GETTING READY FOR THE NEXT LIBERTY LOAN CAMPAIGN

How Geo. H. O'Connor, a Noted Columbia Artist, Figures in the Motion Picture Reels Being Made for Exploitation Purposes—An Attorney and Character Song Artist

In the forthcoming Liberty Loan publicity campaign, there will be used a series of motion pictures that will be displayed in the moving picture theatres throughout the country. This film will contain many features of interest, and

Mr. O'Connor from the committee on public information, George Creel, chairman, and is presented herewith. In addition to Secretary of War Baker and Mr. O'Connor, there are shown in this scene the members of the Liberty

G. H. O'Connor Buying Bond From Secretary of War

will be almost identical with the pictures used in the last Liberty Loan campaign.

Included in these films is one scene entitled: "The Secretary of War Sells a Bond to the Cheerful Subscriber, George H. O'Connor." The "still" of this film has just been received by

Loan committee—John Poole, president, Federal National Bank; Corcoran Thom, vice-president, American Security & Trust Co.; B. F. Saul, president, Home Savings Bank; Eugene Ailes, National City Co.; E. E. Thompson, of Crane, Parris & Co.

George H. O'Connor is an exclusive Columbia artist, whose records have achieved country-wide success. He is the son of an American army officer, and was born, reared and still resides in Washington, D. C., where in his serious moments he is known as an attorney and counsellor at law. He is one of America's most popular character song artists, and his splendid tenor voice is remarkably well adapted for recording.

INVENTORIES AND THE TAX LAW

New War Revenue Bill Will Serve to Make Many Merchants Take Their First Accurate Inventory—Should Help Business

A member of the National Association of Credit Men makes the excellent point that under the new War Revenue Law numerous unskilled merchants will, for the first time, be called upon to make out an income tax report, and believes that this will prove a very direct advantage to business, because merchants who have not been in the habit of taking regular inventory will now be forced to do so. Revenue collectors emphasize the point that every merchant will be expected to take an exact annual inventory, else his tax report can be based on nothing better than guessing, which will not satisfy the Government.

For the benefit of the small merchant who has seldom been called upon to do anything of the sort, the following formula is offered for determining net profit:

A SIMPLE FORMULA FOR DETERMINING NET PROFIT

1. Inventory of Dec. 31st, 1916, at cost.....\$
2. Add Purchases in 1917.....\$
3. Total.....\$
4. Subtract Inventory of Dec. 31st, 1917, at cost.....\$
5. Cost of goods sold in 1917 (item 3 less item 4).....\$
6. Sales in 1917 (Cash and Credit).....\$
7. Subtract item 5 from item 6 to arrive at GROSS PROFIT.....\$

DEDUCTIONS

8. Expense of doing business (Rent, Wages, a Reasonable Salary to Proprietor, Light, Fuel, Taxes of all kinds, except those not on the business, and all other business expenses).....\$
9. Depreciation on Fixtures.....\$
10. Bad Debt Losses.....\$
11. Total Deductions.....\$
12. NET Profit.....\$

PATHE WINDOW HANGER FOR APRIL

Contains All the Latest Hits and Is Most Attractively Printed

The Pathé Frères Phonograph Co., Brooklyn, N. Y., has just sent out to its dealers an attractive hanger featuring the new Pathé records for April. This hanger presents a splendid portrait of Rudolph Ganz, the famous concert pianist, who records for the Pathé library exclusively. The April list contains a new record played by Mr. Ganz, together with an excellent array of popular song successes, latest dance records, Hawaiian records, operatic and classic vocal numbers, standard and sacred vocal records, and instrumental numbers. The artists featured in this list include Claudia Muzio, Paul Althouse and Grace Hoffman.

One of the interesting features of the Pathé list for April is the presentation of a special Pathé Gold Label demonstration record featuring two selections from "Romeo and Juliet," sung by a group of famous operatic artists.

"TALKING MACHINE WORLD TRADE DIRECTORY"

In order to make this directory as accurate and up-to-date as possible, we have listed alphabetically only those concerns whose advertisements have appeared in the TALKING MACHINE WORLD during the past six months. This is the fourth edition of the TALKING MACHINE WORLD TRADE DIRECTORY, each new appearance canceling the preceding list. It aims to answer in a nutshell the prevailing questions of "Where can I get it?" and "Who makes it?"—which questions we are emphatically interested in answering for our readers. No attempt has been made to differentiate between the merits of the various types of machines, records and miscellaneous supplies listed.

MACHINES

- AMERICAN PHONOGRAPH CO.** Offices, 39 Fountain street, Grand Rapids, Mich. Manufactures line retailing from \$40 to \$175.
- ARTOPHONE CO.** Executive offices and factory, 1113 Olive street, St. Louis, Mo. Est., 1915. Manufactures the "Artophone" line, four models, retail prices \$65 to \$150. Also makes electric machines.

The TALKING MACHINE WORLD

For the
makers &
sellers of
talking
machines

Published Each Month by Edward Lyman Bill, Inc., at 373 Fourth Ave., New York, April 15, 1918

The best-known trade mark in the world

“The Victor talking machine’s design, ‘His Master’s Voice,’ has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world’s great masterpieces”—*Collier’s Weekly*.

The Highest Class Talking
Machine in the World

THE INSTRUMENT OF QUALITY
Sonora
CLEAR AS A BELL

THE PRIDE OF POSSESSION

of the owner of a SONORA is one of the reasons for SONORA'S popularity today. Sonora is and has always been recognized as the *quality* instrument. Its makers have done their utmost in helping place the industry on a higher plane.

TODAY phonographs are handled by the most exclusive dealers and appeal to the critical connoisseurs of music. This applies especially to the Sonora which won the highest score for tone at the Panama Pacific Exposition.

POSSESSING many important, exclusive, valuable features and playing all makes of disc records with unequalled beauty, the Sonora is extremely popular. It is well known, well advertised and easily sold.

A Portable in keeping with Sonora quality

The Sonora Portable weighs 15 lbs. complete! It is the most highly developed of all portable instruments and plays all makes of disc records perfectly.

The Sonora Portable possesses to a marked degree the richness and fullness of tone which have made Sonora famous, and it is just the thing for automobilist, vacationist,

soldier, and all who want a light, high grade phonograph. Size 10 $\frac{3}{4}$ x 10 $\frac{3}{4}$ x 10 $\frac{1}{2}$. Double spring motor, polished cowhide leather-lined case.

Write today for an agency in your territory.

SELLS IDEAS AS WELL AS GOODS

The Real Salesman Finds It Difficult to Sell Successfully Anything in Which He Doesn't Believe—The Influence of Quality Products

Many writers who have made a thorough study of the principles of salesmanship have stated that a salesman sells, not goods, but rather his ideas about goods. This statement contains much of truth, and consequently it is a difficult task for a man to sell successfully anything in which he doesn't believe. For this reason many salesmen often refuse to sell inferior products which look good but which possess no solid merit, not merely because of any ethical issue involved, but rather because they fear the effect upon their own sales ability. Articles which sell upon a quality basis rather than a price appeal are as a rule represented by abler salesmen.

There is a reason for this, a reason which applies to the selling of talking machines as well as to the selling of any other line of merchandise. Able, conscientious workmanship in a talking machine inspires support and admiration. This is reflected in the salesman's canvass. The cheaper instrument almost always lacks this element. As a result, even though a competent salesman is selling the line, he cannot put into his sales the same amount of ginger that would otherwise be at his command. His "ideas about the goods" are not of a sort to awaken his enthusiasm.

The customer himself is also unconsciously affected by a quality product. The salesman may sincerely believe that he is selling talking machines merely for the money there is in it, but at the same time he does take a certain artist's pride in handling a first-class line of goods. Then, too, there is much more to be said in favor of goods of quality than for those manufactured with nothing but the price element in view. Quality products offer the salesman opportunities for a much more interesting, much more convincing selling canvass.

Every salesman should endeavor to sell as good a line, within reasonable limits, as is possible. In the long run it will pay better. The very fact that he is handling instruments and records of reputable standing and real intrinsic worth will tend to develop his selling ability, which in turn is the quality through which, in the final analysis, he must score a permanent success in his chosen field.

FIX NEW TERMS ON VICTROLAS

Famous & Barr Co. Advertise New Instalment Schedule for Benefit of Public

ST. LOUIS, Mo., April 8.—The Famous & Barr Co. have been advertising these terms on Victor machines since March 1. The difference in proportion of the prices is, it is explained, to protect somewhat the numbers that are hard to obtain:

TERMS ON VICTROLAS Beginning March 1, 1918

Style IV or IV-A (\$15 or \$20)	\$5	cash, \$5 per month
Style IV or VI-A (\$25 or \$30)	\$5	cash, \$5 per month
Style VIII..... (\$45)	\$5	cash, \$5 per month
Style IX or IXA (\$50 or \$57.50)	\$6	cash, \$5 per month
Style X or X-A.. (\$75 or \$85)	\$10	cash, \$6 per month
Style XI or XI-A (\$100 or \$110)	\$12.50	cash, \$7 per month
Style XIV..... (\$165)	\$15	cash, \$10 per month
Style XVI..... (\$215)	\$20	cash, \$10 per month
Style XVII..... (\$265)	\$25	cash, \$12 per month

The amount in records never to exceed the first payment of cash.

Just what has become of the former Talking Machine Dealers' Association does not appear to be definitely known, but those who were active say that if terms should drop too low again, a meeting will be called. Under the present scarcity of machines, conditions have been very good. The above terms are generally observed by all Victor dealers. Interest is charged on deferred payments.

NEW MULTIPLE DISC MACHINE

Max Krauss, of Philadelphia, Patents a New Talking Machine Designed to Play a Large Number of Records Automatically—Some Interesting Features of the New Invention

PHILADELPHIA, PA., April 2.—Patents for a new multiple disc talking machine have been granted to Max Krauss, of 233 North Alden street, this city. It is designed to play, automatically, a number of disc records in succession or separately if desired. The record need not be shifted after its termination nor turned over to play the second side.

The entire absence of a turntable is noted in this new machine. Twelve records are attached in a vertical position to a horizontal driving axis. The shifting of a small lever from slot to slot places the desired record in playing position. A semi-permanent needle obviates the necessity of frequent needle changes and an automatic stop, also the invention of Mr. Krauss, insures the proper stopping of the record at its termination. It is planned to furnish additional driving axis on which a large stock of records may be kept in a position that they may be easily placed in the machine.

Mr. Krauss is an experienced talking machine mechanic, and familiar with the trade. The first working model of the multiple disc machine, twenty-two inches wide by twenty-four inches deep by forty-eight inches high has already been produced, and Mr. Krauss is proudly showing the product of his brains to all comers. He intends to sell his patent outright or release it on a royalty basis.

HAD A \$3,000 RECORD LIBRARY

Registrar of Rutgers College, Who Died Recently, Left Unusually Valuable Collection of Records of the Higher Class of Music

NEW BRUNSWICK, N. J., April 3.—It is reported that Irving S. Upson, registrar at Rutgers College here, who died recently, left a collection of Red Seal records estimated to be worth \$3,000. The records had been handled very carefully and many of them were as new as could be found in the stock of the average dealer. A peculiar feature was that, although Prof. Upson had several thousand dollars' worth of the finest records in his library, he used for reproducing them a Victor V machine. It is believed that Prof. Upson held the record for the value of a private collection of talking machine records.

TALKER NEEDLES IN GRENADES

According to an American surgeon who is home on furlough, having spent some time in the French army hospitals on the Western front, the Germans at times use some peculiar materials for filling their grenades and trench bombs. He cites one case where a poilu was badly wounded in the arm by a trench bomb. Investigation at the hospital showed that his arm was full of steel talking machine needles with which the bomb had been filled. Just why the needles had been used was not learned, but as the surgeon expressed it, "The Boches must have thought it took a lot of needles to play a French record, judging from the number we took out of the poor soldier."

War Lecture Concerts Emphasize Patriotism and Business

From time to time the talking machine dealers throughout the country give concerts to specially invited guests. These entertainments are given either in the concert hall, with which so many retail establishments are now equipped, or in the store proper. The idea is herewith advanced to put into these highly commendable affairs a war-time note in the form of a short war talk by a man who has been "over there." The present store concerts, which many talking machine merchants are employing as a means of gaining local business and popularity, are a decided success. This being so it will follow that a program including a war speaker will be doubly attractive from the viewpoint of the public.

The war speakers can deliver "close-up" impressions of the great war along the line which has brought Arthur Guy Empey into national prominence. But good speakers, men whose experiences have been every bit as violent as Empey's, can be secured at a very nominal sum. There are a number of booking agencies which, at the present time, are offering speakers at a very moderate fee. As the influx of war veterans continues to grow no doubt speakers may be obtained at still more economical figures. The talk itself need not include any appeal for money for any of the various war charities but can be a newsy discourse about conditions and events on the battle front that will hold and interest the audience.

Any merchant who puts on a program like this is bound to win attention throughout his city and to earn an easy entrance to the news columns of the local papers. Surely no one can doubt but that the United States Government will be highly pleased to see the talking machine industry making it finally possible for

many heroes of the war to convey their stirring messages to the American people. In fact, the nation can feel justly proud of an industry that is striving to inspire the war spirit that will spell victory for the Allied Cause and worldwide safety for democracy.

But aside from the patriotic standpoint a war lecture feature is calculated to do wonders for any retail institution. From an advertising standpoint it can't be beaten, because it is 100 per cent. timely and 100 per cent. full of gripping human interest. The dealer will have a powerful attention stimulant for his newspaper advertising and some real live news for the newspapers besides. He will have the opportunity to definitely identify his establishment as up-to-the-minute in patriotism, and his house will win the resultant favor that is bound to go with such a reputation. Furthermore, he will have an ideal opportunity to introduce selections on the talking machine, on the player-piano and by human musical artists as a very logical part of the program. In fact, he will be showing his wares to the audience, even while rounding out the program in the way that would be duly fitting no matter where the war talk might be given or no matter under what auspices. And at one and the same time he will be demonstrating the close relationship that exists between war and music.

On the whole the war lecture concert idea seems to be one that will materially increase the talking machine industry's contribution toward winning the war, that will provide an income for many of the brave fellows who have done their "bit" on the firing line, and that will do both of these things at a minimum expense and a maximum benefit to the talking machine dealer.

Making the Instalment Sale a Lengthened Opportunity for Cultivating and Holding Trade

"Instalment business is worth more to me than the actual sales it represents," remarked a wide-awake talking machine dealer to *The World* man recently. "Every instalment contract that I accept is scrutinized for possibilities of record business after the account is paid. There are quite a number of these customers who have very little money to spend on records while they are meeting their instalments, but when the payments are completed they could go on paying at the same rate for records. Of course, there are people who can buy all the records they want while paying for their outfits, but these are not the people I refer to just now. My staff has very definite instructions regarding these instalment customers, and acting towards them in a manner that will retain their good will and keep them coming after their obligations have been completed. The cost of getting people to the store is considerable, and it takes a lot of thinking, then why not make the very most of such an asset as regular weekly or monthly visitors?"

"When a customer comes in here to pay an instalment he is made to feel that we are still interested in him. We ask about his machine, how the children like it, if he has heard such-and-such a record, etc., and we make him feel that he can have a record played without being urged to buy it, or to feel that we are disappointed if he doesn't buy it. So many people become resentful while still on your books if

in any sense the attitude of the store or its staff is one of the non-interest. We aim to keep people from thinking we are only interested in their payments and through with them as soon as they are through. Many of our sales have been made to persons whose names were given us by instalment customers.

There are various kinds of service, but service to my mind should have thought of the future. For example, while I may not be here

*"With Every Sale
Must Go the Spirit
of Service, Even
After the Goods
Are Paid For"*

a year from now, I expect to be doing business here for the next forty years. In that case wouldn't I be foolish to ignore the children, even from a cold, unsentimental business point of view? These boys and girls are men and

women before you know it. They are mighty susceptible to being noticed and treated courteously. They don't forget, and other things being equal, when they commence making purchases on their own account the man who respected their childhood personalities will get the preference.

"Nearly a year ago an elderly gentleman came in here and bought a high-priced outfit. I had not seen him before, and wondered why he came. Since then I have become acquainted with him and learned that he came to reside with a married son, whose youngsters had some reason or other to feel kindly toward my establishment. The old gentleman said the children were responsible for his coming to the store. I could tell you quite a lot about the results from this kind of service."

"One thing to be remembered, however, is that with any kind of sale should go the spirit of service, service that will continue even after the goods are paid for. Every sale means a fresh opportunity to make friends for the store, friends that may develop into customers later. The instalment sale means a lengthened opportunity for making and cultivating new friends for business inasmuch as business relations continue over several months or years as the case may be. These opportunities should not be lost, therefore, through lack of interest or careless neglect. They represent the most valuable assets of business."

ELABORATING THE TALKER CABINET

Some Views of Interest From the Standpoint of the Veneer Specialist

The increasing desire of manufacturers of talking machines to get away from the ordinary, or commonplace, in designing their instruments, is the subject of general commendation among not only the members of the general trade and the purchasing public, but in the woodworking trades they are following these developments with exceeding interest, and it has been the subject of considerable notice. For instance, that bright and always interesting publication, *Veneers*, in a recent issue says:

"The idea of elaborating the talking machine cabinet has been with us for some time. Perhaps it made its appearance upon the scene a little too early and that held it in check a while. Anyway, while some of the first ideas of this kind were elaborate enough to be satisfactory to the artistic instinct they did not at first prove very satisfactory as a business proposition."

"Perhaps it was mainly because the talking machine itself was something of a novelty in

its new role as a dispenser of music and this novelty had to wear off before the public would give thoughtful attention to artistic departures in cabinet design, especially if those departures involved the outlay of materially increased sums of money. There were first the plain box-like cabinets, then a steady enlarging of the artistic idea in connection with these until some have elaborately-faced box cabinets, offered at somewhat increased prices.

"These are still popular, but notwithstanding this, other ideas are making their way now in a manner suggestive of possibilities that may assume magnitude in the near future. Plainly, too, manufacturers are casting about for patterns and ideas which will offer novelty of design as well as elaboration. Some have followed what we might term natural ideas associated with music, that of patterning after pianos; some have turned toward the idea of embodying the designs of familiar articles of furniture into the case of talking machines, and perhaps eventually we will settle down to a series of recognized design aside from those, or rather in addition to those of the regulation cabinet."

"The interesting thing about it to the veneer

manufacturer is to follow the tendency and see what it may mean in the way of new departures or new requirements for veneer and built-up work used in connection with these machines."

PUSHING "FIRST AID" FRENCH

Victor dealers generally, and particularly those located in the vicinity of military encampments, report an unusually strong demand for the Victor "First Aid Course in French," all contained in three records and a text book. The recent booklet issued by the Victor Co. on "How to Demonstrate the First Aid Course in French" has been put to excellent advantage by salesmen generally, enabling them to meet intelligently questions that would ordinarily tax their ingenuity.

NEW QUARTERS IN DAYTON, O.

The Superior Phonograph Co., which handles a complete line of Superior phonographs, as well as the Steger line of pianos and player-pianos, are now settled in attractive quarters in the new Mercantile Building on South Ludlow street, near Fourth, Dayton, O.

HONOR ST. PATRICK IN CLEVELAND

Collister & Sayle Co. Arrange a Most Attractive Window Display for Erin's Saint

CLEVELAND, O., April 2.—One of the really effective window displays in honor of St. Patrick in this city was that at the store of the Collister & Sayle Co., Victor dealers, 252 Su-

An Attractive St. Patrick Day Window

perior avenue, and which is shown herewith. Shamrocks, green ribbon, Irish flags and records of Irish songs predominated in the display.

The floor of the window was covered with large squares alternately green and white. On each green square was placed an appropriate record, and the white squares were set off with a shamrock in each corner. In the center of the display was a large harp, backed by an Irish flag, kept waving by an electric fan. To carry out the scheme even the Victor dogs in the window were decorated with green ribbons about their necks.

According to the manager of the store a record was kept playing for ten minutes, in which time 574 people passed the store, 185 "rubbered" and forty-two stopped. It was not learned how many of those who stopped were Irish.

ATLANTA CONTINUES TO BE A VERY BUSY TRADE CENTER

Some Dealers Getting Machines in by Express—Pathé Line in Haverty Chain of Stores—Jascha Heifetz a Big Attraction—Out-of-Town Business Unusually Good—Prosperity Prevails

ATLANTA, GA., April 8.—Trade conditions in this city are most satisfactory in every respect, and the prospects could hardly be better. A recent visitor to the wholesale department of the Columbia Graphophone Co. was George W. Hopkins, general sales manager, who expressed himself most appreciatively regarding the progress of the local branch during the past twelve months. Manager Terhune accompanied him on a call on the Columbia local dealers, and this visit was productive of excellent results in the exchange of ideas and new friendships.

A happy incident during Mr. Hopkins' visit was the distribution of bonus checks to Columbia employes.

I. M. and R. D. Bame, Victor and Sonora dealers, say that they have been receiving express shipments from the Sonora Phonograph Corp., so active and insistent has been the demand for Sonora goods, from \$100 up. It speaks well for the enterprise of the Atlanta dealer, and for the Sonora Co., that they are willing to stand the expense and effort to haul their stock by express the nine hundred miles from New York to Atlanta in order that their customers might not be disappointed.

The Haverty Furniture Co., having recently installed the Pathé line in all their furniture stores, from Charleston, S. C., through Georgia, Alabama and Tennessee to Texas, found it necessary to have some one from the Pathé Frères Co. visit them to explain the details of operation of the Pathé, and incidentally to be present at their Pathé opening and "boost" sales. J. F. Collins, sales manager, accordingly made the trip to Atlanta, which city was used as a base point to radiate to the other cities in the Haverty chain of stores.

With his co-operation and assistance the sale of Pathé goods was most successful, the Atlanta store being sold out on the \$50, \$75 and \$100 models in two days after the opening, and additional large orders were placed at once.

Jascha Heifetz, Victor artist, was recently in the city, and entertained a large and cultured audience at the local auditorium.

The Cincinnati Symphony Orchestra, which organization makes records for the Columbia Co., gave a concert on March 26 in the city, and every one who heard them was delighted with their performance.

The Edison line is still selling well locally. The increase in prices, which took place January 1, seems not to have caused any cessation in the demand, nor to form any impediment in closing a sale.

All local Victor dealers are doing a most satisfactory business, and the demand for Victor goods exceeds the supply. The average purchaser who formerly bought a 75-cent record occasionally, now buys \$5 worth, and more frequently than formerly.

It has gotten to be quite usual for a customer from out-of-town to drop in one of the talking machine stores here, and buy a \$160, \$215 or higher-priced instrument, and a substantial selection of records, pay cash in full and have the goods shipped by express to his home town. This kind of business can be traced directly to the high price of cotton, and the large amount of money in circulation. The South, as a section, has more money than in fifty years, and the eyes of the nation are turned this way, both as a land of commercial opportunity, and as a place to buy animal products and foodstuffs.

Let NYACCO Solve Your Record Album Problem

With These Two Dependable Albums

No. 1012

Our No. 1012 (see illustration) is the strongest album obtainable to retail at a moderate price. Has heavy green envelopes, interlocked so that each envelope forms an individual container. Both ends are finished with brass metal tops.

The NYACCO Metal Back Quality Album (the only genuine metal back album being manufactured) has a binding which consists entirely of one piece of metal, and envelopes of heavy fibre green paper, re-enforced with strips of flexible canvas; the result being a practically indestructible album.

NEW YORK, APRIL 15, 1918

BUSINESS in the talking machine industry, broadly considered, is in excellent shape despite innumerable annoyances in the way of a shortage of machines and records, due to the unusual conditions prevailing. Meanwhile manufacturers, jobbers and dealers are doing their best to fill all demands with the utmost available despatch. Fundamental conditions are healthy, and there seems evident an increased buying power in certain sections of the country, due to the large distribution of money among the working people who are earning unusually large wages. They are buying talking machines and records of good quality, and the great problem of the day is to produce and distribute sufficient stock to satisfy the demands.

With this month we enter the Spring campaign for business. The bleak, dismal, wintry days have at last been replaced by sunlight and brightness, and this seasonable change is undoubtedly having its influence on the mental viewpoint of everyone.

A few weeks ago there seemed to be an undercurrent of dissatisfaction, or uneasiness—a lack of faith in the future; in contrast to this we find to-day a better feeling prevailing—one of hope, trust and confidence.

This is the right viewpoint. The man who sees disaster ahead, either in business or in war, is not a good American. It is the time for courage, energy and enterprise, and there should be no harboring of doubts as to our success as a Nation. It is the time for the booster, and not the knocker. We must work to help the business progress of the country by being optimistic in our opinions, and not give way to an indulgence in doubts or uncertainties.

There is a disposition at times among business men to run to extremes of either over-enthusiasm or the gloomiest "gloom." When the latter prevails the croaker or pessimist rides his hobby horse to the danger of the community.

To-day we are in the midst of serious times, it is true, but it is the period when strong men—unselfish, broad-visioned, and able men are needed, when reason and sound sense should dominate all our movements rather than whim or caprice. Whether in war or in business great victories can only be won by good generalship, backed by men, money and the support of the American people. The talking machine trade has always been noted for its go-aheadness, for its freedom from harmful mercantile traditions, and it is going to face the future with courage and confidence and win new triumphs.

MEMBERS of the trade who have recently visited leading cities in the South are quite enthusiastic over the prospects for an enlarged volume of business in that section of the country. The Southern people have more money to spend to-day than ever before. They have a tremendous purchasing power, due to the billions of dollars that have reached them through their efforts in the past year in agricultural activities.

The Southern people are turning their eyes northward for all those home furnishings that appeal to those esthetically inclined, and naturally they are buying talking machines, player-pianos, and other essentials to the enjoyment of music in the home.

This prosperity in the South is not confined to the white people, but throughout Louisiana the colored people who have small farms have got prices for their cotton and other products which have enabled them to pay up any indebtedness on their land, and with the surplus they are buying talking machines and records in goodly numbers.

The purchasing power of the people in the South is a factor worthy of consideration, for the laboring people who are working in the factory centers are earning such large wages that they are manifesting a desire to own a musical instrument of some kind.

It would be invidious, however, to make distinctions when speaking of the trade in the South, for the demand exists among all classes and conditions of people, and it is steadily growing. It is a source of satisfaction that the South is coming into its own in an industrial and agricultural way.

THE great campaign for the successful flotation of the Third Liberty Loan is now under way, and every one in the talking machine industry is planning to do his level best to have this Three Billion Loan oversubscribed. We now have an opportunity to express our confidence in the Government and in the boys at the front, who are fighting as truly for human rights, and the tearing down of autocratic rule, as did our forefathers during revolutionary days.

Every talking machine man can "do his bit" not only by subscribing for bonds but by utilizing his windows for poster display, and by sending out informative literature in his letters, in fact, he must consider every available means to exploit and make successful this Third Liberty Bond campaign.

The military situation at the front has now assumed a critical stage, and every man at home must consecrate himself to the service of the Nation in some one way or other. If we cannot fight we must help in a monetary way toward the maintenance of our forces; therefore let us devote our most enthusiastic efforts to making a new record in this great campaign.

IN the making of instalment contracts during the period of the war, piano merchants would do well to be guided by the provisions of the Soldiers' and Sailors' Civil Relief Act passed recently, and thereby avoid the chance of facing a loss that may be guarded against by the exercise of foresight. Although the act is calculated to protect the soldier or sailor while still being fair to the merchant, in deferring but in no sense canceling the obligation, the dealer selling on instalments can, unless he watches things carefully, tie up considerable money in instalment accounts that under the law need not be met until after the war, which at best is rather an indefinite length of time.

It has been suggested by a prominent attorney in the trade that where practical the wife or some person other than the soldier, or likely-to-be-soldier, be called upon to execute the contract. There will no doubt be numbers of unscrupulous people quick to take unfair advantage of the new law with fraudulent intent, and special efforts should be made to guard against this class.

IN co-operation with the Music Industries Better Business Bureau, located in Milwaukee, and whose activities have on previous occasions been mentioned in 'The World', the National Vigilance Committee of the Advertising Clubs of the World has been quite active recently in proceeding against "gyp" dealers in various parts of the country—in other words, dealers who make a practice of advertising talking machines and records

from private homes, and ostensibly at a sacrifice, frequently making misleading statements in their advertising to forward their ends. The Vigilance Committee already sent out one bulletin regarding the operations of a "gyp" dealer in Chicago, who uses the name of a prominent make of machine to promote the sale of another much cheaper machine for which he had the agency.

The Better Business Bureau at the present time is making a special drive against the "gyp" operations and has solicited the assistance of legitimate dealers in all sections in an endeavor to rout out the evil. When members of the trade learn of the operations of irresponsible individuals they will be doing themselves a service by investigating the methods employed by the advertiser, and placing the information thus obtained before C. L. Dennis, secretary of the Bureau. The complaints are handled promptly, and in a surprising number of cases the activities of particular "gyp" dealers are curtailed or stopped entirely by appealing to the newspapers to exclude such advertisements, and by other means, without going to court.

Every machine sold by a "gyp" dealer not only takes a sale away from a legitimate merchant, but by supplying the purchaser with a machine of inferior quality shatters his belief in the talking machine as a whole.

WORKING steadily, energetically and persistently to sell what stock he has on hand or can get, instead of sitting around and waiting for machines and records for which there is an unsolicited demand, is the system that is going to keep the average talking machine dealer in business during these war times. The overhead expenses of his establishment are going on just the same, whether he gets in new stock or not, and he cannot afford to sit back and wait for something to happen. From present prospects, any improvement in the present situation will be gradual. Even when the labor and transportation problems ease up they will not do so with a rush, and the retailer must make up his mind to adjust himself to conditions. The situation looks blue and hopeless only to the man who has plenty of time to sit and think. The fellow who is too busy to stop and worry is going to keep his business in fairly good shape, even if he doesn't make as much money as in any previous years, and it has yet to be proven that 1918 in the long run is not going to be a good, big year for talking machine dealers. It depends largely upon the individual whether his business goes forward, stands still or slides back.

JUST at the present time members of the trade in all sections of the country should keep a close watch on the various State legislative bodies with a view to checking without delay measures that may prove inimical to the interests of the trade.

In normal times there are always a few bills introduced

TO OUR SUBSCRIBERS

If your copy of The Talking Machine World does not reach you on publication date, or a few days thereafter, do not assume that it has gone astray. The existing railway congestion has had a serious effect on the handling of mail, particularly second class matter, and brought about unusual delays. Kindly wait a few days longer than usual before writing to us, as the paper will probably arrive safely.

that are calculated to harass the trade in some way or another, even though such intent is well hidden. Quick action is generally quite effective in disposing of such measures, but under present conditions it must be borne in mind that many legislators are only too quick to hide behind the shield of patriotism, and to defeat their object, without creating the wrong impression, presents a serious problem for the business man. Bills providing for special taxes or license fees are particularly numerous, and likewise particularly dangerous, for anything that looks as though it would bring revenue into the coffers of the State or the Nation finds favor with law-making bodies, regardless of whether the burden it places on one particular line of industry is just.

There was introduced in Congress recently, by Representative Cary, of Wisconsin, a bill which provided that all merchants selling goods on instalments should pay a license fee of \$200 and should give the customer not only a receipt for his payments, but a statement showing the actual cost of the merchandise upon which a profit of not more than 30 per cent. was to be allowed. The bill applied only to the District of Columbia, but instalment interests from all sections of the country were quick to realize that the bill was most pernicious in its provision, and, if passed, was liable to be accepted as a model by various State legislators. The opposition by the various interests, including both talking machine and piano men, was, therefore, very strong and is believed to have killed the measure.

Another bill in the New York Assembly, for instance, provided for an annual license fee of \$2 on all automatic instruments, and was so worded that it could be construed to cover talking machines and player-pianos. It is estimated that the revenue from those instruments alone would amount to practically a million dollars annually, and it was strongly hinted that the whole idea back of the bill was to provide a score of jobs for political claimants who would be charged with carrying out the provisions of the bill. Even the most harmless looking measure should be scrutinized for the "joker," and the simpler the wording of the bill the closer it should be investigated. When questionable measures are discovered the organized forces in various branches of the trade will be quick to take any action necessary either to defeat the bill, or have it amended as may be deemed desirable.

NO STRING TO THIS

Sidestep it, perhaps, on April first only. But on ALL OTHER days of 1918, pick up the full pocketbook of Victor record profits.

These five words mean what they say:

Pearsall Service for Record Profits

A brand new list of the best music in the world is at your service every month for increasing profits. The complete Victor catalog numbers thousands of selections that you CAN put into the homes of Victrola owners.

Edison Message No. 20

Forging the Third Link

On April 6th we began forging the third link in the chain that will hold the dogs of war forever in check. And the business end of that chain is going to be in the hands of the people in all countries, and not in the hands of a self-chosen few who can hurl the world into a maelstrom of blood and fire whenever it suits their fancy. Already the metal of resolve has been heated white-hot in the furnace of patriotism and every dollar invested in a Liberty Bond is a hammer-blow that will help weld an indestructible bond of world control among liberty-loving peoples.

Edison dealers, by our contributions to the Third Liberty Loan let us show the world, and especially our enemies, that America is rapidly getting into her full, irresistible stride, and

Let them come from the east,
Let them come from the west,
From Maine to the Philippines.
From the frosty north,
From the balmy south,
And all of the in-betweens.

Let us renew our pledge of allegiance to the flag and reconsecrate our patriotism by doing our utmost to make the Third Liberty Loan a landslide that will crush militarism out of the world forever.

The Redistribution of Records, One of the Answers to the Present Shortage Problem

Those members of the trade who have made a close study of the present record situation and means for offsetting in some measure the effect of the shortage declare that considerable relief can be obtained by an intelligent system of redistribution of records among the dealers themselves, as well as by exploiting consistently records known to be in stock, or obtainable from wholesalers.

The plan for exchanging surplus records is not by any means a new one, although it has not been carried out to any great extent in the retail field. The Jobbers' Association has had such a plan in force for a number of years among its members, various local associations of dealers have attempted something of the sort, and here in New York the Talking Machine Men, Inc., have a committee charged with the work of gathering lists of surplus records from dealers and bringing them to the attention of other dealers who have a demand for such records.

Under normal conditions there was not a great deal of interest taken in plans for exchanging record stock, there being a sufficient number of popular records to keep business going, the surplus stock being looked upon as one of the necessary burdens of the trade. Just now a surplus stock is a heavy load to carry, especially in view of the fact that such records may be used to advantage by a dealer in some other locality.

As an instance in point: a New York dealer who found it impossible to get locally certain McCormack and light opera records and other good selling numbers for this section, learned by accident that a Western dealer was overstocked on many of the records for which the New York man had a general demand. It did not take long to negotiate the transfer of those particular records from the West to the East, giving the New Yorker something to do business with, and giving the Western dealer cash instead of surplus stock. It is very probable that many other instances along the same general lines could be cited.

There are very few records that sell equally well in all sections. As a matter of fact the demand is found to vary in various districts even in the confines of one city, depending largely upon the character of the population. If surplus stocks of records can by any means be so

redistributed as to place them in sections where they are most likely to be sold, then many members of the trade will be able to cut down the amount of money they have tied up in slow moving stock while giving their fellow dealer an opportunity to do some business. In other words, all hands will benefit.

One local dealer suggests strongly that effort be made to establish a series of central clearing houses in the various cities to act for the dealers in the various sections, and endeavor to make the most out of present record stock on the shelves.

"A central clearing house," said the dealer,

"Why Not Central Clearing Houses for Surplus Records to Offset Shortage?"

"could be maintained at a small annual expense of, say, \$10 per member, and if properly conducted should bring back to each individual represented profits of many times that amount. There are enough established associations of talking machine dealers in various cities to provide foundations upon which to build such clearing houses. The matter will have to be taken seriously, however, by the majority of the dealers who participate, to make it worth while.

In the first place, arrangements should be made for the filing of weekly reports by every member, showing the records of which he has a surplus, as well as the special records of which he is in the greatest need. Salaried employes going over and comparing the lists could very easily tell the individual dealer where his surplus could be disposed of or where he could obtain certain desired records.

"The time is past when the average dealer

can sit tight and let his surplus stock accumulate in anticipation of being able to take advantage of a record exchange proposition from the manufacturer. Such a course may be excusable when the dealer is doing plenty of business with new records, but when he is not getting the new records every dollar's worth of stock on his shelves represents a real loss in tied up capital and potential profits.

"The clearing house suggestion, although offering quite a number of details to be worked out, nevertheless seems to point the way to providing some way from the present record situation. It will not cure it by any means, but anything that will help is worth considering with all seriousness."

There are already a number of wholesalers who themselves are conducting clearing houses for the benefit of their dealers. The wholesale salesman being in close touch with the dealers, knows just about what records certain retailers are overstocked with, and can, and does, in many cases, arrange for the transfer of such records to some retailer who can use them to advantage. Such instances, however, are few and far between, and it seems the dealers themselves should make some attempt to help themselves.

Wholesalers, too, have endeavored to assist the dealers by supplying each week lists of from a half dozen to twenty records that are in stock with the suggestion that such records be specially featured during the week. It gives the dealer something tangible to work on and he knows that any demands he may create for those records through special efforts can positively be met.

One wholesaler has gone to the extent of taking a page advertisement in *The Talking Machine World* this month to call the attention of dealers to a list of desirable records he has on hand and is able to supply.

This action of the wholesaler is simply in line with the arguments that have been put before the trade for months past. In short, now is the time to concentrate on selling stock on hand or that can be obtained, instead of bemoaning the loss of sales of more popular machines and records. As a matter of fact, summed up, real salesmanship consists of selling the customer what you have to offer, rather than what he is particularly anxious to buy.

EFFECTIVE GALLI-CURCI DISPLAY

People's Outfitting Co., Detroit, Takes Full Advantage of Appearance of Noted Soprano in That City—Record Sales Stimulated

DETROIT, MICH., April 8.—The talking machine department of the People's Outfitting Co. took full advantage of the recent visit of Galli-Curci to this city by arranging an elaborate window display featuring the noted soprano and her

A Classic Galli-Curci Window

records, together with four other Victor artists of renown. The figures of the artists, including Farrar, Caruso, Tetrassini and Harry Lauder, were life size and plainly labeled. A special list of records by Galli-Curci were shown on both sides of the window, and it is reported that the display proved most effective in stimulating the sale of records of all types.

IMPORTANCE OF SMALL DETAILS

Little Things Often Determine the Success or Failure in the Marketing of a Product

Seemingly insignificant details are often most essential to the success of a business or a product, and it is the business man who studies these small things who is apt to score a success in his sphere of activity. The fact that little things often determine the success or failure of a product was emphasized recently by George W. Hopkins, general sales manager of the Columbia Graphophone Co. He said that in marketing a high grade of candy it was discovered that the public will not buy candy packed in green colored fancy boxes. Just why this is so he could not say. Possibly the color of the package suggests arsenic, a poison. But whatever the reason, the company found after spending several thousand dollars that green boxes killed all chances for making the candy popular. When pink was substituted sales increased in a most satisfactory manner. Biscuit manufacturers have learned from sad experience that round packages, no matter what the character of the biscuit may be, do not appeal to the public. Square shaped, or oblong boxes, on the other hand, immediately find favor. As fully 75 per cent. of all goods are sold on their appearance, it behooves manufacturers to see to it that products are put up in packages that have an attractive eye appeal.

There are better ways to do everything now accomplished. The simplest device can still be simplified; the speediest engine quickened; the sanest system convicted of waste.

LIVELY BUSINESS IN GRAND RAPIDS

Local Branch of Brunswick-Balke-Collender Co. Reports Strong Demand for Phonographs

GRAND RAPIDS, MICH., April 2.—The local office of the Brunswick-Balke-Collender Co., through C. W. Kalder, reports that the phonograph business of the company in Michigan, Ohio and Indiana is unusually good. Excellent results were obtained at the National Furniture Show held in January, which was attended by a number of Brunswick dealers, and the volume of business booked for that month alone was greater than for any four previous months.

Several new dealers have been signed up recently, among them being the J. E. Anderson Co., Saginaw, Mich.; W. A. Stilwell, Big Rapids, and the F. N. Arbaugh Co., Lansing. The latter concern is one of the largest department stores in the State, and their phonograph department is a new venture.

The local Brunswick headquarters was recently called upon to ship one of their \$1,500 machines to Fort Worth, Tex., by express, the expressage alone being about \$50.

GIVES VICTROLA TO SERVICE CLUB

The Henry F. Miller & Sons Piano Co., in Portland, Me., recently donated a Victrola to the National Service Club, recently opened in that city to provide entertainment and comforts for the soldiers and sailors.

ADA JONES DENIES BEING DEAD

Prominent Talking Machine Artist Sets Latest Rumors of Demise at Rest

Ada Jones, like Mark Twain, objects to being reported dead, and the veteran talking machine artist was quick to deny the latest rumor of her demise in the following letter:

"I have often been reported dead. I even have a double who has been singing throughout the country, using my name, as 'Ada Jones, the phonograph artist.'

"I have just been out with a troupe of phonograph artists giving several entertainments where I was introduced as 'Ada Jones, the mother of the phonograph.' Which made me feel very ancient, I assure you. Cordially yours, Ada Jones, Long Island."

NEW BOOTHS FOR HOMER KLOCK CO.

The Homer Klock Piano Co., which handle the Columbia and Sonora machines and records in Stamford, Conn., have just installed some very attractive booths finished in white enamel, for the purpose of demonstrating their machines and records, which add quite materially to the facilities of this establishment as well as to the appearance of the store. This company are quite enthusiastic over the line which they handle and report an excellent business so far this year.

This is no time for being just half a man—try being a man and a half.

When a dealer gets an intelligent prospective customer to the point where he will listen to a machine play, nine times out of ten he will select a

SCHUBERT PHONOGRAPH

Schubert dealers know this.

We'd like an opportunity to prove it to the satisfaction of every other dealer in the country.

Why Not Make a Vigorous and Successful Drive On the Sale of Foreign Records

The talking machine dealer in the average city in the United States, especially if it happens to be an industrial center, who is not making a consistent and energetic drive on foreign records is neglecting a most important feature of his business. In some instances it would be just as logical for him to forget to call attention to the popular records of the day, or the records of the world's famous artists.

There are enough facts and figures to prove that the ordinary mortal has but a faint conception of the extent of the foreign and semi-foreign population of this country. There are cities in the West where over 65 per cent. of the population is foreign born, or the children of foreign-born parents. No matter how thoroughly Americanized these foreigners or sons of foreigners may be, there is naturally a strong sentimental regard for their native land—a sentiment to which music, and particularly folk songs of that native land, appeal with particular strength.

There are a number of prominent houses, Grinnell Bros., in Detroit, for example, who do pay particular attention to foreign record business with gratifying success. It means work

and consistent effort to do it successfully. Special advertisements should be run in foreign language newspapers in order to reach the thousands, or even millions, who still demand the

popular things in their native tongue, although newspapers in English can also be used to distinct advantage—those who combine a thorough knowledge of the English language with the sentiments of their native land.

In the great majority of cities there are foreign colonies, the boundaries of which are wonderfully distinct. The emigrant who lands in this country naturally seeks out those who speak his own language, and practically to some extent in this new locality the mode of living to which he is accustomed. Once having found the colony he either remains in it or else keeps in close touch with his people. This habit of colonizing makes it particularly convenient for the talking machine dealer.

Foreign records, even though carefully listed in the catalogs and stocked on the shelves, do not mean anything to the dealer's business unless he brings them to the attention of those most likely to be interested, and there are many owners of talking machines who have supplied their record wants from the regular catalogs without having learned that there may be particular gems in their native tongues simply awaiting their order.

A successful foreign-record business cannot be handled in a haphazard manner any more than the regular record business can be handled in that fashion.

ISSUE LIST OF RECORD CLASSES

Various Types of Victor Records, Placed in Regular Order on Special Card by Thos. Goggan & Bro., Proves Big Sales Aid

Thos. Goggan & Bro., Victor wholesalers of Houston, Tex., recently brought out a welcome help to their dealers and salesmen in the form of a framed card bearing a list of the types of records put out by the Victor Talking Machine Co. The different classes of records are arranged in alphabetical order, from band records, through coon songs, dance records, humorous talking records, minstrel records, solos, trios, instrumental, down to yodling records. The instrumental list proves particularly valuable, because it enables the salesman to call the customer's attention to solos on instruments which he did not know had ever been recorded, such as the ocarina, etc.

The list is in large type, and is to be hung in each demonstrating room. By referring to it both the salesman and the customer can quickly find the sort of records that will make the strongest appeal. It saves going over the

entire catalog and narrows the salesman's work down to pleasing the customer with records of one or two particular classes, which the customer himself can select from the list. This is a sales help of real merit.

F. W. CORLEY IN AVIATION SERVICE

RICHMOND, VA., April 3.—Frank W. Corley, who for some years maintained and developed the successful wholesale Victor business of the Corley Co., Victor distributors here, went into the Naval Aviation Service a couple of weeks ago. During Mr. Corley's absence, Fred R. Kessnich, who has long been connected with the company, will look after the Victor business of the company as wholesale manager.

NEW \$300,000 CORPORATION

The Commercial & Postal Phonograph Co. has been incorporated under the laws of Delaware with capital stock of \$300,000 to engage in the manufacture of sound producing machines. The incorporators are W. I. N. Lofland, George W. Morgan and Frank Jackson, of Dover, Del.

NEW ASSOCIATION IN DALLAS, TEX.

Local Music Trade Organization Elects Officers and Names Committees

DALLAS, TEX., April 3.—The Dallas Music Trades Association recently organized by the piano and talking machine men in this city has selected the following officers and committees: President, Robert N. Watkin, of the Will A. Watkin Co.; vice-president, J. C. Phelps, of the Field-Lippman Piano Co., and secretary and treasurer, B. F. Hollingsworth, of Thos. Goggan & Bro.

B. F. Gupton, of the Goettinger Co., and B. W. Gratigny, of the Bush & Gerts Piano Co., together with the above officers, were made members of the executive board.

D. L. Whittle, of the Western Automatic Music Co., was made chairman of the membership committee.

C. H. Mansfield, of the Edison Shop, was made chairman of the press committee.

Fred Giebel, of Sanger Bros., was made chairman of the always important entertainment committee.

THE BROOKS Automatic Repeating Phonograph

Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—The Phonograph Sensation of the Age

MR. DEALER:—

You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with Instruments retailing for \$300.00 and up.

In tone qualities it is unexcelled by any talking machine on earth! In mechanical equipment and automatic features it is years in advance of its nearest competitor. We have been building talking machines for three years—last year our sales doubled every four months. The BROOKS DEALER has no competition. The machine creates interest and discussion—it is self-advertising. Send for particulars, terms, prices. Do it Now.

BROOKS MANUFACTURING COMPANY
Talking Machine Dept. - SAGINAW, MICH., U. S. A.

View of Controlling Dial

This dial sets, starts and stops the machine. Will play any desired number up to nine or continuous.

Simplest Machine to Operate

Instructions

Set the needle at the inner edge of record cutting and then move pointer to the figure designating the number of times you wish record played.

That is all. You can now forget the machine. When the record has been played as many times as set for, the machine will stop automatically with the tone arm suspended in the air above record.

Giving the People Artists They Want

Educating the people is all right—in school. But grown-ups usually know pretty well what they want in music. And Columbia gives them what they want.

Nora Bayes, for instance. Nora Bayes can get more over to more people in one song than any other American comedienne. What of that? Well, Nora Bayes now sings for Columbia exclusively. Columbia just naturally had to have her. And she just naturally had to come to Columbia.

And Nora Bayes is merely one more in Columbia's Milky Way of Stars. There are the Chicago Symphony Orchestra, Percy Grainger, Al Jolson, Prince's Band, Geo. H. O'Connor, Samuel Ash, Robert Lewis, Arthur Fields, The Peerless Quartette, Campbell and Burr, Oscar Seagle, Henry Burr, Harry C. Browne, Mery Zentay, Nellie Hoone Wetmore, the Columbia Stellar Quartette, Louise, Ferera and Greenus, and the Paulist Choristers of Chicago.

These aren't all the stars in Columbia's Milky Way of Stars. These are merely those shining in its May List of Records.

Nor are these all the world-wide known stars Columbia employed to give the people what they want for just one month. For those eagerly waiting for more, Billy Williams and Harry Champion, of English music hall fame, contributed, and Thornton W. Burgess supplied some more of his Bedtime Stories for children. Some Milky Way for Just May—what?

Giving the People Records They Want

No question about the first two records by Nora Bayes. There'll be a public scramble for "Some Day They're Coming Home Again" and "I May Stay Away a Little Longer." They add something to even the laurels of Nora Bayes.

There's always a scramble for Al Jolson's new records, and he has a song in Columbia's May List that seems made to order for him. "Wedding Bells (Will You Ever Ring for Me?)" is already popular in the big cities where Al Jolson has sung it. Now that it is recorded, it is bound to sweep the country.

Percy Grainger, the "Musical Viking," brings his power into full play in Chopin's Polonaise in A-Flat Major.

Samuel Ash has made many a song popular. In "My Sweetie" he has come upon one so catchy that it is likely to make him more popular.

Oscar Seagle has sung "Keep the Home Fires Burning" and "Pack Up Your Troubles in Your Old Kit Bag and Smile, Smile, Smile," two of the big war songs, so that more may enjoy them.

And there are marches for the martial and dance-records for the dancers and talking records for those who want their vaudeville on tap at home, and a great variety of more music of sorts the public has shown that it wants. Columbia's May List is a whopper!

Columbia Grafonola Columbia Records

Columbia
Grafonola
Price \$45

Giving the People Grafonolas They Want

When customers enter your salesroom, give them prompt, courteous individual attention. If they are left to themselves too long they may wander out.

Attend them promptly. Try to discover tactfully about what priced instrument they can afford to buy. Show different Grafonolas within a reasonable range around that price—but never so many different models that the customers are merely confused and cannot decide on any instrument.

Ascertain as quickly as possible the kind of music a customer likes—and then play that kind on the Grafonola that seems to make the best impression. Of course you will play any record the customer wants on any Grafonola.

Give customers all the time they need to decide, but good salesmanship will help them decide before they leave the store. Good salesmanship means in a word selling the customer the Grafonola he wants at the price he ought to pay.

Columbia Graphophone Co.
Woolworth Building, New York

Columbia
Grafonola
Price \$110

The Result of Giving People What They Want

People who get the records they want by the artists they like and play them on the best Grafonola they can afford to buy are Columbia fans for good and all.

Columbia fans are steady customers for Columbia dealers. It is worth taking time and trouble to see that your first sale makes a permanent Columbia fan of your customer.

By the way, Columbia makes records in 30 different languages, all made by native artists under direction of masters of each tongue. Are you making the most of our many records in foreign languages?

A small investment—you have a full catalogue department in the two or three languages commonest in your territory—and the turnover is quick and highly profitable.

Where not already actively represented, Columbia wants a few more dealers in their International records. Get into this fine field among the early ones and reap a tidy profit. People of foreign birth—well, you know what fans they just naturally are about music.

Columbia Graphophone Co.
Woolworth Building, New York

THE MISSION OF THE VICTROLA IN THE PRESENT WAR

Through the Medium of the Talking Machine Our Fighters Are Receiving the Benefit and Solace Which Music Alone Can Bring—Educational Records Proving of Great Value

Somewhere behind the battle line in Flanders, Walter R. Creighton, son of the late Lord Bishop of London, wrote to Maud Powell: "I have just been listening to you playing and I wanted to write and tell you of our gratitude," in which short sentence he summed up a condition which will be met by every American soldier who goes abroad, as well as by the relatives and friends who stay at home.

Even in war we do not live by bread alone, and that which can bring shaken men back to self-respect, to decency and a determination to "carry on" is a thing the value of which cannot be computed in dollars and cents, says the Victor Co. in its March record supplement.

Apart from their purely military equipment our men will experience three essential needs, if they are to be preserved through the stagnation of trench warfare. Those three essentials are food, shelter and recreation.

Rudyard Kipling knew what music can do to stabilize the morale of slaughter-wearied men when he wrote the "Song of the Banjo." "You couldn't pack a Broadwood half a mile—you mustn't leave a fiddle in the damp." These lines are as true to-day as they were when Kipling wrote them.

Young Creighton heard Maud Powell play out there on the edge of "no man's land," because she has made records for the Victor Talking Machine Co. and because that company has made it possible for human beings everywhere to enjoy the solace and the inspiration of good music.

An instrument which requires somebody to play it is useless except when some such person is at hand. Every one of the warring governments has made special and strenuous efforts to supply music and entertainment for its soldiers, but human needs do not keep regular hours. A musical instrument which can be operated by anyone at any time, and which, like Kipling's banjo, can, if need be, "travel with the cooking pots and pails," performs a service obtainable through no other agency.

The Victor Co. has a picture of a gigantic "Anzac"—a sergeant—six feet six in his stocking feet, peering over the edge of a trench in Gallipoli. The photograph was taken by Lieutenant Throssell, of the Tenth Light Horse, just before the men went "over the top" in a bayonet charge, and in the immediate fore-

ground of the picture is a Victrola—playing.

When Steffanson's ship, the "Karluk," caught and crushed by the Polar ice, finally sank down to the ocean bed, a Victrola played the Chopin Funeral March for requiem.

Those whose efforts enable men to endure the unendurable might safely be classed as among those who are already "doing their bit," but the Victor Co. is doing all this and more.

The most valuable work a man can do is that.

Poster Featuring Wireless Records

which he has best learned to do. As a result of conscription, England sent engineers, machinists, draftsmen into the trenches, and subsequently had to recall them because the work they already knew how to do was more valuable to the nation than anything they could do in the trenches—and in such work as the Victor Co. is already best qualified to serve some noteworthy special efforts have materialized.

One of the critical concerns of the nation at the moment is the educating of thousands and thousands of wireless operators. A system of teaching by means of records has been devised

and recently introduced by the Victor Co. The American soldier in France, with no knowledge of the language, is likely to face some critical embarrassments, if not actual dangers, which might otherwise be avoided. After months of labor, research and expense the Victor Co. developed a system of French lessons which gives the soldier something he can really use the moment he steps ashore or at any time when he may be left to his own resources.

These are specific things—thrown in for good measure—but however much more the Victor Co. may do along such special lines it can do no more valuable work in the mobilization of national energies than that of enabling men to endure the mental and nervous strains of modern warfare, which are always so nearly unendurable. Morale is an essential element of victory—at the front, behind the lines and at home, and moralè is a mental condition. There are many agencies through which the strain on the body may be relieved, but there are few practical avenues of relief for the mind, and certainly none that can be spared.

NEWS BRIEFLETS FROM DENVER

Displaying the Pathé Line in New Quarters—Improvements at Darrow's—Brunswick Line With Swanson—Other News of Interest

DENVER, COLO., April 6.—The Swanson & Nolan Supply Co., which handles the Pathephone at wholesale and retail in this territory, is now at home in its new quarters at 1514 Welton street. The store is most attractively fitted up, and there are ample conveniences to carry an excellent stock of Pathé goods.

The Darrow Music Co., which carries the Columbia line in its talking machine department, is putting in a handsome new store front, with an entrance at the corner which will insure a larger window space.

Albert Giesecke, president of the Denver Music Co., who handles the Victor and Columbia machines, is very enthusiastic regarding trade prospects in his section.

The Knight-Campbell Music Co., which handles the Victor, is advocating larger monthly payments on musical instruments of all kinds purchased at this store.

The Brunswick phonograph is now handled in this live territory by Swanson's Jewelry Store, 39 Broadway, and this fact is being made known to Denverites through some very attractively arranged billboard signs throughout the city.

ANTICIPATE REQUIREMENTS

E. L. Knapp Tells Why Canadian Trade Should Anticipate Needs—Recent Company Change

JAMESTOWN, N. Y., March 25.—Announcement is made that A. F. Weber, who has been identified with the Weber-Knapp Co., of this city, as president and treasurer, has severed his connections with this company.

It is further announced that Edward L. Knapp, formerly vice-president, will now take full charge of the plant, and that business will continue along exactly the same high-class lines without interruption.

Mr. Knapp reports an increased demand for talking machine hardware, and from a larger area than there has ever been before. Shipments to the Canadian markets, he states, have been materially interrupted, due to the necessity of procuring an individual license for each shipment.

Mr. Knapp feels that it would be to the interest of those houses in the Canadian territories that order from the States to take this fact into consideration, and to anticipate their requirements if possible at least six months in advance. It usually takes two weeks to procure the necessary license, and as each individual shipment is required to have this license the same delay is naturally caused each time a shipment is made. Conditions are apt to grow worse rather than better, hence this caution.

TRANSFER BUREAU NOW ORGANIZED

Tri-State Victor Dealers' Association of St. Louis Arranges a Real Constructive Program That Should Be of Wide Benefit to Members

ST. LOUIS, Mo., April 4.—The Tri-State Victor Dealers' Association has set itself for an earnest program for the rest of the year. The officers believe that the association now is safely established.

The first work undertaken was that of establishing an exchange for records and machines that happen to be dead stock on one dealer's hands, but would be live stock elsewhere. That bureau is now working under direction of John F. Ditzell of the Famous & Barr Co. of this city.

Next comes the associated membership work. The associate members are to be the salesfolk who will be invited to join the Association and special meetings will be arranged for their benefit. The control will remain in the hands of the department managers and store proprietors. The first meeting to which associate members were admitted was held yesterday and a big meeting is planned for May. The April meeting was preliminary. The program for the associate members will be a help in selling goods, a plan whereby sales people can get the training desired as to machine construction, etc. One of the first features provided along this line will be moving pictures of the Victor factory and later will come talks on salesmanship and Victor reasons.

At the last business meeting E. C. Rauth, of the Koerber-Brenner Co., was elected secretary to succeed C. H. Lippman of the Field-Lippman Piano Stores. Mr. Lippman explained that his duties had increased so heavily since former employes of the firm had departed for war work that he was unable to get time to attend to outside duties. It was decided that weekly meetings of the directors of the association would be held in preparation for the May meeting.

Chairman Ditzell of the Transfer Bureau sent out this letter to all members as a memo. of the rules of the bureau:

"It is with pleasure I can advise you that the Transfer Bureau is now organized and ready to serve you in the very best possible way.

"In the operating of this Bureau your chairman respectfully asks for your co-operation in following conditions and rules by which this Bureau will operate.

"The most prominent advantage that members will obtain from this Bureau will be that they will be given the opportunity to dispose of in a wholesale way any overstock they may have of slow selling records.

"Members that avail themselves of the privileges of the Bureau will also be able to obtain a great many records that they were unable to get from the distributor.

"The following is the plan by which we shall operate:

"Each member is privileged to use the enclosed form to list with the Chairman any Victrolas and Victrola records that are in perfect condition and which he wishes to dispose of in a wholesale way.

"Each member in turn will be notified of the Victrolas and Victrola records that are available through the Bureau.

"The Association will in no way be responsible for credits, condition of goods sent through Bureau, etc. As to credits, any dealer can get such information from the Koerber-Brenner Company. Any controversy relative to the condition of Victrolas or Victrola records sent or received through the Bureau will be settled by your Chairman and all must abide by his decision.

"A request for information regarding the Bureau must be made in writing to the Chairman. Time prohibits the consideration of phone calls or personal calls regarding the Bureau.

"All transfers must first have the approval of the Chairman and after approval is granted the dealings will be directly between the members."

"Any suggestions regarding the operating of this Bureau will be appreciated. If we can all work with the one thought, 'An Efficient Transfer Bureau,' every member will find many advantages in the work that will be accomplished."

The membership campaign of the association is meeting with splendid success. Concerning the reasons for an exclusive association, Mr. Ditzell said: "An exclusive association appeals more to the exclusive dealer than to the dealer selling several machines. We assume, however, wherever a dealer sells Victors that his highest interest is there. But a Victor dealer, who is enthusiastic in his line, does not care to make criticisms and suggestions in a meeting of mixed interests. I would freely say things in a Victor association that I would not care to say if an exclusive dealer in another line was there. I believe also that if a man was selling Victors, Columbias, Edisons and Artophone machines, etc., he would offer suggestions and criticisms in meeting where all dealers sold these machines that he would not make in a meeting where

there were dealers who did not sell this machine.

"He would assume that all dealers selling this machine knew its weak points in machine or service, but he would not be willing to hand that statement, on his authority, to a competitor."

In this connection, the following statement has been made officially as to the object of the association:

"Its object shall be to advance, promote and extend the commercial interests of its members; to inculcate just and equitable principles of trade, and to improve business standards; to acquire, preserve and disseminate valuable business information; to promote friendly intercourse and to establish closer business relations between its members, and also between said members and the Victor Talking Machine Co.; to increase the facilities of its members for an interchange of ideas, and for the purpose of co-operating with other organizations upon important matters pertaining to and affecting business; to discuss and disseminate proposed legislation affecting the business welfare of members; and to investigate existing laws and encourage their enforcement."

RECORDS BY AUGUSTA BOUILLIEZ

The Starr Piano Co. announce that they have successfully negotiated with Mr. Augusta Bouilliez, the famous Belgian baritone, to make exclusive recordings, which will be issued about the middle of April and will be listed in the Gennett Art Tone series. The recordings which Mr. Bouilliez has made are as follows: Les deu Grenadiers (the two Grenadiers); Ballo in Maschero "Eri tu"; Hamlet, "Chanson Bashique" (drinking song); Faust, Serenade of Mephisto; Faust, "Aria of Valentine." They are very highly spoken of.

Repeat orders make pretty good testimony to the fidelity of a business institution, and regular customers are of more importance than first sales.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., April 4.—The Third Liberty Loan and the forthcoming great parade, to come off on the sixth of this month, are the uppermost topics of conversation in the trade just now. The various talking machine houses made a handsome showing in the purchase of bonds on the two previous drives and there is every reason that more will be forthcoming from them this time, especially as the right propaganda of education has been spread abroad, and people now better than ever before understand what the nation is really up against. The trade is likely to be well represented in the parade, which will enlist the services of upwards of 80,000 men, women and children.

Business Continues Good

Business with the various dealers continues good, but many of them complain that the call for goods is in excess of what they are able to secure from the factories. Toward the end of April there should be an enormous demand for the records of the various grand opera stars as the Metropolitan Company begins a week's engagement here at the Boston Opera House on April 22. The visits of the big opera companies invariably stimulate business.

Death of Andrew J. Lyons

The Victor and Edison departments of Chickering & Sons were called upon to part with a valued employe a week ago, Andrew J. Lyons, who died at his home in Roxbury, after a short illness. Mr. Lyons had been with the department several years and was married only a year and a half ago. He was devoted to athletics, and was especially interested in baseball and was among the foremost in promoting the game among the various talking machine houses in the city. Manager Currier of the Chickering house and the employes of the Victor and Edison department attended the funeral, and they were represented also by some beautiful floral offerings.

Ciccolini Appears in Concert

Considerable interest centered Sunday afternoon, March 31, in the appearance in this city of the famous Guido Ciccolini, the Italian tenor, who is one of the leading Edison artists. His concert at the Boston Opera House attracted an enormous crowd of people, and the Italians especially were most enthusiastic over the man, his voice and his fine presence. Ciccolini had the assistance of Pierre Henrotte, concert master in the Chicago Opera orchestra as violinist,

and Mr. Fabbrina as pianist. For several days prior to the concert the tickets were on sale at the Edison warerooms of the C. C. Harvey Co. in Boylston street, in the window of which establishment there was a large placard announcing the concert by this talented musician. In the Saturday advertisements which the Harvey company put out announcing the concert were these suggestions: "Hear him there to-morrow. Hear him Monday at our store. Hear him Monday night in your own home." Besides the Harvey company those especially interested in the concert were George Lincoln Parker, the F. H. Thomas Co., Chickering & Sons, all of whom are Edison dealers, and, of course, the leading Edison jobbers, the Pardee, Ellenberger Co., Inc.

An Attractive Easter Display

Among the especially attractive window decorations at Easter, and which was highly significant of the season, was that of the Eastern Talking Machine Co., where Wholesale Manager Fitzgerald arranged a profusion of Easter lilies in both windows as a frame and background for the exhibit of the latest of the month's novelties in Victor records.

Has An Eye for the Artistic

Manager R. S. Hibshman, of the Vocalion Co., is another who has an eye to artistic effect when it comes to adorning his warerooms and show window. There is not a week going by that there are not pots of blossoming plants and cut flowers placed effectively about, and these help a great deal in beautifying what is really one of the most home-like phonograph warerooms in the city. Manager Hibshman is making ready to give his customers quite a surprise very shortly, a foretaste of which some of them already have had in visits to the warerooms.

Interested in Marriage of Chas. Edison

The local Edison dealers were especially interested in the announcement of the marriage at Seminole Lodge, near Fort Myers, Fla., of Charles Edison, son of the inventor, Thomas A. Edison, and Miss Carolyn Hawkins, of Cambridge, by reason of the fact that the young man was at one time a student at the Massachusetts Institute of Technology, and during his years at that school made many friends here.

Fred. H. Silliman a War Expert

Manager and Vice-President Frederick H. Silliman, of the Pardee, Ellenberger Co., Inc., is

one of those men who are not only deeply interested in the war, but who can discuss its various phases most intelligently. Mr. Silliman studies carefully the situation day by day and is always ready to analyze and speculate on the various moves and counter-moves made on the battle front.

Cupid Invades Ditson Department

Two of Manager Henry A. Winkelman's valued women employes at the Victor department of the Oliver Ditson Co. have taken unto themselves husbands. One is Miss Ethel Chools, who lately was married to Joe Carlson, who also has been with Manager Winkelman and is now in service at Camp Devens, Ayer. Their wedding took place at Quincy. The other young lady, Miss Gertrude Lockardt, is now Mrs. Brown. Fortunately for Manager Winkelman the young ladies are now back at work, so he is not without their valued services.

To Do Educational Work for Columbia

James M. McLaughlin, who has been prominently identified with the music department of the Boston public schools for which he has been director for several years, has identified himself with the Columbia, and will have offices at the Grafonola Co. of New England. His position will be director of the educational department, and he will devote his time, especially during the summer, to the development of music in the school and home. Mr. McLaughlin for a long time has been a great believer in the future of the phonograph as an educational medium among the young.

R. H. White Co. Department Busy

The Graphonola department at the R. H. White Co.'s department store is finding many sales these days and Manager Fred L. MacNeil says that the only difficulty that confronts him and his staff of men and women salesmen is the difficulty of getting a sufficient supply of goods. This department handles the Victor, Edison and Columbia lines. Mr. MacNeil has had considerable experience in this line of business, and came to manage this R. H. White department a few months ago.

Gillis Takes Over the Miller Victor Business

Walter J. Gillis, who for some time has been retail manager for the Henry F. Miller Piano Co., has taken over the Victor business of the house and henceforth will manage it as his own business. He has purchased the entire stock and the good-will, and his staff for the present

Foresight Proves Its Value

Some years ago we adopted a policy of conducting our Victor business "with the dealer's viewpoint foremost in mind."

By practicing this policy we have acquired a knowledge which in times like the present makes Eastern Victor Service of triple value to the dealer who wants *practical* co-operation from his jobber.

EASTERN TALKING MACHINE CO.

177 TREMONT STREET

BOSTON, MASS.

will include Herman Mahr, Miss Edythe Austin and Miss A. J. Daly. Mr. Gillis has been in the Miller house for twenty-three years, and is therefore intimately in touch with the piano industry. He has a host of friends who will wish him unlimited success in his new undertaking. A son, Walter J. Gillis, Jr., is with the 101st Engineers in France, and encouraging letters continue to be received by the family.

Sending Letters from the Front

Jerry Spillane and Ed Welch, of the Eastern Talking Machine Co., Victor distributors, are proving themselves good letter writers. They have been in France with a hospital corps now almost a year, and their old associates hear from them quite regularly. Thus far they are quite well and having many exciting experiences.

Plan Tone Test for Fitchburg

The Iver Johnson Sporting Goods Co.'s Edison department is arranging for a tone-test to be given in City Hall, Fitchburg, on the evening of April 11. For this test Miss Marie Morrissey, the well-known contralto singing for the Edison company, is coming on from Chicago. Arthur W. Chamberlain, the Edison manager for this Boston house, will be in immediate charge.

At Local Brunswick Headquarters

One of the additions to the local staff of the Brunswick-Balke-Collender Co. at 94 Washington street is M. J. Graff, who comes here from the company's Chicago quarters as repair man. Mr. Graff is a Brunswick enthusiast and has a persuasive manner in presenting the claims of the Brunswick machine. The "Ultona," which is one of the cleverest devices yet put on the market for reproducing the various makes of discs, is about to be put out by the Brunswick as a component part of its machine. Anyone, therefore, possessing a Brunswick will be able to play any record. As a piece of mechanism this Ultona is worth careful study. F. H. Walter and E. S. Campbell, as the local travelers for the company, are finding a good call for the Brunswicks and March proved a surprisingly productive month for the company.

Sonora Territory is Enlarged.

Through a new arrangement with the Sonora Co., Richard Nelson, New England manager, now has the State of Connecticut added to his territory and this will be operated in conjunction with Massachusetts and Rhode Island. To better facilitate the situation Joseph H. Burke, assistant sales manager, who is doing excellent work, will spend a part of his time at Hartford, making visits meantime to the Boston offices which are so pleasantly located in the Little Building. Co. at Haverhill is one of the latest concerns with which Manager Nelson has signed up. Some of the largest orders for the Sonora line are coming from the large Boston department store of the Jordan Marsh Co.

Fred Peabody on Road to Recovery

The Boston phonograph dealers have been sorry to learn of the serious illness of Fred Peabody, who runs a chain of stores at Haverhill and Gloucester. He was threatened with pneumonia, but thanks to good care he is on the road to recovery. Mr. Peabody comes up to Boston quite often and always gets a warm welcome from his many friends.

Wholesale Columbia Department Busy

The last day of the month found Manager Fred E. Mann's wholesale Columbia department a busy place, for it was quarterly stock taking day. In the city at the present time are C. A. Klebart and Stephen Gilroy, auditors from the New York office who have been spending a week or more at the Federal street headquarters. Another visitor here from the New York

offices has been A. R. Harris, of the general sales department. F. K. Pennington, assistant general sales manager, is expected here in a day or two. Manager Mann is quite enthusiastic over the good showing that the month of March made, which was the best of the three of the current year thus far.

Featuring Nora Bayes' Records

It is of special interest to the trade that just as Nora Bayes is making her appearance in Boston in the "Cohan Revue" the first of this comedienne's records are being put out by the Columbia Co. The engagement began at the Colonial Theatre April 1 and the windows of the Grafonola Co. of New England made a most attractive display of her records.

Make Splendid Victor Display

One of the attractive booths at the big exhibit at Horticultural Hall, which opened to-day under the auspices of the Boston Herald, is that of the M. Steinert & Sons Co., whose display of Victor outfits is attracting many persons. The

TRADE CONDITIONS IN BOSTON

(Continued from page 21)

exhibit is in charge of William A. Burnes, of the Steinert house, and the demonstrations, which occur at regular intervals, are listened to by crowds of people. Robert Steinert, who is in charge of the Arch street Victor headquarters, makes a most encouraging report of the March business both in machines and records, but he, like others, is feeling the shortage of goods.

The New England Vitanola Talking Machine Co., exclusive distributors of the Vitanola talking machine, made in Chicago, for the New England States, are steadily building up a very satisfactory dealer clientele for this excellent product.

NEW ENGLAND T. M. CO. EXPANDS

Add 3,000 Square Feet of Floor Space to Boston Factory to Meet Demands

BOSTON, MASS., April 3.—Announcement is made that the New England Talking Machine Co., of this city, have found the necessity of adding some 3,000 feet of floor space to their factory, due to the strong demand evidenced for their products. The "Perfection" ball bearing tone arm and the new "Perfection" flexitone reproducer need no introduction to the trade. Their increasing popularity has necessitated this change.

NEW QUARTERS FOR H. G. APPLIN

SOMERVILLE, MASS., April 5.—H. G. Applin, talking machine dealer, formerly located at 20 College avenue, has moved to new and larger quarters in the Medina Building, where he has installed several soundproof booths, commodious record racks, and a complete repair department. Mr. Applin handles both the Victor and Edison lines, and has been in business here for over ten years. This is the fourth time that he has been compelled to move, owing to the expansion of his business.

URGES CARE IN RECORD PACKING

Post Office Department Notifies Postmasters Regarding Packages and Their Packing

WASHINGTON, D. C., April 6.—Complaints having reached the Post Office Department that many phonograph records are broken in the mails when sent by parcel post, Otto Prager, Second Assistant Postmaster General, has notified the postmasters and other employees to be careful to see that the articles are properly packed, properly marked and carefully handled. The order reads as follows:

"Numerous complaints of damage to phonograph records shipped in the mail indicate that postal employees are not giving proper attention to these fragile articles. Therefore, it is directed that postmasters and all employees receiving parcel post from the public for transmission in the mail shall be particularly careful to see that such parcels are suitably and sufficiently prepared for safe transmission, and that they are plainly labeled 'Fragile.' All postal employees are also cautioned to use special care in handling such parcels with a view to preventing damage thereto."

CLEVER SWINDLER GETS RECORDS

Young Man Manages to Get Forty-five Records From Two Stores of Shroyer Music House

BETHANY, Mo., April 2.—The Shroyer Music House, of this city and Albany, Mo., was stung twice recently by the same swindler, and both times for a goodly bunch of Edison records. A young man about twenty years old entered the Shroyer store in Albany recently and contracted to purchase an Edison phonograph on instalments without making an initial payment. He ordered nine records and offered to take them with him to save the trouble of delivery. The man left on the next train for Bethany without waiting for the machine to be delivered. He next visited the Shroyer store

ILSLEY'S GRAPHITE PHONO SPRING LUBRICANT

here, and by some smooth talk managed to get thirty-six Edison records on approval, agreeing to pay for those his folks selected. The music house does not yet know how the records appealed to the young man, for he got out of town without delay. It is stated that the Shroyer Music House will adopt a definite policy of letting no records go out on approval in the future.

SEMI-PERMANENT NEEDLE POPULAR

Vallorbes Jewel Co. Make Enthusiastic Report Regarding Latest Addition to Their Line—Export Demand Steadily on the Increase

LANCASTER, PA., April 4.—The Vallorbes Jewel Co. of this city report that their new semi-permanent needle is growing in popularity by leaps and bounds not only throughout the United States but in Canada and other countries as well. W. F. Meiskey, president of the company, reports that although they are just about finishing taking care of the large number of initial inquiries, recorders are coming in fast for large quantities.

The original card that was announced to the trade has been improved in design and is printed in three different colors so as to differentiate between the three tones in which the needle is made—soft, medium and loud. Mr. Meiskey announces that they might use an adaptation of a familiar phrase and say, "We couldn't improve the needle so we improved the card."

Ault & Miller, who handle the Edison line in Fort Collins, Colo., are making a great drive on bringing the merits of the Edison record to the attention of the purchasing public.

Style 5H—Holds 100 Records

Filing Cabinet for use with Victrola VIII or IX; Columbia Grafnola 15, 25, 35 and 50; Aeolian Vocalion D. & E., and other portable styles of talking machines.

Automatic Insert Files will re-equip any standard Talking Machine with durable up-to-date files—on dealers' sales floor or in customers' homes. Every dealer and jobber should carry them in stock.

Automatic RECORD CONTAINER

Every Record in Plain Sight

Opens automatically—remains open at the right place—all records accessible—closes easily and quickly—no weight to handle—no more broken or misplaced records. Records properly filed give maximum use and enjoyment.

Mr. Dealer: You ought to add this profitmaker to your line. Many thousands of phonographs and records have been sold and thousands more are being sold every day! There is a real demand and a growing demand for efficient filing cabinets.

Automatic Record Containers meet every requirement. Simple—flexible—durable—nothing to wear out—nothing to get broken or misplaced. A delight to use them.

Manufacturers, get shop rights to equip your line

FULL PARTICULARS AND PRICES ON REQUEST

Filing Cabinet—Style L. T.

Attractive in Parlor or Library. Satisfies your customer, sells readily. Ample filing capacity increases sales of records.

Automatic Carrying Cases for Salesmen and Repairmen are ideal—constructed on the same principle as our Record Containers. Every dealer and jobber should equip his salesmen with them to increase their efficiency.

AUTOMATIC CONTAINER COMPANY

5 North La Salle Street CHICAGO, ILL.

The Unequaled Selling Features of the AEOLIAN-VOCALION

ON the three pages following we are showing specimen advertisements from the strong campaign of Vocalion publicity carried on in the national magazines and newspapers of the leading cities.

These advertisements emphasize two of the many impressive features of the Aeolian-Vocalion.

No phonograph made to-day is so easy to sell as the Aeolian-Vocalion, disposes so readily of competition, brings so good a class of patronage to a merchant, or reflects more prestige on his store.

This one point alone; the Vocalion's ability to *play all records*, is already coming to be recognized as of vital importance. Moreover, the Vocalion's method of doing this—the remarkably effective tone-arm, which makes it possible to shift from “lateral” to “hill and dale” records by a *single turn of the reproducer*—gives the Vocalion a notable advantage over other phonographs.

Vocalion representation is the most valuable franchise the phonograph dealer or progressive merchant can secure. This is not alone because this great phonograph is demonstrably the finest instrument made, but because of Aeolian methods of doing business.

The unparalleled character and excellence of Aeolian service, which has recently been still further augmented by the establishment of convenient distributing points in different parts of the country, is proverbial in the music trade. Added to this service is the well-known Aeolian policy of fairness and courtesy in business dealings which make the representation of this house one of the most satisfactory connections offered in the business world.

F. W. J. S. 1864

*The Music of the Entire World Is Yours
If You Own the*
AEOLIAN-VOCALION

THE owner of an Aeolian-Vocalion is not confined to one, or at most two, groups of artists.

Every artist, every instrumentalist, every entertainer, every orchestra and band that has made a record, has made it for him to hear and to enjoy.

No matter what the make of record, no matter by what system it is produced—so-called “hill and dale” or “lateral” cut—the Aeolian-Vocalion will play it and play it *better* than it can be heard from any other phonograph.

DID the Aeolian-Vocalion possess no other advantage; were it only the equal of other phonographs in other respects, this ability to play *all makes* of records would make it the most desirable phonograph to own.

No single manufacturer, nor any two manufacturers, controls the musical talent of the world. The phonograph field is constantly broadening, new artists are appearing, and the phonograph owner who is in a position to enjoy them all commands the situation.

But the Aeolian-Vocalion is not merely the equal of the best phonographs of other makes. It is absolutely supreme and alone among all such instruments.

The *tone* of the Aeolian-Vocalion has been scientifically demonstrated to be far nearer that of any instrument or voice it reproduces, than has hitherto been possible in phonographic reproduction.

The tone-controller of the Aeolian-Vocalion—the celebrated “Graduola”—is the first and only effective and artistic means devised for modulating phonographic tone without muffling it or changing its character.

The *cases* of the Aeolian-Vocalion represent the first serious effort on the part of phonograph manufacturers to fit this instrument to take its place among the other furnishings of the modern home. The simplicity of Vocalion case-designs, the depth and richness of its case woods, are notable in their contrast to what has hitherto been typical of phonographs.

OTH^{ER} features of the Aeolian-Vocalion—mechanical features such as its automatic stop—represent equal progress.

From every standpoint this great phonograph, made by the world's most progressive and largest builders of musical instruments, offers the utmost in musical value, in pleasure and entertainment and in architectural beauty, that the expenditure of any sum of money in such an instrument can procure.

*Vocalion Prices: Conventional Models, \$45 to \$375
Sixteen Beautiful Period Styles, from \$215 to \$650*

THE AEOLIAN COMPANY
AEOLIAN HALL, NEW YORK

The
AEOLIAN-VOCALION
PERIOD STYLE 1493
Queen Anne, 1702-1714

IN this design the Holland influence, a factor in Queen Anne Furniture, is very marked. The coved base, its curve continued by the characteristic "cabriole" leg, gives this Vocalion a grace very pleasing to those who admire this Period. The finely moulded top, the shaped chamfering of the corners and the decorative grille, all contribute to the harmony of the whole.

PERIOD STYLE VOCALIONS

THE introduction of these superbly cased instruments represents the third great achievement of the Aeolian Company in developing the phonograph.

First—this Company produced the most musical phonograph that has ever been heard.

Second—in the Graduola expression attachment it provided the only satisfactory and artistic means for controlling the phonograph's tone yet devised.

Third—The Aeolian Company, the first to depart from the conventional lines in designing Art Style Phonographs, now presents this superior phonograph in a wide variety of Period Cases that are in line with the finest furniture designing of the present day and that in price are within the reach of almost every phonograph purchaser.

HARMONY IN HOME FURNISHING

In selecting furniture for even the moderate home the purchaser is now enabled to secure a harmony of effect that in the past was available only to the wealthy. The Aeolian Company has recognized this condition and has taken steps to meet it. The superb group of Period Style Vocalions here announced is its response to the growing popular demand for *phonographs* of reasonable price that will harmonize with the finest

modern furniture. Like the best examples of furniture of today, these Period Vocalions have their origin in the rich traditions of the historic past. Furthermore, they are thoroughly adapted to the practical needs of the present, making them a true product of this age as well as beautiful illustrations of the art of the cabinet-maker of ages past.

These Period models introduce motifs ranging from Gothic and Jacobean through Queen Anne, Chippendale and others, to our own American Duncan Phyfe.

SUPERIORITY OF THE AEOLIAN-VOCALION

The Aeolian-Vocalion is now recognized as the leading phonograph upon the market.

Its positive superiority of cases, as manifested both in the new Period Styles and in the many conventional models in which it is made, is but one of its striking advantages.

The Aeolian-Vocalion's supremacy extends to *Tone, Tone-Control, Ability to Play All Records, Appearance, and Auxiliary Features.*

Vocalion Prices are—Conventional Models, \$45 to \$375
With Graduola from \$110. Period Models from \$215 to \$650
Sold on Moderate Down Payments and Most Liberal Terms

THE AEOLIAN COMPANY
AEOLIAN HALL, NEW YORK

HOW CLEVELAND TRADE PLANS TO HELP UNCLE SAM'S BOYS

Entertainment First Week of May for Y. M. C. A. and K. of C. Funds—President Bennett Appoints Association Committees—Helping Liberty Bond Campaign—Attractive Window Displays

CLEVELAND, O., April 9.—The Talking Machine Dealers' Association of Northern Ohio is going to give a big benefit performance and concert in some local theatre or armory during the first week of May, the entire net proceeds to go to the Y. M. C. A. and Knights of Columbus. Singers whose voices are reproduced by talking machine records will be asked to cooperate in making the benefit a success. If Keith's big Hippodrome can be obtained it will be used, as it is the largest theatre in the Middle West.

At the March monthly meeting of the association Charles K. Bennett, president, appointed the following committee to arrange for the benefit: W. G. Bowie, chairman; L. Meier, of L. Meier & Sons; A. W. Roos, manager of the Columbia Graphophone Co.; J. J. Schriener, music department manager; L. W. Bloom, secretary of the Phonograph Co.; Richard Svehla, a West Twenty-fifth street dealer in musical instruments, and A. L. Maresh, of the Maresh Piano Co.

At the April meeting of the association plans will again be discussed and the arrangement committee will report progress.

Mr. Bennett is very enthusiastic over the prospects of a big benefit and thinks that the appearance of several musical stars featured through Victor, Pathé, Edison, Columbia and other records will insure a big attendance and net a goodly sum for the Knights of Columbus and the Y. M. C. A. The proceeds will be split fifty-fifty with these two organizations which are doing so much to make camp life of soldiers a pleasant existence.

During the March meeting, which was held at Schuester's Cafe, trade conditions were variously discussed. There were twenty-four members present and assurances of two more members were received.

Mr. Bennett announced the following standing committees for the association for 1918: Executive—L. W. Bloom, secretary of the Phonograph Co., chairman; L. Meier, of the L. Meier & Sons Co.; Herman Wolfe, president of the Wolfe Music Co.; T. A. Davis, manager of the piano department of the Bailey Co.'s department store, and J. O. Raeder, secretary-treasurer of the Caldwell Piano Co.

Grievance—W. G. Bowie, chairman; Richard Svehla, dealer in musical instruments, and E. A. Friedlander, manager of the Diamond Disc Co.

The presence of several piano dealers who are active members of the association, gave assurances of hearty support to the organization during the year.

Mr. Bennett and others said transportation conditions are still bad. "We are not getting stock," said Mr. Bennett. "A consignment of stock from the Victor factory, Camden, N. J., started for Cleveland February 2, had not been heard from March 21. At that date we had received no machines started during March. It is expensive business getting machines by express and the transportation charges eat up profits. Of course, needles and records can be sent by parcel post, as they are not so bulky as machines."

After the meeting Mr. Bennett left for a vacation trip to New York, Atlantic City and other places, from which he has just returned.

Talking machine dealers of the Cleveland Association are staging some unusual activities for the third Liberty Bond sale campaign, which opened April 6. Cleveland has always "gone over the top" in its war subscriptions, whether for the Red Cross, "Y," or Liberty Bonds and War Savings Stamps, and during the "Liberty Day" celebration, April 6, piano dealers and talking machine men will play an important role. Music will be a big lever in the campaign, and no means will be spared by talking machine men to do their bit in putting over the third Liberty Loan.

Cleveland is the home of the nation's Sec-

retary of War and his assistant, also the National Fuel Administrator, Harry A. Garfield, Christian Girl, head of the motor truck department of the war council, and other "dollar-a-year men" now serving their country in Washington. For this reason Cleveland will have a big wave of patriotism April 6 and launch the third loan with a series of parades and other demonstrations in which music of all kinds will play an important role.

Eastertide found talking machine dealers all set for the event. Many effective window displays attracted attention to stores. The Collier & Sayles Co., Victor dealers, put on a fine show window attraction, as did the Wolfe Music Co. The Eclipse Musical Co., Victor distributors, went the limit with a display in the company's retail store, Euclid avenue, that won high praise.

The B. Dreher's Sons Co. also had a fine display of machines. The Caldwell Piano Co., the "Harmony Music Shoppe" of the Hart Piano Co., and other well-known concerns displayed machines, player-pianos, music rolls, records and other seasonable stock. Easter found Cleveland in an optimistic mood, the weather having moderated, making "glad rags" appropriate for the "joyous season." All the churches had extra musical programs and "music was in the air."

Among the latest hits in talking machine records in Cleveland are:

Columbia—"Au Revoir, But Not Good-bye, Soldier Boy," by Henry Burr; "There's a Service Flag Flying at Our House," by the Sterling Trio; Charles Harrison's "Li'l Liza Jane"; Marconi Brothers' "It's a Long Way to Berlin."

Starr—"When the Bell in the Lighthouse Rings," by Frederick Martin; "Oh, Promise Me," by Chester W. Smith; "Drink to Me Only

With Thine Eyes," by Albert Widerhold; "Vulcan's Song," by Frederick Martin.

Pathé—"In the Land of Wedding Bells," by Campbell and Burr; "Are You From Heaven?" by Irving Gillette; "Liberty Bell," by the Peerless Quartet; "Love and Life in Holland," by the Imperial Symphony Orchestra.

"When the Boys From Dixie Eat the Melon on the Rhine," "I'm Writing to You, Sammy," "American Through and Through" and "There's a Service Flag Flying at Our House"—these are among the newest patriotic hits of the past few days.

ISSUE WEEKLY RECORD BULLETINS

Standard Talking Machine Co. Urges Dealers to Push Selected List of Victor Records, All of Which Are Now Obtainable

PITTSBURGH, PA., April 2.—The Standard Talking Machine Co., in connection with their service department for dealers, have issued a series of new weekly bulletins for the use of retailers, listing from twenty to twenty-five of the most desirable records in regular form, with the names of the selections, the artists who make them, size and price. It is urged that the dealers during the week call the particular attention of the customers to these selected lists of records, all of which the Standard Co. have in stock before the bulletin is issued. Up-to-date the plan has proven most successful, and has stimulated the sale of a number of records that usually would rest on the dealer's shelves, and likewise has compensated in some measure for the dearth of some of the more popular selections.

OCCUPYING NEW QUARTERS

The Glendale Phonograph & Piano Co., Glendale, Cal., is now located in attractive new quarters at 323 Grand Boulevard, that city. The company features the Baldwin pianos in addition to phonographs and musical merchandise. Two soundproof booths have been installed.

To the Talking Machine Man Who Is Not Selling Pianos—Why?

When Piano Dealers started to sell Talking Machines with so much success, did they do so at the expense of their piano business? NO—the combination proved to be an instantaneous success—each has helped the other.

Your business, selling talking machines only, is probably as big as an exclusive business as you can make it. Why not branch out? You can do with Pianos what the piano man did with Talking Machines.

With little additional investment and the same overhead expense, you can sell Pianos and Player Pianos profitably. Your piano business will help your talking machine business, and you will make more money. For particulars address

Scarcity of Stock a Serious Problem—Hedman Tells of Prosperity With Farmers—L. H. Lucker Tells of Conditions—Other News

ST. PAUL and MINNEAPOLIS, MINN., April 4.—The business situation in St. Paul and Minneapolis is just what it was last month, the month before, six months ago and a year ago. Dealers, whether retailing or jobbing, simply are unable to supply machines as they are desired and no one has any idea as to the proportions the Victrola trade, for instance, could assume in this territory if the machines were obtainable as freely as desired. W. J. Dyer & Bro. are buried in urgent appeals for instruments not only from dealers in their territory, but often from houses at a distance. The Beckwith-O'Neill Co. has discontinued sending its representatives to the dual city trade because there is nothing to offer except apologies and excuses. It is not easy to discourage such confirmed optimists as E. F. O'Neill and George Mairs, but they have to be content in view of conditions.

South Dakota farmers never were so busy as they have been this spring, declares E. W. Hedman, traveler for the Columbia Graphophone Co. There is a greater acreage of grain than the State ever saw before, and if the Lord will aid occasionally they promise to give Uncle Sam the greatest supply of grain that ever came from that State. Other travelers bring the same hopeful reports, and with a March increase of between 60 and 70 per cent. in the volume of business as between 1917 and 1918 Manager Sprague sees a chance to win another silver tank and some laurels. J. W. Hayes, local scout for the Columbia Co., is credited with some record business in Minneapolis and St. Paul. The company plans to restrict the number of dealers in the Twin Cities by centering their efforts with the strong accounts.

F. S. Binger, chief assistant auditor of the parent company, left last week for the East after working here about a month. He was accompanied by Richard Grant, who leaves the Columbia Co. on his arrival in New York to become a rookie at Camp Mills, and get a blue star in the Columbia flag. The appointment of R. C. Tanner as chief clerk at the Minneapolis headquarters office is announced by Manager Sprague.

Officials of the Minnesota Phonograph Co., jobbers of Edison phonographs, feel in a somewhat complacent mood, although the Twin City retail trade hardly is up to expectations. Recent arrivals of carloads and other shipments of instruments and records have placed the company in a position to supply the wants of the large growing circle of dealers. Manager Laurence H. Lucker was in a sorry position some months ago, but the trade skies are much brighter now that he can command the goods.

Minneapolis and St. Paul newspapers are carrying the want ads of the Brunswick-Balke-Collider Co. for rubbers and finishers at the Dubuque, Ia., factory. The Brunswick business is excellent, particularly in Minneapolis, where the Brunswicks are handled by Boutell Bros., big furniture dealers, and the exclusive Brunswick shop of Nye & Nye, who are housed in one of the most artistic talking machine shops in the Northwest. E. L. Kern, one of the directors of the company, is head of the Northwestern organization.

Pathé phonographs and records continue to be distributed on a generous scale by the G. Sommers Co., which has a most wonderful and extensive organization. Jay H. Wheeler, head of the phonograph department, is a veteran in the business, and is understood to be making a distinct mark with the house.

Sewell D. Andrews, who looks after the interests of the Sonora phonograph in the Northwest, is out of town for the time being, but it is stated that the business is on a satisfactory basis with a goodly increase as a result of the Sonora convention in Minneapolis in January.

EDISON WINDOW DISPLAYS DESIGNED

Thos. A. Edison, Inc., Prepares a Number of Suggestions for Window Trims for Retailers—The Basic Principles Illustrated

Realizing that many more Edison dealers would show attractive windows if they fully understood some of the basic principles of window display, the advertising department of Thomas A. Edison, Inc., have devised a num-

ber of appropriate displays which a dealer can place in his window at very slight cost.

In the above sketch originality and good taste have joined forces to present the idea of music's re-creation so convincingly that all who pass must pause and consider.

Characteristic spring colors of green, yellow and light gray are used. The background is made by hanging green denim at the sides and back of the window. The New Edison is well

An Attractive Spring Window Featuring the Edison Phonograph

tered in light gray and yellow, says: "Come in and hear re-creations of the world's best music on the New Edison." "As refreshing as the first signs of spring," the poster below tells you. Here the cardboard is of light gray and the lettering of yellow. A third and smaller sign to the right might announce recitals. As a final argument pictures of famous artists singing with their Edison Re-Creations are grouped at either side of the poster.

HAS OBJECTIONABLE FEATURES

Cary Bill, Taxing Dealers Doing Business on Instalments, Excites Countrywide Opposition—J. N. Blackman Gives His Views

The National Association of Talking Machine Jobbers is keenly interested in the Cary bill now before Congress, which provides for a license of \$200 per year for all merchants selling goods on instalments, and which includes a number of decidedly objectionable features. The bill was introduced by Congressman Cary, of Wisconsin, and, although it applies only to the District of Columbia, the measure is exciting countrywide opposition.

Action by the Jobbers' Association on this bill was referred to its legislative committee, and in the meantime J. Newcomb Blackman, president of the association, has taken up the matter by correspondence with Washington, and the legislative committee is planning to take any action that is deemed advisable.

Mr. Blackman thinks that this bill is decidedly inimical to the best interests of the country, and that because of its serious faults it will practically defeat itself. Mr. Blackman points out that the bill will not regulate instalment business, but will tend to annihilate it, as it contains features that will make it practically impossible for an instalment house to do business.

VIGILANCE COMMITTEE IS ACTIVE

Issues Bulletin Regarding Operations of "Gyp" Dealer in Chicago and Is Co-operating With Music Industries Better Business Bureau

The National Vigilance Committee of the Associated Advertising Clubs of the World has entered the fight against "gyp" dealers in musical instruments who use the classified columns of newspapers to dispose of instruments from residences under claims that are generally

THREE ATTRACTIVE HANGERS

Gotten Out by the Advertising Department of the Columbia Graphophone Co. for Use of Their Dealers—Should Stimulate Sales

The advertising department of the Columbia Graphophone Co. recently prepared for the use of Columbia dealers three very attractive

this popular selection having been recorded by the Columbia Co. three different ways—an instrumental arrangement by Prince's Orchestra, a tenor duet by Campbell and Burr, and an Hawaiian guitar combination.

The hanger featuring the big war hits has a definite and timely appeal that is certain to stimulate the demand for the records listed on this hanger. The Al Johnson hanger can not fail

Hangers Featuring Popular Columbia Records

hangers featuring Columbia records that are destined to be successful in all parts of the country. These hangers are presented herewith, and the fact that they are being used by Columbia representatives everywhere indicates their practical value.

One hanger features the "Missouri Waltz,"

to attract attention, as this popular star is now adding to his laurels in a new revue at the Winter Garden. His rendition of the successful song, "I'm All Bound Round With the Mason Dixon Line," has won considerable praise, and this record has met with a ready sale.

questionable. The committee has gone so far as to issue a bulletin regarding the advertising of R. Nordin, appearing in the Chicago papers over that name, and also over the name of A. Nordin, F. Nordin, B. Nordin, etc.

Nordin's specialty was advertising "My beautiful \$150 Victrola size phonograph and records, guaranteed ten years. Will accept \$60. Used only ten weeks. Wonderful bargain, etc." The

Vigilance Committee declares that the name Victrola is misleading, and that Nordin handles another make of phonographs. An advertising agency is also mixed up in the case, having placed the advertising for Nordin.

The National Vigilance Committee is working in co-operation with the Music Industries Better Business Bureau, and bulletins covering other transactions will soon be issued.

McCORMACK'S SAN FRANCISCO CONCERT REALIZES \$24,700 GETTING AFTER THE "GYP" DEALERS

Famous Irish Tenor Scores Phenomenal Success in Concert for American Red Cross—Sherman, Clay & Co. Co-operate in Generous Way—Entire Affair Splendid Evidence of Patriotism

SAN FRANCISCO, CAL., April 4.—Local talking machine and music circles are still agog over the recent sensational appearance of John McCormack, the famous Irish tenor, in this city. Mr. McCormack's appearance in the interests of the American Red Cross served to enrich the funds to the extent of \$24,700.

The admittance fees—the place was filled—totaled close to \$20,000, and Tom Skeyhill, the

brought \$550 from J. J. Tynan, while Mayor Rolph paid \$250 for "I Hear You Calling Me." Mrs. S. R. Maynard paid an even \$500 for the "Long, Long Trail," and Mrs. E. J. Knight paid a like amount for the Berceuse from "Joselyn." Skeyhill auctioned the records off until his voice failed him and he was led from the platform in a storm of cheers.

McCormack sang unimagined pathos and beauty into "Mother Machree," which came as an encore. "Has Sorrow Thy Young Days Faded" brought tears to the eyes of many, and it is no exaggeration to say that the rafters rang with the applause which greeted the noble "God Be With Our Boys To-night." The program was well-balanced, with tender Irish airs and songs of the more martial type.

San Francisco has established a record for the McCormack

tour. The sale of records exceeded that of any other city. Cleveland is second with a record sale of \$3,500.

The records by McCormack which were auctioned off by Skeyhill were donated by Sherman, Clay & Co., well-known Victor wholesalers, of this city, who did their full share in making the concert a success, and incidentally arranged a most elaborate and attractive McCormack window to their store to mark the event. In the window display was a life-size figure of McCormack, as the centerpiece, which is shown herewith. The entire affair proved how patriotic are San Franciscans.

Assistant District Attorney Goldstein Planning to Prosecute Those Who Offer to "Sacrifice" Talking Machines at Prices in Excess of Real Values—Busy in Harlem District

As was prophesied some time ago, "gyp" dealers in musical instruments, and particularly talking machines, have been quick to take advantage of conditions brought about by the draft, and the sudden calling of young men from their homes and occupations. Dealers have been particularly active in the upper section of New York City, and the newspapers are quite full of announcements of machines and records offered at a "sacrifice, owing to the fact that the owner has been called to the colors and must dispose of his effects." Assistant District Attorney Goldstein has taken cognizance of the activities of "gyp" dealers, and is investigating their operations. He threatens that when sufficient proof is forthcoming he will take immediate action to stop their activities.

Investigators in one instance, lured by the announcement that a "\$200 model machine and library of records, little used, could be purchased for \$60 from a young man Upton-bound," found that not only could the machine on exhibition in the front room of the apartment be purchased at the special price, at least 50 per cent. more than it was really worth, but there were a dozen or more machines in the adjoining room ready to be moved in and "sacrificed" one at a time.

Mr. Goldstein urges that dealers, or individuals, who obtain proof of fraud in the operation of "gyp" dealers, communicate with him that he may take legal action. It may also be said that dealers in other cities who run against "gyp" operations can secure action by reporting the same to the Music Industries Better Business Bureau in Milwaukee, who are co-operating with the National Vigilance Committee of the Advertising Clubs of the World, in an effort to check the evil in all sections of the country.

OCCUPYING NEW QUARTERS

William Gulden, furniture and talking machine dealer of Union Hill, N. J., is now located in a fine new store at 149 Bergenline avenue. Mr. Gulden features the Brunswick phonograph.

Sherman, Clay & Co. Window Advertising of McCormack's Concert

twenty-one-year-old Anzac boy who for three years battled with the English colonial forces, to leave his eyes behind him on the western front, sold records of the golden McCormack voice, adding \$5,250 to the box office receipts. All will be given to the Red Cross.

Skeyhill, his sightless face making mute appeal to the hearts of the audience, was eminently successful as a seller of records. The "Star-Spangled Banner" went to E. J. Carroll, of the St. Francis Hotel, at \$550, and E. Brule, of the Palace Hotel, paid \$1,000 for "The Sunshine of Your Smile," immediately reselling it for \$500. "Keep the Home Fires Burning"

CHANGES IN PORTLAND STAFFS

Various Talking Machine Men Make New Connections in That City and Vicinity

PORTLAND, ORE., April 3.—Many changes have taken place in the employed forces of the talking machine departments of local big music houses in the last month. C. B. Cordner, of Eilers Music House, has taken the position of manager of the talking machine department, succeeding to the place formerly held by H. S. Rayner, who is now in Seattle with the Hopper-Kelly Co. Mr. Cordner is well known and well liked by Portland people. He has long been with the Eilers people. The new manager has started out a drive for cash sales and has been having remarkable success, due, he believes, to the prosperous condition of the people of Portland.

R. C. Coltart, of the Columbia Graphophone Co.'s Portland branch, has gone to San Francisco, where he will take charge of the Columbia branch there.

Henry Schmidke has succeeded Mr. Coltart with the Columbia people. Mr. Schmidke, who has been traveling for the Portland branch through the Oregon territory, is considered one of the most efficient officers of the local house.

W. L. LeVanway, Jr., has been placed in charge of the phonograph department of the Graves Music Store. The position was formerly held by I. W. Lane, who has gone to Tulsa, Okla., and is now connected with the Tulsa Automobile Co.

C. V. Jones, traveling salesman of the Portland branch of the Columbia Graphophone Co., has been meeting with big success in the spruce districts of Southwestern Oregon.

H. A. Yerkes, of New York, traveling man-

ager of the Columbia Graphophone Co., enjoyed a trip up the Columbia Highway while here. Mr. Yerkes and his wife were guests of L. D. Heater, manager of the local Columbia branch.

W. D. & C. N. ANDREWS
BUFFALO, N. Y.

The Importance of Knowing Both Your Own and Your Competitors' Line :: :: By Frank D. Parsons

The ideal talking machine salesman is careful to maintain the reputation of his wares. Every instrument has a certain standing and reputation, and it behooves the retail salesman to guard that reputation as carefully as though he himself were the manufacturer. To accomplish this the salesman must know his line thoroughly—must know its good points, its exclusive features, and also its defects, if any there be. In addition to this he must also have a general knowledge of competing lines and their merits and shortcomings. A knowledge of the peculiarities of competing instruments is invaluable to the salesman.

It is human nature for a prospective customer to walk into a talking machine store, and disparage the line of instruments for sale therein, praising the qualities of some other line. This is done, often as not, not because the prospect really believes the other line is better, but because he, the prospect, wants to settle his mind absolutely in regard to the instrument the salesman is showing him, before the sale is consummated. In other words, the prospect wants to convince himself that he is making the best possible purchase, and if the salesman can point out the difference between his products and those being sold by a competitor, and point out these differences so clearly and convincingly that the prospect remembers and believes the salesman's statements, the sale will not only be made, but it will "stick."

In doing this, however, the salesman must carefully refrain from "knocking." The verbal hammer of the salesman, pounding against a competitor's line, has spoiled more possible sales than any other single factor. If the

prospect praises the tone of a competing line, the salesman should be able to point out the fact that this own line is equal, if not superior, in tone to the instrument being praised by the prospect, and to do this the salesman must know enough about the principles of construction to prove that his line need not take second place when compared with competing instruments. If the prospect is enamored of some special feature of case design in a competing line, the salesman should know enough about case construction to point out the special features embodied in his own instruments, and be able to convince the prospect of the beauty and attractiveness of the wood and the finish,

as well as other points which his line possesses.

These and similar arguments can be used most effectively by the salesman, without in any way knocking his competitor, or his competitor's line. The arguments can only be made effective, however, if the salesman has a thorough knowledge of his own line, and knows enough concerning competing lines to talk about them intelligently. The salesman who attempts to sell talking machines without first fortifying himself with a practical knowledge of the instruments he is selling is no surer of success than would a schoolboy be of solving a problem in algebra without first having committed to memory the multiplication table.

MOULDING THE AMERICAN CITIZEN

Striking Victor Co. Advertisement Calls Attention to What the Victrola Is Doing in the Schools of the Country Just Now

One of the most effective Victor advertisements yet presented was that appearing in the Saturday Evening Post of March 23, which emphasized in a striking manner, through the medium of both text and illustrations, the strong position held by the Victrola in the schools of the country. The advertisement was captioned: "Moulding the American Citizen of To-morrow," and offered an appeal along a new line. The border was made of a series of views showing the Victor machine furnishing music for folk dances, singing and writing exercises, calisthenics, etc., in graded and high schools, and the text called attention to the fact that the Victrola was used in more than 25,000 public schools in 6,000 cities and towns. The Victrola XXV,

manufactured especially for school use, was shown in one corner of the announcement.

RECEIVING CONGRATULATIONS

G. C. Jell, general manager of the recording laboratories of the Columbia Graphophone Co., New York, is receiving the congratulations of his friends and co-workers upon the arrival at his home a fortnight since of a baby girl, who has been christened Mary Caroline. Miss Jell will doubtless have unlimited opportunities to become an operatic artist, under the guidance of the Columbia recording laboratory manager.

HOLD OPENING OF NEW QUARTERS

The Victoria Music Co., Wilmington, N. C., recently held the opening of their new quarters in the new Theatre Building, at the corner of Second and Market streets. The company features Victrolas and records exclusively.

A HERZOG Cabinet for the Victrola IXA

And we have other cabinets for all talking machines and phonographs. HERZOG Art Record Cabinets are correctly designed, substantially constructed and exceedingly well finished. They stimulate the sale of machines and records. Many are being sold daily to those who already own small machines and the dealer who does not carry a representative stock of HERZOG Record Cabinets is overlooking a prolific source of additional and easy profits.

A handsome new Catalog showing the complete line is just off the press. Ask for a copy of Catalog No. 22 and see the biggest and best line of Art Record Cabinets on the market.

COLUMBIA DEALERS HOLD MEETING

Lambert Friedl Prepares Many Interesting Subjects for Discussion at Third Monthly Gathering of Columbia Retail Dealers

The third monthly meeting of Columbia dealers was held last month in the auditorium of the Columbia Shop, and a representative gathering of Columbia retailers was on hand to participate in the various business discussions that constituted the program. Lambert Friedl, manager of the local wholesale branch of the Columbia Graphophone Co., who inaugurated these meetings, prepared for the dealers a number of interesting topics that were the subject of serious discussion, the principal topic being the new Columbia records, which will be issued on April 10.

Ralph W. Knox, advertising manager of the

Lambert Friedl

Columbia Co., delivered an effective and timely address regarding the company's advertising plans for the present and the future, telling the dealers how they can tie up their local advertising with this campaign, and pointing out just what the publicity will represent. Edward N. Burns, vice-president of the Columbia Co., who is taking a keen interest in Columbia recording,

and G. C. Jell, general manager of the recording laboratory, were also present at this meeting for the purpose of deriving all possible benefit from the dealers' suggestions, etc.

A number of Columbia artists rendered pop-

ular selections as a part of the musical program: the artists present including Chas. W. Harrison, Frank Croxton and Reed Miller, with Chas. A. Prince at the piano. A. Oblo, a successful Columbia dealer in Brooklyn, N. Y., also gave a number of musical selections.

At the close of the meeting the dealers expressed their hearty enthusiasm regarding the practical value of these business sessions, and it is quite likely that Mr. Friedl will call these meetings regularly for the next few months.

Columbia Retailers Who Attended Recent Monthly Meeting

ular selections as a part of the musical program: the artists present including Chas. W. Harrison, Frank Croxton and Reed Miller, with Chas. A. Prince at the piano. A. Oblo, a successful Columbia dealer in Brooklyn, N. Y., also gave a number of musical selections.

They give the dealers an opportunity to get together and talk over common business problems, and under Mr. Friedl's direction every possible effort is being made to co-operate with the dealers and carry out their suggestions along practical lines.

BEAUTIFULLY EQUIPPED QUARTERS

Now Occupied by the Outlet Co., Which Celebrates Its Eighteenth Anniversary

PROVIDENCE, R. I., April 3.—The Victrola department of the Outlet Co., of this city, recently celebrated its eighteenth anniversary, and Manager Harold A. Glasser, who for a long time was identified with the Victor trade in New York City, has been receiving congratulations on the success of this enterprise, which is the largest Victor establishment in the State of Rhode Island.

In the new talking machine department, which is located on the third floor of the monster Outlet building, there are eighteen soundproof booths, a complete repair shop, a record library, office, and a room devoted especially to the sale of records by telephone. The entire woodwork is finished in antique oak, and the booths are so

attractively arranged that the entire department is one of the most imposing and most artistic to be found anywhere in the trade. Mr. Glasser is quite enthusiastic about the trend of business this spring, and is preparing for one of the most satisfactory years in the history of this house.

NEW PAMPHLET ON DECALCOMANIE

Containing Samples of New Name Plates for Talking Machines by Smith-Schiffin Co.

The Smith-Schiffin Co., manufacturers of "Magnet" decalcomanie name plates, are finding the demands for their product to be greatly on the increase, so states Geo. A. Smith, of the firm. Since the first of the year the calls for samples and the return orders from dealers have been very heavy, and this, with the addition of a substantial demand from the manufacturing trade, has kept the company working to capacity. A new pamphlet is now being sent out to the trade containing facsimile illustrations of name plates together with price quotations.

Whether a commander of a ship or a stoker in the ranks, "act well your part; there all the honor lies." And if called upon to assume the heavy burdens and great duties—go to them without flinching.

PORTLAND, ORE., ASSOCIATION MEETS

Many Interesting Business Questions Discussed—Urged That Terms Be Held Up to Good Standard—Condemn Approval Practice

PORTLAND, ORE., April 2.—The monthly meeting and banquet of the recently organized Portland Dealers' Talking Machine Association, held at the Imperial Hotel March 19, did much to cement business relations between the dealers in this city and to wipe out unfair methods of competition. Following a delightful banquet, E. B. Hyatt, president of the association, called the twenty-one members to order and an interesting session was held in which many things of interest to the local trade were discussed.

L. D. Heater, manager of the Columbia Graphophone Co., and James Loder, manager of the talking machine department of the Bush & Lane Co., called particular attention to the necessity of keeping terms up to a dignified and businesslike standard—to put the goods before the public and sell them in a legitimate way. It was decided that the firms should all require payment of 10 per cent. down and require the contract to be paid up within one year.

Taylor C. White, manager of the talking machine department of Sherman, Clay & Co., and L. D. Heater started a discussion in regard to sending out records on approval. The practice was generally condemned, the speakers maintaining that the public abused the confidence of the dealers in this way and injured the records. There were a few present, however, who thought that better business could be obtained by the old method of allowing customers the privilege of taking records home to make their selections in that way.

Attention was called to the fact that there were dealers who were offering records free with higher-priced machines as a means of developing trade. Stress was laid on Portland's present prosperity and the needlessness of this method of getting business, and the dealers all finally agreed to discontinue any such practice. It was decided that the records henceforth should all be sold separately. Almost all the houses have been following this course of separate sales.

The best of feeling was exhibited at the meeting, despite wide variance of opinion on some of the subjects discussed, and there was no doubt that the association has co-ordinated the business, and that the firms are now on the best of terms with each other and are disposed to help one another, whereas before the association was formed each firm was out for itself to the detriment of the talking machine business as a whole.

The representative of The Talking Machine World was elected to honorary membership in its association.

MAURICE LANDAY GETS ACTION

Proves Right Man as Advertising Manager of "The Range Finder," Issued by His Artillery Regiment Now Stationed at Fort Hancock

Maurice Landay, brother of Max and James Landay, of Landay Bros., local Victor wholesalers, is a private in Battery E, Fifty-seventh Artillery, C. A. C., at present stationed at Fort Hancock, N. J., and incidentally fills in his spare time as advertising manager of "The Range Finder," a snappy publication gotten out in the interests of the regiment at various intervals. The magazine is full of clever cartoons, excellent jokes and interesting articles regarding army life and happenings at the Fort.

Mr. Landay has shown convincing proof of his ability as advertising manager by lining up several pages of good business for the publication, a number of local talking machine jobbers having taken liberal space.

The regular quarterly dividend has been declared by the Victor Talking Machine Co. on both common and preferred stocks, payable April 15 to holders of record March 31.

SHOW FILMS OF VICTOR PLANT

Talking Machine Dealers in Pittsburgh See Motion Pictures Showing How Victrolas and Records Are Manufactured—Large Attendance

PITTSBURGH, PA., April 10.—A large number of talking machine dealers in the local territory, as well as a generous sprinkling of the public at large, had the opportunity last night of seeing by means of motion pictures just how talking machine records are made in the factory of the Victor Talking Machine Co. The film, which has been shown in various sections of the country, was made under the direct auspices of the Victor Talking Machine Co., and its showing in this city was arranged for by the Pittsburgh Talking Machine Dealers' Association. The exhibition was held in the auditorium of the Chamber of Commerce, and officers of the association made special efforts to secure a large attendance, particularly of dealers and their employes. The general results were most gratifying.

COMES HOME FROM THE WAR

Louis Older, of Portland, Ore., Honorably Discharged From Canadian Service

PORTLAND, ORE., April 2.—Portland boasts one veteran of the great European war among its talking machine men—Louis Older, recently Private Louis Older, of the First Depot Battalion, Vancouver, B. C. Mr. Older prior to the war was known as the pace-maker and enthusiast of the Columbia Graphophone Co.'s Portland branch. He has now returned to Portland and has resumed his duties with the Columbia people.

Mr. Older obtained an honorable discharge after serving seven months in Canada and Scotland. He enlisted and was assigned to the forestry division and was in Scotland when he was kicked by a horse, the accident incapacitating him from further war duty—a broken ankle and stiff knee being the regrettable result of the accident.

OPEN NEW BRANCH IN ROME, N. Y.

Buckingham & Moak, well-known piano and talking machine dealers of Utica, N. Y., have opened a new store at 170 West Dominick street, Rome, N. Y., where in addition to pianos and other musical goods they will feature the Vocalion phonograph.

PLAN EDISON DEALERS' CONVENTION

Annual Sessions to Be Held at Waldorf-Astoria Hotel During Week Beginning June 3

The annual convention of the Edison phonograph dealers will again be held in New York this year, and is scheduled to occupy the entire week, beginning on June 3, with headquarters at the Waldorf-Astoria Hotel, where last year's convention was held. While, of course, it is too early to judge, it is nevertheless believed by the Edison officials that this year's convention will surpass in attendance that of last year, which in itself broke all previous records for gatherings of that nature.

It will be a dealers' convention in every sense of the word, and they will be in charge of all sections of the convention. Plans are now being laid for the preparation and reading of a number of special papers, both by the dealers themselves and by factory officials who will be invited to attend.

A particularly interesting fact in connection with this year's convention is that it will be held during the week of the National Music Show at the Grand Central Palace, at which Thomas A. Edison, Inc., will have an elaborate exhibit. The various piano trade associations will also hold their conventions the same week, which will tend to make New York City a musical center for the time being at least.

AN ATTRACTIVE ESTABLISHMENT

Odeon Music Co. Handling Brunswick Phonographs in New Brunswick, N. J.

NEW BRUNSWICK, N. J., April 3.—The Odeon Music Co., 28 Liberty street, this city, has a most attractive establishment for the sale of all kinds of musical instruments, including pianos, player-pianos, Brunswick phonographs, as well as music rolls and sheet music. The company, of which D. E. Elmer is president, and J. C. Cramer is manager, have installed three soundproof demonstrating booths in their phonograph department and have equipped them in an elaborate manner with rugs, comfortable furniture, decorative plants, etc., and report an excellent business.

Miller & Kades of Harrisburg, Pa., have recently installed six soundproof booths costing \$6,000. This firm is the sole distributor of the Columbia line in that district and reports an increase of 50 per cent. in business last year.

PHENOMENAL MONTH'S BUSINESS IN PORTLAND, ORE.

Leading Houses Make Most Encouraging Reports Regarding Business, But Complain of Shortage of Machines and Records—Fine Spirit of Optimism Prevails Throughout the Trade

PORTLAND, ORE., April 2.—Talking machine dealers in Portland report spring business of such volume as never before experienced in this district. March sales eclipsed all marks, both for machines and records, and the only real complaint heard among the dealers is regarding transportation conditions and shortage of stock.

So heavy has the demand for Victrolas been in Portland that an actual shortage exists and many dealers have lost sales through inability to deliver desired models.

The Wiley B. Allen Co., of Portland, followed its February business, which was 100 per cent. increase over that of February, 1917, by making even a better record for March, the figures for the latter month being even greater than that of the big San Francisco house. Shortage of stock alone prevented Wiley B. Allen from breaking all existing records at the Portland branch. In spite of this Paul B. Norris reports a wonderful sale of Victor and Edison machines and the rapidly diminishing stock testifies to the fact. Hopes are entertained for an early arrival of new machines and Mr. Norris says unless more stock is soon forthcoming there will be a big falling off in business.

Sales continue large at the Hyatt Talking Machine Co. store. E. B. Hyatt, manager of the firm, says trouble has been experienced in getting Victrolas, especially models Nos. 14 and 16. In one week 250 "Joan of Arc" records were disposed of by this house and 150 more have been ordered. A big new consignment of Edison records has just arrived and Miss Emma Reynolds, who has charge of the record department, says they are an unusually fine lot. Mr. Hyatt says the demand for Columbia machines keeps up well and this is especially pleasing inasmuch as the Columbias are much more easily obtained than are the other lines.

February and March were the biggest months

ever experienced by the Portland branch of the Columbia Graphophone Co. L. D. Heater, manager of the house, says that he had thought December, 1917, would for a long time be unparalleled, but that February showed 2,000 more records sold than in December, and March even more than in February. Columbia machines have been finding a greater sale than ever before, too, and this is in part attributed to the fact that a great deal of the competition has been removed because of shortage of stock in the Victor and Edison lines. Mr. Heater, however, says that there is little hope of escaping a real shortage of Columbia machines because of the ever-increasing demand and railroad conditions which prevent the arrival of enough machines to supply this demand. The Columbia Co. has heretofore always been able to supply all retail houses, but Mr. Heater says before long customers will have to wait.

So great has been the increase of business in the Dictaphone department of this company that it has been found necessary to buy an additional truck to speed the delivery. L. C. Callahan, manager of the Columbia Dictaphone department, says that the trade for February and March has never been equaled in Portland.

Sonora machines have been finding a ready sale at the Bush & Lane house. Patrick Murphy has been making some big deals, one \$375 Sonora invincible topping a goodly list of sales for the last month. Mr. Murphy also disposed of a big line of Victrolas in the last month. James Loder, manager of the department, declares that the high-priced Sonoras and Victors are the favorites in Portland and he says if present indications are to be trusted the month of April will be a memorable one for the department.

Excellent results have been obtained in the Victrola department of the G. F. Johnson Music

Co.'s store. The firm is now well established in business and though it has only been in operation five months, a growing list of customers attests to the fine management and the excellent character of the house. A lack of Victrolas and records interferes with some sales, but Mr. Johnson says freight is slowly delivering long-belated orders and a fine spring trade is regarded as certain.

The Meier & Frank Co. received a big shipment of Edison records which have been on the way for some time and a good supply of Edison machines is still in stock at this big house. Large sales of Edisons are reported, the \$100 and \$160 models being the best sellers. The house reports a shortage of Victor records and machines and therefore curtailed sales of these instruments for which the demand continues strong. Miss Madeline Larsen, saleswoman in this department, says there is a good stock of Columbia records and machines and that sales of these goods have been heavy.

The Wakefield Music Co. reports big sales of Brunswick phonographs. Several machines a day has been the record for the last month or so and Miss Hazel Raymond, in charge of the record department, says that never has the demand for records been so great.

The Reed-French Piano Co. has been having a fine trade in Columbia and Edison machines and the spring business is said to eclipse all previous marks at this store.

The Edwards Furniture Co. is congratulating itself on the receipt of a shipment of forty-seven Unolas from Chicago, which were on the road only twenty-one days. A big shipment of Brunswicks was also received by this house, which reports ready sales. J. E. Allen, manager of the talking machine department, says he is finding it increasingly difficult to procure enough sales people to look after the business which has been constantly expanding.

The Copp Music Shop of South Bend, Ind., Victor dealers, are planning to enlarge their establishment.

HALLET & DAVIS START CAMPAIGN

Famous Boston Institution Arrange for Active Development of Their Pathé Business With R. O. Ainslie as Manager—Affair Started With Dinner and Business Meeting

BOSTON, MASS., April 1.—Toward the middle of March the Hallet & Davis Co. started in on a campaign by way of booming the Pathé line of machines, and the program was opened with a dinner at the Hotel Thorndike which was attended by the officers and managers of the Hallet & Davis Co., and several from New York, including Eugene Widmann, president of the Pathé Co., and James Watters, the secretary of the company. The dinner was followed by a business meeting in the concert room of the Hallet & Davis Co., 146 Boylston street. The purpose of the meeting was to explain the Pathé advertising campaign and to perfect plans for the distribution of the Pathé line throughout New England. This meeting was presided over by O. A. Card, the Hallet & Davis retail manager, and there were speeches by C. C. Conway, vice-president of the company; Secretary Watters, President Widmann and R. O. Ainslie, who has come from the West to take the management of this new Pathé line for the Hallet & Davis house.

The advertising campaign was begun in one of the Boston newspapers on the following Sunday, and the local house began at the same time to establish many new Pathé dealers both in Boston and in New England, and one roadman has been kept busy doing nothing else but visiting those who are anxious to take on this line of talking machine. In the meantime the retail business has been very large this past fortnight, and it has been necessary to increase the floor salesmen to take care of customers who have been flocking to the store both day and night, for the Boylston street warerooms have been open every evening since the campaign was on. In the delivery of goods it is a fact that the vans and trucks have been busy up to midnight. Each day since the campaign was opened it has been gathering momentum and the success of the present Pathé campaign is now an assured success. The Hallet & Davis dealers everywhere have been heartily co-operating with the home offices and this has meant a lot in creating popularity for these machines.

Mr. Ainslie, the new manager, is a Williams college graduate, and has had some valuable experience in the commercial world, and therefore comes to the Hallet & Davis house well fitted for taking up this new work. He says that the whole phonograph business among the Hallet & Davis dealers all over the country is going way ahead of all expectations and the roadmen are putting in a lot of their time on this department of the business and are sending in large-sized orders for Pathéphones and Pathé records every day.

HEAVY LOSS CAUSED BY FIRE

Many Machines and Records Destroyed in Store of W. F. Frederick Co., in Johnstown, Pa.—Planning to Open New Quarters

JOHNSTOWN, PA., March 30.—The building occupied by the local retail warerooms of the W. F. Frederick Piano Co. was completely gutted by fire on March 17. The entire loss to the stock of the Frederick Co. totaled over \$60,000, and in addition to a number of pianos and player-pianos, there were destroyed over seventy-five Victrolas, and over 5,000 records, valued in all at about \$15,000.

Pending the opening of new retail quarters, the company is now doing business direct from its large warehouse, where, fortunately, there was a considerable reserve stock, and the other stores of the company were also called upon to fill gaps in the stock where possible. The business offices are maintained at 221 Franklin street, a few doors from the burned building, for the convenience of the public, until new quarters are ready.

HEARS OWN VOICE ON VICTROLA

Miss Marion Harris, Victor Artist, Visits Sherman, Clay & Co. in Tacoma, Wash.

TACOMA, WASH., April 1.—While Marion Harris, the well-known concert singer and Victor artist, was in this city recently, in the course of a recital tour, she visited the store of Sher-

man, Clay & Co., Victor wholesalers, and took occasion to listen to the reproduction of several of her latest records. The accompanying picture shows Miss Harris enjoying the sound of her own voice coming from the Victrola, with the Victor dog on the other side, showing a very intent, even though inanimate, interest.

LARGER QUARTERS IN FRAMINGHAM

A. A. Vose, who features the Vocalion phonograph in addition to his line of pianos in Framingham, Mass., has moved to larger quarters in the new Crouch Building that city. Mr. Vose has conducted a music store in Framingham for over forty years.

FIRE IN THE POOLEY PLANT

Several completed and partially completed talking machines were destroyed in a fire which broke out in the factory of the Pooley Furniture Co., Seventeenth and Indiana avenues, Philadelphia, recently, causing \$1,000 damage.

SHOWS NEW VIBRATING HORN

Western Inventor Devises Method for Supplementing Vocal and Instrumental Tones on Records by Special Vibrating Tongues Keyed in Sympathy With Different Tones

Several times recently authorities have claimed that the chief difficulty with the present form of talking machine is that one diaphragm is relied upon to record or reproduce, as the case might be, various instrumental and vocal tones each with its distinct series of vibrations, and that confusion results therefrom to a certain extent.

Now comes an inventor from the West, Frederick Lyon, of Fayetteville, Ind., to be exact, with a new talking machine invention designed to separate and emphasize the different vibrations of instruments or voices. Mr. Lyon's invention consists of a specially constructed sound chamber, which in the first place considerably augments the tone and which is equipped with a series of vibrating reeds set in a row and supported by wires, each reed resembling in magnified form the reeds in a harmonica, and keyed to respond in sympathy with certain vibrations. For instance, the rapid vibration of a soprano voice sets one reed in motion and the slower vibration of the basso affects another reed. These supplementary vibrations tend to emphasize the particular tone with which the reed is in sympathy, and the effect is remarkable to say the least.

Mr. Lyon had a machine in New York recently for the purpose of demonstrating it before various talking machine interests, and it was well received. A special horn and amplifying sound chamber can be placed in almost any talking machine instead of the ordinary sound chamber. It is of metal and, according to the inventor, can be manufactured accurately at little expense.

A Western concern is now planning to manufacture a new talking machine embodying Mr. Lyon's device.

NOW SETTLED IN NEW STORE

The Peoria Phonograph Co., of which O. F. Zimmerman is the manager, is now located in attractive new quarters on the second floor of the Hippodrome Building in Peoria, Ill. The company handles both the Edison and Brunswick phonographs, and reports a steadily growing business.

The Bliss Reproducer Will Play All Records

A new superior and scientifically constructed sound box—no mica, rubber or cork used.

Beautiful full, rich tone quality, clear articulation. It individualizes each voice and instrument in the record. Greater volume with lighter needles, thus minimizing wear on records.

A demonstration of the Bliss reproducer means a sale—each sale brings another, for every music lover who hears the Bliss reproducer wants one.

Comparative tests solicited. Write today for dealer proposition.

CINCINNATI TRADE COMPLAIN OF SHIPPING CONDITIONS

Talk of Revival of River Traffic—All Branches of Trade Enthusiastic Over Business Outlook—Demand for Art Styles Grows—Some Big Orders Being Booked—News of the Month

Cincinnati, O., April 6.—Shipping conditions are the one big bone of contention in the Middle West, the trade as a unit finding some outlet for its energy west of Cincinnati, but practically shut off from accommodations in the opposite direction.

Cincinnati just now is giving some attention towards a revival of the river traffic and this will be of benefit to the trade when regular lines are again established. The few steamers which survived the ice floes of the past winter are unable to handle all freight offerings. One boat, which did not turn a paddle in six years, reached the harbor Saturday and will be overhauled at a cost of \$30,000 and placed in the Cincinnati and Louisville trade. In due time the Government is expected to compel an exchange of freight between railroads and river lines which will benefit river communities. Last week talking machine merchants, taking advantage of the new postal regulations, attempted to send small-sized machines through the mails. This resulted in the local facilities being clogged and it also affected first-class mail.

F. F. Dawson, manager of the local branch of the Columbia Graphophone Co., is very enthusiastic over the present outlook, and believes the territory will make a splendid increase over last year. Since he took charge of the local branch nearly one hundred new dealers have been established, and an increase in business of nearly 100 per cent. over last year tells the story of the progress that has been made. The month of March just ended is by far the banner month in point of total sales for the Cincinnati branch since it has been established.

J. L. DuBrueil, who came to Cincinnati more than a month ago from the general sales department, New York office of the Columbia Co., is still here, and giving valuable assistance to Manager Dawson, and it is largely due to his efficient efforts in handling the details of the Cincinnati branch that "the mill keeps grinding."

Chester Luhman, representing the educational department of the Columbia Co.'s executive office, is in this territory visiting the schools in the interest of better music, and for the promotion of this phase of Columbia activity.

J. D. Bright, who joined the sales force of the local Columbia branch, is making splendid progress. Mr. Bright covers Kentucky territory, and in the five weeks he has been on the road he has opened fifty new accounts.

W. S. Givler, Columbia's "old stand-by," recently made a very successful trip, including Dayton, Springfield and Columbus. At Columbus he secured one initial order for \$15,000 from one of the largest music firms in Central Ohio.

Recent visitors among the Columbia dealers receiving their supplies from the Cincinnati branch were Walter Lewis, of the Lewis Furniture Co. of Huntington, W. Va.; W. F. Higgins, furniture dealer, Richmond, Ky.; C. A. Campbell, of the Campbell Furniture Co., Piqua; F. R. Follis, of Rike-Kumler Co., Dayton; Mr. Rothenberg, of May & Co., Dayton; C. C. Baker, of Columbus, and Mr. Kramer, of the Sterling Jewelry Co., Dayton.

A recent visitor to the local Columbia headquarters was Miss Sybil Sanderson Fagin, an exclusive Columbia whistling artist. Miss Fagin has made some recent Columbia records which are very attractive and are having rapid sale throughout the Cincinnati territory. She is a native of Springfield, O.

Manager Byars, of the Vocalion department of the Aeolian Co., reports a substantial increase in Vocalion business for March as compared with the same month last year. There were a number of high-priced instruments sold, and a tendency seems to prevail toward the more expensive instruments.

"There has been a shortage in Vocalions since Christmas," said Mr. Byars, "but shipments are beginning to arrive from the East again, and there is every reason to believe that we will

not be troubled with any further stock shortages.

"The recent advertising of the art styles has stimulated quite an interest in these new period models, and we have every reason to expect that from now on a substantial portion of our Vocalion business will be in the art style models."

The Fritsch Phonograph Co. is in receipt of its second order from Wilkes & Co., Ltd., Sydney, Australia, which firm is about to establish five branches in that country. This dealer is enthusiastic over the possibilities of the market for the Cincinnati machine. W. Musselman, of Cynthiana, Ky., has taken on the company's full line for his immediate territory.

The Crystola Co. is shipping practically all its output to Western points because of the limited railroad facilities eastward.

HOME FROM 5,000-MILE TRIP

W. P. White, of Thos. Goggan & Bro., Very Successful in Work of Disposing of Surplus Record Stock and Filling Up Own Gaps

HOUSTON, TEX., March 30.—W. P. White, manager of the wholesale Victor department of Thomas Goggan & Bro., this city, is now settled at his desk after a 5,000-mile trip throughout the Middle West and Eastern section of the country, calling on Victor wholesalers for the purpose of negotiating the exchange of surplus records.

Mr. White visited jobbers in Washington, Baltimore, Philadelphia, New York, New Haven, Providence, Boston, Pittsburgh, Cleveland, Chicago, St. Louis, and other cities, as well as calling at the factory in Camden, and reports that he was able to dispose of approximately 65 per cent. of his surplus record stock and was likewise able to obtain about 25 per cent. of records from other jobbers. He considers that the trip, unusual in its way, owing to the expense involved in wartime traveling, proved a very profitable venture, and has enabled Thomas Goggan & Bro. to increase by just so much their ability to take care of dealers' demands.

Emil E. Steinmetz, general sales manager for the Barron Victrola Co., Superior, Wis., will open a talking machine store in St. Paul.

Northern Ohio dealers of the Phonograph Co., Cincinnati, are demanding tone-test recitals, and Manager Peterson is now trying to arrange a tour for one or more artists to take place later in the month.

The Victor situation in this district is summed up as follows by Manager Rudolph Dittrich, of the Rudolph Wurlitzer Co.: "The transportation problem is still the greatest and most important question in the talking machine business to-day. The demand for Victrolas is excellent and the record demand is exceptionally good. There has been no improvement in freight and express conditions since the warm weather began and there is no very great improvement in sight. Accordingly, it behooves the talking machine trade to take this fact into consideration when ordering goods. If a dealer can stay ahead of the game far enough, he will suffer comparatively less. It will mean larger stocks and large stocks mean greater efforts on the part of the merchant in bigger sales."

PATRIOTIC DECALCOMANIE EMBLEM

Interesting Novelty Issued by the Globe Decalcomanie Co.—Sending Out New Booklet

The Globe Decalcomanie Co., Jersey City, N. J., have just issued a new novelty patriotic emblem to be placed on store windows, doors or the wind shield of automobiles. It contains the flags of the United States, England and France, with an American shield and the Statue of Liberty placed in the center. The emblems are neat and attractive in appearance and according to a recent statement of the president of the above company are becoming popular. The company is sending the emblems out to the trade at the retail price of twenty-five cents, which are followed by quotations for quantities. Under the caption of "You Need Decalcomanie In Your Business," the above firm is sending out a new folder with illustrations of transfer name plates.

OCCUPY NEW QUARTERS IN DENVER

DENVER, COLO., April 2.—The Swanson & Nolan Supply Co., local distributors and retailers for the Pathéphone and Pathé records, formerly located at Eighteenth and Curtis streets, have moved to new and larger quarters at 1514 Welton street, which have been remodeled to meet the particular requirements of the company's business.

What Does STRADIVARA Mean To You?

To some not acquainted with this wonderful machine it simply means a name but it really means more than the name because it is the symbol of all that is best in tone perfection, containing a sound board of seasoned Norwegian Spruce, a feature not to be found in other machines.

IT ALSO MEANS PROFIT TO HUNDREDS OF DEALERS

The steady ever-increasing demand for this superior talking machine is conclusive evidence of its ability to "stand up" by comparison with other machines as the repeat orders received from hundreds of satisfied dealers throughout the land testify.

Are you among the skeptical? Why not ask for our proposition and at least make comparison?

TRADE REACHES HIGH WATER MARK IN SAN FRANCISCO

Sales Made in First Quarter of 1918 Break All Records—Interested in Galli-Curci Concert—New Brunswick Agencies—Sonora Shop Expands—General News of the Month

SAN FRANCISCO, CAL., April 2.—Business in talking machines continues to grow in California, despite the war and the consequent cutting down of the factory output. March was one of the best months ever enjoyed by the trade, and this in the face of the fact that during the last week there was a falling off in the rush of business earlier in the month, due without doubt to the concentration of the attention of the people on the critical battle raging on the Western front in Europe. The first quarter of 1918 will go down in history as the high water mark to date in the sales of talking machines. Some good shipments have been received, and the general freight situation seems to be easier, but the arrivals have been absorbed so rapidly by the back orders on the books of the various dealers that it can hardly be said that the available stock is any better on the first of April than it was on the first of March. This is especially true of the higher-priced machines. Of the cheaper machines and medium-priced ones the situation is a little better in the aggregate, but there are still plenty of dealers who are short on this class of goods as well as on the expensive ones. However, with the enormous demand continuing so strong, a spirit of optimism is everywhere evident, and the almost universal good nature of the customers is taking the sting out of the "worry-bee," brought to life by the freight situation and the incompleteness of stocks.

Gray Features Brilliantone Needle

W. S. Gray, a dealer in phonograph accessories, states that he has just received a shipment of 7,000,000 steel needles from Japan. These needles added to his stock and the lot of 3,000,000 Brilliantone steel needles he recently received from New York, makes his stock conspicuous on the Coast at the present time. Mr. Gray thinks he should be congratulated on having accumulated such a stock of such a needful article at such a time.

New Brunswick Agencies

The Brunswick-Balke-Collender Co. has recently signed up two new agencies, one at Woodlands, Cal., and the other at Mill Valley, Cal. James F. Mahoney, salesman for the company, who injured his ankle while taking a train at Fresno a month ago, is very much improved and will soon be able to cover his territory again.

Miss V. E. Wells has bought the Martinez Music Store at Martinez, Cal., and has thus secured the Victrola and Sonora agencies in Mar-

tinéz. As Martinez is a rapidly growing community, located near one of the largest ship-building yards on the Coast, the business under the aggressive new manager should grow rapidly. Miss Wells will also carry a line of pianos as agent for Sherman, Clay & Co., of San Francisco.

Robert M. Bird, of the talking machine department of Sherman, Clay & Co., has resigned the position he held for many years to associate himself with the Victor Co. Mr. Bird has been succeeded by Otto Rathlin.

Frederick Stern, of the Stern Phonograph Co., visited the southern part of the State this month, and from the reception the Rex talking machine received in that section he thinks that the new branches he has in mind will be money makers from the start. He is planning several of these, but is held back until he can accumulate enough stocks of machines, records and accessories to insure ample supplies.

Galli-Curci to Sing

It is confidently expected that another big business is going to be done in the records of Galli-Curci, who is scheduled to sing here in May. Indeed, one of the prominent music dealers predicted that the sales would exceed those of the McCormack records. His reasons for thus believing are that despite the fact that the concert does not occur for over two months two-thirds of the immense auditorium has already been sold out, and secondly the demand for these records is far in excess of the demand for the McCormack records a month before he appeared. One reason for this is curiosity, as Galli-Curci is unknown to most of the music lovers of San Francisco.

Rearranging Sonora Stock

A complete rearrangement of the stock in the Sonora Phonograph Shop, on Stockton street, is being made. When it is completed F. B. Travers, the manager, says that it will afford a considerable increase of floor space. The shop will be entirely newly decorated and refurnished. Mr. Travers says that he intends to concentrate his efforts on the Victor and Sonora machines.

The John Breuner Co., of Oakland, has secured the exclusive agency for the Sonora phonograph for that city.

Children's Records in Strong Demand

The Burgess Bedtime Story records and the Bubble Books are proving excellent sellers in this territory. All the dealers handling these records, especially the talking machine depart-

ments of the department stores, which are visited by women with children more than the regular music stores, say the demand is increasing all the time and that the next holiday season should see an enormous demand for these records.

The Edison Phonograph Shop reports a good demand for its machine, especially for the higher-priced machines in art cabinets.

The W. W. Kimball Co. continues to spread in this State. It recently opened a branch store at Eureka and another at Woodlands. Both will handle the entire Kimball line, including the Pathé phonograph.

The Sonora Shop is displaying a new auxiliary record cabinet which is said to be becoming very popular. The manager says that since he began to show these cabinets he has had to double his order at the factory.

FOR TWO PRICE MARKS ON GOODS

Bill in New York Legislature Provides That Both Cash and Instalment Prices Must Appear on All Articles Sold on Credit

The attention of the trade of New York State has just been called to a new bill introduced in the Legislature by Assemblyman Earl A. Smith, of New York, which provides that all retail merchants in the State selling goods other than for cash shall attach to the article in plain figures both the cash and instalment price for the information of prospective purchasers.

TO MAKE THE TONKOLA

Wm. Tonk & Bro., New York, to Put Talking Machines On the Market

Announcement was made recently by William Tonk & Bro., Thirty-sixth street and Tenth avenue, New York, that they will manufacture a talking machine to be known as the "Tonkola." There will be several styles of cabinet machines which will be equipped to play all makes of disc records.

TO HANDLE VICTORS EXCLUSIVELY

W. J. Killea, who has for some years past conducted a very successful Victrola business in Albany, N. Y., while at the same time acting as telegrapher for the Associated Press, has given up his telegraph work to devote his entire time and attention to the talking machine business.

The North Hudson Maxaphone Service Co., of Union Hill, N. J., has been incorporated with a capitalization of \$100,000 for the purpose of transmitting news and music by wire.

SECURE PATHE JOBBING RIGHTS

Wm. Volker & Co., of Kansas City, Mo., Have Most Attractive Quarters for Pathé Display

KANSAS CITY, Mo., April 8.—Wm. Volker & Co., of this city, one of the leading wholesale concerns in this part of the country, is meeting with

Wholesale Pathé Demonstrating Room No. 1 very pleasing success in the merchandising of the products of the Pathé Frères Phonograph Co. This company recently secured the jobbing rights for this line in its territory, and its sales-

Demonstrating Room No. 2 men have already established many agencies in the different cities and towns.

The company has installed in its general offices in its building on Main, Second and Third streets two demonstrating rooms, which are shown in the accompanying illustrations. These rooms have been visited by many Pathé dealers in this territory and from far distant points, and these visitors have been unanimous in stating that they constitute one of the most artistic wholesale displays in the talking machine industry. Wm. Volker & Co., who installed these rooms for wholesale purposes only, should be congratulated upon their initiative and progressiveness in furnishing such attractive display rooms for the benefit of their dealers.

The Harlem Phonograph Shop & Typewriter Exchange, Inc., has been incorporated with capital stock of \$10,000, to deal in pianos, organs, phonographs, musical instruments of all kinds, typewriters, etc. The incorporators are: Allys Lennon, Francis B. Wood, and Joseph A. MacKnight.

WEEKLY RELEASE PLEASURES

Dealers Handling the New Nine-Inch Emerson Records—A. H. Cushman Optimistic

Arthur H. Cushman, director of sales of the Emerson Phonograph Co., New York, states that the Emerson dealers who have signed for an exclusive Emerson agency for the new nine-inch records report that the new weekly release arrangement is one of the most important factors in their merchandising success. The purchasing public are taking to the idea of weekly releases rapidly, and this plan gives the dealer an opportunity of putting the latest records on sale one to four weeks earlier than under the system of monthly releases.

The dealers have told Mr. Cushman that their customers now go in the store every week for new records instead of visiting their establishment only once a month. This not only gives the dealers an opportunity to sell the released records for that week, but almost invariably the customer picks out other numbers as well. The individual sales to a record buyer do not always run as high, but the total sales for the month to the individual customers have been greatly increased under this system, according to the records received at the Emerson offices.

The Emerson nine-inch records carry only the latest popular, patriotic, and dance hits, and the company is making it a point to place the big hits in the hands of its dealers in the shortest possible space of time.

UTILIZES AUTOMATIC REPEATER

Owner of Brooks Talking Machines Finds the Automatic Repeater of Convenience for Other Purposes—Uses Talker as Awakener

SAGINAW, MICH., April 6.—C. C. Brooks, president of the Brooks Mfg. Co., recently received a letter from one of the company's dealers describing a unique way in which one of this dealer's customers had utilized the automatic repeater on the Brooks talking machine.

This repeater is equipped with a dial which starts the machine and sets it to repeat a record any number of times, and Mr. Brooks' correspondent states that his customer has conceived the idea of turning the machine into a melodious alarm clock, by taking the dial from an ordinary alarm clock, and touching a spring to the alarm winding key, so that when the alarm goes off the spring will be wound up. At the other end of the spring is a loop which is hooked over the end of the pointer dial which starts the machine; this loop slipping off the end of the pointer after it has pulled it in the starting position.

It is understood, of course, that he has placed on the machine, the night before, the record which will most harmonize with his awakening dreams, and the dealer has been assured that each member of this particular family is enthusiastic over this innovation, for they find that this method of awakening starts the day off far more pleasing than the blare of the ordinary alarm clock.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., April 8.—March was another most productive month for the talking machine dealers in Philadelphia. The business ran at most of the stores considerably ahead of last year, and where there was a neck-to-neck race, or a slight falling off in business, it was not due to the desire for the instruments, but because the firms were unable to secure the much desired supplies.

Scarcity Still Prevails

The scarcity of machines and records is still striking, and especially for the Victor and Columbia product. The Victor dealers were very much handicapped again in March. They were not able to get nearly the number of machines for which they had orders, nor were they able to supply a full measure of the demands for the most popular of the records by this company. The Columbia dealers are also complaining of a shortage of stock. There seems to be no indication that conditions would be changed during this month, although the manufacturers are promising better results.

Tells of Pathé Expansion

Walter L. Eckhardt, the Philadelphia wholesaler and retailer of the Pathé machine, with headquarters at 1026 Chestnut street, reports that they had a wonderful increase in their business in March over that of February. He has just returned from a two weeks' trip to Atlantic City, where he went with his family for a much-needed rest after the strenuous work he encountered in getting the Pathé Shop into shape. To-day it is one of the business show places of this city.

Mr. Eckhardt says: "With each month my enthusiasm regarding the Pathé product increases, due to the continued increase in our sales, and the enthusiastic manner with which our trade is receiving the Pathé. Considering that we are still in our infancy and the fact that the Pathé products were unknown in Philadelphia prior to December, I feel absolutely confident that we are enjoying our full proportion of the local patronage.

"At the present time there are approximately seventy Pathé dealers in Philadelphia. Each and every one of these merchants contributes substantially to the demand that is being created. Had we been in business several years, a month like we had in March would have been readily

TALKING MACHINE DEALERS

can greatly increase their profits without additional overhead expense, by selling the world-famous

Weymann "KEYSTONE STATE" Musical Instruments

a combination that has proved to be an instantaneous success.

understood, but to have developed a momentum such as we experienced in the March business in so short a time is a decidedly new experience.

"At the outset of the month of March, as is my usual custom, different quotas were established for the various departments, which were accomplished, and frankly they were established at such figures that it required full steam ahead through the month to reach the goal. I would have been fully satisfied with the result, but when I state that the quota established was exceeded by the organization by 40 per cent. it reflects most creditably upon the organization, and discreditably upon my own judgment as a prophet. As an incentive for the month of

April I have placed my figures well in a comparative advance, and even at that I doubt whether my organization will not compel me to again acknowledge my inability as a prophet."

Among the visitors to the Pathé Shop recently were E. A. Widmann, president of the Pathé Co., and George W. Lyle, assistant to the president, as well as Frank Capps, the factory manager.

Weymann Enjoying an Active Business

H. A. Weymann & Son enjoyed a wonderful March business in their talking machine department, considerably ahead of last year in spite of the fact that they experienced a shortage of machines and records. They have again gotten their Victor force fully organized. The draft drew heavily upon this department of their establishment, but they have gotten three new men of much past experience in this line from other talking machine stores in this city, including Mr. Hoegerle, for a long time connected with the Columbia retail store here.

The Weymann firm have been having some unusual windows during the past month, and they find that this effort on their part fully repays them. There is no business window in Philadelphia that attracts more attention. Most all of the Philadelphia dealers are now using the Weymann record holder for their window displays, and they have sold this convenient record display contrivance pretty generally throughout the country.

March Business Was a Record-Breaker

The Columbia Graphophone Co., 210 North Broad street, report that their business in March was a record-breaker and was limited only by the amount of machines they were able to secure from the factory. They have had a phenomenal demand for their March records, and an especially big seller was "Baby's Prayer at Twilight." R. F. Bolton, the sales manager of the international record department of the Columbia Co., was at the Philadelphia offices recently in the interest of the foreign records. Among other trade visitors was Harry C. Grove, of H. C. Grove, Inc., and A. Weil, treasurer of Lansburgh & Brother, both of Washington, D. C. H. C. Kohn & Son, big furniture dealers at Eleventh and Filbert streets, this city, are

SELL RECORDS

Mme. Amelita Galli-Curci, Soprano

Because there may be a general shortage of certain records, there is no reason for "laying down". If you *sell* the higher class records, you won't need to make as *many* sales.

PENN PHONOGRAPH CO.
17 S. NINTH STREET PHILADELPHIA

“Value Received” are two mysterious words that are incorporated into legal documents. These two words mean much in the commerce of the world.

In every Victor record sale VALUE RECEIVED is the dominating force. No mention of this is required because *you* know your customer is getting great musical value and the *customer knows it*. This is true, so sell MORE RECORDS. Educate your customers musically! Feature better music—the higher priced records.

Buehn Service does help you render “value received.” It is exclusively wholesale, with every energy devoted to assisting your growth.

THE LOUIS BUEHN CO., PHILADELPHIA

VALUE RECEIVED applies with like force to Liberty Bonds. Buy them for yourself, and urge your customers to buy them. GIVE THE BOYS A HAND OVER THERE is the slogan. Buy a Bond!

LIBERTY BONDS

about to install a full line of the Columbia product.

The Grafonola Shops, Inc., in this city, at 1109 Chestnut street, are the first handlers here of the Columbia to advertise their records on the club plan, which several department stores have been doing for some time.

P. J. Leonard Addresses Edison Dealers

Blake & Burkart, the leading Edison representatives here, report that they had a most satisfactory month in March, and their business was way ahead of March, 1917. They were able to get machines through almost to the extent of their requirements, and the record situation has eased up considerably. P. J. Leonard, the sales manager of the Edison, was in Philadelphia on Tuesday and addressed the Edison Dealers' Association at their monthly meeting held at the Bingham House. C. J. Gardner, the traveling representative of Edison, was also in attendance at this meeting. The association is making elaborate plans for its annual meeting which will be held the first Tuesday in June, when it will have several prominent Edison talking machine men to make addresses.

Start Sonora Concert Campaign

The Sonora Phonograph Co., 1311 Walnut street, will start on Monday evening, April 8, and continue until the end of the month, one of the most remarkable series of concerts ever given in this city at a talking machine establishment. They will be given in the Sonora Hall, well suited for the purpose. They will be by invitation to the Philadelphia Navy Yard men, the men at Hog Island, Cramps Ship Yard and the Philadelphia Arsenal. Aside from the Sonora programs there will be a number of assisting artists.

The Sonora business in Philadelphia was very fine in March, and Manager F. D. W. Connelly is very optimistic as to the spring business on this remarkable machine. The Sonora visitors the past month included Frank I. Coupe, sales manager, and Mr. Pringle, of the main New

York office. Mr. Connelly spent several days in New York last week.

To Handle the Cheney Phonograph

Strawbridge & Clothier, the department store people, having purchased the Henry F. Miller local store, instruments, leases, prospects, etc., they will also take over the handling of the Cheney phonograph here which has been handled from the Miller store as the Cheney headquarters in this city. G. D. Shewell, who is the Eastern representative of the Cheney machine, will remain as such here, and will either have his headquarters at the old Cheney store, 1105 Chestnut street, or if a piano firm take that building, he will open private offices as the Philadelphia representative of the Cheney phonograph. There is some likelihood of the machine remaining where it is.

Report Fair Month's Business

The Louis Buehn Co. report that their business in March was fair, and was as large as the machine and record supply would warrant. There was a great scarcity of Victor records in March, and all the handlers here in that line have experienced the same handicap. The shortage of records in March was greater than it has ever been before, and conditions are not very encouraging for a betterment in April.

Louis Buehn and his family motored to his cottage to Ocean City last week and spent the Easter holidays there.

W. E. Holland, representing the Robelen Piano & Talking Machine Co., of Wilmington, Del., was a Philadelphia visitor the past week. He reports conditions good in his section.

Joseph Goodman, the Manayunk handler of Victor talking machines, contemplates making extensive alterations in his store, including the addition of several more booths.

The Geo. D. Ornstein Co. are gradually getting their new building in shape. The general offices on the front of the building, second floor, with Mr. Ornstein's private office in the rear of this floor, have been handsomely furnished. The

third floor will be devoted to the record department, and the fourth and fifth floors will be used for reserve stock. George A. Lyons is the assistant to Mr. Ornstein.

Featuring the Ediphone

The Edison Dictating Machine Co. in Philadelphia have had all their stationery and advertising matter changed to the new name, “Ediphone,” and will shortly place this new title on their window. They enjoyed a wonderful business in March. They are preparing an elaborate exhibition for the industrial show which will be held here from April 15 to 20. They will have two booths, Nos. 67 and 68, and as a feature of their exhibition they will demonstrate the Telescribe. N. C. Durand, vice-president of the company, was a recent Philadelphia visitor. The local store has opened a branch office for the Ediphone in Wilkes-Barre, Pa.

Booked Good Business on Trip

The Penn Phonograph Co. report that their business in March was good, very much of an improvement over January and February. They note that machines are coming in very slowly, and as to records they can only depend on the monthly list.

T. R. Clarke, manager of the wholesale department of the Penn Co., and T. W. Barnhill, a member of the firm, recently made a trip to New York, Pittsburgh, Detroit, Chicago, Cleveland and Indianapolis, calling on the various jobbers at these points and looking over their plants with a view of adopting various ideas which they could pick up for use in their business here.

Some Trade Brieflets

Charles K. Bennett, of the Eclipse Talking Machine Co., of Cleveland, O., was in town calling on the various dealers.

Rudolph Wurlitzer was a Philadelphia visitor the past week.

The local Brunswick-Balke-Collender Co. offices tell of expanding business in the Brunswick phonograph in this territory.

Is there any form of local advertising—bill boards, window display or store fixtures—that you suspect you're not getting what you might get out of? The Columbia Dealer Service Department will go into the problem with you willingly.

Columbia Graphophone Co.
Woolworth Building, New York

BIG STRIKE HAS LITTLE EFFECT ON KANSAS CITY TRADE

Talking Machine Dealers Suffer Very Little as Result of Tying Up of Transportation Lines—Offer to Take Pianos in Exchange for Talking Machines—Situation Reviewed

KANSAS CITY, Mo., April 5.—The business of this territory in talking machines has gone steadily forward during year after year despite drought, floods, and all sorts of incidents that might be considered obstacles. The local trade ran up against the worst retailing conditions during the week starting March 27 that it has ever encountered. Although the weather was fair, and there was also a general prosperous condition, a sympathetic strike, starting that morning, so upset the people that very few retail stores did any business the rest of the week. The union men who joined the sympathetic strike, about 4,000 in number, were supporting laundry drivers who, since the middle of February, have been trying to get concessions from their former employers. By the last of the week the number of strikers had increased to more than 10,000, and after a total suspension of street car service for twenty-four hours, from Thursday afternoon, the street cars were running at about 50 per cent. of their usual schedules. It is a remarkable fact, however, that talking machines happen to be one of the few commodities that did not suffer severely from the general depression. Where, for instance, people who had been planning to get a piano might postpone their purchase till the trouble was over, those who were getting talking machines were all the more eager to have them in their homes so that they might have some consolation through being forced to forego their street car rides and their usual outdoor pleasures that involved possible mixing up with the strike trouble. In only a few instances were stores that handled talking machines directly affected by the strike. These were chiefly furniture stores where union workmen quit to join the sympathetic movement.

An advertisement in Kansas City papers offering to take pianos in exchange for talking machines attracted some little attention. Queries of several of the music dealers, however, revealed that most of them were making no special effort to pull in pianos. As a matter of fact, even those who dealt chiefly in talking machines, merely handling pianos in the disposal of their used instruments received in exchange, did not exploit their exchange features prominently. One dealer suggested that as a rule the pianos that people wanted to exchange for talking machines were in such bad condition that they could not economically be put into shape for sale.

Another dealer, however, said that he occasionally did take a piano in exchange for a talking machine; in one instance, of recent date, the piano was a \$350 instrument he had sold to the customer seven years ago—and it had not been tuned since its purchase. The customer wanted to sell this piano for a \$50 credit on a talking machine. The instrument was in good condition despite its apparent neglect.

The dancing classes of the Edison Shop in Kansas City have proved to be an even more important feature of the life of the city than was anticipated when they were begun. Photographs of some of the dances were recently exhibited in the window of the retail shop and attracted even more attention than some of the spectacular stunts that were being pulled in windows nearby, for these photographs showed Kansas City young people in these artistic poses. A group of the dancers who have been learning and practicing at the Edison Shop are arranging for a public performance at a local theatre.

A. A. Trostler, manager of the Victrola department of the Schmelzer Arms Co., said that nothing seemed to make any difference in the big demand for Victrolas and records—neither labor unrest, the price of wheat, nor war prices. People continue to demand machines, in all styles, and they are bought before they arrive. Mr. Trostler says it is same old story, of course, about deliveries, he himself continuing to almost wear a path to the factory with his frequently trips there after the goods.

THE TIMELY EDISON MESSAGES

Unique Editorial-Like Announcements of Thos. A. Edison, Inc., Attract Wide and Favorable Comment—Good Work for Music

The Edison messages appearing under serial numbers in the columns of The Talking Machine World monthly constitute something unique in advertising. These messages have a distinctive editorial flavor, for without exception the Edison "selling talk" one would naturally expect to be included in all Edison advertising copy is omitted, and forceful, well chosen English is utilized to drive home points of overwhelming interest.

The officials of the Edison Co. have evidently recognized that a part of its duty as one of the leading institutions of the industry is to interpret the relation between current national conditions and the Edison retailer. Meanwhile interpreting in the trade press the effect of current and national conditions for the Edison retailer is at one and the same time interpreting conditions for the entire industry. Hence the Edison messages are publicity of an exceedingly influential, broad-minded sort, and the

William C. Chestnut, of the Brunswick Shop, was one of the talking machine men who, in belonging to the Missouri Seventh Regiment, Home Guards, was called out during the recent strike.

Mrs. Nellie Williams, manager of the Victrola department of the Jones Store Co., stated that business continued splendid and that there was not quite as great difficulty in getting machines as was the case around Christmas, and that the department has finally gotten its Christmas substitutions on machines cleared up. Mrs. Williams stated that no unusual advertising was being done—that business was so good it was not necessary.

Miss Patsy Ann Epperson, who had been with the J. W. Jenkins' Sons Music Co. for some time, is now connected with the Wunderlich Piano Co. Miss Ruth Burriss, formerly cashier, has succeeded Miss Epperson in the talking machine department.

Porter Lasseter, formerly head of the talking machine department at the Kansas City Photo Supply Co., has accepted a position with the Paige Motor Car Co. His successor has not yet been named.

The talking machine made by Wilson & Co. is said to be getting a wide distribution, especially in the smaller points.

retail merchants handling all makes of instruments who read these discourses will benefit the industry by propagating such forceful utterances as have appeared in the series of Edison messages under such captions as "The Recent Food Control Legislation Will Do Much to Stabilize Living Conditions," "Woodrow Wilson's Address to the Soldiers of the National Army," "General Optimism in Command," including a quotation from Printer's Ink; "Music's Part in War Times," including a quotation from the New York Evening Mail; "Where Music Stands," "The Need for Music," and "What the World Would Lose If I Lost Music," and that very timely talk which appears on page 10 of this issue of The World, entitled: "Forging the Third Link," a forceful plea for the successful flotation of the third Liberty Loan, which we aim to make a landslide, so that it will crush militarism out of the world forever.

Every day music is proving both in civil and military life that it is the fourth essential of life.

Thos. A. Edison, Inc., are certainly doing their bit in a most emphatic way in spreading the gospel of good music, and inculcating a deeper spirit of patriotism among the people.

Jamestown, N. Y.

The Real Importance of the Talking Machine in the Daily Life of the People

The talking machine dealer who is not taking full advantage of the present demand for both machines and records for various military units in the training camps, and for groups enlisted in the naval service of the country, is overlooking a mighty fine chance to corner some publicity not only for himself, but for the trade in general—publicity that is going to put the talking machine business in an enviable position perhaps in the eyes of the Government under conditions that may develop if the war continues.

One can hardly pick up a daily paper these days in any part of the country without seeing therein either letters direct from soldiers asking for donations of machines, and particularly records, or appeals from various organizations

for records for the fighting men. Then, too, the daily papers themselves in many instances publish requests that the public contribute new and old records and music rolls sent to certain distributing centers for delivery to camps and ships. Never has the public of the United States had brought home to them the real importance of music in the daily life of the people. If the men in training for deadly combat find it necessary to have music to lighten their leisure hours, how necessary must that same music be in the daily life of the people at home.

In the matter of supplying music for the soldiers and sailors, the talking machine shines in a class by itself; no matter how sudden the shifting of military units or how limited

the transport space for extra equipment, there is always found room for a talking machine and records. There is hardly a daily paper or magazine in the United States featuring war photographs that has not at one time or another published pictures of soldiers and sailors grouped about a machine and listening to their favorite records. The dealer who makes proper use of these pictures in his window displays and in his store—who takes full advantage of the publicity that the war is giving the talking machine, who enters into the plan for supplying outfits for the fighting men, is putting himself on the map in his local community. The more generous the spirit in which he participates in the drive the more substantial will be his returns.

COLUMBIA LINE WITH KRAKAUER

Krakauer Bros., 125 West Forty-second street, New York, have secured the agency for the Columbia line of talking machines and records, and this new department will be in charge of Miss D. R. Schwinger, formerly with Bloomingdale Bros. Milton Weil, manager of these warehouses, has devoted generous space for the display of this line, and the various models are displayed amid surroundings that show them off to their best advantage. It is planned to maintain a full stock of records at all times.

ATTRACTIVE HEINEMAN FOLDER

The Otto Heineman Phonograph Supply Co., Inc., has just issued a very attractive four-page folder that is devoted primarily to the products of the company's Dean division. On one page of this folder there are presented some of the most popular styles of Dean steel needles and attention is also called to the fact that the company manufactures permanent needles to play Pathé records and sapphire and genuine diamond points to play Edison records.

There is also shown on another page of this folder two of the most popular motors manufactured by this company; these motors being the Meisselbach Motor No. 18, and the Heineman Motor No. 77. It is suggested that the manufacturers utilize the idea of combination orders for these motors, and it is mentioned that the ideal combination for a \$165 machine is the Meisselbach motor No. 18, tone arm No. 98, and sound box No. 2C. The ideal combination for an \$85 machine is the Heineman motor No. 77, tone arm No. 11, and Ideal sound box No. 2. The company offers to send interested manufacturers and dealers a copy of its complete catalog, which includes sixteen different styles of tone arms and sound boxes.

GETS CARLOAD OF PHONOGRAPHS

HELENA, MONT., April 2.—The Montana Phonograph Co., Edison jobbers in this section, have had the stock problem solved in some measure for them through the receipt of a full carload of new Edison machines. The shipment included 129 machines, and was valued at \$23,000. It represents an additional order and will serve to supplement the stock regularly received by the company.

J. C. ROUSH ENJOYING LIFE

J. C. Roush, president of the Standard Talking Machine Co., Pittsburgh, postcards from Florida that he is enjoying his midwinter vacation with his family to the fullest extent. He has visited Palm Beach, Key West, Miami and other resorts, and states that he is having "the time of his young life." He expects to return about April 15 in fine fettle and ready for a busy campaign.

A Display Card Series of Value

The cards are 14" x 22", each individual card painted by an artist, and present a striking sales appeal for Victor Records.

Designed especially for Bruno Service and are "exclusive." The service consists of two cards monthly.

LUCIEN MURATORE
Exclusive Pathé Artist

The Quality Phonograph

And it started something when Muratore sang the Marseillaise at the Metropolitan Opera House

OF course it's a Pathé Record. Muratore only records for Pathé and it's the one he made for Pathé just after his return from service in the French army.

But what *did* it start? First, it brought the Metropolitan Opera House audience to its feet with one of the greatest ovations ever accorded a singer.

Then it turned loose the greatest activity in the sales of Muratore Records that Pathé has ever known.

And what's more. Something has shot ahead the sales of all Pathé Records.

Do you know that any dealer can get in on it if he wants to—because Pathé Records are playable on any standard make of machine.

Write for particulars.

PATHÉ FRÈRES PHONOGRAPH CO.
20 Grand Avenue Brooklyn, New York
Pathé Frères Phonograph Co., 5 Clifford St., Toronto, Ont.

Ever Realize the Real
Selling Value in the name—

The Quality Phonograph

THE minute you do, you're making a good start—yes, for yourself.

How many times do you suppose "Pathé" is flashed on the motion picture screens? No use computing nor guessing—anyway, it's thousands—hundreds of thousands.

What does that mean to a dealer in selling Pathé Phonographs—when Pathé is only identified with *quality* product—whether phonographs or pictures?

Perhaps you haven't thought of it before, but you should now.

Write for "The Other 20%" booklet. It will tell you something you ought to know.

PATHÉ FRÈRES PHONOGRAPH CO.

20 Grand Avenue

Brooklyn, New York

Pathé Frères Phonograph Co., 5 Clifford St., Toronto, Ont.

Path Phonograph \$175
Other Models \$25 to \$225

No Needles to Change

The Pathé Sapphire Ball takes the place of needles. It need not be changed.

Long Life to Records

The Pathé Sapphire Ball cannot possibly cut, grind, rip or mar the record's surface.

The Pathé Controla

With the Pathé Controla you may increase or decrease the tonal volume of the Pathé Phonograph at will.

Plays All Records

Each Pathé Phonograph plays not only Pathé records, but all other makes of records, and plays them perfectly.

CONVENTIONS OF DEALERS ARE HELD IN INDIANAPOLIS

Edison and Pathé Retailers Entertained by Jobbers of Their Respective Lines—Volume of Business on the Increase—Planning Co-operative Advertising Campaign—Other News

INDIANAPOLIS, IND., April 4.—The talking machine business both in the wholesale and retail fields during March showed an increase over January and February, local dealers report. Most of the dealers express the opinion that business is getting better and steadier every day and they are not expecting even the strenuous Liberty Loan campaign to have much effect in curtailing the business for April.

A meeting of the dealers of the Kipp Phonograph Co., jobbers of the Edison, was held March 22, when Harrison Durant, manager of the Edison department for financing dealers' instalment paper, told the dealers of the new arrangement the Edison Co. has made to enable dealers to expand their business. The dealers were enthusiastic over the plan, and Walter Kipp, president, and Jewell Cartmill, secretary of the Kipp Co., expressed the belief that the plan would result in a greatly increased Edison business, as it will enable the smaller dealers to handle their business more efficiently.

A meeting of the Pathé dealers of the Mooney-Mueller-Ward Co., jobbers of the Pathé line, was held two weeks ago and Charles T. Reinhart, from the Pathé factory, demonstrated to the dealers the mechanical features of the machines, showing them how to adjust the machines in event any trouble arose.

R. B. Goldsbury, in charge of the company's Pathé department, said that the Pathé "Pop" supplements are making a big hit with the dealers and are getting the results as shown in the increased record sales. Mr. Goldsbury added that there seems to be a phenomenal demand for the 175 model Pathé, and that the general preference of the trade leans to the higher-priced models with the art models becoming daily more popular.

W. E. Pearce, of the phonograph department of the Brunswick-Balke-Collender Co.'s branch

here, reports that the new "Ultona" tone arm and reproducer is proving popular with the trade. Billboard advertising being done in this territory for the Brunswick is also getting results, Mr. Pearce said.

Ben Brown, manager of the Columbia Co.'s branch, said that March business showed an increase of 50 to 60 per cent. over March last year. Mr. Brown pointed to the fact that business is unusually good in the smaller towns in his territory as substantiating his belief that business is getting steadier and better every day.

Louis Sayers is now traveling in Kentucky for the Columbia Co.

The Craycraft Dry Goods Co., of Noblesville, Ind., has put in a talking machine department, handling Columbia machines.

H. A. W. Smith, manager of the Pathé Shop, is in Buffalo, N. Y., at the offices of the H. R. Ness Co., owner of the shop.

O. C. Mauer, manager of the talking machine department of the Kiefer-Stewart Co., jobbers of the Sonora, said that the price increase of Sonoras, which went into effect March 1, had no effect on sales, and that March business was good.

Business continues good at the Stewart Talking Machine Co., wholesalers of the Victor line, the chief difficulty being in getting the machines. Emerson Knight, advertising manager of the company, is expecting to receive a call to the colors soon. He has been accepted for a training school for military balloon observation work.

George Standke, manager of the Brunswick Shop, is proving to be as enthusiastic a plugger for the third Liberty Loan as he is for the Brunswick. He already has more than \$2,000 in subscriptions for the loan, and is making his store the headquarters for the American Club

Liberty Loan campaign. Mr. Standke is also advertising the Liberty Loan in connection with billboard advertising being done for the new "Ultona."

C. P. Herdman, of the Columbia talking machine department of the Baldwin Piano Co. store, reports that March business was good, and that the business that is being done is high class on a sound basis.

One of the daily newspapers is planning a co-operative dealers' advertising campaign in connection with publicity boosting music in the home, and most of the music dealers are getting in on the proposition which is somewhat similar to the campaign that has been conducted in Milwaukee. The local music dealers have recently on several occasions, subscribed to co-operative advertising, and some of the dealers who were boosting for a talking machine dealers' association point out that the reason the attempt to start the association failed was because some of the dealers held back on the proposition of doing any co-operative advertising. These dealers are now doing it with the newspapers.

A. H. Snyder, manager of the Edison Shop, said that March business was good, and the general outlook for spring business is excellent.

Serge L. Halman, manager of the Aeolian Co. branch, said that the Vocalion business is good; in fact, this instrument is steadily increasing its popularity. Mr. Halman is an ardent worker for the Thrift and War Savings Stamps.

He is acting as chairman of the advertising committee of the local retail merchants, having got up the scheme of co-operative advertising on the part of local merchants to boost the sale of the stamps. This campaign will start after the Liberty Loan campaign.

"We merchants don't have to worry about business if we keep a stiff upper lip and keep plugging," said Mr. Halman. "The people have the money and they will buy and we can all afford to do our part, too, in helping in every way to win the war."

BUFFALO TALKING MACHINE MEN AFTER COUNTRY TRADE

Combing the Rural Communities as Roads Become Passable—Give Earnest Support to Liberty Loan—Arrange Special Display—More Trade Members in the Military Service

BUFFALO, N. Y., April 9.—In a whole-souled, patriotic way Buffalo talking machine dealers and their salesmen are contributing their time, enthusiasm and financial aid in helping to make the third Liberty Loan a success. Even if the public purse is almost turned inside out this month and a veritable Niagara of dollars is being diverted to the Government by loyal Buffalonians the dealers are still forging ahead with their "Business Better Than Usual" slogan. Greater efforts than ever have to be put forth to reach the high business mark of last April. Some of the dealers say they are attempting "to go over the top" and even surpass their trade figures of a year ago.

Rural highways are becoming passable for the motor cars of the salesmen whose business it is to reach the farming population. Deliveries of talking machines throughout the country are now made with little difficulty. Easter and patriotic records have been in great demand.

At the store of Victor & Co., Pathéphone jobbers, there was a remarkable display to promote the sale of Thrift Stamps. There were life-size representations of President Wilson, General Pershing, Colonel Roosevelt, Washington, Lincoln and Uncle Sam. In a window displaying cards to advertise the sale was George E. Beckwith dressed as Uncle Sam. At a table just inside the door was Marie M. Ginther, representing Liberty and selling the stamps. The display attracted large crowds and large sales of stamps were made.

In the window of Walbridge & Co., Victor dealers, there also was a Thrift Stamp display. There was a life-size picture of Liberty clinging to a cross. To the right was a life-size representation of an infantryman, and on the other side a U. S. marine, while the window was handsomely decorated in the national colors. Thrift Stamp advertisements were well placed in the window.

E. O. Hock, salesman for Robert L. Loud's Victrola department, is at Camp Upton, as is Harold Kuhn, of Kuhn Bros.

Mme. Galli-Curci had to postpone her April engagement in this city on account of illness. Local dealers, however, boomed the Galli-Curci records during the week.

Bach Utley, who formerly had charge of the New Edison department of his father, C. H. Utley, is attending the U. S. Aviation School at Lake Charles, La.

The Winegar Piano Corp., Columbia dealers, has been organized in Buffalo with a capital of \$30,000, by A. C. Winegar, F. W. Zabel and C. A. Winegar. This concern has taken over the store of Winegar, Lindsay & Seales.

G. H. Poppenberg, Inc., of Buffalo, capitalized at \$500,000, has been incorporated. The concern handles talking machines. "Instead of a partnership this firm now becomes a corporation," said G. H. Poppenberg.

J. N. Adam & Co., Victor dealers, will have special Liberty Loan displays this month. Ralph C. Hudson, president of the company, will represent the Buffalo Retail Merchants' Association in the campaign.

Increased wages for Buffalo mechanics are helping trade at the local talking machine stores. One industrial plant, constantly seeking workmen, is running illustrated street car ads to show that men who work at that factory can have plenty of money to buy all kinds of comforts, talking machines included.

Corporal P. H. Barenthaler, of the 303d Engineers, Camp Dix, has asked Buffalonians to ship some of their used records to the boys in camp.

Charles L. Bricka, son of Charles F. Bricka, of Bricka & Enos, Columbia dealers, has been promoted to captain and assigned to Company 2, train and military police division, National Army. He is a graduate of the first officers' training camp at Madison barracks.

Jascha Heifetz, violinist, whom Buffalo music critics called a "superb artist," recently played in this city. His appearance here helped the sale of the Heifetz Victor records.

A fifty-first anniversary sale was recently conducted by Adam, Meldrum & Anderson Co., Pathéphone dealers. When this store was founded in 1867 Buffalo's population was only 110,000. T. M. Gibson, vice-president and retail manager of the concern, was employed at the store when it was first opened.

Richard Nevils has joined the sale force of John G. Shuler, the Sonora dealer.

Harold Verbeck, of the Verbeck Musical Sales Co., has joined Uncle Sam's aviation section at San Antonio, Tex. On account of his departure the Verbeck Co. has closed its Genesee street branch, which he managed.

Work of remodeling the building at 733-737

Main street, where the Columbia Graphophone Co.'s wholesale department will occupy the second and third floors, is progressing rapidly. The new quarters will be ready for occupancy May 1. O. M. Keiss, manager of the Buffalo branch, has been ill for a few days. George W. Hopkins, general sales manager of the company, was a caller. March business at this store was greater than that of March, 1917. April trade may be somewhat hindered by temporary embargoes on eastbound shipments. For a time the company may have to use trucks to ship machines east of Buffalo.

Wallace Currier has been appointed manager of the William Hengerer Co.'s Victrola department. He succeeds Herbert A. Brennan, now traveling representative of the Victor Talking Machine Co. Mr. Currier was formerly with the Victrola department of the Lion Drygoods Co., Toledo. Before going to Toledo he had an Edison store of his own in Portland, Me. Mr. Currier conducted a Victrola week early in April. Special advertising and window displays contributed to the success of this event.

VALLORBES Economical Semi-Permanent NEEDLES

Satisfied Customers

Heavy responses met the initial announcement of our needles. Large re-orders have invariably resulted where samples have been sent.

These needles are semi-permanent and may be used many times with true reproduction. They wear themselves rather than the record and being parallel in shape, as they wear down they do not enlarge their diameter as does an ordinary tapered needle, hence prolong the life of record. They are produced in three grades—soft, medium and loud.

BUY LIBERTY BONDS and THRIFT STAMPS

We advertised this last month and again devote part of our space to this cause.

Another patriotic pleasure is to use the Vallorbes needle and thus conserve steel for Uncle Sam.

(Hoffay products are protected by patents granted and pending. Infringements will be prosecuted.)

What Y. M. C. A. and Other Agencies Are Doing to Provide Music for the Fighting Men

There are various national organizations at work providing music for the army and navy men both at home and abroad. Perhaps the most important of these is the Y. M. C. A., which recognized at an early date the value of music in maintaining the morale of the fighting men.

During the past month The World has learned much through Y. M. C. A. officials anent what this worthy institution is doing to see that the men in the service have plenty of talking machines and records. The general policy of the

conducting more aggressive local campaigns for talking machines and records, they will find the explanation in that fact.

The reports to date indicate that comparatively few machines have been received by the association through donation, but that a great many records have been given by the public, and several manufacturers, notably the makers of Victor, Columbia and Emerson records. The data available shows, however, that the free donation of records and machines to the Y. M. C. A. represents a small percentage of the total

and for the men in our own expeditionary forces. No exact figures can be given as to the total number of machines and records that have been sent to the other side. Last month, however, in a news bulletin showing what the Y. M. C. A. has shipped abroad, there were included one hundred talking machines and 2,500 records, all sent over in a thirty-day period for the use of our soldiers in France.

There has been much controversy over just what kind of records the soldiers prefer, and the association has gone so far as to conduct

Copyright, Committee on Public Information

In a Y. M. C. A. Hut at a Cantonment

One of the Recreations in the Y. M. C. A. Building at Columbus Barracks, O.

Y. M. C. A. is against the solicitation of either machines or records on a free contribution basis, although good use can be made of all machines and records that may be donated. No direct donations are solicited because it is felt the American people have stood nobly behind the association in the way they oversubscribed to its national campaign for money last fall. There are so many war charities continually approaching the public for outright donations that the Y. M. C. A. prefers to acquire its materials in a regular business way, with the money that has been subscribed for the purpose. Therefore, if talking machine dealers should wonder from time to time why the Y. M. C. A. is not

number of machines and records that have been given to the fighting men, because the majority of the donated instruments and discs have been presented to particular soldiers in the different cantonments or to specific companies, corps, etc., and through the Y. M. C. A.

The Y. M. C. A. has long since established a "hut" in each of the military camps in the United States. In one of the largest camps several huts have been erected, each being equipped with a talking machine and an excellent supply of records.

A considerable number of machines and records have been sent to Europe for the entertainment of men in the armies of our Allies

special investigations to determine what kind will give the "men in khaki" the greatest pleasure. On the evening of March 22 P. F. Jerome, purchasing agent for the National War Work Council of the Y. M. C. A., gathered together six sailors from the Brooklyn Navy Yard and six soldiers loaned for the purpose by Captain Andrew C. Gardner, post-adjutant of Fort J, Governors Island. These men-of-war became musical critics for the time, and sat as a jury to determine which out of a total of 15,000 records would bring the greatest joy to Uncle Sam's fighting forces. The members of the jury were picked at random without regard for

(Continued on page 50)

On Selling Records

There are many excellent ideas the Victor Dealer can use to stimulate the sale of slow moving stocks. Some of these ideas have already been put into practice, others have not yet been discovered. We urge Victor dealers to encourage their salesmen in originating new plans for selling records, and along the same line our travelling representatives will be glad to offer several good suggestions.

ECLIPSE MUSICAL COMPANY
CLEVELAND OHIO

Bringing in more customers and making more sales for every dealer accepting its aid, is the sole aim of the Columbia Dealer Service Department.

THE PROVIDING OF MUSIC FOR OUR FIGHTING MEN

(Continued from page 49)

their familiarity with music. Their main mission was to decide what records should be scrapped for the duration of the war, and among those put into the scrap barrel were pieces of musical merit with unfortunate names and all German music, including some operatic selections. Among the records barred because of their names were such as "I Didn't Raise My Boy to Be a Soldier" and "The Prussian Military March."

Popular records without doubt are the ruling favorites. The songs of the operatic stars and the great masters on the violin, etc., are exceedingly well liked by a certain percentage of the soldiers, but in volume of demand run second to the "popular" selections. Patriotic pieces are in the third class.

Miss Kate Pope, an English girl, who has served in an important American Y. M. C. A. "hut" across the sea since last September, makes the following interesting commentary on what kind of music the soldiers want:

"Write a rag—at least a song with some syncopation. That is what the boys always ask for. Don't be too patriotic in your song-writing. The boys don't like that sort of thing. When they do it's an exception like 'Tipperary.' But if you analyze that you will find that it is not the usual type of patriotic song. It is simply considered patriotic because of time and usage.

"A good point to bear in mind is to introduce the humorous side of the war. The soldiers know the other side, and when they are out to sing and to listen to music it is for diversion. For instance, the most popular song with the soldiers here is 'I Don't Want to Get Well.' Other popular songs of the moment with the men are 'Joan of Arc,' 'Huckleberry Finn' and 'Are You From Dixie?' They sometimes like what Americans call 'sob stuff'—such sentimental ballads as 'God Send You Back to Me,' 'A Little Bit of Heaven' and 'Mother Machree.' But rag is the rage."

Very probably talking machine dealers will be asked by the public from time to time regarding what kind of records the soldiers like best. The result of the study given to the matter by the Y. M. C. A., as presented above, will indicate the kind of advice to offer these inquiries. As far as the disposal of donations of either records or machines is concerned, the best plan seems to be to deal with the Y. M. C. A. headquarters in the nearest cantonment in case the donation is for the military forces on this side of the Atlantic, and in case the donation is made for the overseas forces to get in touch with the Division of Music, National War Work Council, 124 East Twenty-eighth street, New York.

In addition to machines and records supplied to camps and ships by the Y. M. C. A., or under its direction, there have been hundreds of outfits supplied through other channels which have made a specialty of collecting machines and

records for distribution among the fighting forces. Special committees, as well as newspapers throughout the country, are constantly making appeals for donations of talking machines and discs, and are getting excellent results.

The Knights of Columbus, who are operating huts in all the leading cantonments and camps here, and also in France, and who, with recently collected funds, plan to broaden their work along this line materially, see to it that each hut is supplied with a machine and a suitable collection of records, and in addition have supplied outfits to various company and regimental units.

CHANGE NAME TO "ELMBRO"

Talking Machine Put Out By the Elmbrola Co. Will Bear Above Name Hereafter

ST. PAUL, MINN., April 5.—J. Neiger, general manager of the Elmbrola Talking Machine Co. of this city, has announced that the company has changed the name of its product from "Elmbrola" to "Elmbro." Mr. Neiger states that the company has achieved very pleasing success with this product, and had already established wholesale agencies in important cities, and made arrangements for dealer representation throughout the country. He recently visited New York and expects to have an announcement ready in the near future regarding the presentation of the Elmbro line in the eastern part of the country.

The Elmbrola Talking Machine Co. manufactures a complete line of machines, and Mr. Neiger, who has been associated with the industry for a number of years, is devoting considerable time to effective dealer co-operation. He states that he is making a drive for the better class of business, and the dealers which he recently established are well known in their respective localities.

SONORA PAINTED SIGNS ATTRACT

The Sonora Phonograph Sales Co. has recently made arrangements whereby they will feature artistic painted signs along the route of each railroad just before reaching New York. The object of these signs is to impress out-of-town visitors with the fact that the company has artistic salons at Fifty-third street and Fifth avenue, which are at the disposal of these visitors for demonstration and display.

The accompanying picture is that of a sign which is located in two places—one on the Long

A Sonora Signboard

Island railroad near Jamaica, and one on the New York Central railroad, just below High-bridge. This sign has attracted very favorable attention, and Frank J. Coupe, director of sales and advertising for the Sonora Phonograph Sales Co., is well pleased with the publicity that this advertising affords.

CLEVELAND MAN WELCOMED IN EAST

C. K. Bennett, the well known executive of the Eclipse Musical Co., Victor jobbers in Cleveland, has recently completed a two weeks' trip through the East. He spent part of his time calling on the trade in New York, and also made quite a visit at Victor headquarters in Camden, N. J. In talking with The World during his visit to New York, Mr. Bennett said that he was going to Cleveland with a better knowledge of general conditions and lots of new ideas for boosting the Victor business.

NEW MULTIPLE DISC TALKING MACHINE

Inventor Will Sell Patent Out-right or on Royalty Basis

Plays 28 selections in one set which can be replaced set for set according to the number of records. Equipped with automatic stop which requires no setting. Fine tonal reproduction.

CHAS. J. ORTH HOST AT DINNER

Milwaukee Talking Machine and Piano Man Entertains Officials of United Phonograph Corp. and Members of Own Staff in Milwaukee

MILWAUKEE, Wis., April 2.—A most enjoyable dinner party was given in the Gold Room of the Hotel Wisconsin on Thursday evening,

family gathering, without an unduly serious aspect, in preparation for the real work that is now being undertaken by him in behalf of the Puritan. This thought was carried throughout the dinner. When the guests took their seats they found favors of a humorous character and a menu that was particularly Puritan-esque.

The guests of honor were Fred A. Dennett, president and general manager of the United

horn. Representatives of the press included Alfred B. Cargill, W. A. Dudley, Harry J. Grant, Leonard Meyer and Frank Effinger. Other guests were James Orth, J. B. Thiery and Roy Steffen.

ORGANIZED IN KALAMAZOO, MICH.

Electric Phonograph Co. Incorporated to Manufacture Coin-Operated Machines

KALAMAZOO, MICH., April 4.—The Electric Phonograph Co., of this city, has been incorporated with capital stock of \$30,000, to engage in the manufacture of coin-operated electric phonographs, designed particularly for use in public places. The equipment for a factory has been ordered, and a plant will be established in this city. It is stated that the company owns a number of new patents covering their instruments.

The officers of the new company are: President, John W. Adams; vice-president, E. B. Desenberg, and secretary-treasurer, A. J. Reams.

MAKING NEEDLES FROM CACTUS

PORTLAND, ORE., April 2.—Oregon never considered its scrub cactus growth—which is found in the waste sections of Eastern Oregon—of much value, but even this is now being turned to account by the phonograph people. The scrub cactus needles, tests have shown, are admirably fitted, after proper treatment, for record needles, and these, with a variety also found on the Mexican border, are rapidly being turned to commercial advantage. These needles have been placed on sale in Portland by the Wiley B. Allen Co. and are found to give pleasing sweetness and softness to the tone. There is little danger of the supply of raw material ever being exhausted in Oregon, no matter to what extent the manufacture of the thorns into record needles expands.

Dinner Given by Chas. J. Orth to United Phonograph Corp. Officials and Members of His Staff

March 21, by Charles J. Orth, 504 Grand avenue, the well-known piano and talking machine dealer who recently took over the distribution of the Puritan phonograph in Wisconsin and the Upper Peninsula. The event served to introduce the men responsible for the Puritan to the Orth force and members of the press.

Phonograph Corp., Sheboygan; William H. Thommen, general superintendent of the company and designer of the Puritan, and Lloyd Jenkins, general sales manager. Mr. Orth's staff was represented by W. H. Heise, Adam C. Schroeter, W. H. Hadert, Gustav Kleemann, G. M. May, Paul Wachs, Roy Hettinger, Albert Mueller, Henry Staab and George E. Ball-

Mr. Orth stated the dinner was a little

USES INFORMATIVE ADVERTISING

Famous & Barr Co. Using Educative Copy in Their Announcements With Great Success—Featuring Victor Line Strongly

St. Louis, Mo., April 8.—A novelty in the way of advertising of records has been the series of informative advertisements run in the newspapers by Manager Ditzell, of the Famous & Barr Co. The series is running and will continue indefinitely, according to present plans, and Mr. Ditzell hopes to gather a series that can be put into book form after they are run as ads.

The text in the ad below, bearing on the soprano voice, will illustrate what the series is. The introduction reads:

"There are two principal soprano voices—the coloratura and the lyric—each with its fair and measured province in the field of song. The first, or coloratura, corresponds with the flute in the orchestra—it is the sparkling, dazzling voice, abounding in trills, turns and tremolo—the 'showy' voice. Its most striking exponent is Galli-Curci, who sings the famous 'Bell Song' from Lakme with almost uncanny brilliance.

"The lyric, on the other hand, is essentially the sweet voice, the voice of romance, poetic fancy and emotion. Of the lyric voice, one of the best examples is that of Lucy Marsh, who sings 'Birth of Morn' divinely."

Then follows a list of records set out as to the kind of soprano voice each presents. Other ads deal with the various kinds of voices, the quartet male and mixed, and then will come the various instruments. Mr. Ditzell says that in preparation of these ads he uses information gathered by work on the floor in the record department, where he asks customers as to which kind of soprano they wish and other leading questions to develop what will really be information to the average record buyer.

Another novelty from the Famous & Barr Co. is the new form of announcement of the monthly record lists. This idea first was that of photographing the regulation Victor record list and reproducing it. But the list did not lend itself well to photographic reproduction by printing, so a redrawing of the Victor dog that illustrates the hanger was made and the names of the records set in type in exact facsimile of the original. The result is a neat mailing card that will easily catch the eye of the Victor record buyer. Of this Mr. Ditzell says:

"Of course, next to the trade-mark dog, the most familiar advertisement to a Victrola owner is the monthly record bulletin. You will notice that a Victrola owner always is ready to stop and read the hanger. Now we hope to catch the eye in a way that the bulletin ordinarily mailed does not. Also some Victrola owners get the bulletins from the several sources, and we hope our announcement will be distinctive. We believe it is a move in the direction of conservation of paper, mail weight and in other ways meets the demands of the times."

NEW PRICES ON LANSING COVERS

E. H. Lansing Announces New Schedule, Owing to Greatly Increased Cost of Production

BOSTON, MASS., April 1.—E. H. Lansing, who manufactures the Lansing khaki moving cover for talking machines and accepted as the pioneer in that field, announces that he has been compelled to increase the prices of his various covers, and the new prices will be, Style A, \$8.50, and Style B, \$6. Mr. Lansing has been absorbing the increased cost of both materials and labor for some time past, and has found it impossible to do so any longer. The increase of \$1 per cover, however, means the placing of as light a burden as possible on the purchaser. Incidentally, Mr. Lansing reports that the business is keeping up in good shape in all sections.

Both prophets and profits are without honor in every country and just now.

The 1st of May Will Be Thrift Stamp Day In the U. S. A.

The Active Co-operation of
Every Reader of

THE TALKING MACHINE WORLD

Is Urgently Requested to
Make It a Success

May 1st, 1918, will be observed throughout the United States as Thrift Stamp Day! On that day retail stores everywhere in every line of business will ask customers to take PART OF THEIR CHANGE IN THRIFT STAMPS! It will be patriotic for every man, woman and child to accept at least one Thrift Stamp as change on every purchase made that day—and to make as many purchases as possible on May 1st.

Here is a big, practical way of getting millions of Thrift Stamps into the hands of the people of the United States, and of insuring the success of the Government's War Savings Stamps campaign. Thrift Stamp Day will HELP EVERYONE. It will prove a tremendous boost to business. On May 1st, 1918, the nation should do the biggest total retail business of any single day in our history! The beneficial habit of Thrift will be sown broadcast among the citizens of the U.S.A.! Most important of all, Uncle Sam will be furnished with the sinews of War and Victory!

American business must go "over the top" AT ONCE in a quick drive to make Thrift Stamp Day an overwhelming success. You wholesalers, you jobbers, you salesmen, must TALK Thrift Stamp Day among your trade, arouse the ENTHUSIASM of the retailers, the storekeepers, the clerks behind the counters. Uncle Sam NEEDS YOUR HELP. A practical PLAN has been prepared showing how each one of you can "do your bit" to make Thrift Stamp Day a red letter day in American business annals. Write for this plan TO-DAY WITHOUT FAIL. Remember, in helping Uncle Sam you are helping business and helping yourselves. Address Mr. W. Ward Smith, National War Savings Committee, 51 Chambers St., New York City.

AS SOON AS IT'S A HIT IT'S AN EMERSON

**IF You Had Been An
Emerson Dealer on March 1st
You Would Have Sold These BIG HITS**

- "A Baby's Prayer At Twilight"
- "Liberty Bell, It's Time To Ring Again"
- "Are You From Heaven"

Emerson dealers nine times out of ten beat the game by bringing out the wanted music—the big hits of the day way in advance of anybody else.

Sometimes Emerson dealers are two months ahead of anybody else. Sometimes a month. This is an advantage plus the many other money making advantages that come to Emerson dealers. Because they sell for 35c—3 for \$1.00, the number of buyers is increased many fold. Because they bring you more profit per record, it is worth more to you to sell them. Because they will play on any machine without an attachment, everybody can play Emerson records.

**IF You Are An
Emerson Dealer NOW
You Will Have For Sale These BIG HITS**

- "My Mind's Made Up to Marry Carolina"
- "On the Road to Home Sweet Home"
- "There'll Be a Hot Time for the Old Men"
- "I'm the Brother of Lily of the Valley"

**IF You Are An
Emerson Dealer On April 20th
You Will Supply the Demand for These BIG HITS**

- "Cleopatra," Al Jolson's Winter Garden Hit
- "What Are You Going To Do To Help the Boys"
- "Good Bye Barney Boy"
- "If You Look In Her Eyes"
- "Lafayette"

INTRODUCE NEW STEEL NEEDLE

The Gloria Phonograph Supply Co. Makes an Important Announcement—To Make Needles in All Standard Styles and Tone Qualities

The Gloria Phonograph Supply Co., 200 Fifth avenue, New York, has just placed on the market a new steel needle which will be known as the "Gloria." The company is marketing this needle in all standard styles and tone qualities, and is instituting an aggressive campaign to present this needle to the jobbers and dealers throughout the country.

Realizing that the talking machine dealers have been badly handicapped the past year by a shortage of steel needles, the Gloria Phonograph Supply Co., before announcing its new needle, completed factory arrangements whereby it could promise the dealers immediate delivery on their orders. The company felt that it was unfair to the trade to announce a new steel needle without being in a position to take care of the dealers' requirements promptly, and delayed their announcement accordingly until the officers were certain they could guarantee immediate shipments of the needles.

In its literature the Gloria Phonograph Supply Co. will emphasize the fact that the Gloria steel needle is constructed of the finest carbon steel, and that it is guaranteed to give absolute satisfaction to every user. The company's manufacturing and sales campaign will feature this important constructional merit, in order to impress the dealers with the fact that they can offer the Gloria steel needle to their customers with perfect confidence in the satisfaction that it will render.

The president of the Gloria Phonograph Supply Co. is Rudolf Gaertner, who for a number of years has been prominent in manufacturing and import circles. Mr. Gaertner will devote

his entire time to the new company, which was recently incorporated with a capital stock of \$25,000, and his lengthy experience in the mercantile world will doubtless enable him to cooperate effectively with the dealers throughout the country.

R. R. Debacher, president of William Schimper & Co., Hoboken, N. J., and a director of the Trust Co. of New Jersey, a well-known manufacturer of metal goods, and prominent in New Jersey financial circles, is first vice-presi-

Rudolf Gaertner

dent of the company, and as such will act in an advisory capacity.

Roswell Francis Easton, who has been associated with Mr. Gaertner for a number of years, is second vice-president of the company, and will be actively interested in its activities.

On another page in this issue of The World is the first announcement of the Gloria steel

needle, and this announcement, which, by the way, is a splendid example of lithographic art, features the copyrighted trade mark of the needle—the lark. It is planned to use this trade-mark on all posters, window cards, etc., and all publicity will probably feature the same poster design as shown in this announcement. The company is now preparing to distribute a series of window cards to the dealers, in order that the public may be acquainted with the qualities of the new needle.

DOUGLAS PICTURES IN NEW YORK

Process for Making and Projecting Motion Pictures in Natural Colors, Invented by Leon F. Douglas, Proves Decidedly Interesting—Wonderful Effects Produced by the Process

Members of the local talking machine trade were much interested recently in the special showing in this city of motion pictures in natural colors produced by a new process invented by Leon F. Douglas, of San Rafael, Cal., who for many years was actively connected with the Victor Talking Machine Co., is still a director in that company, and had much to do with the early development of the Victor product.

The Douglas pictures have been shown in various sections of the country recently and with much success, and when offered at the Eighty-first Street Theatre served to attract much attention not only from the public but from members of the motion picture trade. The pictures shown include really wonderful views of Yellowstone Park, with its geysers, falls, flora and fauna. Then there were magnificent pictures of the Grand Canyon of Colorado, remarkably natural in their reproduction. Likewise views of a forest fire, of Californian flower gardens and of motion picture celebrities. While the films showed the natural colors of the landscape with great faithfulness, depicting the subtleties of the sky, ground, water and plant life very closely, they reached their best when showing closeups of people. Whether a young lady has copper-colored hair or is a typical blonde or brunette, her locks show up with startling faithfulness, and even her complexion is given its full value. The closing feature of the exhibition, and one that greatly impressed the audience, was a sunset scene, with the sun's last rays merging into the purple tinge of twilight.

Mr. Douglas' device consists of an inexpensive attachment that may be affixed to any motion picture camera and which permits of the production of a film containing a series of images so colored as to give, when projected, a moving picture in natural colors, without the use of the rotary colored shutter usually required.

"By this contrivance," declares Oliver Jones, formerly a well-known talking machine man, and now acting as representative for Mr. Douglas, "the brilliancy and intensity of the projected colored picture are increased and a stereoscopic effect is obtained impossible in black and white. There is no more light required than is used in projecting black and white, and a speed of only twenty-four to the second is necessary, and through certain experiments being made this speed will be reduced. The cost of producing pictures by this process is slightly more than that for making black and white, while the advantage in the art of producing motion pictures is considerable."

NEW QUARTERS IN IRVINGTON, N. J.

A. H. Redden, who has been conducting a bicycle and sporting goods store in Irvington, N. J., has moved to new quarters at 1065 Clinton avenue, that town, where he is featuring Brunswick phonographs very successfully. He has handled the Brunswick line since last fall.

MOVING TO NEW LOCATION

H. G. Applin, the Victor dealer of 20 College avenue, Somerville, Mass., has arranged to move to new quarters in the Medina Building on April 1.

KOCH-O-PHONE

\$18.00

No. 18

The KOCH-O-PHONE is the FORD of the Phonograph world. There is no charge for the name or expensive advertising added to the cost. Most people would rather pay \$36 (resale price) than \$75 for the same amount of pleasure. Plays all makes of disc records. No disconnecting needed in exchanging from one make of record to another. Simply turn the sound box and change needle to suit make of record. This machine for tonal quality and volume is not excelled by any \$75 machine on the market.

No. 18—Height 40 in., width 18 in., depth 18 in.; double spring worm driven motor; 12 in. turntable, all metal trimmings are nickel plated; made in mahogany finish. Weight about 100 lbs. \$18.00

Cabinet alone, complete with needle cups . . . \$10.00

CONDITIONS IN TALKING MACHINE INDUSTRY IN ENGLAND

Louis S. Sterling, Manager of Columbia Co. in London, Tells Most Interestingly of Business Activity—Labor Problem Serious, But It Is Being Mastered—Record Trade Enormous

"Our sales during 1917 showed a gain of 25 per cent. over 1916, making this year the best in our history," said Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, who arrived in New York recently for a visit to the executive offices. "Our figures for the year show that our business was double that of 1913, and we therefore have every reason to feel gratified at the prosperous condition of talking machine activities abroad, notwithstanding the war.

"The preponderance of our business last year was in records, and the actual production of records was larger in 1917 than ever before in our history. Although the demand for machines

ballads and the very fine string and orchestra selections. In fact, to the casual observer the demand for this class of music is almost remarkable.

"We are shipping many thousands of records per month to the boys at the front, and the orders for these records almost invariably call for 50 per cent. of popular music, and the remainder good standard selections and operatic numbers. The demand for the so-called patriotic popular number has practically passed into oblivion, the boys at the front calling for the straight popular selections.

"The demand for table machines is by far in the preponderance, but this is attributable to the fact that it is almost impossible to get cabinets to manufacture the floor machines. The demand for cabinet machines is far in excess of the supply, and it is for this reason that the table machine is selling in such large quantities.

"There is a very bright future ahead for the talking machine business in England. We are all optimistic regarding the future, and whether or not the war continues for any extended period, the talking machine industry is certain to enjoy an era of activity and prosperity."

MAKING RICHMOND MUSICAL

Corley Co. Doing Much for City's Musical Advancement—How This Company Serves the Dealer—Widely Known as Victor Distributors

RICHMOND, IND., April 9.—Fred. R. Kessnich, now in charge of the wholesale department of the Corley Co., this city, had in his possession during the past week substantial evidence of the fame of the Corley Co. as Victor distributors. Two large cases addressed to widely separated cities in the Middle West were in some unaccountable way delivered to the Corley Co. in Richmond. The only accountable reason being that these cases bore on them the Victor trade-mark.

Mr. Kessnich reports generally good business in both the wholesale and retail departments and the continuing popularity of their Victrola fibre trunks.

The aim of the Corley Co. has ever been service to the dealer. For a long time the Corley Co. has owned a print shop where they have printed the large volume of literature that they send out and in addition turned out many printing jobs for their dealers at a small cost. Another service department of the Corley Co., which is in the highest state of efficiency, is the repair department, which is in charge of M. F. Burnett, who has been with the Corley Co. for a number of years. In order to keep this department up to this high state Mr. Burnett makes it a point to make a yearly visit to the Victor factory.

The slogan of the Corley Co.—"The house that made Richmond musical"—has been especially proved this year. Through the efforts of the Corley Co. many world-renowned musical artists have come to Richmond during the past season. For these series the large City Auditorium is engaged and is usually filled to capacity. Literature is now being mailed concerning the Spring Festival to be held at the City Auditorium on April 29, 30 and May 1, 1918. Prominent operatic artists, such as Paul Althouse, tenor; Sophie Braslau, contralto; Mabel Garrison, soprano, and Lambert Murphy, tenor, are to appear. Attention is called in the literature describing this festival that these artists are well known to all Victrola owners, and the opportunity is offered to get acquainted and to make comparison between their voices and the perfect reproduction of the Victor records. Other artists that will appear are May Peterson, Nina Margana, Helena Marsh, Thomas Chalmers and Rafaelo Diaz. The Wednesday Club Chorus of Richmond and the Russian Symphony Orchestra will also appear.

Louis S. Sterling

is bigger at the present time than it was before the war, we must consider the fact that the production of machines is only 30 per cent. of the total production before the war started, owing to the necessary restrictions placed upon our product, the scarcity of raw material, and the dearth of labor.

"General conditions in the talking machine industry in England are very satisfactory, although all of the factories have been obliged to face very serious labor problems. When the war broke out in 1914 there were 291 men employed in our record factory in England. At the present time there are only eleven men employed, the rest being women, and in order to produce the same efficiency in our factory, we found it necessary to increase the force of women by 40 per cent. Out of the eleven men at the plant six are over fifty years of age.

"The numerous air raids over England, the lightless nights, and the various curtailments of amusements are influencing the people to stay home more now than ever before. They naturally must have some relaxation from the seriousness of war, and it is in this respect that the talking machine is 'doing its bit,' and affording the public pleasure and entertainment.

"There exists in England to-day a tremendous demand for the straight popular songs, and there is also a notable increase in the call for good music. I refer particularly to high-class

TALKING MACHINES A WAR NECESSITY IN MILWAUKEE

This Is Proven by the Demand in Camps and in the Homes—Badger Activity—New Brunswick Dealers—Phonograph Co. Increases Capital—Four New Sonora Dealers—Puritan Developments

MILWAUKEE, WIS., April 12.—As the nation enters the second year of active participation in the world war as a combatant, it is becoming more and more evident that of all the instruments ever created to assuage mental and physical pain and suffering the talking machine has outdistanced all others and is secure in the first rank, not only so far as the boys at the front are concerned, but among those who must remain at home. Never since its origin has the talking machine been in such tremendous demand as it is today. At the same time, the output of the country's talking machine factories, while probably the largest that it ever has been, is becoming more and more inadequate to fill requirements. In the case of so popular a line as the Victor, it is conservatively figured that if twice as many machines were available immediately, not all orders could be filled. Even some of the newer and relatively lesser known makes are selling so well that the big problem in the talking machine industry of Wisconsin today is to produce enough instruments. In the case of records, needles and other supplies and accessories, the condition is similar.

Talking machine business predicated upon the Easter holiday this year assumed such volume that it was wholly reminiscent of the pre-Christmas season. Saturday, March 30, the day before Easter, seemed like a Christmas eve in local retail establishments. Stores were crowded until closing time with customers demanding delivery of machines and records for Easter. Regular delivery systems had to be supplemented with extra trucks and wagons. The situation has not before been known here, although the Easter season also has been a distinct feature of spring business.

Retail dealers attribute the remarkable demand, especially at Easter time, to the influence of the war. In fact, the splendid business that has been done during the last six to eight months is believed to be the direct result of the need for solace which all people have come to experience since thousands of homes have given up sons, and even fathers—and some, daughters.

The dealers who a year ago feared that the declaration of war would shortly result in the collapse not only of talking machine business, but business in general, have had ample reason to change their opinions. There was a lull of about thirty days' duration immediately following the opening of hostilities. But after that talking machine business swung into the most active period in its local history, and it has grown day by day until at this moment it has reached the most prosperous point ever known.

"It's the same old story," said Harry A. Goldsmith, secretary of the Badger Talking Machine Co., Victor jobber, when asked "What's new?" by The World representative. "Our customers still are asking for more machines than we can possibly deliver, and our back orders are piling up every day. So far as records are concerned, we are still worse off. We try to do the best we can and take care of all our retailers, but in spite of this effort, not all disappointments can be obviated. The demand for the Victor to-day is by far the greatest we have known since we established this business. The same is true of Victor business in all other parts of the country. Our situation is not unusual among Victor jobbers, for they all are overwhelmed with business."

According to Thomas I. Kidd, manager of the local branch of the Brunswick-Balke-Collender Co., 275-279 West Water street, the Brunswick factory is having an extremely difficult time in filling all of its requirements, due to the rapidly growing demand for the Brunswick phonograph in Wisconsin and elsewhere. The still serious congestion of freight traffic forms another handicap. Express lines are used from time to time to relieve acute shortage among

dealers, but in recent weeks the express companies have been so overwhelmed with business that, considering the extra expense, not a great deal is gained by making shipments by express. The nine Brunswick retailers in Milwaukee have been doing an exceptionally large business since the beginning of the year, and reports which they make to Mr. Kidd indicate that 1918 is destined to be the greatest Brunswick year since the line first was introduced in this city.

The Yahr & Lange Drug Co., 207-217 East Water street, this city, wholesale distributor of the Sonora for Wisconsin and Upper Michigan, has increased its local city selling organization by the appointment of four prominent retail stores in as many widely separated sections of the city. The new retailers include Alfred W. Fuchs, jeweler, 1403 Green Bay avenue; William Klug & Sons, furniture, 543 Twelfth street; Bruno W. Thien, jeweler, 3401 North avenue, and the Noll Piano Co., 1057 Muskego avenue. A successor to Charles J. Orth, 504 Grand avenue, as the main downtown retail representative, will be selected shortly. Pending the closing of a new connection, the Yahr & Lange Co. has inaugurated a complete service department for the benefit of Sonora owners in Milwaukee, in connection with the Sonora jobbing department of its big wholesale house.

The New Edison continues to increase in popularity throughout Wisconsin, and the Phonograph Co. of Milwaukee, 211-213 Second street, wholesale representative in the territory, has never been quite so busy as now in keeping the wants of its retail representatives fully supplied. The Edison Shop, which is the retail department, is doing a splendid business locally. To accommodate the growth of the business in general, the Phonograph Co. has been obliged to increase its capital stock from \$25,000 to \$50,000. William A. Schmidt is general manager of the company and is ably assisted by Herbert W. Gausewitz, retail sales manager.

Since taking over the wholesale distribution of the Puritan phonograph and records in Wisconsin and Upper Michigan on March 1, Charles J. Orth, 504 Grand avenue, this city, has built up a remarkably efficient sales organization and is giving the Wisconsin-made instrument an exceptionally strong representation in its home state and contiguous territory. In all respects Mr. Orth is duplicating the splendid achievement credited to him in putting the Sonora on the map in Milwaukee as exclusive retail distributor in this city for the past two years, a connection which he relinquished to broaden out as one of the principal distributors of the Puritan line. Arthur Roelke, formerly state representative of the Sonora, has joined Mr. Orth and is looking after retail contracts throughout the Wisconsin and upper Michigan territory. Gustave Kleeman also has joined the traveling sales force. W. H. Heise and Adam C. Schroeter are managing local sales. Numerous excellent retail connections already have been established and before long the Puritan will be represented in practically every nook and corner of the territory. The "home agency," as it were, at Sheboygan, Wis., where the Puritan is manufactured, has been placed with M. W. Brand, 1103 North Eighth street.

Milwaukee and Wisconsin people are respond-

ing generously to the appeal to donate records and music rolls to the soldier boys in camps and afield. The National League for Woman's Service, with the assistance of the Milwaukee County Council of Defense, the Milwaukee Association of Music Industries, and numerous other agencies, is daily collecting scores of records and rolls, which are being forwarded to the various camps as rapidly as they can be classified and packed. This part of the work of the Bureau for the Advancement of Music is regarded here as an especially beneficial undertaking and one in which much pride is taken to make it a success. The recent visit to Milwaukee of C. M. Tremaine, manager of the bureau, did much to stimulate interest and place the local campaign on a sound footing. It is interesting to note that practically no worthless records have been tendered so far.

Fay R. Smith, dealer in talking machines, pianos, etc., New London, Wis., recently has been appointed local chairman of the Waupaca County Council of Defense; city chairman of the Waupaca County Liberty Loan Committee, and was elected president of the New London branch of the Wisconsin Loyalty Legion upon its organization. He is taking an active part in numerous other patriotic movements requiring in all a large personal sacrifice.

The Milwaukee board of school directors has indefinitely postponed action on the proposition recently made to provide talking machines to assist in the instruction of high school boys and girls in stenography and typewriting. Although the success of the plan at Indianapolis and other cities was forcibly presented to the finance committee, it felt that under existing conditions the expense hardly would be warranted.

CANADA CONSIDERING EMBARGO

Reported to Be Planning to Bar Importation From the United States of Musical Instruments and Many Other Articles

Reports from Canada are to the effect that the authorities in the Dominion are planning to reduce imports from the United States by \$150,000,000 a year, by means of an embargo on the importation of specified articles, including all musical instruments, as well as jewelry, furniture, clothing, automobiles, etc.

For the manufacture in Canada of the articles on the embargo list, it will be necessary to import large quantities of parts and raw materials from the United States, but it is maintained that two articles can be manufactured in Canada for practically the same cost as one can be imported.

To compensate the Canadian Government for the loss of customs revenue and to cover the extra protection given manufactures by the embargo, it is proposed to levy a special war tax of 10 per cent. on all Canadian articles that will be sheltered thus from competition.

Should the embargo be put into effect, it will prove a blow to many American manufacturers, particularly of pianos, which are in great favor across the border. Talking machines and records manufactured by companies with headquarters in the United States are in most cases produced in Canadian factories to meet the demand in that country, and avoid customs charges.

Sentiment has no place in charity work. Giving just to help the "forever-wanting," both undermines the independence of the individual you seek to help, and tends to make him not only perpetually poor, but a parasite.

PLAN CONCERT UNDER AUSPICES OF DETROIT ASSOCIATION

Prominent Artists to Appear at Public Affair on April 30—Proceeds to Be Given Over to Local Regiment—Hudson Co. Preparing to Move—Trade Keeps Going at Lively Pace

DETROIT, MICH., April 10.—We won't declare that Detroit talking machine dealers have had a record business, but we will say that they have had a very satisfactory business during January, February and March, and that they are anticipating excellent business before the end of the year. Some go so far as to predict that business will stay about as it has been for the past three months, and that there will be big business early in the fall continuing to improve until after holiday time. After all there is every reason to look for good business, as Detroit has been blessed with war orders that run into nearly a billion dollars, while workmen are getting higher wages than ever before. There is no scarcity of money and, despite Liberty Bonds, the Income Tax and Red Cross, people seem to have plenty of cash to buy whatever they make up their mind to.

In talking machine circles locally, the big event of interest and importance is the recital to be given at the Arcadia, April 30, under the auspices of the Detroit Talking Machine Association. For many, many months the association has had in mind something that would be along patriotic lines, but they wanted to do something that had not been done before. The idea of giving a concert and turning the money over to some patriotic fund appealed to the members of the organization, and the decision was reached unanimously that such an event take place. A special committee was appointed and the work began. Sam E. Lind, president of the Detroit Association, and chairman of the concert committee, immediately got busy by long distance, by letters and by telegrams, lining up the different artists with the various companies making records. He received splen-

did support from the companies and the artists themselves—greater than he had even anticipated. The final result of Mr. Lind and his committee is that the concert will surely take place at the Arcadia on April 30, and among the artists who have agreed to appear personally are Henry Burr, Albert Campbell, Arthur Collins, Byron G. Harlan, John H. Meyers, Billy Murray, Theodore Morse, Fred Van Epps, the Peerless Quartet and the Sterling Quartet. The committee has 5,000 as the number of tickets to be disposed of, and each member of the association, aggregating fifty, has individually agreed to take and sell a specified number of tickets. "I believe we will easily dispose of 5,000 tickets—with everybody co-operating and working together on the proposition," said Mr. Lind. "We are getting splendid support all around—everybody is with us heart and soul, knowing the purpose for which it is given. Whatever money we raise will be turned over to the regiment known as Detroit's Own. Something like \$600 is to be spent in the Detroit newspapers for advertising and publicity." Here's wishing the enterprise every success in their patriotic venture.

J. L. Hudson Co. are getting ready to move from 118-120 Woodward avenue to 68-70 Library avenue. The new building is six stories in height, with full basement, and the company is expending nearly \$75,000 in fixing up the new building, which formerly was devoted to the toy departments. The Hudson officials want to make their new music store the finest of its kind in the country and they will get results if money counts. The talking machine departments will occupy the first and third floors. On the first floor will be the various record booths, record stock and a large counter for selling records. The booths will be ventilated in the latest fashion, will be carpeted and right up to the minute. On the third floor will be the retail salesrooms of the Victrola and Sonora machines, which are handled by Hudsons. There will be many new, interesting, original and unique features that will be described after the store is opened.

Max Strasburg, of the Max Strasburg Shops, has returned after spending four weeks in the South. He had a splendid vacation, played a lot of golf, and is now on the job regularly each day. Mr. Strasburg looks for a good year, although he says there are sure to be times during the year when trade is off.

The W. E. Metzger Co., who retail the Victrola, are devoting more time than ever to the line, and are carrying larger stocks than ever.

Quite a number of Columbia dealers are displaying the company's line of period Grafonolas in their store displays.

Frank Bayley, Edison dealer, recently purchased for himself and family a handsome new residence on Chicago boulevard, costing \$40,000.

In talking with jobbers, such as Grinnell Bros., who handle Victrolas, Williams, Davis, Brooks & Hinchman Sons, who handle the Pathé line, the Phonograph Co., who job the Edison, and the Brunswick Co., who job the Brunswick phonograph, we find that they are carrying good-sized stocks of both machines and records, and that shipments are easier than they have been in some time. They don't believe there is going to be any difficulty in taking care of customers, but they believe that customers should order well in advance to offset any unforeseen delays that might occur. All of these jobbers are exceedingly optimistic and can't see anything but good business ahead.

Some splendid displays recently in connection with the Victrola, particularly the cheaper models, have attracted considerable attention to the windows of the People's Outfitting Co. We will say one thing for this concern—every display is carefully planned and thought out and they are usually timely and in keeping with the news and events of the day.

The Strand Talking Machine Co. was incorporated recently at Albany, with a capital stock of \$6,000. Those interested are S. Birnswieg, S. Friedberg and H. Weiner.

PLAYERPHONE TALKING MACHINE CO.

W. D. McKENZIE, Pres. and Gen'l Manager

338 to 352 NO. KEDZIE AVENUE, CHICAGO

THE PLAYERPHONE OFFERS GREAT OPPORTUNITIES TO JOBBERS IN FOREIGN COUNTRIES

Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the fourteenth in a series of articles on the general subject of the musical possibilities of the talking machine. The aim of the series is to develop these possibilities from all angles, thus opening up fields for sales expansion oftentimes neglected wholly or in part.—Editor.]

OPERA AND THE TALKING MACHINE

I suppose that, in one sense of the word, no other idea is as strongly impressed on the mind of the layman who goes to buy a talking machine as the idea of what he calls "opera." The mere fact that the greatest successes of the talking machine have had to do with the reproduction of great voices, especially of the best advertised among the great voices, has intensely directed public attention to that field of musical enterprise where great voices are mainly developed. That is the field of grand opera. The great artists who, in earlier days, were first and most splendidly exploited by the talking machine makers, were operatic singers; and the progress of the talking machine therefore has peculiarly been mixed up with the progress of grand opera in this country. Indeed, it would not be going too far to say that the talking machine has actually done more than any other agency to teach the public the fascination of operatic music and create a demand for it.

But with all this, I shall venture the remark that the demand for operatic records is a demand just as uneven, just as scattering, as can be said of any other type of musical performance available through the talking machine. One of the most astonishing things about the talking machine business is to be found in the disproportion between the public knowledge of certain artists and public familiarity with their recorded works. Any talking machine dealer, I am sure, will agree with me that of all those thousands who know the names of the dozen best-advertised operatic artists, not one in ten knows familiarly six separate numbers which any one of these artists actually sings. Indeed, when I have gone shopping for records in the guise of a simple-minded member of the great public, I have found that the salesmen themselves are quite often rather narrow-minded in these matters; knowing plenty of names, but precious little about the actual work that is being done through the talking machine by the owners of those names.

Exploring One's Stock

Now, I shall perhaps not be too seriously contradicted if I say that it would be a very good thing for every man who is interested in the sale of talking machines and records to undertake a little series of explorations into the great territory of operatic music as exhibited in the hundreds of operatic records now listed in the catalogs of the great companies. The literature of grand opera is in quantity immense and has a history stretching back more than three hundred years. The art of singing has developed along with that of operatic composition and the greatest singers in the world have always been operatic singers. If one is going to know his record stock, then it is perfectly obvious that he must know something about that which is mainly responsible for filling his record shelves. For a talking machine dealer to carry in stock hundreds of operatic records and then to confine his knowledge of them to two or three each of a very small number of well-advertised singers, is like a bookseller knowing Dickens and Mark Twain, the Encyclopaedia Britannica and the Bible, but hopelessly at sea when a customer asks for Thackeray or Emerson, for Shakespeare or Walt Whitman. Such a bookseller would not last long. Nor would such a dealer in records last any longer if the public were generally as ill-informed as he himself.

The public may indeed be ill-informed, but to

sell one's goods in a half-baked way merely because there is reason to believe that one's customers know no better, is not exactly sound business. I have always contended that if the contents of the great record catalogs were really appreciated, really studied and really known, there would not be the unevenness in sales there now is. The field for the sale of records is scarcely scratched as yet, if we but knew it. Indeed, the field of sales in operatic records alone is scarcely scratched.

Something in General

Therefore, I am hoping, for all these reasons, that you will not take it ill of me if I say something about operas in general, some things quite different from anything you will read in catalogs or even in books professedly designed to teach you how to be musical. Frankly, I don't believe in trying to teach people to be this or to be that. It is time enough when they ask of themselves. But, if I can do something to make you believe in the worth-whileness of studying your wonderful record catalogs from end to end, and studying especially the wonderful reproduction of great operatic music, I shall do as much as I could reasonably expect; and you will, some day I believe, bless me.

I am not setting up to be a teacher or lecturer or uplifter or anything of the sort; but simply a suggester. That is certainly humble enough and I hope you will accept what I say in that spirit.

Two thousand five hundred years ago great assemblies of wonderful people, people more generally intelligent than have ever since trod the globe, people whose efforts at understanding the meaning of life and the glory of beautiful living and thinking have given us literature, art and thought wholly unsurpassed by the product of any later age, gathered together upon the several occasions of their great national festivals under the genial skies of fairest Greece, by the side of the blue waters of the Aegean Sea, to hear and see the supreme intellectual, physical and aesthetic works of their greatest men. To the ancient Greek, life rightly lived included the right cultivation of every function. The mental and the physical must be developed equally. Music, gymnastics (in-

cluding in these terms, as the Greek did, all artistic and all physical culture), poetry, the drama, history and philosophy were the common studies of every child and the common possession of every citizen. At the great "games" held each fourth year, at the foot of Mount Olympus, the ripest products of Greek intellectual genius were publicly recited and the most powerful products of the dramatists publicly performed before the multitudes who gathered within the amphitheatre, in the intervals between the athletic contests. The tragedies of Aeschylus, of Sophocles and of Euripides, the comedies of Cleon and of Aristophanes, the Iliad and Odyssey of Homer, the Histories of Herodotus and Thucydides, were thus acted or recited, as the case might be; and in this way were duly "published" to the intellectual world.

Acting to Music

The great dramas, such as the Oedipus of Aeschylus, the Philoctetes of Sophocles and the Alcestis of Euripides, as well as the merry comedies of Aristophanes, in all the exquisite absurdities of the birds, the frogs and the clouds, were acted by professional performers, who appeared in masks and declaimed their lines to the accompaniment of musical instruments, which provided a rising and falling melody appropriate to the sense of the words. The practice of the Greek dramatists to provide a chorus, which was grouped on either side of the stage and furnished a running commentary on the action, personifying Fate, the Gods, Nemesis or some similar abstraction, not only gave opportunity to paint clearly the moral lesson worked out in the fates and tragedies of the characters, but afforded full sway to the musical science of the Greeks by allowing them to develop the idea of rhythmic singing or, rather, declamation, to a point of very considerable perfection. This wonderful Greek drama we still can read and still appreciate, but we can never thoroughly understand it because we do not know just exactly how the verses were declaimed or how the chorus went through its work.

The intellectual night that settled down over Europe after the barbarian invasion of Italy in the fifth century A. D. was relieved by scarcely

THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 61)

a glimmer save the light that burned at Constantinople, and the fitful candle gleam that burned, only to be brutally stamped out, in those valleys where dwelt the Waldensian and Albigensian peoples. But the fire of the Renaissance, bursting into full flame at the taking of Constantinople by the Turk in 1453 A. D., together with the discovery of the New World by Columbus forty years later, brought about a liberation of the human intellect and the creation of a spirit of inquiry to an extent scarcely credible even to-day. The study of classical Greek and Roman literature became the passion of every man and woman who would be thought liberal minded. Popes took more interest in Horace than in Thomas Aquinas, cardinals and princes translated Sophocles and forgot the Latin current of the convent and the breviary. The death of the Greek Empire at the hands of the Turk was the signal for the spread of Greek learning throughout Europe. The Dark Ages were dead and modern Europe had begun.

The Gentlemen of Florence

During the sixteenth century, what with the religious reformation and the growth of liberal learning which has sprung into birth at the Renaissance, the musical ideas of the polite world progressed amazingly. No longer confined to the uses of the Church, music became secular. Every lady played the Virginal, every gentle-

man the lute. Persistent efforts were made to discover some connection between music as then known, and the great Greek poetry and drama which were now forming the models for composition to all the world. At last, during the closing years of this century, a society of wealthy musical and artistic amateurs, meeting in the beautiful city of Florence, decided to attempt the reconstruction of the Greek drama, adapting it to contemporary taste, with the music arranged as nearly as possible like the original; and in this way to bring about a revival of dramatic writing and acting in its ancient purity.

Count Bardi and his friends had no notion that they were about to make a musical revolution. But how often it happens that the most important and revolutionary ideas are born unnoticed. These sixteenth century Italian gentlemen thought they were going to make an impossible revival of Greek art; in fact, they were going to create opera.

Messer Peri

Persevering in their task, the musical friends finally brought their labors to a conclusion, with an adaptation of the legend of Orpheus, he of the magic lyre, as told in Greek mythology, the story of the poet and singer who sang so sweetly that the birds and beasts followed him, forgetting ancient animosities. Orpheus and his Eurydice (their stories were most beautifully made into music by that great man Gluck, two hundred years later, and you can hear Louise Homer's lovely record of the great "Che faro" air); this was the theme of the first opera. Commissioned by Count Bardi and his friends as a revival of the Greek drama with music, it turned out, under the hand of Messer Jacopo Peri, to be a real music-drama, with action, chorus and stage business performed to music composed in best Italian style and played by a band of viols, virginals, flutes and shawms.

Jacopo Peri did not succeed in reviving Greek music; but he did something ever so much better and more important. He invented a method of declaiming to music and he invented the operatic "air." He discovered how to write music in such a way that the spoken parts of the story, which carry the plot, could be sung by the voice accompanied by a simple chord here and there struck in just to carry the singer on the pitch. This was the famous "recitative" which all the old Italian operas employ and which can be heard to its perfection in the oratorios of Handel.

Peri went further. He also developed the operatic air; that is to say a song, forming part of the drama but developed so as to show off the vocal capabilities of the singer and to afford the latter an opportunity for display. With these two ideas Peri practically invented the modern opera.

The Greek drama had no notion of the song or air; but Peri found his Italian temperament

dissatisfied with continuous recitative and he could not, at that stage of the game, in musical development, find a way of making it more than dry and formal at the best. Three hundred years later, very nearly, Richard Wagner took the same idea and made continuous recitative the basis of his great works. Yet when you listen to the Ring, to Tristan or to Parsifal, you never think that this is what it all is; for Wagner was able to weld thought and tune, music and word, so perfectly that the two coalesce like two elements in a chemical affinity. But it took three hundred years to bring about the perfect union.

Laid the Foundation for Modern Opera

That little experiment, three centuries and more ago, with the tinkling little band of old-fashioned queer-shaped fiddles and the rippling little spinets, the soft sweet flute and the rest of Peri's "concert," would not have seemed much to a modern observer could he have dropped back in the ages to hear it. But with it, and with his invention of the accompanied song and the half-sung, half-spoken recitative, he laid the foundations for every modern record you can put on your machine to-day, in which the glorious art of great singers is reproduced to you.

"Opera" is a Latin word and means simply "works." Bardi's friends called these pieces of theirs just "works." The larger styles were called "opera majora," meaning "greater works," and so to-day we call them "grand opera." The smaller and less serious pieces were "opera minora" or "smaller works" and later on called by the irrepressible Italians in their own tongue "opera buffa," or "comic opera."

Rightly speaking, then, any and all operas are dramatic pieces, tragic or comic, set to appropriate music, sung instead of spoken. You can study out the differences between Italian and German, English and French opera (for all schools have had their day) just as long as you like, and can hear whole operas from records from overture to finale; yet you can never get away from the fundamental notion of recitative and air; the story and its embellishment.

Close of This Recitative

That is my little recitative on the beginning of opera. Perhaps you will not mind if I return to the subject in a different way a little later on. Meanwhile, you can try a perfect example of the ancient recitative and aria by getting the wonderful *Lascio ch'io piang* from Handel's Rinaldo, written by him in the Italian style as early as 1711. Schumann-Heink and Julia Claussen have recorded it and perhaps others. It is a perfect type of the sweet, stately and wholly beautiful old manner. If you want to know opera rightly, begin by studying that. It is still near enough to the days of Peri to be marked with his original impress and still close enough to our own days to be musically interesting. To study it well and drink in its beauties is not only to take a step in a fascinating pursuit, but to be vastly entertained the while.

ST. LOUIS TRADE MOST OPTIMISTIC

Labor Troubles Hurt Retail Trade, But Talking Machine Men Are Not Blue—Artophone Display—News at Aeolian Hall—Silverstone Returns From Vacation Spent at French Lick

St. Louis, Mo., April 9.—The reports of business for March are a bit spotted, but the jobbers say that their business has been above previous records and that they are expecting a big run throughout the spring.

The retail reports in the city possibly vary as the trade has been hit by the several labor troubles. Since the street car strikes of six weeks ago there has been a continuous series of strikes in some line or other, the most disastrous to the talking machine trade being that of a number of department store clerks and cash girls. Not enough people left the employ of the stores to really cause much difference, but those who did go out had the support of organized labor and a boycott was declared on all of the stores. This naturally hurt some of the stores more than others. All are reported to have felt it, some because of loss of trade from labor union members, but a harder proposition was that many women who are not directly interested in organized labor in itself have sympathy with the young worker and these women would not enter the stores while the pickets were outside.

Several Piano Row firms report that their March record sales were the heaviest they ever had. While they do not assert that the increase came from labor or sympathy trade, the amount of business is of record. The boycott was on for five weeks, and was ended only the last Friday in March. During that time one of the department stores—the Lindell—which sold cheap machines and records, was put into the hands of a receiver. This store had a large labor trade and was most seriously affected by the number of clerks going out and also by the boycott.

Samuel Limberg, of the Columbia international record department, came here the first of the month to spend several weeks with C. R. Salmon, of the Columbia Co., in boosting the language records and they report an excellent showing for the first few days.

Robert H. Cone, Jr., of the Artophone Co., is proudly showing a new line of eleven Artophone machines on the floor of the Artophone retail salesroom. The prices range from \$40 to \$300, including one table or low cabinet model. A catalog will be issued very soon setting forth these new styles and prices.

"Our retail trade has been better than we expected," said Mr. Cone, "and the jobbing trade is what we can make it. The demand throughout our entire territory is excellent, and I wish we could care for all of the business in sight. Now that we have co-ordinated our facilities for getting out these eleven styles of machines and will be able to offer more than our previous two models, we expect to be able to handle a much greater proportion of our trade."

THE WIDDICOMB

A FINISHED PRODUCT

The most expensively constructed and intelligently assembled line of Phonographs in the world—yet so reasonably priced that greater value is shown a prospective purchaser—

*Special Introductory Offer—Order from our illustrations in December, January and February issues of this publication any model as a sample at less 40-10, that you may know how well it is possible to make a reproducing instrument—you will receive a combination of—tone excelled by none—a motor less noisy than your watch and guaranteed to stay so—a better constructed and finished case than you have ever seen for the money. More convenient and commodious filing devices—except in numbers 1 and 5, where partitions for albums are used—together with unusual minor improvements—in fact you may secure the agency for *A Better Phonograph than your Competitors.**

WIDDICOMB FURNITURE COMPANY

We Are Ready—

Grand Rapids, Michigan

At Aeolian Hall, Manager Guttenberger reports the best month of the history of the talking machine department, not including the wholesale department which is getting under way satisfactorily. Harry B. Levy, once manager of the talking machine department here when a jobbing business was done through this wareroom but now Vocalion wholesale manager at Chicago, was here for several days during March and approved of the plans and assisted in getting the work under way.

Aeolian Hall also has found the record business exceedingly good during the month and reports unusually large sales of the more popular numbers.

C. R. Salmon, wholesale manager of the Columbia Co., is having an "off agin, on agin, gone agin" time with his draft call. Not long ago we reported him in class one. Next month he was in class five on physical examination. Now he has been recalled for further examination and finds himself in class one again, under the revised physical requirements. Mr. Salmon is making no claim for exemption, but would like to get a final decision.

Mark Silverstone has been back from his trip to French Lick, where he went for a much-needed rest. But his health is not entirely restored and he is taking things pretty easy, only visiting the store occasionally and then for only a short time. The organization he built up before he was compelled to rest is carrying forward the business in excellent style.

CONTRACTS ARE CANCELED

Important Letter From President of Columbia Graphophone Co. to Dealers

The following letter has been sent to Columbia dealers by Francis S. Whitten, president of the Columbia Graphophone Co.:

"In view of the recent Supreme Court decision, we consider it our duty to notify you that the dealers' contract existing between you and this company is no longer valid, and is hereby canceled.

"We anticipate that this new condition will not interfere with or disrupt our present business relations. We expect to continue to furnish you with our product and give you the same hearty and helpful co-operation as heretofore, and we expect you to give us the same loyal and interested representation.

"We have in course of preparation a certificate which will formally indicate that you have qualified as a Columbia dealer and are authorized to handle Columbia products, which certificate we hope to send you in the near future."

MAINTAIN YOUR INDIVIDUALITY

Do not surrender your individuality, your identity. Stand for something. The carbon copy is seldom sent out of the office. Better be a ten-penny nail in the plant where you work than try to be a steel girder that won't fit.

NORTHWESTERN CABINET COMPANY
MENOMONIE WISCONSIN

We are exclusive manufacturers of talking machine cabinets. We can furnish them either in white or finished. Special designs created and submitted if desired.

SPECIAL OFFER

We have a quantity of cabinets made for a concern which went out of business before shipment could be made. They are in oak and mahogany, height 50 inches, depth 23 inches and width 22 inches, with fancy carved legs, well top, beautiful massive design throughout. This is a big bargain for a quick purchase. Write for particulars regarding this special offer.

Pathe

The Quality Phonograph

**Don't you want to line up—
With a phonograph that—
promises best for the future?
Yes — Pathe —**

It's going strong right now—
And so are the Pathe Records—
But the dealer with business
vision should look way beyond
the present.

And if he does—he can see the fine
desirability of a Pathe connection.

Pathe arrived long ago—is moving ahead
fast—but it's this present momentum of
Pathe publicity that later on will provide
the greater returns for the dealer who
starts now, and builds with Pathe.

Write us about the Pathe proposition.

No Needles to Change

The Pathe Sapphire Ball takes the place
of needles. It need not be changed.

Long Life to Records

The Pathe Sapphire Ball cannot possibly
cut, grind, rip or mar the record's surface.

The Pathe Controla

With the Pathe Controla you may increase
or decrease the tonal volume of the Pathe
Phonograph at will.

Plays all Records

Each Pathe Phonograph plays not only
Pathe Records, but all other makes of
records, and plays them perfectly.

NEW YORK STATE SONORA DEALERS HOLD CONVENTION

Gather in Syracuse and Discuss Business Problems—Hear Interesting Addresses by President Brightson, of Sonora Phonograph Corp., and Others—Enjoy Banquet at Onondaga Hotel

About seventy Sonora dealers and members of the Gibson-Snow Co., Syracuse, N. Y., Sonora distributors, were in attendance at the first annual convention of the Sonora dealers in this jobber's territory, which was held recently under the auspices of the Gibson-Snow Co.

The purpose of this meeting was to enable the various Sonora representatives of New York State to get better acquainted with each other, and to have an opportunity of meeting the directing heads of the Sonora Phonograph Sales Co. The convention was a decided success, and all of the dealers were enthusiastic in their praise of the practical benefit derived from the meetings.

The dealers convened at the Gibson-Snow headquarters at 9 o'clock, and during the morning and the early part of the afternoon a number of informal conferences were held regarding distinctive features of Sonora products, and practical sales suggestions.

At 3 o'clock they adjourned to the Onondaga Hotel, where a short address of welcome was made by Nelson P. Snow, vice-president of the Gibson-Snow Co., Inc. Among the other addresses made at this meeting was a splendid talk on "Sonora Quality," by George E. Brightson, president of the Sonora Phonograph Sales Corp., which is reproduced herewith. Joseph Wolff, treasurer of the Sonora Phonograph Sales Co., spoke on "Trade Possibilities in Connection With the Sonora," and Frank J. Coupe, the company's director of advertising and sales, gave one of his usual effective addresses on "Advertising as a Whole," and as applied particularly to the Sonora line. Mr. Coupe gave the dealers some idea of the tremendous publicity campaign which the Sonora Phonograph Sales Co. has in view for 1918.

A banquet was held in the evening at the

Onondaga Hotel, and during the course of the dinner informal addresses were made by a number of the dealers who told of their experiences in handling the Sonora product, and of the remarkable strides in popularity which have been made by this high-grade phonograph in recent years.

Among those present at the convention in addition to the names already mentioned were the following: C. T. Malcomb, assistant manager of the Gibson-Snow Co.; L. M. Cole and Mr. Trotter, of the Gibson-Snow Co.; E. C. Beshgetoor, Jamestown, N. Y.; F. A. Jenss, Niagara Falls, N. Y.; J. Gordon Jenss, Niagara Falls, N. Y.; P. Moody, Saratoga Springs, N. Y.; F. W. Mead, Middletown, N. Y.; Fred L. Weinheimer, Syracuse, N. Y.; E. N. Weinheimer, Syracuse, N. Y.; Wm. Hile, Syracuse, N. Y.; Messrs. Bentley, Caldwell, Thompson and Schindwein, Syracuse, N. Y.; Chas. J. Ziegler, Palmyra, N. Y.; W. P. Smith, Palmyra, N. Y.; L. H. Wheat, Newark, N. J.; W. C. Ludwig, Rochester, N. Y.; J. E. Bird and J. E. Bird, Jr., Rome, N. Y.; Giles H. Dickinson, Binghamton, N. Y.; W. A. Jones, Oxford, N. Y.; F. E. Barnes, Herkimer, N. Y.; Chas. F. Hoffman, Buffalo, N. Y.; P. Farb, Saginaw, Mich.; C. G. Smythe, Binghamton, N. Y.; Fred Walters, Lancaster, N. Y.; T. Amesbury Goold, Buffalo, N. Y.; W. H. Patterson, Fulton, N. Y.; D. H. Clarke, Watertown, N. Y.; Mr. Hammond, Cortland, N. Y.; R. Guy Coe, Kirkville, N. Y.; E. F. Schepp, Boonville, N. Y.; E. K. Ruhl, Buffalo, N. Y.; C. F. Foster, Earlville, N. Y.; Geo. Kempf, Dolgeville, N. Y.; Miss F. Kempf, Little Falls, N. Y.; W. C. Al-peter, Rochester, N. Y.; J. H. Anderson, Utica, N. Y.; Taylor Chapin, Oneida, N. Y.; R. Gang, Syracuse, N. Y.; Mr. Churchill, Syracuse, N. Y.; Miss Elizabeth Kushnic, Syracuse, N. Y.; John

Gang, Syracuse, N. Y.; R. P. Smith, Marcellus, N. Y.

Geo. E. Brightson's Speech

At this time it might be well to bring to your notice that it has been the policy of Sonora Phonograph Co. to be original and lead, rather than follow what other manufacturers have done. At no time are we influenced by learning what some others are doing—such as offering inducements in the way of discounts or terms. Understand me, I hold in very high respect our greatest rivals for supremacy, and appreciate and give them full credit for whatever they are doing, or have done, in the way of improvements or production.

This applies particularly to the Victor Co. The world has them to thank for the really wonderful results of their efforts. The great industry they have built up is the public's tribute to the value of the work they have done. They have spent tremendous sums of money to record the genius of the foremost vocal and instrumental artists of our time. This will be appreciated by the generations to come, and will form a lasting monument to the remarkable and gigantic Victor organization. Their expensive advertising has helped every one, who has had under consideration the purchase of a phonograph, to determine they should have one.

The Columbia Co. also deserves much credit for many of its productions.

Personally, I have repeatedly said, during the past four years, that I would not want an instrument that could not play all disc records. These thoughts are not new with me, for our 1913 and 1914 advertising substantiates my views in that respect.

At the time of the formation of the Sonora Phonograph Corporation, we formulated a plan of keeping off of all other band-wagons; we refused to hire any person who had ever been in the employ of either of the then existing companies, whether it be a mechanic or a clerk. We would not consider a pattern for a cabinet that looked like one of the others, and we also followed original plans of our own for distribution. It has been our fixed policy to build our own foundation, to give full credit for that which belongs to our rivals, but to hold on to our own with a strong arm. While we are glad to give other manufacturers all they are entitled to, in return we ask only for that which belongs to us.

Here are some facts, which it is worth while to remember—and remember they are facts:

Referring to Sonora's production, I will say, and furnish absolute proof, if it be necessary, that Sonora was the first company to manufacture a cabinet under the \$200 list price.

The first to make a machine for disc records, with feed screw mechanism (as now used by another manufacturer and abandoned by the Sonora Co. about seven years ago).

The first to have an automatic stop—the first to have a tone modifier—the first and only one to have a motor-meter.

The first to play a disc record with a jewel needle—the first to play all makes of disc records in the world, and our earliest advertising told what we had accomplished in this respect.

Sonora was the first to deprecate the growing evil of "easy payments"; the first and only one to receive notice and a recommendation by the Jury at the Panama-Pacific Exposition for the highest award for tone quality.

Our recent advertising, condemning the growing evil of increasing the "easy payment" plan for selling is because we have an interest in the welfare of our dealers' bank balances. "Easy payments" are not easy—they are hard for the buyer, because they mortgage his future earnings. They are hard for the dealer, because they tie up his capital and load him up with extended debts, and often many return second-hand instruments.

Why **MUNOLA** Sales Are Increasing

Co-operation offered the dealer is of such caliber that it creates business, stimulates his confidence, and his sales to the consumer are made with greater assurance that satisfaction is guaranteed.

Owners of MUNOLA Phonographs appreciate what this medium priced instrument has brought to them: Tone qualities, cabinet work, and the distinct advantage of playing all records. Qualities such as these have never before been expected of an instrument selling at so low a price. Dealers make money on MUNOLA Phonographs because:

FIRST—The retail price is low and advertised.

SECOND—The MUNOLA is good.

THIRD—The discounts are legitimate.

You can become a MUNOLA dealer in your town if there is not one there already. Write today for full particulars.

America's Leading Popular Priced Phonograph

MUNZER MANUFACTURING CORP.

307 Sixth Avenue So.

Minneapolis, Minn.

\$44.50

In New York City one of our highest class piano dealers, on Fifth avenue, who sells our instrument, tells us that most of his sales for Sonora are made for cash, and at no time will they ever consider any partial payment, which carries the debt beyond six months. This same dealer has other phonographs for sale in his store, and he is compelled to follow what others are doing with those instruments, because of the publicity occasioned by great advertising.

It is difficult for me to understand just why a phonograph should be offered for sale differently than other necessities, and at this time I recommend to our dealers, when confronted with competition of that nature, and with the claim of some possible purchaser that he can get "easy" terms elsewhere; that you promptly say: "This is a Sonora I am offering you, and the Sonora is sold only with a quality inducement, and has never followed any other method. It is worth in value more than we are asking you for it." You can also say to your possible customers that their friends will recognize, when they see a Sonora in their homes, that they own the phonograph, that they have paid at least more than \$1 or 25 cents per for same. Pride of possession is prob-

George E. Brightson

ably the strongest selling force that exists, and that degree of pride is largely felt by Sonora owners.

Our advertising has been different from all others, and will continue to be "classy." We believed a phonograph was entitled to an advertising and sales plan, which aims to reach the masses, and not merely the masses. Our steadily increasing sales, and the very high class dealers, who now sell Sonora are a convincing proof that we were right in the course we pursued, and which we steadfastly are pursuing.

We have not stopped making improvements, nor are we resting on our laurels. I do not wish at this time to give away trade secrets—for that reason I cannot tell you at present, but will merely indicate that within a year from now we shall have the results of some of our lengthy and expensive experiments, which, when placed before our dealers, will cause you to add a largely increased value on your contract for selling Sonoras. I wish you would all remember this reference, and in less than six months I can say, "I told you so."

The marked favor Sonora has found, and our great success have caused some unscrupulous ones to attempt to deceive the public—in a few instances by advertising names closely resembling ours—in one case the changing of a letter, such as an "r" for an "n," otherwise it would be Sonora—making statements such as "about as good as Sonora" or "this part like Sonora," and generally making untruthful statements. To protect our industry as far as we can, I wish to ask your co-operation in these efforts of ours, which are now being made, to protect our rights, your business, and prevent the deception of the general public.

Notwithstanding the troubles of the world existing to-

day, present indications of 1918 are that it is going to be a far greater and better business year for phonographs than any that has gone before, which I hope will enable you to comfortably pay much larger excess profit taxes to the Government, in the spring of 1919, than you are paying to-day.

Homes with absent ones will need cheer. Invalids may return—the home will again need cheer. What can fill the void or vacancy equal to and for less money than a good phonograph?

England and France, I am informed today, after having been in this terrible war for such a long period, are manufacturing and selling more phonographs than at any time prior to the war. The demand is greater here to-day with us than before the war. I trust it will continue, for the comfort it brings to all that need it, and while it is our business, it is a pleasant thought to feel that we are all instrumental in making it possible for those requiring same, to have this cheerful proposition in their homes. If you could read the many hundreds of letters which this company has received from those who have gone to fight for our great cause, you would enjoy with me my feelings in this regard. We have them from Plattsburg, Spartanburg and from about all the camps in this country, as well as from the trenches abroad, and from our sailor boys, whom we must feel are our great protection against the invasion of our land.

We are going to keep right on making the "highest class talking machine in the world," and are going to do more to help you sell it than ever before. Expect it, and tell us if you do not get it.

NEW RETAILER IN PHILADELPHIA

Theodore Presser Co. Opens Handsome Victor Salesrooms at 1710 Chestnut Street, That City, With A. D. Proudfit as Manager

PHILADELPHIA, PA., April 2.—The latest addition to the retail Victor showrooms in this city are those opened recently by the Theodore Presser Co., well-known music publishers and dealers, at 1710 Chestnut street, in the building adjoining their old-established quarters. The new showrooms have been fitted up in a most elaborate manner, with Unico equipment throughout and under the management of A. D. Proudfit, formerly manager of the retail warehouses of the Estey Piano Co., in New York City. It is expected that the standing of the Presser Co. in local music and business circles will insure the success of the department from the outset. A satisfactory stock of machines and records has been secured, and Manager Proudfit reports that a satisfactory business has been transacted since the opening day.

NEW COLUMBIA DESIGNATIONS

George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, has sent out a letter to Columbia dealers informing them that in an endeavor to simplify the ordering of Grafonolas the company has inaugurated new type designations covering the instruments in the Columbia catalog.

In the future, when a dealer for example orders a mahogany Grafonola No. 15, the order will call for type "A" mahogany; when ordering a No. 35 oak, the new designation will be type "C" oak, etc. When ordering electrics, the word "electric" is utilized, as for example the 125 "E" mahogany Grafonola will be ordered as type "G" electric mahogany Grafonola.

The complete list of the old and new designations with the list prices is as follows: Grafonola No. 15 is now type "A," list price \$18; No. 25 is type "B," \$30; No. 35 is type "C," \$45; No. 50 type "D," \$55; No. 75 type "E," \$85; No. 85 is type "F," \$95; No. 100 type "G," \$110; No. 110 type "H," \$120; No. 150 type "K," \$160; No. 200 is type "L," \$215; No. 125 "E" type "G electric," \$135; "E" is type "H electric," \$145; No. 175 "E" is type "K electric," \$185; No. 225 "E" is type "L electric," \$240.

JOIN IMPORTANT ASSOCIATION

The Otto Heineman Phonograph Supply Co., Inc., has been elected a member of the American Manufacturers' Export Association and the National Association of Manufacturers. This company's export activities have increased tremendously during the past year, and Mr. Heineman is making plans to take care of a record-breaking export trade during the coming year.

The best and biggest men of all times have been self-made men—most of them started out with what the world would call a poor chance. Their chances were no worse and no better than those which surround every individual to-day.

No. 498 [vertical interior] For Victrola IX For Columbia 50 For Pathe 50

Height, 32 in. Width, 19 in. Depth, 22 in. Holds 240 records. Mahogany front. Quartered oak front. Average weight, crated, 80 pounds. [If horizontal shelving is desired, order No. 1498.] [When felt interior is wanted, order No. 498F.]

We started advertising Udell record cabinets in the first issue of The Talking Machine World that was ever published.

Every year since then we have consistently advertised Udell cabinets.

As a result of our publicity several thousand Americans are familiar with Udell cabinets and the Udell trade mark.

The industry has been steadily kept on intimate terms with Udell cabinets and the Udell trade mark.

Today the Udell trade mark on a record cabinet is nationally recognized by talking machine dealers as a guarantee of superior quality and of an excellent profit for the dealer.

NEW MANUFACTURING HOME FOR COLUMBIA IN TORONTO

Occupancy of Large Building at 54-56 Wellington Street Gives Company Double Present Factory Space—New Concerns Enter Field—Some Staff Changes—Other News of Interest

TORONTO, ONT., April 8.—The Columbia Graphophone Co. have just closed a deal whereby they will occupy, within a few days, the large modern building at 54-56 Wellington street, West. This will not only give the company more than double the manufacturing space heretofore necessary, but will bring them into the heart of Toronto's wholesale district, enabling Jas. P. Bradt, the company's general manager for Canada, to keep in close touch with the talking machine trade, and making it easy for Columbia dealers to keep in personal touch with the management.

The company announce that they have extensive plans in view of aiding the dealers even more than before. In this connection the latter will, no doubt, quickly get the habit of dropping in and talking things over, as Mr. Bradt's score of years' experience in talking machine affairs in different parts of the world, which is freely placed at the command of Columbia dealers, should be of inestimable benefit to them.

The primary reason for this move is the increase in Columbia business, which has made it impossible to keep pace with the demand for Columbia products, particularly records, in the quarters being vacated. New record-making equipment is already on hand, and is being rapidly installed. This, Mr. Bradt states, will at once increase the output to take care of the business, which has more than doubled during the past year, and with an eye to the future, facilities are provided to again double the output as soon as necessary.

The cabinet manufacture and the making of completed Grafonolas will continue as at present, a number of large woodworking plants being busy on this work. So the new premises will be reserved to supply ample record manufacturing, stock and distribution facilities. The Dictaphone will also be taken care of in the new location.

Large and handsome offices and ideal showroom facilities are being provided, as the chief consideration in locating on Wellington street was the central location, convenient for the trade. It is primarily this reason, state the management, that influenced the company in going to the expense of establishing in what is chiefly a wholesale, showroom district.

James P. Bradt, Columbia general manager for Canada, was wearing an unusually happy expression when asked about the new Columbia factory. "It is great," he said, "a lot better than we expected to secure, and ideally located. We hunted Toronto from end to end, and at different times found three factories which appeared to be the last word in desirability, but they were all bowled over and forgotten when we found the Wellington street premises. There is no better wholesale block in the whole of Toronto than that on Wellington street, between Bay and York streets.

"My Lyle, who was introduced to the Canadian trade in February, is very ably and strongly on the job as my co-worker. His intimate acquaintance with and knowledge of all our manufacturing problems will be of great value in making our new factory efficient and dependable in every department. Assistant Manager Hoffman, who came here from our Bridgeport factory two years ago, is enthusiastic over the prospect of having a model plant in Toronto. We hope to be 'at home' in Wellington early in April. We extend a very cordial invitation to our friends to come in and look us over."

C. J. Pott, Canadian sales manager of the

Otto Heineman Phonograph Supply Co., Inc., New York, has returned to the Toronto branch after a strenuous week in New York, where he attended a convention of the firm's head office officials, branch managers and factory managers.

Mahood Bros., Kingston, Ont., Victor dealers, C. W. Lindsay, Ltd., Columbia, etc., also of Kingston, in their advertising feature largely a

New Columbia Building in Toronto

selected list of popular selling records of classic, instrumental, patriotic and dance listings and find this a capital way of disposing of a selected list.

During the period of "heatless days" when theatres and movies were closed, the Columbia Graphophone Co. and their dealers throughout the country featured large-sized copy advocating the purchase of Grafonolas and records as a constant reminder of music in the home and never off the job entertainers.

The Talking Machine Supplies Co. has been registered in Toronto.

Arthur Middleton, the well-known Edison artist, recently appeared in a concert recital here in conjunction with the Toronto Symphony Orchestra. The dealers report having sold a large number of records of this artist as the natural sequence.

F. J. Kennedy, formerly of the Mason & Risch staff, Toronto, is again with headquarters, having returned in the capacity of manager of the Victrola department. A couple of years ago Mr. Kennedy went to Winnipeg and was manager of the Victrola department there, which position he resigned to return East.

A recent trade visitor to Toronto was M. H. Matthews, president of the Thomas Mfg. Co., Dayton, O., who was over having a look at his firm's Toronto branch, in charge of P. K. Wood and F. J. Foley. Mr. Matthews reports a

largely increased output of Dayton motors, tone arms and reproducers, as a result of the recent installation of new machinery and enlargement of their manufacturing facilities.

W. B. Puckett, vice-president and general manager, and F. A. Trestrail, advertising manager of the Williams Piano Co., Ltd., Oshawa, recently resigned their respective offices with that firm to devote their entire time and attention to the business of the Musical Merchandise Sales Co., distributors in Canada of Brunswick phonographs. John E. White, sales manager of the Williams Piano Co., announces that he is also joining the Brunswick distributing organization. The plans of the Musical Merchandise Co. include the opening of branches at Winnipeg and Montreal. Their offices and showrooms in Toronto are in the Excelsior Life Building, at the corner of Adelaide and Toronto streets.

J. W. Caswell, formerly Eastern sales manager of White Sewing Machine Co., has resigned that position to join the Starr Co., of Canada. His territory will be all of Ontario, and as he makes a change only after a close observation of the phonograph business in general, and the Starr line in particular, he should make good.

To avoid confusion because of similarity in names, and also to make their name more indicative of their business, the distributors in Canada of Starr phonographs and records have changed their firm name. In the future it will be "The Starr Co. of Canada," instead of "Canadian Phonograph Supply Co." The headquarters of the firm remain at London, Ontario. John A. Croden and W. D. Stevenson, proprietors of the firm, are just approaching the close of their first year's business, which has exceeded their brightest hopes. For some time they have been receiving phonographs from the factory at Richmond, Ind., by express, in order to have goods for delivery.

Rea's Drug Store, Woodstock, Ont., have had the formal opening of their music room, which has just been completed at the rear of the store. Rea's are featuring the Brunswick phonograph.

W. C. Wilson has taken up his new duties with the Pathé Co., and is already deeply engaged in evolving new ways and means of giving service to Pathé dealers.

T. A. Dillon, formerly Ontario traveler for R. S. Williams & Sons Co., Ltd., Edison sales branch, is now located at the Toronto headquarters as manager of the Edison sales department. Mr. Dillon is succeeded on the road by J. A. MacKay.

James Malcolm, president of the Pathé Co., is at present on a Western trip, which will take him out to the Coast.

Thomas Mundy, Toronto, has joined the Canadian Symphonola Co. as sales manager.

Recent additions to the growing list of Pathé dealers are: Claxton & Co., Lindsay; E. V. Warnock, Peterboro; Minifies Music Store, Sarnia; Jury & Leslie, Owen Sound; Wesley Walker, Goderich; A. G. Day, Orillia; Martin Music House, Brampton; Tucker Piano Co., Port Arthur.

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 69)

“MUSIC IN THE HOME” IN MONTREAL

Talking Machine Men Support the Campaign—American Machines in Favor—General Business Outlook Reported Most Satisfactory

MONTREAL, QUE., April 4.—A representative meeting was held recently of piano and talking machine dealers to listen to E. C. Scythes, president of the “Music in the Home” movement in Toronto, and J. A. Fullerton, secretary. A goodly amount was subscribed by those of the trade present, and it was announced that Montreal’s leading English Daily and Weekly and French Daily would feature a “Music in the Home” page very shortly.

W. W. O’Hara, general sales manager for Layton Bros., Edison and Columbia dealers, won the third prize in the recent Canadian Edison window display contest.

C. W. Lindsay, Ltd., lately displayed in their handsome show windows two new art design Pathéphones, the first to arrive in Montreal.

N. G. Valiquette, Ltd., have inaugurated a Pathé Club open to 100 members. As special inducements they offer easy weekly payments, reasonable extension in case of sickness, accident or loss of employment and clear receipt in case of purchaser’s death.

Sales Manager W. W. O’Hara with his usual aggressiveness made capital out of St. Patrick’s Day by dressing Layton Bros. show windows appropriately in honor of Ireland’s patron Saint. Edison and Columbia models were decorated with green ribbons, pots of shamrocks and records of Irish artists prominently displayed. The whole drew most favorable attention from passersby.

The Melodia Co., of Canada, have recently put on the market a new model.

The Berliner Gramophone Co., Ltd., are now distributing the new 584-page Victor catalog listing over 9,000 records.

The following world-known Victor celebrities will shortly appear in Montreal—Alma Gluck, Efrem Zimbalist, Martinelli and Heifetz.

Joseph Brien is now calling on the French trade in the interests of the Pathé Co. He is working from the Montreal office.

J. G. Harrison, of W. H. Thorne & Co., Ltd., St. John, N. B., Edison jobbers in the East, has returned from New York, where he attended the Edison jobbers’ convention. This firm has arranged for Odette Le Fontenay, soprano, assisted by Jan Glockner, cellist, to give a series of Edison tone tests in different Maritime Province towns, including St. John, Fredericton, Pictou, New Glasgow, Sydney and Glace Bay.

Ed Archambault has purchased the old J. A. Hurteau business from C. W. Lindsay, Ltd., and is turning his own store and the Hurteau store, which are next door to each other, into one large store. He will feature the Pathéphone and Pathé records.

Madame A. Didier, who has been in charge of the French section of the Pathé Co., has gone into business on her own account, opening a large Pathé department in the store of Dupuis Frères, the leading French departmental store in Montreal. Madame Didier is well acquainted with the talking machine business, having been in charge of the Pathé department at N. G. Valiquette, Ltd.

H. L. Hewson & Son, Ltd., Amherst, N. S., distributors of the Pathéphone for the Maritime Provinces, are moving into their new warehouse and offices, where ample facilities will be afforded for the development of their growing business.

The Cowan Piano & Music Co. are delighted with results since handling the Brunswick line and are building up a large clientele with this make as their leader.

Charles Culross reports exceptionally good Sonora and Aeolian-Vocalion business the past month with an increased demand over February in the call for the various higher-priced models of machines.

H. C. Wilson & Sons, Ltd., Sherbrooke, Que., are firm believers in the continued popularity of Victrolas and Victor records, to which they are giving aggressive and exclusive representation in Sherbrooke and the surrounding country and in their branch stores. Owing to the increased business a large part of the grand piano floor has been given over to soundproof demonstration rooms.

A. Ramsberger, in charge of the Grafonola department of J. W. Shaw & Co., reports that since removing the department to the ground floor business has increased wonderfully. The new style Columbia, No. 100, is quoted as an exceptionally good seller.

The Canadian Graphophone Co., Columbia distributors in the Province of Quebec in both their wholesale and retail departments, report briskness that augurs well for the future in both machines and records.

OPEN NEW SALESROOMS

The Ideal Phonograph Co., of Rockford, Ill., has opened two salesrooms in that city, one at 819 West State street, under the management of C. R. Poole, and the other at 1324 Seventh street, in charge of John King.

WITH THE TRADE IN WINNIPEG

Collecting Old Records for Soldiers—W. P. Trotzke Re-enters Trade—Hudson Bay Co.’s Payment Chart for Instalment Sales

WINNIPEG, MAN., April 2.—Stanwood’s, Ltd., Columbia dealers, recently appealed through the press for old records which they collect and send overseas without any expense to the donors. This example could easily be emulated by other aggressive dealers.

W. P. Trotzke, of Kinistino, Sask., who some time ago dropped out of the phonograph business, is back in the game again good and strong with the Edison line.

C. E. Locke, Tara; W. A. Bowen, Ridgeway; W. K. Elliott, Brampton, and Niagara Music Store, of Niagara Falls, have added the Brunswick phonograph line.

The Winnipeg Piano Co. secured first prize in the Canadian Edison window display contest, and feel quite elated over their victory by beating out Toronto in second place, and Montreal in third.

The following system of extended payments is announced by the Hudson Bay Co.’s Calgary, Alta., Grafonola department:

Price of Instrument.	Initial Cash Payment.	Monthly Payments.
\$24.00	\$5.00	\$4.00
\$38.00	\$8.00	\$5.00
\$58.00	\$10.00	\$6.00
\$73.00	\$13.00	\$6.00
\$112.00	\$22.00	\$9.00
\$122.00	\$22.00	\$10.00
\$155.00	\$30.00	\$10.00

It is reported that Edison Hall (the Kent Piano Co., Ltd.), are having a \$50 Edison prize essay contest open to the school children of that city and vicinity.

ESTABLISH MANY NEW DEALERS

BOSTON, MASS., April 8.—Oscar W. Ray, New England manager of the Emerson Co., makes a most enthusiastic report of the way dealers are taking hold of the new nine-inch records. Among the houses that are taking large consignments are the Jordan Marsh Co., Magrane Houston Co., Timothy Smith’s, out in Roxbury; J. C. Cauldwell, of East Boston; Harry Schulz, of South Boston; Sage Allen Co., of Hartford, Conn.; John Peitti, of Roxbury; M. J. Elvedt, of Allston; Kittredge’s, in Lowell; James W. Hill, at Manchester, N. H.; Krey’s Music Store, in Boston, and Seaford’s at Portland, Me. Mr. Ray says that March has been the best month in the New England territory since he took hold of it and that prospects are excellent.

An Artistic Spring Window Suggestion Described for Talking Machine Dealers

By Ellis Hansen

This is the fourteenth of a series of articles on window display written by Ellis Hansen, who is recognized as one of the most practical designers of talking machine window displays in the United States.

Once upon a time when the talking machine industry was very young indeed, hardly older than a baby that could only talk baby talk, and sing little simple songs, the public, nevertheless, was beginning to grasp the wonderful possibilities of the "talker" as a home entertainer. One day a well-known manufacturing concern woke up to the fact that its business was entirely too brisk. Letters and telegrams were pouring in on the concern from every part of the land, and it didn't know what to do to fill the orders. You see this concern had previously started an advertising campaign in the national magazines and the result was that it was hopelessly swamped with orders. Although its factory was working overtime far into the night, new orders were piling up and no relief was in sight. Something desperate had to be done. It was done. The advertising in the wicked magazines that had caused so much trouble was withdrawn for the time being. Soon after the factory caught up with all the orders on hand. The frantic telegrams and unpleasant letters from dealers urging deliveries ceased to trouble the order department. The working forces stopped overtime work and slept quietly at night and everybody was happy. Moral: Whenever you need a good rest stop advertising.

This little story may be true or it may not. It is a fact, however, that many dealers have cut down their advertising appropriations during the war, not only curtailing expenses for newspaper advertising but window display services as well. That sort of economy is bad business. The time to advertise and put in lots of work in your show windows is when business is slow.

Talking machine dealers should keep on hammering the fact into the public that music in war time is as necessary as food and clothes, and the dealer's best means for such a campaign is his show windows. Music helps to keep our boys in France or in the training camps strong and fit. It brings joy and pleasure into their life and helps them to stand the hardships that military life imposes on all new recruits.

But even the ones that are left behind—the

Detail of Dance Group

mothers and children—need music to cheer them up far more than before the war. The horrors of the war—our war—that are brought to our very doors every morning through the newspapers requires the greatest amount of reserve power, not only for our soldier boys but equally so for us, who by circumstances are compelled to stay at home.

The talking machine is the ideal instrument to provide the relaxation, refresh and strengthen the mind and dispel gloom and fear. But to bring these facts home the dealers must advertise and the show window is the best medium through which to demonstrate the entertainments, the diversion and the inspiration that the talking machine is able to bring to the millions

cealed back of the arms and figures to the nearest floor plug which, of course, would heighten the effect considerably. The figures were made separately, the girl standing in front of the boy with about four inches between them, which made the arrangement much more realistic. To make the most out of this display one fine talking machine should be arranged near the center

A Well Arranged Spring Window That Will Appeal to Dealers

of homes that are more or less affected by the war.

In former articles of this series I have called dealers' attention to the great aid "cut out" figures have proved to be in making interesting and inexpensive "talker" displays in connection with records. No other special feature that I can think of stimulates the sales of records more than such displays, probably on account of the human interest.

The "craze" for dance records seems to be as strong now as it was before our country entered the war. Several prominent dealers have urged me to design a dance window on that account and describe it in *The World*. The display shown in the photograph is intended to illustrate what a splendid time and entertainment people can enjoy in their own home by the aid of a talking machine. A simple baluster, finished off at each end with vases, forms a graceful background for the two dancers. Back of this are about a dozen Japanese lanterns in red, green, blue and yellow, which form a most dazzling color combination, and give atmosphere to the display. The two little trellises arranged back of the vases are thirty-six inches high, enameled white and made into a hub or ring at the top to support the two birds of paradise. These trellises also serve to support the rose branches which fit so nicely into an early summer window. The two figures are adapted from a *Vanity Fair* title page which pictured a skating scene. The two lanterns held by the dancers could be used with any lettering the dealer might desire. The dancers could also be provided with real lanterns and electric bulbs placed inside, the wires being con-

group. On the opposite side a program made up for the supposed entertainment should be placed. This program should consist of six musical numbers, the disc of each of which should be placed on stands in the display. The program should be headed with "America" or some other patriotic selection. The other five numbers could be made up from records the dealer is anxious to sell, and of which a good supply is kept on hand. The lanterns held by the dancers could also be used for important announcements of new records, or other advertisements desired by the dealer.

The baluster and vases are made of heavy cardboard cut out and air brushed and reinforced by strips of wood. The figures are almost life-size and painted in the natural colors. The artificial flowers in the vases consist of three branches in each, and can be procured from dealers in artificial flowers for less than \$2. The Japanese lanterns cost 10 cents each retail. Each one should have a little sand in the bottom to hold it in shape.

WORLD RECORD SOUNDS OF BATTLE

Henry G. Rhodes, Whiteville, Tenn., who describes himself as a "Phonograph fan," is shortly to enter the military service, and advises us that his ambition is to carry about 100 blank records to France with him and record the sound of the big guns right back of the firing lines in order to let the folks at home hear what they sound like. A motion picture has shown us the big guns in action, and probably the phonograph will let us hear how they sound in action.

SONA-TONE SHOP OPENED

New Brooklyn House Featuring Sona-Tone Phonographs—Now Able to Make Prompt Deliveries of All Types of Those Machines

A spacious and attractive Brooklyn Sona-Tone Shop was opened in Brooklyn on April 3, with Franklin Riker, a well-known musician, as sales manager. This shop is situated at 322 Livingston street, within a half block of the Montauk Theatre. The Nevins street subway station is just around the corner, and Mr. Riker is enthusiastic over the desirability of the shop's location and the unlimited opportunities for closing an excellent business.

This shop will carry a complete line of Sona-Tone phonographs, and arrangements have been made which will enable the shop to make immediate deliveries of all types. The showrooms are attractively furnished and decorated, and Mr. Riker is leaving nothing undone to make the warerooms a Mecca for music-lovers in that section of the city.

One of the most interesting features of the organization of this Brooklyn Sona-Tone Shop is the fact that Mr. Riker is a thoroughly trained and experienced musician, having studied for the concert stage in Italy, under some of the best-known maestros. Possessing a remarkably fine tenor voice, his concert work has attracted considerable attention from critics and from members of the musical world. At the present time he holds a position as soloist in one of the largest and most influential churches of Brooklyn. Mr. Riker believes that every salesman of musical instruments, especially talking machines, is a 100 per cent. salesman only when he knows the practical side of music, and knows when and how to appeal to his patrons through understanding tone quality. He has a number of important plans to announce in connection with his work at the Sona-Tone Shop, and sales during the first ten days have been very gratifying.

FINISHING FRET WORK PROPERLY

How One Cabinet Manufacturer Solved This Particular Problem in a Logical Way

One of the features of many phonograph cabinets that has called forth criticism has been the unsatisfactory finish of the fret work covering the sound chamber. In a good many cases cabinets, beautiful in every other particular, have been marred by poor work in this connection, due oftentimes to the fact that the cabinet finishers did not understand just how to go about handling the fret work. One cabinet maker managed to overcome the difficulty by having the panels finished before the fret sawing was done, the panels being rubbed down after the three coats of varnish, just the same as the rest of the case.

The panels were then nailed together, four in a bunch, with ordinary drafting paper between them, the top panel being turned face downward, and the marking done on the back, it being sanded if needed. The panels turned out well and they presented a fine, clean-cut appearance that was impossible in the old method.

In order to stain the edges left white by the sawing, an oil stain is used, as water stain is inclined to swell the wood and mar the clean-cut appearance of the work. The top side of the fret sawing that shows when it is placed in the case is shellacked with a small, soft brush from the back side of the panel, and the result is very satisfactory. These panels are of five-ply veneer and are three-sixteenths inch in thickness and go into a small mitered frame that is removable. Any finisher knows how much tedious and fussy work is required to finish a fret sawed panel, the rubbing is never flat and the picking out of pumice stone from the corners of the fret is an almost impossible job, while what is left turns white in time.

The above plan does away with this nuisance. Four panels are fret sawed at one time and the work is done on a McKnight saw. For panels in the fumed finish, no paper is required between

Most Efficient for Record Filing

Here is shown the Edison style C 150, equipped with an Eject-o-File style 150 E.

The instrument equipped with this device offers a wonderfully simple and efficient receptacle for records.

The record is always at your finger tip.

Simply press the index lever and the desired record is gently rolled into your hand.

It completes the instrument.

them while fret sawing. By using a good saw blade with little set, or one of the French pattern blades, having no set and running to a narrow back, the work is very smooth and no further labor is required before sending the panels to the finisher.—Veneers.

Style 70—Retail \$10.00

7 IN 1

Seven strong points in our feature is a powerful selling argument.

1. Controlled entirely by gravity. Will not get out of order.
2. Non-abrasive individual record compartments.
3. Records cannot warp, scratch or mar and are kept clean.
4. 10" and 12" records can be filed in any compartment indiscriminately.
5. In beautiful oak and mahogany finish. Polished, waxed and dull finish.
6. Automatic out signal shows "when and where" a record is missing.
7. Filing and finding a pleasure. Get the desired record when it is desired.

COLUMBIA DEALERS: Eject-o-files are built to fit the style 75 and others. Slip them in as they are wanted. Why carry that big stock of 85's, etc., when the Eject-o-file does the trick. "The Eject-o-file is Efficient" and you are in business for dollars and cents.

VOCALION DEALERS: A receptacle for records that can be slipped into your style F.-G.-H.-J.-&-K. They are "built to fit." Wonderful convenience and a powerful selling argument. Ask the Salesman.

EDISON DEALERS: Eject-o-files are built to fit the style C-150 and 100. Many dealers are reaping the benefits. Why not you?

"BUILT TO FIT" any machine and a powerful asset for any dealer. Why offer Albums, Envelopes and other antiquated methods of filing to your customer? Eject-o-files are modern and efficient. Prices are phenomenally low.

The "sectional Eject-o-file," an auxiliary cabinet, compact, large capacity. Can be conveniently placed on table, stand, etc., or stands especially adaptable can be had. Beautiful and artistic, mahogany and oak finish, polished, waxed or dull. Each section a complete unit, can be added to, one upon the other, you know, sectional bookcase idea.

THE EXCLUSIVE VS. GENERAL STORE

Some Strong Arguments in Favor of the Former Set Forth by M. E. Taylor, Victor Dealer of Jackson, Miss., and a "Specialist"

Since the talking machine business was young—and that is not so very long ago—one of the points of discussion has been whether or not it was advisable to handle talking machines exclusively, or, whether the better course was to handle several lines of merchandise in conjunction with the talking machine department. The views, of course, are varied, according to the personal experiences of those giving them.

The man with the exclusive store, who has won success, naturally maintains the arguments for his method, while the other merchant who carries side lines can see some merit in his system. There is no doubt, however, that in many particulars the exclusive talking machine

An Inspiration for Other Dealers

store has some advantages in the matter of attractiveness to the customer, and the service that can and must be given, to insure the success of the business. With an exclusive store, the dealer has no other line to rely upon to make up in profits what he may miss by his neglect of the talking machine trade. In support of the exclusive idea, therefore, the following comment by M. E. Taylor, Victor dealer, of Jackson, Miss., is of general interest. He says:

"We are 'specialists.' We started in business here in November, 1913, confining our entire capital and energy into the talking machine business and to prove that this is a business big enough to sustain itself and not a 'side line' issue as so many have thought. We have now gone through four years and for your information and for the information of thousands of others we take great pride in stating that our business has grown to quite large proportions.

"The customer has learned to come to the exclusive dealer because he has learned from actual 'service' rendered him that he gets what he wants and that well trained employes are telling him the history of each particular record, and in every way making things interesting to him.

"The exclusive dealer as stated before places his whole time and energy into this which he considers as big a business and requires as much time as another business in order to give the most critical customer the service he is looking for.

"We believe that more dealers are waking up to the fact that specializing is what is needed. We have time to give close study to every detail to think out what your trade wants, to study each customer, to keep records of each customer's purchases on cards for future reference so as to follow him up closely, to be able to intelligently get to the kind of music he wants without boring him and shortening both his time and yours. This kind of service the customer appreciates. He feels that you are taking that special interest in him and appreciates it.

"We carry the complete line of records because this is 'service.' When the customer asks for a particular record he expects to get it. It is true that some records don't move as quickly as others, but you never know when a certain record will be asked for and to have this rec-

<h1 style="font-size: 2em; margin: 0;">MICA</h1> <h2 style="margin: 0;">Diaphragms</h2>	Quotations and samples promptly forwarded upon request Send us your requirements No obligation incurred			
	<h3 style="margin: 0;">INTERNATIONAL MICA COMPANY</h3> Offices and Factory, 37th and Brandywine Streets, WEST PHILADELPHIA, PA.			
PHILADELPHIA PA.	CHICAGO, ILL. (Insulation Dept.)	AMELIA CO. VA.	MONTREAL CAN.	WEST PHILADELPHIA PA.

ord creates an impression at once on the customer that this store in the future is where he will come. So our advice is to carry the complete catalog and have it so systematized as to order immediately as fast as you sell a record to get it right back in stock, and thereby never be out and never lose a sale and never disappoint a customer.

"Now by specializing you can easily do this, because you are just in the talking machine business and by giving your whole time to it it becomes not only profitable but extremely interesting, and, Oh! my! watch it grow, watch the customers multiply, watch them come in from your side line competitor. Now the writer does not in the least wish to hamper the trade by discouraging side line agencies, but if the dealer who thinks this is a little business and places it in just to pay the rents and other items, he is overlooking the biggest business he has ever had.

"If possible for him to do so, let him rent a store elsewhere and just specialize, if not, then by all means build booths and place in a most prominent place at the front of his store a well equipped talking machine department with nothing short of the complete catalog of records.

"There is nothing to fear, just start it right, and watch it grow to be the most interesting business you have ever entered.

"Don't employ cheap help, look around and get the best. It pays. Remember you have the highest grade talking machine with the world's greatest singers, and don't employ cheap help. At all times keep the high prestige of your line before the public in every possible way.

"The same applies to your advertising department. Get up a nice attractive ad or nothing at all.

"The writer may be an extreme enthusiast, but we have found that the above are facts, and to be more frank about it, I have found time to take but one three-day vacation in four years, working even into the night many and many times until 11 or 12 o'clock.

"Now suppose this was a side line and kept us this busy, what would become of the other business?"

MAKING TALKING MACHINE PARTS

The Popular Talking Machine Co., New York, has just placed on the market a complete line of talking machine parts, including single and double spring motors, tone arms, governor springs, main springs, etc. The company has made arrangements to supply the trade with these parts in large quantities, and has already closed contracts with several manufacturers. According to present plans it will also market a line of talking machines which will be known as the "Popular," and these instruments will include all of the types that are in active demand.

TAKES CHARGE IN SCRANTON

Frederick Delano, of New York, has taken charge of the talking machine department in the store of Stoehr & Fischer, on Washington street, Scranton, Pa.

TO HANDLE THE COLUMBIA

Harry Stevenson, furniture dealer of Circleville, O., has put in a line of Columbia Gramophones and records in a large new department just opened.

NEW DISTRIBUTIVE PLAN SOON

To Be Announced by Wm. H. Alfring, Manager of Wholesale Vocalion Dept. of Aeolian Co.

Wm. H. Alfring, manager of the wholesale Vocalion department of the Aeolian Co., New York, announced this week that the company

W. H. Alfring

will soon be in a position to advise the trade regarding the establishment of several important points of wholesale distribution. Mr. Alfring has been busy the past few weeks working

out this plan of distribution, and, according to present arrangements, Vocalion wholesale headquarters will soon be located in many of the principal cities.

At the present time the Vocalion is being distributed from St. Louis and Chicago, and the dealers in these territories handling this line are enthusiastic regarding the service and co-operation that they are receiving from these two distributing points. The demand for the Vocalion has increased so rapidly that it has been found advisable to divide the country into a number of wholesale distributing centers, so that the dealers in each section of the country may be given maximum service and co-operation.

During the past few months Mr. Alfring has visited Vocalion representatives throughout the country, and, according to reports he has received, this high-grade line will enjoy a banner era of prosperity during the coming year. Vocalion representatives have been concentrating their activities on the development of the better class of business, and the fact that this

instrument is manufactured, marketed, and guaranteed by the Aeolian Co., the world's largest

A Period Style Vocalion

manufacturer of musical instruments, has been an important factor in the success which this instrument has achieved during the past two years. Meanwhile, plans already laid should mean even greater progress for the Vocalion in the future.

MANY AIDS FOR THE DEALER

Kohler & Campbell, Inc., Have a Well-Managed Department Equipped to Help Dealers Secure Business Along the Lines of Least Resistance

The value of a thoroughly perfected organization has been manifested in the success of Kohler & Campbell, Inc., Fiftieth street and Eleventh avenue, New York, who are counted among the world's largest manufacturers of pianos, player-pianos and reproducing pianos. The growth of this concern has not only been rapid but has been particularly healthy, and they have, besides developing phenomenal manufacturing facilities, maintained for many years a sales promotion department, which places at the disposal of the dealers many merchandising aids.

The main object of this department has been to study the requirements of the purchasing public as well as the dealer, and to help the latter secure business along the lines of the least resistance, consequently this department, which is under the supervision of Chas. A. Stein, advertising manager, who has had a wide experience in merchandising, has planned several forms of promotion work which have proved most successful. These include circular letters for the dealer's use, catalogs, pamphlets, envelope stuffers, window displays, window cards which may also be used for trolley car advertising, and electrotyped advertisements for use in various sized newspaper advertising. The department is also able to supply the dealer with lantern slides, which may be used in the various moving picture houses in his locality. All of these sales promotion features have been planned after a thorough study so that they will have a most appealing effect on the minds of the people and prove to be a magnet which will draw prospects to the dealer's store.

Veritone Talking Machine Co., Inc., has been incorporated with capital stock of \$2,000, to deal in phonographs and musical instruments. The incorporators are Walter B. Craighead, Edith Craighead and Isabell Ross

The Unger Furniture Co. have set aside a large section of their store as a talking machine department handling the Victor line exclusively.

COLUMBIA FORCE IN DALLAS, TEX.

DALLAS, TEX., April 4.—H. A. Yerkes, field manager of the Columbia Graphophone Co., was a visitor to this city recently, and spent some time at the company's local branch, which is under the management of F. E. Erisman. While here Mr. Yerkes congratulated Mr. Erisman upon the efficiency of his sales organization, and the accompanying photograph gives the facsimiles of these live wires.

During the past few months the sales totals of the Dallas branch have shown a good-sized gain over 1917, and the figures for last December, which set a new record, were exceeded by February. March sales totals are not yet available, but it is more than likely that this month established a new high-water mark for this very successful organization.

THE DEALER WHO FAILED

Shop front dirty—unclean windows—inadequate stock—rusty stock of machines—records heaped together indiscriminately on the counter,

scratched, and with torn envelopes—untidy shop, etc.; that is the story of the dealer who failed. It is told in an interesting way by M. E. Ricketts in "The Voice," of London, and makes instructive reading, embodying, as it does, helpful hints and much useful advice for all who would be successful in their business.

TRADE ACCEPTANCE PROVES POPULAR

Delpheon Co. Finds That Its Dealers Generally Are Pleased With That System of Handling Accounts as Increasing Credit Prestige

Talking machine manufacturers throughout the country are taking a keen interest in the adoption of the trade acceptance as an ideal

authorities, the National Association of Credit Men, and, in fact, all members of the business world are advocating its prompt adoption. The Federal Reserve Banking System has been urging business men to utilize the trade acceptance, and it is quite likely that its use will soon be universal and common.

The average business man is familiar with the principle of trade acceptance, which is an acknowledgment of the debt by the buyer in favor of the seller, for merchandise that the latter has placed in the hands of the former, with which to pay his debt. The buyer agrees to pay at a certain date at his own bank, to the seller, the amount of this invoice, by writing across the face, the word "accepted," with the name of his own bank and his own signature.

duced herewith, and this form is meeting with the unanimous favor of the company's representatives.

NEW INVINCIBLE SOUND BOX MODEL

Hector Pocaroba, sales manager of the New Jersey Reproducer Co., Newark, N. J., manufacturer of the "Invincible" sound box, returned recently from a two months' trip through the north and central West. He states that conditions throughout this territory are very satisfactory, and substantiates this optimism by showing good-sized contracts which he has closed for 1918.

In a chat with The World Mr. Pocaroba said: "It is pleasing to note that a number of well-known manufacturers have adopted the 'Invincible' sound box as the standard equipment for their 1918 product, and as they reached this decision because of the tonal qualities of our product, we are naturally gratified at the success which this sound box is achieving. We have received many letters of commendation from dealers regarding the 'Invincible' sound box, and our facilities in 1918 will enable us to adequately take care of the demands of our trade."

Upon his return to Newark Mr. Pocaroba learned that the company now has ready a new model of the "Invincible" sound box, which was invented and perfected by A. Luciano, superintendent of the company's laboratories. It will be known as the "Invincible" No. 2, and is now being introduced to the trade. Initial orders indicate that it will soon outrival the first model in popularity.

SECURES THE COLUMBIA AGENCY

The Sanitary Bedding & Furniture Co., of Binghamton, N. Y., has secured the agency for the Columbia Grafonolas and records, and has opened a handsome department to handle that line.

THE DELPHEON COMPANY BAY CITY, MICHIGAN. \$ _____ 19 ____ days after date pay to the order of OURSELVES Dollars. Invoices of THE DELPHEON COMPANY

The TRADE ACCEPTANCE—Read Carefully. If you do not care to take the cash discount, sign the above Trade Acceptance and return it. Our obligation to make wholly satisfactory all goods shipped to you does not cease under the above manner of settlement.

Form of Trade Acceptance Used by the Delpheon Co. Many manufacturers regard the trade acceptance as the solution of one of the biggest problems in the business world to-day, and are calling the attention of their dealers to its value and advantages.

an acceptance increases the financial standing and prestige of the giver, because it evidences his desire to pay his invoices promptly. One of the many prominent talking machine manufacturers who have adopted the trade acceptance is the Delpheon Co., of Bay City, Mich., which recognizes in the trade acceptance the ideal method of doing business.

LOCAL VOCALION DISTRIBUTION

Retail Manager Fletcher Announces New Distribution Plan for Metropolitan Territory—Promotions for Members of Sales Organization

Thomas H. Fletcher, retail manager of the Aeolian Co., New York, in a chat with The World last week announced a new plan of Vocalion distribution for the metropolitan district which went into effect on the first of the month. This plan was evolved in order to give Vocalion dealers in metropolitan territory 100 per cent. efficient service and co-operation in handling this line. The demand for the Vocalion has increased tremendously within the past year, and Mr. Fletcher has perfected a distribution plan which will undoubtedly meet with success throughout this territory.

Aeolian Hall in New York, together with the three Aeolian branches in the Bronx, Brooklyn and Newark, will be the distributing points in this new system, the New York headquarters, of course, being the principal basis for distribution.

E. M. Wheatley, who has been in charge of the retail Vocalion department at Aeolian Hall, New York, for the past two years, has been placed in charge of Vocalion metropolitan distribution with headquarters in New York, and will also continue as head of the retail department at Aeolian Hall. Mr. Wheatley is one of the best-known members of the local retail trade, and during his two years' association with the Aeolian Co. has achieved gratifying success.

Louis E. Vannier, who has been in charge of the Bronx branch, has been appointed assistant to Mr. Wheatley in both retail and wholesale distribution. Mr. Vannier is one of the veterans of the Aeolian sales organization, and his conscientious and loyal work in the past well merits his promotion to his present important post.

M. Stein, who has been connected with the Aeolian organization the past seventeen years, has been appointed manager of the Bronx branch, and will be in charge of the metropolitan distribution north of 125th street. Mr. Stein joined the Aeolian forces when a boy, in charge of one of the stockrooms, but soon developed such marked sales ability that he was appointed a member of the outside sales staff. Within a period of two years he became the

"top" man of the outside force, and year after year maintained this enviable record. During the past few years he has been in charge of Vocalion agencies in the metropolitan district, and as he is a native of the Bronx, his appointment as manager of this branch will undoubtedly mean additional laurels for him.

C. J. Davis, manager of the Brooklyn branch since September, 1916, will be in charge of distribution in Brooklyn and the adjacent metropolitan territory. Mr. Davis joined the Brooklyn sales staff two years ago as an outside salesman, but advanced steadily to the post of manager of this branch. His thorough knowledge of salesmanship and his keen executive ability have been important factors in the success of this branch.

W. O. Black, who is well known in piano circles throughout the country, and who has been manager of the Aeolian Newark branch since it opened, will be in charge of metropolitan distribution for Newark and the adjacent territory, and under his able direction the Vocalion will receive splendid representation in this district.

TALKING MACHINE EXPORTS

The Figures for January Presented—Exports Show Machines and Records Both Increase

WASHINGTON, D. C., April 1.—In the summary of exports and imports of the commerce of the United States for the month of January, 1918 (the latest period for which it has been compiled), which has just been issued, the following figures appear:

Talking machines to the number of 5,731, valued at \$150,649, were exported in January, 1918, as compared with 6,190 talking machines, valued at \$149,569, sent abroad in the same period of 1917. The total exports of records and supplies for January, 1918, were valued at \$164,074, as compared with \$163,632 in January, 1917. For the seven months' total 55,146 talking machines were exported, valued at \$1,520,738 in January, 1918, and 44,943, valued at \$1,111,761 in 1917, while records and supplies, valued at \$1,171,138 were sent abroad during 1918, as against \$877,283 in 1917.

ANDREWS AD WORTH READING

BUFFALO, N. Y., April 3.—On another page will be found a large list of Victor records from the stock of W. D. & C. N. Andrews, of this city. This firm will be able to make immediate shipments on these records.

"Our idea of publishing this list," said C. N. Andrews, "was that perhaps we could furnish to many dealers certain records that they were unable to obtain elsewhere and also to induce them to push the sale of records that can be obtained.

"As we are catering to the wholesale trade exclusively we always stand ready to do anything to assist the dealer. We have a very good stock and would like to have any dealer who is having difficulty in getting what records he wants to give us a trial order."

NEW WINDOW DRESSING SERVICE

First Instalment Issued by the Emerson Phonograph Co. to the Trade—Offered to Dealers at an Insignificant Monthly Charge

The accompanying photograph presents an illustration of the first instalment of the new window dressing service inaugurated by the Emerson Phonograph Co., which has made arrange-

Emerson Window Dressing Service

ments to issue similar window displays each month. The display will be furnished to those Emerson dealers who take advantage of the special plan which the company has prepared, by the terms of which the service will cost the dealer 50 cents a month for a subscription of four months, or a full year.

The company made the first announcement of this new service a few weeks ago, and has already received numerous requests for the service from dealers throughout the country, who appreciate the fact that the use of this display will give them an attractive window without necessitating the employment of skilled window dressers.

HEINEMAN'S GIFTS APPRECIATED

Vanophones and Records Sent to U. S. Marines at Various Points Bring Forth Letters of Earnest Thanks From the Recipients

As noted recently in the columns of The Talking Machine World, Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, has donated a Vanophone and a supply of Emerson records for the various companies of the U. S. Marine Corps located in different stations throughout Cuba, Haiti, etc. These companies have received their machines and records, and they are being used to excellent advantage by the members of the Marine Corps. In fact, they are so enthusiastic over the entertainment that this gift has afforded that Mr. Heineman has already made arrangements to furnish the various companies of the Marine Corps with additional machines and records.

Some of the letters received from the commanding officers of the different companies of the Marine Corps in acknowledging these gifts read as follows:

"Wish to acknowledge receipt of one Vanophone and twenty-five records, for which I want to thank you for your kindness, and can assure you that it will be very much appreciated by the men of this command. I am sure that they will derive much pleasure from these excellent machines, and will encourage them to buy more records from you."

"Many thanks for the Vanophone received. The men derive great pleasure in the daily Vanophone concerts, and are very grateful for your kindness and consideration. It is a joy to hear reproduced the new music and songs of our native land.

"The men contemplate purchasing an additional supply of your Emerson records and would very much appreciate a catalog with price list of Emerson records that they may still further enjoy the kind and thoughtful gift."

"Through the graciousness of the Otto Heine-

man Phonograph Supply Co., the Fifty-seventh Company, U. S. Marines, is in receipt of a Vanophone and one set of Emerson records. I am sure that the men of this company will receive much pleasure and enjoyment from your good gift.

"Through your beneficence you have afforded an abundance of pleasure to the men of the Marine Corps stationed here.

"The Fifty-seventh Company takes this opportunity to offer its thanks."

"I am in receipt of a box containing five Vanophones and records therefor. By direction I have distributed one to the Fifty-third Company and one to the Fifty-seventh Company under my command at this post. The other three have been shipped to Cape Haitien for distribution to the Fifty-fourth, Sixty-second and Sixty-fourth companies.

"Permit me to thank you on behalf of the Fifty-third and Fifty-seventh companies for your kindness in this matter. The Vanophones are extremely unique and they will give an im-

mense amount of pleasure to the men and also to the officers. It is a donation that is highly appreciated."

"Referring to your letter dated New York City, January 14, 1918 (R.C.A.:C.F.) signed by R. C. Ackerman, export manager, we all wish to thank you for your kindness in sending us the three Vanophones with twenty-five records for each, which have just been received in good condition.

"The machines and records have been distributed to the three companies mentioned, and are now in use and being appreciated by all the men; these are excellent little instruments and appear very strong and compact.

"The men are deriving a great deal of pleasure from these machines, and we are truly greatly indebted to you for this generous and welcome contribution to our amusement and entertainment.

"Please accept my personal thanks for having our interests and welfare at heart, and our best wishes for your success."

GRADED LIST OF VICTOR RECORDS

The latest and most important addition to the educational literature sent out by the Victor Talking Machine Co. is a new graded list of records for the home, kindergarten and school, a handsome volume of over 270 pages, illustrated in detail, and with the various types of song and instrumental numbers carefully classified, according to the school grade in which they are intended to fit to the best advantage. In the descriptive matter the list follows closely along the lines of the regular Victor catalog, and that makes for convenience.

The illustrations show the use of the Victrola in the various schools for games, folk dancing and various exercises, and for other special purposes. There are shown portraits of some of the famous Victor concert artists, together with illustrations that show the various instruments of the orchestra, strings, woodwind, brass and percussion. The list also acts as a

guide to the teacher in the selection of appropriate records and their proper use.

NOW WHOLESALE EXCLUSIVELY

PEORIA, ILL., April 8.—The Putnam-Page Co., Victor wholesalers of this city, have discontinued their retail department and now handle Victor machines and records at wholesale exclusively. The rapid growth of the company's wholesale business necessitated the move. The company will remain at its present address and arrangements have been made for securing considerable additional space in the same building.

J. W. MARKS NOW IN CHARGE

J. W. Marks, of Chicago, has taken over the management of the piano and phonograph department of the O. T. Johnson Co., Galesburg, Ill. Mr. Marks was for a number of years connected with the Cable Company, of Chicago.

SONA-TONE

A Phonograph of Distinction with the Tone You Can't Forget

THE American public today—those who purchase phonographs and other domestic conveniences—want above all else—

-- QUALITY -- RELIABILITY -- SERVICE --

SONA-TONE *Quality* means a resonant, full, liquid tone that comes from an especially designed, all-wood sound chamber—and superior workmanship in material, finish and equipment.

SONA-TONE *Reliability* means simplicity of mechanical construction—ease of operation—and convenience and solidity of working parts.

SONA-TONE *Service* means the immediate ability of the purchaser to play all makes of records—without attachment of any sort—and to play a library of from 250 to 1000 assorted records without further expenditure.

We believe that a Sona-Tone eliminates—to a greater extent than any other phonograph—the surface noises of the record.

We believe that it has the same quality of resonance as exists in the Stradivarius violin.

From our sales record—previous to advertising—we believe that a SONA-TONE is a superior phonograph for retail merchandising.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN,
Manager

World Office
Republic Bldg., 209 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., April 10.—The wholesale trade in general is unanimous in claiming that the past month was fully up to their anticipation and that they have exceeded in some instances the business carried on during the corresponding month last year. There were some doubts, however, at the beginning of the month as to whether or not they would come up to anything like last year's business, owing to the chaos then existing in the railroad center due to storms and other mishaps which generally bring rolling stock to a standstill. As these conditions righted themselves and the shipments of both the completed product and the raw material found their way through in periods of time that were not much greater than those of normal, conditions began to get brighter and the better the shipping facilities became there naturally followed an increased amount of business.

The record situation which was quite keen during the first three months of the year also began to get back to the normal, and as records came rolling in the retail dealers began to get busy and for the first time during the year they were allowed to have the stock for which they were clamoring the most; that is, the popular numbers.

The retail trade suffered a slight set-back during the latter part of March and the first part of April, but this set-back had been anticipated because as is usual during Holy Week there is a general dropping off in business. However, after the public had finished eating its usual quota of Easter eggs and had digested them they began to think of "Music in the Home," which was only natural, and as a result the trade began to pick up again.

L. C. Wiswell to Go East

L. C. Wiswell, manager of the wholesale Victor department of Lyon & Healy, is making preparations for a contemplated visit to the Victor factory next week. Mr. Wiswell also intends to visit various other plants in the East before returning to headquarters in Chicago.

Cheated the Doctor

H. J. Fiddelke, assistant manager of the wholesale Victor department of Lyon & Healy, returned to his desk this week after having been confined to his home for several days with an attack of acute appendicitis. During his illness

Mr. Fiddelke stated that he had lost twenty-five pounds in weight and suffered intense pain. He was fortunate enough to recover, thereby avoiding an operation. Mr. Fiddelke anticipates going to a hospital and having an operation performed just as soon as he regains his strength, as he figures there is no use in having a reoccurrence of the attack.

Singers Give Concert

Oscar Shaw, leading man of the "Leave It to Jane" company, now playing at the La Salle Theatre, accompanied by several other artists of this company, was heard in a special Columbia recital on the afternoon of April 2 at the

Columbia Recital of Adam Schaaf

recital hall of Adam Schaaf. Several of the big "hits" of the show were rendered to the large audience by Mr. Shaw and Columbia records of these "hits" were also played. The Columbia graphophone and a player-piano were used throughout the entire performance in conjunction with the various numbers sung. R. H. Walley, of the Columbia Co., and Charles Hertzman, manager of the "Leave It to Jane" company, were instrumental in making arrangements for the concerts. Among some of the numbers rendered were "I've Got the Blues for Home, Sweet Home," "The Stormy Sea of Love" and "Michael and His Motorcycle," which were sung by Mr. Shaw, accompanied by the graphophone. Other members of the cast, accompanied by the graphophone, rendered various "Leave It to Jane" selections.

A. R. Harris Visits

A. R. Harris, in charge of the record sales department of the Columbia Graphophone Co., with headquarters in New York, made a short

visit to the Chicago offices of the Columbia Co. this week. Mr. Harris held a meeting in the Palmer House on Wednesday evening, April 3, which was attended by the Columbia office force and a number of Columbia dealers. He gave an interesting talk on the selection of records and went into detail explaining just why certain songs were chosen for the purpose of making records.

New Loop Man

C. L. Morey now has charge of the Chicago loop district for the Columbia Graphophone Co. Mr. Morey is one of the best-known talking machine salesmen in the city and was formerly connected with other big companies here.

G. M. Rickoff, formerly with A. Neihause & Co., proprietors of the Band Box Shop, Columbia dealers, is now connected with the advertising department of the Chicago offices of the Columbia Co.

Joins Empire Co. Forces

E. B. Kropp is the latest addition to the large office force of the Empire Talking Machine Co. Mr. Kropp was formerly connected with several of the largest establishments in Chicago, and in his new connections with the Empire Co. has entire charge of the office in addition to being advertising manager.

Increased Business

C. F. Baer, assistant manager of the Chicago office of the Columbia Graphophone Co., remarked this week that their business for the month of March was 50 per cent. greater than for the corresponding period last year. "Our shipments are coming in in fine shape," stated Mr. Baer, "and it certainly keeps us hustling to fill the demand. Records are especially good and the Columbia Co. is sure getting out some very good numbers. The demand is very heavy at present for popular songs, and we have a large supply on hand to take care of this demand. Our stockrooms are well supplied to meet any contingency, such as a freight embargo, and we feel that at present we are very well equipped to overcome any future difficulties.

Brunswick Portfolio

The Brunswick-Balke-Collender Co. have compiled a handsomely illustrated portfolio in colors showing the various cuts, complete advertisements and direct mailing literature concerning

(Continued on page 83)

THE "WADE" FIBRE NEEDLE CUTTER

Service Feature Is of Immense Importance

Your greatest revenue, Mr. Dealer, is from record sales.

The average customer seldom buys more than one talking machine in a lifetime, but may be readily educated to systematically accumulate a record library and thereby become a constant source of revenue to you.

The Wade Fibre Needle Cutter Is the Connecting Link

It permits the use of Fibre Needles, with all their acknowledged advantages, at the minimum expense, with its 20 or more original re-points to each fibre needle, and is very cheap insurance on the life of their records.

Instruct your salespersons to use these sales arguments and you will soon have a Wade Cutter and Fibre Needle in every customer's home, which will naturally result in increased record sales.

Business Increasing

When called upon by The World this month, R. F. Morenus, president of the Morenus Piano Co., stated that although they had but recently moved to larger quarters at 342 West Huron street, from present indications they will have to make a further enlargement. "We have been growing very fast of late," he declared, "and have been putting on more help and turning out more material than we ever d'd, but we are finding that more space is necessary. The trade thinks very well of the results obtained through the unique and special construction of our horn and tone chamber and the workmanship and finish of our talking machines are given the same care and attention as those of the pianos we turn out, that is, they receive first-class piano finish."

Deserved Promotion

Fred E. Reid, who for five months worked in this territory for the Thomas Mfg. Co., makers of motors and parts, Dayton, Ohio, made such an excellent showing that President Matthews has made him general sales manager of the company with headquarters at the factory at Dayton, O. Mr. Reid left early this month to resume his new duties, but not until he had appointed a successor in the person of N. S. Richmond. Mr. Richmond will have his headquarters in the recently opened offices on the tenth floor of the Republic Building and will have the title of Western sales manager. He will visit the trade in Chicago and contiguous

territory. He has considerable experience in the talking machine industry and has a technical knowledge of motors and everything entering into the construction of talking machines.

Empire Window Trims

The Empire Talking Machine Co. of this city have had prepared for them several very beautiful window trims, which they are prepared to furnish Empire dealers. These trims were prepared in response to numerous requests from Empire dealers all over the country for something individual and distinctly characteristic. John H. Steinmetz, president of the Empire Co., stated that the policy of co-operation existing between his company and his dealers has been meeting with marked success and that these new window displays which he has had prepared are receiving much favorable comment.

The impressive illustration shown herewith is a photograph of the window trims which were prepared especially for the formal opening of the Troup Bros. new store, 34 Market street, Lewistown, Pa. This store was thrown open to the public on April 1, and the display as shown in the illustration attracted much attention, as the art work was beautifully colored and harmonized with the Empire talking machines to the fullest degree. This new store of the Troup Bros. is under the personal supervision of Manager W. S. Lewis, who is enthusiastic over the

tonal qualities and values of the Empire machines.

In addition to the window trim which was used at the opening of the Troup Bros. store a special concert was arranged under the supervision of A. R. Mitchell, of Williamsport, Pa., the Empire representative in Pennsylvania. This concert was held on Tuesday evening, April company with headquarters at the factory at

Empire Window Trim Used by Troup Bros., Lewistown, Pa.

2. in Troup Bros.' recital hall. Miss Emma Keiss, soprano, was accompanied by Empire record selections played on the Empire talking machine. At the conclusion of this concert both Mr. Mitchell and Miss Keiss left for Greenburg, Pa., where Miss Keiss will be heard in another similar concert at the Porch Bros., Inc., establishment on April 5. A series of concerts will be

HERE, at last, is the supreme phonograph achievement of recent years . . .

The Brunswick Method of Reproduction.

It includes two distinctly new improvements, two inventions that absolutely revolutionize old standards.

Some maker was bound to build this ultimate phonograph, freed from ancient handicaps.

The honor has come to The House of Brunswick, a pioneer in developing the all-record idea. The first Brunswick met with phenomenal success, showing that we might spend thousands of dollars in perfecting this idea.

Better Than Ever

Now, with the new Brunswick Method of Reproduction, distinctly new, we offer a super-phonograph.

It not only plays *all* records, but plays them at their *best*.

This is accomplished chiefly by The Ultona, our new all-record reproducer, and the new Brunswick Tone Amplifier.

Tone values are now given a naturalness hitherto unattained. Some of the gravest problems in acoustics are solved.

The Ultona is an amazingly simple contrivance. It plays all records according to their exact requirements. The proper diaphragm is presented to each record, whatever make, and the exact needle, the exact weight.

So you see that this is not a makeshift, not an attachment, but a distinctly new creation.

Simplicity Itself

At the turn of a hand you adapt The Ultona to any type of record. A child can do it. It is practically automatic.

Now your library of records can be bought according to your favorites. For instance, each record maker has a famous tenor. On a one-record instrument you are confined to one. Others are barred. And who likes to be restricted? Who wants to be confined to buying from only one catalog, when there are several from which to choose?

The Ultona, we think, is the greatest feature offered any music-lover. And it is obtainable *solely* on the new Brunswick.

Another vast improvement in tone projection comes in our all-wood Tone Amplifier, built like a violin. All metal construction is avoided, thus breaking away from the usual custom.

Wood, and *rare* wood at that, is the only material that gives sound waves their proper vibration. With The Ultona and the new Brunswick Tone Amplifier, phonographic art is brought to higher standards.

See and Hear

You cannot afford now to make a choice until you've heard the latest Brunswick. Until you become acquainted with The Brunswick Method of Reproduction. Until you hear this marvelous instrument.

You are invited particularly to examine The Ultona and note how simply it adapts itself to each type of record.

Once you hear the new Brunswick, you'll be delighted and convinced that this super-phonograph is in a class heretofore the ideal, but unattained.

All you want in any phonograph is found in this composite type. Plus superiorities not found elsewhere.

A Brunswick dealer will be glad to play this super Brunswick for you and explain the new Brunswick Method of Reproduction.

given by Miss Keiss under the supervision of Mr. Mitchell at various other Empire establishments throughout that territory in the near future.

Notable B. & H. Fibre Needle Month

March came as a surprise to the B. & H. Fibre Needle Co. It was not only one of the best months they have had for some time in point of orders actually shipped, but they entered April with a gratifying amount of unfilled business on their books. In their viewpoint the trade, as shown by the demands from their jobbers all over the country, is in excellent shape, at least the fibre needle is in steadily increasing demand.

Notwithstanding the conditions produced by the war the company is in excellent shape so far as supplies are concerned and is getting shipments of the finest quality of bamboo it has ever had both from Japan and India. They have recently received samples of some very excellent bamboo grown on the Governmental experimental plantation in Porto Rico. Mr. Hall's test of the quality of this bamboo produced very excellent results and would indicate that a new source of supply is available in this direction.

Talks on Conditions

When called upon by The World this month H. B. Bibb, sales manager of the talking machine division of the Brunswick-Balke-Collender Co., stated: "Our factory is making a tremendous effort to supply us with machines, but the shortage of competent mechanics, finishers, etc., is a serious handicap, and for that reason we are advertising for expert cabinet finishers and mechanics in all parts of the country. In order to meet the demand and relieve the strain put upon both our Muskegon and Dubuque factories, we have made arrangements to equip our large plant in Chicago with the necessary utilities for manufacturing talking machines. This building covers an entire block on Orleans and Huron streets and is located in the heart

of the manufacturing district on the north side of Chicago. It is but a few minutes' ride from the loop, and it will, therefore, be convenient for out-of-town visitors, as well as for shipping goods. This building takes up a hundred thousand square feet of floor space and will be in full running order within the next thirty days. It will be equipped so as to turn out at least ten thousand machines for the balance of this year.

"Our new Ultona reproducer is going over in great shape, and the matter of properly serving our established dealers is occupying practically our entire time, as we have made some very important contracts lately. J. E. Anderson, of Saginaw, Mich., is one of the dealers in his part of the country who is now handling the Brunswick exclusively. Other dealers who have taken on the Brunswick within the past week are the American Furniture Co. and the T. P. Pattison Music Co., both of Denver, the Wilbur Templin Music Co., of Elkhart, Ind., and Herb & Kalmer, of Sandusky, O., the leading department store."

Joliet Visitor

Geo. Wiswell, of the West Music Co., Joliet, Ill., spent several days in Chicago this week. Mr. Wiswell is a brother of L. C. Wiswell, manager of the wholesale Victor department of Lyon & Healy. Mr. Wiswell stated that they are "doing things" down in his town, and that the only trouble they are having at present is the shortage of records.

Empire Phono Parts Co. Literature

The Empire Phono Parts Co., of Chicago and Cleveland, have issued a beautiful little leaflet dealing with the Empire universal tone arm and reproducer. This leaflet contains three illustrations of the Empire products and is arranged in a very attractive manner, the wording being very brief, but to the point. It contains the story of the Empire tone arm and sound box and deals with the attractiveness of design of these phono parts in a manner which appeals to the manufacturers in many ways.

Two of the three illustrations presented show the tone arm in a position for playing lateral cut records and the other position shown is that of the reproducer turned back to permit the insertion of the needle. It is stated that when in this position the cover of the cabinet may be lowered without striking the needle point. This throw-back position appeals particularly to the purchaser, as it eliminates all chances of injury to the record and insures that the sound box is always in a correct position for playing.

Brunswick Man to Army

H. E. Nelson, advertising manager of the Brunswick-Balke-Collender Co., left Chicago April 2, bound for Portland, Me., where he entered the U. S. Aviation Training School for Mechanics. Several other boys from the Brunswick Co. were also called to the colors and left during the week for various training camps throughout the country.

Having Vacations

C. L. Davidson, of the Talking Machine Shop, in an interview with The World this month, stated that the stock was coming in in fine shape and that they were enjoying a very good business. "The first of our girls started their vacation last month, when Evelyn Brackenridge left for Saginaw, Mich., to visit her mother. She will be gone for the whole month. Ruth Hartman, also of our sales forces, took a two weeks' vacation the first of April." Mr. Davidson stated that his brother, G. W., took a little flying trip to the Victor factory about two weeks ago and from there went down to Philadelphia to visit his relatives. He was accompanied on the trip by Mrs. Davidson.

Six Best Sellers

Edison announce the following as the six best sellers for the month: "U. S. Army Camp Songs," "Bungalow in Quogue" and "Just a Voice to Call Me, Dear," "Leave it to Jane" and "Siren's Song," "Jack O'Lantern Fox-trot" and "Knit, Knit, Knit," "That's Why My Heart is Calling"

Empire
—the Machine
that Plays
any Record

**This Machine Will Bring
You Wonderful Results**

The many features embodied in the Empire machine have made it wonderfully popular and all of our dealers are selling a great many of them at the present time. The Model B as illustrated represents the biggest value ever offered in a talking machine retailing at that price.

The Empire line comprises nine beautiful models. Each one is equipped with universal tone arm which plays all makes of records. Motors are all smooth running and powerful. Prices at retail from \$27.50 to \$215.00.

We also make a complete line of Empire records which retail at popular prices. Dealers interested in putting in a line of machines and records should write for our exclusive agency proposition.

Why MANDEL SERVICE is a guarantee of sales

Dealers have learned the advantage of handling the MANDEL LINE of superior Talking Machines because they are made in their entirety *under one roof*—a guarantee of uniformity throughout.

THE MANDEL LINE of Talking Machines is sold on a written guarantee for *service* backed up by one of the most efficient up-to-date factories in existence. A fitting assurance of its superiority.

This is our handsome Model No. 3 Machine.

Note our plan of sending it on FREE TRIAL

In quality, workmanship and richness of tone MANDEL TALKING MACHINES measure up to the highest accepted standard, yet in price are within the reach of the most modest purse.

The Mandel Talking Machine is the Machine "Without a come-back." Its standardized make-up assures service even under the stress of severe usage.

Our co-operative plan to dealers is the biggest inducement ever offered by any reliable talking machine line. We not only help *sell* our line but *help dealers buy it*.

Send to-day for details of this unique plan—it is "opportunity pounding on your door"

You" and "Will You Remember," "Naval Reserve March" and "Spirit of America."

Six best Victor sellers for the month are: "Id' Like to be a Monkey in the Zoo" and "Go-Zin-To," "Are You from Heaven" and "Give Me the Right to Love You," "Just a Baby's Prayer at Twilight" and "On the Road to Home Sweet Home," "Tickle-Toe" and "Going Up," "The Lord is My Light," "I Puritani."

The six best Pathé sellers for the month are: "Romeo et Juliette," "Can't Yo' Heah Me Callin'," "Caroline?" and "Little Alabama Coon," "Sweet Little Buttercup" and "In Berry Pickin' Time," "Homeward Bound" and "When the Boys from Dixie Eat the Melon on the Rhine," "A Baby's Prayer at Twilight" and "Valley Rose," "Liberty Bell" and "There's a Million Heroes in Each Corner of the U. S. A."

Columbia Graphophone Co. announce for the past month the following six best sellers: "Long Boy" and "For You a Rose," "Darktown Strutters' Ball" and "I'm All Bound Round With the Mason-Dixon Line," "What 'Til the Cows Come Home" and "Somewhere in France Is the Lily," "Do Something" and "Liberty Bell," "Hello, My Dearie" and "Ching Chong."

Resting Up

C. E. Goodwin, general manager of the Phonograph Co., recently left for Hot Springs, Ark., for a two weeks' resting period. Mr. Goodwin has been very active for the past several months and thought that this time of the year would be beneficial to his well-being. He is expected to return to Chicago on Monday.

Ryde Visits

Joseph Ryde, formerly assistant manager of the Victor department of Lyon & Healy, but now of the Fuller-Ryde Music Co., of Indianapolis, was a visitor to Chicago for several days last week. Mr. Ryde has a partnership in the firm of Fuller-Ryde and stated that he likes the new field. "Business is very favorable in our territory," said Mr. Ryde, "and the trade is keep-

ing us mighty busy. We are having some very good sales. I expect to permanently locate in Indianapolis in the fall, when I will move my family and belongings from Chicago to that progressive city.

Move to New Quarters

The Automatic Container Co., manufacturers of the automatic record filing device for talking machines and who are producing an extensive line of record cabinets and carrying cases incorporating this feature, have moved their general offices and warerooms from the Tacoma Building to more centrally located quarters at 506 Republic Building. The company is constantly adding to the number of talking machine manufacturers who are adopting their device and the sale of cabinets is continually increasing. The company is arranging for exclusive wholesale agencies in various parts of the country. They recently made the Phonograph Clearing House, Inc., at 51 East Forty-second street, New York, their representatives in that city. H. E. Taylor, formerly superintendent of the Jacko Furniture Co., of Buffalo, will represent the Automatic Container Co. in western New York. The company will have an exhibit at the National Music Show to be held at the Grand Central Palace in New York the first week in June.

Will Represent Widdicomb Line

H. P. A. Mossner, a piano and talking machine man of wide experience, has secured handsome warerooms at 532 Republic Building. The warerooms are immediately opposite the elevator and with its handsome crystal front constitutes one of the shops for which the building is noted. Mr. Mossner will have the Chicago wholesale representation for the Widdicomb phonographs, made by the Widdicomb Furniture Co., of Grand Rapids, Mich., and will shortly have a complete line of these beautiful machines in the various period styles on display for the benefit of visiting dealers. He will

also handle a line of pianos made by the Chute & Butler Co., of Peru, Ind., and an extensive line of talking machine accessories.

Chicago Headquarters for Puritan Phonographs

What may be properly termed one of the most important news items of the month is the closing of a deal by which James B. Orth secures the wholesale representation for the Puritan phonographs and records of the United Phonographs Corp., of Sheboygan, Wis., for Illinois, Indiana, Michigan, inclusive of the upper peninsula and Missouri. Offices and demonstration rooms have been secured at suite 422 Republic Building, where a complete line of Puritan phonographs and records will be carried for the inspection of the trade. Mr. Orth is a successful Chicago business man of years of experience and is a brother of C. J. Orth, well-known piano and talking machine dealer of Milwaukee, who, by the way, has recently become distributor for the Puritan line for Wisconsin and the upper peninsula in Michigan. Mr. Orth will have a valuable assistant in Miss Helen Essen, a young woman who has been associated for some years with leading talking machine concerns in Chicago, and who will be the "campaign manager," doing some traveling and giving dealers the benefit of her experience in demonstrating and selling.

New Mandel Model

The Mandel Mfg. Co. are out with a new member of the Mandel talking machine line. It is known as Model No. 5 and is a full cabinet machine, forty inches in height, retailing at the moderate price of \$65. The company state that it has the same high-grade equipment which characterizes the other models and has been produced to meet the demand for a cabinet machine selling at a lower price than the other models. The company has also inaugurated a very extensive dealers' co-operative service, consisting not only of attractive advertisements for inser-

The Empire Tone Arm and Reproducer

Patent Applied For

Plays Any Make Record

No Set Screws to Adjust

The Empire Universal Tone Arm will appeal to the talking machine manufacturers because it possesses wonderful tonal qualities and because it will add distinction to their machines.

The Empire Reproducer has been pronounced by competent critics to be the best sound box on the market. It is adjustable to any position without the use of set screws and the throw back position for inserting needle will appeal particularly to the retail purchaser.

The Empire Tone Arm and Reproducer can be furnished in several lengths, and in ordering samples state measurements from center of turntable shaft to center of horn hole on motor board. Made in both nickel and gold plated finish.

Mills & Cooper
Manufacturers of Mills Gramophones
2725 Calumet Avenue
Chicago

Barnhart Brothers & Spindler,
Chicago.

Sirs: We should like to have you share with us the enthusiasm that comes from hearing the Superior Reproducer at its best. We have completed our experimental work and have placed the Mills Gramophone on the market. As you know, we are using the Superior Reproducer and we consider it head and shoulders above anything made.

We have been experimenting for more than a year and have tried almost every combination under the sun. We like the Superior better than any other we tested and with it have been able to get probably the best reproduction ever attained.

It is only proper here to mention the intelligently rendered service which goes to users of your product. Your Mr. Louis K. Scotford has helped us immeasurably by his interest and suggestions. We have developed an amplifier which brings out the more subtle tones and gets the expression of the original with a character and musical ring we have never heard in another machine.

The Mills Gramophone is made in small quantity only for the higher class trade. It has made a profound impression among the music lovers who have heard it, and especially among those who do not care for the usual colorless phonographic results. It is absolutely toneless—that is it has no flavor of its own to mar the beauty of the original tones in the records. Our idea is that a phonograph has about as much business with tone as a cup has with flavor. With this idea in mind we have worked until we now have an instrument which will play every make of record better than the machines of the record manufacturers. The improvement is so marked in some cases as to be almost uncanny.

Respectfully, Mills & Cooper.
By G. K. Mills.

tion by the dealer in his local paper, but an excellent window display and direct mailing material of a forceful nature. The company has also lately put into effect a liberal selling plan which is proving very interesting to the trade and resulted in adding a number of good dealers to the Mandel Co.'s list of important representatives.

W. E. Cotter Now General Manager

W. E. Cotter, who for the past few months has been in charge of the retail talking machine department of Thos. E. Wilson & Co., has been made general manager of the entire talking machine division and will have charge of both the wholesale and retail departments. Mr. Cotter

stated that they are getting out a new line of talking machines, embracing six new models and all models to be in three different woods. Preparations are being made for elaborate wholesale display rooms in connection with the retail department at 42 South Wabash avenue. Mr. Cotter is assisted in the wholesale department by Miss Mabel Winchell, formerly of the Talking Machine Co., of New York. Miss Winchell, who will act in the capacity of secretary, will assist Mr. Cotter in entertaining visiting dealers to the wholesale department. He is assisted in the retail department by Miss Hazel M. Walker, who will have entire charge of the retail end of this business.

defeat of 30,000 Huns and saving the lives of 30,000 American boys.

"The Playerphone dealers who buy direct from the Playerphone Talking Machine Company, and not through our jobbers, should establish the Liberty Bond and Thrift Stamp Fund at the rate of \$2 instead of \$1 for each Playerphone, in order to maintain the \$3 standard and help reach the \$30,000 Playerphone Liberty Bond and Thrift Stamp campaign.

"We sincerely hope and believe that our Playerphone jobbers and dealers will join us in the Playerphone Liberty Bond and Thrift Stamp campaign, as Uncle Sam must win, or the Playerphone business can not continue. This also applies to your other lines of business."

A PIONEER IN THE CHICAGO MARKET

D. W. McKenzie, President of Playerphone Talking Machine Co., Among First to Realize Trade Possibilities in That Section—Plan to Help Liberty Bonds and Thrift Stamps

CHICAGO, ILL., April 8.—D. W. McKenzie, president and general manager of the Playerphone Talking Machine Co., was among the first Western men to perceive the advantage offered by Chicago, the "great central market," for the manufacture of talking machines. Associated with him in this enterprise is D. D. Caldwell, one of Oklahoma's most enterprising citizens, and vice-president of the State National Bank of Oklahoma City. This company, of which Mr. McKenzie is the head, has become a very strong factor in the trade and is marketing its product through many of the largest jobbers and dealers, whose strength and extent of operations in itself is evidence of the recognition of the company's product as one of merit and of stability.

The Playerphone line embraces no less than nine cabinet machines ranging in price from \$65 to the beautiful \$500 White House model. Just as the country has inaugurated the third

Liberty Bond campaign, Mr. McKenzie has made an announcement which is as timely and generous as it is unique. It is to the effect that the Playerphone Talking Machine Co. will establish a Liberty Bond and Thrift Stamp fund on the first of each month, according to the amount of Playerphones shipped the previous month, one dollar being placed to the credit of this fund for each Playerphone shipped from March 1, 1918, until the close of the war. Further details of the plan are contained in a leaflet which is now being sent to the trade and which runs as follows:

"Every Playerphone jobber is cordially invited to participate in this Playerphone Liberty Bond and Thrift Stamp campaign by establishing a fund similar to the Playerphone Talking Machine Company's plan and placing one dollar to said fund for each Playerphone sold, and to invite their dealers to whom they sold Playerphones to do the same.

"Therefore, if this plan is followed out and complied with, by the time the Playerphone reaches the customer there will be \$3 worth of Liberty Bonds or Thrift Stamps bought. If 10,000 Playerphones are sold during the year it will mean \$30,000 worth of Liberty Bonds or Thrift Stamps purchased and possibly mean

ANNOUNCE A NEW TONE ARM

Barnhart Bros. & Spindler Offering Scotford Tone Arm and Superior Universal Reproducer to the Trade—Some Features

CHICAGO, ILL., April 10.—Barnhart Bros. & Spindler announce to the trade this month that they are now in a position and are offering to the trade their Scotford tone arm and Superior universal reproducer. Both the reproducer and the tone arm are the inventions of Louis K. Scotford. In breaking away from the general design of tonearms, Mr. Scotford has confined his experiments to the well-founded fact that tone waves act upon the same principle as light waves, i. e., traveling in a straight line until they meet some obstruction from which they are deflected at right angles. Having in mind the well known laws that a straight line is the shortest distance between given points and that sound waves are deflected at right angles, Mr. Scotford set out to produce a tone arm that would embrace both of these laws and as a result the tonearm which is being manufactured by Barnhart Bros. & Spindler is char-

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 89)

acterized by being angular instead of curved, the result being that the tones are given the shortest possible route over which to travel from the sound box to the amplifier. This has the effect of giving the sound produced the seeming point of origin directly in front of the machine instead of the muffled unnatural sound within the machine. This, as can be seen, adds volume to the tone owing to the short distance through which the tone must travel. In producing the superior and universal reproducer, Mr. Scotford has gone off the path generally followed and has produced a sound box which is carried above the record at a slight angle instead of a vertical line as is generally the case. To bring the vertical line into play, which is necessary for playing the record, the needle is also placed in the clip which is built at an angle; the result being that the point of the needle is directly centered no matter in what position the sound box is placed. This sound box has many interesting features embodied in it. Mr. Scotford has also produced a tone amplifier which is made of especially prepared composition. This amplifier is also worked out on the law of angles, the throat being very short and set on a right angle with the body of the amplifier. The sound waves coming down into the throat do not vibrate the amplifier in the least, Mr. Scotford's idea being that the sound vibrations be reflected back

into the air column, thereby giving more volume and throwing the tone out of the machine in its entirety.

R. M. McArthur, of Barnhart Bros. & Spindler, stated that they had gone slow in announcing their Scotford tone arm and Superior universal reproducer to the trade because they wanted to have it perfected to the highest degree and be in a position to meet the demands of the trade. The desired result of perfection having been obtained and enough material on hand to produce the goods in order to meet the demand that would be put upon it by the trade the formal announcement was made. "We have been sending out samples for some time and have been receiving many interesting letters from those to whom we have sent the samples," stated Mr. McArthur. The following letter was received from Alfredo L. Demorest, vice-consulado del Paraguay, Wilmington, Delaware:

Gentlemen: I consider the Superior universal reproducer and tonearm the best leader made; they are, in fact, above all competition. Your reproducer gives a depth of sound that is so wonderful that all other sound-hoxes that I have ever heard seem obsolete. Besides this marvelous depth and warm richness of tone, it has the great advantage of a surprising musical volume. In all makes of records overtones and undertones never before heard with other reproducers are brought out with pure, crystal-like clearness. Your reproducer, turning with absolute correctness upon your ideal tonearm, places the needle in exactly the right angle for either the lateral or vertical cut

records. Your Superior universal reproducer and tonearm is the only outfit of its kind that, to my knowledge, will safely play the vertical cut records without skidding across the record which causes a jewel point to dig into the record and ruin it. This is impossible with your reproducers as they, in position for playing hill-and-dale records, take the grooves at the only correct angle. Other makes of reproducers slant too much, therefore there is always the tendency for them to slip from the groove and skid. All that I have said of the Superior is also true of the Scotford Model I, that wonderful reproducer of yours that, with its large diaphragm, plays the vertical-cut records with so great and beautiful a tone. Though I am not in the talking machine business, being a writer and artist, aside from consular duties, I have made a deep study of phonograph parts, also experimented a great deal, from pure love of the thing. I even have made sound-hoxes, or reproducers after my own ideas. I am considered an expert on sound-reproduction. I have sixteen different reproducers fitted to my talking machine, but I know that for perfect articulation, beautiful tone and volume, your sound-hoxes and tonearm have no equal.

Wilmington, Delaware. Vice-Consulado del Paraguay. ALFREDO L. DEMOREST,

A BIG VITANOLA SELLER

Model No. 150 a Great Favorite With the General Trade of the Country.

CHICAGO, ILL., April 6.—The Vitonola Talking Machine Co. report that the No. 150 Vitonola

VITA-NOLA 150

which is herewith illustrated is proving one of the biggest sellers on the line of new models which they have recently put on the market, and in fact is the biggest seller they have ever had. It is an extremely attractive instrument in exterior appearance and stands 50½ inches in height. It is very symmetrically designed with massive carvings at the top and bottom of the legs. It contains a double spring motor of unusual strength and accuracy of operation which winds for eight records. The tone arm and sound box are of special design and of the company's own creation. One of the minor

Presenting the Puritan

In our new demonstrating rooms, 422 Republic Building, Chicago, we are now showing the Puritan Phonograph, the instrument of new and exclusive features.

Service is our slogan. And we are equipped to render active and immediate service to all dealers in Michigan, Indiana, Illinois and Missouri territory.

Write, wire or 'phone for full particulars regarding the PURITAN and PURITAN RECORDS — or, better still, come in.

James B. Orth

CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 90)

features which yet adds one to the many talking points of the machine is the tilting motor board, which gives easy and instant access to the motor. Another detail which many dealers will appreciate is that the sound chamber is finished in harmony with the exterior of the case. It is equipped with horizontal felt-lined shelving. No. 150 is supplied in either golden or fumed oak or in mahogany.

NEW LINE OF MACHINES AND CASES

Lakeside Supply Co., Inc., Offering Cases Woven of Luxfibre Which Are Distinctly Attractive in Appearance—Company Also to Market a New Jumbo Tone Arm

CHICAGO, ILL., April 10.—The Lakeside Supply Co., Inc., of 202 South Clark street, this city, are just ready to put on the market a brand new line of talking machines and cases. These cases are made up of what is known as Luxfibre, which can be woven into the most artistic patterns, as is shown by the illustration. Unlike reed or rattan it does not crack or break in making short curves or bends, it is claimed.

The Luxfibre Case

The cases are finished in old ivory, mission, oak, chocolate brown, frosted ebony and frosted brown. However, they can be produced in almost any shade desired to match the surroundings.

It takes an expert weaver from four to six days to weave the cases. They are then well sized, next given a spray of the finish desired and then two spray coats of spar varnish. The Lakeside Supply Co. does not specialize in making completed phonographs, as it furnishes all parts to manufacturers and assemblers, but in marketing the Luxfibre machines they are not competing with any one, as these cases are distinctive and not being sold by the trade generally.

The Lakeside Supply Co. expect to put on a man to handle the Luxfibre line exclusively and introduce it to the trade.

Another important announcement from the Lakeside Supply Co. is the fact that they have just developed their new No. 4 Jumbo tone arm to play all records in one position without any appreciable loss in quality or volume. This means absolutely no shifting or moving of arm or sound box for playing any disc record. The company have worked very hard for a number of months and now believe they have a thoroughly practical combination. Patents have been applied for.

METAL SPECIALTIES CO. ORGANIZED

Benton Harbor Concern to Have Capital Stock of \$60,000 in Their New Enterprise

BENTON HARBOR, MICH., April 9.—The Metal Specialties Co., of this city, have been organized with a capital stock of \$60,000 and have purchased and fully paid for a substantial two-story factory building and are now preparing to produce talking machine motors, tone arms and other specialties. The officers are Wm. R. Everett, president; A. R. Knight, vice-president, and Milton Hinckley, secretary and treasurer.

President Everett, whose inventions the company will manufacture, is a man of long experience in the talking machine and supply business and was formerly the Western representative in Chicago of the Crescent Talking Machine Co., of New York. Added to his experience in the talking machine business, he has had fifteen years' experience in the manufacturing line. He is a mechanical engineer and a member of the Society of Automobile Engineers. In speaking of the company's product Mr. Everett says:

"You may state that our motor is not a radical departure in any way from accepted engineering practice, but on the other hand it is not a copy, nor yet an 'improved modification' of any existing type of motor. Our use of worm and spiral gears with one jack shaft only, and this set at an original angle, is an invention. Our use of a vertical governor and with solid links instead of the usual spring weight links, while an invention, is nothing more or less than good mechanics.

"I think we are the only people in the United States using the galvanic copper process for the making of tone arms. In the first place, the copper metal itself is resonant and has a real musical tone. In the second place, the use of this process enables us to make tone arms without extravagant tool cost. In other words,

Why Break Records? Just File Them!

That is if you have the wonderful Record filing system which is a feature of

each phonograph manufacturer can have his own exclusive design of tone arm and at practically competitive prices with other processes and without tool cost."

G. T. Williams, popular Brooklyn Victor wholesaler, is back at his desk after a well-deserved rest down South.

Different—But Practical

The MORENUS Phonograph is a Distinct Departure from a Tonal Viewpoint

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the *bottom*, not the top. The tone is big and full but mellow, and the reproduction of the artist's voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are *right* and the cabinet work and finish unexcelled.

The MORENUS is in 3 STYLES

- A. OAK, - - 48 inches high. Retail price, \$110
- B. MAHOGANY, 48 " " " " 125
- C. OAK and MAHOGANY, 50 inches high, Retail price, - - - - 150

*Very liberal discounts to the trade

MAKING CABINETS EXCLUSIVELY

Wm. A. Johnson, Now Owner of the Northwestern Cabinet Co., Is a Progressive

MENOMONIE, Wis., April 6.—Really no one could conceive of a better location for a cabinet factory than this city. It is located right in the heart of the big lumber industry and from the roof of any of the factories one can see the forests whose product is continually going through the mill rooms in Menomonie.

Wm. A. Johnson, who recently acquired the interest of his former associates in the Northwestern Cabinet Co., is now the entire owner of that business and is devoting himself exclusively to the manufacture of cabinets for talking machine manufacturers. He is a man of long experience in the making of pianos and talking machines and has built up an excellent business since he became a part of the industrial activities in Menomonie. He is himself a skilled designer and is prepared to submit special de-

signs for cabinets as well as to make them after the ideas of others. He also has facilities for installing the working parts of machines into the cabinets if the customer so desires. The factory is excellently located, being near the junction of the Chicago, Milwaukee & St. Paul and Chicago & Northwestern railroads, and therefore enjoys unusual shipping facilities. Mr. Johnson is a brother of Henry G. Johnson, vice-president and superintendent of the Holland Piano Mfg. Co., and the two men have become dominating influences in the business life of this thriving city because of their goaheadness.

W. A. Johnson

WIDDICOMB POPULARITY

Line of Phonograph Made by Grand Rapids House Grows in Trade Favor

GRAND RAPIDS, MICH., April 9.—The Widdicomb Furniture Co. is meeting with excellent success with the Widdicomb line of phonographs, which have attracted great attention in the trade because of the unusual character of the beautiful period designs and of the high-class construction and tone qualities. E. C. Howard, the manager of the phonograph department, says that they are shipping goods just as rapidly as they are completing them, and that they are straining every effort to give their dealers prompt satisfactory service.

SAFELOWERS MAKE A BIG HAUL

Get Much Cash, Liberty Bonds and Notes at Collister & Sayle Store in Cleveland

CLEVELAND, O., April 8.—Safeblowers early this morning broke open the store of the Collister & Sayle Co., 252 Superior avenue, dealers in Victor talking machines and records. The safe was wrecked with nitroglycerine and \$700 in cash and \$500 in Liberty Bonds and \$10,000 in promissory notes stolen. The robbery was discovered by a porter when he opened this store. W. F. Sayle, treasurer of the company, said he thought the above items would cover the loss. The store is in the very heart of the shopping section, directly across the street from the post office. The robbers cut a hole through the rear wall. After blowing the safe they dragged the loot to a vacant room and sorted it. There is no clue.

NEW AGENCIES FOR THE BRUNSWICK

New York Office of Brunswick-Balke-Collender Co. Opens Number of New Accounts

Among the new agencies for Brunswick phonographs recently opened by the New York office of the Brunswick-Balke-Collender Co., is included the firm of Anderson & Duchene, Torrington, Conn. The formal opening of the new department, in charge of J. J. Brophy, of the Brunswick Co., was quite an event, and was heralded by liberal advertising. The company is composed of Victor Anderson and Rene Duchene, both experienced talking machine men.

The Brunswick phonograph was also recently placed with Simon Bersin, a well-known piano dealer at 410 Grand street, New York.

Chester Abelowitz, of the Brunswick Co., is now in Trenton during the recital week held at the warerooms of the Hurley-Tobin Co., of that city, and who carry the Brunswick line.

Very enthusiastic reports have been received during the past week from John Duncan, manager of the Brunswick department of the Gamble-Desmond Co., of New Haven. Mr. Duncan reports that sales have been fine recently.

Hiawatha Phonographs AND Hiawatha Success

STYLE 100

In the past two years HIAWATHA dealers have realized that the HIAWATHA Phonograph has enabled them to sell a Phonograph to their trade, the Quality of which they can guarantee with every assurance that it will reflect credit to the reputation they have established for square dealing and their motto of "Quality First".

HIAWATHA Phonographs mean Success which has been established by their wonderful Quality of *Tone*, *Construction* and *Finish*. The same opportunity is waiting for you. Write today and let us prove that your initial order will not only be satisfactory, but a good investment.

Models \$40, \$60, \$85 and \$115 Retail

Tone chamber made of genuine Spruce. No metal.
Cabinets made of 5-ply stock. Construction guaranteed.
Motors and equipments, using double spring motors, highest standard of Quality.

NEW MODEL OF PURITAN PHONOGRAPH READY FOR MARKET

Handsome Machine, Designed on the French Baroque Order, Embodies the Various Distinctive Puritan Features of Construction, Including the Long Horn—New Distributors

The United Phonograph Corp., makers of the Puritan phonograph and records, Sheboygan, Wis., are just putting on the market a new design of the Puritan phonograph, illustrated elsewhere in this issue, and which is calculated to attract instant attention because of its uniqueness as well as artistic symmetry and gracefulness. It is on the French Baroque order and with its utter distinctiveness, curved surfaces and exquisite veneers, handsome hand carvings, heavy base and carved feet, is bound to be considered an artistic triumph. The design, by the way, has been patented. A notable feature of all Puritan phonographs is the long horn built entirely of wood and extending from the tone arm to the tone chamber at the bottom of the cabinet. It has only one bend and closely resembles an organ pipe in construction. Unusual resonance and beauty of tone are claimed as a result of this construction. The drop door at the base gives egress to the tone and operates as a modifier, being manipulated by a button at the side of the machine near the crank handle and can

be set at any angle desired. While the tonal idea was the desideratum in the horn construction and the location of the tone chamber, the consequent position of the record compartment in the upper part of the cabinet is another advantage, as it gives most convenient access to the records. The United Phonographs Corp. is a subsidiary of the the great Wisconsin Chair Co., of Port Washington, Wis., a million dollar concern, and has the advantage of practically unlimited manufacturing facilities. The line of cabinet machines is extensive, meeting the demand of practically all classes of the trade as to price. The men at the helm have high ideals as to the maintenance of a high quality standard in everything they produce.

The company has recently made Charles J. Orth, of Milwaukee, distributor for Wisconsin and the upper peninsula of Michigan, while J. B. Orth, who has just opened warerooms in the Republic Building in Chicago, has for his territory Illinois, Indiana and Michigan with the exception of the upper peninsula.

NEW HOME FOR PENN PHONO. CO.

Well-Known Victor Wholesalers of Philadelphia Lease Large New Building on Arch Street

PHILADELPHIA, PA., April 8.—The Penn Phonograph Co., the well-known Victor wholesalers at 17 South Ninth street, has signed a lease for the modern fireproof building at 913 Arch street, and will move to that location some time in June. The building is a four-story and basement structure. The exterior is as unusually striking in appearance as the interior is complete and practical. The expanding business of the company has made this change necessary. The company believes the future of the business means much greater things than in the past and is preparing for the expansion when it comes.

GUEST OF PHILADELPHIA DEALERS

T. J. Leonard, General Sales Manager of the Musical Phonograph Division of Thomas A. Edison, Inc., Speaks at Regular Monthly Meeting of Philadelphia Edison Dealers

PHILADELPHIA, PA., April 4.—The guest of honor at the regular monthly meeting of the Philadelphia Edison dealers held at the Hotel Bingham on Tuesday of this week was T. J. Leonard, general sales manager of the musical phonograph division of Thomas A. Edison, Inc. H. E. Blake, of Blake & Burkart, acted as chairman and introduced Mr. Leonard, who spoke on general business conditions. Supervisor Gardiner, of the Edison house, was also present at the meeting.

The big majority of the dealers present reported a large increase for March, 1918, over the same month 1917, and Mr. Somers, of Starr & Moss, reported that their company had an increase of 177 per cent. for the month of March. Many of the dealers present declared that they would be present at the coming Edison dealers' convention which will be held in New York on June 6 and 7.

Milton Isaacs, son of Joseph Isaacs, Victor dealer of 176 Sixth avenue, New York, and who is well known in the local trade, went to Camp Upton on April 4 to join the National Army.

WATCHING CARY BILL CLOSELY

Talking Machine Dealers and Others Selling on Instalments See Genuine Danger of Measure Designed for District of Columbia

WASHINGTON, D. C., April 6.—The thing of interest to local music trade men, as well as members of the trade throughout the country, outside of war troubles, is the progress made by the Cary bill, a measure introduced by Representative Cary of Wisconsin, and designed to put heavy burdens on dealers selling merchandise on instalments.

As the measure now stands, it requires a payment of a license fee of \$200 by every merchant who is engaged in the instalment business, under a plan whereby he retains title to an instrument until the full purchase price has been paid. The bill applies only to the District of Columbia, but it is realized such measures in the National Capital are frequently accepted as models to be followed by legislatures in various States and cities.

If this Cary bill, which provides among other things that no merchant shall make a profit of more than 30 per cent. of the actual cost price of any article sold, should be copied in various States of the Union it is easy to foresee the predicament of the merchants who have testified under oath that their cost of doing business is in excess of 30 per cent. Such irksome restrictions as the requirement of annual reports on all business done would be bad enough, but the particularly perilous feature of this amazing bill is the restriction under which no sale greater in amount than \$200 can be made to any one person under a license for instalment sales.

In its original form the bill provided that a purchaser might sue and recover any profit made by the dealer in excess of 30 per cent. of the original cost of the article. In its amended form, however, the bill provides that the buyer can, in addition to recovering the excess profit, recover a credit on the principal amounting to one-quarter of that principal. On the whole, the Cary bill is regarded as a most pernicious piece of legislation.

A violation of the act would be construed as a misdemeanor punishable by a fine of not less than \$5 nor more than \$500, or, by imprisonment for not less than five, nor more than thirty days, or by both fine and imprisonment. George W. Pound, counsel and general manager of the Music Industries Chamber of Commerce, who has been in Washington several days recently, has opposed the bill very strongly, and the National Association of Talking Machine Jobbers has filed a strong protest, as have other trade organizations, whose members are liable to be affected by the provisions of the act.

PROGRESS OF NATIONAL MUSIC SHOW

Prominent Talking Machine Concerns Arrange to Take Space at Big Exhibition to Be Held at Grand Central Palace, New York, in June

Plans for the National Music Show, to be held at the Grand Central Palace, New York, on June 1 to 8 inclusive, are progressing most satisfactorily, and a large part of the available exhibit space has already been taken by prominent concerns in various branches of the music trade.

In keeping with the times, the patriotic spirit will be much in evidence at the show. It will be opened by Governor Whitman, of New York, and various representatives of the United States Army and Navy have promised to be in attendance, if the opportunity presents itself.

Conducted on Co-operative Basis

With a view to making the National Music Show co-operative it has been decided to hold it under the auspices of the Music Trade Exhibitors' Association. Each manufacturer who engages space automatically becomes a member of this association without expense or liability of any kind beyond the amount of space engaged, and he will participate in any surplus remaining after expenses are paid in proportion to the amount paid for space. This co-operative spirit has been the nucleus for the holding of a number of very successful industrial expositions throughout the country and it is safe to assume that this plan will work out unusually well for the National Music Show.

The show committee includes representatives of all the various branches of the music industry, the talking machine trade being represented by William Maxwell, vice-president of Thomas A. Edison, Inc., and H. L. Willson, general manager of the Columbia Graphophone Co. Charles H. Green is the general manager of the show, and has at his command experience gained through conducting several similar exhibitions in the past. Walter T. Sweatt is manager of the exhibits.

Will Dispel Gloom and Doubt

It is expected that the National Music Show will be the year's greatest dispeller of gloom and doubt. It will start off with a high keynote of optimism, which will sound throughout the music trade and will reach beyond to revivify general business conditions. It is generally realized that it is more important to hold a show during a period of depression than when all lines of business are active and when optimism reigns supreme. Panics and hard times

are psychological—at least they are largely due to doubts and uncertainty. The visible evidence of confidence and activity presented by the music industry will react on the minds of the whole public and will re-establish waning confidence. The vitality and the firm foundation of America's music industry will be proved conclusively by the forthcoming show, which will be a reply to the many false reports that the industry was in the non-essential class. There never has been a year when the need for music was so important as now.

Without a doubt the Music Show will be the most unique of any exhibition ever held in Grand Central Palace so far as the individual displays of the exhibitors are concerned. Each exhibitor will have a distinct display of his own, so constructed as to be soundproof.

The talking machine companies who will exhibit at the show include Columbia Graphophone Co., New York; Thomas A. Edison, Inc.,

Orange, N. J.; Otto Heineman Phonograph Supply Co., New York, and the Pathé Frères Phonograph Co., Brooklyn, and others.

There will be a number of conventions held in New York during the week of the show, including the annual gathering of the Edison dealers at the Waldorf-Astoria. The National Piano Manufacturers' Association, the National Association of Piano Merchants, and the National Piano Travelers' Association, will also hold their conventions in New York during the week.

All the money taken in at the door for admissions, and it is expected to be a large amount, will be devoted entirely to the purchase of musical instruments, records, etc., for the men in the service. Moreover, all those who bring a new or used talking machine record as a contribution for the use of our soldiers and sailors will be admitted to the show without further charge.

INCREASE DELIVERY EQUIPMENT

C. Bruno & Son, Inc., Put New Truck Into Service for Metropolitan District

C. Bruno & Son, Inc., 351 Fourth avenue, New York, Victor wholesalers, have just added to

Latest Addition to Delivery Equipment of C. Bruno & Son, Inc.

their delivery equipment a handsome Ford-Dearborn truck, which is shown in the accompanying illustration. The body of this truck, which is a dark blue with the lettering in gold, presents a very attractive appearance. The truck is utilized for metropolitan deliveries, and has contributed materially to the efficiency of C. Bruno & Son's delivery system.

Germany is listening—make your money talk—buy a Liberty Bond.

SUCCESS OF THE BUTTERFLY MOTOR

Leonard Markels Planning Factory Expansion to Take Care of Increasing Demands

Leonard Markels, 165 William street, New York, motor manufacturer, states that during

the past month or two he has received very large orders for the Butterfly motor which he introduced last year, and which has achieved remarkable success in the comparatively short while it has been in the market. The Markels factory is working to capacity to turn out this motor, and plans are now being formulated

whereby the factory output will be materially augmented during the course of the next month or two.

Mr. Markels states that this motor has been adopted for exclusive use by prominent manufacturers throughout the country, who are pleased with its distinctive merits, and who are equipping their machines with this motor, in order that their dealers may have convincing sales arguments for their product.

It is probable that in the near future Mr. Markels will have some significant announcements to make regarding the perfection of several important new models which will be added to his line as quickly as possible.

PLAN EXHIBIT OF RECORD MAKING

One of the features of the National Music Show to be held at the Grand Central Palace, New York, on June 1 to 8, will be the exhibit of the Pathé Frères Phonograph Co. This company plans to install a complete record-making plant in its booth, to show the public how records are recorded and pressed. The exhibit will be under the direction of H. N. McMennen, managing director of the Pathé Co., and not only will the pressing equipment be installed at heavy expense, but an orchestra and a galaxy of recording artists will be on hand to give demonstrations. The Pathé Co. installed a record-pressing plant in their exhibit at the Music Show in Chicago last year, and it was one of the big attractions of the show.

To be satisfied with a phonograph other than the *Phon d'Amour* is to be content with something less than the final achievement in phonographs. You should see the *Phon d'Amour* and have its wonderful patented features explained to you. Hear it play, then compare it. Plays records of whatever make.

THE FRITZSCH PHONOGRAPH COMPANY

228-230 W. Seventh St.

CINCINNATI, OHIO

First Presentation to the Trade—the PURITAN

THIS great instrument embodies the most striking discoveries that have come into the talking machine industry since tone reproduction was first invented. These discoveries are exclusive features—giving the dealer a series of *new*, powerful and definite selling arguments found in no other phonograph made. And, in addition, you have the Puritan Records, made by us.

THE LONG HORN, extending the full height of the instrument, from tone arm at the top to the sound chamber at the bottom, gives a fullness, richness and life-like quality of tone absolutely unheard of in reproduced music. The horn is of saxophone design and entirely of wood. With the sound chamber at the bottom, the sound waves *rise* to where you stand or sit. The graceful convex cabinet design is another exclusive and patented Puritan feature.

The long horn extends from top to bottom

The Puritan plays any disc record. Prices range from \$85 to \$350. Write or wire today for full details of our attractive proposition on Puritan Phonographs and Puritan Records.

REPAIRS

TALKING MACHINE TROUBLES AND
HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines. Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 176 Sixth avenue, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

A SLIDING SAPPHIRE BALL

Repair Department,

Talking Machine World:

I have a talking machine with so-called Universal tone arm, which plays all styles of records. When I place the sapphire ball needle in the sound box and try to play the Pathé records, the sapphire always slides out of the groove of the record. Can you tell me what the trouble is?

S. R. A.

ANSWER.—Your trouble without doubt is in not having the sapphire ball at the proper angle to the surface of the record. Try bending the sapphire holder out at an angle of about 45 degrees and then place it in the sound box with the sapphire pointing up. This will bring the ball at about the proper angle when placed on the record.

Regarding Motor Knocking

The Talking Machine World:

Could you suggest a way to overcome the following troubles which I am having with my Victrola? While playing it often makes a loud knocking noise in the motor, and while it used to play five records with one winding it now has to be wound up after playing one record.

Miss J. K.

ANSWER.—The knocking is caused by lack of graphite mixture on the main spring. If the machine will only play one record no doubt one

of the main springs is broken which prevents the full winding of the motor.

Adjusting the Speed Indicator

Editor Talking Machine World:

Can you tell me through your Repair Column the cause of the following trouble with my talking machine? When playing a record at the proper pitch of voice the pointer on the speed adjuster points to 60 instead of 78, as the instruction book with the machine says it should. How can I fix pointer so that it will point to the 78 mark on the regulator dial when machine is playing 78?

I. C.

ANSWER.—There are several styles of dials and regulators used on talking machines. As a rule, there is an adjusting screw either on the bottom or top of the dial, and by screwing in or out with this screw, the position of the governor lever rod is changed and the speed of the motor is adjusted accordingly.

EDISON BOOK OF INTEREST TABLES

Harrison Durant, financial supervisor for Thomas A. Edison, Inc., has just completed a very valuable book, including the interest tables to be used in connection with Edison phonograph deferred payment sales. In this connection it might be of interest to say that the Edison Co. was the first phonograph company to demand that dealers charge interest on deferred payment sales, and this book of interest tables was prepared as a ready reference and information chart, and it is certain that the demand for the book will be very general.

A NEW LINE OF TALKING MACHINES

C. John A. Woods & Son, 30 Church street, New York, well known in expert circles, have just placed in the market a new line of phonographs, which will be known as the "American Maid" phonograph. This machine is being manufactured in six different models, retailing from \$17.50 to \$150, and each model is equipped

with a universal tone arm, which plays all makes of records without any attachment. The concern is not only planning to develop an export demand for this instrument, but is also making arrangements to take care of an active domestic trade. Mr. Woods has already established important expert connections, and expects to announce in the near future a number of domestic agencies for the "American Maid" phonograph.

SENDING TRUCKS FOR VICTROLAS

I. Davega, Jr., Inc., Haul Machines From Victor Factory to New York in Their Own Motor Trucks to Overcome Transportation Delays

The motto of the firm of I. Davega, Jr., Inc., 125 West 125th street, appears in their various communications and advertisements and is "The House of Service." How well this motto has been lived up to is shown in the steadily increas-

New Delivery Truck of I. Davega, Jr., Inc. ing growth of their wholesale Victor business.

The freight delays arising from the crowded conditions of the railroads during these war times have been a source of much annoyance and loss of profit to the dealers. To overcome this difficulty in some measure, I. Davega, Jr., Inc., are now sending their auto trucks down to Camden at regular intervals to get their Victrolas and supplies. These trucks are spacious and will hold as many as forty Victrolas at one loading. Another truck is now nearing completion for this service.

SUGGESTS NEW RECORDING SYSTEM

Henry G. Rhodes Would Use Film Instead of Circular Record and Record Tones of Each Instrument or Each Voice Separately

Henry G. Rhodes, of Whiteville, Tenn., in a letter to The World suggests that the conventional record be done away with and that a specially prepared paper, a little wider than a movie film, be substituted for recording purposes. Explaining his idea, Mr. Rhodes says:

"If a quartet and orchestra were to make a record, let there be five recorders mounted on a rigid frame so as to be exactly parallel; each diaphragm to vary in thickness. The bass singer would have his horn and separate recorder—as bass vibrates slowly his diaphragm should be thicker than even the baritone. The tenor of course vibrating very fast, should have a thin diaphragm. The orchestra would have a horn and record to themselves—possibly two horns to take in all of it.

"The four singers and the orchestra would sing and play separately each to their appropriate diaphragms—each in a separate room so that their respective recorders would record only their voices or music. Then when this record was to be reproduced, each stylus would track the original groove, using a diaphragm of the exact thickness as the recorder that made that especial groove. This tape would be moved much like a moving picture machine film, from one reel on to another. The five reproducers to be mounted so they would touch the tape about where the conventional phonograph's reproducer is.

"The tape would move under these reproducers at about one hundred feet a minute. Thus one diaphragm would not have to vibrate with so many and varied pitches."

ENLARGING THEIR DEALER CLIENTELE

PITTSBURGH, PA., April 10.—The Pittsburgh Pathéphone Co., of this city are enjoying a most prosperous spring season. They are gradually enlarging their line of dealers, among the most recent being Samuel Levi & Co., Portsmouth, Ohio; the Preston Piano Co., Ashland, Ky., and Anderson & Newcombe, Huntington, W. Va. Manager Brennan announces the opening of a new repair and adjustment factory for the convenience of his trade. It is connected with the Pathé Shop on Liberty avenue.

ANOTHER FEIST MUSIC CAMPAIGN

Prominent Publishers to Carry New Copy in Saturday Evening Post at an Early Date—All Advertisements Planned to Stimulate Record Sales as Well as Music Sales

Leo Feist, Inc., the well-known publishers of popular music who from time to time have used space in The Talking Machine World describing to the dealers in this industry the cooperation they offer them in handling Feist songs of the moment which have been recorded by the leading record manufacturers, have again brought to the trade's attention their advertising co-operation in this issue. Throughout the past two years the house of Leo Feist, Inc., have run advertisements in mediums of national circulation inducing the public to buy their songs and in every case they also stated that the numbers could also be secured for the talking machine and player-piano.

Not only does the firm carry on a national advertising campaign in behalf of their songs, but they also see to it through their various branch offices, located in the larger centers of the country, that their songs are sung in vaudeville and played in the moving picture houses, cabarets, and by the dance orchestras in almost every city. This is done by the traveling representatives of the firm working from the cities.

In an announcement to appear in an early issue of the Saturday Evening Post, which is reproduced on another page of this paper, the House of Feist will feature three of their new songs, all of which have already been given public approval. The numbers are entitled "I'm Sorry I Made You Cry," "Belgian Rose" and "Just Like Washington Crossed the Delaware, General Pershing Will Cross the Rhine." The advertisement will also include mention of all the active numbers in the Feist catalog.

PATENTS REPLAYING DEVICE

Patents covering a replaying and repeating device for talking machines has been granted to the Rev. John Prout, of this city. The device described in this patent allows of the complete control of the replaying of the record or the repeating of parts of the selection from various parts of the room without other exertion than a slight pull on a cord. The action is so simple that various persons who have seen this device have marveled that it was not used before.

EXECUTIVE COMMITTEE TO MEET

Governing Body of National Association of Talking Machine Jobbers to Hold Session in Philadelphia to Discuss Conditions

President J. Newcomb Blackman, of the National Association of Talking Machine Jobbers, has called a meeting of the executive committee of that organization for April 22 and 23, at the Ritz-Carlton Hotel, Philadelphia. The committee will discuss primarily the effect of the latest war conditions on the trade, and endeavor to devise ways and means whereby through cooperation between the wholesalers and the Victor factory the conditions can be met and overcome. The talking machine men realize that they must make sacrifices as a result of the country being in the war, but feel that there are ways of adjusting their businesses so that the burden may be carried as lightly as possible. At the meeting in Philadelphia plans will also be discussed for the annual convention of the association to be held in Atlantic City in July.

The members of the executive committee are: President, J. N. Blackman, Blackman Talking Machine Co., New York; vice-president, I. Son Cohen, Cohen & Hughes, Baltimore; secretary, Jos. C. Roush, Standard Talking Machine Co., Pittsburgh; treasurer, A. A. Trostler, Schmelzer Arms Co., Kansas City; W. D. Andrews, W. D. Andrews Co., Syracuse; J. F. Bowers, Lyon & Healy, Chicago; A. A. Grinnell, Grinnell Brothers, Detroit; George Mickel, Mickel Bros. Co., Omaha; Andrew McCarthy, Sherman, Clay & Co., San Francisco; E. C. Rauth, Koerber-Brenner Co., St. Louis; W. H. Reynolds, Reynolds Music House, Mobile; E. F. Taft, Eastern Talking Machine Co., Boston; C. A. Wagner, Musical Instrument Sales Co., New York; P. B. Whitsit, Perry B. Whitsit Co., Columbus; and Rudolph Wurlitzer, R. Wurlitzer Co., Cincinnati.

NOW IN TALKING MACHINE TRADE

Harry Jasper, formerly sales manager at the factory warerooms of Paul G. Mehlin & Sons, prominent piano manufacturers of West New York, N. J., is now conducting a Victrola store in Englewood, N. J., under the store of the Franklin Parlors. Mr. Jasper also conducts Jasper's Orchestra, a well-known musical organization which last week provided dance music at the dinner of the Talking Machine Men, Inc.

BUSINESS PRIDE

HERE is more in business than just financial gain..... the satisfaction of accomplishment, the making of friends, the establishing of goodwill.

When the Stephenson Precision-Made Motor was perfected we faced the selling problem; faced it with hearts full of faith and confidence, and high ideals.

We have now a pardonable pride in our success. We have profited, but the pride is not on this score, but rather because of the thousands of Stephenson Precision-Made Motors that are giving perfect satisfaction; of the friends we have made through the sincere service given. And for these friends we are grateful.

And always we will be ambitious to render this service and make it even more complete, and to guard jealously the goodwill that the Stephenson Precision-Made Motor has won.

EDISON EMPLOYEES ORGANIZE FOR THE THIRD LIBERTY LOAN

Meeting and Dinner Held in Orange, N. J., Attended by Many Prominent Speakers Who Tell of the Work Already Accomplished by Our Government in Prosecuting the War

On April 2 the Edison employees' war committee of 200 members assembled in one of the Edison buildings to dine and discuss the Third Liberty Loan. William Maxwell, vice-president and manager of the musical phonograph division, acted as chairman, and in his opening remarks made humorous reference to three chairs in the background which were labeled: "For the Newlyweds, Mr. and Mrs. Charles Edison." Mr. Maxwell stated that the three chairs meant three cheers for Mr. Edison and his bride, and they were given with a will.

The first man introduced was William Mead-

plished. Aeroplanes were being sent over by every ship, not completed but in parts and assembled on the other side, and that hundreds of American machines were at present in the air over there. It is comparatively easy, asserted Dr. Hutchison, to get a reputation by muck-raking, but it would be a great deal better for everybody concerned if they did something instead of talk. We are not in it for fun but for good, and we will not stop until things are over "over there." Material is going over with every ship and no little seventy-two-mile gun can bluff us because we're in the game to win.

This "down with the trusts" propaganda was

A Section of the Head Table at the Edison Liberty Loan Banquet

owcroft, assistant to Thomas A. Edison, who read the following telegram from the inventor who is at present in the South:

"William Meadowcroft, Edison Laboratory, Orange, N. J.

"Say to the committee I am highly pleased that they have all banded together to help the Government. Our Government suits us because we make it ourselves and we will fight to maintain it and all other governments, of which the people are masters, against any predatory aggression of barbarians.—Edison."

Mr. Meadowcroft then emphasized the tremendous amount of time, effort and money that Mr. Edison is expending for the Government and for which he refuses to accept one cent in payment.

Mr. Maxwell discussed the telegram and remarked that America should not feel oversecure. The Germans were only sixty miles from Paris, but 3,000 from Washington, which acted as a present source of self-defense, but unless everybody got in and did the best that they were capable of, God help us all. In the course of his talk Mr. Maxwell declared that it was his opinion that the war would be decided this year, and from newspaper comment that our boys were evidently in the big fight to-day and were carrying on to the best of their ability. He said that we must all do as the Government bid us without any heroics, that we were to exercise our influence whatever work is to be done and should do whatever work was assigned to us to the best of our ability.

He then introduced W. S. Mallory, vice-president and manager of the Edison Cement Works at New Village, N. J., the division that made such a splendid record at the last Liberty Loan drive. Mr. Mallory said that Mr. Maxwell had started the campaign and said that he looked for big things and that the Cement Works would show up as well in the Third Liberty Loan as in the others that preceded it.

Mr. Maxwell next introduced Dr. Miller Reese Hutchison, who is a member of the Naval Consulting Board, and whose remarks were exceedingly interesting, particularly the reference to ignoring the muck-raker.

Dr. Hutchison claimed that despite all the newspaper talk of the muck-rakers that nothing had been done a great deal had been accom-

plished. Aeroplanes were being sent over by every ship, not completed but in parts and assembled on the other side, and that hundreds of American machines were at present in the air over there. It is comparatively easy, asserted Dr. Hutchison, to get a reputation by muck-raking, but it would be a great deal better for everybody concerned if they did something instead of talk. We are not in it for fun but for good, and we will not stop until things are over "over there." Material is going over with every ship and no little seventy-two-mile gun can bluff us because we're in the game to win.

At the conclusion of his remarks, which were heartily applauded, Dr. Hutchison claimed that many of Mr. Edison's inventions were holding

up his reputation as an inventor on the other side.

In the matter of the loan, Dr. Hutchison subscribed \$10,000 on the spot, and declared that he believed the employees of the Edison Co. would excel their excellent records in connection with the first and second Liberty Loans.

Mr. Maxwell, after the applause had subsided, said that it was not the intention of the meeting to start subscriptions, but Dr. Hutchison had the honor to be the starter. Mr. Maxwell then introduced whom he called the get-the-money-man, Gene Philips, credit manager. Mr. Philips characterized his talk as the bum show after a star act. He congratulated everybody on the War Savings Stamp effort, and said that, although all the details hadn't been received, the rate of the new loan will be 4¼ per cent, which was exceedingly liberal considering that it was backed by the best security in the world and that savings banks only gave 4 per cent. Mr. Philips quoted from figures. He said that up to March 12 there had been invested in War Savings Stamps in the country \$96,298,402, and he also thought that by April 2 at least \$100,000,000 worth of War Savings Stamps had been sold. He also illustrated by figures the vast increase in our armed forces, showing how the men of the country had rallied to the colors. Mr. Philips said that despite the fact of all their bragging, the Germans would never reach Paris, and that it was up to us to make a business of winning the war.

At this point Mr. Maxwell said that it would be the best time to introduce the author of this slogan, "Make a Business of Winning the War," and introduced Nelson C. Durand. Mr. Durand said that it was up to everybody to "make a business of winning the war." He said that it might be necessary, as in the Civil War, for the women to make bandages, etc., and he characterized the mere giving of money as a joke compared to the sacrifices our soldier boys were making. He said that the Edison organization was investing over \$2,100 a week in War Stamps.

Tone—the vital thing

IF you, as a manufacturer, can talk and prove *tone superiority* in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you *can* talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

Parr Magnetic Reproducer

fitted with the

Vibratone Patented Diaphragm

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most *vital feature*. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallizing, always resilient

VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of mica diaphragms, it overcomes all mica's bad features. Guaranteed uniform in quality, free from bubbles, blisters and waves, the Vibratone Patented Diaphragm is non-porous, non-absorbent.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

PARR MANUFACTURING CORPORATION

1 UNION SQUARE

At Fourteenth St.

NEW YORK

Take the Parr Magnetic Reproducer—

The most sensitive of reproducers. The permanent magnetic device, an integral part of the reproducer, acts on the stylus box. Its possibilities in giving warmth and delicacy in the tonal reproduction of quiet passages make old-style sound boxes seem obsolete. And in fortissimo passages where ordinary reproducers create unpleasant, music destroying blasts, caused by the needle jumping and losing its grip, the Parr Magnetic Reproducer, with its marvelous flexibility, follows every wave and vibration in the record and takes everything the record holds.

The Kaiser Will "Strafe" It

NO sir—it won't tickle the Kaiser. But maybe that's why it's sweeping the good old U. S. A. with its wonderful melody and inspiring words. Geo. W. Meyer has put the real spirit of 1918 into his peppery military music—and Howard Johnson has written the words that will linger in the memory of every American when the Rhine is crossed and the guns are stacked. Get it—it will get you.

Just Like Washington Crossed The Delaware

General Pershing Will Cross The Rhine

CHORUS

Just like Wash-ing-ton crossed the Del-a-ware, So will Per-shing cross the Rhine, As they fol-lowed af-ter George, At dear old Val-ley Forge, Our boys will break that line. It's for your land and my land And the sake of Auld Lang Syne, Just like Wash-ing-ton crossed the Del-a-ware, Gen-ral Per-shing will cross the Rhine.

© LEO. FEIST, Inc. N.Y.

It Will Tease You Till It Gets You

A REAL "kiss and let's make up" song—with a teasing melody and tantalizing words. You can't help but hum it, sing it, or whistle it once you've heard it. Full of life and spirit—the kind of song you like to hear once, twice, and a hundred times. True love doesn't run smooth but "I'm Sorry I Made You Cry" is the smoothest love song in years. Words and music by N. J. Clesi.

I'm Sorry I Made You Cry

CHORUS

I'm sor-ry, dear, so sor-ry, dear, I'm sor-ry I made you cry! Won't you for-get, won't you for-give? Don't let us say good bye! One lit-tle word, one lit-tle smile, One lit-tle kiss won't you try? It breaks my heart to hear you sigh, I'm sor-ry I made you cry!

A Hit That Hits Home

OUT of Belgium, for four years a land of desolation has grown Benoit's, Levenson's and Garton's "My Belgian Rose"—a beautiful song that reaches the heart. It's a real, undeniable appeal that makes a real impression—you can't get away from its captivating melody and wonderful words. "And tho' they've taken all your sunshine and dew, we'll make an American beauty of you" are two of the lines you'll love in this song. Learn it now.

My Belgian Rose

CHORUS

Bel-eian Rose, my droop-ing Bel-gian Rose, For ev-ry hour of sor-row you've had, You'll have a year in which to be glad; You were not born in vain, for you will bloom a-gain, And tho' they've tak-en all your sun-shine and dew, We'll make an A-mer-i-can beau-ty of you, And you will find re- pose, ov-er here, My Bel-gian Rose.

ALL PROFITS FOR LIBERTY BONDS

B. R. Forster, President of Brilliantone Steel Needle Co., Pledges All Profits for Current Year to Patriotic Purpose—Splendid Step

On the opening day of the Third Liberty Loan an important announcement was issued from the offices of the Brilliantone Steel Needle Co. in the Marbridge Building, New York, to the effect that B. R. Forster, president of the company, will dedicate every dollar of profit made during the year 1918 to the purchase of Liberty Bonds. The company have already purchased \$25,000 worth of these bonds and will continue so to do as their profits accrue.

It was announced at the formation of this company, months before they actually started in business, that their business slogan would be "Made in America by American Labor." It is needless to state that this slogan has been rigidly lived up to. This latest patriotic endeavor is entirely in accord with the spirit of the firm. According to the achievements of the Brilliantone Steel Needle Co. during the first three months of their existence, it would seem that the amount to be invested in Liberty Bonds during the year will reach a very large figure.

B. R. Forster has just returned from an extensive trip which covered twenty-seven States and totaled about 8,000 miles. He found business conditions good throughout the territory he covered, but particularly in the South. Orders are coming in very strong, he reports, but they are somewhat hampered at the present moment by not being able to turn out the needles fast enough. During the shortage their factories have concentrated in turning out half-tone needles only and for the past few weeks deliveries have been made of this grade exclusively.

Their rapid growth has already necessitated the enlarging of their offices. Adjourning offices have been secured and work will be shortly started in tearing down the partitions.

Eugene Latham, who recently joined the col-

ors from this company, was a recent visitor at the offices. B. R. Forster, with Mrs. Forster,

B. R. Forster

are enjoying the pleasures of Atlantic City, where Mr. Forster is at present taking a much-needed rest.

EDISON INSPECTORS CALLED IN

The staff of Edison mechanical inspectors have been called in for their annual get-together to check up the developments in connection with the New Edison phonograph preparatory to their returning to the road. The mechanical inspectors will remain at Orange to assist in the School of Mechanical Instruction, which will be given for the benefit of the dealers who attend the coming Edison dealers' convention and will return to their territories late in the summer.

Mrs. H. C. Ernst, wife of H. C. Ernst, of the executive offices of the New York Talking Machine Co., Victor wholesalers, left for Dayton this week to attend the funeral of her stepfather, who was killed in an elevator accident.

WILL HAVE 28 STARS IN FLAG

The Service Flag of the New York Talking Machine Co. Is Steadily Becoming Starrier—The Men Are Ready for Service

The service flag in the offices of the New York Talking Machine Co., Victor wholesalers, will have six new stars within a few weeks, for six members of the company's forces have either enlisted or will join the National Army in the very near future. These men are Maurice Stegner, one of the assistants to George A. Kelley; Roy Johnson, receiving clerk; Frank Ferrier, packer; Y. Moore, packer; Henry Roth, stock clerk; Fred Meltzer, stock clerk, and Rocco Renna, porter. All of these boys will be in the National Army with the exception of Mr. Meltzer, who is a member of the U. S. Army, Cavalry Division.

With these new names the New York Talking Machine Co.'s flag will have twenty-eight stars, for twenty-one of the company's staff are now in the service of Uncle Sam. Considering the fact that this organization is a comparatively small one, this record is remarkable, and it is probable that this company's staff has a greater proportion of boys who are "doing their bit" for their country than any other concern in this industry. Quite a number of the New York Talking Machine Co.'s staff are now "somewhere in France," and the letters that are being received by their friends "over here" reflect a spirit of optimism and patriotism which is characteristic of the American boys "over there."

FRED MARASAK JOINS THE ARMY

Fred Marasak, who for the past couple of years has been assistant to A. H. Dodin, president of the Talking Machine Repair & Sales Corp., 176 Sixth avenue, recently enlisted in the United States Army. Mr. Marasak already has two brothers in the army. A third brother, Charles Marasak, is manager of the Victor store of L. A. Smith, Brooklyn, N. Y.

The Talking Machine Men, Inc. Hold Their Annual Banquet

The annual dinners of the Talking Machine Men, Inc., have always been notable events in the local trade, but the last dinner, held on April 10 at the Hotel McAlpin, outshone all previous affairs, due largely to the efforts of the entertainment committee, under the direction of J. J. Davin and Sol. Lazarus, who provided an array of talent of a caliber that at various stages made most of the diners forget to eat, temporarily. The dinner itself was a mighty good one at that, as vouched for by over 300 talking machine men, their wives and friends in attendance. The entertainers included the Hawaiian Troupe, which has made so many successful Victor records, Joseph C. Smith and his orchestra, Charles Harrison, Arthur Fields, Henry Burr, Sally Hamlin and Jasper's Trio, all of them well

much for their country as those who are actually under arms, for the music that they supply aids in assuaging the sorrows of those who are called upon to face the loss of loved ones, and likewise helps the boys actually in the trenches by providing them with cheering melodies. In every sense the business is essential.

He also referred to the recent Supreme Court decision in the matter of price fixing, declared that manufacturers must now depend upon legislation to get redress, and referred to steps now being taken by the various Governmental boards in the fixing of prices on basic raw materials.

Mr. Hopkins described the operations of the price cutter and the reason for his actions and told how certain standard articles were offered

Important addresses made by President Coughlin, Geo. W. Hopkins, J. Newcomb Blackman, Marion Dorian, John R. Young and J. H. Tregoe—Fine Program Offered

"Endeavor to learn of the houses in your vicinity which are not supplied with Grafonolas. Then take a kodak snapshot of the house, have it finished and attach it to the head of a letter, send to the owner or occupant of that house with the query: 'Why is there not a Grafonola in this house?' accompanied by a short selling talk. The personal touch is almost sure to make the proper impression."

Mr. Hopkins also made a plea for consistent and liberal advertising by the dealer, and stated that statistics show that 84 per cent. of the business failures are among non-advertisers. He also maintained that organization funds should be used liberally in the cause of music, with the ultimate idea of making America a singing nation. Mr. Hopkins closed his address by tell-

Annual Banquet of the Talking Machine Men, Inc., at Hotel McAlpin on Evening of April 10

known to the talking machine men through records they have made for various companies. Miss Hamlin, in fact, is believed to be the youngest record artist, and proved her ability in person by reciting "Pollyanna."

Must Watch Credits, Says J. H. Tregoe

When the time came for the after-dinner talks President J. T. Coughlin took up his duties as toastmaster and after explaining that Congressman Daniel Stephens, father of the Stephens' Bill for price maintenance, and Henry C. Brown, assistant to the general manager of the Victor Talking Machine Co., who had been scheduled to speak, were unable to be present, introduced J. H. Tregoe, secretary-treasurer of the National Association of Credit Men of New York, who gave a talk that was for the most part along patriotic lines. In the matter of credits, however, Mr. Tregoe declared that this was the time for merchants to co-operate and that loose credit, a mistake in normal times, was little less than criminal right now. He declared that business men must see to it that terms of credit were closely observed for their own protection.

George W. Hopkins' Inspiring Address

The feature of the evening was a talk by George W. Hopkins, general sales manager of the Columbia Graphophone Co., who fully lived up to his reputation as a speaker on the subject of salesmanship. Mr. Hopkins declared that in his opinion the business men of the country should endeavor to do twice as much business as in the past as one factor in doing their part in the war and in developing the nation's financial power.

He maintained likewise that the talking machine manufacturers and dealers were doing as

at reduced prices, with a view to selling the customer other articles upon which a profit could be made. The speaker drew upon his experiences in other lines of industry to prove the necessity of the salesman believing first in his own product and mentioned that only the man who is himself sold on his product can really be successful.

Mr. Hopkins said it is his belief that the average talking machine salesman was too technical and failed to realize that the buyer likes to be flattered by having the features of the machine or records presented to him in a manner that he can understand and appreciate.

For the dealer and manager Mr. Hopkins declared that the head of the house should endeavor particularly to stamp his personality on the people employed by him, and by that means multiply himself among his salesmen. Everyone likes to do business with the head of the house, he said, and proper training will give to assistants the ability to give the same personal sort of service.

"Don't run your store the other fellow's way, but work out your own way," said the speaker. "To follow in the footsteps of a competitor and to adopt his ideas is a sign of weakness and the imitator rarely meets with any success. Think up new ways of getting business and holding it. As an instance in point, don't leave a customer alone in a booth while searching for the record he has asked for. See that there is a selected bunch of records in each booth, and put one on the Grafonola and start it playing, on leaving the room. This idea as one has actually resulted in increasing record sales where it has been adopted. There are also many other plans that will get results if properly applied.

ing what Columbia service represented at this particular time, and offered some convincing facts for the consideration of the dealer.

J. N. Blackman Talks for Liberty Loan

J. Newcomb Blackman, president of the National Association of Talking Machine Jobbers, was the next speaker, and reviewed briefly some of the problems that are facing the trade at this particular time. Mr. Blackman pointed out what business men were expected to do in support of the war program of the nation, and emphasized the fact that we had a big job ahead of us and were handling it in a big way. He declared that in this country business men were asked to buy Liberty Bonds bearing interest, to provide finances for the war, while in Germany business men had all their assets conscripted in exchange for a piece of paper possibly of no value. Mr. Blackman cited some of his experiences at Washington in connection with the war excise tax, the Cary bill and other important legislative matters, and ended his address by making a strong appeal for subscriptions to the Third Liberty Loan through the trade committee. Mr. Blackman is chairman of the talking machine division of the Liberty Loan committee of the Allied Music Trades.

Marion Dorian's Witty Address

Marion Dorian, auditor of the Columbia Graphophone Co., spoke next, and as is his usual custom confined himself principally to some genuinely humorous remarks about nothing in particular. He kept his audience convulsed for several minutes and in closing became serious for the moment and urged liberal support for the Liberty Loan, not only for patriotic reasons, but in appreciation of what Mr.

(Continued on page 104)

BANQUET OF TALKING MACHINE MEN

(Continued from page 103)

Blackman had done in the interests of the industry as a whole at Washington.

Columbia Record by General Pershing

Mr. Dorian sprung the sensation of the evening, however, when he announced that his company had just received a cablegram from England to the effect that General Pershing, of the American Expeditionary Forces in France, had made a Columbia record. General Pershing is probably the leading figure in America's military life to-day, therefore the announcement of his record was accepted at its true value.

Some Other Talks

John R. Young, head of the convention bureau of the Merchants' Association of New York, through whose efforts the talking machine men have been able to use the rooms of the Merchants' Association as a meeting place, next offered some comments on the commercial importance of New York and other matters within his ken, after which J. T. Coughlin, president of the association, spoke at some length on organization and co-operation, urging the necessity of talking machine dealers getting together, particularly in times such as these. He spoke for honesty in business dealings, and pleaded that the dealers forward their own cause by placing their confidence one in another.

Dancing Ends Evening's Entertainment

At the conclusion of the dinner and speech-making the talking machine men indulged in dancing to the strains of Jasper's Celebrated Jazz Orchestra until it was time to go home and change to business suits in order to take up the threads of business the next morning.

The success of the evening as a whole was due to the untiring efforts of J. J. Davin, of the New York Talking Machine Co., and chairman of the arrangements committee, and Sol. Lazarus, secretary of the Talking Machine Men, Inc. Their elaborate plans of entertainment went through without a hitch, for which they deserve congratulations.

The present officers of the Talking Machine Men, Inc., are James T. Coughlin, president; Henry Mielke, vice-president for New York; H. Jaffee, vice-president for New Jersey; A. P. McCoy, vice-president for Connecticut; A. Galuchie, treasurer; Sol. Lazarus, secretary, and William Berdy, financial secretary.

W. C. Strong to Make Headquarters at Meisselbach Division of Otto Heineman Phonograph Supply Co.—An Authority on Motors

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., announced this week that W. C. Strong, who has been one of the company's factory executives at Elyria, O., for the past two years, will in the future make his headquarters at the plant of the company's Meisselbach division in Newark, N. J. Mr. Strong, who is recognized as one of the foremost authorities on motor construction in this country, will act as assistant to A. F. Meisselbach, head of the Meisselbach division and vice-president of the Otto Heineman Phonograph Supply Co. Mr. Strong's many years' experience will doubtless enable him to render invaluable assistance to Mr. Meisselbach.

BUILDING UP A GOOD TRADE

S. N. Rosenstein, president of the Phonograph Clearing House, Inc., states that he has achieved remarkable success with the products of Barnhart Bros. & Spindler, Chicago, the agency for which he secured recently. These products, which include "Superior" tone arm reproducers, etc., are meeting with a ready sale, and Mr. Rosenstein considers himself very fortunate in being able to offer these phonograph parts to the Eastern trade. He states that it requires only a demonstration to sell these products, as the manufacturer and dealer is easily convinced by actual demonstration that this tone arm and reproducer can be merchandised to excellent advantage.

Miss N. L. Moody is now in charge of the Victor retail department of Philip Werlein, Ltd., New Orleans, La.

John B. Taylor Conducts Interesting Experiment in Playing Records Backward—Declares Tonal Effects Are Entirely Changed

John B. Taylor, who is a talking machine enthusiast, has done much experimenting with talking machines and records, and has delivered a number of illustrated lectures on the "Development of the Phonograph and a Microscopic Study of Records," has aroused particular interest through his experiences in playing records backward and reversing tones, tune and speech. In telling of his experiments in reversing records, Mr. Taylor said recently:

"Such reversed sounds, besides being curious, are worthy of study from a physical and psychological basis. Playing backwards was an old device in the early days of hand-driven, tin-foil phonographs, but these were so imperfect as to tone quality that any critical study of the change in quality was not possible. According to the theories of tone quality since Helmholtz, the quality of a tone is not influenced by the phase relations of the several sound wave partials which make up the tone. By this theory the quality of a tone should be unchanged by playing backwards. Experiment shows that this is true provided tone quality is defined in a restricted, physical sense which is more limited than the average musician means by the word 'quality.'

"In these experiments it appears that an even, sustained tone, whether vocal or instrumental, is practically the same for normal or backward rotation of the record, but, since many instruments do not, and others are quite incapable of producing even, sustained tones, there are surprising effects from these reversed records, especially from the percussive instruments such as piano, cembalon, harp, xylophone, bells and celesta. When reversed, these all in some degree resemble wind instruments.

"To show the ability of the phonograph as a single instrument to reproduce the tone qualities of the many musical instruments of diverse shapes, sizes and means of sounding, a pleasing and instructive feature has been the display of a slide picture showing a performer and instrument at the same time that the phonograph plays a characteristic bit by the same instrument. I have had more difficulty in finding suitable records for this series than in finding pictures for the slides."

A NOTABLE VISITOR FROM CHICAGO

George L. Davidson, one of the owners of the Talking Machine Shop, Chicago, Ill., exclusive Victor retailers, accompanied by Mrs. Davidson, was a visitor to New York this week, after spending a few days in Philadelphia visiting some of Mrs. Davidson's friends and relatives. While in New York Mr. Davidson took advantage of the opportunity to call upon several of the local Victor retailers in order to gain an insight into conditions in the local trade.

Mr. Davidson is one of the foremost members of the retail talking machine industry in Chicago, and his rise in this business has been little short of phenomenal. He started several years ago with a small capital, and last year did a business of more than \$250,000. His establishment now occupies a four-story building in the "musical center of America," and this store, which contains more than twenty demonstration booths, is considered one of the finest Victor establishments in America.

ADDITION TO BUEHN ORGANIZATION

Louis Buehn Secures Services of William H. Nolan, a Victor Man of Countrywide Reputation—Now Building for the Future Trade

PHILADELPHIA, PA., April 8.—Louis Buehn, head of the Louis Buehn Co., prominent Victor wholesalers of this city, is one of those who have full

William H. Nolan

confidence in the future of the talking machine business, and is making preparations accordingly in building up and strengthening the organization of the company. Mr. Buehn realizes that the present shortage in machines and records is but the natural temporary result of wartime economic readjustment, and that conditions are bound to return to normal.

One of the factors that has meant success for the Buehn Co. in the past, and means further success in the future, is the practice of selecting for the organization young men of broad experience in the Victor game—men like F. B. Reineck and Chas. W. Miller; E. P. Bliss, a former factory man and later with Lyon & Healy; and L. D. Callahan, who came to him with the experience of several years gained in traveling from coast to coast for the Victor Co. And now Mr. Buehn announces the addition to his organization of Wm. H. Nolan.

Wm. H. Nolan is known to the trade from California to Long Island. During Mr. Nolan's connection with the Victor factory he traveled all sections of the country, and during the Panama-Pacific Exposition directed much of the work of the Victor Temple at San Francisco—an exhibit unsurpassed by anything ever before attempted in the annals of the talking machine industry. Mr. Nolan's work won such flattering attention that Lyon & Healy, of Chicago, induced him to take the management of their retail department, probably the largest retail department in the United States.

After two years with Lyon & Healy Mr. Nolan re-entered the wholesale end of the work with the New York Talking Machine Co., where his wide experience was utilized in the development of improved retail methods among the dealers of New York City and vicinity.

IMPORTANT VOCALION SALE

Among the interesting Vocalion sales closed this week at Aeolian Hall was that of a Vocalion, style "K," to Johan Baumann, a delegate representing the Norwegian Commission which has been visiting this country for some time past in the interest of the Norwegian Government.

It is interesting to note that the Brazilian, Danish and Norwegian Commissions have all recently purchased Vocalions to take with them to their home countries. Incidentally they all selected style "K" Vocalions.

SUBSCRIBING TO LIBERTY LOAN

Local Talking Machine Trade Interests Going "Over the Top" With Flying Colors—J. N. Blackman, Committee Chairman, Anxious to Establish New Trade Record

As The World goes to press the drive for the Third Liberty Loan is in full swing and there is every prospect that the local talking machine trade will go "over the top" with far more than its normal share of subscriptions. The Allied Music Trades of New York have pledged through Julian T. Mayer a minimum of \$1,000,000 for the loan, and J. Newcomb Blackman, president of the Blackman Talking Machine Co., and sub-chairman of the committee with direct responsibility for the talking machine trade, stated that his trade would probably raise at least one-quarter of the total amount.

Late this week Mr. Blackman stated that possibly \$200,000 had already been raised by the talking machine men, with much more in sight, and that trade subscriptions to the third loan would far exceed those recorded for the second. Liberty Loan talks at the annual dinner of the Talking Machine Men, Inc., on Wednesday night are believed to have stimulated subscriptions to a considerable degree. The members of the committee assisting Mr. Blackman include George W. Hopkins, of the Columbia Graphophone Co.; Emanuel Blout, Roy J. Keith, New York Talking Machine Co.; Lipman Kaiser, S. B. Davega Co.; A. P. Plumb, Musical Instrument Sales Co.; E. H. Jennings, Sonora Phonograph Corp.; R. H. Morris, American Talking Machine Co.; Thos. S. Green, Silas E. Pearsall Co.; G. T. Williams; C. L. Price, Ormes, Inc.; Max Landay, Landay Bros.; T. E. W. Carlson, C. H. Ditson & Co., and Joseph Schwetz, I. Davega, Jr., Inc.

It might be mentioned that a substantial subscription to the Liberty Loan from the talking machine trade at this particular time should have a most desirable effect in Governmental circles, as indicating full support of the Government in the war, and that subscriptions, therefore, should be made wherever possible through the trade committee.

COVERING NEW YORK TERRITORY

Thomas McCreedy, who formerly represented the Victor Co. in Ohio, is now in charge of New York territory, succeeding R. N. Lagow. He is a man splendidly equipped for this important post, who believes in co-operating with Victor dealers for the best interests of the industry.

F. W. C. Hayes, formerly manager of the Victor department of Philip Werlein, Ltd., New Orleans, La., has left to take charge of the Brunswick phonograph department in that city. He has recently established new Brunswick dealers in Jackson, Meridian, Columbus, Hattiesburg, Brookhaven and Lexington, Miss., Baton Rouge, Crowley and Jennings, La.

GLOBE-WERNICKE LITERATURE

Interesting Information About the Sectional Disc Record Cabinet of This Company Issued

CINCINNATI, O., April 6.—In connection with the exploitation of its sectional disc record cabinets, the Globe-Wernicke Co. of this city has prepared attractive literature, which can be used to excellent advantage by the dealer.

The company has emphasized the fact that these sectional disc record cabinets solve an important problem, and a recent piece of literature entitled "How to sell more records" reads in part as follows: "Why is it, Mr. Talking Machine Dealer, that for three or four months after a customer

buys a talking Sectional Disc Record Cabinet machine he will also buy records in quantities, and then suddenly refuse to buy more? Why is it that, a few months after selling a machine, you can telephone the buyer and get his permission to send him the latest records from which to make a selection, and that after this period, your experience reaches you that it is useless to send him any more of these records with the hope of his retaining any appreciable number?

"At first hand the reason would seem to be that he is tired of his new 'toy,' but many dealers have told us that the difficulty is the proper and adequate housing of the records he has bought from you. The space at his disposal for filing the records has become crowded, and he has taken the road of least resistance and made up his mind not to buy any more records for the time being.

"We believe that we have solved this problem for you by the introduction of our sectional disc

record cabinet, which is an elaboration of the Globe-Wernicke system of sectional bookcases.

that is, a top, a unit, and a base. The unit has ninety compartments, so that each record, whether 10-inch or 12-inch, has its own compartment. In other words, there is a place for every record and every record is in its place. When the unit is filled, a second unit is placed between the first and the top sections, and so unit after unit is added vertically and horizontally as space permits.

The Unit Idea

"Dealers who place these sections on their salesroom floors, and explain the quick filing and finding facilities of this system, will undoubtedly develop an active demand for records, as the use of this system eliminates the 'bugbear' of 'No room for any more records.' Our new catalog, No. 317, will give you an adequate idea of our unit system."

GOLDSMITH BREAKS INTO PRINT

MILWAUKEE, Wis., April 9.—Harry A. Goldsmith, secretary and sales manager of the Badger Talking Machine Co., Victor wholesalers, broke into the "Who's Who" column of the Milwaukee Journal on last Friday evening. A personal sketch stated in part that "Harry A. Goldsmith acquired a becoming bashfulness while engaged in the newspaper business in Calumet, Mich., from which he has never recovered. Mr. Goldsmith believes a bass drum never sounds so loud as when one pounds it himself, but is more effective if the world is doing the pounding." The sketch also stated that Mr. Goldsmith was born in Chicago thirty-four years ago, and was brought up in Calumet, Mich.; that he is unmarried, but is willing, and is a member of the Press, Elks and Advertisers clubs, the M. A. C., the M. A. of C., and the Masons. A portrait of Mr. Goldsmith accompanied the sketch.

Model No. 90 Mahogany or Oak

"American Maid" Phonograph

We are ready to offer the trade the "American Maid" phonograph, an instrument which has a *tone* quality that is unsurpassed. Hence—the slogan—"Purity and Sweetness of Tone". NOW THE COLUMBIA GRAPHOPHONE MANUFACTURING CO.

President Whitten Makes Formal Announcement of the Change of Name of the American Graphophone Co.—Will Not Affect the Personnel or the Policies of the Company

Francis S. Whitten, president of the Columbia Graphophone Co. and the American Graphophone Co., sent out a letter this week to Columbia representatives formally announcing the change of the latter company's name to the Columbia Graphophone Mfg. Co. The name of the Columbia Graphophone Co. remains as it is at the present time.

The letter sent out by President Whitten announcing the American Graphophone Co.'s change in name reads as follows:

"As of this date, April 1, the name of the American Graphophone Co. is changed to that of the Columbia Graphophone Mfg. Co. This change is made pursuant to a special meeting of the stockholders of the American Graphophone Co. held on March 25, 1918, at which time the officers and directors of the company were authorized to sell and transfer practically all the assets of the American Graphophone Co. to the Columbia Graphophone Mfg. Co. under

a reorganization plan dated December 14, 1917.

"The names of the American Graphophone Co. and the Columbia Graphophone Co. have always been more or less confusing to our dealers, and for this reason and other advantages in the reorganization we have changed the name 'American Graphophone Co.' to 'Columbia Graphophone Mfg. Co.'

"The Columbia Graphophone Mfg. Co. assumes all the liabilities of the American Graphophone Co. and the officers, directors and department heads of the Columbia Graphophone Mfg. Co. are now occupying the same positions they previously held with the American Graphophone Co.

"The change in question does not in any way affect your relations with the Columbia Graphophone Co., which continues to be the sole sales agent of the Columbia Graphophone Mfg. Co., as it previously was of the American Graphophone Co."

play, so that each Columbia representative can use that part of the service which best suits his particular needs. This department has recently completed its newspaper advertising schedule, which includes a campaign in seventy

Window Display of United Music Stores
papers published in twenty-three languages. This advertising is inserted without using the Columbia Co.'s address, so that the local talking machine dealers may receive the full benefit of this publicity.

ARTISTIC WINDOW DISPLAY

Made by the United Music Stores of Portland, Me.—Features Display Put Out by Columbia International Record Department

The international record department of the Columbia Graphophone Co. recently received the accompanying photograph from the United Music Stores, Portland, Me.; this illustration showing a window display that was recently used by this progressive and successful Columbia dealer. This display incorporates some of the new window service ideas completed by the international record department which are being used to excellent advantage by many dealers throughout the country.

The United Music Stores expressed their hearty commendation of this display and stated

that two days after it was installed the store closed the biggest foreign language record business in its history. As an example of the sales appeal of this display, it is interesting to note that on the very day it was placed in the window two Danish sailors happened to pass the window and were so favorably impressed with the Danish cut-out that they left an order for a \$78 outfit, to be delivered to their ship.

The United Music Stores conducts one of the most attractive talking machine establishments in New England. It has a remarkably fine location, being situated on the most prominent corner of Portland's best business street.

R. F. Bolton, sales manager of the Columbia Co.'s international record department, states that this department has made arrangements whereby it can furnish the dealers with the complete display, or different sections of the dis-

ORGANIZE BEECROFT-BLACKMAN, INC.

Beecroft-Blackman, Inc., has been organized in New York for the purpose of taking over by assignment the Beecroft United States Letter Patent No. 1,244,944, issued October 30, 1917, covering the placing of moulding on top of talking machine cabinets to hold Victrola IX. The new corporation plans to issue licenses on a royalty basis to desirable manufacturers of cabinets for the use of Beecroft patents. Several arrangements to that end have been entered into. The leading figures in the new corporation are Clement Beecroft, long connected with, and widely known in, the talking machine cabinet field, and J. Newcomb Blackman, president of the Blackman Talking Machine Co., New York, who likewise needs no introduction to the members of this trade.

Your Record Order

—Placed with us is handled with that promptness and satisfactory attention to every detail which is only possible to a large, perfectly equipped distributing organization

You want your order promptly filled; you want the records carefully packed; you want your shipping instructions followed; you want conscientious, painstaking attention given your needs; you want service that is real co-operation— These factors applied to each and every order, large and small, is each month increasing the list of retailers whom we serve. VAN VEEN BED-SET BOOTHS

BUY LIBERTY BONDS

INVEST IN LIBERTY BONDS

MODEL "D-A"—BED-SET—DOUBLE CONSTRUCTION—SOUNDPROOF

CONSTRUCTION

Sectional or knock-down, built in three-foot units, with pilaster columns between, with a patented, simple and efficient interlocking device permitting satisfactory setting-up by local labor. Regular stock booths and knock-down construction most economical and satisfactory to the buyer, allowing the purchase of matched additions at any time, or the rearrangement or removal of the whole installation without damage to equipment or building walls or partitions.

REGULAR SPECIFICATIONS

This equipment is specified as soundproof. It must be understood, however, that the booths are only commercially soundproof. It is impossible to make demonstration booths absolutely soundproof unless masonry walls are built between. The booths specified are as nearly soundproof as it is possible to construct with air chambers between all the wood and glass panels and with invisible felt insulation provided at points in contact with walls or floors.

PARTITIONS—Each three-foot section complete in itself, in a single piece, eight feet over all. Double laminated and veneered panels to prevent warping or splitting, with air chambers between, throughout. Double, extra heavy, "A" quality glass, 24 in. x 46 in., throughout. Inner glass lights set in removable frames for cleaning.

DOORS constructed with double wood panel and glass surfaces, with air chambers between, like sections. With double rabbeted jambs all around. Doors fitted with glass knobs and sanded brass finished hardware.

ROOFS of heavy, ribbed sky-light glass set in framed, interlocking sections.

FINISH in any natural wood color—same inside and outside.

THE INSTALLATION PHOTOGRAPHED

This installation consists of two 6 x 9-foot booths, white enamel finish, with Adam decorative treatment on cornice and pilasters. Decorations finished in old ivory glaze. The record racks were specially designed and may be seen in the rear of the store photographed.

This installation built for R. F. Fitzsimons, 2885 Broadway, New York City.

RECORD RACKS

These record racks are made in 3-foot sections, 8 feet high, to match the booths. Each record rack has three shelves for 10-inch records and three for 12-inch records, with upright dividing partitions, 3½ inches apart on centers. Each section of rack holds about 1,400 records.

Write for a copy of our new catalog.

ARTHUR L. VAN VEEN & CO., Marbridge Building, New York City.

BUSINESS IN BALTIMORE ONLY AWAITS SUFFICIENT STOCK

Some Dealers and Distributors Report Wonderful Trade, Others Slowed Up by Lack of Goods—Good Advertising From Concerts—Why W. S. Parks Is Happy—Activity With Victor Dealers

BALTIMORE, Md., April 9.—Talking machine business in Baltimore is in a peculiar condition at this time. Some of the dealers and distributors are reporting wonderful business with remarkable increases over the same period of previous years, while others report a falling off due to the lack of goods—not to the lack of demand for machines and records, however. The month opened with better receipt of goods than for some time past, but not near enough to meet the pressing demand.

The present condition has caused several of the distributors to adopt a policy of forcing dealers to sell the kind of records they can get or do without additional machines. This in a measure has resulted in creating business of a new kind and records that have been in stock for as long as six and eight years are now moving out of showrooms. Many instances are reported of the buyers accepting what they could get instead of what they want. Dealers are forcing their salesforce to study their stock better so as to meet the present conditions of shortage of goods with as small a loss as possible.

Both the Victor and Columbia concerns were

able to obtain some good advertising for their records last week. The Victor Co. took advantage of the fact that Amelita Galli-Curci was billed to be the special soloist with the Symphony Society of New York at the Lyric on April 4 and advised music lovers to hear her and then hear her on the Victor in the home. Two days before the performance announcement was made of the illness of the artist and Lucy Gates, soprano, was substituted. The Columbia Co. at once let loose display advertising urging the public to hear Miss Gates and then to have Columbia records make her ever present in their home. Thus both companies benefited by the unfortunate event for one and the fortunate event for the other as the demand for Galli-Curci records and the Gates records are the greatest the dealers in the respective lines have ever had for any individual record. It's the old saying that it's an ill wind that blows no good.

W. S. Parks, manager for the Baltimore branch of the Columbia Co., is very happy over the phenomenal business done by his branch during March. It proved to be the greatest month's business that the branch has ever done,

and what it did to the figures of the same month a year ago would be a shame to tell. But Mr. Parks is right on the job; for instance, on Saturday, before the close of the month, he received a carload of machines. He had a lot of orders for Washington and Southern points, so he hired two big motor trucks and at 4 o'clock in the morning had the machines at the station. These machines were loaded as soon as business opened and the machines were rushed to Washington. The facilities for Southern shipping out of Baltimore by boat being a little congested at this time Mr. Parks through this stunts was able to get his goods started for their destination promptly by this move. It was just a trifle more expensive, but proved to be a way to get around the freight situation. Mr. Parks announces the appointment of Daniel De Foldes, as head of the dealers' service department.

F. K. Pennington, assistant general sales manager of the Columbia Co., was in Baltimore during the month and expressed himself as well pleased with the business conditions here. It was his first visit to the new quarters.

From General Manager H. L. Willson, of the Columbia Co., Mr. Parks received the following wire: "Heartiest congratulations to you and Baltimore's sales force on splendid March sales." He also received a wire from A. J. Heath, former Baltimore manager, but now in charge of Philadelphia headquarters for the Columbia, which stated: "Put it over on Philadelphia." Mr. Heath was in Baltimore to spend Easter and met Mr. Parks.

The Hopewell Furniture Co., Hopewell, Va., who have just received their first line of Columbia goods, are overjoyed with the outlook for good business. Thurman & Boone Co., Roanoke, Va., who have been handling the Columbia line for some time, have just rearranged their store, installed new booths and redecorated their talking machine department.

A. B. Creal and W. M. Korhammer, Jr., who are on the road for Columbia, have been sending in fine orders. P. W. Peck, who looks after the Carolinas, made a hurried trip to headquarters during the week looking after stock.

W. C. Roberts, manager of E. F. Droop & Sons Co., Victor distributors, is doing a fine retail business, but his wholesale business is retarded because of his inability to obtain goods. He says it's a regular record famine. With his wholesale trade he is demanding of all dealers that they buy an equal amount of the kind of records obtainable with every order for machine. In this way he says that he has been able to move records that have been on the shelf for at least eight years. Mr. Roberts reports that the demand for Galli-Curci and Heifetz records have been phenomenal. Had he been able to get the goods he says he would have shown very close to a 50 per cent. if not better increase over last year's business.

Henry Eisenbrandt, of H. R. Eisenbrandt & Sons, Inc., Victor distributors, is very short of goods and is making every effort to get more goods, but with little success. He says that business has naturally suffered because of the lack of records. He visited headquarters during the month and will make another trip there the coming week.

I. Son Cohen, of Cohen & Hughes, Victor distributors, says he has been unable to fill the demand for goods, despite the fact that he has been able to obtain some goods by shipment, although not near enough to go around.

Jesse Rosenstein, for the National Piano Co., Pathé distributors, has been able to get some goods, but is still short of machines and records.

The Brunswick-Balke-Collender Co. have changed their Baltimore headquarters and are now located at 107 Hopkins place. They are steadily expanding their business.

Hammann-Levin Co., Victor dealers, report a fine business in both machines and records, and say the business of the past six months is way ahead of the same period of a year previous.

The Mann Piano Co., Leopold Ehrlich, sales manager, Victor dealers, says that March business is simply fine in both records and machines.

WHY MUSIC IS AN ESSENTIAL

During War Times Discussed Most Interestingly by H. N. McMenimen

H. N. McMenimen, of the Pathé Frères Phonograph Co., recently gave a very interesting interview in connection with the importance of music in war times, and the fact that it should be recognized as an absolute essential.

In this talk Mr. McMenimen said in part as follows: "In war times music is an essential. It is a necessity in the ranks of the fighting man, for it instils the firmness of morale neces-

H. N. McMenimen

sary to success in war. It is important in the lives of civilians because it strengthens moral fibre and dissipates depression. Whether it be the stirring strains of a sonorous band, or the sounds of a soothing, sympathetic voice, it is a tonic in war times; it is a mental exhilaration that engenders physical recuperation. England and France found profound solace in melodious sounds. We may sacrifice nonessentials in this period of stress, but we can ill afford to neglect a cherished part of our cultural activities.

"Music is the universal tongue, the democracy of art, it is mental food; the kind that sustains and brings out the finer things of character, and is as necessary to us in war times as the smile of fortitude on the face of our soldiers."

The line of demarcation between luxuries and necessities is hard to see—when the necessities insist on masquerading as luxuries.

TO CALCULATE PROFITS

What Additions to Cost Necessary to Determine Them—Some Interesting Data

A letter has been received by the New York Times from John Connors, secretary and treasurer of the Howe & Rogers Co., of Rochester, N. Y., containing a schedule of profit calculations which he thinks will be found very useful by the average business man. It shows, for instance, that 5 per cent. added to the cost of an article is equal to a 4 3/4 per cent. profit on the selling price. The remainder of the table follows:

ADDITION TO COST.	PROFIT ON SELLING PRICE.
8 1/2 per cent.	7 per cent.
10 per cent.	9 per cent.
12 1/2 per cent.	11 1/8 per cent.
15 per cent.	13 per cent.
16 per cent.	14 1/4 per cent.
17 1/2 per cent.	15 per cent.
20 per cent.	16 2/3 per cent.
25 per cent.	20 per cent.
30 per cent.	23 per cent.
33 1/3 per cent.	25 per cent.
35 per cent.	26 per cent.
37 1/2 per cent.	27 1/4 per cent.
40 per cent.	28 1/2 per cent.
45 per cent.	31 per cent.
50 per cent.	33 1/2 per cent.
55 per cent.	35 1/2 per cent.
60 per cent.	37 1/2 per cent.
65 per cent.	39 1/2 per cent.
66 2/3 per cent.	40 per cent.
70 per cent.	41 per cent.
75 per cent.	42 2/3 per cent.
80 per cent.	44 1/2 per cent.

"This schedule," Mr. Connors says in his letter, "appeared some years ago in a newspaper which I believe was and is still published in Springfield, Mass. I have never seen it published since in any paper."

HOW BOTEFUHR DEVELOPS TRADE

Live Talking Machine Man of Pittsburg, Kan., Has Built Up Big Business Among the Miners as Well as the Wealthy in His Section

PITTSBURG, KAN., April 3.—Frank S. Botefuhr has developed a business in Grafonolas that keeps him hustling. He has been established in the music business in Pittsburg for several years and has a high-class retail store which is patronized by the wealthy classes as well as others. The chief trade in Grafonolas, however, is though the Pittsburg territory, scores of machines having been placed in the last few months even in the homes of the miners, that, judging from their exterior, would have none of the modern conveniences and the essentials of American life. The miners, however, are getting \$4 and \$5 a day and they can work three days a week and have more money to spend than the ordinary city clerk who makes \$100 a month.

One of the plans of distribution Mr. Botefuhr has operated very successfully is as follows: One of his subagents will take two or three machines to his automobile and drop them at houses along the route. He will place maybe five or six along one of the main roads in the territory, in houses as close together as he can. Perhaps the next day and the following day he

will spend in placing more machines in houses along this same road. Then he will start gathering up the machines, a day or so being sufficient for a trial. In nine cases out of ten the people who have tried the Grafonola will keep it. However, if one of them should decline to buy, the agent will load the machine in his car and take it with him on his further work down this road. When he finally comes to a house that has not yet tried a machine, he will leave it at this house. In this manner the agent saves a great deal of time in placing machines and his work is even simpler than that of an agent working in a city, because his delivery expense and time occupied in picking up the Grafonola when it is not sold is reduced to a minimum. Mr. Botefuhr has been distributing considerably over twenty-five Grafonolas a month in the Pittsburg neighborhood, and one can easily imagine the large trade in records which he is building up for himself.

TEST offered to dealers to prove the superiority of Wall-Kane Steel Needles

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

Beware of Imitations

Package of 50 WALL-KANE needles. Loud, Extra Loud and Medium, greater value than 500 ordinary steel needles, retails for 10c, costs the dealer 6 1/2c.

STOCK SITUATION A LITTLE EASIER IN LOS ANGELES

Jobbers and Dealers Getting Some Small Shipments of Machines and Records—Talking Machine Dealers' Association Discusses Trade Problems—General Happenings

LOS ANGELES, CAL., April 6.—The situation here in regard to getting stock has brightened up to a certain extent, and all of the local jobbers have been receiving small shipments of both records and machines during the last month. However, most dealers are a long way from having all the goods they need, as most of the machines received are already spoken for, which leaves none for present trade. The demand keeps up to all expectations and only the lack of goods prevents last year's records from being broken.

The Victor, Edison and Columbia jobbers seem to think that the freight situation will not be as strained as before and that goods will be coming through nearer to schedule time than before. This will be a great relief to the local dealers as the old "freight" excuse is getting rather time-worn even if true.

It really is remarkable that business has kept up as well as it has, considering the number of ways in which our patriotic citizens are coming to the front in defense of our Government by buying bonds, stamps, etc.

A great many persons are still sending machines and records to our nearby cantonments and many soldiers and sailors are themselves purchasers, especially of records, when in our city on leave. The phonograph has become very popular with the soldier boys, who get a great deal of enjoyment and entertainment from playing them. When donated for that purpose, all dealers will be glad to send them to the camps free of charge.

Talking Machine Association Meets

The Retail Talking Machine Dealers' Association of Southern California held its regular monthly meeting at the Platt Music Co. store last Tuesday evening, with practically every member present. It was decided at this meeting to continue the trial plan of refraining from advertising talking machine terms for another thirty-day period, as it seems to have been proving very satisfactory. The proposition was also discussed to further regulate sales, on a more uniform basis, by requiring that the first payment equal 10 per cent. of the contract price, with \$5 as the minimum for such payment; that 7 per cent. interest be exacted in all instances on deferred payments, and that the free records accompanying machine sales shall not exceed one-half the amount received as the first payment. These matters, however, were only discussed with a view to preparing the members for definite action at the next meet-

ing, which will be held on April 30, at Barker Bros.

A. A. Tanner, Victor dealer in Monrovia, Cal., recently gave a benefit concert for the Red Cross with a Victrola XVI electric. The machine alternated with other musical numbers and the concert was a big success with a large attendance. In all more than \$500 was made for the Red Cross.

Dan Voorhies, with the Brunswick Phonograph Co., is very enthusiastic about the way his line of machines is taking in southern California. Mr. Voorhies has placed agencies from Bakersfield in the north to San Diego in the southern part of the State, also several agencies in Arizona. The Brunswick is represented in Los Angeles by the Barnes Music Co., Lyon-McKinney and Smith, large furniture dealers, and Hamburger & Sons, the largest department store in the Southwest. The Brunswick Co. are located at 845 South Los Angeles street.

McCormack's Sensational Drive

One of the most notable musical events that have taken place in our city for some years was the Red Cross concert given by John McCormack and his company on March 18, at the Shrine Auditorium. An immense audience was present. In fact, hundreds were unable to obtain tickets and the concert was a huge success from every standpoint. Mr. McCormack was very enthusiastically received by the large audience and had to respond to numerous encores. About \$11,000 was realized for the Red Cross Society, and besides donating his services to the concert Mr. McCormack autographed forty-five of his favorite records, which were sold by the Red Cross at prices ranging from \$25 to \$100. Twenty-five of the records were donated by Barker Bros. and twenty by the Southern California Music Co.

The T. J. Johnston Music Co., for many years located on Main street, near Fourth, are moving to 406 South Broadway, where they will open an up-to-date music store of pianos, sheet music, small goods and talking machines. They are agents for the Victor and Columbia lines, and will have a very fine department.

The Curtis-Colyear Furniture Co., of 507 South Main street, Pathé dealers, report a fine business for March. Their business has been growing so fast that they are contemplating enlarging the department in the near future.

malee-Dohrmann Building for the last ten years, have just succeeded in leasing the entire floor, and are busy at present moving and remodeling. Chas. Ruggles, their local manager, is delighted with the change as his former space was entirely too small for the volume of business that he now has. When finished they will have nearly 13,000 square feet of space which will give them one of the largest jobbing houses for their line in the West.

The Columbia Phonograph Co., wholesale, report a brisk demand from dealers for their new period designs, several of which have been sold since they were placed on exhibition. Mr. Stidham, their manager, is very much pleased with their business, and has placed many new agencies since January 1—several of whom handle the Columbia line exclusively.

Edison Co. Take Over Local Concern

One of the most important changes in the jobbing line that has taken place in Los Angeles has just been consummated—namely, the taking over by Thomas A. Edison, Inc., of the Diamond Disc Distributing Co. This is in accordance with the policy of the Edison Co. to control the wholesale line on the Pacific Coast, this office being the last link in the chain, which extends now from Seattle to San Diego. A. C. Ireton, with headquarters at San Francisco, will be Coast manager for the new company, which will be known as the Edison Phonograph, Ltd. Mr. Ireton was formerly general sales manager for the Edison Co. at East Orange, N. J. The Los Angeles office will now have the entire State of Arizona as the El Paso wholesale house will be closed. C. A. Lovejoy, who has had charge of the Edison wholesale both for the Southern California Music Co. and afterward the Diamond Disc Distributing Co., will be retained as local manager.

Barker Bros. have enlarged their talking machine department by the addition of several new demonstration booths. C. A. Booth, their manager, says business is fine, and if it keeps up and they are able to get the goods, it will be necessary to enlarge again next fall. April first was the day for the formal opening and each customer was presented with a beautiful rose as a souvenir. Barker Brothers handle the Victor, Edison and Sonora machines.

Madam Melba was the recipient of a most beautiful loving cup given to her by several of

the leading dealers of Los Angeles. The occasion was on the night of her concert, April 8, at Trinity Auditorium. The presentation speech was made by Len Behymer, our local impresario, in his usual faultless style, and the Madam responded with a few well-chosen words of thanks. The following dealers were the donors of this beautiful gift: Andrews Talking Machine Co., Barker Brothers, Geo. J. Birkel Music Co., Southern California Music Co. and the Wiley B. Allen Co.

Hamburger & Sons had the formal opening of their new phonograph department on April 1. It is located on the third floor and is complete in every detail. Every person calling at the department received a beautiful souvenir. This house will carry the Columbia and Brunswick machines.

C. H. Yates, special Coast representative of the phonograph department of the Brunswick-Balke-Collender Co., is now making his headquarters in Los Angeles, dividing his time between this city and San Francisco. He formerly covered Southern territory for the Diamond Disc Distributing Co., Edison jobbers, and later managed the Spokane branch of the Pacific Phonograph Co. until sold to Edison Phonographs, Ltd., in 1917. Mr. Yates expects to build up an excellent trade for the Brunswick in this territory.

STRONG DEMAND FOR SMALL MOTOR

Reported by the Melophone Talking Machine Co.—Materials Purchased Before War

The Melophone Talking Machine Co. are finding the demands for the small single spring motor to be on the increase. Since the first of the year several contracts have been closed whereby deliveries in quantity lots during the balance of the year will be made to several concerns. The Melophone Co. has been unusually successful in meeting the requirements of the trade wishing a small motor for popular-priced machines which will give reasonable service. One of the reasons why this house can still market their small motor at low prices, according to the officers of the company, is the fact that all the materials entering into the motors were purchased before the war. Henry Sobel, president of the Melophone Talking Machine Co., is very active in the third Liberty Loan drive, being a member of one of the committees of the Patriotic Service League.

OTTO B. HEATON'S NEW WAR POST

COLUMBUS, O., April 8.—Otto B. Heaton, one of the proprietors of the Heaton Music Store, at 369 Fifteenth avenue, this city, has been appointed Army Secretary for the Y. M. C. A., and will leave for France very shortly to take up his new duties. Mr. Heaton has long been interested in Y. M. C. A. work and feels that he can best do his bit by assisting that organization in its efforts to increase the comfort of the soldiers on the field. The business will be continued by his brother, C. W. Heaton.

THRIVING SCRANTON STORE

Temple of Music Has Most Artistic Victor Quarters Under Management of G. W. Deetz

SCRANTON, PA., April 8.—One of the most successful talking machine establishments in this section of the State is the Temple of Music in this city, which handles the Victor line, and has developed a profitable Victrola and Victor record business.

This establishment is under the management of Guy W. Deetz, formerly connected with the Emerson Piano Co., Decatur, Ill., and well known in Western talking machine circles. Mr. Deetz came to Scranton with a thorough knowledge of the retail Victor business, and his practical experience in this field has been an important factor in the success of the Temple of Music.

This establishment was opened last fall by Stoehr & Fister, and is considered one of the most attractive Victor establishments in the East. It is a consistent user of advertising space in the newspapers, and Mr. Deetz, who is a firm believer in the value of this publicity, takes advantage of every opportunity to feature the Victor line.

G. W. Deetz

The Temple of Music is becoming more than a retail store, for it has a concert hall, which seats 500 people, and which has been the scene of many important musical events. Mr. Deetz has made this store a community proposition, and its prestige, together with the store's splendid sales totals, reflect the practicability of his ideas in this field.

CLEVER PUBLICITY POINTER

The J. L. Roark Estate, house furnishers and Victor dealers in Greenville, Ky., have adopted a most attractive gummed label for placing on Victrolas sold by the company. The gummed label is attractive in design and, in addition to the well-known Victor trade-mark, carries the name and address of the company. It has a metallic finish, and represents dull brass in appearance. The company states that it will be glad to send a sample of the label to other dealers on request.

CREDITORS TO MEET

A meeting of the creditors of the W. K. Cowan Furniture Co., bankrupt, Chicago, will be held on April 15 in Room 907, Monadnock Block, 53 West Jackson boulevard, when creditors may examine the bankrupt, file their claims and transact other business in like order.

ENJOY VISITS TO THE MEISSELBACH AND DEAN FACTORIES

The Resources of These Establishments and the Methods of Manufacturing the Various Products Enlighten Branch Managers of Otto Heineman Phonograph Supply Co. During Recent Visit

When the branch managers of the Otto Heineman Phonograph Supply Co., Inc., visited New York recently for their annual conference, one of the most enjoyable trips during this conference was a visit to the factories of the company's Meisselbach division at Newark, N. J. One day was spent at this plant, and the visiting managers were greatly impressed with the efficiency which characterizes every department of the Meisselbach factories. They marveled at the new machinery which was recently installed, and, after going through the factory from garret to cellar, stated that they now readily understood how the Meisselbach motor had gained its fame and prestige in the phonograph industry.

A. F. Meisselbach, head of the Meisselbach division of the Otto Heineman Phonograph Supply Co. and vice-president of the company, is a pioneer in the motor manufacturing industry, and his intimate knowledge of every detail of motor production has enabled him to place his motor in the front ranks of the industry's products. Mr. Meisselbach is ably assisted by Pliny Catucci, who is recognized throughout the trade as possessing a technical knowledge of motor construction that is second to none. He has developed and perfected many important improvements that have contributed materially to the success of the Meisselbach motor.

A. F. Meisselbach & Bro. started in business thirty-five years ago as manufacturers of fishing reels, and a few years ago placed the Meisselbach motor on the market. From the moment it was introduced this motor won the approval of the manufacturers, and this factory has been

arms, and sound boxes have won new laurels in the talking machine industry.

how Dean steel needles are manufactured. They quickly recognized the fact that, there are many intricate processes connected with steel needle production that are hardly appreciated by the talking machine industry as a whole, and under the guidance of Chas. E. Dean and John M. Dean, Jr., inspected every department of the

Plant of the Meisselbach Division of the Otto Heineman Phonograph Supply Co., Newark, N. J.

During their stay in New York the branch managers of the Otto Heineman Co. also spent a day at the factories of the company's Dean plant. The Dean division of the Otto Heineman Co., although the "baby" of the organization, is becoming more important day by day,

TALKER MEN HAVE LIVELY TIME

Talking Machine Men, Inc., Cast Tie Vote on Question of Barring Jobbers From Active Membership—Other Questions Taken Up

The feature of the regular monthly meeting of the Talking Machine Men, Inc., held in the rooms of the Merchants' Association in the Woolworth Building on Wednesday, March 20, was the discussion and vote on the amendment to the by-laws recently introduced and designed to confine active membership in the organization to retail dealers exclusively and place jobbers and wholesalers in the class of associate members.

J. Newcomb Blackman, who is president of the National Association of Talking Machine Jobbers, made a strong talk in favor of the amendment and gave some excellent reasons for making the change. Henry Mielke and others also spoke in favor of the measure. Those opposed to making the change in the by-laws included Irwin Kurtz, A. H. Mayers and Max Landay. Several votes were taken on the question, but the final result was a tie, and it was decided to postpone the final decision until the next meeting, when all members will be notified to attend for that special purpose.

Various other committees, including that on membership, and the one entrusted with securing a general agreement to charge 6 per cent. interest on instalment contracts, reported progress.

J. H. Mayers, chairman of the nominating committee, presented the following slate for the coming year, which will be voted on later: J. T. Coughlin, for president; Sol Lazarus, vice-president, New York; A. H. Tusting, vice-president, New Jersey; A. B. Clinton, vice-president, Connecticut; E. Leins, financial secretary, and A. Galuchie, treasurer. Irwin Kurtz was nominated recording secretary but declined and the nomination was left open.

It was felt by the majority of the jobbers, as well as a number of the dealers, that to obtain the best results each branch should have its own association, and that the membership in the Talking Machine Men, Inc., should be confined exclusively to retailers, as planned originally. The wholesalers were of the opinion that they could still give the retailers the benefit of their advice when desired, and of their cooperation through the holding of associate memberships in the association.

The opposition centered largely around the claims of Max Landay, of Landay Bros., who has done excellent work in developing the membership of the association and strengthening its treasury, that to bar him as a jobber from active membership, would be to curtail his usefulness to the organization.

The sacrifices we are exacting of the noble American boys who are going to the bloody fields of France for the lives and liberty of us who stay at home call to us with an irresistible appeal to support them with our most earnest efforts in the work we must do at home.—Secretary McAdoo. Buy Liberty Bonds.

DEVELOPED MAIL ORDER TRADE

J. A. Sandee, of the Victrola Department of L. S. Donaldson Co., Minneapolis, Tells of Plans of Procedure in This Connection

MINNEAPOLIS, MINN., April 3.—J. A. Sandee, manager of the Victrola department in the big department store of L. S. Donaldson Co., this city, has methods of doing business that should interest talking machine dealers generally, inasmuch as they have proven successful. Mr. Sandee came to Minneapolis something like a year ago from Milwaukee, and, although the Donaldson department was supposed to be on a very profitable basis at that time, he made it yield still greater returns.

The big end of the increased sales Mr. Sandee attributes to the mail order department which he has cultivated most assiduously while the approval system for records has been of substantial help in building up the business. The house issues twice each year a big mail order catalog in which Mr. Sandee is allotted two pages; one he devotes to records and the other to machines, and on both he has planted the most compelling advertisements he is able to produce. They are pulling the business, the approval feature for records having proven most successful. The approval plan also is operated in the city, but not to as great dimensions as in the country.

In the city the delivery wagons leave records as indicated by approval customers. These are allowed twenty-four hours in which to make se-

lections and must then deliver the records or the equivalent in cash to the delivery wagon drivers, who cover the entire city and have regular routes. Rural patrons are permitted forty-eight hours within which to make returns.

All approval customers are listed in a card index. On the respective cards are enumerated the catalog numbers of the records requested in black ink and the numbers of the records taken later appear in green ink. A hasty glance at the card discloses at a glance whether the customer is a "live" one, that is to say, an actual buyer, or a "dead" one. The latter soon are eliminated, if they refuse to heed a gentle reminder that the Donaldson Co. is not operating its approval system solely for the amusement of people. From 12,000 to 14,000 records are kept in stock.

Manager Sandee makes excellent use of the appearance of phonograph stars in Minneapolis by striking advertisements and in other ways. Harry Lauder on a recent visit to Minneapolis was the guest of the Donaldson Co. at the store for an entire day and made a big hit. Galli-Curci and Evan Williams records were featured when those distinguished artists visited Minneapolis.

Says an experienced salesman: The great factor in selling is the human factor, and not the things we sell. The things must be right, of course; but it's people who buy and use the things, and therefore it's people whom we must interest and deal with in getting rid of things.

PENNINGTON ON WESTERN TRIP

Assistant General Sales Manager of Columbia Co. to Visit Company's Branches

Frank K. Pennington, assistant general sales manager of the Columbia Graphophone Co., left Wednesday night for a trip to the Columbia branches in Pittsburgh, Cincinnati, Cleveland and Detroit.

Before leaving for the West Mr. Pennington commented upon the fact that the Columbia Co. closed in March the biggest month in the history of its business. This record is remarkable in many respects, and indicates the wonderful strides which the Columbia Co. has made during the past year. April has also started in as a record-breaker, and it is quite possible that this month will outdistance the figures for March.

BRICK BROS. MERGE STORES

Leon & M. B. Brick, proprietors of Brick's Music House, Brooklyn, N. Y., successful dealers in talking machines, music kodaks, etc., have merged their two stores, formerly located at 1808 Pitkin avenue and 1743 St. John's place, and moved the entire stock of both stores to elaborate new quarters at 1803 Pitkin avenue. Formal opening of the new store was held on April 6.

ONE OF DETROIT'S PROGRESSIVE TALKING MACHINE STORES

DETROIT, MICH., April 6.—Under the heading of "The Store Within a Store," there recently appeared in the Michigan Druggist, a magazine for the retail druggist, a very interesting article in connection with the Pathéphone salesrooms in the general offices of Williams, Davis, Brooks

an impression that will please and last. Even the 'stars' hang on the walls.

"Especially interesting is the view of the show windows from the 'street.' They are dressed in the latest approved displays which are made from cut-outs and panels furnished by the pho-

General Offices 711 MILWAUKEE AVENUE CHICAGO
Southern Wholesale Branch 1530 CANDLER BLDG. ATLANTA, GA.

Interior and Facade of Pathéphone Salesroom in the General Offices of Williams, Davis, Brooks & Hinchman Sons, Detroit

nograph manufacturers, some standard fixtures and a few records taken from stock. The illustration, which is greatly reduced, conveys but little of the real 'sales-ability' of the displays which were arranged with much thought and care.

"The 'store within a store,' besides being an admirable model in every detail, makes a convenient salesroom for Williams, Davis, Brooks & Hinchman Sons, as it is pleasantly isolated in their large general offices.

"Williams, Davis, Brooks & Hinchman Sons is perhaps the oldest firm handling phonographs, having been established in 1819. The company, however, has been in the phonograph jobbing business about two years. In this time they have twice enlarged their record stock floors to meet the requirements of a rapidly growing business."

L. N. Bloom, Edison jobber at Cleveland, drove to Orange last week to personally deliver the new Marmon car purchased by C. H. Wilson, vice-president and general manager of Thomas A. Edison, Inc. Mr. Bloom reported bad roads in places and made the trip in remarkably short time considering the period of the year.

& Hinchman Sons, of this city. This well-known concern is the Michigan jobber for the products of the Pathé Frères Phonograph Co., and has succeeded in developing a splendid dealer representation for these products. The firm was established in 1819, and is therefore one of the oldest firms in the country handling talking machines. The article reads:

"The phonograph dealer who visits Williams, Davis, Brooks & Hinchman Sons, Michigan agents for Pathéphones, finds in their office a 'store within a store.' This store within a store, as illustrated by the above photographs, is like hundreds of phonograph shops on the main streets of New York, Chicago, Detroit and other large and small cities.

"In this store, which is of the usual dimensions, is a demonstrating booth with the familiar ventilators; several phonographs in an interesting arrangement—set at various angles, here a lid lifted or doors open—all planned to make

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

The Economic Position of the Gramophone Industry Interestingly Analyzed—Displaying Enemy Manufactured Goods for Information and Emulation Where Necessary—The Labor Situation—War Needs Dominating Everything—Records Continue to Go Up in Price—Murdoch Trading Co., Ltd., Rehabilitated After the Fire—Winner's Record Exchange Scheme—Talking Machine Society News—Granados Dances Recorded—Records by Clara Butt—J. H. Pease's Enterprise—The Apprenticeship System Being Revived—All the News From England Interestingly Presented

signs already point to a severe British handicap, not on production capacity, as so much on the question of prices, whatever the terms of peace may be. The claims of labor are growing somewhat exorbitant, and the enormous wages now paid reflect the standard which is already on the cards as a post-war demand. There are many other prospective factors, but none the less real, which British commerce must face. Enterprise and new developments are thereby restricted. The German workman will put in longer hours at a less wage than the British workman, and with the additional aid of Government support in the way of subsidies, continental concerns possess a flying start on their competitors. Face the position frankly; look both ways, and we shall be able better to appreciate where our prospects of commercial growth commence and end. One is moved to the expression of such thoughts by the continual reproaches leveled at the heads of British manufacturers for their alleged inability to study local conditions in the different world markets. There may be something in it, but not to the great extent the newspaper scribes would have us believe. Let us have done with the persistent adjurations to prepare for the war after the war; let's get the real war over first, and then act instead of talking. The Government is doing all that need be at the moment, by arranging exhibitions of enemy manufactured goods from all parts of the world. One such display has recently been opened at the Department of Overseas Trade, 73 Basinghall street, London, where some 10,000 samples of German and Austrian goods are on view. Eighty different world markets are represented. It should be of the greatest possible service to

British firms, as showing in which branches of trade the Germans excelled, and the demands of the markets to which they sent their goods. To meet these indicated trade openings every effort will doubtless be made, but we must not run away with the idea of attaining immediate success. There are too many insurmountable difficulties in the way, which cannot be overcome while the war is on. As an instance to manufacture one line of goods in which the Germans previously excelled, one British firm put down plant no less than four times, but on each occasion it has been commandeered by the Government for war output. It is now almost an impossibility to obtain sanction for the installation of plant for other than actual war work, and as all suitable factories are fully utilized, it will be seen that the prospects of capturing enemy trade is not so bright as to justify so much discussion as is gratuitously leveled at British enterprise. In this connection, the talking machine trade is a typical example. Before the war our markets were controlled by enemy and neutral manufacturers, particularly as regards motors. Where are the British motors to-day, after three and one-half years of freedom from enemy imports? Their absence is not due to lack of ability to make them. It is due solely to lack of facilities, and until the war is over these facilities will not be available. By then, however, the British motor will soon make its appearance. Meanwhile, let us have done with so much talk. Let us get on with the humanitarian task ahead and get the war over!

"His Master's Voice" Records of Pamela

The popular musical comedy "Pamela," now

(Continued on page 116)

LONDON, ENGLAND, E. C., March 30.—The future economic position of the British gramophone and record industry, as with other trades, is a matter in which we all are interested. During the last decade statistics have enlightened us regarding the rapid growth of continental exports to all parts of the world, and particularly so in the case of Germany. In the latter instance, the percentage of increased returns in almost every department of commerce, has given our manufacturers, and indeed, the British Government, reason to think. There is much to ponder over. While I need not at any great length enter upon a disquisition as to the reasons why British world trading has proportionately declined in comparison with German attainments, one cannot balk the fact that continental methods and adaptability have proved superior to the British system in the race for commercial eminence. Consideration must also be given to the important difference between the two systems as regards labor conditions and fiscal policies. I am not going to commit myself to any definite prognostication, but the

This intensely human picture stands for all that is best in music

—it is the "His Master's Voice" trade-mark, and it brings to you, no matter where you are, the very best music of every kind, sung and played by the world's greatest artists—the greatest singers, pianists, violinists, orchestras and bands—all enshrined in the unequalled "His Master's Voice" records

FROM OUR LONDON HEADQUARTERS—(Continued from page 115)

being played at the Palace Theatre, is rich in pretty songs and love melodies, a combination of fun and sentiment. The part of fair Pamela is charmingly undertaken by Miss Lily Elsie, whose beautiful voice has been faithfully "caught" by the "His Master's Voice" in a series of solo and duet records (with Owen Nares), comprising the hits of the piece. All the vocal numbers are accompanied by the Palace Theatre Orchestra, conducted by Herman Finck. On a splendid twelve-inch double we have a potpourri of the songs charmingly recorded by the Mayfair Orchestra. The music by Frederic Norton is throughout of that quality, which quickly attains the standard of popularity that greets one here, there, and everywhere. These "Pamela" records bid fair to reach great sales, and the trade is therefore ordering heavily.

Another Record Increases in Price

As I foretold when the comparatively recent increase in the price of eighteen-penny discs was announced, it has come about that other record makers are falling into line on the question of price. Messrs. Pathé Frères have held out as long as possible, as much for political reasons as any, I imagine. Outside a few insignificant makes, records of all grades have been affected by war-time circumstances, necessitating an alteration in price. The enormously increased cost of materials, labor, transit and other charges since the war blazed out in August, 1914, has either meant increased prices for records, or bankruptcy. Manufacturers loyally refrained from making any alteration until compelled by these conditions so to do, and even now I venture to think that the 33 $\frac{1}{3}$ % average price increases agreed upon will have to be revised in alignment with the still expanding cost of manufacture, before the war is over. The manufacturer's profit is cut to a minimum. Record buyers are, generally speaking, earning exceptionally good money, and it would be no hardship to them if they had to pay a little more for the splendid quality records now issued. Output facilities are short of the demand, and increased prices would ease the situation to the advantage of the trade generally.

A Continuous Record Exchange Scheme

It has ever been a thorny question as to the best way of insuring to every dealer an up-to-date stock. Some records get broken, some become second-hand by reason of shop use, while others take up more or less permanent lodgings with the dealer, for somehow or other their sales are too few and far between to warrant house room. These three classes of records represent scrap, which may now be exchanged under a system recently devised by the Winner Record Co. for new records. The scheme is based upon a continuous exchange in force all the year round, except during the busy months of November, December and January. By this system dealers can at any time make a clearance of their scrap records for new "Winners"

at the rate of six to one. All makes of records, except two or three specified, are accepted as scrap, and on a minimum consignment of six dozen, the Winner people pay carriage both ways. Dealers who agree to the terms are offered a guarantee that the company will not vary the exchange terms, notwithstanding the upward tendency of prices, for a period of two years, subject to three months' notice being given in writing. There are various minor qualifications, and all interested are invited to write the Winner Co. for exact particulars.

As between dealer and manufacturer there is a mutual value in this exchange scheme. The company secure a goodly supply of material, of which there is a shortage, in addition to the obvious publicity advantages. On the dealer's side is the important consideration of always having fresh up-to-date stock by the acquisition of new current titles for broken or otherwise unsalable records. It is therefore a business scheme which, as such, benefits equally all parties subscribing thereto. On these grounds there can be no hesitation in recommending the retailer to investigate the merits of this offer, which, I think, can be accepted on its face value as a good proposition for both sides.

Proposed Revival of Apprenticeship System

This subject, which had become a strongly advocated one generally before the war, is again arousing interest in certain trade quarters, though it is realized that no substantial revival can take place until after the declaration of peace. Upon the occasion of a recent address, Lord Leverhulme, who, by the way, himself served an apprenticeship, said:

"We welcome the proposed revival and strengthening of the ancient apprentice system. There is no doubt that the individual training given by the father or master with expert knowledge was far more to them than any other experience they had. What is most valuable in this system is the individual human touch. We were becoming far too mechanical. Businesses in every direction were getting larger, and the shopman might never see the manager."

Some few years ago the writer took an active part in developing the old apprenticeship system. It was found that employers, especially those of the arts and crafts school, were eager to sign indentures of apprenticeship with suitable boys, often without a premium, but were in later years somewhat reluctant to bind themselves, owing to the failure of the courts to strongly uphold the agreement when, as not infrequently happened, the apprentice broke away for a more immediately lucrative blind-alley occupation.

To-day, the system is more or less a dead letter, though, owing to the general scarcity of labor, employers are only too willing to teach their trade to women. And the women have come forward splendidly. They have shown an aptitude which has quickly won an undreamt-of success, in trades previously thought to re-

quire years of tuition to insure proficiency. May the good work go on, as much in the interests of the gramophone, as of other industries, until our warriors are ready to discard the sword in favor of their old-time associations.

Smart Reorganization After Disastrous Fire

Notwithstanding the loss of their Farringdon road premises and the whole of the valuable stock by fire, as reported a few issues ago, the Murdoch Trading Co., Ltd. (now incorporated with J. & G. Murdoch, Ltd.), have already got things in fine working order at their new location, 59 Clerkenwell road, London, E. C., and are replenishing as fast as possible new stocks of gramophones and records and other musical instruments. In certain lines and parts there will naturally be a shortage for some little time, owing to the great difficulty of manufacture, but dealers may continue to rely upon a good service from this enterprising firm.

A Reputation Regained: Old Offense Wiped Out

How a musical instrument trader regained his good name and was restored to his rank is told in a brief announcement in a recent issue of the London Gazette, as follows:

"The permission granted to Lieutenant-Colonel and Hon. Colonel Thomas James Stockall (now known as Thomas James) to retain his rank and to wear the prescribed uniform on retirement, also the award of the Volunteer Officers' Decoration, which were canceled in the London Gazette on November 16, 1909, are hereby restored. Never mind what was his offense; it is a thing of the past and rightly belongs thereto, in view of his Royal pardon, upon which all having knowledge of the past incident, will heartily congratulate the gallant Colonel."

On the outbreak of war Colonel Stockall unsuccessfully offered his services to the war office, and upon attempting to enlist in the ordinary way was rejected on account of age. He eventually took a position as civilian clerk in the army pay corps under an assumed name. The happy sequel was the grant of a free pardon from the King. Good luck, prosperity and long life to Colonel Stockall

The Elman String Quartet

An outstanding record of merit on the "His Master's Voice" March supplementary list is No. 08056 Quartet in G major, Adante (C. Von Dittersdorf) by the Elman String Quartet, comprising Mischa Elman and Messrs. Bak, Rissland and Nagel, of the Boston Symphony Orchestra. This attractive melody is rendered in a manner which bespeaks a true sympathy be-

tween the players, each instrument blending in a rich volume of sound and perfect ensemble, controlled by the great violinist, Mischa Elman. Of the recording itself one need only say that the "H. M. V." musical director is a master.

Memos From "The Voice"

Home on leave, Corporal Stewart Gardner was a recent visitor to "His Master's Voice" factory. He took the opportunity of recording several songs.

Congratulations to Lieutenant Toplis Green on winning the military cross for a brave action at the front!

A Musical Box on Records

A refreshing novelty, with a charm all its own because it brings back memories of former days, will be found in William Murdoch's Columbia record this month of Laidow's "Musical Box."

Historical Notes as Aid to Advertising

Most advertisers commence their advertisements with a mention of the goods they have to sell. For displayed advertisements that is perhaps the best method. But there are other forms of publicity, and particularly effective is the editorial style adopted by Thos. Edens Osborne, the Belfast gramophone factor, who centers the interest of his readers by an initial chat regarding Belfast history. The "Historical Notes" series is running in all the chief local newspapers. Easily coupled up with an introduction along these lines is the advertisement offer, and I should imagine it is a profitable style to adopt; it is certainly commendable.

The Talking Machine Society Movement

Society news is now a regular feature of the various British gramophone journals, which allocate each month a liberal amount of space to the doings of these associations. Notwithstanding that many members are now engaged in more warlike pursuits, the movement is as vigorous as ever. Occasionally we hear that some new society is in process of formation at this or that town, the object being to promote the development of music generally, and of the gramophone or phonograph in particular. As a result of these informal gatherings, where discussions take place anent the relative values of different makes of records, helpful criticism and suggestions for the betterment of mechanical

music often emanate to the advantage of record manufacturers, who are not adverse to trying out any suggestion likely to prove of value.

The societies are composed of enthusiasts, each of whom in turn takes over the responsibility of the weekly-night entertainment. This is usually in the form of a carefully-chosen program, interspersed with studiously critical comments, both instructive and highly interesting. Each member is nothing less than a walking advertisement for the gramophone, and as such deserves every encouragement.

Much Illness Prevalent

The changeable weather conditions recently experienced, combined with the extra strain placed upon all by wartime circumstances, has resulted in much illness, the talking machine community being no exception. The tendency is to carry on at all costs, owing to scarcity of stuff, and early symptoms of illness which in the ordinary way would justify a rest, are neglected. It is perhaps an unwise policy in the long run, for in many cases a serious breakdown sooner or later is in consequence unavoidable. A number of leading gramophone men in this way have been compelled to rest awhile, though in a few cases illness has supervened. Among others, I learn that Mr. Gilberg, of W. H. Reynolds, Ltd., who has been laid up for some time, is now well on the road to convalescence. It is to be hoped he will soon be in harness again.

Employment of Aliens Controlled

By an order in council the provisions of the Aliens Restriction (Consolidation) Order, 1916, is extended to provide that as from March 1 a male alien between the ages of eighteen and sixty-one may not undertake or perform work for an employer in certain scheduled occupations, unless permission in writing has been obtained by him from the Director-General of National Service. Aliens engaged upon such work prior to March 1 may continue without any such permission until notice to the contrary is sent or given to him and to his employer by the Director-General. Employers are required to have regard to the provisions of this order in employing aliens. A list of occupations and trades classified is given, but in the usual official way, so that it is not quite clear whether the gramophone trade is affected. I should be inclined to think it is, as coming under the item of "miscellaneous manufactures," or "miscellaneous occupations." Anyway, to be on the safe side, British firms should obtain a ruling from the Director-General of National Service.

Granados' Spanish Dances

Probably no single orchestral record of the kind has ever attained so immediate a success as has met the Columbia record of the first two of Granados' five Spanish dances, played by Sir Henry J. Wood's Orchestra. Sympathy with the ill-fated composer, who lost his life at the hands of the Germans, probably played some part in this, but, over all, the merit of the enchanting music itself, and the remarkable per-

formance of Sir Henry J. Wood's musicians, must have met with their reward.

"The Old Folks at Home," by Clara Butt

There are songs of which the world will never weary—songs, that hackneyed though they may be, seem to clutch at the heartstrings and fill the air with memories. And there are singers—but not many—who can infuse those songs with a life that makes them throb in our very ears. Such a song is "The Old Folks at Home"—such a singer, Madame Clara Butt. Once more, a perfect Columbia record by the divinely-gifted contralto who seems to have sung her soul itself into it. Indeed, she declares it to be the finest record of her voice yet made.

A Dealer's Wartime Enterprise

A retailer of the "push and go" order is J. H. Pease, of Southend and Leigh. Nowadays most dealers are on the defensive, which, circumstances considered, is not altogether a matter for criticism. Offensive tactics though usually prove the more successful way of conducting a business, as witness the bold move recently made by Mr. Pease in opening up additional showrooms in Southend. The business has been formed into a private limited liability company under the style of J. H. Pease (Southend), Ltd., and, following this, certain developments have taken place. The whole concern has been reorganized, and, with the addition of the new premises mentioned, Mr. Pease will undoubtedly enhance his already splendid local reputation for prompt and up-to-date service. In addition to most musical instruments, all the chief makes of records are stocked as fully as is possible these days, and it is seldom a customer cannot get the titles he wants.

WORLD'S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "Situation" advertisement intended for this Department to occupy a space of four lines, agate measure, and it will be inserted free. Replies will also be forwarded without cost. Additional space will be at the rate of 25c. per line. If bold faced type is desired the cost of same will be 25c. per line.

WANT to meet a talking machine man or a business man who would like to enter the talking machine business; one who has a large business acquaintance to help finance and assist an established, growing manufacturing business. We have the best patented sound box and tone arm on the market, and have been in business since 1912. We want to branch out, and have a splendid, paying proposition for the right man. All details gladly furnished to responsible parties. Address "Box 516," care The Talking Machine World, 373 Fourth Ave., New York.

SALESMEN WANTED—Salesmen calling on the music and phonograph trade. We are offering a side-line that will double your income by calling on one or two people in each town. No samples to carry. Article very much in demand. In answering please state territory you are now covering. Address Morton J. Ross Music Co., 54 West Lake St., Chicago, Ill.

WANTED—High-class Victrola salesman. We have a permanent position with exceptional opportunities for a young man of ability and ambition. Must be clean cut, of unquestioned habits, capable and willing to work. City and climate the finest in the world to live and work in. Answer with full particulars, references and salary expected. Address Thearle Music Co., 640 Broadway, San Diego, Cal.

WANTED—Young man with ten thousand dollars cash that has had experience in the phonograph business to take half interest and the management of an Edison disc and cylinder business established ten years, in a city of two hundred and fifty thousand in the northwestern part of Ohio. Ten thousand dollars in good accounts and about ten thousand dollars in new stock and fixtures. Excellent opportunity for an active man. Address "Box 508," The Talking Machine World, 373 Fourth Ave., New York.

AN OPPORTUNITY FOR EXPERIENCE AND CAPITAL—The war opens an opportunity to join a firmly established organization for a man with actual and thorough experience in the manufacture, marketing or financing of a high grade phonograph or records. Only a man whose past record shows results accomplished; who is resourceful and aggressive and possesses initiative and who is willing to back these qualities with capital will meet the requirements. Your first letter must contain the proof and complete information. Address "Box 509," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—A reliable salesman well acquainted with wholesale and retail trade, to introduce an article used in the phonograph line. Gives more value for the money than others. Costs less. Apply stating experience, firms worked for, salary or commission, etc. Address "Box 510," care The Talking Machine World, 373 Fourth Ave., New York.

TO THE TRADE—Dealer has stock of records which he will close out in 100 lots for cost. First answers will be first served. Address Jos. Dumas, 54 West Lake St., Chicago, Ill.

WANTED—Exclusive Victor agency, city or nearby town. Price no object. Address "Box 511," care The Talking Machine World, 373 Fourth Ave., New York.

SALESMEN wanted on a commission basis to sell popular priced talking machines. Only those capable to show results need apply. Address R. L. Kenyon Mfg. Co., Inc., 220 Fifth Ave., New York.

TO COMBINE Retail Phonograph Stores

Business established 15 years, possessing many valuable contracts and exclusive rights, in one of the most desirable locations in Massachusetts. Is rapidly growing and is now doing considerably over \$100,000 business. Owner has many money-making ideas, and would like to combine with individual or individuals, preferably those in same or kindred lines. No triflers or curiosity seekers need apply, and only those possessing either capital or resources of \$10,000 and above should answer this advertisement. Negotiations are to be treated in strictest confidence.

Address Box 507, c/o The
Talking Machine World,
373 Fourth Ave., N. Y. City.

EXPERT FINISHERS WANTED—We can use a number of coarse rubbers, oilers and patchers on phonograph cabinets at once. Our men in this department of our factory are earning \$4 to \$5 per day. Address Brunswick-Balke-Collender Co., 629 South Wabash Ave., Chicago, Ill.

WANTED—By a firm in Canada an expert phonograph mechanic, one who thoroughly understands the assembling, adjustment and repairing of motors and sound boxes. Address "Box 512," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—An experienced lateral cut recorder for New York record manufacturing plant. Splendid proposition and permanent position for A1 man. Address "Box 513," care The Talking Machine World, 373 Fourth Ave., New York.

JOBBERS and salesmen wanted to handle high-class line of phonograph on commission basis. Exclusive territory can be arranged. These instruments are attractive in design and absolutely trouble proof. Retail from \$50 to \$215 in six models. Applicants must be in position to purchase own samples. We will carry acceptable accounts in any amount. Write, giving full particulars. Address "Box H. P. S. No. 65," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED SPECIAL REPRESENTATIVES—Paramount records are now ready for the trade. An attractive proposition is open for several good salesmen in various parts of the country. Strictly commission basis. If interested send photo of yourself, give your employer, territory you cover and how often. Also any other information that you think fits you to handle the Paramount record. Address The New York Recording Laboratories, Inc., Port Washington, Wis.

SITUATION WANTED—Thoroughly reliable young man wishes to make connections with responsible firm in the capacity of assistant traffic man, or shipping clerk, where there is a chance for advancement. Has had several years of practical experience in this line, much of which was in Chicago talking machine trade, and can furnish the best of reference. Is prepared to go to any point for interview. Address "M. R. 30," care The Talking Machine World, 209 South State St., Chicago, Ill.

POSITION WANTED—Mechanic with 15 years' experience constructing and repairing phonographs of all makes, part of years with Victrola line, with one of the largest music houses in this country desires to make a change. Capable executive, thoroughly efficient with modern methods. Can furnish the very best of references. Address "Box 514," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Talking machine salesman, five years' experience. Inside position large city preferred. Familiar with all well known machines. References. Address "A. P. 2," Talking Machine World, 209 So. State St., Chicago, Ill.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., April 8.—TALKING MACHINE.—Emile Pathe, Paris, France, assignor to the Pathé Frères Phonograph Co., New York. Patent No. 1,251,565.

Some of the objects of this invention are to provide in a talking machine improved means for supporting a sound box arm; to provide in a talking machine an improved sound box arm.

In the accompanying drawings, Figure 1 is a fragmentary top plan view of a talking machine constructed in accordance with this invention; Fig. 2 a fragmentary front elevation of the same; Fig. 3 a fragmentary side elevation of the same; Fig. 4 a fragmentary horizontal section on line 4—4 of Fig. 2; Fig. 5 a fragmentary section on line 5—5 of Fig. 1; Fig. 6 a fragmentary top plan view of a modified form of sound box arm constructed in accordance with this invention; and Figs. 7 and 8 are a fragmentary side elevation and a fragmentary rear elevation respectively of a modified form of sound box arm constructed in accordance with this invention.

the connection between the sound pipes and the amplifying chamber. Fig. 3 is a horizontal section on line 3—3, Fig. 2, and Fig. 4 is a plan view of a cabinet cylindrical in form.

SOUND REPRODUCING MACHINE.—Anton H. Rintelman, Chicago, Ill. Patent No. 1,252,843.

This invention is concerned with the styli and their supporting mechanism used in sound reproducing machines, and is designed to produce such styli and to support them as to produce the very best possible reproduction of the tones recorded, thus enabling the varying of the loudness of said tones at will.

To this end, a novel needle or stylus has been devised, preferably with a plurality of points to adapt it for the different types of this record, such as the zigzag Columbia and Victor records and the hill and dale Edison and Pathé records, together with a holder therefor, which enables one to easily position the needle perfectly relative to the groove in the disc, and also to regulate within a very wide degree the loudness of the tone produced by the single needle, without impairing the quality thereof.

Figure 1 is a side elevation of a sound box and a part of a tone arm having the invention applied thereto. Fig. 2 is a central longitudinal section, on an enlarged scale, through the needle holder in a plane parallel to the face of the

diaphragm. Fig. 3 is a similar view, but with the needle adjusted for a lighter tone. Fig. 4 is a cross section, on a still larger scale, on the line 4—4 of Fig. 2. Fig. 5 is an end view of the needle detached, on the same scale as it appears in Fig. 4, and Figs. 6, 7 and 8 are side elevations of the needle as seen from three different sides.

SOUND MODIFIER FOR PHONOGRAPHS.—Peter McAllister Maccaskie, Hot Springs, Alaska. Patent No. 1,253,407.

This invention relates to phonograph sound boxes and particularly to means for regulating or modifying and thereby improving the tone of a phonograph without the necessity of changing the needles.

The general object of the invention is the provision of a device of this character which is adapted to be detachably mounted upon any ordinary sound box and be therefore applicable to a large number of different phonographs.

A further object of the invention is to provide a device of this character which has a tone modifying element which may be applied to the stylus arm or lever at various points there along so as to dampen, modify or soften the vi-

brations of the diaphragm and thus achieve the same object as is achieved by changing the needles or styli from hard needles to medium and soft needles.

A further object of the invention in this connection is to provide a dampening or modifying member composed of a combination of different substances disposed in such relation to each other that the modifying member may be shifted to bring any one of the different substances into engagement with a stylus arm, to thus variously modify the action of the stylus arm.

A further object of the invention is to provide means whereby the tone modifying element may be pressed with greater or less force against the stylus arm.

Still another object is to provide a shifting tone modifying element, shiftable not only into various positions relative to the stylus arm itself, but also into various positions with relation to the diaphragm.

This invention is illustrated in the accompanying drawings, wherein: Figure 1 is a face view

of the sound box provided with attachment; Fig. 2 is a side view of the sound box provided with attachment, the cross bar 14 being in section; and Fig. 3 is a perspective view of the sound modifying member and rod 16.

CENTERING MEANS FOR PHONOGRAPH RECORDS.—Bertram M. Hansen, San Francisco, Cal. Patent No. 1,253,374.

This invention relates to improved center bearings for phonographic records and the like wherein the aperture is brought concentric with the approximately concentric sound convolutions; and the objects of the invention are:

First, to provide an improved central bearing for phonographic records and the like that shall be adapted to resist wear and thereby prevent the enlargement of the record aperture whereby the alinement of the sound convolutions to the axis of rotation may be preserved.

Second, to provide an improved central bearing or centering means whereby the central aperture of the record may be alined or arranged approximately concentric with the sound convolutions of the record.

Third, to provide improved means adapted to reduce the frictional engagement of a reproducing needle with the record and thereby improve the harmony of the selection being rendered.

Fourth, to provide improved means whereby the wear on the sound or impression convolutions or grooves may be eliminated.

Figure 1 is a plan view of a phonographic record disclosing the invention applied thereto.

Fig. 2 is an enlarged broken transverse sectional view of a record disclosing more fully in detail the construction and arrangement of the invention.

TALKING MACHINE.—John A. Weser, New York, assignor to Weser Bros., same place. Patent No. 1,253,317.

This invention is concerned primarily with talking machines in which disc records are used to vibrate the reproducing diaphragm through the usual needle. For such machines there are, at present, two popular types of records on the

(Continued on page 120)

subject matter of Fig. 1. Fig. 3 is a central longitudinal sectional view of a form of amplifier embodying the invention. Fig. 4 is a similar view illustrating another form of amplifier. Fig. 5 is a detail view illustrating a means for giving the amplifier bias toward movement in one direction.

CABINET TALKING MACHINE.—Howard D. Darlington, Dayton, O. Patent No. 1,253,010.

This invention relates to cabinets for talking machines. An object thereof is to provide a cabinet of a novel construction in which sound pipes are utilized in connection with the amplifying chamber of the cabinet. Another object is to provide a cabinet which is made of metal.

Figure 1 is a perspective elevation of a cabinet embodying the invention. Fig. 2 is an enlarged longitudinal section thereof illustrating

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 119)

market, in one of which the groove for causing vibrations of the diaphragm is of a uniform depth with respect to the disc but has its sides of irregular outline to cause lateral movements of the needle therein as the groove is moved with respect thereto, while in the other type of disc the groove is of true spiral form with respect to the disc but is of irregular depth so as to impart vertical movements to the needle with respect to the disc as the record rotates. It has been proposed previously to provide a tone arm and sound box of such construction as to permit the use of the sound box with either of the above described types of records, it being understood, of course, that the direction of vibration of the needle must, at all times, be normal to the plane of the diaphragm. Such known devices, however, usually entail a complete modification of the usual type of tone arm and the construction thereof in several sections interconnected through pivotal joints which permit movement of the sound box through widely divergent planes. Such movement entails a displacement of the needle and the sound box through a very appreciable angle so that such known constructions not only involve the objections of expensiveness of manufacture and multiplicity of parts, but also those of bulkiness and awkwardness in adjustment. The principal object of the present invention is to overcome all of the objections enumerated above and so to construct the tone arm and the sound box and mount the same with respect to each other that the needle may be quickly and easily positioned with respect to the grooves of the particular type of disc to be played without moving the tone arm and without displacing the sound box bodily with respect to said arm. Another object of the invention is to make it possible to secure such adjustment without modifying appreciably the usual form of tone arm and by making the adjusting devices between the latter and the sound box of simple and inexpensive character. Still another object of the invention is to permit an adjustment of the character described without displacing the needle itself through an appreciable distance, the movement of the sound box with respect to the tone arm taking place about an axis which is nearly coincident with the axis of the needle. A further object is to improve the construction of tone arms for graphophones by providing a simple and effective pivotal joint therein whereby the outer end of the arm with the sound box may be readily swung in a vertical plane when the needle is lifted from the record.

In these drawings Figure 1 is a view, partly in vertical section and partly in elevation, of a tone arm and sound box embodying the invention, the range of movement of the tone arm

by reason of the improved joint therein being indicated in dotted lines. Fig. 2 is a view in plan of the devices illustrated in Fig. 1, part of the tone arm being broken away to show, in horizontal section, the improved joint. Fig. 3 is a fragmentary view indicating a portion of the tone arm and showing the sound box in a position at 90 degrees to that shown in Figs. 1 and 2 to permit the reproducing of vibrations caused by a laterally undulating groove. Fig. 4 is a view in side elevation showing the sound box illustrated in Figs. 1 and 2.

SOUND RECORDING AND REPRODUCING MACHINE.—David Frederick McGuire and Kenneth Douglas McGuire, Hornchurch, England. Patent No. 1,254,330.

This invention relates to sound recording and sound reproducing machines employing disc rec-

ords and of the type adapted both for the recording of sounds and for the reproduction of sounds thus recorded, the invention being principally adapted for domestic and office use.

The object of the present invention is to provide an improved form of machine of the above character in which the reproduction of the recorded sounds may be effected through the usual tone arm, sound chamber or amplifying horn without damage to the record, due to the fact that by reason of this inventor's construction the recording stylus or like member and the reproducing member both move across the face of the record in the same path instead of as is usual the one member moving in a rectilinear path and the other in a curved path.

The invention consists in a sound recording and sound reproducing machine comprising in combination a record supporting member, a tone arm, a member movable rectilinearly across the face of the record and means connecting the tone arm with this latter member but slidable upon said member.

The invention also comprises a sound recording and sound reproducing machine of the above character, having a carrier for the recorder and reproducer, rotatable about a vertical axis, so that either the recorder or reproducer may be moved into its operative position.

The accompanying drawings illustrate two modes of carrying out the invention: Figure 1 is a front elevation of one form of device in accordance with the invention when applying it

to an ordinary gramophone; Fig. 2 is a perspective view of the arrangement shown in Fig. 1; Figs. 3, 4 and 5 are views illustrating details; Fig. 6 is a view showing a modification in accordance with the invention; Fig. 7 is a side view of the arrangement shown in Fig. 6; and Fig. 8 is a fragmentary view of a portion of the device in Fig. 6; Figs. 9 and 10 are a side view and front view respectively of a detail shown in Fig. 2; Fig. 11 is a view showing a detail; while Fig. 12 is a view illustrating a modified form of reproducer.

SOUND BOX.—Henry C. Miller, Waterford, N. Y. Patent No. 1,254,425.

This invention relates to improvements in means for dispensing with individual needles in connection with sound reproducing machines, particularly where records having grooves provided with lateral undulations are employed.

The principal objects of the invention are to provide means for employing a continuous piece of thin wire to be used as a stylus, and gage the feeding of the latter to insure of the correct projection of the wire; to provide improved means for feeding the wire; and to provide safety means to prevent the sound box falling and destroying a record.

The use of a continuous wire for a stylus for sound reproducing machines is old in the art, numerous attempts having been made to operate the wire automatically, others semi-automatically, and still others being operated purely by guess. However, in all such structures known the details are so arranged that foreign sounds are produced, the same being necessarily conveyed to the amplifier and mingling with the reproduction. Furthermore, these foreign sounds cause a material loss of a number of the finer tones, and according to this invention these defects are materially over-

come by improving the construction.

In the use of a continuous wire employed as a stylus, it is of the utmost importance when feeding the wire that the latter be fed a predetermined distance, and to this end it is the purpose to provide a gage so arranged that when positioned in the path of the end of the wire, the latter will be limited, which always insures a uniform stylus. Then again when

the wire is to be fed the gage is so constructed that when it is in operative position the wire clamp will be simultaneously released to permit the feeding of the wire.

This invention also aims to provide simple and effective means for storing the wire, the same consisting of a magazine having frictional means for holding it in any position when properly set.

A number of records are destroyed by the sound box dropping, and to overcome this difficulty there is provided special means for holding the sound box in any position within a given range. This feature of the invention is so constructed as not to interfere with the free movement of the needle in the record grooves, the binding action between the parts taking place only after the sound box is slightly elevated from the record.

In the drawings: Figure 1 is a perspective view of the improvement. Fig. 2 is an enlarged detail view on the line x—x of Fig. 1. Fig. 3 is an enlarged view of a portion of the sound box and the magazine, the latter being in section. Fig. 4 is a central section taken through the sound box, the parts being separated. Fig. 5 is a perspective view of a part of the stylus lever, and the wire clamp, the parts being separated. Fig. 6 is a detail perspective view of the wire and the manner in which its end is held in the magazine. Fig. 7 is a detail perspective view of the means for preventing the sound box falling on the record. Fig. 8 is a detail view of the magazine friction clamp. Fig. 9 is a detail perspective view of a different form of the invention. Fig. 10 is a detail end view of the same. Fig. 11 is a detail perspective view of the parts shown in Figs. 9 and 10.

SOUND BOX.—Richard James Prettie, Jamaica, N. Y., assigned to the Aeolian Co., New York. Patent No. 1,253,527.

This invention relates to improvements in sound boxes, the features and advantages of which will be apparent to those skilled in the art from an understanding of the following description.

In the latter, Figure 1 is a face view of the sound box with a portion broken away; Fig. 2 is a section partly in elevation on the line 2—2 in Fig. 1 looking in the direction of the arrows;

Fig. 3 is an enlarged detail of Fig. 2. Fig. 4 is a section partly in plan through the line 4—4 in Fig. 3, and Fig. 5 is an enlarged view of the back of the stylus arm.

SELLING EDISON PHONOGRAPHS TO MINERS IN NEVADA

Mrs. C. W. Friend, who has been a very successful Edison dealer at Carson City, Nevada, was recently asked to whom she sells New Edisons. In reply Mrs. Friend wrote: "I am sending you a photograph given me by a pleased customer, and shows some of the people to

The owner of this instrument has already purchased seventy records, and there has been a good deal of comment on the class of music he selects for his miner friends back in the mountains. Think of those fellows listening to the Rigoletto Quartet, Chopin's Nocturne in E flat,

The New Edison Furnishing Music in the Wilds of Nevada

whom I am selling New Edisons. It is not only a great advertisement for the New Edison, but shows our beautiful Nevada scenery to advantage. I have found that a miner always buys the best money can buy and this sale was the most satisfactory sale I have ever made.

Meyerbeer's Cavatina and such things. Think of this sort of music floating up from a canvas tent up among the pines while miners in overalls listen attentively. They don't want ragtime. They want the best music the New Edison offers."

DEATH OF PHILIP WOHLSTETTER

Philip Wohlstetter, vice-president and general manager of the Imperial Talking Machine Co., New York, N. Y., and Wilmington, Del., died suddenly April 2 at his home in New York. Mr. Wohlstetter, who was forty-eight years old at the time of his death, was well known in talking machine circles throughout the country, having been identified with the industry for many years. He is survived by a widow and four children. Funeral services were held at his late home on the afternoon of April 4 and were largely attended.

PUBLISHES INTERESTING ARTICLE

Samuel Wein, who is well known in the talking machine industry as a technical expert, has recently published an interesting article entitled "Modern Photographic Developers," which has been issued as a practical hand book. Mr. Wein has contributed many articles to prominent magazines, and his present work in the laboratory of a well-known talking machine manufacturer may result in important technical discoveries.

NURSERY RHYMES WITH RECORDS

Volume of Children's Verse Issued, Containing Columbia Phonograph Records of the Same

If you were suddenly asked for a plan to make nursery rhymes sell phonograph records, or for a scheme to make valentines sell garden seeds, or to devise a method whereby candy and books would sell each other, the chances are you would be stumped, says "Printers' Ink." Yet if those interested in such a plan had a chance to think over the proposition for awhile no doubt they would be able to suggest several ways whereby one product would sell another that may be entirely foreign to it. Such plans are being worked right along. For instance, Harper & Brothers recently issued what they call a "Bubble Book." It contains, in illustrated verse, the stories of "Tom, Tom the Piper's Son," "Jack and Jill" and "Mary Had a Little Lamb." Three of the pages in the book are in the form of envelopes. In each of these is a special Columbia record, giving the singing version of these famous nursery rhymes, and which can be played on a phonograph. It is a unique combination of pictures, verses and

music. By listening to the songs a child can learn to read the book, and sing the verses.

Here we have an idea that induces the music store to handle nursery books—an item which formerly they would consider entirely out of their line. On the other hand, the plan gets phonograph records into book stores.

RECEIVING MANY REPEAT ORDERS

"Our new No. 1012 album is meeting with very pleasing success, and we have received numerous repeat orders from our dealers," said Philip A. Ravis, vice-president of the New York Album and Card Co., New York. "We were fortunate in securing additional factory facilities for the production of our albums, as the demand for the 1012 album has taxed our resources, even though our capacity has been considerably augmented. Our Nyacco metal back album continues to be the leader of our line, and judging from the orders already in hand for this album, this season will be an active one for the Nyacco metal back product. This album has many distinctive features, and the fact that it lies perfectly flat when opened is one of the reasons for its success."

The Highest Class Talking Machine in the World

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

THE most valuable asset of any manufacturer is the reputation his product has won.

Sonora is everywhere known as the *quality* phonograph—not the quantity phonograph, not the phonograph offering “terms” as the main sales feature, but the *value* instrument which the buyer is proud to own and which is shown to friends with the remark “I bought this phonograph because of its quality of tone and appearance.”

The owner’s pride of possession in a Sonora is a factor in Sonora’s increasing popularity.

In proportion to the total number of instruments on sale, more Sonoras are sold for cash than any other instrument. This is conducive to a higher bank balance for the Sonora dealer.

The Sonora sells easily, turns every buyer into a Sonora enthusiast, and makes money for the dealer. If you wish to sell Sonoras this year write us NOW for information.

LOVING CUP FOR MME. MELBA

Famous Diva, so Widely Known Through Her Records, Surprised at Her Concert by Gift From Leading Victor Dealers in Los Angeles

LOS ANGELES, CAL., May 1.—In recognition of the fact that she was the first great prima donna to give her art to the world through the medium of the Victor, Mme. Melba was presented with a silver loving cup by L. E. Behymer, the local impresario, during her concert at Trinity Auditorium on the evening of April 3.

The presentation was made on behalf of the Andrews Talking Machine Co., Barker Brothers, Wiley B. Allen, Geo. J. Birkel and Southern California Music Co., leading Victor dealers of this goahead city.

"I don't know what to say. I don't think I deserve this. Give them all my love. I shall

Mme. Melba and Cup Presented to Her

always keep this trophy among my most treasured possessions. I thank those who have given me this most heartily," said Mme. Melba.

In presenting the cup Mr. Behymer said that the Victor dealers of southern California recognized in Mme. Melba one of the greatest benefactors the talking machine knows, making possible the development and recognition of the talking machine as a musical instrument of the highest order, by her co-operation with the Victor Co.

The cup was an elaborate silver affair, presented just after she had finished singing Tosti's "Good-bye." The following inscription was engraved on the face: "To Mme. Nellie Melba, Dame Commander of the British Empire, the first great prima donna to give her art to the world through the medium of the 'Victrola.'" Then followed a list of the names of the dealers making the presentation.

TALKERS FOR COOLIES IN FRANCE

Records From America Help to Cheer Chinese Laborers Behind the Lines

Not only is the talking machine with its records a friend of the allied soldiers in the trenches on the Western front, and for that matter of the enemy soldiers, but it appears that even Chinese coolies, who are employed in large numbers back of the French front, are also strong admirers of that instrument. Talking machine records in the Chinese language and recordings of Chinese music have been sent to France from the United States, and proved the source of entertainment for the Chinese worker.

Knowing a dozen languages won't help unless you know how to make a living in one of them.

THE "TALKER" IN THE WAR

Samuel Gompers Pays Tribute to the Influence of the Talking Machine for Good in the Trenches in France as in the American Home

While in Cleveland recently to boost the sale of Liberty Bonds Samuel Gompers, president of the American Federation of Labor, paid a high tribute to music and musical instruments and the part they are playing in the world war. Mr. Gompers declared that the talking machine has made army camps and even the trench dug-outs "seem like home" to tens of thousands of American soldiers.

"The war is developing a love for music and talking machines are doing their part wonderfully well," said Mr. Gompers. "Through the agency of these instruments and records the boys who have given up homes and home environment are permitted to enjoy good music, to listen to the words of the world's great singers, orchestras and bands. The words of that wonderful song, 'Home, Sweet Home,' mean more than they ever did to all true Americans. Talking machines, player-pianos and other musical instruments are making 'home, sweet home' out of many a place that would be dreary if these musical instruments were not available. Like the movies, talking machines are great stimulants to back up our fighting men on sea and land, in training camps or back of the firing line in the war zone."

Douglas Fairbanks also paid a high tribute to the "good that talking machine music is doing during this war" while here. He appeared jointly with Mr. Gompers at the Keith Hippodrome and the Central Armory making appeals for bond buyers.

NEW DEPARTMENT IN ASBURY PARK

ASBURY PARK, N. J., May 4.—The Steinbach Co., this city, has opened an elaborate new Victrola department in its present store. The new department is equipped with four handsome sound-proof demonstration booths, and an excellent equipment for the display of machines and the storing of records. It is declared to be one of the finest departments in this section of the State.

Music for the Camps Provided by the Knights of Columbus

Robert G. Wulf, director of construction on the Committee of War Activities of the Knights of Columbus, recently outlined for The World what the Knights of Columbus are doing toward providing talking machine music for the military forces. Mr. Wulf said in part: "Up to the present time this organization has erected something like ninety buildings in the various cantonments, encampments and marine and naval stations throughout the country. In each building a talking machine has been installed with a collection of at least twenty-five of the latest records.

"It is our information from our secretaries in the different camps that the talking machines and records play an important part in the entertainment of the soldiers, and that the records are being played from early in the morning until late at night.

"We feel confident that the soldiers are interested in all kinds of music; and record donations from any source will be greatly appreciated.

"We cannot say what kind of machines or records are most desired, for the reason that in the majority of instances we ordered this equip-

WHAT CO-OPERATION ACCOMPLISHED

Brooklyn Dealers Saved From Loss Through Exchange of Information Regarding Operations of a Talking Machine Swindler

How co-operation can save money for talking machine dealers was instanced in a most emphatic manner recently in this city. It appears that a man giving a New York City address attempted to purchase a talking machine from Frederick Loeser & Co., of Brooklyn. The deal was just about to be closed when the quick-witted salesman glanced at the name and remembered that he had seen an advertisement in one of the New York papers giving the same name and address as did the customer, and offering a Victrola, slightly used, at a low price. He, of course, refused to conclude the sale, except on a cash basis, and the customer went out.

The salesman immediately called up J. J. Cavanaugh, manager of the talking machine department of A. I. Namm, in Brooklyn, and advised him of the occurrence. Mr. Cavanaugh also recalled the name and address of the New York party, and found that his house had sold a Victrola to the man some time before. He immediately went to the New York address in his automobile and asked the party if he had a Victrola to sell at a bargain. "Sure," said the man, and pulled off the cover of a machine from which the nameplate had been removed. Mr. Cavanaugh flashed a Deputy Sheriff's badge, made known the real purpose of his errand, and ended up by taking the machine back to the store with him. Inasmuch as the second payment was not yet due on the machine there would have been little redress for the store through the courts.

It is lack of co-operation between merchants that encourages many swindlers to operate, and permits them to operate successfully. With the talking machine men getting together, as they are in New York, watching advertisements as did the Loeser salesman, and endeavoring to remember names of those who it is believed are fraudulently inclined, much can be done to prevent losses. The important thing, however, is co-operation and a willingness to advise a competitor of the operations of swindlers and thereby offer protection to one another.

ment long before the soldiers arrived at camp. It was our idea that they would be mostly interested in popular music and not in the classical music or songs.

"In addition to the talking machines, we also have player-pianos in each building with a new assortment of music rolls for the entertainment of the soldiers."

The Knights of Columbus very evidently have a clear conception of the part that music plays in keeping up the morale of the soldiers, and will undoubtedly make good use of any donations of records, machines or music rolls sent to them.

In answering the inquiries of the general public, talking machine dealers can refer prospective givers to the Committee on War Activities, Knights of Columbus, Woodward Building, Washington, D. C. Talking machine merchants who may themselves be collecting records for the use of the Knights of Columbus by getting in touch with the same headquarters will be able to determine what military units have the greatest need of records, etc. This will be a move along the lines of efficiency and concentration.

The Man Who Is Hard to Sell Is a Challenge to Salesmanship and a Stimulus to Effort

There are two mental attitudes regarding the prospect who is a hard nut to crack, a difficult man to sell. One of these attitudes is that of the salesman who gets peevish over such a prospect and gives him up and tries ever after to get even with the fellow for not buying.

The other attitude, and the right one, is that of regarding the hard man to sell as a challenge to salesmanship and a stimulant to effort. The salesman who gets this attitude sets deliberately about finding a way to get behind the defense of the customer—for there is a way to get behind the defense of anyone in a position to buy.

The man who is not easily won over usually sticks better when he is won. He does not

change his mind or back out without reason. If you find out how a man feels about your proposition, and why he feels so, you will be able to handle him. Put yourself in his place and talk from that side. Instead of so much about what "I have to sell," say more about what "you need to buy." Emphasize the "You" instead of the "I."

Dig into that man's problems and discover why he thinks your talking machine or phonograph would not suit him. Don't begin to try to get him to buy before you have even shown the advantages of what you have to offer. Sales are not made so easily. And don't waste preliminary time in talk about the weather, war or politics. You may inadver-

tently get the man into a discouraged frame of mind by reminding him of extraneous business conditions. You know what will interest people who are prospective buyers of musical instruments, even if they are hard nuts to sell. The prospect may not at the outset care two straws about your particular line, but if he is interested in music at all, he will discuss with you many phases of the question and if he listens, you can get him coming your way.

When you get a person asking questions about and showing an interest in something you know more about than he does, then you have made a start. Once you have made a start, if you get no farther, the fault is your own.

PLANNING FOR IOWA CONVENTION

Elaborate Arrangements to Be Made for the Third Annual Meeting of the Iowa Victor Talking Machine Dealers' Association

DES MOINES, IA., May 6.—A meeting of the executive committee of the Iowa Victor Talking Machine Dealers' Association was held in this city recently at the offices of the Mickel Bros. Co., the Victor wholesalers, at 411 Fourth avenue, for the purpose of considering various plans and suggestions for framing a program for the third annual convention of that organization, some time in August.

The executive committee consisting of W. A. Stoaks, president; W. P. Deal, secretary; Joseph Britt, treasurer, and E. E. Hobbs, member at large, was present in a body, as were a number of association members, including representatives from the following houses: McGregor Bros. & Coen, Creston, Ia.; Schlick's Music Store, Charles City, Ia.; Lohr & Donahoe, Ft. Dodge, Ia., and Harmony Hall, Iowa City, Ia. Through their co-operation a tentative program was considered, details of which will be worked out and announced to the association during this month.

George E. Mickel, member of the association and general manager of Mickel Bros. Co., of Des Moines and Omaha, suggested that the association endeavor to have Galli-Curci and Jascha Heifetz appear during the convention in a recital or concert to be held in Des Moines at the Coliseum.

This event, which would have been extraordinary, was found to be impossible after investigation on the part of Mr. Mickel, owing to the fact that neither of the artists was in a position to specify definitely whether his or her appearance would be an assurance, owing to certain engagements, which were contracted for previously. However, the services of these two artists are still in question as to whether the contracts can be filled.

Should it be impossible for the above-mentioned artists to appear, a suitable program (such as has always been successful at these conventions) will certainly be instituted, and it is desired by the executive committee that a two-day session be held instead of the one-day session as of previous conventions. Judging from the responses already noted from members, the third annual convention will be a far greater success than the two previous ones, as the interest on the part of the members is very noticeable. The membership is increasing each year.

Matters of the utmost importance will come up for discussion at the convention, owing to the shortage of Victor products, and it is to be hoped that by the time of the convention (which will be held the latter part of August) the Victor Co. will have had an opportunity to overcome the ever-increasing shortage of its products and that the fear which has been entertained, and which naturally would be entertained on the part of some dealers, will be a matter of past history as to the future outlook of their business.

ENJOY GALLI-CURCI CONCERT

By Means of Victor Records in the Osterhaus Free Library in Wilkes-Barre

A representative of a New York publishing house who recently visited Wilkes-Barre, Pa., made the following observations which are passed along to readers of The World for information and use when available. He said: "I am a plain, ordinary book agent, classed with the dogs and baby carriages and therefore unwelcome in most public buildings. However, my roving disposition carries me all around the country, and I have noticed a few things which would benefit 'us' New Yorkers. For instance, I dropped into the Osterhaus Free Library here, and enjoyed a really fine concert by Galli-Curci and other stars. Of course, it was on the talking machine, but what does that matter? The place was crowded. It was a regular concert with programs, and the 'Star Spangled Banner' was played and honored. The local merchants loan selections to this library."

INCORPORATES BUSINESS

WESTFIELD, MASS., May 4.—The business of George H. Sharp & Son, which was established in this city in 1893 by George H. Sharp, was recently incorporated, and in future will be known as the George H. Sharp Co. The company specializes in talking machines and music, and the business will be enlarged to take in considerably more territory.

ALL RECORD CUSTOMERS ARE ALBUM CUSTOMERS

MAKING THEIR SELECTION

A Place for Every Record and Every Record in its Place

Albums are an Indispensable Requisite in the talking machine business and wherever records are sold. Practical and handy. Save time and records. A profitable adjunct to the business.

We manufacture disc Record Albums to fit cabinets of all sizes and styles. With the indexes they are a complete system for filing all disc records.

We have unexcelled manufacturing facilities, and considering quality our prices are the lowest. Write us, giving quantity you may desire, and we will quote prices.

OUR ALBUMS ARE MADE TO CONTAIN VICTOR, COLUMBIA, EDISON, PATHE AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. American St., PHILADELPHIA, PA.

THE PERFECT PLAN

ATLANTA TRADE SOMEWHAT SPOTTY

Shortage of Machines and Records Felt—Meanwhile Business in General Was Never Better

ATLANTA, GA., May 4.—The talking machine business in this city during April was a little "spotted." In addition to the very critical condition in Europe there was and is a shortage of goods, one of the leading manufacturers not having in stock at the present writing a single \$55, \$160 or \$215 model.

Just what effect the conference of the manufacturers recently held in New York City will have on the future of the business is somewhat uncertain, but it certainly appears that there is to be some curtailment in production. Probably this will make the public eager for what is left to be marketed and will in this way make easy sales for the dealer.

After cable news in regard to General Haig's famous "back to the wall" stand was received, there was a noticeable increase in buying and a better feeling all round. This now world-celebrated order will live in history with "Don't give up the ship" and "England expects every man to do his duty."

Talking machine dealers in the South and many of the fraternity in New York, Philadelphia, Bridgeport and elsewhere, will read in this paper with regret of the death recently of Richard Thornton, of Atlanta, Ga., for years identified with the phonograph business in Atlanta, and one of the pioneers of recent years in the growth and development of the industry.

Chamberlin, Johnson, DuBose Co., this city, one of the best-known and foremost dry goods houses in the South, have recently moved into a new six-story fireproof building on Whitehall street, in the shopping center, and have engaged Edgar Brotherton, a former Atlantian, but recently with D. H. Holmes Co., New Orleans, to take charge of their Victrola and Sonora department.

Without detailing reports from each individual firm in the city, we can say that business in general is good, and all are anticipating a continuance of activity throughout the summer.

The Columbia Graphophone Co. has qualified the Kenny Furniture Co., locally, and it is understood that this concern is doing well with this widely known line.

ATTRACTIVE STORE IN MINNEAPOLIS

Nye & Nye, in the Brunswick Shop, Have an Elaborate Establishment

MINNEAPOLIS, MINN., May 8.—One of the outstanding establishments in the talking machine trade in this city is the Brunswick Shop of Nye

Nye & Nye's Attractive Store

& Nye, who are in possession of most attractive quarters, fitted out elaborately for the special requirements of their business.

The Nye & Nye shop is located at 712 Marquette avenue, right in the center of things, and the amount of business already being han-

View of Display Room and Booths

dled more than justifies the handsome equipment. The firm is composed of Walter G. Nye, a former Mayor of Minneapolis, and George M. Nye, a former member of the Minneapolis Legislature. Both men are naturally widely known to the citizens of the city, and this fact has helped them to build up a clientele that is constantly growing.

TRADE MOVES IN WAR TIMES

The Attitude of Dealers Toward Goods Other Than Machines and Records Discussed by F. O. Wilking, of the Ready-File Co.

In a recent letter to The World F. O. Wilking, president of the Ready-File Co., Indianapolis, Ind., points out the tendency which that company has found on the part of the dealers toward making a special effort to push the sale of accessories during war times. He says in part:

"One of the most interesting developments of war times is the changing attitude of talking machine dealers toward goods other than machines and records. This was forcibly brought to my attention during a recent trip through the Central West, when both dealers and jobbers of the most progressive type showed an entirely new disposition to warm up to the extra profit that Ready-File makes for them. Dealers who had previously shown only slight interest in our proposition have become enthusiastic boosters; distributors that have been ordering in 100 lots are now ordering in 400 and 500 lots.

"The explanation lies partly in the fact that our goods are constantly becoming better known, but deeper than that is the inability of either distributor or dealer to get all the machines and records needed to supply the demands of the trade. The fact that his profit on machines and records has been cut by curtailed production has made many dealers to put more effort behind selling other goods. Each dealer is anxious to have his books look at least as good at the end of 1918 as they did a year before, and he is consequently keenly interested in any device such as ours, which permits him to make an extra profit on each sale.

"In this awakening may lie the salvation of many dealers. It is a fact that there are accessories, a number of them, that show the dealer a better profit than either machines or records. Our advice to every dealer is to investigate these devices now, while his machine and record stock is short, pick out those that suit him and get his sales force in the habit of including them in every deal. Thus he will keep his business up to the mark for the present, and be in a position to greatly increase it when the factories get through doing war work."

NEW PATHE NUMERICAL CATALOG

The Pathé Frères Phonograph Co., Brooklyn, N. Y., has just issued a new numerical catalog of Pathé records which lists all records up to and including the May supplement. It is interesting to compare this catalog with the old edition, as the increased size of the publication indicates the remarkable strides made by the Pathé Frères record library during the past few months. At the present time the Pathé library contains a complete library of all classes of records, and the popularity of Pathé recordings is increasing rapidly with Pathé representatives in all sections of the country.

NEW YORK, MAY 15, 1918

THE need for some definite central organization of talking machine manufacturers was emphasized strongly last month when the industry was called upon to appoint a committee to confer with the United States Fuel Administrator regarding measures for curtailing the output of talking machine factories.

It is true that representatives of the larger companies conferred with the Fuel Administrator, but he preferred to deal with the trade at large and, therefore, a representative committee was suggested. Of course, such a committee was appointed at the meeting in New York on April 30, but it meant a delay of several weeks before definite action could be taken. Had there been an organization in existence representative of the entire trade, an agent of, or committee from that body would have been in a position to have followed up the matter to a conclusion with the Fuel Administrator earlier in the month.

It is probable that there will be other matters which will require the attention of the united trade in the future and before the war is over, and the industry should not be caught napping again. Hence the necessity of a permanent committee of representative men, or an individual, if one can be found to satisfy all parties, being appointed to provide official representation for talking machine manufacturers. Matters with the Government can thereby be discussed and adjusted quickly to avoid suspense. The piano and allied trades have followed this plan through the Music Industries Chamber of Commerce, and it has proven most successful.

The request from the Fuel Administrator that the talking machine trade appoint a committee to confer with him on the question of curtailment came as a surprise to many, as it was believed that the general order curtailing the output of musical instrument factories 30 per cent applied also to talking machine plants. It was learned, however, that an order was issued for a conference with the General Counsel of the Music Industries Chamber of Commerce, who was unable to state at that time that he represented the talking machine division of the trade. The Government does not desire to take up matters affecting the trade at large with any one or two companies in the trade. When a united trade opinion is desired, it must be what it professes to be—the opinion of the members, or a majority of the members, of one particular industry. It is only by getting together in some form of organization, even if only for the period of the war, and the appointment of a committee with the power to speak

for the trade as a whole, that this result can be accomplished. It is not the time for standing aloof or arguing over details. Any orders issued, or any actions taken against the industry, are going to be against the trade as a whole and will hit every individual manufacturer in it. This fact must not be overlooked.

With a committee appointed, an effort should be made to gather together honest statistics regarding trade, capital invested, number of employes engaged, those beyond the draft age, or women, amount, value and character of materials used, value and equipment of plants, and other essential details for presentation in collated form to the Federal officials. It has already been learned by other branches of the industry that the general statement that "music is a war necessity," for its worth in preserving the morale of citizens and soldiers, does not get anywhere in Washington. The fact that there is a large amount of capital invested and that so many thousands of people are dependent upon the industry for their livelihood is listened to with attention.

There are many ways of gathering these statistics without jeopardizing the business secrets of any one manufacturer. The disinterested outsider has been intrusted with similar statistics by more than one big industry, and practically without exception has proven faithful to the trust. These are not times for fancy talks. What Washington wants are facts—cold, hard facts—that can be considered in a businesslike manner, and the trade should see that such facts are available.

RECENT events indicated that conditions demand a more general co-operation between talking machine wholesalers and between dealers in the matter of a redistribution of surplus record stocks in order to preserve a most efficient balance. It is an acknowledged fact that record supplies from the factories are far from being normal, and due largely to labor conditions will possibly drop off even more, regardless of any Federal curtailment order. This shortage does not exist alone in the new and most popular records, but it is felt right through the line of the standard catalog selections. The seriousness of the situation is evidenced by the fact that not alone wholesalers but dealers have felt warranted in sending out representatives throughout the country to gather up what surplus stock they could to fill gaps in regular catalog stocks, but often with indifferent success.

One jobber, in calling upon his fellow jobbers for any record stock they could spare, declared that he was completely out of close to 2,000 records from his regular lists. Under such conditions, the wholesaler or dealer who is burdened with surplus records is simply fooling himself by neglecting to make an effort to get in touch with jobbers or dealers in or out of his territory, who may not only be able to use those particular records, but who would be glad to get them. When wholesalers are willing to pay retail prices for stock records, and perhaps a few popular numbers thrown in, for the sake of keeping their record assortments in half-way presentable shape, then the situation is serious enough to receive earnest consideration.

FROM the earliest ages the value of music as a therapeutic has been recognized and appreciated and it is not surprising to learn that Mrs. Isa Maude Ilsen, of Hamilton, Ont., has made extensive use of music to win the convalescent and diseased soldiers of Canada back to the fulness of health and happiness. Music she believes—and she has been demonstrating in practice the truth of her tenets—possesses a tremendous power considered as a medicine.

She says the part that music may play toward bringing back to normal our soldiers who are sick with minor ailments before they go to the front or are wounded after reaching the battle line is no small one. Mrs. Ilsen knows whereof she speaks. For nearly two years she has been the volunteer superintendent of the Military Infirmary of Hamilton, where a great number of Canadian soldiers suffering from wounds and illnesses caused by the war have been treated. It is in this institution that she has proved the practical value of music in the sickroom.

At present Mrs. Ilsen is drafting a plan for the United States military authorities which will give them an idea of the possibilities to be gained from the application of her principle. She will use her recent experience to illustrate the enormous possibilities of music in therapeutics.

Talking machine music is being used to-day in many hospitals as a curative influence, and has been especially effective particularly where soldiers are suffering from forms of "shock" which disturb the entire nervous system, making them in a measure a wreck for a considerable time. The selection of the records to be used is, of course, an important matter. They have to be gauged in accordance with the actual physical condition of the patient so that the influence exercised is most beneficial. The effect of music on different patients varies, and just like medicine, what cures one may harm another. In this domain the talking machine is destined to fulfil a noble mission.

JUST another reminder about terms: The stock of machines and records on the dealer's floor are, regardless of fixed price agreements or anything else, worth more to him right now than when he bought them, whether it was three weeks or three months ago. This higher value is based on the fact that once off his floor they will leave a gap that may not be filled for some months to come. Meanwhile, he is paying rent and carrying overhead on that gap. Why, therefore, sacrifice these machines and records on long time terms. Demand cash wherever possible, for right now it is the dealer's right to do so, and barring cash, make the terms reasonable—that is, reasonable to the house. Meanwhile many dealers are selling only for cash.

RECENT cases in the West where "gyp" dealers, and even that class of legitimate dealers in talking machines who have been convicted of misleading advertising and punished therefor, indicate that State advertising laws and local ordinances really have some "kick" in them and are not to be trifled with. When a few more cases are successfully pushed in other sections of the country that will serve to force on erring members of the trade generally that they either have to be good and tell the truth or stand punishment, so much the better off will be the industry.

Up to a couple of years ago the talking machine industry was remarkably free from misleading advertising. The leading manufacturers have always set high standards for their publicity. They endeavored to present facts instead of fiction; based their claims on truth and devoted their arguments to selling their own lines rather than in knocking those of competitors and trading upon competitors' reputations.

There is now evident in some quarters, however, definite attempts to cast reflection on the products of competitors, or to market unknown lines on arguments based on instruments of recognized standing. The "Victrola-like" or "Grafonola-style" of instruments offered at bargain prices by "gyp" dealers have become too common to permit of their being ignored any further, and the Music Industries Better Business Bureau, with headquarters in Milwaukee, is taking cognizance of this fact and has

TO OUR SUBSCRIBERS

If your copy of The Talking Machine World does not reach you on publication date, or a few days thereafter, do not assume that it has gone astray. The existing railway congestion has had a serious effect on the handling of mail, particularly second class matter, and brought about unusual delays. Kindly wait a few days longer than usual before writing to us, as the paper will probably arrive safely.

already succeeded in prosecuting several cases successfully, while others are under investigation.

The New York District Attorney's office has also been investigating local advertisers of the "gyp" type, and has promised to prosecute any of this ilk when proof can be furnished that they are uttering misstatements.

It is all up to the legitimate dealer to protect his own interests. If he sits quietly by and considers that the "gyp" dealer is not doing enough to hurt him to make prosecution worth while, he is simply encouraging a malignant growth in the industry. The thing to do is to investigate personally so far as possible every questionable advertisement, whether by "gyp" or legitimate dealers, and to present the facts before local authorities or before the Better Business Bureau, and prompt action can be obtained. Keeping the industry clean means to keep it healthy.

TALKING machine and record manufacturers are taking no undue credit to themselves when they acknowledge that they are doing real good for the fighting men of the nation at this time. Hardly a military unit, ship or hospital but has one or more talking machines, and a suitable supply of records, and the cry is constantly for further supplies of talking machine outfits for new units not yet equipped. The Y. M. C. A., for instance, consider the talking machine sufficiently important to appropriate a substantial portion of their funds for the purchase of such outfits for their various huts in this country and France. And so it is with the Knights of Columbus. Even the enemy enjoys the talking machine, for a story comes from London of an officer who while engaged in a drive against the Germans found several records in No Man's Land, and close to their trenches. It is said that Washington has divided the products of the country into three classes unofficially, they being first, food; second, war materials, and third, everything else. From results already shown it would seem that talking machine records might have a fair chance of edging into the second class.

THE phenomenal success of the Liberty Loan Rally of the Allied Music Trades, at Carnegie Hall, on April 30, was due in great measure to the work of the talking machine men and the generosity of the manufacturing companies and their artists.

Meet Us at the Music Show

Those of us whose part it is to "keep the Home Fires Burning" while our boys are at the Front will be doing our part if we feed with an inexhaustible supply of fuel the fires of love and sympathy—if we cheerfully perform every service of which we are capable and bear every sacrifice and burden that comes to us, for the sake of those who are bearing still greater burdens on the field of action.

Music will help a lot. It is helping to keep our boys mentally fit and inspire them to the utmost of sacrifice and achievement. With music at the front, music in the camps and music in our homes, we have a bond of spiritual strength that will defy all apprehension, disappointment or discouragement (real or fancied). That will support to the end our resolve to purge the world of the monstrous, perverted doctrine that puts might above right. That will make unbending our determination to be stripped of all our possessions and drown in a sea of blood rather than permit the policy of the cloven-hoof to prevail on earth.

For our boys there is hardly a moment when music will not fit in, from the time they change from "civilians" to khaki until they return to their earthly homes triumphant in victory or, with thousands of brother heroes, are borne aloft where the supreme award for valor awaits them.

The spirit behind the National Music Show, June 1st to June 8th at the Grand Central Palace, New York City, is in harmony with the "Home Fires" sentiment. That spirit is a missionary spirit which has not only taken music into the remotest parts of our own country, but has carried it to the four corners of the world. Its influence in the lifting of humanity to higher levels of conception and accomplishment has been tremendous. May the National Music Show be instrumental in the musicalizing of every home in every land.

We shall keep open house for all visitors to the National Music Show at Sections 19 and 20 where they will find a most cordial welcome awaiting them.

THOMAS A. EDISON, Inc.
Orange, N. J.

How Music Aids in Maintaining the Nation's Faith, Hope and Courage

By M. C. Schiff

There are reasons why it would be unwise, from a broadly patriotic point of view, to curtail talking machine production. No doubt the representatives of every industry designated as non-essential have countless arguments to present against the propriety of such designation. In the case of the modern talking machine, however, the morale of the home itself, the very foundation of the nation's institutions, is affected. It is that, and not any inclination to evade bearing our full share of our country's burden, that actuates talking machine manufacturers in feeling that the proposed curtailment of fuel supply is not wise.

According to my understanding, it is the sense of the administration that the production of talking machines should be curtailed to the end that labor thus released may be employed in Government operations, and the money which would be expended for the instruments may instead be invested in Liberty Bonds, thereby providing the Government with the means of purchasing the product of the labor. The benefit that eventually would accrue to the Government under such program with reference to some industries, such as pleasure automobiles, for instance, is obvious. The difference in the value of the program as applied to the automobile industry, which we have taken for comparison, and the talking machine industry, lies in the fact that the former is not indispensable to the morale of the home, while the latter most certainly is.

Music is the most ennobling of all human agencies. Without it the ideals of the nation, and, hence, the nation itself would suffer. It is essential to the home in which is to be maintained the mental attitude necessary to national hope and courage.

The fact that, notwithstanding the withdrawal of thousands of persons from the usual buying channels, the demand for talking machines has increased proportionately with the stress of war conditions, the sales of the past six months having been the largest of any similar period in the history of the industry, proves that the public looks to this universal music reproducing instrument to renew the tremendous mental energy daily consumed under the strain of our present national crisis.

Through the talking machine the emotions may be thrilled and hearts made happy. The

music of the master, reproduced by the talking machine, can send into the very soul of the lonesome mother or heartsick wife a message of hope and cheer from the brave soldier at the front, and only through the talking machine can there be received in the home the message of

*The Stress of War
Demands That
There be Music to
Preserve Morale*

patriotism that great bands and famous musicians impart in their masterful interpretation of our national songs, expressing in the most po-

tent manner the great ideals for which America stands.

The talking machine brings democracy into the home and at this time, when events transcend the powers of the ablest writer or orator, the amplification of music must be permitted to perform its appropriate work of binding the people throughout the country so they may be held together by common ideals and sympathies.

Music in the home is the most positive preventive of our deterioration to a morose practicability; it will inspire the home folks to in turn inspire the boys "over there," and it will prove the greatest element in preserving the morale of the nation's war workers, both here and at the front, by preserving the morale of the home.

Talking machine manufacturers are not only willing, but in common with every other American industry, are anxious to go to any limit to serve the interests of the country, but they hope a way may be found to do that without risking injury to the spirit of the nation which now, more than ever, needs and depends upon the talking machine for economical mental relaxation and clean home entertainment.

DEATH OF RICHARD THORNTON

Well-Known Talking Machine Man of Atlanta, Ga., Passes Away in New Orleans

Richard Thornton, of Atlanta, Ga., for a number of years identified with the talking machine industry, recently passed away in New Orleans, La., at the Presbyterian Hospital, of acute pneumonia, after an illness of only a few days, in his thirty-fifth year.

He was identified with the Columbia Graphophone Co.'s Southeastern distributing headquarters in Atlanta from 1911 to 1915 as assistant manager, and was regarded as one of the most expert and experienced phonograph men in the United States, his work in the various departments of the Columbia Co. having given him an opportunity to learn the business from the ground up, managerial, selling and financial.

In 1915 the Columbia Co. sold their retail interests in Atlanta, and Mr. Thornton organized the Atlanta Talking Machine Co. at the old stand on Peachtree street, becoming junior partner and manager. His success with this

business was excellent, but when the New Edison entered the Southern field he was selected by the owners of the first modern Edison shop in the Southeast to introduce the line into an undeveloped field. It may be said that the present large sale of Columbia product in Atlanta and vicinity and also the Edison ground work can be attributed very largely to his ability and efforts.

Mr. Thornton was educated at the Atlanta public schools, in preparatory schools in New England and at Emory College, Oxford, Ga. He was a member of the Chi Phi Fraternity, and of the leading clubs of Atlanta, and was universally beloved by all who knew him. His untimely end will be mourned by hundreds of friends all over the country.

HANDLING SONORA PHONOGRAPHS

Charles W. Homeyer, well-known music dealer of 332 Boylston street, Boston, Mass., has just installed a line of Sonora phonographs and is very enthusiastic over the possibilities of the new line.

IMPORTANT BUSINESS TOPICS DISCUSSED IN ST. LOUIS

Tri-State Victor Dealers' Association Have Interchange of Ideas on the Evils of Free Service, Current Monthly Records and Salesmanship Requisites—Start Repair Shop for the Trade

St. Louis, Mo., May 8.—The last meeting of the Tri-State Victor Dealers' Association, the first to which the associate members—sales people—were admitted, was entirely successful. The experiment was as to whether the sales folk would take an interest. They did. So the experiment was considered successful. More meetings of this kind will be held, and it is believed that the sales folk will become so interested that it will be possible to get out-of-town members to send their sales forces to attend occasional special meetings. The program was especially designed to interest those in the selling end.

Val Reis was to have spoken on “The Evils of Free Service—The Extent to Which Such Service May Profitably Be Extended.” Mr. Reis was unable to be present, but President Magoon introduced the topic and asked those present for ideas. There was a good deal of discussion, the chief idea being that there should be a definite suggestion as to how far the salesman should go in promising service. At present the salesman has to be entirely dependent upon the customer's word as to what other dealers will do, as there appears to be no understanding. Some customers get the idea that they are within their rights when they call to have a service man sent out to wipe out scratches to the cabinet. Others get the free service idea so strong that they do not even try winding up the machine before they call for assistance. On motion, a committee was appointed, of which E. C. Rauth is chairman, to outline suggestions as to what free service is desirable and to report at the next meeting.

J. F. Hunleth talked on “Current Monthly Records.” Mr. Hunleth said that during the present shortage of supplies of new records it behooved each dealer to make his stock go as far as he could. He took a recent monthly list and called attention to the numbers in stock similar to those on the list and suggested that when a customer called for a certain new record—say, a Caruso—that he be reminded of the other and similar Caruso records in older stock, and that these be played for him as well as the new one—with no emphasis on the new one. He said that experiments of this kind carried out in his store have resulted in many sales from the older stock and that in many cases the customer was better pleased with the older records. He said that only the entirely new songs need be sold and sometimes there were good substitutes for these. He also reminded his hearers that some of them had large stocks of excellent musical numbers that could just as well be sold as not, as there was no satisfactory reason for their going out of fashion—mere whim.

J. F. Ditzell, of the Famous & Barr Co., spoke at some length on the “Requisites of a Salesman.” He reminded his hearers that a sales person was made—not born—that there

were certain essentials that it was necessary to teach, and as soon as it was found that the candidate for a sales place could not grasp these requisites, that candidate should be placed in the discard. He reminded the salesmen—and women—present that there were many things that they could do to bring about their own advancement by self-development. These efforts, he reminded them, always brought excellent returns in the way of salary advancement, as there was but one basis on which to fix the salary of the salesman—that of the earning power.

Through the association the St. Louis members have completed an arrangement for a common repair shop. The association has guaranteed a local motor repair man—said to be the best in town—a certain amount of work if he will hold himself at the call of the members. He will make special prices and will guarantee all of the work. This shop is not expected to handle case work—only mechanical—but the repair man will have case work done if desired. This arrangement was made because good repair men are becoming scarce, and it was felt that by consolidating the work better results would be obtained and men could be spared for other work.

J. D. MOORE RESIGNS AS MANAGER

Retires as Head of Successful Talking Machine Department of Lion Drygoods Co.

TOLEDO, O., May 4.—J. D. Moore, who about five years ago opened a talking machine department in the Lion Drygoods Co. store in this city, and has since acted as manager, resigned recently to enter a new field upon leaving the services of the company. Mr. and Mrs. Moore were entertained at dinner by the employes of the talking machine department, on which occasion Mr. Moore was presented with a handsome traveling bag in token of their esteem. The Victrola department of the Lion store is operated on a very successful basis. No records are sent out on approval, and interest is charged on all deferred payments. All accounts are watched carefully through co-operation with the credit department, with the result that there are practically no repossessions.

LEASE LARGER QUARTERS

MINNEAPOLIS, MINN., May 3.—Owing to the increase in their Edison phonograph business, the East Side Phonograph Co., this city, have leased new and larger quarters at 209 East Hennepin avenue, which will be equipped to meet the requirements of the company, and which will be occupied about November 1, when the lease on the present store at 416 Central avenue expires.

Get That \$3

You can sell every Victrola X-A and XI-A you can get—and sell

Ready File

With every one. Or you can sell the Victrolas alone, making \$2.75 or \$3.00 less on each one. Mail us this advertisement, with your name and address on the margin. Full particulars will be mailed at once.

Ready File Co., Inc.

INDIANAPOLIS, U. S. A.

¶ Sentimentally regrettable as it may be, little phonographs, like little nations, live only long enough to demonstrate the *strength* and *permanency* of the big ones.

¶ Pathé stands for a future greatness in proportion to its present magnitude. Pathé is big in every way. Pathé means an immense resource of machines and records. Pathé means good service.

¶ If you are a Michigander, interweave your future with Pathé and grow with a great service in a great state.

How the Talking Machine is Disseminating a Knowledge of the World-Famous Musicians

Hector Charlesworth, who has written a series of articles on talking machine and player-piano music for the Canadian Home Journal, in the course of one of them emphasizes a thought that is interesting. He says: "While in a small Ontario town I noticed a large advertisement announcing that records of Jascha Heifetz could be procured from a local dealer. Less than ten months ago the name of Heifetz was unknown, even to the most noted musical critics of New York. He came to America from Petrograd and gave a violin recital in that city about the time of the first snowflakes. At once it was recognized that a great star had risen in the musical world, and his subsequent appearances have created a furor wherever he has gone.

"But a decade ago such an incident would have affected only a few large cities with halls capable of containing the thousands that naturally throng to hear a new and celebrated man of genius. In a small town, such as the one I mention, the idea that Heifetz would become a personage so well known as to be the subject of lengthy advertisements in the local newspapers would have been fantastic. Only a few of the well-to-do, who might go on a journey, could ever hope to hear him play the violin, and his name would have been dismissed from

the mind of the average individual. It is not overshooting the mark to say that ten years ago the ordinary reader of a small town newspaper would have been indifferent as to whether Jascha Heifetz was an anarchist or a new kind of mineral water. Now he is the possession of

*Artists may some day
devote themselves
exclusively to the
making of records*

the whole community. The sure barometer of advertising expenditure shows that he has a public everywhere, a public infinitely larger (who will know him through the records, and probably sees his face) than the throngs who are crowding to hear him in the large cities."

In the course of time, when a greater percentage of homes have talking machines, Mr. Charlesworth thinks that some artists will find it profitable to devote themselves exclusively to the making of records and abandon public appearances altogether; just as certain lecturers and educators have abandoned the rostrum and do their teaching entirely by the correspondence method.

"This is not likely to occur in the case of any artist of first-rate talent," says the writer, in conclusion, "for the very good reason that public appearances in themselves, if successful, form an advertisement for the records of an artist of inestimable value. Yet the situation does hold its possibilities for the singer who happens to meet with misfortune other than the loss of voice.

"Suppose that Caruso, just for instance, had been young enough to have been drafted for the Italian army, and had met with the loss of his legs or with some hideous facial disfigurement which precluded his ever appearing on the stage again. He would, did his voice retain its power, be able to continue to appeal to popular approval by making new records. The same is true of every other noted singer of either sex."

HERZOG ART RECORD CATALOG

New Catalog Portrays and Describes Over Sixty Different Models of Cabinets

A new catalog of "Herzog Art Record Cabinets" has recently been published by the Herzog Art Furniture Co., of Saginaw, Mich. This new catalog, which is a very handsome affair in blue, white and black, portrays over sixty different models of cabinets. It starts in with a comprehensive view of the factory, and a pertinent discourse on why Herzog art record cabinets are a profitable accessory for talking machine dealers. Following this are a series of profusely illustrated sections.

Section 1 is devoted to Victor record cabinets, Section 2 to Columbia record cabinets, Section 3 to Pathé cabinets, Section 4 to Brunswick cabinets, Section 5 to Edison cabinets, Section 6 to Auxiliary cabinets, Section 7 to player roll cabinets, Section 8 to a reproduction of the various newspaper cuts of Herzog cabinets

which are available for use in the dealer's local advertising. The volume is well written, admirably printed and produced, and should prove of interest to all members of the trade.

LEE GILBERT MARRIED

Lee Gilbert, a well-known talking machine man of Omaha, Neb., recently married Miss Weltha Gilbert, of Des Moines. It was a home wedding of a most attractive sort, and the guests included Mr. and Mrs. Geo. E. Mickel, Mr. and Mrs. Fred. Bailey and Hugo Hayne, all of Omaha, and all well known to the talking machine trade of the Middle West.

Mr. Gilbert started his career in the talking machine industry at the Victor factory. From there he went to Chase & West in Des Moines, and later with Mickel Bros. in the same city. He was transferred to the Omaha branch of the Mickel Bros. Co. on February 1 of this year, with which organization he continues to display great energy as a Victor salesman.

TO FEATURE EDISON LINE IN UTICA

New Concern Formed to Take Over the Business of the Utica Music Co., Inc.

UTICA, N. Y., May 6.—A new company has been formed to promote the sale of the new Edison phonograph. This company will handle a probationary zone, having the exclusive sale of the Edison instruments and records. The stock, fixtures and lease of the Utica Music Co., Inc., have been purchased and the Utica business will be conducted at 261 Genesee street, Crown Building, where every model of the New Edison and a complete stock of the Edison Disc and Blue Amberola records will be found. The members of the new company are Clayton L. Wheeler, Arthur R. Knox, E. L. Kuhl and John Schuderer. The Utica headquarters at 261 Genesee street will be under the management of Arthur R. Knox and the Rome branch, 173 West Dominick street, will be managed by John H. Schuderer.

THE BROOKS Automatic Repeating Phonograph

Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—
The Phonograph Sensation of the Age

DEALERS:

You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with Instruments retailing for \$300.00 and up.

In tone qualities it is unexcelled by any talking machine on earth! In mechanical equipment and automatic features it is years in advance of its nearest competitor. We have been building talking machines for three years—last year our sales doubled every four months. The BROOKS DEALER has no competition. The machine creates interest and discussion—it is self-advertising. Send for particulars, terms, prices.

BROOKS MANUFACTURING COMPANY

Portable Model Grafonolas for Vacationists

"Vacations with Music"—

That's the Columbia sales slogan for the next ninety days.

Make it yours, and your Summer sales will follow your Thermometer upward. The hotter it gets, the better your business.

Sell Portable Grafonolas to the folks who go to the woods and lakes and shores, and there'll be no Summer Slump for you. Your July will be a big, fat January.

It is sound sales strategy.

Vacation time is joy time. People want to pack all the fun possible into their play days. They jump for anything that makes for mirth and spice-o'-life while they're away.

And how many know what joy there is in a "Vacation with Music?"

Make it your job—and your opportunity—to tell them.

A vacation with all the live, up-to-date music always ready to play. Stirring soldier songs, close harmonies and splendid bands—for the twilight time when the crowd gathers; dear old-time ballads or the haunting strains of violin, floating out over the water in the velvet darkness, when the little waves go slap-slap-slap against the side of the canoe.

Or snappy, catchy, cheery song-hits for rainy days—glorious syncopations for dancing. Who can imagine a vacation without dancing? Think of having all the newest jazz riots, one steps, waltzes, right on tap in a friendly, willing Grafonola.

Here's a big opportunity for the live salesman—go after it.

We've prepared a tremendous barrage of National Advertising on the Portable Grafonolas as vacation companions—to be launched during June, July and August.

People are going to want the Vacation Models.

Tie up, friend dealer, tie up. Write—today—to your Distributor about the Portable Models, prices, Sales Helps, quantities, etc.

Remember the countersign—"Vacations with Music."

Columbia Graphophone Company
Woolworth Building, New York

Grafonola

Columbia Vacation Model Grafonolas

Made for Out-of-door Music

For those jolly, informal parties by seashore, lake, or river the most popular entertainer is always the Columbia Vacation Grafonola. This friendly, companionable Grafonola is a good sport. Take him along with you on your holiday trip this year.

Price \$45.00

Traveling light, strong, and compact, with a voice that is sturdy, sweet, and clear, the Vacation Grafonola will sit up all night to give you music for dancing—and then be ready and cheerful for a bathing or sailing party bright and early in the morning.

Wherever you go in the joyous vacation lands by seashore, lake, or river the Grafonola will give you music.

Price \$18.00

Price \$30.00

To make a good record great, play it on the Columbia Grafonola. COLUMBIA GRAPHOPHONE COMPANY NEW YORK

High-Power National Advertising that will make it Easy for You to Sell Portable Model Grafonolas

During June, July and August—when people are going by the hundred thousand to the Summer resorts—Columbia will make a powerful sales drive on the Portable Model Grafonolas.

The big idea back of the advertising is, "Vacations with Music."

It's a powerful idea—an idea that automatically makes every vacationist a potential customer for a Grafonola.

The advertising schedule comprises full-page space in the Saturday Evening Post, Collier's, American Magazine, Scribner's, Literary Digest and Good Housekeeping.

Over six million combined circulation.
Thirty million readers.

Is it big enough for YOU?
Then you PUSH—our ads will PULL.

NEW VICTOR ADVERTISING MANAGER

Ernest John, Widely Known as Editor of "Voice of the Victor," Advanced to This Important Post in the Victor Co. Organization

The following letter sent to the trade by Louis F. Geissler, general manager of the Victor Talking Machine Co., requires no comment beyond the endorsement of Mr. Geissler's views regarding the experience and ability of Ernest

Ernest John

John as qualifying him for his new post as advertising manager of the Victor Co.:

"We take great pleasure in announcing the appointment of Ernest John as manager of the advertising and editorial departments of the Victor Talking Machine Co., which departments will be amalgamated under his direction.

"This highly important position requires not only a broad advertising experience, but certain special qualifications, and, above all, an intimate knowledge of Victor business.

"As editor of the 'Voice of the Victor' and manager of the editorial department, Mr. John, with fourteen years of practical experience as an advertising man, is already well known to the trade. We confidently believe in his ability to maintain in the future as fully as it has

been maintained in the past that high efficiency which has been characteristic of Victor advertising and publicity.

"Associated with Mr. John on the editorial staff, which has already given the trade such excellent service, will be Arthur S. Garbett and F. A. Delano, writers of distinction and high qualifications. On the advertising staff will be W. L. Marshall and H. E. Green, both men of established worth and long experience.

"Ours is a highly specialized business requiring special talents and special training. Our one consistent purpose is to be of greater service to the trade, and so to be of greater service to ourselves. To that end the above appointments have been made; to that end, also, we ask your earnest co-operation, which must assuredly be to the advantage of all concerned."

For Mr. John it can be stated that by experience and training he is particularly well qualified to handle with success the problems connected with his new post. He was born in St. Ives, a summer resort on the Cornish Coast of England, recognized as the mecca for artists, among them some of the greatest painters in England. It was in his native town that he secured a fundamental knowledge of art, that has proved of great advantage to him in the domain of advertising and editing.

Coming to the United States when still a young man, Mr. John became associated with a small town newspaper in Michigan, where he had experience as editor, manager, circulation manager, and more particularly as advertising manager. Mr. John proved particularly successful in the last position, proving to his clients the value of advertising, even selling them advertisements, and finally writing and designing the ads. After five and one-half years as advertising manager, Mr. John resigned in 1910 to go with the Victor Talking Machine Co. to take charge of specialized work. He was engaged to go all over the country giving demonstration lectures before the public on the musical value of the Victrola, and in addition acting as special adviser to the dealers with whom he came in contact. At that time musicians still thought of the talking machine only as a means of supplying "canned" music, and the dealers themselves lacked a full appreciation of the possibilities of the Victrola. It was to overcome this condition that Mr. John was sent on tour.

Mr. John worked so successfully that he was called back to Camden to edit "The Voice of the Victor," the trade organ of the Victor Co. Here his knowledge of practical matters, of

TALKING MACHINE DEALERS
—READ THIS—

"The finest and most delicate pieces of mechanism do not prove efficient unless properly lubricated. Skill, Genius, Invention and Workmanship must have the proper Oil. Stop and consider this when you have to buy an Oil for household use."

NYOIL
IS BEST
FOR ANY TALKING MACHINE

Being made in our Watch Oil Dep't, the same care given in refining as in our "Watch Oil," as all gums and impurities are extracted, leaving it Colorless, Odorless and Stainless.

BEWARE OF SCENTED OILS

Machines will not clog if oiled with NYOIL. NYOIL is used by the U. S. Gov't in Army and Navy. A trial order will make a permanent customer of you.

Ladies use NYOIL for Sewing Machines, for it is stainless.

Sportsmen find NYOIL best for Guns, for it keeps them from rusting.

NYOIL is put up in 1oz., 3¼ oz. and 8 oz. Bottles, and in Pint, Quart and Gallon Cans.

For Sale by all Talking Machine Supplies Dealers
WILLIAM F. NYE, New Bedford, Mass., U. S. A.

typography, design and illustration, combined with a thorough knowledge of the dealers' needs, and of Victor possibilities, enabled him to produce a publication of unquestioned standing and value.

Mr. John's next appointment was that of assistant advertising manager to Henry C. Brown, who was then manager. About eighteen months ago, when the new "Editorial Department" was created, Mr. John was appointed manager, and in addition to editing "The Voice" has been called upon to get out the monthly supplement of new records, as well as catalogs, and take charge of other important tasks. In this new work he made good, and when the time came to choose another advertising manager to replace Mr. Brown, who had become assistant to the general manager, Mr. John was accepted as the logical man for the post.

Mr. John is a man of winning personality and charm of manner. He makes friends quickly, and what is more keeps them, although he is not averse to a "scrap" if he finds that his rights demand it. In other words, he has the necessary qualifications for a man who is advertising manager of the Victor Co. and can be depended upon to do big things in a big way.

VEECO MOTORS ARE IN DEMAND

Improved Model Wins Favor of the Manufacturers—C. F. Simes in France

BOSTON, MASS., May 4.—The Veeco Co., of this city, manufacturers of the Veeco electric motor and the Vitraloid turntables for talking machines, report a strong and growing demand for their motors. The company recently put on the market an improved type of motor, considerably heavier than the old model, and with details added that make for betterment. The motors are coming through in good shape, and shipments are being made with regularity.

Charles F. Simes, formerly sales manager of the Veeco Co., who enlisted in the U. S. Artillery last August, has been in France for some time past, and a letter received at the Veeco headquarters states that his battery has already been in action on the Western front.

A VISITOR FROM CHICAGO

M. C. Schiff, president of the Vitrola Talking Machine Co., Chicago, Ill., was a visitor to The World sanctum in New York the closing days of the month. On his trip East he was accompanied by Mrs. Schiff. While the visit was a business one in a measure, yet it also marked the twenty-fifth anniversary of their marriage. Both Mr. and Mrs. Schiff enjoyed their silver wedding anniversary in a very pleasant sojourn in the nation's metropolis.

TIMELY SALES SUGGESTIONS

Prepared by J. I. Carroll on General Phases of Salesmanship Are Right to the Point

J. I. Carroll, assistant manager of sales of the Emerson Phonograph Co., manufacturers of Emerson records, sends out regularly to the members of his sales staff interesting bulletins which contain timely suggestions on important topics, and occasional suggestions on general phases of salesmanship. One of his recent bulletins, entitled "Pep," was enthusiastically received by the members of the staff. This bulletin reads as follows:

"The man who's on the job early in the morning and late at night—he's got it.

"The man who's alive to the opportunities in each town, studies to profit by them, and then goes to it with enthusiasm and determination—that's it.

"The man who works the small towns as eagerly and thoroughly as the big, and gets the business in each—is supplied with it.

"The man who enthuses his dealers, gives them sound advertising and practical merchandising suggestions; who is ever alert to help his customer build up a successful department—has a stock of it.

"The man who wastes no time, makes every minute count, covers ground rapidly though thoroughly; who makes friends for himself and his house—he surely has it.

"The man whose appearance is neat; whose speech is clean cut, straightforward and businesslike; whose manner is tactful, courteous, gentlemanly, and who reflects credit on his house—has a fund of it.

"'Pep' is not noise or buncombe. It is life, enthusiasm, energy, preparation, belief and confidence in yourself, your firm, your goods.

"Every salesman who lacks any of the elements of 'pep' should cultivate them—they bring success."

SURPRISED THE RECORD SALESMAN

Selection by Grand Opera Artist of Ragtime and Popular Records Shocks Salesman

A certain shining light in the operatic world was a visitor recently to one of our talking machine establishments, and needless to say his visit caused quite a stir. The best salesman was called into service, and without much difficulty an expensive talking machine was sold. From there he journeyed to the record department to make a selection of records for his library. Immediately the record salesman prepared what he deemed would be an acceptable list of operatic records to supply to this celebrity, and he was led into the most attractive sound-proof booth the company possessed. List in hand, the record expert suggested a duet from "Boheme," a polonaise from "Mignon," the "Caprice Viennois," and other numbers which he thought would appeal to a man famous in the operatic world.

The celebrity politely waited until the young man had come to the end of the list, and his breath as well, then said: "You are very kind to have taken such trouble for me, but as I hear so much opera and good music all the time" (smiling), "I would now like to purchase all the 'bad' music you have. The most syncopated ragtime, the most popular songs I will have if you please—also some jazz band mixtures. You need not play them, just pick me out about two dozen of your very latest and lightest music."

He arose to go. The record salesman still wore a terribly pained expression. He hovered tremulously around—pencil in hand. "But may I not send any opera records?" he asked rather anxiously.

The celebrity was now at the elevator. "Just a complete set of the kind I have named," he returned, majestically, as he stepped out of the shop.

GETTING AFTER THE CASH

A Suggestion in "System" That Is Worth While Where Cash Is Not Enclosed With Order

The following suggestion of E. R. Marshall, which appears in the current issue of "System," may be of interest to talking machine dealers, some of whose business is by mail on a cash basis:

"Sometimes orders that come into an Eastern house are not accompanied by the necessary remittances. A rule of the house requires cash with each order. How to get the remittance without losing the order, or without offending the customer, puzzled the manager until he drafted this letter:

I note that the envelope which contained your recent order contained no form of remittance. The envelope bore no evidence of having been tampered with in the mails, and it occurred to us that perhaps you inadvertently sealed it without enclosing your remittance.

If this is so, will you be good enough to send it by return mail, sending us back the enclosed order? Or, if you did enclose your remittance, send us particulars regarding it.

We hope to have your reply on the back of this letter by return mail.

"Experiments proved that the letter pulled. Now it is written to every customer who fails to send cash with his order."

MEETING OF COLUMBIA DEALERS

Retailers in Indianapolis District Gather for Business Discussions

INDIANAPOLIS, IND., May 4.—Dealers in this city and vicinity who handle the Columbia line of Grafonolas and records held a meeting recently at the Hotel English, where they listened to excellent business talks by Ben. L. Brown, manager of the local branch of the Columbia Graphophone Co., Samuel Lemberg, special representative of the international record department of that company; William Kobin, special representative of the Dictaphone, and H. C. Barnes, of the advertising department of the local paper.

Many phonographs play all records; only the Cheney plays all records *better*

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., May 8.—The Third Liberty Loan campaign has ended and Boston has gone "over the top." The talking machine trade has certainly done its share and both heads of establishments and employes have all been enthusiastic buyers of bonds. Such houses as the Oliver Diston Co., Eastern Talking Machine Co., the wholesale department of the Columbia, M. Steinert & Sons Co., Pardee, Ellenberger Co., Inc., Hallet & Davis Co., and many others having helped considerably to swell the total for this city.

The local business continues to be pretty good, but with the last week of April and the first week of May there was a general improvement all along the line and there is a feeling that the early summer business will be very good. But in the meantime there is a notable shortage of goods which is felt by nearly all the companies.

Great Columbia Meeting

The Columbia people had a great night on Tuesday, April 23. It was the monthly meeting of the dealers and there were some special features to make the occasion something out of the ordinary. Manager Fred E. Mann presided and the 140 or more persons present were entertained by Leon Rothier, of the Metropolitan Opera Co., who graciously consented to take part before going to the opera house where he was to appear later in the evening. Mr. Mann played his accompaniments. Mr. Rothier has seen service in the present war and was in the front trenches at Verdun and has also been at Rheims. Another who entertained was Arthur Fields, who sang quite a number of songs, many of which are familiar to the owners of Columbia records. Mrs. Fields accompanied her husband. A. R. Harris, of the record division of the sales department, came over from New York to give a talk on the June records. A number of the Columbia dealers present came from neighboring and more distant cities.

W. A. Hine and R. F. Ott, of the Columbia forces, visited the factory at Bridgeport, Conn., a short time ago, later going over to New York to visit the executive offices.

Illness of Mrs. F. C. Henderson

F. C. Henderson, of the F. C. Henderson Co., who operates a chain of talking machine departments in a number of the large stores in Boston and other places, has had the sympathy

of his friends in the illness of his wife who recently underwent a serious operation. She is now well on the road to complete recovery.

Joins the Colors

Young Sugarman, a partner of Harry Rosen at his School street talking machine shop, has gone into service and is stationed at the Portsmouth, N. H., Navy Yard.

Victrola on the S.S. "Belfast"

Quite an innovation was tried out on April 29 when the passengers taking the initial trip of the "Belfast" of the Eastern Steamship Lines, Inc., sailing from this city to New York had the pleasure of listening to a high-priced Victrola which had been installed by Herbert L. Royer, who conducts a Victor shop in Chauncey street, this city. Mr. Royer was on the boat, the guest of the management, and he was on hand to give the stewardess instructions from time to time in regard to operating the machine. The selection of records was left entirely to Mr. Royer, and his choice were such as certainly gave pleasure to all on board the boat. It was noticeable that such a machine is admirably adapted for use on a steamer and the music carried well to many parts of the boat. The Victrola is located on the upper saloon deck and Mr. Royer has similarly installed one on the "Camden," which is the sister ship of the line. This route to New York, known as the outside line, has long been popular with talking machine men during the summer months.

Joins Chickering & Sons Forces

F. H. Robie, formerly associated with Steinert & Sons, is one of the latest additions to the Edison and Victor staffs of Chickering & Sons. Business with this house keeps up quite well.

Associated with the Wm. Hengerer Co.

Boston friends of Wallace Currier, who was long identified with the local Victor business, hear occasionally from him in Buffalo, where he is associated with the William Hengerer Co., and in charge of its Victor business. Mr. Currier finds his new association very pleasant.

New Emerson Accounts

Oscar W. Ray, New England manager of the Emerson Phonograph Co., had as a week-end guest the early part of May Arthur H. Cushman, the company's sales manager, who spent several days here going over the New England situation, which is very promising. Some of the new accounts which Manager Ray has just

signed up are Harry Kittridge, of Lowell; the Wentworth Music Co., at Skowhegan, Madison, Brunswick and Waterville, Me.; John J. Forrest, at Lawrence; C. C. Moir, of Cambridge; F. C. Tucker, at Haverhill, and B. L. Couchar, of Springfield. All of these stores are installing the new nine-inch records, which, though out only a short time, have been selling most satisfactorily everywhere.

Steinert Men in the Service

The Arch street Victor headquarters of the M. Steinert & Sons Co., which is in charge of Robert Steinert, is about to fly a service flag to the breeze, for the house has certainly done its share in providing good men for the service of Uncle Sam. There is Emmet Ryan, an outside man for the company, who is now in France attached to General Pershing's staff. Leo McCarthy is another. He was an outside wholesale man, and is now with a unit of heavy artillery. Robert Tiffany is naval aviator and is now in practice at Princeton. Frank Griffin, of the repair department, is in the quartermaster's division at Camp Devens, Ayer. Frank Cunningham, a branch manager, is at the Charlestown Navy Yard attached to the paymaster's department. Charles Von Euw, head of the stockroom, is at Fort Slocum, N. Y.

Represented on Grand Opera Program

The talking machine business was well represented in the program of the Metropolitan Opera Co., which has finished a week's engagement here. Houses included were M. Steinert & Sons Co., Oliver Ditson Co., C. C. Harvey Co., the Victor Co., which had the back page, and the Columbia Co., which was featured by the Gramofola Co. of New England.

Russell Steinert Did Good Work

One of the hardest-working men in the Liberty Loan campaign purchase was Russell Steinert, who makes his headquarters at the Boylston street establishment of the Steinert Co. He was in charge of Precinct 5 of Ward 8 and was an important factor in disposing of a large amount of bonds.

New Sonora Representatives

One of the important deals just closed by Richard Nelson, manager of the New England department of the Sonora, is that of Charles W. Homeyer, a well-known Boylston street sheet music dealer. Mr. Homeyer has arranged a single booth in the center of his warerooms and he already has been able to interest a number

Foresight Proves Its Value

Some years ago we adopted a policy of conducting our Victor business "with the dealer's viewpoint foremost in mind."

By practicing this policy we have acquired a knowledge which in times like the present makes Eastern Victor Service of triple value to the dealer who wants *practical* co-operation from his jobber.

THE TRADE IN BOSTON AND NEW ENGLAND—(Continued from page 20)

of persons in this new proposition. Another new account signed up by Manager Nelson is the C. B. Moller Co., a large furniture house in Cambridge. Thomas Wardell, of Lowell, is still another who will carry the Sonora. Clinton Royer, formerly with the Steinert house, is one of the latest to join the Sonora local forces.

Joseph H. Burke Married

Joseph H. Burke, who is associated with Richard Nelson in the New England management of the Sonora, and who is now making his headquarters at Hartford, Conn., was married on April 29 to Miss Eleanor H. Keyes, of Auburndale. The ceremony was performed at St. Bernard's church, West Newton, and Mr. Burke and his bride started off on a short trip to Atlantic City.

Visited Edison Factory

George Lincoln Parker, who handles the Edison and Victor outfits, paid a visit to the Orange, N. J., factory and laboratories of the Edison Co. a while ago and he returned to Boston convinced that the company is now turning out some of the best records that have been put out since the Edison proposition has been before the public.

Aeolian-Vocalion Progress in Boston

The Boston office warerooms of the Vocalion Co. have been honored with visits from New York of two of its important men in the business. One was Thomas Pritchett, traveling auditor, who was here for several days; and the other was Douglas Langford, one of the traveling men from the company's New York office. Manager Hibshman makes an enthusiastic report over business which, for the month of April, was considerably in advance of the business of the same month in 1917.

Close Many Good Contracts

Wholesale Manager R. O. Ainslie, of the Pathé line, whose headquarters are at the warerooms of the Hallet & Davis Co., has been closing some very advantageous contracts throughout New England. One of the latest concerns to be signed up is the Tuttle Co., of Rutland, Vt., and it has taken a large initial order. One of the new outside men, R. H. Reid, has gone up to Rutland to help open up the department which promises to be quite an adjunct to the commercial enterprises of that city, for the Tuttle Co. has made special preparations to push the Pathé proposition in that territory.

Joins Brunswick Staff

Austin L. Fordham is the latest addition to the staff of the phonograph department of the Brunswick-Balke-Collender Co., which is featuring the Brunswick machine. Mr. Fordham

comes here from the company's retail store in Washington, D. C. F. H. Walter, who is meeting with marked success in introducing the Brunswick throughout his New England territory, is especially proud of the new model 350 which has just been received at the Boston warerooms. It is considered an exceedingly handsome machine by all who have examined it.

Big Showing of Artists

The Boston office of the Columbia Co. from Manager Mann down was well represented at the Boston Opera House on the evening of April 24 when three of the Columbia artists sang in "Rigoletto." These were Lazaro, Mardones and Mme. Barrientos, all of whom acquitted themselves splendidly.

Sympathy for the Patriotic Alsen Family

The many friends of the family of John Alsen, formerly head of the Victor and Edison departments of the George Lincoln Parker warerooms, are full of sympathy for them in the death of Henry C. Alsen, a brother, who as a member of the 104th Infantry, was lately killed

in France. John Alsen himself is now in France where he went with the 101st Regiment and it is of special interest that ever since he has been away his sister, Miss Anna Alsen, who is also with the talking machine department of George Lincoln Parker, has sent her brother The World each month, and he writes home that the magazine is eagerly looked for. Thus is The World to be found in the trenches. There is also a third brother in the family who entered the service. He, too, is somewhere in France.

Visits New York Headquarters

W. H. Gould, sales manager of the educational department of the Columbia Co., was over here from New York the latter part of April. Mr. Gould is most enthusiastic over the way the public have been taking hold of the new line of records which are so eminently adapted to the homes where there are young people.

Henry Kahn, who runs a well-equipped talking machine department in the Jefferson build-

ing, Washington street, was a visitor to the New York laboratories of the Columbia a short time ago.

A wedding recently taking place in the ranks of the Columbia forces was that of Miss Marion Davis, of the wholesale order department, and Charles E. Davis, physical instructor at the Springfield Y. M. C. A. The bride's office associates presented her with a magnificent mahogany chest.

BIG VICTOR GATHERING IN BOSTON

Concert and Lecture by Oscar Saenger in Steinert Hall Attended by Many Victor Dealers

Boston, Mass., May 6.—There was a large attendance at a lecture on voice culture given recently by Oscar Saenger, of New York, at Jordan Hall, and they left at the conclusion of a pleasant evening convinced that as an aid to voice culture the Victor plays an important part. In New York Mr. Saenger is widely known as a vocal teacher, and while he has given these demonstrations there at various times it is understood that this was the first time he has given them outside his home city. There was a group of excellent artists to assist and they were heard in compositions from Verdi, Kreisler, Caesar Cui, Tartini, Delibes, Gluck and Paganini. The records which comprise Mr. Saenger's course were brought into use. In the forenoon there was a meeting of Victor dealers held at Steinert Hall when a large group of men was addressed by Mr. Saenger. For this occasion C. V. Egner, one of the assistants of the traveling department of the Victor

Co., came over from New York. This meeting was a valuable heart-to-heart talk and the dealers, who also were responsible for the evening demonstration and concert, felt well repaid for the time and thought put into the arrangements. James A. Frye, of the Victor Co., who happened to be in Boston at the time, played a part in putting the plan through and in working out the details he had the able assistance of Henry Winckelman, of the Oliver Ditson Co., and others. At the evening affair there was a sort of reception committee—Walter Gillis, Harry Parker, Mr. Newman, of Steinert's; Charles Ulass, of the Eastern; Mr. Bond, of the Eastern Co.; Mr. Freemon, F. C. Henderson & Co., taking an active part.

Following is a list of the dealers co-operating to make the concert and lecture a success: M. Steinert & Sons, Eastern, Oliver Ditson Co., Jordan Marsh Co., Walter Gillis, A. M. Hume Piano Co., Kraft, Bates & Spencer, A. J. Jackson Piano Co., George Lincoln Parker, Chickering & Sons, Shepard Norwell Co., Rosen Talking Machine Co., Conclave Phonograph Co., H. W. Savage, Tosi Music Co., A. M. Phinney, Hyde Park; Codman Square Music Co., J. J. Cannell, Everett; McArthur Furniture Co., Royer Talking Machine Shop, C. E. Osgood Co., Iver Johnson Co., M. J. Elvedt, Allston; and C. C. Harvey Co.

A PROGRESSIVE PLYMOUTH STORE

The United Talking Machine Co., which have very attractive quarters on Main street, Plymouth, Mass., report a very excellent demand for Victor Victrolas and the full line of records which they handle. Their establishment is nicely equipped with three mahogany soundproof

Partial View of Warerooms

booths, and two spacious record racks. Samuel Feldman, manager of the store, is shown in a partial view of the establishment herewith.

EMERSON SELLER SYSTEM A SUCCESS

Boston, Mass., May 6.—By way of proving the efficacy of the self-seller system inaugurated some time ago by Oscar W. Ray, New England manager of the Emerson Co., the following letter is of special interest, and at the same time

Emerson Display at Smith Co. Store

it refers to the accompanying picture of the display at the Timothy Smith Co. out in Roxbury, which is only a short distance from the downtown section of the city. The letter is addressed to the Boston office of the Emerson Phonograph Co. and reads as follows:

"In reply to your request for information in regard to developing of the sale of Emerson records in our store we are pleased to give you the following data: Since increasing the size of our department and establishing the self-seller display racks with a girl in charge, we have increased our sales so that we are now selling between three and four hundred records a week. Previous to our establishing the self-seller display racks with a girl in charge our sales were only between thirty and forty records a week. We have found the Emerson records a very valuable piece of merchandise, not only paying us a good margin of profit, but also bringing a great many people into our store. Very truly yours, Timothy Smith Co."

F. B. CURRY INSTALLS BOOTHS

In Talking Machine Department of Jordan Marsh Co. Store in Boston

Boston, Mass., May 8.—Jordan Marsh Co. have had recently installed in their talking machine department a number of new "Curry" soundproof demonstration booths and record cases. These booths are of Honduras mahogany and lend to the department a very fine appearance. C. Hewett, manager of the department, enthusiastically expressed his approval of the installation to Frank B. Curry, 19 Wareham street, this city, who has gained quite some prominence through the installation of his booths and record cases in the new Columbia shop which was opened in Boston about a year ago.

Manufacturers—Jobbers—Dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION ball-bearing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison machines. Made in nickel and 24 carat gold finish, extra fine quality.

Tone arms fitted to Edison machines only

The PERFECTION Flexi-tone reproducers will also play Victor and Columbia records on all types of Pathe machines, as they can be attached to the joint that is being sold with the machine for playing these records.

PERFECTION FLEXI-TONE reproducers No. 3, No. 6 and No. 7 fit all types of Victor and Columbia machines. Made in nickel and 24 carat gold finish, extra fine quality.

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from highest pitched soprano, to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Phonograph manufacturers can have PERFECTION FLEXI-TONE reproducers fitted to their machines. Write for prices, information, etc.

PHONOGRAPH MANUFACTURERS

We have 6,000 sets of Universal Tone Arms and Reproducers, Nickel finish, that can be used on any make of phonograph. These Arms and Reproducers are ready for quick delivery. Write us for quantity prices, information, etc.

THE FOURFOLD SALES APPEAL OF THE

AEOLIAN-VOCALION

IT is more and more coming to be recognized in the music-trade that the Aeolian-Vocalion has the most complete sales appeal of any phonograph on the market. The history of the Aeolian Company is one of extremely active development. It has almost unlimited resources here in the United States and abroad for the creation and development of musical instrument features. The Aeolian-Vocalion, though one of its younger, is one of its greatest and most successful enterprises.

The Aeolian-Vocalion possesses a number of distinctive advantages, among which are four that stand out particularly for their musical value and sales promotion. The primary appeal is that of *tone quality*. Added to this are its up-to-date and efficient mechanical features, such as a new Universal Tone Arm, a superior Automatic Stop, its artistic and fascinating tone control, the famous Graduola, and its uniquely beautiful outward appearance.

These four great points of advantage, coupled with the moderate prices at which the Vocalion is sold, make it by far the most attractive phonograph proposition today.

Among these features will be found an appeal to all classes of people, the highly trained musician, the wealthy connoisseur, the more modestly situated, the young and the old. People

of discriminating taste, musical and artistic, are everywhere finding the Vocalion irresistible.

The volume and quality of the advertising exploiting the special features mentioned above are indicated by the advertisements upon the three following pages, which are part of the aggressive advertising campaign conducted in newspapers and national magazines.

Aeolian service, which is being further strengthened by the establishment of convenient distributing points throughout the country, and the breadth and fairness of Aeolian business dealings, added to the emphatic superiority of the Vocalion itself, make the representation of that instrument one of the most profitable, desirable and satisfactory business connections that can be made.

***B**y virtue of knowledge, experience and equipment, The Aeolian Company was the logical source from which a higher development of the phonograph should spring.*

The privilege of unfettered self-expression in music was first given to mankind more than a quarter of a century ago by The Aeolian Company.

Successively, the reed-organ, the pipe-organ and the pianoforte were taken by this company, carried far beyond existing tonal standards and made available for all to play.

The Aeolian-Vocalion's great point of departure from other phonographs lies in its revolutionary device (the Graduola) for controlling expression.

By using the Graduola one may actually play the records—may shade and color the tone to suit the fancy and thus introduce the delicate variations that every artist himself introduces in his performances.

THE PHONOGRAPH MADE BY THE WORLD'S GREATEST MUSIC HOUSE

The AEOLIAN-VOCALION

WHEN the Aeolian Company decided to build a phonograph, it brought to the problems involved an experience and resources unparalleled in the music industry. This Company, through its genius in developing new musical instruments, and its success in raising the standard of those already established, had assumed a position of unequivocal leadership.

It had become the largest manufacturer of musical instruments in the world, with 14 factories in America and Europe and branches and representatives in all the world's important cities.

It had originated the Pianola, the first and most widely known of the modern instruments called "player-pianos" and the one that has always been recognized as the standard of all instruments of this type.

It had developed the modern residence pipe-organ and had become the largest manufacturer of these costly and magnificent instruments.

It was responsible for the greatest of all pianofortes—the Steinway, the Weber and the Steck Grand Duo-Art Pianos.

And it was credited with having done more towards raising the standard of piano-tone and quality, than had ever before been accomplished by any single manufacturer.

The Tonal Superiority of the Aeolian-Vocalion

It was this imposing and successful music-house from which the new type of phono-

graph—the Aeolian-Vocalion—sprang.

With The Aeolian Company's knowledge of tone-production through various mediums—strings, pipes, sound-chambers and resonant surfaces—this Company experienced little difficulty in improving the phonograph tonally.

Faults, which others with less knowledge and experience in acoustics had been unable to remedy, were wholly or in great part, overcome.

In the Aeolian-Vocalion, stridency or muffling of tone were absent, surface scratch was almost eliminated, depth and free natural tones of correct timbre were secured.

The Graduola Makes the Phonograph a Real Musical Instrument

Important as was the tonal development of the Aeolian-Vocalion, however, this instrument represented in another way a still greater advance in phonograph development.

Tone—or expression control, as offered by its new and exclusive feature—the Graduola—is what essentially makes the Aeolian-Vocalion the phono-

graph of ultimate type toward which progress has been tending.

No music-producing means ever devised, that did not afford opportunity for spontaneous and artistic expression control, has been seriously considered by musicians or taken a permanent place in the music-world.

For the first time in the history of the phonograph this opportunity is offered by the Aeolian-Vocalion.

How vastly it improves the phonograph, how much more interesting it makes both the instrument and its records, and how satisfactorily it meets the desire that practically all human beings feel, for some way to express their music-thought, is written in the wonderful success that has been so quickly achieved by the Aeolian-Vocalion.

Plays All Records

The Aeolian-Vocalion is the ultimate phonograph. Actually it would be difficult for imagination to picture a more completely satisfying instrument.

In addition to its tonal superiority and the new and wonderful privilege it offers for playing and coloring its music with your own feeling, it offers the great advantage of playing *all* records, thus making the performances of not one group, but practically all the world's best musicians available to the owner of an Aeolian-Vocalion, while its cases are far more attractive than any phonographs have hitherto possessed.

Vocalion Prices are—Conventional Models, \$45 to \$375; with Graduola from \$110. Beautiful Models in Prevailing Period Styles

No. 1514

Price

\$490

The Period Vocalion here shown is thoroughly worthy of the place of honor in this charming setting.

THIS
VOCALION

Although Louis XIV in general design, has characteristics which make it equally suitable for various English or Italian interiors.

The AEOLIAN-VOCALION

during the three years it has been on the market has gained universal recognition not only as a *greater phonograph*, but as a *playable musical instrument*. It is known as the greater phonograph because of its scientifically faithful reproduction of the tones of all instruments and voices. It is recognized by musicians everywhere as the first phonograph to take rank as a *real musical instrument*, because of the *Graduola*—which enables anyone to play the records personally—adding the spontaneity and life to the record which has hitherto been lacking.

Now again taking the lead, the Aeolian Company is introducing sixteen entirely new and original models of Period Vocalions. These Period Vocalions are designed to harmonize with the fine furniture which is being used in the home of today, and which takes its motifs from the famous cabinet designers of the historic past.

These new Period Vocalions are so beauti-

ful in design, material and finish, and yet so moderately priced that they have already caused a sensation wherever they have been exhibited. In price they range from \$215 to \$650.

The attention of dealers is directed to the opportunity that this new line of Period Vocalions presents. Popular demand is turning more and more toward good taste in furniture—and even the most modest of homes are now being furnished in accordance with some historic “period.” Here then, at practically regular phonograph prices, are sixteen handsome models harmonizing with these different furniture periods. This new line of Period Vocalions is being given wide and attractive publicity. It will attract the *best class* of people wherever it is put on sale.

Any progressive merchant will appreciate what an exclusive representation of this new line of Vocalions would mean.

Territory is now being assigned for the representation of the Aeolian-Vocalion. Address the Aeolian-Vocalion Department

CLEVELAND TRADE EXPRESSES CONFIDENCE IN THE FUTURE

Business Active But Stock Scarce—Talking Machine Men Do Their Share for Liberty Loan—Talking Machine Dealers' Concert Postponed—Attractive Window Displays—News of Month

CLEVELAND, O., May 7.—Dealers express confidence in the future. All agree that dealers will have to make the best of the situation, now that manufacturers are talking of curtailing their output. There are many handicaps to the business in Cleveland, but distributors and dealers alike are looking at the situation with the hope that conditions will brighten up later.

Cleveland's talking machine men certainly did their share in putting across the Third Liberty Loan. Harland H. Hart, president of the Music Trades Association, was chairman of a committee which directed the loan campaign in the Arcade, where scores of stores and offices are located, and where tens of thousands of people pass daily. At the Euclid avenue entrance Mr. Hart and his committee kept soloists and pianists busy during the noon hour to hold crowds. Mr. Hart devoted the greater part of his time to the bond sale campaign and declared he was glad to do his part.

Charles K. Bennett, president of the talking machine men's organization, as well as the members, have also been doing their bit regularly.

The concert and benefit proposed a few weeks ago by the Talking Machine Dealers' Association of Northern Ohio for the benefit of Y. M. C. A. and Knights of Columbus workers in army camps has been called off indefinitely. The dealers, at their April meeting, decided in view of the fact that the "Y" people will put on a similar stunt, the proposed benefit would interfere with "Y" plans.

In announcing the calling off of the proposed benefit Charles K. Bennett, president of the Talking Machine Men's Association, did not say whether the project will be again taken up later in the spring or summer. It was proposed to give the entire proceeds to "Y" and Knights of Columbus workers. Difficulty was also experienced in obtaining artists who sing for talking machine record manufacturers, as these singers are engaged in Liberty Loan campaigns.

The dealers were addressed by Rex C. Hyre, assistant secretary of the Cleveland Music Trades Association. He is attorney for the association members and discussed long-time payment plans for musical instruments, arguing against these long-drawn-out sales. Mr. Hyre's talk was similar to one he made at the annual meeting of the Music Trades Association, several weeks ago at the Hotel Winton banquet.

Cleveland's music dealers responded faithfully during the third loan campaign and their efforts contributed much in making the sale a success. Music of all kinds played its role in meeting, rallies and special sale stunts in and out of doors.

Talking machine dealers are making some unusually attractive window displays these days which demonstrate their patriotic sentiments. The Eclipse Musical Co.'s Euclid avenue retail store has one of the most attractive displays of Victor machines and records in the city. The window is a decided novelty—a different type from others. The talking machine offerings of the Fischer Co. have never appeared to better advantage, while the Collister & Sayle Co., Victor dealers, also had a novel display window last week. Other concerns utilizing their windows to advantage are the B. Dreher's Sons Co., the Starr Piano Co., the Wolfe Music Co., the Cleveland Piano Co., the Muehlhauser Bros. Piano Co., Sonora dealers, and the "Harmony Music Shoppe," of the Hart Piano Co., whose Boy Scout window introduces a miniature camp in which the talking machine plays a part.

A concert and benefit for Italian war orphans was given at the Hotel Winton the evening of May 2, featuring Signor Ricardo Stracciari, the noted Italian concert singer. Stracciari records by the Columbia Graphophone Co. were sold at auction and the sale realized quite a neat sum in addition to that received for tickets. Stracciari's songs were well advertised through Columbia dealers in the city.

The Brunswick-Balke-Collender Co.'s Huron road store is featuring the new sound reproducer the firm has been extensively advertising. The Ultona promises to make a quick hit with the public. The instrument was exhibited here by a Chicago representative of the firm several weeks ago and was hailed with delight. The Cleveland office of the company reports a good April business in the sale of Brunswick talking machines.

The Ott Piano Mfg. Co. is offering a large line of talking machines. These machines are assembled in the plant, Euclid avenue and East Nineteenth street, this city.

The Kaiser Music Store, in the Arcade, swatted the German Kaiser a few days ago when the word "Kaiser" was dropped. This store has borne this name since 1848. The concern is now known as the R. L. White Music Co. Mr. White, owner of the store, has attested his loyalty to the flag by dropping the widely-advertised name of his place of business.

Cheney talking machines are very popular in Cleveland. In many homes these makes have supplanted other phonographs.

The biggest electric sign flaunted during the night by any talking machine concern is that which advertises the Edison. Few electric signs in Cleveland attract more people at night than this spectacular sign over the distributing offices of Edison machines. No other phonograph distributing agency approaches the Edison illuminations which are close to the Hotel Statler, in one of the most congested districts of the downtown retail sections.

The Phonograph Co. April 29 increased its capital stock as an Ohio corporation from \$150,000 to \$500,000. The increase of capital was for the purpose of expanding the company's business. The company distributes Edison ma-

chines and records for all of Ohio, and D. W. Smith is president, and L. N. Bloom secretary.

"Business is surprising us," said Mr. Bloom in commenting on the increase of capital stock. "We simply are growing and the increase became necessary under our plans for developing. We are getting a fair stock of goods, but it usually takes thirty days to get an order for machines filled."

The Colonial Furniture Co., which handles the Vita-Nola talking machine at retail in this city, report a very excellent business. These instruments, which are made by the Vitanola Talking Machine Co., of Chicago, are certainly appealing to a larger clientele of Clevelandites.

BIG INCREASE IN LOUISVILLE

Talking Machine Department of Kaufman-Straus Co. Reports 300 Per Cent. Increase

LOUISVILLE, KY., May 7.—H. V. Boswell, manager of the talking machine department of the Kaufman-Straus Co., this city, reports that last month they had a fairly good business with a 75 per cent. increase over the same month last year, but April showed a still finer business with an increase of 300 per cent. This house is doing some splendid advertising which is bringing results. Their business extends over the States of Kentucky, Tennessee and Alabama, and even as far East as New Jersey. Recently they sold a C200 Edison in a Tennessee town, and also filled an order the other day from Newark, N. J., for an Edison C150, only five miles from the Edison factory. This concern is "digging" for business all the time and this emphasizes that it pays to be constantly "on the job."

MANAGER OF VICTROLA DEPARTMENT

E. A. Christman, who some time ago left the employ of the G. C. Aschbach Music House, Allentown, Pa., to enter other fields, has returned to the service of that company as manager of the Victrola department.

Talking Machine Men

are becoming more and more interested in selling our pianos, as indicated by inquiries recently received through this advertising.

The slight additional investment means many dollars in increased business. There is practically no extra overhead expense, AND—you receive the active co-operation of what are generally regarded as the most progressive and successful Piano Manufacturers of this country.

Your piano business will help your talking machine business—Your talking machine business will help your piano business.

THE LATEST CREATION IN MUSIC

The PHONO-GRAND

(Not Coin Operated)

The Most Complete Musical Instrument

Combining in one dainty case the music of the world's most popular instruments

The Piano and The Phonograph

Both electrically operated
Playing all rolls and all records

The Piano plays all Standard 88 note Player Piano rolls. It is especially adapted to the Q R S Expression Rolls with which it reproduces naturally and beautifully the playing of the master pianists.

The Phonograph is of the latest type and plays all phonograph records. Its tone quality is unusually full and clear. It is operated by a separate electric motor independent of the piano.

Height 55 inches. Width 34 inches.

The first announcement of this instrument was made last October. Orders came to us immediately in such quantities as to compel us to withdraw further advertising.

A Demonstrated Success

The success of this instrument is assured. Six months' trial before the retail public has proved its utility and wonderful attractiveness.

The representation of the Phono-Grand is

HOW SOME GERMANS "OPERATE"

Banker of Berlin Poses as Talking Machine Dealer and Develops Big Company Which Brings Him in Contact With U. S. Army

Nine days before the world war started in 1914 Johann Mayer arrived in New York and passed the Immigration Inspectors as an ordinary German. He had money, how much is not stated, and within a week or two he started a little shop where he sold talking machines and records. In Berlin he was a banker, but that fact Mayer carefully kept from those with whom he became acquainted. Four weeks ago agents of the Department of Justice arrested Mayer, and since then he has been in the Essex County (N. J.) jail pending action by the Federal authorities.

The investigation, so far as Mayer is personally concerned, is said to have been completed, and a report on the case was sent to Attorney General Gregory in Washington.

For three years after landing in New York, according to officials, Mayer apparently devoted all of his time to managing the little talking machine store. He was quiet and apparently harmless, paid his bills promptly, and always seemed to have plenty of money, although his business was not large.

For a little more than four months after Congress declared war Mayer continued his talking machine shop; but in August the business went out of existence, and when next heard of Herr Mayer had organized the Emm and Ess Trading Co., soon to be followed by another company, of which he was also a head, known as the Military Sales Corp. Mayer was now selling military equipment to officers and enlisted men.

The draft men were called to the colors and began to mobilize. Mayer decided to establish branches near some of the cantonments, and picked out Camp Jackson at Columbia, S. C.; Camp Sevier at Greenville, S. C.; Campe Greene at Charlotte, N. C., and Camp Wheeler, near Augusta, Ga. On the outskirts of each of these big soldier cities the German opened a store; in each he placed stock valued at about \$12,000.

For more than five months the business flourished, nobody dreaming that the man who directed it was a loyal subject of the Kaiser. Sol. Savery, another man concerned in the business, is said now to be in France and to have organized a branch near one of the big American overseas camps.

Savery says he was born in the East Indies, and that he is a loyal friend of the Allies. But he bears a striking resemblance to Mayer, according to the Federal authorities—a resemblance so close that he might easily be taken for a twin brother of the German head of the Emm and Ess concern. All information concerning Savery is withheld by the Federal authorities. It was not admitted that he was under arrest or surveillance in France.

On March 16 agents of the Department of Justice went to a house in Remsen street, Brooklyn, and arrested Mayer. At the same time agents of the Government entered the various stores near the cantonments and seized all the data found, including information relating to military transportation in the United States, facts concerning the camps, the number of men in them, and the nature of their equipment.

NEW WILSON-LAIRD APPOINTEES

H. F. Thornell Becomes Sales Manager and Henry A. Day Office Manager of the Wilson-Laird Phonograph Co., of New York City

The Wilson-Laird Phonograph Co., New York, manufacturers of the Bliss reproducer, have announced the appointment of Harrison F. Thornell as sales manager of the company, and Henry A. Day as office manager. Both of these appointees have already assumed their new duties, and Mr. Thornell is making plans for an aggressive campaign in behalf of the company's product.

H. F. Thornell is well known in the talking machine industry, having been associated with the mechanical and merchandising divisions of the business for many years. He is generally recognized as one of the best-posted members of the trade on recent developments in the perfection of reproducers, etc., and his thorough knowledge of this field will doubtless be reflected in the activities advanced in behalf of the Bliss reproducer.

Mr. Thornell has been visiting the trade throughout the country, and has instituted a campaign to interest the Edison dealers in the Bliss reproducer. This campaign has produced excellent results, and many Edison dealers have placed good-sized orders for these sound boxes.

The company is making plans to have an attractive exhibit during the convention week of the Edison dealers, June 3-8, and as its headquarters at 29 West Thirty-fourth street are directly opposite the Waldorf-Astoria Hotel, where the meetings will be held, the Edison dealers will have an opportunity of inspecting the Bliss reproducer at their convenience.

GODARD FEATURES THE VOCALION

Bringing This Product to the Attention of the People of Syracuse and Central New York

SYRACUSE, N. Y., May 6.—Godard's Music House, 215-17 James street, this city, is conducting an active campaign in behalf of the Aeolian-Vocalion, emphasizing the special individual qualities of this product to the people of Syracuse and Central New York. The importance of a talking machine that will harmonize with the furnishings of the home are brought to the attention of the public, and it is pointed out that the Vocalion in a wide variety of period case designs covers the whole range of present-day requirements. The motifs of these designs have been taken from historic pieces—the Gothic, Elizabethan, Italian, Renaissance, Jacobean, William and Mary, Queen Anne and other periods.

HOLDS SPECIAL SALE

R. Montalvo, Jr., the well-known talking machine dealer of New Brunswick, N. J., recently held a special sale of certain makes of machines and records at his store, 209 Neilson street, his lease of the premises running out on May 1. Mr. Montalvo still maintains another very successful store in New Brunswick,

A NEW EDISON SALES PLAY

"The Dotted Line" to Be Presented at Forthcoming Dealers' Convention in June

Two years ago one of the big features of the Edison dealers' convention was the sales play, "Bought and Nearly Paid For," and last year this principle was carried out further with an act that made even a deeper impression, called "Mr. Guy Wise, Esq."

There is being prepared for this year's Edison dealers' convention, which will be held at the Waldorf-Astoria June 6 and 7, another sales playlet called "The Dotted Line," which will illustrate some good methods of getting the customer's signature on the dotted line. As in former years, it is expected that a private view of this playlet will be given for the advertising and sales experts in New York City, and it is understood that "The Dotted Line" will be as enthusiastically received as the two plays that preceded it.

FRIEDA HEMPEL TO BECOME CITIZEN

Miss Frieda Hempel, the newest Edison star, who will shortly become an American citizen, has announced her engagement to a prominent silk manufacturer of New York, where she will make her home.

By this step Miss Hempel will forfeit property of considerable value in Germany, because she is disobeying the dictates of Kaiser Bill.

LANDAY WINDOW WITH A HISTORY

Striking Display of Landay Bros. Based on Victrola Used in Crocker Land Expedition

Landay Bros., New York, prominent Victor wholesalers and retailers, have always made it a policy of utilizing their window display space to excellent advantage, and the windows of their various stores in the high-class shopping districts have won favorable comment from members of the talking machine industry and well-known advertising experts. These displays have usually been prepared by the managers of the various stores, who, in addition to their merchandising ability, have proven themselves efficient and successful window dressing experts.

A recent window display in the Landay store at 563 Fifth avenue, which was prepared by H. D. Berkly, manager of the store, is shown herewith, and this window has a human interest ap-

peal that made it the center of attraction during the week that it was displayed.

The keynote of this display was the fact that Donald B. MacMillan, of the Crocker Land Expedition, and famous Arctic explorer, who recently returned from a lengthy trip in the Arctic regions, carried with him a Victrola No. 9, in

A Landay Window Display of Unusual Interest

order to furnish entertainment for the members of his expedition and the native Eskimos in the lands that he visited.

The original Victrola that Mr. MacMillan carried on his expedition is shown in this display, together with many unique and interesting supplies which formed an important part of this expedition. At the left-hand side of the window are displayed several photographs, including a picture which shows the Eskimos listening to a Victrola, and another illustration featuring the Eskimos busily engaged in repairing a Victrola. Included in the display are many unique products incidental to an Arctic expedition, and the fact that the average layman very seldom has an opportunity of viewing these supplies contributed to the distinctiveness and success of this window display. Above the Victrola was placed the original flag which Mr. MacMillan used at the Crocker Land Expedition headquarters.

PATHE RECORD PUBLICITY

The Pathé Frères Phonograph Co. recently mailed to its dealers a proof of the artistic full-page advertisement that appeared in the Saturday Evening Post, featuring the new Pathé record of the "Marseillaise," sung by Lucien Muratore, the great French tenor, who is a member of the Metropolitan Opera Co., and records exclusively for the Pathé Frères record library. Accompanying the proof of this page was a suggestion for newspaper advertising, and there is no doubt but that the record of the French national anthem, sung by this renowned tenor, who has seen service in the French army in the present war, will meet with a ready sale.

Dayton Motors

Sold all over the world. Used in all high-class talking machines.

The Thomas Mfg. Co., 322 Bolt St., Dayton, Ohio, U.S.A.

Utilizing St. Paul's Municipal Library For Free Talking Machine Recitals on Sundays

St. Paul has been presented with a musical innovation by Miss Blanche Sorenson, of the educational department of W. J. Dyer & Bro., and St. Paul likes the innovation. The latest enterprise of this versatile and energetic woman is to produce a series of free Sunday recitals by Victrolas in the municipal library—library recitals she calls them. The programs begin at 4 p. m. and are arranged to continue about one and one-half hours, being composed of about fifteen numbers with suitable intermissions for explanatory remarks. The recitals show added attendance with each recurring Sunday until the assembly room of the library is taxed to contain the music lovers bent on hearing the concert. The two pre-Lenten recitals in particular attracted much attention through the careful arrangement and selection of the numbers for the occasions, which ranged from the old classics of ancient church music to the modern sacred songs by John McCormack, Alma Gluck and Schumann-Heink. The recitals are prefaced by instructive talks on the general theme of the day by Miss Sorenson. That she is contributing much to the musical life of St. Paul by this enterprise there can be no question, but the canny dealer will ask if the plan will sell Victrolas. Miss Sorenson says that it will and she is a business woman of marked capacity.

Miss Sorenson, who was connected with the educational department of the Victor Co. for two years before becoming associated with the house of W. J. Dyer & Bro. last fall, has achieved a distinct success in her school work. Her aim is to have the talking machine recognized as one of the indispensable aids to teaching in the public schools. It long has had a place in the music classes and for amusement and entertainment, but also it has a distinct place and duty in the classroom. It can be utilized to advantage in the penmanship classes by stimulating speed and rhythm in writing. By requiring pupils to write certain letters in time to music, suited to the movement in writing, they acquire a swing or rhythm which, by careful manipulation of the talking machine, may be developed into speed.

The study of geography, of history and of English literature is stimulated by the playing to properly chosen music, while folk dances and foreign language study virtually demand the constant use of talking machines to obtain the best results.

Ornithology and kindred subjects also are taught with the aid of talking machines. It's worth while to study Miss Sorenson instructing a class of St. Paul tots with the aid of bird slides and talking machines. The children simply absorb the instruction through every faculty they possess.

It's worth while to tag around after Miss Sorenson for a whole week, if one has the vitality, and observe her manifold duties.

As an instance, she will hear of a school, not necessarily a public school, that is without a Victrola. The first step is to create a demand among the teachers and pupils for such an instrument. She does it in various ways known to herself. The next step is to provide the money. She does this, too. She goes right out among the parents and business men in the district and raises the money. The next step is to dedicate the Victrola with proper ceremony. She does that, too. She arranges the concert, prepares the program, decorates the rooms, and does anything that may be needed. If piano music or a vocal solo is needed here or there for the sake of varying the program she will attend to that herself for she is a skilled performer on the piano and a gifted as well as a thoroughly schooled singer.

And besides she is a fluent and interesting lecturer. The result is that Miss Sorenson is

about the busiest mortal in the entire city of St. Paul.

Reference has been made to the Sunday concerts known as the library recitals, but regularly every Friday afternoon she has charge of the Victrola and Pianola recitals at Dyer's music hall, and regularly every Saturday morning during the school year she is in charge of the children's recitals. These, by the way, were an innovation, by Miss Sorenson. The Friday afternoon recitals have become an established institution. In addition to the Victrola and Pianola numbers some well-known soloist is invited to contribute a few numbers during the recital.

Pianists, violinists and singers of talent appear at the Friday and Sunday recitals and are

pleased to participate on the programs, for they always are assured a large and appreciative body of listeners. Often Miss Sorenson essays the solo roles and invariably receives hearty and generous approbation for her numbers. Good judgment is always displayed in the selections listed—in fact, they are models of program making as far as records are concerned.

Miss Sorenson was induced to come to St. Paul by George A. Mairs, manager of the Victrola department of the big Dyer establishment. It may be revealed that he is more than satisfied with the engagement, and with the extra business accruing therefrom.

The success of every institution is built upon a combination of individual selves.

Style 5H—Holds 100 Records

Filing Cabinets for use with Victrola VIII or IX; Columbia Grafonola 15, 25, 35 and 50; Aeolian Vocalion D. & E., and other portable styles of talking machines.

Automatic RECORD CONTAINER

A Durable Album— that opens itself

- No weight of records to handle
- No broken or misplaced records
- 100% increased capacity
- Every record accessible
- Automatic in opening
- Files all records
- Sells on sight

Mr. Dealer:

How will your customers house the thousands of records you have sold them? How can you get them to buy more records today?—

Sell them an ample and efficient filing cabinet.

Automatic Container Cabinets meet these requirements—they are simple and durable too. They satisfy and please your customers—you cannot afford to be without a sample in your salesroom.

Mr. Manufacturer:

Is your competitor "beating you to it" on files? Equip your line with Automatic Containers—they cost no more—hold more records—and sell your machine.

Automatic Insert Files will re-equip any standard Talking Machine with durable up-to-date files—on dealers' sales floor or in customers' homes. Every dealer and jobber should carry them in stock.

Automatic Carrying Cases for Salesmen and Repairmen are ideal—constructed on the same principle as our Record Containers. Every dealer and jobber should equip his salesmen with them to increase their efficiency.

Dealers Should Co-operate with the Manufacturers in Educating the Buying Public

Talking machine dealers should be especially eager at this time to avail themselves of all co-operative service offered to them by the manufacturers whose goods they handle. The leading institutions of the industry have set a pace, as far as window bulletin displays, mailing circulars, electros for use in local advertising, poster cards, etc., are concerned, that is probably the most elaborate and the most brainy offered by any of the great American industries. In fact, four and five colored posters, the handiwork of the finest artists and printers in the country, have been so common that many talking machine dealers have frequently failed to appreciate their real value. The reports compiled by several of the leading manufacturers show that the percentage of dealers who make extensive use of the service provided for their benefit is not much over fifty per cent.

The main reason why dealers have not paid greater attention to this service undoubtedly lies in the fact that their business ran continuously good without special exploitation of the machines and records which they handled. But at the present time, even though orders continue to be far in excess of the dealers' ability to supply, it is important to make use of the service which the manufacturers are offering. In the first place, nobody knows better than the manufacturer what he is going to be able to supply as the war goes on. Therefore, his service to the dealer will be largely built around what he knows he is going to be able to produce in the nearest to satisfying quantities. Therefore, the dealer who utilizes and co-operates with the manufacturers' service in war times will truly be feathering his own nest.

In the second place, the service offered by manufacturers is bound to be increasingly powerful as the war goes on. The prices on printing have advanced not less than twenty per cent., on paper not less than fifty per cent., on postage just fifty per cent., and on all the other materials used in the manufacturer's service to his

vice is going to be "Make everything count." This being so, the talking machine dealer should pay particular attention, as in this way he may keep his promotion overhead low, keep his store in line with the policies expounded by the parent manufacturer and steadily increase the prestige his establishment enjoys in its home community. It is a time to eliminate all waste, and there would be an obvious waste of a very costly service and brain power should the dealer fail to display the proper interest in what the manufacturer is trying to do to help him while our country is at war.

"The Slogan for Dealers' Service should be, 'Make Everything Count.'"

dealers in like proportion. Obviously this means the cost of the free service supplied by the manufacturer has gone up a total of not less than fifty per cent. In the face of this condition, the dealer can rest assured manufacturers are going to condense everywhere and in any way possible. Expensive circulars, posters and bulletins are going to be supplied only when there is a very pertinent message to deliver. Novelties, decalcomanies, etc., for use in interior and window displays are going to be distributed with much care so that they are put only in the hands of those who will make fitting use of them. The slogan for dealers' ser-

NEW VICTOR NUMERICAL CATALOG

Within the course of a few days the latest of the successive editions of the Victor numerical catalog is to be mailed to the Victor trade. This issue of May, 1918, will involve several new features. A new method of binding will be used which makes it possible to open up the catalog flat at any desired position, and which will be of great convenience to every user. Another special feature is the six ruled spaces preceding each record number, which provide an excellent method of taking stock and for keeping track of the demand of each individual record. In addition to this there are extra numbered ruled spaces for the new records announced each month and for use in this space gummed numerical pasters will be supplied as the new records are released.

The American Phonograph Co., Grand Rapids, Mich., has been incorporated with capital stock of \$10,000 to manufacture musical instruments. The incorporators are: Peter Meeuwesen, G. L. Dornbos and Cornelius Essenbager.

RECORD WINDOW DISPLAY FOR JUNE

Dealer Service Department of Columbia Co. Has Prepared Very Artistic Display Which Should Make a Strong Appeal to the Trade

The dealer service department of the Columbia Graphophone Co., H. L. Teurs, manager, has prepared for the use of Columbia representatives a very artistic window display for the June records. This display, which is the seventh monthly issue of this service, is reproduced herewith, and, judging from its appearance, it will be one of the most successful that has so far been prepared by this department.

Columbia Record Window Display for June

The principal feature of the June display is the direct tie-up with Columbia national advertising, and it utilizes the same illustrations, the same copy, the same colors, and the same general appearance that is carried by the Columbia Co. in its magazine advertising, supplement covers, and other literature that will be used for the June records. Seventeen pieces, each indicative of "Joyous, sparkling, up-to-the-month music on Columbia records," lithographed in eight brilliant colors, constitute this complete display.

Records in illustrations and copy are the dominating feature of the whole display. Each small and large card has a reproduction of a

Columbia record thereon, and the appearance of all these records, supplemented with the regular Columbia commercial record, make a distinctive record display that should attract the favorable attention of all passers-by.

Another feature of this display is a set of unique price cards for Grafonolas, which depict a large American Eagle swinging on the tone leaves of the Grafonola type "K," with a medal and ribbon effect suspended in the same fashion on the Grafonola type "F," and a miniature trench scene where the boys are "going over the top," for the smaller type instruments. These new price cards, together with the large central figure and the four smaller cut-out records, which mention certain classes of music to be found in the Columbia record catalog, are of a permanent nature, and may be used effectively and indefinitely with almost any window trim or interior decoration.

These displays are sold complete in seventeen pieces, at an extremely nominal price, and many dealers have placed their orders for them, notwithstanding that occasionally their windows are too small to use some parts of the outfit. Quite a number of dealers have advised the dealer service department that they have utilized certain banners and cards with a small Grafonola and similar smaller material as the basis for their display, and have received results which well warranted the expenditure for the whole display.

Every Columbia dealer who has experimented with this display material is enthusiastic in his reports of the results obtained by the use of this service. In fact, subscriptions have been received in such large quantities from the Columbia distributing branches at the present time that more than three times the number of sets are now being turned out than were originally contracted for by the department.

Putting real pep into business is not done with a bass horn. It's the soundless baton that speeds up the band.

EDISON STANDARDS OF PRACTICE

Valuable Booklet for Use of Amberola Dealers Has Just Been Issued

Thomas A. Edison, Inc., have just brought out a booklet for the guidance of their Amberola dealers entitled "Standards of Practice." The data for this book has been gathered from many

New Booklet for Amberola Dealers

sources and represents years of study, based on experiences and information secured from successful Amberola dealers and other authorities on retail phonograph merchandising. The various paragraphs cover such items of importance as store arrangement, storing of records, window displays, recitals, suggestions for advertising, motion picture slides, circularizing, service to owners, canvassing, advertising, repairs, general adjustments and general instructions, and it is felt that the book will be in great demand, as it answers many questions of interest to Edison Amberola dealers.

Queer how so many would-be salesmen keep themselves on low salaries because they fail to follow the cardinal rule of salesmanship—courtesy.

A PROGRESSIVE SONORA MAN

Is L. M. Cole, Traveling Representative of the Gibson-Snow Co., Syracuse—Reports Great Activity in His Territory at the Present Time

L. M. Cole, traveling representative of the Gibson-Snow Co., Syracuse, N. Y., Sonora jobbers, was a visitor to New York this week, and during the course of his stay in the metropolis called at the offices of The Talking Machine World. Mr. Cole, who has been associated with the talking machine industry for many years, thoroughly appreciates the importance of a progressive trade paper, and has frequently suggested to his dealers that they subscribe for, and read, The Talking Machine World from cover to cover.

Mr. Cole leaves nothing undone to co-operate with the dealers in his territory in every possible way, and in order to keep this service before them at all times mails them many unique forms of literature, which emphasize the sales possibilities of the Sonora phonograph, and call attention to some of its many qualities. Mr. Cole recently mailed to his dealers a copy of a very interesting publication, "Sonora Policy," which was compiled by George E. Brightson, president of the Sonora Phonograph Co. Together with this booklet, Mr. Cole sent a brief resumé of the Sonora dealers' convention held in Syracuse last month, together with several personal and individual touches which made this literature well worth reading.

While here Mr. Cole commented upon the fact that the dealers in his territory are closing a splendid business, and that the great majority of them report sales totals for the first four months of this year well ahead of 1917. They are all "cashing in" on the mammoth Sonora advertising campaign, which includes practically every form of profitable publicity.

BIG BUSINESS IN A SMALL TOWN

C. M. Christianson Doing Well With the Columbia Line in Savannah, Mo.

C. M. Christianson, who handles the Columbia line in Savannah, Mo., has sent to The World an interesting picture showing a shipment of fourteen large Grafonolas lined up on the sidewalk in front of his store, with his sales staff standing in front of them. Mr. Christianson states that he does an excellent business in Columbia graphophones and records, both in the store and on trips through the surrounding country. For the latter work he has W. R. Haskins, a veteran salesman, who still clings to the horse and buggy in preference to the automobile, but finds that they get him where he wants to go in all kinds of weather. Mr. Haskins incidentally manages to sell three or four Grafonolas per week from his buggy.

Savannah, Mo., is a town of 1,800 inhabitants, but according to Mr. Christianson shipments of Grafonolas are cleaned out with great regularity. He has a horn projecting over the sidewalk with a tube connected with a Grafonola inside the store in such a way that each time a record is played for a customer the music is also carried into the open air. He states that, although the idea is not new, it has resulted in the sale of a large number of machines and records to people who have stopped to listen to the music.

SUPPLEMENT OF NINE-INCH RECORDS

The Emerson Phonograph Co. has just issued a supplement of its new nine-inch records, which includes recording of patriotic hits, dance numbers, and popular song hits. These records, which are all double-faced, retail at 65 cents each, and Emerson dealers are therefore afforded an opportunity of developing profitable business from the sale of these nine-inch records. Many well-known artists are included in this repertoire, and the Emerson Co. is preparing to handle a country-wide demand for these new records.

A NEW HARPONOLA CATALOG

Just Issued by the Celina Furniture Co. Is Artistic and Full of Interesting Material

A new catalog has recently been issued by the Celina Furniture Co., of Celina, O., covering their talking machine, the Harponola. It is attractively laid out and is well printed on super-calendered paper. The cover is a fine half-tone reproduction of a home scene in which the Harponola plays a prominent part. There is an introductory article on the "Birth of the Harponola," written by Ed. Brandts, vice-president and sales manager of the company. The various models are described in detail and illustrated. The last few pages of the catalog are devoted to advertising helps for the dealer and reproductions of the various electrotypes which are furnished him free for his newspaper advertising, as well as a few pieces of copy suggestions for use in same. At various places throughout the catalog is reproduced the trademark of the Harponola, a girl playing the lute and kneeling on a base marked Harponola.

SILVER SERVICE FOR G. D. ORNSTEIN

Close Friends in the Trade Make Appropriate Presentation to Newest Victor Wholesaler

PHILADELPHIA, PA., May 2.—At the recent meeting of the executive committee of the National Association of Talking Machine Jobbers held in this city was the presentation of a handsome silver service valued at over \$1,000, to George D. Ornstein, who recently became a Victor wholesaler in this city, after serving for twenty years in an executive capacity for the Victor Co. The silver service was the gift of a number of Mr. Ornstein's closest friends in the trade, and with an engraved minute was presented to Mr. Ornstein by Joseph C. Roush, of the Standard Talking Machine Co. The gift was especially appropriate inasmuch as Mr. Ornstein, while with the Victor Co., had acted as guide, teacher and friend to most of the present Victor wholesalers, and many of them he had actually seen through the forming and developing of their organizations.

A TIP TO THE WISE

The question of supply is today a more important one than that of demand.

The dealer should without delay place sufficiently large orders for

B. & H. FIBRE NEEDLES

U. S. Pat. Nov. 12, 1907

with his jobber to meet his future requirements, and should at the same time urge his customers also to lay in a supply.

B. & H. FIBRE NEEDLES are better than ever and in greater demand than ever, but present manufacturing conditions make the anticipation of wants necessary in order to avoid disappointment to the user.

U. S. Patent December 5, 1916

Retail Price \$2.00

The B. & H. Repointer was conceived of necessity and has made good. The principle involved in this device is the only logical and practical one for the purpose intended.

The proof of its efficiency is in the actual test. Play a record with a fibre needle before repointing and then notice the difference in tonal quality after the Repointer has been used.

CHICAGO, ILL.

The Heavy Increase in Consumer Demand Is Responsible for Current Shortage

Ever since war was first declared, leading members of the music industry, as well as many prominent officials in military and public life, have endeavored to accurately portray the mission of music during times of war. Many of the addresses and writings on this subject have been handled in masterly fashion, in that they are founded on fact and not upon sentiment. Innumerable cases have been cited where music has been an important factor in stirring the elan of the men on the fighting front, in restoring the spirit of the wounded in the hospitals, in providing welcomed entertainment for the soldiers who frequent the Red Cross canteen and the Y. M. C. A. and K. of C. huts, and in maintaining the morale of the great civilian population behind the men in uniform. Indeed, cases of this sort are of such common occurrence that great military leaders and strategists themselves have not hesitated to give due credit to the part that music plays in keeping up the morale of the men in khaki and the civilian army back home.

Further evidence of the great mission of music in wartimes is found in the steadily increasing demand for musical instruments. Naturally, if music is as important as is claimed, then during wartimes there must be a vigorous demand on the part of the army and on the part of the navy and on the part of the general public. This, in fact, is the case. The leading manufacturers of the talking machine report that the demands for talking machines and records are far in excess of any previous years. The American public, notwithstanding certain advice that the present is a time for rigid economy, has apparently, after giving the matter due consideration, decided that talking machine music, considering

the comfort it affords for those left at home, is a necessity and is a good investment during wartime.

No doubt there are members of the talking machine industry who believed that war would mean a falling off in the demand for talking machines and records. But the purchasing public has not so willed, and manufacturers in the talking machine industry find themselves confronted with unfilled orders of a very exceptional proportion. *The fact is, that the shortage of machines and records which one hears so*

much about these days is not really due so much to a decrease in the production of previous years as it is to a tremendous increase in the demand.

Talking machine dealers will do well to bear this in mind before complaining about shortages. It is, of course, understood by all that the production problems of the industry during the period of war have been and are going to continue to be extensive and yet manufacturers who can keep their output up to the figure of 1917 will still be falling far behind the current increase in demand for their product.

W. L. GARBER AGAIN IN SERVICE

Member of New York Talking Machine Co.'s Staff Joins the Tank Service—M. C. Stegner Enlists in U. S. Marine Corps—Given Nice Send-Off by Associates—E. Fontan Writes

W. L. Garber, formerly private secretary to Arthur D. Geissler, president of the New York Talking Machine Co., Victor wholesalers, who enlisted in the U. S. Army some time ago and was discharged because of physical disability, recently appealed to the army authorities for another examination. His appeal was granted, and he passed the second examination with flying colors. According to his present plans he will soon join the tank service, a new branch of the army service that makes a distinctive appeal to those patriots who want immediate action at the front. Since his discharge from the army, Mr. Garber has been visiting the dealers through New York State and Pennsylvania, where he won the friendship of all the company's clientele. He is thoroughly familiar with all methods of Victor merchandising.

M. C. Stegner, formerly assistant to George A. Kelley, of the New York Talking Machine Co., has enlisted in the U. S. Marine Corps, and is now stationed at Charlotte, N. C. Before joining Uncle Sam's service Mr. Stegner was the guest of honor at a luncheon given by Roy J. Keith, general manager of the New York Talking Machine Co., at the New York Athletic Club. There were six members of the company's sales staff present at this luncheon, and Mr. Stegner was surprised to receive from Mr. Geissler a gift of a handsome personal kit, which he can use to excellent advantage "over there."

Ernest Fontan, formerly a member of the company's sales staff, who has been in one of the army camps for several months, has written his former co-workers that all of their supplies have been packed in big wooden cases and nailed up, marked for France. It is safe to say that Mr. Fontan will soon be on the other side of the Atlantic. John Connolly, another member of the company's staff who is "doing his bit" for his country, has sent several cards and letters from "over there," expressing his pleasure at being in the big fight.

Lucky 13 Phonograph Co., 3 East 12th St., New York

SAN FRANCISCO TRADE ACTIVE DESPITE LOAN CAMPAIGN

Trade Helps to Put Liberty Loan "Over the Top"—Business as Active as Stock Supplies Permit—Columbia Co. Settled in New Quarters—Month's News Tells of Trade Progress

SAN FRANCISCO, CAL., May 3.—The Liberty Loan drive in this city has not had the deterrent effect on the business of the talking machine dealers that was expected. Collections have been a little slower in consequence of the desire of the people to carry the city "over the top," but the new business shows hardly any diminution. The dealers themselves have been busy with the loan and every one has generously subscribed for the bonds. Some makes of talking machines are very scarce on the market, but for nearly all there have been fair receipts this month. The time on the road of these goods seems to average much less than a month ago, and from this the dealers say that the freight situation is practically solved as far as their lines are concerned. The difficulty of getting all the stock wanted lies in the factories, and for this the local dealers say there is no remedy so long as the war lasts. Both wholesalers and retailers say that there is plenty of business to be had in San Francisco, and that the interior of the State is even more prosperous than the city.

Take on the Pathé Line

Fred Stern, president of the Stern Talking Machine Co., has been East for nearly a month. He will return in a few days now, and his associates are looking for him to announce something of importance in the way of increased stock when he gets back. The company have just taken over the Pathé Frères phonograph line and report a good business in their new acquisition.

Featuring Records Successfully

The California Phonograph Co. has been featuring certain records in its windows by means of cards telling of the worth of the record that is being pushed and says that this means of bringing the goods to the attention of the public has been very successful. F. A. Levy, president of the company, says that goods are reaching him in much larger quantities than for some time past. This is especially true with Victor machines. The supply of needles is very much easier, he says.

Miss Frances Gridman, manager of the record department of the California Phonograph Co., will leave for the East in a short time and will visit the various factories making records during her absence.

George Hively, manager of the phonograph department of the Eastern Outfitting Co., says business with him keeps up wonderfully well. April's sales were far ahead of those of last year for the same month.

Big Run on Galli-Curci Records

The singing of Galli-Curci in this city brought about a boom in records made by her. All the Victor dealers featured these records during the entire month and the demand exceeded the supply to such an extent that Byron Mauzy had to have a shipment of records sent him by express. One way of advertising the singer was the display of a grand piano in Mauzy's window with the label that it also was shipped by express for the exclusive use of the singer. This and the other publicity stunts pulled off caused a bigger run on these records than occurred even in the recent case of McCormack.

The Woolworth 5-10-15-cent store recently bought 13,000 Emerson records, which were being closed out at a bargain price by the Emporium. It is expected that the records will go on sale somewhat below regular price.

Pacific Phonograph Co. in New Home

The Pacific Phonograph Co. has moved into new quarters on California street. It formerly occupied a place on Battery street.

Wiley B. Allen Co. Activities

E. P. Corcoran, of the talking machine department of the Wiley B. Allen Co., has been ill for several weeks, and has recently returned to his duties at the store. During the absence of James J. Black, manager of the department, Mr.

Corcoran has been in charge. Mr. Black has been temporarily located in Sacramento, where the company has recently enlarged its store and added a talking machine department. This was the only branch of the company which was without a department for the sale of this popular musical instrument.

New Edison Jobbing House in Los Angeles

The Edison Phonographs, Ltd., the local Edison jobber, with a distributing house at Portland, has purchased the Edison merchandise of the Diamond Disc Distributing Co., at Los Angeles and opened a jobbing house at that place. This gives the company three jobbing houses on the Coast.

Mrs. Howard With Hauschildt Co.

Mrs. Helen B. Howard, who broke into the talking machine business as saleswoman for Sherman, Clay & Co., Oakland, about six months ago, has made such an extraordinary success that she has been called to the management of the talking machine department of the Hauschildt Music Co. in Oakland. Mrs. Howard is a woman of most pleasing appearance and manners and is destined to go high in the music world.

Improvements at Phonograph Shop

The Phonograph Shop on Powell street, which features the Sonora, has about completed the renovation which began a month ago. New racks have been installed and much additional storage space gained thereby. The decorations are in a delicate tint of cream and the shop is one of the most attractive appearing sales places in the city.

The Starr phonographs are making good progress in this State, according to the statement of J. W. Steinkamp, who represents the Starr interests in this season. He is making a drive to place the instrument in the furniture houses and says that he is meeting great success in his activities.

Columbia Co. Settled in New Quarters

The Columbia Grafonola Co., which moved into the new "Daylight" Building on Sutter street last month, is about settled in its new abode. Walter Waters, who was one of the salesmen with the Columbia, has enlisted in the Signal Corps and is now busy learning wireless telegraphy. Eight men have enlisted from the local house.

The Brunswick-Balke-Collender Co. in this city is pushing its machines in all parts of the State. The universal tone arm has proved a great success and more dealers have been signed up since its introduction than in double any like period since the company first began to place agencies.

Ray Solomanson, who has been connected with the sale of talking machines in the Emporium for some time past, was recently drafted in the army, and is now in training to "show goods to the Kaiser."

SUGGESTIONS THAT INSPIRE

George E. Brightson, Author of a Booklet That Is Full of "Meat" for the Man Who Aspires

"Sonora Policy" is the title of an interesting and inspiring article written by George E. Brightson, president of the Sonora Phonograph Corp., New York, and recently issued in booklet form for all Sonora employes.

Mr. Brightson emphasizes the importance of good will, referring to it as follows: "There is one big element of success in this world, of personal success, and of business success, and that is good will." This subject is very interestingly discussed, and is followed by a splendid discourse on "service." The tremendous importance of extending every customer a fair, square and efficient deal is emphasized in one of the paragraphs of this article, and many suggestions embodying sound logic are presented to the employes of the Sonora organization.

Co-operation and team work is the subject of one of the closing paragraphs, and from cover to cover this admirably written article not only reflects Mr. Brightson's many years of experience in the talking machine industry, but forms an inspiration for every Sonora employe.

VICTOR DECALCOMANIE POPULAR

The new trade mark decalcomanie recently offered by the Victor Talking Machine Co. to Victor dealers is proving decidedly popular. This decalcomanie is slightly over twenty inches in width and portrays "His Master's Voice" in the original colors. It can be used on either glass or wood and therefore is well adapted for use on store windows, doors, delivery cars, wagons, etc. These decalcomanies cost 18 cents each.

The Cheney Phonograph Sales Co., of Cleveland, O., has been incorporated with capital stock of \$300,000 by E. M. Buel and others.

A Message to the Edison Dealer

Complete the equipment of your Edison Phonograph by using the "BLISS" REPRODUCER to play lateral cut records better than they are now played on any other Phonograph.

Make the Edison Phonograph as far ahead of other Phonographs on lateral cut records as it now is in interpreting the Re-Created Edison Diamond Disc.

We furnish you with a "BLISS" REPRODUCER to achieve this result.

May we not send you samples and our dealers discount?

ECLIPSE MUSICAL CO.'S NEW WHOLESALE HEADQUARTERS

Noted Cleveland Institution Has One of the Most Complete Departments and Executive Offices for the Transaction of a Jobbing Business in the Talking Machine Trade

Ohio has frequently been rated as the liveliest State in the Union as far as the musical industry is concerned. Whether or not Ohio should retain this reputation unchallenged is, of course, a debatable question, but at any event there is no argument about the progressiveness

Office of General Manager

of the Eclipse Musical Co., Victor distributors, located in Cleveland. This institution has steadily moved ahead, as far as its own private business is concerned, and has been decidedly instrumental in the formation and development of the Northern Ohio Dealers' Association, and other activities tending toward the betterment of the retail trade.

The Eclipse Co. recently established new wholesale headquarters in the Cadillac Building, on Euclid avenue. The new headquarters is made up of a very handsome set of executive offices, an extensive department for the many series of record racks in which the wholesale stock is stored, a special division where the surplus stock is kept, a packing department, a shipping department, a department where record orders are filled, checked and double checked, and a repair department.

The executive offices embrace, in addition to

Sales Manager in Conference

the handsome quarters of the officers of the company, a special record statistical department, a record ordering department, a stenographic

department and an accounting and bookkeeping department.

The record racks in the stock department, in their make-up and general arrangement are similar to those used by the leading Victor jobbers in the country. Slightly separated from the main series is a "monthly record rack" accommodating the issues of the two last months. In addition to this there are individual racks for the red seal, blue label and purple label records. This section immediately adjoins the regular record stock section.

The repair department is equipped with a complete repair bench and a sanitary re-graphiting compartment. A complete stock of all Victor parts is kept in a large well-systematized cabinet which may be seen in the background of one of the pictures accompanying this article. There is also a separate apparatus with an adjustable standard for testing motors.

The shipping department is noteworthy for

Well Equipped Repair Department

the efficiency which prevails therein. All scrap paper and scrap cardboard is jammed in a bailing machine and all excelsior is kept in a metal-lined excelsior container. It is as near fire-proof as modern devices can make it. From the packing department Victrolas and Victor records make their exit from the Eclipse headquarters by one of two routes. The first of these is through what is known as the "express bins" which adjoin the packing department and which are immediately in front of the elevators. These express bins are five in number and classified in accordance with the different express companies and other kinds of shippers, so that the representative of each different kind of transportation knows exactly what is meant for him and where to get it.

The other method of shipping goods out is decidedly unique. The Cadillac Building was designed throughout for automobile purposes, and there is a rapid, large-elevator service, and because of this fact the Eclipse Co. is enabled to bring their motor trucks up and right into the floor where the Victor stock is kept as

shown in the illustration. The machines can be loaded right into the car from where the stock is stored and the car run on to the elevator and lowered to the street.

Loading Truck Right on Stock Floor

Among the live-wire officials who are responsible for the efficient way in which the new Eclipse wholesale division has been organized and efficiently conducted are T. H. Towell, president; P. J. Towell, vice-president; C. K. Bennett, general manager; E. B. Lyons, sales manager, and Earl Poling, Jack Kennedy and Norman H. Cook, traveling representatives.

OPENS NEW JEWEL LABORATORY

H. J. Smith Opens Quarters in Newark, N. J., to Manufacture Talking Machine Jewels

H. J. Smith, who for the past twenty-seven years has been connected with the talking machine industry, recently opened a laboratory for the manufacture of jewels at 833 Broad street, Newark, N. J. Mr. Smith has been connected with some of the largest organizations in the field, including Thos. A. Edison, Inc., American

Eclipse Co.'s Room for Packing Records

Graphophone Co. and the Pathé Frères Phonograph Co. He is one of the best-known jewel experts in the country, and his products include phonograph and sapphire reproducing points, recording laboratory jewels, jewel bearings for electrical instruments, rough diamonds and diamond powder. The plant is one of the best equipped in the country, and is fitted for the carrying on of experimental work. One of the policies of the H. J. Smith plant is an open invitation to the trade to visit the laboratory at all times.

SELLING TO THE BUSY MAN

How One Talking Machine Dealer Handled a Difficult Situation Successfully

"I had a little experience with one salesman who knew how to get on with busy people with whom he wanted to do business. It took only about thirty seconds for him to show that he and I would not quarrel because of any tendency to take up my time unnecessarily," said a business man the other day.

"I was busy when he first called and I showed it. 'Pretty busy this morning?' he asked pleasantly. 'Yes,' I said, perhaps a little crustily, 'I am busy. I have a lot of mail I want to get off before noon.' 'All right,' he replied, 'I'm not going to bother you now. I want to talk to you about talking machines and I have something to say that will interest you. Can you give me fifteen minutes some time during the day? I promise to take no more time than that unless you wish me to do so. You needn't worry about my boring you. I don't do business that way.'

"I couldn't refuse a request like that or even be grouchy about granting it. I named a time. At that time he walked in. He did not show up half an hour ahead of time and make me nervous by standing around waiting. He did not act with such deliberation that I would be afraid he would overstay his time. He laid his watch where he could see it and where I could see that he saw it, but where I could not see it. At the end of thirteen minutes he had said his say with the impressiveness and with the brevity of a four-minute speaker. He took up his hat and his watch. 'I appreciate your giving me this hearing,' he said. 'I would like to talk my proposition over with you definitely some day soon, but I won't ask you now to make an appointment.'

"If he knew, or surmised, he had interested me so I would want him to stay longer then and give me his proposition then and there, he did not show it, but he was properly appreciative when I told him I was interested and would hear the rest of his story at once."

TO MAKE DEMONSTRATION BOOTHS

H. Mickelas, 164 McKibben street, Brooklyn, N. Y., who has been in the cabinet business for fifteen years, has inaugurated a department that will devote itself entirely to the construction of demonstration booths, record racks and store interiors for dealers. Some three years ago Mr. Mickelas started to take care of this class of business, and the results were so satisfactory that he determined to enlarge his factory, so that he could cater to the demands of the dealers.

The booths constructed by Mr. Mickelas are soundproof and include all of the features desired by talking machine dealers. A number of installations have been made in local territory, and these customers have expressed their satisfaction with the booths in every respect.

BWARE OF WAR RUMORS

Talking Machine Dealers Should Be on Guard Against Untrue Statements Regarding the Affairs of Manufacturers Put Out by Competitors

In these times talking machine dealers should be particularly upon their guard against insidious rumors. Reports have been circulated in the trade to the effect that the factories of certain manufacturers have been commandeered by the Government, and further that this or that manufacturer will be unable to supply goods as promised, and still further that this or that manufacturer has a financial interest in competitive concerns.

When the talking machine dealer hears rumors of this kind he should make careful note of the sources from which they emanate. It should be easy to detect cases where the representative of a certain line is taking unfair advantage of a contemporary manufacturer. It is reasonable to suppose that each individual company will inform its clientele of dealers regarding any important action it may take affecting the welfare of their dealers, and it is also reasonable to suppose that the circulating reports about competitors which have not been authorized by the company to which they refer is inspired by malicious motives.

Dealers should see that the traveling representatives of every manufacturer in the talking machine industry paddle their own canoe, in that they explain the merit of their own product and

institution and do not resort to unsupported claims about the war weaknesses of other perhaps more successful competitors.

F. C. KENT MOVES TO NEW PLANT

Manufacturer of Talking Machine Attachments in Newark, N. J., Installs New Equipment, Including a Model New Tube Bending Machine

F. C. Kent, the well-known manufacturer of phonograph attachments of Newark, N. J., recently moved from 24 Scott street, to the corner of Mulberry and Chestnut streets. In his new plant he has installed a large number of new machines and among others one of his own design which is used to bend brass tubing. This new machine not only bends the tubing but leaves every angle and dimension at their original size. In speaking of this new machine the officers of the company said "There are only a few such machines in the country and our industry was largely in need of such machines." All the Kent attachments will be produced with the new machine as well as several new products the company has in mind, including a new one-piece brass tone arm. While brass is expensive at the present time the fact that much labor and time is saved by the new method, as well as the fact that there are no joints or rough edges, will, according to F. C. Kent, make his new tone arm very desirable. The announcement of the delivery of the tone arm will be issued later.

The NEW VEECO

THE ELECTRIC MOTOR WITHOUT A FAULT

The improved Veeeco Electric Motor for Talking Machines represents the last word in scientific development with special regard for the purpose for which it is intended.

Runs on either A. C. or D. C., 100-125 volts without adjustment. Can be supplied to run on any voltage from 6 to 250.

Supplied mounted on 12" or 12½" square mahogany boards, all ready to install.

SEND FOR A SAMPLE AT ONCE

Then, after testing it thoroughly, place orders at once to insure delivery.

THE VEEECO motor and the VITRALOID turntable make a complete motor unit for high-class machines.

PATHE RECORD-PRESSING EXHIBIT

Bope-Hayes Co. Reports Good Sales Following Recent Exhibit of How Pathé Records Are Made—Fischer Co. Renders Assistance

COLUMBUS, O., May 4.—The Bope-Hayes Co., of this city, which handles the products of the Pathé Frères Phonograph Co., recently installed in its store a very effective record-pressing exhibit, which demonstrated the method employed by the Pathé Frères Co. in pressing Pathé discs. This exhibit attracted wide attention, and crowds of people visited the store daily in order to gain an insight into methods which have usually been considered technical and mysterious to the average layman.

The Bope-Hayes Co. was very well pleased with the success of this exhibit, and after it had closed wrote a letter to the Pathé Frères Co. stating as follows: "We are more than pleased with the success of the exhibit, and moreover believe we will do a wonderful business in Pathé goods this year.

"We placed ten phonographs in country homes yesterday, and notice quite an increase in our record sales. We have continuous inquiries from owners of other phonographs as to how to play Pathé discs on their instruments. We are now arranging quite a campaign of newspaper advertising and soliciting about 5,000 live prospects, which we received during the exhibit. We are going to do our best to lead the Pathé sales in Ohio this year, and thoroughly believe that we can 'go over the top.' We wish to thank you for sending us Mr. Gates, who helped us materially in arranging the exhibit."

The Fischer Co., of Cleveland, O., Pathé distributors, co-operated with the Bope-Hayes Co. in arranging this exhibit, and R. J. Jamieson, of this company's staff, spent the entire week in Columbus in order to co-operate with the company in every possible way.

Mr. Jamieson arranged for a banquet for the Bope-Hayes Co.'s employes, and left nothing undone to assist the company in making the exhibit a success.

BRASS PLAQUE FOR VICTOR DEALERS

Very handsome brass signs are now being offered to Victor dealers by the Goodman Co. of New York. At the left of the brass plaque the Victor trade mark is shown in green, to the right of this in heavy black appears the word "Victrolas," and beneath this in smaller letters and in green "Victor records."

The Government needs the help of every man and woman in the United States. Stand by!

TALKING MACHINE JOBBERS MEET

Executive Committee of the National Association of Talking Machine Jobbers Discuss Important Topics at Meeting in Philadelphia

The executive committee of the National Association of Talking Machine Jobbers held a meeting on April 22 and 23 at the Ritz-Carlton Hotel, Philadelphia, Pa., and at this meeting discussed a number of important topics incidental to present business and national conditions. The members of the committee in behalf of the association determined to utilize all possible means at their command to co-operate with the Government in its war program. They discussed the entire recent situation in the business as it has been affected by the war, and will be affected in the future.

The executive committee discussed at length the means that should be adopted to co-operate with the factory in eliminating all possible waste in the conduct of the business. The members of the committee realized that they must make sacrifices as the result of the country being in war, and discussed ways and means of adjusting their businesses so that the burden may be carried as lightly as possible, and so that they may assist the Government in fulfilling its war plans.

The members of the committee not only pledged their own support to subscribe to the utmost of their ability for Liberty Bonds, but to also help in the general advertising campaign in behalf of the Third Liberty Loan, and to carry out their influence as far as possible among the members of the association in behalf of the loan. The committee also voted to appropriate \$1,000 out of the funds of the association to purchase bonds in the present loan.

Owing to war conditions the committee decided to defer announcing a definite program for the annual convention until a few weeks later. Full details and plans will be ready at that time.

Among the members of the committee in attendance at this meeting were J. N. Blackman, Blackman Talking Machine Co., of New York, president of the association; I. Son Cohen, Cohen & Hughes, Baltimore, Md., vice-president; J. C. Roush, Standard Talking Machine Co., Pittsburgh, secretary; A. A. Trostler, Schmelzer Arms Co., Kansas City, Mo., treasurer; W. D. Andrews, W. D. Andrews Co., Syracuse, N. Y.; A. A. Grinnell, Grinnell Bros., Detroit, Mich.; George Mickel, Mickel Bros. Co., Omaha, Neb.; Andrew McCarthy, Sherman, Clay & Co., San Francisco, Cal.; E. C. Rauth, Koerber-Brenner Co., St. Louis, Mo.; W. H. Reynolds, Reynolds Music Co., Mobile, Ala., and C. Alfred Wagner, Musical Instrument Sales Co., New York.

STANDARDIZE THE 'CLEAR TONE' LINE

Lucky 13 Phonograph Co. Make Important Announcement—Will Institute Aggressive Advertising and Sales Campaign

The Lucky 13 Phonograph Co., of New York City, announced this month that it had completed arrangements whereby the Cleartone line of phonographs, which it manufactures, will be standardized, and an aggressive advertising and sales campaign instituted in its behalf. This line has been on the market for several years, but D. Bartelstone, head of the company, decided recently that the success of the line well warranted the inauguration of plans that would make it even more successful than it had been in the past.

With this idea in mind Mr. Bartelstone visited many of the leading cabinet factories throughout the country, and finally succeeded in placing a contract with one of the most prominent manufacturers in the West. This concern has been making high-grade cabinets for several years, and its products have won recognition throughout furniture circles as embodying quality and attractiveness.

Mr. Bartelstone placed a very large order for cabinets, which called for immediate delivery, and also made plans for an advertising and sales campaign to assist Cleartone dealers in developing their business with this line. This campaign is now under way, and judging from the inquiries for agencies already received, this line will receive splendid representation in all sections of the country.

In addition to distinctive cabinet designs, Cleartone phonographs will be equipped with motors, tone arms and sound boxes of recognized standard and prestige. The line is now complete, and dealers are being signed up daily.

C. J. Cassutt, proprietor of the Seattle Music House, 1216 Third avenue, Seattle, Wash., is now having the interior of his store entirely remodeled on an elaborate scale and will in the future devote himself exclusively to featuring the Brunswick phonograph and Pathé records.

The Liberty Talking Machine Co., Chicago, has been incorporated with capital stock of \$5,000 by Robert Bachrach, S. Sidney Stein and Hirsch E. Soble.

THOS. GOGGAN & BROS.' FINE FLOAT

Elaborate Display Attracts Much Attention in Trades' Parade Held During the Recent Annual Spring Carnival in San Antonio

SAN ANTONIO, TEX., May 4.—One of the big features of the recent trades' parade held in this city in connection with the annual Spring Carnival was the elaborate float entered by Thos. Goggan & Bros., and which is shown herewith. The player-piano at one end of the float was kept going almost constantly throughout the parade, and at intervals four young ladies

Goggan & Bros.' Carnival Float

from the Goggan establishment rendered well-known selections in quartet form on violin, mandolin, ukulele and cornet. At one end of the float was a large Victrola electric, with the well-known Victor dog sitting at attention close by and listening to his master's voice. Small signs in red, white and blue were placed about the float bearing such mottos as: "The World Needs Harmony," "Keep the Home Fires Burning," etc. On both sides of the float were placed signs bearing the name "Thos. Goggan & Bros." The fact that the company was established in 1866, and is, therefore, the oldest music house in Texas, was strongly emphasized. The patriotic spirit was carried out in the decorations of the float, which were made up largely of red, white and blue bunting, and large red poppies.

A UNIQUE SYNCHRONIZATION

A. T. Moulton Demonstrates a Perfect Synchronization Between the Pipe Organ, Piano and Victor Auxetophone at the Broztel Hotel

A unique musical novelty has recently been introduced to New York by A. T. Moulton. With the aid of a small pipe organ, a piano and a Victor Auxetophone, he produces a synchronized effect of a decidedly unusual character. The solo effects are carried by the talking machine, and the bass effects by the organ. Mr. Moulton uses his left hand and left foot to play the organ, and his right hand and right foot to play the piano.

For a number of years he made a study of synchronizing these three instruments and first performed for the public in one of Minneapolis' leading hotels. After a number of months' engagement in the Northwest with different hotels he came to New York, and is at present providing musical entertainment for the dining room of the Broztel Hotel, New York.

ATTRACTIVE MUTUAL LITERATURE

The Mutual Talking Machine Co. has just issued an attractive four-page circular featuring Mutual tone arms and sound boxes. One page of this circular illustrates the company's No. 2 and No. 3 sound boxes which have been adopted for general use by manufacturers. Another page is devoted exclusively to the Mutual universal ball bearing tone arm, which, although recently introduced, is now included in the equipment of many well-known makes of talking machines.

Wm. L. Phillips, president of the company, states that the demand for Mutual products is steadily increasing, and that the company is now making arrangements to augment materially its factory facilities. Mr. Phillips has received letters from many manufacturers praising the service given by Mutual tone arms and sound boxes.

OCCUPY ELABORATE NEW QUARTERS

The Neal, Clark & Neal Co., Buffalo, Now Settled in Their New Home

BUFFALO, N. Y., May 6.—The Neal, Clark & Neal Co., the Victor wholesalers, have moved into their new wholesale quarters at 778-780 Washington street, where they occupy two floors running through from street to street. Each floor is 40 x 200 feet, giving the firm a total of 16,000 square feet of floor space. The place was laid out under the supervision of V. W. Moody, who has had considerable experience in the planning and organizing of wholesale talking machine establishments.

Probably the most interesting feature of this new plant is the arrangement of the record stockroom, which might be compared to a gigantic fireproof vault, with ample ventilation. The entire stock, both open packages and reserve stock, will be carried in the new record room, which is 25 x 100 feet. After the record orders have been assembled they are taken into the packing room, off the end of the record

room, and packed and shipped from there. The machine stock is carried in the spacious basement. Incoming machines are run into the basement on a steel chute, specially designed. Outgoing Victrolas are lifted on an electric sidewalk elevator and loaded directly into trucks.

NEW ENGLAND RATES INCREASED

Interstate Commerce Commission Grants Increases in Passenger and Freight Rates

WASHINGTON, D. C., May 3.—Increases in class freight rates ranging between 5 and 15 per cent., and in passenger rates to 2¾ cents a mile on New England railroads were allowed to-day by the Interstate Commerce Commission.

The Commission ordered that mileage rates might be increased to an average of 2¾ cents, and authorized other changes in passenger schedules to bring in many million dollars more to the roads.

The Commission specified a scale of class rates for the leading railroads and somewhat higher rates for minor lines in New England.

**LYRIC RECORDS**

LYRAPHONE CO. OF AMERICA

12-14 West 37th Street New York, N. Y.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., May 8.—The talking machine business in Philadelphia in April was most satisfactory. With most of the dealers it showed a gain over April of last year, and like previous months it was limited to the amount of stock that the Victor Co.—so far as Victor dealers are concerned—were able to secure. The Victor Co. have made promises to their dealers in this district that they will be warranted in looking for more generous treatment this month and in the months to come.

It is generally supposed here that the reason why talker manufacturers have kept retailers so short is that they were bending every effort to get as much stock as possible to the dealers in Canada before the law went into effect in that country prohibiting the importation of musical instruments into the Provinces.

Doing a Maximum of Business

Louis Buehn, of the Louis Buehn Co., states: "We are doing a maximum of business, although the shortage of Victor machines and records is seriously felt. The month's total was slightly less than last year. Business conditions are good, so far as we are concerned, but we are not getting enough goods."

Penn Phonograph Co. Will Remove June 1

The Penn Phonograph Co. report that there was a slight falling off both in their machines and records business over April a year ago, but it was so small as not to leave very much regret. They have the assurance from the Victor Co. that they will be able to give their trade very good service during the remainder of the spring.

The Penn Co. have started the preparations for their moving to their new building at 913 Arch street the first of June. There will be four floors in their new quarters. They will not be able to fix the building to any very great extent before they move in, but they already have their racks under way, as well as all the designs for the new installations.

Reports Large Columbia Business

Manager A. J. Heath, of the Columbia Graphophone Co., reports that their business has been wonderful in April. It is the same old story with them, that the amount of business done was limited only by the amount of product they were able to secure. They have now several

TALKING MACHINE DEALERS

can greatly increase their profits without additional overhead expense, by selling the world-famous

Weymann "KEYSTONE STATE" Musical Instruments

a combination that has proved to be an instantaneous success.

carloads on the road which will place the firm in the position of being able to respond to any reasonable demand.

Mr. Heath says that a number of their dealers have called at their offices during the past month, and they all report that their business has been exceptionally good. One pleasant feature, he says, is that the trend for the taking of the higher-priced instruments is most encouraging, and that in the farm districts they are buying for cash, which indicates a healthy condition prevailing.

Mr. Heath was in New York several days last week, and at the present time F. S. Binger, the traveling auditor of the company, is at the local offices. Mr. Heath says: "The record situa-

tion has improved, and I believe we shall be in a position to give the dealers better service this month than any time in the past. It was a common sight during the past month to have automobile trucks come here from our territory for machines and records. Leading among those who made the trip were J. E. and E. W. Nace, of Hanover, Pa., and Fink & Corbett, the dealers of Pottstown."

Expansion of Dictaphone Business

The Dictaphone Co. report that they had a most satisfactory business in April, and were very much gratified with the attention given the machine at the recent Business Show held in this city from April 15 to 20. They have added a couple of new men to their sales force, and among their visitors were Frank Dorian and N. F. Milnot, general sales manager of the Dictaphone. Both of these men were here for the show.

Closed Good Edison Trade in April

Herbert E. Blake, formerly Blake & Burkart, leading dealer here in the Edison product, reports that his business in April was fair, but not as large as in March. It just about equaled the business of last April. Machines and records, Mr. Blake says, are coming through in very fine shape. The fine surface on the new records is going to be of great help to the Edison dealers.

Mr. Blake, the Edison representative, in his latest publication of "Re-Created Notes," states that he has sold a large number of Edison Army and Navy models to the soldier boys at Camp Dix and Camp Meade. He makes the suggestion that any person wishing to contribute to the pleasure of the boys, either by purchasing new records for these machines or sending them records of which they have become somewhat tired, if they will deliver them to him at Eleventh and Walnut streets, he will see that they reach the boys in the camps in the name of the donor and at no cost to giver or receiver.

Edison Dealers Meet

At the meeting of the Edison Dealers' Association, which was held at the Bingham House yesterday, May 7, there were no set speeches, but all of the dealers participated in a discussion as to the selling proposition. The result was most-satisfactory.

In the campaign for the Liberty Loan in Phila-

The Louis Buehn Company Victor Distributors PHILADELPHIA

Philadelphia the piano and talking machine dealers were placed in one class, and a sum set for them to raise. This sum was not entirely reached, and of the money subscribed more than three-fourths came from the leading talking machine dealers.

L. H. Crabtree Somewhere in France

L. H. Crabtree, the son of the president of the International Mica Co., of Philadelphia, is now in the service of his country "somewhere in France." Mr. Crabtree, Jr., is a member of the 109th Infantry, United States Army, and in addition to doing his bit over on the other side is instrumental in turning out large quantities of the International Mica Co.'s product for Government purposes, these products being used for gas masks, etc. This is the kind of service which will win the war, and Mr. Crabtree and the International Mica Co. are to be complimented on their devotion and the patriotic spirit shown in thus serving their country.

Pathé Activity in Quaker City

Walter L. Eckhardt, of the Pathé Shop, has arranged to start a series of unusual concerts in this city beginning this week. They will be given daily at 11.30 in the morning and 3.30 in the afternoon. The Pathé did great work for the Liberty Loan; upon the arrival here of the great Orchestra Pathé it was almost immediately shipped to the Statue of Liberty erected south of the City Hall, where concerts were being given on it constantly for more than a week, and the young ladies in charge of the work there said that the Pathé was the best Liberty Bond salesman they had.

Mr. Eckhardt is delighted with the work accomplished by his men in April. When the month began he set for them the March quota, which had been so gratifying. They protested that with the Liberty Loan and other hindrances they could not accomplish it. They made the quota, and as each man reached his sales quota Mr. Eckhardt took him out and bought him a good dinner.

Among the several visitors to the Pathé Shop

in April were Messrs. Lehming, Emerson and O'Neill, of the Pathé Co.

The Weymann Family in the Nation's Service

Harry W. Weymann, president of H. A. Weymann & Son, widely known as Victor wholesalers, and also as manufacturers of the famous

Herbert W. Weymann

H. Power Weymann

Harry W. Weymann

Weymann and Keystone State instruments and other specialties, which are popular in the talking machine and piano trades, is well represented in the United States Army and Navy, his two sons, H. Power Weymann and Herbert Weymann, being in war service. H. Powers Weymann is with the 315th Infantry, U. S. Army, and is stationed at Camp Meade, Md., while Herbert Weymann is chief yeoman in the United States Navy stationed at League Island, Philadelphia. Both are fine types of manly Americans, who are destined to give a good account of themselves in the service of the United States, and Mr. Weymann has reason to be particularly proud, because he has given his two only children to the nation. Hats off to him!

New Brunswick Distributors

The Brunswick machine, handled in this city

by the Brunswick-Balke-Collender Co., has added a number of new distributors to their list in April, including the Hurley dealers in Camden, Bridgeton, Wilmington, Atlantic City, Wilkes-Barre, etc., and all the stores of the J. B. Gillies Co. They are at present negotiating with one of the largest stores in this city for handling the Brunswick.

The newly developed "Ultona" on the Brunswick—the "all-record reproducer" has been making a very strong impression here. By the use of the "Ultona" the different makes of records can be played by simply changing the position of the attachment. It is a most effective contrivance.

Doing Well With the Vita-Nola

The Vitanola Distributors Co., 1025 Arch street, report a steadily expanding demand for the Vita-Nola made by the Vitanola Talking Machine Co., of Chicago. The diversity of styles displayed combined with the intrinsic merits of these products have enabled them to make a wide appeal.

E. G. EVANS NOW A GARAGE OWNER

Popular Talking Machine Man Embarks in New Venture as a Side Line

E. G. Evans, the popular salesman with C. Bruno & Son, Victor wholesalers, New York, has embarked in the automobile business as a side line, and is one of the owners of the Cos Cob Garage, located on the Boston-New York Post road, near Greenwich, Conn. Mr. Evans says that he is doing a lively business, inasmuch as several hundred cars, including heavy trucks used in cross-country transportation, pass along the Post road every day, and an excellent percentage of them stop for supplies and repairs. Many of Mr. Evans' friends have already found his garage a haven of rest while en route along the Post Road. Meanwhile, Mr. Evans still gives his usual careful attention to the Victor business.

Woolworth Building, New York**

BUSINESS CONTINUES VERY ACTIVE IN KANSAS CITY

Stock Somewhat Short and Dealers Are Able to Dictate Their Own Sales Terms—Columbia Expansion—Jones Co. Feature Foreign Records—Liberty Loan Campaign Big Success

KANSAS CITY, Mo., May 4.—Business in the Kansas City territory continues splendid. In fact, it is good in every line, consequently money is plentiful and people are spending it. And more and more the talking machine is being regarded as a necessity in every home, so good prospects are not hard to find. Nowadays every dealer says he has half a dozen prospects to one machine. Dealers are therefore able to dictate their own terms and are almost all cutting out the small payment plan. There is of course in the Kansas City territory, with the big demand for machines, a tremendous shortage of records. The patriotic records continue to be the big sellers. Every dealer reported that, despite the shortage, his record business was excellent for the month of April (and this month was handicapped by the Liberty Loan campaign and the strike).

The Wunderlich Piano Co., which is one of the biggest music firms in the middle West, recently took on the Brunswick line. Martin & Adams, Wichita, Kansas's leading house, also recently added the Brunswick, as did the Darrow Music Co., of Tulsa, Okla. The Brunswick-Balke-Collender Co. Kansas City branch stated that its business was spreading tremendously

and that the Kansas City territory was opening up into a very excellent field.

E. A. McMurtry, manager of the wholesale department of the Columbia Co., reports increasing business not only in Greater Kansas City but in the whole territory. "Particularly in the country, the dealers are waking up to the big field for the Columbia machine," he said. "In fact, so splendid is the demand and the prospects are so good for an even far greater call for machines and records, that we are doubling our floor space in effort to keep pace with the strides of our business." The company has taken over the adjoining storerooms. The remodeling will be done by the middle of the month when a total floor space of approximately 12,500 square feet will be had. This additional room will be used entirely for the wholesale record department. The present quarters of that department are entirely inadequate. Two carloads of records were recently received and as many have been sold in the past few weeks. This department has instituted the new card index system adopted in the record departments of all the Columbia wholesale branches and has added some improvements that will aid in the local distribution. The additional room will give the company two more windows for display purposes; two will be used for the Dictaphone and two for the Grafonola. The Dictaphone department had, during April, the second-best month in its history.

J. J. Wiedeman, formerly Columbia salesman in this territory, has resigned to go back to his home town—Cleveland, O.—where he will enter the automobile supply business. He has been succeeded by William Roy.

The Henly-Waite Music Co. recently took on the Artophone line and is doing splendidly with it in addition to the Columbia.

The Junkins-Riley Co., formerly Pathé jobbers, will soon open a splendid up-to-date retail store, The Pathé Shop, at 202 East Tenth street. They will specialize in the art models.

The Jones Store Co.'s Victrola department has recently fixed a plan concerning the sale of its machines on time. Ten per cent of the purchase price must be paid down at once and the rest must be paid for in twelve months.

A. A. Trostler, manager of the Victrola jobbing branch of the Schmelzer Arms Co., has just returned from a visit to the Victor factory. "Business continues excellent," said Mr. Trost-

ler. "We could dispose of a great many more machines than we are able to get. The demand is great in Kansas City and in local territory."

Miss Jessica Owens has succeeded Robert Laster in the management of the Columbia department in the Kansas City Photo Supply Co.

J. P. Price, Price & McNeal, Maryville, Mo., is going into Government service.

Mrs. Nellie Williams, head of the Victrola department of the Jones Store Co., stated that they have been recently encouraged with the marked success in their foreign record trade, principally Mexican. In the first place, with the present scarcity of labor, the Mexicans all are holding down \$25 a week jobs at the packing houses and, as they live so much more cheaply than Americans, they are better able financially to buy machines than many Americans who are making as much or more. And they are sure pay. They seem to be very timorous and in great awe of the American man's jail, and in fact there is a deep-rooted fear in most of them that if a single payment is missed or delayed they will be thrown immediately into prison. Consequently payments come in as regular as clockwork; in some cases they have even brought their money up before it was due, saying that their wives would not be home on the day the collector came to call.

In the Liberty Loan campaign, in which Kansas City far exceeded its quota, a great deal of credit was accorded to music and talking machine men of the city who were as well represented as subscribers and as volunteer workers the campaign week.

B. F. Woodward, manager of the Edison Shop, was pumping air into a tire on his machine when the rim blew off and struck him, breaking an arm and a leg. He is rapidly improving.

The six weeks of story dancing, under the direction of Miss Baldwin, recently closed at The Edison Shop with a highly successful program in which five hundred Kansas City children took part. The dancing, to the Edison of course, was given in the Auditorium Theatre with a large audience. The newspapers devoted much space to the affair.

C. L. Smith, of the Edison wholesale, in Kansas City, is now at Jefferson Barracks, where he was called May 10.

The Edison Co., in its tone tests with Glen Ellison, Scotch baritone, had the greatest success—both in the city and rural districts. The dealers who held tone tests outside of Kansas City were: Carl Latenser, Horton, Kan., and Atchison, Kan.; D. B. Hickey, Chanute, Kan.; Eshelman, St. Joseph, Mo.; Chas. Sauer, Chillicothe, Mo.; G. W. Sherman, Breckenridge, Mo.

"The Music Without the Blur!"

This ideal of talking machine manufacture is attained more nearly than by any other, in the construction of the

ISSUE IMPORTANT RULING ON INSTALMENT BUSINESS

Internal Revenue Commissioner Roper Hands Down a New Order Bearing on Sales of Talking Machines and Other Musical Instruments Which Is of Paramount Importance

WASHINGTON, D. C., May 4.—One of several rulings just handed down by Internal Revenue Commissioner Roper affecting income and excess profit taxes is of exceeding interest to this industry, in which he holds that dealers in goods sold on the instalment plan shall return their profits proportionately as the gross profits stand to the gross contract price. Of course this new ruling applies to the business of 1918, on which the income tax returns will be made next year. The decision as to instalment selling follows:

"It has been ascertained that dealers in personal property who sell on the instalment plan adopt one of four ways of protecting themselves in case of default, namely:

"1. A provision that title is to remain in the seller until the buyer has performed his part of the agreement.

"2. A conveyance of title to the purchaser subject to a lien for the unpaid portion of the purchase price.

"3. The conveyance to the purchaser and an immediate reconveyance by way of chattel mortgage to the seller.

"4. Conveyance to a trustee in trust to hold the title, pending performance of the contract and subject to its provisions.

"In view of the fact that in a number of States it is held that the form first mentioned shall not be enforced according to its terms, but will be regarded as a sale with a chattel mortgage back to secure the unpaid purchase price, it is desirable that a uniform rule be established which will be equitable and applicable to all.

"The rule prescribed is that in the sale or contract for sale of personal property on the instalment plan, whether or not title remains in the vendor until the property is fully paid for, the income to be returned by the vendor will be that proportion of each instalment payment,

which the gross profit to be realized when the property is paid for bears to the gross contract price. If, for any reason, the vendee defaults in his instalment payments and the vendor re-

possesses the property, the entire amount received on instalment payments less the profit originally returned will be income to the vendor to be so returned for the year in which the property was repossessed.

"This ruling amends Articles 117 and 120 of Regulations 33, Revised, and revokes all previous decisions and rulings which are in conflict herewith."

TALKING MACHINE EXPORTS

The Figures for February Presented—Exports Show Machines and Records Both Increase

WASHINGTON, D. C., May 4.—In the summary of exports and imports of the commerce of the United States for the month of February, 1918 (the latest period for which it has been compiled), which has just been issued, the following figures appear:

Talking machines to the number of 5,565, valued at \$154,943 were exported in February, 1918, as compared with 3,786 talking machines, valued at \$90,633, sent abroad in the same period of 1917. The total exports of records and supplies for February, 1918, were valued at \$104,376, as compared with \$89,180 in February, 1917. For the eight months' total 60,711 talking machines were exported, valued at \$1,675,681 in February, 1918, and 48,729, valued at \$1,202,394 in 1917, while records and supplies valued at \$1,275,514 were sent abroad during 1918, as against \$966,463 in 1917.

INCORPORATED

The American Recording Laboratories, Pas-saic, N. J., have been incorporated with capital stock of \$25,000, for the purpose of manufacturing phonograph records. The incorporators are: Carlton E. Sanderson, Mabel C. Sanders, and George Thornton.

A reputation built on "front" can never come "back"—after being side-swiped by Time.

COLUMBIA PROGRESS IN THE SOUTH

Conference of Columbia Branch Managers in Atlanta, Dallas and New Orleans Held in the Latter City—Excellent Reports Made

NEW ORLEANS, LA., May 6.—A conference of the Columbia branch managers in New Orleans, Atlanta and Dallas was held in this city at the local offices of the Columbia branch. Many practical subjects were discussed during the course of the meeting, and it was gratifying to learn that every manager in attendance predicted that April and May business would show a substantial gain over last year. The fact that the company had closed in March the biggest single month in its very successful history was the subject of enthusiastic comment among those present. The managers who attended the conference were W. F. Standke, New Orleans manager; Westervelt Terhune, Atlanta manager, and F. R. Erisman, Dallas manager. Several of their assistants were also present, and the executive offices in New York were represented by O. F. Benz, of the general sales department, who gave a very interesting and effective address during the meeting.

APPOINT COAST REPRESENTATIVE

BOSTON, MASS., May 9.—The New England Talking Machine Co., 16 Beach street, manufacturers of tone arms and reproducers, this city, have announced the appointment of W. S. Gray as their representative in San Francisco, whose headquarters are in the Chronicle Building.

DO YOU USE TONE ARMS

"off the shelf"? You spend time and money freely on the design of a cabinet, why compromise on the tone arm? Why don't you put the same thought into the tone arm? Make it at least as distinctive as the cabinet.

We have experts who are specialists in designing tone arms that will blend with your cabinet in quality and appearance—that will continue quality unbroken from sound chamber connection to stylus groove.

These men are ready to serve and prove to you by sketches and figures that "INDIANA" made tone arms will increase the value of your machine and make it a better selling proposition.

Bear in mind that acceptance of this service does not obligate you in any way and anything developed for you is for you exclusively, and is not sold or sampled to your competitors.

MILWAUKEE TALKER TRADE HELPS THE LIBERTY LOAN

Badger Companies on Roll of Honor—Trade Excellent—New Brunswick Dealers—Goldsmith in Public Eye—C. J. Orth Features Puritan

MILWAUKEE, Wis., May 12.—One of the principal duties of the local talking machine trade during the last four weeks or more was to help in effecting a subscription to the Third Liberty Loan that puts most other cities of this class to shame. Uncle Sam asked Milwaukee to subscribe not less than \$14,600,000 to the third issue. As a matter of fact, the total subscription at the close of the campaign was found to be \$21,000,000, or an oversubscription of approximately 50 per cent. On the roll of honor appeared the names of the Badger Talking Machine Co., Victor jobber, and the Badger Talking Machine Shop, Victor retailer, each for \$10,000. So far as can be ascertained, these were the largest subscriptions made by any Milwaukee music industry.

The total subscription made by the music trades division, in charge of Henry M. Steussy, president of the Milwaukee Association of Music Industries, exceeded \$75,000. This fine showing was made without sending a committee to visit the individual factories and dealers to importune them to buy bonds.

Local talking machine dealers, both wholesale and retail, have been kept busy as never before during the early spring season. As April advanced and finally May was entered, it became more and more a question of obtaining machines and records than to sell them. And it appears as if this will continue to be the situation from this time on, at least while the war lasts. It does not apply to all makes of instruments, but is particularly true of the Victor, Edison and other of the older machines.

Thomas I. Kidd, manager of the Milwaukee branch of the Brunswick-Balke-Collender Co., concluded arrangements just prior to May 1 for placing the Brunswick in the new establishment in the Plankinton Arcade of the Milwaukee Piano Mfg. Co. Hundreds of visitors attended the formal opening of the new store on May 1, and much time was spent in inspecting the special exhibit of Brunswick models which Mr. Kidd provided for the occasion. Henry M. Steussy, president of the Milwaukee Association of Music Industries, is general manager of the new store.

Concerning Harry A. Goldsmith, secretary of

PERSONAL SERVICE

The members of our Company are always available and will gladly see you personally or write you at any time we can possibly serve you.

BADGER TALKING MACHINE CO. 135 Second Street
MILWAUKEE, WIS.
VICTOR DISTRIBUTORS

the Badger Talking Machine Co., Victor jobber, Milwaukee, the "Who's Who" column of the Milwaukee Journal in a recent issue had the following interesting things to say:

"Harry A. Goldsmith acquired a becoming bashfulness while engaged in the newspaper business in Calumet, Mich., from which he has never recovered. Mr. Goldsmith believes a bass drum never sounds so loud as when one pounds it himself, but is more effective if the world is doing the pounding.

"Mr. Goldsmith was born in Chicago thirty-four years ago and reduced the city's population by one before he was old enough to begin his education. This, he says, he began in the public schools of Calumet and has not yet finished. Leaving the newspaper business, he returned to Chicago, where he was engaged in the brokerage business until about four years ago, when he became one of the organizers of the Badger Talking Machine Co. and came to Milwaukee. His interests have spread to several other allied industries and Mr. Goldsmith declares he is in Milwaukee to stay.

"Mr. Goldsmith's residence is 585 Stowell avenue; he is unmarried. (But in confidence he said he is willing and named some qualifications.) He is a member of the Press, Elks and Advertisers' clubs, the M. A. C., the M. A. of C. and is a Mason."

Paul F. Seeger, manager of the talking machine department of the Edmund Gram Music House for the past nine years, resigned May 1 in order to accept the position of manager of the North Shore Talking Machine Co., Victor retailer, 603 Davis street, Evanston, Ill. Mr. Seeger will assume his new duties on May 15.

The Ellis Reproducer Co. of Milwaukee has been incorporated with a capital stock of \$15,000 to develop the business created by James H. Ellis, inventor and patentee of a universal reproducer for talking machines that can quickly be substituted for the regular device. Mr. Ellis

has been manufacturing the reproducer at 410 Jefferson street.

Charles J. Orth, since March 1 exclusive distributor of the Puritan in Wisconsin and Upper Michigan, has been obliged to increase both the traveling sales force and the staff at the local store in order to keep pace with the growth of the popularity of the Wisconsin-made product. Mr. Orth has placed a number of excellent agencies throughout the territory and his policy of selecting only the leading merchant in each community to take on the representation of the Puritan has won him a splendid lot of new trade. The sale of Puritan records also is growing beyond all expectations.

Emil O. Schmidt, piano and talking machine dealer, recently paid a fine of \$100 and costs in the police court upon being adjudged guilty of having violated the Wisconsin fraudulent advertising law. Mr. Schmidt advertised that he had purchased the entire bankrupt stock of the Republic Phonograph Co., Inc., Chicago, and was placing it on sale "at considerably less than wholesale price." The advertisement also contained a facsimile telegram purporting to have been received from Arthur S. Nestor, trustee of the Republic Co., reading:

"Your offer accepted for the bankrupt stock of the Republic Phonograph Co. Shipping you fifty machines to-day; balance to go forward upon receipt of packing box. Waiting your instructions."

At the trial it developed that Mr. Schmidt had purchased only a part of the Republic's bankrupt stock and that the prices at which he advertised them for resale were \$30 above the wholesale and \$15 above the regular retail price of the instrument. Furthermore, the telegram was branded as a "fake" and evidence was shown that Mr. Schmidt himself wrote the message, which was taken to Chicago by a friend and dispatched from there. Mr. Schmidt protested his innocence but the court found him guilty and imposed the heaviest fine yet meted out under the act.

Albert E. Smith, proprietor of the Wisconsin Music House, 20 North Carroll street, Madison, Wis., has moved his establishment to beautiful new quarters at 215 State street. The new store is probably the handsomest in the capital of Wisconsin. Due attention has been paid to the Victrola department. A feature is the stock of more than 10,000 Victor records which the house carries at all times. An assortment such as this seldom is seen in a city of less than 100,000 population. Madison has 38,000 inhabitants.

The Madison newspapers recently published illustrations of a huge load of Victrolas being delivered by truck to the Forbes-Meagher Music Co. of that city. The house is a Victor retailer and the shipment, of which a part was illustrated, is considered the largest that has ever been received in the State capital.

Wiley L. Ballinger, retail jeweler, 17 West Main street, Madison, Wis., has installed a talking machine department.

R. Boeing, Hustisford, Wis., is a recent addition to the list of Brunswick retailers.

The George D. Ornstein Co., Victor wholesalers, recently established in Philadelphia, have incorporated with capital stock of \$150,000.

No man can serve Honest Business and Questionable Practices at the same time—and be even moderately happy.

HOW THE RECORD SHORTAGE HAS HELPED MANY DEALERS

Has Forced Distributors and Dealers to Analyze the Victor Catalog, Says J. C. Roush, of Pittsburgh—Idle But Meritorious Stock Being Brought to Attention of Public—Interesting Chat

"I am firmly convinced the present record shortage is in one respect at least one of the best things that could happen to the average Victor dealer," said President Joseph C. Roush of the Standard Talking Machine Co. of Pittsburgh to a representative of the Talking Machine World in answer to a question regarding the present record situation. Mr. Roush was in Philadelphia April 22 and 23, attending an executive meeting of the National Association of Talking Machine Jobbers, of which he is secretary.

"And to many of the distributors, too," he continued, "it has forced our noses back into the big general catalog where the best music of all time is waiting for a chance to be sold. All of us have been carrying stocks of hundreds of records on our shelves for years which would have been snatched up by the public only we were too busy selling supplement records to discover them ourselves.

"Distributors and dealers alike are now feverishly thumbing the big catalog, checking old stocks, playing over records which haven't been out of their covers for years—and are getting closer to the heart of the Victor game than ever before in their Victor careers.

"And if the experience of others is anything like my own, they are getting many a surprise—and are having a lot of fun with this research work."

"Can you tell us some of the things you are doing to interest your dealers in these catalog numbers?" he was asked.

"The study of our own record conditions has as an immediate object the supplying of dealers with salable numbers to take the place of those not now available. Such records we list, classify and push through all the agencies at our command.

"In the first place our road men carry lists of numbers and stocks to assist dealers in keeping their shelves filled with good salable records. Orders for the records not being pressed are discouraged—those for available records are encouraged.

"Then twice a month we issue a list of twenty records which we urge the dealer to push through his sales force for two weeks. This serves two important purposes. It boosts a dealer's record sales and it gets his salesman intimately acquainted with twenty good catalog records. After a salesman has played a good record from one of these lists over and over

again for his customers and recognizes how easy it is to sell, that record becomes one of his permanent favorites. He will continue to recommend it long after the two weeks have elapsed—in fact, it has been added to his growing vocabulary of good Victor 'hits.' It goes without saying that only records are so listed which a dealer can get.

"Each month a hanger is furnished dealers listing eight to a dozen numbers of the same nature for a dealer's booths and windows. These hangers are headed 'Victor Records Every One Should Own' and are somewhat similar to those issued by the Victor Co., but list only records in stock in our territory.

"About once in three months a classified list is prepared for the dealer's distribution, listing twenty to twenty-five 'in-stock' records under four different classifications—dances, violin numbers, etc.

"On our record delivery bags, and in fact in every other way we know we list for the dealer and for his record buyers, those General Catalog numbers which are practically unknown, have distinct merit and can be secured in considerable quantities.

"The results have fully justified these special efforts. We have made a feature of these lists since last September, and we would not discontinue them now even though every record in the catalog were available. Despite shortages of all kinds, embargoes, delayed shipments and all the other distributors' troubles during these months, our record business has increased steadily, and we attribute this largely to these special drives on 'records-in-stock.'"

FORDHAM SHOP INCORPORATED

The Fordham Victrola Shop, Inc., New York, has been incorporated with capital stock of \$15,000 to deal in pianos, Victrolas and musical instruments generally. The incorporators are Lillian Stimel, Charles Somberg and James J. Collins.

BUSINESS IN INDIANAPOLIS FAR EXCEEDS EXPECTATIONS

Baldwin Co.'s Great Columbia Trade—Aeolian Co.'s Fine Liberty Loan Showing—New Pathé Dealers—Big Call for Victrolas and Records—Some Columbia Changes—The News of the Month

INDIANAPOLIS, IND., May 4.—Business during April exceeded the expectations of most of the local talking machine dealers who had anticipated that the Liberty Loan drive and tax-paying time would be felt.

The Columbia Grafonola department of the Baldwin Piano Co. store rounded out its first year April 1, and C. P. Herdman, manager, said that he was pleased at the record. This April's business was far ahead of April last year, Mr. Herdman said. With each supplement of Columbia records Mr. Herdman is giving a patriotic monthly calendar to his customers, which advertises the Baldwin store's talking machine department.

F. K. Pennington, assistant general sales manager of the Columbia Co., visited the Indianapolis branch several days ago. He informed Ben Brown, Indianapolis Columbia manager, that the business for March was the biggest in the history of the company. C. E. Wilson has been placed in charge of the foreign record department of the local branch which is constantly growing. John Barlow, manager of the Columbia department of the Beasinger Outfitting Co. at Louisville, Ky., is pleased with the Columbia business, Mr. Brown said.

Morris Rosner, manager of the Vocalion department of the Aeolian Co. store, left Wednesday to join the army. Serge L. Halman, manager of the store, said that the Vocalion business has been satisfactory. Mr. Halman was proud to report a 100 per cent. Third Liberty Loan Bond record for the local employees of the Aeolian Co.

H. E. Whitman, manager of the talking machine department of the Pearson Piano Co., said that the Edison business held up well during April, and that a shortage of certain models of Victrolas was all that held down the Victor business. The record business also has been good.

A. H. Snyder, manager of the Edison Shop, reported that April business for this year showed an increase of 42 per cent. over April last year. The average sale was \$207, Mr. Snyder said, showing that his salesmen were putting across the business for the higher-priced Edisons.

George Standke, manager of the Brunswick Shop, said that April proved to be the best

month since the holidays. Mr. Standke attributes many of the Brunswick sales to the new models with Ultona attachment, which is causing much favorable comment and has been well advertised. In featuring the Ultona Mr. Standke had a large model made for the window display electrically lighted to show the idea of the attachment.

At the Pathé Shop business in machines and records is reported good. H. A. W. Smith, manager, is still visiting Buffalo, N. Y.

R. B. Goldsbury, in charge of the Pathé wholesale department of the Mooney-Mueller-Ward Co., has signed a contract with the 'Trustees' Harco Association Store, of Harco, Ill. This is a co-operative store backed by 5,000 miners, and Mr. Goldsbury is expecting to see the store do a big Pathé business. E. J. Groenwoldt has been added to the talking machine department of the Mooney-Mueller-Ward Co., and will be on the road. The W. P. Johnson Drug Co., of Greenfield, Ind., has put in a line of Pathé machines.

W. E. Pearce, of the Brunswick talking machine department of the local branch of the Brunswick-Balke-Collender Co., is urging his dealers to sell the higher-priced models, and not to be content with selling the smaller models. The O'Donnell Hardware Co., of Washington, Ind., has opened a Brunswick department. A. J. Kendrick, of the Brunswick Co., was in Indianapolis recently on a tour of the Brunswick dealers. Charles Veneman, of Muncie, Ind., is doing a nice Brunswick business, Mr. Pearce said.

O. C. Mauer, manager of the talking machine department of the Kiefer-Stewart Co., distributors of the Sonora and Stewart phonographs, said that business was splendid. He has already placed his fall orders.

The demand for Victrolas and Victor records keeps steadily up and both are harder to get, is the report received from the Stewart Talking Machine Co. This concern is striving to keep its stock of machines and records up to the minute in order to give their dealers the best service in spite of all obstacles. Emerson Knight, advertising manager of the company, has enlisted in the U. S. Marine Corps and expects to leave next week for service.

Jewell Cartmill, secretary of the Kipp Phonograph Co., distributors of the Edison, reported a satisfactory April business.

Under the name of the "Music Interests of Indianapolis," local talking machine dealers and piano dealers have started co-operative advertising in the local newspapers featuring the "Music in the Home" idea. A full-page ad appeared last week in one of the evening papers.

SCHOOL OF MECHANICAL INSTRUCTION

There will be a school of mechanical instruction at the Edison laboratory on Monday, Tuesday and Wednesday, June 3, 4 and 5, the three days just preceding the Edison dealers' convention.

This has always been a feature of the week the convention is held and each year the attendance is larger and larger, showing that the dealers are becoming more and more aware of the importance of being fully acquainted with the instruments they are selling. All the new, as well as the old, improvements are going to be discussed during this three-day session and a large attendance is looked for.

TALKING MACHINE MEN MEET

J. T. Coughlin Elected President at Annual Meeting—Reports Show Year's Progress

The annual meeting and election of the Talking Machine Men, Inc., was held on Wednesday afternoon, April 17, in the Assembly Rooms of the Merchants' Association in the Woolworth Building.

Prior to the usual order of business the body was addressed by J. Newcomb Blackman, chairman of the talking machine division of the Al-

J. T. Coughlin, President

lied Music Trades Liberty Loan committee. Mr. Blackman made a stirring address in the interest of the drive, and the result was that a spontaneous decision by almost every man who attended was made to take some bonds, subscription blanks being on hand for the purpose. The afternoon's total amounted to \$40,000 and, of course, this is only a small part of what the trade is doing, as many had subscribed liberally previously.

The annual reports of the recording and financial secretaries were then read, both of whom in addresses called attention to the growth of the organization and the progress it had made during the past fiscal year.

The new amendment to the by-laws to make jobbers associate members only was next taken

up, and after much discussion this was defeated through the inability of those wishing the change to muster a two-thirds vote. Another amendment was then offered, making it optional with the jobbers whether they became active or associate members. This latter was laid on the table until the next meeting.

The election of officers then followed with the result that J. T. Coughlin was elected president; Sol. Lazarus, vice-president for New York; A. H. Tusting, vice-president for New Jersey; A. B. Clinton, vice-president for Connecticut; E. Leins, financial secretary, and A. Galuchie treasurer. The election of an executive committee and a recording secretary was laid over until the next meeting.

The Talking Machine Men, Inc., have made great strides during the past year, not only in adding to their membership, but in accomplishments, and from the attendance at recent meetings, which has been large, it will not be surprising to see the organization make further gains during the balance of the year; at least the indications point that way.

BROOKS BUSINESS EXPANDING

Manufacturers of the Brooks Phonograph Making Arrangement to Double Their Output

SAGINAW, MICH., May 6.—The business of the Brooks Mfg. Co., of this city, manufacturers of the Brooks phonograph, is increasing to such an extent that the company is planning at the present time an expansion all along the line, with the idea of obtaining facilities which will enable it to more than double its output. The company is adding new dealers to its lists from all parts of the country, and the sales department states that as soon as the dealer receives his sample machine, good-sized orders are forthcoming immediately.

Some of the well-known phonograph dealers who were recently added to the lists of Brooks representatives have informed the company that their requirements for the Brooks automatic repeating phonograph will be covered by carload orders next fall, and that their customers are enthusiastic in their praises of the instrument. The automatic repeater, which is an exclusive Brooks device, has been an important factor in the success of this phonograph, and its simplicity and efficiency has won recognition from the dealers everywhere.

BUFFALO TRADE MAINTAINS ITS CUSTOMARY OPTIMISM

Excellent Volume of Trade Gives Reason for This Attitude—Music Industry Booms Liberty Loan—Columbia Co. in New Wholesale Quarters—Record Orders Should Be Confined to Actual Needs

BUFFALO, N. Y., May 4—Even in face of a shortage of machines and records, embargoes, depleted staffs, etc., Buffalo talking machine dealers and jobbers are maintaining their customary optimism. As hundred percent loyalty will admit of no pessimism, they are not borrowing trouble as to what restrictions the Government may place on their business from now until the time when the tide of Prussian terrorism is stemmed. They are confident that Uncle Sam will place on them no unfair burdens, no business-destroying curtailments.

Buffalo talking machine dealers and jobbers joined with the piano men in putting over the music trades' end of the Third Liberty Loan. Their quota of \$150,000 was oversubscribed. Their committee was composed of William H. Daniels, chairman; C. N. Andrews, George A. Goold, Jacob Hackenheimer, Robert L. Loud, N. R. Luther, Ben Neal and C. H. Wood. They worked at full speed, increasing right up to the last minute. At the close of the campaign Saturday evening, May 4, they attended a jollification dinner at the Iroquois Hotel. At this session Chairman Daniels and his co-workers were warmly congratulated on their success.

The name of the Adams-Koenig Piano Co. has been changed to the A. F. Koenig Piano Co. A. F. Koenig has bought out the interests of L. B. Adams in the concern. Mr. Koenig expects to add an important line of talking machines to his stock.

L. M. Cole, Eastern representative of the Gibson-Snow Co., Inc., Syracuse, was a Buffalo visitor. "Lennon & Clarke, of Watertown, N. Y., have been appointed Sonora agents," said Mr. Cole. "This firm sold its initial delivery before the second shipment arrived."

A. H. Trotter, Western New York representative of the Gibson-Snow Co., has established eleven Sonora agencies in Buffalo.

The business of the former Syracuse branch of the Brunswick-Balke-Collender Co. is now handled by the Buffalo office of that concern. F. G. Eigenbrod is in charge of the phonograph department of the Buffalo branch. L. J. Farrell is resident salesman of the Syracuse territory, with headquarters in Utica.

Lingard Loud, son of Robert L. Loud, will continue his training as a U. S. flyer. He was recently graduated from the ground school of aviation at Princeton. In the Victrola department at Mr. Loud's store two new demonstration booths have been added.

Patriotic rallies were held recently by the employes of the William Hengerer Co. and J. N. Adam & Co., Victrola dealers. Each employe signed a pledge to engage in national service work of some kind and "to constantly support our boys by every means in our power."

Motor truck freight routes from this city to points within a 150-mile radius will be organized by the Buffalo Chamber of Commerce. Talking machines will probably be among the goods shipped over these routes.

Victor & Co., Pathéphone jobbers, had striking window displays for the Third Liberty Loan. This firm and its employes and customers were heavy purchasers of the bonds.

The Jones Piano Co. has closed its Buffalo store.

The store of the Winegar Piano Corporation has been remodeled and attractively redecorated.

A. B. Smith, dealer of Akron, O., was a Buffalo visitor.

R. E. Smith, salesman for the Hoffman Piano Co., Sonora dealers, has originated some attractive merchandising signs at that store.

The Columbia Graphophone Co. has moved into its new wholesale quarters on the second and third floors at 733-737 Main street. The

company has invited its friends to patronize the numerous retail Columbia dealers in this city.

W. D. & C. N. Andrews, Victor wholesalers, are working out a method to reduce the circulation of Victor monthly supplements. The firm has sent out a letter to dealers on this subject. An excerpt from the letter follows: "Owing to war conditions the Victor Talking Machine Co. is experiencing great difficulty in supplying sufficient monthly supplements as well as records. They have asked us to lower our demands to actual needs. In order that we may co-operate with them we are going to ask you to specify the lowest quantity with which you can circularize your customers."

This subject was discussed at the last meeting of the Talking Machine Dealers' Association of Buffalo. A committee was appointed to handle this matter.

IMPRESSIVE SIGN FOR GOETZ STORE

The Goetz Music Store of Philadelphia has recently erected a very handsome Victrola electric sign. It is hung over the sidewalk so as to meet the gaze of people moving both up and down the street. Each letter in the word Victrolas is in white opal glass, which is set into a large dark green square, thus giving a very strong contrast when the interior is lighted up. At the top of the sign is the Victor trade mark, which is worked out in art glass, and which is also illuminated from within. At the bottom is a rectangular glass in which appears the name of the Goetz Music Store. The whole sign measures four and one-half feet in width and twenty feet in height. It is a very impressive affair.

Mr. Talking Machine Merchant: Why not have some advertising cards or postal cards printed; the former you could enclose with a letter. In addition to the article you are featuring on the card, print a little street map showing the vicinity and location of your store. Make it easy for people to find you.

65¢

Emerson Records

The equal of any records at a 75c price—in length of playing, in quality of tonal production, and in value to purchaser.

You can't beat the Emerson dealer who offers these remarkable records at 65 cents each, that play as long as the average standard record.

Hits way in advance of everybody

If you want to know how far Emerson dealers always are in advance, glance over the following hits, already on sale by Emerson dealers.

*If you're an
Emerson
Dealer
you're selling
them NOW*

"They Were All Out of
Step, But Jim"

"What are You Going to do
to Help the Boys"

"I'm Sorry I Made You Cry"

"Cleopatra"

"'N' Everything"

*If you're not,
have you been
able to get
these Hits
Elsewhere?*

It's surely a big advantage to sell Emerson Records. You appeal to a bigger population—every machine owner—with popular song and dance hits way in advance of the others. Emerson Records are now made in 2 sizes—35 cents and 65 cents.

Happenings in Dominion of Canada

NEW HOME FOR COLUMBIA CO. IN TORONTO SOON READY

When Alterations Are Completed This Will Be One of the Most Complete Plants in the Dominion
—Heineman Co. Branch to Remove—Sonora Distributors Start Service Campaign—Other News

TORONTO, ONT., May 6.—The management of the Columbia Graphophone Co. are literally "camping on the job" in order to rush the completion on their new factory premises which, as announced in the last issue of *The World*, has been secured at 54-56 Wellington street West, this city. The whole interior arrangements of the building are in the hands of the contractors for remodeling. The general offices will be in keeping with what a factory should be. Special thought and planning is being given to the installation of the hydraulic presses for record manufacturing. The workmen will be provided with lockers and a lunchroom. The entire building is to be filled with fireproof partitions and sprinkler system. Every effort is aimed at providing factory conditions that will permit a largely increased output and a closer co-operation with Columbia jobbers and dealers. It is expected that the factory will be ready for occupation by May 1. J. P. Bradt, the general manager for Canada of the Columbia Co., recently paid Montreal a visit.

Multifile Systems, Ltd., are endeavoring to interest the Canadian talking machine trades in their system of filing records which they term "Flexible."

A Victrola XVI was used at the Regent Theatre in Toronto in connection with the run of "Lest We Forget," one of the finest and most thrilling films ever shown in Canada. One of the scenes shows a group of soldiers in the trenches enjoying a talking machine, and for this scene the Victrola supplied the music. At a special invitation showing of the film the Victrola was also used.

Manager C. J. Pott, of the local branch of the Otto Heineman Phonograph Supply Co., Inc., has been obliged, by reason of the firm's increasing business, to arrange for new premises. It is expected by May 1 the company's Canadian headquarters will be moved from the Lumsden Building, where they have been since opening the Canadian branch a year ago, to 172 John street. Here they will have the advantage of having the offices and warehouse together, thereby permitting a closer personal supervision of all incoming and outgoing shipments. Owing to the increased office work at the Heineman Canadian headquarters, Mr. Pott is to have the assistance of L. Green, who has come to Toronto from the New York office. Mr. Green has had a wide experience and is thoroughly posted on the Heineman policy.

One of the most interesting and helpful Musical Hours for Children held since this notable educational feature was commenced by the R. S. Williams & Sons Co., Ltd., some weeks ago, took place at the Williams' Recital Hall, 145 Yonge street, Saturday morning, with an excellent representation of school children and for which the Edison phonograph supplied all the music. The undoubted feature of the occasion was the "Parade of the Allies," a musical promenade in which all school children attending took part, and a flag dance. An extemporaneous talk on the life of Thomas A. Edison by one of the girl scholars and re-creations on the New Edison completed a most enjoyable program.

Ralph Cabanas, formerly manager of the Columbia business in Canada, has just returned to Toronto from a visit to Mexico. Before going South Mr. Cabanas launched the Talking Machine Supplies Co.

The Walker Talker, manufactured by the Walker Bin & Store Fixture Co., Ltd., Kitchener, Ont., is fitted with a Brooks automatic repeating device for which this firm have the Canadian rights.

Columbia dealers all over Canada featuring Bedtime Stories by Thornton W. Burgess are having a phenomenal sale of these records.

I. Montagnes & Co., Canadian Sonora distributors, have inaugurated a retail advertising service for the benefit of their dealers. Messrs. Montagnes are arranging to manufacture all lines of Sonoras in Canada, several of the smaller types having already been produced in Canada. This action was decided upon whether the importation of musical instruments from the United States should be prohibited or not. Mr. Van Gilder has just returned from a visit to the Sonora factory at New York and succeeded in securing a further supply of goods.

The Starr Co. of Canada express their gratification with the success that has followed their introduction of the Starr line to the Canadian trade and they are now starting out on their second year with still greater confidence.

Maud Powell, Victor violinist, and Grace

Kearns, Columbia celebrity, recently appeared in concert recitals in Toronto. The trade benefited from their visit, as a large number of records of both artists were disposed of.

The Robert Simpson Co., Ltd., featured Alma Gluck records prominently on their delivery wagons and in the windows of the store doors just previous to this exclusive Victor artist's appearance in the Queen City.

E. V. Warne, Peterboro, who recently took on the Pathé line, announces that he has had to reorder quickly to keep his range of models and records as complete as possible.

John A. Sabine, of the Music Supply Co., was a recent visitor to New York.

The Music Supply Co., distributors of Columbia lines, announce that they have leased a warehouse for storage purposes. Office and shipping departments remain at the present address, 36 Wellington street East.

Very attractive phonograph salesrooms have been completed by Frank Stanley on the second floor of his building on Yonge street. These rooms are intended for the better class trade, while the cheaper business is to be handled in the rooms on the mezzanine floor.

SOME QUESTIONABLE SALES METHODS IN MONTREAL

Evil of the "Gyp" or Private House Sale Exposed—W. F. Evans Tells of Conditions in British Columbia—Expensive Models in Demand—New Agencies Arranged for—Important News Presented

MONTREAL, CANADA, May 6.—The matter of small manufacturers of phonographs selling machines from private addresses has been brought to the attention of the writer on more than one occasion and it was only recently where one barefaced incident was related to your correspondent which showed how the public are being gulled and the industry as a whole is bound to suffer. Various modes of misrepresentation are being used in their endeavor to sell machines and records, such as "Owner going to the front," "Moving," "Death in the family" and numerous other plausible misleading statements. The trade should call a meeting and stop this practice or evil and should interview the daily newspapers and have them prohibit fraudulent advertising of this nature. It is not fair competition to the manufacturers who have business taxes, war taxes, etc., to have to compete with dealers of this character who have no business tax or overhead charges to meet. The proof is there and all that is wanted is quick action on the part of the trade to suppress for once and all this growing evil and by so doing they will not only be protecting themselves but at the same time confer a favor on the music-loving public by stimulating the interest in music and allowing them to still maintain their belief in the legitimate talking machine dealer, otherwise it is bound to leave a bad taste in the mouths of some people who are always looking for a bargain and in reality are not getting it. Dealers should bring to the mind of every person whom they sell a machine the fact of the one price system which has been the means of building up this industry and putting the phonograph business where it is.

On a recent trip East, Walter F. Evans, head of Walter F. Evans, Ltd., the well-known music house of Vancouver, B. C., visited Toronto and Montreal en route to New York and other Eastern centers. In Montreal Mr. Evans visited the factory of Berliner Gramophone Co., Ltd., his firm being exclusive "His Master's Voice" dealers for many years, in addition to having the Heintzman agency and handling sheet music and small goods. The Evans store is well located, and is one of the brightest and up-to-date in the West, and Mr. Evans is a musician of unusual training and talent.

Regarding conditions and prospects in British Columbia, Mr. Evans had only an optimistic viewpoint. The Vancouver dealers, since deciding to organize some months ago, have had regular meetings, and the resultant acquaintance and greater confidence in each other, he considered an important advantage to the music business of the city.

H. P. Labelle & Co., Ltd., will exhibit a full line of Pathé machines at the forthcoming sportsmen's show to be held in Montreal.

Indications are bright and rosy for a prosperous summer trade, is the way Tom Cowan, of the Cowan Piano & Music Co., puts it, while referring to the Brunswick line, of which he is a great booster.

"Every month sees an increase in our Victrola department," said J. Donat Langelier, "and if indications prove correct we will eclipse all previous records in our talking machine department despite war-time handicaps."

Popular selling Victor records the past month include patriotic songs by Alan Turner and

(Continued on page 54)

Talking Machine Supplies and Repair Parts

SPRINGS, SOUND BOX PARTS, NEEDLES

THE RENÉ MANUFACTURING CO.
MONTVALE, NEW JERSEY

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 53)

Gitz Rice, and the recordings of Paul Dufault and Mr. Dufresne and not overlooking Heifetz records, whose appearance in Montreal the past month made an extra heavy demand upon the stocks of Victor dealers.

C. W. Lindsay, Ltd., are well satisfied with present conditions. Recent Pathé sales included a number of art models in Sheraton. Columbia and Sonora lines have showed up equally as good in volume of business closed.

The new Victrola store of Gauvin & Courchesne's in the Auditorium Building, Quebec, has been completely reorganized and a large stock displayed. A number of comfortable parlors for the private hearing of Victrolas and records has been installed.

That a good line of talking machines and records can be sold from a departmental store as well as a music store or anywhere is ably demonstrated by Almy's, Ltd., where Miss Vezina in charge of the Columbia Grafonola department holds sway.

"Our clientele take much more readily to the expensive models of Aeolian-Vocalion and Sonora phonographs than they do to the cheaper types," said Charles Culross, "because," continued the speaker, "merit tells and merit sells."

W. J. Whiteside, who specializes in His Master's Voice lines, is doing so with creditable results and his business is showing rapid strides.

Columbia, Edison Amberolas and other lines continue popular with the rapidly increasing list of customers at Wm. Lee, Ltd., store.

J. J. Freund, of the New York office of the Thomas Motor Co., recently called on the Montreal trade.

Layton Bros. recently pulled off a very successful recital of Edison re-created music and are well satisfied with the results.

The Berlind Phonograph Co., Ltd., are well satisfied with the demand for the Brunswick line.

According to L. J. Bourgette, manager of the Edison department of Goodwin's, his department is exceedingly busy and the call is daily increasing for the Edison Diamond Disc machine and records. Columbia product is likewise showing a good volume of sales.

W. Craig, of the Pathé Co., recently called on the trade in Montreal.

Madame Didier, who has established a Pathéphone business of her own in Dupuis Freres store, is well pleased with the call for period models.

In order to devote their entire efforts to the wholesaling of Columbia products in the Prov-

ince of Quebec, the Canadian Graphophone Co. have disposed of their retail branch store to A. A. Gagnier, who will carry on the business under the name of the Canadian Graphophone & Piano Co.

N. G. Valiquette, Ltd., are consistent believers in printer's ink, the result being that everybody knows that they handle the Pathéphone and Pathé records and can give their clientele A1 service.

C. Lamoureux has recently moved to 661 Mount Royal avenue East, where a store in keeping with the Columbia line is conducted.

Managing-Director J. E. Tourangeau, of H. P. Labelle & Cie., Ltd., is building up a phonograph business second to none in the city with the Pathé as its leader. Manager H. C. Foisy is an energetic hustler. A number of new demonstration parlors have been installed to meet the needs of customers.

J. W. Shaw & Co., since removing their Grafonola department downstairs, have trebled their business both in the number of machines and records sold, says Manager A. Rampsberger. The demand is still confined to the higher priced Columbia models.

An exclusive Brunswick shop will be opened in Montreal very shortly in the premises to be vacated by Gervais & Hutchins at 582 St. Catherine street West on May 1. Peter Sydney Berlind will be in charge.

An exclusive phonograph store has been established at 4864 Sherbrooke street West in Westmount by Fred J. Smith, the first dealer to invade this select territory.

The City House Furnishing Co., 1340 St. Lawrence Boulevard, are now carrying a full and complete line of Victrolas and Victor records.

The Canadian Graphophone & Piano Co. have built up a large business in foreign records and maintain a separate department for the sale of Polish, Russian, Italian, Greek, Hebrew and Rumanian records. This firm are carrying advertising in all the leading foreign papers in the United States and Canada and ship records as far as British Columbia, Sydney, Winnipeg and points in the Far West.

FEATURING PATHE RECORDS

Howard E. Brillhart, who has recently opened a new music store at 531 Thirteenth street, Oakland, Cal., is featuring the Pathé records in addition to the Kimball line of musical instruments.

TRADE NEWS FROM WINNIPEG, MAN.

The Berliner-Gramophone Co. Book Some Big Orders Through Thomas Nash's Visit—Robert Shaw Tells of Columbia Expansion—Edison Sales Reported Good by Babson Bros.

WINNIPEG, CAN., April 29.—Thomas Nash, of the Berliner Gramophone Co., Ltd., who is as well known to the trade here as in his own home town, has returned East after a visit to Winnipeg and Calgary. The Western Gramophone Co., distributor of His Master's Voice products, experienced an avalanche of orders for Harry Lauder records as a result of that idol's recent visit. An interesting development of record business here is the greater ratio of sales of grand opera music and records of the classics. The demands from the most remote places for the best of music is also convincing evidence of the country's musical development and the part that the talking machine has taken in fostering public appreciation of the best in music.

Robert Shaw says that Columbia records are coming in such quantities as to indicate considerable factory improvements, over 25,000 having arrived in the last few days.

The records of Louis Graveure have had a big sale as a result of the two recitals given by this artist. Mr. Shaw also says Columbia needles are now to be had in all four grades. He reports all round vastly increased business.

Babson Bros. report Edison sales up to the average and collections fair, shortage of deliveries from the factory being the chief trouble.

TRADE NEWS FROM REGINA, SASK.

REGINA, SASK., March 11.—In the annual circulation campaign of the Post of this town one Columbia Grafonola valued at \$100 and fifteen Columbia \$24 machines figured in the prize list, all of which were purchased from Child & Gower, Columbia representatives in Regina.

G. W. Johnston, for the past five years manager of the phonograph department of Scythes & Co., of this town, and who has recently joined the 77th Battery, was lately tendered a banquet by the firm and staff. He was also presented by the firm with a shaving kit and by the staff with a wristwatch. Short speeches were made expressing regret at losing Mr. Johnston and wishing him good luck. There was a fine musical program.

CONTAINS PRACTICAL SUGGESTIONS

The May issue of the Emerson "Spotlight," a house organ, published for and by Emerson record dealers, made its appearance this week, and this issue contains many practical suggestions that can be utilized to excellent advantage by Emerson representatives. Under the heading of "What Other Dealers Do," there are presented numerous suggestions in connection with the ideas and plans that have been tried out by Emerson dealers and found successful. There is an excellent article entitled "A Good Phonograph," by Joseph I. Carroll, assistant manager of sales, and the dealers are advised that Emerson record advertising is now appearing in the leading newspapers of New York, Boston and Philadelphia. There are reproductions of various forms of Emerson advertising, and this issue as a whole is the best one that has yet been published.

CLOSE MANY IMPORTANT CONTRACTS

DETROIT, MICH., May 6.—Lewis C. Frank, of this city, who manufactures a complete line of record and delivery envelopes for talking machine dealers, has been closing a number of important contracts during the past few months with well-known dealers throughout the country. Mr. Frank stated recently that paper of all styles and grades has advanced greatly in price within the past six weeks, but that he is leaving nothing undone to co-operate with his clients and is now selling his product at prices considerably lower than the increased costs should warrant.

CONDITIONS IN STEEL NEEDLE FIELD

Suggestion Made That Needle Packages Be Increased to Two Hundred at Retail Price of 25 Cents—Timely Chat With Adolf Heineman

Commenting on general conditions in the steel needle field Adolf Heineman, assistant general manager of the Otto Heineman Phonograph Supply Co., New York, who is in charge of the company's Dean division, remarked to *The World*: "The trade doubtless understands that we have been leaving nothing undone to cooperate with our clients in every possible way, even though this has required the expenditure of time and money far beyond expectations. For example, we are using in the manufacture of Dean steel needles only the highest grade carbon steel, and, with the tremendous shortage of raw material the past year, it has been a very serious problem to secure this steel in sufficient quantities to fill the requirements of our trade.

"However, we have surmounted these difficulties until, at the present time, we are producing Dean steel needles in far greater quantities than ever before. Our factories in Putnam, Conn., and Newark, N. J., are working to capacity, and we have every reason to believe that our patrons will be satisfied with our service during the coming year.

"One of the many problems that have confronted us during the past few months is the increased shortage of paper. The use of paper is an important factor in the steel needle industry, as our vast output necessarily calls for the consumption of paper for envelopes in tremendous quantities.

"For many years the standard needle package in this country has been the envelope containing 100 needles, but many of our customers have suggested to us during the past few months that we inaugurate a plan whereby steel needles would be merchandised in packages of 200 instead of 100.

"These jobbers and dealers tell us that this is an opportune time to educate the ultimate consumer to the idea that the standard package for needles is a package of 200 retailing at 25 cents. This plan is timely in view of the fact that many dealers in different parts of the country are now endeavoring to retail the package of 100 needles at 15 cents, but would welcome a standard package of 200 needles at a retail price of 25 cents.

"From a patriotic standpoint this suggestion is an excellent one, for, as the trade probably knows, the Government has already taken steps to readjust the paper situation in view of the alarming shortage of this product. In addition this plan, if generally adopted, will mean a tremendous saving in paper and labor, and will give the dealer a larger profit on every sale.

"As a matter of fact, the unit of needle shipments in the export trade has for some time been a package of 200 needles. We are making shipments to South America, Australia, and all points of the globe on a basis of 200 needles to a package, and we feel sure that this same unit of shipment could be utilized satisfactorily in this country, with a material saving of paper and labor, and increased profits for the dealer."

A form of detectaphone small enough to be worn under a man's shirt front and record conversations on a cylinder attached to his belt has been patented by a resident of Washington.

MEETING OF PORTLAND ASSOCIATION

Oregon Talking Machine Men Discuss Terms and Record Approval System But Fix No Standards of Practice for Members

PORTLAND, ORE., May 4.—The Portland (Ore.) Talking Machine Dealers' Association held a regular monthly meeting at the Imperial Hotel recently with a large attendance and the question of terms was paramount. Frank Case, manager of the Wiley B. Allen Co., made an excellent address in which the province of the association was discussed, Mr. Case taking the stand that while all matters relating to the talking machine business should be fully and freely discussed at these meetings, it was not well for members of the association to criticize terms made by other firms. Each house has its own method of transacting business, Mr. Case said, and as long as the business is done in an honorable manner it is not open to criticism by the association. James Loder, of Bush & Lane, said that members should be broad-minded enough to discuss all subjects and not to take what was said as criticism. There was a lively tilt, free from personalities, and the association seemed to agree that the question of terms should be left to the individual houses, although it was suggested that it was to the interests of all dealers to keep payments up since money has become so easy in Portland.

Strong arguments were made pro and con on the subject of letting records go out on approval. L. D. Heater, of the Columbia; E. B. Hyatt, of the Hyatt Talking Machine Co.; James B. Loder, of Bush & Lane; Paul B. Norris, of Wiley B. Allen; Mrs. Baker, of Sherman, Clay & Co.; C. A. Alphonse, of the Hyatt Co.; W. L. LeVanway, of Graves Music Co.; R. Callahan, of Johnson Piano Co., and Frank Case, of Wiley B. Allen, all took part in a spirited discussion and after a vote of the association it was agreed that it was a good thing to let customers have records on approval. Mr. Heater declared that it would not be long before the association as an association and the members as individuals would find that the practice is not good. Mr. Hyatt took the position that dealers with small demonstration rooms could do nothing else than send out records and said that otherwise much business would be lost. Mr. Case took the position that it all depended on the dealers' using their brains in the approval business and said that if records were sent out to the right people business could be improved in no little degree.

The association went on record as in favor of high terms but declined to make it obligatory on the members to fix any special schedule for the members.

At the May meeting the association will elect officers.

NEW SELECTIONS ON LYRIC RECORDS

Latest List Issued by Lyraphone Co. of America Is Full of Interest

The Lyraphone Co. of America, manufacturers of the Lyric records, have just issued their new catalog of popular songs and dance selections. These latest releases comprise all of the songs of the moment as well as several new additions to the standard catalog of the company. A campaign to popularize the Lyric record is now under way and special emphasis will be made on the firm's long list of foreign records as well as their complete standard catalog.

The foreign records include numbers in Neapolitan, Italian, Polish, Russian, Hungarian, Jewish, Hebrew, Roumanian and Servian. Jacques M. Kohner has been appointed sales manager of the company and promises the trade immediate deliveries in large or small quantities. Mr. Kohner has been connected with several record companies and has an enviable record for creating sales. In a recent statement he said: "Promptness and service is my motto, and that is mostly what the trade wants at this time."

**No. 404 [Vertical Interior]
For Victrolas IV and VI
And Columbia 25 or 35.**

Height, 32 in. Width, 17 in. Depth, 17 in. Holds 208 Victor records. Quartered Oak Front. Mahogany Front. Average weight, crated, 75 pounds. [If horizontal shelving is desired, order No. 1404.] [When felt interior is wanted, order No. 404F.]

Making the Best of Current Shortages

War, among other things, has brought about a national shortage of both talking machines and talking machine records.

Naturally this reduces the normal cash turnover of the talking machine merchant, but many enterprising dealers have been quick to recognize the best way to make up for these shortages is to push the sale of Udell record cabinets.

The Udell line of trademarked cabinets stands supreme in its field. The high quality of workmanship and the unusual beauty of design that characterizes all Udell cabinets, insure a profitable cabinet department for the dealer.

The Highest Grade Phonograph Steel Needle in the World

The WALL-KANE STEEL NEEDLE

The Wall-Kane Steel Needle is the finest grade of ordinary domestic steel needle, wonderfully improved by chemical processes, which, briefly described, are as follows:

The highest grade of steel needle of domestic manufacture, and playing one record only, is first subjected to chemical processes by which the grain of the needle is made very much finer (see illustration under magnifying glass).

After this process the needle looks all black, like illustration No. 1. Considerable quantity of the charcoal in the original needle is now eliminated, and the needle greatly strengthened by the finer grains and the elimination of the charcoal.

The point of the needle is then subjected to various chemical processes. While in this process the needle looks like illustration No. 2.

Three different coats of certain chemical solutions are placed on the point of the needle, softening the point, so much so that the needle will positively play at least ten records before the friction with the grooves will wear off these coatings and reach the original grain of the point.

Dealers who believe in merchandising an article of the highest quality, and handing out to the public the greatest value should handle the

Wall-Kane Steel Needle

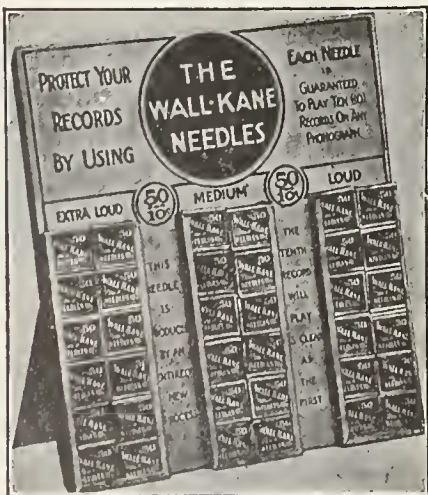

To the Dealers:

Practical test offered to dealers to prove the superiority of

WALL-KANE STEEL NEEDLES

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

**Jobbing Territory
Open for
ProgressiveHouses**

BEWARE OF IMITATIONS

This handsome metal enamel display stand holds 60 packages, 2 doz. extra loud, 1 doz. medium and 2 doz. loud; each package containing 50 WALL-KANE NEEDLES, retailing for 10c. Price of stand to dealers, \$4.00. Single packages, 6½c.

NEW YORK

Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the fifteenth in a series of articles on the general subject of the musical possibilities of the talking machine. The aim of the series is to develop these possibilities from all angles, thus opening up fields for sales expansion oftentimes neglected wholly or in part.—Editor.]

THE RECORDS OF STRING QUARTETS

Explain it how you will, mankind has come nearer to producing the harmonies of the blest through the medium of four-stringed instruments than in any other way ingenuity has ever devised or is likely to devise. There may be some to whom the thrilling beauties of a fine quartet are closed, whose mentalities are irresponsive to the loveliness of the most perfect form yet fashioned out of the material of music. But there is no use in worrying about people of that sort. What is worth while is to tell my talking machine friends that when they do not push some of the very fine existing records of concerted string music they fail to do a very wise and a very necessary thing.

Form

Let me go into it a bit deeper. The art of music expresses itself in various ways. Some of these ways have become, as it were, standardized. The opera, the symphony for orchestra, the sonata or ballad or nocturne for piano; these are some of the standardized forms into which musical expression has coalesced. Now, one of these, and one of the most beautiful and appropriate, is the quartet of stringed instruments. More than a hundred years ago Haydn was working out in the peace and security of his position as leader of the private orchestra of a great Magyar prince the problem of putting to the most perfect use the beauties of the violin family of instruments. The violin itself, queen of musical instruments, is unsurpassed—nay, unequalled—in all that makes for musical loveliness. Its tone, at one moment strong and vigorous, at another yielding and melting, at still another joyous and keen, swelling and dying out at the magical touch of the musician's bow, is something that has never been equaled for sheer musical value by any other product of man's ingenuity. It offers an almost literally perfect medium for the production of musical tone. And, to bring the matter up-to-date, it is splendidly fitted to the requirements of the recording disc of the talking machine.

A Melody Instrument

But the violin has one great disadvantage. It is strictly a melody instrument. To a limited extent double-notes can be played on it, and to a still more limited extent chords of three notes; by a process of arpeggiation. Yet both of these extensions of the violin's capacity are technically hard to produce and far from bringing about the needed filling-in which is demanded for a musically self-contained instrument.

Unless, in fact, music can be performed in at least four parts, it is not satisfactory to the ear. The piano and the organ alike, of course, are capable of this and more; hence their tremendous utility, overcoming the obvious defects of their tempered intonation, the shrieking of their minor thirds and the growling of their sixths and sevenths. Their harmonic capacity lifts them above all these defects and makes them musically indispensable.

The Other Strings

Now, in order to produce musical effects as complete and self-contained as the piano or organ alone gives it is necessary to back up the violin with auxiliary instruments. The use of the piano or organ with the violin is not satisfactory, for the tones of piano or organ do not blend well with the smaller instrument. Fortunately, however, the violin family contains other instruments, lower in pitch, which together with the violin enable the composer to

write in at least four separate parts, corresponding to the four-part harmony of soprano, contralto, tenor and bass-baritone, familiar in chorus music. Four-part writing for voices is the oldest form of concerted music and the simplest. Applied to the quartet of stringed instruments, violin (soprano), second violin (alto), viola (tenor) and 'cello (baritone-bass), the musical results are not only satisfactory in width and richness of the chords, but ever so much better in all respects of beauty, sweetness of intonation and capacity for emotional expression.

The String Quartet

The string quartet, so-called, was thus worked out by Josef Haydn and by him developed into the basis of the elaborated form of orchestral writing. Even now, though instead of one instrument for each voice, the modern orchestra may contain sixteen first violins, sixteen second violins, fourteen violas, fourteen violoncellos and ten contrabasses, the basic idea is the same and the composer bases all his writing on the notion of the simple quartet of these stringed instruments, first violin, second violin, viola and bass. Haydn developed this form, as has been said, and wrote many "string quartets"—as the form itself has likewise come to be called. Mozart followed him, and in turn he was followed by the greatest of all quartet writers, as he was the greatest of all musical composers—Beethoven!

Almost every other composer who has ever attempted to express himself in art-forms has tried his hand at the string quartet. Mendelssohn, Schubert, Schumann, Brahms, are a few of them. It is a simple form, merely writing for four instruments, each of which is virtually a duplicate of the next, at a different pitch. Yet no form of music is so hard to write well, none so seldom written well, none so seldom well performed. With all this, nevertheless, no other form of musical expression is half so lovely, half so fascinating to the musical taste, as this.

A really fine quartet, like some of Mozart's, like Beethoven's in B flat, is a breath from Heaven, a glimpse of sweetness and light such as mortal man can scarce experience from any other source. Fortunately, the string quartet

lends itself wonderfully well to recording, and some extremely good records of such music have been made. Of these I shall speak below.

The Four Fiddles

The four instruments which comprise the stringed quartet are two violins, a viola, and a violoncello, or 'cello, as it is usually called. The two violins in no way differ from each other, but to the second violin is allotted the part of the alto voice in a four-part song; that is to say, the range of sound from G below treble staff to C above the staff, or thereabouts. The first violin may range through the entire compass of its tones. It is the solo instrument par excellence, doing the showy work and gaining the hearer's interest more quickly, just as the soprano in the quartet does. But the two violins often interchange. The reason for having two violins is, of course, found in the fact that otherwise there would be a sort of gap between the range of the violin and that of the viola which would be awkward and hard to fill up.

The Viola

The viola itself is a lovely instrument, but one that only too often sinks into obscurity in the light of the violin tone. It is a somewhat larger violin, tuned a fifth below the other. Its strings are C (below middle C), G, D, A, instead of G, D, A and E. It is quieter and somewhat more melancholy in tone quality. But its voice, though gentle, is the voice of all voices the loveliest, the mellow contralto tones of a charming woman.

"Cellos"

The violoncello is the baritone of the quartet. But it is a baritone with a range of voice that runs up to the soprano and down to the bass.

This is a noble instrument and one which has made a wonderful hit with the music-lovers who buy instrumental records. The work of such men as Josef Holmann, Hans Kronold, Anton Hekking, Leo Schultz and Pablo Casals has splendidly brought the beauties of the 'cello before the minds of record buyers. Its tone is noble, manly and capable of considerable nuance; but its prevailing thought is, after all, melancholy.

The string quartet, then, is a powerful instru-

THE UNIT CONSTRUCTION COMPANY

RAYBURN CLARK SMITH, President

Fifty-eighth Street and Grays Avenue, PHILADELPHIA, U. S. A.

THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 57)

ment for the production of musical works of the highest order. It is neither noisy nor titillating. Its thought is pure, simple and lovely. It relies on its sweetness and light rather than on adventitious ornament.

Quartets

The various works that have been written in quartet form are very many in quantity. But in form they are the same. The quartet is written just as is a symphony for orchestra or a sonata for piano, but in simpler and less florid form than either of the others. It usually has three movements, or even four, an Allegro, a slow Andante, a gay Scherzo and a brilliant or thrilling Finale. The first movement contains the usual two themes, one bright and vigorous and the other gentle and feminine. These are worked out, developed, repeated and closed, like the regular first movement of a sonata or symphony. The Andante or Adagio is a slow song, in which the full beauty of the singing tone of the instruments can always be brought out. The Scherzo is gay and tripping, testing the technical powers of the performers to the utmost and the Finale is powerful and conclusive, bringing the composer's thought to an appropriate close.

Testing

Much most interesting experience may be had, and much very valuable information, too, by testing out before offering for sale the string quartet records in stock. As a mere beginning, and mainly for the purpose of becoming acquainted with the tones of the four instruments, separately and blended, it is well to try such a piece as the Humoresque on two American airs, as played by the Zoellner String Quartet. This is found in the Columbia catalog. Then the Victor catalog contains records by a string quartet composed of Mischa Elman and Messrs. Bak, Rissman and Nagel, of the Boston Symphony Orchestra. These artists have produced records of the Andante from Haydn's Emperor Quartet, a Minuet (Scherzo) from one of Mozart's quartets and the slow movement from a quartet by von Dittersdorf.

The Victor String Quartet has recorded movements from three of Beethoven's lovely works in this form. These are the very height and depth of the quartet writer's art and every one who wants to appeal to the intelligence of his buyers should soak himself in them. He will then have no trouble in selling them.

Incidentally, the above-named quartets, the Zoellner Quartet and others have recorded also smaller pieces, like Grieg's Spring Song,

Dvorak's Humoresque, and others adapted from piano and orchestra. These are useful indeed for getting the customer acquainted or broken in. The real thing can follow later.

Some day a complete quartet will be recorded on a set of double-faced records. How soon this great step in the musical evolution of the talking machine shall be definitely taken will largely depend upon the intelligent demand of the dealers. The present article has been an attempt to prepare the ground for this demand.

MARVEOLA PLAYS SIX DISC RECORDS

Unique Weser Bros. Model Can Be Controlled by Buttons or Will Operate Automatically—Will Be Feature of Weser Exhibit in Booth Seven National Music Show

Among the unique exhibits at the National Music Show will be that of the Marveola, a talking machine de luxe, manufactured by Weser Bros., Inc., 520-530 West Forty-third street, New York. It will be on display at Booth seven, and will play from one to six standard disc records, of eight, ten or twelve inches. These records may be placed upon the turntable at one time, the operation of the machine being controlled by electric buttons. The mechanism of this machine has been so perfected through the ingenuity of the late John A. Weser, that these buttons may be, if so desired, placed in a different room from the machine. They control the machine in such a way that they start, stop or discharge any particular selection at any time, or will repeat any record, or part of any record, at will, the mechanism shifting to the next record automatically, or at the will of the operator. This machine is particularly adaptable for the purposes of demonstrating records, and for dance music. Besides being controlled by the buttons, it may be set to play at regular intervals, a time arrangement being installed at the side of the turntable in the top of the cabinet.

The operating of the machine is almost human in many respects. As one record is played a metal finger lifts the record off and slips it into a receptacle at the side of the cabinet. The tone arm goes back to its original position and another selection is played automatically. The machine derives its power from ordinary electric light current, a storage battery, a spring motor, or both. This machine will be shown in conjunction with the other styles of Weser phonographs which include various artistic models.

NEW QUARTERS IN PORTLAND, ORE.

Sahlstrom Corporation Acting as Representative for Otto Heineman Phonograph Supply Co., Stradivara Phonographs and Emerson Records

PORTLAND, ORE., May 4.—The Sahlstrom Corp., handling the Stradivara talking machine and Emerson records and distributors of the Western division of the Otto Heineman Phonograph Supply Co., has established itself at 405 Morrison street. L. E. Gilham is the manager of the local branch, the main business here being wholesale. This company has the agency for eleven states for machines, eleven states for the Otto Heineman Co. and six states for the Emerson records. Mr. Gilham says he intends to establish dealers in town for the Stradivara. The company has started off with phenomenal sales for Emerson records, which have not been well-known in Portland until recently. There is a good supply of Stradivara machines yet on hand, but sales have been so large that Mr. Gilham says he is now anxiously awaiting another shipment from the East. A Stradivara grand, just unpacked during the visit of The Talking Machine World correspondent, was sold at once.

The Sahlstrom Corp. is the outgrowth of the Hudson Arms Co., the oldest and for many years the largest sporting goods house in Portland.

JENKINS EMPLOYES FORM CLUB

Men of Kansas City Music House Also Organize a Military Company for Local Guard

KANSAS CITY, Mo., May 6.—Some seventy of the employes of the J. W. Jenkins' Sons Music Co. recently organized a club which is to have for its purpose the social welfare of the employes, and the creation of a military company which will later become a unit of the Seventh Regiment, National Guard of Missouri. Thomas W. Hendricks, who served on the border in 1916, is captain; E. R. Corbett, graduate of a military school, first lieutenant; J. W. Wornock, who has seen service in the navy, second lieutenant; J. Stukenberg, top sergeant, and C. E. Hall, now a member of the National Guard, first sergeant.

Samuel Beatty was elected president of the social club.

Under ordinary conditions, new customers do not appear fast enough to take the place of the old ones, and every progressive merchant realizes the importance of making every customer a permanent one.

On Selling Records

There are many excellent ideas the Victor Dealer can use to stimulate the sale of slow moving stocks. Some of these ideas have already been put into practice, others have not yet been discovered. We urge Victor dealers to encourage their salesmen in originating new plans for selling records, and along the same line our travelling representatives will be glad to offer several good suggestions.

ECLIPSE MUSICAL COMPANY
CLEVELAND OHIO

ECLIPSE

THE NEW EDISON DIAMOND AMBEROLA
MODEL 50

Ten Reasons Why Our Production of the New Edison Diamond Amberola and Blue Amberol Records is Constantly Over-Sold

- 1.—No continual expense for needles, no needles to lose, to be out of just when needed, to become scattered around the house, to prick the fingers, with perhaps serious consequences (especially in the case of children), to be put in their mouths by children, or to wear out expensive records when carelessly used. Instead, a permanent GENUINE DIAMOND stylus.
- 2.—Records almost unwearable and unbreakable, that retail in the United States at 60c, 75c and \$1.00—less than the price of talking machine records of the same individual selections, or selections of the same class.
- 3.—Marvelously sensitive Edison reproducer, the result of more than two thousand separate and complete experiments by the greatest inventor of the age.
- 4.—Simplest and most dependable mechanism ever put into a phonograph.
- 5.—Completely enclosed instrument that retails, in the United States, as low as \$35.
- 6.—Highest class talent in the musical world.
- 7.—Extensive library of records especially suited to the less-than-one-hundred-dollar trade.
- 8.—Musical superiority proven before phonograph experts by comparative tests with talking machines costing from two to five times as much.
- 9.—Manufactured under the personal supervision of Thomas A. Edison.
- 10.—Constant enthusiasm of dealers and sustained interest of owners because of complete satisfaction and extraordinary value for amount invested.

BALTIMORE TRADE USING MOTOR TRUCKS TO SUPPLY NEEDS

Business for April Exceeds Expectations—Cohen & Hughes Open Exclusive Wholesale Department—Columbia Expansion—Fifty Per Cent. Increase at Droop's—News of the Month

BALTIMORE, MD., May 4.—There is a much better feeling over business in April among the dealers and jobbers in Baltimore than for several months. The reason is that all of them equaled or bettered the business of the same month of a year ago and went ahead of most of the month's trading for the year. Goods arrived better than those in most instances by express and boat, while the motor truck played a big part in making possible sales. Advertising by individual dealers besides the regular monthly ads of the Columbia and Victor Cos. kept the retail business alive and sound business methods by some of the dealers in going out into new markets for goods helped business.

One of the most interesting events of the month was the opening of the exclusive wholesale department of Cohen & Hughes, Victor distributors, at their Saratoga street building, just east of Howard. This building was erected by the firm less than a year ago, and part of it was leased to the Maryland Piano Co. A few months ago the Maryland Co. needed larger quarters and moved to Howard and Franklin streets, and I. Son Cohen, head of the firm, decided to separate entirely his wholesale and retail businesses.

A feature of this department is that it is headed by a young woman, Miss E. M. Griffin, who for a number of years has been Mr. Cohen's private secretary. Miss Griffin is well acquainted with the wholesale trade and having been a close student under Mr. Cohen has absorbed equally well the Victrola business and knows all of the details. The first floor, that is, half of the first floor, is devoted to general offices with a rest room for visitors, while the other half of the ground floor is devoted to the shipping department, with garage facilities for the company's motor trucks. The building is a three-story affair and the entire second floor and part of the third are devoted exclusively to record department and the balance of the building for the caring for the surplus stock of machines. The two departments of the firm are separated so well now that every record used by the retail department is charged out just the same as an outside customer, and Miss Griffin says she plays no favorites, so that the retail department of the firm is given no preference over any of her outside customers.

The firm has been making good use of its motor trucks to get machines and records. Mr. Cohen has been keeping some of his big trucks busy coming to and from the Victor factories, and a great deal of goods is delivered to customers along the routes without having to be rerouted at the Baltimore office. Mr. Cohen says he has not been able to get nearly enough goods, but business has been coming along very well, and the motor trucks have made possible some business despite the general shortage of goods. Among the customers who visited the firm during the month were James McFaquar, of S. Kann Sons & Co., Washington; J. F. Hargest, Pocomoke City, Va.; Mr. Caulfield, of Burke-Hume & Co., Norfolk, Va.; Mr. Levy, of Ferguson, Lillienfeld Co., Norfolk, Va., and Charles Jacobs, of Jacobs Brothers.

Harry M. Little, in charge of Cohen & Hughes' retail department, reports a fine business for the month. Mr. Little recently had an exceptionally fine window display featuring Victor records and a Victrola. A large American flag from a flag staff with a cardboard soldier on guard and with grass and lanes of gravel made the window most timely. Various Victor records arranged artistically were placed in various places about the display. During the early part of the evening an electric light shaped into a searchlight effect was thrown on the Stars and Stripes. The cardboard soldier was made by Mr. Little, by cutting the figure out of a large Marine poster that is being used to stimulate recruiting.

Showing a substantial increase for April over the same month of a year ago, and making the quota set for the month, W. S. Parks, manager of the Columbia Graphophone Co.'s Baltimore headquarters, is well pleased with business. This was accomplished despite the fact that goods are not coming in as well as he would like to have them. But Mr. Parks just forces goods in when he is able to get the factory to have them started. Motor trucks have been pressed into service. He has his goods shipped to Hagerstown, about a hundred miles from here, and sends trucks there for the goods. Instead of bringing the goods back to Baltimore he has his men reroute them there and a great deal of the shipment is delivered from that point by either freight or motor trucks.

During the month Mr. Parks made a flying trip to Roanoke and Lynchburg, Va., and stimulated the dealers to activity. He says the prospects for business there are bright, and he expects to see some fine results come out of that section. Among the visitors to the Columbia headquarters during the month were Mr. Freeman, of the Hopewell Furniture Co., Hopewell, Va.; Mr. Carey, of the Columbia Co., Norfolk, Va.; Mr. Coteen, of the Phillips, Levy Co., Norfolk, and Mr. Freedberg, of the Virginia Mercantile Co., Norfolk; M. B. Kornman, of 706 H street, N. E., Washington, a new Columbia dealer, and Kelly Moust, now manager for Lansberg, Washington, and formerly of Hecht's Washington store.

Daniel De Foldes, in charge of the dealers' service department and the international record department, made a trip to New York last week and from headquarters obtained some fresh ideas for his place. P. W. Peck and A. B. Creel, two of the Columbia road men, have purchased new motor cars as the result of the fine business done by them in March.

C. Fred Smythe, in charge of the Dictaphone Co., for Columbia, and who took charge of that department in January, has broken all records for sales. He not alone has bettered any previous month's business done here, but he has beaten the fine marks each month that he has been making and Manager Parks is more than pleased with the record of his Dictaphone man, because he was responsible for bringing him to this city. Harry Dise has been placed in

charge of the accounting department of the Baltimore Columbia branch, and he has reorganized the branch and introduced many up-to-date methods.

W. C. Roberts, manager for E. F. Droop & Sons Co., Victor distributors, is very happy this month, for he is able to report an increase of 50 per cent. in his business. This is the first time since the holiday season that Mr. Roberts was enabled to make any kind of showing. Aside from one month's December business April was the best month that the firm ever had. Mr. Roberts was able to get goods through by express and by boat from Philadelphia. Mr. Roberts also was able to run ahead by the fact that he was able to obtain big shipments of records from some Western jobbers. Among the visitors to the Droop Co. during the month were George Lyons, of Ornstein & Co., Philadelphia; J. W. Wheatley, Easton, Md., and Kirk Johnson, Lancaster, Pa. Maurice Kirsch, of the wholesale department, made a tour through Pennsylvania during the month. This is the first time that Mr. Roberts has sent a territory man out for several months. Retail business is more than holding its own, but many sales for records are being lost because of shortage in this department.

Jesse Rosenstein, for the National Piano Co., Pathé distributors, was in New York last week looking over the field and was making a determined effort to get more goods. The Standard Furniture Co., of Murfreesboro, N. C., has become a Pathé distributor. Eddie Rosenstein, who for a time looked after the wholesale department, has enlisted in the Aviation Corps and is now at Kelly Field, Tex. Business with the firm is reported as good.

H. R. Eisenbrandt Co., Victor distributors, report retail business good, but wholesale business not as good as they would like to have it, owing to shortage of goods. They have been able to get in some goods, but not near enough to meet the demand of their trade.

The Victrola department of the Maryland Piano Co., Inc., John Slockbower, manager, is now in shape and the half a dozen booths of white ivory on the first floor make a very attractive place. Indirect light effect is used and the general scheme of the place is of an ornamental and tasteful nature.

Sol. Rosenstein, of the Rosenstein Piano Co., Columbia dealer, has just inaugurated an international department for records in his store and has the place ornamented with the colors of the Allies. He is looking forward to fine business.

Summer time—the play time—
nothing sounds so sweet as a
Schubert out of doors; on the
porch, in the cottage or at the
camp.

Dealers do well to remember that the

SCHUBERT PHONOGRAPH

is being used more and more to furnish after-
noon as well as evening entertainment—out-
doors as well as in the home.

This means a steady source of income for Schu-
bert dealers. Are you one of them?

LEIBOWITZ OPENS NEW STORE

Talking Machine Man in Bronx Now Has Two Establishments in Fine Residential Center—Handling the Columbia Line With Success

One of the most successful talking machine dealers in the Bronx is Louis I. Leibowitz, who recently opened a new store at 1082 Southern boulevard, which has been meeting with remarkable success. Mr. Leibowitz has another store at 897 East 163d street, and as these two establishments are located in a residential center that is growing steadily, Mr. Leibowitz has been able to build up a very large record trade in addition to a splendid talking machine business.

Louis I. Leibowitz

A few years ago Mr. Leibowitz became interested in the possibilities of the talking machine

The Main Store on 163d Street business, and after making a careful study of the field was successful in securing a license to merchandise the products of the Columbia

Graphophone Co. Mr. Leibowitz then opened the store at 94 East 163d street, handling the Columbia products exclusively, and through the use of aggressive merchandising methods and by carrying a complete stock of machines, with

New Store on Southern Boulevard

a representative library of records, soon succeeded in building up a large and very profitable trade.

Always on the lookout to expand his business Mr. Leibowitz made a survey of the neighborhood and became convinced that Southern boulevard, near Westchester avenue, was a very desirable location for a phonograph store, and last fall leased the store at 1082 Southern boulevard.

This store was fitted up most attractively and an efficient mailing campaign soon produced good results. Mr. Leibowitz is an enthusiastic admirer of Columbia products, and one of the most important branches of his business is the foreign language record division, and the demand for this type of record is increasing rapidly.

Joseph A. Cramer is now the sole owner and proprietor of the Odeon Music Co., which handles the Brunswick phonograph as well as pianos and musical instruments, at 28 Liberty street, New Brunswick, N. J. Dr. F. E. Elmer is no longer connected with the company.

SELLING AGENTS FOR STRADIVARA

Schilling Piano Co. Announces Appointment of Josiah Partridge & Sons Co., Well-Known Furniture House, Who Will Give This Machine Wide Representation

An important deal was consummated the first of the month when the Schilling Piano Co., 112 West Twenty-third street, New York, Eastern distributors of the Stradivara phonograph, consummated an arrangement with Josiah Partridge & Sons Co., with executive offices and showroom at the furniture exchange, Forty-sixth street and Lexington avenue, New York, whereby on May 1 they became the selling agents for the Stradivara.

Josiah Partridge & Sons Co. is one of the oldest furniture houses in the country, having been established over seventy-five years ago, and is selling agent for such well-known concerns as C. B. & J. Warner Co., Inc., Warner Shade & Novelty Co., and the Lewisburg Chair Co., Lewisburg, Pa., and others. They maintain a vast selling organization which will now represent the Stradivara and will cover thoroughly the entire music trade as well as the furniture industry throughout the United States, Canada, Australia, New Zealand, Brazil, Argentina, Chile and various other foreign countries. With the consummation of the new arrangement the promotion of the Stradivara machines has been greatly augmented, and it will undoubtedly acquire an international as well as national reputation.

MCCREERY HELPING "OUR BOYS"

Advertise Plan of Collecting and Buying Records and Machines for Soldiers and Sailors

The Victrola department of James McCreery & Co., Fifth avenue and Thirty-fourth street, carried the following advertisement suitably displayed in the New York papers during the past week:

"To collect records and talking machines for our soldiers and sailors.

"To help this cause James McCreery & Co. have adopted the following plan of buying records and machines for our soldiers and sailors:

"James McCreery & Co. will pay you 10 cents for each old record brought into the store (this excludes all German records, as these have been interned), provided you purchase an equal number of new ones, and

"James McCreery & Co. will pay you from \$5 to \$15 (depending upon condition and value) for every old talking machine, provided you purchase an equal number of new ones.

"Or, if you do not wish to buy any new records or a new machine, and you want to give your old ones to the soldiers and sailors, bring them in, and James McCreery & Co. will deliver them free of charge to the Y. M. C. A., Knights of Columbus or Jewish War Relief, who will forward them to the camps. On request we will call for machines or records."

ST. LOUIS TRADE "OVER THE TOP"

This Is True Not Only in Sale of Liberty Bonds, But in Business—Active Despite Shortage in Stock—Kieselhorst Takes on Brunswick Line—Vocalion Demand Increases—Other News

St. Louis, Mo., May 8.—Talking machine dealers here expected a quiet month in April because of the Third Liberty Bond campaign, but it appears that St. Louis went "over the top" in talking machines as well as in Liberty Bonds. As a matter of fact, the dealers did not have much to say about April business until after the success of the loan was assured. It may be that they did not want any one to think they had been getting money that should have gone for bonds, but when the success of the loan was announced they talked freely. It may have been that they wanted to wait for the end of the month to be certain of their total, fearing all the time that there would be a slump. Increases as high as 44 per cent. over the previous April are reported.

These increases, of course, were with the fortunate dealers who have sufficient stock to make sales when the opportunity offers. There is no denying that there is a shortage of Victor machines, especially mahogany finish. A good many dealers have waiting lists for these machines and will have a nice run of business when the opportunity offers.

The Columbia, Edison and Brunswick are giving their trade a fair supply, in some cases all demands are being met. The jobbing trade was especially good during April, according to all reports. Small-town merchants are expecting a splendid summer business and are ordering freely. City dealers are piling up orders to fortify themselves against a possible shortage.

The Kieselhorst Piano Co. announce that Brunswick machines, Columbia machines and records and Pathé records would be sold from the Olive street store, which has been heretofore an exclusive Victrola store. Concerning this change, Mr. Kieselhorst remarked: "Of course, the adding of these two lines will mean changes and more business. Our facilities of one floor devoted to talking machine sales booths and another floor for record sales have already proved inadequate, so we are going to enlarge these facilities as rapidly as we can. We expect to put ten additional record sales booths in the basement part of our building at once. At the Market street store (known as the Piano and Talking Machine Exchange) we will show the lower-priced machines. Record sales have not been a great success there, and we will withdraw the records entirely from that store and sell them here." The Columbia line of machines and records have been on sale in the Market street store for some time.

At Aeolian Hall Manager Guttenberger reports excellent increases in Vocalion business, both in jobbing and retail. A number of the new dealers are taking hold well. Vocalion

records are now being sold at wholesale to the newly-established exclusive Vocalion dealers, but are not yet on sale at Aeolian Hall, the reason being that so far the supply has not been adequate to taking care of the exclusive dealers and the big retail run on a popular number at Aeolian Hall. Mr. Guttenberger hopes to offer Vocalion records at retail after May 15.

Several of the new machines with the Universal tone arm are on exhibit at Aeolian Hall and have been highly praised. Especially has this praise been given to the playing of the various makes of records.

Ben S. Phillips, who was manager of the Columbia retail store here, has joined the Vocalion sales staff.

Manager Irby W. Reid, of the Columbia wholesale department, reports excellent general business in the entire territory. He has been busy keeping in touch with the various promotion plans being put on by his dealers, to all of which he lends especial attention. The continued success of the Columbia window display sets have proven interesting, also to observe how the idea has been adopted by others. A local dealer in a rival line saw the point so well that he is using hand-painted sets of his own design. They are of excellent workmanship, have certain individual touches for this store, which shows how well the idea has taken.

Wholesale Manager Salmon reports excellent country and city trade and that deliveries have been up to the most exacting mark. He says

that record orders have been filled about 95 per cent.

The reports of reductions in the supply of machines is not at all to the liking of dealers; they make no secret of that but they are making no complaint. They believe that the move is toward winning the war and that suffices for them.

The Home Talking Machine Co., a southside Columbia house, on the first of the month announced that it had arranged for a motor delivery service on records and machines for the entire city.

The line of machines made by the Vitrola Talking Machine Co., Chicago, which is distributed in this city by the Witte Hardware Co., is steadily growing in demand, and the Rice-Stix Drygoods Co. and the Phoenix Furniture Co. are doing an excellent retail business with the Vita-Nola. Many new dealers have been entered up during the past month.

THE RIGHT START IN ADVERTISING

A good start in advertising is like a good start in any kind of a race—it gives one courage and confidence. But a bad start does not always foreshadow a failure, rather a reverse. If the experience is used rightly it should switch the advertiser onto the road for success.

The door to the temple of success is never left open. Every one who enters makes his own door, which closes behind him to all others.

"In Tune with the Times"

We offer to the talking machine trade throughout the country a remarkable selling proposition in the

"American Maid" Phonograph

PURITY AND SWEETNESS OF TONE

The "American Maid" is supreme in its "tone" quality and all models are equipped with the "American Maid" universal tone arm playing any make record as it should be played. Each cabinet machine has tone modifier. Our Model A is heavily gold plated on all exposed metal parts.

A COMPLETE LINE OF ALL STYLES, SIZES AND FINISHES. GRACEFUL IN DESIGN, MATCHLESS IN EXECUTION, GENEROUS IN PROPORTION.

We are Specially Equipped and Stocked to Cater to the Export Trade. Inquiries Cordially Solicited.

C. JOHN A. WOODS & SON, -- 25 Church Street, New York, N. Y.

RECITAL UNDER DETROIT ASSOCIATION AUSPICES A HIT

Members Decidedly Well Pleased With Their First Effort, Which Drew a Capacity Audience—Will Benefit Business—J. L. Hudson Co. Occupies Handsome New Home—Other Happenings

DETROIT, MICH., May 9.—In querying Detroit talking machine dealers regarding April business we find that it was just about normal with the same month of 1917, but if we base figures on the gross for the first four months of 1918 as compared with the same period in 1917, we can safely report that this year's business is ahead, regardless of the repossessions this year, which naturally have been greater. It seems to be the same cry as during March—that machine business is fair—record business is very good—and collections improving. And you must remember that the Third Liberty Loan drive was on for three weeks during April.

The future really looks good for Detroit. It is true that we are very short of homes and also we are short about 30,000 mechanics and laborers. Wages are higher than ever before, and the Detroit Board of Commerce is working with the Federal Government doing all it can to bring the required number of workers here. Detroit manufacturers are blessed with big war orders, and it only remains for them to secure sufficient help to increase production.

Michigan went dry on May 1 without any ceremonies or any unusual scenes. A great many of the former saloon places are continuing in business, handling soft drinks and near-beers. However, the ultimate effect of prohibition ought to be beneficial to the music industry inasmuch as many men will be staying home more than formerly, and their wives are bound to have more money with which to equip their homes.

The recital given April 30 at the Arcadia under the auspices of the Detroit Talking Machine Dealers' Association was most successful, and the members feel that they have every reason to feel proud of their initial undertaking in this respect. Something like 3,000 people attended the concert, and had it not been for the hard rain which started right after the supper hour, keeping many people at home who had planned to come, the auditorium would never have held all the people. As it was, the crowd who did come enjoyed every minute of the concert as evidenced by their enthusiastic applause. The function started at 8 o'clock sharp and ran until 11.13. Some of the artists simply could not get through the crowd encoring and insisting upon "more" and "more." The artists who appeared were from the various talking ma-

chine companies and all were very well known in their respective fields. They include Billy Murray, Arthur Campbell, Henry Burr, Sterling Trio, Peerless Quartet, Fred Van Epps, Theodore Morse, Byron G. Harlan, Arthur Collins and John H. Meyers. The artists arrived in the morning and were the guests of members of the Talking Machine Dealers' Association, being entertained at luncheon at the Detroit Athletic Club and taken for motor rides in the afternoon. The concert committee consisted of Sam F. Lind (Columbia), chairman; Wallace Brown (Brunswick); Max Strasbury (Victor and Columbia), and Ed Andrew, of the J. L. Hudson Co. (Victor). But right here we want to give credit to every member of the local association, as all of them did their share in selling tickets and working up interest to make the concert a success. The entire profits of the concert have already been turned over to Detroit's Own Regiment, 339th, at Camp Custer cantonment. Next year, if all is well, the Detroit Association will give another recital or function of some kind for patriotic charity.

The gala event of May was the opening of the new music store of the J. L. Hudson Co. at 68-80 Library avenue, removing from the former location at 188-190 Woodward avenue. The new store is a fireproof building, about 60 by 120 feet in size, six stories high with a full basement. The company spent more than \$75,000 in remodeling it and installing a ventilating system, automatic sprinkler system, pneumatic tube cash carrying system. This is exclusive of the many thousands spent for decorations, rugs, carpets, electric light fixtures, etc. E. P. Andrew, general manager of the store, was given authority by the "powers that be" to spare no expense in making this new store as fine as money would go, and he has brought out an atmosphere of coziness and artisticness that is exemplified in few music stores. There are stores more massive and more impressing in some ways, but not for quietness and coziness. The first floor has two large windows, but they have no background so that from the front you can see clear through to the rear. One of the windows will always be for talking machines and records while the other one will be for pianos, players, etc. The sheet music, small goods departments, and fourteen record demonstrating

booths, occupy the first floor. Also a service counter sales, which is quite an innovation, as all sales are made over this counter, the stock being in racks in the rear of the counter. The second floor has the general accounting offices and the music roll department. The third floor has the private office of Ed Andrew, Jr., an assembly room for his salesmen and about twelve booths for displaying talking machines exclusively. In other words, the third floor is entirely for talking machines, both Victor and Sonora. On the fourth floor is the general office of E. P. Andrew, general manager of the store, the office of the sales manager, an assembly room for the sales staff, and large, roomy parlors for exhibiting straight pianos, both upright and grands. In the rear of this floor is space devoted to used pianos. On the fifth floor is the display of piano players, while on the sixth are finishing, tuning and stock departments. The basement is also for stock. The decorative colors throughout the store are French gray, French blue and French DuBarry rose. All fixtures even to the door hinges are aluminum and silver, and all exposed woodwork is dull finished American walnut, which includes the counters and main entrance doors.

The entire week of April 29 was given over to "openings," and each day was specifically devoted to some particular purpose. For instance, Monday night, April 29, was given over from 7 to 10 p. m. to music dealers, talking machine dealers, anyone affiliated with the allied trades. Nearly every dealer in Detroit, Windsor and nearby towns came to the store and attended the opening. Tuesday was not scheduled, as everybody had their minds on the concert that evening given by the Detroit Talking Machine Dealers' Association, the sale of tickets being at the Hudson music store. Wednesday afternoon, Wednesday evening and Thursday afternoon were for the public. Thursday night was for the music teachers, music instructors and music professors, while Friday evening was for the 3,000 employes of the J. L. Hudson store and the department managers. Saturday was "open" for business in the regular way, and we are glad to say that Saturday business was better than expected. During the first week of the openings there was "something doing" on every floor. On the first floor was a five-piece orchestra; on the second was the Hudson Quartet, one of the finest quartets in the country; on the third floor was a trio; a vocalist was on the fourth floor, Miss Elois Johnson, and Ursula Dietrich demonstrated the Apollo and Art-Apollo on the fifth floor. Among the beautiful floral pieces for the opening were those presented by the Sonora Phonograph Sales Co., Charles Marshall, Detroit manager; Grinnell Bros., Robert Alling, of the Edison Shop, and Sam F. Lind, of the Columbia Graphophone Co. The new Hudson music store is a monument to the music business and the Hudson Co., and it is sure to be very successful, being in the very heart of business activities and convenient to its former Woodward avenue location.

Wallace Brown, Brunswick dealer, has opened a branch store in the Polish district in north-east Detroit, which is in charge of an experienced phonograph man who speaks Polish. In addition to English records, foreign records will be handled. It is the intention of Mr. Brown, inasmuch as he has the exclusive agency for Detroit and Wayne County, to open Brunswick branches in other parts of the city during the next four months, so that by fall he will have branches established in the east, west, north and northeast sections.

The various wholesalers of talking machines and phonographs are of the same opinion in discussing the future. All say they have a good stock on hand, and believe they will have a big fall business if they can only get the goods.

Burton Collver, who formerly was with Grinnell Bros., and now with the Cheney Talking Machine Co., of Chicago, spent several weeks in Detroit and Michigan recently. Mr. Collver has put on quite a number of accounts and is confident of big fall business for the Cheney phonograph.

TWIN CITY TRADE STILL GROWING

Jobbers and Dealers Report Strong Increase in Volume of Business Handled Despite Stock Conditions—Rural Business Coming Well

MINNEAPOLIS and ST. PAUL, MINN., May 6.—Springtime is not the best time for selling talking machines, yet the Twin City dealers, particularly those in the jobbing section, are satisfied and, even more so, with their results in April and the outlook for May. Jobbers figure on a growth of from 25 to 100 per cent. in the volume of sales for the first half of 1918 as compared with the corresponding period of last year. This rather describes the local situation in St. Paul and Minneapolis in a brief way.

W. J. Dyer & Bro., St. Paul, and the Beckwith-O'Neill Co., Minneapolis, Victor jobbers, are making desperate efforts to assemble something that looks like a stock before the big rush begins. They know that it will be difficult to supply their needs, as the demands from the suburban districts even now take everything that comes to their warerooms almost before the goods are unpacked. There is only one satisfaction to the managers, and that is that nothing has any chance of becoming shopworn. Now that is a pleasant thought, as there are some lines of trade in which the fear of goods becoming shopworn is persistent and perennial.

Edison business in this Northwestern territory will show a very substantial increase. The Minneapolis and St. Paul retail houses have sold much more than a year ago while the jobbing trade of the Minnesota Phonograph Co. will show better by from 40 to 50 per cent., according to President Laurence H. Lucker.

A part of this increase is due to a systematic spurring and coaching of the rural dealers. As, for instance, the house had an account in one of the most prosperous towns in Redwood County, Minnesota, but the man was not doing what he should with his operators. So the house sent down one of their live wires—Stinchfield is his name. In an even week he had

closed sales aggregating more than \$2,700. The dealer got a goodly bundle of money—that he really did not deserve—and also he had his eyes opened. It is believed that his blindness has been cured, at least for a time.

The new Brunswick phonograph is running about 100 per cent. better in sales than it did a year ago, according to E. L. Kern, manager in this territory for the Brunswick-Balke-Coller Co. He predicts that the new tone arm permitting the Brunswick to play any and all disc records will make it the great favorite all over the country, and that the only limit will be the ability of the factories to reproduce instruments. Mr. Kern is devoting considerable time to the task of obtaining men for the company's Dubuque factory, which is losing men continually through the draft. He has met with some success, but finds that other industries are in the field for the same class of men. A shortage of machines is quite within the range of possibilities with the restrictions on material and labor on one side and the continued demand on the other. Mr. Kern has opened an account with the Hagen-Newton Co., Fargo, N. D., which is installing the most modern and complete phonograph headquarters in North Dakota. The plant will include several demonstration booths, a large record rack and proper display facilities, and will take the lead in every way, say its promoters.

Jay H. Wheeler, manager of the Pathé department of the G. Sommers Co., has gone to New York to select the fall stock. While he was away his assistants were superintending the construction of a gigantic record storage plant. It will have a capacity of 100,000 records, and almost any one would concede that such a number of records is quite a lot.

Reports from the Columbia wholesale headquarters in Minneapolis are in every way satisfying. The balance sheets to date show everything in favor of Manager Sprague and a continuance of good business is to be expected.

VERDI'S VIEWS OF THE GERMANS

A letter of exceeding interest appeared in the New York Times the other day from Edwin C. Boykin, who is connected with the editorial department of Edison publicity in Orange, N. J. The communication was based upon an extract from a letter written by Giuseppe Verdi, the great Italian composer, at the time of the Franco-Prussian war in 1870, and which Mr. Boykin deemed most appropriate to bring to light at the present time in view of war developments in the zone in which the Germans are at present operating. It read as follows:

"Our men of letters and politicians well may boast of German knowledge and science and—God forgive them—even of the arts of those conquerors; but a glance backward would let them see that the old blood of the Goth is still running in German veins; hard, intolerant despisers of all that is not German, and inclined to a boundless rapacity. Men of brains, but heartless, strong and uncivilized. And that King [William I., grandfather of the present Kaiser], who, in the name of God and Providence constantly on his lips, destroys the best part of Europe and thinks himself destined to reform the manners and punish the vices of our modern world! What a missionary!

"The composer of 'Trovatore' and 'Aida' was not without insight into the true character of the despoilers of the world," remarked Mr. Boykin in closing.

GIVE YOUR DEALER WHAT HE WANTS

AND HE WILL ALWAYS BE YOUR DEALER

The *Play-Rite* is not merely manufactured—but created.

The very best tone arms you can install in your machines—They have proven to be the loudest and clearest tone reproducing arms on the market—They are beautiful in appearance—and are reliable. Guaranteed to give perfect satisfaction.

Beware of Infringers and Imitators

Unless these tone arms bear our trade mark they are imitations.

Play-Rite

Look for our trade mark. It insures quality.

Although the appearance and construction of these arms are different, they both represent the very best quality in tonal construction and have the largest number of talking points to choose from.

GENERAL ACTIVITY PREVAILS IN PORTLAND DISTRICT

Oregon Talking Machine Men Keep Things Going and Overcome in Some Measure the Shortage of Machines and Records—New Concerns Enter the Field—General News of Interest

PORTLAND, ORE., May 4.—Scarcity of talking machine records of patriotic and popular airs has been one of the chief barriers to splendid business in the record departments in Portland for several months, but this condition is rapidly being alleviated and some of the lines have so managed that the pinch has scarcely been felt. The Columbia Co.'s local branch has been fortunate in having a splendid supply of records and has been able to supply all dealers with what they have asked for. The Third Liberty Loan has not hurt business at all at this house, according to Manager Heater. Henry Schmidke, a valuable member of the sales force, has been drafted and will leave for camp in a short time.

An arrival of Pathé machines aided materially in assuaging a shortage of stock at Calef Bros., only one machine being on hand when the shipment reached Portland.

Shipments of records from Chicago, Salt Lake

and Denver have done much to relieve the shortage at the Hyatt Talking Machine Co. The situation as regards Victor and Edison records was becoming critical, but now Mr. Hyatt believes he will be able to take care of his trade.

Four months ago the Graves Music Co. received two carloads of talking machines. The day before Easter only ten of them were left. To-day there is not a machine in stock and orders have been taken for so many more that another big shipment, momentarily expected, will last only a short time. In fact, a third big order has been forwarded even before the arrival of the second lot. W. L. Le Vanway, in charge of the phonograph department at the Graves store, says that April business was 50 per cent. greater than in March, with every indication of continued prosperity.

A big shipment of Victor and Columbia records reached the Meier & Frank Co. in mid-

April and a big demonstration was given in the music hall April 16. A large crowd was in attendance. Demand for Brunswick machines has continued at the Wakefield Music House and the supply is now so short that there are not enough left in stock to fill the demonstration booths.

Shortage of Victor and Edison machines is reported by the Reed-French Piano Co.

Dealers report that they have been able to meet the demand for Columbia records and this is ascribed to the fact that the Columbia people are sending virtually all their records by express, although the time required for deliveries is not much less than it was for freight shipments in pre-war days. Small graphophones are also being sent by express. Graves Music Co. has been boosting the sale of small Columbias and has been doing a big business with 15s, 18s and 45s. Special advertising has been given by this house to these instruments. The same house reports sales of Edison and Stradivara machines in such quantities that it is almost impossible to supply the demand.

Classical records as well as popular and patriotic records have been in demand. Since the Frieda Hempel, Louis Graveure, Mischa Elman and Galli-Curci concerts in Portland the records of these artists have been very popular.

The G. F. Johnson Music Co. reports an ever-increasing demand for records of the Victor French courses, both teachers and soldiers making heavy inroads on the stock of these records.

Reports from Baker, in Eastern Oregon, are that Frey's Sporting Goods Store is making a fine display of Brunswick talking machines.

From the Morris Music House at Eugene, Ore., in the Willamette Valley, comes word that the new Edison is having a big sale.

Eilers Music Store has been fortunate in disposing of surplus record stock through the energy of Miss A. Bennett, in charge of the record department. Miss Bennett has realized the shortage of popular and patriotic records and has been showing customers good numbers, of which there is a surplus, and satisfactory sales have resulted.

Sherman, Clay & Co. are feeling the shortage of Victrolas, according to F. D. Addis, of the Victrola department. Business is increasing so rapidly at this house that sales could be tripled over last year's mark if machines could be obtained. Machines shipped more than two months ago have not yet been received here. The public is still calling for the larger machines.

Shortage of the larger-sized Victrolas at the G. F. Johnson piano store has made it necessary to supply customers with smaller machines, says R. F. Callahan, sales manager of the talking machine department of this house. Now a big shipment of big machines has arrived and sales are picking up wonderfully.

One of the new houses in Portland has been doing a large business with the Victor and Brunswick machines. The Seiberling-Lucas Music Store, formerly a small goods and sheet music store, has become one of the big houses of the city since putting in talking machines.

Graves Music Store has one of the liveliest phonograph departments in the city. Manager Le Vanway delivered twenty-three talking machines in one day recently, all makes, and some were large, handsome instruments.

BOOKING GOOD BUSINESS

Illsley, Doubleday & Co., New York, manufacturers of Illsley's graphite phono spring lubricant, are making plans for a prosperous year with this product, as the majority of the manufacturers using this lubricant have already placed large orders for 1918 to cover their requirements. The company states that it is receiving inquiries month after month from dealers and jobbers, through its advertising in The Talking Machine World, and that these inquiries have been turned into profitable sales. This lubricant has been merchandised to the trade with the idea of making it a standard in the field, and the results to date have been very satisfactory.

U. S. COURT GIVES FINAL DECISION ON VICTOR CONTRACTS

District Court Hands Down Findings Against the Contract System of That Company to Settle Formally Long Discussion—System Already Abandoned—L. F. Geissler Explains Situation

The daily papers on May 4 published some sensational and, in many cases, misleading statements regarding the decision handed down recently by Judge Augustus N. Hand in the United States District Court for the Southern District of New York, against the Victor Talking Machine Co. Some of the papers even went so far as to declare or insinuate that the decision practically ordered the dissolution of the company.

As a matter of fact, the ruling of the Federal District Court above referred to was upon the contract system of the Victor Co., regarding which there was some question following a decision of the Supreme Court against that company a year or so ago. It was decided to get a court ruling on the contract, and the decision of the District Court represents that ruling, which will be accepted by the Victor Co. without appeal.

In discussing the case, Louis F. Geissler, general manager of the Victor Talking Machine Co., said: "The decree issued by Judge Hand against the Victor Talking Machine Co. is the outcome and final and formal action in a long discussion which has been pending with the Government for some time relative to our license or contract system of doing business.

"The decision of the Supreme Court of more than a year ago against us made it patent to us that our contract system, although sustained by practically all court decisions up to that time, would no longer be considered legal by the Government; hence, on May 29, 1917, we notified, by letter, all our trade that our license agreements were voided and no longer effective, for, while we and our counsel thought the contract all right, the Government evidently did not, and it was necessary to get a definite ruling in order to close the discussion. The company agreed to accept the court decree.

"The decree signed by Judge Hand is of importance only in the sense that it definitely concluded the discussion which had been in progress between the Government and the company. The practices complained of having been discontinued long ago, no changes by the Victor Co. as a result of the decree are necessary."

REPEAT ORDERS FOR HOFFAY LINE

Ingenious Features of "Air-Tight" Talking Machines Commend Them to Trade—Sales Manager Kingsberg Planning Trip Throughout Country—Secure Larger Floor Space

"Repeat orders evidence, as nothing else can, what favor the Hoffay air-tight talking machines find with dealers," declared Alexander Kingsberg, sales manager of the Hoffay Talking Machine Co., 3 West Twenty-ninth street, New York.

He is at present calling on the trade in adjacent territory, preparatory to covering the United States and Canada to place agencies, and states that the manifestations for the Hoffay are more marked than ever and will result in a banner year. The steadily increasing demand for the Hoffay talking machines has necessitated the expansion of quarters at the Twenty-ninth street address and negotiations are being made for still larger floor space.

"It is not at all surprising that the Hoffay machines with their ingenious features are being taken up so rapidly by dealers throughout the United States and Canada," Mr. Kingsberg remarked: "The universal tone arm enables the playing of all makes of records and the 'Resurrectone' reproducer to the highest degree acquits itself of the artist's interpretations. Voluntary testimonials have given us more ground than ever upon which to substantiate our claims regarding the standing of the Hoffay air-tight talking machines."

"Don't send out letters simply to keep stenographers busy. Employ a sufficient number to mail the necessary amount—and keep them going all the time. Don't let mail leave your office without an advertising enclosure of some kind.—Publicity.

10 PER CENT. WAR TAX IN CANADA

War Excise Budget Provides Heavy Burden for Talking Machine and Record Manufacturers

OTTAWA, CAN., May 4.—Nothing has created so much talk in commercial circles for some time as the recent budget speech delivered by the Hon. A. K. MacLean, acting Minister of Finance. The piano and phonograph industries came in for their share as was expected, and there will be levied a war excise tax equal to 10 per cent. upon automobiles, gramophones, graphophones, phonographs, talking machines, cylinders and records therefor, mechanical piano and organ players and records therefor, when manufactured or imported after the 30th day of April, 1918, on the duty paid value when imported and on the price when manufactured and sold, provided that such war excise tax shall not be payable when the articles are manufactured for export.

USES FOR RECORDS AND NEEDLES

When Musical Value Is Gone They May Still Prove of Use to the Handy Housewife

All the phonograph records you don't care to hear any more are still of use, the Illustrated World advises housewives. On ironing day take out one record and place on the board and you will be introduced to a new and improved ironing wax when you lightly place the iron on the record.

Take all the old needles and put them into a bottle or small jar on the sink, and whenever you have a dirty bottle, such as a milk bottle, vinegar cruët, etc., just pour them into it and shake well. In half a minute the bottle will be clean.

THE AEOLIAN CO. ANNOUNCES THE VOCALION RECORD

Aeolian-Vocalion Record Now Ready for the Market—Embodies New Recording Features—Is Hill and Dale Cut, Ten and Twelve-Inch, Single and Double Faced—Will Be Marketed Through Vocalion Representatives—Recording Studio in New York Splendidly Equipped

The Aeolian Co., New York, is now ready to announce to the talking machine trade the new Aeolian-Vocalion record. The first list of records is now ready for general distribution, and plans are being formulated whereby the merchandising of this record will be conducted in the thoroughly efficient manner which characterizes all Aeolian merchandising plans.

Behind this important announcement in behalf of the Vocalion record lies an interesting history of progress and development. The Aeolian Co. has never been satisfied to place any product on the market bearing its name, without knowing that this product represented something different and distinctive. In fact, it has been this constant aim to give the musical world something new that has made the Aeolian Co. world-famous and a recognized leader in international musical development.

The Aeolian Co. in its very successful history has always endeavored to create rather than to imitate. It has been a pioneer in the player-piano and organ fields, and its player-piano products have won recognition the world over. The Duo-Art reproducing piano, the company's most recent development in the player-piano industry, has won enthusiastic endorsement from the most famous musicians, who acclaim it as one of the greatest achievements in the history of music.

When the Aeolian Co. a few years ago decided to manufacture talking machines it did not make any immediate announcement to this effect, but for several years the company's technical experts thoroughly investigated the scientific features of the talking machine. Every known improvement and scientific achievement was given careful consideration during this period of investigation, and this research was especially significant in view of the fact that the Aeolian Co.'s technical staff comprises not only musicians and artisans of great ability, but several scientists of note. For several years these men labored to develop the phonograph, working for two years in collaboration with Professor Dayton C. Miller, of the Case School of Applied Science, one of the greatest living authorities on tone and tone quality.

Finally in 1914, these technical experts decided that they were ready to introduce the Aeolian-Vocalion phonograph and this instrument was presented to the musical world as an instrument that embodied numerous improvements of great musical value. The subject of musical tone was thoroughly discussed in all literature that the company issued; and when the instrument was placed in the hands of the dealers, it carried with it the absolute

introduction of the "Graduola," which was embodied in the Vocalion in order to permit of tone control. The "Graduola" has won recognition as one of the simplest and most efficient means of phonographic tone control yet devised.

Where the Vocalion Records Are Made

After the perfection of the Aeolian-Vocalion phonograph and its subsequent success with musicians and the general public, the Aeolian Co. continued to experiment in the different realms of phonograph research, but the company's technical experts finally reached the stage where they were in a position to tell the officers of the company that in their opinion "the Aeolian-Vocalion phonograph represented the acme of perfection, musically and scientifically."

In this report there was also submitted a suggestion that the musical prestige of the Aeolian-Vocalion phonograph could be further strength-

lian Co. decided that a talking machine record bearing the Aeolian name was the only practical solution of this problem. It was determined that nothing would be left undone to make the record bearing the Aeolian name a worthy companion to the other famous Aeolian products, and with this determination in mind, the technical staff was instructed to concentrate its efforts upon the production of such a record.

For two years these scientists and tone experts experimented with new and different systems of recording. No time or expense was spared in the hope that one of these new systems might be utilized in the production of a record that would fully satisfy the Aeolian executives and technical staff.

Experimentation was going forward in the Aeolian technical laboratories when a cablegram was received at Aeolian Hall from the company's English branch, saying that an inventor had submitted samples of a phonograph record which was of marked superiority, and that there was a possibility of acquiring the process by which it was made. Following this cablegram a number of specimen records were received and given exhaustive hearings and tests.

In order to insure the acquisition of so valuable a method the president of the Aeolian Co. made a special trip to London in order to investigate the matter personally. He found that the improvements in the new process were so important that its inventor had already been able to secure patents in all of the principal countries.

Further investigation strengthened the first favorable impression the records had made, and after a short period of negotiation, the patented rights to the new method were purchased, and the men responsible for the new record were engaged to continue the development of the system under the auspices and in the laboratories of the Aeolian Co.

Discussing this method of recording from a scientific standpoint one of the Aeolian Co.'s technical experts remarked:

"As is generally understood, all sounds—musical tones included—are conveyed to the ear by what are known as sound, or tone waves. These waves, while intangible and invisible, can, by means of recently devised scientific appliances, be observed, measured and accurately estimated, through certain effects they produce.

"While investigation of musical tones through various apparatus is not new, no such accurate observation has hitherto been possible, and it is of more than passing interest to know that the Aeolian Co., in addition to its own completely equipped acoustical laboratories, has been in a position to profit by these new appliances and researches of their inventor, who is recognized as one of the most noted contemporary authorities on the phenomena of sound.

"It has been established that all musical

Two Views of the Handsome and Splendidly Appointed Artists' Room in Aeolian Recording Studio

endorsement and guarantee of the Aeolian Co. The success instantly achieved by the Aeolian-Vocalion reflected the importance of the new scientific and musical qualities which it embodied.

The distinctive and outstanding feature of the Aeolian-Vocalion was its tone quality and the

ened if a record was perfected that would harmonize completely with the scientific perfection of the Aeolian-Vocalion. In other words, these experts expressed their belief that further progress in the phonograph field was not possible, except in the development of the record.

With its customary progressiveness the Ae-

tones are composite in character—that is, each tone is composed of a greater or less number of individual tones. Every composite tone, such as a note of the human voice, the violin, or other instrument, has a fundamental or basic tone, and a long or short series of overtones as well.

"These overtones or partials are what determine the character of each distinctive tone, their number and relative amplitude being the decid-

the waves entering the large end of the horn, and being brought down and intensified as they approach the smaller end. Here they strike

the process employed makes possible, are reproductions of the sound waves that have been recorded. The fidelity of this correspondence is the exact measure of the similarity between the original instrument and the phonograph's reproduction of it.

The Vocalion Method of Recording

"The problems presented in record-making are exceedingly difficult. Sound waves are usually delicate and complex. To reproduce the natural timbre of the violin, or any other instrument, every minute variation of its wave must not only have its exact counterpart in the line cut in the wax, but the needle, or reproducing point of the phonograph, must be of a nature to 'feel' and respond to these almost imperceptible variations. Herein lies the superiority of the Vocalion method of recording and reproducing. By this method the resistance of the cutting tool to the wax is reduced to a minimum, and the minute vibrations in the sound waves, caused by partials or overtones, are capable of being accurately recorded. The new method catches these delicate tone elements and faithfully records them.

"The Vocalion method of reproduction with the fine-pointed needle in turn seeks out and reproduces what has been recorded, with the result that recorded tones, whether of voice or

One of the Recording Rooms in the Aeolian-Vocalion Laboratories

ing factor. When sounded, a musical note creates a number of distinctive waves, one for each of its partials. These vary in what may be called strength, as the partials themselves vary with the voice or instrument.

"No sooner are these waves formed than they all merge into one wave which carries in the irregularities of its outline all the waves of all its partials. It is essential to a comprehension

upon the diaphragm, which vibrates in response to their impulse.

"Connected with the center of this diaphragm by a delicate lever bar is a fine cutting tool. This tool, moving in response to the motion of the diaphragm, cuts a line in a revolving disc of soft wax, which line corresponds in configuration with the outline of the sound waves entering the horn.

"The wax is then allowed to set or become hard. After receiving a bath in an electro-chemical solution, which cuts it with copper, the disc with the line of sound imprinted upon it is carried through various depths before the phonograph record is finally completed.

"The reproduction of the sounds recorded is practically a reversal of the process of record-

Reception Salon in the Vocalion Studios

instrument, reappear in almost their exact original character, far clearer than has ever been possible before. This gives a sense of satisfaction in listening to Vocalion records not ex-

No. 1. Tuning Fork.—The tone of a scientifically mounted tuning fork is absolutely devoid of partial tones, hence the tone wave it creates is entirely free from the irregularities found in other tone waves, which are caused by their partial waves.

of this subject to understand that in recording and reproducing musical sounds the realism of effect is entirely dependent on maintaining the shape of these waves. (The accompanying illus-

No. 2. The Flute.—The tone of the flute contains but few partial tones. The tone wave it creates is consequently far less regular than those caused by other instruments. This simplicity in the flute's tone, while possessing distinctive beauty, especially by contrast, makes it comparatively uninteresting as a solo instrument.

trations show the differently shaped waves peculiar to various instruments.)

Making a Record

"The process of record making is to-day practically standard with all the older companies, and remarkable results have been achieved in view

of the difficulties offered by the systems employed.

"Briefly, this method involves a specially devised horn, into which the sound is projected,

No. 4. Oboe.—Here we have a tone wave which shows unmistakably a tone of very distinct individuality. The pronounced irregularities of the oboe's tone wave are caused by the dominance of certain of its partial tones.

ing. A needle or some other point is inserted in the sound groove, and as the record revolves, is moved either back or forth or up and down, in obedience to the variations in the line.

"Through another lever, to which the needle is attached, its movements are transmitted to a reproducing diaphragm contained in the phono-

No. 5. Violin.—The tone of the violin has many partial tones. None of these is aggressively dominant, however; hence the fluent smooth quality of the instrument. This is shown in the photograph of its tone wave. There are many irregularities in the wave, but they are all too small to influence its general symmetry.

graph sound box. This diaphragm, vibrating in consonance with the movements of the needle, creates new sound waves. These, as nearly as

No. 6. Trombone.—The tone wave of this instrument denotes unmistakably the quality of its tone. Rich in partial tones and hence interesting and expressive, it is very characteristic and dominated by full, pealing notes.

perienced in others. They sound richer, fuller, deeper, more beautiful and more natural.

"Moreover, due to the difference in method, Vocalion records contain practically one-third more music than others; ten-inch records playing as long as the ordinary twelve-inch, and

No. 7. Human Voice.—This tone wave was created by pronouncing the vowel sound "ah." The voice is particularly rich in partial tones, some voices indeed containing as many as forty very appreciable.

twelve-inch records playing correspondingly longer."

When the Aeolian Co. had perfected its new (Continued on page 70)

ANNOUNCE THE VOCALION RECORD

(Continued from page 69)

method of recording and was ready to start manufacturing Aeolian-Vocalion records, it decided that it would give this very important branch of its business befitting quarters. The company believed that the actual work of recording should be recognized as the most vital factor in the production of a record, and, although there was plenty of room available in Aeolian Hall on Forty-second street, arrangements were made to occupy an entire building at 35 West Forty-third street for recording purposes exclusively.

After leasing the building the Aeolian Co.'s executives made a careful study of the most intimate details of recording from a general standpoint. Negotiations were completed where by many well-known artists were engaged to make Aeolian-Vocalion records exclusively, and as this list steadily increased, the company realized that the subject of environment was an important item in the making of a successful record.

It is only logical to assume that an artist who enters a cold and dreary room prior to making a record will hardly be imbued with a spirit of warmth and enthusiasm. On the other hand, if the artist is received in a tastefully furnished and artistically decorated saloon, where a piano is at hand for impromptu and informal rehearsal or practice, it is only natural that he should enter the recording room with complete assurance and enthusiasm, and the finished record will doubtless reflect the mood of the artist.

Recording Studios Beautifully Furnished

With this idea in mind, the Aeolian Co. arranged to furnish its recording studios on Forty-third street in a thoroughly artistic and attractive manner. The reception room on the main

floor and the artists' room on an upper floor are all furnished in a way that cannot fail to impress the artist favorably and at the same time arouse in him a keen desire to make the best record that is possible.

This recording studio is splendidly equipped in every department, and under the capable di-

The Vocalion record will be merchandised through Vocalion representatives exclusively, and a complete library of all classes of music will be offered to these dealers. According to present plans the records will be double and single faced, and a ten-inch double-faced record will retail at 75 cents and upward, and a twelve-inch double-faced record at \$1.25 and upwards.

Is a Hill and Dale Cut Record

The Aeolian-Vocalion record is a hill and dale cut record, played with a needle, and the accompanying reproduction of the opening announcement in local newspapers will give some idea of the campaign that the Aeolian Co. will inaugurate in behalf of its new record. These records will be presented through the medium of consistent national magazine advertising, and through every other form of publicity that has been utilized in Aeolian advertising campaigns in the past.

With the Aeolian spirit and organization behind this record, together with its musical and scientific qualities, it is safe to assume that the Aeolian-Vocalion record will soon take its place as an Aeolian product that is entitled to worldwide recognition. Every form of co-operation will be offered the company's dealers in merchandising the Aeolian-Vocalion record, carrying out the company's plans of giving their dealers 100 per cent. service in handling Aeolian products.

H. N. BARRIGER IN NATION'S SERVICE

Head of Traveling Sales Staff of Crafts-Starr Phonograph Co., Richmond, Va., Joins Colors

RICHMOND, VA., May 6.—H. N. Barriger, who has been at the head of the traveling sales staff of the Crafts-Starr Phonograph Co., of this city, factory distributors for the Starr phonograph and Gennett records, has just been called into Uncle Sam's service. Mr. Barriger had been remarkably successful in introducing these products to the dealers in his territory, and among the representatives which he recently established were the following: Darnell & Thomas, Raleigh, N. C.; Winchester Electric Co., Charlotte, N. C.; F. H. Andrews Music House, Charlotte, N. C.; Lancaster Department Stores, Lancaster, S. C., and many other dealers who are well known in their respective localities.

A. J. Crafts, president of the company, states that business has kept up very well this year, and that collections are excellent. The only difficulty experienced by the company is in the accumulation of reserve stocks, but so far this house has been able to take care of its dealers with a reasonable degree of promptness, which, in view of existing transportation difficulties, is a very gratifying record. Owing to the difficulties in obtaining large shipments from the factory, the company has done no retailing, but the fact that it has conducted its wholesale department exclusively has been quite a factor in enabling it to take care of its dealers' requirements.

The AEOLIAN COMPANY ANNOUNCES THE VOCALION RECORD

A new phonograph record produced under a system differing from and superior to any hitherto used and resulting in a record of revolutionary character and quality.

IN this important announcement is chronicled the second great step taken by The Aeolian Company in its development of the higher musical values of the phonograph.

First, the Aeolian-Vocalion—that wonderful phonograph which three years ago startled the musical world and leapt almost overnight into the premier position among all such instruments.

Second, the Vocalion Record—giving the Aeolian-Vocalion, for the first time, a Record fully worthy of its extraordinary powers of reproduction.

Product of the World's Leading Music House

FOR nearly half a century, The Aeolian Company has maintained its position as the foremost creative influence in the music

industry. As a source of invention, progress and improvement, no other house has even remotely approached this Company's notable record of achievement. Today, The Aeolian Company stands without a rival in its comprehensive understanding of music and its broad and scientific knowledge of the various instruments for producing it.

The New Musical Values of the Vocalion Record

THE phonograph record itself is a marvelous invention. To hold in an inert and inarticulate disc the melodious notes of a human voice—the vibrant tones of a violin—almost baffles comprehension.

If these notes and tones have hitherto fallen a little short of nature—if some character, some richness, some of the more delicate qualities have been lost in their recording—it is no wonder. The only wonder is the marvel-

ous nature of the results accomplished.

The new Vocalion Record comes a sympathetic step nearer to reality.

Where with the old system only the broader, stronger elements in any tone could be recorded, the new system records the tone in its entirety. The finer overtones—those subtle partials that give to every instrument and voice its final touch of individuality and beauty—are, for the first time, caught and imprisoned by a far more delicate and scientific method.

Those who hear the new Vocalion Record are conscious of new impressions. To sight the phonograph remains—to hearing it is gone. The tendency to stridency—the lack of richness and of body—the vagueness of individuality—all the effects hitherto typical of even the best phonograph performances are replaced by natural verities of sound.

AN INVITATION—At Aeolian Hall on West 42nd Street and at The Aeolian Company's various Branches in the Metropolitan district, the new Vocalion Record is now on exhibition. The numerous owners of the Aeolian-Vocalion, the owners of phonographs of other make and all persons to whom progress in music is of interest, are cordially invited to the public informal demonstration of these Records, which for the present will be continuous throughout each day.

H. MICKELAS - 164 McKibben Street - Brooklyn, N. Y.

PITTSBURGH DEALERS PLACE BAN ON GERMAN RECORDS

Association Formally Advocates the Internment of All Records of German Music, Those Made by Enemy Alien Artists and of Pacifist Tenor, for Period of the War—An Important Move

PITTSBURGH, PA., May 7.—German operas and music have been placed under the ban by the Metropolitan Opera Co. and other operatic and concert organizations. German books and books showing German influence have been removed from public and private libraries, and now the executive committee of the Talking Machine Dealers' Association of Pittsburgh has made plans for interning German vocal and instrumental records and records of a pacifist nature for the period of the war.

The executive committee declares that there is a distinct public sentiment against the sale and use of records of German music or records made by Germans, or German sympathizers, and that in their opinion it is better to remove the German records from shelves voluntarily than to wait for a suggestion to that end from outside sources.

The association has recommended that the German records be interned, but the action is not compulsory on the individual member. Each dealer must determine for himself whether he is to take the step of laying aside such records for the period of the war, or scrapping them entirely.

The resolution as adopted by the executive committee of the local association reads:

"Whereas, Victor, Edison and Columbia record stocks now on hand in the trade generally include vocal selections in the German language and instrumental records of German airs, and

"Whereas, Traffic in these German records, or the playing of them, is not consistent with our conception of true Americanism,

"Be It Resolved, That there be prepared, at once, a list of all Victor, Edison and Columbia records in any essential respect German, including other records of a pacifist nature, or by organizations or artists of known pro-German tendencies; and that such list be supplied to our

membership and the trade, with the recommendation of this committee that the records named therein be immediately withdrawn from stock and interned for the period of the war.

"Talking Machine Dealers' Association of Pittsburgh."

The resolution was sent to all members of the association, accompanied by the following explanatory letter:

May 6, 1918.

To Talking Machine Dealers:

We are face to face with the German record problem.

Talking machine dealers have the alternative of some quick action on their own initiative or of the same action but at the direction of our Government. The day is close at hand when German records and those who distribute them will both stand as menaces before the public.

In our opinion it is far better for us as patriotic citizens to remove from stock and store for the duration of the war every record which, by any possibility, might cause displeasure to a true American or give pleasure to a "Hun."

In conformity with the above the enclosed resolution and list were adopted. This list is the result of a very intimate study of the Victor, Edison and Columbia catalogs. It includes all records, both vocal and instrumental, which, in any particular, show either German origin or sympathy, all patriotic and national airs of other enemy countries, all records by artists or organizations whose whole-hearted loyalty for America has been questioned.

It is recommended that every one of these numbers be packed away until the final shot against Germany and her allies has been fired, and all insidious propaganda, espionage and sabotage have been crushed out of existence for all time.

Give as wide publicity as possible to the en-

closed resolution—it will put you solidly on record as a 100 per cent. American. Your customers will think more of you and will tell others of your patriotic stand.

Let us take this aggressive action without any delay—the situation demands it.

Executive Committee,

Talking Machine Dealers' Association of Pittsburgh.

A list containing close to one thousand records in German or records of German music, and other records deemed objectionable during the war, taken from the Victor, Columbia and Edison catalogs, were sent to members of the association, with a letter and the copy of the resolutions.

After sounding the sentiments of the local trade, it appears that the great majority of the dealers will follow the suggestion of the association officials to the letter, although there are some who will follow their own ideas as to the records to be interned.

EXHIBIT AT FURNITURE EXPOSITION

During the first week in May business was particularly good with both the wholesale and retail phonograph departments of the New York branch of the Brunswick-Balke-Collender Co. In the wholesale department during this week an average of one new dealer a day was added to their already large list.

E. G. Bryson, representing the house in Baltimore, has been transferred to the New York branch and been placed in charge of the Brooklyn territory.

The Brunswick phonograph has been displayed at the Furniture Exposition held at the Grand Central Palace, New York City, from April 29 to May 18. The exhibit was under the immediate supervision of Chester Abelowitz and C. J. Klacke. Results so far have proved very satisfactory, indeed, and the exhibit has been directly responsible for the closing of several new dealers for the Brunswick line who placed large initial orders.

Increase Your Record Business

Through Taking Advantage of the Grinnell Record Service

Increase it through carrying "live" numbers. Through having the stock to meet the demands of your record-buying public—and through their coming to know that their Record wants can always be supplied at your store.

Our service aids you in keeping your stock to a point of highest completeness at all times.

We make it a point to fill every order within a few hours' time, at the most, after it is received. The transportation facilities at our command enable us to make delivery to any part of the country with utmost dispatch.

The same superior service that is so rapidly building our business can have a definite part in increasing your own!

HOW RICHMOND DID ITS SHARE

Great Concert Arranged for by the Corley Co. Helps to Raise Over \$2,250,000 for the Liberty Loan—An Inspiring Gathering

RICHMOND, VA., May 8.—During the intermission at the annual May Festival of the Wednesday Club, of this city, a patriotic scene was enacted that stirred Richmond deeply and was felt throughout the country. This concert was one of a series arranged for by the Corley Co., of Richmond, in direct keeping with their slogan, "The House That Made Richmond Musical." The affair was held in the Auditorium, the largest meeting place in the city and a capacity attendance was recorded.

The Russian Symphony Orchestra stirringly rendered "Dixie" and spirited Liberty Loan appeals in speech and song were made by Sophie Breslau, Mabel Garrison and others. The scene was thrilling. The audience rose to its feet as one man and the pledges commenced to pour in. And they continued to pour until approximately \$2,250,000 was subscribed. This, together with amounts pledged at other meetings, put Richmond away ahead of her allotted quota to the Liberty Loan.

It is interesting to note that this meeting in Richmond was held on the identical night and hour that the members of the music trade rallied at Carnegie Hall and pledged their contributions to the great loan at an equally enthusiastic meeting.

THE SCARCITY OF NEEDLES

The Otto Heineman Phonograph Supply Co. is using to excellent advantage an article which recently appeared in the newspapers entitled "Phonograph Needles Scarce." The company has made a reprint of this article and is utilizing it as an envelope enclosure in order to impress upon members of the trade that it is to their advantage to place their orders now for phonograph needles.

The article, which appeared in the New York Times, reads as follows: "Due primarily to the difficulties manufacturers are experiencing in obtaining carbon steel, there is said to be developing a scarcity of phonograph needles. And in face of this condition, the demand for needles of this sort in this country is constantly increasing. In export fields also, it is reported phonograph needles from this country are sought in steadily increasing quantities. There have been a few lots of needles imported to this country from Japan, but there also the shortage of carbon steel has militated against any increased production."

COLUMBIA DEALERS MEET

Important Addresses Made at Fourth Regular Meeting—Stracciari Entertains and Addresses Made by Messrs. Friedl, Hopkins and Sterling

The fourth regular meeting of Columbia dealers in metropolitan territory and up-State was held last month in the Green Room of the Hotel McAlpin, under the auspices of the local

Riccardo Stracciari

wholesale branch of the Columbia Graphophone Co. Lambert Friedl, manager of this branch, who was responsible for the inauguration of these meetings, which have been a remarkable success, presided at this meeting, and in his opening address gave a stirring appeal in behalf of the Third Liberty Loan. In fact, his appeal was so effective that during the course of the meeting subscriptions were received from more than fifteen Columbia representatives present.

In the course of his address Mr. Friedl called the dealers' attention to 1917 figures, which indicated that on the basis of a population of 100,000,000 in this country there were sold last year talking machines on a proportion of one to every 120 people. Figuring on a basis of five people to a family, Mr. Friedl stated that only one family out of twenty-four had bought machines in 1917, and expressed the belief that at least one family out of every eight could be sold a phonograph without choking the channels of trade.

The dealers convene for these monthly meetings in order to hear and discuss the midmonth records which are placed on sale the 10th of each month. These meetings really afford the only satisfactory means of demonstration for the dealers, and the interest which is being evidenced in these monthly gatherings is shown by the fact that more than 300 Columbia representatives were present at this meeting.

A. R. Harris, of the general sales department of the Columbia Co., who is directly in charge of record promotion, and who is a recognized authority in his field, commented briefly upon each record, leaving it to the dealers to decide whether or not the record was worth a large or small order. Order blanks were furnished to each dealer, so that after hearing the records they could indicate their initial orders.

During the course of the afternoon Mr. Harris introduced the Farber Sisters, co-stars with Al Jolson in his new production at the Winter Garden. These talented and popular actresses have arranged to make Columbia records exclusively, and their first record will go on sale in the very near future. This record is entitled "How'd You Like to Be My Daddy?" and these artists favored the company with a rendition of this selection, which was reproduced immediately afterward from their Columbia record.

Short addresses were made by Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, Eng., who is in this country for a month's visit, and by George W. Hopkins, general sales manager of the Columbia Co.

The most important feature of the afternoon was the introduction of Riccardo Stracciari, famous operatic baritone, who records exclusively for the Columbia Co. He recently appeared in New York for the Chicago Opera Co. and won unanimous praise from every musical critic. He favored the dealers with several selections, and the enthusiastic applause which he received from the Columbia representatives reflected the importance of his acquisition to the Columbia recording staff. Mr. Stracciari has made several new Columbia records which will go on sale in the near future. These, like his previous recordings, are destined to win favor.

There were present at the meeting several dealers from Albany, Poughkeepsie, Middletown, Nyack, and other points up State, and in addition to the Columbia executives mentioned previously, there were also in attendance R. W. Knox, advertising manager of the Columbia Co.; N. F. Milnor, sales manager of the Dictaphone division; Theodore Bauer, director of the operatic and concert division; G. C. Jell, general manager of the record laboratory, and L. L. Leverich, assistant advertising manager.

The Difference Between

Phon d'Amour

and other Phonographs is resultant from difference in construction; the patented features of Phon d'Amour being exclusive.

Amplifier

The Amplifier in Phon d'Amour

is of an entirely new type and one never before used. It is constructed in two chambers, being walled about with violin wood and is constructed upon the same principle as that of a violin. Not only is the volume in "Phon d'Amour" materially increased, but this is accomplished without any sacrifice of the characteristic overtones of voice or instrument.

H. T. LEEMING, GENERAL MANAGER

Prominent Member of the Trade Assumes This Important Position With the Emerson Phonograph Co.—Splendidly Equipped for the Post

The Emerson Phonograph Co., New York, manufacturer of Emerson records, announced this week the appointment of H. T. Leeming as general manager of the company with headquarters at the executive offices, 3 West Thirty-fifth street, New York. Mr. Leeming assumed his new duties on Monday, and in this important post will be in complete charge of the production and merchandising of Emerson records.

H. T. Leeming has been associated with the talking machine industry for more than fifteen years, having spent thirteen years with the phonograph division of Thos. A. Edison, Inc., and during the past few years, has occupied important executive posts with the Pathé Frères Phonograph Co. He is thoroughly familiar with every detail of the production and marketing of talking machines and records, and as general manager of the Emerson Phonograph Co. will have unlimited opportunities to develop the tremendous possibilities for the Emerson record.

R. D. Wyckoff, treasurer of the Emerson Phonograph Co., who formerly occupied the post of general manager, remains as treasurer and a director of the company. Mr. Wyckoff has many other important interests in addition to the Emerson Phonograph Co., and the appointment of Mr. Leeming as general manager will give him a chance to devote a part of his time to these varied interests.

HEINEMAN EXHIBIT AT MUSIC SHOW

Otto Heineman Phonograph Supply Co. Extend Invitation to Industry to Visit Their Booth at National Music Show, New York, June 1 to 8

The Otto Heineman Phonograph Supply Co., New York, has extended a cordial invitation to all members of the talking machine industry who are planning to be in New York during the week of the National Music Show, June 1-8, to make the company's booths their headquarters during their visit in the East. This music show will be held at the Grand Central Palace, and judging from all indications will be an emphatic success.

This company has arranged to install a complete exhibit of Heineman products in Booths 40 and 41, and in addition these products will be displayed through the medium of the various exhibits conducted by the talking machine manufacturers who use Heineman and Meisselbach motors, tone arms, sound boxes, etc.

At last year's music show held in Chicago the Heineman exhibit was one of the most popular at the show, but Otto Heineman, president of the company, has made arrangements whereby this year's exhibit in New York will far surpass the 1917 display. There will be many unique and timely ideas introduced during the course of the show, which will doubtless make the Heineman booths a popular Mecca for visitors.

One of the most interesting features of the Heineman exhibit will be the first formal presentation of the new Heineman records. This latest addition to the Heineman family is now ready for the trade, and judging from the inquiries received from manufacturers and dealers throughout the country this part of the exhibit will receive the careful attention of all members of the talking machine industry who visit the National Music Show.

EDISON EMPLOYEES TO AID RED CROSS

The Edison war committee of 200, composed of employes and executives of Thomas A. Edison, Inc., have prepared a popular entertainment and dance for the evening of May 16 for the benefit of the Red Cross. The music for dancing will be furnished by the Edison Band, and the entertainment will be provided by Edison artists.

WORKING FOR RED CROSS FUND

Piano and Talking Machine Dealers Asked to Give 10 Per Cent. of Receipts on May 22 to the Fund—C. Alfred Wagner Is Chairman

May 22 has been set aside as the day on which every piano and talking machine dealer in New York City will give 10 per cent. of their gross sales to the Red Cross. C. Alfred Wagner, vice-president and general manager of Chickering & Sons, is chairman of the piano and talking machine committee of the profit-sharing days for the Red Cross, and under his able direction it is expected that splendid results will be secured.

Berthold Neuer, retail manager of Wm. Knabe & Co., and A. P. Plumb, of the Musieal Instrument Sales Co., are doing intensive work in the piano and talking machine fields respectively under Mr. Wagner's direction, and the responses to date to this patriotic appeal have been very gratifying. Mr. Wagner has been quite active the past year in behalf of Red Cross work, and his efforts have been fraught with success.

TALKING MACHINE MEN JOIN

Two Eastern Concerns Become Members of Music Industries Chamber of Commerce

It was announced last week at the offices of the Music Industries Chamber of Commerce, that the first members of the talking machine trade to apply for membership in that organization had been duly elected to membership. They are the Pathé Frères Phonograph Co., Brooklyn, N. Y., and the Bell Talking Machine Corp., New York.

HAS LEFT FOR ENGLAND

Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, England, who has been spending the past six weeks at the executive offices in New York, left the city last week for London. While here Mr. Sterling discussed plans and policies for the future, and visited the factory and various branches throughout the country. He enjoyed his visit greatly.

HERE IS A NEW PHONOGRAPH With MANY EXCLUSIVE FEATURES

New Reginaphone Style 900

Regina Sound Box

THE NEW REGINAPHONE THE IDEAL TALKING MACHINE

is produced in seven beautiful models (mahogany or oak), each is equipped with the Regina Co.'s new sound box and tone arm. The larger types of Reginaphones have quadruple spring motors which play for thirty minutes and all models have our own make motors, simple, durable, smooth running, with worm driven governors.

The new Regina sound box is unique, always in the same position; to change from lateral cut position to vertical or vice versa a quarter turn is made, the sound box still remaining at the same angle and the needle's position never changing. This feature while revolutionary is the greatest improvement the industry has had in years.

The tone arm and sound box are the simplest in construction and performance of any playing both the lateral and vertical cut records and do away with any objections found in the universal tone arm. The special diaphragm brings out the tone of either type of record with equal facility and in full volume.

The tone amplifying chamber found in most of the larger models sends the sound waves up instead of in the usual forward manner, thus giving the Reginaphone a tone of rare beauty and almost perfect naturalness.

These machines will sell on demonstration. Our proposition will therefore interest every live dealer.

TALKING MACHINE MEN DISCUSS FEDERAL CURTAILMENT

Several Meetings Held in New York Recently and Committee Appointed to Act for Entire Trade to Discuss With the Washington Officials the Proposed Curtailment of Output

In the assembly hall of the Columbia Shop, New York, there was held on Tuesday afternoon, April 30, for the first time in the history of the trade, a convention of talking machine manufacturers and their representatives, for the purpose of discussing a matter of vital interest to the entire trade, i. e., the curtailment of the output of talking machines and records by order of the Government.

The call for the meeting was sent out by R. L. Freeman, secretary of the Victor Talking Machine Co., at the suggestion of P. B. Noyes, director of curtailment, after a conference some time ago between Mr. Noyes and representatives of several talking machine manufacturers, with the idea of reaching some trade agreement regarding a basis of curtailment that would be presented to the Federal officials.

Over thirty talking machine men, representing the leading concerns in various sections of the country, answered the call and the meeting was presided over by H. L. Willson, general manager of the Columbia Graphophone Co., as temporary chairman, with J. Schechter, representing the Sonora Phonograph Corp. and the Otto Heineman Phonograph Supply Co., as secretary.

After a lengthy and frank discussion of the general trade situation, particularly as it is at present affected and may in the future be affected by war conditions and Government requirements, during the course of which various suggestions were offered as to the course to be pursued by the trade, a committee of ten was appointed to act upon the matter of curtailment for the trade as a whole.

In addition to H. L. Willson, the chairman, and J. Schechter, the secretary, the committee of ten consisted of R. L. Freeman, Victor Talking Machine Co.; Chas. Edison, Thomas A. Edison, Inc.; E. A. Widmann, Pathé Frères Phono-

graph Co.; Arthur Cushman, Emerson Phonograph Co.; L. Rommell, Bell Talking Machine Corp.; W. H. Alfring, Aeolian Co.; Julius Balke, Brunswick-Balke-Collender Co., and Louis Mandel, Mandel Mfg. Co., Inc.

It had been generally believed that the recent order of the fuel administrator curtailing the output of pianos and parts 30 per cent. for the months of April and May also applied to talking machines and records, inasmuch as the order referred to "musical instruments." Several representatives of prominent manufacturers, however, were called to Washington to confer with the fuel administrator regarding the plans for curtailing the industry, and it was learned that the talking machine trade was to be considered by itself, in the issues of any curtailment order.

The first general notice to the trade that the fuel administrator contemplated a second curtailment order was found in a letter sent out by P. B. Noyes, director of curtailment, to sixteen well-known concerns in the industry, and which read in part as follows:

"In order that sufficient fuel may be assured industries essential to the conduct of the war, the United States Fuel Administration has under consideration curtailment of fuel to be used by less essential industries.

"Before taking any action regarding talking machines we should be glad to confer with the committee representing your industry.

"If the talking machine industry can organize itself and form a war service committee that will represent the industry as a whole, we will be glad to arrange a conference with them before any action is taken."

The letter of Mr. Noyes was followed almost immediately by the call from R. L. Freeman for the meeting at the Columbia Shop.

In addition to the committee already mentioned, those who attended the meeting at the

General Offices 711 MILWAUKEE AVENUE CHICAGO
Southern Wholesale Branch 1530 CANDLER BLDG. ATLANTA, GA.

Columbia Shop included: H. B. Schaad, Aeolian Co.; George W. Lisle and H. N. McMenimen, Pathé Frères Phonograph Co.; F. N. Needham, Sears-Roebuck & Co.; George E. Brightson, president Sonora Phonograph Corp.; C. C. Brooks, Brooks Mfg. Co., Saginaw, Mich.; R. D. Wyckoff, Emerson Phonograph Co.; H. D. McNulty, Wonder Talking Machine Co.; J. D. Manton, the Manton Shop, Inc., New York; Harry Gennett, Starr Piano Co., Richmond, Ind.; J. Bartelstone, Lucky 13 Phonograph Co., New York; L. Blumberg, Regina Co., New York; M. C. Schiff, Vitanola Talking Machine Co., Chicago, and others.

The committee of ten appointed on April 30, after a thorough study of the situation, met again at the Columbia Shop on May 9 to report their findings and decide upon a definite course of procedure. At this meeting a subcommittee of five was named to go to Washington and confer with the United States Fuel Administrator.

The committee of five consists of H. L. Willson, W. H. Alfring, R. L. Freeman, E. A. Widmann and Julius Balke.

At the meeting of the committee of ten also a sub-committee of three, consisting of R. L. Freeman, J. Schechter and E. A. Widmann was appointed to compile data regarding the industry, from statistics that have been gathered, and to prepare a brief for presentation before the director of curtailment at Washington.

The committee has arranged to hold another meeting at the Columbia Shop on May 16, when the brief will be submitted for discussion, and an effort will be made to hold a conference with P. B. Noyes, director of curtailment, in Washington, on the following Monday.

WOODS & SON IN NEW QUARTERS

C. John A. Woods & Son, manufacturers of the "American Maid" phonograph, have moved their executive offices from 30 Church street to 25 Church street, New York, in order to have sufficient room at their command to properly display this line of phonographs. At this address the company has ample space for demonstration display rooms for the service of dealers.

The company states that it has made a number of important agency connections during the past few months, and it has also completed its line in all styles and types. Factory facilities have been also increased, and Mr. Woods is making an energetic drive for the better class of trade.

I HAVE severed my connection with the George A. Long Cabinet Co., and have consummated arrangements with the Nanes Art Furniture Co., whereby I will handle record cabinets made by this company. New improved designs to match the various types of talking machines will be introduced to the trade. Correspondence invited.

PURITAN

The Long-Horn Sensation of the Phonograph Industry

HERE is the most important discovery since sound reproduction was first invented. Look at this phantom illustration. See how the Long-Horn extends from tone arm at the top to the sound chamber at the bottom of the instrument. It means a big fullness, richness and resonance of tone beyond comparison with other sound-reproducing instruments. The Horn is of saxophone design and entirely of wood. It is an exclusive and patented feature of the Puritan.

It is a remarkable selling argument for the dealer and a real, definite, actual advantage to the purchaser.

Note that the sound chamber is at the bottom of the instrument—another exclusive Puritan advantage—and still another is the beautiful convex cabinet. Another tremendous advantage in handling the Puritan line is that you have also our line of Puritan Records made in our own recording laboratory. The Puritan plays any disc record made. Prices range from \$85 to \$350.

Write, wire or phone for our attractive proposition today.

UNITED PHONOGRAPHS CORPORATION
SHEBOYGAN, WISCONSIN

NEW INCREASE IN VICTROLA AND VICTOR RECORD PRICES

New Schedule of List Prices Formally Announced on May 8 and Became Effective on May 10—Increased Manufacturing Costs and Curtailment of Output Given as the Reason

A new increase in the list prices of Victrolas and records was announced by the Victor Talking Machine Co. in a telegram sent to Victor wholesalers throughout the country on the evening of May 7, and received by them on May 8, the increased prices becoming effective on May 10.

The increase in the list price of the various styles of Victrolas, ranging from something less than 5 per cent. to a trifle more than 10 per cent. in certain cases, has become necessary, it is explained, by the fact that manufacturing costs are mounting steadily, while at the same time production has been greatly curtailed through scarcity of labor and other conditions brought about by the war. A revision of the list prices has been expected by the trade for some time past, and therefore caused little excitement, even though the notice carried with it the first increase in record prices.

The new prices on Victrolas are as follows: Victrola IV-A, \$22.50; Victrola VI-A, \$32.50; Victrola VIII-A, \$50; Victrola IX-A, \$60; Victrola X-A, \$90; Victrola XI-A, \$115; Victrola XIV, \$175; Victrola XVI, \$225; Victrola XVI, electric, \$282.50; Victrola XVII, \$275; Victrola XVII, electric, \$332.50; Victor 25, school machine, \$85. Other new machine prices are in proportion.

The list price of the Marconi records, covering the course in wireless telegraphy, have been increased from \$5 to \$6 per set, and the price of the French course from \$2.50 to \$3. The list prices on all other Victor records, except double faced, Black Label, remain unchanged.

The 10-inch double-faced Black Label records will be listed in future at 85c. and the 12-inch double-faced Black Labels at \$1.35. There has in some cases been a readjustment of dealer's discount by jobbers, but this is a matter that rests entirely with the individual wholesaler.

In announcing the increase, together with the discount that will apply to the wholesalers, the Victor Co. stated in part: "It is necessary to advise the trade that the demand for our products is far in excess of our capacity for production. For some years the Victor Co. has found it difficult to meet the requirements even of its old customers, and this deficiency in supply has increased with the labor conditions caused by the present war. So far as possible

the company will endeavor as heretofore to protect its old customers, through whom its business has been so largely developed, by meeting their requirements as fully as possible."

It is a known fact that, although the costs of materials and every other element entering into manufacturing have increased tremendously since the beginning of the World War, the list prices of Victrolas have only advanced about enough to barely cover the War Excise Tax. The company has been absorbing increased manufacturing expenses, and dealers have been meeting heavy selling expenses out of the same margin of profit. According to an official of the Victor Co. a substantial increase in prices would have been warranted over a year ago, and yet the move was delayed.

Up to the present time the company has stood pat on the list prices of records, although the cost of shellac, the principal ingredient, has jumped many hundred per cent., as has the cost of everything else entering into record making. The new increase in record prices does not begin to offset the increased costs, to say nothing of taking care of the 3 per cent. war excise tax on each record produced.

WORKING FOR THE RED CROSS

The Pittsburgh talking machine trade has appointed a committee of six, consisting of J. C. Roush and French Nestor, Standard Talking Machine Co.; C. L. Hamilton, S. Hamilton Co.; W. C. Dierks, C. C. Mellor Co.; A. C. Henk, Columbia Graphophone Co., and George Hards, W. F. Frederick Piano Co., to solicit subscriptions in the Red Cross campaign.

TALKING MACHINE MEN TO MEET

A regular meeting of the Talking Machine Men, Inc., will be held on Wednesday, May 15, in the assembly room of the Merchants' Association in the Woolworth Building, when final action will be taken on various amendments to the constitution and by-laws and committees appointed to act during the year.

Mrs. H. J. Raymond has taken over the talking machine business recently conducted by W. E. Johnson in Corona, L. I.

BRILLIANTONE CO. EXPANSION

Larger Quarters Needed to Meet the Increased Demand for the Brilliantone Steel Needle—Will Have Exhibit at National Music Show

That the additional space added to the headquarters of the Brilliantone Steel Needle Co. in the Marbridge Building, New York City, was an absolute necessity is well proven by the fact that every square foot is utilized and it will not be long before more room will be needed. B. R. Forster, president of the company, reports that their output has reached tremendous proportions and, in keeping with the policy that has been theirs since their incorporation, every order that is received is given their immediate attention and shipped that very day with the possible exception of cases where the stock of the grade requested has run temporarily low. Several additions have been made to the office force of the company, and the addition of a Mr. Kaufman has been announced for the sales staff.

The Brilliantone Steel Needle Co. will be represented at the forthcoming National Music Show to be held at the Grand Central Palace, New York City, from June 1 to 8 by an interesting exhibit occupying two booths on the mezzanine floor, numbers 101 and 102. Mr. Forster will be glad to have the out-of-town talking machine men make that booth their headquarters during the show.

VICTROLA FOR HOSPITAL TRAIN

Machine and Supply of Records Will Entertain Wounded Soldiers on First of New Hospital Trains Turned Out by Pullman Co.—The Donation of a Chicago Club

CHICAGO, ILL., May 11.—A Victrola XI and Victor records will entertain the wounded soldiers on the first hospital train that will be operated in this country.

The H. Reichardt Piano Co., of 6423 South Halsted street, this city, has just sold an outfit to the Englewood Fellowship Club of Chicago, who are donating it to the Government for use on this hospital train.

They are now building at the Pullman shops here twenty-four complete hospital trains which will operate between the Atlantic ports and the permanent Base Hospitals.

Train No. 2 is now nearing completion and will be turned over to the Government within a few days and this will be the first train put in operation. It has been assigned to Fort Sheridan and the Great Lakes Training Station, both located just outside of Chicago.

EDISON MEN MATCH PRESIDENT

When President Wilson made his subscription to the Liberty Loan at a Washington theatre toward the end of the Third Liberty Loan drive, he did not realize that he was starting a popular movement which was called "Match the President" and which eventually added many millions to the Liberty Loan total.

The officials of the Edison Co. enthusiastically set out to get as many of the Edison executives as possible to make a last-minute subscription on this "Match the President" drive, with the result that ninety-one subscriptions were obtained. The subscription sheet that was passed around was headed "Match the President," and Thomas A. Edison headed the list, followed by Charles Edison. A telegram was sent by Charles Edison to President Wilson telling him of the eleventh hour successful drive.

OPENS BRANCH IN RUTLAND

RUTLAND, VT., May 10.—The United Talking Machine Co. opened its branch at 7 Center street, this city, last week with an interesting concert at which the special features of the Columbia and Pathé machines were demonstrated to a large crowd of people.

PLANS FOR JOBBERS' CONVENTION

Sessions to Be Held at Hotel Traymore, Atlantic City, on July 1 and 2—Program Will Carry Out the Present War-Time Spirit

Plans for the forthcoming convention of the National Association of Talking Machine Jobbers are progressing nicely, although, due to the uncertainty of existing conditions, the final arrangements will not be announced until just prior to the convention to avoid possible disappointment.

The business sessions of the convention will be held at the Hotel Traymore, the official headquarters, on Monday and Tuesday, July 1 and 2, with the annual banquet held on July 2. The program of the convention, both in the business sessions and the entertainment features, is strictly in keeping with the war-time spirit, and the main object for the jobbers getting together will be to consider how they may adjust themselves and their businesses to current conditions, and at the same time render the most helpful effort in support of the Government and its work in the matter of backing Liberty Loans, Red Cross and other drives, and in other ways. It is planned to have several prominent speakers make addresses.

The banquet will be a modest affair, devoid of the usual wines, although the diners may gratify their individual desires in the matter of refreshments.

Those planning to attend the convention should make reservations direct to the Hotel Traymore management to insure accommodations when the time comes.

In connection with the convention there will also be held the annual golf tournament, the arrangements for which are in the hands of T. H. Towell, of the Eclipse Musical Co., Cleveland. The tournament will be held at the Atlantic City Country Club, where the talking machine men have shown their skill, or lack of it, on previous occasions.

SOLDIERS WANT GOOD MUSIC

Professional entertainers who have appeared before thousands of soldiers in the training camps in the United States are of the opinion that one result of the innumerable concerts has been the raising of the standard of the programs. Says one singer:

"When the mobilization first began it was supposed by many, including those who gave talking machines and records, that the men wanted only ragtime, jazz band and mooney-looney-wishy-washy stuff, but a few of the good old musical standbys given as encores soon proved by the applause they won that the soldier boys' tastes are above those credited by some producers to the Tired Business Man.

"The troops want the best music we can give them, and since many of the headliners have appeared in the camps the audiences have become critical.

"One thing is sure, they don't want cheap heroics about marching into Berlin. It doesn't ring true, and if there is any place where a man learns true valuations it is in the training camps."

DISCUSSES TRADE CONDITIONS

The editor of the business department of the New York Times keeps in close touch with the talking machine trade evidently, judging from the frequent mentions made of this industry in his columns. For instance, Saturday, he said:

"Considering the time of the year, the phonograph trade is experiencing considerable activity, according to reports from a number of manufacturers with offices in this city. Instalment business in the medium-priced instruments is said to be holding up very well in most sections, and in many cases is increased over the same period in former years. The demand for very high-priced phonographs in elaborate cabinets

seems not to be particularly heavy just now, but the Third Liberty Loan and the season are held to be chiefly accountable for this fact."

ATTRACTIVE WINDOW DISPLAY

PITTSBURGH, PA., May 11.—The Goldenson Furniture Co., of this city, have recently been making some very attractive window displays of the Brunswick phonograph, and the picture herewith, which was taken at night, gives an excel-

The Goldenson Furniture Co.'s Window Display lent idea of the splendid arrangement of this display, which has proven of exceeding public interest.

Although only seventeen he had come to "join up," and was in the recruiting office answering some questions that the sergeant was putting to him.

"Look here, my man," said the sergeant, "are you willing to die for your country?"

The recruit opened his eyes with astonishment.

"No, sir," he replied; "I'm joining up to make a German die for his."

John H. Jensen, manager of the Brunswick Shop in Terre Haute, Ind., has just opened a branch in Clinton, Ind., where he is handling a full line of Brunswick phonographs, pianos and other musical instruments.

P. A. FUSS JOINS EDISON STAFF

Comes From Toronto to Take Editorship of the Amberola Monthly—Has Had Wide Experience in Newspaper and Phonograph Fields

P. A. Fuss

P. A. Fuss has recently become editor of the Amberola Monthly, published by Thomas A. Edison, Inc. He has had a broad experience and one which fits him well for the new work he has undertaken. He started business with a brokerage house on Wall street, later became traveling auditor for the National Surety Co., and next was traveling salesman with the Thomas J. Plant Co., manufacturers of shoes, becoming subsequently assistant to the advertising manager.

In the talking machine field he has acquired two kinds of experience, the first with the phonograph department of a well-known trade journal, and the second, as the Edison sales manager of the R. S. Williams & Sons Co., Ltd., of Toronto, Canada. In addition to editing the Amberola Monthly Mr. Fuss will serve as general assistant to the advertising manager of Thomas A. Edison, Inc., and will specialize along the line of issuing publicity of general trade interest.

PLEASED WITH BUSINESS PROGRESS

Joseph Hoffay Enthusiastic Regarding Outlook—Improved Cabinet Construction Augments Various Mechanical Attractions

Joseph Hoffay, president of the Hoffay Talking Machine Co., Inc., in a recent statement to a representative of The World said he was very much pleased at the development and prospects of the Hoffay business. In speaking of the new grill work of the Hoffay machines Mr. Hoffay said: "Increasing quantities of Hoffays are being sold throughout this country and abroad and our purpose in giving our new cabinets this distinctive feature was that they might be immediately recognized, so that even when placed on display in the show windows the passer-by would note they were Hoffay instruments. As we believe the Hoffay tone is immediately recognized by those who have heard our machines they also will now be able to recognize the cabinet itself."

INCORPORATED

The American Recording Laboratories, Passaic, were recently incorporated with the authorities of New Jersey, for the purpose of manufacturing and dealing in phonograph records, with a capital of \$25,000. The incorporators are C. E. Sanders, M. E. Sanders and George Thornton, all of Passaic.

BUSINESS ACTIVE IN PITTSBURGH

Conditions Favorable Despite Shortage—Peerless Record Makers Score—J. C. Roush Returns—Edison Tone Tests—German Records Being Interned—Other News of Interest

PITTSBURGH, PA., May 6.—Stock shortage in many lines of machines and records and other wartime conditions to the contrary notwithstanding, the Pittsburgh talking machine trade continues to go ahead in a really satisfactory manner. Jobbers and retailers are working hard, and the results are apparent.

Two big things in the trade during the month have been the appearance of the Peerless Record Makers, under the auspices of the Talking Machine Dealers' Association, and a decision of the executive committee of the association to "intern" records of German music and records by German artists for the period of the war. The relative importance of these two big things naturally depends upon the attitude of the individual.

The Peerless Record Makers, including such well-known artists as Arthur Collins, Byron G. Harlan, Billy Murray, Henry Burr, Albert Campbell, Fred Van Epps and Theodore Morse, appeared at Carnegie Music Hall on April 24 and attracted an overflow audience. Without doubt the majority of the audience were talking machine and record owners who appreciated the opportunity of hearing and seeing their favorite record artists in the flesh. The concert was well handled, and without doubt produced results.

Just how the plan to intern records of German flavor during the war will work out remains to be seen, but a list of nearly a thousand selections in the Victor, Columbia and Edison catalogs has been submitted to the association members.

At the local branch of the Columbia Co. Manager S. H. Nichols declares that March and April have been the best months in the matter of sales that have ever been experienced by the branch. Moreover, May has started off in a big way, and indicates that this month, too, will probably set a new record.

Joseph C. Roush, president of the Standard Talking Machine Co., Victor wholesalers, who returned recently from a vacation spent in Florida, was tendered a special dinner at the William Penn Hotel by the boards of governors of the Mount Lebanon Country Club and the St. Clair Country Club. The dinner was in the nature of a special welcome.

The Dawson Bros. Piano Co. are displaying Emerson records in a big way at their store, 957 Liberty avenue, and have given over considerable show window space to boost that line.

The Pathé Shop, the local headquarters of the Pathé Frères Phonograph Co., has been featuring with great success recently a new twelve-inch demonstration record bearing two scenes from the third act of "Romeo and Juliet," by the principals and chorus of the Paris Opera Co., accompanied by the Opera Orchestra. The demonstration record is offered at \$1, which is said to be just one-quarter of its actual value.

A number of new dealers have been signed up for the Pathé line recently, they including the Salem Music Co., Salem, W. Va.; Butch & Son, Harding, W. Va.; Dowdy Phonograph Co., Clarksburg, W. Va., and C. C. Denham, Fairmount, W. Va.

A number of very successful Edison tone tests have been held in towns embraced in the Pittsburgh territory, under the direction of the Buehn Phonograph Co., Edison jobbers of this city. Other tone tests are also scheduled for the near future.

TAKES ON NEW LINE

Clement Bccroft announces that he has relinquished his connection with the George A. Long Cabinet Co., of Hanover, Pa., and will hereafter represent the line of talking machine cabinets made by the Nanes Art Furniture Co., which he will show in a large number of styles.

Insures Long Life to Disk Records and Preserves Tone

Automatically cleans the **Record Grooves** and gives the needle a clean track to run in. Preserves a clear Reproduction and prevents Records from soon getting scratchy. Makes the Needle wear better. Dust and dirt in the Record grooves wear the Record out quickly and grind the Needle so it cuts the Record. **SAVE THE LIFE OF YOUR RECORDS.**

DIRECTIONS FOR ATTACHING BRUSH

No. 1

No. 2

No. 3

- 1st. Clamp Spring Clips of Brush around Goose Neck. (see 1 and 2). Place Record on Turn Table and Needle in Sound Box. Move Spring Clips along Goose Neck to a position where only outer bristles of brush will sweep the first few threads of record. Test this by resting needle in first groove of record. (See No. 3).
- 2nd. Turn Spring Clips on goose neck to produce necessary pressure on record through yielding spring. Brush top must not touch edge of Sound Box when in operation (see correct position of brush on No. 3). Yielding Spring of Improved Cleanrite Brush eliminates danger of too much pressure on record.

KOERBER-BRENNER FORMAL OPENING

Great Gathering of Talking Machine Men on May 8 Helped to Celebrate Formal Opening of Their Handsome New Building

St. Louis, Mo., May 8.—The Koerber-Brenner Music Co., Victor jobbers here, held the formal opening of their handsome new quarters, which they occupied more than a year ago without special observance, to-day. An opening was planned when the new quarters were occupied, and then came war delays, transportation delays, a rush of business and other things that happen to business these days; so no auspicious time appeared until now.

The program called for steady entertainment from 11 a. m. until midnight, and nearly 100 dealers of the district who were in attendance enjoyed every minute of the day.

The guests assembled at the Koerber-Brenner warerooms, and, after an inspection of their splendidly equipped and modern merchandising and stock-keeping plant, left in automobiles for a drive about the city, thence to the Sunset Country Club Inn—a beautiful place where many of the best St. Louis folk go to play golf and for dinner dances. A luncheon was served here, and the party returned to the Missouri Athletic Association for the afternoon session, which was along instructive as well as constructive lines. There were two factory men as speakers and a repair expert. Moving pictures of the Victor factory, to give the dealers an idea of what a considerable industry they are a part, was one of the several features of the gathering. The afternoon was all devoted to a discussion of business matters.

In the evening the visiting dealers were the guests of the Koerber-Brenner Co. at dinner—as liberal a dinner as is compatible with war times. Aside from the good things to discuss on the menu, the entertainment included the Temple Quartet—and there are few better in or out of the record studios—the Haenschen Ragtime Orchestra—which is so good that it has had records made and sells them independently—and other features that added to the enjoyment of the evening.

The post-prandial program was in charge of R. E. Lee as toastmaster. Mr. Lee has been a newspaper man, soldier, and is a clever talker. He introduced the various speakers and the hosts. The chief speaker was W. E. Bilhimer, who is regarded as the champion organizer of life insurance salesmen in this section of the country, and for the last year has been the most popular speaker in the community. He was followed by A. W. Magoon, president of the Tri-State Victor Dealers' Association, who told of the good work the association is doing. L. C. Wiswell, manager of the Victor department of Lyon & Healy; A. A. Trostler, Victor manager of the Schmelzer Arms Co., Kansas City, Mo., were also among those who made eloquent addresses and were given an enthusiastic reception. Messrs. Brenner and Rauth, the hosts, were also called upon for remarks.

The Koerber-Brenner warerooms, at 1714 Washington avenue, are on the ground floor of a magnificent white tile building in the wholesale section. They are of massive mahogany furnishings, very much on the plan of a banking office. The plans were made by a business engineer who studied the business for several months, and who gauged his plans for the time when the Victor Co. would be able to supply all of the machines needed for this territory. The feature of the front office is a model show window and demonstration room for the inspection of dealers. This is built in the corridor and not seen from the street. The demonstration rooms are constructed of the latest folding doors and are used for firm and dealer assembly meetings, as twenty-four can be seated. The real pride of the establishment is the record stockroom, which is so ample that it has never been taxed to capacity. It combines all of the features which go to make an up-to-date jobbing stockroom.

ROY J. KEITH'S GREAT SUCCESS

Vice-President and General Manager of New York Talking Machine Co. Sold \$200,000 Worth of Liberty Bonds in Recent Drive

Roy J. Keith, vice-president and general manager of the New York Talking Machine Co., Victor wholesalers, was one of the most energetic workers in behalf of the Third Liberty Loan. As a member of the talking machine committee working for this loan Mr. Keith left nothing undone to increase the figures for this division, and when the final totals were ready for presentation he had the honor of being able to report the receipt of more than \$200,000.

This total included the subscriptions of the members of the New York Talking Machine Co., every one of whom subscribed to one or more bonds. The company itself also subscribed very liberally, and it is interesting to note that at the present time the New York Talking Machine Co. owns Liberty Bonds totaling more than its entire capitalization.

Arthur D. Geissler, president of the company, in addition to a handsome subscription in New York, also subscribed liberally at French Lick Springs, where he spent a fortnight during the loan drive. Incidentally, while at this famous resort, Mr. Geissler bought a golf ball, which was auctioned in behalf of the Red Cross. As he paid \$400 for this golf ball it is safe to assume that he will keep it for tournament play.

The \$200,000 reported by Mr. Keith also includes a subscription of \$33,000 given to Mr. Keith by the Otto Heineman Phonograph Supply Co., well-known motor manufacturers, and \$60,000 of this total was raised at a concert given at the University Glee Club at the Hotel Astor. At this concert Reinald Werrenrath, the famous baritone and exclusive Victor artist, conducted the drive for the Liberty Loan.

Twenty local Victor dealers also subscribed to Mr. Keith's Liberty Loan total, and when it is considered that twenty-nine members of the company's staff are now in the service of Uncle Sam, it can safely be said that this company is "doing its bit" for democracy.

REGARDLESS of his product, if a manufacturer is to grow, to prosper, his product must stay sold. A phonograph is made up of many parts, and of these the motor is of major importance.

When the Stephenson Precision-Made Motor was introduced, many compliments were received; on the spring drum construction, the tapered bearing turntable shaft, the silent wind, the running qualities and many initial orders were received. The initial orders were trial orders the subsequent repeat orders were because of the inherent merit of the Stephenson Precision-Made Motor. Because manufacturers appreciate that this motor helps them to keep their product sold helps them to make satisfied customers helps them to prosper, to grow.

L. W. McCHESNEY WINS PROMOTION

Is Appointed Assistant General Manager of Thos. A. Edison, Inc.

Leonard W. McChesney, for many years connected with Thomas A. Edison, Inc., has been appointed assistant general manager of Thomas A. Edison, Inc., under C. H. Wilson.

Mr. McChesney started with the Edison organization about fourteen years ago in the ad-

Leonard W. McChesney

vertising department under his father, L. C. McChesney, and gradually progressed to the position of assistant advertising manager. In 1912 he resigned to become advertising manager of the General Film Co., but returned shortly after to the Edison Co. as sales manager of the motion picture division, succeeding H. G. Plimpton as general manager of this division. Until the motion picture business of the Edison Co. is entirely liquidated and closed out, Mr. McChesney will also retain the title of manager of motion picture division.

R. F. BOLTON OFF ON WESTERN TRIP

Columbia Foreign Language Record Business Shows Great Increase—New Literature

R. F. Bolton, sales manager of the international record department of the Columbia Graphophone Co., left this week for a trip through the Middle West, which will include a visit to the Columbia branches and representatives as far west as Kansas City and Minneapolis. Before leaving for the West Mr. Bolton commented upon the fact that the Columbia foreign language record business had shown a splendid increase this year, the sales totals for the first four months of 1918 being far ahead of last year. This record is particularly gratifying in view of the many merchandising problems incidental to the war.

This department has just issued a very attractive set of booth hangers, listing records in the various languages, each accompanied by a descriptive cut. These records are carefully selected from the general catalog, and as the lists are changed monthly, the dealers will have an opportunity of displaying practically the entire catalog in their booths.

The newspaper campaign in behalf of foreign language records which was recently inaugurated under Mr. Bolton's direction is producing splendid results.

SOME IMPORTANT APPOINTMENTS

Ratified at Recent Meeting of Directors of Otto Heineman Phonograph Supply Co.

At a meeting of the board of directors of the Otto Heineman Phonograph Supply Co. held May 8 at the executive offices of the company, 25 West Forty-fifth street, New York, the following appointments were ratified:

A. L. Fritzsche was elected a director of the company. Mr. Fritzsche is general sales manager of the General Fire Extinguisher Co., Cleveland, O., being a member of the executive committee of that company. This is one of the most prominent industrial concerns in the Middle West, and is credited with doing the largest fire extinguisher business in the country.

J. Schechter, a member of the law firm of Schechter & Lotsch, New York, identified for many years with the industry, was elected treasurer of the company, and Miss F. Aufrichtig was appointed cashier.

Thos. E. Griffen was appointed manager of the new Springfield, Mass., factory, and Charles B. Kraemer assistant manager. Both are well known in manufacturing circles, and will be in charge of the new record factory.

PRICE QUOTATION SHEETS

Prepared by the Gloria Phonograph Supply Co. for Convenience of Their Dealers—Plan Intensive Sales Campaign to Start Soon

The Gloria Phonograph Supply Co., New York, which placed on the market last month the Gloria steel needle, has just prepared a complete set of price quotation sheets for their needles, in order to provide its patrons with a standard set of prices that will apply to all orders. The company believes that this is the only way to successfully merchandise any product, and this policy will be one of the important factors in the company's sales and merchandising plans.

Since the introduction of the Gloria steel needle last month requests for the agency for this needle have been received from all parts of the country. The company is living up to its promise of making prompt deliveries of its products, and arrangements have been consummated whereby factory facilities will be materially augmented in order to adequately handle the increasing demand for Gloria steel needles.

Plans have been completed for an intensive sales campaign in behalf of this needle, and

Rudolf Gaertner, president of the company, expects to announce the details of this plan within the next few weeks. The company will endeavor to provide the dealers handling Gloria steel needles with an efficient system of co-operation, and several practical ideas have been developed along these lines, to be soon released.

GOOD WORK FOR LIBERTY LOAN

Talking Machine Trade Subscribes \$1,000,000 of \$3,017,250 Reported by the Allied Music Trades—J. N. Blackman's Able Chairmanship

The local talking machine trade made a wonderful showing in the recent Third Liberty Loan drive, when the committee in charge of the talking machine division of the Allied Music Trades, under the chairmanship of J. Newcomb Blackman, rolled up a total of \$1,000,000 in subscriptions, allowing the piano trade, as a matter of courtesy, to tie them at that figure. The total subscriptions to the loan for the Allied Music Trades was \$3,017,250.

Although the official figures for the talking machine men were given as a round million, that department of the trade is also to be credited with a substantial portion of the \$651,700 subscribed at the great rally at Carnegie Hall on April 30, at which musicians and artists associated with talking machine companies supplied the greater part of the program. The story of the rally appears in another section of The World.

The showing made by the talking machine trade is particularly significant inasmuch as subscriptions to the second Loan amounted to something under \$250,000. In other words, the trade quadrupled its record, and in doing so made a bigger gain than any other branch of the industry.

When the totals of the subscriptions to the Third Loan were reported by the committee of the Allied Music Trades, the following significant telegram was sent to William G. McAdoo, Secretary of the Treasury: "We pledged you \$1,000,000 for Third Liberty Loan and actually raised \$3,017,250, a gain of 276 per cent. over our quota, which we hope will be considered a highly essential response from a so-called non-essential industry. We are always ready to answer the call."

So successful was the work of Chairman Blackman and his associates in the Liberty Loan campaign that the piano men tried to have him take the chairmanship for the trade in the coming Red Cross drive, but for business reasons Mr. Blackman was compelled to decline.

LOS ANGELES "TALKER" MEN MEET

Large Attendance at Recent Meeting—Some Important Resolutions Passed Regarding Time Sales and Interest—Some Interesting Talks

LOS ANGELES, CAL., May 4.—The Retail Talking Machine Dealers' Association of Southern

California had its regular meeting at Barker Brothers on the evening of April 30. In all sixteen out of the twenty-three firms belonging to the association were represented, and many things of interest to the trade were discussed.

A resolution was passed limiting all contracts to fifteen months, with all contracts to draw 7 per cent. interest. While most of those present seemed to be in favor of not advertising terms, this matter was left to the discretion of the different dealers with the understanding that if they did the advertisement must contain a cut, the model and the price of the machine.

Meeting of the Retail Talking Machine Dealers' Association of Southern California

The following firms, Johnston Music Co., Starr Piano Co., Walter R. Gage Co., Broadway Department Store, Hamburger & Sons and the Musical Record Shop, have not joined the association as yet, but committees have been appointed to call on them, and it is expected they will all be in the fold by the next meeting.

Through the courtesy of Mr. Booth, of Barker Brothers, the association picture was taken in the Barker Brothers photographic department.

Only officers and department managers are eligible to membership in this body, but the association kindly elected as an honorary member The Talking Machine World's local correspondent, H. H. Fish.

Frank Anrys, vice-president and general manager of the Wiley B. Allen Co., was present and spoke at length on several subjects of interest.

Wm. H. Richardson, chairman of the publicity committee, gave an interesting talk on that subject, and among other things spoke of the "Memory Contest for School Children," advocated by C. M. Tremaine, of the National Bureau for the Advancement of Music, and its bearing on the trade.

It was decided to make the next meeting an open one and all employes in the local talking machine departments are invited. A banquet followed by an informal dance will be the features. Following are the names of the persons in the accompanying picture: Reading from left to right, seated, are Harold Jackson, manager talking machine department, Wiley B. Allen Co.;

president, J. W. Booth, manager talking machine department, Barker Brothers; first vice-president, C. W. Colyear, proprietor Colyear's Furniture Co.; second vice-president, E. Holland, proprietor Vernon Music Co. Standing, left to right, J. B. Chamberland, president Hollywood Furniture Co.; Frank Salyer, manager talking machine department, Bartlett Music Co.; Nathan Shiresohn, proprietor Shiresohn Brothers; Howard Brown, manager talking machine department, Lyon-McKinney Smith Co.; H. H. Fish, representative The Talking Machine World; Wm. H. COLUMBIA RECORDS OF FOLK DANCES

Educational Department of Columbia Co. Announces a Special Set of Country Dances

Because of the introduction of physical training in schools throughout the country and the widespread interest in folk dancing, the Columbia Co.'s educational department has prepared a special set of English country dances, Morris dances, and sword dances, recorded under the personal supervision of Cecil J. Sharp, a recognized authority on this work. These records have been accepted for use in the New York City schools. Mr. Sharp is an honorary director of the English Folk Dance Society and of the Stratford-on-Avon School of Dance and Song. For three years he has been teaching these English dances in the leading educational centers of America, and his work has received the highest praise.

There is a growing demand for penmanship records that will give rhythmic count and instruction helpful to the school children in their daily penmanship exercises. The Columbia Co. takes care of this demand by the issuance of the Kirby rhythmic penmanship records, which is a splendid adaptation of the correct rhythmic forms found in music, woven into rhythmic counting patterns, for use in instructions in handwriting. These records were made by J. Albert Kirby, penmanship teacher of the High School of Commerce in New York City, where this rhythmic system is in daily use.

J. F. WATTERS JOINS NATIONAL ARMY

Secretary of the Pathé Frères Phonograph Co., Brooklyn, Receives Several Handsome Gifts From His Co-workers on His Departure

J. F. Watters, secretary of the Pathé Frères Phonograph Co., Brooklyn, N. Y., is now a member of the National Army, and, after spending a few weeks in camp, will leave for "over there." Before joining the National Army Mr. Watters was presented with several handsome gifts from his co-workers as a mark of their affection and esteem; these gifts including a gold wrist watch and a silver cigarette case striped and lined with gold.

Although Mr. Watters has been connected with the talking machine industry for only the past few years, he has already won the friendship and esteem of Pathé jobbers and dealers throughout the country. A tireless worker and possessed of a pleasing personality, Mr. Watters during his two years' association with the Pathé Frères Co. has rendered the company's clientele invaluable assistance and co-operation.

He joined the Pathé Frères forces as a member of the sales department, but his unusual ability and thorough knowledge of merchandising soon enabled him to win important promotions until he was finally appointed secretary of the company. Every member of the Pathé force is numbered among his personal friends, and they all wish him "God speed" as a member of Uncle Sam's fighting forces.

RETURNS FROM CANADIAN TRIP

George W. Hopkins, general sales manager of the Columbia Co., returned to New York late last week, after a visit to the company's branches in Toronto, Buffalo and Cleveland. Mr. Hopkins was gratified to find conditions in these sections very satisfactory, and Canadian business in particular is increasing by leaps and bounds.

While at Buffalo Mr. Hopkins addressed the members of the Greater Buffalo Club, who were in session at the Hotel Lafayette, on the subject of "Psychology of the Little Things of Business." This address was enthusiastically received by the Buffalo business men, who appreciated the many effective points that Mr. Hopkins emphasized in his talk.

Twenty-five submarine chasers, built at the Bremerton Navy Yards, have been equipped with Victrolas.

"MANAGING BUSINESS IN WARTIME"

Two Volumes Just Issued by A. W. Shaw Co. Designed to Help the Business Man In This Country to Meet His Present Problems

"Managing a Business In Wartime," a most valuable work in two volumes, has just been issued by the A. W. Shaw Co., of Chicago and New York, and is designed to help the business man in this country to meet the problems he is encountering just now, aided largely by the experience of British business men during their several years of war.

In the very first chapter—Adjusting a Business to Wartime Conditions—T. J. Zimmerman, managing editor of the British System, tells exactly how a British business met the new conditions and sudden problems that the war brought.

Other chapters in the first volume are: What American Business Men Can Learn from British Experience; Hints on Handling Wartime Business; How Working Hours Affect Output; Training the Boy Worker.

The second volume treats particularly of ways for American business to meet wartime conditions, and the list of chapter titles suggests the possibilities. For instance, The Probable Effect of the War Upon Prices; A Short Cut in Financing; How to Sell to the Government; More Production with Fewer Men; Wartime Buying Problems; and many others.

Nor are the business problems that will confront us, when peace is declared, forgotten. Here are one or two of the subjects covered: Where Will European Competition Find Us Weakest? What Chance Has America After the War? Preparing for the Trade Contest.

Some of the men who have made these books valuable for American business men by their contributions are Lord Leverhulme, Sir Charles W. Macara, Rt. Hon. John Hodge, M.P., Minister of Labor; Laurence R. Dicksee, of the University of London; Ralph E. Heilman, of Northwestern University; W. R. Basset, of Miller, Franklin, Basset & Co.; Reginald Trantschold, John Hays Hammond, Theodore E. Burton, Noble F. Hoggson, and other successful business men.

In short, these books show the American business man just what he must do to readjust his business to the demands of war, from securing the necessary help to the character of the product he should handle, from the minor problems which may be more or less obvious to anticipating the modifications that the Government might otherwise suggest, sooner or later.

"Managing a Business in Wartime." A. W. Shaw Co., Chicago and New York. Two volumes, cloth bound, \$3.

SALES STAFFS MADE WELCOME

The general sales department of the Columbia Co. has inaugurated a policy of inviting members of the sales staffs in the different branches throughout the country to visit the executive offices, in order to permit the executives to become better acquainted with the men "on the firing line," and so that the salesmen may acquire first-hand information regarding Columbia products. The salesmen visit the factory at Bridgeport and the recording laboratory and return to their home cities imbued with an adequate appreciation of Columbia efficiency and quality.

Among the salesmen who visited New York this week were H. L. Ireland and H. L. Fields, of Pittsburgh, accompanied by Mrs. Ireland and Mrs. Fields; Wm. Roy, Kansas City branch; Louis B. Sayer and George L. Schuetz, of the Indianapolis branch, and W. M. Korhammer, of the Baltimore branch. Mr. and Mrs. Ireland and Mr. and Mrs. Fields made the trip to New York from Pittsburgh, accompanied by K. Mills, assistant manager of the New York branch, and formerly assistant manager of the Pittsburgh branch, who had returned to the "Smoky City" for a day or two in order to bring his automobile to New York.

OPPOSE ZONE POSTAL RATES

Merchants' Association Declares It Will Harm Publishers

The Merchants' Association recently sent the following telegram, protesting against the application of zone postal rates on second-class mail matter, to Senator John H. Bankhead, chairman of the Senate Committee on Post Offices and Post Roads:

"This association believes that the application of zone postal rates on second-class matter must inevitably greatly reduce the circulation of periodicals by making the cost of distant circulation prohibitory, thereby greatly reducing the revenues of publishers, making the business generally profitless, and forcing many publishers out of business. Such zone rates will be especially destructive to the great publishing interests of the Eastern States, inasmuch as the cost of circulation of their publications to distant points will exceed their revenues from such circulation and will, moreover, create conditions which will heavily discriminate in favor of centrally located publishers.

"The Government, because of enforced decrease in the circulation of periodicals, would fail to realize the increase in postal revenues expected from the application of zone rates to second-class matter, and, further, would be deprived of large revenues from the excess profits and income taxes by reason of the unprosperous condition of the publishing business arising from a prohibitory postal charge. The great decrease in the circulation of periodical literature which must result from a prohibitory postal charge will, to a considerable extent, deprive the American people of educational opportunities of great importance and benefit to them. For these reasons we urge that the proposed application of postal zone rates to second-class mail matter be not approved."

PHONOGRAPH HARDWARE CATALOG

Hammacher, Schlemmer & Co. Issue Booklet Bearing on Talking Machine Cabinets

Hammacher, Schlemmer & Co., Fourth avenue and Thirteenth street, New York, have just issued a catalog in which are illustrated and listed various items of hardware which are used on talking machine and phonograph cabinets. Various kinds of hinges are shown, including hinges of wrought brass with dipped butts, the Soss invisible hinges, which are used by a great many talking machine manufacturers, as well as the top supports and slides, stay joints and desk slides.

The book also contains illustrations of elbow catches, grip neck casters, Philadelphia stem casters, faultless casters and "Steel Gem" roller-bearing casters and the various parts which are installed with it. A complete line of furniture slides and leg tips as well as brass leg sockets and flush pulls are shown. Several pages are devoted to knobs, including brass knobs both wrought and cast, polished and dull finished, glass knobs and wooden knobs. A complete line of mortise locks are also included, as well as a display of fancy keys. Other items are corrugated steel fasteners, used for joints and wood screws, paper covers, packing bolts and felt for washers, discs, lining, etc.

TO SELL PAROQUETTE ASSETS

By order of the Supreme Court, Kings County, there will be sold at auction on Wednesday, May 22, the property and assets of the Paroquette Mfg. Co., which has made a general assignment for the benefit of creditors. The assignee, Maurice L. Shaine, will sell at public auction through Joseph Feldstein, auctioneer, at Building No. 1, Bush Terminal, Brooklyn, N. Y., the entire property and assets consisting of a complete plant for the recording and manufacturing of phonograph records, 30,000 Par-o-Ket records, and a large number of master and mother matrices.

THE BRONX EXPOSITION

To Open May 30 and to Remain Open Five Months Each Year

In order to assist the manufacturers of the United States in capturing their just share of the export business of the world, and to provide them with a market place where they may meet the foreign buyers who are coming to this city from all over the globe, the New York International Exposition of Science, Arts and Industries is now being constructed here. It will be opened to the public, beginning on May 30 and continuing until November 1. The exposition is to be permanent, along the lines of Shepherd's Bush, London, and the annual trade conference at Lyons, France. Each year it will be open during the period indicated.

The exposition grounds cover twenty-seven acres, and are situated at the East 177th street subway station, West Farms. This is one of the most accessible points in Greater New York, and is said to have the best transportation facilities ever possessed by an international exposition in this or any other country. The exhibit buildings now under construction include a Palace of American Achievements, Palace of Fine Arts, Temples of Liberal Arts and Varied Industries, and others housing features found at previous expositions of this character.

That Canada will have a representative exhibit now seems assured. The directors of the exposition have received notice that exhibits are being assembled by the Provinces of Quebec, Manitoba, Nova Scotia, New Brunswick, and Ontario. It is expected that for the second year of the exposition Canada will have an entire building in which to house its products.

Charles F. Lilley, proprietor of the New York Phonograph Co., of Elmira, N. Y., recently celebrated his second anniversary in the business. He has been most successful since opening his store in Elmira, and has built up a large and profitable clientele.

EDISON THEATRE AT MUSIC SHOW

Splendid Program Arranged for the Edison Display to Be Made at the National Music Show in Grand Central Palace Early Next Month

Thomas A. Edison, Inc., have arranged their section of the music show exhibit at the Grand Central Palace as an Edison Theatre. This theatre is to be fully equipped with all the necessities of a regular theatre, will seat about six hundred people and have a splendidly arranged stage.

Verdi E. B. Fuller, who is in charge of the Edison tone test work, is arranging a series of recitals for afternoon and evening to be given by such artists as Marie Tiffany, of the Metropolitan Opera Co.; Marie Morrisey, concert contralto; Vernon Dalhart, Frederick Wheeler, the Fleming Trio and others. Anybody who has never heard a tone test will find this a splendid opportunity to become acquainted with this feature of Edison advertising.

The exhibit will be a view de luxe of the celebrated Period models with some surprises in new styles, and will be in a space adjoining the Edison Theatre. There will also be shown in this space the famous Army and Navy model as well as some of the regular models.

The Edison dealers' convention, which will be held at the Waldorf-Astoria, takes place during the same week as the music show, and it is expected that the Edison Theatre will be headquarters for hundreds of Edison enthusiasts.

L. Lehman, of May, Stern & Co., Pittsburgh, Pa., was a visitor to New York recently calling at the Columbia executive offices and renewing his friendship with Manager Friedl, of the New York branch, who, prior to his arrival in New York, had been manager of the Pittsburgh branch. May, Stern & Co. are one of the largest Columbia dealers in that territory, and Mr. Lehman's satisfaction with Columbia product is reflected in the company's fast-growing sales totals.

The GREATEST MOTHER in the WORLD

Stretching forth her hands to all in need; to Jew or Gentile, black or white; knowing no favorite, yet favoring all.

Ready and eager to comfort at a time when comfort is most needed. Helping the little home that's crushed beneath an iron hand by showing mercy in a healthy, human way; rebuilding it, in fact, with stone on stone; replenishing empty bins and empty cupboards; bringing warmth to hearts and hearths too long neglected.

Seeing all things with a mother's sixth sense that's blind to jealousy and meanness; seeing men

in their true light, as naughty children—snatching, biting, bitter—but with a hidden side that's quickest touched by mercy.

Reaching out her hands across the sea to No Man's Land; to cheer with warmer comforts thousands who must stand and wait in stench and crawling holes and water-soaked entrenchments where cold and wet bite deeper, so they write, than Boche steel or lead.

She's warming thousands, feeding thousands, healing thousands from her store; the Greatest Mother in the World—the RED CROSS.

Every Dollar of a Red Cross War Fund goes to War Relief

Contributed through Division of Advertising United States Government Committee on Public Information.

NEW YORK TALKING MACHINE COMPANY

119 West 40th Street, New York

CHICAGO TALKING MACHINE COMPANY

10 No. Michigan Ave., Chicago, Ill.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN,
Manager

World Office
Republic Bldg., 209 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., May 10.—Both the wholesale and retail trade of Chicago are jubilant over the showing that they made during the recent Liberty Loan campaign. While it is true that the allotment for the music trades of Chicago was handled principally by piano men, the talking machine men proved themselves a potent factor during the big drive by helping push their quota of \$700,000 over the top. When the final returns of the big drive were officially announced it was shown that from the music trade alone there were 3,485 subscribers, and the amount subscribed was actually \$740,150 or approximately 6 per cent. above the original allotment. All the manufacturers, distributors, jobbers and retail men rolled up their sleeves and took part in the fray, devoting every possible moment that they could to make the drive a success.

However, the wholesale trade had a very good month and are trying the best they can to take care of their orders, which kept coming in principally from the outlying districts. The supply, however, was way below the demand, and as a result distributors were very careful in apportioning their goods in order to keep peace in the family, so to speak. The record situation is somewhat improved over last month and shipments are coming through from the plants in better shape.

If the demand for records may be used as an indicator of the nation's pulse, it is an assured fact that the great wave of patriotism which has swept over the country is growing more intense. This is apparent because the demand for patriotic numbers has increased in greater proportion than any other time during the past.

With the retail trade there was a slight falling off in Chicago during the past month. This was expected as, according to the majority of the dealers, it is customary at this time of the year—moving season. The falling off, however, was principally for machines, but the record business made a good showing and the sale of patriotic and dance records had a tendency to balance the deficiency in sales of machines, and as a result kept the trade in a somewhat even status.

He Went to Rockford

H. Elthorn, who for the past five years has been traveling through the Indiana and Illinois

territory for the wholesale Victor department of the Rudolph Wurlitzer Co., was called to Rockford with others of the draft contingent, leaving on Monday of this week.

H. S. Conover Manages Department

H. S. Conover, who was formerly connected with the wholesale Victor department of the Rudolph Wurlitzer Co., has accepted a position with Simon Bros., of Gary, Ind., and is now manager of their talking machine department.

Enlists With Canadians

Ray Cepek, who is in charge of the Victor record order department at the Rudolph Wurlitzer Co., left Chicago last week bound for the Canadian training camp at Toronto, where he enlisted in the British-Canadian overseas forces.

Edison Artist Sings

Hardy Williams, an Edison artist, is entertaining in person during the showing of the Thos. A. Edison war film, "The Unbeliever," now appearing at the Auditorium Theatre. This war drama was produced by Thos. A. Edison, Inc., in conjunction with the United States Marine Corps. Mr. Williams renders patriotic songs during the intermission.

S. A. Ribolla in New York

S. A. Ribolla, manager of the Chicago headquarters of the Otto Heineman Phonograph Supply Co., spent a few days last week in New York in the company's interests.

Move to Larger Quarters

The Emerson Phonograph Co. within a few days will move the headquarters which it now occupies on the fifth floor of the Regal Building, 7 East Jackson boulevard, to its new location on the fourth floor of the same building. Manager F. W. Clement states that the new headquarters will occupy the space of approximately five thousand square feet and the offices are being arranged so as to provide for several large demonstration rooms. The shipping department will be on the same floor as well as the general offices and demonstration rooms, and arrangements have been made for a large space in the basement which will be devoted entirely to stockroom. Mr. Clement states that the new nine-inch Emerson records have impressed the trade very favorably, and from present indications the new field for these records is unlimited in that the independent dealers are now

able to supply their trade with large records, which heretofore they were unable to do. A large stock of these nine-inch records is carried by the Chicago headquarters and the wants of the Central Western territory are supplied from this point.

To Jefferson Barracks

H. W. Higgins, assistant to F. W. Clement, manager of the Chicago branch of the Emerson Phonograph Co., received his official notice this week to report to Jefferson Barracks, St. Louis, Mo., on April 6. Mr. Higgins has been Mr. Clement's assistant for the past two years and will be a great loss to the Chicago branch.

Reduced Price on Certain Styles

The Columbia Graphophone Co. announced through a letter which was sent out to their dealers a few days ago that their small-size talking machine type "E" had been reduced from \$85 to \$75. Columbia has two types of this machine, the large and the small, and this reduction was made in order to differentiate as both were formerly quoted at the same figure.

W. C. Fuhri Visits

W. C. Fuhri, manager of the Chicago headquarters of the Columbia Graphophone Co., made a short visit to the Columbia headquarters in New York this week.

Singing Lullabies

W. H. Wade, of the Wade Talking Machine Co., is receiving congratulations from his many friends in the trade, due to the fact that a young lady by the name of Ruth Hall Wade is now residing at his home. About two weeks ago "along came Ruth" and since the arrival, Daddy Wade has been an exceptionally busy man memorizing various well-known lullabies.

A Busy Man

Frank P. Read, of the Automatic Container Co., is up to his neck in work these days in making preparations for the big show at New York, and formulating plans for the big sales campaign to be launched by his company within the next few weeks. He is establishing a large corps of competent traveling salesmen and fitting them out with sample displays. He is also fitting out a full line of the company's product for exhibition purposes at the New York show and will be in personal charge of the company's booth, number 116 on the mezzanine floor. W.

A. Fricke, of the Lakeside Supply Co., will accompany Mr. Read to the show and will assist him in taking care of the display. Both Mr. Read and Mr. Fricke will demonstrate for the benefit of the manufacturers attending just how the Automatic Container Co.'s filing devices can be used in all models of talking machines. A very beautiful Artkraft model containing the latest design of the automatic container filing device is being prepared for the show by the Lakeside Supply Co.

A. D. Geissler Visits

A. D. Geissler, president of both the Chicago Talking Machine Co. and the New York Talking Machine Co., was a visitor to Chicago the first part of the week, having come from French Lick Springs, where he was enjoying himself for about two weeks. After spending a few days in Chicago Mr. Geissler left for his headquarters in New York.

Six Best Sellers

The six best Edison sellers for the past month are: "U. S. Army Camp Songs"; "Bungalow in Quogue" and "Just a Voice to Call Me Dear"; "Leave It to Jane" and "Sirens' Song"; "Jack O'Lantern Fox Trot" and "Knit, Knit, Knit"; "That's Why My Heart Is Calling You" and "Will You Remember"; "Naval Reserve March" and "Spirit of America."

Pathé announce for the past month the six best sellers as follows: "Who Knows?" and "Mary of Argyle"; "Keep the Home Fires Burning" and "When the Great Red Dawn Is Shining"; "Vocal Gem Medley, No. 2"; "One Day in June" and "I'm Sorry I Made You Cry"; "Hungarian Rag" and "American Jubilee"; "Hearts and Flowers" and "Will You Remember."

Six best Victor sellers for the months are: "Four American Folk Song"; "Sweet Emalina, My Gal" and "While the Incense Is Burning"; "Each Stitch Is a Thought of You, Dear" and "A Little Bit of Sunshine"; "Everybody's Crazy

'Bout the Dog-Gone Blues" and "In the Land o' Yamo Yamo"; "Roses of Picardy" and "Love's Garden of Roses"; "The Last Long Mile" and "K-K-K-Katy."

The six best Columbia records for the month are: "Quartet From Rigoletto" and "Sextet From Lucia"; "I Hate to Lose You" and "For the Two of Us"; "Any Old Place the Gang Goes (I'll Be There)" and "Faugh-a-Ballah"; "On the Road to Home, Sweet Home" and "Bring Back My Daddy to Me"; "Keep the Home Fires Burning" and "Pack Up Your Troubles in Your Old Kit Bag (and Smile, Smile, Smile)"; "Tales of Hoffman" and "Melodie in F."

Six best Emerson sellers for the month are: "Au Revoir, But Not Good-bye, Soldier Boy" and "On the Rockin' Rosa Lee"; "The Missouri Waltz" and "Kathleen Mavourneen"; "A Baby's Prayer at Twilight" and "Gate City"; "Kilima Waltz" and "Hilo March"; "What Are You Going to Do to Help the Boys?" and "I'm Going to Follow the Boys"; "Cleopatra" and "K-K-K-Katy."

The six best Paramount sellers for the month are: "Pasadena Day March" and "Lights Out"; "Poet and Peasant Overture, Part 1" and "Poet and Peasant Overture, Part 2"; "Where the River Shannon Flows" and "When You and I Were Young, Maggie"; "Come Where My Love Lies Dreaming" and "The Rosary"; "Baby's Prayer at Twilight" and "One Day in June"; "Havanola" and "Ragging the Scale."

Gennett records: "Humoresque" and "Ave Maria" (Helen Ware) (Art Tone record); "Mary of Argyle" and "Eileen Allanna"; "Hilo March," Aloha Oe" and "Ua Like No a Like" (Hawaiian instrumental trio); "Good-bye Barney Boy" and "Yock-a-Hilo Town"; "Fox-Trot Medley" and "One-Step Medley"; "Hello, I've Been Looking for You" and "Liberty Bell."

Donates Victor to U. S. S. "Wilmette"

Mrs. Edwin Allen Mead, a prominent society

woman of Wilmette, has donated a large Victor cabinet talking machine to the crew of the U. S. S. "Wilmette." The "Wilmette" was formerly the old steamer "Eastland," which capsized in the Chicago River, causing a loss of six hundred lives. This boat has been recently remodeled and converted into a scout ship for the U. S. Navy and received its overhauling and complement of men and guns at the shipbuilding yards in South Chicago. Many of the boys of the crew are sons of well-known families of Wilmette, and for this reason Mrs. Mead made her donation. The talking machine was purchased from P. S. Ridgeway, manager of the Victor department of the Cable Company.

New Home for Hiawatha

The Ottawa Pianophone Co., whose plant at Ottawa, Ill., was destroyed by fire a few weeks ago, have purchased a splendidly equipped factory at Geneva, Ill., only an hour's ride from the Chicago market. It is a three-story brick structure, thoroughly equipped for the exclusive manufacture of phonographs and is run entirely by electric power with individual motors for each machine. The plant is now in operation and several hundred cabinets are already in progress through the factory. Within the next few weeks they will be ready to make shipments to their trade. At the general offices and wholesale warerooms in the Republic Building, Sales Manager Fred Moynahan expressed his satisfaction that, although six weeks elapsed between the burning of the plant and the resuming of operations in the new factory no cancellations of orders had been received, this showing conclusively the value placed on the Hiawatha agency by the dealers. It is the intention of the company to change the name to the Hiawatha Phonograph Co., and a meeting of stockholders has been called for June 3 in order to take the necessary steps to that end.

(Continued on page 87)

PLAYS ALL RECORDS

If All Phonographs Were Like The Brunswick

IF ALL were endowed with The Brunswick Method of Reproduction, the opportunity for dealers would be similar and uninteresting.

Brunswick Dealers, however, have infinitely more to offer their customers.

And ideas that are exclusive.

No other instrument has, or can ever have, this new-day way of playing records.

Some may attempt, but our patents are broad.

Only Brunswick Dealers, in pointing out the advantages of The Brunswick Method of Reproduction, can offer The Ultona, the wonderful all-record player.

Only Brunswick Dealers can offer The Brunswick Tone Amplifier, the latest and greatest advancement of all in acoustic arrangements.

Other dealers cannot offer these wanted features.

And we are creating a demand for them among music lovers in our national advertisements.

People want to know about The Brunswick Method

of Reproduction. They want to hear this instrument.

Only Brunswick Dealers can satisfy this demand and make the sales.

A peep in our new sales portfolio will make you read the whole interesting story.

A copy will be sent on request to super-dealers who are interested in handling the super-Brunswick in a super-way.

We already have a great many fine dealers, but there are several locations offering profitable opportunities.

ALL PHONOGRAPHS IN ONE

FROM OUR CHICAGO HEADQUARTERS (Continued from page 85)

Makes Important Widdicomb Deals

E. C. Howard, manager of the phonograph division of the Widdicomb Furniture Co., of Grand Rapids, spent considerable time in Chicago last month and announced that very important arrangements for the distribution of Widdicomb phonographs had been made. A full line of the beautiful instruments is now on exhibition at the warerooms of H. P. A. Mossner, who opened headquarters at 532 Republic Building last month as sales agent. The Widdicomb Sales Co. has been organized to do a jobbing business in the Widdicomb product with headquarters at 327 South LaSalle street. Mr. Ernst and Mr. Stewart, who control the concern, are experienced talking machine men and are very enthusiastic regarding the new line. They will carry a stock in Chicago for the benefit of their trade.

Mr. Howard made a trip to St. Louis a week ago, and on his return announced that the great Meyer Bros. Drug Co., of that city, known as the largest wholesale drug house in the world who have an army of seventy-five traveling salesmen covering Southern and Southeastern territory, had taken on the Widdicomb line and would push it vigorously. Other Western distributors recently reported are Sanborn Kinney Co., Sioux City, Ia., and the H. Dinwoodey Furniture Co., Salt Lake City, Utah. Ben Schweneger, formerly with the Manophone Co., is now on the road for the Widdicomb people. He is making his headquarters in Cleveland and has established some excellent dealers accounts in the Buckeye State.

Youthful Record Maker

Good talking machine records have been made of the voice of Master Howard Dewar, whose mother, Mrs. Mary Allene Dewar, is a saleswoman for H. A. Rintleman, manufacturer of Goldentone needles, with headquarters in the Republic Building. The boy soprano has an unusually fine voice and has appeared at very notable entertainments in Chicago. Mrs. Dewar

is herself handling the records of her son's voice with considerable success.

Attends Koerber-Brenner Opening

L. C. Wiswell, manager of the Victor department of Lyon & Healy, left for St. Louis on Tuesday evening of this week to attend the opening of Koerber-Brenner Co.'s new store at 1712-16 Washington avenue. The formal opening of the new quarters took place on Wednesday, May 8, and an elaborate program was offered. An informal reception and inspection of the new quarters took place in the morning. This was followed by a twenty-five-mile auto trip through the business and residence section in St. Louis up to the Sunset Hill Country Club, where the guests partook of a buffet luncheon. After luncheon the return trip was made to the convention hall of the Missouri Athletic Association Clubhouse, where a Victor factory film was shown. This was followed by practical demonstrations by window trimming experts, and in the evening the guests were given a banquet in the Athletic Club, where many speeches were made. After the banquet Mr. Wiswell gave a strong talk on salesmanship, which was eloquent in the best sense of the word and full of practical wisdom. Mr. Wiswell was accompanied by Mrs. Wiswell.

Andrew McCarthy a Visitor

Andrew McCarthy, treasurer of Sherman, Clay & Co., San Francisco, and in charge of the Victor department of that company, was a visitor to Chicago the early part of the month. Mr. McCarthy was returning to his headquarters from a visit to New York and the Victor factories at Camden.

C. L. Egner Visits

C. L. Egner, assistant traveling manager of the Victor Co. with headquarters in Camden, N. J., was in Chicago during the latter part of April. While here he held a sales conference with W. F. Fries, J. E. Durham and Wm. Yeager, Victor traveling representatives. After the meeting Mr. Egner left for St. Louis to hold

a conference with the Texas, Oklahoma and other Southern Victor travelers. Mr. Fries travels Minnesota, Mr. Durham, Michigan, and Mr. Yeager, Illinois for the Victor.

Ellis Visits Trade

G. P. Ellis, sales manager of the Chicago Talking Machine Co., spent the entire month of April visiting dealers in Illinois, Indiana, Iowa, Michigan, Missouri, Wisconsin, Kentucky and Ohio.

The Lakeside Rotometer

The Lakeside Supply Co. have installed their new punch presses for making the Lakeside Rotometer and are now ready to supply these instruments in any quantities. These little instruments are designed so as to take up the least possible space and are calibrated to indicate when the proper turn table speed has been attained. This company also carries a large stock of the Stephenson precision motors and has established a repair service department especially for this motor to serve the users in Chicago and adjacent territory. The Lakeside Supply Co. is also assembling one of their beautiful Artkraft models of their Luxfibre talking machine for the Automatic Container Co. for the purpose of demonstrating its automatic filing device during the coming New York show. The Artkraft Luxfibre machines are very beautiful and have been most favorably commented on by the trade, although they have been only on the market about six weeks.

Godfrey Isaac, a son of the late Theodore Isaac, who was president of the Klingsor Talking Machine Co., is now connected with the Lakeside Supply Co., and is specializing on the sale of their Artkraft Luxfibre talking machine in both the wholesale and retail lines.

W. A. Fricke, secretary of the company, will accompany Frank P. Read, of the Automatic Container Co., to the New York show and will assist him in demonstrating the Automatic Container Co.'s full line of filing devices.

Why MANDEL SERVICE is a guarantee of sales

Dealers have learned the advantage of handling the MANDEL LINE of superior Talking Machines because they are made in their entirety *under one roof*—a guarantee of uniformity throughout.

THE MANDEL LINE of Talking Machines is sold on a written guarantee for *service* backed up by one of the most efficient up-to-date factories in existence. A fitting assurance of its superiority.

This is our handsome Model No. 3 Machine.

Note our plan of sending it on FREE TRIAL

In quality, workmanship and richness of tone MANDEL TALKING MACHINES measure up to the highest accepted standard, yet in price are within the reach of the most modest purse.

The Mandel Talking Machine is the Machine "Without a come-back." Its standardized make-up assures service even under the stress of severe usage.

Our co-operative plan to dealers is the biggest inducement ever offered by any reliable talking machine line. We not only help *sell* our line but *help dealers buy it*.

Send to-day for details of this unique plan—it is "opportunity pounding on your door"

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 87)

Returns From Vacation

G. W. Davidson, of the Talking Machine Shop, who for the past six weeks had been visiting Philadelphia as well as the Victor plant in Camden, returned to headquarters in Chicago this week. Others of the Talking Machine Shop now on vacations are Miss Pauline Tishler and Frank Nall.

Like Morenus Talking Machines

The Morenus Piano Co., of this city, report that business is developing very nicely, and that dealers are particularly well pleased with the special horn construction and acoustic properties of the talking machine. R. F. Morenus has been out on the road a large part of the last month demonstrating the Morenus machine for some of his old friends in the piano trade with the result that he has secured some excellent accounts who are already sending in largely repeat orders.

B. & H. Co. Increase Capacity

The B. & H. Fibre Mfg. Co., makers of the B. & H. fibre needles, have found the demand for their product increasing at such a heavy rate as to necessitate larger facilities; consequently, they have taken an entire additional floor of the building at 35 West Kinzie street, in which their factory is located, and it is now being equipped for their purposes.

Inside of thirty days the company will place a new package of fibre needles on the market. The needles which will be known as the No. A needles are considerably shorter than the standard fibre needles and naturally produce a greater volume of tone. The price, however, will be the same as the regular package, namely, 40 cents per hundred needles.

Puritan Distributor Active

James B. Orth, the new distributor for Puritan phonographs in Chicago, is dispensing luxurious-looking cigars in glass cases in his richly furnished display rooms in the Republic Building. Also he is enthusiastic about the

prospects for the new long horn wonder—as the Puritan is being advertised.

Mr. Orth says he never realized what students dealers are until they began to come to him in ever-increasing numbers to inspect this new long-horn principle and tell him what he didn't know about physics and the principles of sound. Every one who sees it is so enthusiastic that sometimes the cabinet is threatened with destruction to get a real look at the horn, consequently Mr. Orth is having especially built a skeleton model showing this feature, and will have this on exhibition in a few days. G. A. Langheck and E. W. Graham, both salesmen on Mr. Orth's staff, are now calling on the trade in Missouri and southern Illinois, where a lively interest is reported.

Empire Phono Parts Progress

John H. Steinmetz, president of the Empire Talking Machine Co., spent several days at Cleveland last month at the plant of the Empire Phono Parts Co., of which he is secretary and treasurer. President McNamara and he made plans for the increasing of the output of the plant in order to take care of the large volume of business for the company's product. "Our tone arms and reproducers will soon be the standard equipment on a number of well-known talking machines," said Mr. Steinmetz. "Furthermore, we will be ready about the middle of this month with our new attachment for playing lateral cut records. The trade is showing much interest in this device and we are anticipating a large demand for it."

Big April for Vitanola

Jeffrey B. Schiff, sales manager of the Vitanola Co., states that April proved to be one of the largest months they have had since December. Orders are coming from all points.

Use Victor Machine

During the big Liberty Bond drive in Chicago a small Victor table machine was used by those in charge of the Geo. P. Bent Co.'s booth

at Wabash avenue and Adams street. Various well-known patriotic records were rendered on this machine, and by its use large crowds were constantly attracted to the booth. The little machine was donated for the purpose by the Victor department of the Rudolph Wurlitzer Co.

Sings at Empire Concerts

Miss Emma A. Kiess, music teacher and concert singer of Williamsburg, Pa., has made an

Emma Kiess.

arrangement with the Empire Talking Machine Co., of this city, by which she is appearing in recitals given by Empire dealers throughout Pennsylvania, singing in accompaniment with

Empire records as played on Empire talking machines. Miss Kiess' reputation as a singer results in attracting large audiences to these concerts, and her superb rendition of numbers has been the subject of much comment in local papers. Her engagement by President Steinmetz was brought about by a letter she wrote the Empire Co. expressing her delight with the Empire machine which she had purchased. Her tribute to its excellence and her appreciation of its value to her both as a singer and a teacher led to a correspondence which resulted in her engagement.

New Aeolian Manager

Fred Aylesworth, who for the past three years has been manager of both the Aeolian-Vocalion and Sonora departments of Julius Bauer & Co., has resigned his position and will take charge of the Vocalion department of the Aeolian Co.'s branch at Indianapolis on May 15. For a youngster he is to be complimented upon the excellent results he produced in building up

the fine talking machine trade for Julius Bauer & Co.

Occupy New Offices

The Combination Attachment Co. have moved from the Republic Building to new and larger quarters in the U. S. Annuity Building, 20 Jackson boulevard, E. They have four large rooms, as suites 401 and 402 on the fourth floor, furnishing them with excellent offices and salesrooms with a comfortable demonstrating parlor for the purpose of showing the visitors the excellence of the Orotund and Superior sound boxes and attachments for playing the various types of records on all classes of machines.

New Perkins Plant

The Perkins Phonograph Co. has developed a very large talking machine business in the last two years and has purchased the plant of John Kimmeth & Co., formerly utilized as a furniture factory on the southeast corner of Wood and Clarinda streets. The purchase included a four-story mill constructed sprinkler building

with ground dimensions of 70 by 130 feet and a lot of 115 by 30 feet. The purchase price is said to be \$70,000. The company has heretofore manufactured at two plants, one on Wright street and the other at the headquarters of Wilbur Perkins interests, 1925 South Western avenue. Now, however, all case work and assembling will be done at the new plant, although the company will continue manufacturing their own tone arms, motors and sound boxes at the old location.

Manufacture New Cover Support

Barnhart Bros. & Spindler announce that they will soon have ready for the market a new cover support for phonographs. They state that it has been thoroughly covered with patents and will support the cover at any point at which it is placed and will prevent it from warping.

The company is having an excellent demand on the Scotford tone arm and the Superior universal reproducer.

Paramount Records Popular

C. J. Woodard, Chicago representative for the New York Recording Laboratories, Inc., of Port Washington, Wis., has moved his office from 503 Cable Building to Room 204 Athenaeum Building, 59 East Van Buren street. Mr. Woodard has a larger and more modern office than formerly, and the new location enables him to carry a larger sample stock of new Paramount records and to also accommodate visitors. Mr. Woodard has done excellent work on the Paramount, and the numbers of local dealers specializing on these records is constantly increasing. There are now four Chicago Paramount jobbers, namely, Carson, Pirie, Scott & Co., the Automatic Container Co., Moore & Evans and Joseph Hagan Co.

M. C. Schiff Talks on Curtailing Music

The following article on the curtailment of music, written by M. C. Schiff, president of the Vitanola Talking Machine Co., appeared recently in the Chicago Daily News, and it makes good reading:

"Recently there appeared an article indicating the possibility that the Government would take steps to curtail the production of musical instruments, the industry being designated as non-essential.

"Since music in the home is the most positive preventive of deterioration to a morose practically, it is essential to the degree that it affects the morale of the home, the very foundation of the nation's institutions, and therefore the morale of the nation. Music is the most ennobling of all human agencies. Without it the ideals of the nation and hence the nation itself would suffer. It is essential to the home in which is to be maintained the mental attitude necessary to national hope and courage.

"The message of patriotism that great bands and famous musicians impart in their masterful interpretation of our national songs, expressing in most potent manner the great ideals for

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 90)

which America stands, will go a long way at this time, when events transcend the powers of the ablest writer or orator, toward binding together in common ideals and sympathies the people throughout the country.

"Let us find some way for the industry to serve the country without risking injury to the spirit of the people who now, more than ever, need and depend upon music for economical relaxation and clean entertainment."

Personals and Visitors

Among the recent visitors to the Chicago trade the past month were A. Cleveland, Beloit, Wis.; Fred Leithold, of Leithold Piano Co., La Crosse, Wis.; Wm. Hubble, of Wm. Hubble Bro., Monroe, Mich.; W. C. Larrew, Knox, Ind.; H. G. Power, Taylor Carpet Co., Indianapolis, Ind.; H. E. Whitman, Pearson Piano Co., Indianapolis, Ind.; Fred Pearson, Pearson Piano Co., Indianapolis, Ind.; Geo. P. Cheatle, Music Shop, Springfield, Ill.; Ensign Thor Norberg, Norberg Music House, Moline and Rock Island, Ill.; and D. J. Maher, of Maher Bros., Jackson, Mich.

New District Sales Managers

The Jones-Motrola, Inc., announce that W. Afton Carter has been appointed district sales manager for Illinois, Indiana, Michigan and Wisconsin with headquarters in Chicago, and that F. L. Sheppy has been appointed district manager for Missouri, Kansas, Nebraska and Iowa with headquarters in Kansas City.

S. J. Turnes With Brunswick

Sam J. Turnes, who was formerly connected with the Geo. P. Bent Co. in the capacity of advertising manager, is now associated with the phonograph division of the Brunswick-Balke-Collender Co. as advertising manager. After leaving the Geo. P. Bent Co. Mr. Turnes went over with the Burnett & Weinberger Co. as sales service manager and remained with them until he accepted his present position. Mr. Turnes succeeds H. E. Nelson, who is now stationed at the U. S. Government Aviation School

for Mechanics at Portland, Me. To use his own words, "Sam," as he is popularly known throughout the trade, says that he just couldn't keep away from the old stamping ground and is glad to be back among his congratulatory friends on the Row.

Brunswick Activities

The following is a partial list of new agencies that have been established by the talking machine department of the Brunswick-Balke-Collender Co. during the past month: Porch Bros., Altoona, Pa.; Wunderlich Piano Co., Kansas City; Kieselhorst Piano Co., St. Louis; the Knabe Warerooms, Inc., Baltimore, Md., and Washington, D. C.; J. Goldsmith & Sons Co., Memphis; E. Witzmann Piano Co., Memphis; and Hollenberg Music Co., Little Rock and Pine Bluff, Ark.

SEEBURG EXHIBIT AT MUSIC SHOW

Chicago Manufacturers Will Make Fine Display of Phonogrand at National Music Show

CHICAGO, ILL., May 9.—One of the most interesting exhibits at the National Music Show in New York from June 1 to 8 will be that of the J. P. Seeburg Piano Co., of this city. They will occupy Booth No. 14, and will be devoted to the Phonogrand, the company's remarkable combination of electrically-driven player-piano and phonograph. Illustrations of the instrument will be found in the company's advertisement elsewhere in this paper. The Phonogrand was announced to the trade last fall, but the company is now ready to go on the general market with it and have perfected their productive capacity to that end. In the meantime it has been tested in actual use, and a number of the instruments have been sold from the retail warehouses of this city, where it has proven to be a sight seller. In every instance the greatest degree of satisfaction has been expressed by purchasers. Furthermore, some of the best-known

dealers in the country have placed sample orders and are extremely pleased with the instrument and its selling possibilities. Repeat orders are coming in rapidly.

The Phonogrand is but a little larger than a large phonograph. The piano plays all standard eighty-eight-note player rolls and is especially adapted to the Q R S expression rolls with which it reproduces wonderfully the playing of the great piano artists. The phonograph is of the latest type and is equipped for playing all types of records. It is operated by a separate electric motor, independent of that operating the player-piano. The Phonogrand is, it must be understood, not a coin-operated instrument. It is designed particularly for home use, but is also particularly adapted for clubs, hotel parlors and other places where it competently substitutes for both a good talking machine and a full player-piano. Those who have heard the instrument have been surprised at the volume and quality of tone of both the player and the phonograph. The Phonogrand is a strictly unique instrument and will be inspected with keenest interest by the visitors to the show. It will also be shown permanently in New York at the company's new offices and salesrooms in the Bush Terminal Exposition Building, at 130 West Forty-second street.

WHAT'S TIME TO A HOG?

Does not this old story illustrate clearly the wrong viewpoint of the merchant who is habitually slow when meeting his obligations?

The mountaineer's razor-backs were running loose and feeding on such fattening forage as grass and green apples. "Why don't you pen them up and fatten them quick with corn?" asked the summer boarder. "It takes so much time to get them ready for market so long as they run wild." "Hell!" snorted the mountaineer, "What's time to a hog?"—Kansas City Association Bulletin.

Trade Mark Registered

Claims Are All Right— But Only Proofs Count

Any manufacturer may claim for his product all the qualities there are. That is his privilege. He may even think his claims are justified. You read the advertisements, so you know that makers, as a rule, are not over-modest in that regard. If you believe them all, they all make super-phonographs. In your experience, that theory doesn't hold.

THE VITANOLA

must be good, because it sells—and stays sold. Many propositions look good on paper—but when you apply the real test—selling—how many can stand up and sell the way the Vita-nola does? AFTER THE FIRST VITA-NOLA IS SOLD IN YOUR TOWN more buyers will come in and ask for it. The consumer likes the Vita-nola—because it gives a round dollar's worth of value for every dollar put into it. For this reason every owner is a Vita-nola booster—and you know what consumer boosting means to your store. YOU GET A NICE PROFIT FROM EACH SALE. You get advertising of the best kind from each buyer—why shouldn't you handle the Vita-nola in your town?

OPENING OF ELBEL BROS. STORE

Nearly 12,000 People Attend—All Entertained With Delightful Program—Description of Building—Many Representatives From Prominent Music Houses Present

SOUTH BEND, IND., April 29.—Elbel Bros., Inc., new store was a veritable bower of spring-time blossoms and greenery Saturday on the occasion of the formal opening. Nearly 12,000 people visited the store and were shown throughout the day and evening.

On the basement floor the sheet music is to be found, an endless array of all kinds of music. Three soundproof "tryout" rooms are given over to the player-pianos on this floor. On the first floor in the rear of the building is a beautiful green-tinted room, which is the recital hall. This room has a seating capacity of about sixty persons and was filled during the entire day. On the first floor are to be found twelve soundproof rooms for the trying out of Victrolas. An instant service record counter is on the first floor near the offices.

The front display window was tastefully arranged as a music room. Near the window was placed a wonderful floral creation, the compliments of the Chicago Talking Machine Co., Victor distributors. A beautiful basket of pink roses which stood at the entrance of the music room was the gift of the Whitney-Currier Co., Toledo, Victor distributors.

On the second floor, which extends over the Max Adler store as well as the Ebel Building, the rooms are given over to the exhibition of grand and Duo-Art pianos. The walls of the rooms are beautifully tinted and add much to the general attractiveness of the display rooms. Donahue's Orchestra played in these rooms during the evening. Beautiful roses were given as favors to the guests during the day and evening. Hundreds of pianos and Victrolas were on display in the six rooms on the second floor,

and on the third floor is to be found the stock and repair room. An automatic electric elevator in the rear building gives service to the four floors.

Representatives from several of the leading music houses were guests at the store for the opening day. They were W. W. Michaels, W. C. Griffith and G. P. Ellis, of the Chicago Talking Machine Co.; J. F. Dunham, of Camden, N. J.; Warren K. Kellogg, of Toledo, O.; Henry Gennet, of the Starr Piano Co., of Richmond, Ind., and David F. Cordingley, New York City.

FEATURE PARAMOUNT RECORDS

Active Campaign Inaugurated by the New York Recording Laboratories, Inc., Port Washington, Wis., in Behalf of These Records

An interesting feature of The World this month is a supplement devoted to Paramount records, made by the New York Recording Laboratories, Inc., Port Washington, Wis. The facts set forth therein give an excellent idea of the development of this organization both in the numbers represented as well as the artists connected with the recording department. This company have inaugurated an active sales campaign, and with a well-developed organization will bring the Paramount records to the attention of a large dealer and a purchasing clientele throughout the entire United States.

WINDOW THAT ATTRACTED MANY

During the recent drive for the Third Liberty Loan the Flatbush Music Co., Brunswick dealers of Brooklyn, N. Y., trimmed their windows in a particularly attractive and patriotic manner, which drew quite heavy crowds. The Brunswick-Balke-Collender Co. were so pleased with the window that they had photographs taken of it and sent to all their dealers with a suggestion that they use similar window displays.

Different—But Practical

The MORENUS Phonograph is a Distinct Departure from a Tonal Viewpoint

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the bottom, not the top. The tone is big and full but mellow, and the reproduction of the artist's voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are right and the cabinet work and finish unexcelled.

The MORENUS is in 3 STYLES

- A. OAK, - - 48 inches high. Retail price, \$110
- B. MAHOGANY, 48 " " " " 125
- C. OAK and MAHOGANY, 50 inches high, Retail price, - - - - 150

A TRIBUTE TO THE COLUMBIA

Letter of Praise for the Columbia Grafonola From Iowa Dealer Contained in Latest Issue of the "Columbia Record"—Other Items

There is published in the latest issue of the "Columbia Record," a house organ issued by the Columbia Graphophone Co., New York, an interesting letter from L. Ginsberg & Sons, Des Moines, Ia., relative to their satisfaction with the Columbia line, which they handle in their successful retail establishment in that city. This letter, which is a tribute to the sales possibilities of the Columbia product, reads as follows:

"After six months of pushing Columbia Grafonolas we wish to compliment you on the wonderfully dependable machines you people put out. Our troubles have been so small that you can call them practically nothing considering the number of Grafonolas we sell.

"We may here state that our business during the month of November, on Columbia Grafonolas exclusively, was over six times as much as the month of November, 1916, when we handled several different makes, and did not push any particular make.

"We also wish to take this opportunity of expressing our appreciation for the way the Schmoller & Mueller Piano Co. have handled our business, as they have many times gone out of their way to give us service.

"Hoping that the Columbia Grafonolas will continue to progress in the future as they have in the last six months; we remain, yours truly, L. Ginsberg & Sons (Signed), I. D. Ginsberg."

Other interesting articles in this issue of the "Columbia Record" include a letter from the president of Townsend Harris Hall, College of the City of New York, referring to the fact that this society has become deeply interested in the artistic series of window displays produced by the Columbia dealer service department for the use of Columbia representatives. The president

of the society requests the Columbia Co. to supply them with copies of this display material for use by the members of the society.

There are the usual number of articles featuring attractive window displays, with special mention of the signal success achieved by the Columbia international record department with its new display service.

10 PER CENT. WAR TAX IN CANADA

Musical Instrument Manufacturers Much Perturbed Over Proposed War Budget

OTTAWA, CAN., May 6.—The members of the piano and talking machine trade in the Dominion are naturally quite excited over the War Revenue Budget urged by the Hon. A. K. MacLean, acting Minister of Finance, and which, among other things, would levy a war excise tax equal to 10 per cent. upon automobiles, gramophones, phonographs, talking machines, cylinders and records therefor, mechanical piano and organ players and records therefor . . . when manufactured or imported after the 30th day of April, 1918, on the duty paid value when imported and on the price when manufactured and sold, provided that such war excise tax shall not be payable when the articles are manufactured for export.

Musical instrument manufacturers in the United States, who are paying only a 3 per cent. war excise tax on certain of their products, are being regarded with envious eyes by the manufacturers of this country who see little hope of having the proposed tax of 10 per cent. cut to any appreciable degree. An appeal, however, has been sent to George W. Pound, general counsel of the Music Industries Chamber of Commerce of America, in New York, who carried on the fight before Congress in the interests of the trade in that country, for advice and assistance in our own time of trouble.

Attention!

Victor, Edison and Columbia Dealers and Distributors

Don't forget, when a customer questions you as to what attachment will equip his machine to make it universal, in playing all makes of records most perfectly and without destruction, that

The Orotund and Superior

attachments are the only scientifically perfected outfits on the market, playing all makes of records, producing the greatest musical results, positively reducing surface sounds, and in many instances entirely eliminating disagreeable scratching and nasal effects. If you have not as yet had a real demonstration as to the highest type of music and entertainment from the various makes of records, you should visit our office, or ask for a personal demonstration.

If, after hearing our different attachments and reproducers with a few of the most beautiful records ever recorded, you do not believe we have produced some wonderful results which you have never before thought possible on a talking machine, we will then apologize for wasting your time.

You will increase your sales of records by handling these attachments.

We guarantee to improve the tone of your machine. We sell attachments, tone arms and jewel points, Diamond and Sapphire.

Write for circulars and prices.

Superior Universal Reproducer

The Reproducer that pivots on its axis—taking the correct angle for all makes of Records—and the needle retains the same center in both positions

	Sample Prepaid	Retail Price
With Attachment for Victor	Nickel \$4.10 Gold 5.00	\$6.50 8.00
With Attachment for New Victor	Nickel 3.50 Gold 4.25	5.50 6.75
With Attachment for Columbia	Nickel 3.70 Gold 4.55	5.85 7.25
With Attachment for Edison	Nickel 4.10 Gold 5.00	6.50 8.00
With Attachment for Pathe old style arm	Nickel 3.70 Gold 4.40	5.85 7.00
As is—it fits the new Pathe universal arm	Nickel 3.15 Gold 3.75	5.00 6.00

*This refers to the latest type having the enlarged Tonearm

"The Superior Universal Reproducer gives a depth of sound that is so wonderful that all other sound-boxes that I have ever heard seem obsolete. Besides this marvelous depth and warm richness of tone, it has the great advantage of a surprising musical volume. In all makes of records overtones and underlines never before heard with other Reproducers are brought out with pure, crystal-like clearness. Your Reproducer places the needle in exactly the right angle for either the Columbia and Victor or the Pathe and Edison Records. It is one of the few which safely play the Edison Diamond Disc Records without skidding across the record, which causes the jewel point to dig into the record and ruin it. Other makes slant too much, therefore there is always the tendency for them to slip from the groove and skid. All that I have said of the Superior is also true of the Scotford Model I, that wonderful Reproducer of yours that, with its large diaphragm, plays the Pathe, Edison, Lyric and other vertical-cut records with so great and beautiful a tone. I have sixteen different Reproducers fitted to my machine, but I know that for perfect articulation, beautiful tone and volume, your sound-boxes have no equal."

Wilmington, Delaware

BUSINESS HAS BEEN SOMEWHAT SLOW IN LOS ANGELES

Liberty Loan Campaign, Successfully "Put Over," Engaged the Attention of Public—Machine Stock Situation Improves—War Records in Favor—Harold Jackson With Wiley B. Allen—Other Items

LOS ANGELES, CAL., May 6.—The month of April did not prove to be a very good month for business in the talking machine line. In fact, it was the poorest so far this year. Of course, there were several good reasons for this, and the best excuse, probably, was the great Liberty Loan drive, which has just been brought to a successful finish.

The machine situation has cleared up to a considerable extent, and all of the local dealers have more machines in stock now than at any time since January 1. Records, however, are still hard to obtain and most stocks are sadly depleted with very little hope of any shipments in the near future. This shortage has been a sort of blessing after all, as it has made the merchants push the sale of many good records that were poor sellers before.

The demand for the popular war records keeps up, and it is impossible to get some of the numbers at present. The call for patriotic music is good—the most popular being the "Star Spangled Banner" with "America" second. The French national air seems to be the best liked of the foreign songs.

G. C. Beckwith, of Beckwith-O'Neal Co., Victor wholesalers at Minneapolis, Minn., paid a visit to Los Angeles after a month's sojourn with his family at Coronado, Cal.

R. C. Daynes, who was connected with the talking machine department of Barker Brothers for several years, has left there to go into the farm tractor business.

John Miller has left the Wiley B. Allen Co. to accept a position with Sherman, Clay & Co., local Victor wholesalers.

Howard Brown, manager of the talking machine department for Lyon-McKinley-Smith, is very much pleased with his last month's business, and says that, although he did not do as much as some months before, yet the cash business was larger and his average down payments on instalment sales was 22½ per cent. This company handles the Brunswick line exclusively.

Harold Jackson, for many years connected with the Southern California Music Co., and for the last three years on the road for the Diamond Disc Distributing Co., now the Edison Phonograph, Ltd., has taken the management of the talking machine department for the Wiley B. Allen Co. Mr. Jackson is well known in southern California in the music business, and has handled the Edison line for years. The Wiley B. Allen Co. are also agents for the Victor.

E. Holland, proprietor of the Vernon Music Co., says business has been as good with him

OPPOSE NEW POSTAL LAW

Hear Protests Against Zoning Provisions for Second Class Mail

Further protests against the application of the new postal zoning provisions for second class mail matter in the war revenue law were made public this week. Ex-Attorney General George W. Wickersham said: "There should be no law against limiting intelligence. It is against the public interest. The people are entitled to all the information they can get."

Dr. Charles A. Beard called the principle of the provisions "contrary to the principles on which our Government was founded. Jefferson," he said, "promulgated the theory more than a hundred years ago that newspapers and periodicals were essential to the success of our democracy. It is wrong in spirit and wrong in theory to hamper the national development of the country."

Newcomb Carlton, president of the Western Union Telegraph Co., said that the measure should be repealed and a more equitable method of raising revenue substituted.

NEW INCORPORATION

The Disk Phone Piano Method, New York, has been incorporated with capital of \$100,000, by L. T. Fetzer, J. V. and T. H. Robinson.

as ever. This is certainly a ray of sunshine to the other dealers who have complained of a considerable slow-up during April and are glad to hear of some one whose business did not let up. Mr. Holland's business is located quite a way from the business center of the city, but he has a fine trade and is always hustling for more.

W. G. Bailey, window trimmer for the Southern California Music Co., has had some very interesting displays for the talking machine department lately. One that attracted unusual notice was the "Spirit of '76." In this the figures were all working, the three dummies keeping time and even the flute player's fingers working to the tune of a lively piece. Mr. Bailey displays great ingenuity in his animated signs and has no equal on the Coast in this work.

BROWN RECORD CABINET CATALOG

The Globe-Wernicke Co., Cincinnati, O., has recently published a handsome catalog featuring the Brown disc record cabinets which are made in four sizes, and the Globe-Wernicke sec-

Cover of a Globe-Wernicke Catalog

tional cabinets which are manufactured in standard and art mission styles. This catalog is being generally distributed among talking machine dealers, who are using it to excellent advantage in developing disc record cabinet business.

COLUMBIA DEALERS TO MEET

Lambert Friedl, manager of the local wholesale branch of the Columbia Graphophone Co., has announced that the fifth monthly meeting of Columbia dealers in this territory will be held on May 17 in the Myrtle Room of the Waldorf-Astoria Hotel, at 2 p. m. A very interesting program is now being prepared for this meeting.

Arthur Goyet has taken over the music store of H. J. Provost on Main street, Woodland, Cal. He will handle talking machines.

HEINEMAN "OKEH" RECORD NOW READY FOR THE TRADE

Otto Heineman Phonograph Supply Co. Announces Heineman Record—Hill and Dale Cut—Will Be Sold Through Authorized Jobbers—Recording Studio in New York—Factory in Springfield, Mass.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week that the company is now

Otto Heineman

ready to place on the market the Heineman record, which will be known as the "OkeH" record. This name is derived from the original Indian spelling of the term colloquially known as O. K., standing for "all right." This record has been in course of development the past year, and Mr. Heineman has been devoting a considerable part of his time to the perfection of this record, in order that it might be fully commensurate with the prestige and quality of the other Heineman products.

According to present plans the Heineman record will make its formal trade appearance at the National Music Show to be held at the Grand Central Palace from June 1 to June 8, in conjunction with the annual convention of the National Association of Piano Merchants. The Otto Heineman Co. has made arrangements for an extensive exhibit at this show, and the Heineman record will be one of the features of this exhibit, which will appear in Booths 40 and 41.

The Heineman record is a hill and dale cut record, to be played with either a sapphire point or a steel needle. The company is planning to manufacture only ten-inch records at this time, retailing at the uniform price of 75 cents. All of the records will be double-faced, and the library will include popular and standard se-

lections. The first list, ready for distribution to the trade on June 1, will contain about fifty records, and the artists listed in this first supplement include many of the best-known recording artists now before the public.

It is planned to merchandise the Heineman record to the dealers through duly authorized jobbers, and the prominence of the Otto Heineman Co. in the talking machine industry is reflected in the fact that the company has already received numerous requests from all parts of the country for this valuable jobbing franchise. In fact, several appointments have already been made, and will be announced in the very near future.

The recording laboratories for the Heineman record are located in New York, and are under the supervision of Charles L. Hibbard, technical director, and Fred W. Hager, musical director. Both of these men are generally recognized as two of the best-posted members of the technical and musical divisions of talking machine recording, and Mr. Heineman is very pleased to announce their addition to his staff.

This record is manufactured in a large and up-to-date factory at Springfield, Mass., which is now a member of the Heineman group of factories. This manufacturing is under the supervision of Thos. E. Griffen and Charles Kramer, both well known in their fields. Mr. Kramer has personally supervised the construction of several record manufacturing plants and is thoroughly familiar with every phase of this important work.

During the past few weeks visitors to the company's executive offices have had an opportunity of listening to the Heineman record, now christened the "OkeH," and they have all expressed their hearty approval of this record, stating that it possesses musical qualities which

will undoubtedly win instant recognition from talking machine dealers and the music-loving public.

This announcement of the Heineman record marks another stride in the remarkable progress achieved by the Otto Heineman Phonograph Supply Co. during the past two years. From a modest beginning in a small office in New York this company has marched steadily forward, until to-day it is the recognized leader in talking machine motor production, and, in addition to its executive offices in the leading cities, owns and controls factories in Elyria, O., Newark, N. J., Putnam, Conn., and Springfield, Mass.

The original product, the Heineman motor, is now the head of a family of products which includes Heineman motors, tone arms, sound boxes, etc.; Meisselbach motors, tone arms, sound boxes, etc.; Dean steel needles, etc., and finally the Heineman record.

Each one of these products is a leader in its field, and full credit for this wonderful progress in the short period of two years must be given to Otto Heineman, president of the company. Thoroughly familiar with every phase of the talking machine industry, and internationally prominent as an expert on the technical end of the business, Mr. Heineman has worked indefatigably to place his company in the front ranks of the talking machine field. That he has succeeded even beyond his expectations is indicated in the prestige and position that the company now occupies.

DOEHLER EMPLOYEES BUY BONDS

The patriotism of the employes of the Brooklyn plant of the Doehler Die Casting Co. was splendidly manifested by their subscriptions to the extent of \$56,000 to the Third Liberty Loan so successfully launched recently. These men, like millions of others throughout the country, helped in a most emphatic way to put this loan well "over the top."

Style 70—Retail \$10.00

7 IN 1

Seven strong points in our feature is a powerful selling argument.

1. Controlled entirely by gravity. Will not get out of order.
2. Non-abrasive individual record compartments.
3. Records cannot warp, scratch or mar and are kept clean.
4. 10" and 12" records can be filed in any compartment indiscriminately.
5. In beautiful oak and mahogany finish. Polished, waxed and dull finish.
6. Automatic out signal shows "when and where" a record is missing.
7. Filing and finding a pleasure. Get the desired record when it is desired.

COLUMBIA DEALERS: Eject-o-files are built to fit the style 75 and others. Slip them in as they are wanted. Why carry that big stock of 85's, etc., when the Eject-o-file does the trick? "The Eject-o-file is Efficient" and you are in business for dollars and cents.

VOCALION DEALERS: A receptacle for records that can be slipped into your style F.-G.-H.-J.-&K. They are "built to fit." Wonderful convenience and a powerful selling argument. Ask the Salesman.

EDISON DEALERS: Eject-o-files are built to fit the style C-150 and 100. Many dealers are reaping the benefits. Why not you?

"BUILT TO FIT" any machine and a powerful asset for any dealer. Why offer Albums, Envelopes and other antiquated methods of filing to your customer? Eject-o-files are modern and efficient. Prices are phenomenally low.

The "sectional Eject-o-file," an auxiliary cabinet, compact, large capacity. Can be conveniently placed on table, stand, etc., or stands especially adaptable can be had. Beautiful and artistic, mahogany and oak finish, polished, waxed or dull. Each section a complete unit, can be added to, one upon the other, you know, sectional bookcase idea.

REPAIRS

TALKING MACHINE TROUBLES AND
HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines. Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 176 Sixth Avenue, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

KEEPING TRACK OF THE MOTOR

It seems to be the natural and usual thing that a talking machine owner never looks at the motor of his machine until it won't play properly. Then almost without hesitation he calls on the dealer from whom he purchased the instrument and requests that it be repaired at once. The dealer turns the matter over to his repairman and upon his arrival at the scene of the trouble he often finds a broken governor spring—the leather out of the brake—the motor screws loose so that the turntable hits the brake or regulator—or some other little thing wrong that takes about five minutes' actual working time to remedy. The dealer has spent some valuable time—the repairman possibly has spent an hour or so riding to the house to remedy a little fault that the owner could have prevented if he had been given a few helpful words at the time he purchased his machine.

In this time of war when all things call for the conservation of resources, time in particular, why not make it a point to call the buyer's attention to the following important facts:

1. A machine must be oiled at stated times.
2. If used to any great extent make a point of going over the governor spring screws and tightening them up about once every six months—also the motor board screws and nuts.
3. Make a point of taking out the winding key and oiling the threads on the winding shaft and

also oiling the key where it rubs against the escutcheon.

4. Put vaseline on the spiral cuts of the turntable spindle and governor spindle.

5. See that brake leather is properly held in place, and that turntable does not hit or rub against any parts of the motor board attachments.

These little hints, if given to and followed by the machine owner, will save him trouble and expense and will certainly conserve for other purposes, the time of the dealer and repairman.

Proper Pressure of the Needle Point

New York, May 1, 1918.

Editor, Talking Machine World:

Would you kindly advise me regarding the proper pressure of the talking machine needle on the record to secure the best results? I have had a lot of varied opinions on the subject, but nothing authentic, and believe that the pressure of the needle has much to do with the reproducing and wearing qualities of the record.—S. B. B.

ANSWER.—Too much weight or pressure at the needle point will certainly affect the wearing qualities of the record. The correct weight pressure at the needle point for disc records of the lateral cut type is six ounces, and for the Edison record four ounces.

When the Reproducer Goes Bad

Philadelphia, April 29, 1918.

A. H. Dodin, care Talking Machine World:

Some of my customers have complained that after a year or more their machines have lost certain of their tone qualities. I have investigated and everything seems to be all right even to the adjustment of the reproducer. A friend of mine suggested that perhaps the diaphragm has lost its vibratory qualities. Could this be a possible explanation of the trouble, and how can it be remedied?—J. A. C.

ANSWER.—If the diaphragm is made of any composition or material other than mica, it is possible that the trouble will be found in the diaphragm itself. In boxes where mica diaphragms are used it is always found that the

PROOF

Mr. Fred T. Cunningham, Hattiesburg, Miss., said: "I find your products are all you claim for them and that is considerable." Thousands of Dealers and Repairmen are as well satisfied with **LESLEY'S PATCHING VARNISH**, which dries in 10 seconds and enables them to make perfect patches. Scratches, Holes, Broken Veneer and Molding, or any other damage done to varnish, can be repaired successfully with our No. 275 Finishers' Outfit. Price \$3.00 U. S. A., or \$3.30 Canada. Contains enough material for 100 average patches and is sold on a **MONEY BACK GUARANTEE**. If you have this kind of trouble, order today. **LESLEY'S CHEMICAL CO., 350 Virginia Ave., Indianapolis, Ind.**

gaskets and adjustment of the needle arm are the general cause of all troubles. It is understood that the mica is the correct thickness for the diameter of the box, and it is shellacked to the gasket in such a way that its edges do not touch the cap of the box at any point in its circumference.

When Spring Slips While Winding

Harrisburg, Pa., April 26, 1918.

Editor, Talking Machine World:

I have an old style Columbia disc machine with horn, and notice that every once in a while the spring seems to slip and then catch on again while winding. I may wind the machine constantly for several hours without a slip and then suddenly the spring will slip several times in succession. When wound up the machine seems to run without difficulty. Can you tell me what is likely to be the trouble, so that I may have some guide before taking the machine apart?—T. L. B.

ANSWER.—You will find upon examination of the springs that the trouble lies somewhere in the hooking of the spring ends either on the cage or shaft rivets. I have often had cases like this and have found that in many instances the spring would slip off the rivet head and then on the next winding catch and hold firm, only to slip off again when spring had completely unwound.

KOHLER & CAMPBELL SUCCESSFUL

Great Piano Manufacturing Concern Who Made Intensive Study of Retail Phonograph Trade, Has Found Many Dealers Who Can Successfully Handle Pianos in Their Display Rooms

A few months ago Kohler & Campbell, Inc., Fiftieth street and Eleventh avenue, New York, numbered among the most enterprising organizations in the piano industry, started to devote considerable attention to the piano requirements of talking machine dealers.

In connection with their campaign they have been conducting a consistent effort through the advertising columns of The World with the result that they have discovered that talking machine dealers are finding that the handling of pianos in connection with their line of machines and other musical products is proving very successful.

The Kohler & Campbell organization has been built up in such a way that they are in a position to offer not only pianos of an exceptional value, but also a legitimate dealer's service, which helps greatly in the presenting of the product to the public as well as to the closing of sales. The building up of this aid work to the retail trade has been the result, in the phonograph field as well as in the retail piano field, of intensive study of the requirements of the general public and the various retail merchants. In this way the very best methods have been adopted and are at the disposal of all dealers who handle Kohler & Campbell pianos and player-pianos.

The belief, which Kohler & Campbell had, that the greater the harmony between the piano industry and the talking machine industry the more mutual benefits derived, has proved to be a far-sighted reality, and to-day many talking machine dealers are finding it profitable to handle pianos and player-pianos in connection with their regular business.

If you are short of cash capital try investing a few thousand smiles. Many a man has built a business with nothing much but a capital of smiles.

MANY NEW JOBBERS APPOINTED

To Handle the Wall-Kane Steel Needles Reported by President Tauber—Good Reports From Talking Machine Trade in the East

In a chat this week with The World D. Tauber, president of the Progressive Phonographic Supply Co., New York, sole distributor for Wall-Kane steel needles, stated that the company's business during the past six weeks had far exceeded expectations. New jobbers have been appointed in all parts of the country, and these jobbers state that their dealers are well satisfied with the sales possibilities of the Wall-Kane needle.

This needle is being merchandised to the dealers with an absolute guarantee that it will play ten records perfectly, and the company's entire campaign has been based on this important sales argument. The Wall-Kane factory has been considerably enlarged since the first of the year, in order to handle the demand for this needle, and judging from present indications additional factory space will be imperative in the near future, as the dealers throughout the country report a constantly increasing call for the Wall-Kane needle.

Mr. Tauber has been visiting the trade in the East during the past six weeks and states that the dealers are enthusiastic in their praises of the Wall-Kane needle. He has encouraged the dealers to interest their customers in the scientific merits of this needle, and has prepared a simple test, which the dealers are using to excellent advantage, in order to illustrate the distinctive features of the Wall-Kane steel needle.

The more customers of the store a man shakes hands with, the more of them are going to get acquainted with him and come back. The politicians haven't made handshaking the first move in every campaign without having first discovered that it is the very best-known method of making folks feel friendly at first sight.

PATHE RECORD BY ADAMO DIDUR

One of the Features of the Diversified Supplement Issued by This Company for June

The new list of Pathé records for June features an interesting record by Adamo Didur, basso, of the Metropolitan Opera Co., who has achieved signal success in many important roles. This list also includes operatic vocal records by Claudia Muzio and Florencio Constantino, both of whom are well known in musical and operatic circles.

The popular records for the month include two songs by the Farber Girls, co-stars with Al Jolson in his new show at the Winter Garden. There are, of course, the usual number of popular selections by the Peerless Quartet, the Sterling Trio and other well-known artists.

There are also represented on the June list the latest dance records, standard and sacred vocal numbers, and instrumental records, including two records made by the Garde Republicaine Band.

ISSUE SUPPLEMENTARY CATALOG

Wm. Volker & Co., Kansas City, Mo., Pathé distributors, have just issued a spring supplementary catalog, which contains several pages devoted exclusively to Pathé phonographs. This catalog is mailed to more than 10,000 "live" dealers throughout the company's territory, and is therefore a valuable link in the company's Pathé campaign. There are reproduced in the pages of the Pathé section several illustrations of the standard Pathéphone models, together with some of the salient features of the Pathé sales plan. There are three pages featuring Pathé art models, together with photographs of the Wm. Volker & Co.'s wholesale demonstration booths. This section is artistically compiled and cannot fail to impress the dealers favorably, and produce results for the Volker Pathé department.

NEW QUARTERS FOR SONA-TONE CO.

Company Discontinues Retail Branch to Concentrate on Wholesale Business—Many New Agencies Will Soon Be Announced

The executive offices of the Sona-Tone Phonograph Co., Inc., have been moved from 3421 Broadway to 3366 Broadway, New York, corner of 136th street. The company has discontinued its retail branch in order to concentrate upon the development of wholesale trade, and in its new quarters will have plenty of room for the expansion of its business.

In a chat this week with The World L. C. Seiler, manager of the company, stated that the only trouble experienced so far has been the inability to secure sufficient merchandise to handle the requirements of the dealers, but this condition is now showing improvement, and shipments are being made to all parts of the country. Mr. Seiler expects to announce in the near future a long list of agencies that have been established the past few months, and judging from all indications this phonograph is meeting with a ready sale.

GETS AGENCY FOR CHICAGO PRODUCT

Phonograph Clearing House to Represent Automatic Record Container Co. in the East

S. N. Rosenstein, president of the Phonograph Clearing House, New York, stated this week that his company had been appointed Eastern representative for the Automatic Record Container Co., Chicago. This device is meeting with great success in all parts of the country, and will be represented at the National Music Show to be held at the Grand Central Palace next month. Mr. Rosenstein states that he has been closing a very satisfactory business the past few months, and that the various lines he now represents in the East are meeting with a ready sale with leading manufacturers who speak highly of their merits.

Pathé Phonograph \$225
Other Models \$30 to \$225

PHONOGRAPH APPLIANCE CO., 109 West Broadway, NEW YORK

FEDERAL COMMISSION RECOMMENDS FIXED PRICE LAW

Federal Trade Commission Emphasizes the Need of Congressional Action to Deal With the Price-Cutting Evil in View of Recent Decisions—Powers of Commission Curtailed by Present Statutes

WASHINGTON, D. C., May 7.—In a formal public statement published May 4, the Federal Trade Commission announced the policy which must govern the disposition of all cases involving resale price control and the right of refusal to sell. The commission declares itself bound by the recent decision of the United States Supreme Court in the Graphophone Case to forbid producers to indicate prices, to secure agreements from dealers as to prices, or to refuse to sell to or discriminate against price-cutters.

The most important feature of the statement is its final paragraph in which the commission frankly admits its inability under present law, as laid down by the courts, to deal adequately with the price-cutting evil and emphasizes the need of remedial standard price legislation by Congress "in the manner suggested by Mr. Justice Brandeis."

It seems unnecessary, and would obviously be improper at this time, to comment further upon the significance and potentiality of this vital declaration by the governmental agency whose special duty it is to study and pass upon the ethics and public policy of commercial practices.

A complete copy of the commission's statement is as follows:

"For a considerable time there has been a controversy throughout the country over the question of the right of manufacturers, wholesalers, etc., fixing resale prices at which their articles could be sold, and the right to maintain such resale prices has been contended for by them, and the question whether such right exists has been brought before the Federal Trade Commission numerous times.

"Many hearings have been had, many complaints have been made, and much consideration has been given to the subject by that Commission. Many business concerns have been refusing to sell to customers who would not agree to maintain the resale price fixed by the seller.

"The Federal Trade Commission has just disposed of the first of these cases in which com-

plaints have been issued charging violations of law through fixing the resale price of articles, and an order to cease and desist from this practice has just been issued by it in the case of Chester Kent & Co., Inc., of Boston, manufacturers of proprietary medicines.

"Attorneys for the company admitted that in the past the practices complained of had been in use. The order, the first in cases of this character, forbids the company to:

"(a) Indicate to dealers the prices for which its proprietary or patent medicines shall be resold.

"(b) Securing agreements from dealers to adhere to such prices.

"(c) Refusing to sell to dealers who fail to adhere to such prices.

"(d) Refusing to sell to dealers who fail to adhere to such prices upon the same terms as dealers who do so adhere.

"(e) Furnishing any advantage to dealers who adhere to the resale prices, while refusing similar treatment to dealers who do not adhere to the prices.

"This order of the Commission follows the decision of the Supreme Court of the United States in the American Graphophone Co. case lately decided by it.

"Some of the most distinguished lawyers in the United States have appeared before the Commission to argue this question, as well as many of the leading business concerns of the country, some of whom have insisted that the maintenance of resale prices was proper, and others who have contended that it was not. Almost all of the large department stores of the country have been heard in opposition to it.

"After full consideration the Federal Trade Commission has decided to issue complaints against all business concerns who refuse to sell unless the purchaser will agree to maintain a resale price fixed by the seller. The case just decided is the first formal finding by the Commission to that effect.

"When once an article has passed from the

maker to a purchaser, he owns it, and the owner of such article may sell it at any price that he chooses, provided he does not himself sell it at such price as to be below cost, and thus thereby enter into unfair competition with other retailers selling the same article.

"This decision is going to be open to considerable controversy in relation to the subject matter thereof, and the matter will probably have to be settled by an act of Congress in the manner suggested by Mr. Justice Brandeis in his concurring opinion in the Supreme Court of the United States, in the case of the American Graphophone Co. The Stephens Bill which is now in Congress is in relation to that matter, but in the estimation of many business men and others it is thought to be broader than it should be. It may be that resale prices can be so regulated by placing the power somewhere protecting against unfair prices as to make it work equitably, and be a fair method of competition in commerce, but that question will undoubtedly have to be settled by Congressional action."

C. L. STEPHENSON NOW SALES AGENT

The New Jersey Reproducer Co., Newark, N. J., manufacturer of the "Invincible" sound box, has announced the appointment of C. L. Stephenson as general sales agent. Mr. Stephenson has opened New York offices at 1133 Broadway, and is making plans for an aggressive campaign in behalf of the company's products.

C. L. Stephenson has been associated with the talking machine industry for the past two years, and was formerly president of the Wilson-Laird Phonograph Co. He is familiar with the most important details of sound box manufacture and merchandising, and is now making arrangements whereby the users of the "Invincible" products will receive 100 per cent. co-operation and service. Mr. Stephenson is planning to visit the trade in the very near future, in response to many inquiries that have been received from well-known manufacturers regarding the use of the "Invincible" sound box on their machines.

A PROGRESSIVE BELFAST MERCHANT

T. Edens Osborne, the enterprising talking machine merchant of Belfast, Ireland, with his usual keen-sightedness utilized for his publicity in the local papers the article which appeared in *The Talking Machine World* of March 15, referring to a "speaking machine" invented by Mr. Miller, of Lurgan, in 1758. After giving the "meat" of this article Mr. Osborne closes one of his reading announcements as follows:

"One hundred and forty years later, October, 1898, the first type of 'His Master's Voice' gramophone was introduced in Belfast by T. Edens Osborne, of 11 Wellington place, who holds the most extensive stock of gramophones, phonographs and records in Ireland." This is educational publicity of the right kind.

ACTIVE ADVERTISING IN CINCINNATI

Believed That New Campaigns by Dealers Will Bring About Improvement in Conditions—New Machines on the Market—General News

CINCINNATI, O., May 8.—Talking machine merchants are again devoting space towards advertising machines and are giving attention towards pushing records. This let-up in publicity may explain a decline in the retail field of the past month. Jobbers find exceptionally good business in the smaller centers in close reach of rural sections, but not much doing in the big towns.

The John Church Co. last week put its talking machine on the market through the Church-Beinkamp Co., the first lot consisting of two sizes, the smaller one selling for \$85. The feature of the instrument is a tone clarifying chamber, the entire throat of the machine being so shaped as to eliminate any harshness that otherwise might be heard.

W. E. Summers, Washington C. H., Ohio, was a caller at the Phonograph Co. last week, being entertained by Manager Peterson, who reports a slight increase in shipping facilities.

Otto A. Gressing, recently with the Melville Clark Co., has taken charge of the selling department of the Crystola Co., this city. Mr. Gressing is entirely familiar with the machine field, having been connected with the Victor Co. and the Musical Instrument Sales Co. At one time he had charge of the latter's St. Louis branch. He comes here from New York City.

April business with the Cincinnati branch of the Columbia Co. was by far the largest April in the history of this branch. Manager Dawson states that record orders are coming in from the factory more promptly than at any time for several months.

The Cincinnati branch now has three traveling men covering the territory, and shipping requirements have so increased that the local branch finds it necessary to consider the matter of moving to new quarters. They have taken an option on a six-story building on West Fourth street, near Central avenue, and hope in a short time to complete negotiations for leasing the building which will be ample for their requirements. This is a six-story building with more than fifteen thousand square feet of floor space and will be occupied exclusively by the Columbia Co.

Carl Kraner, who recently made his first trip for the Columbia Co., is making a splendid record, and reports that business is showing more than usual activity in the mining sections of West Virginia, surrounding Huntington.

Mr. Spring, of Spring Brothers Co. department store, Eaton, O., was in Cincinnati a few days ago visiting the local branch of the Columbia Co., and while in the city arranged with the company for franchise to handle Columbia goods. Their initial order was considerably above a thousand dollars.

The Walnut Hills Grafonola Shop recently

opened a beautiful Columbia store at 2507 Gilbert avenue, which is one of the best trading points in Cincinnati, as it serves a community of many thousand people. Miss Carrie Althaus, who was for several years assistant manager of the Columbia Co.'s store in Louisville, Ky., is the owner and manager of this enterprise.

H. L. Moorey, one of the traveling auditors from the New York office of the Columbia Co., has been spending the past two or three weeks at the Cincinnati branch going over the accounts.

J. C. Dubriel, who has been spending some time with the Cincinnati branch, has gone to Cleveland as assistant manager of that branch.

C. L. Byars reports a very satisfactory Vocalion business in April at the local Aeolian store. A number of the larger instruments were sold. Mr. Byars says business is not easy to get these strenuous times, but the right kind of salesmanship can get sales over, and it is the hard sales that give the salesman real pleasure after all.

H. L. Lewis, formerly connected with the Edison Shop at Indianapolis, is now enlisted with the Vocalion forces. Mr. Byars has also had the good fortune of acquiring the services of Geo. Kleeman, who was connected for some time with the local Edison Co. These two men have finished their preliminary training and are now taking their regular turns in the trenches.

C. W. Neumeister, local representative of the Otto Heineman Co., is about the happiest man in the talking machine field of the Middle West just now, for he stands to establish a new record in orders this year, thereby bearing out a prediction made earlier in 1918.

"People," he said, "are just mad for needles. This is just one of the big wants that are being supplied in liberal quantities just now. The manufacturers want supplies. Many are turn-

ing out goods to their limit, believing that the field will be unlimited for talking machines before the end of the year. This bears out an assertion that I have made, claiming that 1918 ought to be almost a record-breaker in the retail line. The histories of the allied belligerent countries is identical to what the United States is going through. There was a time when production almost disappeared, which was followed by a demand.

"There are several manufacturers in the Middle West, with good machines, who will be badly disappointed with their results when the books for the year are closed. They do not realize, apparently, that these are abnormal times and have not used methods which should be in use under such conditions. Yes, business is good in the Middle West."

WOMAN MANAGER MAKING GOOD

Miss N. Moody Introduces New Ideas in Retail Department of Philip Werlein, Ltd.

NEW ORLEANS, LA., May 4.—Miss N. Moody, who recently took charge of the Victor retail department of Philip Werlein, Ltd., reports an unusual sale of Victrolas and records for this time of the year. Miss Moody bears the distinction of being the only retail Victor lady manager in a large Southern city, and is fast making a name for herself as being a very successful one. She has installed some very novel selling ideas that are bringing in a large amount of business.

NUMEROUS TALKING MACHINE DISPLAYS AT MUSIC SHOW

Machine, Record and Accessory Manufacturers Planning Elaborate Displays at Big Exposition to Be Held at Grand Central Palace, New York, on June 1 to 8

Within two weeks after this issue of The Talking Machine World is in the hands of its readers, the National Music Show will be in full swing at the Grand Central Palace, New York City, the formal opening taking place on Saturday, June 1, and the show running until the following Saturday, June 8.

The plans for the exhibition are now practically completed, and the exhibit space still available is being contracted for rapidly. There will be approximately fifty exhibitors, representing almost every branch of the music industry, with the talking machine trade particularly well represented, and the exhibits will occupy two floors of the Grand Central Palace.

The show committee, consisting of H. L. Willson, Columbia Graphophone Co.; William Maxwell, Thos. A. Edison, Inc., as well as J. A. LeCato, George W. Gittins and C. C. Conway, the latter three representing the piano and supply trades, have been working hard for several months in co-operation with Charles H. Green, manager of the show, to make the exhibition the largest and most impressive of its kind ever held, and it appears as though their efforts would prove successful.

During the week of the show a number of important trade conventions will be held in New York, several of them right in the Grand Central Palace Building. There will be the annual gathering of the Edison dealers at the Waldorf-Astoria, which it is expected will be attended by over a thousand dealers. There will also be held the annual conventions of the National Piano Manufacturers' Association, the National Association of Piano Merchants, the National Piano Travelers' Association, the National Music Roll Manufacturers' Association, and the Music Industries Chamber of Commerce, bringing hundreds of dealers to the city, and incidentally to the show.

The Grand Central Palace itself is New York's largest exposition building, and the home of the

automobile, flower, motor boat, electric, and other shows of international reputation and importance. The building is located at Forty-sixth street and Lexington avenue, and within easy reach of the various prominent hotels in the city.

Governor Charles S. Whitman, of New York,

The Grand Central Palace, New York, Where the National Music Show Will Be Held

Tone—the vital thing

IF you, as a manufacturer, can talk and prove *tone superiority* in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you *can* talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

Parr Magnetic Reproducer

fitted with the

Vibratone Patented Diaphragm

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most *vital feature*. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallizing, always resilient

VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of mica diaphragms, it overcomes all mica's bad features. Guaranteed uniform in quality, free from bubbles, blisters and waves, the Vibratone Patented Diaphragm is non-porous, non-absorbent.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

PARR MANUFACTURING CORPORATION

1 UNION SQUARE At Fourteenth St. NEW YORK

Take the Parr Magnetic Reproducer—

The most sensitive of reproducers. The permanent magnetic device, an integral part of the reproducer, acts on the stylus box. Its possibilities in giving warmth and delicacy in the tonal reproduction of quiet passages make old-style sound boxes seem obsolete. And in fortissimo passages where ordinary reproducers create unpleasant, music destroying blasts, caused by the needle jumping and losing its grip, the Parr Magnetic Reproducer, with its marvelous flexibility, follows every wave and vibration in the record and takes everything the record holds.

will officiate at the opening of the show, and representatives of the United States Army and Navy will be in attendance. Many prominent men of America's leading industries, recognizing the national scope of the exposition and the work that the music industry is doing in the war, will be present during the week of the show. The exposition will be the most dignified and educational affair of its kind ever housed under one roof.

The increasing importance of the music industry undoubtedly will be felt when the public becomes acquainted with the rapid advances made during the past year in things musical. The various exhibits are bound to create an interest which will work for the benefit of the entire industry as a whole. The show will be a means of cementing co-operation on a broader scale than ever before, and manufacturers, dealers and others will profit through this co-operation. In other words, the show will be a big store window for the industry, in which everything new and novel will be displayed for the public's approval. Those who believed that the music industry was a non-essential one will suddenly realize how important it really is, what it is doing to bring cheer to the boys in our army and navy, what gladness and sunshine has penetrated into saddened homes through the medium of music, and what can be expected of the music industry of the future.

To single out what each exhibitor is to show would prove quite a task, although each one is planning special features of distinct interest to both the trade and the public.

The Pathé Frères Phonograph Co. is to practically transplant its laboratory from Brooklyn

to the Palace, but, of course, it will be in miniature. Phonograph records will be made right in the Palace, and in order to do this it will be necessary to install all the equipment used in the regular laboratory. Each night of the show Pathé artists will be in attendance to register their talents.

Thomas A. Edison, Inc., of Orange, N. J., are to have a section of the show set apart for the Edison Theatre. It will be fully equipped, will seat about 600 persons and will be complete in every way. Artists whose voices have been recorded by Mr. Edison will be in attendance daily and a comparison of their tone quality will be made with that of the New Edison instruments.

The Columbia Graphophone Co., while it has not announced the details of its exhibit, will, nevertheless, have numerous surprises to offer visitors to the show when the time comes, as will the Otto Heineman Phonograph Supply Co., the Cheney Talking Machine Co., the Emerson Phonograph Co., the Automatic Record Container Co. and other concerns.

There will likewise be a distinct patriotic touch given to the show by the announcement that every dollar taken in for admission tickets at the door will be devoted to the purchase of musical instruments, records, etc., for the soldiers and sailors. The show, moreover, has the endorsement of many of the leading members of the trade who believe that just at this time it will prove a powerful factor in impressing upon the public generally the importance of our industry.

Among the concerns who have already taken space at the show are: American Piano Co., American Player Action Co., the Autopiano Co., Auto Pneumatic Action Co., Automatic Record Container Co., Bennett & White, Inc., Brambach Piano Co., Bjur Bros., Inc., Chickering & Sons, Cheney Talking Machine Co., Columbia Graphophone Co., Thomas A. Edison, Inc., Estey Piano Co., Estey Organ Co., the Glidden Varnish Co., Hallet & Davis Piano Co., Hazelton Bros., Inc.,

Otto Heineman Phonograph Supply Co., Wm. Knabe & Co., Kranich & Bach, Kohler & Campbell, Inc., Laffargue Co., Murphy Varnish Co., Paul G. Mehlin & Sons, L. J. Mutty Co., Milton Piano Co., National Lead Co. (Atlantic branch), Operators Piano Co., Pathé Frères Phonograph Co., Ricca & Son, Rythmodik Music Roll Co., Standard Pneumatic Action Co., Pease Piano Co., J. P. Seeburg Piano Co., Staib-Abendschein Co., Steinway & Sons, Soloelle Co., Inc., Q R S Music Roll Co., Weser Bros., Inc., Wilcox & White Co., Melville Clark Piano Co., Emerson Phonograph Co. and Armour & Co.

H. A. YERKES' NEW POST

Becomes Assistant to H. L. Willson, General Manager of the Columbia Graphophone Co.

H. A. Yerkes, one of the most popular members of the Columbia Graphophone Co.'s sales staff, who has been occupying the post of field sales manager since the first of the year, has been appointed assistant to H. L. Willson, vice-president and general manager of the company, and will in the future make his headquarters at the executive offices in the Woolworth Building, New York.

Mr. Yerkes is one of the "veterans" of the talking machine industry, and has been associated with the Columbia Co. for many years. He is thoroughly familiar with every angle of talking machine merchandising, and in the executive posts that he has occupied has achieved signal success.

NOW ANNOUNCE THE REGINAPHONE

Regina Co. Ready to Place Their Latest Talking Machine Product on the Market—New Line Is Produced in Seven Models

The Regina Co. with offices in the Marbridge Building, New York, and a factory in Rahway, N. J., who for the past twenty-five years have been manufacturers of musical instruments and who in more recent years have been actively associated with the talking machine industry, being the manufacturers of the Regina Hexaphone and other talking machine products, now announce the Reginaphone, a talking machine with many exclusive features.

This new line of machines is produced in seven models, five of them of full cabinet size and three table models. All the machines are equipped with a new patent tone arm and sound box, which plays all makes of records with equal facility. Of special note is the fact that the sound box always remains in the same position, the point of needle remaining in the direct center and the vertical and lateral cut changes are made by a quarter revolution of the sound box without changing the angle.

All the larger styles are equipped with a quadruple spring motor, which will play for over thirty minutes, and every model is equipped with a tone modifier. While the larger models are manufactured with an automatic stop there are also start and stop push buttons. They also contain a new style sound chamber which throws the sound upward instead of in the usual forward manner. The cabinets are in both mahogany and oak and are unusually attractive in appearance.

A. J. KENDRICK VISITS SOUTH

A. J. Kendrick, of the phonograph division of the Brunswick-Balke-Collender Co., was recently a visitor in New Orleans, giving his old friends there the pleasure of seeing him once more.

MODEL 100

SONA-TONE

A Phonograph of Distinction with the Tone You Can't Forget

SONA-TONE *Quality* means a resonant, full, liquid tone that comes from an especially designed, all-wood sound chamber—and superior workmanship in material, finish and equipment.

SONA-TONE *Reliability* means simplicity of mechanical construction—ease of operation—and convenience and solidity of working parts.

SONA-TONE *Service* means the immediate ability of the purchaser to play all makes of records—without attachment of any sort—and to play a library of from 250 to 1000 assorted records without further expenditure.

We believe that a Sonatone eliminates—to a greater extent than any other phonograph—the surface noises of the record.

We believe that it has the same quality of resonance as exists in the Stradivarius violin.

From our sales record—previous to advertising—we believe that a SONA-TONE is a superior phonograph for retail merchandising.

ALLIED MUSIC TRADES HOLD GREAT LIBERTY LOAN RALLY

Greatest Demonstration of the Patriotism of the Music Industry Ever Seen Took Place at Liberty Loan Meeting at Carnegie Hall on April 30—Subscriptions Total \$2,200,000—Farrar and Caruso Sing—French and American War Heroes Wildly Applauded—Credit to Committee

Carnegie Hall was filled to capacity, and a little more, and a tremendous crowd estimated at close to 15,000 battled with police reserves to enter the hall after the doors had been closed in order to participate in the Liberty Loan Rally of the Allied Music Trades on Tuesday evening, April 30. It was without question the greatest affair ever held under the auspices of the music industry, and is believed to be the most successful rally held by any industry, or organization, in connection with the Liberty Loan campaign.

It was a wildly enthusiastic crowd that answered the public call of the Allied Music Trades to help Uncle Sam by subscribing for bonds, and there was every reason for the audience to be enthusiastic, for sensation followed sensation. For nearly two hours the audience was almost constantly on its feet as a tribute to the national anthems of one of the allied countries, or in enthusiastic welcome of some unit, military or naval, marching down the center aisle.

Even the most blasé New Yorker might well have fought for the privilege of enjoying a musical treat such as only the industry itself could offer, and it might be said right here that, although men of all divisions of the trade worked hard to make the affair a success, it was the talking machine trade that contributed most to the entertainment by providing the musical features which were a big factor in its success.

Bringing in the Colors

It was just about 8.45 p. m. when the Columbia Band on the stage, under the able directorship of Chas. A. Prince, opened the program with a medley of patriotic American music, bringing the audience to its feet at the end with "The Star Spangled Banner." Hardly had the strains of the national anthem ended when the doors opened and down the center aisle and on to the stage was carried Old Glory under escort of a full company each of sailors and soldiers. After a brief drill, to the accompaniment of much cheering, the fighting men took their places on the stage where they remained for the entire evening.

Geraldine Farrar Sings National Anthems

Geraldine Farrar, the famous opera artist, next created a wave of patriotic emotion in the audience by singing "The Star Spangled Banner" after kissing the emblem. As an encore she sang the "Marseillaise," with a sailor holding over her the Tri-Color of France. Next came a selection from "Madame Butterfly," and as a

finale, "Annie Laurie," all sung to the accompaniment of the Victor Orchestra, under the direction of Joseph A. Pasternack.

Music's Contribution to Patriotism

James M. Beck, the noted publicist, who was scheduled for an address, chose for his subject "Music's Contribution to Patriotism," and in a most interesting way cited many historical instances where music had played a part in matters of world importance. He told how music served to reflect courage, and cited as an example the fact, that as the names of a few survivors of a naval engagement early in the war were flashed on the screen in a small town theatre in England, where the non-appearance of a name meant that some one in the audience had probably lost a loved one, the women arose en-masse to sing "Rule Britannia." He offered as a prophecy that the time will come when the Hymn of France will be sung again in the city of Strassburg. "Let us hope," said he, "that its strains will go down the Unter den Linden in Berlin."

The Edison double male quartet next appeared, and sang several of the most popular of the war songs of the day, including "Long, Long Trail," "Keep the Home Fires Burning," and finally the Liberty Bond song, "What Are You Going to Do to Help the Boys?" with Cesare Sodero as director. For a time the audience refused to let them leave the stage.

French "Blue Devils" Prove Sensation

Next came one of the big sensations of the evening, when the company of French "Blue Devils," the men who at the beginning of the war, nearly four years ago, occupied a section of Alsace-Lorraine, and have not since yielded an inch of the ground thus gained, came swinging down the aisle and on to the stage with their needle-like bayonets gleaming in the light. The men uniformed in dark blue, with tam-o-shanters rakishly perched on one side of their heads, were accorded an uproarious reception, and lined up across the stage, stood at attention while their commander read a message to the American people from General Foch, urging support of the Liberty Loan.

Boys From "Over There" Wildly Received

Although it seemed as though the limit of enthusiasm had been reached in the reception of the "Blue Devils," it was not a marker to the tumult that arose when, unannounced, except by the sudden playing of the band, a dozen of Pershing's own men, three of them members of the old Sixty-ninth Regiment, N. Y. N. G., and now a part of the 165th U. S. Infantry, trooped up to the stage. The United States soldiers, all of whom had seen at least six months of actual fighting, and several of them wearing the Croix de Guerre, had arrived direct from the firing line only a few days before, and were introduced individually to the audience. Sergeant Eugene MacNeff, of the Sixty-ninth, explained modestly how he happened to win the French War Cross, but gave most of the credit to his pal, Corporal Milo Plant, of the Sixty-ninth. The unit to which the men belong made an excursion into the German trenches, but were caught in a barrage, and had to make their way back to their own lines as best they could. It was then learned that eight men were left in No Man's Land wounded or dead, and Sergeant MacNeff and Corporal Plant volunteered to go after them. Seven were brought in success-

HOFFAY TALKING MACHINE CO., Inc.
3 West 29th Street New York City

fully. The eighth man was picked up in a bag next morning and buried. The committee could have started bond subscriptions right then and there wouldn't have been a slacker in the house.

"Fighting Parson" Tells Experiences

Some first-hand information of what the fighting men of the Allies are enduring on the Western Front, of the barbarous fighting methods of the Germans, and their delight in killing deliberately the aged, the women and infants, and the hopes that the world is placing upon America to turn the tide to victory, was furnished in a most graphic manner by the Rev. Dr. Travis, an American of the Canadian forces, and known as the "fighting parson." Dr. Travis made a long address, but every bit of it was interesting. He declared that, although America had done much she had not done enough if victory was to be assured, and recalled the promises that had been made at our entrance into the war regarding the airplanes we were to put over the European lines. "We were under shell fire for four months," he said, "and, by God, we never saw an American airplane, although I had told my comrades to look for the coming of machines bearing the star."

Sergeant Empey Pleads for Support

Sergeant Arthur Guy Empey, the author of "Over the Top," and probably the best known among the fighting men who have returned to relate their experiences, gave one of his characteristic addresses, during the course of which he flayed Americans for their apparent lack of interest in, and support of, the war. He pictured a very dismal future unless America woke up, and incidentally made a strong attack upon pro-Germanism and the activities of German agents in this country, who he said represented a greater menace than the Kaiser's army. He said the man to look out for was not the man who yelled "Hoch the Kaiser" in public, because he was brave but foolish and we knew where he stood. The fellow to guard against was the man with the American flag in his button hole and wearing Liberty Bond and Red Cross buttons, who worked to poison the minds of his neighbors.

For joyous, sparkling, up-to-the-minute music that everybody loves—

Columbia Records on the Columbia Grafonola.

Columbia Graphophone Co.
Woolworth Building, New York

At the conclusion of his address Sergeant Empey asked for bids on a poster in oils rep-

"Victory," by Mrs. Julian T. Mayer

resenting "Victory," draped in an American flag and pleading for Liberty Bonds. The poster was the work of Agnes E. Mayer, and was donated by her to the cause. The bidding quickly jumped to \$160,000, the successful bidder being H. L. Willson, of the Columbia Graphophone Co., who immediately returned the picture for further bids.

The oil painting of "Victory," which was auctioned off for bonds, was the work of Agnes E. Mayer, a well-known portrait artist, with studios in New York, and the wife of Julian T. Mayer, chairman of the Liberty Loan Committee of the Allied Music Trades. Mrs. Mayer donated the picture for Liberty Loan work, and at various rallies it was the means of raising several hundred thousand dollars' worth of bonds.

Caruso Sings Own Composition

One million four hundred thousand dollars was subscribed in about fifteen minutes, when bond selling ceased temporarily to permit of the appearance of Enrico Caruso, the famous tenor, who sang several selections and as a finale rendered his own stirring composition in march time, entitled "Liberty Forever," accompanied by the Victor Orchestra.

\$2,200,000 Subscribed for Bonds

Bond selling was then resumed with a vim, with the result that the total subscriptions for the evening were over \$2,200,000. In other words, the trade went "over the top" with a will.

Sergeant Empey proved an excellent stimulator of interest in bonds, and created some amusement by throwing a German helmet on the stage and permitting all who would subscribe \$1,000 to kick it off. Two young ladies

took a kick at the helmet, one of them Sergeant Empey's sister, who managed to knock over a couple of music stands in the orchestra. Even the soldiers on the platform entered into the spirit of the occasion and subscribed \$6,500.

Rally a Huge Success

The rally was the biggest thing that has ever been attempted in the trade, and the fact that it went over without a flaw, and that the details were carried out like clockwork, is a distinct tribute to those who conceived the idea and had the matter in charge. Anyone who has ever had doubt regarding the possibilities of music in arousing enthusiasm to the highest pitch and in preserving the spirit of civilians and soldiers, could not have left Carnegie Hall without being converted to the cause.

Much credit, too, is due to the members of the various committees in the trade and their assistants for their work in soliciting bond subscriptions in the audience.

The committee in charge of the rally consisted of the following: C. H. Child, Victor

Talking Machine Co., Camden, N. J., chairman.

Talking machines and phonographs: J. Newcomb Blackman, Blackman Talking Machine Co.; George W. Hopkins, Columbia Graphophone Co.; George Babson, Phonograph Corp. of Manhattan; Walter Miller and E. H. Jennings, Thos. A. Edison, Inc.

Pianos: Julian T. Mayer, J. & C. Fischer; Frederick Steinway, Steinway & Sons; Mark Campbell, Brambach Piano Co.; William V. Swords, Aeolian Co.; E. P. Hamilton, Frederick Loeser & Co., and George W. Gittins, Estey Piano Co.

Music publishers: George H. Bliss, Q R S Co.; Isidor Witmark, M. Witmark & Sons; J. M. Prialux, Charles H. Ditson & Co.; Lawrence Ellert, B. F. Wood Co.

Musical instruments and supplies: George H. Hilbert, of Carl Fischer, and A. W. Johnson.

Liberty Loan representatives: M. K. Parker and George P. Learned.

Director of publicity: Henry C. Brown, the Victor Talking Machine Co.

Model "C"

The
HARPONOLA

A Talking Machine of Splendid Performance and within the means of the great American People

A machine that is within the means of the masses means quantity sales and quantity profits for the dealer.

Take on the Harponola line and see for yourself how it sells.

Tone—Marvellously sweet.

Cabinets—Artistic to the highest degree.

Equipment—Most modern and best money can buy. Plays all records.

Send for fully descriptive illustrated catalogue. We will send you cases only or complete out-fitted machines.

EDISON FORCES PARTICIPATE IN LIBERTY LOAN PARADE

The employes of Thomas A. Edison, Inc., helped in a very material way to celebrate the success of West Orange in going "over the top" in the Third Liberty Loan drive. Robert A. Bachman, vice-president and general manager of the storage battery division, was grand mar-

shal, and one of his principal aides was William Maxwell, vice-president and general of the musical phonograph division.

One of the features of the parade was the attractive floats designed and built by Edison employes, a few of which are shown in the illustrations herewith, demonstrating the patriotism of the entire Edison organization in a very practical and forceful manner. The floats attracted much favorable comment for their artistic appearance.

pany, is the originator of this new product which has been named the "Liberty Album." The binding itself attracts attention by the fact that it has a gold center imprint of Uncle Sam surrounded by ships, guns and other war material which will make the world safe for democracy, and is a fitting addition to the company's products at this time. Over fifteen thousand of the "Liberty Albums" were sold on the first day of their release, thus demonstrating that the trade feels the new product will have a favorable reception from the public.

NEW "LIBERTY" RECORD ALBUM

Important Additions to the Line of the Boston Book Co., Bound in Khaki

The Boston Book Co., manufacturers of record albums, have just placed on the market a timely and appropriate record holder. The album is bound in khaki and is very patriotic in appearance. J. M. Alter, president of the com-

WOMEN WORKERS ADORN UDELL FLOAT IN LOAN PARADE

On April 6 a Liberty Loan parade took place in Indianapolis which was unquestionably the biggest and most patriotic parade ever staged in that city. In this parade the Udell Works, well known manufacturers of music roll and talking machine record cabinets, participated with one of their big 3½-ton trucks. This truck was loaded with some of the good looking women that are now so conspicuous around the Udell factory. The sign displayed on the top of the truck was 12 feet long by 3 feet wide. The slogan on the sign brings out the excellent point that the Udell Co. is helping to win the war by employing female labor, thereby releasing men for military service.

The Udell Float in Liberty Loan Parade

SONORA SALES SERVICE

Individual Sales Service for Dealers Introduced by Sonora Phonograph Sales Co., Inc.

The Sonora Phonograph Sales Co., Inc., has introduced a dealer's individual sales service, which is well calculated to produce excellent returns for Sonora dealers. This sales service will be issued each month, and in its present form constitutes one of the most complete and valuable dealer helps that has ever been prepared. A brief summary of this sales service will give some idea of its practicability, although this resumé hardly does justice to the quality and attractiveness of the many helps included in the service.

According to this summary this service will include the following: 1. Answers to questions the dealer wishes to ask about his business. 2. Large window display frame with monthly card change. 3. Small window display frame with card change. 4. Appropriate window display material of a decorative nature. 5. Examples of good form letters. 6. Printed post cards to send to prospects. 7. Leaflets, catalogs and folders to send to prospects. 8. Suggestions on selling. 9. Methods of securing filing and using prospects' names. 10. Ideas as to effective office furniture, files, cabinets, etc. 11. Electrotypes or matrices of several suitable advertisements monthly, and special advertisements made to the dealer's order. 12. A certain amount of stationery free—the rest at cost. 13. Special signs of various kinds. 14. Moving picture slides. 15. Latest advance news of what other dealers are doing throughout the country.

Frank J. Coupe, director of advertising and sales for the Sonora Phonograph Sales Co., is in charge of this very important work, and is being ably assisted by L. C. Lincoln, who is now associated with the Sonora advertising division under Mr. Coupe's direction. Mr. Lincoln is well known in the piano and talking machine fields, having previously been advertising manager of Otto Wissner, Inc., where he was very successful. Sonora dealers throughout the country are enthusiastic regarding the new service, and Mr. Coupe confidently believes that every Sonora representative throughout the country will soon be enrolled for this monthly service.

MANY INTERESTING ARTICLES

To Be Found in the Latest Issue of the Columbia Record—Advertising Plans and Window Displays Used by Local Dealers Featured

Volume 2 of the "Columbia Record" in its new form reached Columbia representatives recently, and this very successful house organ, which is intensely practical in its make-up and arrangements, has won high praise.

There are many interesting articles in this issue, including the result of a tone test down South, where the Columbia Grafonola won first place by a substantial margin, and a timely article featuring the Grafonola military trunk, which was recently introduced. There are several articles on different phases of Columbia advertising, one article emphasizing the big selling idea which is in back of it. A reproduction of a recent window display prepared by the international record department gives representatives who handle foreign language records an opportunity to display these records to excellent advantage.

There are presented various illustrations of the shops of Columbia dealers, each carrying out some special feature worthy of mention. Buffham & Co., of Idaho Falls, Idaho, sent in a very artistic window display that is reproduced, and an artistic window display presented recently by the Rosen Talking Machine Co., of Boston, is also shown. The delivery of a large shipment of Grafonolas to N. E. Everitt, in North Bend, Ore., forms another interesting illustration.

There are reproductions of various newspaper "ads" for Columbia dealers, together with a wealth of incidental items received from all sections of the country that should prove of interest to dealers.

NEW ORLEANS BRANCH DOING WELL

Many New Brunswick Agencies Established in That Section of the Country

NEW ORLEANS, LA., May 4.—The local branch of the Brunswick-Balke-Collender Co. reports a very large sale of Brunswick phonographs and the establishment of many new agencies for that instrument in this territory. Among the new dealers recently recorded are: R. C. Gaddis, Laurel, Miss.; Sharp Furniture Co., Natchez, Miss.; T. M. Bissat, Lafayette, La.; Hyde Drug Co., Poplar, Miss.; Richard Bell Furniture Co., Lake Providence, Miss.; J. McGrath & Sons, Brookhaven, Miss.; J. E. Briggs Jewelry Co., Fayette, Miss.; Picon Drug Co., Eunice, La.; J. J. Hollins Jewelry Co., Jennings, La.; W. Hemingway, Vicksburg, Miss.; Harry Hollins Jewelry Co., Crowley, La., and the Heidelberg Furniture Co., Hattiesburg, Miss.

The fellow who gives as little as he can get by with will generally be forced to get by with very little.

HEINEMAN MOTOR NO. 77 LIKED

Although on the Market But Short Time Has Met With Great Favor

The Otto Heineman Phonograph Supply Co., New York, has been achieving signal success with the Heineman new No. 77 motor, which,

Heineman Motor, New No. 77 Model

although it has been on the market a comparatively short while, has met with the hearty approval and endorsement of talking machine manufacturers throughout the country. This motor embodies many new and exclusive features, some of which are shown in the accompanying illustration. The company's technical engineers spent many months perfecting these new improvements, and the motor is offered to manufacturers with the usual iron-clad Heineman guarantee.

Record Delivery Envelopes
Safe - Swift - Secure

CHANGES IN PORTLAND, ORE., TRADE

Several Managers and Salesmen Make New Connections in That City

PORTLAND, ORE., May 4.—Changes were comparatively few in the various talking machine stores in Portland in April. Dealers are congratulating themselves on the fact that their experienced help has stayed as well as it has in the face of big opportunities opening on every side and the great labor shortage in the Pacific Northwest. There have, however, been changes in virtually every house in Portland.

J. H. Matney has been made manager of the talking machine department in the Meier & Frank Co. store, taking the place of Mrs. M. E. Gibson, who has resigned. Mr. Matney has had a great deal of experience in the talking machine business, having been with the Wiley B. Allen Co. in Portland and with Sherman, Clay & Co. in Spokane, Portland and Seattle. He has recently been at the Graves Music Store here.

Donald Smith, who has been with the Meier & Frank talking machine department, is at present in San Francisco visiting friends.

H. A. Rayner, the well-known and popular manager of the talking machine department of the Eilers Music House, has resigned and accepted a position with the Hopper-Kelly Co. of Tacoma, Wash.

N. Dunphy, for many years a phonograph salesman and recently connected with Bush & Lane Co. here, has resigned on account of ill health and has gone to Los Angeles to recuperate.

Miss Mabel Le Vanway, formerly with the Graves Music store, has been elected treasurer of the Oregon-Eilers Music House.

Portland had a visit late last month from F. B. Travers, manager of the Sonora Co., of San Francisco. Mr. Travers visited the Northwestern cities and is well pleased with the showing made by the Sonora dealers. The Sonora is becoming popular in Portland and the demon-

stration rooms at the Bush & Lane house, which has the exclusive sale of this machine, are always well filled with interested prospects.

Mrs. Thomas Carrick Burke, chairman of the music committee for the Fosdick commission, is asking for Victrola records for the Soldiers' and Sailors' Club of Portland, Ore. A piano and Victrola have been donated by the G. F. Johnson Piano Co., but records are needed.

EDISON HAS SECOND GRANDSON

Thomas A. Edison has a second grandson who was born on April 22. He is John Edison Sloane, son of Mr. and Mrs. John E. Sloane, and was born in the Edison home at Llewellyn Park. When the child was twenty-two hours old Mrs. Edison, his grandmother, purchased a \$100 Liberty Bond for him.

The Fordham Talking Shop of the Bronx was incorporated at Albany recently with a capital stock of \$15,000.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, OF THE TALKING MACHINE WORLD, PUBLISHED MONTHLY AT NEW YORK, N. Y., FOR APRIL, 1918.

STATE OF NEW YORK,
COUNTY OF NEW YORK, ss.

Before me, a Notary Public, in and for the State and county aforesaid, personally appeared August J. Timpe, who, having been duly sworn according to law, deposes and says that he is the Business Manager of The Talking Machine World, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are:
Publisher—Edward Lyman Bill, Inc., 373 Fourth avenue, New York City.
Editor—J. B. Spillane, 373 Fourth avenue, New York City.
Managing Editor—J. B. Spillane, 373 Fourth avenue, New York City.
Associate Editor—J. Raymond Bill, 373 Fourth avenue, New York City.
Business Manager—August J. Timpe, 373 Fourth avenue, New York City.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock): Edward Lyman Bill, Inc., 373 Fourth avenue, New York City; Caroline L. Bill, New Rochelle, N. Y.; J. B. Spillane, 373 Fourth avenue, New York City; J. Raymond Bill, 373 Fourth avenue, New York City; August J. Timpe, 373 Fourth avenue, New York City; B. B. Wilson, 373 Fourth avenue, New York City; Carleton Chace, 373 Fourth avenue, New York City; L. M. Robinson, 373 Fourth avenue, New York City; E. P. Van Harlingen, 209 South State street, Chicago, Ill.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is..... (This information is required from daily publications only.)

AUGUST J. TIMPE,
Business Manager.
Sworn to and subscribed before me this 20th day of March, 1918.

(Seal) EUGENE R. FALCK,
Notary Public, 8.
(My commission expires March 30, 1920.)

Passing of the New Man Power Bill Causes Much Uneasiness in Talking Machine Trade—Expected That the Trade Will Survive Any Upheaval—Women Will Help Solve Labor Problem—The United States Import Embargo—New Editor for "The Voice"—What the Various New Record Lists Have to Offer—Supplying Machines and Records to the Fighting Men—Experimenting With Substitutes for Steel Needles—Records by the Late Lord Roberts—General Trade News of the Month

LONDON, ENGLAND, E. C., April 26.—During the last few months nothing so seriously untoward has happened, as things go these times, to mar the general belief of a steady future of war-time prosperity for the talking machine trade as the passing of the new man-power bill. In common with other trades, it will materially affect the gramophone industry in more ways than one. But only for a time, I think.

Let us examine the situation calmly, in the light of the nation's need. In the latter sense, however much one may feel inclined to deplore the recent reverse to the British arms and its probable result, the potent fact remains that the Allies are as ever determined to brook no thought of defeat. There is some consolation in the fact, too, that history is only repeating itself—that, however we muddle through, we shall eventually get there all the same. The war has become more than ever a national one for us, and I believe the Government is at last alive to its importance. Officialdom no longer holds the enemy as cheaply as the last three and a half years' policy would seem to suggest. The nation has now to get into harness and work and fight as never before. Let the

necessity for that sink into all minds, and we shall the more easily resign ourselves to the drastic action centered in the new bill which provides for the wholesale cancellation of exemptions and the call up of all citizens between the ages of eighteen and fifty.

Now, as to its effect. That there will be a temporary dislocation and upheaval of commercial life there can be little doubt. Deletion has been brought to such a pitch that one is inclined to think trade will suffer more by withdrawal of men from the administrative side than by the calling up of subordinates and general routine workers.

Among the luxury trades to be "combed" is the musical instrument industry, most sections of which are specifically mentioned in the official schedule. Whether this comb is to operate at once or gradually has not been clearly defined, but this much is certain—a strict cancellation of exemptions held by the eighteen to forty-one men of grades one and two if not of grade three. Men of the first category coming within the new age extension limit will doubtless be called up almost immediately; those of category two, gradually, and of the third class not at all unless, of course, conditions develop which may render it necessary.

With the aid of women it is the forty to sixty men who have kept alive the output of records—only just. Indeed, during the height of the season output has fallen short of demand. We start then with a new demand for men that can ill be spared from an already labor-pressed industry. Yet these men are necessary in the national interests, and they must go, however much one regrets the cause which has made it necessary. How to replace them?—that is the

question. On the one hand suitable female labor is growing more scarce each day; on the other hand, the gramophone trade is determined to somehow survive. That it will triumph I have not the slightest doubt. There may be vacant places at the factory benches or the pressing tables for a time. That cannot be avoided. Salvation must come through two sources, the women and time-expired or discharged soldiers. A further demand must be made in the columns of the daily press and employment agencies for women, and if need be the rate of pay for each "accepted" record must be slightly increased. No effort must be spared to bring in as quickly as possible the largest number of women so that when the men have to go they may be semi if not wholly proficient to carry on the good work of providing the nation with a plentiful supply of music. To fill up the gaps I am of opinion that to a great extent reliance will need to be placed upon women rather than ex-soldiers, since, if medically fit, few of the latter can withstand for long a close atmosphere, particularly the heat of a record-pressing room, after their open-air life. Still, there exists a very large reservoir of discharged men from whom to choose a suitable number, and for some time I believe record manufacturers have been taking advantage of this class of labor.

Given a due recognition of the immediate need for persistent effort, there should be no prolonged shortage of factory labor, and in this regard I am much more hopeful of the situation than of the likely effect of the new bill on the executive and administrative side of our industry. The loss of the men upon whom devolves

FROM OUR LONDON HEADQUARTERS—(Continued from page 107)

all the responsibility for the successful conduct and administration of large businesses is regarded in trade circles with something like consternation, though, forsooth, in no spirit of cavil.

Their chief concern is to reconcile the official call with their very natural anxiety for the carrying on of businesses which have been nursed and built up over a period of long years to a state of prosperity. It is rightly said these times that no man is indispensable. True enough though it may be, how is replacement to be effected when all men of the same class have also to direct their services into State channels? That is the problem which time and circumstance alone can solve. Each firm will, of course, make every effort to adjust itself to the situation, and must succeed to an extent, but the measure of their success is obviously dependent upon the chance needs of the military situation. An important man may be called up at any time, subject to a few days' notice. His removal would very likely throw out of gear the whole commercial machinery, other employes being interdependent upon his particular work. It is not altogether a pleasing prospect and one can only trust that in looking upon the extreme side of things the result may not be so disheartening as at present appears.

Among gramophone firms the present is a time of preparation. An ounce of quick decision now is better than a ton of effort a month hence. Never was the old adage "procrastination is the thief of time" more true than it is to-day. We must all buckle to in the knowledge that if the Germans get through our businesses wouldn't be worth a damn.

In the foregoing I have touched upon but one aspect of the new man-power bill, excluding to the last any reference to its likely effect upon record sales. Owing to the general social and commercial upheaval it will entail, talking machine men are of opinion that sales of luxury articles may be adversely affected, for a time at least. Consideration of the position convinces me that there will be no great falling off in the demand for mechanical music; it is too much of a necessity in the national life, these times, and as for soldiers and sailors—to them record music is absolutely essential. If, therefore, a shortage of sales is registered I firmly believe it will be more the result of an output failure rather than anything else. America is out to do her "big" bit; so is Great Britain. We are, in fact, doing it at terrible cost. In the face of that, who shall say that anyone must over-worry as to the preservation of the gramophone industry?

United States Import Restrictions

The Board of Trade are in receipt, through the Foreign Office, of telegraphic information from His Majesty's representative at Washington to the effect that the War Trade Board have issued a list of commodities, licenses for the import of which into the United States will be

granted only under the following conditions:

If the goods are shipped to the United States as return cargo from ports in Europe, and then only when (a) They are shipped from a convenient port, and (b) They are loaded without delay.

The list of restricted imports from all countries specifies musical instruments and parts thereof, while from Europe only phonographs, gramophones, graphophones and parts thereof included.

It is understood that the United States authorities, subject to the foregoing conditions, will grant licenses freely for the import of United Kingdom goods.

Applicants for import licenses will be required to show that the conditions laid down have been complied with. In the case of shipments from Europe on and after April 15, therefore, it will practically be necessary for the applicant for a license to afford proof that shipping space for the goods has been engaged; and such is understood to be the intention of the regulations.

After April 15 United States Consuls will not certify Consular Invoices for goods included in the list unless they are furnished with the number of the import license granted, or other evidence that a license has been issued. Shipping agencies are advised not to accept for shipment consignments of listed articles without similar evidence.

New Editor for "The Voice"

In the current issue of "His Master's Voice" house organ C. F. Higham announces his relinquishment of "The Voice," which he has so interestingly conducted since its inception. The editorship passes to Miss G. Ivy Sanders.

It is interesting to note, by the way, that Mr. Higham was recently admitted to the freedom of the city of London.

The Wireless Voice at Sea

At the Royal Institution lectures Prof. J. Joly recently described a radio-telephone in use by the United States. In certain lighthouses where there was no human being, a phonograph spoke into a receiver, which converted its sounds into ether waves, which in turn were picked up by the ships and again translated into sounds. Thus, on approaching Point Judas, the sailor hears the words "Point Judas" called out again and again. As he nears the dangerous point the wireless voice will notify in a considerably deeper tone: "Keep off; you are getting into danger."

Sound travels under water with such clearness, said Prof. Joly, that a watertight watch which had been lost in the sea and continued to go was recovered by a diver, who traced it by its tick from a considerable distance.

"His Master's Voice" Issue "The Mikado"

It will come as welcome news to the lovers of the gramophone that the Gramophone Co. has prepared a series of twelve-inch double-sided records bearing the entire opera of Gilbert and Sullivan's great favorite. Many records of "The

REX GRAMOPHONE CO.
are making a Specialty of
EXPORT
in
Horn, Hornless & Portable Disc Machines
REX GRAMOPHONE CO. 2 Elizabeth Place
Rivington Street, LONDON, E.C. 2
Cable Address "Lyrecodisc, London" Enquiries Solicited

Mikado" have, of course, been issued from time to time, but this is the first complete set recorded under the direction of the popular D'Oyly Carte Opera Co. The music and song is produced in conformity with this company's high standard of quality, the chief executants having been chosen from such eminent artists as Ernest Pike, John Harrison, Robert Radford, Edna Thornton, Violet Essex, etc. It is altogether an artistic achievement of which everybody concerned may be justly proud, while from a sales point of view it furnishes the dealer with an excellent opportunity for unlimited trade, having regard to the very wide appeal which this opera makes.

"Winners" for Popular Titles

Shorn of all embroidered language one can only describe the current issues of Winner records as representing the utmost possible value in quality of recording as in the class of fare provided. The current program presents a galaxy of good things, there being a well-chosen variety of vocal and instrumental numbers of the popular order by artists of considerable repute, as, for instance—The Two Bobs, Stanley Kirkby, Band of H. M., First Life Guards, De Busse, the Carlton Vocal Trio, the Bijou and the Royal Court Orchestras, Corner House Rag-time Band, etc. A recent issue comprises a double bearing thereon two of the greatest favorites of the day—"When the Bells of Peace Are Ringing" and "Sergeant Daddy, V. C." (No. 3180), by Stanley Kirkby. It is altogether an excellent record, and one which live overseas dealers would do well to order heavily.

Not Quite Up-to-Date

What must be regarded as a tribute to the value of continuous publicity is found in the publication of the Gramophone Co.'s title as the Gramophone Typewriter Co. The artist who drew the cartoon on the front cover of a recent issue of "The Passing Show" will evidently be surprised at the information that this well-known firm dropped out the word typewriter from its title almost a decade ago. He should take an interest in some of the more current "His Master's Voice" advertisements!

Records by the Late Lord Roberts, V. C.

The great field marshal was not the only wideawake man in this country (though there were precious few) to warn us against, and to prepare for, Armageddon, but his efforts and the weight of his reputation created an impression which cut deep into the minds of all thinking men. His advocacy of conscription was fortunately "canned" by the "His Master's Voice"

FROM OUR LONDON HEADQUARTERS—(Continued from page 108)

company on a series of six records. These records find many buyers these days, though in this regard it is seldom one comes across a public reference to them. One would have thought to the contrary. Curious to relate, the first public announcement of these records I have seen for a long time reaches me from the Emerald Isle, of all places! It is in the form of an advertisement by Thos. Edens Osborne, the great Belfast factor, whose temerity would be surprising were it not that he evidently knows his public. That a demand is anticipated is distinctly pleasing, and I hope the results will prove even more so!

Gramophone Outfits for Jack and Tommy

There is no general conspiracy to provide our soldiers and sailors with free gramophones and records, but it is really surprising the several channels which exist for their distribution and collection from a generous public. One of the most popular organizations for this purpose is the Daily Express Cheery Fund, which under the guidance of one named "Orion" dispenses all sorts of games and amusements to the different services. Free "drawings" have been instituted for outfits consisting of a fine Columbia trench gramophone, six double records and a thousand needles. Any soldier or sailor acting for a group of comrades may participate by making application, countersigned by an O. C., to the Daily Express office, London. The "drawings" take place periodically, the outfits being equally divided between the two services. By this scheme about forty free gramophone outfits, value nearly £10 each, have been distributed in a few weeks. The demand is, of course, greater than the supply, which is dependent upon a generous public. Unless more funds are subscribed within the near future there will be a falling off in the number of outfits available for distribution. Here is a chance therefore to supplement Orion's splendid efforts to provide the right kind of amusement for the rest camps behind the line—the line that keeps the enemy from desecrating our Homeland. Who will help? Any reader wishful of so doing either in goods or in hard cash should communicate with Orion at the above address, and receive his grateful acknowledgment. Do it to-day!

The Shortage of Steel—Substitutes for Needles

Owing to the available supplies of steel for all purposes other than war work having been seriously curtailed, recourse has been had to substitutes for the ordinary steel gramophone needle. A measure of success has been achieved by two or three enterprising firms in the direction of resharpening by a special process old or used needles, but this method does not seem to have altogether met what is to-day a difficult problem.

The bamboo or fibre needle is coming into vogue at a greater rate than formerly, though a certain amount of prejudice remains to be overcome before this substitute can be regarded as likely to materially counterbalance the steel needle shortage, owing in part to its soft tone,

and mainly to the initial expense of the repointing equipment. Where volume is the great desideratum, as it is with a large circle of gramophonists, the fibre point makes little or no appeal, and, except of necessity, is scarcely likely to displace the steel needle.

There are a few sapphire points on the market, and a glass one, too, I believe. But what I have seen and heard of these types does not impress me with any favorable leaning towards them. Their reproducing qualities are harsh and strident, to say nothing of the abnormal damage they cause to the record sound walls.

Experiments, I am told, with the ordinary bush thorn, have given delightful results from the viewpoint of tonal quality. But here again the work of their collection and shaping precludes the general use of such, as it is not a commercial proposition by any means.

A more interesting prospect is furnished by the suggestion to utilize the spines from hedgehogs. This suggestion is reported as a "discovery" by an army officer, who has tried the plan with great success. He gives it as his opinion that there is nothing to equal the purity and detail of tone derived from a hedgehog spine, and recommends all gramophonists to try it. A somewhat dangerous piece of advice, I think, though amusing to picture a band of music lovers indulging in the noble sport of hedgehog hunting. I think, after all, 'twere better not to forsake the steel needle!

A Special Sunday at Home Program

Quite a novelty in record lists is announced by the British Zonophone Co. It comprises a program embodying sacred, classical and semi-religious musical items suitable for Sunday rendition for the family circle. The idea has caught on immensely among the wholesale and retail trade, and many a live dealer reports the inauguration of special period sales, coupled with local advertising and attractive window dressing. It is certainly an unique opportunity for a big local sales campaign.

A Gramophone Firm's "Tank" Contribution

As mobile banks, the Tanks have been doing great things around the country. The story of an individual firm's contribution makes interesting reading, as reflecting the determination of the people to see the war through to the bitter end. One week's contribution from Brown Bros., Ltd., and their staff amounted to no less than £8,500, representing a further investment of £5,000 by the firm, and £3,500 by its members' War Saving Association. If every firm did as well as this in the purchase of certificates and bonds when the Tank calls, there will be little need of worrying about the financial part of the war. Many other music trade concerns have also made substantial contributions.

The Adventures of Four "H. M. V." Records

In a letter to the Gramophone Co., Ltd., a captain in the R. E.'s outlines an interesting story of the adventures of four records. He writes: "After doing their bit in the Cambrai

show they had the misfortune to become booty for the Boche, who quite possibly made them serve their turn for him. However, he, too, had to abandon them, evidently in a hurry, as we found them lying out in the open in No Man's Land, where they had lain for a month, exposed to rain and frost, not to speak of barrages, and so forth. We think that after such a dose of the horrors of war the records really play quite well, even on our old war-worn machine."

To say the least, it speaks well for the quality of the "His Master's Voice" record material, that it could withstand so well the elements of weather and warfare to the extent mentioned.

"Yes, Uncle," First on Columbia

Two orchestral records on a special issue of Columbia are the first to be announced of the popular musical play at the Prince's Theatre. One is an orchestral selection giving the eight principal numbers. The record is in two parts, played by the London Revue Orchestra. The other "Yes, Uncle," record is by Jacob's Trocaderoians, and provides an unusually sparkling performance of "Widows Are Wonderful" and "Think of Me," the play's outstanding songs.

A Strong "Double"

In response to a very wide demand, there is announced this month a Columbia record of "Smoke Clouds," the delightful song first introduced by Miss Jennie Benson in "Topsy Turvy" and since the rage of the whole country. It is sung by Basil Lloyd, with 'cello obbligato. On the back it carries a fine recording of "Roses of Picardy."

The End of a Perfect Day

All that was left after a fire at the mess of a Provincial military camp was a copy of the song, "The End of a Perfect Day."

WORLD'S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "Situation" advertisement intended for this Department to occupy a space of four lines, agate measure, and it will be inserted free. Replies will also be forwarded without cost. Additional space will be at the rate of 25c. per line. If bold faced type is desired the cost of same will be 25c. per line.

WANTED—Manager for phonograph department. A man with organizing ability and selling experience (with Edison phonographs) preferred. A good proposition will be offered to the party who can show results. Apply with full particulars, in confidence, to Layton Bros., 550 St. Catherine St., W., Montreal, Canada.

WANTED—A manager for our phonograph department at our Ottawa warerooms. Apply with reference to C. W. Lindsay, Ltd., 512 St. Catherine St., W., Montreal, Canada.

WANTED—A thoroughly experienced man in selling and ordering records; one experienced in Victor and Columbia records preferred; capable to take charge of record department for a leading firm in large Western Coast city. Good permanent proposition to right party. Must be a business producer and know how to handle other record sales people and get results. References required. Address "Box 517," care The Talking Machine World, 373 Fourth Ave., New York.

FOR SALE—Old established Victor agency in Pacific Coast town of 45,000. Reasonable rent and fine location. Also Eastman Kodak agency and only stock of classified sheet music in city. Best of reasons for selling. Address "Box 518," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—High class salesman in our wholesale department to cover Southern States principally. Excellent position for high class salesman. Must be energetic and enjoy a reputation for getting results. Address Crafts-Starr Phonograph Co., 218 North Second St., Richmond, Va.

SALESMEN wanted to sell phonograph dealers nationally advertised very successful phonograph attachment. Will give exclusive rights in territories of six States each or less contributory to Boston, Philadelphia, Pittsburgh, Atlanta, Dallas, Denver, Los Angeles, Seattle, Minneapolis and San Francisco. Liberal commission. Drawing account possible. State age, experience, present employer and expectations. May arrange as side line some territories. Address Jones-Metrola, Inc., 29 West Thirty-fifth St., New York.

LINES WANTED—Wholesale representative with fine warerooms in Republic Building, Chicago, wants agency for medium grade talking machine and also for accessories and articles that go hand in hand with talking machine and piano trade. Address "A. P. 27," care The Talking Machine World, 209 South State St., Chicago, Ill.

EXPERIENCED SALESWOMAN of personality, driving automobile. Will solicit phonograph sales from farmers. Submit offers to "M. A. 4," care The Talking Machine World, 209 South State St., Chicago, Ill.

WANTED in Chicago, experienced packer and repair man on talking machines. Give experience and references. Address Channing L. Sentz, Marquette Building, Chicago, Ill.

POSITION WANTED—Would like position with talking machine manufacturer as laboratory experimental man or charge of construction. Am thirty-five years old with several years' experience in every phase of the art. I also have complete mechanical equipment for experimental work and several valuable inventions which I would gladly turn over along with my services to the right concern. Address "Box 519," care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—Young married man now employed as manager of a wholesale phonograph house wishes to make new connections with some large Chicago manufacturer. Thoroughly capable of assuming management of sales and advertising or handling sales promotion work. Can furnish unquestionable references. Would also consider position as Chicago representative for some outside manufacturer. Address "A. P. 30," care The Talking Machine World, 209 South State St., Chicago, Ill.

WE WANT JOBBERS to represent us and sell our product in Ohio, Wisconsin, Illinois, New York State, Louisiana, Connecticut, Georgia, Minnesota, Montana, New Jersey, Michigan, Texas and Missouri. We manufacture high grade tone arms for Edison disc machines, also high grade reproducers for use on Victor, Columbia, Sonora and Edison disc machines. We have recently enlarged factory space, and can make quick deliveries of large quantities. Write for information, New England Talking Machine Co., 16-18 Beach St., Boston, Mass.

TO THE TRADE—Have just bought 15,000 records. Closing out in hundred lots. Full details will be given upon inquiry. Address Jos. Dumas, 54 West Lake St., Chicago, Ill.

SALESMEN WANTED—Salesmen calling on the music and phonograph trade. We are offering a side-line that will double your income by calling on one or two people in each town. No samples to carry. Article very much in demand. In answering please state territory you are now covering. Address Morton J. Ross Music Co., 54 West Lake St., Chicago, Ill.

POSITION WANTED—Mechanic with fifteen years' experience constructing and repairing phonographs of all makes. With the largest houses in this country; desires to make a change. Capable executive, thoroughly efficient with modern methods. Can furnish best of references. Will go anywhere. Address "Mechanic," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Salesmen, sideline to dealers, filing cabinets for phonograph records, patented, advertised, no samples, sell from photographs; liberal commission. Automatic Container Co., 506 Republic Bldg., Chicago, Ill.

POSITION WANTED—Young man, married, would like to get position anywhere in talking machine line where there is a chance for advancement. City or country. Can be used as all-around man, as I can be a shipping clerk, salesman, repair man, assembler, delivery man; willing to work, not afraid of hard work or long hours. Address "Box 520," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Experienced cabinet factory manager and designer wishes to make a change. Thoroughly familiar with up-to-date methods. Forty years old. Highest reference. Now employed. Address "Box 521," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Mechanic with 15 years' experience constructing and repairing phonographs of all makes, part of years with Victrola line, with one of the largest music houses in this country desires to make a change. Capable executive, thoroughly efficient with modern methods. Can furnish the very best of references. Address "Box 514," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Talking machine salesman, five years' experience. Inside position large city preferred. Familiar with all well known machines. References. Address "A. P. 2," Talking Machine World, 209 So. State St., Chicago, Ill.

SALESMEN WANTED—Calling on music and furniture trades to sell popular line of records and talking machines. Address "A. P. 7," The Talking Machine World, 209 So. State St., Chicago, Ill.

WANTED—Position as salesman or department manager by A-1 Victor man, 26, married. At present in charge of talking machine department of large Western music house. Six years' experience in Victrola business, doing buying, newspaper advertising, window trimming. Can furnish the references you want. Prefer town west of Chicago of not less than 25,000. Address "W. N.," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Thoroughly experienced Phonograph and Record salesman for either road or managing establishment, can vouch for seventy-five thousand dollars gross business per annum, now with leading company, highest grade credentials. Address G. H. Coryell, Saratoga Hotel, Chicago, Ill.

CASH

Paid for list of names of phonograph owners, any and all makes; all names and addresses must be guaranteed as machine owners, Victor, Columbia, Edison Disc, etc. If you have a mailing list quote us your price.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., May 8.—AUTOMATIC RECORD REPEATING MEANS FOR PHONOGRAPHS AND THE LIKE.—Richard James Prettie, Jamaica, N. Y., assignor to the Aeolian Co., New York. Patent No. 1,255,117.

The present invention relates to automatic record-repeating means for phonographs and the like, the features and advantages of which will be apparent to those skilled in the art from the following description in connection with the drawings.

In the latter, Figure 1 is a plan view of a phonograph comprising one embodiment of the record-repeating means, said figure showing the parts in set position with the record playing; Fig. 2 is a similar view except that the parts are shown in tripped position with the needle and sound box lifted off the record and in the act of being carried back by the conveyer to be replaced on the record at its starting point; this figure further illustrates a change in the adjustment of the device to make it do this for a smaller record, e. g., a ten-inch record, whereas Fig. 1 shows the adjustment for a twelve-inch record. Fig. 3 is a plan view, on an enlarged scale, of the mechanism underlying the turntable; Fig. 4 is a vertical section partly in elevation on the line 4—4 in Fig. 3 looking in the direction of the arrows; Fig. 5 is a similar view on the line 5—5 in said Fig. 3; Fig. 6 is an underneath fragmentary view of the turntable on a larger scale to illustrate the movable dog carried thereby; Fig. 7 is a vertical section partly in elevation on the line 7—7 in Fig. 6 looking in the direction of the arrows; and Fig.

8 is an enlarged detail of Fig. 1, the switch member being shown adjusted as for a ten-inch record, Fig. 9 is an enlarged sectional view on the line 9—9 in Fig. 2, looking in the direction of the arrows, and Fig. 10 is a vertical section on line 10—10 in Fig. 3.

SOUND CONTROL MECHANISM.—Nicolas Kolby, Chicago, Ill. Patent No. 1,256,025.

This invention relates to improvements in volume controlling apparatus for sound reproducing machines. An important object of the invention is to provide apparatus of the above mentioned character, which is attractive in appearance, highly efficient in operation, and convenient to actuate.

Figure 1 is a side elevation of apparatus embodying the invention. Fig. 2 is a detail transverse section through the lower track for the panel curtain. Fig. 3 is an enlarged horizontal

sectional view through a portion of the panel curtain, Fig. 4 is a horizontal sectional view taken on line 4—4 of Fig. 1, and Fig. 5 is a transverse sectional view taken on line 5—5 of Fig. 4.

NEEDLE SHARPENER.—Harry L. Notter, Chicago, Ill. Patent No. 1,256,034.

This invention has for its object to provide a device for sharpening needles, and which is particularly adapted for sharpening needles of metal or other material used on talking machines.

The invention has for its main object to provide a needle-sharpening attachment for sound-reproducing instruments constructed and arranged with relation to the sound box thereof, and the horn carrying such sound box so that when it is desired to sharpen a needle engaged with the sound box the latter may be swung on the pivot of the horn so that the needle enters the sharpening means and is held firmly in position with relation to the sharpening element, and may then be sharpened and returned to normal position for playing further talking machine records.

The invention has for its further object to provide a small, simple and efficient device of the character set forth which may be easily attached to the casing of a sound-reproducing instrument in position for ready operation to re-sharpen needles used thereon.

Figure 1 is a perspective view of a needle-sharpening device constructed in accordance with the invention. Fig. 2 is a top plan view

of the same. Fig. 3 is a vertical longitudinal section of the same on the line 3—3 of Fig. 2. Fig. 4 is a fragmentary detail section on the line 4—4 of Fig. 3. Fig. 5 is a fragmentary view in side elevation partly in section showing a portion of the casing of a sound-reproducing instrument equipped with a needle-sharpening device constructed in accordance with the invention. Fig. 6 is a top plan view of the same.

PHONOGRAPH ATTACHMENT.—Robert L. Baker, Aurora, N. Y., assignor of one-half to Henry Morgan, same place. Patent No. 1,256,099.

This invention relates to improvements in phonograph attachments and particularly to devices for cleaning a record in advance of the needle so as to remove particles of dirt and dust therefrom.

Devices have been provided for the same purpose as this invention but by reason of the particular construction of this device and by reason of the specific way in which it is mounted upon the native parts of the talking machine, advantages are secured that are not attained by the previous devices. One disadvantage of such devices already produced is that they are attached to the shell of the sound box and since they include spring elements, they present readily vibrated bodies which are in position to receive their vibrations from the diaphragm of the sound box through the shell of the sound box and when the phonograph is in operation there is a tendency for such devices to vibrate with a singing sound and interfere with the clear tones of the instrument. In the construction the device is mounted upon the stem of the needle post and moves therewith as the needle post is moved with the needle. The needle post, of course, has a positive movement with the needle and not a vibration such as is imparted to the diaphragm and thus the tendency of the

metal portions of this device to vibrate is prevented.

One object of the invention is to provide a device of this character which is resilient in its nature so as to readily accommodate itself to varying conditions, due to the use of longer or shorter needles.

Another and primary object of the present invention is to provide a cleaning brush which may be mounted upon the stem of the needle post of a sound box and which will lie with its brush portion transversely of the line of movement of the record so that with the lateral movement of the needle as it engages the sides of the record groove, the brush will also move laterally and as a result of this movement will

more thoroughly clean the record groove.

Another object is to provide a structure in which, while the brush portion is movable vertically with respect to the needle and is held against the record by spring action, there will be resistance to lateral movement of the brush with respect to the needle so that the brush will move with the needle positively as stated above.

Another object is to provide a device of this character in which the cleaning element or brush can be removed when worn out and a new one placed therein, without the necessity for removing the device from the phonograph.

In the drawing: Figure 1 is an enlarged elevation of the invention applied to the needle clamp of a phonograph sound box; Fig. 2 is a front elevation; Fig. 3 is an enlarged vertical section on the line 3—3 of Fig. 2; Fig. 4 is an enlarged section on the line 3—3 of Fig. 1.

TALKING MACHINE TONE ARM.—Arthur R. Schwarzkopf, Muskegon, Mich., assignor to the Brunswick-Balke-Collender Co., Chicago, Ill. Patent No. 1,257,939.

This invention has for its object to provide a universal talking machine tone arm for use with records of both the bottom cut and side cut types and particularly those familiarly known as the Victor, Edison and Pathé records.

A further object of the invention is to dispense with the necessity for detaching any parts of the tone arm when it is desired to play one or the other make of records, but to enable this to be done by simply moving parts into and out of operative position and which can be done easily and quickly by any user without special skill or instruction.

A further object of the invention is to proportion and dispose the parts so that the stylus for each type of record will be held in place in the groove under the proper pressure, thereby preserving the desired tone volume and quality.

Figure 1 is a side elevation showing the invention arranged for playing an Edison record; Fig. 2 is a top plan view of the invention as shown in Fig. 1; Figs. 3 and 4 are sectional

views on the lines 3—3 and 4—4 of Figs. 2 and 3, respectively; Fig. 5 shows the invention arranged to play a Victor record; Fig. 6 shows both sound boxes thrown back in position at rest, and Fig. 7 is a plan view of the invention as shown in Fig. 6.

(Continued on page 112)

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 111)

TALKING MACHINE SOUND BOX.—Thomas F. Jones, Maywood, Ill. Patent No. 1,258,341.

This invention relates to sound boxes of talking machines, and its object is to provide a novel and improved mounting therefor whereby it is free to rotate about its own axis rather than swing bodily about an axis outside of itself, this arrangement resulting in advantages.

Figure 1 is a side elevation of a fragment of the tone arm of a talking machine and the sound

box carried thereby; Fig. 2 is a plan view thereof; Fig. 3 is a section on the line 3—3 of Fig. 2, and Fig. 4 is a section on the line 4—4 of Fig. 1.

SOUND REPRODUCING MACHINE.—Willard E. Cleveland, Rochester, N. Y., assignor to George Clay Cox, same place. Patent No. 1,258,189.

This invention has reference to sound reproducing machines and its purpose is more particularly to provide an apparatus that is readily applicable to and used in conjunction with pianos so that a phonograph mechanism may be used either independently of or in conjunction or harmony with a piano. A more especial purpose of the invention is to afford a novel drive or controlling mechanism that permits ready application of the device to a piano structure. Another object of the improvement resides in the novel construction and relationship of the horn to the record table, so as to create a maximum of sound volume and clearness in a minimum space and with due regard to the simplicity of the construction.

In the drawings: Figure 1 is a front elevation of a piano, with a portion of the case broken away, and showing the application of a preferred form of the invention; Fig. 2 is a horizontal sectional view on the line 2a—2a of Fig. 1; Fig. 3 is a front elevation of the upper part of the piano case, with the record table in playing position; Fig. 4 is a horizontal sectional view showing the position of the record table when out of operation; Fig. 5 is a plan view of the keys and key levers; Fig. 6 is a central vertical sectional view of the record table; Fig. 7 is a plan view of the same partially broken

away; Fig. 8 is a perspective view of the housing and horn for the record table; Fig. 9 is an enlarged detail view showing the hinge connection between the two parts of the record table; Fig. 10 is a sectional view taken through the hinge portion of the table and showing the latter in its folded and inoperative position, and Fig. 11 is a sectional view of the housing and horn for the record table.

TALKING MACHINE.—Henry Lobschutz, New York. Patent No. 1,258,128.

The object of this invention is to provide an improved tone arm for talking machines. More particularly it is one of the objects of the invention to provide a tone arm in which the passages for the sound waves are constructed almost entirely of wood. By using a wooden tone arm, the objectionable metallic, harsh or

scratching sounds accompanying tone reproduction in talking machines may be almost entirely eliminated and only the tones sought to be reproduced are heard. This invention further provides a wooden tone arm of a certain novel interior construction whereby a clearer and more soft tone reproduction is obtained.

Figure 1 is a view, partly in section, of a tone arm and sound box embodying the invention; Fig. 2 is a plan view of the supporting bearing for the tone arm.

ATTACHMENT FOR TALKING MACHINE.—André Junod, New York. Patent No. 1,259,242.

This invention relates to that type of talking machine employing a record carried on the face of a disc which is revolved by a suitable motor, and has for its object to produce a device whereby a sound box or reproducer may be employed for the purpose of reproducing sound from a disc having a sinuous record groove in which the reproducing stylus is moved laterally relatively to the face of the disc, and the same reproducer may be employed to reproduce sound from a disc having a vertically cut record groove in which the stylus is moved in the direction perpendicular to the plane of the disc.

A further object is to produce a device whereby the position of the sound box may be reversed to give access to the needle holder without reversing or in any way altering the position of the tone arm or any part thereof.

A further object is to produce a device in which the sound vibrations set up by the diaphragm will be caused to travel into and through the tone arm without encountering obstructions and without making sharp turns.

In the drawings: Figure 1 is a plan view of the device operating in conjunction with a record disc having a sinuous or lateral cut groove; Fig. 2 is a side elevation of the same; Fig. 3 is a view similar to Fig. 1, but showing the de-

vice engaging a vertical cut record; Fig. 4 is a side elevation of the same; Fig. 5 is an enlarged detail sectional view of a reproducer in position to operate on a sinuous groove record; Fig. 6 is a section on the line 6—6 of Fig. 5; Fig. 7 is a side elevation of the parts shown in Fig. 5; and Fig. 8 is an enlarged side elevation of the device in position to operate on a vertical cut record.

LOCKING DEVICE FOR TALKING MACHINE.—Joseph Wolff, Brooklyn, N. Y., assignor to the Sonora Phonograph Co., New York. Patent No. 1,259,189.

This invention relates to locks and more particularly to a device for securing the repro-

ducer or speaker of a talking machine to the tone arm, and has for its object to produce a device whereby the reproducer will be securely locked to the tone arm, and cannot be removed by an unauthorized person.

In the drawings: Figure 1 is a rear elevation

of a reproducer partly in section, the section being taken on the line 1—1 of Fig. 2; Fig. 2 is a section on the line 2—2 of Fig. 1; Fig. 3 is a plan view of the lock with the thimble in section; Fig. 4 is an elevation of the end of the tone arm; and Fig. 5 is an elevation of the key.

SOUND BOX.—Richard James Prettie, Jamaica, N. Y., assignor to the Aeolian Co., New York. Patent No. 1,263,468.

The present invention relates to improvements in sound boxes and comprises improvements whereby the sound box can be converted to play either lateral or vertical wave records.

In the latter Figure 1 is a face-view of a sound box illustrating one form or embodiment of this improvement shown as if playing a lateral-wave disc record. Fig. 2 is a partial edge view of the sound box in Fig. 1; Fig. 3 is similar

to Fig. 2 except that it shows the device adjusted as if to play a vertical-wave disc record; Fig. 4 is an enlarged vertical section partly in elevation on the line 4—4 in Fig. 2 looking in the direction of the arrows; Fig. 5 is a modification, the view being otherwise similar to Fig. 4; and Fig. 6 is a side view of one of the parts in Fig. 5.

HINGED-COVER SUPPORT.—Charles J. Bousfield, Bay City, Mich., assignor to the Delpheon Co., same place. Patent No. 1,262,167.

This invention relates to hinged cover supports for talking machine cabinets and the like.

One object of the invention is to provide means for holding the cover open through the instrumentality of suitable mechanism controlled by the tension of a spring.

Another object resides in the provision of

means whereby the tension of the spring is exerted only when the cover is in open position.

Figure 1 is a partial sectional side elevation of a talking machine cabinet equipped with the improved cover supporting means, showing the mechanism in two different positions.

Fig. 2 is an enlarged isometric view of the mechanism comprising the supporting means.

IMPROVEMENT IN FOREIGN TRADE

Department of Commerce Reports Substantial Recovery From Recent Decline

WASHINGTON, D. C., May 10.—March imports and exports show a partial recovery from the decline in recent months, according to a statement issued to-day by the Bureau of Foreign and Domestic Commerce.

Exports for March amounted to \$531,000,000, an increase of \$119,000,000 over February. For the nine months ended with March exports were valued at \$4,394,000,000, a decrease from the \$4,637,000,000 recorded for the nine months' period a year ago.

SOLDIERS ATTEST TO POPULARITY OF THE NEW EDISON

The popularity of music, and especially music of the "canned" variety, is shown by the three accompanying photographs, which depict the New Edison Army and Navy model phonograph doing its bit in some of the army camps in the United States. The boys play the phonograph whenever they find any spare time on their hands, and the soldier who sent these pictures wrote that the hardest worker in the entire camp is the New Edison, as it is going practically all of the time, and the more it is played the more the boys seem to enjoy it. All classes of records, from grand opera to the jazziest ragtime, are played and enjoyed by the soldiers,

The New Edison Is Very Much in Evidence in the Army Training Camps and the commanding officers of the various units are unanimous in their praise of the New Edison as a means of keeping up the morale of the soldiers in the training camps.

talking
machines

Published Each Month by Edward Lyman Bill, Inc., at 373 Fourth Ave., New York, June 15, 1918

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly*.

The Highest Class Talking Machine in the World

THE INSTRUMENT OF QUALITY

Sonora

CLEAR AS A BELL

BECAUSE of its magnificent tone which won highest score for quality at the Panama Pacific Exposition, Sonora is of especial interest to those who are accustomed to demand the very best and who can afford to, and who do pay cash for what they want.

There is a great advantage in selling a phonograph for cash instead of tying up your capital with long installment payments. Sonora keeps your bank balance strong, and you don't have to worry how to make ends meet as your business grows, because you are not obliged to meet the unbusiness-like "easy payments" offered by your competitor.

Sonora, because of its many exclusive features sells easily and quickly on sheer merit. It is worth all that is asked for it. It delights the purchaser and makes money for the dealer. Sonora plays all makes of disc records perfectly without extra attachments. Write us regarding the Sonora agency in your territory.

TALKING MACHINE MAN IN FRANCE

E. W. Dahlberg, of Montgomery, Ala., Writes in a Graphic Manner Regarding His Experiences as an American Soldier "Over There"

ATLANTA, GA., June 5.—E. N. Upshaw, secretary of the Elyea-Austell Co., Victor wholesalers of this city, recently received a letter from E. W. Dahlberg of the Dahlberg Talking Machine Co., of Montgomery, Ala., who left his business in the hands of his partner some time ago and enlisted in the United States Marine Corps. Mr. Dahlberg, who has been in France for some time, took occasion to remark upon the presence of "His Master's Voice" trade-mark in that country. In fact, it is about as well known in that country as it is in the United States. In this letter, which was delayed in transit, he says:

"It's near 'taps' now, and someone just told me to-day was Easter. How unlike a year ago. But, you know, in a headquarters office in the American forces yesterdays are the same as to-days, and all to-morrows are the same. We seldom know that Sunday has come, unless someone reminds us. That is, unless one is of Catholic religion; if he is, he goes to church. There are some wonderful cathedrals here. I wish I had the nerve to enter during 'session' and see them inside. The two largest down town have quite historic values. I haven't seen a church of 'my kind' since I have been here. Ninety per cent. of the people seem to be Catholics.

"Your friend, Mr. Edmond Clement, is singing in town. He has quite a wonderful voice. Reminds me quite a lot of our own John. Recently I have heard Manon, Cavalleria and Pagliacci—all in French. Can you imagine 'Pagliacci,' a cheap Italian tragedy-comedy, translated into French? Gosh, when the nasal hit it, I could hardly recognize it. Baritone only fair. If Alma Gluck has a twin sister, she sang 'Nedda' deliciously.

"'His Master's Voice' appears in great big letters on the main street, in front of a fine, artistic place—having signs of much former luxury. I asked my companion if the people understood the meaning of 'His Master's Voice' (because it's always in English), and she answered that it was a byword, even among the kiddies, and about as well known as in America. They haven't had a cabinet machine in years, and not a new record in several months. Only have a few old horns left. But they have the usual Victor feeling over prospects, etc.

"Say, this is a great town for you and Foster and Jack to visit while your wives stay home.

You know New Orleans, New York? I never thought that any place could make them look like country villages, but this one does. There's more champagne, wine, booze (of all kinds) on one block downtown than in fifty blocks in New Orleans!

"I am several miles out (in the woods) and have a big time getting into town. Hold up trench trains—get cursed in French, but for all that, I make it in due time. The town is as large or larger in peace time than New Orleans, and it's some burg.

"You should hear me speak this lingo. I can do it better than the natives, or rather I guess I do, because when I pronounce a word absolutely according to Hoyle and they don't get it, why, it's just over their heads (!). But, at that, we get by—mostly with the aid of our hands. The sign language, I find, is universal.

"The Big Uncle is taking care of us 'over here' better than back in God's country—I mean with reference to equipment, shelter, clothes, food, etc.—and we very genuinely appreciate you people's efforts and sacrifices in our behalf."

MUSIC FOR SUBWAY WORKERS

Lively Strains Keep Track Repair Crew Going at Lively Pace Throughout the Night

Both plain and fancy labor is getting so scarce that special inducements are being offered by the big corporations. In the hope of keeping a track repair crew interested in its work and entertained, a large talking machine is kept playing lively reels and jigs in the subway, just south of the Ninety-sixth street station, where the men are working at nights.

"We've had the talking machine playing for the men all night," said the foreman, "and they are doing good work. When they slacken up a bit the record is played faster and they get in the habit of keeping step with the music."

Just at that minute a particularly lively jig was being played, and the subway laborers had to step so lively that they got their feet all tied up in the rails. Straightening them out caused a grievous loss of time and then the talking machine was slowed down to a dog trot.

NEW INCORPORATION

The Farron S. Betts Co., of Brooklyn, N. Y., was incorporated recently for the purpose of manufacturing albums and cabinets for talking machine records. The capitalization of the concern is \$300,000, the incorporators being F. S. Betts, J. W. Murphy and J. S. Keith.

ALMA GLUCK AND THE RED CROSS

Noted Artist Asked Everyone Who Enjoys Her Victor Records to Subscribe \$1 to the Recent Red Cross Drive—Results Are Excellent

Alma Gluck, noted singer and Victor record artist, hit upon an unique plan for aiding the American Red Cross during its recent drive for \$100,000,000. Mme. Gluck, who has given her time and services in many ways for entertaining the soldiers at the camps, and in helping to provide for their comfort, came forth with the suggestion that everyone who had heard her voice through the medium of Victor records should contribute at least \$1 to the Red Cross for the special Alma Gluck "Love Fund," in care of that organization. It is said that close to one million of Mme. Gluck's records are sold each year, which led her to hope for big returns.

In talking of her plan Mme. Gluck said:

"It occurred to me that of all persons likely to be moved into generous assistance of the Red Cross in its humanitarian work in the midst of this terrible war, the people who love music, the men and women and children of tender hearts that thrill with joy or sorrow or sympathy when they listen to simple songs, are those naturally most likely to respond here. I recalled the many notes of sweet and tender sentiment that had come to me from my own big musical family in this connection, and I made up my mind that, if it were possible, I should mobilize all of them—all to whom my voice reached and who might care in some sweet way to repay me for any pleasure it gave them—into forming a sort of Alma Gluck army for the Red Cross. If thereafter the plan is extended by other singers to their circle of song-lovers in turn, I shall be most happy indeed."

The suggestion was certainly a happy one, for no sooner was the plea sent out than money came pouring in from admirers of Alma Gluck in New York, from young girls who live way out in little towns in the West, who love to hear Alma Gluck sing "Little Grey Home in the West," and checks came in from the South, where her "Carry Me Back to Ole Virginny" has won its way into their hearts—in fact, Alma Gluck must have friends galore, for money in abundance came in to the Red Cross as a result of this appeal.

Besides collecting thousands of dollars through the "Love Fund" Mme. Gluck also donated \$25,000 personally to the Red Cross, and auctioned \$10,000 worth of tickets for the Josef Hofmann recital at Carnegie Hall. On the opening day of the Red Cross campaign she collected \$15,000. She said that she would endeavor to send each one of those who contributed to the "Red Cross Love Fund" an autograph photograph as an acknowledgment of their kindness.

DOEHLER CO. EXPANSION

Additional Buildings May Soon Become a Necessity to Meet Business Needs

The department of the Doehler Die-Casting Co.'s Brooklyn plant devoted to the die-casting of phonograph parts reports great activity. The general business executed by this concern has reached such proportions that additional building operations are already rumored. It is less than a year since the great modern concrete building, now used as the main building was added to their group of buildings.

The General Recording Co., Manhattan, was incorporated at Albany recently with capital of \$20,000, for the purpose of manufacturing records. Those interested are: J. C. Jackson, F. W. Weeks, and H. Hemming, 1476 Broadway.

Value of Stick-to-it-iveness to Talking Machine Salesmen

Pretty nearly every good prospect for a talking machine buys one sooner or later. The reason so many of them do not buy from the dealer who first discovers they are prospects is not so much that that dealer's line is not satisfactory as that the dealer does not stick to the prospect long enough.

We find a man who is talking of buying. We present our proposition to him. He is non-committal and we accomplish nothing the first time. We see him again after a few days and he is less encouraging than before. We grow discouraged. Then the third time we see him he says he is not going to do anything at present.

We think that he has put off buying when all that has happened is that we have not got him interested in our proposition and he doesn't want to encourage us to keep coming. At all

events, he does not prove responsive and we have other prospects demanding attention and we become interested in them and forget about this one until the first thing we know we hear he has bought elsewhere.

The only trouble was that we did not stick to him, studying his case and trying to see the proposition from his point of view, seeking to discover just what he wanted and what we had that would fill the bill. It may be that the reason we did not get the order was that we did not keep going until we happened to catch the prospect in the right frame of mind. We may have simply developed him to a point where another dealer found him all ready to sign up for almost anything with a case and a sound box. Let's stick and study in every instance until the prospect absolutely refuses our proposition.

Why the Persistently Dissatisfied Man Is a Real Menace to a Sales Organization

Look out for the disturber in the sales organization, the fellow who is never satisfied, who declares that everything about the store is operated on the wrong basis, who maintains that he never gets a square deal and never loses an opportunity for wailing to his fellow employes. Such a man can do a surprising amount of injury in any organization, unless he is checked without delay.

There are times when a most competent salesman feels that he has considerable kick against the way he has been treated or is being treated by the house he is working for. If the manager is wise he will endeavor to find out if there is any basis for the complaint or dissatisfaction and seek to adjust it. If the salesman has a real grievance, and ponders over it, it interferes materially with his efficiency, and if he airs it, it starts the rest of the staff to wondering whether or not they are getting everything they should. Adjust any warranted grievance without delay. Either give the salesman what is coming to him, if it is right, or explain to him where he is in error, if such should be the case.

The thorn in the side of the average manager who wants to treat his men fairly and keep them happy is the fellow who is continually oppressed by those employing him or associated with him—that is, to hear him tell it. He is just a disturber, without any definite aim other than to appear cynical, and at the same time downtrodden. He gets the ear of the young salesman who is perfectly happy over a recent increase in commission or salary, explains to him that he is getting an unfair proportion of the money he is making for the house, is worth more money for the work he is doing, and generally has not much to be thankful for beyond the fact that he happens to be living.

The younger salesman is more than likely to be impressed and influenced by the talk, to a certain degree at least, and instead of working at full speed for the generous reward he feels will be his, is inclined to lay down and endeavor to give to his house only that amount of effort which his colleague declares he is being paid for.

The chronic disturber is the I. W. W. of the

business organization, and should be pulled up with a jerk. If he has a legitimate complaint, give it attention. If, after adjustment, he is still complaining, or if he cannot prove any genuine reason for dissatisfaction, then the best thing to do is to ask him to retire from the organization.

No business organization, the majority of whose members are dissatisfied, can work in a way to get the greatest results. The handicap is too great. Instead of entering wholeheartedly into the joy of the work at hand, the salesmen go about with the feeling that there is something wrong with conditions in general which they may or may not be able to fathom, and they are inclined to spend too much time consoling one another over what they consider to be their hard lot.

By endeavoring to satisfy those that are willing to be satisfied, and putting the quietus on the chronic growler without hesitation, the manager can do his share at least in endeavoring to preserve an organization that is working hard because it finds pleasure and profit by so doing.

THE HANDLING OF RECORD STOCK

Goodwin's, Ltd., of Montreal, Give Some Pointers on a Very Important Subject That Are of Considerable Interest to the Trade at Large

MONTREAL, QUE., June 3.—A simple, inexpensive and satisfactory method of keeping their stock of Blue Amberol records is thus explained by Goodwin's, Ltd., of Montreal:

"Each compartment is twelve and one-half inches high, four inches deep and two and three-quarter inches wide. This permits the placing of five records in each compartment and each record projects about three-quarters of an inch, so that it can be easily taken out. The most important part of the system is that we do not carry any duplicate numbers in any compartment. Briefly, in one set of racks we carry a complete stock of every record (one of each only), as listed in the numerical catalog. In this way we can tell at a glance the missing records, and the entire stock can be taken in a very short time. Of course, we carry a reserve stock in addition to the above, and each morning a list of records sold the previous day is taken and if in the reserve stock, they are placed in

the regular stock. If not in the reserve stock they are immediately ordered, and in this way our stock is always complete.

"The title and number of each record is kept on separate cards. When records are ordered, the number of records received is placed on each card and those sold during the day are crossed off each morning. When checking up the records sold, if we find a particular record is desired, the card is taken out and the record ordered. The card is kept out until the record is received.

"The importance of our system is that we can tell in five minutes exactly the number of each record out of stock and which it is necessary to order; thus, as previously stated, keeping our stock as complete as possible with practically very little time and effort.

"It would hardly seem necessary for us to add that an orderly and systematically kept record stock helps a lot toward increasing record sales. Many Amberol dealers show this, but for the benefit of those who do not appreciate the fact we might say that the more systematic and complete a dealer keeps his record stock the fewer sales he will lose through being out of stock of certain records. A systematic stock-

keeping method will help the dealer keep his stock complete and a complete stock will help him meet most any requirement of his record customers."

NOW THE C. B. HAYNES CO., INC.

RICHMOND, VA., June 3.—The firm of C. B. Haynes & Co., 200 East Broad street, this city, which has been conducting a wholesale and retail business in Edison products since 1906, have incorporated under the style of the C. B. Haynes Co., Inc., with \$100,000 paid up capital, consisting of the following officials: C. B. Haynes, president; Geo. E. Garnett, vice-president; E. Bowman, secretary and treasurer. Mr. Bowman, a resident of this city, became connected with the firm in September, 1915, and has proved a very valuable asset. Geo. E. Garnett is a traveling representative, and has been connected with the company for the last ten years. C. B. Haynes, who is known as "Pop Haynes," is still at the helm. The firm's business has shown an increase every month this year of from 50 to 75 per cent. over last year—"even if in war times"—and expect it to continue all the year.

NATIONAL PUBLISHING CO., 239 S. American St., PHILADELPHIA, PA.

DEATH OF EVAN WILLIAMS

Singer Long Popular in the Talking Machine Trade and the Musical World Passes Away—Was Striking Figure in Concert and Oratorio

The announcement of the death of Evan Williams, the popular Victor artist, which occurred in Akron, O., after a short illness on May 24, has brought a sense of personal loss into every home where there is a talking machine, for there are few makers of records in the vocal field who enjoy a wider popularity than did this big-hearted and genial personality, who has passed from us.

Evan Williams was probably the most distinguished oratorio tenor and lyric singer of the old school on the concert stage. His concerts were always a delight because of his programming of many English and American ballads, which he sang with rare charm, and better still with an enunciation that was a delight. He made records exclusively for the Victor Co., and it may safely be stated that every one of his records is a splendid example of good singing and perfect record making. For some years his record of Bartlett's "A Dream" was considered to be one of the finest vocal records made. Every expression, every nuance, every feeling was revealed in this record so masterfully that it never failed to move its hearer as the singer would in person.

Another fine example of his oratorio singing in record form was "Sound the Alarm" from "Judas Maccabeas"; but it is unjust to differentiate, for all of Evan Williams' records, those in oratorio or ballad form, are perfect examples of fine singing, and they will remain the greatest monument to his memory—records that will ever be treasured and admired.

Mr. Williams had well been termed a national figure in the musical world. For twenty-seven years he thought and sang and studied for better music throughout the nation. He was intensely American, and naturally very patriotic. He had been doing magnificent work at the camps entertaining the soldiers, and two of his sons are fighting for Uncle Sam at the front.

Evan Williams was born in Mineral Ridge, O., of Welsh parents, on September 7, 1867, and as a young man was employed in the coal mines near his home. His rise from poor cir-

cumstances to a high place in the musical profession was considered one of the most remarkable achievements in American musical history. Mr. Williams made his first concert appearance with a Welsh choir in Galion, O., in 1891, and five years later he distinguished himself in an appearance with noted soloists at the music festival in Worcester, Mass. He appeared in England in 1894, and sang at many important

Evan Williams

concerts in London, returning to this country in 1897. His fame grew rapidly and he was the soloist with leading choral societies both in England and the United States.

Mr. Williams' death occurred in the City Hospital in Akron, O., and was due to blood poisoning.

ATTRACTIVE VICTROLA PRICE CARDS

I. Davega, Jr., Inc., Victor factory distributors, 125 West 125th street, New York, are issuing an attractive line of Victrola price cards for warerooms and window display. These cards come in sets of nine and are printed in three colors, red, white and blue, on a good quality cardboard five and one-quarter by ten and one-half inches. The card also contains a cut of the style and the famous Victor trade-mark. It is announced that these cards may be obtained from any Victor distributor or direct from I. Davega, Jr., Inc. A large demand has already been felt, it is reported, for these cards.

FRAUDULENT DEALERS PROSECUTED

Music Industries Better Business Bureau Proceeds Against Those Who Advertise Talking Machines in Misleading Manner

MILWAUKEE, WIS., June 4.—The very interesting report of the Music Industries Better Business Bureau for the month of April, issued recently, includes briefs of four cases against concerns advertising and selling talking machines on a misleading basis. The action of the bureau brought about several changes for the better in the advertising of a Chicago mail order concern. Another dealer in Milwaukee likewise changed his selling methods when approached by a representative of the bureau. Still another concern in Grand Rapids is being investigated at the present time, while a Milwaukee dealer was fined \$100 and costs for making false statements in his advertising.

The Better Business Bureau asks for the cooperation of all members of the trade interested in an effort to stamp out misleading advertising and the operations of "gyp" dealers or those who sell from homes.

PUBLISHER AIDS RECORD SALES

Sam Fox Publishing Co. Issues Special Advertising Matter Featuring Various of the Company's Songs Appearing in Record Form

The Sam Fox Publishing Co., Cleveland, O., is making a special feature of elaborate folders and slips calling attention to the various numbers published by the company and recorded on Victor records by Victor artists. Special attention has been given to the recording of "The Prayer Perfect," by Alma Gluck, and of "I'm A-longin' Fo' You," by Sophie Braslau. In addition to the folders produced in elaborate form, the Fox Co. has also issued hangers and posters for window and showroom display.

AN IDEA THAT SHOULD BE USED

Piano Dealer Adopts Clever Stunt That Should Appeal to Talking Machine Men

A progressive piano dealer has introduced an idea into his store that might be copied with profit by some talking machine dealers who have demonstrating booths on an upper floor. The piano dealer in question has an electric reproducing piano in a room on the second floor in connection with a lighting fixture so that when he is ready to take a prospect upstairs he switches on the light, the piano starts to play much to the mystification and genuine pleasure of the visitor. It would be a very simple thing for a live talking machine dealer to work the same plan by connecting an electrically-operated machine either in a room in the rear of the store, or on an upper floor, with a lighting socket so that it could be controlled with the regular lighting switch and caused to start when the light was turned on.

NEW YORK, JUNE 15, 1918

THERE is much to disturb one's mental poise these days. The business man is face to face with problems of a most complex and serious nature. There are demands on his purse and on his time that are unprecedented, and it is not at all unnatural that he should be worried. And yet anxiety over business problems is the hardest thing with which a man's physical apparatus can be burdened. It corrodes, wears and wastes the body and the mind. The worrying habit is a mighty harmful one, because things that frighten us most in business rarely ever happen. And this applies just as fully to national affairs in these strenuous war days.

During the month which immediately followed the entrance of the United States into the war the calamity howlers were much in evidence with statements that business was going to smash, and that every industry would be extinct in due time, unless those devoted to the making of munitions.

We are now entering on the second year of the war, and none of these things has happened. The sensational news-monger no longer has an audience; we have oversubscribed to three liberty loans, invested millions in thrift stamps, are building a bridge of ships that will enable our men and supplies to cross the Atlantic, we have hundreds of thousands of men right at the front facing the enemy, and our factories everywhere are running at top speed to furnish needed supplies.

The money borrowed by our Government is wending its way back into the channels of trade, for the working man is getting a large share of it—a larger share than ever he got in history. His pay has been doubled and tripled, and he is enabled to make purchases of essential luxuries, such as talking machines and other musical instruments in keeping with his wish to have that which he has long desired.

The war has demonstrated that music is the great essential, the great consoler, the great up-lifter in the home of the workingman as well as in the home of the rich in these days of stress. It helps to stimulate the optimism of our people as it heartens the youths of the country to don their martial habiliments to fight for right and justice.

There is no room for the pessimist to-day, for the country was never in such a sound condition financially, and never before was there such a wonderful illustration that the heart of the nation has been stirred as never before in history. Men and money are being supplied to meet the nation's requirements

in a manner that typifies that the United States is in the war for keeps, and in the war to win.

Business, of course, will be what we make it. It would not be well to waste our energy and anticipate our strength worrying and arguing over each changing phase which the daily reports from the Western front depict. In fact it is not well to ride the bumps of the war news from day to day. Of course to follow and feel all the glees and glooms that reach us from the front is human and exciting, but it involves much useless wear and tear of the spirit. As James H. Collins recently remarked:

"It is good business, good patriotism and good conservation to forget most of the headlines in the morning paper and concentrate strictly upon the long, hard grind between to-day and the final result. That will save your spirit, buck up your resolution, and enable you to do your utmost in winning the war. Moreover, it will enable you to get out of the war, as a business man and a patriot, the utmost benefit from war adjustments. Those adjustments make for wiser and more economical personal habits, as well as a business grounded in sound economy."

DECISIONS by the Supreme Court, as well as action taken by the Federal Trade Commission, indicate that if retail prices on patented and trade-marked articles are to be maintained at a fixed standard in the future, special legislation to that end will be required. As a matter of fact, it is reported from Washington that even now plans are being made for introducing a new, or amended, Stephens bill into Congress at an early date, the bill to be drafted along lines that will meet the situation as now developed.

In addition to giving the manufacturers of trade-marked goods the right to fix the retail selling price, or the resale price on their goods, it is stated that the revised bill will provide that any method of price fixing must have the approval of the Federal Trade Commission.

Noted jurists with open minds have agreed that the manufacturer of a trade-marked article must have some protection, for he is the special victim of the price cutter. A nameless article advertised at a reduced price may, or may not, be worth anything the advertiser agrees to claim. Trade-marked goods, however, have a fixed value in the public mind, due to advertising, and the trade-marked name used in cut rate advertising naturally proves of distinct advantage to the merchant following such methods.

No less a man than Justice Brandeis of the United States Supreme Court, in a dissenting opinion in a recent price fixing case, gave it as his view that price maintenance should be brought about through legislation, and intimated that the Federal Trade Commission should be given some authority in the matter. Under such auspices there should be no fear of a manufacturer endeavoring to assert his price fixing prerogative in a manner unfair to the retailer, for not only the retailer but the ultimate consumer would have recourse to the Federal Trade Commission in such an event.

The main thing now, however, is for the talking machine trade, and particularly the retail element, to urge and support legislation looking towards price maintenance. The industry has been built on that basis. Standard prices have meant the success of every house in it, particularly the smaller dealers. Future progress will undoubtedly depend upon the fixed price element to a substantial degree. It is a cause worth fighting for.

SUMMER is with us and thousands of families throughout the country are planning for their annual sojourn in the country. The time is not too early for the dealer to decide on ways and means of getting some extra business out of the summer resorts. Every cottager and every vacationist realizes that the summer outing is incomplete without music. Whether for the parlor, or the piazza, for dancing, or other entertainment, the talking machine is always ready to co-operate, and its versatility is such that an orchestra, famous pianist, violinist, or singer, or one of the famous military bands can be provided on demand.

It matters little whether it is war time or not, the fact remains

that the talking machine is indispensable. It is truly an essential to the joy and comfort of those who need consolation, owing to the absence of loved ones, or affording joy and pleasure to those who feel that victory is in the air—that our boys will soon come marching home triumphant.

Where summer cottages are already supplied with talking machines there certainly is a big opportunity for selling records. No matter how you view it there is business to be had, but it must be gone after intelligently and persistently. These are days when it doesn't pay a business man to rest on his laurels; he must be up and doing, bringing his products continually before a new constituency.

In this respect advertising is one of the necessary concomitants to success. The form of this publicity and how it is placed must depend upon the individual dealer, but there is no getting away from the fact that advertising is an insurance against failure. It is true that some succeed without advertising, but it cannot be denied that their successes would have been much larger and more pronounced had they advertised.

THE fact that booze and instalment collections don't mix has been proven by his experience since Detroit went dry, according to Wallace Brown, a well-known talking machine dealer in that city. In other words, the workman who formerly spent several dollars investing in the regular Saturday night "edge," increasing his expenditures as the price of alcoholic refreshment has advanced, now wends his weary way homeward with a full pay envelope and the extra money therein is more than sufficient to meet the payments on a talking machine or piano. Business men in other sections of the country where Prohibition has gone into force report the development of similar conditions. Regardless of personal opinion on the question of Prohibition, from the viewpoint of the man doing an instalment business with the average wage earner, the bone-dry movement is a good thing, even though he is called upon to make good on some of the taxes formerly paid by the liquor interests.

A RECENT ruling by Internal Revenue Commissioner Roper regarding the manner in which returns must be made on instalment transactions during this year, on which an income tax will be due in 1919, is of particular interest to talking machine retailers who do an instalment business.

The Commissioner has ruled that in making out the income tax return next year, on business done during 1918, the dealer who sells on instalments must enter upon his return a percentage of each instalment collection equivalent to the percentage which the gross profit bears to the gross contract price.

To use a purely arbitrary example, the tax will work out in this fashion: A talking machine costing \$100 wholesale is sold on the instalment plan for \$150, the payments running over a

TO OUR SUBSCRIBERS

If your copy of The Talking Machine World does not reach you on publication date, or a few days thereafter, do not assume that it has gone astray. The existing railway congestion has had a serious effect on the handling of mail, particularly second class matter, and brought about unusual delays. Kindly wait a few days longer than usual before writing to us, as the paper will probably arrive safely.

period of fifteen months. The gross profit on this sale is \$50, which is 33⅓% of the gross selling price of \$150. If the talking machine dealer collects twelve payments during 1918 of \$10 each, he must enter 33⅓% of such collections, or \$40 as income, when he makes out his income tax return for 1918. Should the customer suddenly default in his payments after paying twelve instalments, and the talking machine is consequently repossessed in 1919, the dealer must enter \$80 on his return for 1919, payable in 1920, as a result of such repossession. This figure represents the entire amount of money collected on the instrument (\$120) less the \$40 entered in the 1918 report on which the tax will have already been paid.

Dealers should bear in mind that the percentage of profit for the tax returns should be figured on the gross selling price instead of on the cost. In the example quoted above the talking machine dealer really makes a gross profit of 50% (\$50 profit on \$100 cost), but the percentage to be returned on the income tax blank is only 33⅓% (\$50 on \$150 selling price).

The ruling is in no sense complex, but talking machine dealers should keep a careful account of their collections during the year, so that they will have accurate figures on which to base their returns in 1919.

WHAT is to be accepted as a matter for congratulation by the business world generally is the evident tendency at present to place in positions of authority in the various war bodies at Washington business men of recognized standing and ability. In other words, it seems as though the day of the theorist is passing away, and that the practical business man—the man who, while realizing the demands of war, has at the same time a proper conception of means for meeting those demands at a minimum sacrifice on the part of business—is taking his place. It is true that since the outbreak of the war business men have been in the service of the Government, but in a majority of the cases they have been subordinated to Government departments, and their efforts made ineffectual by the yards of peace time red tape. It looks now as though modern efficiency is taking the place of hide-bound precedent in Governmental work, and it is a good sign for the country in general. It means that we will get more action for the money we spend.

IT'S almost impossible to tell today what you will want for Victor Records next week.

There's always a few records constantly needed so why not use P. S. S.—Pearsall Short Service.

Uncle Sam feels that men buy W. S. S. to take care of the odd quarters for big bonds.

Everyone can buy W. S. S. And every dealer can use P. S. S.

So you have a combination—one to make good profits and the best way of investing them. "Shorts" is only a part of

B. R. FORSTER, President

How to Fill the Ranks of the Sales Force, is the Merchants' War Problem :: :: :: By G. D. Crain, Jr.

(Copyright, 1918)

Help continues to be big war problem of the retail merchant.

The recent order of the Provost-General, declaring that men of draft age must "work or fight," and that employment as a salesman in a store does not come within the conception of useful employment, means that many additional men will have to give up positions in retail establishments and seek employment having a more direct application to war activities.

There are obviously two principal sources from which the merchant must draw his help to fill the places of those who are barred by the new regulations.

One of these consists of men under or over the draft age—boys of from eighteen to twenty-one, and men over thirty-one. Apparently the latter class is the more desirable, from the standpoint of experience and judgment, though in most cases higher remuneration would be necessary.

The other class is composed of girls and women. They are already being used in great number in retail sales work, but principally in department stores, specialty stores in most cases preferring men except for selling women's garments, toilet accessories, etc. But they must be trained to handle all classes of retail sales.

Male help, as a general proposition, is extremely scarce. The inroads already made by the war have limited the available supply, even making use of those included in the draft, but enjoying deferred classification as a result of dependents or for some other reason. With the latter eliminated as a result of the newest order, which will doubtless be obeyed by most draft registrants without hesitation or argument, the merchant must look around harder than ever for desirable employes.

In England and other countries where retail salesforces have been decimated as a result of the war, it is noteworthy that about the only men left on the floors of the shops are those too old to go to the front. It must be admitted that there is something incongruous in the sight of a young and sturdy man devoting his efforts to selling in a store while thousands of others are fighting and dying in the great war. That is something that cannot be explained away, for the contrast is evitably felt by the customer. Perhaps the substitution of those who obviously are not fitted for military

duties will have an excellent effect from the standpoint of showing the public that the merchants of the country are not using up manpower that could be more profitably employed, from the standpoint of winning the war.

Salespeople are necessary; there is no gain-saying that; but the immediate problem is to find those who can be utilized in the store organizations without hampering the work of

Merchants Utilizing Older Men or Young Women in the Maintenance of the Sales Force

producing war materials, and without taking those who could do more good for the country if they were in uniform.

Older men, say about forty-five, make excellent workers. There are many such who are available, and for whom the demand is less active than for any other class of men. The merchant may insist that these men are "failures," since one of this type, who has reached middle age without making a definite success and winning permanent and profitable employment, evidently lacks the quality which makes for business advancement. Yet this is not always equivalent to saying that they are not suited for work in stores. In many cases they fit into it splendidly, and not only make efficient clerks, but prove to have the knack of making friends. What they have lacked is initiative or something similar to it, but in a store the work of the salesman is usually "cut out for him," as the saying goes.

One advantage of employing older men is that they are more likely to remain on the job and be satisfied. The younger man, even though somewhat more aggressive and productive, is always looking around for a little better

place. The store which employs him is thus unconsciously competing for his services with every other in the community, and he thinks nothing of quitting one job for another. This is part of the general situation and irresponsibility of young men just starting out in the business world.

The older man, on the other hand, has been buffeted in the sea of experience. He has learned that things are not always what they seem, and that a good position is not to be tossed away lightly. Thus he is in earnest and is determined to hold on to what he has. He obeys willingly, he meets the trade courteously, and is satisfied with his situation. He is the sort of dependable, reliable salesman who can be counted on to be on time and to stay until the store closes.

Comparatively few warrooms are at present made up largely of men of this age and type, but one feels justified in saying that the most recent war development will bring many of them into positions in the shops, taking the place of younger men who are leaving for war work, either in industry or in the ranks of the fighters.

Many recruits will doubtless be obtained also from the ranks of women workers. In spite of the large number who have been impressed for industrial work, and who already have filled into positions vacated by men who have gone to war, there seems to be no trouble about getting others. College girls and other students who realize the importance of productive labor, and of releasing as many men as possible, are taking up work of all kinds, and of course many wives and other relatives of soldiers are doing what they can to support themselves by employment in and out of stores.

The main feature of employing girls and women is training. Few of them are inherently capable of taking a position in a wareroom and handling it to advantage without preliminary coaching and instruction, and the store which has a large number of "new beginners" on its floor should make a point of seeing that they are properly supervised, in order that the sales service may not suffer.

By drawing on these two big sources of supply, the labor situation and the help question in the domain of retailing will be effectively dealt with.

THE BROOKS Automatic Repeating Phonograph

Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—The Phonograph Sensation of the Age

DEALERS:

You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with Instruments retailing for \$300.00 and up.

In tone qualities it is unexcelled by any talking machine on earth! In mechanical equipment and automatic features it is years in advance of its nearest competitor. We have been building talking machines for three years—last year our sales doubled every four months. The BROOKS DEALER has no competition. The machine creates interest and discussion—it is self-advertising. Send for particulars, terms, prices.

BROOKS MANUFACTURING COMPANY
Talking Machine Dept. - SAGINAW, MICH., U. S. A.

View of Controlling Dial

This dial sets, starts and stops the machine. Will play any desired number up to nine or continuous.

Simplest Machine to Operate

Instructions

Set the needle at the inner edge of record cutting and then move pointer to the figure designating the number of times you wish record played.

That is all. You can now forget the machine. When the record has been played as many times as set for, the machine will stop automatically with the tone arm suspended in the air above record.

VALUE OF CO-OPERATIVE PUBLICITY

How the Yahr & Lange Drug Co. Advertised the Eight Dealers Handling the Sonora Line and Themselves in Milwaukee Recently

MILWAUKEE, Wis., June 3.—The Yahr & Lange Drug Co., of this city, distributors in this territory for the products of the Sonora Phonograph Sales Co., recently used in the local newspapers a striking half-page advertisement which won considerable comment in the local trade. This advertisement was the first one in a series of co-operative advertisements, and it served to definitely establish in the minds of the local trade the prestige and importance of the Sonora line.

The center of the space was used by the Yahr & Lange Drug Co., which presented a splendid selling talk relative to the tone qualities of the Sonora phonograph. Surrounding this advertisement were the cards of eight Sonora dealers in this territory, each card presenting a distinctive message, and calling attention to some special merit of the Sonora phonograph. Among the dealers represented in this co-operative advertising were Wm. Klug & Sons, Thien-Pentler Sonora Shop, Alf. W. Fuchs, J. B. Bradford Piano Co., Theo. Mueller, Noll Piano Co., Edward Jensen and the Model Drug Co.

EMERSON CO.'S ANNUAL REPORT

President Emerson Tells of Company's Progress for Year—Substantial Profit Reports

The Emerson Phonograph Co., New York, has just issued its annual report for the year ending April 30, 1918. Considering general manufacturing conditions for the past year, this report is very satisfactory, as it shows a substantial net profit.

In submitting the report to the stockholders, Victor H. Emerson, president of the company, called attention to some of the important factors that entered in the company's manufacturing activities the past year. He commented upon the fact that the retail price of the 7-inch record was advanced from 25 cents to 35 cents, insuring a more satisfactory profit to the company, its jobbers and its dealers. He also stated that the new 65-cent record was meeting with pleasing success, and that plans are now being made for an aggressive campaign during the remainder of the year. Referring to the outlook for 1918, Mr. Emerson said: "The outlook for the coming year is difficult to forecast, as it depends very largely upon the duration of the war, the price of raw material, as well as fuel, labor and transportation conditions."

The Helbig Bros. Piano Co., Washington, D. C., has been incorporated with capital stock of \$40,000 to manufacture and deal in pianos, organs, talking machines and records. The incorporators are Fred W. Helbig, Jr., Harold H. Helbig and Nettie M. Helbig.

TALKING MACHINE EXPORTS

The Figures for March Presented—Exports Show Machines and Records Both Increase

WASHINGTON, D. C., June 4.—In the summary of exports and imports of the commerce of the United States for the month of March, 1918 (the latest period for which it has been compiled), just issued, the following figures appear:

Talking machines to the number of 9,234, valued at \$239,049, were exported in March, 1918, as compared with 7,417 talking machines, valued at \$187,833, sent abroad in the same period of 1917. The total exports of records and supplies for March, 1918, were valued at \$199,903, as compared with \$163,632 in March, 1917. For the nine months' total 69,945 talking machines were exported, valued at \$1,914,730 in March, 1918, and \$1,390,227 in 1917, while records and supplies valued at \$1,475,417 were sent abroad during 1918, as against \$1,130,095 in 1917.

There isn't much hope for the man who gets so peeved that he isn't on speaking terms with his own conscience.

CONCERTS FOR FACTORY WORKERS

Phonograph Co. of Cleveland Adopts Interesting Method for Reaching the Employees of Various Industrial Plants in That City

CLEVELAND, O., June 2.—The Phonograph Co., Edison phonograph wholesaler and dealer in this city, has been conducting a series of factory concerts for the purpose of stimulating business. The concerts are given at the various factories during the noon hour, the first being held at the plant of the Ohio Varnish Co. In almost every case immediate sales of machines and records to employees were noted.

L. N. Bloom, general manager of the Phonograph Co., felt that although the workmen in the various plants, especially those with war contracts, were making more money than they ever made before in their lives, they were kept so busy that they did not have time to investigate the full possibilities of the phonograph as a factor in their homes, and took the opportunity to bring the machines and records to them to simplify the matter of selection. It was also proved that their judgment was right.

Ready-File Company
INDIANAPOLIS

Mr. Edison Dealer,
Anywhere, U. S. A.

Dear Mr. Dealer:-

Lots of Edison dealers are making \$6.00 more on every A100 and C150 sale than you are.

We want to tell you how to do it, but we don't know your name or address.

Drop us a card and find out how to get these extra profits.

Cordially yours,
READY FILE COMPANY.

Our *Forecast* for this Summer

Lucien Muratore
Exclusive Pathé Artist

Pathé Phonograph \$30
Other Models to \$225

ECONOMY is now essential as it never was before. But so, too, is amusement.

The Pathé Dealer is able to supply the amusement that is most economical and can be easily carried to Summer home, hotel, bungalow or camp.

These portable Pathe Phonographs

By far the finest both in appearance and performance at the price.

Hence the Pathé Dealer can safely count on a most profitable summer.

That's our forecast.

This is our advice—if you're not a Pathé Dealer, write us at once about the Pathé Proposition.

No Needles to Change

The Pathé Sapphire Ball takes the place of needles. It need not be changed.

Long Life to Records

The Pathé Sapphire Ball cannot possibly cut, grind, rip or mar the record's surface.

The Pathé Controla

With the Pathé Controla you may increase or decrease the tonal volume of the Pathé Phonograph at will.

Plays all Records

Each Pathé Phonograph plays not only Pathé Records, but all other makes of records, and plays them perfectly.

The Quality Phonograph

Supplying Successfully the Needs of the Buyers of Foreign Records :: :: :: :: By Harry A. Goldsmith

Harry A. Goldsmith, of the Badger Talking Machine Co., Milwaukee, Wis., Victor wholesalers, recently contributed the following interesting article on: "The Buyer of Foreign Records," through the "Voice of the Victor." The article, which is worthy the consideration of every talking machine dealer, reads as follows:

Groping about in darkness seeking musical light the buyer of foreign records offers the average Victor dealer a source of income of considerable proportions. Nor should his business be sought after only for this reason, for the buyer of foreign records knows a goodly number of folks who are very anxious to own talking machines, and he can give you a wealth of prospects who are likely to be very profitable for many years to come.

When you, as a Victor dealer, were asked to interest yourself in educational work—to open an educational department—you looked askance at the proposition. You did not grasp, possibly, just what latent opportunities there were. It is needless to remind you of the tremendous success that has attended this particular feature of the Victor business.

To the live Victor dealer is offered like opportunities in starting a foreign record department. Many dealers, no doubt, have felt they would like to get some of the foreign business, but have been a bit hesitant, fearing the complexities which might arise.

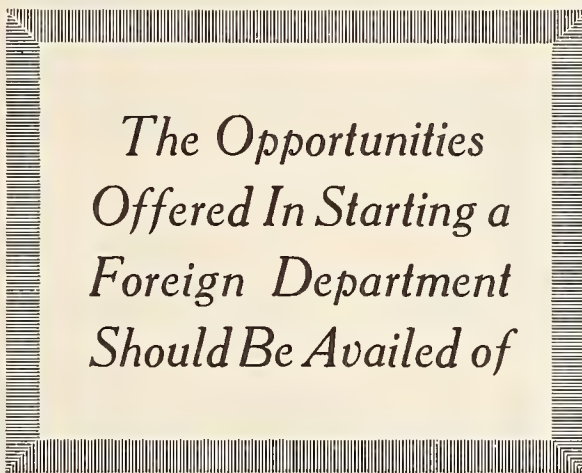

A careful analysis of the subject clarified conditions materially. It is not so hard as it seems. You ask how to proceed? It is really easy if you will but take a little time to work out the details.

Tony Andrianopolis shyly enters your store, hat in hand, and asks if you have some Greek records. Of course you have none, and in the past simply told him so and turned away from him. He slinked out of your store. You soon forgot the incident. Now, had you invited Tony into your office, inquired from him about how many Greeks, for instance, lived in your city, and put it up to him squarely if he thought it would be profitable for you to carry Greek records, you might sit up surprised that you had wasted some wonderful opportunities.

Tony would likely have told you that there were probably a hundred or more Greeks in town, a score or more of whom owned talking machines, and they have been buying records

in large quantities from some dealer in Milwaukee, Chicago or New York. He would add that because of the difficulty in getting records there were at least a dozen or more of his friends who had not bought machines.

You feel satisfied, now, that there is some fine business to be had among the Greeks, but don't know how to stock up with Greek records. Go a bit further. You have discovered that Tony

The Opportunities Offered In Starting a Foreign Department Should Be Availed of

gave you some mighty good advice. Don't let him get away. Just hand him a Greek catalog and ask him to mark in this what records he thinks you ought to carry for a starter. Tony is going to be a little shy here. The moral obligation of stocking you up with merchandise is great, and before he gets through with that catalog he will have made a mental note of every Greek talking machine owner and just about what records each will buy.

Have faith in Tony. Order every single record he tells you to and go him one better. When sending in your order to your jobber tell him to include in this order such Greek records as might have been omitted which he knows are good sellers, and every wholesaler can give you this information at a moment's notice. When you get these Greek records in stock let Tony know. Tony will do the rest.

He will come into your store with one or two friends and ask for Greek records. Now don't make the mistake of just taking a pile of them and passing these out to him. Treat him as you would one of your regular customers. Better still, wait upon the group yourself. Watch the face of each listener light up as they

hear some good old folk song. Maybe, after a half hour's visit they will buy only two records, but you can gamble anything you want that within another day the news will have spread throughout the entire Greek community that you have some Greek records. You can make another mental wager, and win, that several Greeks will buy machines from you within a week after you have put in your stock of Greek records.

What is true of the Greeks of your city is equally true of other nationalities. With only slight modifications you can proceed in a like manner with each and every nationality represented in your community.

Just bear in mind one important factor, and that is, every foreigner is just as hungry for music as are your present regular patrons. The B. of F. R. will prove a more loyal and consistent customer of yours than you ever before had. He will be your booster through thick and thin, and more patient.

There are certain characteristics quite common to each group of B. of F. R. To illustrate, Italians respond quite the quickest to purchases of records from the general catalog, and early buy Red Seal records. The Poles will start out demanding loud records, progressing later to a better class of selections. The Greek, with a love of his old traditions, is a bit harder to get interested in the general list. Because they are neighbors, do not think the Swedish and Norwegian folks will buy the same records. If a Turkish customer happens in and you have nothing to offer him in his language he will be interested in instrumental records listed in the Assyrian and Greek catalogs, and vice versa.

The B. of F. R. will be greatly interested in accordion records if his home was in any European country. The same is true of harmonica records. Band numbers are extremely popular among your foreign friends. The old-fashioned waltzes, polkas and schottische are always desired. It is needless to say that folk songs find a ready sale. Modern English songs rarely find favor when sung in a foreign tongue.

One might continue indefinitely pointing the way to develop foreign record sales, but, after all, the few suggestions given above and a willingness on the part of the Victor dealer to go half way with the B. of F. R. should quickly result in profitable business development.

THE BOSTON BOOK COMPANY ANNOUNCE THEIR NEW LIBERTY RECORD ALBUM

15,000 SOLD THE FIRST DAY

The most timely and appropriate addition to the album field in years.

Beautifully designed, bound in khaki and stamped in gold with a most artistic and patriotic center piece.

CREATING INTEREST IN THE STORE

How the Mason Furniture Co., of Huntsville, Brought Crowds to Their House and Orders for Their Products—Enterprise That Pays

HUNTSVILLE, ALA., June 2.—One of the most progressive of the Columbia dealers in this section of the country is the Mason Furniture Co., of this city, who handles the Columbia line exclusively. The Mason Co. owes much of its success to its unique methods of publicity which attract unusual attention and get excellent results. In connection with the company's annual spring opening held recently, one of the evenings was devoted to the appearance of Mason's Columbia Minstrels. The event was widely advertised, and at the opening hour the store was thronged with people, many standing

Mason Furniture Co.'s Recital Hall

on the street, being unable to get into the store. The balcony at the back of the store had been arranged for the stage, the railing on either side of the stairway had been removed, and curtain, wings, and drop all arranged in place, footlights from an extension cord, all lending to the atmosphere of a real theatre:

The program opened with "America," sung by Louis Graveure, followed by a Columbia minstrel record, a trombone solo, violin solo, quartet numbers, etc. The secret was a Grafonola concealed behind the scenes, but the acting was done by seven of Mr. Mason's employes dressed up as black-face comedians, acting out the records, even to the lip movement. The result was such that some of the audience were extremely hard to convince that a Grafonola entered into the evening's entertainment at all. The audience was very generous with applause, calling several members back again and again, and Mr. Mason found it necessary to give a second performance of his "Famous" minstrel two nights later. The first performance had been

so popular and so much talked about that people came from quite a distance to see it, one party motoring sixteen miles in order to witness the second showing.

Throughout the entire week the store was thronged with the people. The interior had been tastefully decorated for the occasion, and music was furnished by the Grafonola. The Mason Columbia Minstrel has proved so popular that Mr. Mason has received numerous requests to stage this performance in several nearby towns, which he will do, under the auspices of the local schools, charging a small admission, the proceeds of which will go to the school in providing a school Grafonola outfit.

The accompanying photograph gives an idea of the store, and the Grafonola department with its goodly array of soundproof rooms will be seen on the right side.

Mr. Mason carries the complete Columbia record catalog, and does an exceedingly large business, in both Grafonolas and records. This enterprising firm recently received one shipment of over sixty Grafonolas and has met with considerable success in the sale of the higher-priced instruments.

In closing let us state that Huntsville is given a population of 8,000 people, and there is nothing unusual in the surrounding territory to make it more prosperous than other counties.

Unique advertising, an attractive store, courteous and efficient clerks, and last but not least tie ups, and taking advantage of the many helps offered by the Columbia Co., are responsible for their success.

FAIR METHODS IN BUSINESS

Business is more or less selfish. The average man aims to get the most that is possible for his labor without much thought of the other fellow. It is in the line of human nature. But there is a clear line of demarcation between selfishness and reason. Reason demands that selfish interests be at least directed in a manner that will not arouse injurious antagonism. The merchant who employs unfair methods to obtain trade through his unchecked selfishness ignores good reason by inviting dangerous antagonism. Treating competition fairly, treating the public right, is in reality the best method for promoting selfish business interests.

The Linton Co., Philadelphia, Pa., has been incorporated with capital stock of \$25,000 to manufacture musical instruments. The incorporators are William Friehofer and others.

SONORA CO.'S GIFT TO RED CROSS

Contribution of \$1,000 Made to Second War Fund on First Day of Drive Appreciated by Officials of the American Red Cross

As announced in last month's World, May 22 was generally observed by local talking machine dealers as the day on which they donated 10 per cent. of their sales to the Second War Fund of the American Red Cross. Quite a number of the local dealers joined in this plan, but the Sonora Phonograph Sales Co., when advised of this method of donation to the War Fund, decided that instead of contributing 10 per cent. of its retail sales on May 22, it would do its share for the War Fund through its usual channels.

George E. Brightson, president of the company, who has for many years been active in behalf of a number of philanthropic and charitable interests, received recently a letter from Wm. E. Breed, chairman of the American Red Cross War Fund committee of New York, acknowledging the contribution of the Sonora Phonograph Sales Co. This letter reads as follows:

"I cannot let this opportunity go by without officially and personally acknowledging the splendid contribution of \$1,000 made by your corporation to the Second Red Cross War Fund. I trust that you will express to your board of directors the grateful appreciation of the War Fund committee for your generous gift, which is a material help in continuing the work of the Red Cross. Sincerely yours (Signed) Wm. C. Breed, chairman."

Mr. Brightson also received recently a letter of acknowledgment from Vice-President Jones, of the National Park Bank, captain of the bank's Red Cross War Fund team. Mr. Jones acknowledged a contribution of \$1,000 from the Sonora Phonograph Sales Co., expressing his appreciation of the company's liberal donation, which incidentally was given to the bank the first day of the drive.

NEW VICTOR PATRIOTIC RECORD

The Victor Talking Machine Co. have made a special announcement of a new patriotic ten-inch double-faced, Black Label, Victor record, "What Are You Going to Do to Help the Boys?" Chas. Hart and Shannon Four, and "Keep Your Head Down, Fritzie Boy," American Quartet. This record was put out in advance as a special, and will be listed in the regular July supplement.

The Victor Co. further state that there is positively no end to the demand for patriotic music. "What Are You Going to Do to Help the Boys?" was one of the big hits of the Third Liberty Loan drive and is enormously popular.

FOR NATIONAL TRADE-MARK

WASHINGTON, D. C., June 4.—Senator Pomerene, of Ohio, has introduced a bill "to authorize the adoption, registration and protection of a national trade-mark to distinguish merchandise manufactured or produced in the United States of America and used in commerce with foreign nations, or among the several States, or with Indian tribes, and to authorize the Secretary of Commerce to license the use of same, and for other purposes." The bill has been referred to the Senate Committee on Patents. A somewhat similar bill was introduced in the House of Representatives early at the present session of Congress, but up to the present time the committee to which it was referred has not reported it out.

NEW INDIANAPOLIS COLUMBIA CO. WHOLESALE QUARTERS

Located at 209-217 West Washington Street—Increased Business Makes Move Necessary—Geo. Stewart Appointed Fuel Administrator—Cheney Line With Pearson Co.—Interesting News Budget

INDIANAPOLIS, IND., May 31.—The wholesale department of the local branch of the Columbia Co. is moving into large quarters on the second floor of the Kirschbaum Building, 209-217 West Washington street. The retail store in North Pennsylvania street will be conducted as usual, but Ben Brown, manager, will have his office in the wholesale department.

Increased business made it necessary for the Columbia Co. to find suitable quarters for its wholesale department. Up to the present time the company has been handling its machines through a warehouse, but now it will have room enough in its new quarters to handle all incoming and outgoing shipments. Part of the first floor of the building will be used for the shipping department. Mr. Brown is determined to make his new department one of the best distribution places in the Columbia service.

George L. Schuetz, representative of the Columbia Co. in Indiana, says that the country business is keeping ahead of the city business.

H. P. Dahlen, owner of the Talking Machine Shop of Terre Haute, Ind., has sold out to the Robertson Music Co. of that city. The latter company will handle a complete line of Columbia machines and records.

C. P. Herdman, manager of the Columbia department of the Baldwin Piano Co. store, reports that business during May was good and the demand for small machines for summer purposes has been brisk.

At the last monthly meeting of the Columbia dealers, L. B. Sayer, Kentucky representative of the Columbia Co., and George L. Schuetz, Indiana representative, told of their recent visit to the Columbia factory and explained the features of record making. The monthly meetings of the Columbia dealers have been well attended and the dealers appreciate the opportunity they get to come together.

Walter E. Kipp, president of the Kipp Phonograph Co., has gone to the Edison factory and Jewell Cartmill, secretary of the company, joined him in New York, where he attended the Edison dealers' convention.

At the Edison Shop, A. H. Snyder, manager, says that the Edison business is holding up well with last year. Mr. Snyder has rearranged his recital hall for the summer, calling it the rose room and inviting women to use it as a rest room during the summer while downtown shopping.

The Pearson Piano Co. is now selling the Cheney phonograph and has been conducting an advertising campaign on it. H. E. Whitman, manager of the talking machine department, is enthusiastic over the Cheney and says he hopes to see it meet with satisfaction of the public, as he believes his store is offering something that is right.

Business in the Edison and Victor lines continues substantial, Mr. Whitman says. The new velvet Edison records are meeting with approval and Mr. Whitman expects to see them increase the sale of Edison machines.

F. A. Aylesworth, formerly manager of the talking machine department of the Julius Bauer store in Chicago, is now manager of the Vocalion department of the local Aeolian, succeeding Morris Rosner, who is in the army.

The Ultona is still the feature of the Brunswick business, George F. Standke, manager of the Brunswick shop, reports. Mr. Standke says that many owners of other machines come into the shop and ask to buy the Ultona, thinking it is an attachment which can be bought separately from the Brunswick. Mr. Standke continues to arrange clever electric window display featuring the Ultona from the standpoint that it plays all records.

There is one new feature of the Brunswick

Shop worthy of comment. It is a canary bird. This bird is a little singer than accompanies the playing of records so that many people who come into the store are under the impression the bird notes are in the record. The bird likes the Jazz band records and he sways his body to and fro while he warbles an accompaniment. Mr. Standke has had many offers to sell the bird, but there is nothing doing.

George Stewart, vice-president and wholesale manager for the Stewart Talking Machine Co., jobbers of the Victor line, has been named assistant fuel administrator for Marion county. Mr. Stewart served in this capacity for a time last winter.

Emerson Knight, advertising manager of the Stewart Co., is now in the U. S. marine corps at Paris Island.

General Sales Manager Collins of the Pathé Co. visited the Mooney-Mueller-Ward Co., Pathé distributors, recently. R. B. Goldsbury, in charge of the local company's Pathé department, says that the new process records of the Pathé Co. are meeting with approval and with the new tone arm are boosting the sale of Pathé machines.

W. E. Pearce, of the Brunswick talking machine department of the local branch of the Brunswick-Balke-Collender Co., says that the Brunswick business continues nicely. Mr. Pearce is after contracts in some of the larger cities of the State which he expects to close soon.

E. L. Ruffing, of the Ruffing music store, Delphi, Ind., which recently began handling the Brunswick, visited Mr. Pearce this week to place an additional order for machines.

COMPETITION IS AN INCENTIVE

In the fight for business no man or concern has a monopoly of all the best brains and methods. Let competition be an incentive to your energy and ambition. Give the other fellow a fair, square deal and beat him out on your merits.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, Pa., June 8.—The talking machine situation in Philadelphia at the beginning of June is practically the same as at the beginning of May. May was a very satisfactory month so far as the amount of business is concerned, and where this business was not satisfied was due entirely to the fact that the Victor dealers were compelled to turn much of it away for want of merchandise.

The condition in May was about the same as April in this respect. The percentage of shortage was about the same in the amount of goods received, and the month showed a loss over the May of a year ago—though not to any very great extent—due entirely to conditions stated.

With the Edison, with the Columbia, with the Pathé, and all other machines, this shortage was not an existing feature, and in consequence all of the companies named supplied their representatives here with the goods that were immediately needed. The transportation conditions by these companies have been overcome during the month and by means of the auto-truck transportation system now so adequately conducted between Philadelphia and New York and intermediate points goods have been rushed through by this means and with great promptness.

Big Columbia Business for May

Manager A. J. Heath, the local Columbia representative, reports that the business of the Columbia has been exceptionally good in May. During the past few months they have given a great deal of attention to the ordering and building up of their stock in Philadelphia, and they are, therefore, fortunate enough, at the present time, to give their dealers exceptionally good service on records from this on, and with the same degree of completeness as they did in May.

Mr. Heath says that records are coming through in exceptionally good shape, but they have experienced some difficulties in getting machines through due to existing embargoes. They brought over a number of shipments by express during the month, which helped them to keep their dealers supplied with merchandise. Mr. Heath notes that business has been generally very good with the Columbia dealers throughout his territory. Among his recent visitors were F. W. Zerker, of the Regal Umbrella Co., York, Pa., and H. Israel, of the Harold-French

Established 1864

Co., Reading, Pa. F. K. Pennington, the assistant general sales manager of New York, spent several days in Philadelphia during the month.

M. J. Rogers, one of the Columbia boys, was called to the colors in May. He was in charge of their shipping and stock departments, and was well known to all the dealers in Philadelphia.

Blake Doing Well With the Edison

Herbert Blake, the leading Philadelphia dealer in the Edison, reports that things were fine with them in May, and that he had a "dandy" month. He doubled the business of May a year ago, in spite of the fact that at that time they conducted a piano department, since discontinued.

He says they have been having some difficulty in getting a complete supply of both machines and records from the factory, and to put it in his words: "We are selling like the devil, and nothing coming in in comparison." He says that he was over to the factory last week, and that he found them optimistic, but he added "we cannot sell optimism."

They received, however, quite a shipment of both machines and records last Friday, which will help them out materially.

News From Buehn Headquarters

Louis Buehn, of the Louis Buehn Co., reports business somewhat below that of last year, and added that Victor goods are coming over to about the same extent as during April. Miss A. M. Kiefer, who had been the bookkeeper at the Buehn establishment for the past eight years, was married on May 22. The employes of the store presented her with a complete Victor outfit, machine, records, etc., and the firm presented her with a very substantial check. Robert Carpenter, for a number of years connected with the Buehn house, was called to the colors on the 11th of May.

M. M. Hart, of Chester, Pa., has just completed extensive improvements to the talking machine section of his business, and has added several new booths.

Louis Buehn and his family motored to Ocean City on Decoration Day, and Mr. Buehn did not return to this city until Monday. He will shortly open his cottage there for the summer.

Brunswick Activity

The Brunswick-Balke-Collender Co. report that their May business far exceeded their expectations, and went away ahead of anything for which they had hoped.

Last week the Brunswick-Balke people gave a big recital at Atlantic City, which resulted in the sale of a number of high-priced Brunswick machines. The recital was in charge of a representative from the factory. The Ultona attachment has been creating a tremendous sensation in this city. The firm is about to open some big accounts here, and they have a number of dealers up the State who recently signed up, including an especially gratifying account at Bethlehem.

LL Victor Jobbers are now, and have been for some time past, operating on a war-time basis. The Penn organization has been quick to adapt itself to the changed state of affairs and is extending to Victor dealers the utmost in service that is possible under war conditions.

Penn Phonograph Co.

Make June an Educational Month

FEATURE the value of more knowledge and the advantage of using the Summer for improved mental equipment. You can sell "Education," for example, in The Oscar Saenger Course of Vocal Training, the Victor French Course, the Victor Wireless Course, not to forget the benefit of knowing more about the records of good Music.

Buehn Victor Service will co-operate with you to make this month a *good* one.

The Louis Buehn Company Victor Distributors PHILADELPHIA

Pathé Shop Exceeding Quota

The Pathé Shop notes that the sales force not only exceeded the quota that Mr. Eckhardt had set for May, but recorded the best month's sales that they have had since they went into the handling of the Pathé here. They also exceeded their best previous month in the retail end of their business. Strange as it may seem, the minimum they inaugurated in April carried their retail business for May over with flying colors regardless of the war saving stamps and the war chest campaigns.

Mr. Eckhardt closed several very satisfactory wholesale accounts in May, including the Bowby Co., of Shickshinny, Pa., and Fread & Beam, of Lansdale, Pa. Mr. Eckhardt's representative said: "While we can naturally anticipate a falling off in our June business, nevertheless the fact that the majority of our dealers are anticipating fall requirements, they are beginning to place their orders now for large fall stocks, and this will enable us to roll up a splendid business in the month of June."

The Pathé Shop gave an elaborate series of recitals from the 6th to the 11th of June inclusive, on the Orchestra Pathé, which created a great deal of talk, so much so, in fact, that they have been requested to grant the loan of this machine by one of the largest moving picture houses in this city.

Penn Phonograph Co. Prepared to Move

The Penn Phonograph Co. expect to move to their new home at 913 Arch street some time during the month. Mr. Barnhill says they will have "a spasmodic flitting." Just at the present time they are removing the material from their warehouse, and when the new building is equipped to receive their regular stock they will move it into place as rapidly as possible. The entire establishment will be quartered in the new home by July 1. They will have about 8,000 more square feet of space in their new building, and it will be otherwise better adapted to their business.

Business with the Penn Co. in May showed a

slight falling off, due to the inability to get goods, and it is becoming clearly evident that they will have to work with a curtailed stock of machines and records during the remaining summer months.

Doing Well With the Cheney Phonograph

G. Dunbar Shewell states that he has a fair stock of Cheney phonographs on hand. He has been doing a very satisfactory business with these machines. The entire building is being remodeled, and the talking machine end will be adequately cared for. A section of fine booths is being put in place on the first floor, and Mr. Shewell will have a fine office on the third floor front of the building.

H. A. Weymann & Son Report Progress

H. A. Weymann & Son have been most fortunate in being able to supply their dealers in May in a way that has been most satisfactory to them, although not to a full 100 per cent. The system they inaugurated some months ago of getting a big stock on hand has helped them out considerably, and they are in very excellent shape for the rest of the summer. While they have lost several of their best men from this department to enter the Government service, they have been able to replace them with some experienced salesmen and shippers.

Philadelphians at Edison Convention

There was a large representation from this city to the Edison Convention in New York. The first annual meeting of the local Edison dealers was held at the Bingham House on Tuesday evening of this week. There was to be an annual banquet, but due to the fact that it is also convention week in New York, the Philadelphia banquet has been postponed until the meeting in July. There was no election of officers at this annual meeting, as it has been arranged that the officers will be elected hereafter every January to serve for the year.

Miss Katherine Fuicheon, for many years connected with the Estey Piano store, has left that firm and has assumed a position with the Edison section of N. Stetson & Co., where her wide

experience will add much to the effectiveness of that department.

George D. Ornstein, the new Victor distributor at Eleventh and Chestnut streets, did a very good business in May, his second active month. Mr. Ornstein has taken his family to the shore for the summer, and he went down on Decoration Day to remain over the week end. George A. Lyons looks after the business at the store in Mr. Ornstein's absence.

Recent Visitors to Quaker City

Among the out-of-town prominent dealers the past month who were in this city were Rudolph Wurlitzer, of Cincinnati; John W. Jenkins, of J. W. Jenkins' Sons Co., Kansas City, Mo., and O. R. Boone, of the Birmingham Talking Machine Co., Birmingham, Ala.

PHILADELPHIA DEALERS ORGANIZE

Victor Retailers Form New Association in That City at Meeting on May 27

PHILADELPHIA, PA., June 3.—The launching of the Philadelphia Victor Dealers' Association was accomplished with great enthusiasm at a meeting on May 27 at the Adelphia Hotel, when over fifty dealers turned out and enjoyed a pleasant luncheon together. Everyone became better acquainted, and good fellowship seemed to be the spirit of the meeting, while problems of mutual interest were discussed.

The officers of the Philadelphia Association are J. Ralph Wilson, president; Berthold B. Todd, vice-president; Walter G. Linton, secretary, and George W. Huver, treasurer.

Firms in Camden, Wilmington, Norristown and other localities adjacent to Philadelphia have come into the association, thus greatly widening its influence.

These dealers have organized with a desire for a friendly acquaintanceship and a free and frank interchange of ideas for the advancement and development of their respective businesses

(Continued on page 22)

PHILADELPHIA DEALERS ORGANIZE

(Continued from page 21)

so that the interests of each individual member will be promoted.

It is estimated that much good is going to be derived from the discussion of such subjects as "The Rendering of Better Service to the Public," "Store Management," "Proper Stocking and Purchasing of Goods," "Overhead Costs and Expenses," "Credits," "Advertising," and other economic questions. The better solution of such problems is bound to elevate the industry in the eyes of the public, and have a direct bearing upon the success of every member.

COURTLAND SHAW, JR., APPOINTED

Becomes Manager of the Dealer Service Department of the Columbia Co.

The general sales department of the Columbia Graphophone Co., New York, announced this week the appointment of Courtland Shaw, Jr., as manager of the dealer service department. Mr. Shaw succeeds H. L. Tuers, who left for Ithaca recently to go in training at the aviation grounds in that city, preparatory to obtaining an

Courtland Shaw, Jr.

officer's commission in the Aviation Section of the Signal Corps.

Mr. Shaw has been associated with Columbia retail activities for the past eleven years, and is thoroughly familiar with all details of the retail merchandising of Columbia products. From his long and continuous experience in the retail selling field he has acquired an adequate idea of the dealer's requirements, and therefore knows the true meaning of the term "dealer service."

CHENEY PHONOGRAPH SALES CO. ORGANIZED IN CLEVELAND

New Company With Capital of \$50,000 to Take Over the Distribution of This Phonograph—German Records to Be Interned During War—Collister & Sayle Novel Display—News of the Month

CLEVELAND, O., June 2.—The Cheney Phonograph Sales Co., with a capital of \$300,000, has been organized under the Ohio laws to take over the distributing business of the Cheney Sales Co., and will maintain offices at 4400 Euclid avenue, this city. The officers of the company are E. M. Buel, president; T. R. Buel, secretary-treasurer, and G. R. Madson, sales manager. He was formerly with the Columbia Graphophone Co. and is well known to the trade in Ohio, West Virginia and central and western Pennsylvania, the territory the newly organized firm will supply.

The Cheney talking machine has a rapidly increasing sale in this section of the country and the volume of business necessitated the formation of the company just launched.

The distributing agency will put out the product of the Cheney Talking Machine Co., of Chicago, and will have well-equipped offices in this city for looking after business.

The Cheney talking machine has found popular favor in Cleveland because of the construction of the cabinets, which are from the widely-known Grand Rapids, Mich., firm of Berkey & Gay.

Charles K. Bennett, president of the Talking Machine Dealers' Association of Northern Ohio, has furnished the members with a list of the German records to be interned during the war period. The list contains about 1,000 titles and includes all records which reproduce vocal or instrumental selections in the German language as well as selections of pro-Germans. This action will bar all the orchestral selections of Dr. Carl Muck, of Boston, and those of any other musical director who has been interned by the Federal Government.

The barred list has 535 Victor, 271 Columbia, and 53 Edison records. The association members are pledged not to sell any of the records listed and to withdraw them from sale.

In conformity with the association's action the Muehlhauser Brothers Piano Co., dealers in Sonora machines, displayed cartoonist Oppen's cartoon drawn for the National Security League, in their shop window. The cartoon represents a machine called the "American Citizenship Phonograph." Before it stands a German-American who offers a record bearing the words "Deutschland—Uber Alles." The cartoon is labeled, "You Cannot Play That Record on This Machine." These Oppen cartoons have made a big hit in Cleveland.

The Collister & Sayle Co., Victor retailers,

have been attracting attention by a novel display of war weapons, including a gatling gun. The firm's show windows are always attractive and the novel features were shown during the city's campaign to raise a \$6,000,000 "Victory Chest," which was oversubscribed \$5,000,000.

During the drive Charles K. Bennett, manager of the Eclipse Musical Co., Victor distributors, was a member of the Cleveland Athletic Club's team of record-breaking money finders.

The May Co.'s piano department is making an advertising drive on Victrolas, featuring them in extensive displays in the local daily newspapers.

Cleveland police a few days ago had a chase after a lot of talking machine records. Crafty crooks robbed the music store of Charles H. Rudolph, 10010 St. Clair avenue, of \$200 worth of property, mostly talking machine records. Two well-dressed men called at the store and asked to hear the strains of "Nancy Jane" played. The pair selected \$150 worth of records and told a clerk to put them aside until the next morning. During the night the records were stolen.

Henry Dreher, of the B. Dreher's Sons Co., was one of the hardest workers for the "Victory Chest" fund Cleveland raised. He is quite a golfer, and after he had held up the players of the Willowick Club, the caddies "came across" with a substantial sum.

The Starr Piano Co. is making a drive on talking machines and using considerable space in the Cleveland daily newspapers.

Bings' furniture store, one of the biggest in Cleveland, is featuring Sonora talking machines. This enterprising firm is one of the many which is using phonographs to attract trade successfully.

WELCOME TO THE TALKER FIELD

A. H. Taylor, formerly traveling representative for the piano house of F. G. Smith, and well known in piano circles throughout the country, has purchased the Victor establishment formerly conducted by Mrs. Kaplan at Jamaica, L. I. Mr. Taylor has entirely renovated this store, installing new decorations and additional soundproof booths, with the idea of making the establishment one of the most attractive talking machine stores in Long Island.

Probably the best and most profitable kind of ability is amiability.

Efficient Record Service

ECLIPSE

THE accompanying illustration shows one of the numerous efficiency systems we have installed in order to make Eclipse Victor second to none in the matter of giving prompt attention to orders.

Here Are the Points

that make the Nightingale the highest quality machine offered to the American public. This wonderful combination of features is the result of several years' successful manufacturing.

It is equipped with the Stephenson Precision-made Motor.

The Scotford Tone Arm and Reproducer are used.

Not only are the finest veneers used, but the solid parts of the cases are of *genuine* mahogany, black walnut and quarter sawed oak.

We make our own cases and in cabinet work and finish they are unsurpassed.

We guarantee it unconditionally against broken or defective parts for a period of two years.

The selection of a phonograph line is a serious matter—on your decision both profits and prestige hang. You must give perfect satisfaction to your customers and assure yourself of an adequate profit. On both these points the Nightingale scores big.

KANSAS CITY CONTINUES TO BE A LIVELY TRADE CENTER

Business During the Past Month of Large Volume Despite Red Cross and Other Drives—High-Class Machines in Demand—Sales Have Been Limited Only by Supplies—Other News

KANSAS CITY, Mo., June 8.—The talking machine trade in this vicinity for the past month has been more than usually good, taking into consideration the Red Cross drive and various other patriotic activities. Many of the talking machine men gave up an entire week's time to the Red Cross. Burton J. Pierce, manager of the Victrola department of the J. W. Jenkins' Sons Music Co., and A. A. Trostler, who has charge of talking machines for the Schmelzer Arms Co., were both captains in General Jaccard's division in the campaign during War Fund week, and devoted the entire week of May 20-27 to this work. The Kansas City quota of \$800,000 was reached the third day of the campaign and the final figures carried the city over the top with a total of \$1,296,000. Mr. Pierce was the life of his division, leading the cheering and demonstrations with the energy which characterizes his ball playing and recently his golf. Just at this point it may be well to mention that Mr. Pierce would suggest that any members of the trade who visit Kansas City during the summer months had better bring their golf sticks along. He promises them an interesting trip to the Meadow Lake Country Club links. Mr. Trostler was in charge of a district which extended over a large section of territory and was consequently difficult of access. However, the results were very satisfactory, for although not so large in amount as some of the more prosperous districts, it registered practically 100 per cent. in the number of subscriptions, a point more worthy of commendation.

William C. Chestnut, sales manager of the Brunswick Shop, 923 Walnut, has been enjoying an unusually high class of trade, especially in the more expensive machines. The majority of the instruments sold range in price from \$175 to \$225, and a number of \$350 models have been sold. The new Brunswick line, which carries the Ultona reproducer, has been very successful. There will be an exhibition of the special \$1,500 model which was shown at the Music Show in Chicago last year at the Brunswick Shop in the near future. Mr. Chestnut said this week: "In order to protect ourselves from any difficulty in completing a deal with drafted men, we have adopted a ruling that no sales will be made on the instalment plan to unmarried men who are in class A of the first draft."

A. A. Trostler, manager of the Victrola department, Schmelzer Arms Co., said in regard to business conditions: "It is not a question of how business has been but one of getting goods. If we could only secure the merchandise, trade would be phenomenal under the existing circumstances. It has been very good. We have interned all Central Power records or anything pacific in nature, such as 'I Did Not Raise My Boy to Be a Soldier,' for the duration of the war. All records having a semblance of half-hearted support to the Government have been suppressed."

D. M. Guthrie, manager of the retail department of the Columbia Graphophone Co., says that business is going along very nicely with good prospects for an excellent summer season. The Columbia Co. recently sold a beautiful period design to Mrs. Wallace Robinson, wife of the proprietor of the Hotel Baltimore. The instrument, which sold for \$1,750, was specially ordered by Mrs. Robinson as part of the furnishings of her beautiful Country Club home. Mrs. Robinson, who is a fine soprano and prominent in musical circles, has signed an exclusive contract to make Columbia records. Her first two numbers will be "Mighty Lak a Rose" and "When You and I Were Young, Maggie," with orchestra accompaniment. The records will be catalogued in September. The deal was consummated by Mr. Guthrie.

M. M. Blackman, manager of the wholesale department of the Edison Co., is in the East, attending the convention at New York.

Mrs. Nell Williams, manager of the Victrola

department of the Jones Store Co., has been in charge of the department for just one year. During that time the Victrola business has grown remarkably, showing increases not only in the sales but in the class of trade. "Although we have suffered from shortage in goods, we have been very successful in substituting machines and with our wide variety of records satisfying that phase of the demand. It has been a year in which it has been necessary to resort to original plans in salesmanship to overcome the influence of the war. With us, the old plan of selling Victrolas at just the price of the records is now as though it never existed. People seem to have the cash and are willing to pay. We are now carrying a large stock of accessories such as record files and Motrolas to give complete service to our customers," said Mrs. Williams.

O. D. Standke, who has charge of the Victrola department of the Geo. B. Peck Dry Goods Co., is visiting his home near Clinton, Mo., for a week or ten days.

E. S. Hall, of the Hall Music Co., considers the increase in price in all talking machines and records the principal matter of interest to the talking machine dealers at present.

Miss Hazel Godfrey has recently been added to the sales force of the Victrola department of the Jones Stores Co.

Mr. C. L. Schwager has recently resigned his position as office manager of the wholesale department of the Columbia Co., and left May 26 for Atlanta, Ga. He has accepted a position as traveling auditor for the Columbia Co., and his first work will be in Atlanta. For four years Mr. Schwager had been with the Kansas City office.

O. A. Field, of the Field-Lippman Piano Store, St. Louis, was in Kansas City recently as a guest of A. A. Trostler.

The Columbia Co. is receiving a number of very large orders for the General Pershing records.

F. S. Allen, of the Musical Record Co., of Los Angeles, Cal., was in Kansas City recently on his way to the East.

F. S. Horning, Victor representative for the central West, has been in Kansas City en route to the Atlantic coast.

Why Not a Record Window That Has Some Real Human Interest Features? :: By Albert B. Parsons

It is often more difficult to fool the public in the matter of making a human interest window display than some of us might believe. The reason why so many displays of this kind are failures is due to this very cause. There is nothing in the window that will excite attention, admiration or comment. The public simply will not become aroused in the commonplace. Further the public will not respond to the show that is a make believe. You can fool the children with fairy stories and kindred tales of fascinating lore, but the grown ups demand a more well-defined reason for showing the same interest in your window.

Now, there is a great deal more truth in this than some dealers might even think possible. You may feel that your imitation, papier-mache figures and your make-believe scenes that give a faint idea of the impression you are trying to make have really been effective, but the truth of the matter is that your object more often has not been attained. The interest in your own windows cannot be had unless there is something of value to attract.

Say that you have a new or a special record that you want to advertise. If you care to arouse the public interest in this, an interest that will make the sale of the record worth while, then you will have to give the public a reason for stopping at your window and of becoming interested. Your display signs and the little effort that you add with a number of reading signs, even though they depict something in connection with your record, will not bring the desired results. The dealer who has a window that simply has a talking machine therein and then hopes that the public will come in to buy a machine, can really count on little in this way. There is lacking the very interest that you have been hoping to arouse.

This is best given a personal test by trying it on yourself. You might be induced to stop and look at a competitor's window display, but this is simply because you want to see what he is showing. It is not from the fact that you have been impelled to stop on account of the novelty of the display. Try it on another kind of display. Does the imitation window that lacks human interest appeal to you like that which has this feature?

If you can put a person in your window and make him portray a given subject, and make the background a part of the setting, will you not arouse a larger share of interest in your display? If you even place a figure in there that can do more than remain a figure you have aroused an interest that will impel the public to stop and ponder. If you place an animal in the window that has a part to play in the role you will have aroused attention. The public does not want to be fooled, however, and you should make your display real. The imitation is a poor means of arousing and holding the public's attention.

To-day there are a number of popular soldier records. There is a wide interest in all that pertains to the life of the soldier. Why not the display that has something of this kind in connection with the record? Why not the real war relics, the real rifles, bugles, flags, Red Cross fixings? Why not the display that has a man dressed up to represent a soldier or a woman as a Red Cross nurse, that will make clear the idea of a real scene? Pick out any number that is now popular. Make it a part of the window display that has a human interest side.

Best get away from the commonplace and make the record a real picture. Place a phonograph in the window and fix up a camp scene. Place therein also some tents and a man or two. If you cannot get live men, why, take figures, but make the display a real one.

You will find an interest in this kind of display that you can never feel in the window that has only a make-believe show. Invite the public to come in and hear these records. Ask them to permit you to play them for the passer-by. Come in and hear this record and all others. Show that you are fully alive to the needs of the hour and that you can arouse a feeling in the public that will find a ready response.

You Cannot Arouse Interest in Your Windows unless there is Something of Value to Attract

You will be surprised to see how eager the public is for a story of this kind. But the imitation will never arouse that same display of interest. The public has been given so much of this ordinary show that it has tired of the sameness. There is a longing for something that will be a real display. If you only have an ordinary record you can make it appeal by the nature of the window show that you make.

If you care to go to a little additional expense or to make an extra effort to arouse the public in this way you can find ample time to

keep the public interested in your display. If you can do so you should make a complete change at least once a week. But keep the public guessing as to the next window show that you make. Pick out the popular records and play them up. You will be surprised how much real profit there is in this idea when it has been given serious study. But it must be real. If it is only a stick, or a hatchet, or a gun, make these items real, and not an imitation. You cannot fool the public. No, there are too few of them now that will fall for your make-believe style.

It is astonishing how much all of us love a reality. It is a part of our human make-up to love that which is real. Can you not be benefited by this idea and by the suggestion that can be made a part of your display? You want to sell machines and records, but the only way to do so with anything like a profit to yourself is to keep the interest of the public alive and the show window is the logical means when it is made to act as a medium for the telling of a human interest story.

NEW QUARTERS FOR PEARSALL CO.

The Silas E. Pearsall Co., Victor distributors, has leased the entire fourth floor of the building at 10 East Thirty-ninth street, New York, a few doors east of Fifth avenue. According to its plans the company will move from its present location at 18 West Forty-sixth street about the 20th of June, and in its new quarters will concentrate exclusively upon the development of wholesale Victor business, discontinuing its retail business entirely.

PROGRESS OF TRI-STATE VICTOR DEALERS' ASSOCIATION

Exchange Bureau of Association Proving of Great Value—Many Conferences on Jobbers' Prices—Membership Now Includes Leading Houses of St. Louis and Adjacent Cities

St. Louis, Mo., June 3.—Victor dealers in this trade territory are showing much interest in the Tri-State Victor Dealers' Association since the formal opening of the Koerber-Brenner Music Co. warerooms on May 8. At the dinner given in connection with the Koerber-Brenner meeting, President Magoon of the Tri-State Association was a speaker and he explained the objects and benefits of the association. As a result, a number of membership applications have been received by the membership committee. These will be submitted to the association at the next meeting, probably the third week in June.

The greatest direct benefit of association has been the Exchange Bureau. While not many machines have changed ownership through this bureau, which is under direction of John F. Ditzell, of the Famous & Barr Co., the record transfer has been very heavy. Some dealers reported unusually heavy stocks of standard records and these were eagerly taken by other dealers, especially by those dealers who have learned the art of suggesting as substitutes for the new numbers, older records by the same singer or player.

Since the notices of the advanced prices by

the Victor Co., local members of the Association have held several conferences to consider the dislocation of jobbers' prices and the lessened profits to retailers on certain items. The dealers decided not to take action at present but authorized John F. Ditzell, who attended the Piano Merchants' Convention in New York City, to take up the point with the Victor factory while he was in the East. He will report to members of the association at the June meeting.

The following list of members does not include the applications received as a result of the Koerber-Brenner house-warming meeting:

A. M. Magoon, Kieselhorst Piano Co.; C. F. Lippman, Field Lippman Piano Stores; Val Reis, Smith Reis Piano Co.; J. F. Ditzell, May Department Stores Co.; F. Schanzle, Home Phonograph Co.; J. F. Hunleth, Hunleth Music Co.; E. C. Rauth, Koerber-Brenner Co.; A. C. Thiebes, Thiebes Piano Co.; W. Gus Haenschen, Scruggs, Vandervoort & Barney; Wm. Bauer, 2619 Gravois, St. Louis, Mo.; J. Raigor, Raigor Art & Music Co., St. Louis, Mo.; J. Glaser,

Tower Talking Machine Co.; J. Mediar, Stix, Baer & Fuller D. G. Co.; A. E. Geitz, Geitz Sewing Machine & Furn. Co., 4706 Easton; Fred Coleman, Wellston Talking Machine Co., all of St. Louis, and E. A. Parks, Parks Music House Co., Hannibal Mo.; T. J. Price, Bracy-North Hdwe. Co., Carterville, Ill.; Jos. Knapp, Knapp Jewelry Co., Belleville, Ill.; W. L. Rhein, Walter L. Rhein Piano Co., Belleville, Ill.; Fred Lehman, Lehman's Music House, East St. Louis, Ill.; Frank Beach, C. L. Beach & Son, Mansfield, Mo.; E. Pat Boverie, Boverie Store Co., Ste. Genevieve, Mo.; T. S. Gravenhorst, Gravenhorst's Store, Effingham, Ill.; W. C. Daumueller, Lebanon, Ill.; Frank H. Feraud, Feraud Bros., Granite City, Ill.; H. E. Arcularius, Neosho, Mo.; J. T. Lochridge, Lochridge & Ridgway, Mayfield, Ky.; J. V. Johnson, Bry Block Merc. Co., Memphis, Tenn.; Herbert Highfill, Highfill Neifind Furn. Co., Caruthersville, Mo.; John Calveard, L'Harmonie Compagnie, Louisville, Ky.; E. T. Ballagh, Nevada, Mo.; Frank C. Cochran, Piggott Music & Nov. Co., Piggott, Ark.; E. E. Baker, Harrisburg, Ill.; J. P. Brown, Jacksonville, Ill.; Walter H. Shackleton, Kranusgill Piano Co., Louisville, Ky.; W. B. Decker & Sons, Fairbury, Ill.; Franklin Meyer, Carlinville, Ill.

IMITATION RECORDS FOR WINDOWS

Dealer Service Department of Columbia Co. Announce Unified Display Feature for Dealers

In response to requests from Columbia dealers throughout the country, the dealer service department of the Columbia Graphophone Co. has just announced that it is ready to supply Columbia representatives with an imitation record lithographed on sheet steel. These records can be utilized to excellent advantage, as the dealers have hitherto been hampered in exhibiting records in their display windows by the deterioration caused by the heat of the sun and the gathering of dust in the record sound grooves, rendering the records thus displayed unfit for use, and a direct loss in money.

Many requests for the solution of this problem actuated the experimentation with substitutes that would withstand the extraordinary requirements of window display and still maintain the appearance of actual records. Trials of cardboard, wooden and fiber substitutes proved unsatisfactory for many reasons, and after lengthy tests of various materials, an imitation record lithographed on sheet steel was perfected.

Imitations of Columbia records have been manufactured in ten and twelve-inch diameters, single-faced, with regular blue and symphony labels. Record edges are round-rolled giving the appearance of actual record thickness. Each imitation is punched with a hole in the center so they may be substituted wherever the others may be displayed.

These records are furnished to the dealers in sets of twelve assorted comprising three of each type of record. There has also been issued for use with these imitations a record display easel

consisting of a sheet steel and wire record holder with easel adjustable to any angle. This easel holds ten-inch or twelve-inch records and a metal pin inserted through the record hole keeps the record in display position.

The Orpheum Record Co. of Manhattan was incorporated in Albany recently with a capital stock of \$10,000, by A. and K. Poulus and M. A. Stadhoupoul, 247 West Twelfth street.

That has made good in thousands of machines. It has won wonderful and enduring popularity and embodies the silent-running, reliable and durable features that delight the customer and satisfy the builder. The Dayton Motor is considered by manufacturers as being

How Talking Machines Play a Prominent Part In the History of the World War :: By Wm. J. Fitzgerald

One of the real problems of every military organization in active service is that of preserving the morale of the troops at the highest point. Modern war conditions are particularly nerve-racking to the soldier, for he is called upon to spend weeks, or even months, inactive in the trenches, but alert and ready at all times to enter into a death grapple with the enemy. In short, the heroics that have gone with other wars are almost entirely lacking in this. There are few charges across the open, or the excitement of passing from one battlefield to another. It is a war of waiting, of methodical campaigning, the sort of campaigning that wears on the nerves.

Our allies, even before we entered the war, realized the necessity of talking machines at the front. The English Government and private organizations sent thousands of talking machines and records over to France for the use of troops in the field, and found them most effective in distracting the mind of the soldier from the grind of war during his brief periods of rest. There is hardly a military organization in the United States to-day that is not provided with some sort of talking machine and a library of records.

The talking machine has established its place in the military life of the country, and has been accepted as an essential. Hundreds of talking machines are in the camps over there. Thousands are in the cantonments here. I really believe that individuals to-day are endeavoring to see that talking machines are placed aboard every vessel afloat. Music is getting to play an important part in this war. The music of the talking machine soothes the raw nerves of the boys who have just returned from the trenches, lessening the mental lassitude of the reaction that follows, with soothing melody, and helps in every way to make their lives more comfortable. Every one of the warring governments has made special efforts to supply music for its soldiers, but human nature needs to keep regular hours, and talking machines, which can be operated by any one at any time, perform a service obtainable through no other agency. We know, for instance, that it is an established fact that the soldiers will not endure the waiting periods of modern warfare without the relaxation. Commanders of the army have found that the morale deteriorates when the men

are given only the so-called necessities of life. Military men have found that the modern man requires something different. Therefore, to-day, we find in the cantonments of the country, even with the expeditionary forces abroad, that our troops are being well taken care of by the kind of music from the talking machine, and also by the good literature which is so kindly allowed them even in the greatest hours of danger. I do not hesitate to predict that the music in-

The talking machine provides comfort, inspiration and joy for the boys at the front

dustry will come sooner or later to be recognized as a war industry, and something absolutely necessary for our army and navy and even for our military camps at home. It has been taken as a matter of course, by everybody from the President down, that talking machines must be provided for the boys training and for the boys at the front. The talking machine has never been known to be a traitor; it means good music, and helps to provide comfort and inspiration which usually follows. All good music is patriotic, because in wartime comfort and inspiration are to be regarded as a national state in every home.

* * *

The foregoing article by Mr. Fitzgerald appeared in the Boston Sunday Advertiser and American of May 26 followed by a striking advertisement of the Eastern Talking Machine Co., depicting many of the leading Victor artists, with suitable text matter, emphasizing that the greatest artists of the world make records for the Victor exclusively. This was followed by the individual cards of some fifty-four dealers. In this connection it was pointed out to the

reader that "It is your patriotic duty to-day to trade with the Victor dealer in your own city."

The following had cards attached to the advertisement: Geo. H. Herrick Co., Attleboro; John H. Newell, Beverly; Chickering & Sons, Conclave Phonograph Co., Walter T. Gillis Co., C. C. Harvey Co., Iver Johnson Sporting Goods Co., Kraft, Bates & Spencer, Inc., Osgood, Rosen's Royer Talking Machine Shop, M. Steinert & Sons Co., Henry H. Savage & Sons and the Tosi Music Co., Boston; United Talking Machine Co., Brockton; W. E. Moore & Co. and C. C. Moir, Cambridge; Fred B. Emerson and Chelsea Music Co., Chelsea; Codman Square Music Shop, Dorchester; S. Hirshberg & Son, East Boston; Saul A. Rouffa, East Cambridge; J. F. Chaffin, Fitchburg; Travis & Cunningham, Framingham; Fred W. Peabody, Gloucester; J. G. Heidner, Holyoke; A. M. Phinney, Hyde Park; Kneupfer & Dimmock, N. F. Edmester, John J. Forrest, Lawrence; Bon Marche Dry Goods Store and Wardell's Music Store, Lowell; Harry M. Curtis and G. W. In complimenting Mr. Fitzgerald on the splendid work accomplished in this co-operative advertisement, he very modestly said: "I wish to emphasize that Thomas O'Brien, classified manager of the Boston American, and Arthur Burns, his able assistant, are certainly two men in the advertising field that deserve wonderful credit for their ability to stick and win out on any hard proposition that may arise, and believe me co-operative advertising is one of the hardest propositions known."

Sometimes a better outlook is secured by a critical inlook. Tried that lately?

NYOIL

is the last word in the refining of high-grade oils, for every impurity is taken from it, leaving nothing but what is required to keep machines in perfect condition, being combined of four oils perfectly blended.

Will not Gum, Chill or become rancid; is free from acid. It is colorless and has no sickening smell, being absolutely odorless.

"The finest and most delicate pieces of mechanism do not prove efficient unless properly lubricated. Skill, Genius, Invention and Workmanship must have the proper Oil. Stop and consider this when you have to buy an Oil for household use."

Hundreds of satisfied customers have written us that they would never use anything else for

TALKING MACHINES, GRAPHOPHONES, PHONOGRAPHS AND SEWING MACHINES

NYOIL will lubricate the machinery and polish all woodwork

and can be obtained of any "Up-to-date" Talking Machine Dealer in the world, and is manufactured by Wm. F. Nye, who for 50 years has made 80% of all the Watch, Clock and Chronometer Oil that is used in America.

PITTSBURGH PATHEPHONE CO.

963 LIBERTY AVENUE, PITTSBURGH, PENNSYLVANIA

MAY REDRAFT THE STEPHENS BILL

Believe That a Remodeled Measure, or an Entirely New Bill, Providing for Maintenance of Resale Prices Under Auspices of Federal Trade Commission, Will Be Offered

It is now predicted that in view of the various recent decisions against the existing methods of providing for the maintenance of fixed retail prices, and particularly in view of the recent action of the Federal Trade Commission in the matter of price fixing, a new, or amended, Stephens bill will be introduced into Congress at an early date which will be drafted along lines to meet the situation as now developed.

It is believed that in its new form the Stephens bill will still be designed to give manufacturers of trade-marked goods the right to fix the retail selling price, or the resale price, on their goods, but will also provide that the price fixing must have the approval of the Federal Trade Commission. It is believed that legislative and judicial interests at present opposed to the fixing of retail prices by private concerns can be won over to the policy of price maintenance, provided such a policy shall be under Government supervision.

Even Justice Brandeis, of the United States Supreme Court, in a dissenting opinion in a recent price-fixing case, gave it as his view that price maintenance should be brought about through legislation, and intimated that the Federal Trade Commission should be given some authority in the matter.

With the Federal Trade Commission in charge, the retailer, or the final purchaser, will have some recourse in the event that he felt that the price fixed on a certain article was higher than was warranted by the cost of manufacture and distribution, in which event the Commission would probably order an adjustment.

There are four things a business man ought to know—himself, his business, how to use his means and knowledge, and the—other fellow.

WM. A. CONDON NOW SOLE AGENT

For the Gloria Steel Needle—Plans an Aggressive Sales Campaign—Demand Grows

The Gloria Phonograph Supply Co., New York, has announced the appointment of Wm. A. Condon as sole agent for the Gloria steel

Wm. A. Condon

needle. He has already assumed his new duties, and is making plans to establish an aggressive campaign in behalf of these products.

Wm. A. Condon is well known to the talking machine jobbers and dealers throughout the country, as he has been identified with the talking machine industry for many years. As one of the founders of the Condon Auto-Stop Co. he had occasion to visit practically all of the important cities from coast to coast, and while

on these trips met the leading jobbers and dealers in every trade center of importance.

He is now making plans whereby the Gloria steel needle, which was introduced to the trade a few months ago, will be merchandised efficiently and successfully. Arrangements are being completed for the adequate distribution of these needles, and Mr. Condon has perfected sales and publicity plans which will doubtless be of interest to the trade generally.

Since it was placed on the market a few months ago the Gloria steel needle has achieved pleasing success. Shipments have been made to jobbers and dealers in all parts of the country, and the company is working on a strictly uniform price basis, leaving nothing undone to fulfil its promises of prompt deliveries of its product.

GREAT ROSTER OF PATRIOTS

Another star was added this week to the service flag flying from the offices of the New York Talking Machine Co., Victor wholesalers. This star was occasioned by the fact that Henry Roth, one of the company's stock clerks, is now a member of the National Army and is in training at Camp Upton. The patriotism of this company's sales staff constitutes a remarkable record, for there is probably a greater proportion of the New York Talking Machine Co.'s force now in the service of Uncle Sam than any concern in the talking machine or allied music industries. Several of the members of the staff are now engaged in battle at the Western front, while others are getting ready to leave for France at a moment's notice.

NEW AUTOMATIC BRAKE

The Weber-Knapp Co. of Jamestown, N. Y., have made preliminary announcement of a new automatic brake which they have been developing for some time and which is already in the process of manufacturing. It is claimed that the device is very simple and a cordial reception of the new invention is expected.

TRIBUNE ATTACKS RECORD OFFER

The "Ad-Visor" Alleges That Certain Sections of Landay Bros. Retail Advertising Were Not Lived Up to in Actual Practice—Talking Machine Men., Inc., Congratulate Paper

The "Ad-Visor" column of the New York Tribune, in which the attention of the public is called to advertising statements in the New York papers by various concerns which are believed by the Tribune critic to be misleading, launched an attack recently on Landay Bros., local wholesalers and retailers of Victrolas and records, regarding a certain phrase in the Landay advertising.

The Landay advertising recently carried the line: "A genuine \$85 Victrola with all the records you want for \$5 down and easy monthly payments." The Tribune investigators claim that the Landay salesman informed them that \$5 worth of records were allowed on the \$5 down basis, and that records to a greater value would require a larger initial deposit. The investigators allege that they demanded \$50 worth of records with the \$85 machine and were informed that a \$25 deposit would be required. "In other words," as the published report of the case reads, "they could have 'all the records they wanted' on a \$5 deposit provided they did not want more than \$5 worth of records." The Tribune people claim that they brought the matter to the attention of the Landay house, and that there was a temporary change in the advertising phraseology, but that the old offer again appeared.

At the meeting of the executive committee of the Talking Machine Men, Inc., held in this city on May 23, the following resolution was adopted:

"That the management of the New York Tribune be congratulated on the stand it has taken in the matter of the 'Landay advertising' as discussed and criticized in their issue of even date, and this committee does hereby concur and sustain the action taken in this matter and believes that it will be of great benefit to the talking machine trade of New York and vicinity, and it does furthermore instruct the secretary to send a copy of this resolution to the New York Tribune and trade papers showing the action taken at this meeting."

The Everton Phonograph Co., Chicago, Ill., has been incorporated with capital stock of \$2,500. The incorporators are Thomas Wilkinson, Earl F. Hurd and Raymond B. Cunliffe.

EMERSON LOSES BIG JUDGMENT

Appellate Division Reverses Decision of Supreme Court, Which Awarded \$46,485 to Victor Emerson as Against Henry Waterson—"Little Wonder" Records Basis of Suit

In a decision handed down by the Appellate Division on May 31 the judgment for \$46,485.59, obtained by the Emerson Phonograph Co., as assignor for Victor H. Emerson, in the Supreme Court, was reversed. The case grew out of an arrangement made by Mr. Emerson with Henry Waterson, whereby the latter secured exclusive distributing rights for the small "Little Wonder" records made by the American Graphophone Co., by which company Emerson was employed. Mr. Emerson declared that he

demanded that Waterson agree to pay to him one-half the profits he made from the sale of the records, and in fact paid \$1,700 at various times.

Waterson claimed that he had to pay the American Graphophone Co. so much royalty that he did not make the profit he expected out of Little Wonders and he sued Emerson for the money advanced. Emerson, on the other hand, alleged that Waterson had made a profit of \$200,000 out of Little Wonder records and wanted the court to give him a judgment of half that amount against Waterson. The lower court did give Emerson a verdict of \$46,485.59 against Waterson, which is now set aside.

The opinion handed down states that the testimony as to the alleged verbal contract between Emerson and Waterson is not conclusive,

but even if such a contract did exist, it would be null and void in law, because Emerson was at the time it was made a trusted employe of the American Graphophone Co., and was receiving pay to work in their interests, therefore he had no right to make such a contract.

HEAVY DAMAGE BY FIRE

The surplus stock of talking machines and records in the cellar of the store of the Worcester Phonograph Co., 11 Trumbull Square, Worcester, Mass., was badly damaged by fire recently.

George W. Harris, piano dealer of Burlington, Vt., is planning to move to a new location at 200 Main street, where he will feature the Henry P. Miller piano, and the Edison phonograph.

Happenings in Dominion of Canada

CANADIAN MANUFACTURERS ASSESSED TEN PER CENT. TAX

Proposed Bill, Which Will Undoubtedly Become a Law, Provides for a War Tax of 10 Per Cent. on the Manufacturers' Price on Players, Talking Machines, Rolls and Records

TORONTO, ONT., June 5.—When the daily papers on May Day announced that certain musical instruments were included in the list of articles that the Government proposed to tax, uncertainty and much anxiety were felt in music trade circles. The first report made it appear that a 10 per cent. tax was to be imposed upon the retail selling prices of certain lines. This misapprehension was corrected by later reports that made it clear that the proposed tax was to be on the manufacturers' selling price, although even at present writing there is necessarily indefiniteness of detailed confirmation as to the proposed tax measures and the working out of the collection of them. It is clear that the specific lines are player-pianos, player organs and music rolls, talking machines and records.

In Toronto a general trade meeting of piano and talking machine manufacturers and wholesalers was hurriedly summoned and a delegation appointed to visit Ottawa and obtain, if possible, information that would remove some of the uncertainty as to the conduct of business in view of the proposed legislation. Inland Revenue officers at various centers had notified dealers that they must keep a record of all sales made on May 1 and take an inventory of goods on hand. It now appears that this warning was not necessary in the case of retailers.

The delegation to visit Ottawa included Fred. Killer, Henry H. Mason, H. G. Stanton and E. C. Scythes. On their return, meetings of both the piano and phonographic branches of the business were held to receive reports and decide on the next step to be taken. As a result a circular letter has been issued to the trade from the office of the secretary of the Canadian Piano & Organ Manufacturers' Association, reporting that the following points were tentatively established in connection with the excise tax. The regulations here announced are subject to official confirmation:

- (1) Tax applies only through manufacturers and importers.
 - (2) Tax applies on all goods imported or shipped or delivered by manufacturers after April 30 (except in cases mentioned in "exceptions").
 - (3) Tax applies on all imports whether now in bond or transit.
 - (4) Tax is payable on duty paid price for imported goods, and manufacturers' selling price for goods made in Canada. The manufacturers' invoice price to dealers in each individual case to form basis of tax.
 - (5) Tax does not apply to parts or unfinished materials.
 - (6) Exceptions. Where manufacturer or importer has received and accepted orders previous to May 1, which he is legally bound to deliver at former prices and where he cannot collect the tax, will have consideration as to refund by applying to the Department of Inland Revenue.
 - (7) Payable from Canadian Manufacturers. Tax collected by Government for phonographs, records and player rolls; May sales on June 1, 1918. For player-pianos and mechanical organs; May sales on June 1, 1918.
- Note: Efforts are being made to secure extension of collection of records tax for two months, and players tax for six months. No decision yet rendered. In event of postponement of tax, a guarantee year bond will require to be furnished satisfactory to the department.
- (8) Tax is payable when goods are passed through Customs. This does not change present regulations covering bonding.
 - (9) While bill has not been passed, it is understood that when it is put in force it will be made effective as from May 1, 1918.

While up to the time of going to press the excise bill is still before the house, it is not expected there will be any serious objection, and that it will become law and effective as on May 1, 1918.

This special war tax of 10 per cent. on the manufacturers' selling price applies to player-pianos and rolls, mechanical organs, talking machines and records.

Various opinions are, of course, expressed concerning the inclusion of musical instruments among those lines on which a tax might fittingly

be placed, but your correspondent believes the general sentiment is one of cheerful readiness to co-operate with the Government in raising much needed revenue and a feeling that the Government has been careful not to impose an assessment that would seriously restrict the industry. It is felt that the piano trade has reason to feel elated that the contention of the piano being a household and educational necessity has been recognized by the Government. In regard to the 10 per cent. on player sales there is a little uncertainty as to how this will affect the financing of the sales as the tax may be required by the Government in a lump sum when the sale has been made. The optimists in the trade figure that this tax may do good to the industry in forcing better terms of payment.

So far as the talking machine trade is concerned it is not felt that the tax will interfere with business. Because of the impost dating from May 1, manufacturers and wholesalers are uncertain as to what the necessary changes in

prices will be and are protecting themselves by a clause on all invoices of goods going out since May 1.

Exception is taken, however, to the act and the following vigorous protest is registered by a prominent dealer in the East: "The writer, personally, feels that a big protest should have been made against this tax on talking machines by all manufacturers and dealers in phonographs. Talking machines are far more than a luxury. They are just as necessary for the uplift of humanity and civilization as schools and colleges, and the Government might with as much judgment and common-sense, tax school books, newspapers, magazines, etc.

"Thought is a great motive power in this world, and music is a mighty factor in helping people to think aright. Some great writer has said: 'If you wish to grow better then you should look on a beautiful picture every way, read a beautiful poem, and listen to a beautiful musical composition.'

"We feel sure that if the members of our Parliament realized the great blessing that talking machines are in the homes they would not have placed such an excessive tax on these instruments."

OTTO HEINEMAN PHONOGRAPH SUPPLY CO.'S NEW HOME

Now Located in Toronto at 172 John Street—G. W. Hopkins' Visit Enjoyed—Many New Stores and New Agencies Announced—Recent Visitors to Toronto—Other News

TORONTO, ONT., June 6.—The local branch of the Otto Heineman Phonograph Supply Co., Inc., is now at home in the new quarters at 172 John street. The manager, C. J. Pott, has taken a lease of the entire ground floor in the new concrete, fireproof building at the foregoing address and has rearranged the floor space to house both the offices and warehouse. Substantial quarter-cut oak fittings have been put in, private offices for Mr. Pott and his assistant, Mr. Green, and an interdepartment phone service. From Mr. Pott's desk he will be able to overlook both the incoming and outgoing shipping departments. Soundproof rooms are also being installed.

The increased floor space will permit the carrying of a much larger stock of Heineman and Meisselbach motors, tone arms and all parts. The advantage of having all departments under one roof and on one floor are quite obvious.

The Heineman branch had the recent pleasure of a visit from A. F. Meisselbach of the firm's Meisselbach division in Newark, N. J. In company with Mr. Pott, Mr. Meisselbach visited a number of phonograph manufacturing plants in Ontario centers, and Mr. Meisselbach makes no secret of his enjoyment of a visit to Canada.

Mr. Pott is again visiting New York, where he is attending the National Music Show in the Grand Central Palace during the week of June 1 to 8.

H. M. Shaw, until recently in charge of the Home Outfitting Co.'s exclusive Pathé store at St. Catharines, has removed to Windsor, where he is in charge of the Pathé department of Baum & Brody, furniture dealers.

Armand Heintzman, vice-president of Gerfard Heintzman, Ltd., had a display of styles of his firm's phonograph at the National Music Show, which was recently held in New York.

The Musical Merchandise Sales Co., distributors of the Brunswick phonograph, announce the introduction of the new "Ultona" reproducer with which three models of the line have been equipped.

J. L. De Vaney, who was the Musical Merchandise Sales Co.'s representative in Alberta and British Columbia, has enlisted in the Royal Flying Corps. He is succeeded by K. A. Ross, who has already a considerable connection in the West. The firm also announce the opening of a Brunswick Shop in Winnipeg under the management of H. E. Etenberg, in connection with which it is proposed to put on an extensive advertising campaign. The Musical Merchandise Sales Co.'s Western headquarters have been located at 143 Portage avenue.

George W. Hopkins, New York, general sales manager of the Columbia Graphophone Co., addressed the Ad Club at London on May 16. Mr. Hopkins addressed the Toronto Board of Trade recently when his speech made a hit.

W. S. Carr, of Niagara Falls, Ont., who is well known in the Niagara Peninsula, has taken on the Columbia line which he is featuring quite extensively.

Judging from the letters received from John Sabine, while the latter was in New York recently, he was considerably enthused over the Columbia period models, displayed at the Columbia Co.'s Fifth avenue store. Mr. Sabine

Talking Machine Supplies and Repair Parts

SPRINGS, SOUND BOX PARTS, NEEDLES

THE RENÉ MANUFACTURING CO.
MONTVALE, NEW JERSEY

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 33)

visited the company's head office in New York and the factories at Bridgeport.

The Adams Furniture Co., after trying out various makes of machines and records, are now handling the Columbia line exclusively.

In their contribution to a patriotic fund being raised in London, the Starr Co., of Canada, included a Starr phonograph trench outfit. This is one that regularly sells at \$110. With other contributions it was put up at auction at the Tecumseh House and realized \$250, being purchased by Sir George Gibbons, who, with his usual generosity, donated it to the boys who are serving at the front.

O. C. Dorian, general manager of the Pathé Co., will soon leave for an extended trip which will take him right through to the Western Coast. He will call on some of the most important Pathé representatives in the West and will make a thorough study of conditions there.

W. K. Elliott, Brampton, Ont., has added the Brunswick line to his piano business.

At the recent motor show in the armories in

Peterboro there was an exhibit of Pathé records and machines shown by E. V. Warne.

H. S. Berliner, vice-president of the Berliner Gramophone Co., Ltd., Montreal, was a recent trade visitor to Toronto.

G. W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, spent a week-end in Toronto looking over the company's new factory and Canadian head office premises.

At the opening of the Commodore Jarvis branch of the Navy League of Canada held in Toronto's new Masonic Hall, the Sonora in charge of H. R. Braid, of I. Montagnes & Co., Canadian distributors of the Sonora, provided the musical entertainment in the luncheon parlors.

The first firm to pay the new excise tax of 10 per cent. at the port of Toronto was I. Montagnes & Co., who released a shipment of Sonora phonographs on May 2. The 10 per cent. is payable on the importer's price plus the regular tariff charge.

cating in their advertising copy the purchase of machines before the new additional 10 per cent. war tax is applied.

The Berliner Gramophone Co., Ltd., with their usual thoughtfulness for their customers on May 1 (moving day in Montreal) placed their motor trucks at the disposal of their customers moving their Victrolas and records absolutely free of charge.

R. W. Burgess, manager of the Montreal branch of the Pathé Co., has been obliged to take a few weeks' rest in a sanitarium at Three Rivers, owing to a nervous breakdown.

The Musical Merchandise Sales Co. have been using large space in the dailies in the interest of the Brunswick and the new Brunswick Shop in particular which was opened to the public the past week at 582 St. Catherine street West. New dealers in Montreal include J. A. Ethier, 1901 St. Catherine street East, and J. L. Ethier, 734 Notre Dame street, West.

George S. Pequegnat, who has been in charge of Wilder's Music Supply Co. (phonograph department) for some time, is severing his connection with that company on the first of June. His plans as yet are unsettled, although he has had a number of flattering offers.

The death occurred very suddenly the past month of John Ferns, who for some years had been handling "His Master's Voice" products in the north end of the city. The late Mr. Ferns was for some years superintendent of the Berliner Gramophone Co.'s plant leaving there on account of ill health, and was one of the first men to press Victor records in Canada.

TRADE NEWS FROM WINNIPEG, MAN.

G. W. Johnston Joins the Forces—Edison Tone Test Attracts—Robt. Shaw Discusses Record Situation—Big Order for Pathéphones

WINNIPEG, MAN., June 1.—G. W. Johnston, who has been for the past five years manager of the phonograph department of W. G. F. Scythes & Co., Regina, Sask., and has recently joined the Seventy-seventh Battery, was tendered a banquet by the firm and staff, and presented by the firm with a shaving kit and by the staff with a wrist watch.

E. D. Morris, of the Morris Music Store, New Westminster, B. C., who suffered considerable loss by fire in March last, has opened up again with a full line of Victrolas, pianos and players, small goods and sheet music.

The New Edison with Florence Fennell in a tone test recital drew large audiences to the Hotel Vancouver in Vancouver, B. C. Edison Hall (The Kent Piano Co., Ltd.) report some nice sales as a direct result of the recital. This artiste was also heard in recital in the Hotel Empress ballroom in Victoria, B. C.

The Canadian Phonograph & Sapphire Disc Co. report business good and collections ahead of the average. Mr. Poisson recently visited Montreal.

Robert Shaw says that the Columbia trade is increasing every month with no shortage of records, owing to the improved factory facilities. He says the supply of European records is well to the fore. Owing to the publicity methods of the dealer service department many dealers are coming in on the window scheme.

Babson Bros. say Edison business has been normal and records are coming through the factory a little better. On the whole there is little or no complaint. The new Edison records are winning high praise.

The Hudson Bay Co., of Vancouver, B. C., have just placed an order for one carload of Pathéphones. The most gratifying feature in connection with it is that nearly 75 per cent. of the whole order was made up of machines from \$125 up. The Hudson Bay Co.'s Calgary, Alta., house have also become agents for the Pathé line of phonographs.

The Musical Merchandise Sales Co., Brunswick distributors, have located their Western headquarters in Winnipeg at 143 Portage avenue.

MONTREAL TRADE DISCUSSES PROFITABLE ADVERTISING

Does Display or Classified Advertising Bring Best Results—Talking Machines as Wedding Gifts—Artistic Sonora Display—New Brunswick Dealers—Death of John Ferns

MONTREAL, QUE., June 5.—An increasing demand is noticeable in the sale of phonographs as wedding gifts. In sounding out the local dealers it seems that this business is not gone after as aggressively as it might be by some firms, while others are hot foot on the trail of the would-be bride and bridegroom. The information is gained from the engagement column of the daily newspapers and from private sources.

The Montreal Light, Heat & Power Co., Ltd., in their new and well-appointed showrooms in their new building, have a rest room for their lady patrons, et al. Musicales are given every afternoon. The Sonora furnishes the music and is from the warerooms of Charles Culross. One of their handsome show windows for demonstrating some of their electrical lines suitable for a den featured an Aeolian-Vocalion furnished by Charles Culross. It showed up to splendid advantage in the cozy and well-furnished room.

Speaking with a representative phonograph dealer who believes very strongly in printer's ink the question was put to him as to whether he found display advertising or condensed classified advertising the most productive of results. He stated that on second-hand machines

and exchanges the classified columns brought him excellent returns, but when it came to advertising and featuring a new machine he had to resort to display advertising and an illustration of the machine for direct results.

At Layton Bros. warerooms a window full of Grafonolas attracted considerable attention and represented eighty-nine models of Styles 24 and 38. Summer sales were considerably stimulated by this effective window display. Sales Manager W. W. O'Hara was responsible for the unique window trim.

An annual event with Eugene Julien Co., Quebec, who do an extensive piano and phonograph business, is their exhibition which this year was preceded by a dinner tendered to the press and the directors of the firm by Eugene Julien. H. V. Roy, who has charge of the music department, had a full orchestra and his musical features were appreciated by large audiences.

The recent appearance here of Martinelli revived interest in the recordings of this famous Victor artist and the Berliner Gramophone Co., Ltd., and all "His Master's Voice" dealers shared alike in the spirited call for his records.

Nearly all the phonograph dealers are advo-

ACTIVE CALL FOR TALKING MACHINES ON PACIFIC COAST

All Sections Report Increased Demand Despite Campaign for Red Cross and Other Funds—Northwest Especially Prosperous—What Leading Talking Machine Houses Say About the Outlook

SAN FRANCISCO, CAL., June 2.—Taken as a whole the month of May was a thoroughly satisfactory one for the San Francisco talking machine trade, both wholesale and retail, according to reports from various establishments; in fact, better than might have been expected in view of the strenuous campaign for Red Cross funds and other diverting influences. Advices from other Pacific Coast cities indicate that the active demand for talking machines and records was not confined to the Bay district. Local music houses maintaining branch stores or selling dealers in other sections of the Western territory report very good returns from all directions. The Northwest is especially prosperous on account of the rapid growth of its shipbuilding industry, which makes toward activity in practically all lines of business including talking machines; the interior of this State is in splendid condition from an agricultural standpoint, and dealers in southern California, Arizona and New Mexico seem to be getting their full quota of business also. The increased freight rates did not come as joyous news, but the local trade shows little inclination to complain about war-time readjustments over which they have no control.

Acting With Sherman, Clay & Co.

"Business was never better at this time of the year," is the way Andrew G. McCarthy, treasurer of Sherman, Clay & Co., sums up the month's report for the Victor department, which he gives his personal attention. The only difficulty, he says, is to get stock. Shipments have been coming through from the factory in fairly good time and in fairly large quantities, but more goods could be used to excellent advantage on the Pacific Coast. Mr. McCarthy returned from an Eastern trip early in the month, during which he visited the Victor headquarters and looked after other matters for his company. Since he returned he has been interested in the extensive improvements Sherman, Clay & Co. are making at their wholesale Victor branch in Los Angeles, Cal. The work was started some months ago, but it was only this month that tenants occupying part of the additional space vacated, so the plans for expansion could be brought to a close. Now the company's Southern California quarters compare very favorably with any place of the kind in the entire country, it is claimed. The same plan of arrangement has been carried out in the Southern city as was worked out for the new wholesale Victor establishment, fitted up last year by the company on Mission street, San Francisco.

Trade in Southern Points

Jas. J. Black, of the Wiley B. Allen Co., is back at the San Francisco headquarters giving his attention to the talking machine department of the business, after spending some little time at the firm's branch store in Sacramento, Cal., where a talking machine department was being added. R. R. Draper has accepted a position with the company as manager of the new department, and Mr. Black says he is sending in very good reports from the capital city. At the local store, business for May gave no ground for complaint. Frank Anrys, general manager of the Wiley B. Allen Co., has gone East on a combined business and pleasure trip.

Conducting an Active Campaign

Mrs. Helen Plummer Howard, who was placed in charge of the talking machine department of the Hauschild Music Co., in Oakland, Cal., a few weeks ago, has been conducting a very active campaign and is getting splendid results. At her instigation the company is giving away a talking machine each week to some training camp, cantonment or other branch of the army or navy service, and is collecting records for the use of the soldiers and sailors stationed in this part of the country. A call for records is incorporated in the firm's advertising, and a box has been placed at the Liberty War Hut. In this way a great many are received, and

Mrs. Howard says the men in the service are very appreciative. Machines have been placed on three submarine chasers built in this vicinity. Mrs. Howard now has associated with her Miss Fay Otis, formerly music history teacher at the University High School in Oakland. Together they are specializing along educational lines and have succeeded in working up considerable interest. A few days ago Mrs. Howard demonstrated a machine at the shipyards in Alameda, and she has arranged for a public demonstration at the Quericli branch of the Public Libraries in Oakland.

The Hauschild Music Co. has recently added the Brunswick line of phonographs at its Oakland store.

Columbia Warerooms Almost Cleaned Out

The local warerooms of the Columbia Graphophone Co., under the supervision of F. A. Denison, are almost entirely cleaned out of stock, as a result of very active selling during the past month, and it now looks as if June business might be curtailed to a considerable extent by lack of machines to sell. The shortage of stock applies particularly to machines, as records are coming through in better shape than was the case a few months ago, according to Mr. Denison, which is largely due to the fact that he is having most of the shipments come by express instead of depending upon freight service.

Move Mauzy Machine Department

The talking machine department of the Byron Mauzy music business in Stockton street has just been moved from one of the upper floors of the building to prominent space on the main floor. Several soundproof demonstration rooms have been installed and the new quarters are being nicely fitted up. Edw. Humphreys has charge of the department. He reports business exceedingly good for this time of the year. Mr. Mauzy left for New York recently, accompanied by his wife and daughter.

The White Music Co., which was organized several months ago by Arthur White, formerly manager of the talking machine department of the Emporium in this city, to engage in business in Berkeley, Cal., has been granted permission by the State Corporation Commissioner to issue fifty shares of its capital stock to Mr. White and G. H. Leathurby in consideration of money advanced to the corporation.

A nicely fitted up talking machine department

is one of the principal features of the new branch store opened by Byron Mauzy in Oakland.

A new music store was recently opened at 531 Thirteenth street, Oakland, by Howard E. Brillhart, who is handling the Pathé line.

ORDERS TWO CARLOADS OF PATHES

Stern Talking Machine Corp. to Act as Pathé Dealer in San Francisco

SAN FRANCISCO, CAL., June 3.—Fred'k Stern, president of the Stern Talking Machine Corp. of this city, who returned recently from a two weeks' trip to the East, closed arrangements on this trip whereby his company will act as Pathé dealers in this territory. Mr. Stern states that he has already placed an order with the Pathé Frères Co. for two solid carloads of Pathéphones and for approximately 20,000 records for immediate shipment.

It is the intention of the company to carry a complete stock of Pathé records, having on hand every single number in the catalog at all times. The total stock of Pathé records will therefore be approximately 100,000 records. A permanent stock of Pathéphones of about 750 to 1,000 machines will also be on hand, so that the company can adequately handle the requirements of its clientele.

During the past month or so the Stern Talking Machine Co. received about 10,000 Pathé records and about 100 Pathéphones from the local Pathé jobber, and these machines and records met with a ready sale. In fact, the business was almost phenomenal, and Mr. Stern is naturally enthusiastic regarding the prospects for Pathé business in all of the company's stores.

In a chat with The World correspondent he said: "Having been able for the past two years to declare a cash dividend to our stockholders, amounting to about 20 per cent. at the close of each year, we feel that we ought to be able to do much better than that the coming year, as the result of our handling Pathé products, because we consider the Pathé line far superior to anything we have heretofore handled. If the Pathé Frères Phonograph Co. will supply us with merchandise as fast as we order it, and I have every reason to believe that they will, I am sure that our business during the coming year will far exceed our expectations.

"One other item which will materially increase our volume of business is the fact that the Pathé Frères Co. is so prompt in getting out new record selections of the new popular numbers.

A Message to Phonograph Manufacturers

Are you making *Just Another Talking Machine?*

Is it your aim to manufacture a line of Phonographs for the future?

Edison Message No. 23

Music A Vital Force

"Theoretically, music is a gratuity, a luxury; practically, it has proven itself to be a necessity. The simple truth is that one of the vital forces of a nation is its music, and that in the accomplishment of a huge task wherein all its energizing processes are required, the value of music should be carefully regarded."

— Colonel E. M. Markham,
303d Engineers, National Army

Colonel Markham speaks from experience and with authority. During his many years in the army, he has served in China, the Philippines, Cuba, Mexico and no doubt by now he is serving in France. He says a man away from home requires the refining influence of good music and that it makes him a better man and a more efficient soldier.

If music is so indispensable to our soldiers, whose entire time seems to be actively employed, how much greater is the need for those who must remain behind to hope and pray and wait.

TRADE IN BUFFALO ACTIVE DESPITE RED CROSS DRIVE

Last Month's Business Exceeded Expectations—Death of C. H. Utley Regretted—Getting After Vacation Trade—Laxity of Credit Out of Date—Columbia's Biggest Month—Other News of Interest

BUFFALO, N. Y., June 9.—Even if millions of dollars of Buffalo's money were diverted in May to two worthy causes, the Third Liberty Loan and the Red Cross, the local demand for talking machines and records was extra heavy in the past month. May business at some of the wholesale and retail stores showed a gain in May, 1918, over the preceding period a year ago.

The A. F. Koenig Piano Co. has taken on the Pathé agency. President Koenig is enthusiastic over this line. His Pathé window display is enhanced by the use of a valuable oriental rug.

In the Red Cross campaign in May local talking machine dealers figured prominently and contributed generously. Red Cross posters and banners were well displayed by these merchants.

The funeral of Benjamin D. Bing, of Bing & Nathan, Sonora dealers, was held here recently. Mr. Bing was sixty-one years old.

Members of the music trade industry learned with great regret of the death of Chas. H. Utley, the Edison dealer, and veteran piano merchant of this city, who passed away recently after an extended illness. The funeral from Trinity chapel, of which Mr. Utley was vestryman for twenty-five years, was largely attended. Mr. Utley was born in Buffalo September 1, 1847, and is survived by a widow and one son, Lieutenant Chas. Bach Utley.

Will local talking machine dealers follow the lead of some of the piano dealers, who are clearing house on account of a shortage of goods and slow transportation? In many cases the merchants in question are repossessing instruments on bad accounts and selling them over again to good prospects.

The advent of warm weather has various effects on the talking machine trade. When the temperature rises some dealers and salesmen sink into a state of coma, so far as stirring up

active business is concerned. Others cultivate the summer resort and country trade, or strive for success among city prospects. The last-named campaigners have the foresight to realize that the going is easier now than it may be in face of "heatless Mondays" and other wartime handicaps next winter.

C. Kurtzmann & Co. were represented at the conventions in New York by J. H. Hackenheimer, H. C. Rice and Roy S. Dunn.

The wise talking machine salesman these days is impressing on his prospective customer that music and patriotism are inseparable and that, in wartime, music is really essential.

L. L. Hatfield, of this city, formerly sales representative of the Edison Co. in Canada, has joined the Canadian Heavy Artillery.

War gardening is being practiced as an act of patriotism and recreation by Charles Hereth, New Edison dealer. Mr. Hereth has a farm at Bomansville, twelve miles from Buffalo. He is also an amateur florist. So far as business is concerned, he advocates the extension of short-term credit.

Harold J. Verbeck, of the Verbeck Musical Sales Co., Columbia and Delpheon dealers, expects to go overseas shortly. He has been training in aviation at Lake Charles.

Bach Utley has received his commission as second lieutenant in aviation at Lake Charles.

The Kaepfel Piano Co. has taken on the Sonora line. Carl Kaepfel, of this firm, attended the New York trade conventions. This firm is displaying a service flag, Alvin Kaepfel having joined the navy.

Laxity of credit by talking machine jobbers and retailers is going out of date. Figuratively speaking, "Get the Money" is seared into the mind of every salesman. In the employers' estimation, the sales person who can "bring home the bacon" in the form of tangible payments for

goods is the man who doesn't have to worry about his job.

Salesmen of the following firms are selling War Savings Stamps: J. N. Adam & Co., Victor dealers; Adam, Meldrum & Anderson Co., Pathéphone dealers; Bricka & Enos, Columbia dealers; William Hengerer Co., Victor dealers, and Walbridge & Co., Victor dealers.

Ralph C. Hudson, president of J. N. Adam & Co., Victor dealers, is a member of an advisory committee to draft rules to govern talking machine and other mercantile establishments along lines on which factories are controlled.

In times like these railroad men are regarded as good talking machine prospects. As substantial wage increases are headed their way, their purchasing power may be considerably increased within a few weeks.

"We have closed the biggest month in the history of this branch," said O. M. Kiess, local manager of the wholesale department of the Columbia Graphophone Co., in speaking of his May trade. "The largest previous month we ever had was December, 1916. We have gone ahead of that month by several thousand dollars. Our May, 1918, business was 81 per cent. over May, 1917, and 90 per cent. over the trade in April, 1918."

F. K. Pennington, assistant general sales manager of the Columbia Co., stopped off to inspect the company's new quarters which he said have the best facilities of any branch of the Columbia Co. in the United States. New Columbia dealers include Lewin Bros., Ellicott Square, Buffalo, and the Crane Piano Co., Syracuse.

At the Buffalo branch of the Brunswick-Balke-Collender Co. a well-equipped balcony is being built for the exclusive demonstration and display of Brunswick phonographs.

W. R. Gardner, manager of J. N. Adam & Co.'s Victrola department, is pushing the sale of the record "God Be With Our Boys Tonight." This song was featured by John McCormack, who appeared at the Broadway Auditorium for the benefit of the Knights of Columbus War Camp Fund.

The Leonard Markels BUTTERFLY MOTOR

The Leonard Markels Jewel Bearing Butterfly Motor

has revolutionized the motor industry. It is silent running and silent winding and represents the acme of perfection in motor construction.

This motor has achieved phenomenal success, and is being used exclusively by leading phonograph manufacturers in all parts of this country and Canada.

READY-FILE CO. ENLARGES FACTORY

Experiencing Big Call for Ready-Files for New Edison Models and Needs More Room to Fill the Orders Which Are Pouring in

INDIANAPOLIS, IND., June 6.—The Ready-File Co. announces the enlarging of that part of its factory devoted to Ready-File for the New Edison. It is stated that these models were put out to fill a market that was thought somewhat limited, because the New Edison had been considered in the trade as an instrument that was chiefly sold in the higher-priced models, while Ready-File was to be made only for the 100A and 150C models. However, the Edison dealers have shown unexpected interest towards this filing device, and the demand has been very much stronger than was anticipated. It is especially worth noting that many dealers have been sending in frequent repeat orders for large quantities, which seems to disprove entirely the theory that the New Edison is sold only in the more expensive models.

Ready-File for the New Edison is now considered by the officials of the company to be well over the experimental stage, and to have come to the point where a strong, well-balanced market can be relied upon. Hence the resolve to give the manufacturing of it larger quarters. Edison dealers in Indianapolis are wishing the Ready-File Co. the "best o' luck" in developing this new necessity for New Edison phono-

graphs, for, as one dealer put it, "the greater demand they can create for Ready-File the greater will be our extra profits from the sale of it."

Officials of the Ready-File Co. have expressed themselves as being sure that the enlargement now under way will enable them to give faster and more satisfactory service to their customers.

M. E. SCHECHTER'S NEW POST

Appointed Eastern Sales Manager of the Otto Heineman Phonograph Co.

The Otto Heineman Phonograph Supply Co., New York, has announced the appointment of M. E. Schechter as Eastern sales manager of the company, with headquarters at the executive offices, 25 West Forty-fifth street, New York. Mr. Schechter assumed his new duties the first of the month, and spent considerable time at the music show getting acquainted with the members of the out-of-town trade who visited New York during convention week.

Mr. Schechter is splendidly equipped to occupy his new post, as for several years he was associated with the Sonora Phonograph Sales Co., having been purchasing agent for this company for the past two years. He is therefore familiar with the manufacturing end of the industry, and numbers among his friends and acquaintances talking machine manufacturers from coast to coast. He is enthusiastic regarding the sales possibilities of Heineman products, and is planning to co-operate with the manufacturers in every possible way.

APPOINTED SONORA DISTRIBUTOR

RICHMOND, VA., June 3.—The Rountree Cherry Corp., 111 West Broad street, has been appointed a distributor for the products of the Sonora Phonograph Sales Co. The company is planning an active campaign in behalf of this popular line, and well-known dealers throughout this territory are being signed up regularly. The Rountree Cherry Corp. is well known in local retail circles, and every member of its sales staff is enthusiastic regarding the possibilities for developing Sonora business in this territory.

You never know under what conditions a worth-while idea may come to you. Keep your eyes and ears open to impressions when you are on the street, in any place where people gather and talk. It is this alertness of mind that makes you every day more and more receptive to outside impressions and furnishes you with ideas you can use.

BOLTON ON WESTERN CONDITIONS

Sales Manager of International Record Department, Columbia Co., Tells of Progress Throughout West Based on Recent Trip

R. F. Bolton, sales manager of the international record department of the Columbia Graphophone Co., New York, returned recently from a Western trip which included a visit to the company's branches in the leading Western cities as far as Kansas City and Minneapolis. This was Mr. Bolton's first Western trip in his new capacity, and he was accorded a hearty welcome everywhere.

In a chat with The World Mr. Bolton expressed his appreciation of the splendid sales efforts which the branch managers and their staffs are advancing in behalf of Columbia foreign language records. The demand for these records is steadily increasing, and judging from all indications 1918 will be a banner year for this important branch of Columbia activity.

The dealers throughout the West are utilizing to excellent advantage the series of new hangers recently prepared by the Columbia Co.'s international record department. They are enthusiastic regarding the sales value of these hangers, and are also well pleased with the new advertising campaign inaugurated by this department a few months ago. In fact, many of the dealers are tying up their local advertising with this national newspaper campaign in order to secure maximum results from this publicity.

THE LIBERTY PHONOGRAPH CO.'S LINE

MINNEAPOLIS, MINN., June 4.—The Liberty Phonograph Co., of this city, has just placed on the market a line of phonographs which is meeting with considerable success. The company has established quite a number of dealers and, according to present plans, an active campaign will be advanced in behalf of these products. At the present time the company is concentrating on the production of two models retailing at \$75 and \$95, and these instruments embody numerous distinctive features, including a wooden tone arm, automatic stop, speed regulator, and other desirable features. The company is making it a point to fill the orders of its dealers promptly, and arrangements are being made to take care of an active fall trade.

Do not mistake activity for progress. If Paul Revere had ridden a rocking horse he would not have arrived.

THE UNIT CONSTRUCTION COMPANY

RAYBURN CLARK SMITH, President

Fifty-eighth Street and Grays Avenue, PHILADELPHIA, U. S. A.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., June 9.—Business is about what one might expect at this season of the year and with the conditions as they are recognized to be. The times are surely just opportune to test the mettle of a man, and those who hustle seem to be the ones that get the goods. There are times when business often comes to a man; and there are occasions such as the present when one waits a long time if the proper attraction is not offered to induce trade. There are men in Boston who are doing a most creditable business because they go after it, they exercise every honorable means to draw business to their establishments, and it is not to be wondered at that they are optimistic. Even these houses are working against great odds, for as is distinctly known in one or two cases they are badly handicapped through lack of help, due to the draft and other things. There is on the other hand the men who complain that business is not what it should be; and while this is a statement of fact that admits of great truth these same men do not press out, branch forth as they should to invite a better feeling.

Good Showing of Bostonians at Conventions

There is something of a laugh going the rounds of the trade at the expense of some of the boys who got "cold feet" and didn't care to take any chances the first of the month in going to New York for the music trade convention via the outside water line. On the day of the story of the U-boat escapades there was some expectation that the port of Boston would be closed, so this offered a fairly reasonable excuse for quite a group to cancel their passage on the Eastern steamship line to New York; but it happened that the "Belfast" sailed that night all right, and the alternate boat sailed the following night. Incidentally quite a number of talking machine men went over to New York for the conventions, and it is seldom that the trade has been so well represented from Boston as this year. And nearly all of them went by train!

Impressive Educational Exhibits

At the Eastern Music Supervisors' conference held lately in Boston both the Victor and the Columbia Cos. had exhibitions which attracted the attention of all the men and women in attendance. The exhibits were at the Hotel Brunswick, which was the headquarters for the conference, and each of these talking machine companies occupied a large room of its own.

The Victor demonstration was in charge of Mrs. Frances E. Clark, manager of the educational department for the company; and Miss Gladys Barr, supervising instructor of the company's educational department. In charge of the Columbia exhibit, which included several of the leading styles of machines, was Frederick Goodwin, and he had the assistance of Harry B. Goodwin, of the western Massachusetts department, who is located at Holyoke; and Mrs. Grace Drysdale, representing the educational department for the company in eastern Massachusetts and Rhode Island.

McCormack Records in Demand

John McCormack, the Irish tenor, was in town the other evening to sing at Mechanics' Hall for the benefit of the Knights of Columbus War Camp Fund, and a feature of the concert was the selling at auction of some of the McCormack records which had been autographed. One of "The Star Spangled Banner" brought \$120, and one of "God Be With Our Boys To-night" brought \$100, while one of "Mother Machree" sold for \$105. Naturally the day following the concert there was a renewed call for the McCormack records, but there were few of the popular ones that could be had, owing to their scarcity.

W. H. Merrick Joins Emerson Forces

Oscar W. Ray, New England manager of the Emerson Co., has just appointed a new salesman, Wilfred H. Merrick, who has been manager of the Cressey stores at Buffalo, N. Y., and the Metropolitan stores at Pittsfield and Fitchburg. He will take for his territory Maine, New Hampshire, Vermont and Eastern Canada.

Announce Many New Agencies

Manager Ray has lately signed up the F. H. Thomas Co., which conducts a large establishment in the Back Bay and will handle the Emerson records; the Lippet Bros. at New Bedford; Archie MacDonald at New Bedford; the Tuttle Co. at Rutland, Vt.; Adams Music Co. at Burlington, Vt. Manager Ray, who is over in New York, where he attended the music show, said before leaving that the company's new nine-inch record has been meeting with unparalleled success. H. T. Leeming, the new general manager for the Emerson Co., has been a visitor in town, making his headquarters with Manager Ray.

Aeolian-Vocalion Expansion

Manager Hibshman, of the Vocalion Co., was

one of the many attendants from this city to the music trade convention in New York. Lately his staff have been successful in interesting a number of prominent persons in the Aeolian-Vocalion proposition and some large purchases have resulted.

Sonora Activity

Richard Nelson, manager for Southern New England of the Sonora Co., went over to New York the first part of the month, to be away for the week. A few days earlier Mr. Nelson was over at Hartford, Conn., conferring with Joseph H. Burke, who is associate manager of the Sonora Co. Mr. Burke subsequently went over to New York also. Business with Manager Nelson has been good for the month of May.

Signs Up Many Pathé Agents

Wholesale Manager R. O. Ainslie, of the Pathé line, was another who went over to New York the first of the month. Mr. Ainslie since taking hold of the Pathé line has met with marked success. Within the next few weeks he expects to make a trip through New England, visiting the concerns which he has signed up since associating himself with the Pathé.

Ditson's Immense Victor Business

The Victor department of the Oliver Ditson Co. has been able to show a splendid volume of business both in and out of season, and Manager Henry Winkelmann was lately congratulated by the officers at the Ditson Co.'s annual meeting for the good showing his department had made during the preceding year. That's the sort of recognition that makes a man feel good.

Some Recent Distinguished Visitors

H. L. Wilson, the vice-president and general manager of the Columbia, accompanied by Louis Sterling, the London manager of the company, spent a few days in Boston lately, and Mr. Sterling was most interesting in his recital of some of the German bombing atrocities perpetrated on London. While here Mr. Wilson and Mr. Sterling were entertained by Manager Fred E. Mann. Another local visitor from New York, too, was F. K. Pennington, assistant general sales manager of the Columbia.

Geo. Lincoln Parker Honored

Local Edison dealers were quite delighted at the honor that came to George Lincoln Parker, of the Colonial Building, in being invited to preside at the sessions of the Edison dealers. It was known in advance that Mr. Parker would make a good presiding officer because of his

Victor Dealers In New England Territory

can rest assured that EASTERN VICTOR SERVICE has their interests individually at heart, particularly with respect to the securing of Victor stock. Our aim is to help the Victor dealer make the most of the existing conditions.

EASTERN TALKING MACHINE CO.

many qualities which would serve him in good stead in such a position, one that invariably tests a man's tact and good judgment.

Doing the Best to Please All

Wholesale Manager William Fitzgerald, of the Eastern Talking Machine Co., these days is called upon to exercise all the suavity of manner he can muster because of the letters and phones and wires which he receives complaining or remonstrating at the poor service received by dealers. This is all due to the scarcity of goods, a fact which dealers do not seem to appreciate, for having placed a good sized order they think they should receive, if not the whole consignment, at least a large proportion of it, which is not always possible these days. So Manager Fitzgerald is doing the best he can and trying through amiability and diplomacy to minimize all alleged grievances, which, one may add, he is doing quite satisfactorily.

Interesting Many in the Vitanola

A very good May is reported by the New England Vitanola Talking Machine Co., which has local offices at 52 Chauncy street. Harry Bergson, the treasurer, has been able to interest a great many persons in the Vita-Nola proposition and to-day many furniture houses and periodical stores are carrying this line. All of New England is covered from this headquarters here and the two traveling men, James Birmingham and J. S. Whitney, are finding business good throughout the territory.

Will Soon Join Uncle Sam's Forces

Fred L. MacNeil, the affable young manager of the talking machine department in the R. H. White Co.'s department store, expects to be called into service soon as he is in the present draft call. He is hoping to be able to get in a week's vacation before starting in upon his duties for Uncle Sam. Mr. MacNeil has been able to show some good business lately, and a sale of Edison machines and records recently advertised in the daily papers brought many customers to the department.

Attended Edison Convention

Francis T. White, manager of the Victor and Edison departments of the C. C. Harvey Co., is over in New York for the Edison convention. Ernest A. Cressey, vice-president of the Harvey Co., also went over, he being interested in both the Edison and the piano conventions.

New Brunswick Dealers

F. H. Walter, of the Brunswick-Balke-Collender Co., returned to-day from Pittsfield, whither he went to sign up Rice & Kelly, of that city, who are to carry the Brunswick line. The company has installed handsome quarters for the display and demonstration of the Brunswick

machines. Mr. Walter also has signed up the Burke-Tarr Co., of Providence, R. I., and this concern, too, has made ready to handle the Brunswick machines under the most attractive conditions. Mr. Walter is leaving to-night for New York for the convention to remain away until the end of the week.

Henning Enters the Navy

Edward Henning, Victor retailer at Egleston square at the south side of the city, has entered the navy. Prior to his enlistment in the service he sold his stock of Victor goods to Harry Barish, at 324 Blue Hill avenue, and the latter is now operating at this location as a Victor retailer.

Reports a Good Business

Walter Gillis, manager of the Victor department, lately handled by the Henry F. Miller Co., reports a very good business for May, and he has been called upon to furnish quite a number of packages of records for families about to start on summer vacations. Mr. Gillis hears frequently from his son, Walter, Jr., who is

with the 101st Engineers at the French front.

Attended Edison Convention

L. H. Ripley, F. S. Boyd, Guy R. Coner and T. E. Dean representing the traveling staff of the Pardee-Ellenberger Co., went over the first of the month to New York for the Edison convention. They had planned to go by the outside line, but at the last moment changed their mind and took the train. Two days later Manager Silliman, of the Boston headquarters, went over to New York to attend the Edison conferences.

Ralph W. Longfellow, manager of the Victor and Edison departments of Chickering & Sons, was numbered among the Boston men who attended the Edison convention. One of Mr. Longfellow's recent appointments as a new attache of his force is William Sundell.

Dealers Hear Evan Davies

A dealers' night held a while ago at the quarters of the Columbia Co. in Federal street brought together a company of about 125 men

(Continued from page 41)

and women who listened with the greatest delight to Evan Davies, one of the Columbia artists, who entertained with songs and monologues. Manager Fred E. Mann presided at the entertainment and played Mr. Davies' accompaniments with rare artistic finish, for Mr. Mann is a musician of distinction. O. F. Benz, who is connected with the sales department, came over from New York, and gave an informing talk on records, which furnished the dealers with a new insight into this department.

Some Other Columbia Happenings

M. H. Hanson, concert manager for Riccardo Stracciari, the Columbia baritone, who is one of the Chicago Opera Co. members, was in town a few days ago making the preliminary plans for a concert to be given in the fall by this artist. He was a Columbia caller.

The many friends of "Billy" Parks, of the Columbia, who went to Baltimore some time ago, received the joyful information a few days ago that he has become a proud father, the heir to the father's business ability and good nature being named William Scott Parks, Jr. There's still time to enjoy a smoke, Bill.

H. E. Gardiner, who has lately joined the sales department of the Columbia, is spending a week at the Boston offices of the company.

Thornton Burgess, the Columbia artist, came over to Boston a few days ago for the opening of the children's educational department at the Shepard Norwell Co.'s store. In his story telling he was accompanied by a Columbia machine. Mrs. Grace Drysdale, of the Columbia's educational department, was on hand to assist.

Diplomatic J. A. Frye

James A. Frye, the business promoter for the Victor, passed through Boston a few days ago. Mr. Frye is spending much of his time throughout New England territory, and he has many intricate business problems to settle, which the trade says he is doing with rare judgment and satisfaction to all concerned.

SONORA IN NORTHERN NEW ENGLAND

Many Important New Agencies Announced by W. B. Glynn Distributing Co., Who Cover This Important Business Territory

The W. B. Glynn Distributing Co. for the Sonora phonograph in Northern New England have recently placed this well-known instrument with the following concerns in Maine: the Bussell & Weston Co., Augusta; Maine Music Co., Rockland; Larose-Marcotte Co., Lewiston; D. T. Percey & Sons, Bath, and Jas. Fenderson & Son, Biddeford; the following houses in New Hampshire: the J. E. Lothrop Piano Co., Dover; F. P. Meader, Rochester; Carey Furniture Co., Ashland, and these concerns in Vermont: the Remington Furniture Co., Rutland; the Bailey Music Rooms, White River Junction. These are all representative concerns, who are splendidly fitted to display the Sonora to the best advantage.

COLUMBIA LINE WITH BAILEY CO.

ST. JOHNSBURY, VT., June 5.—Alden L. Bailey, president of the Bailey Music Co., leading piano dealers in northern Vermont and New Hampshire, have lately added the Columbia line to their store in this city. This line also has been added to the company's stores at Hardwick and White River Junction, Vt., and Lancaster, Berlin, Littleton and Colebrook, N. H. The Vermont stores are under the management of G. R. Magoon, while the New Hampshire stores are supplied through the Portland, Me., branch. The Columbia line has been taking very well with the patrons of the several establishments.

NEW UNIVERSAL TONE ARMS

Are Now Being Marketed by the New England Talking Machine Co.

BOSTON, MASS., June 1.—The New England Talking Machine Co., 16 Beach street, are now ready to market their new Universal tone arms, models 7 to 10, inclusive, together with the new Puritone reproducers 6 and 7 that are attachable to these tone arms. Many fine points are claimed for the reproduction qualities of the Puritone and its high popularity in the trade is forecasted. A large stock of these tone arms and reproducers is on hand, which assures immediate delivery of orders. Descriptive advertising matter has also been prepared.

TAKES ON THE COLUMBIA LINE

BURLINGTON, VT., June 5.—The McAuliffe-Pope Co., of this city, has taken on the exclusive line of Columbia products which gives the company two good representations in this city, the other being the E. E. Clarkson Co., which is the principal department store of Burlington. Mr. McAuliffe recently went to Boston to inspect the line at the Federal street headquarters, and was delighted at the methodical, shipshape arrangement of everything, and with the easy way business is dispatched, thanks to the careful system insisted on by Manager Mann.

D. A. Ingalls, the Columbia's traveling associate for Vermont, has moved from Springfield to this city. Mr. Ingalls has been with the company two years, and he reports the conditions excellent in the Green Mountain State for the Columbia line.

RUTLAND DEALER EXPANDS

RUTLAND, VT., June 5.—The Tuttle Co., of this city, has taken over the goods of the Columbia Co. and has opened a special shop next door to its printing and stationery establishment. Mr. and Mrs. M. O. Tyrrell are conducting the new place, under the name of the United Talking Machine Co. For jobbing purposes the Tuttle Co. is carrying the Pathé line. The opening of the Columbia store was quite an event in the city, and the Boston headquarters was represented by J. F. Carr, who went up especially for the opening, while D. A. Ingalls, the company's traveling associate for the Vermont territory, also was on hand for the event. In the several weeks that the shop has been in operation the Columbia line has received its share of recognition.

INSTALL FULL VICTOR LINE

WORCESTER, MASS., June 3.—The firm of Barnard, Sumner & Putnam Co., Main street, has lately installed a complete line of Victor Victrolas and records, having bought out the Victor stock held by the Worcester Phonograph Co. at 11 Trumbull street. This is one of Worcester's leading department stores, and judging by the way it has begun to interest the lovers of the Victor machines there is a big success ahead.

MUSIC FOR WORKERS

From a paper by Gordon Gray, a writer on sociological questions, we select the following paragraphs:

"Too much music mixed in might mean work mixed up; but, on the whole, harmony is the antidote for monotony.

"The way to drain off life's drudgery is to drink at the fountain of melody. Take all you want. Musical inebriation has no harmful after effects.

"What the world needs is more lilting music and less alcohol. Turn on the phonograph and turn off the spigots. Give the workers more and better bars of music and fewer of the baser sort.

"Work accompanied by music is never hard.

"Obviously if music can take the sweat out of sweatshops, the principle that harmony makes burdens light and work easy is susceptible of wide application."

Manufacturers—Jobbers—Dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION ball-bearing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison machines. Made in nickel and 24 carat gold finish, extra fine quality.

Tone arms fitted to Edison machines only

PERFECTION FLEXI-TONE reproducers No. 3, No. 6 and No. 7 fit all types of Victor and Columbia machines. Made in nickel and 24 carat gold finish.

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from highest pitched soprano to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Write for prices, information, etc.

DETROIT TRADE STOCKING UP TO MEET FALL DEMANDS

Jobbers and Dealers Admit That Stock Situation Is Serious—Hope for Improvement—C. H. Grinnell's Views on the Subject—Brown Opens Branch Store—New Columbia Models—News in Detail

DETROIT, MICH., June 5.—For the next three months dealers in Detroit are going to give most of their attention to stocking up with merchandise that is going to sell next fall. Dealers here are extremely optimistic about big fall trade and the only question with them is "will we be able to get goods?" That's the big bone of contention—the big problem confronting every dealer regardless of whose line they are handling. Some of the jobbers express little hope of there being any improvement—in fact, some jobbers who have regularly sold local dealers have frankly admitted that the situation is most serious and that so many conditions have to do with making the future look rather gloomy for merchandise. There is the labor shortage which is by no means improving; then again, the Government having taken over so many of the needed materials has hampered the manufacturers' production and no one looks for the manufacturers to increase production under these conditions; as a matter of fact, production is certain to be curtailed and every jobber admits that, they know it to be a fact; then again, shipments are very bad—extremely slow—whether by freight or express. Goods on the way for weeks and weeks have yet failed to put in an appearance, and there is no encouragement that this condition will improve. It's no longer a question of being able to sell talking machines and records but merely a question of getting the goods.

C. H. Grinnell, manager of the Victrola jobbing division of Grinnell Bros., says the situation is most serious and he is more than willing that his views be expressed in *The Talking Machine World*. "Some of the trade papers have said we had a big stock and we want to correct this impression," he declared to the writer. "We have a good stock of old record numbers and certain styles of Victrolas, but they are not the kind that are in popular demand and that are selling and we don't know of any way that they can be pushed out. You can hardly expect a dealer to push records that they have tried to sell and cannot—and the same thing applies to some of the models. The kind of Victrolas that we could sell large quantities of we simply can't get except in such small quantities that they don't stay in the warehouse long enough to be noticed. Unless something

is done and done quick to relieve the tense situation—giving dealers merchandise that they can sell—I am sorry to think what the dealers will be up against in the fall when business really starts to boom. Even right now the demand is very good with Victor dealers both for machines and records but the trick is to get merchandise."

What Mr. Grinnell says is no different than what jobbers all over the country have to say. One leading dealer recently showed *The World* correspondent a letter he had sent out to some thirty jobbers, and every answer was about as follows: "We would be glad to take care of you if we had the merchandise."

Wallace Brown, the Brunswick dealer, now has a branch store on Chene street in the Polish northeast section of Detroit, with a Polish manager in charge. Business there is reported as being very good. Recently several professional dancers were engaged for two days to "step the light fantastic" in the show windows. It resulted in tremendous crowds in front of the store—at times the crowds blocked the street car tracks. It was a good advertising stunt and considerably popularized the branch. Mr. Brown, who has the exclusive Wayne County agency for the Brunswick, is planning to extend his activities to all sections of the city, giving him representation in every part of town. Mr. Brown celebrated his thirteenth month as Brunswick dealer in May—and is quite enthusiastic over the outlook.

A number of dealers told the writer that most of their talking machine sales were among the working people who were earning big money in the munition factories. "They are the real buyers of talking machines these days," said one dealer. "The wealthy people are not buying and neither are the poor people."

There has been quite a big demand for small talking machines for boats and canoes priced not over \$15 or \$25.

F. S. Kratzet, manager of the Brunswick-Balke branch at 247 Jefferson avenue, is not only very optimistic about future business, but says that since the department was established sales have exceeded considerably his anticipations. Of course, in Detroit Mr. Kratzet has just the one dealer—Wallace Brown—but through the State he has put on some splendid

MANUFACTURED BY

ILSLEY-DOUBLEDAY & CO., 229-231 Front St., New York
Established 1853

accounts of late and is getting many inquiries from every corner of the State.

The Edison Shop of Detroit has had a number of interesting window displays of late of warfare equipment for the soldiers. One display, loaned by a Detroit physician just back from the fighting lines, comprised a number of German souvenirs, and they attracted a lot of attention.

Max Strasburg, of the Max Strasburg Shop, Victor and Columbia dealer, says that while he has a larger stock than ever, he could still stand a lot more, and especially of certain models which he is finding almost impossible to get. Mr. Strasburg is watching every phase of his business closer than ever—both the selling and collecting end. In other words, he is really after quality instead of quantity business. He wants to avoid repossessions and troubles later in locating anybody of doubt.

Sam F. Lind, the local Columbia branch manager, is showing a number of new models which the Columbia have added lately. Sam is very happy these days, as this year will be a record one for the local branch. In the past three months Sam has received a number of offers from leading firms who were willing to spend unlimited money to get a Columbia agency, but he had to turn them down. "We are not trying to take on more accounts in Detroit, but we prefer to protect those already established," he said. "While I have to turn down some wonderful offers, it pleases me to know that these people at least selected the Columbia."

Dealers selling Pathé phonographs and records are getting unusually good service and shipments, in spite of war conditions. The Michigan jobbers—Williams, Davis, Brooks & Hinchman Sons—are carrying enormous stocks in their warehouses, having anticipated some time ago that there would be a time when manufacturers would of necessity slow up on their production on account of labor conditions, etc. They report an excellent business and most satisfactory prospects.

In the recent drive for contributions to the Detroit Patriotic Fund the talking machine stores co-operated most liberally. Not only did 100 per cent. of the Detroit dealers subscribe, but many of them went so far as to underwrite the subscriptions of their employes who pledged themselves to pay on the monthly instalment plan. The Edison Shop employes hit well over the thousand-dollar mark. The employes of Grinnell Bros. went around \$7,000, while the J. L. Hudson Co. employes, including those at the music store, went up to nearly \$50,000.

The Buhl Sons Co. and Geo. C. Wetherbee & Co., who feature the Vita-Nola talking machine, made by the Vitanola Talking Machine Co., of Chicago, report an increasing demand for these products in this section of the country. The attractiveness of the styles and the satisfactory tonal results have won for them a special clientele.

DISTINGUISHED VISITORS TO CITY

D. A. Creed, vice-president of the Chicago Talking Machine Co., Victor wholesalers, and G. P. Ellis, sales manager of this company, were visitors to New York to attend the annual stockholders' meetings of the New York Talking Machine Co. and the Chicago Talking Machine Co., and also the regular directors' meetings of the two concerns. These visitors from the "Windy City" spoke optimistically of the business situation in the West, stating that the outlook is very satisfactory, with Victor dealers closing a business that is limited only by the available merchandise.

W. I. Smith, of Sebree, Ky., has recently secured the agency for the Edison phonograph.

SHORTAGE OF STOCK RETARDS BUSINESS IN CINCINNATI

Dealers Complain of Lack of Machines and Records—Hope Lack Will Be Remedied This Month—Crystola Co.'s Latest Novelty—Vocalion Expansion—Columbia Co.'s New Wholesale Quarters

CINCINNATI, O., June 4.—A rather serious shortage of records occurred during May, this causing quite a slump in the volume of business for the month. A like condition prevailed in the machine end, which has not improved to any extent with the change in the calendar month. All the dealers report the record situation to have improved with the entrance of June.

Between fighting for sufficient supplies and trying to keep enough help around the shops the man in the talking machine field is kept quite busy these days. There is a general tendency on the part of all to anticipate some kind of a bump these days and to try to overcome the annoyance without the commotion a change might have caused in the old days.

The Crystola Co., this city, is experimenting with something new in the talking machine line. The exact idea of the change, this being an attempt to get away from the conventional phonograph atmosphere, has not been made known as yet. It is intimated that the new machine will be much more musical. The company is figuring on getting out new advertising material, one being a folder of four colors.

D. W. Martin, Washington Court House, O., has become one of the dealers for the John Church Co.'s phonograph, spending part of last week in the city arranging for his supplies.

A 10 per cent. increase in the price of all things that go to make up a phonograph is predicted by C. W. Neumeister, Cincinnati, representative of the Otto Heineman Phonograph Supply Co. He believes the boost will be along very shortly. In his opinion any person building phonographs now will double his money in the next six or eight months.

"A splendid business in May" is the report of C. L. Byars, of the local Vocalion forces. He reports a substantial increase for the month of May over the same month of last year. These results were especially gratifying in view of the fact that owing to the shortage of help the sales force was operating throughout the month considerably crippled by lack of salesmen.

"It is my impression," says Mr. Byars, "that one of the most serious problems facing the retail phonograph business during the coming months is the securing and holding of men of selling ability. There is a probability that women will have to be impressed into the outside selling in the phonograph business if the dealer intends to continue his aggressive policy of following up the prospective buyers on the

outside. Just how well this is going to work out of course can only be learned through experience. As a general rule, girls do not prove very satisfactory for outside selling work, but I am inclined to think that the phonograph dealer is going to have to start a regular training course for women, and gradually train them for this class of work."

The new wholesale headquarters of the local Columbia Graphophone Co. is now a reality. The company has moved to its new quarters and is located at 427-29 West Fourth street, three blocks west of present location. The retail department will continue to operate as formerly at the old address, 117-119 West Fourth street, where the local Dictaphone offices will also be located for the present.

The wholesale department will take up six floors and the basement of the new building and will have every facility for handling all orders with dispatch and accuracy.

During the moving period business was a little retarded and Manager Dawson stated to our representative that he desired to take this opportunity of thanking the trade for the consideration extended the company during that time and to extend the hospitality of the new headquarters to all Columbia dealers.

The increase in business during the past year has made this move imperative and the outlook is greater than at any time in the past. With the enlarged quarters and adequate facilities for handling the orders, etc., Columbia "Service" is assured.

F. K. Pennington, assistant general sales manager of the Columbia Graphophone Co., spent a day at the local Columbia store injecting "pep" and enthusiasm into everyone and his usual good humor permeated the entire store. Mr. Pennington is quite a favorite among Columbia employes and his visit was greatly enjoyed by all.

Miss Stella Green, formerly connected with the local Columbia store, has again cast her lot with the company as assistant to Manager Arrington of the Dictaphone department and was cordially welcomed by all the old employes.

William C. Wornhoff, who for some time has conducted the Phonograph Shop at 7512 Madison street, Oak Park, Ill., has rented the store at 131 Marion street, Oak Park, and has occupied the premises with a big line of Edison phonographs and Columbia Grafonolas. Pianos will also be handled in the new quarters.

HELPS IN PATRIOTIC CAMPAIGN

How the Pathé Phonograph Was Effectively Used in the Recent Third Liberty Loan Campaign in Philadelphia—Scored Big Success

PHILADELPHIA, PA., June 2.—The Pathé phonograph manufactured by the Pathé Frères Phonograph Co. was an active factor in the recent Third Liberty Loan campaign, being used to excellent advantage by the local Liberty Loan committee. The instrument was "on duty" in front of the Liberty Statue during the four weeks of the Liberty Loan drive, and was the center of attraction during this period.

The loan committee was so enthusiastic regarding the success of the Pathé phonograph at this particular location that when the Phila-

Pathé in Front of the Liberty Statue

delphia Pathéphone Co., local distributors for the Pathé product, wanted to send the instrument to some other point, the members of the committee offered to lease the machine for the balance of the campaign. This offer was declined, however, as the company preferred to let the machine remain where it was without any charge, in view of the splendid cause for which it was working.

Handling a good line helps. Handling one that is well known brings reputation to the retailer and more business.

The Difference Between

Phon d'Amour

and other Phonographs is resultant from difference in construction; the patented features of Phon d'Amour being exclusive.

Amplifier

The Amplifier in Phon d'Amour

is of an entirely new type and one never before used. It is constructed in two chambers, being walled about with violin wood and is constructed upon the same principle as that of a violin. Not only is the volume in "Phon d'Amour" materially increased, but this is accomplished without any sacrifice of the characteristic overtones of voice or instrument.

The Quality Phonograph

A POPULAR MEMBER OF THE TRADE

Joseph F. Collins, Sales Manager of the Pathé Frères Phonograph Co., Has a Host of Friends Who Are Glad to Welcome Him

We take pleasure in presenting herewith Joseph F. Collins, sales manager of the Pathé Frères Phonograph Co., and one of the most popular members of the talking machine indus-

Joseph F. Collins

try. Although a young man in point of years, Mr. Collins can well be considered one of the "veterans" of the industry, for he has been associated with the talking machine industry from practically its earliest days of development and possesses an invaluable knowledge of every phase of manufacturing and merchandising.

For the past four years Mr. Collins has been associated with the Pathé Frères Phonograph Co., and in the capacity of sales manager has been an important factor in the success achieved by Pathé products. He has visited the trade in all parts of the country, and his many years'

experience has enabled him to render practical assistance to Pathé jobbers and dealers in developing a market for these popular products.

For the past year Mr. Collins has been devoting a considerable portion of his time to calling upon Pathé jobbers and working in close touch with the members of their sales forces. He has co-operated with the jobbers in the development of their Pathé activities, and has spent quite some time with the various sales staffs while they were perfecting their campaigns for developing Pathé business. He is a Pathé enthusiast, heart and soul, and this enthusiasm is reflected in the fact that Pathé jobbers everywhere are frequently requesting Mr. Collins to visit their cities in order that their travelers may also be instilled with his particular brand of enthusiasm.

LINE OF MOTORS RESTRICTED

The Otto Heineman Phonograph Supply Co., Inc., has just issued the following important notice: "Owing to conditions in the raw material market, due to the necessary Government work going on at present, coupled with the scarcity of experienced labor, it has been deemed advisable to restrict our line of motors to certain types. We will supply motors No. 33, No. 77, and No. 44—this variety will cover a complete line of phonographs from small ones to the very best. By confining our production efforts in this manner, we can assure our customers the very best of service and deliveries."

The Meisselbach division of the Otto Heineman Phonograph Supply Co. has also issued a similar notice, the second paragraph of which reads as follows: "We will supply motors No. 10, No. 12, No. 16 and No. 19 without automatic stops—this variety will cover a complete line of phonographs from small ones to the very best."

A worthy Hindu maxim says: "Work as they work who are ambitious. Respect life as they respect it who desire it. Be happy as they are happy who live for happiness alone."

WIDDICOMB PHONOGRAPHS POPULAR

Manager Howard Extending Agencies for This Instrument Throughout the Country—To Exhibit at National Furniture Show June 25

GRAND RAPIDS, MICH., June 5.—The phonograph division of the great Widdicomb Furniture Co. here is exceedingly busy, having received very large orders from its recently-appointed distributors as well as from representatives throughout the country.

Manager E. C. Howard is highly pleased with the reception so far given his efforts to produce a Widdicomb high-grade phonograph of exceptional merit both as to tone, construction and cabinet design. The beautiful showing of art cases has in itself won many friends to the line. The company now have in preparation several beautiful new higher-priced art models, samples of which they expect to be able to exhibit at the furniture show at Grand Rapids, which commences June 25.

The company now has its phonograph production facilities fully organized and has of late been able to make very prompt shipments to its trade.

ISSUE ATTRACTIVE SUPPLEMENT

The Emerson Phonograph Co. has issued an attractive supplement featuring its new 65-cent records. This supplement has an unusually artistic cover which cannot fail to attract the attention of music-lovers who receive it in the mails from Emerson dealers, or who notice it in the dealers' warerooms. This supplement lists patriotic hits, popular song hits and selected dance records, as the company is issuing only this class of music in its 65-cent records.

These 65-cent Emerson records are meeting with pleasing success throughout the country, and the artists recording for this library include some of the most popular artists now making talking machine records.

MILWAUKEE NOTES IMPROVEMENT IN STOCK SITUATION

Dealers to Maintain Prices—Death of Geo. H. Eichholz Regretted—Important New Sonora Agents—Badger Business Grows—Kesselman-O'Driscoll Co. Increase Capital—Puritan Phonograph Popular

MILWAUKEE, Wis., June 10.—Although not much improvement can be noted in the promptness of deliveries of machines, the situation in this regard as reported by Milwaukee wholesalers and jobbers is relatively much better than that concerning records. During the last three or four weeks the local trade has encountered unusual difficulties in obtaining adequate stocks of records, due to the enormous demand everywhere and the inability of factories to produce them in sufficient quantities to fill orders. It is said that the number of back orders unfilled at this time is undoubtedly the largest known in the history of the talking machine trade.

The demand for machines in recent weeks has been well maintained and jobbers say that their bookings exceed those of the corresponding period of last year all the way from 20 to 40 per cent., according to make. Certain limitations surrounding both the manufacture and transportation of machines, arising from wartime conditions, make it appear that for the time being the shortage of goods can hardly be relieved. At the same time the public is demanding talking machines and phonographs in an enormous volume, also due directly to the effects of war time, which again is proving to be a great stimulant to music.

An encouraging factor in the local retail situation at this time is the determination of Victor dealers to decline to take advantage of the opening given them to disregard list prices. No Victor dealer in Milwaukee desires to see a price-cutting war and all are agreed that the only way in which they can continue to do business on a scale of reasonable profit is to observe the catalog lists on machines, records and supplies. Giving of discounts now is frowned upon by the Government and, in addition, every modern business principle is against such practices. Victor dealers are "hand-picked" business men of high caliber, for the greater part, and as such they like to observe high-class principles of doing business. Every argument appears to be in favor of adhering to advertised prices, and none against it. Promiscuous discount-giving has started many a price-cutting war that has been the ruination of many a business, and Milwaukee Victor dealers want none of that, especially in times such as these when every resource must be put into play to assist the Government in winning the war in the shortest possible time. It would not be surprising, of course, to find one or two retailers attempting to attract business by discounting lists, but in doing so they undoubtedly are sealing their own doom as business men of standing.

The Milwaukee Association of Music Industries, recognizing the value of the sessions to dealers in talking machines as well as pianos and other musical instruments, was officially represented at the annual convention of the National Association of Piano Merchants in New York, June 4 to 7. The delegates were Paul F. Netzow, with Leslie C. Parker, manager of Gimbel Bros.' Victor department, as alternate. A special meeting of the Milwaukee Association will be held shortly to hear the reports of the New York meetings.

One of the most profound shocks ever experienced by the Milwaukee talking machine trade was the announcement made on Memorial Day of the sudden death of George H. Eichholz, one of the best-known Victor and Edison dealers of Milwaukee and the Northwest, and a pioneer in the trade. Mr. Eichholz was stricken with a neuralgic affection which is believed to have attacked his spine. He complained of feel-

ing ill on Tuesday, May 28, and took to his bed early on Thursday morning, May 30, his condition became acute and he passed away before physicians were able to administer further aid.

Mr. Eichholz was born in Germany in 1870, and when twelve years old came to America with his parents, locating in Milwaukee. When the first talking machine store in the city was opened by Lawrence McGreal in 1898, Mr. Eichholz left the life insurance business to enter his employ as a salesman. This was in the days of the first Edison machine. After five years in the McGreal organization Mr. Eichholz went into business for himself at 542 Twelfth street, where the store is still located. He was appointed retail dealer in both the Edison and Victor, retaining the connections up to the present. In 1912 he admitted as a partner Frank Preuss, a faithful assistant, who, with Mrs. Eichholz, will continue the business.

Mr. Eichholz had intended to be in New York for the national conventions during the first week of June, principally to attend the Edison gathering. He was one of the founders and a commanding figure in the Milwaukee Association of Music Industries. The Middle Western talking machine trade has had few members so widely and favorably known as he.

The Yahr & Lange Co., distributor of the Sonora in Wisconsin and Upper Michigan, recently announced the appointment of the J. B. Bradford Co., 411 Broadway, Mason & Hamlin representative, as a new downtown retail dealer. The Bradford Co. operates a branch store at 429 Mitchell street, Juneau Theatre Building, and has been dealing in the Victor. Fred E. Yahr, president of the Yahr & Lange Co., who is giving his personal attention to its Sonora business, published a half-page advertisement in the Milwaukee papers, giving representation to the eight Sonora retailers who are located in this city and county.

Always one of the busiest places in Milwaukee, the offices and stockrooms of the Badger Talking Machine Co., Victor jobber, 135 Second street, continues to show signs of further rapid growth. The expansion of its trade has required constant enlargement of its working forces, both in the field and at the "base." Harry A. Goldsmith, secretary of the company, says this is going to be its very best year, and when he makes declarations of this kind they invariably are fulfilled. The demand for Victor goods is so large that it cannot be entirely filled, this being true especially of records at this time. However, the situation merely affords the big jobbing house to demonstrate "Badger Service" at its best, and the splendid manner in which Victor retailers have been accommodated has increased the list of patrons to an even greater extent than before in recent weeks.

Miss Julia Wolf, in charge of the Aeolian-Vocalion department of the Edmund Gram Music House, has received word from her brother, who has been in France for more than three months, that he has been promoted from corporal to sergeant of his unit of Wisconsin field artillery.

The Kesselman-O'Driscoll Co., 258 West Water street, better known as the Victor Palace, has been obliged to increase its capital stock from \$75,000 to \$100,000 because of the rapid growth of its business since it moved from the

northwest side to the downtown business district less than a year ago. At its new capitalization, the K.-O. Co. is one of the largest Victor dealers in the Northwest—and still growing. Louis M. Kesselman, president and general manager, is an enthusiast over the Victor's future in Milwaukee, due to the tremendous increase noted especially since the beginning of America's participation in the war.

Brunswick trade throughout Wisconsin and Upper Michigan continues to enjoy a most healthy growth, and Thomas I. Kidd, manager of the local branch of the Brunswick-Balke-Collender Co., has nothing but good words to say concerning business conditions in his territory. The list of Brunswick dealers is constantly undergoing enlargement as dealers see the advantages of handling the line with its splendid backing. Mr. Kidd has a happy faculty of selecting representatives of the highest standing in their respective communities and this has increased prestige mutually for product and dealer.

Kroeger Bros. Co., operating Pathéphone departments in each of its four big department stores, has increased its capital stock from \$350,000 to \$2,500,000. The organization has grown from two stores to four within the last year, requiring the large capital extension. A. Levitt is general manager.

"A prophet is without honor save in his own country" is not applicable to the Puritan phonograph, manufactured by the United Phonographs Corp., Sheboygan, Port Washington and Grafton, Wis., judging from the reports of business made by Charles J. Orth, 504 Grand avenue, Wisconsin and Upper Peninsula distributor of the Badger-made line. Mr. Orth again enlarged his traveling force during the past month and himself spent considerable time in the territory because of the great interest displayed in the Puritan. Mr. Orth is engaged in an interesting friendly competition with his brother, James B. Orth, Chicago, also a large wholesale territorial representative of the Puritan, and the two are working tooth and nail to create targets for the other to shoot at and improve upon.

Schefft's Victrola Shop, 849 Third street, has taken a leading part in the organization of the Upper Third Street Commercial Association, an organization of retail merchants who desire to maintain the prestige of Upper Third street as "Grand Avenue's Only Rival" against the encroachment of leading business thoroughfares in other parts of the city. Ernest Schefft was chosen a member of the executive committee of the association at the first election.

News comes from Eau Claire, Wis., that the Sailstad-Payson Piano Co. is engaging in the manufacture of talking machines, to be marketed under the trade name of Multitone, with a universal reproducer.

"The good old reliable Columbia grows more popular every day," said A. G. Kunde, 516 Grand avenue, this city, distributor of the Columbia line, in reviewing trade in recent weeks. "We are especially hard pressed for stocks of records, although we have none too many machines to spare. If business keeps up this way for six or seven months longer we shall easily outstrip our best previous year and show a splendid surplus. There's nothing the matter with Columbia business."

The Industrial Appliances Corp., New York, has been incorporated with capital stock of \$10,000 to manufacture phonograph devices. The incorporators are N. V. Rothenberg, J. J. Sullivan and M. C. Kahl.

MEISSELBACH MOTOR CATALOG

Most Complete and Interesting Volume Giving
Fullest Details of the Meisselbach Line

The Meisselbach division of the Otto Heine-man Phonograph Supply Co. has just issued a handsome catalog featuring the motors, tone arms and sound boxes that comprise the Meisselbach line. This catalog is complete in every detail and is particularly worthy of praise for the clear-cut illustrations that are featured and the detailed specifications that accompany each illustration.

The Meisselbach motor has for many years been one of the most popular and successful motors in the talking machine industry, and has won recognition as a dependable motor that can be used by the manufacturers of high class machines with every confidence in its ability to render service and satisfaction. Among the Meisselbach motors that are presented in this new catalog are motors Nos. 9, 10, 11, 12, 15, 16, 17, 18 and 19. All of these motors are specially adapted for use in their respective fields, and in addition to featuring illustrations of the motors together with specifications, this catalog also shows the component parts of each motor with their designated numbers so that duplicate parts may be ordered with maximum convenience and ease.

There are also listed in this catalog some of the popular Meisselbach accessories, including speed regulators, turntables, turntable brakes, winding cranks, etc. Two pages are devoted to the Meisselbach Universal tone arms Nos. 97 and 95, which have achieved signal success, and another page shows the Meisselbach sound boxes, jewel needles and attachments.

The foreword of this catalog gives an interesting history of the Meisselbach motor and some of the fundamental qualities that characterize this product. Several paragraphs from this foreword read as follows:

"For thirty years A. F. Meisselbach & Bro. (taken over in May, 1917, by the Otto Heine-man Phonograph Supply Co.) have been manufacturing high-grade mechanical devices. In the production of mechanical devices, it is experience that counts. Clever design, good materials, able workmen are important, but it is long experience which welds all these elements together, and gives the final perfection to the product. It is because of these thirty years manufacturing a large number of items of kindred character, that to-day this same factory is able to turn out a phonograph motor of the highest excellence in every part, and so harmonize and adjust part to part that it satisfactorily fills the phonograph needs and can be counted upon to give perfect performance, even in the most adverse conditions. A. F. Meisselbach & Bro. have reached this position of enviable pre-eminence largely because of the

expert guidance of their activities and the capable and experienced inventors and mechanics that have been associated with them. The best metallurgical and technical experts of the country have continuously worked with the experimenters and designers of the Meisselbach products with the result that no item in any field has been put out which has not been subjected to the very highest scientific and practical tests.

"While the firm has produced items used in many branches of science, art and sport, it has made a special study of the conditions and the requirements of the phonograph trade, and hence the motors, sound boxes, tone arms, needles and other talking machine accessories which are described in the following pages of this catalog, represent really the cream of the factory's efforts. The factory's ideal has been to turn out talking machine motors and accessories that should prove themselves in every way superior in design, workmanship and operation to anything heretofore produced, either in this country or abroad. This reputation has actually been obtained, and is being in every way sustained and improved upon by the present organization.

"No piece of mechanism produced, not even a watch, is called upon to meet so many exacting and practical requirements as a phonograph motor. It has to meet not only the demands of the laws of mechanics, but also the still more rigid demands of the laws of music. It must be miraculously precise and delicate in its operation and yet must be able to endure the handling of the most inexperienced and rough person. For satisfactory musical reproduction the motor must turn the turntable with absolutely perfect rhythm. A shade of hesitation throws the music entirely off key, and the rendition is spoiled. Absolute perfection of speed regulation is therefore imperative. Silence in operation is another imperative essential. Any clicks, or grindings or whirrings in the mechanism will be heard through the music and spoil the rendition. These are only two of the many unrelenting specifications imposed upon the motor maker to the meeting of which this factory has successfully devoted their efforts.

"Meisselbach' motors are super-silent in operation, super-steady in regulation and super-sturdy in construction. They wind easily and silently, are long playing, and in every way eliminate for the phonograph owner all mechanical anxieties.

"The designing and perfecting of a mechanical device is only one operation of the problem. An experimental motor or two, of the highest perfection such as might be turned out by a group of expert mechanics, might not possibly turn out satisfactorily in quantity production. This side of the matter has had special attention, and the wide experience gained in the manufacturing of various kinds of devices has enabled this factory to develop a motor upon the most practical commercial production basis. This has been a matter not only of perfection of design in the motor, but also of inventing and developing production machinery. Rough or approximate work is incompatible with the smooth running and silence absolutely essential in a talking machine motor. All gears must fit, and every dimension must be exact to the fraction of a thousandth of an inch. Therefore, the delicate gauges, carefully tested templates and the accurately adjusted automatic machinery employed in the manufacture of 'Meisselbach' motors, are important factors in their ultimate success.

"Each of these machines is absolutely designed for the purpose as, for example, the hobbing machines for making the spur gears of special design, particularly adapted for the delicate wheels of the phonograph motor. Hobbed gears, after long experimenting, were proved to be the only type that would give the hair-breadth precision required for the true and smooth running of the phonograph motor."

The order of the Australian Controller of Customs, requiring a full statement in the invoice covering goods shipped to Australia of the value of those goods in the country of exportation at the date of the invoice, is to be strictly enforced after June 30 on all shipments subject to ad valorem duties, according to a statement of the official representative of the Australian Department of Trade and Customs in this city.

JENKINS USING MOTOR TRUCKS

Kansas City Music House Solves Transportation
Problems by Inaugurating Delivery by Motor
Truck to Its Various Branches

KANSAS CITY, Mo., June 1.—The initial step toward utilizing the highways as a means of reducing the burden of railroad transportation of freight was taken by the J. W. Jenkins' Sons Music Co., recently, when a G. M. C. truck made the trip to Tulsa, Okla., carrying a load

One of the Jenkins Delivery Trucks of merchandise. The trip was made in good time, over good roads, and no difficulties were encountered.

A. J. Cripe, manager of the Tulsa branch of the firm, found that in order to give better service and actually cover his rapidly growing field it would be necessary to have a truck for delivery and transfer work. With this in mind, W. H. Cannon was sent to Kansas City and given a two weeks' course in handling pianos. The company, which has a squad of seven G. M. C. trucks to take care of the heavy delivery and transfer work here, then provided a similar one for the Tulsa branch, loading it with two pianos and a full equipment for transfer work, such as derricks, block and tackle, grand boards, etc. On the sides of the truck were large signs bearing the inscription, "Our Own Truck Line, Kansas City to Tulsa."

Mr. Cannon started Monday morning, May 20, at six o'clock, and arrived in Tulsa Tuesday evening without any mishaps.

NEW COMMITTEES ARE APPOINTED

At Meeting of Executive Committee of Talking
Machine Men, Inc.

At a meeting of the executive committee of the Talking Machine Men, Inc., held last month the following committees were appointed by President Coughlin:

Outing committee: Messrs. Leins, Galuchie, Lazarus, Birns and Hunt.

Membership committee: Messrs. Galuchie, Riddle, Davin, Lazarus and Kaiser.

Legal committee: Messrs. Mielke, Kurtz and Leins.

E. G. Brown, of Bayonne, N. J., was elected secretary.

Willingness to learn from others displays intelligence.

Columbia Grafonola

in Period designs

JUST as Columbia Records give you the best music of all ages, so Columbia Grafonolas bring you the most beautiful designs of all artistic periods. More than ever American women are giving careful attention to the harmonious furnishing of their homes. In response to a genuine need, the Columbia Grafonola has led the way in worthily adapting to the uses of good music the best designs of the world's master craftsmen.

Gothic Design
of Columbia Grafonola

THE originals of the twenty-three Period Grafonola designs now available are among the chief treasures of American and European art museums. All artistic periods are represented, from Gothic and Elizabethan to Adam and Chippendale. Thus you may be sure of obtaining a design that will fit in with the decorative treatment of your home.

Italian Renaissance Design
of Columbia Grafonola

These Period Grafonolas have a superb richness of tone—full, smooth, and pure, as the music floats out through the silken inter-spaces of lattice or grille. All are electrically equipped, the motor starting and stopping automatically. As musical instruments, no less than as artistic cabinets, they are worthy of a place in any home. Prices of Period Grafonolas range from \$250 to \$2100; Standard models from \$18 to \$250.

RECORD TRADE ASSUMES LARGE DIMENSIONS IN ST. LOUIS

Demand for the Past Month Has Exceeded All Expectations—Salesmanship in Machines Now Counting More Than Ever—Details of Mailing Division—Novel Check on Record Publicity

ST. LOUIS, Mo., June 5.—The talking machine business went through the Red Cross drive in this district, which was the first "over the top," in splendid shape, but according to recent reports there followed a lull after that, lasting until the first of June, when business again began to pick up. But despite the let-up and the handicap of a shortage of machines of particular sizes, a number of the houses report that May of this year will exceed all other Mays.

And this is considerable of a record, too. None would have predicted such a thing two months ago when, with sizes then broken, it was brought home to the dealers that there were to be fewer machines manufactured than for many months previous. Dealers then imagined that their totals would shrink immediately, but they did not foresee the record demand. A number of dealers in this city are now selling more records monthly than the total of their machines and records three years ago, and some are selling more records than machines, in figures.

The record business is a curious proposition. The people have money and they are bound to spend it and they, apparently, want music. They come to the record room dead set on a certain number they have seen advertised recently but which is out of stock. Then enters a bit of salesmanship, if it exists in the demonstrator. J. F. Hunleth read a paper at a Tri-state Victor Dealers' Association meeting in which he outlined, taking several current records as samples, how nearly old records were like new ones, and told of incidents in which older records had proven the first choice when heard in contrast with the new ones. He suggested this because often it is impossible to obtain enough of the new records to meet the demand. A number of dealers recently have been bringing this fact before their help and the result has been astonishing in the selling of what was considered dead stock and selling records of which jobbers had a supply. Dealers who handle several makes of records are having these listed as to common numbers, so that they can meet the demands from the most ample stock and still satisfy the customer. Sometimes a customer insists in having the record asked for or none and goes elsewhere, but the chances are that if he is a few days late in asking for a popular record, some one will get the chance to substitute for him, for the stocks of those records which strike the popular fancy are quickly exhausted, as the distribution is practically equal.

Salesmanship in machines now is counting more than it ever has before, because all local stocks are broken on certain sizes and finishes which are those chiefly in demand, and the task becomes that of turning the customer to something in stock, perhaps to another make, for the exclusive dealers are becoming fewer daily. Practically all of the larger dealers have a second line and some of them are buying on the market lots of machines that appear to be satisfactory, regardless of the name.

Manager Staffelback, of the Hellrung & Grimm House Furnishing Co., Pathé jobbers, has organized a mailing division which he has placed at the disposal of his dealers. The plan is that the dealer supplies the names, the mailing division will prepare the monthly supplements, special releases and other record advertising, all with the dealer's imprint, and address and stamp them and deliver to the dealer by parcel post. All the dealer has to do is to break the wrappings and place them in the postoffice. The idea of sending them to the dealer in package is to give him the advantage of the local postmark and to assure him that the work is being well done. This mailing division has been established to meet the complaints of dealers that they have not the extra help needed to get out the monthly bulletins when they come. As help becomes harder to get, few small establishments have any elasticity in their working

force, most forces being driven to keep up the regular work, consequently the bulletins lay in the corner until too old. The mailing division is scheduled to work at cost and it is believed that after the merchant has paid for the work and stamps, he will not neglect the mailing.

Manager Guttenberger, of the Vocalion department, at Aeolian Hall, says that the newly established jobbing department is meeting with extraordinary success. The recent improvements in the Vocalion and the fact that there is a Vocalion record is making a big hit. He says that already a number of persons have come into the store to hear Vocalion records played on a Vocalion machine, saying that while they do not own a Vocalion, they have heard of this record and are anxious to hear it. The later comment never indicates a disappointment, but many go out of their way to praise the product.

Manager Irby W. Reid and wholesale manager Salmon of the Columbia Co. visited the Columbia factory last month to see what was doing and to get a better understanding of the trend of the trade from a higher up viewpoint. They returned well satisfied with the prospects and were kept busy for a number of days catching up with the business. The Columbia jobbing trade is especially pleasing and deliveries have been of a good average up to date.

Customers are the only trouble at the Mozart factory, according to President Fitzgerald. And the trouble with customers is that there are so many of them and they want so much. Trade has been exceedingly satisfactory and the factory has overcome the handicap of the fire, of some months ago, and is doing wonders toward meeting the demands.

Albert Vogel, for eight years a member of the talking machine staff of the Thiebes Piano Co., joined the Marines and left June 4 for training camp.

General Manager Goldberg and Retail Manager Schlude, of the Silverstone Music Co., attended the Edison convention in New York this month. President Silverstone is going in for golf, motoring and other pastimes that keep him outside much of the time in an effort to get his strength back. He is again feeling in very good health, but has been warned by his doctor not to get too anxious to get back at work.

Manager Ditzell, of the Famous & Barr Victrola department, tried a novel means of checking record advertising. He selected a record not on recent current lists, described it as to music and other features at considerable length, but he took especial pains not to mention the name of the record or give any wide clew to the name. The result was rather satisfactory. There were numerous telephone calls from persons wanting to know what the name of the record was, some informing him that he had spoiled the ad by forgetting to put in the name and other persons frankly came to the department and said their curiosity had been aroused and asked that the record be played for them.

The Kieselhorst Piano Co. is completing the housing arrangements for the two lines of records, Pathé and Columbia, recently added to the Victor as on sale there. The adding of these two lines is going to make the first floor rather crowded for the present, but as soon as men can be spared from more important work, additional record sale space will be provided.

The announcement made the middle of the month that Vocalion records were on sale at Aeolian Hall led to a very satisfactory demand from Vocalion owners. The verdict reported by purchasers was more than satisfactory—"it was extremely pleasing"—according to Manager Guttenberger.

Ben S. Philips, for a long time a salesman and later retail manager for the Columbia Co. here, is on the Vocalion staff at Aeolian Hall.

The Vita-Nola talking machine made by the Vitanola Talking Machine Co., Chicago, which is featured locally by the Rice Stix Drygoods Co., the Witte Hardware Co., and the Phoenix Furniture Co., is in excellent demand.

Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the sixteenth in a series of articles on the general subject of the musical possibilities of the talking machine. The aim of the series is to develop these possibilities from all angles, thus opening up fields for sales expansion oftentimes neglected wholly or in part.—Editor.]

GEORGE FREDERICK HANDEL

The puristical fuss-button might insist on writing it "Georg Friedrich Haendel," but a man who spent only one-third or less of his life in his native Saxony and more than forty years in continuous residence within the limits of the British Isles, who became a naturalized Englishman, spoke, thought and wrote English only, and who composed music in a style peculiarly and characteristically English upon themes which only Englishmen could at the time have relished, can hardly be called aught else than an Englishman. Such George Frederick Handel undoubtedly considered himself and such his whole marvelous career has proclaimed him ever since to be.

It has been well said that no one man has ever had a more extraordinary influence upon the social life of his community. To this day British and the American social life has been astonishingly under Handelian influence in many unsuspected ways. The oratorio of "The Messiah" has formed the most important element in the art-feelings of uncounted thousands of English-speaking people for nearly two hundred years; and its drawing power is as great to-day as ever. The dead are buried to the accompaniment of the "March from Saul," the living sing in Church the hymn-tunes of Handel, the great are welcomed with the strains of "Hail to the Chief" and the musical daughters of uncounted proud parents have struggled through the strains of "Lascia ch'io piangia" and "Angels ever bright and fair."

"The Messiah"

Each Christmas time, in innumerable towns and cities of the United States and Great Britain, great choral societies and humble church choirs alike are to be found giving, wholly or in part, the immortal measures of "The Messiah." The music of Handel is literally the most Anglo-Saxon music that can be imagined and we are perhaps not without justification if we claim Handel for ourselves and decline to be ashamed of our pride in him.

Naturally, the recorded music of Handel available to the owners of talking machines is considerable in quantity and particularly good in quality. Naturally, also, the interest which the dealer should have in becoming acquainted with Handel's music more than superficially, and in promoting its steady sale, ought rightly to be very large. Hence, some few of the very interesting facts about an intensely interesting life and its musical product may rightly claim a place here.

Youth

George Frederick Handel was born at Halle in the year 1685, and was therefore contemporaneous with J. S. Bach, who first saw the light during the same year in the little town of Eisenach. The young George Frederick had for father a worthy but sadly prosaic surgeon, who plied simultaneously the trade of barber. It was not expected that the young boy should be destined for any calling save one of respectability and worth; but genius laughs at bonds.

The lad soon found his own choice and it was music. Forbidden to learn, he discovered in the lumber room of his home, hidden away in an attic, an old broken down spinet. On this he secretly taught himself to play. There is a well-known picture by the British artist Dicksee showing an attic room at midnight and at its door a troop of half-dressed, half-frightened people who have burst in carrying candles and a blunderbuss. The candle light falls on a

slender child seated before a spinet, and the title is "The Child Handel." That was the beginning of one of the most remarkable careers the world has yet witnessed.

The worthy Doctor Handel did not without much reluctance, after much persuasion, agree to permit his son to follow the beggarly profession of music, as he sincerely thought it to be. But a fortunate accident, leading to the child's talent being brought to the attention of the Doctor's princely employer, settled young George's fate and from thenceforth he was devoted to the study and practice of the divine art. His early career was not very exciting and about all that need be said about it is that young Handel made himself the best organist and very nearly also the best harpsichordist of his age, while he likewise became no mean performer on the violin and could even sing quite respectably. He was organist at the university of his native town, when only fourteen years old, and when his father died about this time began to support himself wholly from his musical earnings. In the year 1705 he actually composed and brought out, though without much success, two operas in the then prevalent Italian style, thin and insipid enough in all conscience, but remarkable productions for a boy. But greater work was in store for him.

Italy

In those days the music Mecca was Italy. There the best singers, instrumentalists and composers were to be found, in generous quantity. Young Handel much wanted to get over the Alps but he was twenty-one before he could manage it. Once there, however, Il Sassone (The Saxon) as he soon came to be called, swept all before him. His extraordinary talents astounded the Italian virtuosi and made for him a fame that reached from one end of Europe to the other. His early ventures in Italian opera were further extended during this stay and he for a time became quite Italianized. But this phase of his career was to be only incidental.

"Signor Handello"

In the year 1710 Handel, who had meanwhile become court-musician and composer to the King of Hanover, obtained leave to go to Eng-

land, whither he had been invited on the strength of his now European reputation. He was to compose for his debut an Italian opera and it is a significant commentary on the artificiality and insipidity of public taste that it was thought proper to introduce him as Signor Handello, not as Mr. Handel. In fact, Handel was nicknamed both Mynheer Handel and Signor Handel later on during his British career, but these were rather affectionate pet-names. "Signor Handello," however, meant that a composer had no chance unless he was an Italian or supposed to be one. England has not always been free, in later days, from this affectation. Good honest Dan Foley, one of the finest Irish singers that ever lived, thought it well to call himself Signor Foli, and then there was Signor Sullivan, otherwise Tim Sullivan, bless him!

Anyhow, the "Signor" came to London and found that the enterprising Aaron Hill, who had taken the new Haymarket Theatre and was putting on a season of the fashionable Italian opera, had already let it be known that the Signor would have a new original opera ready for the opening; which was all of fourteen days off! Handel set to work and got it out, and the result was Rinaldo; certainly the finest thing that had ever been done of its kind and one which abounds with still lovely music. Of course, a modern opera audience would find Rinaldo dreadfully tedious, simply because taste has changed and we no longer can sit through an interminable series of recitatives and set airs. Still, you will find recorded in each of the leading catalogs, the gem of the opera "Lascia ch'io piangia," sometimes Englished as "Mid' lures, mid' pleasures," sometimes called "Leave me to languish." Look for it under Rinaldo and you will find it in the Victor, the Columbia and the Edison catalogs.

This record, whether you take Schumann-Heink's, Julia Claussen's or Adelaide Fischer's interpretation, gives a perfect example of the ancient style of Italian operatic music. It consists of a recitative followed by an air. A recitative is a short declamatory passage in which some point vital to the story is brought

THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 53)

out. It is a simple melody intoned by the voice and set to words that explain the stage of the action reached. The voice sings with no accompaniment save that of an occasional chord brought in to give emphasis and support. This is followed by the air or song proper. In the case we are considering, the air "Mid' lures, mid' pleasures" is one of the loveliest melodies ever written by man. Its sweet stately beauties are as fascinating to-day as when they were written more than two hundred years ago. It makes a lovely record and all should know it.

Of the more than forty operas that Handel composed during the next few years, not one survives, but the indefatigable recorders of music have preserved for us the well-known so-called "Handel's Largo" which is in reality an air from his opera "Xerxes." (Classical themes were favorites with opera-makers in those days.) This has been sung, played, orchestraed and banded till everybody knows it. Several good records of it in various forms are available.

"Tweedledum and Tweedledee"

From merely being a composer, Handel became in due course a manager. Now, grand opera management has always been a sure road to bankruptcy except where wealthy guarantors or government subsidies have smoothed the way. So Handel, after his final settlement in England for keeps after 1718, found himself in due course stranded on the shore of the bankruptcy court. His troubles were largely due to the jealousies between his partisans and those of the rival managers who were brought out to ruin him. Troubles with prima donnas and high-priced tenors, the social quarrels with ladies of society that followed, and the consequent formation of a society clique determined to ruin him, led to the importation of Buononcini from Italy as a rival composer at a rival theatre. Thus London enjoyed a first-class operatic war and the town was agog with it. Dean Swift's witty, malicious tongue obtained undue credit for the clever jingle which hit off the tempest in a teapot so cleverly and besides gave two new words to the language. Everybody knows it:

"Some say, compared with Buononcini
That Signor Handel is a ninny;
Others aver that he to Handel,
Is scarcely fit to hold a candle:
Strange that such difference should be
'Twixt Tweedledum and Tweedledee."

The dean was not the author, but what of that.

In the Domain of Oratorio

The solid, honest, bluff character of stout old George Frederick would not stand the petty stupidities of this sort of thing however, and in 1737 he found himself not alone ruined in finances but in health. It was at this time that his naturally religious and quite thoroughly Anglo-Saxon nature found itself drawn towards the contemplation of sacred oratorio, as a form of composition which might give rise to words of real artistic worth and lead to the development of new and splendid musical material. The sacred oratorio is peculiarly a Handelian form of musical work and has remained almost purely English and American. The Anglicized Mendelssohn tried his find hand at it, Papa Haydn too, and such men as Arthur Sullivan, Gaul and Gounod were proud to be associated with it. In effect, the oratorio is an opera, sung without action or costume, its story based on some biblical episode, with words drawn from the scriptures and music of appropriate character. It involves, as developed by Handel, great choruses, quartets and solos for tenor, bass, soprano and contralto. Its subject, as was said, is always biblical.

Judas Maccabaeus, Israel in Egypt, Saul, Judas, Joshua and a number of others flowed in succession from Handel's pen. Beginning with his first experiment in setting the story of Esther, he continued, in face of many disappointments, to persevere in his chosen work, till he burst upon the world with the immortal, forever glorious "Messiah," composed in the extraordinarily short space of twenty-one days, and first sung, not in the London which had irritated and flouted his genius, but in Dublin, where his friend, the Duke of Devonshire, was Lord Lieutenant, for the benefit of the prisoners for debt confined in the city's Marshalsea.

Immortality

Performed with a handful of singers and a small orchestra the success of this extraordinary work was so profound and overpowering that Handel's waning fame was restored in an instant. Since that year, 1742, "The Messiah" has been performed almost annually on the largest scale. Since the great Handel festival of 1784 in London, the choirs have become larger and larger. Crystal Palace performances in London have massed five thousand voices of chorus and five hundred instruments of orchestra, with a great organ to boot, before audiences numbering ten thousand and more. The Handel

and Haydn Society in Boston, for a century last, has faithfully fulfilled its task of keeping green the memory of this marvelous work. Oratorio societies in New York, in Chicago, in Cincinnati and elsewhere have never ceased to carry on the good work; and to-day the man, woman or child within range of a musical center who has not heard "The Messiah" is somehow, one feels, defective.

Push Them!

In the circumstances is it not absurd that every dealer does not push to the limit, especially during the winter months, the sale of Messiah and other Handel records? Between the Victor, Columbia and Edison catalogs one can make up almost the entire Messiah. The immortal airs "He Shall Feed His Flock," "I Know That My Redeemer Liveth" and "The Trumpet Shall Sound," the divinely inspired choruses "The Glory of the Lord" and above all "Hallelujah," have been splendidly recorded. Thus the veriest dweller in the wilderness may become acquainted with the wonders of Handel's genius. It is said of him that, in his later years, he used to tell, in his quaint English, about when he was composing the "Hallelujah," "I did tink the heafen wass opened and the anchels and archanchels ascending and descending!" Who can wonder?

Westminster Abbey!

Handel died in London at his house in Brook street, in the year 1759, at the age of seventy-four. For some years he had been blind, but he continued to direct performances of his oratorios till almost the end. He was given a public funeral, and buried in Britain's Pantheon, Westminster Abbey, near the bodies of Addison and Steele, of Johnson, Goldsmith and Garrick, among such a glory of illustrious dead as perhaps no other so small spot on earth can boast.

In Handel's House

My friends call me a Handel-worshiper. One might have worse titles to consideration. Perchance the fault, which I cheerfully own, is really ineradicable; for my father was married in Handel's house in Brook street, where the grand old man lived for the last twenty years of his life. There in that fine old place still may be seen the very recess where his organ was placed, the very room in which he worked. Most of our family were born in that house. Is it any wonder we love his memory?

AN ARTISTIC WINDOW DISPLAY

The Emerson Phonograph Co. has prepared for the use of its dealers this month an artistic window display service which is the most ar-

Emerson Display for Dealers

tistic display issued in this series to date. The display has found instant favor with Emerson dealers, due to its simplicity of construction, which enables the dealer to install it with the utmost ease and with an extremely small expenditure.

R. H. Coker has opened a music store at 222 East Fourth street, Olympia, Wash., where he will feature the Bush & Lane pianos and players, and the Sonora phonograph.

The only way to beat a time clock is to make it tell of you instead of letting it tell on you.

Here Is the Greatest Phonograph Proposition In America Today

THE newest discovery in tone reproduction, the long horn, entirely of wood and of saxophone design, with the sound chamber at the bottom, an exclusive, patented feature and a tremendous selling advantage of the

PURITAN

THE FINAL SUCCESS AMONG PHONOGRAPHS

More money is being made in the phonograph industry today than ever before in its history. But to get your full share, you have got to carry an instrument whose *real advantages* stand out among the many lines now being offered.

The Puritan offers you the biggest opportunity in the field today.

Its long horn is the greatest and newest discovery in tone reproduction. It makes true and lifelike the music of the greatest vocalists and instrumentalists on earth. The sound chamber at the bottom is another advantage—based on the scientific fact that sound waves *rise*. That is why the real music lovers at the opera sit in the balcony.

The charming convex cabinet design is another exclusive Puritan feature. And you have in addition a line of superior Puritan Records made in our own recording laboratory. The Puritan plays any disc record made. Retail prices range from \$85.00 to \$350. Write, wire or phone for details of our attractive proposition.

BANQUET OF BLACKMAN TALKING MACHINE CO. STAFF

Employees of Victor Wholesalers Enjoy Ninth Annual Get-Together Party at Murray's on June 1 —President Blackman Recites Record of Long Service—Some of the Guests

The ninth annual banquet of the employees of the Blackman Talking Machine Co., New York, Victor wholesalers, was held Saturday, June 1, at Murray's, and was attended by the officers, employes and several invited guests. It had been originally intended to make this annual event similar to the outings of previous years,

J. Newcomb Blackman

and Decoration Day had been chosen as the day on which the 1918 outing would take place. In view of President Wilson's proclamation, however, setting forth the manner in which Memorial Day should be observed this year, the officers of the company decided that it would be more befitting the spirit of the times and the occasion to eliminate the outing and other incidental features, and have instead a dinner at Murray's.

The employes of the company entered enthusiastically into this idea, and when they gathered at the table on June 1 looked forward to an interesting evening which would leave pleasant recollections for the coming year. They were not disappointed in these expectations, for this year's dinner was the most successful that has yet been given by this well-known house.

Some nine years ago J. Newcomb Blackman, president of the company, inaugurated a plan whereby the employes of his company would share in the profits, and based this profit-sharing upon an employe being in the service of the concern for one year. The company's fiscal year closes on April 30, and the distribution of the profits has been marked each year by a gathering of the employes and the officers of the company. These outings and gatherings have undoubtedly been important factors in the splendid success achieved by the Blackman Talking Machine Co., for they have given the employes an opportunity to get acquainted with each other personally, aside from their business interests, and to establish an esprit de corps that has increased steadily year after year.

At Saturday's dinner Mr. Blackman presided

as toastmaster, and in his opening address gave his employes and guests a brief resumé of the history of the Blackman talking machine. He pointed out that the company is now sixteen years old, and that when it inaugurated its profit-sharing plan nine years ago it was one of the very few concerns who recognized the value of such a plan. Since that time the idea of sharing profits with employes has become general throughout the country, and practically all of the leaders in the industrial world have adopted this plan.

When the company started business in 1902 the personnel of the force consisted of Mr. Blackman and one employe, Frank Roberts. Today the staff numbers thirty, and out of this staff of thirty, twenty-one members were entitled to share in the 1918 profits, including Mr. Roberts; a remarkable record that indicates the spirit of loyalty and co-operation which characterizes the activities of the Blackman force.

Delving into statistics Mr. Blackman pointed out that these twenty-one members of his staff had given the company 111 years of service. The veteran of the force, Frank Roberts, secretary of the company, has been with the Blackman Talking Machine Co. for sixteen years; John L. Spillane, assistant secretary, has been a Blackman stalwart for thirteen years; James F. Ashby, assistant treasurer, has been associated with the company for eleven years; H. C. Lansell, traveling representative, and Miss L. D. Peters, of the general sales force, have been members of the Blackman staff for nine years, and George Thau, head of the shipping department, has been a member of the Blackman force for seven years.

Mr. Blackman expressed his appreciation of the loyalty and service of his employes, and in turn assured them that each and every member of his staff could depend upon the heartiest co-operation and assistance from himself and every officer of the company. In the course of his address Mr. Blackman paid tribute to the five members of the company's staff who are now in the service of Uncle Sam, and also furnished those at the dinner with a comprehensive idea of the duty which every true American owes to his Government at this critical time. Mr. Blackman was one of the leading spirits in the remarkable success achieved by the Allied Music Trades division in the recent Liberty Loan, and has always been an active worker in behalf of all patriotic and charitable interests. His talk was enthusiastically received by everyone present, and left a deep impression on the minds of his employes and the other guests.

Two of the guests of honor at the dinner were Seaman Alexander J. Wilckens, who is now a member of the U. S. Naval Reserve Force, and Private A. D. Robbins, who is a member of the 663d Aero Squad. Both of these "boys" were

formerly associated with the company's traveling staff, but are now "doing their bit" for Uncle Sam. Three other members of the Blackman forces are also fighting for democracy, including Lieutenant James H. Giles, 104th Field Artillery, who is now "somewhere in France"; Private C. N. Callanan, Aviation Training Camp, and Private Paul Wordsworth, Ordnance Department. Seaman Wilckens and Private Robbins gave informal addresses which met with hearty applause.

On behalf of the officers and employes Fred P. Oliver, vice-president and general manager of

Fred P. Oliver

Frank Roberts

the company, expressed to Mr. Blackman the sincere appreciation of every member of the staff for the spirit of affection and good will which Mr. Blackman has sponsored in his organization. Mr. Oliver bespoke the continued loyalty of the Blackman staff, with the hope that each year's dinner would mark the closing of a successful year for the company.

Besides sharing the profits, the officers of the company, together with a number of the employes, also received dividend checks as stockholders, including Frank Roberts, Fred P. Oliver, James F. Ashby, John L. Spillane, George Thau and H. C. Lansell. The other stockholders who received dividends were Mrs. J. Newcomb Blackman, Mrs. Fred P. Oliver, Mrs. A. A. Houghton and Mrs. Irene G. Blackman. The other employes of the company who shared in the distribution of profits were A. J. Wilckens, A. D. Robbins, E. S. Palmer, John Hanley, John Mills, Frank Tillinghast, Charles R. Marquis, Miss L. D. Peters, James Toll, Mrs. A. Miller, Miss R. Dunger, Miss M. V. Johnstone, Mrs. E. Reighton and Miss V. Hirshberg.

INCORPORATED

The Prima Talking Machine Co., Wilmington, Del., has been incorporated with capital stock of \$98,000.

DEATH OF DANIEL G. WILLIAMS

Veteran of the Cabinet Industry Passes Away in Indianapolis—Was Seventy-eight Years Old and Had Been in the Trade for Forty-five Years

The host of friends in the trade of Daniel G. Williams, "Uncle Dan," veteran traveler for the Udell Works, Indianapolis, Ind., and one of the best-known and most popular men in the cabinet trade, will learn with regret of his death at his home in Indianapolis, on May 21.

A life of remarkable activity came to an end when Daniel G. Williams passed away. This wonderful man had been sick for about thirty

Daniel G. Williams

days, and inasmuch as he was stricken with pneumonia it was impossible at this advanced age to get his strength back and get well.

"Uncle Dan" Williams had traveled continuously for the Udell Works since 1873 or for forty-five years. In fact, he was the first vice-president of the original concern known as the Udell Ladder & Woodenware Works. Before his connection with the Udell Works he was president of the firm of Todd, Carmichael & Williams, who were in the book business many years ago on Washington street. While traveling for this concern he became interested in some original step ladder patents and prevailed on Calvin G. Udell, then of Chicago, to come to Indianapolis and start a factory. It was the year of 1873 when the Udell Ladder & Woodenware Works was launched with Mr. Williams as vice-president.

There are but few men who live to the ripe old age reached by "Uncle Dan," and the remarkable thing about it all is that up until his last sickness he traveled over a big territory, and his last trip when he was gone for six weeks was one of the most successful he ever had. He was of that genial, jovial disposition that makes friends on all sides, but at the same time when he was on the road he was up and coming all the time, and after the exchange of courtesies it was business first with him. It is not an exaggeration to say that Daniel Williams was the best-known and the oldest salesman in the talking machine, piano, woodenware, furniture and music field.

He was born on July 18, 1839, in Cornish, N. H., and would have been seventy-nine years old on the 18th of July of this year. He joined the First Baptist Church of Indianapolis in 1854 and was the oldest member, having belonged to that church for sixty-four years. Besides the widow, he is survived by five children of a former wife, who was Miss Anna Gabbert, of Columbus, Ind. The five children surviving are Frank Williams, of Shreveport, La.; Miss Cora Williams, of Denver, Colo.; Mrs. Grace Heiner, of Waverly, Kan.; Mrs. Maude Koons, of Indianapolis, and Mrs. Charles Greenstreet, of St. Louis.

He was laid to rest in a beautiful lot in Crown Hill Cemetery Friday morning, May 24. "Uncle Dan" Williams was an inspiration to all who came in contact with him, and his acquaintance unquestionably had a wonderful influence upon the younger men he came in contact with. He was a very hard worker—in fact, some of his best friends thought he worked too hard, but

that was the way he was built. We quote from a letter received a few days ago from one of his friends in the trade: "I have had the pleasure of knowing this gentleman for forty years or ever since I was a tiny young fellow. He was an inspiration not only to everyone in this concern, but to all the people he called on throughout the United States. In all my experience I have never known of a man who was so well thought of and highly respected as 'Uncle Dan.' Everybody that he has come in contact with will miss him."

His was indeed a life that was worth while, and, although he is gone, the memory of him will always be fresh in the hearts of those who were privileged to know him.

SENDING "SMOKES" TO THE BOYS

Talking machine men are good sports, and are seeing to it that the boys in the trenches are getting smokes. Contributors to the New York Sun Tobacco Fund contain the names of many talking machine men, and the employes of the Victor Talking Machine Co., of Camden, N. J., are well represented. The "Smokeless Monday Club," of which J. W. Jagers is president, consisting of employes of the Victor Co., send a weekly gift to The Sun, all representing sacrifices made by the members in order to add to the comforts of the boys at the front. Their usual Monday donation runs about \$20.

LOS ANGELES DEALERS MEET

First Open Meeting of Retail Talking Machine Dealers' Association Brought Together About One Hundred and Twenty-five People

LOS ANGELES, CAL., June 1.—The Retail Talking Machine Dealers' Association of Southern California gave their first open meeting on the evening of May 21. A fine banquet followed by a dance was the attraction and nearly everyone connected with the talking machine industry, both retail and wholesale, here was present.

This delightful affair was given by the dealers as a sort of get-together and get-acquainted occasion, and was held at the Sierra Madre Club on the thirteenth floor of the Los Angeles Investment Building.

Everyone had a good time and dancing and other entertainment was in order during dinner and much credit is due to the committee, composed of E. S. Dible, Frank Salyer and Harold Jackson, for the fine time enjoyed by everyone. Never before has there been such a gathering together of the "trade" in Los Angeles, and the festivities did not end until near midnight.

It is to be hoped that the association will give another of these happy parties in the near future, as they will bring the talking machine people closer together and have a tendency to help business in general by establishing a better understanding between the different dealers.

TWIN CITY TRADE COMPLAIN OF BIG MACHINE SHORTAGE

Conditions Are Such That Dealers Are Worried—Hope for Better Luck This Month—Enormous Crops in Northwest Insure Big Volume of Trade This Coming Fall—L. H. Lucker Goes East

MINNEAPOLIS and ST. PAUL, MINN., June 6.—Any one having a stock of talking machines, whether it be of Victors, Edisons, Columbias, Pathés, Brunswicks or any other standard make, will be able to dispose of the entire stock in a day or two if he will only bring the lot to the Twin Cities. Jobbers declare that the factories do not begin to supply their needs and what the retail dealers say of the jobbers because of the latter's failure to supply machines is hardly printable in a fastidious periodical such as *The Talking Machine World*.

Take it in the Victor trade. W. J. Dyer & Bro., in St. Paul, and Beckwith-O'Neill Co., Minneapolis, declare that they are able and willing to double their business, but the old mother company won't let them; that is to say, will not supply the wherewithal in the shape of instruments. Then call on the Minnesota Phonograph Co., jobbers in the Edison products, G. Sommers Co., jobbers of the Pathé products, and the Northwest offices of the Columbia, and the Brunswick-Balke-Collender Co., and you hear a repetition of an ancient song, "Can't get goods."

It is known, almost to the point of a fact, that the Northwest can absorb thousands of machines more than are being allotted to it. Every dealer, whether selling in lots or by the instrument, says so, and one is fain to believe the universal story. The policy out this way is to prepare for a big fall trade. It is realized that the Government may curtail the factory output 30 or more per cent., that freight regulation may prevent the shipment of talking machines and that other grievous things may happen, but the Twin City people are going ahead regardless of all and are not borrowing trouble. The blows will be heavy enough, if they come, without anticipating them at this time.

Jay H. Wheeler, manager of the Pathé department of the G. Sommers Co., returned last week from New York and the East after placing a big order for the fall stock. He came home to find the new 100,000-record stacks in place and ready for the arrival of a carload or more

of records. The spring business of the house, he states, was far in excess of the volume for the spring of 1917.

Laurence H. Lucker, president of the Minnesota Phonograph Co., left Saturday evening in the company of Milton Lowy, of the staff, and various Northwestern Edison dealers for the big Edison convention. His reports indicate that trade is not quite as active as it was, but the demand still exceeds the supply. Trial balances show that the gross business for the first four months of 1918 was 18 per cent. above the gross for the corresponding period of 1917.

Road men for all the houses are advising their principals to prepare for a heavy rural demand after the crops begin to move. It looks now as though the yield will be immense and in that event the Northwestern farmers, in spite of the calamity howlers, like the Non-Partisan League, and other professional crepe hangers, will be rolling in money. Some portions of North Dakota are entitled to some returns at that, after two successive bad years.

BUDGET OF OPEROLLO DOINGS

Messrs. Kaufman and Gast Make Strong Team in Patriotic Work as Well as in Booking Orders—Lyric Records Well Distributed

DETROIT, MICH., June 7.—Walter Kaufman, assistant sales manager, and Charles Gast, a couple of live wire boosters for the Operollo Phonograph Co., came back to this city just in time to expend their surplus energies in the Patriotic Fund drive. Walter and Charlie teamed together their last trip and by the extraordinary splendid results produced this combination has proven to be very successful. After Detroit had raised its proper quota for the Red Cross and other patriotic funds these "road wizards" again started out to stock up Operollo dealers throughout the South and Southwest.

Jacques Kohrner, of the Lyrphone Co., stopped in on his way West and was surely

gratified to see the splendid manner in which Lyric records were being distributed. Arrangements were made to triple the stock carried so that better shipments could be made to the various dealers.

Arthur Siewiersky, sales manager, has lately completed plans for an aggressive sales and advertising campaign which will undoubtedly startle the trade. He is well pleased with the way Operollos are being distributed and looks forward for an exceedingly large increase in sales this fall.

It is expected to have the new Operollo models ready for market in a very short time, after certain minor improvements have been perfected.

GRAFONOLAS FOR HOSPITAL UNIT

Two of These Instruments and Records Selected for Albany Base Hospital

The Columbia Graphophone Co., New York, recently sold two Grafonolas and a library of Columbia records to Base Hospital Unit No. 33, known as the Albany Base Hospital. This

Nurses Surrounding Grafonola for Base Hospital unit is now awaiting transportation orders for France, and the nurses are mobilized at Ellis Island, with Miss Mattie M. Washburn, of Albany, chief nurse in charge.

Quite a number of nurses recently visited the Fifth Avenue Shop of the Columbia Co., where they spent some time viewing the beautiful Columbia period models, and listening to some of the latest Columbia records. The Columbia Grafonolas and the records are providing pleasing entertainment for the nurses during their training period at Ellis Island, and will doubtless be in constant demand when the base unit reaches "over there."

For the Summer Trade

Victor 4-A's and 6-A's in conjunction with Corley Fibre Trunks are an ideal combination for the bungalow. Sell these trunks not only to new prospects, but to every owner of a Victor IV or VI. Also ideal for the military camp.

GARBER WRITES OF HIS NEW DUTIES

Interesting Letter From W. L. Garber, Now Training at Gettysburg, Received by World

There was received this week at the office of The Talking Machine World an interesting letter from W. L. Garber, who is now a member of the Tank Corps in training at Gettysburg, Pa. Mr. Garber was formerly private secretary to Arthur D. Geissler, president of the New York Talking Machine Co., Victor wholesalers, and more recently was a member of the company's traveling staff. He selected the Tank Corps because of the unusual opportunities that it affords for vigorous action at the front, and his letter reads as follows:

"I had a letter day before yesterday from Mr. Keith advising me he would see to it that I received each month's issue of The Talking Machine World and 'Voice of the Victor.' This news made his letter doubly welcome. I arrived here on the night of May 23, and the next day two other 'previous service' men and myself out of our new detachment from Fort Slocum were selected as sergeants for the Casual Company—a detention or quarantine camp, through which all recruits are recorded, examined and finally transferred to their respective battalions, either the Light or Heavy Tank service. We keep an average of 1,200 men here and transfer them as needed. Sometimes we receive two hundred or more recruits after midnight, which means 3 a. m. or later before we turn in.

"Most of all officers attached here have now been assigned to new battalions formed and the casual camp has been turned over to the non-coms, and it is some job keeping track of a thousand or more strange faces. Yesterday afternoon we (four of us) drove over to Chambersburg and picked up five men who had been confined to camp and had slipped out.

"I understand my old artillery regiment, in which is Morris Owens, another N. Y. Talking Machine Co. boy, has arrived 'over there.' As anxious as I am to get over, I would rather be here in the 'Tanks,' because when we do get over we'll raise —

"We are camped on the field where Pickett made his famous charge, and have plenty of local atmosphere to make us work hard to get in the big fight. The esprit de corps here is marvelous, and the caliber of men above the average. Lots of good luck. Sincerely, W. L. Garber."

RECENT WILSON-LAIRD PUBLICITY

The Wilson-Laird Phonograph Co., New York, factors and distributors of the Bliss reproducer, have just issued an effective four-page folder that gives eight reasons why the Bliss reproducer should be used. These reasons are presented in handy form, so that the folder may be utilized by manufacturers and dealers as an envelope enclosure, and is directed particularly to Edison dealers. It is noteworthy for the absence of technical details and for the abundance of practical sales arguments.

The company has also issued a new price list that shows a reduction in the retail price of the gold-plated Bliss reproducer and also a reduction in the prices of dozen lots. This reduction in price was made possible because of the company's fast-growing business and the fact that it has been able to place its factory on a basis of maximum efficiency. There will be no further changes made from the new price list for the balance of 1918, and the company has advised its trade that it hopes to maintain these prices without any advance during the period of the war.

Plans are now being made to handle a large fall and winter business, and the company is creating through its advertising an active demand for the Bliss reproducer. This campaign has been particularly successful with Edison dealers, although many well-known manufacturers have expressed their intention of using this reproducer exclusively on their machines during the coming year.

PRIZE WINNER IN EMERSON PHONO CO.'S WINDOW CONTEST

The Emerson Phonograph Co. announced this week the prize winners in the store and window displays that were presented for the consideration of the judges embodied many unusual and praiseworthy features.

display contest, which closed on May 15. The contest was a decided success, and some of the

originality in conceiving artistically arranged window displays.

The first prize, consisting of \$75 worth of records, was awarded to the S. S. Kresge Co., 532 Congress street, Portland, Me. This window display is reproduced herewith, and is undoubtedly worthy of the honors bestowed upon it. The second prize, consisting of \$50 worth of records, was awarded to S. A. Wolpert, 1935 South street, Philadelphia, Pa. The third prize of \$25 worth of records was won by the Black S. Hansen Co., 611 Commercial street, Waterloo, Ia.

The following five Emerson dealers were awarded prizes of \$10 worth of records each: Timothy Smith, 2267 Washington street, Boston, Mass.; Jordan & Marsh, Washington street, Boston, Mass.; the Record Exchange, 2017 South street, Philadelphia, Pa.; Feiler Furniture Co., 819 Central avenue, Cincinnati, O.; S. S. Kresge Co., Indianapolis, Ind.

All the displays presented were most excellent, and reflected credit on the participants. It certainly emphasized their

TRADE SITUATION IN ATLANTA

Business Held Up Well for May—New Columbia Dealers—Advance in Price of Machines Interests Trade—Record Sales Are Expanding

ATLANTA, GA., June 6.—Business in Atlanta during May was well up to the standard of previous months, and without exception dealers report that they are doing well.

There have been some changes in connection with lines already established, as well as new stores to open.

The Atlanta Phonograph Co., the president of which is Mr. Riley, was the original Columbia man in Atlanta, way back in 1901 or 1902, but who became later the first Edison dealer in this city, has qualified recently as a Columbia dealer, and is reported as doing finely with that old and popular line.

Zaban Furniture Co., 119 Whitehall street, has also taken on the Columbia line, being new dealers in the talking machine field. They have begun an intensive advertising campaign, and are selling a large quantity of phonographs and records.

The feature of the month was the advance in the price of Victor goods, on May 10, and among those in closest touch with the situation it is considered not improbable that the Columbia and Edison lines will both advance in price within a few weeks.

Notable artists to visit Atlanta in May were Miss Anna Case, of the Edison, who passed through for points further South, stopping here about two days, and visiting the Edison stores. Charles W. Harrison, who sings for nearly all the leading companies, and Miss Geraldine Farrar, the Victor artist, who rendered a delightful concert at the Auditorium Armory, entertaining a large audience of music-lovers and prominent citizens. Miss Farrar is a close friend of a number of the most prominent people in the city, and, owing to her frequent visits here with the Metropolitan Opera Co., has had the opportunity of cultivating these friendships from time to time.

The local distributors for the Columbia, Victor and Edison lines say that their business is far ahead of the same period in 1917.

The small towns throughout the South are heavy buyers of talking machines, most of them having from one to three talking machine stores fully supplied with all types of machines and a complete stock of records. It is estimated that the smaller towns and rural centers are taking from five to seven times as large a volume of goods as they were two years to thirty months ago.

Both the Ediphone and the Dictaphone continue to book an increasing volume of sales. The use of these great time-savers is becoming almost universal.

Edison is announcing the new records by Miss Frieda Hempel. They are excellent re-creations and will find a ready sale among those who really like high grade music.

PHILADELPHIA PA.	CHICAGO, ILL. (Insulation Dept.)	AMELIA CO. VA.	MONTREAL CAN.	WEST PHILADELPHIA PA.

Some anxiety is felt as to the ability of dealers to get sufficient stock in future to operate on, as Government requirements are constantly growing, but no acute shortage is anticipated during the rest of this year at least.

A SUCCESSFUL CANADIAN HOUSE

G. W. Lindsay, Ltd., of Montreal, Are Winning a Big Following for the Pathé

MONTREAL, CAN., June 3.—G. W. Lindsay, Ltd., of this city, one of the most successful piano houses in Canada, has been achieving pleasing success with the Pathé line, and has developed an extensive clientele for Pathéphones and Pathé records. This concern is carrying the Pathé line in its branches in Quebec, Ottawa, Three Rivers, Brockville, Bellville, Kingston,

An Artistic Lindsay Window

Cornwall, and the manager of each branch is enthusiastic in the possibilities for future Pathé business.

The window display shown in the accompanying photograph was presented recently in the Montreal branch of G. W. Lindsay, Ltd., and was created by Leopold A. Poulin, one of the most successful members of the Lindsay sales staff. Mr. Poulin is in charge of the various window displays featured at the Montreal headquarters, and these displays have contributed materially to the success of the Pathé line in this city.

VICTROLA FIBER TRUNKS IN FAVOR

John G. Corley, president of the Corley Co., Victor distributors, of Richmond, Va., attended the conventions and music show during the past week in New York. Mr. Corley reported generally good business in his section of the country, and particularly commented on the great popularity of the Victor fiber trunk that they produce. He said that orders for the trunk are now being received from coast to coast, and that at least one of these trunks was in every cantonment in the country. The demand for them is steadily expanding.

KANSAS CITY TRADE HAPPENINGS

Talking Machine Men Throughout Missouri Most Optimistic—Willard Pierce Joins the Victrola Department of the Jenkins House—Other News From a Lively Trade Center

KANSAS CITY, Mo., June 4.—B. T. Woodward, manager of the retail shop of the Edison Phonograph Co. on Eleventh and Grand, is now back at his desk after being confined for seven weeks to his home, from a broken left arm and leg. "Business is far ahead of last year and we considered 1917 very satisfactory from a commercial standpoint. It is interesting to note the demand for our new Art model. Our patrons are calling for a high class machine. Just yesterday our sales included three laboratory models at \$285."

Miss Jessica Owens has been head of the phonograph department of the Kansas City Photo Supply Co. for nine weeks, and since her advent the record sales have increased wonderfully. Miss Owens reports that the demand for the Grafonola is stronger than ever. "We are making 'the most convenient Columbia shop' our slogan," said Miss Owens.

M. M. Blackman, manager of the Edison wholesale, W. Hinde, Northern Missouri representative, and C. T. Cunningham, Kansas traveler, are attending the Edison dealers' convention at New York, June 5, 6 and 7. They are expecting to remain about two weeks longer.

Herman Woolsey, of the Victrola department of the J. W. Jenkins' Sons Music Co., is spending his vacation at the home of his mother at Fort Scott, Kan.

Willard Pierce, son of Burton J. Pierce, manager of the Victrola department of the J. W. Jenkins' Sons Music Co., has completed his year's work at Kansas University and is now assisting his father in the department. Young Mr. Pierce is a member of the Phi Gamma Delta fraternity.

NEW POST FOR O. F. BENZ

George W. Hopkins, general sales manager of the Columbia Graphophone Co., announced this week the appointment of O. F. Benz as a member of the sales department. Mr. Benz succeeds, and will do the work of A. R. Harris, who has enlisted in the U. S. Navy. He will act as a member of the general sales department in connection with record activities, representing the department at the record laboratories at the factory, etc., and will co-operate with the Columbia clientele in the promotion of record sales. Mr. Benz has been associated with the Columbia Co. for the past year, and is well equipped to occupy his new position.

SONA-TONE

A Phonograph of Distinction with the Tone You Can't Forget

SONA-TONE *Quality* means a resonant, full, liquid tone that comes from an especially designed, all-wood sound chamber—and superior workmanship in material, finish and equipment.

SONA-TONE *Reliability* means simplicity of mechanical construction—ease of operation—and convenience and solidity of working parts.

SONA-TONE *Service* means the immediate ability of the purchaser to play all makes of records—without attachment of any sort—and to play a library of from 250 to 1000 assorted records without further expenditure.

We believe that a Sona-Tone eliminates—to a greater extent than any other phonograph—the surface noises of the record.

We believe that it has the same quality of resonance as exists in the Stradivarius violin.

From our sales record—previous to advertising—we believe that a SONA-TONE is a superior phonograph for retail merchandising.

SONA-TONE PHONOGRAPH, Inc.

"The music is on the record—the tone is in the phonograph."

FOUR NEW MODELS OF COLUMBIA GRAFONOLAS INTRODUCED

Arouse the Enthusiasm of Dealers and Visitors to the National Music Show, Where They Were Exhibited the Past Week—Their Individual Features Described

One of the most important features of the exhibit of the Columbia Graphophone Co. at the National Music Show last week was the first public presentation of four new models of Columbia Grafonolas which aroused the enthusiasm of dealers and others who visited the booths by

Type G-2

reason of their distinctive features, everyone predicting that these new artistic Grafonolas would meet with phenomenal success. While the four models are reproduced herewith, the illustrations hardly do justice to the attractiveness and beauty of the cabinet designs.

Type "E-2" measures 42 $\frac{7}{8}$ " in height, 19 $\frac{1}{8}$ " in width, and 21 $\frac{3}{8}$ " in depth, with a record capacity of seventy-five records. This cabinet is made in red mahogany, English brown mahogany, American walnut satin finish, golden oak, fumed oak and early English oak. This design is very pleasing to the eye, and will harmonize in a room with almost any design of furniture.

Type "G-2" has a height of 46 $\frac{1}{2}$ " with casters; a width of 19 $\frac{5}{8}$ " and a depth of 21". It has a record capacity for eighty-five records. This cabinet is made in red mahogany, English brown mahogany, American walnut satin finish, golden oak, fumed oak and early English oak. One of the distinctive features of this cabinet is a drawer in the bottom which may be used for either catalogs or for spare records.

Type "K-2" measures 46 $\frac{5}{16}$ " in height with casters; 21 $\frac{1}{2}$ " in width, 19 $\frac{3}{8}$ " in depth. It is equipped with seven record albums, with a capacity of twelve 12" records for each album.

This cabinet is made in red mahogany, English brown mahogany, American walnut satin finish, golden oak, fumed oak and early English oak.

Type "L-2" measures 47 $\frac{1}{2}$ " in height with casters; 21 $\frac{7}{8}$ " in width, 19 $\frac{3}{8}$ " in depth. It is equipped with ten record albums with a capacity of twelve 12" records for each album. This cabinet is made in red mahogany, English brown mahogany, American walnut satin finish, golden oak, fumed oak and early English oak. It is beautifully inlaid in satin wood, and presents a very artistic appearance.

All of these Grafonolas can be equipped with either spring or electric motors, as the cabinets are designed to accommodate either type of motor.

One of the noteworthy features of these new

Type L-2

Grafonolas is the tone quality, which has won hearty praise from tone experts and well-known musicians. Tone quality was, of course, a prime consideration in the production of these new Grafonolas, but in addition to the tonal merits of these instruments, there are many distinctive mechanical features which will doubtless contribute materially to their success.

The most important feature of this mecha-

nism is the new Columbia motor unit. This unit embodies a new motor plate, which is fitted

Type E-2

with a hinge so that it can be disconnected from the cabinet quickly. This ingenious construction permits of changing motors immediately. A

Type K-2

spring motor can be disconnected and an electric motor installed by loosening two thumb screws, swinging back the motor plate to a ver-

Save Money on your next BOOTH Installation

Let our representative quote you prices

H. MICKELAS - 164 McKibben Street - Brooklyn, N. Y.

tical position, and by drawing the plate forward. The hinge remains fastened to the cabinet. There is also included in this new motor unit an improved motor frame, made for each of the following spring barrels; one, two, three and four. Three and four spring motors are fastened to the hinge motor plate, the one and two spring motors are attached to the cabinet motor board. There is also a new spring barrel that is fitted with a bayonet lock instead of screws for fastening the cups and separators. These can be easily disconnected by holding the cup and turning the separator slightly, then pulling it endwise.

All of these new models of Grafonolas are equipped with the Columbia non-set automatic stop, which requires no setting or any attention whatever when playing a record. The motor is started in the regular way by moving the start lever and the automatic device will stop the motor when the record is through playing regardless of the size of the record. This does not in any way interfere with moving the start and stop lever by hand. No adjustment is necessary when playing different sized records, because the lever that stops the motor is connected with the tone arm. While a record is playing it holds back the automatic stop until the entire record is played. At this point the tone arm loses its power and the stop works perfectly.

The new Columbia automatic stop is composed of simple durable parts which connect with the tone arm and with the motor. It is concealed beside the other mechanism under the motor plate. Every part is in view and easily accessible when the motor plate is raised.

This automatic stop was perfected after lengthy experimenting at the Columbia laboratories, and was approved by all of the company's mechanical experts before it was pronounced satisfactory. It was in constant use on the models at the music show last week, and won the approval of Columbia dealers who predicted that its use would add considerably to the sales possibilities of the new Columbia Grafonolas.

NEWS FROM SOUTHERN CALIFORNIA

Business in May of Excellent Volume—Dealers Carrying Fair Amount of Stock But Find It Difficult to Get Renewals—Exhibit of Victor Wireless Course—Barnes Co.'s New Quarters

LOS ANGELES, CAL., June 4.—Business during the month of May was very gratifying to all the talking machine dealers in Los Angeles, and showed them that the slump during April was only temporary. The trouble now is the lack of goods which seem harder to obtain all the time. As shipments are coming through much faster under the new management than in previous months it looks as though the shortage is at the factories, and, if so, there appears to be no remedy, at least not at the present.

Most of the Los Angeles dealers have pretty fair stocks on hand at present, but these will not last very long, and it now looks as though there will be a scarcity in most of the popular models of all the standard makes. From September each year business has always increased each month up to the holidays, and the wise man is the one who will look ahead and get his machine and records now and call it a Christmas present.

The Red Cross have interested themselves in supplying the soldiers with machines and records and are handling most of the old records and machines left by persons for the different camps.

The new draft regulations are liable to hit a pretty hard blow to the dealers by taking from them some of their best record and machine salesmen, as many in the trade are eligible for first call. The ladies, acting in this capacity, are liable to be at a premium if many more of our boys are called to the colors.

The Southern California Music Co., 332 South Broadway, Victor and Edison dealers, had a very interesting exhibit last week demonstrating the wireless course gotten out by the Victor Co. An aerial was strung from the second to the third floor and a wireless operator was

placed on a platform in front of the large middle window where he could be plainly seen from across the street. The sounder was placed on the ledge outside the window and the sparking, of course, attracted a great deal of attention. The operators were obtained from the Y. M. C. A., which has included the wireless in its course.

The Barnes Music Co., for many years located at 131 South Broadway, have moved to the old location of the Bartlett Music Co., 231 South Broadway, opposite the City Hall. Mr. Barnes has remodeled his store and now has an up-to-date and attractive store. The Barnes music store are exclusive Columbia dealers.

The Birkel Music Co. report business as good during May and on the increase. Mr. Beck, manager of the talking machine department, says he is pretty well supplied with machines except Victrola XIV, which are hard to get.

T. A. CLARKE WITH CHAMBERLAIN CO.

Theodore A. Clarke, for the past eight years associated with the Victor line in New Haven, Conn., has taken up new duties as manager of the Aeolian-Vocalion department at the Chamberlain Co.—Connecticut's most progressive and finest furniture house.

The Chamberlain Co. have a complete line of Aeolian-Vocalions and records and report Vocalion business in New Haven good at the present time.

SMITH OPENS NEW STORE

Albert E. Smith recently opened a store at 215 State street, Madison, Wis., where he will carry a full line of pianos, Victor talking machines, records and sheet music.

INCORPORATED IN GRAND RAPIDS

The Michigan Phonograph Co., of Grand Rapids, Mich., has been incorporated with a capitalization of \$3,000.

Try the Grinnell Service on Your Next Record Order

Inspections and Tests of the Heineman Motor

DEPARTMENTAL INSPECTION

The parts as taken from the machines are inspected as shown above, before next operation. This prevents any additional operations being performed on any part that may be defective in the preceding operation.

An inspection after each operation has proven to be the logical system of inspection.

Special test fixtures and gauges have been devised and arranged for each of these inspection operations.

MOTOR SPRINGS

Owing to the difficulty experienced in the past, of securing the proper springs, it was found necessary to manufacture under our own expert supervision by experienced spring maker, all springs used in the Heineman Motor.

Our springs must pass through many rigorous tests for temper, pulling power, and breaking strain before being wound in spring barrels. Even to the last turn of the winding machine which coils the spring in the barrel, the spring has been under the eye of an expert spring inspector, as shown in the illustration.

Additional tests are given the spring after being coiled in the barrel before it is assembled in the motor.

The lubrication of main springs has been brought to a state of perfection by this organization and a lubricating compound prepared to our own formula which gives positive results and lasting satisfaction.

MACHINE INSPECTION

All parts are designed to fit standard holes—thus, we have the care taken with jigs by which castings are drilled and tapped.

The inspection of jigs and tools would be of no value if the machines making parts to fit these castings were not true. Hence this inspection of machines for alignment.

The illustration shows the inspection of master-parts which are used to check the alignment of the machine so when piece-parts are placed in this machine for further operations the result of the machine work will be uniform parts.

Of course only one part is shown, though all parts and machines are similarly checked by an experienced and thoroughly trained inspector before machines are started on the production run.

EXTRA INSPECTION

The governor shaft or worm is one of the most essential parts of a phonograph motor.

Extraordinary care is taken in inspecting and testing this part.

The illustration shows an inspection by a trained expert with glass, scale, micrometer and specially designed fixtures with dial indicators.

Governor shafts are put through numerous similar inspections while passing through different manufacturing operations.

TURNTABLE AND GOVERNOR SHAFT INSPECTION

The cut illustrates the inspection of turntable shafts and governor shafts.

A specially designed fibre worm-wheel and governor shaft are used in Heineman Motors. This fibre wheel must be perfect in shape and cut.

This inspection is extra critical on these parts. Special fixtures and tools of intricate design are used in this operation to insure perfect running of these parts in Heineman Motors.

PROCESS INSPECTION

After machines are checked and set up with master part as previously described, and production proceeds, the process inspector shown in this picture takes up his work, checking the parts under the glass and with micrometer and scale at intervals as these parts come from the machine. This inspection at the machine gives a check on the state of the cutting tools.

These cutting tools are made in duplicates, each set being run a stated length of time. Experience has shown that tools will work to full accuracy for a determined period after which same should be replaced with re-sharpened tools.

In case of mishap causing a deflection of the cutting tool before the allotted lapse of time, this tool is removed and a new one, which has been properly sharpened and inspected, placed.

CHECKING DRILL JIGS AND GAUGES

All parts are jig drilled and, to avoid any deviation in alignment of holes, these jigs and tools are checked regularly to ascertain any wear that may have occurred in use.

This inspection on tools, to some, may seem unnecessary, but if one bushing on any of these jigs should show perceptible wear, and use be continued, each part machined thereafter would be off centers and the inter-changeability of parts would be impaired. We, of course, are advocates of piece part inter-changeability.

This feature of inter-changeability is one of the dominant factors in the successful operation of some of the largest manufacturers of high grade equipment in the country to-day; among many are the Cadillac Motor Car Co. and others too numerous to mention.

GOVERNOR BALANCING

Even though all parts of the governor, consisting of worm shaft, governor disc, sleeve and springs, have passed through the various process and other inspections, it is essential that the assembled governor be inspected for the proper alignment of the springs and correct balance.

Each spring in a set on every governor is of the same tension and each ball identical in weight, giving accurate balance to the governor when in motion, and unvarying reproduction through steady running motors. Special fixtures and trained operators are used in this work, as illustrated above.

Nothing like this *timely* merchandise. That means **Military Trunk Grafonola Outfits and Vacation Grafonolas.** Are you pushing them?

"INSPECTIONS AND TESTS"

Details of a Most Informative Booklet Issued by Otto Heineman Phonograph Supply Co.

"Inspections and Tests" is the title of a valuable booklet just issued by the Otto Heineman Phonograph Supply Co. This booklet, which is profusely illustrated, gives manufacturers and dealers some idea of the care that is taken in the manufacturing of the "Motor of Quality." This company has originated and improved many different methods for carrying out in the most exact manner possible the full definition of the words "inspections and tests." From the raw material, throughout every operation in the manufacture, inspections and tests are interposed so that any deviations from the standard that may occur can be corrected immediately. Hundreds of these inspections take place during the processes of manufacturing the various parts.

In the booklet just issued by the company there are listed a few of the most important of these inspections, and in addition there are presented illustrations of some of the most popular Heineman products. There are reproduced herewith on the facing page eight of the illustrations shown in this booklet, together with a brief resumé of each inspection or test. These illustrations will give some idea of the efficiency of the Heineman factories, which has resulted in the international success of the Heineman motor of quality.

SPECIAL FILING CABINET

Made by Salter Mfg. Co. to Fit Into Edison A100 Disc Phonograph in Great Demand

CHICAGO, ILL., June 9.—The Salter Mfg. Co., well-known manufacturers of talking machine record cabinets, of this city, have been having an excellent demand for their special filing cabinet which is made to fit into the shelf of the

Edison A100 Disc, Equipped With Cabinet Edison A100 Disc machine as shown in the accompanying illustration. This cabinet was produced as a result of numerous demands from Edison dealers for a good filing device for this instrument. It is made, of course, to harmonize with the machine and is finished in the same wood or finish. It is made with the care which characterizes all of the Salter products, and is equipped with the famous Salter felt-lined shelves, holding thirty-two records in individual compartments. The compartments are all numbered and an index card is also furnished. The Salter Co. also furnish a felt-lined filing rack for installation in the interior of the Edison C150 phonograph. The rack fits perfectly and is instantly installed. The company manufactures an extensive line of cabinets for other machines and also a fine line of record cabinets for surplus record use.

R. E. RAE WITH COLUMBIA CO.

Robert E. Rae, formerly sales manager of the Jones-Motrola, New York, is now a member of the general sales department of the Columbia Graphophone Co., with headquarters at the executive offices in the Woolworth Building, New York. Mr. Rae, prior to joining the Jones-Motrola, was associated with the Western Electric Co., and is well qualified for his new post.

LONDON PLANT DESTROYED BY FIRE

Columbia Co. Factory in England a Total Loss —L. S. Sterling on His Way to London

Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, Eng., who has been spending the past six weeks in New York, received a cablegram last week advising him that the London plant of the Columbia Co. had been totally destroyed by fire. The original matrices, which were stored in a fireproof building some distance from the factory, were saved, but the loss is estimated at from \$500,000 to \$750,000.

The cablegram stated that every building in the London plant was a total wreck, and in view of the restrictions placed by the Government on the construction of new buildings, Mr. Sterling has not yet made any definite plans for the future. He left for London on Monday, June 3, and will immediately assume charge of all reconstruction activities. The disastrous fire started in a building on an adjoining street, and quickly spread to the buildings occupied by the Columbia Co.

SONA-TONE SHOWROOMS IN N. Y.

The Sona-Tone Phonograph, Inc., manufacturer of the Sona-Tone phonograph, has reopened its showrooms at 3421 Broadway, New York, corner of 139th street, where a complete line of these instruments are on display for the convenience of visiting dealers. The executive offices are now located at this address, and L. C. Seiler, general manager of the company, is leaving nothing undone to co-operate with the Sona-Tone clientele. The company's Brooklyn store is closing a very satisfactory business.

BALTIMORE TRADE SHOWING PLENTY OF REAL ACTIVITY

Dealers Are Awakened to Real Opportunities Despite Many Disturbing Factors—Maryland as a Whole Reports Large Volume of Business—Important Changes and Developments of the Month

BALTIMORE, MD., June 7.—Optimism for the future and good business for the past month is the keynote of the Baltimore situation among the talking machine men. Business showed up very well during the past month, many of the dealers reporting increases, while others considered their business good. Shipments of both records and machines were received during the month. The demand for both machines and records continues to be in excess of the supply.

Retailers everywhere are showing good results. Those dealers who were panic stricken a few months ago because of the war have awakened to the present opportunities and are showing plenty of real activity. This is evident from various quarters. Their show windows are more attractive and up to the minute with the appeal to buyers. Newspaper advertising is also showing up very well.

Baltimore has looked after many visitors from the Southern territory during the past month and all of the jobbers entertained their customers. Many of the callers visited all of the establishments in the hunt for goods.

The Brunswick-Balke-Collender Co. added a new account to their list during the month, Knabe Warerooms, Inc., both in Baltimore and Washington putting in a line of machines. Other new accounts are expected to be announced very shortly.

W. S. Parks, manager of the Columbia Graphophone Co. here, is doubly overjoyed this month, the great month's business done during May being one reason and the other being the arrival on Sunday of William Scott Parks, Jr. Mrs. Parks as well as the heir are both reported doing nicely.

S. C. Cook, assistant manager for Columbia, made a trip through North Carolina and part of Virginia and found the dealers in an optimistic frame of mind. The tobacco crop promises to be a record one and this means that the farmers through the section will have plenty of money, which, dealers say, forecasts good business.

During the month the Columbia Co. gave a reception to Evan Davies, of the Columbia vocal staff, and there were present more than fifty dealers of the city and nearby territory. More than sixty persons attended the affair, and it is hoped to hold gatherings of the kind monthly. These gatherings are for the purpose of bringing the dealers and the workers of the company closer together. Mr. Davies impersonated Harry Lauder and many old-time Southern characters.

Miss Katherine Carey, of the local Columbia office, accompanied Mr. Davies as well as other persons on the piano.

Miss E. M. Griffith, in charge of the wholesale department for Cohen & Hughes, Victor distributors, reports good business, but not quite up to a year ago, because of lack of goods. The firm has just added another two-ton motor truck to its equipment, which will be used exclusively in handling the Washington business so as to get goods to customers in that territory and in the South, shipments for the Southern territory being made in some instances better from Washington. Among the visitors to the distributors during the month were Mr. Levy, of Ferguson, Lillienfeld & Lightfoot Corp., Norfolk; Mr. Ripple, of Martinsburg; Mr. Clemens, of Clemens Bros., Chattanooga, Tenn.; Joseph Isaac, of Goldsborough, N. C.

Hipolito Lazaro, the famous tenor of the Columbia, took a prominent part in the Second War Fund drive of the Red Cross. He appeared a number of times at the Liberty Hut, near Union Station and helped to bring money from the pockets of the interested ones to help "Greatest Mother on Earth" to support the nation's Army of Defense.

George C. Maust, manager of the Grafonola department of Lansburg & Bro., Washington, spent several days at Columbia headquarters during the month. He is reorganizing the Grafonola department of which he recently assumed charge. Among the other visitors to Columbia headquarters were Mr. Whipple of O. J. DeMoll & Co., Washington, D. C.; B. H. Sommers, Ellicott City, Md.; Mr. Friedberg, of the Virginia Mercantile Co.; J. J. Carey, of the Columbia Co., Norfolk, Va., and Mr. Phillips, Washington, W. C.

Mr. Foster has been placed in charge of the music department of Hecht Bros. & Co.

Word comes from the Columbia dealers in Richmond, Norfolk and Washington that all of them are making a liberal display of the Period Grafonolas. April and May, according to J. J. Carey, of the Columbia Co., Norfolk, was the largest in the history of the company.

B. A. Koteen, formerly secretary and manager of the Virginia Mercantile Co., Norfolk, Va., has withdrawn from the company and is now manager of the Grafonola department of the Phillips, Levy Furniture Co., of that city.

P. W. Peck, who travels through North Carolina for the Baltimore office of the Columbia Co., delights in figures and says that the per

capita sale of Columbia products in Edgecomb County is \$1 per every inhabitant of the county. He has also figured that the first three months of this year show 124 per cent. increase in Columbia products for North Carolina over the same period of 1917.

W. C. Roberts, manager of E. F. Droop & Sons Co., Victor distributors, reports good business during May, which showed an increase over the same month of 1917. The increase was 25 per cent. Retail business with the firm is showing fine increases, and Mr. Roberts is hoping he will be able to get goods to meet his ever-increasing demand. For several months past Mr. Roberts says the monthly shipments of records from the Victor factory are sold before they arrive, and he is having a hard time keeping his dealers satisfied. E. H. and C. A. Droop, of the firm, were present at the convention in New York during the week.

George White, of the Southern Furniture Co., Richmond, Va., states that the Grafonola business for this year constitutes a very substantial part of their present business, and because of this fact arrangements are now being made to greatly enlarge the department.

H. S. Jones, of Clark & Jones Piano Co., with headquarters in Birmingham, Ala., and with a chain of stores in the South, visited all of the dealers.

Jesse Rosenstein, of the National Piano Co., Pathé distributors, says he has been getting a liberal shipment of machines and records during the month and that business is fine.

W. T. Davis, of the Victor Co., was in Baltimore a great deal of time during the month looking over the trade.

The Vita-Nola talking machine, made by the Vitanola Talking Machine Co., of Chicago, is handled in this city by the Baltimore Bargain House, Robt. Lipnick, 654 West Baltimore street; the Peabody Piano Co., the Hub Piano Co., 122 North Liberty street, and A. W. Steere & Bro., 830 North Gay street, and all of these concerns report a steadily growing demand for this product.

A VISITOR FROM NEWPORT

A visitor this week at the executive offices of the Pathé Frères Phonograph Co., Brooklyn, N. Y., was Mrs. I. Richstaedt, who conducts two successful Pathé shops in Newport, R. I. She is a firm believer in the musical qualities and sales possibilities of Pathéphones and Pathé discs. In a chat with The World she stated that her Pathé sales were steadily increasing, and that, according to her present plans, she would open a third store in the very near future, handling the Pathé line exclusively.

Edison Dealers Hold Their Fourth Annual Convention

George Lincoln Parker Presides Over Annual Gathering of Edison Dealers Held Last Week at Waldorf-Astoria —Mr. Edison's Great Message—Mr. Maxwell's Playlet Well Received—New Edison Velvet Surface Record

On Thursday and Friday, June 6 and 7, the fourth annual convention of Edison dealers took place at the Waldorf-Astoria, New York, with Geo. Lincoln Parker, of Boston, as chairman. The program for Thursday morning started with an address of welcome from Thos. A. Edison, Inc., delivered by T. J. Leonard, general sales manager of the phonograph division. Following this Geo. L. Parker delivered his convention address. Wm. Maxwell, vice-president, and manager of the phonograph division, spoke next and his subject was "Yesterday, To-Day and To-Morrow." During his talk he intimated that there would be an increase in price on the Edison instruments about September 1, but that

volving salesmanship psychology of a very high order. It elucidated in an interesting manner the way in which the so-called "High Brow" talk, if used with discretion, becomes a matter of great interest to the prospective purchaser of an instrument. The sketch also brought out various points about the New Edison and the Edison Re-Creation, which the dealer should em-

phasize in case of competition with other instruments.

The session was then adjourned in order that the conventionites might visit the Grand Central Palace in the afternoon, and each one was given tickets for the National Music Show as he passed out of the door. It is needless to say that they enjoyed their visit.

THOS. A. EDISON'S INSPIRING ADDRESS ON FRIDAY

On Friday morning the Edison convention was again resumed and started off with a message from Thos. A. Edison delivered by Wm. Maxwell, which read as follows:

Thos. A. Edison's Message

To my friends, the Merchants of the United States and Canada who handle Edison Phonographs and Records:

These are strenuous days, with the fate of civilization hanging in the balance. However, the world is safer to-day than it was in July last year, when you gentlemen were assembled in this same room. Germany prepared and

the most important thing in the world to-day. We must not put our own selfish interests above the interests of the nation. We must give and

Edison Crowd From Syracuse, N. Y.

there would be a thirty-day notice given out in advance of the change in order that the Edison dealers might, by announcing the coming change in price to the public, have an opportunity to bring some pending sales to the closing point.

E. C. Boykin followed and answered questions 1 to 8, inclusive, which were of great interest to the dealers. Following this there was an open discussion in which matters of general interest were brought up and debated. The next speaker was T. J. Leonard, who answered questions 9 to 14, after which an open discussion again ensued. A speech was then delivered by Robt. J. Bolan, of East Orange, N. J., whose subject was "Too Much Money." A. P. Burns, assistant to Mr. Leonard, then answered question 15. Col. F. B. T. Hollenberg, of Little Rock, Ark., and Gust. Holmquist, of Erie, Pa., in turn discoursed on the subject of "Won't Pay Interest." Phillip Haberman, vice-president of the Commercial Investment Trust, New York City, then treated in a very clear way on the matter of "Borrowing Money." W. D. Wilmot,

George Lincoln Parker, Chairman

trained for this war as a pugilist trains for a championship prize fight. She expected to deliver the knockout punch in the fall of 1914. Her boasted far-sightedness proved to be gravely at fault. To-day, after nearly four years of warfare, Germany is still trying vainly to land a knockout. Like a desperate pugilist, who feels his strength ebbing rapidly and knows he can last but a few more rounds, the Hun is staking everything on the chance of landing a lucky punch. General Foch, like a clever boxer, now parries and gives ground, but the time will come when he will strike, and there will be behind his blow the greatest moral and military force that has ever been invoked on the field of battle—the gallant veterans of France, the dauntless British; the daring Italians, and hundreds of thousands of our own brave boys, who will write during this war the proudest page in this nation's history.

We are in this war and we must see it through to a conclusion that justifies the sacrifices we have made. I do not say that Germany must be crushed. It may be that her deluded people will strike the scales from their eyes and overthrow the powers that have plunged the world into war. But however the result is accomplished, there is but one result with which we can be satisfied. Germany must be cured forever of the desire to wage war.

I have spoken about the war, because it is

The Delegation From Cleveland

we must do to the full limit of our respective abilities, in order that the war may be won in the shortest possible time. On the other hand, we should oppose in all proper ways the hysterical and immature ideas that from time to time are advanced by men, who, either through inexperience in business or indifference to the business prosperity of the country, propose measures of incalculable harm and of relatively small advantage.

No legitimate industry is non-essential except as it interferes with the conduct of the war, and then only to the extent to which it interferes. No statistician can prepare figures that can be accepted safely as a guide to the curtailment that should occur in the manufacture of the so-called non-essentials. What we need to do is to speed up. It is not a question of what

Richmond's Delegation (C. B. Haynes to Left)

We must not do, but a question of what we must do. We must win the war. We must provide all the arms, ammunition, ordnance, aeroplanes and equipment that can be transported to Europe, and we must build ships as rapidly as possible. We must make all the other goods that we can possibly make. We must keep on creating new wealth. We must keep our manufacturing organization in good running order. We must continue to go after foreign

(Continued on page 68)

Delegation From the Boston Zone

of Fall River, Mass, spoke next and took as his theme "Want a Discount." V. E. B. Fuller, general supervisor of the Edison Co., closed the speakers' session with a brief talk about the National Music Show, which he urged the dealers to attend while they were in New York and incidentally to visit the Edison exhibit there.

The morning session closed with a one-act comedy entitled "The Dotted Line," written by Wm. Maxwell and produced by E. C. Boykin. It was a very cleverly written sketch in-

FOURTH ANNUAL CONVENTION OF EDISON DEALERS IN NEW YORK—(Continued from page 67)

trade, and we must prepare ourselves for the intense competition for foreign markets that will occur after the war.

We hear a good deal of talk about luxuries. Luxury is a relative term. What is luxury for one man is almost a necessity to another. No matter what is said or done, the increased earning power of the American people is going to result in the increased purchase of luxuries and the urge to possess luxuries will do more to speed up production than all the prize contests, bonus plans and proclamations that can be devised. The laziest and most non-productive man in the world is the man whose wants are the simplest. The fellow who has a family that

William Maxwell

wants luxuries and is endeavoring to gratify them is the man who is usually working the hardest and procuring the most.

Some of you may have been told that music is a non-essential. My views on that subject are probably well known to you. The time is not far distant when music will be recognized as a greater essential than books. Don't let anybody make you believe that music is a non-essential. Merchants who sell good musical instruments are performing a useful service to the nation.

Many Interesting Talks

The next dealer on the program was M. L. Eshelman, of St. Joseph, Mo., who spoke on "Conditions Too Uncertain." J. Craig Youmans, of Newton, N. J., came next and dwelt on "Paying for Bonds," and he was followed by A. Petrone, of Newark, N. J., and C. J. Lionhart, of Norman, Neb., both of whom spoke on "Living Costs So Much." W. W. O'Hara, of Montreal, Canada, and A. P. McCoy, of Waterbury, Conn., made interesting talks on the subject of "Don't Want to Buy Luxuries."

Knock-Out Kid

J. W. Scott, the Amberola supervisor, followed with a discussion on "The Diamond Amberola," and in his talk he was assisted by the "Knock-Out Kid," whom he introduced in part as follows: "Ladies and gentlemen, before making a few remarks about the Diamond Amberola, I want to introduce the world's champion lightweight. He has never been defeated. He is known from the Atlantic to the Pacific and from Hudson Bay to the Rio Grande as the 'Knock-Out Kid.' Ladies and gentlemen, I take great pleasure in introducing Amberola 50, the

Knock-Out Kid, who has never lost a decision." Gust. Holmquist, of Erie, Pa., came next and treated on "Records on Approval." E. Trautwein, mechanical supervisor of the Edison company, explained the method for "Keeping Instruments Properly Timed." M. A. Alfred, of Hartford, Conn., and W. E. Jones, of Cape Charles, Va., both spoke on "Will Wait for More Records." R. Montalvo, Jr., of New Brunswick, N. J., treated on the subject "Am Not Quite Ready Yet." Lesley I. King, of Columbus, O., discussed the solution to "Want to Talk It Over With My Husband," and D. H. Marchant, of Wadsworth, S. C., held the other side of this subject and took as his theme "Want to Talk It Over With My Wife."

Tone Tests Discussed

V. E. B. Fuller, general supervisor of the Edison Co., followed this series of short talks with a discussion on "Tone Tests" and "Lectures on Music." W. McPhillips, of London, Canada, then talked on the matter of "Record Service." An open forum was then declared and discussions followed bearing on numerous topics of interest. Mr. Maxwell closed the session with a little speech entitled "Until We Meet Again."

The New Edison Velvet Surface Record

The outstanding feature of the Edison dealers' convention was the announcement of the new velvet surface record. This latest re-creation of the Edison laboratories is considered a great step forward in the manufacture of disc records, in that it practically eliminates the surface noise hitherto found on records. It was also stated that this record is of a nature which simplifies production. A novel method of announcing this new velvet surface record to the conventionites was used. It was introduced by a most beautiful and charming young lady, who made her debut in the early part of the convention and offered to auction off the first velvet surface record. The offer was promptly accepted and after considerable cross-bidding W. O. Pardee, of the Pardee-Ellenberger Co., of New Haven, Conn., finally bid in the prize at the very liberal figure of \$550. "The Velvet Surface Girl," as she became familiarly known by all the conventionites, spent the balance of the two days during which the convention lasted selling autographed velvet surface records, the proceeds of the sales going to supply Army and Navy Models of the New Edison and Edison re-creations for use on the transports plying between the United States and France. Needless to say, a great many autographed records were purchased and the transport fund rose to considerable proportions.

Comprehensive Advertising Display

In Suite 122 in the Waldorf-Astoria during the Edison dealers' fourth annual convention at New York a comprehensive and exhaustive display was made of the many ways in which Thos. A. Edison, Inc., employs publicity for the benefit of Edison dealers. Samples of all of the different kinds of advertising were on exhibition, as were the different advertising novelties that are available through the Edison company for the dealer to display in his own establishment. The novelties included the rotogravure portraits of the best-known and most popular ar-

The Velvet Surface Girl

tists, the special signs, placards and busts of the great masters of music, etc., etc. At one end of this hall was shown a model window prepared by Ellis Hansen, the famous window display man. This window display was most attractive and was designed in such a way that the panels could be replaced from time to time so as to give an entirely new effect at a very moderate cost.

L. C. McChesney, advertising manager, Arthur J. Palmer, assistant advertising manager, and P. A. Fuss, editor of the Amberola Monthly, took a very justifiable pride in the exhibit shown in Room 122.

BANQUET OF THE EDISON JOBBERS AND DEALERS

On Friday evening, June 7, the Edison jobbers and dealers, many of whom brought their wives, sat down to a most excellent repast in the banquet hall of the Waldorf-Astoria, as the guests of the officials of Thos. A. Edison, Inc. There were in all nearly eight hundred guests, the greater part of whom were old-time friends with each other.

The banquet hall had been decorated most tastily along patriotic lines for the occasion and the entire assemblage rose to sing the "Star Spangled Banner" as the prelude to partaking of a most excellent dinner, about which the attractive menu card contained the following words: "Mr. Oscar Tschirky has sought to demonstrate by our dinner this evening that the strictest observance of the Food Administration's rules imposes no hardship on the epicure"—and it didn't. During the meal an all-star vaudeville was presented on the stage at one end of the hall through the courtesy of Joseph M. Schenck and under the direction of J. H. Lubin.

The "Dinner Show," as it was called, contained several acts from "Keith's First Circuit," and needless to say proved very entertaining. At one point during the show program an interruption was made for the rendering of

a "Gag Song" which contained many clever quips about various celebrities in the Edison trade. The verses ran as follows:

GAG SONG

Now listen, friends, just for a bit, just keep your seats right where you sit
And lend an ear to what I have to say.
Now, with your attention, I'll thank you not to mention
Any indiscreet remarks that come your way.

Of course you all have heard of that tiny little bird
That comes and twitters gossip in your ear.
Well, he met me at the door, and I hope no one gets sore,
For what he said was all in fun—so never fear.

He said, "Now Walter Kipp is known as quite a clip,
He's the Bourbon Kid and likes his little toot,
He loves the merry clatter of the chips—but can the chatter
When he's playing 'Home, Sweet Home' upon his flute.

There's our old friend, H. E. Blaks. He can hardly keep
awake.
You know, he comes from Etherburg, Pa.,
Sh, what's that I hear? Wake up, papa, dear,
For you'll have to walk the floor till break of day.

Hello, L. J., how's friend Bourgette? Now don't get in a
pet,
Just sit calmly there and keep a level head.
There's nothing to get riled about. All your friends will
sure run out
If you start to cuss and shout to raise the dead.

FOURTH ANNUAL CONVENTION OF EDISON DEALERS IN NEW YORK—(Continued from page 68)

Well, well, if there ain't Ollie Rouse. Live anywhere near Bryan's house?

Whose Bryan? Dogged if I remember now. How's things out in Nebraska? Hooverizing? Nitsky, Did I hear you say? You tip 300! Wow!

Have you heard the story told of how Montalvo, Junior, bold

And daring as the bravest pioneer,
Made a talker of his own. He *must* be 'shown.'
Now he'd swap one for a stein of 'almost' beer.

K. M. Kahoon, of Waltham, Mass., he dreams of diaphragms and gas-

Kets. If he had a million still he'd pine
For another million more. O, please don't slam the door.
Where you going? Out for more Priscilla wine?

Charlie Sauer, it's awful sweet for you with us to-night to meet,

How could you leave your prospects for a day?
Won't they be lonesome, Chas.? Won't they miss your
knockout gas?
What's the latest rag out Chillicothe way?

Here, waiter, bring a microscope. I thank you. That will help. I hope

To find a man I'm trying hard to see.
"Does anybody know muh? I'm from Enid, Oklahoma."
Why, sure we do. You're great, big, little Mr. Lee.

I've another search to make for a lanky, human rake,
He's long and lean, but his heart's as big as that.
Say, how d'ye leave St. Jo? Did the hull town see yuh go?
What you drinkin', Estrelman? A split of anti-fat?

There's a Coca-Cola souse and he's somewhere in this house,
He's E. G. Bassett--hails from Bristol, Conn.

"Have a piece of gum? No? Why?" "No, thank you, sir,
for I
Still has the piece I learned to chew upon."

Mr. Thomas, you all know Dan. Why, he's the only man
Who gave a thousand tone tests, so they say,
He'd rather fish than eat. As he walks along the street
The barbers swear they'll get him yet some day.

Out Erie way there lives a man. Why, long ago he tied
the can

To anything related to a smile,
Saloon's his middle name. Not the kind *you're* thinking—
shame!
Mr. Holmquist's eating ice cream all the while.

In the good old sunny South, where they water at the
mouth

When you mention chicken broiled or stewed or fried,
Lives Pittman, suh, whose mind is always on "the other
kind,"
Of Greenville. North Ca'lina, he's the pride.

Billie Maxwell, here's a tip. The favorite has got the pip.
I heard it from a stableboy who knows.

Here's your chance to make a kill that will make the
bookies ill
Play all your cash and then go hock your clothes.

As sure as I'm a sinner, it was at the jobbers' dinner
That they carried out Tom Leonard by his feet.

Says Tom, "I can't recall what happened there at all."
No pink stuff, waiter. Lemonade, and make it sweet.

In an old Rhode Island town lives a man of great renown,
They call him Daddy Wilmot with affection,

They must have shut the place up tight, bein's he's down
here to-night,
At least he started off in this direction.

If in Chicago you should be and you went around to see
Mr. Goodwin at his office, home or club,

And you asked "Say, where's the bach'?" They'd simply
say, "You'll catch
Him playing porpoise in the A. A. Swimming tub."

From "Our Lady of the Snows" he came down to see the
shows.

That *isn't* what he told the folks at home.
With golf Dick Williams piddles and he dotes on ancient
fiddles,
While the little flies do fox-trots on his dome.

When the dinner was nearly over, William Maxwell jumped up on the rostrum and in his characteristically vigorous style announced that there were a few left of the new Velvet Surface Recreations, autographed by Mr. Edison, that would be sold at five dollars each, the proceeds going to the Transport Fund. These were quickly grabbed up by the crowd until just one remained and this Mr. Maxwell would not part with except by auction to the highest bidder. The first offer was for \$50 and from that figure the bidding steadily climbed until it reached the high mark of \$480. By this time Mr. Maxwell had warmed up to his role as auctioneer in great style and it was quite evident that the last of the Velvet Surface Recreations was going to go

(Continued on page 70)

Banquet of Edison Jobbers and Dealers Held at the Waldorf-Astoria, New York, June 7, 1918

FOURTH ANNUAL CONVENTION OF EDISON DEALERS IN NEW YORK—(Continued from page 69)

for more than the first, which Mr. Pardee secured for \$550. But at this point Walter Kipp suggested that after all the money for the Transport Fund was more important than the winning of the particular record. He announced that Charles Edison would start a pot with \$400 and that he as a jobber would add \$200 to that amount. The idea quickly spread and as each new jobber pledged \$200 he was called up on the stage. Before the wave of enthusiasm became exhausted for lack of additional material, the very large amount of \$6,000 was raised by the Edison Jobbers. Mr. Maxwell announced then that each of the subscribing jobbers would be sent an autographed Velvet Surface Recreation together with a personal letter from Mr. Edison. Following this a great number of dealers contributed \$25 each until the total for the evening reached \$8,000.

The "Transport Fund" having been successfully oversubscribed, a most delightful concert was given by a number of the most popular

Edison artists. The caption of this concert was "The Songs Our Soldiers Sing," and in line with this each of the artists sang two or three of the best of the war compositions, such as "Keep the Home Fires Burning" and a few of the national anthems, notably the "Marseillaise" and the "Battle Hymn of the Republic." Among the popular Edison artists who were present for the banquet and who favored the banquetees with songs were Frieda Hempel, now Mrs. William Kahn, Marie Morrissey, Ida Gardner, Edette le Fonteney, Merle Alcock, Caroline Lazzari, Amy Ellerman, Betsy Lane Shepherd, Ralph Errole, Arthur Middleton, Marie Tiffany, Arthur Fields, Billy Murray and Ed Meeker.

The attendance at the dealers' convention and banquet was unquestionably the largest in the history of Edison reunions. The register showed over 660 names covering Edison dealers, jobbers and travelers from all parts of the country. The list is so extensive that lack of space prevents us from printing it.

guests of Thos. A. Edison, Inc., a social event which was greatly enjoyed.

The important feature of the travelers' convention was the manner in which all those present got together, and discussed in the open forums, which followed every talk, problems of particular interest to the man who is handling Edison goods. Many of the informal talks made by those present were deemed so important that each man who participated has been requested to write a brief resumé of his talk and send the same in to the Edison headquarters in order that every one of the many good ideas introduced at the convention may be put into practical operation.

Despite the fact that this was the first gathering of Edison travelers which has been held, the attendance was so large, and the interest so evident, that the success of the future conventions of the Edison travelers is unquestionable.

Those present at the Travelers' convention and their location were: Albany, N. D. Griffin, P. R. Hawley; Atlanta, W. L. F. Rosenblatt, B. K. Troutman, A. C. Witherington; Boston, F. H. Silliman, L. H. Ripley, G. R. Coner, F. S. Boyd, T. E. Dean; Chicago, C. E. Goodwin, H. D. Buchanan; Cincinnati, A. O. Peterson, P. H. Oelman; Cleveland, B. W. Smith, L. N. Bloom, M. G. Kreuzsch; Dallas, A. H. Curry, O. P. Curry, N. B. Johnson, C. L. Rankin; Denver, W. C. Wyatt; Des Moines, G. C. Silzer; Detroit, R. B. Alling; Indianapolis, W. E. Kipp, L. P. Brock, J. Cartmill; Kansas City, M. M. Blackman, C. P. Cunningham, W. M. Hinde; Milwaukee, W. A. Schmidt, G. J. Campbell; Minneapolis, L. H. Lucker, H. E. Stinchfield; New Haven, W. O. Pardee, F. T. Keeney, F. L. Stoddard; New Orleans, F. S. Hemenway, L. T. Donnelly; New York, G. L. Dabson, F. O. Faul, C. R. Lee, A. W. Toennies, R. Montalvo, Jr.; Ogden, R. Proudft, T. S. Hutchison; Omaha, D. W. Shultz, C. Hough; Philadelphia, R. B. Cope, W. Babcock, J. Robinson; Pittsburgh, A. A. Buehn, J. B. Gowdey, W. S. Rippey, Jr.; Richmond, C. B. Haynes, G. R. Garnett, Edgar Hill; St. John, N. B., J. G. Harrison, J. D. FIRST ANNUAL CONVENTION OF EDISON TRAVELERS

Wm. Maxwell Presides at Important Gathering of Edison Traveling Men at the Waldorf-Astoria on June 4—Many Valuable Suggestions Brought Out in the Important Subjects Discussed

The first annual convention of the travelers of Thos. A. Edison, Inc., which was held at the Waldorf-Astoria, New York, on Wednesday, June 4, was attended by approximately one hundred Edison travelers from all over the country, and so successful was the affair that it will become an annual event in connection with the regular yearly Edison conventions.

The morning session opened at 9.30, with T. J. Leonard, sales manager of the phonograph division, as temporary chairman. Mr. Leonard greeted the travelers with a happy speech, in which he introduced the permanent chairman of the convention, William Maxwell, vice-president of Thos. A. Edison, Inc., and manager of the musical phonograph division, who opened the program with an interesting talk on the "Velvet Surface—the New Edison Re-Creation," which was followed by five-minute talks on the record shortage situation and how best to meet it, the talks being in the nature of an open forum. E. C. Boykin, director of sales promotion and editor of "Along Broadway," next told of the aims and purposes of that interesting Edison house organ, and was followed by L. C. McChesney, who gave a most important talk on advertising. Following another general discussion by those

present, Verdi E. B. Fuller talked on the Edison tone tests and their value as a means of creating interest and sales, following which the convention adjourned for luncheon at the Waldorf, at which Mr. Maxwell acted as toastmaster, and during which the travelers vied with each other in saying "Here's one you haven't heard yet."

The afternoon session convened at 2.30, the first talk of the afternoon being given by W. Taylor, the new Edison supervisor, who took as his subject "Factory Circularizing," which was followed by an open forum concerning the best methods to be pursued by the travelers in aiding the dealers in their territory to build up sales. A. P. Burns, assistant sales manager, next talked on travelers' reports, followed by a general discussion concerning suggested improvements which could be made in the method of making reports, during which many valuable ideas were brought out.

E. C. Trautwein next gave a terse talk on "Mechanical Service," and the convention was closed by H. P. Durant, who talked on banking accommodation.

Following the adjournment, the travelers went for dinner, and in the evening attended a performance of "Sinbad" at the Winter Garden as

IDENTIFYING AIR RAIDERS BY SOUND

Interesting Experience Which Shows That Anyone With a Sense of Absolute Pitch Should Be Able to Identify Hostile Air Raiders

The writer of an article in an English musical paper who points out that Gotha aeroplanes "drone" on the note A flat, while English machines prefer E and F, has surely overlooked an important point, says the London Daily Chronicle, when he suggests that anyone with the sense of absolute pitch should have no difficulty in identifying hostile raiders by their sound. The pitch of a sound depends on the number of vibrations reaching the ear in a given time, and the number varies according as to whether the source of the sound is moving towards or away from the listener. Given a Gotha hustling at 100 miles an hour, its A flat could vary as much as a perfect fourth, which is more than the difference between it and the British machines' E or F. If an express train sounds its whistle while approaching and passing through a station, the pitch of the whistle—though actually the same all the time—will appear to rise as the train comes into the station and fall as it passes out. In the first case, the sound waves reach the ear more frequently, as the source is approaching, and in the second less frequently as the source is retreating. It would be the same with the Gotha's A flat—if it is always that note, whatever the speed of the machine, which is highly improbable. Some rather interesting deductions.

THE NEW VEECO MOTOR

MAKES

The Electric Way the Ideal Way

All experimenting has been done in advance at the Veeco factory. Any mistakes have been rectified **before**, and not **after**, the Motors have been put on the market.

The Improved Veeco Electric Motor is designed primarily and exclusively for talking machines. Runs on either A. C. or D. C., 100-125 volts without adjustment. Supplied to run on any voltage from 6 to 250. Mounted on 12 or 12½ inch square mahogany boards ready to install.

Combined with the VITRALOID Turntable it makes a complete motor unit for high-class machines.

STEPHENS TO PRESENT NEW BILL

Father of Present Stephens Bill States to The World That He Plans to Present a New Measure to Congress Embodying New Ideas in the Matter of Controlling Resale Prices Under Supervision of Federal Trade Commission

WASHINGTON, D. C., June 6.—Since the recent decisions in the United States Supreme Court and the District Court against price fixing under certain conditions, and against systems to that end which were formerly in vogue, and in view of the attitude taken by the Federal Trade Commission in the matter of retail price maintenance, there has been considerable speculation as to what attempts will be made to legalize retail price fixing on trade-marked articles, and especially what will be the fate of the Stephens bill. No less a person than Justice Brandeis of the United States Supreme Court has stated that there is an opportunity for establishing price maintenance through legislation and under Governmental supervision, and it has been hinted that an amended Stephens bill, or perhaps an entirely new measure along the suggested line, will be offered in Congress.

Congressman Dan V. Stephens, of Nebraska, father of the present Stephens bill, is of the opinion that it is possible to legalize the fixing of retail prices by producers, if the Federal Trade Commission is given some jurisdiction, and plans a new bill embodying that idea. In an interview with The Talking Machine World to-day Congressman Stephens set forth his ideas as follows:

"In my opinion legislation will be possible, after the pressure of this war legislation is past,

along the lines that I have heretofore indicated in a statement given to the press, namely, that in my judgment it will be possible to legalize the fixing of resale prices by producers, providing a complainant who feels that a price is unfair can have recourse by filing his protest against the price fixed with the Federal Trade Commission for review, the Federal Trade Commission being empowered to go into the question of the fairness of the price fixed and coming to a final decision. The penalty that would follow an adverse decision of the Trade Commission would be the withdrawal of the right to fix the resale price. Each case would be decided upon its own merits. The advantage of this legislation appears to me to lie in the fact that the rights of the people would be absolutely preserved when anyone felt justified in making a complaint. The probabilities are that there would be practically no complaints made as there will be ample and vigorous competition between all brands. In the second instance the producer would be no worse off under such legislation than he is now, as under the court's decision he is unable to control his resale price at all. Under the proposed legislation he would be able to control the resale price, providing his price was fair. If it wasn't fair he would be no better off under the new legislation than he is now.

"It appears to me that legislation along this line is feasible and will meet the approval of many members of Congress who have heretofore had doubts of the wisdom of the legislation that has been proposed in the Stephens bill. As soon as the war work clears away sufficiently to justify it my intention is to present a bill to Congress embodying this idea."

NEW SCHUBERT RECORDS

Dealers Will Receive New Numbers Each Month—First Records Bring Praise

The Bell Talking Machine Co., of 44 West Thirty-seventh street, New York, is now producing a number of new Schubert records, which are being heartily received by representative dealers throughout the country. The announcement of the records, which came a few months ago in The World, brought many inquiries, and the company has been making every effort to get matters into such shape that the dealers should receive a steady supply. From now on this supply will be available, and a considerable number of new records will be produced each month. The first records include a number of standard and most popular selections of the day, and many enthusiastic letters regarding the success which the dealers are having with them have been recently received at the office of the company.

NEW DEPARTMENT IN ST. PAUL

Howard Farwell & Co. Install New Series of Demonstrating Booths in Their Store

ST. PAUL, MINN., June 3.—The new talking machine department of Howard Farwell & Co., piano and music dealers of 25-27 East Sixth street this city, are now considered among the most attractive in the Northwest. The elaborate sound-proof booths are grouped on the main floor, and occupy about half the space there. The booths are built of lathe and plaster, and have a very permanent appearance. Both the Victor and Columbia lines are handled.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN,
Manager

World Office
Republic Bldg., 209 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., June 10.—The wholesale trade of Chicago is working harder than ever before in an effort to take care of the vast amount of business on hand. There is, seemingly, no let-up in the steady stream of orders coming in, especially from the country districts. Wholesale dealers in general agree that the major factor governing their activities depends entirely upon the amount of goods being turned out by the manufacturers. The manufacturers in turn are working overtime in trying to take care of the demands made upon them. Nevertheless, in spite of the overtime their output is way below normal owing to a scarcity of skilled labor. Some of the larger manufacturers in trying to meet the situation have instructed their traveling representatives not to spend so much time in booking orders, but to scout around and be constantly on the lookout for labor—especially experienced woodfinishers, coarse rubbers and trimmers are needed.

This is the situation that the wholesale trade of Chicago is facing. It is practically true of the entire country. For this reason the wholesale dealers of this section are using the utmost care in taking orders and are delivering only to those who are able to buy on short time and pay the most cash with their orders. As one jobber so aptly stated, there exists in the trade to-day an ideal condition, one that every jobber and manufacturer in the country should take advantage of, and that is, pick your trade, cull out the weeds and in a short while the "Gyp" dealer will be a part of history only.

The record situation remains in about the same condition that it has been for the past few months, that is, the demand is greater than the supply. A few large shipments of records brought a slight relief to the situation the latter part of the month, but this stock quickly disappeared in filling back orders.

The retail trade is not so active locally as compared with country business. The demand for machines in Chicago is not very strong, as a whole and, if we may be permitted to use the expression, the record situation is a "goat getter." The buying public continues to make strong demand for popular patriotic selection, especially war songs and dance music with a touch of the military, but these are not forthcoming in adequate quantities and as a result

a great deal of business that could be carried on by the retailer is lost, for a time at least, so many of them declare.

New Empire Art Model

The Empire Talking Machine Co. has just announced the completion of their new period design art model talking machine which will be offered to the trade in the near future. This machine is of Queen Anne design and is one of the most beautiful ever offered to the trade. The workmanship is of the same fine quality so characteristic of all Empire instruments. The artistic beauty of the machine is enhanced by an elaborately designed grill covering the opening of the tone chamber and a delicate festoon is arranged around the borders of the paneling.

W. B. Fulghum Visits

Walter B. Fulghum, formerly manager of the order department of the Victor Co. and who now operates the Victrola Shop at Richmond, Indiana, spent Sunday of this week in Chicago. After a brief visit here he left for the East, where he intends to visit Philadelphia and New York and renew acquaintance with his old friends at the Victor factory and others in the trade. In addition to the Victor store Mr. Fulghum owns and operates four prosperous farms near Richmond. He reports that he has increased his business 200 per cent. and that the country trade is very good.

C. T. M. Co. Men With Colors

W. C. Griffith, assistant sales manager and junior member of the Chicago Talking Machine Co., is now one of Uncle Sam's boys, having entered the army service on May 27 with other selects. He has been assigned to the Fourth Co., First Provisional Regiment, which is stationed at Camp Wheeler, Macon, Ga. Mr. Griffith tried to enlist with the regulars four times but was declined on account of defective vision. Mr. Griffith was one of the most popular men in the Chicago trade and began his career with the Chicago Talking Machine Co. about four years ago, and in January, 1917, was made junior member in the company by President Geissler. His work brought him rapid promotion. He started as a floor salesman with the company and was then given a traveling representative's position, which was followed very quickly by his promotion to assistant sales manager.

Another popular man of the Chicago Talking Machine Co. who recently entered the service was Richard G. Johnson, who had charge of the shipping department. He started with the company about six years ago and was very well liked for his happy and genial disposition. Mr. Johnson enlisted in the regular army on May 21 and is now attached to the Fourth Recruiting Co. at Fort MacIntosh, Laredo, Texas.

Private Emmett A. Creed, brother of D. A. Creed, vice-president of the Chicago Talking Machine Co., is now with the regular army and is stationed with Co. I, Thirteenth Infantry, at Camp Fremont, Cal.

Wins Promotion

James A. Coudret, former assistant to J. H. Steinmetz, president of the Empire Talking Machine Co., has won his chevrons as sergeant and has been appointed as instructor of calisthenics, gas defense and pistol practice. Sergeant Coudret is connected with Co. 5, Quartermaster's Division, Camp Johnston, Fla., and gives instructions to two classes each day.

Praises Paramount Records

The Michigan Phonograph Co., of Grand Rapids, Mich., were recently appointed jobbers for the Paramount records. In a letter to the manufacturers the New York Recording Laboratories, of Port Washington, Wis., Geo. M. Cook, the president of the company, speaks very enthusiastically regarding the records, and in conclusion says: "The future of the 'Paramount' is assured, as it fills a long-felt want in the talking machine industry. Paramount recordings are clear and distinct, surface noise is reduced to a minimum, and the catalog is well balanced, both musically and commercially."

Returns From Eastern Visit

D. A. Creed, vice-president of the Chicago Talking Machine Co., and G. P. Ellis, sales manager, returned the first part of the month from a visit to New York, where they had been attending a directors' meeting both of the New York and Chicago Talking Machine Companies.

Fibre Needle Popularity

F. D. Hall, president of the B. & H. Fibre Mfg. Co., is heartily satisfied with the current demand for both the B. & H. fibre needles and for the B. & H. pointer, which met with such favorable reception from the trade since it was

placed on the market a few months ago. The necessity of increasing the capacity of the plant because of the increasing demand for the fiber needle and the consequent enlargement of the working forces revealed a peculiar condition. Mr. Hall found that, although the wages paid by the B. & H. Co. are very liberal the scarcity of younger women on account of the demands made by munition and war supply manufacturers was so great that it was necessary to train in women ranging between fifty-five and sixty-two years of age. Somewhat to his surprise he finds these women all proving themselves most decidedly efficient, and show an interest and enthusiasm in the work that is highly commendable.

Brunswick Shop Activities

A. B. Stowall, retail manager of the Brunswick Shop, is enthusiastic over the business conditions now prevailing. "We have a very good demand for higher grade instruments," stated Manager Stowall, "but with the lower price machines we are not doing so well. Collections have been exceptionally good with us, and we look forward to a very good business during the summer months."

Six Best Sellers

The six best Victor sellers for the month are: "Just Like Washington Crossed the Delaware, General Pershing Will Cross the Rhine" and "I May Stay Away a Little Longer"; "War Ballad Medley" and "Eclipse Medley"; "There's a Little Blue Star in the Window" and "Some Day They're Coming Home Again"; "From the North, South, East and West"; "Little Mother of Mine"; "The Volunteers" and "Liberty Forever!"

The Columbia announce the following six best sellers for the month: "Levinsky at the Wedding" (part III) and "Levinsky at the Wedding" (part IV); "Regretful Blues" and "A Little Bit of Sunshine"; 'N Everything" and

"When You Play With the Heart of a Girl"; "In the Land O' Yamo Yamo" and "My Mind's Made Up to Marry Carolina"; "If You Look in Her Eyes" and "Fancy You Fancying Me"; "Medley of Old Waltz Songs."

The six best Edison sellers for the month are: "Explanatory Talk for 'Ve lo Dissi'" (did I not tell you?) and "Ve lo Dissi" (did I not tell you?); "Bendemeer's Stream" and "My Love She's But a Lassie Yet"; "Forever is a Long, Long Time" and "My Hawaii, You're Calling Me"; "Light as a Feather" and "Valse 'Erica'"; "Band Festival at Plum Center" and "Bill's Dog Towser"; "Buzzin' the Bee" and "Pozzo One-Step."

Pathé dealers announce the following six best sellers for the month: "The Yanks Started Yanking" and "Round Her Neck She Wears a Yeller Ribbon"; "What'll We Do With Him Boys" and "Rock-a-Bye Your Baby With a Dixie Melody"; "Tishomingo Blues" and "Somebody's Done Me Wrong"; "American Patrol" and "Hiram's Huskin' Bee"; "Fireflies" and "Heart's Ease"; "Deauville" and "Nesting Song."

The Aeolian Co. announce the six best selling new Vocalion records as follows: "Annie Laurie"; "Review of the U. S. Fleet" and "Liberty March"; "Pussy Willow" and "Sally Trombone"; "Un Bel Di" (Some Day He'll Come); "Hungarian Rhapsody (parts I and II); "Just a Baby's Prayer at Twilight" and "Wondrous Eyes of Araby."

The six best Gennett records for the past month are: "Swanee River" and "Gentle Shadows" (violin) (art tone) Helen Ware; "Fox Trot Medley" and "One-Step Medley"; "Spring Song" and "La Blanche Waltzes"; "Hail! Hail! the Gang's All Here" and "I Don't Want to Get Well"; "'N Everything" and "Somebody's Done Me Wrong"; "Good-Bye, Barney Boy" and "Yock-A-Hilo Town."

Paramount six best sellers for the month are: "Aloha Land" and "O Sole Mio"; "Three Wonderful Letters from Home" and "A Little Bit of Sunshine"; "Good Morning Mr. Zip, Zip, Zip" and "Aw Sammy"; "Can't You Hear Me Callin', Caroline?" and "I Cannot Sing the Old Songs"; "Wait Till the Cows Come Home" and "More Candy"; "Livery Stable Blues" and "The Darktown Strutters' Ball."

The six best Emerson sellers are: "What Are You Going to Do to Help the Boys?" and "Way Down There a Dixie Boy is Missing"; "They Were All Out of Step But Jim" and "Second Regiment Connecticut March"; "The Last Long Mile" and "The Stars and Stripes Forever"; "'N Everything" and "Chu Chin Chinaman"; "K-K-K-Katy" and "What a Wonderful Dream It Would Be"; "The Missouri Waltz" and "Kathleen Mavourneen."

Miss Stein in Charge

Miss Esa Stein is now in charge of the recital hall at Lyon & Healy, having succeeded Bob Taylor, who was recently called to the colors. Miss Stein was formerly connected with the record department of Lyon & Healy.

Enthusiastic Over Conditions

W. E. Cotter, wholesale and retail manager of the phonograph division of Thos. E. Wilson & Co., returned on Wednesday of this week from a very successful ten-day trip through Dallas, Houston, Ft. Worth, Kansas City and St. Louis. Mr. Cotter is very enthusiastic regarding conditions throughout the district which he visited, and states that prospects are increasing more and more. While in Houston he visited the Rick Furniture Co., who were holding a ten-day sale, and on the first day they sold eighty-five phonographs.

"Considering the conditions brought about by the war," stated Mr. Cotter, "business is very good. The harvesting crop throughout (Continued on page 77)

The Ultona—a distinctive feature of the New Brunswick Method of Reproduction. Here the *Ultona* is in position for playing a *Pathé Record*. The *Ultona* is adapted, very simply, to play all records, whatever make, and play them at their best. Only The Brunswick has this wonderful feature.

Old vs. New

Which Type of Phonograph For Your Customers?

The Story of The New Brunswick

THE choice is now distinct. Your offering is one or the other—old type or new. Of the old, there are many. So far the *one* instrument that has attained the coveted new standards is The Brunswick.

And this is due to The Brunswick Method of Reproduction.

Until all phonographs abandon the one-record idea, until all discard metal in tone amplification, until all forsake old crudities, the new Brunswick will have few rivals. It stands magnificently alone—the supreme phonograph achievement of recent years.

Only The Brunswick

Until the coming of The Brunswick, each phonograph had its own chief attractions. None had them all.

And mostly, the fame depended on the make of records with which the instrument was co-named.

Some folks said all phonographs were alike—all good. And that the records depended upon luck for their tone.

But The Brunswick has gained its nationwide fame by combining all the better features and discarding the troublesome. And so it is called "All Phonographs in One."

The new Brunswick Method of Reproduction sets higher standards. Never before have records been played so faithfully.

"Phenomenal"—The Verdict

The new Brunswick came out in April. Now thousands know them. All over the country. And these thousands agree that there is no phonograph like The Brunswick.

They praise The *Ultona*, and The Brun-

wick Tone Amplifier, two features of The Brunswick Method of Reproduction.

The *Ultona* is adapted, at the turn of a hand, to any type of record. It is practically automatic. Each type of record is reproduced according to its exact requirements—the proper diaphragm, the exact needle, the precise weight.

The *Ultona* is a distinctly new creation, not an attachment nor a makeshift. *Every* record is played at its best, whatever make.

The Brunswick Tone Amplifier is equally far in advance. Old acoustic problems have been solved. This brings the utmost in fine tone.

Only Brunswick Dealers have all the advantages and opportunities that come with the new Brunswick. From every Brunswick Dealer we are receiving substantial and increasing orders, and generous expressions of increased success due to this bettered instrument.

In a number of cities there are openings for Brunswick Dealers, and in such places we offer complete co-operation. Maybe such an opportunity exists for *you*. Upon your inquiring, we shall be glad to explain our proposition.

FROM OUR CHICAGO HEADQUARTERS (Continued from page 75)

Texas, especially around Dallas, was a bumper. In some parts of this section the corn is shoulder high. Wheat was fine all the way through Oklahoma, Kansas, Missouri and Illinois. This is the finest crop we have had in years, and if the present satisfactory condition continues it augurs well for our trade."

Business Is Flourishing

"Judging from the orders we are receiving from talking machine manufacturers for die cast parts, the trade is maintaining a healthy condition at present and counting on a substantial demand this fall," says L. D. Allen, manager of the die casting department of Barnhart Bros. & Spindler, this city. Mr. Allen also remarked that many manufacturers located in the Central States were finding it advisable to establish supply connections nearer home so as to avoid delays caused by embargoes. Chicago labor for normal pursuits is more plentiful than in the East, where so many factories have been placed on munitions and war supplies exclusively.

Good Business in Pennsy.

A. R. Mitchell, of Williamsport, Pa., was a visitor to the Chicago trade this week. Mr. Mitchell, who is the Pennsylvania wholesale representative for the Empire Talking Machine Co., spoke very enthusiastically concerning the business conditions throughout his territory. "There seems to be no end to the business in sight for the talking machine men in our part of the country," stated Mr. Mitchell, due to the big wages of the munitions workers as well as large crop prospects.

Booze Versus Music

Hundreds of Detroiters are now buying music instead of booze, according to an article which appeared in a Detroit newspaper quoting Wallace Brown, the well-known Brunswick dealer of that city, as saying that during the brief time prohibition has been in force in Michigan many citizens who once used their dollars each week for drink are now buying machines and records instead. The people who purchase on the

weekly payment plan are less often in arrears now since Detroit went dry. Mr. Brown stated further that he is selling more machines this year than last and traces the increase in his business directly to the abolition of intoxicating liquors. His portrait accompanied the article.

New Manophone Offices

The Chicago offices and warerooms of the Manophone Co. have moved from their former quarters in the North American Building to Room 604 in the same building where they have more space and better opportunity for display. Manager A. C. Einstein has been on a trip through the South and Southwest.

New Factory Facilities for Wilson & Co.

W. E. Cotter, manager of the phonograph department of Thomas E. Wilson & Co., states that they have made arrangements by which they will have a large plant in Wisconsin devoted to the manufacture of Wilson machines. They will have a complete new line of seven machines and will be in a position to care for their trade as they have not been hitherto.

New Phonograph Co.

The Everton Phonograph Co., of Chicago, has been incorporated with a capital stock of \$2,500. The incorporators are Thomas Wilkinson, E. F. Hurd and Raymond B. Cunliffe.

Opens Repair Shop

Oscar J. Kloer, well known in the talking machine and piano trades of Chicago, has opened a talking machine repair shop in the Athenaeum Building, 59 East Van Buren street, and is already doing an excellent business. Mr. Kloer is making a specialty of dealers' work and has the facilities and expert assistance to take care of it promptly.

Vitanola Busy

The Vitanola Co. have been having an unusually fine business the past month, they report, and the demand from their distributors has been greater than they have been able to cope with. The Standard Phonograph & Ac-

cessory Co., of Dallas, Texas, Vitanola distributors for the Lone Star State, have been running practically without stock, awaiting carload shipments which are on the way.

New Incorporation

The Stetson Phonograph Manufacturing Co. has been incorporated with a capital stock of \$3,000 by A. V. Carney, Francis V. Healey and B. B. Collins.

R. R. Souders for Service Abroad

Robert R. Souders, at one time with the Columbia Co. in Berlin, Germany, later manager of their branch at Dallas, Tex., for ten years and recently featuring the Sonora record for the Minneapolis Drug Co., passed through Chicago a few days ago en route for overseas duty for the Y. M. C. A. Mr. Souders is an active church man and is well fitted in every way for the work he is undertaking. He leaves behind him his family consisting of Mrs. Souders and four children in Minneapolis where he owns a beautiful home.

C. J. Woodard Marries

C. J. Woodard, the Chicago representative for the New York Recording Laboratories, Port Washington, Wis., manufacturers of Paramount records, will be married on June 12 to Miss Elizabeth Roach, a charming young Milwaukee woman at the Jesu Church in that city. After a honeymoon spent in Michigan the couple will take up their residence in Chicago. Mr. Woodard is a man long connected with the talking machine and piano trades and since he took the Chicago representation for the Paramount people has not only widened his acquaintance in the trade, but has established some excellent accounts. He has a host of friends in Chicago and elsewhere who extend him their very best wishes.

Mandel Progress

M. B. Silverman, sales manager of the Mandel Mfg. Co., returned this week from a business trip East made especially for the purpose of

(Continued on page 79)

Chicago, Ill.

We Offer An Unusual Proposition To Dealers

It doesn't matter what make of phonograph you are now handling, you owe it to yourself to investigate what we have to offer you.

We have developed a great talking machine co-operative plan—one that enables the aggressive dealer to make big money on quality talking machines.

We are staking our money and our reputation on this proposition to establish successful talking machine dealers in every community.

In this advertisement we illustrate Model No. 3—our big seller. It is stately in design, wonderful in tone, and is sold under our guaranteed service. It sells for \$125.00, and unquestionably represents greater value than was ever offered at this price.

This machine is one of the big factors in our co-operative selling plan.

Two additional models—Model No. 6 at \$90.00, and Model No. 5 at \$65.00, give the MANDEL dealer three popular priced machines, all of which embody high quality coupled with big value to the consumer.

What we offer you, Mr. Dealer, is liberal terms, liberal discounts, big profits, and our guarantee of absolute satisfaction to every ultimate purchaser of a MANDEL Phonograph.

Act quickly. Write for our complete proposition. We are closing up territory at record speed.

Mandel Manufacturing Company

perfecting their selling organization in that section. While in New York Mr. Silverman engaged Lawson V. Moore, who has had long experience in the talking machine and piano lines, to represent the company in Georgia and Florida with headquarters at Jacksonville, Fla. Colonel Moore is thoroughly acquainted with the Southern trade and will, no doubt, receive excellent results with the Mandel in his territory.

Herman Levy, formerly with the Bell Talking Machine Corp., will travel in the interests of the Mandel Co. in the eastern portion of New York State under the direction of S. Auerbach, manager of the company's Eastern offices at 41 Union square. George W. Howe will cover the western part of New York.

The company has recently developed a most liberal co-operative plan for the dealers which has met with the decided approval of those to whom it has been presented and are operating under it. "It enables the dealers to extend their talking machine business in a most satisfactory manner," said Mr. Silverman, "and our trade is showing its appreciation of our liberal policy. Details are naturally of a confidential nature, but we would be glad to take the matter up in detail with those who are interested." In view of the comparative shortage of machines, owing to war conditions, the company had decided to concentrate on the manufacture of three models only, and selected those selling at retail at \$60, \$90 and \$125, as these had proven to be those for which the demand was the greatest.

Now Hiawatha Phonograph Co.

At a meeting of the stockholders of the Ottawa Pianophone Co. on Monday of this week it was formally voted to change the name of the company to the Hiawatha Phonograph Co. The new name incorporates the name of the company's product and avoiding reference to the former location of the plant. The new factory at Geneva is now in full operation and shipments are going forward in a most satisfactory manner. The company is to be congratulated on the very speedy recovery from the fire which destroyed the Ottawa plant only a few weeks ago and the loyalty of their dealers, none of whom canceled their orders, but expressed evidence of their appreciation of the merits of the Hiawatha line. The new plant is splendidly equipped for the production of quality goods, and the Hiawatha phonographs are coming through in more perfect condition than ever. The general offices and wholesale warerooms of the company are, as from the inception of the business, on the tenth floor of the Republic Building, Chicago.

Brunswick News Items

"Business with us has really never been better," said H. B. Bibb, sales manager of the phonograph division of the Brunswick-Balke-Collender Co., "and our entire attention at this time is being given to the matter of increased production. Both our Chicago and Dubuque factories are working overtime and we are scouring the country for experienced woodfinishers, coarse rubbers and trimmers. This class of labor is scarce, but we have been able to hold our old employes and secure a number of new ones. We have found it necessary to discontinue many of our small contracts and are not accepting the larger ones except in a few cases where representation is particularly desired."

W. T. Houston, formerly assistant manager of the Brunswick Shop, Chicago, has now been appointed manager of the Brunswick Shop at Toledo, O.

Morris Summerfield, who has been in charge of the record stockroom at Brunswick headquarters here, left this week for the Great Lakes naval training station.

The Field-Lippman Piano stores at Dallas, Texas, and Flat River, Mo., have taken on the Brunswick line.

Emerson Activities

F. W. Clement, manager of the Chicago branch of the Emerson Phonograph Co., reports a very big demand for their new nine-inch records. This record is proving to be a

very attractive seller with the trade, due to its keeping up with the popular music of the day. "Our shipping department is kept busy all the time in supplying the entire Central West from this office. We have established quite a number of big accounts during the last month and are carrying on an extensive advertising campaign throughout the local newspapers of Chicago as well as the papers in the States adjacent to Illinois. The demand for seven-inch records has grown and we are keeping up to date with these records as well as with the new large ones. We have put on two new traveling representatives for Michigan and Indiana. Harry Zimmerman is covering the former State for us and H. T. Steiner is our new man for Indiana."

Uncle Sam Kicks the Kaiser

The Aeolian Vocalion is attracting passersby to its window by means of a little automatic contrivance which sets upon the record impersonating by means of two miniature dolls Uncle Sam kicking the Kaiser. This is

placarded by an attractive sign bearing editorial comment from the New York Sun relative to this little contrivance. It is identical with the one that attracted so much attention throughout the trade several summers ago wherein Uncle Sam was booting Villa, but in this instance Uncle Sam is being kept busy using his foot on Wilhelm.

More Stars on Service Flag

The large service flag in the retail Vocalion warerooms on Michigan avenue which bore 803 stars has had three more added to it this week, A. C. Mason and Fay Fulton, both of the sales force, having entered the service. H. W. Fredericks, cashier, has also been called to the colors. Messrs. Fredericks and Mason went into the army, but Mr. Fulton joined the navy.

Over the Top

Ed Blimke, Columbia's wholesale representative, who covers the west side territory of Chicago, went over the top during the month of May for the sale of records and is credited

Record Container Demand Grows

The Automatic Container Co. announce that they are rapidly completing their plans for an extensive selling campaign to cover the entire country. Many new agencies have been taken on and these, together with the traveling representatives, cover practically the entire

Style 5-I Automatic Container

United States from Texas to the Canadian border and from the Atlantic to the Pacific. Their new style 5-I cabinet has met with much favor throughout the trade, and as a result numerous large orders are coming in. This cabinet is very artistically designed and it comes either in mahogany or oak. Each cabinet holds a maximum of one hundred records, being built in one tier of five units each, as may be seen by the accompanying illustration. Each unit will hold twenty of either the ten or twelve inch records. This cabinet comes with a complete filing system, index book and numbered guides and comes in handy for those dealers who make a specialty of handling the small table machines. W. L. Ceperly is now associated with the Automatic Container Co. and has been appointed secretary. Mr. Ceperly will have charge of the retail cabinet sales of the company and has made his headquarters with that of the Automatic Container Co. in Room 506, 209 South State street, this city.

Victrola or U. S. S. "Leviathan"

A well-known resident of Chicago recently purchased a No. 17 Victrola from the Talking Machine Shop and has presented it to the officers' lounge of the U. S. S. "Leviathan." This ship was formerly the "Waterland."

Edison Men to Convention

Among those making up the large party of Edison dealers who left on the evening of June 4 for the Edison dealers' convention at New York were E. A. Vaughn, of Princeton, Ill.; Zar Hagley, of South Bend, Ind.; Frank Hoover, of Sterling, Ill.; H. E. Wigell, of Towle & Hypes, Clinton, Ill. The party which was in charge of A. D. Wayne, retail manager of the Phonograph Shop, Chicago, stopped off for a day's visit to Niagara Falls before going on to New York, where they arrived Thursday morning. C. E. Goodwin, general manager of the Phonograph Co., had intended to be among those going down, but business matters necessitated his leaving for New York on last Friday.

New Diaphragm Perfected by Scotford

L. K. Scotford, the inventor of the Superior reproducer, Scotford tone arm, and other phonograph specialties, has perfected a new dia-

phragm for their new Superior universal reproducer now being manufactured by Barnhart Bros. & Spindler, of this city. Tests of the new diaphragm were recently conducted by Mr. Scotford in the presence of a number of prominent talking machine men and music lovers, and the verdict was universal that Mr. Scotford has scored another triumph and produced a diaphragm that for mellowness and natural quality of tone, without losing any of the brilliance or volume afforded by the best mica, is unique. The diaphragm is of a very handsome appearance, contrasting nicely with the nickel or gold finish of the reproducer frame. Patents have been applied for, and Barnhart Bros. & Spindler are already producing the diaphragms in considerable quantity.

Columbia Business Big

W. C. Fuhri, manager of the Chicago branch of the Columbia Graphophone Co., reports a
 (Continued on page 82)

A Tonal Wonder

The Morenus Phonograph has won widespread recognition because of its unusual tonal quality. The novel all-wood horn which enters at the bottom (not the top) of the scientifically constructed tone chamber has proven itself astonishingly efficient in securing a most pleasing tone and a remarkably faithful reproduction of the record.

The Equipment is high grade in every respect, plays both types of records, has cover support setting top at any desired angle, original tone moderator, etc.

The Morenus cases are superb productions in every respect.

The MORENUS is in 3 STYLES

very large increase in business for the month of May over that of the corresponding month of last year. "In comparison with May of this year and May of last year," stated Mr. Fuhri, "we have more than doubled our business. The month of June is starting out very good and from present indications will undoubtedly overshadow June of last year. Shipments of records are coming through in fine order, but machine shipments are not coming through the way we would like to have them."

C. F. Baer, assistant manager of the Columbia Graphophone Co., has been a very busy man these days holding two jobs. One is his regular position with the Columbia Co. and the other is as a juror in the Civil Courts.

Visitors and Personals

James Meagher, of the Forbes-Meagher Music Co., Madison, Wis., spent a few days in Chicago the early part of the month.

H. L. O'Brian of the retail sales force of the Aeolian Vocalion has been called to New York owing to the death of his father. Mr.

O'Brian, Sr., it is said, was one of the most prominent dental surgeons in the city of New York.

H. H. Michael, V. K. Tremblett, and H. L. Woodward, all traveling representatives for the Chicago Talking Machine Co., are enjoying a month's vacation.

Mr. Henschen, manager of the phonograph department of Scruggs, Vandervoort & Barney, St. Louis, was a Chicago visitor this week. He reported business with his house as good and came to Chicago to see what the prospects were of securing goods.

Earl C. May's New Post

Earl C. May, who for the past year has held important positions, including that of advertising manager, with Bunte Bros., of Chicago, has resigned this important post, and on June 17 will assume charge of the advertising and sales for the Cheney Talking Machine Co., whose products are steadily gaining in popularity throughout the country. Mr. May's headquarters will be at 725 Marshall Field Annex.

INTRODUCING THE NIGHTINGALE

Details of the Progress of the Nightingale Mfg. Co., Who Make the Nightingale Phonograph, Under the Presidency of H. B. Wolper

CHICAGO, ILL., June 1.—The Nightingale Mfg. Co., whose well-appointed factory is at 426 North Armour street, is a concern that has grown rapidly since the inception of the business several years ago. Harry B. Wolper, the president, is a thoroughly practical man and has entire active charge of the business, the other officers and stockholders being prominent men associated in other lines of trade. From the beginning Mr. Wolper worked along extremely conservative lines until they knew that they had passed through the experimental stage and had a machine which they could successfully offer to the trade at large. The machine proved a success at first and successive increases in output have been necessary. Only four months ago they added an entire additional floor in the large building in which their factory is located. Unlike many of the newer manufacturers, the company makes all its own cases and takes a great deal of pride in their perfection. There is no skimping anywhere. Not only are the finest veneers used in the panels, but all the solid parts of the case are made of genuine mahogany, oak or walnut as the case may be. The company have sought to use the very best possible equipment in their machines and are proud of the fact that the Nightingale is equipped with the Stephenson precision-made motor, a fact which Mr. Wolper says has enabled him to eliminate motor complications entirely. They are using the Scotford tone arm and reproducer and the best possible equipment throughout. The choice of the name, Nightingale, for the talking machine was a happy one and the attractive trade-mark is becoming increasingly well known in the trade. An artistic announcement from this company appears on page 23, this issue.

TAX ON SALESMEN IN ARGENTINA

The matter of replacing the various separate provincial taxes on commercial travelers in Argentina by a single tax for the entire country has again come up for discussion, according to Commercial Attaché Robert S. Barret in Buenos Aires. The proposal is indorsed by the leading newspapers of Buenos Aires, which point out that the overcentralization of Argentina's business, making Buenos Aires the center of commerce, is largely due to the old system which has tended to keep commercial travelers out of the interior of the country. It is thought that a law requiring these "commercial missionaries" to pay one tax to the Federal Government which would permit them to take their samples anywhere in the country would do a great deal toward developing the business of the entire country more evenly.

MISS ESSEN IN UNIQUE POSITION

Is the Only Woman Demonstrator in the Wholesale End of the Talking Machine Trade—Now With James B. Orth & Co., of Chicago

CHICAGO, ILL., June 6.—No, Helene Essen is not a movie actress, but a much rarer specimen of femininity. She is said to be the only traveling woman demonstrator of phonographs in the wholesale end of the talking machine business.

Helene Essen

When the Edison Diamond Disc phonograph was first introduced to musical Chicagoans, Miss Essen occupied the platform in the concert hall of the Edison Shop, and gave "Talks With Records," showing the merits of the instrument, and gave facts and anecdotes concerning the artists and composers. Later, she helped to introduce the Sonora, and now she is connected with James B. Orth & Co., of 422 Re-

public Building, this city, where she is demonstrating to dealers the merits of the new Puritan phonograph.

In discussing the Puritan she said: "If you love a jazz band or the beautiful organ tones of a saxophone alone, you will quickly understand the point the Puritan scores in the 'Saxophone Construction' of its tone chamber. It is just this long horn construction that makes the music, whether it is Galli-Curci's singing, or Sousa's Band playing brass instruments, as mellow as an organ note." After she explains a few more points to you, you will find yourself an enthusiast before you know it.

Miss Essen is tackling a regular man's size job, but says that is always what she wanted, and now feels she can take it without cheating some poor man out of a job, because he is needed "over there."

TO MAKE BUYING PLEASANT

S. E. Lambert Tells of the Good Work of the Columbia Co. in Printers' Ink

Under the heading of "Campaign to Make Buying a Pleasant Transaction," S. E. Lambert presented in last week's "Printers' Ink" a very interesting article in which he called attention to the campaign that is being inaugurated by the Columbia Graphophone Co. to make it easy to shop for talking machines.

Included in this article were reproductions of some of the recent advertisements used by this company in its national advertising, and the text of the article emphasized their distinctive features, pointing out that the advertisements that have been appearing the last few months are designed to make it easy for people to buy a Grafonola. The article further reads:

"George W. Hopkins, general sales manager of the company, points out another reason why it is advisable to employ such copy at present. Thousands of workmen are now earning more money than they ever dreamed of making before. For the first time in their lives a musical instrument is possible and naturally many of them will wish to gratify their desire to own one. However, these men are not accustomed to going into elegant stores, such as phonographs are sold in. They are apt to be a bit shy about visiting such places. The advertising overcomes their hesitancy and makes it much easier for them to take the step.

"The make-it-easy-to-shop appeal is not monopolizing the campaign. Another object of the effort is to give class and distinction to the product. An interesting phase of this end of the advertising is the publicity that is brought to bear on the company's Fifth avenue shop in New York. This is regarded as one of the handsomest specialty stores in America. Something over \$80,000 was put into its furnishings. Each demonstration parlor in it is furnished to correspond with the period designs of the cabinets shown in it. As dealers from all over the country come to New York, they are, of course, anxious to see this store. It shows them the ideal way to sell Columbias, and it inspires them with the possibilities of the business. In a sense it might be called a manufacturer's laboratory store, as it gives the company first-hand knowledge of the buyer in action. Dealers are encouraged to send their prospects to the Fifth avenue store. There they meet the Columbia under ideal conditions. Any sales that are made in this manner are credited to the out-of-town retailer sending the customer to the store on the avenue.

"Many advertisers labor under the delusion that it is not necessary for advertising men to have an intimate knowledge of retailing. If it were necessary to explode this delusion, the present Columbia campaign, which is accounted highly successful, would do so. It is a typical example of how a study of the problems that the dealer is up against can be turned into ammunition for national advertising. In the last analysis the influences that get people to buy goods at retail are the same influences that sell goods nationally or through advertising."

The
Scotford Tonearm
 and
Superior Universal Reproducer
The Ideal Combination
Plays All Makes of Records as they should be played
 Price of Sample Prepaid
Nickel, \$5.25 Gold, \$6.50
Adjusted for Cabinet measuring 8 1/2 inches from center of Tonearm base to center of Turntable shaft

Distinctive Features

- Ⓒ The Reproducer pivots on its axis (as illustrated above), taking the correct angle for all makes of records, and the needle retains same center in both positions.
- Ⓒ Surface noise is less than with any other reproducer—surface scratchings being reduced to a minimum through perfect proportioning of the stylus construction, and placing the needle in the center of the groove at the correct angle.
- Ⓒ The split construction of the frame and face ring of the Reproducer, together with the method of pivoting the stylus bar, and perfect insulation—effect a sensitive and free vibration—and prevent a pinched tone resulting at any time from natural contraction or expansion of the metal parts.
- Ⓒ The reproduction is the mellow, natural quality of tone—absolutely getting away from the usual sharpness and metallic effect so noticeable in most reproducers.
- Ⓒ Sound waves act upon the same principle as light waves—they travel in a straight line until they meet some obstruction, from which they are deflected at right angles. The right angle turn at the back of the Scotford Tonearm causes less breaking up and confusion of the sound waves than occurs in the curved arm.
- Ⓒ The connection between the Reproducer and Tonearm is perfectly insulated with a hard rubber bushing. Inside diameter of the Tonearm is correct to accommodate the volume obtained from the latest records.
- Ⓒ The right-side turn for changing needle is handier than the old style turn-back, and when in position for the Hill-and-Dale records there is no interference with lowering the cabinet cover.
- Ⓒ The lateral movement at the base is simple, free and permanently satisfactory. Inside there is no obstruction to interfere with passage of the sound waves. There are no loose balls in the bearings, therefore no buzzing noise can occur from the great vibration on high notes.

CONDEMNS HOARDING OF MONEY

Rotary Club Editorial Urges Normal Spending for Luxuries, Especially in View of the Fact That War Has Brought Profit to Many

In the page conducted in the New York Tribune by the local Rotary Club each week, there appeared recently a most convincing editorial on the fallacy of hoarding and saving to an unusual degree during these war times. It is all well enough, the editorial declared, to save for a rainy day, as the average individual is taught in childhood. The editorial continues, however, to say:

"But there is a difference between saving for a rainy day and hoarding up money for a peaceful one.

"The war has profited many. Men whose manual labor brought them little more than the proverbial crust of bread in years gone by, today, by that same labor, are able to afford a talking machine, a suburban lot, or even a flivver. Men whose particular business has been an atrophied branch on the tree of commerce have had an influx of orders which have simply swamped them.

"To save this country from a financial panic and subsequent business depression which would prove fatal under the existing conditions, it is necessary to put that money in circulation. It must not be hoarded!

"It is legitimate to make unexpected money. It is legitimate to save some of it to guard against future discomfort. But it is decidedly illegitimate to corner currency or merchandise at this critical period.

"Get busy and circulate your money. This is no time to have a 'one way pocket.' If your profits warrant it, be as profligate as your nerve permits. Paint your house. The painter needs the money and will sing your praises.

"Buy a talking machine and send your old one to one of the camps. Ride in taxis. Even though you suspect the chauffeur of being a thug he may have a wife and eight very hungry children to support.

"Buy generously of things not needed on the other side—the shopkeeper's rent is the same, if not increased. Spruce up your wardrobe.

AIDS RED CROSS IN NEW HAVEN

Loomis Temple of Music Arranges a Most Effective Window Display While Manager Leichter Assists in Collecting Funds

New Haven, Conn., June 3.—One of the most effective window displays in this city in the interests of the Red Cross drive, which ended

Red Cross Window at the Loomis Temple of Music

recently, was that arranged by the Loomis Temple of Music at 837 Chapel street. The

Perhaps the designer, the buttonhole maker and the tailor are too old to enlist or learn a new trade. Circulate your money. Help people to smile. Don't compel them to weep. And if you can, forget about that rainy day. Because if there ever comes a day rainier than this one, God help us all. It is the world's Rainy Day!

"Keep moving yourself. And keep your money moving. That's what is going to make the Kaiser move from Berlin to Bondage!"

The Friedberg Talking Machine Co., Brooklyn, N. Y., has been incorporated with capital stock of \$10,000 by T. W. Guttenberg, H. Schnapp, and N. Friedberg.

chief feature of the display was a life-sized figure of a wounded soldier with a Red Cross nurse bending over him, and the appeal was unmistakable. A reproduction of the window is shown herewith.

Max B. Leichter, manager of the Loomis Temple of Music, in addition to giving the window, also gave much of his time to working on one of the teams in collecting money. The al-

lotment for the city was \$350,000, and New Haven went over the top with over \$625,000, or nearly double its quota.

The Loomis Temple of Music has adopted a very attractive poster label, resembling in form an automobile wheel with the company name running around the rim, while between the spokes appear the names of the various pianos, including the Knabe, Emerson, Fischer, Mehlin and other makes, Victrolas, music rolls, various small musical instruments, sheet music, etc., handled by the company.

R. A. IZOR BECOMES SALES MANAGER

Well-Known Talking Machine Man Appointed Sales Manager of the Brunswick Shop in Indianapolis—Has Had Wide Experience

INDIANAPOLIS, IND., June 8.—R. A. Izor, who has been identified with the phonograph business in Indianapolis for a number of years, has

R. A. Izor

recently been appointed sales manager of the Brunswick Shop. George F. Standke, manager of the shop, is pleased with the acquisition of Mr. Izor to his sales force.

ENLARGE VICTOR DEPARTMENT

TERRE HAUTE, IND., June 8.—Four new and attractive soundproof demonstration rooms have just been completed for the enlargement of the Victrola department of the Herz store. The rearrangement of the department also provides for more attractive display parlors and more convenient record stock files. The enlarged department was formally opened on Wednesday, Thursday and Friday, June 5, 6 and 7, with special musical programs which pleased the large audiences in attendance.

National War Savings Day June 28th

That's the day we sign up.

That's the day we tell Uncle Sam just how hard we want to win this war. That's the day our government has officially set for us to purchase War Savings Stamps.

On June 28th every man, woman and child in the United States will be called upon to pledge his or her full quota of War Savings Stamp purchases for 1918.

You will be expected to pledge the **full** amount that you can afford—no more—but by the same token, no less.

In every state, county, city, town and village the War Savings Committees are preparing for this big patriotic rally of June 28th. Unless you have already bought War Savings Stamps to the \$1,000 limit, get busy with paper and pencil and figure out the **utmost** you can do.

Remember this. You take no chances when you go the limit on War Savings Stamps. They are the best and safest investment in the world.

They pay you 4% interest compounded quarterly. They **can't** go below par. You can get back every dollar you put into War Savings Stamps **any time you need it**. You can turn them in at the Post Office **any time** for their full value plus interest.

Uncle Sam is asking hundreds of thousands of men to **give** their lives to their country. He is asking you only to **lend** your money.

What are you lending?

ANNUAL MEETING OF PORTLAND, ORE., ASSOCIATION

Many Subjects of Interest to Talking Machine Trade Considered at Gathering of Portland Men—
E. B. Hyatt Unanimously Elected President—Other Officers—Shortage of Records Discussed

PORTLAND, ORE., June 4.—Early closing of the talking machine houses in Portland on Saturday evenings during the summer months was decided upon at the regular monthly meeting of the Portland Talking Machine Dealers' Association which was held at the Imperial Hotel Wednesday evening, May 29, at which twenty-seven dealers were present and at which the Victor, Columbia, Edison, Brunswick and Sonora machines were represented.

As to early closing it was decided that in June all talking machine dealers would close their stores at 7 p. m. and during July, August and September at 6 p. m.

Paul B. Norris, manager of the Wiley B. Allen Co. talking machine department, called the attention of the dealers to the fact that it could only be suggested to dealers not belonging to the association to observe this rule, and that they would have to decide for themselves relative to early closing, although he maintained that the propriety of a suggestion could not be denied. Taylor C. White and C. A. Alphonse were appointed a committee to get signatures of those agreeing to the early closing plan irrespective of what non-members of the association might do.

Interest on deferred payments was one of the principal topics of the session. With the exception of the furniture stores and department stores—all of which handle talking machines—all dealers in talking machines have adopted the interest plan. H. E. Burr, who has charge of the talking machine department of Gadsby's Furniture Store, thought it very probable that the firm would adopt the plan of the talking machine houses. W. Matney of the Meier & Frank Co., thought the management of that big department store would also fall in line. James Loder, manager of the phonograph department of the Bush & Lane Co., sug-

gested that the furniture and department stores might co-operate if they were asked to do so and were invited to join the association.

E. B. Hyatt was unanimously elected president of the association at the annual election, which was one of the features of the meeting. Taylor C. White was elected vice-president and C. A. Alphonse secretary. W. L. LeVanway, who has been acting secretary for two months, has joined the signal corps and will leave Portland in a few weeks. He will be much missed by the association, as he has been one of its most valued members. On announcement of his enlistment, the entire membership rose silently and stood at salute in tribute to the young patriot.

Shortage of records came in for interesting discussion and revealed a rather serious condition in the trade. It was brought out that word from the factories of the Columbia, Victor and Edison people was that the labor shortage was acute and that many women are filling places formerly held by men. L. D. Heater, manager of the Columbia branch in Portland, said that in the London factory of his firm there are only two or three men left and they are old men unfit for war. He pointed out that it is impossible to supply goods in England, despite England's reduced purchasing power, so said it could be seen readily how hard it must be to meet an ever-increasing demand in this country. Dealers on the Coast are inclined to look for a serious shortage in the fall, especially as the Government will use more cars for wheat and troop movements.

The question of sending out records on approval was again brought up and it developed among the dealers that almost all had discontinued the practice, save in the cases of well-known customers who really wanted to buy after hearing the records at home. It was

brought out that the custom had been abused, but E. B. Hyatt showed a card which he pastes on all records taken out on approval which he thinks has solved the difficulty. This card reads:

EXTRA SPECIAL

When records are taken on approval and none retained, a minimum charge of 50 cents will be made to cover cost of bookkeeping and clerical expenses.

Mr. Hyatt said this relieved them from a great deal of trouble from people who would get records for use at parties and return them the next day without purchasing any.

C. Guy Wakefield, of the Wakefield Piano Co.; H. E. Burr, of Gadsby's Furniture Co., and W. A. Matney, of the Meier & Frank Co., were elected members of the association.

TELLS OF BUSINESS GROWTH

Chas. Staffelbach, Who Visited New York Last Week, Reports Big Pathé Business Being Done by the Hellrung & Grimm Co., St. Louis

Chas. Staffelbach, manager of the Pathé division of the Hellrung & Grimm House Furnishing Co. of St. Louis, Mo., Pathé jobbers, was a visitor to New York this week, spending some time at the executive offices of the Pathé Frères Phonograph Co., and also visiting the Pathé booth at the music show. In a chat with The World Mr. Staffelbach commented upon the fact that his company is closing a remarkable Pathé business, the sales of Pathéphones and Pathé records so far this year showing a substantial increase over the entire year of 1917. He states that Pathé products are gaining rapidly in popularity throughout his territory, and that his house is planning to institute an aggressive Pathé campaign in behalf of this line, which will include active and intensive cooperation with the Pathé dealers. He placed a good-sized order while in New York, and judging from all indications his optimism will be reflected in a banner Pathé business this coming fall.

CONVENTION OF JOBBERS' ASSOCIATION IS POSTPONED

Membership Votes Almost Unanimously to Call Off Annual Gathering Scheduled for July at Atlantic City, Owing to War Conditions—Follow Recommendation of Executives

It has been officially announced that the annual convention of the National Association of Talking Machine Jobbers, scheduled to be held at Atlantic City, July 1 and 2, has been postponed indefinitely, as a result of the practically unanimous vote of the membership of the organization. It was felt by the officers that in view of war conditions, and the general situation existing in the trade, no real benefit could be gained by holding a general convention, although it is probable that a meeting of the executive committee will be held in the near future.

The abandonment of the convention brings up the question of taking care of the annual election of officers at the expiration of the present terms, but some move will likely be made to re-elect the present board.

Secretary J. C. Roush, secretary of the association, sent out a general letter to the members under date of May 31, the letter reading in part as follows:

"At the executive committee meeting of our association held in Philadelphia, April 22 and 23, the advisability of holding our convention this July was thoroughly discussed and it was the consensus of opinion of your committee that this year's convention be called off for patriotic and other reasons. Final action was to be postponed, however, until May 20 to await further developments.

"Nothing having arisen, however, to justify a reversal of this opinion, I have been instructed by President Blackman to notify you that your executive committee recommends that no convention or meeting be held this year, unless conditions change enough to make said meeting necessary, at which time you will be asked to vote on the advisability of holding

a meeting in the fall. Every member is aware of the constant changing war and other situations affecting our business, and it is believed that we will show a more patriotic spirit by not meeting as usual in Atlantic City this year."

In voting against the holding of the convention as scheduled, the members of the organization agreed thoroughly with the officers on the fact that their interests could best be served by postponing the proposed convention indefinitely. Should the situation warrant it, a general convention of the body may be held some time in the fall.

BECOMES GENERAL SALES MANAGER

John A. Cromelin, of International Fame in the Talking Machine Trade, Assumes This Important Post With the Otto Heineman Phonograph Supply Co., New York

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., New York, announced this week the appointment of John A. Cromelin as general sales manager of the company. Mr. Cromelin will assume his new duties next week, and make his headquarters at the executive offices of the company, 25 West Forty-fifth street.

John A. Cromelin is one of the best known members of the talking machine trade, having been associated with the industry for many years. Until recently he was vice-president and general manager of the Columbia Graphophone Co., and for a number of years held the important post of general manager of the Columbia Co.'s European interests with headquarters at London. He possesses a thorough knowledge of every phase of

talking machine manufacturing and merchandising, and is generally recognized as one of the ablest executives in this field. Mr. Cromelin has for some time been a keen admirer of the plans and policies of the Otto Heineman Phonograph Supply Co., and the rapid strides that this company has made the past two years will

John A. Cromelin

doubtless enable Mr. Cromelin to develop the sales of Heineman, Meisselbach and Dean products to excellent advantage.

Mr. Cromelin will, of course, devote a considerable portion of his time to the new Heineman "OkeH" record, which was placed on the market last month. This record is achieving signal success, and Mr. Cromelin's intimate familiarity with record production and merchandising will undoubtedly contribute to the international success of the "OkeH" record.

VICTROLAS—SUPPLIES—NEEDLES

ENLARGED FAC-SIMILE OF PACKAGE

“MOBILIZED in the SERVICE of OUR COUNTRY”

Vallorbes Economical Semi-Permanent Needles perform more than double duty—their use not only conserves steel for vitally essential war weapons and materials, but serve their users in equally as serviceable and effective manner.

If you are inclined to these needles simply because of patriotic motives or perhaps on account of the shortage of steel needles, you have a surprise awaiting you, for, unlike most enforced economies, they really do you a favor—either as a dealer or user. In the first instance, they attach to the sale of a single package, the highly required and desired profit, and, in the second case, their reproducing qualities are really wonderful—no needles yet have quite equalled them. This is especially true of the soft and medium tone grades. Finally, they also do the records they play a real favor, for it is quite obvious that with their parallel shape of needle points that do not enlarge their diameter as a result of wear, they cannot exert unequal wearing influences on walls of record grooves, as do the old style changeable steel needles, all of which are tapered in shape and dimension, and which from the start of playing a record to the finish is undergoing a change in dimension from which arises the necessity of discarding the needle once used.

Vallorbes Semi-Permanent Needles are made of a special alloy metal, which results in combining to an appreciable degree the hardness of carbon and the toughness of chrome. Moreover, being made of one piece throughout, there are no separate points to work loose and a better sympathetic relationship arises with stylus bar of sound box than would be the case with a separate needle point inserted into a different kind of metal holder. Furthermore, this one-piece construction also permits of three separate and distinct tone grades, i. e., soft, medium and loud.

Neat, handy and attractive cards are especially made to accommodate these needles. Each card of five needles is placed in a separate transparent moisture-proof envelope and readily retail for 15 cents for the card of five needles and play far more records than 15 cents' worth of old-style changeable steel needles.

They are packed for shipment in cartons containing 100 packages of a tone grade, and, as orders invariably follow samples, better save time and order a carton of each tone grade at once, otherwise,

Send 30 Cents in Stamps for a Sample Card of Each Tone Grade

LANCASTER, PA.

GETTING AFTER THE VACATIONIST

Talking Machine Retailers Now Have Opportunity for Realizing on Stocks of Smaller Machines for Use of Campers, Etc.

From practically every section of the country comes the report that the heaviest demand is for the higher, or rather medium-priced machines, those selling from \$75 up to \$165 or so, and that therefore the most serious machine shortage is found in the styles retailing at those prices. At the same time, both wholesalers and retailers have on hand for the most part substantial supplies of the smaller types of machines, those without tops, retailing for \$35 or

Wiley B. Allen Co. Vacation Window less, and for which the normal demand is not at all heavy at this time.

Quite a number of retailers have already realized that this year, as has been the case in other years, the small machines in substantial numbers can be sold to campers and vacationists generally, who do not care to subject their high-priced machines to the rough handling and exposure incident to the summer vacation. It would seem that this year particularly an especially strong drive should be made to place the small machine, and thus make up in some measure for the loss of business, due to the shortage of the more elaborate models.

There has already been received at The World office numerous photographs of special window displays designed to attract the attention of vacationists, and the accompanying view of the show window of the Wiley B. Allen Co., Portland, Ore., offers a fair example of elaborate window treatment.

The campaign should not stop at the window, however, but machines for vacation use should be advertised strongly and matter sent out through the regular mailing list and advertisements in the resort sections of the local newspapers. Publicity in summer resort booklets and advertising sections of newspapers hits the vacationist just at the time he is making his plans for the summer and therefore at a time when he is most interested.

TO HELP IN THE WAR

Must Back the Government With All Our Strength—How Best to Do It

President Wilson, in his statement calling upon every man, woman and child to pledge themselves on or before June 28 to save constantly and to buy regularly the securities of the Government, says: "May there be none unenlisted on that day!"

As the President points out, "This war is one of nations—not of armies—and all of our 100,000,000 people must be economically and industrially adjusted to war conditions if this nation is to play its full part in the conflict."

Our nation, not our army and navy only, is at war. And that means that all of us not actually fighting must do our part.

That part consists in giving the army and the navy all the support of which we are capable. To do that each one of us must first of all be a producer to our maximum ability and a consumer of necessities only, for every bit of man power and every particle of material is necessary for the use of the army and navy and for the making of the things essential to our citizens.

As a maximum producer and as a consumer of necessities only, each one of us will be an accumulator of savings. And these savings can be invested in War Savings Stamps with benefit both to the Government and ourselves.

CHANCE TO MAKE FIFTY DOLLARS

One of the surprises at the National Music Show held in New York last week was the offer of a prize of \$50 in Thrift Stamps by The Music Trade Review, New York, for the best article treating on "The Value and Importance of Music in War Time." The judges to pass upon the merits of the essays submitted are Lieutenant John Philip Sousa, C. M. Tremaine and the Editor of The Review. The contest closes on June 20.

LAW TO END TRADE BRIBERY

WASHINGTON, D. C., June 6.—The Federal Trade Commission last month sent to both branches of Congress a communication urging "the enactment in the public interest as an aid to the preservation of fair and free competition, a sufficient law striking at the unjustifiable and vicious practices of commercial bribery; and that such law be so comprehensive as to strike at each person participating in any such transactions."

The Federal Trade Commission has found commercial bribery to be general throughout many branches of industry, and scores of complaints have been issued by it on that account. Fourteen States at present have laws prohibiting such practices.

Jobbing Rights

NEW YORK TIMES ON "MISTREATMENT OF 'BIG BUSINESS'"

Prominent Metropolitan Newspaper Treats Most Illuminatingly in Its Editorial Columns of Recent Supreme Court Decision in the Shoe Machinery Combination Litigation

Under the caption, "Mistreatment of 'Big Business,'" the New York Times in a recent editorial made some illuminating comments on the decision of the Supreme Court in the shoe machinery combination litigation which will be read with interest by business men in every line of trade in view of recent developments in this and other industries. It is a comprehensive handling of a question which is of vital moment to business men who desire to build up a business along honorable lines of expansion that will be of benefit to the nation and to humanity and still enjoy protection for their rights. The editorial read:

"For seven years the Shoe Trust has been bitterly pursued upon what the Supreme Court calls the 'innuendo' of the Government that it restrained interstate trade. By four to three the court decides that the Government was wrong in its aspersion as matter of law. As the court was so evenly divided, the defendant trust can hardly be blamed for a course which had never been condemned by authority and which was approved by business practice. The acquittal of the trust is condemnation of its prosecutors because they have so persistently refused to take their law from the courts. One Attorney General has even gone so far as to complain that he alone cannot enforce the law against restraint of trade. He formally expressed his regret that 'a number of Federal judges have been and still are apparently reluctant to enforce the Sherman act.' Now the highest court asserts that the Department of

Justice prosecutes by insinuation on a mistaken view of the law.

"If the case stood alone, it would be an undesirable state of affairs, but it is only one of many cases. Only a short time ago Government representatives sat around the same table with many distinguished defendants, at the suit of the Government on complaints which the Government could not proceed with. Public interest would not allow that seven suits against the biggest of the trusts should be pressed to a conclusion, although the trusts were eager for finality regarding their legal status. Such a condition of affairs indicates nothing less than a reign of terror which should be ended. Is it extreme to take the position that the Attorney General and the trusts alike should take their law from the courts?"

"Another suggestion—the trust cases are mostly prosecuted and decided on the law rather than the facts. There have been not a few cases where trusts were attacked on the ground that they restrained trade under the law, although they promoted trade in fact. In the Shoe case there is no question that the manufacture of shoes was enlarged, whatever may have been the fact about the machinery trade. The interest of the public is that the law should be enforced, and restraint of the machinery trade is not to be condoned, if proved. But the public interest is rather in shoes than in shoe machinery, and the effect of the trust's plan is affirmed by the court to be helpful to the small shoemakers, who were able to operate with

Read the Trade Mark carefully,

Send for our Special Proposition

HOFFAY TALKING MACHINE CO., Inc.
3 West 29th Street New York City

leased machinery which they could not buy. To prosecute big business which helps the little men in trade cannot be in the public interest. If there were complaint from the public that the making of shoes was obstructed, or made costly, or that other shoemakers were estopped in their trade by the trust, the Department of Justice might have an excuse for its persistence. But the public is not in court, except through the Attorney General. The court explicitly remarks that the victims of the lease system were not in court.

"All unobserved, there has grown up a practice oppressive to business which has not been convicted of anything. Within a few days a plea of guilty has been accepted by the Attorney General in what might be called his personal court. He arraigned the trust before him, and the trust accepted his view of the law rather than contend in such an unequal contest. It is natural enough, and yet those trusts which resist such practice are more to be commended. The Department of Justice is empowered to prosecute the guilty, but it is an innovation that the Attorney General should arrange the terms on which business men may engage in interstate commerce without the assistance of the courts. If such trade licenses are to be issued, it should be by authority of law, by some official who has been given the authority which the Attorney General seems to usurp. Between the abdication of the Interstate Commerce Commission and the quasi-usurpation of the Department of Justice, the men of large affairs who wish to obey the law are put in an undeserved quandary. The railways and the trusts have deserved discipline and have been scourged until they have repented. Is it not also time that the Government should recognize that conditions have altered, and that the law has teeth enough of its own, without a false set condemned by the courts and common sense?"

BRUNSWICK NEWS IN NEW YORK

Occupying Larger Quarters—New Dealers Appointed—Many Visitors During Month

The Brunswick-Balke-Collender Co. have moved the New York branch of their phonograph department to the second floor in the same building at 29 West Thirty-second street. This change has provided larger and more attractive quarters for the proper display of their exceptional line of talking machines.

The space formerly occupied by the department is now being used by the Railroad Administration of the Government for an immense midtown ticket office for all roads.

Two models of the Brunswick phonograph were sent to the music show held at the Grand Central Palace, New York, during the past week and were to be seen at the attractive exhibit of the Brilliantone Steel Needle Co., where they were used in demonstrating these needles.

P. L. Deutsch, assistant secretary of the company, came East from headquarters in Chicago to attend the music show, also F. H. Walters, of the Boston branch sales staff. Mr. Walters reported excellent business in his territory.

Among the many Brunswick dealers in town for the occasion were O. A. Field, of Field-Lippman Co., St. Louis, and John Duncan, manager of the Brunswick department in the Gamble-Desmond Co. store in New Haven, Conn. Mr. Duncan placed his fall order while in town.

Among the list of new Brunswick dealers for the month is James Quinn, of Brooklyn. Mr. Quinn is a well-known dealer and the prestige of the Brunswick line in that borough is greatly enhanced by his taking over the line.

S. Bersin, 410 Grand street, New York, has also installed the Brunswick line in his new store on Second avenue.

Operaphone Records

Ten Inch Retail 75 cents

ANNUAL OUTING OF THE TALKING MACHINE MEN, INC.

Annual Red Letter Event Takes Place on Wednesday, August 7—Bear Mountain Will Be the Rendezvous and Every Talking Machine Man Should Keep the Date in Mind

Mark the date on your calendar now with a big red circle, Wednesday, August 7, the date of the annual outing of the Talking Machine Men, Inc.

According to information already obtainable regarding the plans for the affair it will be a genuine trade event, and the member of the local trade who is unfortunate enough to miss it will be cheating himself out of some real enjoyment.

The outing will be held at the Bear Mountain Inn, the popular up-the-Hudson resort, and arrangements have been made for the party to sail up the river on the Albany Day Line, leaving the foot of West Forty-second street at 9 a. m.

In order to prevent the trip from becoming monotonous in any sense J. J. Davin, of the New York Talking Machine Co., has arranged for the original Dixie Land Jazz Band from Reisenweber's to accompany the party and fill the air with sweet melodies on frequent occasions during the sail and at the park. The band has donated its services for the occasion, in appreciation of efforts put forth by Mr.

Davin in its behalf. There will also be other surprises in the way of entertainment during the day.

At Bear Mountain there will be a baseball game between Columbia and Victor interests in the association as the chief event. There will also be races of various sorts and other games in sufficient variety to suit all tastes.

An elaborate dinner will be served at the Bear Mountain Inn at 1 o'clock.

Those in charge of the arrangements urge that jobbers and dealers not only attend themselves, but arrange to let as many of their employes off for the day, in order to make the affair successful in every way. It is felt that with employes called upon to do much extra work through shortage of help, a little recreation is really due them.

The committee in charge of the outing consists of Sol. Lazarus, E. Leins, J. E. Hunt, J. T. Coughlin, Saul Birns and J. J. Davin. Information regarding the outing, as well as tickets, may be obtained from A. Galuchi, treasurer of the Talking Machine Men, Inc., 724 Bergen avenue, Jersey City, N. J.

SOME HINTS ON CLEAN BUSINESS

Misdirected Effort and Pep Back of the Wrong Product Often Gets Surprising Results—The Proper Idea Is to Put Energy Behind the Right Kind of Business and Right Product

J. E. Gerlick, a well-known figure in the Western music trade, contributes some words of value to every talking machine salesman who believes in doing business on an energetic, straightforward basis, in the following remarks:

The truth will win if we make serious ef-

forts to disseminate it. Enthusiasm and energy carry with them a convincing power.

Unfortunately this convincing power results from enthusiasm and energy put forth in a wrong cause, just as truly as when expended in the interests of right.

Wait a minute! Perhaps "unfortunately" is not the right term to use in relation to the undoubted fact just stated. Maybe it's fortunate that this is so. Perhaps it is calculated to make the fellow with a bag full of truth work and energize and enthuse harder to sell his commodity than the fellow who is spending his young life in a frenzied effort to peddle a bunch of wrong.

It doesn't put cast iron deers on your front lawn or gold-plated lightning rods on your house if you make a blanded good rat trap and then sit down and think about it. The chances are that you won't have the lawn for the cast iron deer or a house that could sport a gold-plated lightning rod. You'll just keep on washing your own dishes in the shack in the wilderness, and the fellow with the cheap trap and lots of sand and advertising ability and sales push will be working towards a monopoly on deers and dears and lightning rods.

Of course, he would go a good deal farther if he had both your rat trap and his own pep and persistence. But that's an additional narrative, as R. K. would enunciate.

Take it in the talking machine trade. There are two classes of intrinsically good talking machines, those which sell (in a large way) and those which don't. Just think this over and after you have thought a while ponder somewhat and then contemplate.

On the other hand, Mohammed had a rotten sort of religion, but he managed to get a lot of disciples, didn't he?

There has never been a suspicion on the fact of the white-robed ones that the Devil and his imps were easy competition. It's difficult to get the same punch in a clean advertisement as in one of the bunko-steering type.

Business is a game. It would never be a con game if everyone played in accordance with the rules.

If the clean athletes all exercised their powers every minute of the time, the boys with the stiletto would never get a look in in this or any other industry.

MAKING DRIVE ON SUMMER TRADE

The Shepard Co., of Providence, R. I., are making a special drive these days after summer trade, and in this connection are boosting the Victrola VI-A.

Automatic RECORD CONTAINER

PATENTS ALLOWED

Style 5H—Holds 100 Records

Filing Cabinets for use with Victrola VIII or IX; Columbia Grafonola 15, 25, 35 and 50; Aeolian Vocalion D. & E., and other portable styles of talking machines.

A Flexible File

—Expands Outside the Cabinet

- No weight of records to handle
- No broken or misplaced records
- 100% increased capacity
- Every record accessible
- Opens Automatically
- Files all records
- Sells on sight

These cabinets combine business sense with parlor style. A complete modern filing system adapted to home use. An efficient ornament to parlor or library.

Automatic Carrying Cases for Salesmen and Repairmen are ideal—constructed on the same principle as our Record Containers. Every dealer and jobber should equip his salesmen with them to increase their efficiency and multiply record sales.

Automatic Insert Files will re-equip any standard Talking Machine with durable up-to-date files—on dealers' sales floor or in customers' homes. Every dealer and jobber should carry them in stock. Special for Edison 100A and 150C machines.

TEST offered to dealers to prove the superiority of Wall-Kane Steel Needles

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

Beware of Imitations

Package of 50 WALL-KANE needles. Loud, Extra Loud and Medium, greater value than 500 ordinary steel needles, retails for 10c, costs the dealer 6 1/2c.

Music One of the Greatest Weapons America Has for Winning the War, Says A. W. Mason

A. W. Mason, retail manager of the Gately-Haire Co., Victor wholesalers, in the capital city of New York State, is not letting the public in Albany forget that music is proving a decidedly important factor in the war. In a recent interview published in the Knickerbocker Press Mr. Mason declared that music was one of the greatest weapons America has for winning the war, and said:

"In music, as in our lives, there are many kinds of food, and there is a field which is far greater and almost limitless in its scope. That is the lieder and concert songs of a great number of composers of the older classical schools and of the present day such as Debussy, Chadwick and many others.

"If one would take time to study the programs of the concert artists they would find this kind of music represented in a far greater degree and used much more frequently than they realized. It appeals to all classes. It is musically instructive and the increased demand for this music shows conclusively that the public is rapidly acquiring a taste for such instructive material.

"Some of the greatest things musically have been done for the music loving public within the last few years, through the talking machine. My experience has taught me that the public is ever willing, receptive and ambitious to grasp the better class of music, although I will add that many still prefer the so-called popular music, but this is to be expected, notwithstanding the aim of the minority toward expecting better things.

"A short time ago Caruso made the statement that he did not understand why two records from a noted opera which he had made for

one of the large talking machine manufacturers a few years previous, were among the poorest selling records in his repertoire. Artistically he considered them of great credit to himself, and he spoke with much disappointment at the lack of appreciation of these and other numbers of the same character.

"I do not claim to be original in this, but some years ago I realized that the music loving public was constantly looking for the 'gems.' I started to gather these 'Pearls of Great Price' at that time, and believe at present that I have the greatest collection of the 'prizes' of any individual in the Victor talking machine business. I study the catalog to-day as a boy at school studies his grammar. Thus each day new ones are unfolded to me.

"Another department of which the public has but little knowledge is the educational. Few realize that at present there are 5,250 talking machines in the schools of the country, and many thousands of records. These records are by no means confined to marches and dances, but in many instances are used in the English literature classes, in the study of music forms and compositions. Even the little folks are taken care of in this department, as all the widely known fairy tales are reproduced.

"It is indeed gratifying to the retail salesman to see the constant demand for this class of records.

"We have recently installed an extensive Red Seal department in our store and here every day we meet the music lovers of our city.

"Never, in the history of the nation, has the value of music been so clearly demonstrated as at the present time.

"Simply because we are at war, and simply

because the average individual has become reconciled to the fact that we must sing while we fight, we now have a condition that has never presented itself before.

"We have community singing, army singing at cantonments, and many other forms of vocal work, all of which tend to promote the music atmosphere and aid the spirit of the nation. Food, shelter, clothing and music are the four essentials of life, but too little attention is paid to the real merit and the great value of music.

"A disgruntled nation lacks the spirit essential to success. We must have a happy, willing, aggressive nation. Every man's son of us must be there and there with the happy punch. We, as Americans, have the punch, but let it be the happy, willing punch, backed with a song, and we have accomplished more than weeks and weeks of dry military routine can accomplish, toward making our boys feel that we are there to win.

"Sending our boys to the front without music is akin to sending them without our well wishes. We will win, and the quicker we realize, both combatants and noncombatants, that their spirit is their success, the quicker the great conflict will be over. Just let our boys, our red-blooded boys, feel that they can whistle and sing, and swear, when and where they please while in the conflict, and just so quick will we see the merit of our American blood: the initiative produced from such liberties. Discipline is essential, to be sure, but freedom of mental activities is also essential. Let them sing. Encourage it. It makes them fight like hell in fact.

"They have their own little pet parodies that we little realize in civil life and every one of them has a kick to it that might make us hesi-

Style 70—Retail \$10.00

7 IN 1

Seven strong points in our feature is a powerful selling argument.

1. Controlled entirely by gravity. Will not get out of order.
2. Non-abrasive individual record compartments.
3. Records cannot warp, scratch or mar and are kept clean.
4. 10" and 12" records can be filed in any compartment indiscriminately.
5. In beautiful oak and mahogany finish. Polished, waxed and dull finish.
6. Automatic out signal shows "when and where" a record is missing.
7. Filing and finding a pleasure. Get the desired record when it is desired.

COLUMBIA DEALERS: Eject-o-files are built to fit the style 75 and others. Slip them in as they are wanted. Why carry that big stock of 85's, etc., when the Eject-o-file does the trick? "The Eject-o-file is Efficient" and you are in business for dollars and cents.

VOCALION DEALERS: A receptacle for records that can be slipped into your style F.-G.-H.-J.-&-K. They are "built to fit." Wonderful convenience and a powerful selling argument. Ask the Salesman.

EDISON DEALERS: Eject-o-files are built to fit the style C-150 and 100. Many dealers are reaping the benefits. Why not you?

"BUILT TO FIT" any machine and a powerful asset for any dealer. Why offer Albums, Envelopes and other antiquated methods of filing to your customer? Eject-o-files are modern and efficient. Prices are phenomenally low.

The "sectional Eject-o-file," an auxiliary cabinet, compact, large capacity. Can be conveniently placed on table, stand, etc., or stands especially adaptable can be had. Beautiful and artistic, mahogany and oak finish, polished, waxed or dull. Each section a complete unit, can be added to, one upon the other, you know, sectional bookcase idea.

tate in private life were we to hear it, but it is the good old American spirit that prompts it. You have heard the proverbial 'Don't swear, or you won't catch fish' which is simply another sample of the spirit of Americans who will not accept defeat easily, and are bound to win in a mild fishing contest—a contest between the angler and the fish.

"John McCormack says 'Send Me Away With a Smile' is the ideal soldier song. John knows, for he is just in the very youthful fervor of life—only thirty-two years old, and were it not for the fact that he is of greater value individually as a singer, for he has got together some \$100,000 for the Red Cross, he would undoubtedly be a soldier this very minute. He is one of the type of which we proudly say 'That's Our American Boy.'

"While I heartily agree with John in everything he says, for he has pleased millions in his career, there is still another side to vocal work amongst the soldiers and civilians of this nation, namely, that of creating an appreciation among all for better music. Music that will last just as 'Silver Threads Amongst the Gold' has lasted with our parents and forebears.

"We should introduce to the public, favor, encourage and insist upon, recognition of such artists as Gluck and Galli-Curci and the lovely melodies emanating from the instruments of such artists as Heifetz and Powell. What a wonderful treat to think of our boys singing some of Gluck's sweet little simple airs—our own homely selections that are peculiarly ours. These selections last with our boys. They do not tire of them quickly, and furthermore they speak of our musical America in far away France."

AVIATORS SEND PLEA FOR RECORDS

Fliers at West Point, Miss., Have a Talking Machine, But Lack Records

The aviators who are in training at West Point, Miss., have written the New York Evening Journal stating that they have a talking machine which they bought from their none too generous salaries, but they are shy on discs, particularly of patriotic songs, and that cheering jazz music stuff which set so many Broadway feet to tripping last winter. One of these aviators suggested that perhaps through publicity these much-needed records may come their way, so the suggestion is passed along.

CLOSE BIG DEAL IN SOUTH AMERICA

Byron R. Forster, president of the Brilliantone Steel Needle Co., New York, in a chat with The World this week predicted an increasing shortage in needles and a general raise in prices in the needle market in the not far distant future. Mr. Forster also reports that they have very recently closed one of the largest details in the history of the firm with a large South American firm. Mr. and Mrs. Forster expect to make their summer home in Atlantic City, Mr. Forster commuting each week-end.

EXPECTS STEPHENS BILL TO PASS

Secretary of American Fair Trade League Believes That It Will Become a Law With Very Few Changes—Many Misleading Statements

Concerning the question of Federal legislation to provide for the maintenance of resale prices by the producers of trade-marked articles, Edmond A. Whittier, secretary of the American Fair Trade League, declares that there have been many inaccurate and misleading statements made by individuals and published in newspapers and magazines regarding the standard price situation.

"The situation has been so delicate that I have felt it unwise to let any statement concerning the situation or the league's attitude go out," stated Mr. Whittier to The World. "I think I am justified, however, in saying that I have no doubt of the eventual passage of the Stephens bill without modification or change except the wholly inconsequential one which will reserve to the Federal Trade Commission, upon complaint or on its own initiative, the right to investigate the economic effect of any specific contract and to prevent its use or require such modification as the commission may decide the public interest requires. All rumors or suggestions of the probable passage of a different form of bill have nothing to justify them in fact."

You can at least be in the second line of defense—be a war saver.

DISCUSS CURTAILMENT QUESTION

Following Receipt of Letter From Director of Curtailment, Local Talking Machine Manufacturers Meet and Discuss Situation

Upon receipt of a letter from P. B. Noyes, director of curtailment, a few days ago, regarding the question of curtailing in some measure the production of talking machines and records, a number of local talking machine manufacturers held a meeting at the Columbia Shop on Wednesday afternoon, and went over the situation thoroughly in an effort to arrive at some definite basis upon which to approach the director of curtailment should any reduction in output become necessary.

Despite reports to the contrary, it was stated that no curtailment order directed against the talking machine industry had been issued from Washington to date, nor has any announcement been made that such an order will be issued at any definite date, or at all.

The talking machine manufacturers plan to hold another meeting of the committee appointed to act in the interests of the trade on Wednesday of next week, when the question of possible curtailment will be further threshed out and an effort made to secure an audience with Dr. Noyes and go over the situation with him in person.

Curran Bros., of Portland, Ore., have secured the Brunswick agency.

I HAVE consummated arrangements with the Nanes Art Furniture Co., whereby I am handling record cabinets made by this company. I shall present to the trade new improved designs to match the various types of talking machines that should invite consideration. Correspondence solicited.

FIXTURES FOR DISPLAY PURPOSES

Series of Five Attractive Fixtures for Columbia Dealers Just Prepared by the Dealer Service Department of This Company

The dealer service department of the Columbia Graphophone Co., New York, has just advised Columbia distributors throughout the country that there is now ready for the use of Columbia dealers a series of five attractive fix-

Columbia Catalog Rack

tures for the display of the various Columbia hangers and catalogs in the dealers' warerooms.

This department experimented with various models, and after receiving sets of these fixtures from many manufacturers finally adopted the designs that are shown herewith as best suited for the requirements of Columbia representatives. These fixtures are being sold to the dealers at cost price, giving them not only the benefit of the additional business that this method of publicity cannot fail to produce, but also providing them with store equipment carefully worked out and delivered to them at a price considerably lower than that for which they could be secured from the manufacturers through ordinary channels.

This series includes three metal fixtures for

artistic design, and the catalog rack provides plenty of room for the adequate display of all the catalogs incidental to Columbia products.

VISITORS TO THE CITY

Several of the salesmen connected with the Columbia out-of-town branches were visitors at the executive offices recently, including S. W. Lukas and J. P. J. Kelly, of the Pittsburgh branch, and Lyman Bryan, of the Baltimore branch.

TO SHOW COUNTRY OF ORIGIN

Bill Now Before Congress to Enforce Labeling of Articles Made in This Country With Distinctive Mark to Indicate Their Origin

A bill is now before Congress to enforce the labeling of articles made in this country with a distinctive mark so as to show their place of origin. It is hoped that, despite the present pressure on the time of our Congressmen, this measure will receive consideration. The proposition is not a novel one, having been broached from time to time for several years. There is much to be said in its favor, and from more than one standpoint. The first impression of the merits of the proposal would be that its enactment would prevent the use of the sign "imported" on many things which are really made here, but which is employed as a pretext to get higher prices for them. This has resulted in a belittling or undervaluing of many meritorious goods of domestic make. But this is only one aspect of the matter. There is no questioning the advertising value in export trade of a distinctive American stamp on articles produced here. This implies, of course, that the articles themselves have merit, and it is part of the plan to see to it that they are kept up to standard. Such a control would also be of much value to domestic purchasers, assuring them of quality. The Germans, in their foreign trade, set great store on the value of the "Made in Germany" label. So much so was this the case that they did not hesitate to apply it to articles made elsewhere but which their exporters handled. In this way they managed to get a lot of business which other countries, the United States included, might have obtained direct.

TRANSFER ENTIRE VICTOR STOCK

PERSHING RECORD READY SOON

Matrix Made by General Pershing for the Columbia Graphophone Co.—Original Brings Big Price at Auction—Will Be One of a Series of Records to Be Made by Famous Americans

As announced some time ago in *The World*, the Columbia Graphophone Co. has made arrangements whereby it will soon release a record made by General Pershing, commander of the American Expeditionary Forces in France. A golden matrix of this record was auctioned at the Metropolitan Opera House during the recent Red Cross drive, and was purchased by George M. Cohan, the actor, for \$2,700. Mr. Cohan re-donated the matrix to the Red Cross committee, who will in turn present it to President Wilson to be filed in the archives at Washington.

In connection with this Pershing record the following article appeared this week in one of the local newspapers:

"One of the most valuable historic records of the present war is a phonograph record. It is a matrix of General Pershing's voice amid the din of battle—a wax cylinder contained in an ordinary leather sack now in the mail compartment of a convoyed vessel which was headed yesterday for an Atlantic port on the American continent.

"Duplicates of this priceless vocal record have been hidden away in France and England to insure them against loss from submarine attack. It is an exhortation to the American people and will be produced at patriotic meetings, rallies, school, club and social gatherings and in homes throughout the length and breadth of the land.

"Unlike the text of Lincoln's Gettysburg address and similar priceless national historic papers, this record will not be merely a Pershing relic to look reverently upon, but a new Liberty Bell, to be rung when desired—an ever-living voice, transmitting through the sense of sound the message of its author.

"Immediately upon the arrival of the matrix it will be rushed to Bridgeport, Conn., home of phonograph record and munition making, where everything is in readiness to strike off copies of the record. Then, with all the speed that the mails afford, the message will start on its nation-wide circle of inspiration—to every city, village and hamlet, to cantonments and scattered, isolated camps.

"The germ of the idea out of which this movement grew had its inception in the brain of Guy Golterman, a prominent attorney of St. Louis."

WAR PLANS FOR CREDIT MEN

Association Will Discuss How Best to Aid the Government

Plans outlining how the business men of America may give the most efficient support to the Government in time of war will be discussed at the war convention of the National Association of Credit Men to be held in Chicago June 18, 19, 20 and 21. There will be 1,800 delegates present, representing the 24,000 members of the association. Among those who will address the convention are John Burke, treasurer of the United States; and Paul Warburg, vice-governor of the Federal Reserve Board.

J. H. Tregoe, secretary of the association, said yesterday that one of the principal topics of discussion at the convention would be the great burden placed upon business men by war taxes. Another topic will be the matter of preparing for after-the-war business problems. Prizes will be awarded for the best papers on trade acceptances. It is estimated that \$50,000,000,000 is carried annually by the credit men, with \$4,000,000,000 always on the books.

BUILDING UP LARGE TRADE

Forbes & Wallace, of Springfield, Mass., are featuring the Victrola and Victor records to good advantage these days and building up a very large volume of business.

MEIKLEJOHN CO. IN LINE

Open Talking Machine Department in Providence Store Under Management of Allen T. Waite, an Experienced Talking Machine Man

The Meiklejohn Co., the well-known piano dealers of Providence, Pawtucket and Woonsocket, R. I., have recently opened a talking machine department on the second floor of their handsome building in the first named city. The business is under the management of Allen T. Waite, and Edison and Starr phonographs and records are being handled. The new department is admirably arranged, and under the capable management of Mr. Waite should score a great success.

VICTROLA FOR TORPEDO STATION

The Y. M. C. A. hut at the Naval Torpedo Station at Newport, R. I., is now proud of a magnificent new Victrola which has been donated by a prominent New York woman. The sailor boys are quite tickled with this gift.

\$50,000 RAISED TO SUPPLY MUSIC

For the Sailors of the American Navy—To Buy Talking Machines and Other Musical Instruments—Noted Artists Assist at Concert

About \$50,000 was raised to buy talking machines and other musical instruments for the sailors of the American Navy at a remarkable concert given at the Metropolitan Opera House on the evening of June 10, which was participated in by every operatic artist of international fame. Not only the entire staff of the Metropolitan, but others such as Lucien Muratore, John McCormack and Harold Bauer, pianist, contributed their services. The money will be distributed by the Women's Naval Service.

REMOVE TO LARGER QUARTERS

The Columbia Stores Co., Spokane, Wash., have removed from W818 Sprague avenue to N161 Post street, a splendidly equipped three-story building. This company has stores also in Denver and Salt Lake City.

The Ellis Melodious Reproducer

(illustration is exact size)

Weight is less than four ounces. It brings to life the individual voices and instruments in REAL-TONE: No soprano note too high. No bass tone too low. ALL reproduced as natural as life—as perfect as contained in the record.

Retails for Nickel \$10.00—Heavy Gold Plated \$12.50

That the ELLIS "melodious" REPRODUCER "Talks for itself 'most convincingly'" is the evidence of all users. It makes a special appeal to lovers of the better class of music, although at the same time it brings out detail of individual instruments of Jazz Bands and "rag-time."

"Phonograph Cranks," enthusiasts, some having had six years' continuous usage of the Ellis Melodious Reproducer to back up their judgment, tell the many wonderful stories that visiting friends say "I thought that voice human and you surprise me by telling me 'it's a talking machine playing.'"

The following is a testimonial from Mr. J. F. Poche, a "musical critic and well known to the Piano Trade and Talking Machine Industry." He writes over his signature.

"Mr. Ellis: It affords me great pleasure indeed to add my testimonial to the great number of those that you already have in qualifying your wonderful reproducer, as the only one in the country. It is so far superior to any that comparison is unnecessary. The following incident is conclusive proof of above statement. The early part of December took me to the Providence Building to see Mr. LaVelle, who has his Operatic Studio in said building. As I was waiting for the elevator I heard a gorgeous voice, in a most delightful selection, and I was so much impressed with the voice that I inquired of the Elevator man 'who is the singer?' 'This is not a lady singing,' said the elevator man, 'it is a Victrola.' I replied, 'it is

impossible, I am familiar with all of the different styles and makes of talking machines, having sold them for a number of years, and it is impossible to reproduce a voice in that way. To my great surprise I was ushered into Mr. Ellis' Studio, where I was entertained by Mr. Ellis with his marvelous Melodious Reproducer with selections from Caruso, Galli-Curci, Mabel Garrison, Journet, Martinelli, Melba, Gluck, Homer and others. I must in conclusion state unqualifiedly that your Reproducer is the only one giving an absolute reproduction of the Human voice, Violin, Piano, thereby deceiving the most exacting experts.

"(Signed) Very truly yours, J. F. POCHE."

There is a gentleman who wrote "would be willing to walk from Chicago to Milwaukee to get an Ellis Reproducer were there no other way to obtain one."

A dealer in a far-off country wrote, "Mr. Ellis, my customers wonder why your wonderful reproducer isn't known all over the World . . . please find draft to pay for forty more."

MR. DEALER: I am now able to take good care of a few more dealers who wish to give their patrons "the finest of music" with "all the harmonics" which are "hidden" in the wonderful Victor and Columbia Records.

The Ellis Melodious Reproducer is intended for exclusive trade—your customers will "appreciate your kindness for introducing the Ellis Melodious Reproducer."

SEXTON'S NEW DELIVERY TRUCK

Washington Dealer Perfects His Victor Service by Installing Automobile Service

WASHINGTON, D. C., June 8.—K. C. Sexton, 629 Pennsylvania avenue, S. E., Victor dealer, recently added to his delivery equipment a handsome Ford delivery truck, which is one of the most attractive trucks used by any member of the local talking machine trade. This truck is being used to excellent advantage, and Mr. Sex-

Sexton's New Delivery Auto

ton states that it is enabling him to render his patrons maximum service and efficiency in delivering Victrolas and Victor records.

The truck, which is shown herewith, was manufactured by the Hoover Wagon Co., York, Pa., and represents the last word in the development of the small motor truck. The famous Victor trade-mark is reproduced on the side panels, and the general appearance of the truck has won many favorable comments.

ORGANIZE COMPANY IN COLORADO

LOVELAND, COLO., June 6.—A company is being reorganized in this city by C. I. Jackson, to be known as the Jackson Phonograph Co., for the purpose of manufacturing talking machines. The capital will be \$250,000, and the majority of the preferred stock will be taken up by local people. Those interested outside of Mr. Jackson are J. M. Cunningham, George Walker, E. McNeal and Thomas McKee. It is planned to build a factory in Loveland as soon as capital is secured to commence manufacturing this machine, which is the invention of Mr. Jackson. An acoustic feature of the instrument is a wooden tone arm and tone chamber.

FILE PETITION IN BANKRUPTCY

The Cathedral Chime Co., Inc., chimes and phonographs, at 106 Reade street, has filed a petition in bankruptcy, with liabilities of \$35,800, of which \$35,669 are unsecured claims, and assets of \$9,462, consisting of stock, \$6,130; machinery and tools, \$2,250; debts due on open account, \$421, and cash in bank, \$30. Judge Mayer has appointed Maurice Meyer receiver in \$2,000 bond.

PROSPERITY IN THE SOUTH

C. B. Haynes, of the C. B. Haynes Co., Inc., the veteran phonograph jobber of Richmond, Va., who was in the city recently attending the Edison convention, expressed himself enthusiastically regarding business conditions in the South. In the course of a chat with The World he stated that the purchasing power of the people had materially increased within recent years, and that there was a good demand for phonographs of the more expensive types, with the popular demand running from \$150 to \$200.

The Denver Drygoods Co., which handles the Edison in Denver, has started a vigorous billboard advertising campaign in which the Edison is strongly featured.

The Victor department of the Anthony Furniture Co., of Providence, R. I., reports a very excellent volume of business which is only limited by the scarcity of stock.

J. R. Leach, of Arleta, Ore., has secured the agency for the Brunswick phonograph.

NEW WAR REVENUE BILL COMING

Trade Would Do Well to Watch Progress of Proposed New Measure and Be Prepared to Protect Their Interests if Threatened

Members of the talking machine trade, and particularly the organizations within the trade, would do well to watch closely the actions of Congress in connection with the proposed new War Revenue bill, which it is planned to rush through with little delay. President Wilson has already signified his determination to have a tax bill, the burden of which shall rest chiefly upon incomes and war profits, with a good share placed on luxuries. Although no particular products are classed as luxuries in the first announcement, it will not be improbable that some Congressman may insist at the outset in putting musical instruments in that class, despite all that has been done to prove to the contrary.

It is declared that the Government has secured the services of financial experts in drafting the proposed new law, and it is declared that the evidence now in possession of the Government

is of the sort to permit the officials to draft what they believe will be the best measure to meet the situation. Incidentally, the President has taken the stand that lobbying on the proposed measure should be prohibited. It is stated in Washington that, should the Ways and Means Committee follow the recommendations of the Treasury Department in drafting the bill, there will be little opportunity for protest from individuals, but should the House Committee draw a bill along its own lines, it will simply invite protests in the sending of multitudes of attorneys and witnesses to Washington to petition to the Senate Committee for relief, as was the case with the last bill.

Members of the trade will do well to keep informed regarding the progress of the bill and the conditions under which it is drafted, in order to be prepared to put forward their claims for relief in the event that such action is desirable. The trade is perfectly willing to carry its full share of the burdens of war, but it may be that the proposed bill might intentionally, or unintentionally, contain something that would place an excess burden on the industry.

REMARKABLE VICTOR POSTERS

Lyon & Healy Have Now Ready for Dealers Twenty-four-Sheet Poster Nine Feet High, Twenty Feet Long, in Four Colors, Which Should Command Public Attention—Also Issuing an Exclusive Victrola Calendar

CHICAGO, ILL., June 12.—Lyon & Healy have ready for dealers another of the remarkable Victor posters for which they have achieved such a reputation. It is a twenty-four sheet poster, nine feet high by twenty feet long, lithographed in four colors on high quality sunproof poster paper. It is extremely timely, the legend being "Get your home a Victrola. Music is a necessity." The illustration shows a charming little maiden and a Victor record emerging from an envelope on which is the legend, "Here comes the record fairy." Ample space is left for the name of the dealer. The supply of the posters is limited and dealers are urged to place their orders now. The exclusive use of this poster will be given to one dealer in each town. They are furnished the trade practically at cost.

Lyon & Healy have also just published for the benefit of the dealers a very beautiful exclusive Victrola calendar. The essential feature is a reproduction in colors from a painting by Arthur J. Wells of a home group of mother and children around a Victrola, and it is one of the most artistic productions of the kind that have reached this office in many a day. There is no other printing on the calendar except a flap at the top on which the name of the dealer is printed. The company is taking orders now for delivery November 1.

OUR ENORMOUS EXPORT TRADE

From a position of third place among the nations of the world as an exporter of manufactures, which it occupied previous to the war, the United States has suddenly become the leader, having outstripped Great Britain and Germany, according to a compilation by the National City Bank. In 1917 our exports were over \$4,000,000,000.

SECOY CO. INCORPORATED

The Secoy Co., of Piqua, O., recently incorporated with a capital stock of \$10,000, and will manufacture automatic stops for talking machines. The company formerly operated a plant at Sidney, O.

An Investment That Will Give You Exclusive Control of the BEST SOUND BOX on the Market

We offer for immediate sale a plant in the east that has been manufacturing a well-known and successful sound box for the past year.

Purchaser will secure absolute rights to VALUABLE BASIC PATENTS that cover exclusive features which make this sound box the best on the market. We can prove this assertion.

We have an established trade; over 5,000 sound boxes have been sold, and purchaser will get a paying business in addition to stock on hand, fixtures, lathes, etc. Owner leaving for the coast necessitates sale.

Have you a Real Offer?

Address BOX Z, Talking Machine World 373 Fourth Avenue NEW YORK

A SUMMER ADVERTISING NOVELTY

At the request of Columbia dealers to provide them with a summertime advertising novelty, the dealer service department of the Columbia Graphophone Co. has worked out a plan whereby Columbia dealers can secure at a comparatively little cost a supply of unusually attractive fans bearing effective and specific selling suggestions.

The department has suggested to the dealers that the distribution of these fans inside of the store covers only a small part of its possibilities. Its biggest opportunity to produce sales comes in the many ways that will readily occur to the live dealer. A fan may be included with every package leaving the store. It may be sent to the mailing list, and be used also in adding to the mailing list by its distribution at opportune affairs. Picnics, athletic meets and parties provide many opportunities for effective distribu-

tion. This also applies to garden parties, hotel dances, indoor affairs, etc.

The face of the fan conveys forcibly the gen-

eral selling idea of using Grafonolas during the summer. This general message is made specific on the reverse side, where the popular-priced models are featured, together with a suit-

Exhibitors of Talking Machines and Supplies at National Music Show, New York

Largest Music Show in the History of the Trade Formally Opened by Gov. Whitman on June 1st

At the National Music Show which was held at the Grand Central Palace, New York, during the week of June 1 to 8 inclusive, and which was formally opened with appropriate ceremonies by Governor Charles S. Whitman, of New York, the talking machine trade vied with the other branches of the music industry in the prominence of its various displays. In fact, a large part of the informal entertainment provided in connection with the various exhibits was offered by the various talking machine concerns, who brought prominent artists to the show to sing in tone tests and in demonstrating recitals in their special booths or theatres.

Thos. A. Edison, Inc., for instance, gave two fine test recitals each afternoon and evening in the Edison Theatre at the east end of the mezzanine floor, where 300 people could be accommodated at one time. The prominent artists appearing at the tone tests seldom failed to attract a capacity audience.

Then the Columbia Graphophone Co. with a large space on the main floor entertained the crowd at intervals with the songs by prominent artists on the Columbia list, while the Pathé Frères Phonograph Co. made one of the hits of the show with its complete record pressing plant at which records were actually made before the eyes of the visitors and then distributed to the holders of lucky numbers.

The manner in which the piano trade has taken cognizance of the value of the talking machine was evidenced not alone by the displays of machines made by the different piano houses, by at least three types of player-pianos in which were incorporated talking machines, making combination instruments.

The list of talking machine exhibitors at the show and what they had on display was as follows:

Automatic Record Container Co.

The Automatic Record Container Co., Chicago, manufacturers of the clever automatic filing cabinet for talking machine records, had a comprehensive display in charge of Frank P. Read. The automatic record container was shown installed in several types of cabinets, and also in a handsome wicker case machine, the products of the Lakeside Supply Co., Chicago,

DEALERS

Tell your customers how their phonographs may teach them a language by the

CORTINA Phone-Method

Increase your record sales by selling them Cortina language record sets. A timely set for which there has been a great demand is the Cortina Military French-English course.

Send for full information. Advertising matter and poster-hangers free.

Cortina Academy of Languages
12 East 46th Street :: New York

and which in itself represented the exhibit of the latter company. The Automatic Record Container Co. also showed and demonstrated the Paramount records for which they have the Western jobbing agency. The display greatly interested the visitors.

The Autopiano Co.

The Autopiano Co., New York, player-piano manufacturers, showed a new type of Pianista, a player-piano in which was incorporated a talking machine with a horn running to the spool box in the center of the instrument. It aroused the attention of visitors.

Brilliantone Steel Needle Co.

The Brilliantone Steel Needle Co. had a large exhibit at the music show held at the Grand

Exhibit of Brilliantone Steel Needle Co.

Central Palace, New York, from June 1 to 8. Besides Booths 101-102 on the mezzanine floor they also had a table at one of the important entrances where their needles were on display. Their booth was attractively furnished and their shield trade-mark, which has become so well known in the trade, was much in evidence. Steel needles, probably 10,000 times larger than actual size, were also featured in the display and attracted much attention. Not only were samples of the Brilliantone needle freely distributed but attractive souvenirs were issued as well in the form of leather-covered memorandum books. Byron R. Forster and H. W. Acton were personally in attendance at the booth and welcomed many of their out-of-town friends.

Two of the most attractive styles of Brunswick phonographs were installed in the exhibit. These machines not only added to the general effect of the exhibit but served to demonstrate the reproducing qualities of the Brilliantone steel needles. These machines also furnished many impromptu concerts during the day and evening.

Cheney Talking Machine Co.

The Cheney Talking Machine Co. exhibited a new line of console models ranging in price from \$225 to \$1,100. A feature of the exhibit was a Japanese model known as a Fuji design, which was created by one of the most noted Japanese artists in the world.

A complete line of the regular Cheney models was also displayed and a new machine in a Berkey & Gay cabinet, for the retail price of \$60, created much attention on the part of the dealers and other manufacturers. The booth was in charge of Burton Collver.

Cortina Academy of Languages

The Cortina Academy of Languages had a very interesting exhibit at the music show at the Grand Central Palace, New York. Their various language courses were demonstrated to all callers at their booth on the mezzanine floor.

Of timely interest was the Cortina Military French-English course with manual. The exhibit was in charge of A. Sage Swanson, of the Cortina sales staff.

Melville Clark Piano Co.

One of the features of the exhibit of the Melville Clark Piano Co. was the Apollophone, a combination of the Apollo player and a talking machine introduced some time ago, and which has proven very popular. This instrument is the work of Melville Clark, the noted inventor of the Apollo player-piano.

Columbia Graphophone Co.

The Columbia Graphophone Co. presented a remarkably handsome display occupying four booths on the center aisle. This display was divided into several sections, each one of which attracted the attention of visitors to the show. This exhibit was noteworthy for the many new products which made their initial bow to the trade, and which are described in detail in another section of this issue of *The World*. Several popular Columbia art models were also featured to excellent advantage in one of the booths.

The international record department of the Columbia Co. displayed a large map of Europe, which was accompanied by detailed figures showing the population in the United States of the various

Columbia Art Model Room

European nationalities. Group figures, which form a part of the new Columbia international record window display, were also used with this map, and the exhibit as a whole combined

Columbia International Record Room

practicability and attractiveness. The display was conceived by Anton Heindl, manager of the Columbia international record department, (Continued on page 101)

THE NEW EDISON DIAMOND AMBEROLA
MODEL 50

Ten Reasons Why Our Production of the New Edison Diamond Amberola and Blue Amberol Records is Constantly Over-Sold

- 1.—No continual expense for needles, no needles to lose, to be out of just when needed, to become scattered around the house, to prick the fingers, with perhaps serious consequences (especially in the case of children), to be put in their mouths by children, or to wear out expensive records when carelessly used. Instead, a permanent GENUINE DIAMOND stylus.
- 2.—Records almost unwearable and unbreakable, that retail in the United States at 60c, 75c and \$1.00—less than the price of talking machine records of the same individual selections, or selections of the same class.
- 3.—Marvelously sensitive Edison reproducer, the result of more than two thousand separate and complete experiments by the greatest inventor of the age.
- 4.—Simplest and most dependable mechanism ever put into a phonograph.
- 5.—Completely enclosed instrument that retails, in the United States, as low as \$35.
- 6.—Highest class talent in the musical world.
- 7.—Extensive library of records especially suited to the less-than-one-hundred-dollar trade.
- 8.—Musical superiority proven before phonograph experts by comparative tests with talking machines costing from two to five times as much.
- 9.—Manufactured under the personal supervision of Thomas A. Edison.
- 10.—Constant enthusiasm of dealers and sustained interest of owners because of complete satisfaction and extraordinary value for amount invested.

THOMAS A. EDISON, Inc.

Amberola Department

ORANGE, N. J.

EXHIBITORS OF TALKING MACHINES AND SUPPLIES AT MUSIC SHOW—(Continued from page 99)

and the exhibit was in charge of R. F. Bolton, sales manager of the department.

During the course of the week a number of Columbia artists appeared at the booth and gave informal concerts; these artists, including the Farber Sisters, Arthur Fields, Lewis James, Evans Davies and others. Under the auspices of the International Record department there were also presented the Serbian Tambouritza Sextet and the Russian Balalaika Orchestra, who gave several concerts during the week. The Sextet's offerings were decidedly unique, and their records will also be presented in the general Columbia lists, in addition to the regular "E" series of international records.

One corner of the Columbia booth was devoted to the educational department, which conducted a "Children's Hour." This very interesting display was in charge of W. A. Willson, business manager of the department, and W. H. Gould, sales manager.

The complete Columbia display was in charge of R. W. Knox, advertising manager of the Columbia Co., assisted by H. E. Speare, manager of the Columbia Fifth Avenue Shop. Lambert Friedl, manager of the New York branch, was on hand daily, with members of his staff to welcome the dealers. Visitors from the executive offices included H. L. Willson, general manager; George W. Hopkins, general sales manager, and Frank K. Pennington, assistant general sales manager of the company.

Eclipse Talking Machine Co.

The Eclipse Talking Machine Co., of Paterson, N. J., had an exhibit of their Eclipse electric self-starting phonograph. The Eclipse is novel inasmuch as it can be operated by dry batteries or by direct or alternating current. Among the exclusive features of the Eclipse is the Sibley sound box, and the push button that repeats the record at any time during the rendition, a point which is advertised as especially helpful to singers. The booth was in charge of James T. Sibley, president of the company and inventor of the instrument; Albert R. Winans, vice-president of the company; Thomas E. Platt, treasurer, and Walter O. Bacon, secretary.

Thos. A. Edison, Inc.

One of the chief centers of interest during the entire period of the show was the Edison Theatre, occupying a large section at the Western end of the mezzanine floor, and with a capacity of 300. Throughout the week special recitals were given twice each afternoon and evening, at which prominent artists appeared and sang and played in comparison with their recreations on the new Edison. Among the artists were Miss Marie Morrissey, contralto; Vernon Dalhart, tenor; Harold Lyman, flutist;

Part of Edison Exhibit Showing Period Models

Marie Tiffany, of the Metropolitan Opera Co.; the Fleming Trio, and others. The concerts never failed to attract a large audience. In the exhibition space outside the theatre were shown several of the leading period models of the new Edison, as well as the new Edison Am-

berola phonograph, and the Edison army and navy disc phonograph, which has proven so popular with the fighting forces. Verdi E. B.

Edison Concert Hall at Music Show

Fuller, general supervisor of Thos. A. Edison, Inc., with a staff of assistants was in charge of this magnificent display.

Emerson Phonograph Co.

The Emerson Phonograph Co. showed a complete line of Emerson products, including the new 65-cent records and the popular Emerson 7-inch records. Artistic displays of these records together with effective window-hangers and showcards gave visitors to the show an adequate idea of the splendid publicity and co-operative helps that are being issued by this company for the benefit of Emerson dealers. Arthur H. Cushman, manager of sales, was in charge of this exhibit, assisted by J. I. Carroll, assistant sales manager, and several members of the sales staff.

Otto Heineman Phonograph Supply Co., Inc.

One of the most attractive exhibits at the show was that of the Otto Heineman Phono-

Partial View of Extensive Heineman Exhibit

graph Supply Co., Inc., which occupied two booths on the center aisle. The company had many new and important products to call to the attention of visiting members of the trade, including the new Heineman "OkeH" record,

which was presented to the public and to the trade formally for the first time. This new record was heartily praised by visiting dealers and manufacturers, who were surprised to learn that the Otto Heineman Co. had already completed an extensive repertoire which included records made by some of the most popular artists now before the public. The records were demonstrated throughout the week in a soundproof booth. A complete line of Heineman and Meisselbach motors,

tone arms, sound boxes, etc., were also on display, together with Dean steel needles. These products were also featured through the medium of various well-known phonographs which used these motors, tone arms, etc.

During the week many well-known artists

recording for the Heineman record library appeared at the booth and gave informal concerts; among these artists being Joseph Phillips, Miss Inez Barbour, Miss Rosa Torregrosa, comic opera prima donna, Chas. Hart, John Myers, Lewis James and Byron G. Harlan.

The Heineman exhibit was in charge of W. C. Strong, who was ably assisted by M. E. Schechter, A. A. Foute, and other members of the staff. Otto Heineman, president of the company, W. G. Pilgrim, assistant general manager, A. Heineman, assistant general manager, C. J. Pott, Toronto manager, and G. R. Kunkle, chief engineer of the Elyria factory, were also on hand to receive visitors.

Innovation Electric Co., Inc.

The Innovation Electric Co., Inc., New York, displayed the "Innovation" electric motor, a self-winding motor that can be attached to any phonograph without change in construction or interfering with the regular crank wind. The booth which attracted attention was in charge of W. W. Rosenfield, president of the above company, and F. N. Davison, sales manager of the company.

Lakeside Supply Co.

The Lakeside Supply Co., of Chicago, exhibited several of their new tone arms and sound boxes which were very original in design and one of which latter played either lateral or vertical cut records without any shifting of the position of the sound box. The Lakeside Co. also had on display one of its luxifibre Art-Kraft talking machines which embraces several novel features. The new Lakeside rotometer,

which is a great "shortcut" in the testing and regulating of motors, was also on exhibit. Mr. Fricke came on from Chicago to take charge.

National Lead Co.

The booth of the National Lead Co., in charge of W. P. Brown, contained an exhibit of die castings of talking machine and player-piano parts. Of particular interest to the player or talking machine man were sound boxes, tone arms, el-

bows, player valves and transmission frames as well as parts for mechanical players.

Operaphone Mfg. Co.

The Operaphone Mfg. Co., Long Island City, N. Y., displayed and demonstrated a complete selection of the new Operaphone ten-inch hill and dale records, under the direction of E. A. Carter, of the company. The new records mark a distinct improvement over the former Operaphone products, and interested the visitors.

Pathé Frères Phonograph Co.

The Pathé Frères Phonograph Co. occupied three large booths at the show, this exhibit being one of the most interesting displays from a trade and general viewpoint. The feature of this exhibit was the presentation of a record press in actual operation, and this press turned out hundreds of records which were distributed to the visitors free of charge on the basis of the drawing of winning numbers. The exhibit was crowded every afternoon and evening, and the New York public evinced the keenest interest in the complicated equipment which is incidental to the pressing of records.

In another section of this display there were featured several new Pathé art models which will be ready for formal announcement in the very near future. These designs include several models after the antique periods, and their distinctive beauty won considerable praise from the visitors to the show. A new Pathéphone trench model was also displayed for the first time, and its practicability was thoroughly ap-

(Continued on page 102)

Columbia Graphophone Co.
NEW YORK

EXHIBITORS OF TALKING MACHINES AND SUPPLIES AT MUSIC SHOW—(Continued from page 101)

preciated by the many dealers who visited the Pathé booths.

During the course of the week many Pathé artists appeared at the exhibit and gave informal concerts, among these artists being the following: Jan Rubini, famous violinist; Grace Hoffman, concert soprano; Fred Van Eps, Frank Banta, Arthur Fields, Lewis James, the Farber Sisters, Dominico Savino, Wm. Simmons, Louis Winch, Royal Dadmun and the very popular team, Collins and Harlan.

The display was in charge of H. N. McMenimen, managing director of the company, together with J. F. Collins, general sales manager, Marshall Brugman and O. J. Valliere. E. A. Widmann, president of the company, was also a frequent visitor at the booth.

Plaza Music Co.

The Plaza Music Co. and the Supertone Talking Machine Co. occupied a joint exhibit, and displayed a complete line of Supertone talking machines, Magnedo and steel needles, B. & H. fibre nedeles, Wade & Wade fibre needle cutters, etc., together with standard music rolls, Thomas Mfg. Co. talking machine motors, sheet music and accessories. J. H. Roos and A. Germain were in charge of this exhibit.

J. P. Seeburg Piano Co.

The J. P. Seeburg Piano Co., of Chicago, devoted the spacious and richly furnished quarters of Booth 14 to an exceedingly attractive exhibit of the Phono-grand, which is a new combination instrument of individual exterior appearance, including a player-piano and phonograph as separate units. The Phono-grand was shown in many different finishes, including mahogany, Circassian walnut, golden oak and mission.

In addition to the large display of Phonographs the consoles of two of the very famous Seeburg-Smith unified organs were shown. One of the consoles was of a \$15,000 organ and the other was of a \$5,500 organ, and both gave an excellent idea of the musical possibilities in the great unified organs built by this company.

J. P. Seeburg, president of the company, came on from Chicago for the purpose of acquainting the many dealers visiting New York with the great sales possibilities of the new type instrument, the Phono-grand, through retail piano and talking machine establishments. Chas. Seltzer came on from Pittsburgh to co-operate with Mr. Seeburg at the National Music Show.

Starr Piano Co.

The Starr Piano Co., Richmond, Ind., devoted their space at the show to an elaborate display of a half dozen of the more popular models of the Starr phonograph which has come strongly to the fore during the past year. In connection with the phonographs there were displayed and demonstrated the new Gennett records, also made by the Starr Co. The exhibit, which attracted much attention during the week, was under the supervision of Wm. C. Klumpp.

STEPHENSON, INC., ENTERTAIN

Stephenson, Inc., manufacturers of the "Stephenson Precision Made" talking machine motor, had a special display of their motors during the past week at their New York offices at 1 West Thirty-fourth street, where Frank T. Nutze, vice-president and general manager, was in charge. Mr. Nutze is well known to both talking machine manufacturers and to piano dealers, having been for many years interested in the trade as a piano manufacturer, and during convention week he was enabled to meet many of his friends. A very novel invitation to visit the Stephenson offices was sent out by the company to the trade in the form of a little magazine edited by Frank T. Nutze, very friendly in tone and carrying information in regard to entertainment to be found by the visitors while in New York.

VISITORS TO HOFFAY SHOWROOMS

The Hoffay Talking Machine Co., 3 West Twenty-ninth street, had a number of visitors at their showrooms during the past week. These included both manufacturers and dealers, the manufacturers being chiefly interested in the Hoffay "Resurrectone," the patented sound box which the company produces. According to Jo-

Compton-Price Co.

Among the talking machines which were displayed in the booth of the Otto Heineman Phonograph Supply Co. at the National Music Show, June 1 to 8, was the Stradivara manufactured by the Compton-Price Co., of Coshocton, O., the selling agents for which are the Schilling Piano Co., 112 West Twenty-third street, New York.

Thomas Mfg. Co.

Thomas Mfg. Co., of Dayton, O., made a comprehensive exhibit of the different models of the "Dayton" motor and the "Dayton" tone arms in its booth. The parts of the motors were shown before assembling and gave an excellent chance to see the high quality products and principles of construction incorporated in them.

Weser Bros.

Weser Bros. had as their particular feature, besides a great variety of pianos and player-pianos, the Marveola, the talking machine which plays six disc records, and can be controlled at will by three electric buttons. This machine attracted considerable attention. The booth was in charge of W. S. Weser, vice-president and general manager of the company, and sales manager M. Levian.

seph Hoffay, president of the above company, he was successful in forming connections with a number of live piano dealers who in the future intend to feature the Hoffay products.

STEADILY IMPROVING CONDITIONS PREVAIL IN PORTLAND

Dealers Make Excellent Reports Regarding Business Prospects—Labor Conditions Are More Settled in Various Lines—Stock Shortage Is the Only Serious Worry Prevailing in the Trade

PORTLAND, ORE., June 4.—That labor conditions are growing more stable in Portland is apparent from a visit to the various talking machine houses in the city where there have been almost no important changes in the sales staffs in the last month. Dealers attribute this largely to the tone of the business, which is such as to make the salesmen want to stay with their positions. The approach of summer, however, has found a start of the vacation period and this has somewhat disrupted some of the staffs.

May business in the talking machine field was more than satisfactory and dealers all have excellent comparative reports showing a big increase in sales and a remarkably better condition in collections than at this time last year. Collections are reported to be even better now than they were a month ago and this end of the business is declared to have been never healthier. Sales were not quite as large in May as in the earlier months of the spring, when Portland experienced a real boom in the talking machine field, but they were large enough to cause satisfaction to the dealers.

Dealers are a unit in declaring that shortage of stocks is the one and only cause for falling off in sales in machines, many customers refusing to await deliveries which cannot be made on the spot and finally not buying at all.

Taylor C. White, manager of the Victrola department of Sherman, Clay & Co., says that his firm could not ask for any better business than that of the past month. Three electric Victrolas were sold in one day by F. D. Addis, of the department, and this was only a sample of the business being done by the firm. The visit of Galli-Curci to Portland did much to stimulate the sale of her records.

The Victrola department of the G. F. Johnson Piano Co. reports even better business in May than in April. R. F. Callahan, manager of the department, says they cannot get enough Victor machines and he attributes the growing business of his department as much to the popularity of the line as to the methods which he has put forth to get business.

Paul B. Norris, manager of the talking machine department of the Wiley B. Allen Co., handling a large line of Victrolas and Edisons, said: "We didn't get business in big bunches in May as we did in April, but compared with last year at this time business is away up." Mr. Norris' business has been so good that he has just bought a new automobile truck to deliver machines. The show windows of the Wiley B. Allen Co. have recently presented some unusual and attractive scenes arranged by Mr. Norris and his assistants. The excellent location of the store on a corner of two principal streets makes these windows well known and admired by Portlanders.

L. D. Heater, manager of the Portland branch of the Columbia Graphophone Co., says that the freight congestion is very much lessened and that his firm is now receiving shipments in from thirty to forty days after they leave the factory. Part of a carload of Columbias is now on the way from Seattle and several carloads are due any day from the factory.

One unusual demand which Mr. Heater notes is for military trunks for holding Grafonolas. These come from soldiers at Camp Lewis, Wash., and Vancouver Barracks, Wash. Mr. Heater says the soldier trade is a big one. He recently sold 235 Columbias to Camp Lewis in one order. Soldiers at Vancouver are also buying a great number of Columbia records at the local Columbia stores.

The Wakefield Music House reports excellent sales of Brunswick machines. C. Guy Wakefield, manager, says that many new handsome styles have recently been received and that these have added materially to sales.

When \$9,000 worth of Sonora machines arrived at the Bush & Lane house recently the firm congratulated itself on the fact that at last it had a complete line of Sonoras—all lines and finishes—on hand. Under the excellent management of James Loder, manager of the talking machine department, many sales have been made of all machines handled.

L. E. Gilham, manager of the Stradivara Talking Machine Co., says that business is very good and that the out-of-town trade has been very brisk. New record rooms have been added. The Johnson Phonograph Co., of Astoria,

Ore., has sold out its entire business, carrying the Columbia and Victor lines, to the Owl Drug Store, of Astoria, of which John L. Ray, formerly of Lewiston, Idaho, is proprietor.

J. H. Dundore, general manager of the Portland branch of Sherman, Clay & Co., has gone to Washington, D. C., on governmental business. Mr. Dundore is connected with the food conservation movement.

Absolute confidence in the Edison phonograph was displayed by E. B. Hyatt, of the Hyatt Talking Machine Co., where he presented Madame Florence Ferrell, who sings for the Edison Co., in a most successful concert before a large and fashionable audience last month at the White Temple here.

"I was greatly surprised," says C. R. Corder, manager of the phonograph department of Eilers Music House, "to find how little effect the recent Liberty Loan and Red Cross drives had on the talking machine business. For a week it was rather dull, but the interval between the two drives was so lively and we have been so busy that it has more than offset the lack of business throughout the drives.

A new method for finishing checked talking machine and piano cases has been invented by Joe Baker, of the Harold S. Gilbert Piano Co. It is of such value that since its inception Mr. Baker's time has been fully occupied in finishing checked machines for the various talking machine houses of Portland.

The Victrola department at the Lipman, Wolfe & Co. store is well supplied with both machines and records. While some popular records have been entirely sold out, Miss Florence Isaacs, in charge of the record department, shows her good salesmanship by persuading customers to listen to other records and always with good results.

HIPOLITO LAZARO SINGS AT COLUMBIA DEALERS' MEETING

Large Attendance at Fifth Monthly Gathering of Columbia Metropolitan Dealers, Held Recently at the Waldorf-Astoria—Midmonth Records Introduced by Lambert Friedl

The fifth monthly meeting of the Columbia dealers in metropolitan territory was held late last month in the Myrtle Room of the Waldorf-Astoria Hotel, and this meeting was the most successful that has yet been held in this

Hipolito Lazaro

important series of gatherings. Lambert Friedl, manager of the local wholesale branch of the Columbia Co., under whose auspices these meetings are held, presided at this gathering, and, as usual, his informal address and general comments contributed materially to the enjoyment of the meeting.

These meetings are called monthly in order to permit Columbia dealers to listen to the mid-month records, and Mr. Friedl has been providing programs that have won the hearty appreciation of the Columbia representatives.

More than 300 Columbia dealers and their friends were present at this meeting, and Mr. Friedl took advantage of the opportunity to thank the dealers for their loyalty and co-operation the past year, and mentioned that he is now entering upon his second year at the local Columbia wholesale branch. He ascribed any measure of success that he may have achieved

the past year to the assistance received from the Columbia dealers, and bespoke their continued co-operation during the coming year.

During the course of the afternoon Mr. Friedl reminded the dealers that a Columbia record made by General Pershing would be placed on sale very shortly, and incidentally introduced a record made by Ambassador James W. Gerard, for the Nation's Forum. This record, which is remarkably clear and distinct, carries an important message to the American people.

The most important feature of the meeting was the introduction of Hipolito Lazaro, the famous Spanish tenor, who is a member of the Metropolitan Opera Co., and an exclusive Columbia artist. Mr. Lazaro has won international renown, and is generally recognized as one of the foremost tenors of the present generation.

Responding to the hearty reception which he received from the Columbia dealers, Mr. Lazaro sang selections from "Rigoletto," "L'Africana" and "La Favorita."

The closing address of the meeting was made by W. J. Johns, president of the George Batten Co., New York, one of the country's foremost advertising agencies, which is in complete charge of Columbia publicity. Mr. Johns emphasized the fact that the main idea back of recent Columbia advertising is to link up every item of this publicity in such a way that the dealers will receive maximum benefits from this advertising. To visualize this thought he used enlarged sketches of recent Columbia advertisements, and pointed out to the dealers how the color pages used by the Columbia Co. in all of the leading national magazines are also made the basis of the monthly supplements, the monthly hangers, window displays, and, in fact, every form of publicity used during that particular month.

HOME FURNISHERS MEET

The semi-annual convention of the National Home Furnishers' Association, Inc., will be held at the Auditorium Hotel, Chicago, on Thursday, July 11, at 10.30 a. m. An important program of discussion has been arranged for the dealers who attend.

NEW DEPARTMENT IN SACRAMENTO

Kimball-Upson Co. Enters the Phonograph Field on Large Scale With Brunswick Line

SACRAMENTO, CAL., June 3.—The Kimball-Upson Co., the prominent sporting goods house of this city, has opened a phonograph department, and will handle Brunswick phonographs and Pathé records exclusively. The company has purchased the building adjoining their present quarters, and have installed a number of handsome demonstrating booths. The new department will be in charge of R. R. Bent, while Mrs. Baker will have supervision of the record end. New Brunswick dealers are also reported in Oroville, Red Bluff, Willows, and Corning, Cal.

TIMELY COLUMBIA LITERATURE

Attractive Folder on Patriotic and Wartime Records Just Issued Is Up to Date

"Columbia Patriotic and Wartime Records" is the title of a timely and attractive folder just issued by the Columbia Graphophone Co. for use by its dealers during the Fourth of July period. This folder is designed in the national red, white and blue colors, and the front cover is especially worthy of note, as it depicts five thumb nail sketches in colors incidental to the music of "Yankee Doodle," "Oh, Say, Can You," "Tramp, Tramp," "There'll Be a Hot Time" and "Over There." In fact, this cover, because of its distinctive beauty, could well be adopted for use on expensive posters and window hangers.

Under the heading of "Patriotic and Wartime Records" there are listed in this folder practically every type of record that the Columbia dealer can feature to his clientele for Independence Day. In addition to the standard patriotic records that are always prime favorites in the home of every music-lover, there are listed popular hits of the day, which form an important part of the present monthly supplements issued by the Columbia Co. Medleys of patriotic airs and the leading semi-patriotic, vocal and instrumental selections of the day make this list an excellent one for Columbia dealers.

Leo. E. D. Schatney, formerly manager of the Providence store of the Aeolian-Vocalion Co., has been awarded a commission as second lieutenant in the National Army.

THE ELLIS-MELODIOUS REPRODUCER

Receives High Praise From Prominent People Who Have Used It—Fits Any Machine

The Ellis-Melodious reproducer has been recently introduced to the trade by J. H. Ellis, P. O. Box 882, Milwaukee. This new repro-

Ellis-Melodious Reproducer

ducer, invented more than five years ago, has since that time been put through all kinds of tests through which it has emerged victoriously and with a long line of recommendations and tributes regarding the artistic quality of its reproduction. Many very complimentary letters have been received from lawyers, doctors, musicians, newspaper critics and others who have tried it out and are still using the Ellis-Melodious reproducer. It is made to fit practically any make of machine, and is furnished nickel-plated, heavy gold-plated and finest gold-painted.

DOEHLER TOLEDO PLANT EXPANDS

The Toledo plant of the Doehler Die-Casting Co., which is housed in a model factory building completed a little over a year ago, has in this short space outgrown its quarters.

In order to provide for this expansion this company has found it necessary to take over the adjoining plant of the Ohio Electric Co., doubling the present capacity of the plant.

While the greater part of the plant's activities are devoted to Government war work, the needs of the regular trade are getting close attention.

WALTER L. ESHELMAN HONORED

St. JOSEPH, Mo., June 6.—Walter L. Eshelman, an Edison dealer, was recently elected president of the Rotary Club, of this city. This honor was conferred upon him in recognition of his high standing in the community and his untiring efforts in the advancement of music in St. Joseph and vicinity.

Louis S. Sterling, managing director of the Columbia Graphophone Co., Ltd., London, Eng., sailed for London Monday, after spending two months in this country visiting the executive offices. Mr. Sterling is not quite ready to announce his plans for the rebuilding of the Columbia plant in London, which was totally destroyed by fire recently.

WINDOW DISPLAY MAKES BIG SALE

Portland, Ore., Woman Buys Fifteen Victrola Outfits for Use of Soldiers in Camps

PORTLAND, ORE., June 4.—Fifteen handsome Victrola machines and \$10 worth of Victrola records for each machine were bought at the Portland store of Sherman, Clay & Co. this month by Miss Constance Brown, a patriotic woman from New York City who is visiting Portland. Miss Brown sent the machines and records as a donation to the soldiers of the spruce division in camp near Newport, Ore. She was passing the Sherman, Clay & Co. store, was attracted by a patriotic window display and entered the Victrola department and made the purchase. She told Taylor C. White, manager of the Victrola department, that had it not been for the window display the thought of buying the Victrolas would possibly never have entered her mind.

R. S. SOUDERS IN Y. M. C. A. WORK

Robert S. Souders, who has long been prominent in the talking machine industry, through his early connection with the Columbia Co., and who has helped to introduce the Sonora in Northwestern territory since his association with the Minneapolis Drug Co., was in New York last week on his way to Europe, where he will be associated with Y. M. C. A. work for the United States soldiers abroad. Mr. Souders will act as field or hut secretary, and it goes without saying that, owing to his experience as a talking machine man, he will look after the needs of our boys abroad and provide them with the best of entertainment. Mr. Souders is not unacquainted in Europe, having served the Columbia Co. in an important capacity in Germany and other European points.

Don't tell all you know. Conversation is better than conversation.

Tone—the vital thing

If you, as a manufacturer, can talk and prove *tone superiority* in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you *can* talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

Parr Magnetic Reproducer fitted with the Vibratone Patented Diaphragm

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most *vital feature*. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek *perfection*.

The indestructible, non-crystallizing, always resilient

VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of mica diaphragms, it overcomes all mica's bad features. Guaranteed uniform in quality, free from bubbles, blisters and waves, the Vibratone Patented Diaphragm is non-porous, non-absorbent.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

PARR MANUFACTURING CORPORATION
1 UNION SQUARE At Fourteenth St. NEW YORK

Take the Parr Magnetic Reproducer—

The most sensitive of reproducers. The permanent magnetic device, an integral part of the reproducer, acts on the stylus box. Its possibilities in giving warmth and delicacy in the tonal reproduction of quiet passages make old-style sound boxes seem obsolete. And in fortissimo passages where ordinary reproducers create unpleasant, music destroying blasts, caused by the needle jumping and losing its grip, the Parr Magnetic Reproducer, with its marvelous flexibility, follows every wave and vibration in the record and takes everything the record holds.

WORLD'S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "Situation" advertisement intended for this Department to occupy a space of four lines, agate measure, and it will be inserted free. Replies will also be forwarded without cost. Additional space will be at the rate of 25c. per line. If bold faced type is desired the cost of same will be 25c. per line.

RETURNS FROM WESTERN TRIP

Frank K. Pennington, assistant general sales manager of the Columbia Graphophone Co., returned Monday from a week's Western trip, which included a visit to Columbia branches in Cincinnati, Cleveland, Indianapolis and Buffalo. Mr. Pennington states that conditions in this territory are splendid, every Columbia branch manager reporting sales totals far in advance of last year. The Buffalo branch closed in May the largest business in its history, and Mr. Pennington was advised this week by Fred E. Mann, manager of the Boston branch, that the month of May was the largest month so far this year. Another encouraging report was also received this week from W. C. Fuhri, manager of the Chicago branch, who states that the sales totals for May showed an increase of 100 per cent. over last year. In fact, in all sections of the country the business situation is most satisfactory.

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

Great Deal of Nonsensical Talk About Luxuries, in Which Talking Machines Are Featured, Appearing in the Daily Press—The Subject Reviewed—The Manufacturing Outlook—Death of Eric Dunlop—Vallorbes Jewel Needle in London—Important Association Formed—Review of New Records—Gramophone Co., Ltd., Announce Adjustment in Prices—French Tax on Luxuries—The News

LONDON, ENGLAND, E. C., June 3.—A good deal of unnecessary alarm has been engendered in trade circles by the repeated ravings of a certain section of the press anent the plans of the Government for the alleged suppression of luxury trades, among which most of the scribes alluded to are pleased to include all musical instruments. Arising from the official decision to levy a tax on so-called luxuries the subject is one which may or may not apply to the musical instrument trade. Until the committee appointed to enquire into this matter has issued its report clearly defining the class of goods that may reasonably be considered pure luxuries in contradistinction to actual necessities, any discussion along definite lines is not only futile but is likely to create an impression which, perhaps unwittingly, would lead to official conclusions unfavorable to the best interests of the trade. There can be no doubt that the feeling in official circles regarding the defining of luxury goods mainly applies at present to such commerce as expensive articles of feminine attire. The only shadow of justification for inclusion under this category of musical instruments is the fact that pianos are taxed as luxuries by the French Government, the amount being 10 cents. Beyond this no official ruling

has yet been indicated, and the supposition that gramophones and records, for instance, are a luxury is entirely premature. The claim might not have stood the test of too close an investigation in pre-war days, but in war time there is a decided argument against it.

Evidence of the necessity for an unlimited supply of mechanical music is felt on all hands, anywhere and at all appropriate times. More especially is this so with regard to military and naval establishments, where music is officially encouraged. To hospital patients music is medicine. Without it their recovery would be prolonged considerably. That is recognized by the medical profession as an actual fact. At the rest camps, too, the gramophone occupies an honored position. The daily demand is for more, and yet more, and the pity is that the call from our gallant lads cannot be wholly satisfied. The situation at home is much the same; music being an absolute necessity for many weary munition workers whose main relaxation it is after their overlong daily strenuous labor. These facts challenge completely those scribes whose pens might be used to better advantage than in writing ignorantly of the relative value of mechanical music, and in this connection a good case is furnished for immediate counter-action on the part of the recently established Gramophone Association. Steps should at once be taken for the formation of a propaganda section. Its value would prove inestimable during the period of crisis through which the talking machine trade is now passing.

Another aspect of the present situation, here, and which I have previously mentioned in these columns, refers to the threatened Government action that luxury or non-essential trades must

furnish a larger quota of men for the forces and for work of urgent national importance. This has been interpreted by many as in the nature of a serious proposal to suppress the musical instrument trade altogether. Serious though the position may be, it is quite unthinkable that the Government has any such intention. A vital factor in the prosecution of the war from a financial viewpoint is the maintenance of general commerce and the upkeep of money values abroad by the encouragement of export trade. In these circumstances, to suggest that the Government is out to destroy or seriously impair our industry, is, to say the least, scarcely founded upon a good perspective. That the sifting of men from the factories will temporarily dislocate output is quite possible. But the transfer of such labor will most certainly be sufficiently gradual to enable manufacturers to find and, it is hoped, train suitable substitutes. In this regard, the chief difficulty is to find the right class of labor. It must be borne in mind that the country is pretty well drained, the prior claims of the services and munitions factories having left but a residue from which to choose. The mainstay will, of course, be women, but the sources of labor supply provided by discharged soldiers is not being neglected. No great success has so far attended the manufacturers' efforts to secure the services of discharged men owing to their inability or unwillingness after an open-air life to stand the humid atmosphere, for instance, of the record-pressing departments. But such as are available for this and other perhaps more suitable work in talking machine factories should be impressed into the service of this in-

(Continued on page 108)

This intensely human picture stands for all that is best in music

—it is the "His Master's Voice" trade-mark, and it brings to you, no matter where you are, the very best music of every kind, sung and played by the world's greatest artists—the greatest singers, pianists, violinists, orchestras and bands—all enshrined in the unequalled "His Master's Voice" records

FROM OUR LONDON HEADQUARTERS—(Continued from page 107)

dustry with the least possible delay. Time is the essence of all things, and not more so than in this matter. We may rest assured, therefore, that every effort will be made to suitably replace those men in the factories and offices who in the national interests are required for work rightly considered of greater importance.

The call-up of men of the new age classes—forty-one to fifty-one—has already commenced, notices have been issued to those up to the age of forty-five. This does not necessarily mean that men of these groups occupying executive and administrative positions in the commercial world, if medically passed, will be drafted to military or naval units right away. A great deal, of course, depends upon their medical classification and the needs of the services. But in any case official consideration will be shown, and possibly time allowed for the firms concerned to find substitutes, as in the case of factory employes. Given a sufficiently reasonable period of time, business should not be so seriously dislocated as many at first were inclined to think, but for all that the prospect is not regarded with indifference, as it will be exceedingly difficult to replace the class of men in question.

With it all, the possibility of gramophones and records being placed under the category of a luxury must not be overlooked. By many it is regarded as certain. If the tax is levied on the sale of talking machine goods, I am able to say the rate will be in the neighborhood of 17 per cent. of the retail purchase price. The duty is recoverable from the seller and it is to be denoted, and collected, by stamps.

Details of New French Tax

According to reports from France the new French Finance Law promulgated on March 22, and one section of which applies particularly to articles classed as de luxe, places a tax of 10 per cent. on the retail selling price on all the various articles listed, including all pianos other than upright (cottage) pianos. Among the articles subject to the tax when their retail price exceeds a certain sum are included: musical instruments, other than the piano (phonographs, gramophones and mechanical pianos) and all their accessories, when the selling price is over 150 francs, and upright pianos and harmoniums, when the retail selling price is more than 1,200 francs.

The Toll of War—Eric Dunlop

It is with something akin to a sense of personal loss that we have to record the death of Eric Arthur Dunlop, only son of Arthur S. Dunlop, the editor of *The Sound Wave*. As may be surmised it is yet another case among the many young lives sacrificed to the god of war. Mr. Dunlop was but twenty-three years of age. A few years ago he emigrated to the Golden West where he was making splendid headway when this Armageddon suddenly descended upon an unprepared world. With the spirit of his race he joined up as soon as was possible, and after a period of training both in

Canada and England was drafted abroad as a not unimportant unit of the Canadian Camerons.

It all happened at the time of the great retreat; a terrible head wound which, though borne with patience and cheery fortitude right to the last, ended fatally on April 20 at the King George Hospital, London. The funeral took place with full military honors at St. Andrew's, Hornchurch. In the general condolence and sympathy extended by the trade to Mr. and Mrs. Arthur S. Dunlop, the writer begs sincerely to participate.

Increased Prices of "His Master's Voice" Models

The gramophone trade is not unaffected by the generally increased cost of commodities and materials, and it is not therefore surprising that new prices are from time to time necessitated. In this regard the Gramophone Co., Ltd., recently advised the trade of an adjustment in the price of their various models, the new rates to go into effect May 15. Dealers were warned that after this date any sale below the new prices would be construed as a breach of the price-maintenance agreement.

Vallorbes Jewel Needle for British Market

A British sales depot for the Vallorbes Jewel Co.'s 50-record needle has been established here by the Murdoch Trading Co. On the face of it, this new needle may be regarded as a veritable godsend, for the supplies of steel for needles do not improve, and are not likely to. The scarcity still exists, and as I have reported in these columns at different times we are reduced to meeting the shortage by collections of used needles and placing them on the market again after resharpening. This is, of course, not general, the percentage of repointed needles being but small in comparison with the sales of new needles. Nevertheless, any efficient substitute, such as that now under mention, is welcome. The claim, however, that the Vallorbes needle is good for fifty records should be accepted liberally, especially so anent its likely effect on the wear of the records. On the other hand, if the claim is justified by results, it must be accepted as meaning that fifty is the safety margin beyond which it would be undesirable in the interest of the record to go. This is an academic question. The number of records played by one needle depends on the operator. We have heard of a steel needle being used twenty or more times, and still considered good. It should be used only once, but there are people who fail to detect any difference in quality after several times' playing, and therefore to them it is all right. Anyway, the Vallorbes is very welcome, and we have no doubt will find a ready market.

The Clarion Record Exchange Plan

I am advised that the Clarion Record Co. is prepared to exchange unsalable, worn, or otherwise tired-out records (cylinder wax only) for new ones, on the basis of three to one. Each returned record must be complete in its own cylinder box with lid complete. Broken records

which cannot be so returned the company will purchase as old wax at the rate of nine pence per pound. All parcels must be carriage paid. Other details in connection with this exchange may be obtained direct from the company.

The Sense of Winner Records

Whoever is responsible for the Winner repertoire knows a thing or two. That is evidenced by the presentation each month of just those titles which seem to be most in demand. Obviously, it is not merely coincidence, for the lists, as we know, have to be prepared often many weeks in advance of publication. It is just the outcome of knowing one's public—the exercise of a discrimination which is at times almost second-sight. The latest Winner program to hand bespeaks this sense in a wonderful degree. It comprises a real galaxy of up-to-date selling titles by such talent as for instance the Two Bobs, the Elliotts, Stanley Kirkby, the Carlton Vocal Trio, De Busse (organ accordion solos), the Band of H. M. First Life Guards, Royal Court Orchestra, the Corner House Ragtime Band, and other artists equally good.

A special issue is "On the Good Ship Yacki-Hicki-Doo-La," by the one and only Billy Merson, the popular character comedian. With the aid of a sort of buccannering crew, Billy boldly lays siege to the fair damsels, and we may be sure he doesn't get the worst of his temerity. "When First We Met," on the reverse of this disc, is a capital sentimental ditty in which Billy Merson is at his best. Overseas traders could not do better than carry a goodly stock of these quick-selling records.

Gramophones and Records Wanted at the Front

These days when we hear so much regarding the non-essentiality of the talking machine trade, it is a severe commentary upon ignorant scribes who never lose a chance to run down the trade in that sense, that the Y. M. C. A. are appealing for a large number of gramophones and records on the strength of their being urgently necessary at the Front, to make good the losses incurred during the recent great retreat, when 130 fully equipped Y. M. C. A. huts were destroyed. Who will help?

An All-British Gramophone at Last!

The story of an enterprising trader's fight in behalf of an industry that was previously monopolized by enemy manufacturers was recently told to the Shoreditch Military Tribunal by Francis Nottingham, of the Rex Gramophone Co. Since war broke out his machines had been made from parts mainly imported from Switzer-

land, and during the last twelve months £1,000 was paid as import duty. Mr. Nottingham explained how, after three years' continuous effort, he at last succeeded in getting a British firm to make motors and other parts. An all British Rex Gramophone is now being supplied to the trade, and before long it is anticipated that the main output may honestly be described and guaranteed as British throughout. This accomplishment necessitated the placing of orders for thousands of different parts. Notwithstanding the almost hopelessness of the prospect during this period, Mr. Nottingham has won out. His persistency of effort has reached the success it deserves, and what I have seen of the British Rex Gramophone leads me to conclude that complete success is in store.

Incidentally it might be mentioned that Mr. Nottingham established his claim for exemption, the Tribunal agreeing that he was doing much better work than he could do in the army!

Organize Important Association

It will be good news to many that a serious attempt is in being to grapple with the many problems which beset the trade. With this object a meeting of musical instrument manufacturers and others was held last month, the result being the formation of a society under the somewhat long-winded title of The Association of Gramophone and Musical Instrument Manufacturers and Wholesale Dealers. Of the important firms represented, the following may be mentioned: Barnett Samuel & Sons, Ltd, Barnes & Mullins, Beare & Sons, Besson & Co., Ltd., J. E. Hough, Ltd., J. G. Murdoch & Co., Ltd., the Gramophone Supply Co., Ltd., Columbia Graphophone Co., Ltd., British Polyphone Co., Ltd., etc.

The general objects are: To promote, protect and secure the varied interests of manufacturers of and wholesale dealers in gramophones and musical instruments and their accessories. The specific objects will cover a variety of matters of vital trade interest, as for instance post-war conditions, etc., prospects, tariffs, import and export difficulties, supplies of raw material, transit facilities, wages, to supply information anent foreign trade, etc. Membership is open to any firm or person engaged in the musical instrument trade as a manufacturer or wholesale dealer. The minimum annual subscription

has been fixed at the sum of three guineas, pre-paid.

The present endeavor, it will be observed, excludes retail dealers from membership. Previous trade associations, long since defunct, were confined solely to the retail section. We now branch out in an entirely opposite direction, in which we hope success may be achieved. At no time perhaps was an association more necessary than to-day, when a strong lead is required for the direction generally of the whole trade. We should have welcomed an open invitation for membership of the retail trade, for undoubtedly the inclusion of the leading retailers would tend to strengthen the work of the association and carry influence in official quarters. However, while the position is one of great interest, we refrain from further comment at the moment, as undue criticism at this stage would perhaps not be of great advantage until the association is fairly "on its feet," so to say.

"Popular" Records to the Fore!

Some of the many difficulties which beset British record manufacturers during war time were referred to in the course of an interview with the manager of the Sound Recording Co., Ltd., makers of the "Popular" series of records. One of the chief sources of concern is the constant upward tendency in the price of all materials, the effect being to render quotations for parcels of records almost impossible. The cost of paper bags has increased from a few shillings per thousand to anything up to 35/—; insurance and freightage rates generally are to-day a serious item, not to mention the extra import dues levied on goods into the United States, and a hundred-and-one other war-time expenses too numerous to mention. The price of records must go up proportionately, and another general rise is likely within the near future. Notwithstanding, a big export trade is still maintained.

Up-to-date issues of "Popular" records are a regular feature, and traders may always rely upon being able to obtain the latest London hits, vocal and instrumental. Details of the company's offer will be found elsewhere in this section.

What They Say of Zonophones

What they say of Zonophones is "Play that again!" The sentiment reflects nothing but universal appreciation of Zonophone quality. Glance at supplement No. 2 for 1918 and the reason is immediately obvious. Its fare is particularly rich in talent and the variety of selections must be acceptable to all dealers.

There are no less than twenty double-sided discs! G. O. 29 carries Harry Lauder's stirring appeal for £1,000,000 to complete the fund he is raising on behalf of maimed Scottish soldiers and sailors, and on the reverse side he sings that patriotic song, "Shoulder to Shoulder." The great violinist, Miss Mary Law, gives a fine example of her technique, the selections being accompanied with string quartet and piano. Vic-

Soundboxes

IF you are after a genuine offer of soundboxes, you'll do well to communicate with us immediately. We have tens of thousands of perfect soundboxes, fitted with the best quality mica. tory Overture, Part I and II, the Bing Boys on Broadway, Victoryland selections, all by that splendid instrumental organization, the Black Diamond Band—represents typical examples of good recording. Other artists contributing to the list may be mentioned, Sydney Coltham, Herbert Payne, Foster Richardson, Peter Dawson, Florrie Forde, George Formby, Juan Okoni (ukulele with piano), Elsie and Dorothy Southgate (violin and Mustel organ), Royal Cremona Orchestra, etc., a list that of a truth represents the essence of all good things musically.

Gertie Millar for Columbia

Another great musical comedy "star," in the person of dainty Gertie Millar, joins the ranks of those recording only for Columbia, the medium through which her talents are conveyed being the charming musical comedy "Flora," which graces the stage at the Prince of Wales' Theatre, London.

"The Lilac Domino" on "His Master's Voice"

This attractive musical play is the rage of London just now, and judging by the favorable attitude of the public, it is likely to run an unusual period. It teems with music of an exquisite and light character—the mind-staying kind that attains the height of popularity by being hummed here, there, and everywhere. A series of six double records has been issued by "His Master's Voice" Co. consisting of instrumental and vocal numbers, played and sung by eminent artists.

FROM OUR LONDON HEADQUARTERS—(Continued from page 109)

all branches of the talking machine trade, Mr. Hallett is, we should surmise, eminently fitted for the job. His talents are exceptional and up-to-date—fresh from Wadsworth, where he lately held the onerous position of manager of the Clarion Record Co., Ltd.

"The Lilac Domino" for Columbia

In "The Lilac Domino," J. L. Sacks' magnificent production at the Empire Theatre, London, has a feast of music the like of which has not been enjoyed in light opera for many years. At the Empire it promises to repeat the success achieved in New York, and certainly has the advantage of a fine cast, with Miss Clara Butterworth, the well-known prima donna, Mr. Jamieson Dodds, the popular baritone, and Mr. Frank Lalor as comedian, as principals. And the Columbia Co., with an enterprise that is thoroughly typical, has secured the exclusive rights to the Empire production with the original artists, the present being a series of six fine double records.

Link Between Manufacturer and Dealer

The new editress of The Voice, the chatty "His Master's Voice" organ, inaugurates in her first issue an excellent plan whereby the local difficulties of dealers may be solved by mutual ventilation and discussion in The Voice. To this end a page will be reserved each month, and it is hoped an exchange of views or advice from the company, which is freely offered, will result in the elimination of many of the small difficulties which beset the retail trade under present conditions.

Norwegian Exports Prohibited

It is announced that the exportation of commodities of all kinds from Norway is now prohibited except under official authorization.

Women Substitutes at the Victor Co.

Much interest has been aroused in British trade circles by the announcement in The Voice that the Victor Talking Machine Co. has replaced 2,000 of its cabinet factory male staff by women workers! The same scheme is operating in most of the gramophone factories here.

Tax on Luxuries—French Report

French Parliamentary papers contain the text of a report on the French Luxury Tax addressed by M. de Villeneuve, president of the Commission to the Minister of Finance. In view of the introduction of a similar impost in this country the President's explanation of the principles which guided his colleagues and himself in preparing the schedules of articles to be taxed is of interest, and the salient passages of the report are reproduced below. The actual schedules have already appeared in The Daily Telegraph, and other journals.

It would have been vain (says the report) to attempt a rigorously exact definition of objects called luxury objects. We judge that the quality of luxury articles depends on three elements; the nature of the article, its price, and its destination. In the first category are included articles which are essentially de luxe, such as dia-

monds, pearls, jewelry in gold or platinum. In the second, objects which in a general way are in every-day use, such as clothing, but which are of a sumptuous character, when they fetch high prices. Finally, certain articles which are de luxe by nature, such as motor-cars, lose this character when they are employed in the exercise of a profession; for example, the furs of a chauffeur or the carriage of a doctor. The law, indeed, is intended to hit only the display of wealth and not the instruments of labor; it taxes luxury but does not wish to paralyze effort.

The first difficulty that the commission had to grapple with in drawing up the schedules consisted in making a classification as complete as possible, with designation sufficiently clear as to avoid all difficulties in application. In this matter we thought we could not do better than to follow the customs of the trade; it is the traders who will be, in the application of the law, the principal collectors of the tax; it was necessary, therefore, to make our schedules con-

form to their traditions and their customs.

Since the tax is to be collected at once, the figures given represent current prices. The result has been that in a large number of cases we have allowed exceptional figures, clearly higher than those ruling for purchases before the war. It will evidently be necessary to proceed with a revision of these basic prices when the market resumes its normal state.

A very important question, and one which may have a serious reaction on the yield of the tax, has been settled by the heading of Schedule B, which stipulates that the tax is due, not by reason of the sale price, but only by reason of the excess of this price over the basic price appearing in the schedule. This solution appears to satisfy the demands of equity and to accord with the conception of luxury which we have indicated above. Up to a certain price the purchase of a piece of furniture, of an article of clothing, corresponds to a real need: luxury and consequently the tax, only ought to begin above that price.

FAREWELL DINNER TO H. L. TUERS NOW IN THE SERVICE

H. L. Tuers, formerly manager of the dealer service department of the Columbia Graphophone Co., New York, left Saturday for Ithaca, N. Y., where he will take a course in training preparatory to becoming an officer in the Aviation Branch of the Signal Corps. Mr. Tuers was the guest of honor at a farewell dinner, given last Wednesday by his former associates, who presented him with an aviator's coat and helmet. This dinner, which was informal, served to emphasize the affection and esteem in which Mr. Tuers is held by every member of the Columbia organization.

Mr. Tuers is succeeded as manager of the

Former Associates of H. L. Tuers Entertain Him at Dinner

dealer service department by Courtland Shaw, Jr., who has had several years' experience as a member of the Columbia sales staff, and who has a thorough knowledge of the dealers' requirements.

SELLING FACTS TO CONSIDER

Pertinent Pointers That Are Worthy of Consideration by Young Salesmen in the Talking Machine and Every Other Trade

When you start to sell, bear in mind one fact—the prospective customer has a mind, and on this mind depends much whether we do or whether we don't sell. The mind of every customer runs through the same process before the sale: first, attention; second, interest; third,

desire. Almost any one can attract attention. Plenty of people can create interest. Lots of folks can bring about desire. But the essential thing is to have the customer satisfied after the goods are bought. It is expensive to sell customers goods they do not want. You cannot treat all customers alike. To some customers you must smile, to others you may speak freely. A firm, fixed rule cannot be laid down for selling. One thing is certain: All customers are attracted by a face that does not frown. It is well to keep this in mind.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., June 8.—PHONOGRAPH.—Marshall B. Peal, Brooklyn, N. Y. Patent No. 1,265,502.

This invention relates to a phonograph, and particularly to means for automatically causing the phonograph to cease all mechanical motion after the stylus or needle has completed its course of travel relatively to the sound producing surface of the record.

A further object is to provide a record having means adapted to co-operate with features embodied in the phonograph structure for causing the rotation of the record to cease after the sound producing surface of the record has been traversed by the stylus or needle.

A further object is to provide a device which may be either incorporated into the record at the time of manufacture of the record, or which may be attached to the record at a subsequent time adapted to co-operate with features of the phonograph machine for causing the operation of the machine to cease at a pre-determined time.

Figure 1 is a top plan view of a phonograph machine having a record in position thereon, provided with this invention, certain mechanism of the machine being illustrated diagrammatically. Fig 2 is an enlarged vertical detail sectional view taken upon the plane of line II—II of Fig. 1. Fig. 3 is a fragmentary sectional view taken upon the plane of line III—III of Figs. 1 and 2. Fig. 4 is a similar view taken upon the

without stopping the machine to change the disks, and to provide controlling means whereby a second disk is brought into operation successively with a former disk when the latter has reached the end of the subject matter recorded thereon, thereby causing a continuity of the sound or speech.

Figure 1 is a view in perspective of a machine embodying this invention. Fig. 2 is an elevation showing the mechanism employed to operate the turn-tables and the mechanism connected with the reproducer. Fig. 3 is an elevation, partly in section, of a fastening-nut to center the disk on the false-turntable, and spindle for the latter. Fig. 4 is a vertical sectional view of a hollow shaft, turn-table and attaching means for the latter. Fig. 5 is a detail showing the

plane of line IV—IV of Fig. 2. Fig. 5 is a perspective view of one of the parts included in this invention. Figs. 6, 7 and 8 illustrate modifications. Fig. 9 is a perspective view illustrating a further modification; and Fig. 10 is an enlarged sectional view illustrating still a further modification.

TALKING MACHINE MECHANISM.—Archie E. Parnall, Chicago, Ill., assignor to Frank W. Williams, same place. Patent No. 1,265,498.

This invention relates to talking machine mechanism. One of the objects of the invention is to provide improved means whereby the tone arm may be connected with machines having different types of amplifiers.

Figure 1 is a vertical section of a talking machine in which the amplifier is inclosed in a

casing below the record support. Fig. 2 is a vertical section of a talking machine in which the amplifier is mounted above the record support.

MACHINE FOR CONTINUOUS REPRODUCTION OF PHONOGRAPHIC COMPOSITIONS.—Charles S. Andres and Wm. T. Jones, Philadelphia, Pa., assignors to the Sound-O-Photoplay Co., same place. Patent No. 1,265,286.

This invention relates to a machine in which means are provided whereby the continuous reproduction of speech or music recorded on phonographic disks may be obtained.

The object of this invention is to provide means whereby a number of phonographic disks may be played or operated one after the other

mechanism for operating the bell-crank lever. Fig. 6 is a detail showing the means for connecting the bell crank and the lever for operating the same. Fig. 7 is a diagrammatic view of a motor operating circuit, shown in full lines, and a test lamp circuit, the latter being shown in dotted lines, as contemplated in this invention.

PHONOGRAPH OR TALKING MACHINE.—John P. Constable, West Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,265,179.

This invention relates to phonographs or talking machines. The principal object of the invention is to provide an improved mounting for the horn or sound conveyor which forms a part of the phonograph or talking machine. In the preferred form of the invention, the phonograph reproducer is caused to move across the record by mechanical feeding means, and another object of the invention is to provide improved means for rendering the mechanical feeding means inoperative and for disengaging the reproducer stylus from the record surface.

Figure 1 represents a view partly in elevation and partly in section showing the preferred em-

bodiment of the invention. Figs. 2 and 3 represent views in perspective of parts of the device shown in Fig. 1; and Fig. 4 represents a view partly in section and partly in elevation of a detail of construction.

TALKING MACHINE.—William G. Beard, New York, assignor to Henry C. Burnstine, same place. Patent No. 1,264,883.

The present invention relates to certain im-

provements in means for reproducing sound, and more particularly in such as employ a rotating disk record.

The object of the invention is to provide an improved mounting for the tone arm whereby the necessary movements thereof are facilitated, and assembling of the various parts is simplified.

Figure 1 is a plan view of the top of a machine employing the invention, Fig. 2 is a sec-

tional view on the line 2—2 in Fig. 1, Fig. 3 shows a detail in elevation, and Fig. 4 is a bottom plan view of the tone arm gimbal removed.

SOUND BOX.—Louis Menge, East Orange, N. J. Patent No. 1,264,201.

This invention relates in general to sound transmitting mechanisms and specifically relates to improvements in recording and reproducing sound boxes for gramophones, phonographs, and like machines which employ a vibratory diaphragm in connection with a stylus arm or lever operatively associated with the diaphragm to transmit motion to and from the same.

It is well known in the phonographic trade at present that different types of sound boxes now on the market respond differently to the different characters of records used. For instance, a machine using one form of sound box gives the most pleasing effect when used with a record having high vibratory notes, such as a violin record; while another form of sound box responds best to some other character of record, such as a vocal record. It is generally true that each sound box works best with only one or possibly two similar types of records. Under these conditions an obvious objection to the known types of sound boxes now in general use is that they are not susceptible of giving uniformly good results with the different forms of records and accordingly one of the objects of the invention is to provide a sound box capable of being quickly adjusted to best suit the particular character of playing record in use.

Most of the sound boxes now in general use appear to reproduce, superimpose, and rather emphasize the overtones on the record and perceptibly reproduce the high pitch foreign noises

resulting in the squeaking so objectionable in phonographic devices. Another object of the invention is to minimize this sharp note effect and to provide a sound box which while accurately reproducing the basic sounds originally produced on the record, at the same time will mellow the reproduced tones so as to give a rich, full timbre without depriving the tones of their full musical note values.

This latter object is attained broadly by providing a very thin and sensitive vibratory diaphragm formed from a specially adapted wood and by securing to the diaphragm one end of a relatively light and delicately pivoted stylus arm, the other end of which arm is designed to have a playing stylus operatively mounted therein. As a further refinement in the stylus arm feature of the invention, the same is constructed from a relatively small tuning fork, the free ends of the prongs of which are fixed to the diaphragm transversely of the line of grain therein.

In the drawings: Figure 1 is a face view shown in plan of a sound box illustrating a preferred form of the invention; and Fig. 2 is a central sectional view taken approximately on the line 2—2 of Fig. 1.

(Continued on page 112)

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 111)

PHONOGRAPH.—Charles S. Burton, Oak Park, Ill., assignor to the Melville Clark Piano Co., Chicago, Ill. Patent No. 1,264,268.

The purpose of this invention is to provide an improved construction of a phonograph adapted to be combined with a piano and contained within the casing thereof.

Figure 1 is a perspective view of a piano embodying this invention. Fig. 2 is a front elevation of the phonograph mechanism contained in the piano case, showing certain parts of the

piano case and mechanism for the purpose of indicating the relative location of the phonograph in the case. Fig. 3 is a vertical section at the line 3—3 on Fig. 2.

TALKING MACHINE.—Francesco Cirelli, Philadelphia, Pa. Patent No. 1,264,273.

One object of this invention is to provide improved sound transmitting apparatus for talking machines which renders it unnecessary to employ a horn or cabinet construction such as has been the custom to employ prior to this invention.

Another object is to so construct the improved sound transmitting apparatus that it can be used in various positions and places, such for example as on an ordinary table or board and can be moved bodily independently of the record support.

Figure 1 is a side elevation of the invention shown in operative engagement with but mounted independently of a motor driven record. Fig. 2 is a view of similar nature to Fig. 1 but showing the invention out of engagement

with the record. Fig. 3 is an enlarged section on the line 3—3 of Fig. 1 showing the upper portion of the horn in outside view. Fig. 4 is an enlarged sectional plan taken on the line 4—4 of Fig. 1. Fig. 5 is an enlarged fragmentary section taken on the line 5—5 of Fig. 4 showing a portion of the tone arm in outside view.

GUIDING DEVICE FOR PHONOGRAPH TONE ARMS.—John A. Shoemaker, Ada, Minn. Patent No. 1,264,691.

The object of this invention is to provide means for automatically locating the position of the tone arm and the diamond point or needle with respect to the starting point of the groove or path in the record, the device having particular application to the Edison phonograph where the tone arm is raised and lowered to separate the diamond point from the record or position

it thereon preparatory to the operation of the machine.

Figure 1 is a plan view of the top of an Edison phonograph with the invention applied thereto. Fig. 2 is a plan sectional view of the horn arm, with the invention connected therewith. Fig. 3 is a detail sectional view, taken on the line 3—3 of Fig. 4, showing a portion of the

device mounted on the wall of the cabinet. Fig. 4 is an elevation of the horn arm and a section of the cabinet, showing the relative arrangement of the path-finding device thereon.

TONE ARM FOR PHONOGRAPHS.—Robert H. Cone, Jr., St. Louis, Mo. Patent No. 1,264,017.

This invention relates to phonographs of the disk type, and its object is to enable both records having vertical undulations and those having transverse undulations to be played by the same instrument.

The invention consists in an arrangement of sound box and tone arm, and a joint connection between the sound box and the tone arm for enabling the sound box to be set in either of two positions at right angles to each other. The invention further consists in a joint connection between the sound box and tone arm permitting the sound box to be turned up off of the record and out of the way. The invention also consists in a joint connection for holding securely the sound box in either of two

positions of adjustment, and which permits changing from one position to the other by merely twisting the sound box with the hand.

Figure 1 is a side elevation of a tone arm and sound box embodying the invention, showing the sound box in position for playing records having vertical undulations. Fig. 2 is a longitudinal section of the same in a vertical plane through the axis of the tone arm; Fig. 3 is a cross-section of the tone arm on the line 3—3 in Fig. 2; and Fig. 4 is a cross-section of the elbow portion of the tone arm, on the line 4—4 in Fig. 2.

SOUND REPRODUCING MACHINE.—David L. Suiter, Philadelphia, Pa. Patent No. 1,263,816.

This invention relates to improvements in sound reproducing machines, an object of the invention being to provide improved means for modifying or restraining the sound waves during the operation of the device so as to bring out the desired expression, and to control the volume of sound by manually operated means without interfering with the ordinary functions of the device.

Heretofore, various attempts have been made to control the volume of sound, but it is understood that such devices have been defective, largely, because of the fact that the controlling device or damper is located too far away from the diaphragm so that the sound waves are thrown backwardly, causing a confusion of sound and therefore interfering rather than aiding in the proper reproduction.

With these improvements the damper is located as close to the diaphragm as possible so that the control of the sound waves is had before any appreciable volume of air is in motion toward the outlet.

Figure 1 is a top plan view illustrating a preferred form of the invention. Fig. 2 is a view in longitudinal section, partly in elevation showing the improved damper located in a coupling

connecting the sound box with the sound tube. Fig. 3 is a view in longitudinal section taken at right angles to Fig. 2. Fig. 4 is a view similar to Fig. 3 illustrating a modification in which the damper is in the sound tube and the coupling is dispensed with. Fig. 5 is a view in longitudinal section illustrating a modification in which the damper is located entirely in the

sound box. Fig. 6 is a view in section on the line 6—6 of Fig. 5; and Fig. 7 is an enlarged view in section illustrating the butterfly valve or damper shown in Fig. 2.

SOUND AMPLIFIER FOR PHONOGRAPHS.—Herman Thimgan, Denver, Col., assignor to the Colorado Phonograph Co., same place. Patent No. 1,263,625.

This invention relates to improvements in means which, when used in conjunction with the horn of a phonograph, will amplify the sound of the instrument, obviate the harsh, metallic sound so apparent in such instruments, and eliminate all unnatural conditions in the reproduction of the voice or sound.

In the drawings, Figure 1 is an elevation view of the invention, partially in section; Fig. 2 is

a longitudinal sectional view taken on the line 2—2, Fig. 1; and Fig. 3 is a cross-sectional view taken on the line 3—3, Fig. 2.

TALKING MACHINE.—Thomas Kraemer, Philadelphia, Pa., assignor to the Domestic Talking Machine Corp., same place. Patent No. 1,262,810.

This invention relates more particularly to means for modifying the sounds produced by a talking machine, and its primary object is to provide an improved expression device adapted for convenient manual operation to effect individual interpretations of musical or spoken compositions.

In the drawings, Figure 1 is a side elevation of a talking machine embodying the improvements; Fig. 2 is a broken sectional view taken vertically through the mouth of the amplifier illustrating improvements of the invention in side elevation; Fig. 3 is an enlarged broken sectional view taken on a vertical plane through

the mouth of the amplifier and the valve therein, transversely to the view shown in Fig. 2; and Fig. 4 is a broken sectional plan view taken on a horizontal plane coinciding with the bottom of the deck of the talking machine.

Galli-Curci scored a great success in Los Angeles at her recent appearance there.

PROSPERITY IN THE SOUTH

W. Terhune, of Atlanta, Tells of Improved Conditions in That Section—Visitors to Columbia Headquarters During the Past Week

There were quite a number of visitors recently at the executive offices of the Columbia Graphophone Co. in the Woolworth Building, New York, including several of the branch managers from different parts of the country. Among these visitors were James P. Bradt, general manager of the Columbia Co.'s Canadian business; Irby W. Reid, manager of the St. Louis branch, accompanied by C. R. Salmon, one of the members of his sales force; Westervelt Terhune, manager of the Atlanta branch, and A. J. Heath, manager of the Philadelphia branch.

All of these callers spoke enthusiastically of the Columbia business being closed in their respective territories, and as every Columbia branch is showing a substantial gain over 1917 this enthusiasm was substantiated by sales totals for the past four months.

In a chat with The World Mr. Terhune commented upon the very satisfactory industrial and financial status of the South at the present time. The Columbia branch in Atlanta has averaged more than 100 per cent. gain for every month of 1918 as compared with 1917, and Columbia dealers in the Atlanta district are closing a banner year. Mr. Terhune commented upon the fact that a large proportion of Columbia representatives in his territory are discounting their bills, and retail merchants in the South are in splendid financial shape. This gratifying condition cannot fail to benefit the Eastern manufacturers in all lines, who will find in the South a permanent and profitable market for their merchandise.

SOME SALES POINTERS

Before you make an approach, put yourself in your prospect's place. Try to imagine how he feels, what he is thinking, what he needs. Talk your goods over with him beforehand. Don't say one word that will bump him off the order-track. And when you've sold him in your mind, march in and sell the man himself.

Many a sale is lost because the salesman did not get at the real object in his prospect's mind. Don't use up your energy, therefore, overcoming a "straw" objection set up for you to shoot at. Use strategy to find the real obstacle—then demolish it. Don't understudy the machine that turns out form letters by the hours.—System.

DISPLAY CORTINA METHOD

The show windows of C. H. Ditson & Co. were devoted last week to a novel display of the Cortina method of studying military French by means of talking machine records and accompanying text books.

THIS REFERS TO YOU, MR. DEALER

Every talking machine jobber in this country should be represented in this department, no matter what line he handles or where he is located. The cost is slight and the advantage is great. Be sure to have your card in this department of The Talking Machine World each month. It will pay you a big profit on the investment.
