CLEAR AS A BELL

From the New York Globe

**CANNED MUSIC
MAKES ROUNDS**

Plays the Whole Day Through
for Our Men and the Wounded
French.

By JUNIUS B. WOOD.

(Cable to the New York Globe and Chicago Daily News. Copyright, 1917.)

THE AMERICAN ARMY IN FRANCE, Dec. 11.—In a certain unnamed spot a few miles back of the French front are the long one-story frame barracks of a regiment of American railroad engineers. These buildings, with those of a French hospital, near which is a cemetery that is daily growing larger, form a mushroomlike military city. Day and night the Americans take trains up under fire and return to sleep and rest in the barracks.

Every morning, and sometimes oftener, according to how the fighting goes, they bring in a long train which stops at an equally long platform, while its load of helpless, suffering, and bandaged humanity is carried into the wards of the adjoining hospital. Each one who is more seriously wounded is taken farther to more comfortable and better equipped permanent hospitals in southern France. The wounds have been bandaged in the temporary field dressing stations, but only in a few cases has there been an opportunity to wash off the dirt of the trenches before the patients are hurried to this evacuated hospital. Then starts the fight to fan back the flickering flame of life.

In that war born city is one phonograph. Grand opera singers, amusing actors, and entertaining speakers do not come to that hospital in the war zone. A single box of "canned music" is all they have to relieve the monotony of the puffing locomotives, the stifled groans of their fellow wounded and their own gnawing pain. Occasionally German bomb dropping machines seem reluctant even to permit these fragiles of humanity escape.

It is Never Silent.

One thoughtful New York mother sent this ray of brightness to her son, a captain in a railroad regiment. He turned it over, records and all, to the hospital so that all might use it. Now it is never silent day or night until taps sounds. Early in the morning it starts on its rounds through the

hospital wards and by evening it reaches the Y. M. C. A. hut and finishes the night on a rough pine board table in the officers' quarters grinding out the old, familiar home-sick tunes.

Occasionally when work is slack the owner goes himself to run the machine. Here is his description of a Sunday afternoon in that strange city sight:

"I spent an hour and a half playing the machine in a ward where two men carried in the records. There were from sixty-five to seventy-five men in the ward. Some were suffering from pneumonia and still others were terribly burned by mustard gas. Nearly half of the remainder had not seen daylight for a long time. All eyes seemed to be bandaged and there was an everlasting coughing.

"I started off with the "Marsellaise" and every last man who had an ounce of strength left in his system sat up on his cot at salute and tried to raise a bandaged hand if one was left. After that we had some American marching songs, comic opera, grand opera, and everything left on the worn out records.

Records Nearly Worn Out.

"We have used these records until they sound like the proverbial tin can. I wrote to America a couple of months ago for more, but they never materialized. The machine works all day in the hospital and we use it only when the patients have gone to sleep. It would be a calamity if they were deprived of its solace."

For military reasons I am not permitted to give the name or location of this American regiment which, in addition to its war work of carrying forward ammunition and supplies and bringing back the wounded and dying is also spreading the good samaritanism of music. However, anybody who wishes to answer the appeal can send them to me and the American post-office here will see that they are delivered. Anything in the line of music is a balm in the ears of the wounded, even of the French Polu, who does not understand English. Send them in care of Junius B. Wood, war correspondent American Expeditionary Force in France.

IN the trenches and battle zone of Europe 25,000 Sonora Portable Style Phonographs, distributed by our London representatives, are with the British army.

In thousands of American homes the beautiful Sonora is cheering those left behind, while the pride of the household is serving in training camp, cantonment, or over seas.

The man leaving for war should buy a Sonora for his family because, especially for the women and children, it is *needed* for the maintenance of confidence and optimism, for entertainment and restful pleasure, and as a conqueror of loneliness, worry, and "the blues."

\$110	\$140	\$160	\$180	\$200
\$275	\$375	\$500	\$1000	

The above are stock models.

Art Models made to
Special Order.

1917 was the greatest in the history of Sonora. Each New Year finds this wonderful phonograph established more firmly in the public's esteem.

The Sonora is of unequalled quality. It is easily sold and offers to you the opportunity for splendid profit and the development of a substantial valuable business.

Some territories are still open. Write us for details.

LIMIT FREE DELIVERY OF RECORDS

Dealers Inclined to Fix a Limit on Number of Records That Will Be Delivered Without Extra Charge to the Customer—Cuts Into Profits

Retail stores throughout the country, particularly the big department stores, have at the suggestion of the Federal authorities, and as a result of the labor shortage, been making every effort to cut down the volume of free delivery of goods, and at the same time much of the expense of the system by educating the public to carry away with them all small parcels. A number of talking machine men have fallen in line with the campaign, with a view to cutting down the volume of record deliveries. In St. Louis, for instance, the talking machine retailers have entered into an agreement to refuse to deliver free less than six records. In other words, a customer buying five records must carry them home himself or pay additional delivery charges. It would seem to be a move in the right direction. Taking all factors into consideration, the net profit on an individual record, particularly of the popular type, is comparatively small, and to pay out as much as 50 per cent. or more of that profit to cover delivery doesn't smack of good business. The practice has been carried on in the past under the broad term of service, it being felt that the customer would carry away enough records personally to balance it, but a definite rule on deliveries, and the minimum set on the number of records that will be delivered without charge, eliminates the element of chance. It gives the dealer what is due him as profit. It is just one of the trade improvements that can be laid directly to wartime conditions.

WOULD MAGNETIZE NEEDLES

One Writer Believes That It Would Prove Convenience to Talking Machine Owner

A writer in "System" makes the following suggestion regarding the handling of needles that might prove of interest to some members of the trade. He says: "I would magnetize my steel reproducing needles so that instead of lying flat in a tray and scattering all over its surface they would bunch together. This would make them much easier to pick up and would prevent them from rolling out of the tray at every jar.

"When any of them fell into the top of the phonograph, instead of being compelled to pick them out one by one, my customers could easily brush them into a corner and remove them all at once. The same would be true should the tray containing them be upset."

ON "GOING AFTER BUSINESS"

"Only about one sale in ten is a floor sale—the other nine are accomplished almost entirely by outside effort, by carrying the instruments out for home demonstration," remarks W. H. Stoakes, Edison dealer at Grinnell, Iowa.

"There is more than a grain of truth in what Mr. Stoakes writes," says the Editor of Edison Diamond Points. "There are many of them. We have long preached home demonstrations and outside canvassing. The man who stands behind a counter all day and waits for customers to come to him will wait a long time. You should leave your counter and go after business.

"Time was when the dealer did not find it necessary to go after business. Times have changed.

"I hauled out eleven instruments into the country and sold nine of them inside of two weeks," writes Chris Verwers, of Keota, Iowa.

"If you have a Ford all the better. As George Silzer puts it 'Crank her up and hit the highway for those sales that won't come to you.'" This suggestion is well worth considering.

BERLINER'S LATEST INVENTION

Canadian Talking Machine Man Produces Flying Dirigible Torpedo Usable on Land or Sea Which Has Attracted Considerable Attention

Emile Berliner, widely known through his inventions in the talking machine trade, and whose improvements in the telephone made long-distance talking over a wire practicable, is now the inventor of a flying "dirigible torpedo," utilizable on land as well as on sea.

Dr. Berliner's contrivance is in effect a small aeroplane—a monoplane in miniature—run by a little gasoline engine and motor and carrying a propeller and a rudder that is set before launching. It has other means of automatic control, with a gyroscope to keep it level.

The machine is nothing more nor less than an artificial bird that holds a torpedo in its beak. More definitely speaking, the torpedo, carrying a heavy charge of high explosive, is held by spring arms in front of the little aeroplane, so as to be set off on striking the target.

For use on the sea, the flying torpedo may be modified by attaching beneath it a small plane set at such an angle that the machine on striking the water will skip along over the waves toward an enemy ship, the difficulty of hitting it with gunfire being thereby greatly increased.

Dr. Berliner's latest invention has been the subject of considerable notice in leading papers.

MAKING THE TELEPHONE AID SELLING

Proper Use of Telephone Frequently Means Time and Money Saved for the Talking Machine Dealer Who Uses Some Originality in Work

With the price of printed matter still soaring skyward and with mailing costs materially advanced by the war tax, the telephone may come into more general use as a means of selling records. Merchants in a great many lines of trade outside of the talking machine field have been steadily placing greater dependence on the telephone as a means of keeping in intimate touch with their patrons. In fact, it seems logical to presume these merchants in other fields have broken the ice, so that the increased use of the 'phone by talking machine merchants will be cordially received.

A certain talking machine dealer has adopted the plan of mailing out the new record lists each month and then instead of following up his customer by mail, he calls each one by 'phone, runs over the list somewhat after the manner of a grocer enumerating household necessities, and, where the customer evinces interest, he places that record on the group to be sent up on approval. When the records are delivered on approval, a personal letter accompanies them, outlining the individual beauty of each record. Thus the dealer introduces a maximum of the personal element at a minimum cost.

SOLDIERS WHO ARE REAL ARTISTS AS WELL AS ARTISANS

Members of Company B, 306th Infantry, Make Special Case for Popular Priced Talking Machine Which They Find the Keenest Source of Pleasure and Entertainment in the Camp

The talking machine is undoubtedly the greatest comfort to the men in the camps, as it is to the men in the trenches at the front. No other musical instrument affords them such pleasure, because it brings into their lives the

placed it in a case which they specially built and decorated themselves, with the result that they have now something very unique in an outfit.

The outside of the cabinet shows as a decoration the great seal of the United States, and

© 1917, Underwood & Underwood, N. Y.

best in song and music, and enables them, when they are so inclined, to dance to its inspiring music. The men in the camps, however, are just as inclined to the good-looking talking machine as are their folks at home, and the picture herewith is of unusual interest in this connection. It shows how the members of Company B, 306th Infantry took a popular-priced talking machine,

Company B, 306th Infantry Enjoying Themselves

other decorations which emphasize that the men of this company are not only artisans but artists. Around this talking machine the members of Company B gather in the evening and spend hours listening to the music of the day, including very often music of the better type, for the men who are in camp do not leave their musical taste and inclinations at home.

Why 1918 Holds Great Possibilities For Every One In The Talking Machine Trade

FROM almost every angle 1917 has proven a most unusual year in the talking machine industry. It has been a year to test the stability and permanence of the trade and be it said that the trade has not been found wanting under the test. War has brought with it many problems for both talking machine manufacturers and dealers. Its effect has been first of all to curtail supplies and labor, and to hinder the transportation of peace products to an alarming degree. But, on the other hand, it has brought with it a wide recognition of talking machines and records as genuine essentials in the equipment of military units. The coming of the New Year sees the talking machine more firmly entrenched than ever in the hearts of the people, and as a result the future looks bright indeed.

Review of Holiday Business in Machines and Records

Despite the war and despite the high cost of living and other factors connected therewith, the holiday business in talking machines and records reached proportions that swamped the facilities of both producers and retailers. Conditions made it impossible for many of the manufacturers to keep their output up to a point reached the previous year. Transportation problems likewise have had their effect, and there really seemed to be something the matter with the dealer who could say he went through the month of December without suffering serious loss of sales in some manner and through no fault of his own.

It was a noteworthy fact that the big demand was for machines selling in the neighborhood of \$100, and therefore, the most serious shortage was in that type of machines. Machines retailing at from \$20 to \$40 were not such good sellers, and both jobbers and dealers had the experience of seeing these machines lie on their shelves without moving while at the same time they were turning down orders for the more expensive models, or at least endeavoring to install temporary substitutes.

Factories Couldn't Turn Out Records Fast Enough

The record situation was similarly embarrassing. Aside from the call for standard vocal and instrumental numbers, it seemed that everyone who owned a talking machine or expected to own one, wanted records of "Over There," "Goodbye Broadway, Hello France" and the other hits of the day, and the result was that the record supply in no sense met the demand. Of course there were plenty of records, but while they were frequently accepted as substitutes, they were not just what the public were crying for. The factories could not simply turn out the required records fast enough. It was impossible, and the result was embarrassing.

In order to relieve the record situation and help clear up the jobbers' and dealers' shelves and to enable the factories to catch up with orders, several of the companies have shown an inclination to cut down on their monthly lists of new records. The Victor Co. has taken the first step in this direction, by including only fourteen new selections in its January record supplement, and it is stated that the same plan will be followed out for several months to come at least. Several other companies have arranged to adopt the same method, or are contemplating some such action, in an effort to clear the decks for the coming year.

The Industry on a More Permanent Basis

During the past year or so the industry may be said to have settled into more or less permanent channels, and this fact also augurs well for the future. In 1915, it will be remembered, there was a great influx of new concerns into the trade. Hardly a day passed without its group of new corporations setting forth their

intention of making machines or records. They apparently felt that there was great wealth simply waiting to be grasped. There were also many new concerns in 1916, but the number had dropped off materially from the previous year.

It is quite evident that many of these corporations were of the fly-by-night variety. Their object was to sell stock and plenty of it and to offer machines at retail far under established prices and for that matter far below established quality. Many of these concerns dropped by the wayside without delay; 1917 has seen the clearing out of others, while the companies properly organized, and with the correct appreciation of the status of the trade, have survived and established what may be looked upon as permanent positions in the industry.

That the trade condition in this particular is more or less settled is a matter of congratulation for both the trade itself and the public, for it acts as a protection to both sides.

Must Have Courage to Plan Ahead

From present prospects it is safe to assume that 1918 holds great possibilities for everyone in the talking machine trade, but to take advantage of the opportunity, the trade members must have faith in the future and the courage to plan ahead. If early ordering was ever necessary, it should be doubly necessary during the months to come. It is going to be harder than ever for the factories to keep up production to a high pitch, and with the war demands on the railroads, harder than ever for the wholesalers and retailers to get the goods within a reasonable time after they are shipped. It is only by working far ahead that even a fair measure of protection can be assured. In other words, the retailer who does not place his orders for holiday stocks in the spring at least, is simply taking big chances on the future of his business. It will mean tying up some capital, and perhaps a little financial strain, but the sacrifice will be worth while, if the trade members plan to stay in business.

Why the Talking Machine Is a Necessity

The big banking interests and some Government officials are preaching the doctrine of rigid economy by the general public, advising them to discontinue the purchase of anything not ranking as a necessity of life. This doctrine in itself should revert to the benefit of the talking machine trade. The fact that the Army and Navy have already absorbed thousands of talking machines of various types and thousands, if not millions, of records, and are at the same time appealing for more with the full endorsement of the officials, is the best indication that the talking machine is a recognized wartime essential. From the viewpoint of economy, it can also be viewed in a favorable light for it requires a minimum of outlay in proportion to what it has to offer. The machines themselves are comparatively low priced, and record libraries can be built up by the expenditure of only a few cents weekly. In fact, it can safely be asserted that the talking machine is one of the real "essentials" to the nation in war times.

New Year Going to Mark Important Era

From every viewpoint, it would seem that 1918 is going to mark a new era in the progress of the talking machine, as well as genuine prosperity for those members of the industry who have the courage to take full advantage of the opportunity that is there. Certain it is that the manufacturers are not letting the grass grow under their feet. While frankly able to meet only a percentage of the demand for their products, they have kept up their advertising to the full limit, and in some instances a

little stronger than ordinary, and plan to do so in the months to come in order that the public may be kept in close touch with talking machines and records until such time as the industry can take full advantage of all the selling opportunities that exist or will exist. It is this spirit of building for the future that is responsible for the present strong position of the talking machine.

AN IMPORTANT ACCESSORY—ALBUMS FOR FILING DISC RECORDS

The enormous demand for "National" Record Albums keeps pace with the ever increasing demand for machines and records, and our output capacity has been enlarged to meet the greater needed supply. Record Albums have proven themselves to be the best and most convenient, as well as economic, method of filing and keeping disc records.

THE PULLING TEST—THE STRENGTH IS THERE

STRENGTH AT THE STRESS AND STRAIN POINT

PRACTICALLY UNBREAKABLE FOR REGULAR USAGE

Albums are an **Indispensable Requisite** in the talking machine business and wherever records are sold. An accessory that is necessary and worth while. Practical and handy. Save time and records. A **profitable adjunct** to the business. All owners of machines and records want Albums to file and preserve their records.

We manufacture disc Record Albums containing 12 pockets to fit cabinets of all sizes and styles. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc records.

For durability, finish and artistic design, our Albums are unsurpassed. We have unexcelled manufacturing facilities, and considering quality our prices are the lowest. Write us giving quantity you may desire, and we will quote prices.

OUR ALBUMS ARE MADE TO CONTAIN VICTOR, COLUMBIA, EDISON, PATHÉ, AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. American Street, PHILADELPHIA, PA.

WIDDICOMB PHONOGRAPH CATALOG

DEDICATES TOAST TO FIGHTING MEN

BARTLETT MUSIC CO.'S DISPLAY

Handsome Publication Illustrating and Describing New Products of This Company

Dr. M. Goldstein, of Boston Book Co., Writes Some Patriotic Verse

In Window Dressing Contest Conducted by Los Angeles Express and Tribune

The Widdicomb Furniture Co., of Grand Rapids, Mich., have just published their first phonograph catalog entitled "The Widdicomb, a Finished Product." It has been prepared in a very attractive manner and thoroughly describes and illustrates the eight Period models constituting this attractive line. They embrace examples of the Chippendale, Colonial, Adam, Queen Anne and Early American Schools. Fine coated paper is used throughout and perfectly prepared half-tone work reproduces in detail the fine architectural points of each model, which are most distinctive. On each page the slogan of the company appears. "Play it Yourself."

Herewith is reproduced a little New Year's toast dedicated to our soldiers and sailors, the work of Dr. M. Goldstein, who is connected with the Boston Book Co., the prominent New York manufacturers of record albums:

A Toast to our Boys in Khaki,
A Toast to our Boys in Blue,
A Toast to our Brave and Plucky.
A Toast to our Red, White and Blue.

A Toast to our Allies on Land,
A Toast to our Allies on Sea,
A Toast to those Heroes in Command,
A Toast to the Brave and the Free.

REFRAIN

Hurrah for our Boys in Khaki,
Hurrah for our Boys in Blue,
Hurrah for the Brave and the Plucky.
Hurrah for our Red, White and Blue.

JORDAN CABINET WORKS ORGANIZED

The Jordan Cabinet Works, of Brooklyn, was recently incorporated with a capital stock of \$25,000. Those interested are E. E. and E. B. Jordan, Jr., and A. B. Wilson.

The Phonograph Clearing House, Inc., of Manhattan, has been incorporated.

LOS ANGELES, CAL., January 6.—The Los Angeles Express and Tribune recently conducted a window dressing contest which was unique in

Bartlett Music Co.'s Window Display

many particulars, and which scored an emphatic success. The contest embraced many industries, and each house participating presented its display in the window of the Los Angeles Express and Tribune. Herewith is shown the window display prepared by the Bartlett Music Co., Columbia dealers. During the week of this display a number of people called at the offices of the newspaper to inquire on what floor the phonograph department was located, as they wished to buy a Grafonola and records. These inquiries were directed to the nearest Columbia dealer, and the display thereby served a dual purpose.

We hear a lot of "necessary evils," but did you ever hear of an unnecessary good?

NEW YORK, JANUARY 15, 1918

BUSINESS during the holiday season so recently closed more than exceeded the prognostications indulged in the early part of December. Christmas trade opened up slowly, but the closing days showed tremendous activity in the demand for machines and records. Reports from correspondents in different parts of the country vary considerably as to the volume of trade, for it was most uneven in many respects. Some States showed an activity that equaled the same period of last year, while others had quite an increased trade in records but a falling off in the sales of talking machines due to local conditions and the lack of stock. But taking the holiday business of the Nation as a whole, it was, in the face of war conditions, in the main satisfactory.

Record business has assumed formidable dimensions, and this was demonstrated not only during the holidays, but during the first weeks of the New Year. While the demand for popular numbers, and particularly patriotic numbers of all kinds was large, yet there is no question but that the demands for records of standard vocal and instrumental numbers, especially the standard operas, is becoming an increasingly important feature of the record business.

Leading jobbers and dealers inform The World that this aspect of the business is as marked as it is pleasing. The growth in popularity of records of high class instrumental and vocal numbers can be greatly aided if the dealers or salesmen concentrate on bringing these records to the attention of their customers. In this way they can help to move what is usually a slow moving section of their record stock and help to elevate the musical taste of the owners of talking machines. They can do this more effectively if they know something about these high-class songs or instrumental numbers themselves—if they know the composers and the character of their compositions and impart this knowledge to the buyers of these records. In this way they give these records an interest that would be lacking were the customer induced to buy one of the records without giving it the consideration which it would receive if the buyer was properly interested in the selection and its composer.

THERE is a big field to be developed here—one that unquestionably means much for the musical advancement of America, and one that will help in a trade way as well. The popular and patriotic records will always sell, because they are

seasonable, but the standard compositions, the classics so to speak, do not sell in as large numbers as they should, largely because of the lack of attention given them by a large army of salesmen. This neglect is entirely due to their lack of real knowledge of these numbers.

While the leading manufacturers of records tell something about the high-class records in their bulletins every month, yet the salesman should have a wider knowledge of the composers and of their compositions if he desires to appeal to high-class trade.

This is well worth while, for there is no question but that the artistic and musical merits of the talking machine are being more widely recognized to-day than ever before. Evidence of this fact is to be found in the records now on the market of the great symphony orchestras and of leading artists both instrumental and vocal, who are known and esteemed throughout the world.

The dealer and salesman should make a resolution this first month of the year to give more attention to their record departments—to learn more about the goods they are handling, not merely in a commercial way, but also to know the composers and their works. In this way they will be able to meet the requirements of their particular customers, and help educate a large number of people who are ambitious to expand their record library by including records of distinct and enduring musical merit.

AT no time in trade history was it so necessary to cultivate an optimistic viewpoint as far as business is concerned as to-day. The abnormal conditions brought about through the war have a tendency to bring about a hysterical state of mind that is as harmful to the individual as it is to an industry and to the nation. Now is the time to cultivate that desirable quality in the world of business which we call confidence, and which is also as great an essential in the winning of the war.

We must not give credence to every rumor that is put out portending to calamity or trouble, for there is nothing that weakens the morale of our business forces quicker than the insidious annoying little rumors that incline one to pessimism and indifference to necessities whether of war or business.

One thing that we must keep in mind is that the Government of the United States is not wilfully or willingly desirous of bringing disaster to the business men of this country despite the constant flow of "non-essential industry" news which is reaching the daily newspapers throughout the country from correspondents in Washington.

WE may be in the position of an industry that is not entirely essential to the military conduct of war, but our industry is one that is wholly essential to civilization. We need not become panic stricken because one man in the U. S. A. might do without musical instruments. They said in England, when war came, that no one must dream of buying anything new, whether motor cars, pianos, talking machines, or clothes. But the folks went on buying just the same; and yet the war loans have been floated over there with complete regularity and success. Why? Because the people have found they need music almost as much as they need food; and a good deal more than they need rich, expensive food and drink.

Despite the enormous sums which the Liberty Loan Campaigns, past and future, will bring into the national treasury, the Government will still depend principally upon taxation to raise money for the purpose of financing the extraordinary expenditures of war. Unless the industries of the country are kept going on a profit-making basis, the Government will not be able to levy taxes. The more profit an industry makes, the greater will be its tax returns to the Government, and the larger will the war-chest become. Therefore no sensible man will believe for an instant that the Federal authorities are going to hinder any line of business arbitrarily, or will place stultifying restrictions around a business that otherwise would be able to contribute a quota towards keeping the war-funds at high-water mark.

COME what may, we are in war, and in it to win. To obtain our purpose, we shall keep business going all the time; but that does not mean that everything must go on just as it did be-

fore the war. That is impossible; and so much the better. Whatever comes in the future, every bit of brains, nerve and skill in our industry will be needed.

We must continue to make talking machines and records, and continue to sell them and sell more of them than ever before to a people who will be working, planning, organized and organizing; to a cheerful, to a purposeful, to a victory-making people. We must inaugurate and maintain a campaign of publicity that will awaken the people of America to the value of music as a necessity—as a companion that will bring comfort and cheer in days of sorrow as well as victory.

Music by means of the talking machine is a necessity. It supplies the fighting forces as well as those who are working at home for the success of the Nation with that force that replenishes and freshens. For it is hard to define the mysterious power of music in a great crisis such as we are now going through. It is the food that nurtures the Nation's soul, that stimulates brave deeds, and that increases the determination to surmount all difficulties.

THE development of export trade not only during the war, but after peace is declared, is considered by every student of the nation's needs to be absolutely essential to the progress of our country. A forward step in this direction was the passage recently by the Senate of the Webb Export Combination Bill, which it is expected will be enacted into law at an early date. This measure is a highly desirable recognition of the principle of co-operation in foreign trade which has had the support not only of the National Foreign Trade Council but of the leaders in all branches of industry. American exporters have long been greatly hampered in their efforts to compete with foreign exporters in the markets of the world by their apprehension that the Sherman Act forbade combined effort, including even the organization of joint selling agencies. The Webb Bill removes such disadvantages as may now be imposed by our anti-trust laws to the end that American exporters may be free to utilize all the advantages of co-operative action in coping with combinations of foreign rivals united to resist American competition and a combination of foreign buyers equipped to depress the prices of American goods.

The passage of the Webb Bill will mean the definite recognition by Congress of the principle of co-operation, and it should prove a very substantial benefit to the nation's export trade.

DURING the past year talking machine dealers in various sections of the country through local organizations have taken steps to eliminate entirely or at least control within reasonable bounds the practice of sending out records on approval, and it is to be hoped that the elimination of this practice or at least its curtailment to a negligible point will become general throughout

the country during the present year. As a matter of fact present conditions offer to the dealer an excellent opportunity for taking the bull by the horns and eliminating bad business practices that have grown up with competition. Stock is going to be short both in records and machines, and with such a situation the retailer can come pretty near to picking his trade. If he has the record the customer wants make the customer buy it outright. If the records don't suit, the approval plan is not going to sell them. At the same time under that plan the records may be out of the store when somebody else is ready to buy them. Taken from every angle this is the time to clean house without facing the danger of serious loss of business to competitors.

JUST at this time the presentation by the Musical League of Philadelphia of detailed figures showing that nearly \$102,000,000 are spent annually in that city and vicinity in various forms of musical activity, should serve to interest every member of the trade, no matter in what part of the country he is located.

The additional fact that there is a permanent investment of approximately \$20,500,000 in musical establishments and musical instruments in that one city alone must also not be overlooked. Figures of this sort go far to emphasize the necessity of music and the part it plays in civic life. The citizens of a city the size of Philadelphia, whose population is approximately 1,700,000, do not spend an average of \$60 apiece annually on a mere fad or hobby, but demand value for their money.

Talking machine men could do good work for the industry by compiling, or assisting to compile, similar figures for their respective cities or towns. The aggregate amount spent for music annually, as compiled by such means, would undoubtedly impress the country to a staggering degree. A few authentic figures are better than hours of wild conversation in securing public recognition for music and the things that make music.

AT least 50 per cent. of the war rumors that are abroad these days should be summarily dissolved into thin air. Among those rumors which should receive scant attention are those purporting that this or that plant has been anywhere from 60 to 100 per cent. commandeered by the United States Government. The Washington policy as expressed by such men as Willard, Gifford and Garfield does not include drastic action against any industry. Where individual plants are utilized for war work, moreover, the manufacturer will have no reason for concealing the facts. When his plant has been taken over a manufacturer will immediately inform his clients with respect to his inability to supply them with goods, because there would be nothing to gain in a business way by holding back the truth and there is good will to lose. Therefore, unless direct word is given out by the manufacturer in person, rumors bearing on commandeering should be discountenanced.

HAPPY NEW YEAR!

WHERE MUSIC STANDS

The merchants in your street who sell food, clothing and fuel are selling essentials to the body. You who sell music sell an essential to the mind *and* body.

From Confucius down through the ages practically every philosopher of note has declared that music is a human essential.

When you meet a man or woman who thinks a phonograph is an extravagance ask that man or woman if good books are an extravagance. There is scarcely anyone who would dare say that books are an extravagance, yet books have limitations that music does not have. Music, next to religion, is the world's greatest solace.

Don't be afraid to stick
up for music.

War Problems in the Field of Salesmanship and How Best to Meet Them :: :: By G. D. Crain, Jr.

"The worst thing about having to employ so many new clerks," said a tired talking machine dealer, as he looked about at a number of "new beginners" attempting to wait on the trade in his store during the holiday rush, "is training them. It's a job that I haven't much time for, and one that takes a lot of steam."

Yet, without question, the new clerk who is not given the advantage of sympathetic coaching is sure to make a lot of mistakes, and will fail to render the sort of service customers of the store are demanding.

The soldiers who go to France are given several months of intensive training before they get on the firing line. They receive instruction in the methods of warfare which are being used in the world conflict, so that when they take their places in the trenches they are prepared for all developments.

The new salesman, especially the one just starting out in selling work, is green timber. He needs coaching and instruction. He needs to have confidence instilled into him, so that he will not lose his nerve when a tough proposition is presented.

The best way to improve work in the store is to have a weekly conference or "round table." This can be made so interesting and enjoyable that the clerks, instead of dodging the meeting, will welcome it. It should be accompanied by "eats" of some sort, so that the social spirit will be developed, and bashful clerks encouraged to speak their minds.

The boss can be the chairman of the meeting, and can outline subjects for discussion, but it is a good idea for him not to attempt to monopolize the conversation.

Let salesmen, especially those who are experienced enough to be able to give good advice, discuss the problems of their everyday work, because such discussions will give the newcomers an idea of what they may expect.

The merchant can devote some of the time to the description of new models of machines and the new records, comment on changing prices, etc., and he should also explain the policy which is back of the store, so that customers will get from sales people an expression in line with the actual policy of the establishment.

Just now, when most prices have been increased, explanations of high prices should be made intelligently, and advances not simply excused "on account of the war." There is a good reason for the advance in price of every commodity which is carrying an increase, particularly talking machines, and it is a good idea to inform the sales people on this subject. Customers frequently inquire about these things, and they should be given an intelligent answer.

In the smaller store, where there are only a

few clerks, the proprietor can put in odd moments to good advantage in explaining to the new employes the methods which it is intended they shall use and something about the features of the line handled.

In this connection it is well to note that with new sales people having to be trained, now is a good time to study the arrangement and marking of record stock. Obsolete methods in this respect, which were tolerable when experienced salesmen, familiar with all of the retails

*"To Improve Work
in the Store Have a
Weekly Conference
Round Table"*

of the business, were in charge, make the work of new employes doubly difficult.

The arrangement of record stock in some logical way (there are several good systems in use) will enable the rawest recruit in the sales army to take care of his own work without having constantly to ask questions of the dealer or one of his assistants.

The dealer who is training his help should be possessed of lots of patience. He must expect mistakes to be made, and be ready to correct them without animosity. In the case of employes who are just being broken into business harness, reproofs are often taken keenly to heart, and the dealer can afford to be generous in his attitude on this subject.

If he shows that he does not demand infallibility, but only earnest intelligent effort, he will win confidence and loyalty that will go far to keep the mistakes from being repeated.

The new clerk who is made to feel that committing an error is not fatal, but that making the same mistake twice is a capital offense, will develop a spirit of determination to do things right, and will soon display ability that will mean less need for supervision.

One mighty good way to improve the work of new clerks is by enlisting the aid of traveling salesmen representing both the jobbers and the manufacturers.

The travelers are often just as good retail merchants as those who have stores, because they are constantly calling on the dealers, and

they know good methods when they see them.

Furthermore, they are nearly always more than willing to co-operate with their customers in every possible way, and if they are asked to help in coaching a new hand, they will be glad to do so.

Many of these old-timers have seen service behind a counter themselves, and their suggestions are based on practical experience, and consequently are worth more than a lot of fine-spun theories.

Sometimes a traveling man will jump in and do a little sales work himself, if there happens to be a lot doing on a busy day. An ounce of demonstration is worth a pound of argument, and this is especially true of sales work.

After the new clerk has seen how his friend Bill, the traveling man, handles a difficult customer, and how quickly he gets under the hide of the grouchy individual whose bark is usually worse than his bite, he perks up considerably.

Use the traveling man in the clerk's training school, but don't forget that, no matter how informal, there should be a training school.

COLUMBIA AUDITORS MEET

Second Convention of Auditing Department of Columbia Co. at Hotel McAlpin a Great Success—Important Matters Were Considered

The second annual convention of the auditing department of the Columbia Graphophone Co. was held at the Hotel McAlpin, New York, on December 28 and 29. The two-day session was devoted exclusively to a discussion of problems, methods and systems of branch auditing, accounting, stock keeping and inventorying.

Henry C. Cox, comptroller of the company, brought to the attention of the conference a new manual of instructions for the guidance of the company's bookkeepers, which will shortly be ready for distribution to the branches, and explained such of its provisions as are new. The discussion of these new features and of branch accounting generally was highly interesting and beneficial to everyone in attendance.

At the conclusion of the dinner at the hotel on December 28 the entire party were the guests of the company at the Century Theatre.

The convention adjourned late in the afternoon of the 29th, every one expressing appreciation of the benefit derived from the free discussion of so many topics of special interest.

Those present and assisting were: M. Dorian, chief auditor, and E. O. Rockwood, T. Allan Laurie, Homer Reid, H. L. Moorey, F. S. Binger, W. G. Wustefeld, W. E. C. Heym, F. M. Snell, S. S. Gilroy, R. A. Grant, C. Klebart and Harry P. Victor. Hayward Cleveland, one of the veterans, was not able to be present, owing to his detention on the Pacific Coast, but he sent a helpful telegram which was read to his associates, and his place at the conference table as well as at the banquet was marked by a vacant chair.

A most gratifying and highly appreciated incident of the conference was the reading of a letter from H. L. Willson, general manager of the company, congratulating the auditing department on its fine work during the year and wishing each member of the staff continued success and a Happy New Year.

TAKES CHARGE OF DEPARTMENT

H. V. Boswell, formerly with the Rudolph Wurlitzer Co., of Louisville, Ky., has taken charge of the Kaufman-Straus Co.'s talking machine department in that city. He succeeds Robert Duffy, who is now with the Columbia Graphophone Co., of Indianapolis.

INDIANAPOLIS REPORTS A PROSPEROUS HOLIDAY SEASON

Large Percentage Did Cash Business—Dealers and Jobbers Report Trade Increases as Compared With Last Year—Optimistic Regarding New Year—Interesting News Budget of the Month

INDIANAPOLIS, IND., January 5.—The holiday business came up to the expectations of most of the local talking machine dealers and apparently is keeping up. The retailers are still busy selling records and machines and the wholesale men report that orders from dealers have come in almost as steadily as before Christmas.

A noticeable feature of the business was the large percentage of cash business and the size of the down payments. Nearly all the dealers comment on this.

Ben Brown, manager of the Columbia store, said that the total increase in business over December of last year would run nearly 50 per cent. Increases in the business of dealers in the smaller towns in his territory were especially noticed by Mr. Brown. Mr. Brown is making arrangements to go to New York to attend the conference of the Columbia managers.

At the Stewart Talking Machine Co., distributors of the Victor line, business was reported as far ahead of last year. Emerson Knight, advertising manager, said that he believed the Victor Co.'s advertising on the ground that music was more essential during war than in peace had proved effective in stimulating the business.

Jewell Cartmill, secretary of the Kipp Phonograph Co., said that business was not only bigger than last year before Christmas, but that it was keeping up and that dealers throughout their territory continued to send in orders after Christmas. The demand for a few styles caused a shortage, but the company was able to handle its Christmas orders nicely.

R. S. Goldsbury, of the Pathé department of the Mooney-Mueller-Ward Co., said the demand for records had almost depleted the stock. The new art models of the Pathé have proved popular and many orders are coming in for these, Mr. Goldsbury said. The entire supply of electric Pathés was sold out.

O. C. Maurer, in charge of the talking machine department of the Kiefer-Stewart Co., said there appeared to be a strong demand for the oak finish cabinets in the Sonora machines. Business in the Stewart phonograph, which the company also distributes, was remarkably good, Mr. Maurer said. Dealers also made heavy demands for the Emerson records. Mr. Maurer said the outlook for business in the coming year was exceptionally good.

A. H. Snyder, manager of the Edison Shop, said that there was an increase in total business over last year, and that from December 15 the daily sales record showed a marked increase over any previous ones for the same period with larger down payments and a trend toward the higher-priced machines.

Mr. Snyder used an especially attractive window display just before Christmas. He had the window fitted out like a living room and had a woman and a five-year-old girl knitting while two small children played on the floor

near an Edison machine. The Christmas spirit and the showing of the place of the talking machine in the home were well brought out. Newspaper advertising featured a similar idea.

George Standke, manager of the Brunswick Shop, is highly pleased with the first holiday business of his store, which ran above his expectations. Mr. Standke said he was pleasantly surprised at the size of the cash payments and added that he believed in selling goods and not terms. Prospects for a good year look bright to Mr. Standke.

"I did not run short of machines because I have been in the talking machine business long enough to know how to get around that," said Mr. Standke. "I did my buying early. I have never been able to understand why experienced talking machine men should ever complain of any shortage. They know what the demand for machines is during the holiday season and they ought to get their orders in early. Let them start ordering in the spring for their Christmas business. They should not expect a factory to be able to turn out their orders at the last minute."

Mr. Standke has a number of the new DeLuxe models of the Brunswick on the way and already he has sold the first sample model he got.

H. A. W. Smith, manager of the Pathé Shop, said that nearly one-third of the large Christmas business was cash, and that the record business was unusually good. The new Pathé art models which Mr. Smith has on display are attracting much favorable comment, and indications are that they will prove popular sellers. The Pathé Shop has been using animated picture advertising in local theatres, showing people dancing to a Pathé machine and this advertising is proving worthwhile, Mr. Smith said.

H. E. Whitman, manager of the talking machine department of the Pearson Piano Co., said that the holiday business showed a demand for the larger Edisons and Victrolas. The record business was so large the clerks were worked overtime in caring for the customers.

A. E. Pfeiffer, manager of the Starr Piano Co., said that the Starr machine enjoyed a good sale during the holidays. The fact that it plays all records made it popular with the public, Mr. Pfeiffer added.

Serge Hallman, manager of the Aeolian store, said that the Vocalion department enjoyed a good holiday trade, and that business was holding up nicely.

C. P. Herdman, manager of the Columbia department of the Baldwin Piano Co. store, said that his stock of machines had been so selected in advance that he was able to get through the holiday season without the usual trouble of running short of particular styles. A large part of the business was from out-of-town buyers, and this was nearly all cash.

SCHUBERT PHONOGRAPH

Dealers sold 10 times more SCHUBERT Phonographs this year than a year ago.

Because 10 times more people wanted the SCHUBERT after hearing all other machines.

Five Models, \$60 Up

MUSIC FOR U. S. SOLDIERS IN CUBA

How Uncle Sam's Boys Have Been Cared for in This Important Essential, Thanks to Courtesy of R. C. Ackerman and Otto Heineman

R. C. Ackerman, export manager of the Otto Heineman Phonograph Supply Co., New York, who returned recently from a trip through Central America and Cuba, brought with him the accompanying photograph which depicts a body of American soldiers in camp near Camaguey listening to a Vanophone machine playing Emerson records. The Otto Heineman Phonograph Supply Co. handles both of these products in the foreign field, and the company owes this picture to the courtesy of Major Halford, commanding officer of the First Battalion, Seventh Regiment, U. S. Marines.

Mr. Ackerman made Major Halford's acquaintance in Camaguey on the occasion of one of the concerts American Marines Near Camaguey, Cuba, Enjoy Talking Machine Music which Mr. Ackerman gave the guests of the hotel. Major Halford has had long experience in Latin countries, having been in the Philippines as well as Cuba. As members of Mr. Ackerman's family have fought in every U. S. war from 1776 down to the service of Lieut. Ackerman on Admiral Dewey's flagship in the Philippines, Major Halford was pleased to accept Mr. Ackerman's offer of a gift for the United States soldiers of a Vanophone and a collection of Emerson records.

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., has amplified this by making an equivalent present to each of the

posts of United States soldiers in Cuba. "Our boys" are down in that country at the present time co-operating with the Cuban forces to prevent any tampering with the sugar crops, and the importance of this vigilance will be readily realized by all who feel the scarcity of this all important commodity.

SOUTH AMERICA LIKES THE 'TALKER'

There is said to be an increasingly good market in South America for talking machines made

in this country, particularly for those made to sell at wholesale for from \$4.50 to \$25 each, says the New York Times. Several large commission houses in this city with connections in the Southern markets report having done an extremely good business this fall in these lines. It is pointed out by the head of one of these houses that South Americans are a music-loving people, and that the popular-priced talking machine of good reproduction and tone qualities is a great favorite with them. Also it is said that this country is getting a large part of the business in these lines which formerly went to Europe, which it will hold after the war is over.

UTILIZING VACANT WINDOW SPACE

Placing Record Posters in Vacant Store Windows Opens a New Avenue of Publicity for the Progressive Talking Machine Retailer

The United States Government in the exploitation of the various Liberty Bond issues has seen fit to put posters in the windows of every available vacant store. This is an idea which if not immediately opportune for the talking machine dealer may be of value at a later date. Record posters could undoubtedly be placed in the windows of many vacant stores at a very slight expense, and if it is advisable to spend thousands of dollars in order to have one window front on a prominent street, it is probably good business to have as many window fronts speak for your business as is possible, especially when the cost of the additional ground street windows is very small.

DISPLAY SERVICE CO. MOVES

The Display Service Co., formerly located at 16 West Nineteenth street, has moved to 114 West Seventeenth street, New York. This company specializes on original and artistic window displays and has lately been catering to the wants of the talking trade. It is now sending out catalogs describing its products.

INCREASING DELIVERY WAGON VALUE

Posters Advertising Special Records Can Readily Be Attached to Sides of Vehicles

The idea has recently been advanced of advertising records by the use of poster cards prominently displayed on the sides of the dealer's delivery wagons or delivery cars. A good many of the posters which feature individual records or general types of records such as the Hawaiian are of a standard size. This makes it easy to attach a frame moulding on the side of the car with a slit in the top to permit removing old posters and inserting new ones. A car or wagon moving down the street invariably attracts the attention of pedestrians, and it seems quite likely that the brilliant record posters will implant the idea in the minds of a good many to drop in to buy this or that particular record. The children, or the people in the street, are also likely to be attracted and their comment is also apt to produce sales.

PATENTS CLEVER WINDING DEVICE

Emile Kaliski Invents System for Winding Machine by Raising and Lowering Cover

Emile Kaliski, president of the Kaliski Music Co., Ltd., Monroe, La., has just secured a patent on a clever winding device for talking machines. In Mr. Kaliski's invention the raising and lowering of the lid of the machine serve to operate the ratchet wheel connected with the motor and thereby winds up the spring without further attention. The advantage claimed for the new winding device is that it obviates the necessity of marring the side of the talking machine case to provide an opening for the usual winding key.

The big things of life are the unexpected ones. The little things, the courtesies, the right hand of fellowship, the smile, all pave the way to the Big Opportunity. Be courteous to every man, give him your best service, no matter what his clothes, no matter where his home.

MAKING THE WINDOW PAY THE RENT

How the Sonora Phonograph Agency in Atlantic City Has Built Up a Successful Trade

ATLANTIC CITY, N. J., January 5.—When the Sonora Phonograph Agency was established at 711 Boardwalk, this city, about three years ago, it was predicted that it would never succeed, because people on that thoroughfare were there for pleasure rather than business, moreover, others had tried but had failed. Good-natured ones deemed it might be possible to make both ends meet were several different makes han-

Window of Sonora Phonograph Agency

dled, but with one instrument—most assuredly not!

Nevertheless, A. E. Jordan, of the Sonora Phonograph Agency, has proven how unwise it is to prophesy, for he has made good in his venture, thanks to his original methods of attracting the attention of the millions who pass his store in a year. The keynote of his success may be discovered in his clever window displays, which never fail to attract, and the line he handles. He believes that a good window should pay the rent, and this means much, for rents are high on the Boardwalk.

With this end in view the Sonora Phonograph Agency has made a practice of changing its

windows constantly. This has proven a splendid trade attracter, and emphasizes also the value of the window-dressing department, published in *The World* each month, to talking machine dealers throughout the country. The picture herewith is rather a poor representation of one of the many methods used in window display by Mr. Jordan. He has made it a point to arrange a proper window for the special seasons of the year as well as for special days. By this means he has increased Sonora sales beyond expectations, and this despite financial conditions and the high cost of living, due to war times.

TALKER HELPS THE ORDER CLERK

A talking machine of the dictating type has been put to new and excellent use by a prominent Eastern concern. It had been the practice for the telephone order clerk to write out the order in longhand as it was received over the wire and then repeat it to the customer for verification. Now a talking machine has been installed and the order clerk repeats the order over the telephone and into the transmitter of the dictating machine at the same time. When a cylinder is full it is taken to a typist to be transcribed. The saving of time is considerable, and it is declared that mistakes have also been cut to a minimum.

FEATURE RECORD SELLING CABINET

Emerson dealers throughout the country are utilizing to excellent advantage a record selling cabinet which is well calculated to produce and stimulate sales. This cabinet, which is designated as "Emerson Record Selling Cabinet No. 4," is of all steel construction and holds 100 records. It has ten separate compartments or pockets, each holding about ten records in envelopes, ten titles visible. All parts and joints of the cabinet are electrically welded into one solid fixture, and it presents a very attractive appearance.

DAYTON MOTORS

Stand for Excellence of Motor Construction.

They

1. Run Silently.
2. Run Evenly.
3. Run without Vibration.
4. Stand up and give long service.
5. Please users and build business.

Your success as a phonograph builder depends upon the success your instruments enjoy in the home. That success will be short lived if the instruments are built of other than the best parts obtainable. Therefore, the best motor must be used—the best tone arm, the best sound box.

In the Dayton Motor we have that best motor. Because it is simple of construction. Because it is noiseless and will not mingle a single discordant sound with the strains of artist or opera record. Because it runs evenly and without vibration.

Those are the reasons why the Dayton Motor excels. Those are the reasons why an avalanche of business from builders of phonographs who know a super-grade motor has forced us to reincorporate our Company on a larger scale in order to handle the business.

You, Mr. Builder, are striving for success in phonograph building. Be sure you build upon a foundation of excellence and permanence rather than upon one of sand. Use Dayton Motors, Dayton Tone Arms, and Dayton Sound Boxes.

Please the user by placing in your instruments parts that will satisfy—To do so is to build a customer business that will redound to your credit in a bigger and a better business.

Dayton Tone Arms and Dayton Sound Boxes—like Dayton Motors—come in several sizes. All are built scientifically and at prices that will interest you.

Write today for complete information. Investigation is always worth while and we invite it.

Building Up Record Sales By Bringing the Hidden Records to the Attention of Buyers

To say that there is a serious shortage of records most in demand is to reiterate a fact that has been most painfully impressed upon the average jobber and retailer during the past few weeks who has seen hundreds of dollars in potential sales lost because certain types of records could not be delivered rapidly enough. At the same time the jobber or retailer saw on his shelves hundreds of records that under ordinary circumstances might be considered fair sellers, but in no sense "hits," and insofar as the present was concerned simply represented tied-up capital.

With holiday business past, it would seem that this phase of the situation should receive more than casual consideration. Any man who knows anything at all about records will realize that the really worth-while selections in the record catalog are not in any sense confined to the half-dozen or so numbers that are featured strongly each month with special placards or by other means. He knows as a matter of fact that there are real gems on his shelves that require only proper exploitation to insure their sale. Knowing these facts it is up to him to get busy.

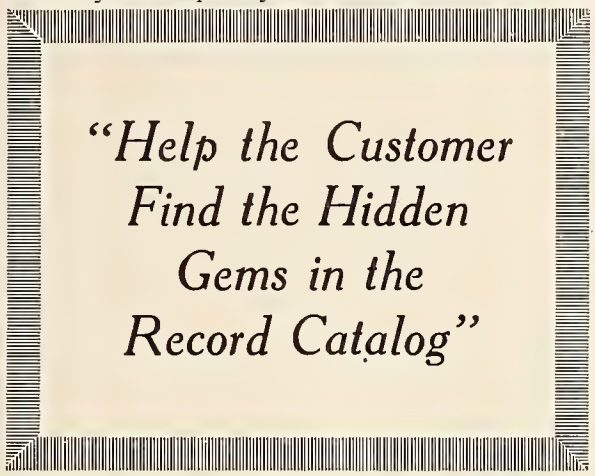

Educational work in the talking machine store is too often accepted as meaning the work of interesting school authorities and school children in records included in special educational lists. In short, educational work is taken to mean school work, when as a matter of fact the term should be applied with equal strength to the education of the grown-up in what the record lists as a whole have to offer.

The average owner of a talking machine, unless he is unusually enthusiastic, does not take the trouble to delve deeply into the mysteries of the record catalog in an effort to discover hidden numbers that may appeal to him. For the most part the talking machine owner follows the current supplements with more or less regularity and finds therein a sufficient number of records to meet his requirements without considering the records that have gone before.

In this particular he requires educating just as much as the child in order that he may realize the good things that are hidden away among the thousands of records listed in the ordi-

nary catalog, and thereby keep the retailer's stock moving by purchasing such records occasionally. He is not going to do the delving himself. He is not going to select a dozen records by their names only and spend an hour having them tested only to find that none meets with his particular requirements. The dealer will have to do this work for him.

It is a known fact in good salesmanship that the customer can be handled much more satisfactorily and quickly if he is limited in his

selections. In buying a cravat, for instance, a man will pick out one from half a dozen shown him and be satisfied much more easily than if he tries to make a selection from a rack containing a hundred or more cravats of varied designs. The same rule applies to record selling and the answer is this:

In addition to featuring the new records monthly, the dealer should also make it a point to play for each customer from the catalog numbers two or three records of various types that he knows to be good. In a surprising number of cases the customer will take at least one of these records, of which he previously knew nothing and probably cared less, because it has been hidden from him in a mass of other records.

It must be remembered that the companies do not record selections on the spur of the moment. There is always some point, either in the character of the music itself or in connection with the recording artists, that is calculated to

make that record of special interest. The retailer, if he is alive, will recognize and emphasize this point, and give the customer some idea of why that particular record is worthy of attention.

These hidden records may also be featured profitably with the newer releases in window displays. One record thus shown alone with the proper sign attached to it is bound to attract attention, and likewise result in some sales if the selection is a good one. Displayed alone it cannot but help stand out prominently, and this system of display will be found more effective than to group a dozen or more catalog records in one display on a chance that one or two may be selected. In other words, limit the range of choice, and the customer makes a selection with that much greater readiness.

The featuring of catalog records in special ways is not in any sense a theory. Dealers in various sections have been doing just that thing for years and, be it said, doing it most successfully, with the result that their entire stock of records has kept turning over in a way that has made it an asset instead of a liability.

It is a very fine thing to announce and advertise that a dealer has on hand every record in a certain catalog, but it does not pay to have every record simply as a talking point. Every record in the catalog is intended to sell, and with very few exceptions will sell if given the proper attention.

This fact is proven by the special holiday lists on which appear records that have been issued years before. Ordinarily they could lie on the shelf and disintegrate into dust before being asked for by a customer, but by properly exploiting certain selections as being most appropriate for the Yuletide, they attract attention that means sales.

Giving talking machine owners the records they come in and demand is not salesmanship. It is simply order taking. To take a record out of stock and convince them that it is the record they want, means selling goods, and that is what the average talking machine dealer will have to do during 1918 if he wants to keep on doing business and make a profit while waiting for the delayed delivery of the self-selling hits.

OPEN NEW RECORDING LABORATORY

Emerson Phonograph Co. Has Special Quarters in the Columbia Trust Co. Building, 362 Fifth Avenue, New York, for Recording Purposes

The Emerson Phonograph Co., New York, manufacturer of Emerson records, has announced the opening of a new recording laboratory, which is up-to-date in every detail and acoustically perfect. This laboratory is located on the fourth floor of the Columbia Trust Co.'s Building at 362 Fifth avenue, on the corner of Thirty-fourth street, and easily accessible.

The floor has been equipped throughout with the most modern and approved types of recording mechanism, and Arthur Bergh, musical director of the Emerson Phonograph Co., personally supervised the installation of the machinery and the lay-out of the different rooms and offices. There are two large-sized recording rooms, with two orchestras, and nothing has been spared to facilitate the work of the artists and the recording experts.

For some time past the Emerson Phonograph Co. has been looking for a new recording laboratory, for it had outgrown its first laboratory a few months after placing on the market its seven-inch universal cut record, and with the advent of its new nine-inch record new recording quarters were absolutely imperative. The present laboratory will give the company an opportunity to adequately handle both its seven-inch and nine-inch recordings.

Phon d'Amour
THE TONE MASTERPIECE

To truly appreciate the Phon d'Amour it must be seen, heard and compared. One must see and have explained the Fritsch inventions—the marvelous wooden diaphragm, the ingenious reproducer and sound amplifier.

One must hear a favorite record played, first on another instrument, and then on the Phon d'Amour.

Then will come the realization that here indeed is a wonder phonograph—a marvelous, artistic instrument that plays any record of whatever style or make, that glorifies the best made records and filters the imperfections from less worthy ones, a phonograph that establishes a new and higher standard of artistry and craftsmanship. See it, hear it play, compare it.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., January 3.—The aftermath of Christmas is not exactly pleasant to consider. It is not due to trade exactly that there is a depressing feeling abroad, but to the weather, which has been so excessively cold as to hamper trade of pretty nearly every description. Boston along with other parts of New England and the East has been in the grip of a frigid wave, which has continued for a number of days. At this writing a snowstorm is setting in which may add to the difficulties and during such weather as is now being experienced here people will not go out unless for the most urgent reasons. At the cantonments—one here may speak specifically for Camp Devens at Ayer—the weather has been colder than here, but the soldiers have been able to keep comfortable, and it has been a godsend that they have had so many Victors, Columbias, Edisons and the like to keep them entertained. During the past several weeks a number of machines have been sent to the camp largely through the thoughtfulness of friends. Added to the general cold situation there is the fuel problem, which is getting more acute every day, and a few of the talking machine warerooms have barely escaped closing because of empty bins. But in such cases a load of coal arrived at the eleventh hour and saved the situation.

Christmas Business Late But Strong

Now to go back to the Christmas business. It did not begin as early in December as it should, but almost in every case the really busy period started on the 15th. From then on all the warerooms were filled, and on the Saturday and Monday before the holiday there were crowds of people besieging the retail establishments. Take it all in all, the business done in Boston was surprisingly good considering the general conditions. Several places were heard from where a bigger business could have been done if the requisite amount of goods could have been secured from the factory. One interesting feature of the Victor business was the heavy demand for the records of the Boston Symphony Orchestra, which were first announced in the December catalog. Toward the end of the month there was scarcely a dealer who had a single one in stock.

Busy Times at Steinert's

The business of M. Steinert & Sons Co. for December was a surprisingly good one. Both the company's warerooms in Boylston street

and in Arch street, which latter place is so convenient to the downtown business section, had a busy time of it from the first part of the month. Russell Steinert, manager of the Victor business of the company, told your correspondent that there were times when the eleven booths on the second floor and all of those on the ground floor were occupied by patrons, and so great was the crowd that records had to be tried out even in the foyer and the corridors.

Planning New Columbia Stores

At the warerooms of the Grafonola Co., of New England, Manager Arthur C. Erisman reports a good business also. The total sales in machines and records were of an exceedingly gratifying character. Since the return of Norman Mason as sales manager for this house there has been a betterment of conditions, for he, through his previous association with Manager Erisman, knows exactly what is demanded by the store's customers. For a week or so before the holidays Manager Erisman established a store in Federal street close to the South Station and quite a number of machines were sold. Plans are under way to locate several stores throughout the city.

Many New Sonora Dealers

Manager Richard Nelson, of the Sonora, has in the past four weeks placed this equipment with thirteen good dealers in Boston and the suburbs, and he plans in the very near future to increase this number to twenty-four. Six agencies have been placed in Providence, all of them high-grade places. Among the latest dealers to take on the Sonora are the United Talking Machine Co., of Brockton, and the C. F. Wing Co., of New Bedford. Manager Nelson says the holiday business was way ahead of what had been looked for, and this was especially true of the Jordan Marsh Co., the largest department store dealers in Boston, which had taken on the Sonora only a few weeks before.

Ditson Business Only Limited by Supplies

The Victor business at the Oliver Ditson Co. was excellent during the holidays. According to Manager Henry A. Winkelman it would have been better if the factory could have sent the goods as fast as they were needed. While speaking enthusiastically of the holiday business Mr. Winkelman qualifies the statement by saying that had the general conditions been as in former years the demand for goods would have been phenomenal. Two of Manager Winkel-

man's good men who are in the nation's service, Joseph Carlson and John Carnivan, have dropped in to pay their respects, which helped to brighten up things up a bit. Carlson is in the Signal Corps at Camp Devens, and he has more than one object in calling around as often as he can. Carnivan, who had a furlough at the Christmas season, is with the rifle range at Annapolis, Md.

Attending Meeting of Columbia Managers

Manager Fred E. Mann, of the Columbia Co., is in New York to remain for the rest of the week. He went over especially for an important meeting. M. C. Perkins has arrived in town from Springfield, to become assistant to Manager Mann. Mr. Perkins was the manager of the Springfield branch which was discontinued, as mentioned in this department last month. The business at the Columbia headquarters was extremely heavy, and it is a notable fact that the heaviest call was for the high-priced machines.

New Vocalion Period Styles

Manager R. S. Hibshman, of the Vocalion Co., is telling his patrons of the new period styles which the company has lately put out. There are sixteen of them and they are magnificent examples of the cabinet-maker's art. Several of these are already in Manager Hibshman's Boylston street warerooms.

Increase in Emerson Record Prices

Local Manager Oscar W. Ray, of the Emerson Phonograph Co., is making known to the dealers in his territory news of the advance in the price of Emerson records beginning January 15, the new price to be 35 cents. Those dealers with whom he has come in such personal touch so as to discuss the situation are more than satisfied with the new arrangement, as it gives them a wider margin of profit, and will give them more of an opportunity to develop their territories. Under this new plan dealers will get their first shipment of goods direct from the factory, and subsequent shipments will be delivered from the Boston headquarters. Mr. Ray says he plans to give dealers the quickest kind of service, and he is looking for a most prosperous year ahead. The dealers are now getting the new foreign catalog of records, and those that have been tried out are adjudged as good records as have appeared on the market in a long time, especially with regard to the band numbers.

Eastern Victor Service

is based on the principle that
a Victor dealer wants what
he wants when he wants it.

EASTERN TALKING MACHINE CO.

177 TREMONT STREET

BOSTON, MASS.

Old Department Store Closes Doors

The W. & A. Bacon Co., one of the oldest established department stores in the city, has finally closed its doors. It met with financial difficulties back in August, and the business was placed in the hands of receivers, but the general business conditions have been such that the company has not been able to weather the storm, much to the regret of its many friends. The Victor, Columbia, as well as the Emerson Cos., were represented in the talking machine department, which, under the management of George J. Krumscheid, has been doing a very good business, this being one of the best paying departments in the whole store.

Greetings From W. S. Parks

W. S. Parks, the new manager of the Baltimore Columbia warerooms, did not forget his Boston friends during the holidays, as many of them received holiday greetings, showing that he had not forgotten the happy days spent in Boston as assistant to Manager Fred E. Mann. Mr. Parks sends word that he is now quite his old self again.

Interesting Personal Items

Manager Richard Nelson, of the Sonora Co., and his family spent Christmas with his father's family in Albany. The senior Mr. Nelson is the Episcopal Bishop of the Albany diocese.

Interesting letters continue to be received from John Alsen, who is with the 101st Regiment somewhere in France. Several of these letters come from Alsen's old associates in George Lincoln Parker's Victor and Edison department, of which he was manager before leaving to join the army.

One of the latest of the salesmen to join Manager Arthur Erisman's staff at the ware-rooms of the Grafonola Co., of New England, is Louis Besserer, who comes into the business with a wide knowledge of music, as he is an accomplished violinist. For some time he was leading violinist in the orchestra of the Boston Opera House. He is proving an able salesman and a genial, affable manner serves him well in dealing with customers.

Brunswick Expansion in Boston Territory

The Brunswick phonograph is steadily growing in popularity throughout the New England territory, thanks to the indefatigable labors of R. H. Booth, manager of the local office. The instrument is not only well represented in this city just now, but agencies are being closed in every city of importance throughout the East. The tone quality of the Brunswick, thanks to individual constructive features, has made a strong appeal to purchasers, and the general character of the case design is always artistic, and the

finish excellent. Mr. Booth has a capable road staff who are doing good work. Mr. Walter is now visiting a number of points in the New England territory and is making some very excellent connections for the Brunswick. The general trade outlook as far as this house is concerned is most gratifying, and 1918 promises to be a record-breaker.

H. L. Royer Adds the Sonora

Herbert L. Royer found very little time to himself during the holidays, and with his Victor outfits he showed his patrons the Sonora, which he now carries in stock. Royer's place around

the corner from Summer street was found by many persons to be a very convenient place.

Manager Longfellow, of the Edison and Victor department of Chickering & Sons, lost the services of L. C. Christensen, his repair man, a fortnight ago, he having gone into the naval reserve, and is stationed at Hingham.

Ricardo Constantino, son of the famous singer, who is attached to the staff at the Grafonola Co., of New England, is going over Saturday to New York and Bridgeport, where he plans to study the late models of the Columbia machines,

(Continued on page 22)

BAGSHAW STEEL NEEDLES

THE honest quality incorporated in all Bagshaw steel needles is responsible for their dominance.

W. H. BAGSHAW CO., Inc.
LOWELL, MASS.

TRADE IN BOSTON AND NEW ENGLAND

(Continued from page 21)

both at the warerooms and the factory. He also will visit his brother, Antonio Constantino, who is in charge of the record department of the Columbia's Fifth avenue store.

William Ellsler returned a few days ago from New York, where he went to spend the holiday with his aged mother. Ellsler is one of the valued employes of the Grafonola Co. of New England.

Taking an Inventory

Manager Silliman, of the Pardee, Ellenberger Co., has been extremely busy since the holidays taking an inventory of the stock of the Edison equipment, and in this he has been assisted by his staff of traveling men, who have not as yet started off into their respective territories. Manager Silliman reports a very good December business throughout New England, and the indications look good, he says, for a brisk business from now on. Mr. Pardee, head of the house, who was in town a few days ago, is well pleased at the business done during the past year.

Activity With Talking Machine Co.

The Eastern Talking Machine Co. found its convenient location in Tremont street of the greatest advantage during the Christmas season, and throughout most of the month of December the warerooms, with their comfortable booths were filled with buyers, who were bent on purchasing the more expensive outfits. The Eastern had a very heavy call for the records of the Boston Symphony Orchestra, and its large supply, laid in very early, was soon exhausted.

Handsomely Decorated Warerooms

Among the handsomely decorated Victor and Edison warerooms during the Christmas season those of the C. C. Harvey Co. in Boylston street were among the more artistic, largely because an artist and professional decorator takes care of the scheme each season. Manager White and his staff of clerks had a busy time of it attending to customers for the past several weeks.

Kept Busy on Deliveries

Warren Batchelder, manager of the Victor department of the A. M. Hume Co., had such a busy season that for several nights toward Christmas teams were delivering Victor outfits way into the early morning.

R. A. Young, who took charge of the Victrola department of the H. Batterman Co., the large department store at Broadway and Flushing avenue, Brooklyn, N. Y., last October, reports having closed a very satisfactory holiday business. Mr. Young was formerly with the Lion store in Toledo, O.

FEBRUARY WINDOW DISPLAY

Attractive Window Prepared by New Dealers' Service Department of Columbia Co. Should Stimulate the Trade of Dealers

The new dealer service department of the Columbia Graphophone Co., New York, which is under the management of H. L. Tuers, has prepared a February window display that is even more effective than the one which was introduced to Columbia dealers last month. This latter display was accorded a welcome reception from Columbia representatives throughout the country, who state that it proved a powerful stimulant to record and machine sales.

The February display, which is shown here-

Columbia Window Display for February

with, consists of a Handy Orchestra cut-out, three half-sheet cards featuring new Columbia records, two quarter-sheet cards announcing new records by Oscar Seagle and Bert Williams, six small cut-outs and a series of price tickets. This display well reflects the determination of the new department to furnish Columbia dealers with a series of highly artistic window displays which will act as an impetus to sales.

The February window display is lithographed in eight colors, and the display is furnished to the dealers at actual manufacturing cost, which is exceedingly small, compared with the value of the material supplied. This low cost is made possible by the fact that the Columbia dealer service department is in a position to order very large quantities, which lowers the cost per unit.

Read the Trade Mark carefully, hear the machine, and you'll agree that it is truly

A. M. STEWART PLAYS SANTA CLAUS

President of Stewart Talking Machine Co., Indianapolis, Makes Substantial Christmas Gift to Every Employee of the Company

INDIANAPOLIS, IND., January 5.—Santa Claus, through the medium of Alexander M. Stewart, president of the Stewart Talking Machine Co.,

well-known Victor distributors of this city, was very good to the employes of that company. Mr. Stewart personally visited each of the many employes of the company on Christmas Eve, and in addition to extending the usual greetings of the season presented each member of the staff with a substantial gift as a mark of appreciation for loyal services rendered during the year. 1917,

by the way, has proved the record year in the history of the Stewart Co., and this means much when the business record of this enterprising Indianapolis house is considered.

SETS HIGH MARK IN RECORD SALES

PORTLAND, ORE., January 3.—Miss A. Bennett, of Eilers Music House, this city, has the reputation of being the best record seller in Portland. She sold over \$2,000 worth of records during December. Miss Bennett says there is a constant demand for the "Missouri Waltz," and they can not get enough records of "There's a Long, Long Trail," for which there is a big demand. Many machines are being sold by this house.

The Eclipse Outlook

ECLIPSE

The 1918 outlook is extremely bright for the Victor dealer who goes about his business, spurred by the knowledge that the war chiefs are placing increasingly heavy emphasis on the war value of music in general and of the Victrola in particular. During 1918 patriotic inspiration will add increased ginger to "Eclipse Victor Service". 'Nuf said!

EDISON DEALERS IN WISCONSIN TERRITORY CONVENE

Very Successful Gathering of Edison Dealers Held in Milwaukee—Tone Test Given at the Pabst Theatre a Feature of the Convention—Many Interesting Papers Read—Officials Present

MILWAUKEE, Wis., January 5.—One of the recent successful conventions of Edison dealers was that held at the Hotel Wisconsin, this city, recently and which was attended by approximately 150 dealers in the Wisconsin zone, many of them accompanied by their wives. F. K. Babson and C. E. Goodwin, of the Phonograph Co., of Chicago; T. J. Leonard, general sales manager of the musical phonograph division of Thomas A. Edison, Inc.; L. A. Zollner, supervisor for Thomas A. Edison, Inc., in the Milwaukee zone; and A. E. Schiller, mechanical instructor for Thomas A. Edison, Inc., in the Milwaukee zone, also were present.

One of the features of the convention was a tone test at the Pabst Theatre, given by Julia Heinrich, formerly of the Metropolitan Opera Co.; the lecturer representing the Edison laboratories was Miss Huldah Voedisch. This tone test was given to a capacity house and aroused much enthusiasm.

Another feature of the convention was the banquet at the Hotel Wisconsin, which was attended by most of the dealers and their wives who attended the convention.

As is the rule at all the dealers' conventions the addresses of company officials were supplemented by business papers read by the dealers themselves. One of the most interesting of these was that of W. E. Bosshard, of Tomah, Wis., on the subject of "How I Make Tone Tests Pay." Mr. Bosshard described in detail how he had gone about arousing interest in tone tests and sent out invitations to 600 people and had succeeded in packing the local armory to the doors, although its seating capacity was 600. He told of the work done by the artists and how he had followed up the tone tests by keeping in touch with those who had attended. One of the immediate results of the test was two cash sales of C-250 instruments. Mr. Bosshard concluded by saying that he had been repaid many times for the expense connected with the tone tests by the interest it aroused locally in the New Edison and the actual business booked as a result.

Another particularly interesting paper was that on "Window Displays," read by Geo. Eicholz, of Milwaukee, who said in part:

"When you first look for a location for your store you take into consideration three things—floor space for selling your goods; your window space; and how many people pass the location of your selection. The value of your location is judged by the latter two things and from your window and the passer-by you must get your money back. As the speaker before me said, you must create a desire before you can sell, so your window display must be staged in such a manner as to create a desire to own in the passer-by.

"If you advertise in a newspaper (which is considered the best form of advertising) and you get 15 per cent. of its readers to see your ad, you certainly get returns; but with a good window display you can stop 50 per cent. of the people passing; therefore, I say your window is the best form of advertising, with the newspaper second.

"You may say, 'I have often tried to stage a good window but failed.' I say try until you get one or two good displays and they will suggest other good displays, and after once succeeding you will wonder why you ever failed in displaying your goods to the best possible advantage.

"You will ask, What do you consider a good window or what constitutes a good window? Your record catalog will give you many ideas as to a good display; almost each selection listed therein is a good title for a window display; for instance:

"Your Hawaiian records suggest a Hawaiian window and that interests people who have a machine in Hawaiian records, also it interests

people that love Hawaiian music in a machine. 'Old Folks at Home,' 'My Old Kentucky Home,' 'Dixie' and other Southern melodies suggest a display of Southern folk songs. Such a window sells Southern melody records as well as machines to people that like the old songs of the South. Patriotic music suggests a patriotic display.

"I find that the most attractive displays can always be made by a combination of machines

VICTOR CO. SUES FOR INFRINGEMENT

Brings Action Against Brodegaard Bros. Co., for Featuring Machine Named "Victoria"

OMAHA, NEB., January 4.—The Victor Talking Machine Co., of Camden, N. J., filed suit in Federal Court last week against Brodegaard Bros. Co., operating a jewelry store at Sixteenth and Douglas streets. The plaintiff alleges that the defendant is infringing the plaintiff's trade mark and trade name and misleading the public.

The complaint states that Brodegaard Bros. Co. is selling the "Victoria"; that the name "Victoria" is placed on the machine in the same position as the name "Victor" on the plaintiff's well-known machine and that folders are printed in such a way as to mislead the public into believing that the "Victoria" talking machine is the "Victor."

Samples of the folders advertising the machine are appended to the complaint. It is pointed out that one of these folders shows a picture of a man standing beside the "Victoria" machine and holding in his hands a "Victor" record, all of which, it is alleged, is part of an intention to mislead and deceive the public. A photograph of the window at Sixteenth and Douglas streets containing the display of the machines is also appended, with a sign reading "Victoria talking machine, \$45." The advertising folders are printed in foreign languages.

The petition is signed by Charles K. Haddon, vice-president of the Victor Talking Machine Co. It states also that the trade name, good will, etc., of the Victor Co. "are worth far more than \$1,000,000."

Damages are asked from the defendant and an injunction preventing the defendant from continuing to offer the "Victoria" machine for sale under that name.

and records. Opera music suggests an operatic window. There are many scenes from operas that can easily be incorporated in your window displays. Instrumental solo records, dance music, music for special occasions such as Easter, the Fourth of July, Christmas, Washington's Birthday, all suggest good ideas for window trimming.

"And now I am going to tell you what we do if we want to make an especially good display. We call all the boys together in the store and tell them to suggest something for a good display. Each makes a suggestion and then we work it out together, so that our best windows have never been a one man's idea."

CONCENTRATE ON WINDOW DISPLAYS

How the Haverty Furniture Co. Brings the Columbia Line to Public Attention

HOUSTON, TEX., January 7.—The Haverty Furniture Co., of this city, has always made it a point to pay particular attention to its window displays, recognizing that the proper dressing of a window very often yields handsome dividends in actual sales, in addition to furnishing

Artistic Display of Haverty Co.

invaluable publicity for the house and the products that are featured.

The Haverty Furniture Co. handles the line of Columbia Grafonolas and Columbia records manufactured by the Columbia Graphophone Co., New York, and these products have formed the basis for many effective displays. House furnishings and talking machines lend themselves admirably to combined display, and the accompanying illustration will give a fair idea of the attractiveness of some of the Haverty Furniture Co.'s windows. This is only one of several recent artistic efforts.

THE SALESMAN WITHOUT THE POLISH

How One Young Man Managed to Handle the High-Class Trade on Sheer Nerve—Was so Rough and Nervy That He Proved Most Entertaining to the Bright Lights of Society

In practically every treatise on salesmanship one reads that the salesman must of necessity cultivate a most refined bearing, that he must learn to place himself apparently in the social position of his prospect. If he is dealing with a plebeian he must act as the plebeian, but when he deals with a society queen he should have that in his manner which conveys that he is of an equal, if not a little superior, social plane.

As is the case with all rules, the foregoing has its exceptions, and one of the exceptions was brought to light recently in an Eastern city.

The young salesman in question has plenty of ambition and pep, and, as the manager expressed it, the gall of a brass monkey, but unquestionably lacks polish. He rarely lets a prospect get away. He can enjoy the experience of being thrown out almost bodily following a definite refusal of the prospect to buy the machine he offers and then call up in the morning and explain that he has reserved a special model, and then ask shipping directions. Putting it over in that manner is almost his daily habit.

The real gem of his work, however, cropped out recently when, being the only salesman left on the floor, the manager was reluctantly compelled to send him out in answer to an inquiry from a prominent society woman. The best the manager hoped for was to hold the prospect until a polished salesman could get on the job. The young man in question called on the lady,

spent the greater part of the evening entertaining her in his own crude way, and solemnly assured her that she was indeed fortunate in being able to command his time, inasmuch as his special work with the talking machine company was to take care of the higher class trade, leaving the ordinary salesman to handle the usual run of things. He actually convinced the woman that she needed a model costing several hundred dollars and closed the sale on that basis.

The manager reached the store the next morning prepared to inquire where the good salesman should start on the case, when he received a message from the society matron asking, with an ill-concealed laugh in her voice, for "the young man reserved for the high-class trade."

It developed later that several of the most polished salesmen in town had called on that particular prospect, but that the rough boy with an exhibition of nerve that would have abashed anyone more polished had simply galloped away with the prize. The lady explained that he was the funniest and most entertaining salesman she had dealt with for some time. She simply couldn't turn him down without an order.

WHY CASH TRADE IS ADVISABLE

George E. Brightson, President of the Sonora Phonograph Sales Corp., Inc., Speaks With Approval of Credit Men's Resolutions

George E. Brightson, president of Sonora Phonograph Sales Corp., Inc., recently spoke with the utmost approval of the resolutions adopted by the New York Credit Men's Association. The resolutions ran:

"Recognizing that the credit granted by the retail merchant to the consumer, known technically as the individual credit, is one of the most rigid forms of credit, and that it is neither wise nor economic to tie up large amounts of capital in such forms of credit, it is sincerely recommended both to the retail merchant and to the consumer that all forms of supplies be purchased and sold on terms of payment the first of the month following the date of purchase, or in no event beyond thirty days from the date of purchase."

It was a further belief of the conference that foodstuffs and the daily necessities of the home be purchased and sold on a cash basis alone.

"Carrying beyond a short period individual credits should neither be asked nor granted under the unusual conditions of to-day," said a second resolution, "and it is sincerely urged that this recommendation govern the credit granting of retail merchants, and its reasonableness be so presented to the consumer that no dispute may arise regarding its absolute necessity. Observance of this plan will keep at a minimum the total sum of individual credits and release capital that may be required for the national defense.

"This is precisely what I have been advocating for a long time," said Mr. Brightson, "and it is a pleasure to learn that the undesirability of unnecessary long credits is now becoming apparent to many. The easy-payment plan I have long regarded as a growing evil.

"'Nothing down and \$1 a week' is demoralizing to any business, and is not the right way to put an organization on a sound and substantial foundation."

AUSTRALIAN VISITOR IN NEW YORK

Charles Tait, managing director of Allan & Co. Pty., Ltd., Melbourne, Australia, was a recent visitor to the trade in New York. Mr. Tait has been in the United States for over eight weeks and does not contemplate returning home until he has thoroughly visited the American music trade centers. Allan & Co. handle in their chain of stores many well-known American pianos. They are also Victor talking machine jobbers and control a large business.

The K. & E. Phonograph Exchange, of Manhattan, has been incorporated with a capitalization of \$1,000 by Irving Kesner, Hyman Edelstein and Solomon Manheimer.

Delpheon
the
Incomparable

Just such an instrument as the aggressive dealer has been awaiting

"We are well pleased with Delpheon and think you have made a great improvement by the use of two reproducers and the improved horn. Delpheon sells on its merit . . . We are only sorry that we did not get in touch with you before, so that we could have spent some of our advertising money and energy on Delpheon instead of other makes in the past two years."

(Name and address on request.)

Delpheon is not an ordinary phonograph. Its reproduction cannot be distinguished from the original. It has more points of superiority than any other. One ordered on trial will prove beyond doubt all that is claimed for it.

100,000 FOR A NAME

EVERY good product desires a good name. We want the Talking Machine trade to supply us with a good name for our product, needles made right to play right.

To the person or persons who suggest what we deem to be the most satisfactory name for our needles we will offer as a reward 100,000 needles. None are barred from participation. We prefer the suggestion of some coined word that can be copyrighted.

To assist in selecting the proper name we wish to state that we will manufacture the best steel needles that can be put on the market.

Needles should be changed for each record played. Our process of manufacture will be such as to insure the reproduction of every delicate shading and tone. Continued use of our needles by your customers will mean contented patrons at all times.

We are desirous of hearing from distributors of needles who wish to establish a source of supply which can be depended upon at all times for quality, price and real service.

We hope to be able to announce the name chosen for our quality needles in the March issue of this periodical. In the event that more than one person suggest the same name, the first suggestion mailed, as indicated by the postmark on the envelope, will be given the credit for the suggestion. Anyone interested in the Talking Machine industry is invited to participate. All we ask is prompt action and to indicate at the same time the name of machine handled and firm with which you are connected.

TALKING MACHINES FOR THE CAMPS

Soldiers of Motor Supply Co. No. 317 Solicit Records From Indianapolisites—Leading Dealers Experiencing Profitable Soldiers' Trade

INDIANAPOLIS, IND., January 5.—The soldiers in the Motor Supply Co., No. 317, who are expecting to leave Fort Benjamin Harrison soon, have made a request of the people of Indianapolis asking for their used talking machine records. They have a small Victrola which they say helps them greatly in passing away the time and in driving away the blues and they are desirous of stocking up on records before they leave.

Women at the Red Cross Shop, in the L. S. Ayres & Co. store, are receiving the records for the soldiers. The soldiers made their plea for records through the local newspapers.

Although most of the soldiers who were stationed at Fort Harrison have left, local talking machine dealers are getting reports from Camp Shelby and Camp Taylor of the great enjoyment the Indiana soldiers are getting from the few talking machines they selected and now have in their camps.

H. A. W. Smith, manager of the Pathé Shop, made a special proposition on a Pathé to the members of the 139th Field Artillery, which is now at Camp Shelby, Miss. The soldiers took the Pathé and a large number of Pathé records to the camp with them. Hardly a day goes by but what some mother or friend of the soldiers of this company comes into the shop and tells Mr. Smith of the pleasures the boys are getting out of the Pathé.

Their barracks have proved popular with soldiers who are not quite so fortunate in owning a Pathé. Mr. Smith said that he had sold several \$25 Pathés to be shipped as Christmas presents to local boys in Camp Shelby.

The Starr Piano Co. is now displaying in its window a Starr machine in its special trunk to be used as an army or navy model. Mr. Pfeiffer says that already he has received many inquiries from soldiers and from friends of soldiers regarding this outfit, which sells complete at \$75.

Ben Brown, manager of the Columbia store, said that the talking machine in his opinion will play a big factor in the war, not only at the front but back at home.

A CLEVER ADVERTISING STUNT

Home Music Co., Lancaster, Pa., Reproduces Words of Songs in Local Advertising to Call Attention to the New Columbia Records

The Home Music Co., Lancaster, Pa., who handle the Columbia line of Grafonolas and records, have hit upon an original method for advertising the new Columbia records in the local newspapers. The company takes a generous space and then reproduces the words of the choruses of the various songs, with the number of the Columbia record on which the song appears shown plainly at the bottom, together with the name of the company. According to reports the original method of advertising is getting excellent results.

"One pound of learning requires ten pounds of common sense to apply it." There is a lot in that old Persian proverb.

BUYS VICTOR AGENCY IN SCRANTON

Scranton Talking Machine Co., Columbia Dealers, Now Have Victor Department

SCRANTON, PA., January 3.—The Scranton Talking Machine Co., 215 Lackawanna avenue, this city, has purchased the Victor agency and a substantial stock of Victrolas and records from the E. A. Fenstermacher Co., of 215 Wyoming avenue. The stock was removed to the Scranton Co.'s store, where a large Victor department has been opened in addition to the Columbia department operated successfully by the company for several years.

MAGNIFYING TELEGRAPH CLICKS

A diaphragm and horn similar to that used in connection with talking machines has been utilized to advantage by two Western inventors to amplify and make more audible the weak relay clicks of telegraph instruments. The weak clicks are transmitted to the diaphragm, whose vibrations act upon the air and shoot the corresponding sounds out through the horn in greatly increased volume. The new invention is believed to be especially valuable in connection with long telegraph lines.

NEW QUARTERS IN SAN FRANCISCO

The California Phonograph Co., San Francisco, Cal., has moved from 975 Market street to much larger quarters at 1009 Market street, that city, where two floors are occupied and an equipment of fifteen soundproof booths has been installed.

WESER PHONOGRAPHS

For 39 years the piano trade has recognized in Weser instruments the highest piano and player piano value. It always has been our delight to invite comparison of the Weser products with those of other makers. Many of our best dealers have been acquired by such comparisons.

Weser Phonographs are making rapid headway in the same manner. Compare them with the world's most expensive makes—in tone quality—in appearance—in reliability, and solidity of construction, and we are content to abide by your decision.

The **Weser Phonograph** will play any record. Made in satin finish mahogany. Other woods on special order. Electric motor will be furnished if desired. Write for catalog.

MILWAUKEE DEALERS REPORT BIG TRADE INCREASES

Business of Unusual Proportions Transacted During Holidays—Co-operative Publicity a Great Help—Optimism Prevails Regarding the General Trade Outlook for the New Year—Trade News

MILWAUKEE, WIS., January 5.—Fresh from a successful holiday selling season, the results of which probably never before were equaled in Milwaukee, talking machine and phonograph dealers of this city are leaving no stone unturned to make the early months of the New Year exceed previous corresponding periods in volume of sales. They have become imbued, and justly so, with the idea that conditions which ordinarily would be considered wholly unfavorable are by no means deterrents if the will is there to do. That was proven during the holiday season recently closed. There is not a single dealer in Milwaukee who did not show a very appreciable increase in sales, compared with a year ago, which had been the high-water mark up to that time.

Local dealers probably were more fortunate than those in some other large cities because they had behind them the full power and influence of a co-operative advertising campaign, conducted by the Milwaukee Association of Music Industries, at a cost of about \$3,000. The stirring appeal of the series of full-page advertisements could not be denied. The spirit of the war was combined with the spirit of music, and the result was that many homes that never before knew the appeal of the talking machine now are equipped with it.

Jobbers as well as retailers have but one report to make relative to Christmas business in 1917, and that may be summed up in the phrase, "Just fine." It is a fact that at the beginning of the holiday buying season the feeling in the trade was that if dealers could reach the record of sales of 1916 they would consider themselves fortunate. Now that increases of from 25 to 50 and in a few instances 75 per cent. were shown there is ample cause for elation. Only a shortage of machines, records, needles and other supplies kept business to the limits it did reach.

Members of the Badger Talking Machine Co., Victor jobbers, were weak from exhaustion when Christmas came. Never before did the house experience so great and urgent a rush of business. Up to the last minute on Christmas eve retailers were imploring the company to help them out.

In some instances relief was given by picking up machines of certain styles which did not sell as well as others in certain districts and turning them over to dealers in other districts. In this manner quite a few disappointments were overcome and stocks were rather nicely readjusted.

Miss Blanche Brewster, of the Victor department of the J. B. Bradford Piano Co., showed herself to be a true patriot and an exponent of the essentiality of music among soldiers in camps by raising a fund for the purchase of a Victrola for Company H, 340th U. S. Infantry, Camp Custer, Mich. All of the boys of Company H are from Milwaukee and letters from the camp indicate that Miss Brewster's gift was one of the most welcome surprises the boys had ever experienced.

The Yahr & Lange Co., wholesalers of the Sonora in Wisconsin and Upper Michigan, entertained its thirty-five traveling representatives and department heads at a banquet in the Calumet Club on December 27. The company has been distributing the Sonora for less than a year,

but made a most remarkable record, and the banquet was more of a Sonora love feast than anything else. Arthur Roelke, manager of the Sonora department, was one of the principal speakers and congratulated the travelers for their splendid efforts in behalf of the Sonora line, which, he said, is destined to make a new and greater record of expansion during 1918 in Wisconsin and upper Michigan, because of its great merits.

The Kroeger Bros. Co., which opened Pathephone departments in its three big department stores on December 1, is delighted with the early success of the innovation. The company acquired a fourth store on January 1 and a Pathephone department was installed immediately.

The Wisconsin Chair Co., Port Washington, Wis., a large manufacturer of fine office furniture, has entered the ranks of producers of talking machines. The machine is being marketed under the trade name of "Vista" and has a universal reproducer. The branch plant at Grafton, Wis., is making records and supplies.

A boxed Victor machine destined for the L. M. DeVaud Co., Marion, Wis., disappeared mysteriously from the depot platform a few minutes after it had been unloaded and has not been heard of since. The theft took place in broad daylight.

A. G. Kunde, distributor of the Columbia, reports that holiday business exceeded his highest expectations and that the reports he has received from his dealers bear a similar cheery tone. The number of Columbia retailers in Milwaukee county now has grown to twenty-five, but all seem to thrive on competition.

Edward R. Sweeney has joined the Badger Talking Machine Co., and is assisting in covering the Wisconsin territory.

The Wisconsin Cabinet & Panel Co., New London, Wis., one of the largest of the wood-working plants of the Thomas A. Edison group, henceforth will furnish all of the box shooks and shipping cases required by the various Edison cabinet factories throughout the country. There is a large and well equipped box factory in connection with the plant and this will be enlarged and become a more important division of the New London works. Several more nailing, sticker and printing machines will be installed at once and the force increased from twenty to at least fifty more.

ONE SMALL TOWN DEALER'S RECORD

PORTLAND, ORE., January 3.—Eastern Oregon is strong for the New Edison. In Baker, with a population of about 7,000, Carl Adler is the only licensed Edison dealer in the town, and he sold 112 machines to the people of Baker and the adjacent country for the Christmas trade. A big advertisement in the Baker Herald gives the names of the 112 "music lovers who have been made happy and contented by the possession of the New Edison phonograph purchased at Adler's." Incidentally, Mr. Adler is an enthusiastic reader of *The Talking Machine World*, which may be one explanation of his success.

Aug. D. Volkman & Sons, Iron Ridge, Wis., have been appointed Columbia retailers in that city.

NEW HONOR FOR JOHN F. DITZELL

Manager of Talking Machine Department of Famous & Barr Store Takes Charge of Piano Department—Has Made Fine Record

St. Louis, Mo., January 4.—John F. Ditzell's amazing success in promoting the Famous & Barr Department Store's Victrola department from a four-demonstration room affair to one of thirty-two rooms since last February has brought him unusual honor and much hard work. He has been made manager of the piano department, which is housed with his department in the wide aisle on the sixth floor of the building.

Mr. Ditzell is not a piano man and says that he never has been. He came here from Kansas

John F. Ditzell

City last February as a Victrola manager when the two departments divided the space about equally, with the odds rather in favor of the pianos. It has been the prediction of observers recently that the piano department would have to get out of the way very soon. Perhaps that is what the heads of the store thought, and to save it they made Mr. Ditzell manager.

"I hardly know what to say about the piano department," says Mr. Ditzell. "The management of that department came to me entirely as a surprise. But I regard the talking machine as so much of a musical instrument, and have built my campaigns on it with that opinion uppermost, so I think they will fit the piano department. I, of course, will select only well-tried pianos and players and will apply talking machine sales and advertising methods to them, and I believe that these methods will win.

"The Christmas season has been a splendid one for us. We did more than double the business of any previous year with ease and satisfaction to all concerned. I was complimented by the Victor Co. on the Victor ads with which we prepared the way for our Christmas selling campaign. The keynote to our advertising here has been to put a touch of human nature into all advertising, and we find it pays. Most of our advertising texts are the perplexities of the actual customers.

"The business this year has been remarkable for the proportion of cash sales and the short credit asked."

ATTRACTIVE PATHE HANGERS

The Pathé Frères Phonograph Co., Brooklyn, N. Y., has mailed to its dealers three very attractive hangers which can be displayed to excellent advantage by Pathé representatives. One of these hangers features new Pathé records made by Rube Goldberg, famous cartoonist, who sings his popular hit "Father Was Right." There are also presented on this hanger other popular hits from the Pathé catalog.

Another hanger gives a list of new Pathé dance records, which are meeting with a ready sale throughout the country, and the third hanger features the new monthly supplement of Pathé records. This supplement contains a splendid group of operatic records, the latest dance numbers and popular song successes.

LANSING OFFICE IN SAN FRANCISCO

Walter S. Gray in Charge and Will Handle a Full Line of Lansing Talking Machine Covers

BOSTON, MASS., January 5.—E. H. Lansing, of this city, whose khaki covers for talking machines have attained national fame by reason of their reliability and excellent construction, has just closed arrangements with Walter S. Gray, of San Francisco, Cal., whereby he will have on hand a goodly stock of Lansing covers. This will give Mr. Lansing's many friends in the Western part of the country more prompt service than is possible at the present time. The headquarters for Lansing khaki covers in San Francisco will be room 422 Chronicle Building. In view of freight conditions, this particularly timely step will enable the trade in the Far West to get quick deliveries of Lansing covers just when they need them.

PROOF OF SERVICE RENDERED

"I am looking for the store where there is less talk of service waiting and more proof of service rendered," remarked a buyer the other day. "I shall be able to recognize that store without difficulty, for its advertising will be truthful, its windows attractive and its merchandise of obviously superior standards. And when I have found it I shall not hesitate because of the prices I am asked to pay. For the record of service performed is the best proof of its own equable value."

NEW STORE IN GRAND RAPIDS, MICH.

W. F. Graham, Antigo, Wis., has opened a talking machine and music store at Grand Rapids, Wis., in the MacKinnon Building. Mr. Graham is an expert at sewing machines, and the music business is an outgrowth of his sales and repair business in that line. He expects to do particularly well in the exploitation of talking machines.

VISUALIZATION OF THE PRODUCT

Basis of Attractive Window Display of the Home Furnishing Co., Columbus, O.

COLUMBUS, O., January 5.—The Home Furnishing Co., of this city, which handles the products of the Columbia Graphophone Co., New York, recently presented one of the most artistic window displays that have been prepared by a local talking machine dealer for some time past. This display is shown in the accompanying illustration.

An Unusual Window Display

tion, although a photograph hardly does justice to the many distinctive features of this window. In preparing this display the company took cognizance of the fact that the success of any window setting depends in a large measure upon the visualization of the product that is featured. It was decided to present a Columbia Grafonola No. 110 as the keynote of this window, and in order to keep the instrument in the center of the display an ingenious decorating arrangement was used. How well the company's idea was carried out may be seen in the photograph. This window attracted considerable attention in local talking machine circles, and the principle of visualization will probably be used as the basis of other window displays along similar lines.

H. J. Luethy, Random Lake, Wis., is a new Sonora retailer in southeastern Wisconsin, who is building up a good business.

Manufacturers—Jobbers—Dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION ball-bearing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison Disc machines. Made in nickel and 24 carat gold finish, extra fine quality disc.

Tone arms fitted to Edison machines only

PERFECTION FLEXI-TONE reproducers No. 3, No. 6 and No. 7 fit all types of Victor and Columbia machines. Made in nickel and 24 carat gold finish, extra fine quality.

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from highest pitched soprano, to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Phonograph manufacturers can have PERFECTION FLEXI-TONE reproducers fitted to their machines. Write for prices, information, etc.

BUILDERS OF THE DAYTON MOTOR RECAPITALIZE

Thomas Mfg. Co. Increase Capital to \$300,000 in Order to Handle Avalanche of Motor Business—Something of the “Live Wires” Interested in This Enterprise

DAYTON, O., January 8.—Brief reference was made in The World last month to the increase in capital stock of the Thomas Mfg. Co., makers of Dayton motors, tone arms and sound boxes, of this city, to \$300,000. Of this \$200,000 is preferred, and it has been underwritten by the United Security Co., of Canton, O., one of the largest bonding concerns in the United States. The \$100,000 common stock issue has been taken up by the old stockholders.

This \$300,000 increase in capital stock of the company has been brought about by the growth

ton inventive genius and Dayton manufacturing skill that made the Dayton motor.

M. H. Mathews, founder of the Thomas Mfg. Co., retains the presidency and general management of the company, being the heaviest owner of the common stock. G. M. Mathews is vice-president. W. R. Funk, business manager of the U. B. Publishing House, one of the largest in Ohio, is secretary. F. B. Jennings, connected with the Thomas Co. since its inception, is treasurer.

Associated with these men on the board of

Plant of the Thomas Mfg. Co., Dayton, O.

in popularity of Dayton motors, tone arms and sound boxes—also other articles of manufacture turned out by the Thomas plant.

This increased demand is due to the general excellence of the Dayton product. In fact, the aim of the Thomas plant from the very start has been quality of material and workmanship, feeling sure that the trade would appreciate a high-grade motor, tone arm and sound box. That belief has been justified by the big volume of business booked and now rapidly being cared for by this concern.

The Thomas Co. has long been one of Dayton's leading industrial units. The Dayton motor is the prime motive force behind this wonderful industrial expansion. It is the result of scientific experiment on the part of Dayton inventors and mechanics. Dayton inventors brought out the Wright Aeroplane, the Omar Fare Register for street cars, the National Cash Register, the Delco Electric Starter, the Dayton Computing Scale and a host of other well-known specialties. Dayton, the home of 1,000 factories, is known as the “City of Precision” because its mechanics are accustomed to the building of exact machinery. And it was Day-

ton directors are Hon. E. E. Burkhardt, twice Mayor of Dayton and now one of the firm of Burkhardt, Heald & Pickrel, a leading firm of attorneys in Dayton; A. C. Jackson, formerly cashier of the Dayton Savings Bank, now assistant secretary of the United Security Co., Canton, Ohio, and Chas. W. Slagle, president of the Merchants' National Bank, Dayton, Ohio.

Mr. Mathews informed our representative that offices of the company have been located in Chicago, Toronto and New York. The New York office is operated under the name “The Thomas Phonograph Parts Co.,” and is located at 18 West Twentieth street, in charge of C. J. Kronberg, J. J. Freund and H. Germain. The Chicago office is located at 1330 Otis Building, 10 South LaSalle street, and is in charge of F. E. Reid, for many years in the phonograph business in Minneapolis. The Toronto office is in charge of Paul K. Wood, a very well known figure in the phonograph motor industry; also Frank J. Foley, formerly a leading attorney of Toronto, also at one time connected with a leading phonograph company of Canada.

During the interview President Mathews said

that business during the past months had exceeded his fondest expectations. He told of five orders which alone aggregated nearly \$300,000, and of a score of smaller orders also rapidly being filled. President Mathews smilingly referred to the future of the Dayton motor as something tremendous, if indications were borne out. And, judging by the hum of machinery, modern and ably handled, and the general bustle about the plant, it certainly looks like even the most optimistic dreams ought to come true—so far as Dayton motors, tone arms and sound boxes are concerned.

This article shows a view of the main plant of the Thomas Mfg. Co. It is located in the heart of Dayton, just a half block from the Union Station. It occupies 300,000 feet of floor space. Another factory building stands two blocks east, near the Miami-Erie Canal, and it has floor space aggregating 55,000 feet.

Mr. Mathews stated that for the present there would be no building operations, but that the entire increase of capital would be devoted to the expansion of equipment and the refining still further the products produced.

The local papers have devoted considerable space recently to the growth of the business of the Thomas Mfg. Co., and the Journal particularly had a full-page story giving illustrations of the various departments of this establishment, and telling in detail of the success of the motor, sound box and tone arms turned out by this establishment, and emphasizing that the business has been built on the basis of quality. In fact, the Thomas Mfg. Co. is right on the map these days.

NEW VICTOR REPAIR PART CATALOGS

The Victor Talking Machine Co. has just issued for the use of its dealers a new repair part catalog for Victrolas VIII-A and IX-A, and also for the latest type Victrola XXV. Owing to change in the mechanical equipment of the new model as compared with the old type, the new repair part catalogs are very necessary to the dealer and should be filed carefully. The Victor Co.'s suggestion that the repair part catalogs be preserved in the new style patent spring binder, supplied at cost by the company, is a good one. It will keep the catalogs all together and available whenever required.

Extensive improvements have been made in the music store of Harold N. Stillwell, talking machine dealer on East Main street, Freehold, N. J.

How to Make the Instalment Department of a Talking Machine Business Successful

By Marion Dorian

[During the past two months we have had a number of inquiries from dealers, particularly from the smaller towns, in regard to making the instalment accounts profitable, and we take the liberty of printing below an article written some time ago for The World by Marion Dorian, chief auditor of the Columbia Graphophone Co., which is so pertinent that it will undoubtedly be read with interest and profit.—Editor.]

We hear about the difficulties incident to instalment business. If dealers have had losses with this class of business it is largely because they have not gone about it in the right way.

There are five cardinal rules for the successful handling of instalment accounts. These have been thoroughly tested, and a fair try-out will prove them powerful aids in making instalment business what it ought to be.

There are exceptions to all rules, and circumstances will arise when it is wise to suspend the rule temporarily. In such cases the sensible dealer will act accordingly.

The five rules follow:

1. Investigate the customer in advance of delivery of goods.
2. Sell him no more than he can pay for comfortably.
3. Let terms be simple and clear-cut. Make sure the customer understands and accepts them.
4. Enforce those terms.
5. Do not allow arrears to accumulate.

Three-fourths of the trouble dealers have with instalment accounts is due to anxiety to secure a good sale. Insufficient or no investigation is made as to the responsibility, reputation, or antecedents of the customer. The sale is hurriedly consummated, the goods delivered and shortly thereafter the dealer learns to his sorrow that the customer is not what he represented himself to be. In many instances both customer and goods disappear.

It is easy to ascertain all it is necessary to know about the customer. His resources and income; his reputation for prompt payment and his general standing in the community. This should be done before the goods are delivered and will insure you against surprises.

Rule 2 is equally important. The advance investigation informs you as to the prospect's income; how permanent it is and what demands are made upon it by his family. With this information in your possession you can determine what it is safe to sell him. Suppose a prospect receives a salary of \$20 per week, and has a family of four. If he has been receiving this salary for some time and his reputation is good, you are justified in assuming he can safely pay \$2 or \$3 per week. More than that is dangerous, because allowance must be made for possible sickness of some of his family, which will make greater than ordinary demands upon his income. Eight to twelve months is the period within which an outfit should be entirely paid for. Allowing for a \$2 a week payment spread over eight months a customer could in that time pay for an outfit costing \$64. That would be the limit which the wise dealer would sell him. Many dealers make the mistake of selling a customer double the amount he can pay for comfortably, with the result that the payments become harder as they multiply and each payment day the customer feels he is carrying a burden. Consequently his attitude becomes one of antagonism and he pays grudgingly; whereas, if sold a bill he can pay for comfortably, he does it cheerfully.

Many customers who buy goods on the instalment plan are of limited business experience. A complicated instalment lease is to them an incomprehensible thing. Your lease should be as simple and clear-cut as is consistent with adequate protection. The terms of the contract should be made clear, and customer should accept them in all particulars. Salesmen should be prohibited from making

verbal agreements with customer. If special terms are made these should be written into the contract itself. If this is not done disputes are apt to arise which are destructive of the mutual confidence which must exist to insure a continuance of patronage. The customer should be furnished a copy of the contract, so that he can refer to it at any time. In this way you gain the customer's confidence and he will not only give you his own future business, but induce his friends to do likewise.

Terms should be made as reasonable as you

Marion Dorian

can afford, but once these have been agreed upon and accepted they should be enforced rigidly. There is no easier way to spoil good customers than by giving the impression that terms are mere formalities. There is no surer way of getting a list of accounts in bad condition than by ignoring the regular date when an instalment is to be paid. If the customer has agreed to pay on Monday train him to make the payment on that day and not on some other day. If his payment is not made on Monday notify him immediately to bring in the payment or make it to your collector without further

delay. The moment the first lapse occurs, get right after him and remind him that the goods were sold on definite and accepted terms and that you expect him to perform his promise. If his payment has not been made by the close of business on Monday have the collector at his place of business or residence on Tuesday morning and you will save money. Even the most obdurate customer will respond to this kind of treatment, especially if the call is made promptly.

If you enforce the terms and train the customer to make payments regularly no arrears will accumulate. If you allow two or three payments to lapse it is like drawing eye teeth to get a customer to make up the arrears. You may secure subsequent payments regularly, but lapsed payments hang fire until the end. Instead of getting your account settled within the contract period, it runs over some months, and persistent dunning, which often results in the loss of a good customer, is necessary, to say nothing of the added expense to which the dealer is put.

These rules may not be new or presented in a novel way, but if followed they will result in better and more profitable instalment accounts. They may be summarized as: Selecting a customer wisely; selling him judiciously; starting him correctly; keeping him in the straight and narrow path, and, finally, making him an asset, because you have sold him an article which has afforded him and his family unlimited pleasure and made it possible for him to pay for it without discomfort. In so doing you have made a lasting friend.

EMERSON MEN "DOING THEIR BIT"

At the executive offices of the Emerson Phonograph Co., 3 West Thirty-fifth street, New York, a service flag with four stars testifies to the fact that four members of the company's forces are now enlisted in Uncle Sam's forces in the fight for democracy. These boys who are "doing their bit" include C. D. MacKinnon, of the sales staff; Frank Hennigs and Jack Lawrence, of the recording department, and Joseph Greenwald, the competent and popular head of the Emerson shipping department.

STRADIVARA

"KNOWN FOR TONE"

You, as a dealer, know that the chief selling feature of any phonograph is TONE.

And comparison of STRADIVARA tone with the tone of all other phonographs will **prove** to you that TONE is the supreme selling feature of the STRADIVARA.

A tone of exquisite clarity and violin-like resonance—free from needle or motor vibration—a tone as peculiar to the STRADIVARA as the time-mellowed purity of a genuine Stradivarius is peculiar to the genius of Stradivari himself.

A tone that is **largely** due to the fact that the STRADIVARA is the only phonograph in the world that embodies a **spruce sound board**, built on the principle of the violin and piano.

Hear STRADIVARA tone and you will be quick to realize that you have at last found the tone that **SPEAKS** for itself and for **your profit!**

The Stradivara Plays EVERY Kind of Record

Each Stradivara is equipped with the Stradivara Automatic Stop Device.

7 Models—from \$45 to \$225

Progressive Dealers: Stradivara sales are going strong in the trade. And that their strength is rapidly increasing is attested by good reports from our dealers.

Get in line for a share of Stradivara profits **today**. Write for the most liberal discount proposition ever offered.

Distributors of Lyric Records—Write for Proposition.

SCHILLING PIANO CO., Inc.

Wholesale Distributors

112 WEST 23d STREET, NEW YORK

From \$45 to \$225

On January 15th, 1918
The Retail Price of
Emerson Records

will be **3** for **\$1.00** or **35c**
each

From the very first, we have made Emerson Records, the biggest, fullest values in the phonograph field. We have been continually improving everything that went into their manufacture—from the raw materials to the kind of artists and selections, but up to now we have never found it necessary to raise the retail price.

The war has affected our costs. Raw materials and labor have gone up by leaps and bounds; taxes have been imposed. It is necessary to raise the selling price to keep profits normal.

For example, shellac, the basis of all phonographic records, has gone up in price 200% since the war began—all other materials have gone up in like proportion.

Your Profits Will Be Increased

We know that the cost of retailing has increased in the same proportion as the cost of manufacturing, and we have arranged our new prices to allow you a more liberal profit also.

January and February are the two biggest record months of the year—this opportunity therefore comes to you at a time when you can do the largest volume of Emerson Record business.

Emerson Records at the new price are a remarkable value—for with the many new improvements you are giving an exceptional record at an unusually low price.

The public has become accustomed to increased prices in every commodity of merit it buys. We know that you will sell more Emerson Records at the new price than you did at the old. You can push them harder. It will pay you well to do so.

We want the Emerson Record to continue its rapid progress—we want you to make even a more liberal profit than formerly. We want to make Emerson Records a line of even more importance to you.

By raising the price we are making your stock on hand worth more!

NEW YORK, N. Y.

CONDITIONS IN THE TALKING MACHINE TRADE IN INDIA

United States Consul Lucien Memminger, of Madras, Makes a Report Which Throws an Interesting Light on the General Situation in That Country—Trade Is Largely Undeveloped

WASHINGTON, D. C., January 4.—United States Consul Lucien Memminger, stationed at Madras, India, has sent to the Bureau of Foreign and Domestic Commerce the following report regarding India's trade in talking machines:

"A firm in Bombay which deals in talking machines has branches at Madras, Calcutta, Rangoon, Delhi, and other cities. A representative of this firm states that it has been dealing more largely in the Swiss machines than in others, because it is able to sell them at a much lower price. The Swiss machines, for example, retail at \$9.08 to \$48.67, whereas the lowest price he is able to quote on certain American machines is \$22.71, and they run as high as \$84.35. Before the war the Madras firm had agencies in all towns of any importance in the Madras Presidency, such as Madura, 134,130 inhabitants; Tanjore, 60,341; Trichinopoly, 123,512; Rajahmundry, 48,417; Bezwada, 32,867; Guntur, 40,529; and Negapatam, 60,168. These agencies have been closed, as the business fell off during the war on account of the difficulty of obtaining supplies regularly, and the higher cost of manufacturing, transportation, insurance rates, etc., which necessitated higher retail prices locally. There has been also a certain tightness of money, causing a reduced demand for such articles as might be considered luxuries.

"The dealer mentioned states that talking machines are very largely in use in Madras among those who have means to buy, beyond the bare necessities, certain comforts or luxuries which cost only a moderate amount. In the wealthier homes of the zamindars, rajahs, etc., a certain number of such instruments is found, but not to the same extent. Of the total population of Madras, 518,660, the merchant said about 6 per cent. might be considered as possible users or purchasers of talking machines.

"A large proportion of the poorer people, he said, is not unfamiliar with these instruments, even though they do not possess any, as it is a common practice for companies or individuals to tour the country, giving concerts with the machines, and taking up collections from the villagers or country people who gather to hear them. In this way the machines have penetrated into the most remote districts.

"It is said that the greater number of records sold here, except among the European community, are in Indian languages—Tamil, Telugu, Marathi, Kanarese, Hindustani, etc. Of these the first two are the most generally in use in this district, Hindustani not being commonly employed in Southern India. For Europeans, however, of whom there are about 4,000 in Madras and 14,000 in the Presidency, nearly all English people, records are in English. A fair number of talking machines is found in homes of the Europeans, but probably not in as great a proportion as among the moderately well-to-do East Indians.

"The merchant who has been quoted states that his firm now gets records in English from London, these being made either there or in America; while some in Hindustani are obtained by him from Bombay. He is of the opinion that Calcutta is the only place in India where records in native languages are actually being manufactured. Formerly many such records were made in Germany, as firms there sent representatives to India to record the songs or recitations of the leading Indian artists, and afterwards reproduced these on discs which were then offered for sale in India.

"Several Indian dramatic or musical artists have a reputation throughout parts or in all of India, and records reproducing their best-known pieces are popular. Instrumental music, comical songs, etc., also make popular records.

"A list of department stores is forwarded. They not only sell at Madras, but also have branches at other points in Southern India, as for example Ootacamund, summer capital of

the Presidency; Bangalore, principal city of Mysore; and Secunderabad, in Hyderabad State. Usually it is well to address the branches direct.

"There are few here who deal exclusively in music and musical instruments. One music dealer, however, has an establishment of considerable extent."

PLAN TO CORRECT TALKER TONES

New York Inventor Designs New Machine for Equalizing Tones of Talking Machine and Giving Each Its Proper Value

A talking machine cabinet designed to sift, correct and beautify sound before it is thrown to the atmosphere, has been invented by Henry C. Miller of Saratoga, N. Y. The inventor's idea, as set forth, is to correct defects in some of the tones which are unduly magnified by the horn or other amplifying device.

The principle of the invention is better understood when it is made clear just how and where a tone is changed from true to false on some talking machines, before it reaches the ears of the listener. Assuming all sound vibrations recorded in the grooves of the disk to be true it is noted that in passing through the reproducer and into the horn a certain tone is unduly magnified. If a horn of a different volume is substituted, this defective tone can be made to assume its proper value. This is due to the fact that the horn which serves to magnify the sound is in itself tuned to a certain key by virtue of its size, shape and weight, and naturally responds to vibrations of a tone to which it is keyed.

The same idea is set forth in the case of the

piano, where it frequently happens that when a certain note is struck some object in the room will rattle in sympathy. In the talking machine this sympathetic connection generally results in undue amplification of a particular tone.

In the new cabinet the sound, instead of being

H. C. Miller's Plan of Equalizing Tones

directed from the horn to the atmosphere, is thrown downward into the open ends of a series of "sympathizers" and resonators, each carefully keyed to vibrate in sympathy with a different tone. To accomplish this result, it is necessary to provide a sympathizer to correspond with every tone in the musical scale. When a record is played on the new machine, each tone will set into vibration the particular amplifier which has been tuned to correspond with it. Thus every tone will receive equal amplification before it is thrown on the air.

CO-OPERATIVE ADVERTISING CAMPAIGN SCORES SUCCESS

How the Milwaukee Talking Machine and Piano Dealers Got Increased Business Stimulus and Satisfactory Results Through Association Effort in the Domain of Publicity

MILWAUKEE, Wis., January 5.—Although the holiday season is over, the Milwaukee Association of Music Industries is going right along with its co-operative advertising campaign, believing that business can be very favorably influenced, especially at a time when it usually is rather slack, by keeping before the public. The campaign was undertaken at the middle of November and covers a period of ten weeks. It undoubtedly was responsible to a considerable degree for the splendid business which talking machine and phonograph dealers of Milwaukee enjoyed during that period, and by continuing its influence the association is keeping business good. There will be no appreciable slack season in this city this year if the efforts of the dealers count for anything.

Advertisements were published once a week, on Friday evenings, in the daily newspaper of the largest circulation, The Journal. Usually the advertisements were framed so that both the piano, player and grand and the talking machine and phonograph received the joint benefit. But during the week between Christmas and

New Year's the association published an exclusive phonograph advertisement for the benefit of that division of the industry. The word

TO ALL HUMAN-KIND IT WAS GIVEN— ENCLOSED WITHIN IT IS ALL THE MUSIC OF THE AGES— The PHONOGRAPH

IT SEEMS only an exquisite bit of cabinet work. A piece of furniture almost too beautiful to be placed in an ordinary setting.

But at the press of a tiny lever it places all the music of the world at your command. It's a musical instrument, yet it is infinitely more than any musical instrument. It has tapped the fountain heads of music. Its call has reached the greatest artists of the age. Their voices and instrumental creations have been contributed to its treasure-troves. Yet no melody is too simple, no instrument too humble to have escaped the magic touch of its rendition.

Music is priceless—its value cannot be computed in cold terms of dollars and cents. A world without music would be a dreary world indeed. And dreary, chill, and uninviting is a home without music.

Consider what a phonograph would mean in your home. Long winter evenings brightened by its rich floods of melody. Amusement a plenty for restless children. Happy dance records for the older boys and girls. The "old-time" songs and favorite comedians for Dad. And for mother, a day-time companion, an inexhaustible source of comfort during the long hours when she is alone.

Consider again the children—their musical education is a constant problem for parents. No instrument can give them a finer, broader appreciation of good music. Their training will be aided, their creative powers quickened by the music of the world's greatest artists.

There is no member of the family who will not be benefited by a phonograph in the home—no home that will not be made cheerier, more inviting—a better home.

You are pausing on the threshold of a new year. The happiness it will bring to your family depends largely on yourself. Resolve NOW that the New Year shall bring Music into your home. ALL the Music of ALL the World—A PHONOGRAPH!

HERE is listed the members of the Milwaukee Association of Music Industries—those Music Houses where you may be sure of always receiving QUALITY PRODUCTS backed by GENUINE SERVICE and sold at HONEST PRICES.

ALWAYS THINK OF THE NEXT SALE

In Dealing With Customers it Will Be Always Well to Keep in Mind the Sales to Come—Some Pointers on the Danger of Overselling

If you are looking for an idea to give to your dealers and their salesmen which will make them the pride of the service, here is the message for your next call, says the "Peptimist."

Never make a sale without thinking of the next one. Always have in mind the sales to come. This will make you more conservative in your statements and more careful in your analyses of your prospects and what you sell them. Moreover, you will always aim to send your customer away with a "I-want-some-more" feeling. This is the secret of sales success.

It is well known a first sale seldom pays for itself—your profits lie in repeats. The next sale, and the next and the next are where Columbia dealers make money.

There are just two thoughts to keep in mind in selling for the next sale:

(a) **Study your customer's wants.** Fill those, not yours. Satisfy him, not yourself. Even if the first purchase is small, better have it satisfactory in every particular than unsatisfactory in one. Never force a man to buy what he is not willing to buy. This does not mean to limit your sales. Offer him ideas. Introduce him to new records he does not know of, but do this in a manner of giving him the benefit of your greater knowledge of Columbia product, not in the manner of a man simply trying to sell records. Every succeeding sale depends on the pleasure the customer finds in the preceding one.

(b) **Do not oversell.** Use judgment. This is an intricate problem and one by which the

real salesman can always be known. Realize it is better to sell a man ten records in two instalments than to crowd the ten into the first sale. Always keep in mind, the ten, twenty, thirty, fifty records you know you can sell a

man, but use judgment in selling them. Keep his interest going. Do not smother it. "A bird in the hand" may be worth "two on the bush," but if you have strings on the two on the bush, you can keep all three. Never let a customer leave your store without some string of interest or desire to pull him back. A sale is valuable just in proportion to the surety you have that there will be another.

SERIOUS FIRE IN MILWAUKEE

Flames Break Out in Building Occupied by the Phonograph Co. of Milwaukee on Christmas Morning and Cause Loss Estimated at \$20,000—Orders Filled From Chicago

MILWAUKEE, Wis., January 5.—The Phonograph Co. of Milwaukee, jobber, and the Edison Shop, retailer of the Edison, encountered a rather exciting experience at the close of the holiday season. Early on the morning of Christmas fire was discovered in the three-story building, the first floor and part basement of which is occupied by the Edison dealers, and the remainder of which is a furniture repair and refinishing shop. The wholesale department and stockrooms were badly damaged, while the retail salesrooms were scorched but not rendered unfit for continuing business. Fortunately the fire came at a time when the stockrooms were fairly depleted by the holiday rush or the loss would have mounted into many thousands of dollars. Four firemen were injured in the effort to save the building and contents. The loss is estimated at \$20,000 to \$25,000, fairly well covered by insurance. The record stocks were relatively much less damaged than machines. Wholesale orders have been filled from Chicago while repairs are being made and new stocks provided. The retail department was open for business as usual on December 26, and while little evidence of fire could be seen in the retail warerooms, the smell of smoke filled the air and told a mute story of a narrow escape. The Edison Shop is one of the handsomest of its kind in the country. William A. Schmidt, general manager, was undaunted by the loss and within a few days' time was ready for both wholesale and retail business as usual.

The World is in receipt of Christmas and New Year's greetings from Thomas Edens Osborne, the enterprising talking machine man of Belfast, Ireland. The kindly sentiments expressed are most cordially reciprocated.

SAN FRANCISCO OFFICE, Room 422 CHRONICLE BLDG.
WALTER S. GRAY, Manager

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., January 8.—The Philadelphia jobbers and dealers in talking machines have just seen through the greatest year in the history of the industry. It has been a profitable year for all concerned. Both lines of the trade have come through the year with a good balance to their credit. What they might have done is a question that could only be answered through the amount of business that they have been compelled to divert from them on account of not being able to supply the goods. There was a shortage that was considerable, but probably not more than the previous year.

Just what the new year is going to bring forth I have not found one dealer who is willing to make a prophecy. The general trend is for carefulness. As one dealer said to me the past week, "I think nothing better could be done for the trade than to have the sign 'Be Cautious' printed and placed on every desk." This it is not to be inferred to mean that there is going to be a big slump in the business, but that the dealer will be wise who does not take too much of a plunge until he sees the way the wind will blow.

Closed a Great Sonora Business

F. D. W. Connelly, the Philadelphia manager of the Sonora Co., went to New York the day after New Year to transact some business at the company offices. He reports an elegant business on the Sonora all during and previous to the holiday season, and while it was not necessary to do so, this statement was confirmed by other dealers, who made emphatic the big December demand for the Sonora. The Sonora Co. advertised quite liberally, and big business was the result. Manager Connelly is arranging for a concert to be given on the second floor of the Sonora Building on the 11th of January. Frank J. Coupe, the general advertising and retail sales manager of the Sonora Co., was in Philadelphia recently.

Blake & Burkhart Closed Big Year's Business

Blake & Burkhart report that they have had a wonderful Christmas business in Edisons, and it went considerably beyond their expectation. The last week before Christmas was phenomenal, and Christmas Eve they had the biggest record demand they have ever experienced in any one day. They report that they are certainly well

VICTOR DEALERS

Appreciate

WEYMANN SERVICE

We urge all Victor Dealers to try our "Short Service," that is—

1. We fill the largest percentage of all orders received for records on which dealers are short.
2. We have the shortest and quickest delivery after orders are received.

WEYMANN

Victor Wholesalers

1108 Chestnut Street PHILADELPHIA, PA.

pleased with their year's business. Among their recent visitors was Charles Gardiner, the supervisor of the Edison zone.

New Sonora Agencies

The Sonora Co. has, at present, nine agencies in this city, and the most recent firm to take the handling of this machine was James Bellak's Sons, who also handle the Victor.

William Keech, formerly a salesman at the Sonora store, has opened a Sonora warerooms at 2808 North Broad street, and is meeting with very good success.

Louis Buehn Co. Ahead of Last Year

Louis Buehn, of the Louis Buehn Co., says: "Business for December was quite satisfactory,

so far as sales were concerned, but very unsatisfactory in other ways." Their inability to get records held down their total sales considerably for the month. Lack of machines also curtailed the month's business. "The demand apparently was just as strong as ever," says Mr. Buehn, "and for the intermediate grades, Nos. 9, 10 and 11, it was excessively large. One year's business closed slightly ahead of last year. This was brought about through the considerably increased record business, and in spite of the reduction in the machine business."

Penn Co. Reports Enormous Record Trade

The Penn Phonograph Co. also report that they had a very good December business; it was exceptionally large in records, with which they were very well stocked. Their record stock, says Mr. Barnhill, has practically been "shot to pieces," and the present supply from the factory is practically "nil." They are simply living now on their reserve. They have only a few machines left. In the new year they expect to carry a very much larger stock than heretofore and will rearrange the upper floors of their building to handle it, and to make the work easier.

Columbia Co. Rearrangement of Quarters

The Pennsylvania Talking Machine Co., whose name has been changed to the Columbia Graphophone Co., the big jobbing establishment in this city of the Columbia on North Broad street, have been making a considerable rearrangement of their offices and other departments. All the offices of the "big men" have been moved from the fifth to the fourth floor, including those of W. C. Fuhri and A. J. Heath. Both men are in New York this week for several days. The Dictaphone department of the company has been taken from their Broad street establishment, and has been removed to the second floor of 924 Chestnut street, where they have suitable quarters and are more in the heart of the business section of the city.

Establish Fifty Pathé Agencies

Your correspondent found Mr. Eckhardt, the head of the Pathé Shop in Philadelphia, at his warerooms Tuesday, slightly cold and anxious, awaiting the additional installation of more radiation, but warm and complacent inside and

THE TRADE IN PHILADELPHIA

(Continued from page 36)

highly elated over the business that the Pathé Shop did during the holiday period. The Pathé Shop did not open until November 30.

Mr. Eckhardt says: "Our business was all that I had hoped it would be. Not getting open until November 30 we had not the time to apprise the people of the wonderful proposition we had to present to them. There were, however, a goodly number of them who found out for themselves. We had an extraordinary business for the time that we were open. And much of it was a cash business and especially large first payments. The line commends itself to the higher element of music lovers."

Prepare to Start the Spring Drive

Mr. Eckhardt has already been able to establish upward of fifty dealers to handle the Pathé. Arrangements are being made to start the spring drive, which, with the experience of the last month, will enable the company to present the Pathé more forcibly. A series of concerts will

AN IMPORTANT ACCESSORY

Growth of the Record Album Business of the National Publishing Co. of Philadelphia

PHILADELPHIA, PA., January 9.—How one enterprise develops another is well illustrated in the enormous demand for albums for holding disc records. These albums are made in book form. The interiors consist of numbered envelopes or pockets of strong fibre paper for containing the records, and are securely fastened to the back for giving the necessary strength. Each album is made to hold usually twelve records, and there are index pages inside of the front and back covers, on which the title of each record and the envelope number may be written. This affords a complete and handy system for filing records and keeping them in excellent condition. The albums are generally put in cabinets, and frequently in book cases, and when a record is desired an album is placed upon a table or the lap, which avoids the strain of stooping or getting on the knees to search for some particular record in an old filing device. For convenience and practicability record albums have surpassed any other filing system ever tried or tested.

Any man of middle age can well remember when the talking machine business was in its infancy and see the wonderful growth within the past ten or twelve years and the tremendous output of records, which are bought continually long after a machine has been purchased. Thus it will be seen that record albums are a most important accessory, for they have solved the problem of keeping and preserving records.

The National Publishing Co., of this city, report that their large and well-equipped factory for manufacturing albums is kept full of orders all the time. There has been such a large increase in the demand each year that they have

be inaugurated about the middle of January which it is expected will startle the music lovers of this city. The dealers will be invited to attend.

Harry Weymann Is Optimistic Anent New Year

Harry Weymann, of H. A. Weymann & Son, Inc., says: "As usual at this time of the year, a quantity of machines was delivered the day before Christmas, and quite a few of our out-of-town dealers sent their trucks to avoid the express and freight embargoes, and in order to make their delivery to their customers in time for Christmas. Our entire wholesale and shipping departments worked until 9.30 on Christmas Eve, until the last machine was shipped out.

"Our record orders in December have exceeded any December since we have been in the Victor talking machine business." Mr. Weymann is quite optimistic as to the coming year, and believes that the war is not going to affect the trade, and that the Victor Co. are going to be able to supply a big percentage of the demand for talking machines and records that will assuredly be placed upon them.

enlarged their output facilities to keep step with the growth. Knowing that The Talking Machine World is distributed among practically all of the talking machine manufacturers and dealers in this country and abroad, they take this means of thanking their many hundreds of customers for the orders they have received, and to state that they will always be ready to serve the trade in the future.

EFFICIENCY IN DEALERS' PUBLICITY

O. J. Dreyer Suggests Charging Dealers for Printed Matter so as to Avoid Waste—Would Impress Its Value More Effectively

In a symposium which recently appeared in "Advertising and Selling," a well-known advertising magazine, relative to the desirability of charging dealers for publicity matter, O. J. Dreyer, advertising manager of the Globe-Wernicke Co., Cincinnati O., contributed a very interesting article. This company, which manufactures the Brown disc record cabinet and sectional record files, is also the world's leading manufacturer of office filing cabinets and sectional bookcases, and is a national advertiser of considerable renown.

Mr. Dreyer's article, which is entitled "Charge Dealers for Matter," reads as follows:

"There are many kinds of advertising, and there is much waste in every kind, but by far the greatest waste is in the distribution of catalogs and printed matter to dealers for their use, and this includes envelope enclosures, circulars, booklets, pamphlets, and, in fact, anything which they receive from an advertiser free and send to their customers and prospects.

"In the case of printed matter being sent direct to consumers by the advertiser: If the mailing list is strictly up to date, there is no waste and in this case the advertiser has full control of the printed matter.

TALKING MACHINE DEALERS

—READ THIS—

"The finest and most delicate pieces of mechanism do not prove efficient unless properly lubricated. Skill, Genius, Invention and Workmanship must have the proper Oil. Stop and consider this when you have to buy an Oil for household use."

NYOIL
IS BEST

FOR ANY TALKING MACHINE

Being made in our Watch Oil Dep't, the same care given in refining as in our "Watch Oil," as all gums and impurities are extracted, leaving it Colorless, Odorless and Stainless.

BEWARE OF SCENTED OILS

Machines will not clog if oiled with NYOIL. NYOIL is used by the U. S. Gov't in Army and Navy. A trial order will make a permanent customer of you.

Ladies use NYOIL for Sewing Machines, for it is stainless.

Sportsmen find NYOIL best for Guns, for it keeps them from rusting.

NYOIL is put up in 1oz., 3/4 oz. and 8 oz. Bottles, and in Pint, Quart and Gallon Cans.

For Sale by all Talking Machine Supplies Dealers

WILLIAM F. NYE, New Bedford, Mass., U. S. A.

"Where the advertiser sends the printed matter to the dealer to be distributed by him, the advertiser loses all control of it. The dealer has the best of intentions, usually, to send out all printed matter which the advertiser will send him. If the dealer requests the advertising matter from the advertiser the chances are he will send it out, but then, he is human like the rest of us, and it is often overlooked, neglected and finally goes to the furnace or paper baler. If he does not request it there is still a greater percentage of waste.

"Investigations by the traveling salesmen of an advertiser will prove that most dealers have printed matter piled up in basements and warehouses, which they intend to use but never get around to the point where it is actually used. Of course, some of that which comes in at a psychological moment is sent out, but most of the printed matter is received, placed to one side and then neglected.

"There is just one way to remedy this trouble and eliminate this enormous waste, and that is for every advertiser in the country to make a nominal charge for all advertising material supplied to dealers. Ten per cent. of the cost will undoubtedly solve the problem. Thus, if a catalog costs 10 cents a dealer should be willing to spend 1 cent for it. If booklets cost \$50 per thousand a dealer should be willing to pay \$5 for each thousand he desires to use. The dealer then has a monetary value in the advertising material and will not waste it."

Walter J. Staats, auditor of the Victor Talking Machine Co., Camden, N. J., has been appointed Federal Fuel Administrator for Camden and Gloucester Counties, N. J.

PRESTO UNIVERSAL TONE-ARM

In Position for Playing Lateral Cut Records

This tone-arm has been designed to play all makes and types of records, whether of vertical or lateral cut. No change or adjustment becomes necessary. By merely turning a swivel joint, the change from one system to the other is made quickly.

THE PRESTO PERFECTED SOUND BOX is in no small measure responsible for the success of the Tone-Arm. The "triangle" Needle Holder permits the use of all types of needles, including the fibre needle. This is a feature not generally found in other makes of sound boxes. The use of new and especially designed machinery enables us to produce work that is of exceptional precision and refinement.

CONTINUAL ROUND OF ACTIVITY IN TORONTO TRADE

After Record-Breaking Holiday Season Talking Machine Men Plunge Into Plans for New Year—Geo. W. Hopkins Addresses Toronto Ad Club—Travelers Make Good Report—New Ventures

TORONTO, CAN., January 9.—A full house greeted Geo. W. Hopkins, sales manager, Columbia Graphophone Co., who made a special trip from New York to address the Toronto Ad Club, at the Board of Trade, December 11. Mr. Hopkins is recognized as one of the leading sales managers in the United States, and his talk here met with enthusiastic approval, delivered, as it was, with punch and pep, and the result of an intimate knowledge of the selling field.

The J. Coulter Co., Ltd., are putting on the market the Harmonola, a new cabinet phonograph, to be sold through the jewelry trade in three models.

C. W. Lindsay, Ltd., Ottawa branch, during the month of December gave noon hour recitals which were entirely informal and included popular and classic, secular and sacred music. This firm handles Columbia, Pathé and Sonora lines.

The Music Supply Co., Columbia distributors, are running some strong advertising in conjunction with their dealers.

"A carload of phonographs is just being unloaded this morning, so we are feeling more contented," remarked W. D. Stevenson, of the Canadian Phonograph Supply Co., London, Canadian distributors of Starr lines, when *The World* called. "We had practically cleared our stock prior to receiving this delivery, and this enables us to continue giving our dealers the same prompt service that we gave when the demand was not quite so heavy."

R. W. Burgess, of the Pathé Co., has just returned from a successful seven weeks' trip to the West, where he went as far as Saskatoon. While there Mr. Burgess opened up a great many valuable accounts for the Pathé western distributors, Messrs. R. J. Whitla & Co., Ltd., amongst which were Cross, Goulding & Skinner; Furnishers, Ltd., and Ashdown's of Winnipeg, as well as Campbell & Campbell, of Brandon, Man. Mr. Burgess personally had charge of the big opening at Ashdown's, and demonstrated the Pathéphone to a very large and appreciative audience. To demonstrate how easily it could be done he proceeded to sell for cash on the opening night one of the superb new Louis XVI Pathéphones, and a large assortment of Pathé records, a total cash sale approaching \$400.

A. F. Meisselbach, of the Meisselbach division of the Otto Heineman Phonograph Supply Co., Newark, N. J., and one of America's pioneer motor manufacturers, recently paid his initial visit to this city. On a former occasion Mr. Meisselbach had seen something of Western Canada while on his way from the Western States to Vancouver. He expressed himself quite pleased with Toronto. Mr. Meisselbach is much impressed with the rapid growth of the phonograph industry, and to him the number of homes without a phonograph is but an indication that the industry is only in its infancy.

Ralph Cabanas, for over two years manager of the Columbia Graphophone Co.'s business, with headquarters in Toronto, resigned from that position on December 31 and in a short time proposes visiting Mexico to look into business conditions there. On coming to Canada in 1915, Mr. Cabanas expected to remain until matters became normal and required his return, to again give personal attention to his business interests in Mexico. During his stay in Canada Mr. Cabanas has thoroughly familiarized himself with methods of doing business here and leaves with the satisfaction of having seen Columbia trade develop to the extent of this year's volume, being a little more than treble that of his first year. On a recent visit to New York he was congratulated by officials of the com-

pany on his record here. He has made many warm personal friends in and out of the trade who will regret his departure, but at the same time extend very best wishes for a complete revival of his former business success in Mexico.

Thomas C. Watkins, "The Right House," of Hamilton, Ont., have taken on the agency for Brunswick phonographs and records.

R. R. Gauvin, a leading furniture dealer of Smith Falls, Ont., has opened a new phonograph department and has secured the agency for Pathéphones and Pathé records.

F. A. Girdwood, proprietor of the Rexall Drug Store, Perth, Ont., has added the Pathé line of phonographs and records. D. J. Ritza, another eastern Ontario druggist, has likewise taken on the Pathé.

R. S. Mason, formerly with the J. M. Greene Music Co., Peterboro, and son of the manager of that firm's Lindsay branch, has leased a store in Orillia, where he will handle Brunswick phonographs and records.

Among recent trade visitors to Toronto were M. H. Matthews, president, and L. A. Baxter, vice-president and superintendent of the Thomas Mfg. Co., Dayton, O. This firm has opened up a Canadian branch in Toronto in the Kent Building, which is in charge of P. K. Wood and F. J. Foley. At the Canadian branch it is the purpose to carry for immediate shipment a large stock of each of their five types of motors and of the four designs of tone arms and sound boxes together with all necessary parts.

At the Stanley Piano warerooms, Yonge street, the Brunswick phonograph line is now being strongly featured.

S. E. Lumdsen, a well-known piano dealer of Arnprior, Ont., has secured the agency for Pathéphones and Pathé records for his district.

M. E. Standfield has started on the road wholesaling Starr phonographs and records for the Canadian distributors, the Canadian Phonograph Supply Co., London, Ont.

D. R. Doctorow, credit and sales manager for Leonard Markels, the New York motor manufacturer, spent a few days in Canada early this month, during which he closed some substantial

orders. Mr. Doctorow informed your correspondent that he was arranging at the factory to have a service man come to Toronto for two or three weeks in the interests of Markels motors and parts.

New Victor dealers in Toronto are High Park Music Store, Roncesvalles avenue, and the St. Clair Music Store, St. Clair avenue.

The Phonograph Shop, 310 Yonge street, Toronto, is featuring the Solophone.

A recital was recently given to a number of invited guests by Manager C. R. Coleman, of Thos. Claxton, Ltd., this city, to demonstrate the playing of various makes of records with the Bliss reproducer. The faithful reproduction was enthusiastically commented upon.

Whether or not talking machines should be displayed in the piano booths at the Canadian National Exhibition provoked a spirited discussion at the recent annual meeting held in Toronto, Ont., of the Canadian Piano and Organ Manufacturers' Association, resulting in the decision that they may be shown, but that the exhibition committee shall have power to enforce the rule that talking machines and player-pianos shall be demonstrated only in the soundproof rooms behind closed doors. It is proposed to interview the exhibition authorities with respect to suitable accommodation for the manufacturers of talking machines wishing to exhibit.

The Hudson Bay Co., following the concert of the Hawaiian players and singers in costume with the Bird of Paradise Co., who were filling an engagement here for a week, had a thirty-minutes' recital of Bird of Paradise Hawaiian Music through the medium of the Starr phonograph.

Arthur Middleton appeared on December 27-28 with the Winnipeg Oratorio Society. He is well known through his connection with the Edison Co., and Edison dealers made capital out of his appearance by featuring his records.

Reed & Robinson, Edmonton, Alta, are handling a large volume of business with the Aeolian-Vocalion line.

Lucy Gates, the Columbia artist, delighted large Winnipeg audiences in that city lately in a song recital.

The Mason & Risch Co., Ltd., local Victrola representatives, stated that the buying of Victrola records for Christmas giving was unusually large.

MONTREAL'S PROSPERITY REFLECTED IN HOLIDAY SALES

Big Run on Higher-Priced Models—Some Generous Advertising Campaigns—Many New Agencies Announced for Prominent Lines—Stores Enlarged and Remodeled to Take Care of Future Demands

MONTREAL, ONT., January 4.—The local talking machine trade were all unanimous in stating that the holiday trade of 1917 goes down on record as one of the best in their history and are all agreed that the talking machine has certainly come into its own. Several reasons are advanced for the large increase. First, the large amount of money in circulation, the demand this year being practically for the more expensive machines, and this was forcibly brought to the attention of your correspondent by nearly

every dealer called upon. Secondly, the manufacturers have spent large sums of money in printers' ink using full pages exploiting their products and educating the people to the advantages of music in the home, especially in war time. Thirdly, the dealers themselves in addition to the appropriation allowed them by the manufacturers for advertising supplemented this largely by running good-sized copy. Fourthly, the Christmas Club idea had a stimulating ef-

CO

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 39)

fect in disposing of a large number of machines on the instalment principle, although from various interviews cash business predominated. There are many more reasons that could be advanced, but these are the principal ones. Record Gift Certificates were never as popular as this year and promise for its future big business in this respect. Why not extend this and make a birthday certificate?

D. S. Cluff, representing the Canadian Phonograph Supply Co., London, Ont., Canadian distributors for the Starr machine and records, has just returned from a highly successful trip in the Maritime Provinces, where he opened a large number of new accounts.

J. G. Bradt, manager of the Columbia Graphophone Co., Toronto, was a recent visitor to the trade in Montreal.

Local Brunswick Shops handling Brunswick talkers include Berlin Phonograph Co., Ltd., 153 St. Catherine street, East, who are East End representatives; Geo. A. Peate, 584 St. Catherine street, West, representatives for Eastern Ontario and Quebec, and the Cowan Piano & Music Co., 633 St. Catherine street, West, West End representatives.

H. P. Labelle & Co., Ltd., are now featuring the Starr line in addition to other makes handled.

Some of the local branch stores of the United Cigar Stores are featuring Emerson records.

The members of the Montreal Publicity Association at a special luncheon at the Rose Room of the Windsor Hotel recently heard an appeal from Mrs. F. W. Stewart on behalf of the Superfluity Shop and the toys made by the returned soldiers.

An address was given by G. W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, one of the four men chosen by the United States to handle Government publicity, who spoke on the little things that make big business. Mr. Hopkins was full of valuable hints for salesmen and advertising men as to the best ways of promoting business.

S. H. Brown, retail manager of the Berliner Gramophone Co., Ltd., and P. Decker, manager of the 417 store, sent a substantial supply of smokes to Messrs. Dewar and Reece, who recently enlisted in the United States Marine Corps.

Eighty-nine Columbia Grafonolas constituted a unique showing in the window of Layton Bros. and was the largest number of talking machines ever displayed in a Montreal store window. The publicity thus gained brought most wonderful results.

Henderson & Richardson, Board of Trade Building, handle the Stewart, and the day before Christmas had sold their complete stock. They report an increasing interest in Operaphone records.

The Edwards Furniture Co., Sherbrooke, Que., are now stocking a line of phonographs.

J. A. Hurteau & Co., Ltd., have completed alterations to the interior of their store, adding a number of soundproof booths and new lighting effects throughout. It presents a most attractive appearance. Pathé and Sonora business has never been as good before in December, said this firm.

W. J. Whiteside experienced his first Christmas business with the Victor as his leader. He reports being sold out of every model in the store with the exception of one machine which he uses for demonstration purposes. As regards his supply of records it was sadly depleted. The majority of Victors sold were for spot cash and included the higher-priced styles, very little call being noticeable for the smaller types.

The Berliner Gram-O-Phone Co., Ltd., evidenced a large demand for the first records of the Boston Symphony Orchestra.

The Canadian Graphophone Co. report both wholesale and retail Columbia business away in excess of last year as regards the month of December and are well satisfied with the number of Grafonolas and Columbia records disposed

of sold as Christmas gifts, the popularity of which is steadily increasing every year.

Lieut. "Gitz" Rice has just recorded for the Berliner Gramophone Co. two Victor records, ten-inch, as follows: "Fun in Flanders" (Parts I and II), 18405; "Honey, Will You Miss Me?" and "Take Me Back to the Land of Promise," 216016.

Lieut. "Gitz" Rice needs no introduction to Canadians. His fame as an entertainer reaches far beyond his native Montreal. When the call of the Motherland was heard he went overseas with the First Canadian Contingent, and saw action at Neuve Chapelle, Ypres, Festubert, Givnechy, Loos, the Somme and Vimy Ridge. Then he was badly gassed and sent to a hospital in England, and is now in Montreal on sick leave.

His ability as an entertainer led to his being detailed to organize entertainments for the men at the front, and he was awarded a commission in order to make his efforts fully effective. Lieut. Rice took charge of all musical entertainments within the Canadian lines, and, with the aid of the various concert and musical troops organized from different regiments, was able to entertain 70,000 soldiers every week.

The authenticity of the songs and jokes on these records is vouched for as true to life in the trenches. Other records by Lieut. Rice will be issued in the near future.

The Berliner Gram-O-Phone Co., Ltd., have enlarged considerably their two St. Catherine street, West, stores, thus giving them a larger number of demonstration rooms and even with the additional rooms at their disposal customers had to wait their turn in line during Christmas and New Year's week.

The report of Charles Culross, Sonora and Aeolian Vocalion representative, is to the effect that the demand was confined largely to the most expensive styles of both makes and which he stated sold with much less effort than the smaller machines.

A. Comtois, 1473 Notre Dame street, West, is handling His Master's Voice products.

The Berliner Gram-O-Phone Co., Ltd., report a holiday business equal to the record volume established in December of previous year. The rush came in the last three days preceding Christmas and kept up continuously until New Year's Eve.

Goodwin's, Ltd., report a good steady flow of trade for Edison Diamond Discs and Amberolas.

"We are not so eager for trade that we take all talking machine sales that are offered us," said Manager Henry Hamlet, of Wm. Lee, Ltd., who do an extensive business in Edison Amberolas and Columbia Grafonolas. "We are daily turning down sales that are offered us, as we only want business that is absolutely of a high class nature."

Geo. A. Peate, who is handling the Brunswick phonograph in Eastern Ontario and the Province of Quebec, is very optimistic over the future possibilities of this make and predicts a great future for the Brunswick. He has already sold a large number to leading local musicians of national repute, who he states are in a position to judge and compare. Two traveling representatives will start out on the road the first of the year.

Sales Manager W. W. O'Hara, of Layton Bros., told your correspondent that on Christmas Eve they were left practically without an Edison machine on the floor, and were cleared out of everything above \$200. Columbia Grafonolas and records also shared in the prosperity. "Months ago we placed what we believed sufficient orders to fill all our wants," he said, "but we never anticipated the onslaught which came as an avalanche and cleaned us out."

According to Norman F. Rowell, manager of the phonograph department of C. W. Lindsay, Ltd., holiday business this year was unprecedented, and Columbia, Pathé and Sonora machines were the gainers.

That the music loving public are being edu-

cated to the advantages of owning a phonograph was amply demonstrated at the warerooms of J. W. Shaw & Co., where Columbia Grafonolas were sold in large numbers as well as Columbia records.

Pathéphones and Pathé records enjoyed a brisk demand at the store of G. A. Holland & Son Co.

Wm. Lee, Ltd., are handling the new Golden-tone needle, which they state is selling freely.

NEWS FROM NORTHERN PROVINCES

Talking Machine Trade Most Active in Provinces of Saskatchewan and Alberta

Wm. H. Field, manager, Saskatoon Piano Co., who features "His Master's Voice" lines, is adding a number of sound-proof rooms on the ground floor. The firm is also planning an addition to the rear of the building occupied by them. The Victrola department, at present located in the basement, has been outgrown, and to meet the need of more rooms it was decided to locate these on the ground floor.

A Columbia distributing agency has been opened up in Calgary, Alta, by James E. Williams.

Nipper, the famous Victor dog, was a prominent and attractive feature in a recent display of Heintzman & Co.'s Moose Jaw store. The Victrolas shown were all of satin finish, and with an attractive arrangement of "His Master's Voice" records the window presented a striking appeal. A later window by reason of its artistic simplicity was particularly good. A cabinet machine and one of table size were shown against a background of denim.

The Victrola department of Heintzman & Co., Ltd., at Calgary, is now in charge of B. Gillespie, formerly manager of Western Gramophones Co.'s branch in that city. Mr. Gillespie is a thorough and consistent Victrola enthusiast, and finds a ready response to his enterprise in giving service to the public. Four years ago Mr. Gillespie commenced his Victrola experience with His Master's Voice, Ltd., Toronto, later transferred to Western Gramophone Co., Winnipeg, and then to that firm's branch at Calgary.

The Child & Gower Piano Co., Regina, Sas., are handling a large number of Vocalion phonographs and Columbia Grafonolas.

Jos. M. Tees, formerly of Winnipeg, where he was one of the pioneers in the music business, is now a citizen of Calgary. Mr. Tees is manager of the Imperial Phonograph Co., which firm is featuring Columbia lines.

The Hudson Bay Co., at Calgary, have taken on the Columbia line. The formal announcement of this event took the form of a series of four recitals in their "Temple of Music" on the fifth floor, but which is being removed to the fourth floor. The recital attracted audiences that crowded every available inch of floor space. The programs were of such artistic value and so well rendered as to win from this department's competitors most generous compliments to the work of J. F. Fisher, manager of this branch of the Hudson Bay Co.'s business. Mr. Fisher came west a few months ago from Toronto, where he was on the staff of the Nordheimer Co. The influence of his knowledge of his business, his friendly personality and broad appreciation of the place of music in the lives of the people, is daily reflected in the improved service of his department and appreciation of his patrons.

The "no records exchanged" sign is hung conspicuously in the store of Mason & Risch, Regina, Sas. Asked as to the difficulty of enforcing the rule, Mr. Polson, manager, replied that he found it of considerable advantage not to exchange records, as customers naturally preferred unused stock. He told of a Scotsman and his wife who had transferred their record trade to his Victrola department, their explanation being that by doing so they were assured of the records purchased being all new.

The Most Memorable Motor Event in a Generation!

The Appearance on the Scene of the

BUTTERFLY MOTOR

Leonard Markels
Jewel-Bearing

The motor that knows
no peer!

Read and note these specifications word for word, and you will realize that a new chapter in the history of the phonograph has been opened by the final completion of the

SILENT BUTTERFLY MOTOR *Jewel Bearing*

Specifications

- Beveled gear, noiseless winding.
- New ratchet device that prevents clicking.
- Bakelite intermediate gear—absolutely silent.
- Plays seven to eight 10-inch or five and a half 12-inch records at one winding.
- Cast iron nickeled frame.
- Powerful, durable, compact, accessible.
- Built especially for the highest-grade machines.
- Guaranteed in every minutest detail.
- The perfection of mechanical genius as applied to the phonograph motor.

Write today for Butterfly Folder

LEONARD MARKELS, 165 William Street, NEW YORK

Made in its entirety, from first to last, under the direct personal supervision and vigorous exacting standards of the recognized Phonograph-Motor Genius of America, Leonard Markels

Every Butterfly Motor tested thoroughly, in every practical way, before it leaves our Factory with our Unqualified Guarantee

There isn't an angle on local advertising, bill boards, store equipment and fixtures that the Columbia Dealer Service Department won't solve for you *gladly*.

**Columbia Graphophone Co.
Woolworth Building, New York**

RECENT DEVELOPMENTS IN THE TRADE IN PORTLAND, ORE.

As Is Usually the Case the Holiday Demand Cleans Out Available Stocks—Patriotic and Semi-Patriotic Records Have the Call—Machines in Period Styles Make a Hit

PORTLAND, ORE., January 3.—The volume of talking machine business throughout Oregon, and particularly this city and vicinity, is practically limited by the available supply of machines and records, and the demand is spread over all the leading lines of instruments. In other words, conditions existing at Portland are as a rule those which, according to reports, exist in practically every other section of the country. From present indications there will be no let-up in business for the coming months at least.

The G. F. Johnson Piano Co., by selling "It's a Long, Long Way to Berlin, but We'll Get There" and "Send Me Away With a Smile," is not losing any friends. R. F. Callahan, the genial talking machine salesman, delights in patriotic records, which he says sell like hotcakes. But he also has the fine taste to recommend the best classic reproductions to discriminating buyers. He says the Boston Symphony Orchestra records sell immediately after being heard. He considers them the most wonderful reproductions of orchestra music ever made.

The William and Mary model of the New Edison machine is being sold at the Meier & Frank store at the old price, with only a nominal sum added for war tax. January 1st the prices on all Edisons were advanced and Portland people took advantage last month of the opportunity to buy these beautiful instruments at the old figures and sales during the Christmas holidays were numerous.

Louis Older, formerly with the Columbia Graphophone Co. there, and now in the Canadian army, stationed at Vancouver, B. C., got a six-day leave of absence last week and celebrated it by coming down to Portland and marrying Miss Suzanne Glen, stenographer of the Columbia Graphophone Co.

The Cowan Classique, one of the most beautiful talking machines ever brought to this city, is having a fine sale. These beautiful instruments have been sold to owners of some of Portland's handsomest homes. The case is not its only recommendation, as the tone is unusually full and sweet.

Miss Emma Reynolds, of the Hyatt Talking Machine Co., reports many good sales. Many

machines were sold for Christmas gifts. The sale of records is constantly increasing. Those of Galli-Curci are very popular. The Hyatt Co. handles the Victor, Columbia and Edison machines.

P. Murphy, of the Jackson Furniture Co. of Oakland, Cal., is now salesman at Bush & Lane's Piano Co. here. Mr. Murphy sold a thousand-dollar Sonora machine immediately after join-

TRADE OPTIMISTIC AND CONFIDENT

D. Bartelstone Tells of Conditions and Prospects Experienced on Recent Trip—Closed Many Contracts With Manufacturers of Standing

D. Bartelstone, head of the Lucky 13 Phonograph Co., New York, returned recently from an extended Western and Northeastern trip, which included a visit to a number of the company's clients. In addition to securing good-sized orders for the coming year Mr. Bartelstone closed contracts whereby his company will be in a position to offer manufacturers and dealers maximum service during 1918.

In a chat with *The World* Mr. Bartelstone commented upon the fact that the great majority of the members of the talking machine industry seem to be imbued with optimism and confidence in the future. The manufacturers report the closing of a satisfactory year, and, judging from their plans for 1918, the question of service to their clients will be a most important factor in the coming year's developments.

The Lucky 13 Phonograph Co. now numbers among its patrons some of the best-known members of the trade, who have been taking advantage of the company's offer to keep them supplied with all phonograph parts immediately upon receipt of their orders. The company carries large stocks on hand, and Mr. Bartelstone has been in a position to take advantage of several important contracts during 1917. For the new year this service will be even more intensive than in the past, and a number of new lines will be announced in the near future.

D. Bartelstone has been associated with the talking machine industry for a number of years,

ing the Portland house. The Sonora is selling rapidly. A carload has just arrived for Bush & Lane and is being quickly disposed of.

Wm. Gadsby & Sons, the large furniture house, have just stocked up with a complete line of Columbia Grafonolas and handle these machines exclusively.

Miss Ethel Brown has taken charge of the talking machine department of H. Jennings & Sons. This house sells Columbia Grafonolas and Windsor machines.

Miss H. Perry, formerly with Byron Mauzy, of San Francisco, is now saleswoman with the Bush & Lane Co. here.

and in addition to being a competent executive and merchandising man also possesses an invaluable technical knowledge of the talking machine business, a knowledge which has contrib-

D. Bartelstone

uted materially to his company's success. He is well known in local trade circles, and according to his present plans will visit the trade throughout the country at frequent intervals this year.

A CONVENIENT BLACKMAN SOUVENIR

Combined Desk Rule and Blotting Device Carries Holiday Greetings to Trade

The Blackman Talking Machine Co., New York, the prominent Victor wholesalers, remembered their friends in the trade with a most attractive and useful holiday souvenir in the form of an eight-inch celluloid ruler on one side of which appears monthly calendars for 1918, and to the reverse side of which are attached several strips of blotting paper that should prove a great convenience in blotting signatures on letters. The Blackman souvenir will find a permanent place on many desks.

Announces

A NEW RECORD ALBUM

Each album has a system of interlocking which makes each envelope an individual container. Riveted at the back so that the strain cannot weaken the envelopes. Ends are brass finished.

Indestructible and guaranteed to be the strongest album on the market

Metal-back and other grades also manufactured as heretofore.

NEW YORK ALBUM & CARD CO., 23-25 Lispenard St., NEW YORK

Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the eleventh in a series of articles on the general subject of the musical possibilities of the talking machine. The aim of the series is to develop these possibilities from all angles, thus opening up fields for sales expansion oftentimes neglected wholly or in part.—Editor.]

SCHUBERT UNFINISHED SYMPHONY

The other day I was listening to some Columbia records at a friend's house and, in looking over his collection, the title "Symphony in B minor (Unfinished)" caught my eye. What memories that name brings back! How I remembered that very young fellow whose pennies were few and far between, but who scraped up each week enough to buy a gallery seat at the St. Nicholas Garden, in New York, so that he might hear Franz Kaltenborn's orchestra on Tuesday nights. This was way back twenty years ago, or very nearly that long. Kaltenborn made a brave attempt to popularize orchestral music in New York during the summer by giving it in a place where you could sit and drink beer while drinking in metaphorically the music from a very good band. His players were nearly all Philharmonic men and they made a pretty large hit that first season. Every Tuesday night was symphony night, and I shall never forget that it was on one of these Tuesdays that I first heard the Unfinished Symphony of Schubert.

The Talking Machine Route

You talking machine fellows, do you know what you might be giving the great American public in these serious times if you would but help them to get acquainted with some of your really fine records of symphonic music? It is such a pity that the people have been taught, by newspaper jokes and by general indifference, to sneer at everything which dares to call itself "artistic." But, thank heaven, those days are passing and we are coming to better understanding. Still, there is much progress yet to be made, and in no direction can it be made more surely and rapidly than via the talking machine route. The talking machine is the best musical educator the people ever will have, and in these days, when we are entered on a great and trying task, we need the encouragement and the strength that come from great music; need it as we never needed it before.

It is up to the salesman to encourage with all their hearts whatever will tend to bring about a better popular understanding of, and demand for, high-class records. The people's heart is right. They want good music, but they don't know what to ask for. They don't know what to listen to. It is up to you to tell them. And how can you tell them if you know no more than they do?

That is why these articles are written; not to instruct you in a superior way, but to furnish ideas that may lead you to take a more definite interest in these things and to make yourself better acquainted with them.

The home folks will not be wanting fox-trots and jazz when the brothers, husbands and sons are at the front. It is up to the talking machine man to decide what they shall have in place of the appalling drivel that once suited everybody.

Franz Peter Schubert

Will you listen, then, while I tell you something about this record: Columbia A5748, the Unfinished Symphony of Franz Schubert, in two parts, one on each side of the disc? It is worth while hearing.

Franz Peter Schubert was one of the world's neglected geniuses. You often hear of such, but seldom know of a real specimen. Schubert's case was genuine. All his life was passed in poverty and disappointment. He died at the early age of thirty-one, in something very like the weakness of an improperly nourished body. In his short life he managed to compose ten

symphonies, operas, piano compositions galore, quartets and quintets for strings, and no less than 600 songs, many of which, such as the "Erl-King," "Gretchen at the Spinning Wheel," the "Serenade," "Hark, Hark the Lark," "Who Is Sylvia," are well known through records to every talking machine man.

Schubert was born in 1797 near Vienna and died the year after the great Beethoven. His father was a poor school teacher and the boy was educated at the school maintained for the choir boys of the Imperial Chapel, a place amongst whom had been secured for him at the age of eleven, on account of his beautiful voice. The fare was scanty, the discipline severe and the child suffered under it. But he was already, although he had no formal musical education, beginning experiments in composition. When he was sixteen his voice broke, and he was dismissed from the school and choir. Three years followed of miserable attempts to teach in his father's school. This finally had to be abandoned altogether, but Schubert nevertheless found time, during the year 1815, when he was but eighteen years old, to compose two symphonies, five operas and one hundred and thirty-seven songs! Some of these songs have since been sung all over the world and are still included in the program of every song recital.

An obscure musical appointment was, at this time, refused to him on the grounds that he was "imperfectly qualified!" Poor Schubert!

Schubert at The Inn

The rest of his life was passed quietly and obscurely. He lived sometimes at home, sometimes in rooms elsewhere. His songs sold fairly well after a time, but often for miserably insufficient prices. For his larger works, however,

he could not obtain a hearing at all. Even his songs he had to give away, almost. Franz Lachner, many years later, once related how he and Schubert had a mind one day to go to the country for an excursion, but neither of them had any money. So Schubert hunted up a bundle of songs he had recently written down and gave them to Lachner, asking him to take them to the publisher, as Schubert himself was too shy to present himself there again. After much hesitation, the publisher consented to pay five Austrian florins (about one dollar) for the bundle of manuscript! The two took this money and went off, happy as kings. At lunch time they stopped at a little inn. While waiting for their meal, Schubert found an old cracked spinet, at which he sat down and began to play over ideas for new songs that had occurred to him on the road. Soon the landlady and all the other guests had stolen silently into the room and sat listening entranced! Some of these songs, says Lachner, were among Schubert's greatest.

The Unfinished Symphony

As I said before, poor Schubert could get no hearing for his larger works, and that is the very reason why the unfinished symphony is really "unfinished," having only the first and second movements. The circumstances were somewhat as follows:

In the year 1821 the Musical Society of Gratz in Austria elected Schubert to honorary membership. The obscure composer was delighted at the recognition and announced that he would compose a symphony for the society as a mark of his thanks. He at once set to work and finished the first two movements. He had just be-

THE 1918 TRIO

NEW HOME OF OLIVER DITSON CO.

DITSON

VICTOR

BOSTON

Adam No. 5
Dimensions, 21x22x45 inches. Exposed parts nicked. Mahogany. Shelves for records.
Price \$100—with electric motor \$125.
"Play It Yourself"

BUT WE DON'T—

We could cheapen our factory cost in many ways as by using gum and birch and finishing to resemble mahogany—but we don't.

We use mahogany and walnut.

We could use two coatings and rub by machine—but we don't.

We use three and rub by hand.

We could save money by using motors that wind with a grind and run with a rumble, with a wabbling turn table—but we don't.

We use a precision motor—as silent to wind and run as your watch.

We could use a poorly constructed tone arm and reproducer with a rattle and a scratch at every turn—but we don't.

We use an acoustically correct and properly constructed tone arm and a brilliant reproducer that conforms to the perfection of the rest of the machine—Great volume—little surface noise.

We could save by using a 10 or 15-lb. iron casting for the concealed horn—but we don't.

We use a machined and carved round neck conforming perfectly to the shape of the tone arm.

We could save by using albums or racks in our higher priced machines—but we don't.

We have built in containers that conform with our beautifully designed cabinets.

We could save by using the usual cheap slide or damper as a tone control—but we don't.

Our modulating device is exceptionally fine and is controlled to any degree by the operator, from a distance if desired, without muffling in the least.

We could have a cheap man assemble many machines a day—but we don't.

We assemble so carefully and accurately that four machines are a day's work for a well paid mechanic.

The
Slogan of

The Widdicomb

A Finished Product

Is "Not How Cheaply But How Well"

We realize the prestige of the older concerns and know that to make a success we must build carefully and pay every attention to the details of construction and equipment. Our facilities allow us to produce a perfect machine, at a moderate price and with a better discount for the dealer.

The dealer with the Widdicomb line is not only selling the phonograph but complete satisfaction as well.

Apply at once for particulars and territory. Catalog and discounts now ready and orders piling up fast.

Prospective jobbers will be amply repaid by a visit to our factory.

THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 45)

gun the Scherzo when some misunderstanding arose, apparently, between him and the Gratz musicians. The work was laid aside, and although, according to Sir George Grove, whose authority is final, it did come into the hands of the Musical Society, it was never performed, but remained forgotten until 1865, when it was disinterred and performed for the first time at one of the concerts of the Vienna Gesellschaft der Musikfreunde in the same year. Since then it has been played constantly, and is now given at least once a year by every important symphony orchestra in the world.

Allegro Moderato

Schubert certainly never heard his manuscript performed, and yet it stands as a model of euphony and delicate perfection. It contains many novel ideas in the way of orchestration and general treatment and is of a captivating beauty that appeals to the musically unlearned as quickly as to the professed musician. Let us look into it a little more closely.

The first movement (Part I on the record) allegro moderato is agitated and stressful. It opens with a solemn theme intoned by the stringed-basses. After nine bars of this, the first and second violin take up a rippling accompaniment, which, a little later, is interrupted by a secondary tune from the oboe. This is joined by other reed instruments, with the dancing violins continuing underneath. Suddenly horns and bassoons break in with a challenging chord. A few notes of preparation follow, and then emerges in the 'cellos what is perhaps the sweetest bit of melody in all the literature of the symphony, the famous second theme of the movement; gracious, charming and tender.

As the strains of the 'cellos die away, the violins take up the tune an octave higher and play with it lovingly. But a change impends. A sudden pause comes. Then, without warning, the entire orchestra crashes into a series of ascending chords which lead higher and higher until there modulates out from them the second theme again, tossed around between violins and 'cellos until the first theme returns and is repeated as in the beginning.

A second section of the movement now opens, with a third tune taken from the original oboe melody of the opening. It mounts onward and upward, until the whole set of subjects is hurled together into another maelstrom of orchestral color, to emerge at last in gentle alternate repetitions, drawing to a lovely and thrilling close, with unison chords and a roll of the drums.

Andante con moto

As the first part is stormy and stressful, so the second is heavenly in its peace and harmony. Three little melodies are voiced together at the opening, in stringed, brass and reed instruments, respectively. After some little working out of these in canonic form (that is to say, by one voice following the other in imitation first on strings, then in reeds and so on) there comes out a second melody all by itself, in the shape

of a solo for the clarinet, accompanied by a syncopated running figure in the strings and oboes. This works up to a sort of climax, and then dies down again into the melodies of the opening. These are repeated and finally develop to a close, the little canonic imitation frisking around from one set of instruments to another, till, quietly, almost dreamily, the movement draws to its gentle end.

Schubert left some two dozen bars of a third movement written out. There is no trace of any sketch for a finale.

It will not be doubted by any one who will calmly sit down in a quiet room to listen to this symphony that Schubert has here touched heights of beauty which few have reached. The storm and stress of the first movement are everywhere concealed in the velvet glove of sweet melody and graceful treatment of the instrumental work. The pure appealing loveliness of the second movement comes to one like a breath from heaven. Schubert, poor, obscure and neglected, Schubert, that ugly little man with the thick spectacles, whom the sweet Fanny Vogel could not make up her mind to marry, who was too shy to approach the bedside of dying Beethoven, whose best friends thought him a bit unpractical and stupid; this Schubert touched immortal heights of inspiration, dreamed immortal dreams of beauty, such as few others, either before or since, have been

permitted to conceive in the great realm of music.

You who may have thought that the music of the masters is obscure, recondite, hard to understand, listen to the sweet loveliness of Schubert, and know that the immortal language is always simple, always easy, always clear to those who listen to it with open ears and minds ready to be taught. Study, let me urge you ever more earnestly, the great treasures of musical beauty that forever have been stored up through the genius and skill of the men who have made the talking machine what it is. Make up your minds definitely that the immortal inspiration of the great souls who have expressed themselves in great music is going to be wanted by the great American people during the strenuous days of the war. Do your part in making it easier for the people to get the consolation, the strength and the encouragement which lie buried in these splendid records on your shelves. You will never regret any trouble to which you go in this connection.

C. A. WOODS PIANO CO. IN NEW HOME

The C. A. Woods Piano Co., formerly located at 1323 St. Nicholas avenue, New York, has moved to new and larger quarters at 1327 St. Nicholas avenue, where special attention will be given to the talking machine department. The company features the Schubert phonograph with a gratifying degree of success in the Washington Heights section.

PITTSBURGH TRADE CLOSES ONE OF ITS BEST YEARS

General Conditions Throughout This Territory Most Promising—S. H. Nichols Succeeds Kenneth Mills as Columbia Manager—J. C. Roush Visiting the East—Wheeling Music Co. Incorporated

PITTSBURGH, PA., January 9.—The Pittsburgh talking machine trade reports having closed one of the most successful years in the history of the business, despite the shortage of both machines and records. The holiday season passed former marks by a good margin, and dealers are only wondering how large their sales might have been if it were not for the scarcity of goods. Stocks in most instances were depleted, but are gradually being replenished to meet the steady demand that continues. One of the most serious obstacles confronting local talking machine distributors at this writing is an embargo placed by the Government on all classes of incoming and outgoing freight. It is understood that this measure is only a temporary one, and it is expected that some improvement in shipping conditions will result from the Government control of the railroads. General conditions throughout this territory are extremely promising, and the trade is quite optimistic as to the outlook for 1918. From reliable sources it is learned that it is the intention of the United States Government to place a total of \$110,000,000 worth of war orders here within the next six months. Orders exceeding \$55,000,000 were placed with local plants during a recent week.

S. H. Nichols, formerly for a number of years district manager of the Columbia Graphophone Co. in this territory, comprising Pittsburgh, Cincinnati, Detroit, Buffalo and other points, has been appointed manager of the Pittsburgh branch of the company, succeeding Kenneth Mills. Mr. Mills has been transferred to the Columbia branch at 55 Warren street, New York City, as assistant to Manager Lambert Friedl. Last June Mr. Mills succeeded Mr. Friedl as manager here, and it is interesting to note that they are again associated in the same organization. Mr. Mills is followed by the well wishes of a host of friends in the local trade.

The Buehn Phonograph Co., local Edison jobbers, tendered a dinner to their employes on Thursday, December 27, at the Fort Pitt Hotel. Covers were laid for eighteen. After the dinner the party attended the theatre.

Among visitors who called on the Buehn Phonograph Co. recently were the following: Harvey Howard, Cameron, W. Va.; L. R. Cope, Lisbon, O.; S. G. Patterson, New Brighton, Pa.;

Howard Ross, of the Ross Furniture Co., Fairmont, W. Va.; H. H. Findt, Steubenville, O.; W. B. Pflughardt, Charleroi, Pa.

Edward Crede, auditor of a local bank, has been announced winner of the second prize in the Edison contest started "Edison Week" in October.

J. C. Roush, president of the Standard Talking Machine Co., local Victor distributors, is spending a week or ten days in the East on business. He will visit the Victor factory.

J. C. McGinnity, of the road staff of the Standard Talking Machine Co., has joined the colors with the field artillery, and is stationed at Camp Sam Houston, San Antonio, Tex. Corp. Don Morrow, of the Standard inside force, returned from Camp Lee, Va., over the holidays.

The Wheeling Music Co., Wheeling, W. Va., has been incorporated to deal in talking machines and other musical instruments, with a capital stock of \$10,000. The incorporators are Joseph N. Johnson, Frank Sweitzer, Frank Porterfield, Jr., S. Porterfield and G. Bowman, all are residents of Wheeling.

50% SALES INCREASE IN ATLANTA

Excellent Report by Grafonola Department of Haverty Furniture Co.—Other Prominent Lines Also in Strong Demand

ATLANTA, GA., January 4.—Manager Thornton, of the Grafonola department, Haverty Furniture Co., this city, reports the holiday trade very active. The business of the Haverty Co. was 50 per cent. larger than 1916, which, up to that time, was the largest month in the firm's history.

The Cable Piano Co., Victor dealers, are reported as having done the largest business in their Victrola department since the department was organized. All other Victor dealers enjoyed a very greatly increased business.

Phonographs Inc., the Edison dealers and the Diamond Disc Shop, also Edison retailers, had a most satisfactory business, their best sellers being the \$200 and \$250 types. The New Edison has been well received in Atlanta.

All dealers in the trade are anticipating the largest year's business that has ever been done. The various army camps near Atlanta have contributed materially to the success of the trade.

PATENTS MULTIPLE PHONOGRAPH

Yonkers, N. Y., Inventor Designs Machine for Playing a Half Dozen or More Disc Records in Succession and Automatically

A new phonograph designed to play a number of disc records in succession, and without the attention of the operator after he has started the machine, has been invented by Lucien M. Flagg, of Yonkers, N. Y., who is at present enlisted in the United States, Naval Reserve. Mr. Flagg has just been granted a patent on his invention, which is illustrated herewith.

The invention is cleverly conceived, and is pro-

L. M. Flagg's Multiple Phonograph

vided with a series of turntables bearing records. The tone arm is placed in position at the top, and as each record is played, the sound box and tone arm are lifted therefrom by a mechanical arrangement lowered and placed in playing position on the record below. After the bottom record has been played, the tone arm and sound box are automatically lifted and placed in position above the top record. Means are provided whereby the operator may omit any record in the series or repeat the playing of a record if desired. The mechanism may also be regulated to stop playing automatically after any record. The mechanism is designed particularly for electric operation. Special attention has been given to the means for making the mechanism as fool proof as possible. The use of a semi-permanent needle obviates the necessity of frequent needle changing and permits of the playing of a series of records several times without any attention to that detail from the operator.

The first model of the new instrument is about five feet high, three feet six inches wide, and two feet eight inches deep, and is designed to accommodate six records.

ARKANSAS CITY DEALER PROGRESSES

K. Weller Daniels, of Arkansas City, Kan., has installed new equipment for his rearranged department where Edisons will be handled. And he is going at the business aggressively. He has been using pages in the local papers, effective copy prepared by himself, that is getting the trade.

No "guesser" ever won shoulder straps in a contest with a "knower."

A Quick, Easy, Profitable Seller!

The Elmbrola is a beautiful machine—a sweet, clear-toned phonograph—one you would surely buy for yourself if you wanted one for your own home. Compare it with any other—it compares with the best. Note the Elmbrola's woodwork, the finish, and then put on a record. There are so many exclusive features in the

How Judgment of Human Nature Helps in Closing Sales of Talking Machines

What is salesmanship? What will bring a salesman closer to his point of selling a talking machine than judgment of human nature? Nothing, absolutely nothing, for when a man enters a talking machine store and the salesman approaches him in the wrong manner, the salesman is pushing him away and will be unable to obtain his confidence. No matter how attractively arranged a store may be, and no matter how inviting its atmosphere, if the salesman does not approach his prospect properly half of the otherwise good impression made by the store is lost.

The talking machine salesman should always make it a point to show his prospect around the entire store, meanwhile listening to what the prospect has to say, noticing his actions, and, by watching his eyes, learning what attracts him the most.

A talking machine salesman never goes wrong if he endeavors to find out what the hobby of his prospect may happen to be. No matter what the hobby is, whether it is hunting, or fishing, or billiards, or even stamp collecting, the salesman will find that the hobby offers him an easy medium through which he can gain the confidence of the prospect.

The salesman who knocks his competitor is in reality boosting him instead. It never pays to knock a competitor or any other make of talking machine. There are many good talking machines made, and the salesman who is willing to admit that there are other good lines besides the ones he is handling will make an impression on the prospect, and will cause the prospect to have greater confidence in all of the statements made by the salesman concerning his own line.

In demonstrating a talking machine the salesman should always play something which, in his judgment at least, will find a responsive chord in the prospect's heart. When selling a middle-aged customer a piece like "Silver Threads" or "Annie Laurie" is bound to be pleasing. When dealing with a prospect who believes he knows a great deal about music other tactics are necessary. Say to this kind of a customer, "You, of course, are familiar with this selection from 'Aida.'" Then proceed to play a selection from that or some other opera which you have named. While this is mere flattery, it leads the prospect to believe that you have a good opinion of his knowledge of music and it helps to place him in a pleasant frame of mind and one in which he will more readily respond to the ideas and suggestions you advance in your selling talk.

When explaining the construction of the talking machine the salesman should spare neither time nor effort to make the customer understand anything that he wants to know about the instrument. The wise salesman will "tear the talking machine to pieces" if necessary to make clear any point the customer wishes to know concerning the way the talking machine is made.

One of the strongest selling arguments any talking machine salesman can offer is the fact that he works for a one-price house, which every talking machine house should be. If a customer knows that the price marked on the tag is the one which he will have to pay and that all customers are treated alike so far as prices are concerned, he will have a great deal more confidence in both the house and the line of instruments being handled than he will if he knows that by haggling the price will be brought down.

It is impossible to judge a sale, absolutely until the salesman has spent a little time with the customer, and as each prospect is different from every other each deal must be handled a little bit differently in some points at least. The

expert salesman is the one who can think faster than his customer and who can direct his thoughts and his questions along lines which will make the sale easier. This can be done only if the salesman has right ideas concerning

human nature, and therefore judgment of human nature and getting the confidence of the customer are the two big things which constitute the foundation of real talking machine salesmanship.

WANAMAKER TO SHARE PROFITS

Department Store Owner, With Large Retail Talking Machine Interests, Announces Plan Whereby Employees Will Participate in Profits

According to a recent announcement employees of the John Wanamaker stores in New York and Philadelphia are to be classified according to their importance during the coming year and their sales are to be averaged. A fund of

\$400,000 is virtually to be set aside to be distributed in extra commissions.

The plan is ostensibly a method of sharing profits, but under the signature of John Wanamaker the explanation is made that if the profits do not permit the withdrawal of \$400,000 the balance lacking will be taken "out of the pockets" of the firm. Nor will \$400,000 be the maximum amount, for if conversely profits are large the extra compensation will be increased. This is an important move.

A "SELLING BOOK" FOR NEW EDISON

M. M. Blackman Produces a Volume of Information That Is Invaluable for the Salesman Concerned in New Edison Exploitation

KANSAS CITY, Mo., January 4.—A year ago M. M. Blackman, manager of the Phonograph Co., distributors of Edisons in Kansas City territory, told members of the Edison Diamond Disc Jobbers' Association at the convention in New York of a new plan he had conceived for assisting salesmen to perfect themselves in their job of selling Edisons. Last September this plan, worked out by Mr. Blackman and the Gundlach Advertising Agency of Chicago, was put into effect, with the issuance of a magnificent volume, with sixteen pages 12 by 15½ inches, the "last word" in de luxe printing of original drawings, photographs and text—and yet far from being merely ornamental. The volume tells the whole Edison story, of the conception, the painstaking evolution, the production, and the performance of the "music recreating" equipment. The work is a marvel of conciseness—for this whole story is told in less than 3,000 words, including description of construction features, of Mr. Edison's search for best ways of doing things, of the re-creation tone tests, of the music that is the soul of man, and even comments of critics of well-known publications, who attended tests.

Five thousand copies of the book were published. And last September they were distributed to jobbers, who passed them along to dealers. Perhaps the most important result from the book is right there with the dealers, who through it have gained a new conception of marketing Edisons, and think and talk of them with a higher enthusiasm.

Dealers have studied the book, imbibed its spirit, and kept it where customers could see it. But in addition to using it as the keynote and guide to their store selling, they have supplied their salesmen with copies. The salesmen have taken these books on their sales visits and there have fulfilled the original function for which the book was intended.

It is in reality a "selling guide." The salesman, opening the book when he begins his sales talk, can if he desires—or if he has not learned the contents thoroughly—merely read the pages to the customer, displaying the pictures at the same time. This sales talk is logical—developed—even to the last paragraph in the book, which is designed to "get the name on the dotted line."

The salesmen have usually been importuned to leave the book so that some absent member of the family might see it; but since it is the only one each has, the request usually had to be denied—the salesman could come again.

But the enthusiasm of the prospect over the book, and its impressive way of presenting the subject, was anticipated in the plan of Mr. Blackman. There was to be a miniature of the large volume, six by eight inches, an exact duplicate, which the salesman could leave—and which, of course, the members of the family would later use on others, backed by the enthusiasm they had gained from the salesman's talk and the view of the handsomer edition. These miniatures were distributed just before Christmas, and salesmen have therefore had a few weeks' use of them.

The book—both the large one and the miniature—might be called a catalog; yet it is far more than a catalog, in design—and principally in function. It never gets into the hands of anybody except a real prospect, who has had the Edison presented to him by a salesman, and who has had his interest in every page aroused by that salesman. And anybody except the owner of one of the miniatures who sees it, must nearly always see it while the owner is telling about the excellencies of the Edison.

The Numm Electric Co., of Amarillo, Tex., have opened a branch house in Wichita Falls, and have been fortunate in securing the Victor agency, formerly held by Harrison & Everton, at that place.

ACCESSORIES BUSINESS ACTIVE

President Wilking, of the Ready-File Co., Tells of Trade Expansion—Important Jobbers Fall in Line—Big Foreign and Domestic Orders

INDIANAPOLIS, IND., December 29.—In spite of the war the talking machine accessories business is looming bright for 1918. Although raw materials are higher and freight shipments more or less delayed, yet the outlook is excellent, according to F. O. Wilking, president of the Ready-File Co., of this city. This company, manufacturing a filing system for Victrolas and a fibre needle pointer, has done a tremendously big business the last year.

President Wilking recently returned from an extended trip to the East and reports business flourishing. He put in Ready-File in most of the important Eastern houses, including the Penn Phonograph Co., H. A. Weymann and Louis Buehn, Philadelphia; Blackman Talking Machine Co., and S. B. Davega, New York; American Talking Machine Co., Brooklyn; Henry Horton, New Haven; J. Samuels & Bro., Providence; the Oliver Ditson Co., M. Steinert & Sons, Eastern Talking Machine Co., Boston; Cressey & Allen, Portland, Me., and Gately-Haire, Albany, N. Y.

The Ready-File Co. recently received an order for 2,000 sets of Ready-File from J. W. Jenkins' Sons Music Co., of Kansas City. This concern writes that 90 per cent. of the Victrolas X and XI it sells are equipped with this filing system. The company recently filled orders from Cuba, Australia and England, which indicates that the war is not stopping business altogether in these countries.

President Wilking announces that the recent delay experienced by the company in filling orders for Ready Needle Pointers has been obviated and this new accessory is now being manufactured on schedule. The company already has a big lot of orders from the trade throughout the country awaiting shipment.

The Ready-File Co. expects to have an ex-

hibit at the National Music Show in New York and will have a few surprises for the trade the coming year.

STATUS OF JANUARY RECORD LISTS

Victor Co. Calls Attention to Importance of the First Supplement of the New Year to Those Who Have Secured Machines at Christmas

An important fact regarding the January record supplements that is not generally appreciated by the usual run of talking machine dealers is the relation it bears to the new talking machine owners—those who have just received their machines the previous Christmas. In a letter accompanying the January Supplement of Victor Records, the Victor Co. says most pertinently:

"The most important supplement Victor retailers receive during the year is that for January. It is the most important because it is the first supplement which comes to the attention of thousands of new customers. A copy of the supplement for January, 1918, is handed you herewith.

"Can you get a mental picture of all the thousands of people who, for the first time in their lives, are now enjoying all the delights that a Victrola brings into the home? Can you get a mental picture of their unbounded enthusiasm? If so, you will realize very clearly that the January supplement is, and will always be, the most important of the year.

"When you put their first supplement into the hands of these new customers, they will fully expect that you will be able to supply them with any record listed therein, and for your own individual good, for the reputation of your own business, it is of the utmost importance that you should not disappoint these people who will inevitably become regular customers of the store that gives them the best service."

Fame is no snob. She weighs merit from behind a bandage.

**Manufacturers—
Jobbers—Retailers**

If you are ready to take advantage of the enormous demand for good talking machines, we can serve you two ways.

Harponola

We are in the position to sell you the finest looking and scientifically constructed cabinets at reasonable prices.

We can sell you fully equipped machines under your own trade mark or ours, in carload lots at jobbing discounts.

If you are a dealer, please bear in mind that we manufacture only high grade cases and are installing the best mechanical equipment that money can buy. A postal will bring you our catalogue with full details.

Our prices and discounts are fair to the manufacturer, liberal to the jobber, right to the dealer and just to the public.

Write us today as we are now placing orders for raw material for our 1918 requirements.

RECORD DEMAND TURNED SCALES IN BALTIMORE TRADE

Business for 1917 Exceeded Last Year—Holiday Trade Closed With Fine Record—Larger Prices Demanded and Paid—Liberal Advertising Brings Results—News of the Trade

BALTIMORE, MD., January 8.—A prosperous year was closed by the talking machine dealers and distributors when the month of December passed. Shortage of machines and shortage of records at various times during the year apparently did not interfere with the gross business when the final tabulation was made, for without exception business showed a substantial increase over the year of 1916.

December closed with a fine rush. Buying was of a class that pleased the dealers without exception, for a great deal of cash business was gathered in by all of the dealers. Larger payments were demanded and obtained by the dealers. The increased prices of machines did not affect the business in any way.

Unlike previous years the machines that had the big call were those above \$50; many dealers found it difficult to get a sufficient number of machines of the higher grade, while all of them still retained their cheap machines after the holiday rush had concluded. Business continued after Christmas with a fine class of buying.

Heavy sales of records is what, in many instances, made possible the increased business over last year. Yet the supply of records was at no time equal to the demand made upon the jobbers and dealers. There is still a shortage of records and machines, but dealers are hoping to have this cleared up now that the rush has concluded.

Dealers advertised liberally throughout December both in the newspapers and other mediums and used mail matter, leaving no stone unturned to build up a real month's business. The dealers were aided in their big advertising drive by the ads of the various factories.

Stormy weather during the close of the month held back some buying. W. C. Roberts, of the E. F. Droop & Sons Co., Victor distributors, stated that December was a most remarkable month for business. Cash sales in particular exceeded expectations. The big business was in records as well as machines. The year closed about 25 per cent. in excess of the previous year, and it was due to the extraordinarily large sale of records, while the machine business was under that of 1916. Looking toward 1918 the firm feel that this is going to be a good year for business and they plan to increase their sales force with experienced and trained men.

S. C. Cook, assistant manager of the Baltimore branch of the Columbia Graphophone Co., says: "Business was simply great in December and for the year 1917 was enormous. That's the best thing I can say. We were so far ahead of 1916—and that was a great year—that I would not give out the increased figures. Records and machines are both coming along every day, and we have managed to keep all of our dealers satisfied, which was some job."

W. S. Parks, the Baltimore manager for the Columbia Co., is out of the hospital after be-

ing a patient for more than six weeks. He was able to be at his desk in final days of the Christmas branch and was pleased beyond measure. He left on New Year's day to attend the convention of Columbia managers in New York City.

Jesse Rosenstein, for the National Piano Co., Pathé distributors, reports business fine for December with a general increase for 1917 over the months of the previous year that the firm handled the line. The firm was handicapped in some measure by the delay in shipments, due to freight congestion.

I. Son Cohen, of Cohen & Hughes, Victor distributors, reports business satisfactory for December, but not much of an increase over the previous year. The business for the year has not been figured up as yet, but will show an increase. Machine and record shortage from time to time kept business back. Mr. Cohen left on Wednesday for New York to stir up more machines and records for Baltimore and during the month of December he also made a number of trips to both the Victor factory and the Victor offices.

Department stores having talking machine departments, as well as furniture houses with talking machine departments, did exceptionally good business during December and closed the

year in good shape. Record business with these firms was what helped business immensely, for there were times when they were without machines other than those they had in their demonstrating booths.

The Brunswick is being handled by the local Brunswick Co. and also by the music department of Brager's Department Store. The Kimball talking machine is being handled here by the H. D. French Piano Co., the W. W. Kimball Co.'s representatives, and the firm has been able to sell all that have been shipped here.

VICTROLA OUTFITS FOR SOLDIERS

Automobile Club of Delaware County Presents Outfit of Victrola and Records to Each of Five Regiments From That District

PHILADELPHIA, PA., January 5.—The Automobile Club of Delaware County recently purchased and presented to each of five regiments from this section now in active service a complete Victrola outfit, including records and needles. Each outfit consisted of a Victrola VIII with six record albums containing in all 102 double-faced Victor records; 10,000 needles were included in each outfit and both machines and records were packed in specially constructed pine boxes for transportation, the boxes being fitted with handles so that the outfits could be carried easily by two men. Deep appreciation from both officers and men was the reward of the club members for their thoughtfulness and generosity.

Anticipate Your 1918 Requirements Now

by investigating at once the merits of our improved Veeco Electric Motor and Vitraloid Turntable for electrically equipping your higher grade machines.

The Veeco motor runs on either A. C. or D. C. of 100-125 volts without any adjustment, and can be supplied to run on any voltage from 6 to 250.

To dealers we supply the motor mounted on either 12" or 12½" square mahogany boards, all ready to install.

Send for a sample and try it out.

Orders for 1918 should be placed at once.

"B & H" REPOINTER

For "B & H" Fibre Needles

This little device is as perfect for its purpose as time, study and money can make it.

It does its work properly and just as it should be done. With one motion of the lever it planes the point side of the needle and sharpens it as you would a pencil with a penknife. It does not break or crack the cortex or shell of the bamboo.

U. S. Patent December 5, 1916

It perfects and repoints a needle from seven to nine times. For efficiency, workmanship and general appearance, the "B & H" Repointer cannot be excelled. It is a high-grade tool, (handsomely nickel-plated), easy to operate, practical and fool-proof; put up in an attractive leatherette box, with tray to receive shavings.

An imperfect needle may be instantly perfected and repointed some eight or nine times with this device.

Every user of fibre needles will want a "B & H" Repointer and Perfecter.

As it is our earnest desire that every user of "B & H" Fibre Needles should have the proper instrument wherewith to repoint his needles *correctly*, we strongly recommend that jobbers and dealers keep this device in stock for the benefit and accommodation of their customers.

Woolworth Building, New York

NEW BUYING ELEMENT CROPS UP IN BUFFALO TRADE

Mechanics and Laborers Put Extra Earnings Into Talking Machines and Records During Holiday Season—Heavy Increase in Population Presages Live Business for 1918—The Month's News

BUFFALO, N. Y., January 5.—According to the reports of holiday business coming from local dealers, the public generally has been talking machine crazy. Practically all of the stocks have been cleaned out or greatly depleted, and many more machines and records could have been sold had supplies been available. Mechanics and laborers made up a large proportion of the buyers, for this class of workmen are making more money than they ever made before, and are ready and willing to spend it for talking machines. It is estimated that the Christmas trade just passed was 25 per cent. greater than that of a year ago.

The prospects are that prosperous conditions will continue throughout 1918. Buffalo's population is increasing by leaps and bounds and it is estimated that there are now 530,000 people, with the people still pouring in. With a big suburban territory to work, the dealers have every confidence in future business.

"There was an unprecedented demand for machines and records and there was not a dealer in our territory whose 1917 business did not surpass that of 1916," said V. W. Moody, manager of the Neal, Clark & Neal Co. "It was necessary, however, to make a few substitutions of special-finish Victrolas. Our method of distribution was such that none of these dealers lost business, and few, if any, carried any unsold stock after December 25." The business done at the attractively arranged new retail store of the Neal, Clark & Neal Co. fully met with the estimated forecast of the firm. While not able to advertise machines as extensively as in other years on account of the shortage, the store made a special drive on records and did approximately fifty per cent. more record business in December than was forecasted for the month.

O. M. Kiess, manager of the Buffalo branch

of the Columbia Graphophone Co., attended a meeting of the company's branch managers of the United States and Canada in New York City this week.

"Our Edison stock moved very fast," was the holiday report of Charles J. Hereth.

The King Furniture Co. is featuring Columbia Grafonolas. The manager of this section is Harry S. Cohen.

The Adams-Koenig Co. handles the Solophone, manufactured by the Hallet & Davis Piano Co.

In their large ads in the newspapers every day during the holidays Victor & Co. played up the Pathéphone strongly. The window displays of Christmas goods at this store were changed frequently. A demonstration was made daily by a live Santa Claus and a big business was booked.

"We are satisfied with our holiday trade," said C. H. Heineke, manager of the Victrola department of Denton, Cottier & Daniels. "We were practically sold out and didn't have enough machines to meet the demand. We found our two new extra demonstrating rooms a big necessity."

W. D. Andrews, of W. D. & C. N. Andrews, spent New Year's in Buffalo. "Our holiday trade was limited by the goods received," was the report of this firm. "We had the biggest record business in our history. We were short of records." This store featured window displays of \$20 and \$30 Victrolas as suitable gifts for soldiers and others.

"Every machine of every other type, which we received, was shipped immediately to dealers," said Mr. Andrews.

Charles Wright, employed for eleven years by W. D. & C. N. Andrews, was a holiday visitor. He is now at Camp Dix. Fred P. Besser, for-

merly with this firm, is at Spartanburg. Major H. H. Noyes, who traveled for W. D. & C. N. Andrews in the Buffalo territory for five years, is serving his country in France. He is with Pershing's army.

E. O. Hock, Victrola salesman at Robert L. Loud's store, expects to go to Camp Dix February 15.

Lingard Loud, son of Robert L. Loud, has passed an examination for the aviation corps, and is awaiting a call from the War Department.

A new show window has been completed at the Buffalo branch of the Rudolph Wurlitzer Co. A service flag bearing forty-three stars supplies a striking background for the window. W. P. Tanney is manager of this branch, and R. E. Harrington is a member of the sales force.

Teck Theatre audiences attending performances by Harry Lauder and other stars are accustomed to view the display of Columbia Grafonolas in the show windows of Winegar, Lindsay & Seales, located in the Teck Building.

HOLIDAY GREETINGS ACKNOWLEDGED

The World takes pleasure in acknowledging and reciprocating greetings of the season from many of its friends in the trade. Cards have been received from H. A. Weymann & Son, Inc., Harger & Blish, J. C. Roush, of the Standard Talking Machine Co.; Lester Burchfield, of Sanger Bros.; E. P. Hamilton, of Frederick Loeser & Co.; Mickel Bros. Co., W. D. & C. N. Andrews, and many others.

E. M. BAKER'S NEW POST

Edward M. Baker, formerly advertising manager of the Columbia Graphophone Co., has been appointed advertising manager of the Borden's Condensed Milk Co., New York.

The F. G. and A. Howald Furniture Co., of Columbus, O., have secured the agency for the Brunswick phonograph.

A Logical Profit

in excess of regular business will accrue to Victor dealers who are wide awake. The secret for success in 1918 consists simply in having adequate stocks of the right records at the right time, and in this respect "The House of Service" is your best insurance.

The Year
With a
Lucky Eight

1918

IMPORTANT

HANOVER, PA., November 20, 1917

To Our Customers and the Trade:

You have probably been notified by Clement Beecroft, of Philadelphia, Pa., or his attorneys, Wiedersheim & Fairbanks, of Philadelphia, Pa., of an alleged infringement of letters patent No. 1,244,944, dated October 30, 1917.

We wish to say that we have an irrevocable license to manufacture and sell this cabinet, and the patentee has no claim, either in law or equity, against this Company, or any of its customers.

We therefore notify you that we will stand back of you in any dealings with this Company, and that we will defend any suit for infringement which may be brought against you.

If further intimidation by the patentee is resorted to, we wish you would notify us, and we will take legal action to have the patentee enjoined.

Very truly yours,

FRIEDA HEMPEL NOW EDISON ARTIST

Famous Metropolitan Prima Donna Latest Addition to the Edison Family of Musical Celebrities—Scores New Triumph in Opera

Frieda Hempel, noted Metropolitan Opera prima donna, is now an Edison artist. The Musical Phonograph Division of Thomas A. Edison, Inc., has just announced the acquisition of Madame Hempel to its present galaxy of Met-

Frieda Hempel

ropolitan artists. Madame Hempel is one of the shining lights of Mr. Gatti-Casazza's stronghold on Broadway.

Madame Hempel's joining the Edison organization occurs at a time when the name of Hempel is on the tip of every opera-lover's tongue, as a result of her brilliant debut in "The Daughter of the Regiment."

The music critics of the New York newspapers have been lavish in their praise of Madame Hempel's performance in "The Daughter of the Regiment," and have not hesitated to assert that she surpasses even the famous Sembrich, who was the last artist to appear in the same role at the Metropolitan, some ten years ago. Madame Hempel herself considers "The Daughter of the Regiment" to be one of her best roles.

Madame Hempel's vocal and histrionic accomplishments so impressed the critic of the Musical Leader that he declared her to be one of the greatest favorites heard in

years at the Metropolitan . . ." The Musical Courier pays tribute as follows: ". . . Her popularity has rapidly and steadily increased until she has become one of the foremost among the favorites of the public . . ." These opinions are confirmed by the Chicago Courier, which says: "Frieda Hempel, who has been heralded throughout this country as one of the greatest artists ever appearing at the Metropolitan . . . has won a place . . . which no one, not even Sembrich, could fill."

Madame Hempel comes of a music-loving family. After three years of thorough and conscientious study she made her debut at one of the smaller European court theatres. It was a great triumph. Subsequently she was summoned to Bayreuth—an honor said to have never before been accorded to so young and so inexperienced a singer. From that time on her career has been one of brilliant success. She has sung in most of the great European opera houses and has the distinction of being the only woman in the world upon whom the Belgian Officer's Cross of the Order of Leopold has been bestowed. This is only one of many honors.

Madame Hempel's view on music's place in war-time takes on an especial interest at this time. In a recent interview she made the statement that "the musical reaction of the war is very evident. People instinctively turn to music to ease the terrible strain for a little while."

INTRODUCE NEW SIZE OF RECORD

Emerson Phonograph Co. to Place a Nine-Inch Double-Disc Record on the Market

The Emerson Phonograph Co., New York, is now ready to place on the market a new nine-inch double-disc record, which will retail at 65 cents. The first list of these new records will be ready on the 15th of the month, and, judging from the enthusiastic comments of Emerson dealers, this record will be accorded a hearty welcome from the trade in all parts of the country.

The new Emerson nine-inch record is a universal cut record, similar to the Emerson seven-inch records which have been on the market for some time past. These records can be played on all makes of machines (with one exception) without any attachment, this feature being the paramount factor in their signal success.

Monthly lists of new selections will be issued for the new nine-inch records, and some of the most popular artists now before the public will be included in this library. The company is planning to inaugurate an extensive merchandising and advertising campaign in behalf of its nine-inch record, as it believes that a universal cut double-disc record, retailing at 65 cents, will meet with a ready sale everywhere.

The Columbia Graphophone Mfg. Co. has been incorporated under the laws of Delaware with a capital stock of \$30,000,000, to engage in the manufacture and sale of graphophones and other sound reproducing instrumentalities.

OFFER PHOTOGRAVURES OF ARTISTS

Stewart Talking Machine Co. Issues Series of Artistic Prints of Noted Victor Stars for Sale to Talking Machine Owners

INDIANAPOLIS, IND., January 4.—"Although thy voice I have often heard, thy face I have never seen." Using this well-known and popular quotation from the genial poet Moore as a selling text, the Stewart Talking Machine Co., Victor jobbers at Indianapolis, are offering to the trade hand colored photogravures of seven noted Victor artists, the artists being Galli-Curci, Caruso, McCormack, Schumann-Heink, Alma Gluck, Patti and Kreisler. They were made from unusual photographs. These photogravures measure eleven by fourteen inches—an appropriate size for framing—and were hand-colored in delicate tints by a firm of New York artists. They sell for 35 cents apiece to the dealer and allow a clear profit of 15 to 50 cents on each one. These photogravures are being marketed on the theory that every one who hears a record of any of the seven artists is a ready prospect for an artistic print.

NEW BRUNSWICK AGENTS DOWN EAST

Important Houses Take the Representation of This Well Known Line in Their Territory

BOSTON, MASS., January 9.—The Boston headquarters of the Brunswick-Balke-Collender Co., the phonograph department of which is under the capable management of R. H. Booth, at 94 Washington street, has, as reported in the Boston letter elsewhere, closed an excellent volume of business within the past few months, and excellent reports are being received from the traveling representatives. For instance, F. H. Walter, who has been covering Maine, New Hampshire, Vermont, Massachusetts and Rhode Island, for the past ten weeks, has closed some very important accounts and reports a growing interest in the Brunswick phonograph in his territory.

Among dealers who have been recently booked by Mr. Walter are the Wentworth Music Co., prominent music dealers, who have stores in Waterville, Pittsfield and Madison, Me.; Chas. F. Wing & Co., prominent talking machine dealers, New Bedford, Mass.; J. L. Chalifoux, the large department store of Lowell, Mass.; Kneuper-Dimmick Co., piano dealers, Lawrence, Mass.; R. P. Marble, Attleboro, Mass. All these establishments have placed substantial orders for the Brunswick line, and are bringing its merits to the attention of the public. Naturally Manager Booth is pleased with the substantial advance of the Brunswick in his territory.

The Peoria Phonograph Co., 418 South Adam street, Peoria, Ill., was damaged to the extent of over \$8,000 by fire recently. Four thousand dollars insurance was carried on the stock in the possession of this company.

HEIFETZ "RECORDED" IN HUMAN INTEREST INTERVIEW

By Wm. H. Nolan, New York Talking Machine Co., New York

"Heifetz telephoned for some more records," the boy said to me the other day as I stepped into my office.

"Heifetz?" I queried, my mind on other things.

"Yes—Jascha Heifetz, the violinist. He got one of the new Victrola XVI electrics the other day. What kind of records do you suppose he wants?"

W. H. Nolan

Though we do not sell records to retail purchasers, the opportunity to secure worthwhile experience seemed to present itself, so I responded to the Heifetz inquiry with a personal call. But when it came to picking out records for Jascha Heifetz, I confess I was not entirely sure.

It was the morning after the third concert of the young Russian violinist who had become the rage of America—hundreds had been turned away from Carnegie Hall unable to secure admission. The papers were carrying big headlines about "The Musical Marvel of the Age," "The Wizard of the Bow," "The Genius of the Violin," "The Reincarnated Paganini." The most conservative critics piled superlatives upon superlatives trying to describe his greatness. And in the end they were all compelled to resort to the frail apology, that "words could not express his genius."

I gave up trying to figure out the musical wants of such a youth, and decided to ask

Heifetz to name them himself, selecting some of the famous records of Elman, Zimbalist and Kreisler, and, adding a couple of the new records of the Boston Symphony for variety, and along with a few of the most unusual records in the catalog, I started for the apartment of the Heifetz's at St. James Court.

In a separate package I carefully carried a bundle of records which I thought might interest the nineteen-year-old boy. They were nothing more or less than the first four records Jascha Heifetz had recorded for the Victor Co.—the first records, in fact, he had ever made.

In response to my ringing of the bell, the door was opened by a short, dignified man of middle age—quite Russian in type. From a room, but one adjoining, came the wonderful tones of a violin, in a Paganini "Caprice." I explained that I had called to see Jascha Heifetz. "In a few moments, please," he answered in rather hesitating but good English. "My son has not yet finished his practicing. He began so late today."

"Perhaps the concert last night is the reason for that," I ventured.

"Concert . . . No! No!" explained the father, brushing the idea aside with the wave of a Russian cigarette. "It is the Victrola that he would spend all his time on. He got up an hour earlier than usual—and he has played all the records he has over and over again. I could not get him to begin his practicing—and it should always be done in the morning."

The "practicing" sounded like a concert performance, to one listener at least, and just as he had crashed down the scale in thrilling thirds, his father called his name and spoke a short phrase to him in Russian—the passage was repeated on the violin. The father spoke a brief word—evidently of approval—and the playing went on. Once again he interrupted the player

at the end of a difficult passage—at least it sounded difficult—and again the passage was repeated until it won the word of approval. Shortly thereafter there came a finale that would have aroused any audience to a frenzy of enthusiasm. Mr. Heifetz rose and led the way to the music room.

There stood the tall, slender young wizard—in a gray tweed suit, the coat of which had been replaced by a fresh white linen jacket, his round, boyish face flushed, his light brown hair ruffled, and his black slippered feet headed straight toward the Victrola. He greeted me enthusiastically—or perhaps it is nearer the truth to say he greeted the records enthusiastically—then suddenly seeming to remember, he turned to his father and said:

"Did it go all right the last time?"

There came the anxiously awaited nod of approval—and the priceless instrument that lay on the piano was forgotten in the wonderful mahogany instrument that graced the corner of the room.

I always thought I had a good talking knowledge of the Victrola—but by the time Jascha Heifetz had put the Victrola through its paces for me I had a much greater one. No boy with a new drum or a new engine had ever been any happier. It is the first talking machine Jascha Heifetz had ever had, and he fairly took it to pieces to see how the wheels went round.

He discovered how to attach the motor to an electric plug in the wall, but he didn't take any chances until he made sure the electric lights in the apartment were 110 volts. He found the voltage instructions in the back of the machine. We got to talking about electricity, and I learned some more facts from the young Russian.

He played the violin records of Elman, Zimbalist and Kreisler and his eyes grew bright and he nodded his head in acclaim as the records of the brilliant artists of the violin revealed the beauties of their playing. Again and again he exchanged understanding glances of enjoyment

"Pathé Records"

Their Significance to the Dealer:

They signify not only the largest record collection in the world, but they signify the only records that bear the Pathé Record Guarantee:

Pathé Records Won't Wear Out

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of TONE.

They signify:

No Needles to Change

THE PATHÉ SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

They signify the world-wide Pathé Record Repertoire: Music new to America—vocal and instrumental celebrities of European fame.

And the Pathé monthly list of patriotic, popular, musical comedy and sentimental songs and dance hits—

Plus the brilliant Pathé artist personnel:

Muratore, Muzio, Ober, Cavalieri, Didur, Thibaud, Ganz, Bispham, Grace Hoffman, Slezak, Urlus, Weil, Fitzu, Sammarco, Ruffo, De-Cisneros and others.

Of further significance is the fact that Pathé Records, despite their unique guarantee, cost no more than other makes of records—

And the fact that they are subject to a dealer's discount so generous it will well repay you to investigate—to-day.

The Pathé Phonograph Plays All Makes of Records

Each Pathé Phonograph, at any price, plays not only Pathé Records, but all other makes of records.

The Pathé "Controla"

With the Pathé "Controla" you may increase or decrease the tonal volume of the Pathé Phonograph at will.

Bert Williams' record A2438 means side-splitting fun for customers, and the music of dollars to Columbia dealers.

**Columbia Graphophone Co.
Woolworth Building, New York**

with his father as test passages for the violin were reproduced on the disc.

Then he tried out the different needles, expressing great interest in the Victor tungs-tone needle which reproduced brilliantly the violin music. He was also delighted with the fibre needle, which produced such a soft, mellow tone. He wanted to know what the needle was made of—and where the bamboo grew—and couldn't the material be obtained anywhere but in Japan. The records of the Boston Symphony Orchestra seemed almost uncanny to him—and he left the room for a moment to bring back his mother—a gentle, sweet woman, to hear the Tschaikowsky Fourth Symphony.

The comradeship between the boy and his parents was a pleasure to see. If he enjoyed anything, they must enjoy it too. And always there was the air of respectful obedience of looking up to his father and his mother for suggestions and advice. Jascha Heifetz is wonderful—but Mr. and Mrs. Heifetz are even more wonderful, for never once, by manner or speech, did they convey the impression that they were the parents of a genius. At last I undid the smaller bundle of records and slipping one out of its envelope handed it to the young violinist with the remark that "here was a record he might like to hear."

The music began. Young Heifetz came a little closer to the instrument and suddenly stopped short—it was the "Valse Bluette," the first record he had ever made.

"Listen, mother," he said as he reached out his hand and drew her nearer, and he looked up into his father's face and smiled. With intent, wondering eyes he watched the black whirling disc, his lips puckered, then parted in a smile. He blushed like a school-girl. When the record was finished, he reached out for the second—the Schubert "Ave Maria"—one of the most beautiful "Ave Marias" ever written. Then came the "Chorus of the Dervishes" from the Beethoven "Ruin of Athens," and last of all the "Scherzo Tarantella" of Wienawaski. This number perhaps more than any other shows Heifetz's absolute command over the seemingly impossible in technique.

The wonder of it all—this mere boy standing before me, a youth of nineteen, a genius. Since he was nine years of age he has been thrilling thousands with his violin. He has played in all the cities of Russia and all through Denmark, Norway and Sweden. He has traveled across the barren plains of Siberia and now he has braved the perils of the ocean and brought his art to America.

In spite of the hundreds of skilled violinists, and the present recognition of the great artists, Jascha Heifetz sprang into fame in New York in one night, and his four months' tour throughout the country has only deepened the first marvelous impressions. Now he has recorded his greatest numbers, and the thousands of persons who may not have an opportunity to hear the great violinist in concert, in person, may hear him as many times as they wish in their own homes through the medium of his marvelous Victor records. His art, which is thrilling the musical

world, comes to the Victor owners with absolute reproduction.

Heifetz's records show the marvelous purity

Jascha Heifetz

of technique and tone that can only come from a youth touched by the divine spark. A youth whose art, though perfect, will deepen with the experience that years only can bring.

"How do you like the records?" I asked young Heifetz as the last note of his own record faded away.

Jascha Heifetz grinned—a plain boyish grin.

"Say, father," he said, evading my question, "was I all right on that?"

As I was waiting for the elevator I had the feeling that those records would be played again and again—that Jascha Heifetz might get acquainted with himself. And even as I was pondering over genius and the youth upon whom it had been bestowed—the door opened, and the reincarnated Paganini, forgetting all about genius and its solemn responsibilities, called out abruptly:

"Say, do you suppose I could have that record of Harry Lauder's—'Stop Your Ticklin,' Jock'?"

PLAN TO ENLARGE DEPARTMENTS

GRAND RAPIDS, MICH., January 7.—At the annual meeting of the Friedrich Music House, of this city, to be held this month, plans will be discussed for enlarging several departments in the company's store. Special attention will be given to the talking machine department, which is fast outgrowing its facilities.

A PAIR OF HOLIDAY SOUVENIRS

The American Talking Machine Co., Brooklyn, N. Y., presented to their friends in the trade a clever holiday reminder in the form of a small hand mirror bearing on the back the company's advertisement with the catch line: "We want to do business with the man on the other side." The company also distributed a second souvenir in the form of a magazine pencil.

Sectional Cabinets For Disc Records

← No. 351 Art-Mission Top.

← No. 0328 Art-Mission Disc Record Section for ten-inch records.

← No. 0328 Art-Mission Disc Record Section for ten-inch records.

← No. 0329 Art-Mission Disc Record Section for ten- and twelve-inch records.

← No. 357 Art-Mission Base.

Section by section it grows with the growing record library.

The better the facilities you furnish your customers for housing records the greater the quantity of records you will sell.

Look carefully at the cabinet.

It invites you to fill it, in fact, you cannot resist the temptation to fill it. No matter how many sections are bought there will be empty compartments and these are always in sight, and the records too are always in sight. Any record is so easily found and quickly replaced that this cabinet adds an extra charm and fascination to the playing of records.

Suppose each of your customers had this cabinet and you had a sample on your salesroom floor to remind them to buy additional sections. Not only would the sale of the cabinets increase but what a tremendous increase in the sale of records would result and there is excellent profit in the sale of both.

Each section has 90 compartments numbered consecutively from 1 up. Globe-Wernicke Catalogue No. 317 T W describes and illustrates these goods fully.

Brown Disc Record Cabinet

For every small talking machine given as a Christmas present

Brown Disc Record Cabinet

Every record right in front of you always.

No searching—No confusion.

Records lie flat when drawer is closed—No warping.

Records are vertical when drawer is open. Every record at your fingers' ends.

A separate compartment for every record.

No Scratching—Rubbing—Cracking or Breaking.

The Brown Disc Record Cabinet was devised to preserve a record perfectly and thereby insure Perfect Reproduction of Sound.

BROWN DISC RECORD CABINET No. 4-T FOUR DRAWER

Same as No. 4 but with Table Top. For use with Victrola VIII and IX, Columbia Grafonola 15, 25, 35 and 50, Aeolian Vocalion D and E. 32½ inches high. Top 18¾ inches wide by 22¼ inches deep.

FINE BOOK FOR THE RETAILER

"Music in the Home," a New Volume by Anne Shaw Faulkner, of Special Value in Training Parent and Child in a Proper Appreciation of the Sort of Music for the Home

One of the latest additions to the literature that will aid the talking machine dealer in developing a more general interest in music, and particularly talking machine music, in the child mind and in the home with a resultant increased demand for both talking machines and records, is a new volume entitled "Music in the Home." The author is Anne Shaw Faulkner, a writer of recognized standing in musical circles and who possesses a thorough knowledge of educa-

Anne Shaw Faulkner

tional work in connection with the development of interest in the talking machine.

In the first place, "Music in the Home" is a book that gets away from the stilted text-book style, and, yet avoids the technical. The message which it carries is presented in plain, ordinary language, readily understandable and likewise distinctly interesting. It is planned as an aid to parents and teachers "in the cause of better listening," which brought down to plain terms means an aid to training the child to get the most out of the music which it hears. It is intended more for the home than for the school, more for the mother than for the teacher, and thereby makes an appeal to parents that is of the strongest sort.

An idea of the character of the contents may be gleaned from the various chapter headings which include: "The Home Education of the Listener," "The Language of Music," "What Music Tells Us," "The Architecture or Form of Music," "The Importance of Nationality in Music," "The Characteristic of Folk Music," "The Message That Music Brings," "The Stories That Music Tells," "The Correlation of Music in the Home With the Studies of School," "Music in Its Relation to Geography," "Music and the History of the World," "The Literary Sources of Music" and "Music Every Home Should Know."

Miss Faulkner has succeeded in linking up music with history and geography and in giving it an interest beyond that which is confined to itself; in other words, by getting away from the usual practice of treating music as a thing apart.

The musical selections suggested in the various chapters are of the standard variety, and without exception found in the leading record lists. This is particularly evident in the chapter devoted to "Music Every Home Should Know," wherein several hundred songs and instrumental numbers are carefully classified under a variety of headings.

"Music in the Home" has already been purchased in considerable quantities by prominent talking machine companies who are utilizing it in their work of exploitation in the belief that

the sale of the volume to their customers will, in the future, make for greater sales of records of the standard sort, thereby building up record libraries in the home that will become permanent and insure continued interest in the talking machine. The book has also been adopted and endorsed by the National Bureau for the Advancement of Music and by a number of schools. It has also been featured successfully by various talking machine wholesalers and dealers, particularly in the West.

Anne Shaw Faulkner (Mrs. Oberndorfer) is as well known as a lecturer on musical subjects, as she is as a writer, and has appeared before many of the largest clubs, schools and colleges in America. She is the authoress of "What We Hear in Music," used by many high schools and colleges as a text book.

"Music in the Home" is published by Ralph Fletcher Seymour, 410 South Michigan avenue, Chicago, Ill. The price is \$1.25 net.

KEEPING THE STOCK IN ORDER

Why the Neatly Kept, Orderly Talking Machine Wareroom Invites Customers and Holds Trade—Some Points Worth Noting

The old saying has it that the "apparel oft proclaims the man," and this is just as true in the matter of looking after your stock or your store front as it is of your person. The dusty windows and the ill-kept store are a serious deterrence to business progress and dealers should keep these facts in mind. The neatly kept, orderly establishment is always inviting to purchasers, and it will be found that the majority of them gravitate to talking machine establishments that are so arranged.

In this connection the following excerpt from "Peptimist" is timely and the application to the Columbia product is just as applicable to every other line of instruments which the dealer handles:

"The wise dealer knows that the public will

never hold his product in any higher esteem than he himself holds it. That is why an inviting store front; neat, tidy and ample demonstration space, and artistic surroundings always count. This idea can be pushed a little further. The way that a dealer's salesmen handle Grafonolas and records has a big indirect effect on the customer. If records are left lying around loose, out of their jackets, or if Grafonolas are allowed to become dusty and parts taken off, an impression is given that the machines and records in that shop are not valuable enough to receive special care.

"Put it up to the dealer. Point out his own impressions, say, buying a necktie. If he goes into a store and finds a pile of neckties on a counter jumbled together in chaotic confusion, if the salesman picks one out here and there, breaking loose the main mass, like a dish of spaghetti—it may be a good tie but impressions are against it. If he goes into a store where the salesman carefully takes out boxes and selects ties from individual packages it may be no better a tie, but impressions are decidedly in its favor.

"Your friend dealer will see the point. A few suggestions regarding the careful handling of records—for effect as well as efficiency—will create an impression well worth while. Taking care of the instruments is equally, if not more, important. The Columbia Grafonola is not a box—it is a musical instrument. You never find a piano minus a pedal or half a dozen keys. You find piano salesmen treating pianos with respect. The dealer who treats his Columbia with the same respect commands an equal regard for Columbia products from his customers."

SECURE THE SONORA AGENCY

The Hessig-Ellis Drug Co., Memphis, Tenn., have secured the agency for the Sonora phonograph throughout that territory, and have opened a substantial talking machine department.

Tone—the vital thing

If you, as a manufacturer, can talk and prove *tone superiority* in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you *can* talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

**Parr Magnetic Reproducer
fitted with the
Vibratone Patented Diaphragm**

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most *vital feature*. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek *perfection*.

The indestructible, non-crystallizing, always resilient

VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of mica diaphragms, it overcomes all mica's had features. Guaranteed uniform in quality, free from bubbles, blisters and waves, the Vibratone Patented Diaphragm is non-porous, non-absorbent.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

PARR MANUFACTURING CORPORATION
1 UNION SQUARE At Fourteenth St. NEW YORK

**Take the Parr
Magnetic Reproducer—**

The most sensitive of reproducers. The permanent magnetic device, an integral part of the reproducer, acts on the stylus box. Its possibilities in giving warmth and delicacy in the tonal reproduction of quiet passages make old-style sound boxes seem obsolete. And in fortissimo passages where ordinary reproducers create unpleasant, music destroying blasts, caused by the needle jumping and losing its grip, the Parr Magnetic Reproducer, with its marvelous flexibility, follows every wave and vibration in the record and takes everything the record holds.

PERHAPS no higher ideals than those of the Edison organization exist in the commercial world. It has been the ambition of the Edison organization to incorporate their ideals of surpassing design, materials and execution into every product that goes forth from the Edison Laboratories.

In strict conformity and highly expressive of these ideals is the Official Laboratory Model of the New Edison in the William and Mary Cabinet, recently announced. The spirit of Edison dominance is revealed in every line.

THOMAS A. EDISON, Inc.

Official Laboratory Model New Edison—William and Mary Cabinet, executed in American Walnut.

EARLY ORDERING IS SALVATION OF SAN FRANCISCO TRADE

Planning for Holiday Stocks Early in Year Saves the Day in Christmas Rush—W. S. Gray Opens Jobbers' Distributing Agency—Columbia Men Visit Headquarters—General News

SAN FRANCISCO, CAL., January 1.—While business was hardly up to expectations at some of the local talking machine departments during the early part of December, it picked up about the middle of the month and the rush from then until Christmas more than made up for the comparative quietness of the preceding two weeks. As a matter of fact, the trade reports the closing of a banner holiday season, both in machines and records, and especially in the higher-priced machines and patriotic records. Notwithstanding the freight congestion and consequent slow deliveries on late orders, most of the local houses, at least, were very well supplied with stock with the exception of a few certain models, having placed their orders for holiday goods early in the year in anticipation of increasing difficulty in getting goods from the Eastern factories as the year advanced. In some instances holiday stock had been stored here for several months prior to the time it was needed.

Reports from other sections of the Pacific Coast received by local jobbers indicate the closing of a very successful year not only in the San Francisco Bay district, but for the Western territory as a whole. In a few isolated spots business was hardly so good as might have been desired, depending upon local conditions, but it was sufficiently active in other vicinities to bring the total volume up to a very satisfactory showing.

Opens Jobbers' Distributing Agency

Walter S. Gray announces the opening of a jobbers' distributing agency in this city. It is his intention to supply the talking machine dealers of the Pacific Coast with all trade accessories, such as Lansing delivery covers, record delivery envelopes, steel needles, etc. Mr. Gray has been Pacific Coast sales agent for the Domestic Talking Machine Corp. for some time and will continue in that capacity, with headquarters at the same location on the fourth floor of the Chronicle Building.

Closed by Holiday Trade

James J. Black reports the closing of an exceptionally fine holiday business in the talking machine department of the Wiley B. Allen Co. Business was a little late developing, he says, but the week before Christmas was sufficiently active to bring the month's business up to a very satisfactory figure. The strong demand for high-grade machines was most noticeable and record sales were the best in the history of the business. Not only did December business show a substantial increase over the corresponding month of 1916, but the year 1917 was

better all through than the preceding one, according to Mr. Black. In checking over holiday business he was gratified to find that first payments ran larger than at any other time in the history of the firm's business, which, he says, was probably due to the fact that practically all workers are getting increased remuneration for their services nowadays. The Wiley B. Allen Co.'s store in Oakland, Cal., did an exceptionally heavy business in December, the end of the holiday season finding very little stock on hand there. The Saturday before Christmas was a banner day at the Oakland store. Very good reports are also coming in from other branches of the firm's business, especially from the Northwest.

Only Difficulty Was Getting Stock

In regard to holiday business, Andrew G. McCarthy, of Sherman, Clay & Co., says the demand for Victor goods left no possible ground for complaint—the only difficulty was to get sufficient stock to supply the needs of the Western trade. The shortage was particularly noticeable on the large styles of machines. Record sales far exceeded expectations. Taking the year as a whole, Mr. McCarthy says Sherman, Clay & Co.'s Victor business showed a substantial increase over the preceding one. They do a wholesale business only in southern California, and the reports from that section are very gratifying. In the Northwest both wholesale and retail business has been active, according to the reports coming in from Seattle, Portland and Tacoma. Spokane, however, seems to be a little slower.

Columbia Men Off for New York

Just before leaving for New York, after Christmas, Fred A. Denison, district manager for the Columbia Graphophone Co., reported a banner holiday business on Columbia products in his territory. The object of Mr. Denison's trip was to attend a convention of the company's managers from all over the country. Others to go from the Western territory included C. V. H. Jones, P. F. West and T. O. Moore, of San Francisco; W. F. Stidham and Mr. Mathews, of Los Angeles, Cal.; G. H. Williams, of Seattle, Wash., and L. D. Heater, of Portland, Ore. Mr. Denison and the San Francisco delegation are expected back at headquarters about the middle of January.

W. E. Henry, who represents the foreign record department of the Columbia Graphophone Co. on the Pacific Coast, has been successful in interesting a great many Western dealers in this branch of the business. In several instances large stocks have been installed, and Mr. Henry is getting very satisfactory reports from all along the line. He plans to leave shortly on an extended trip through the Southwest.

Higher-Priced Machines in Demand

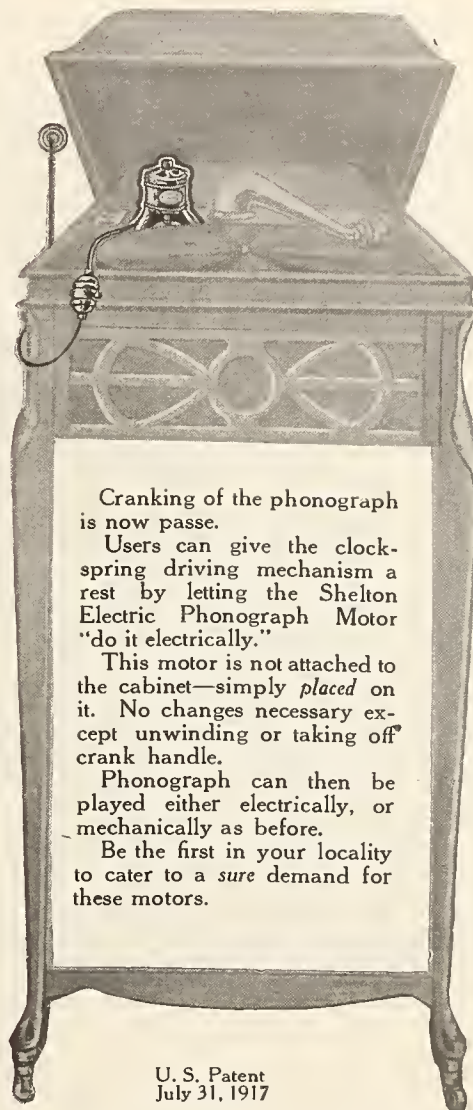

At the Edison Shop, opposite Union Square, holiday business was well up to expectations, according to W. J. Carson, who was particularly well pleased over the large number of high-priced machines sold the last few days before Christmas—even on the Christmas Eve—which brought the month's business up to a much higher figure than was anticipated early in the month.

Edw. Humphrey Goes to Byron Mauzy

Edw. Humphrey has resigned as manager of the Victrola department at Hale Bros., one of the large department stores of this city, to go with Byron Mauzy as manager of his talking machine department. Mr. Mauzy was very well pleased with holiday business in that part of his establishment. In fact, 1917 was a very good

year throughout, everything considered, he says.

Clark Wise, of Clark Wise & Co., reports an unprecedented demand for records during December, and machine sales were fairly active also, although not so good in proportion as record business.

Geo. T. Hively, manager of the talking machine department of the Eastern Outfitting Co., which handles Columbia products exclusively, is very well satisfied with holiday business, and he considers prospects good for 1918, providing stock can be obtained the same as usual.

Jas. D. Moore, who has been manager of the Victor department of the Lion Department Store in Toledo, O., for the past five years, is receiving valuable assistance from Wallace Currier, who recently assumed the position of assistant manager of that department. Holiday business with this house has been excellent.

A good question for a retailer new to the business to ask himself: Is your stock of goods such that your customers want and does it suit the conditions of your locality?

A New Record Repertoire and Greater Record Sales for the New Year!

NOT only do Pathé Records represent the largest and most unique record repertoire in the world: music of which America still knows little—the great voices of all Europe; romantic instrumental ensembles of the Old World's Bohemia; the famed military bands, the songs and melodies of lands that *live* romance; the brilliance and beauty of a world of art so far a closed book to most Americans—

To say nothing of the regular monthly list of up-to-date patriotic, sentimental, musical comedy and popular song successes and dance novelties—

But they represent *continuous* sales

And increased "record dividends" to the dealer—

because there is a fast-growing demand for records that play without needles. And Pathé Records mean:

No Needles to Change

THE SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

Pathé Records Won't Wear Out

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

The Pathé Phonograph Plays All Makes of Records

Each Pathéphone, at any price, plays not only Pathé Records, but all other makes of records.

The Pathé "Controla"

With the Pathé "Controla" you may increase or decrease the tonal volume of the Pathé Phonograph at will.

No Needles to Change

THE PATHE SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

Pathe Records Won't Wear Out

Here's the Pathé Record Guarantee: "We guarantee every Pathé Record to play at least a thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone."

Pathé recordings are not merely phonographed recordings of such world-famed artists as Muratore, Muzio, Cavalieri, DeCisneros, Grace Hoffman, Ober, Slezak, Urlus, Bispham, Sammarco, Ruffo, Weil and others. They are the *realism* of those voices.

Pathé Records cost no more than other records and because they offer the dealer an unusually generous discount.

Write for details TO-DAY.

Washington Birthday Window Suggestion for Talking Machine World Readers :: :: By Ellis Hansen

"If you put a little lovin' into all the work you do,
And a little bit of gladness, and a little bit of you,
And a little bit of sweetness, and a little bit of song
Not a day will seem too toilsome; not a day will seem too
long;
And your work will be attractive, and the world will stop
to look,
And the world will see a sweetness, like the tinklin' of a
brook,
In the finished job; and then the world will turn to look
at you
With a world's appreciation of the thing you've found to
do."
The Winning Way—From Houston Post.

Every live talking machine dealer is continually studying over the important problem of creating the best impression. He likes to have his efforts stand out, way ahead of those of his competitors.

Department stores depend largely upon bargain sales. This, of course, is out of the question with the talking machine dealer. There is, however, one other means used to a great extent by department stores which should also appeal to talking machine dealers, and that is the show window. By using taste, brains and a certain amount of effort the progressive dealer can impress his customers through his show windows and in the creation of impressions most dealers realize that it is the first glance that really counts. If a window is attractive, clean and interesting it appeals irresistibly to the many pedestrians who pass it daily. People are quick to notice interesting displays and few things help more to get a store that valuable business asset—good will. Encouraged by the editor of this journal, I shall design a number of inexpensive displays in this and succeeding issues suitable for small show windows and not only describe them with illustrations and diagrams, but I will actually make up a limited quantity of the display parts that cannot easily be obtained by retail dealers. These parts can be obtained from me at a very reasonable price and thereby enable dealers to get the full effect of the illustrations. The woodwork and easily made parts will be described in full so anybody at all handy with tools will be able to make them.

Before explaining the making of the display

Detail of Scrola

here shown I want to advise every dealer interested in the plan to select some one handy with tools in their employ to have full charge of the show window. Most of the large stores have realized the need of a window trimmer and have either a special trimmer or a clerk who puts in part time for display work. But even the small dealer with only one window and a few clerks ought to have one person and one person only to take care of the show window, and to be held responsible for the appearance of that window. It does not necessarily have to be a man. I know of several stores where women clerks are doing very well indeed as window trimmers. Dealers, however, should realize that it takes time and money to make attractive displays. The would-be window trimmer can no more invent or construct without mental equipment than he can without material with which to work. I know of dealers that do not consider the trimming of their windows as work, but rather as a pleasant pastime, a mental rest from the daily humdrum of every day toil, a labor of love, which, though added to the regular daily duties, should make the person elected to do it thankful and happy! And then dealers wonder why their show windows don't bring results. Any dealer that wants to get results from his windows must first of all recognize window trimming as work—tedious, exacting work, work that not only re-

quires gray matter, but imagination, elbow grease and good judgment besides. If anyone of your force can make your window stand out and appeal, as is the true mission of a show window, he should be rewarded not only financially, but by your confidence and trust. Faith in business is really quite as important as faith in religion. When we give a man that we know can be trusted our confidence and express our faith in him and his work, we make easier all his tasks and remove, or help to remove, the greatest obstacle on his road to success.

Don't think this is mere talk, because it is not; it is my own experience, as I shall presently relate. When L. F. Geissler engaged me about seventeen years ago to take charge of the Sherman-Clay windows in San Francisco I had never trimmed a music window before. Somehow Mr. Geissler had faith in me and never hampered me with restrictions, neither did he allow anyone to tell me how to do my work. He trusted me to do the right thing. Consequently, I planned and worked as never before and as a result made a success of it. The other distinguished houses that I have been with have treated me very much the same way and especially my last employer, E. H. Uhl, manager for the Rudolph Wurlitzer Co.'s Chicago branch. In the three years that I worked for Mr. Uhl I cannot recall one instance of being told what to do or called down in regard to my work. During that period I made a most complete fiasco in building a float at considerable expense to be used for the advertising men's street parade. The float almost collapsed before it was one block on its way. Of course, I felt very humiliated and unhappy and expected to get what I thought was coming to me. Mr. Uhl was in Cincinnati during the accident and upon his return I told him frankly that nobody but myself was to blame for the failure. Instead of calling me

importance of making the window trimmers' job worth while. Give due credit to the trimmer and don't let some one higher up swipe the glory if glory is due. Allow a reasonable amount of money for display material and other expenses as you would for any other branch of

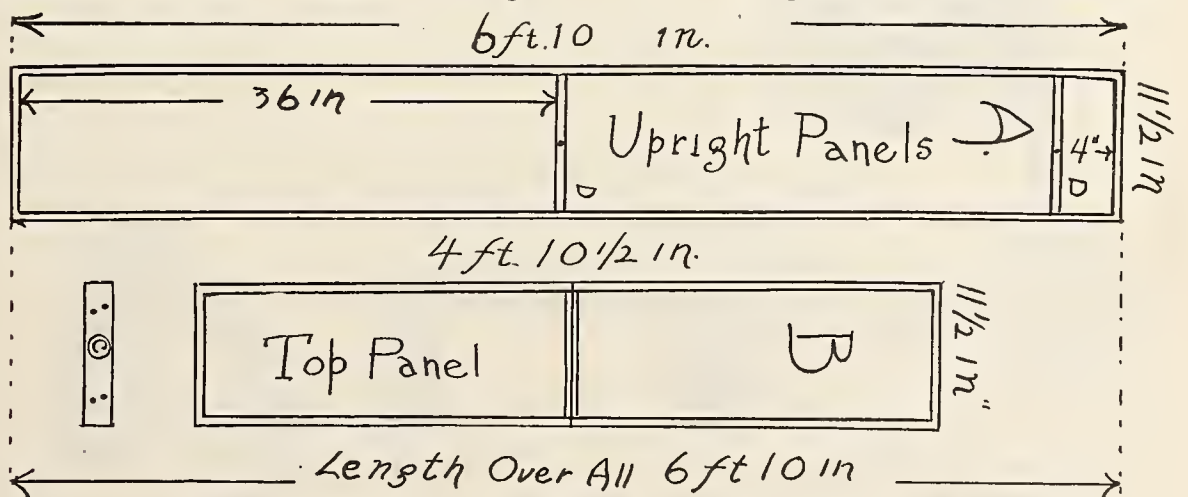

Washington Birthday Window Designed Especially by Ellis Hansen for The Talking Machine World

advertising. Arrange for a place to store all used display material and if you hold the trimmer responsible let it be under lock and key.

Now for the display. It should not appear until the month of February, but by changing the picture in the center the rest of the display would always be appropriate for a patriotic window.

How to Make Display

First make three simple frames or panels; two uprights (see diagram A) and one top frame (B). Use basswood strips one inch square, which can be obtained at your nearest lumber yard. Make the uprights six feet ten inches long by eleven and one-half inches wide. Put two crosspieces (D) as shown in diagram four inches from top, the other thirty-six inches from bottom. Drill quarter-inch holes in center of crosspieces. Next make top panel (B). Length four feet ten and one-half inches, width, eleven and one-half inches, with a crosspiece in center. Now cut two pieces of one-fourth inch wood

Key to Arrangement of Washington Birthday Window Display

down he put his arm around my shoulder and told me not to worry but forget all about it as he would forget it. No wonder, I could do good work for a man of that calibre.

These remarks are intended to emphasize the

two inches wide by eleven inches long (C). These pieces are used to fasten the top piece (B) to the two side panels (A). Four one-inch screws will hold the panels together securely.

(Continued on page 68)

WASHINGTON BIRTHDAY WINDOW

(Continued from page 67)

Make the three frames rigid and secure. Then proceed to tack on the scrola. "Scrola" is the name that I have selected for this new decorative material. It stands out in strong relief, being made of heavy cardboard, machine cut and colored by one of the most expert air brush artists in America. After the scrola has been tacked on turn the frames and tack blue crepe paper on the back. Sixteen five-pointed stars, three inches in diameter, should be cut out of white paper and pasted on the crepe paper back of the scrola as indicated in the picture. By using three incandescent lamps back of the frames a very beautiful effect can be produced. Pictures of Washington can be had from ten cents up. Any frame of suitable size will do, but an oval frame is to be preferred. The two American flags used are four by eight feet in size and can be obtained in most stores at \$1.50 each. The folds in the drape are three inches wide and the arrangement is so simple that anyone who tries can duplicate the effect by studying the photograph. The record stands at the bottom of the display were fully described in last month's World. The placing of the phonograph is, of course, up to the trimmer and depends on the number of instruments to be used. Three-sixteenth inch by one and one-fourth inches round-headed stove bolts are used to bolt the four records on uprights. The ten records used should, of course, be patriotic selections. The smallest size window used should be seven feet square. The scrola all ready to be tacked on frames can be obtained all complete for \$5 money with order or C. O. D. by writing to Ellis Hansen, 600 South Harvey avenue, Oak Park, Ill. This simply covers the cost of production, with a very slight additional charge for handling.

P. C. Peuser, who recently entered the retail field at Franklin, Pa., with a store at 139 Adams avenue, has secured the agency for the Sonora.

TALKING MACHINE EXPORTS

The Figures for September Presented—Exports Show Machines Decrease and Records Increase

WASHINGTON, D. C., December 30.—In the summary of the exports and imports of the commerce of the United States for the month of September, 1917 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures regarding talking machines and supplies appear:

Talking machines to the number of 6,437, valued at \$191,157, were exported in September, 1917, as compared with 7,955 talking machines, valued at \$181,847, sent abroad in the same month of 1916. The total exports of records and supplies for September, 1917, were valued at \$150,554, as compared with \$106,054 in September, 1916. For the nine months 63,659 talking machines were exported, valued at \$1,606,555, in September, 1917, and 45,210, valued at \$1,128,602, in 1916, while records and supplies valued at \$1,330,759 were sent abroad during 1917, as against \$823,858 in 1916.

GENEROUS CHRISTMAS BONUS

For Employes of Otto Heineman Phonograph Co.—Get War Saving Certificates in Addition

The Otto Heineman Phonograph Supply Co., New York, presented its force of employes with a handsome Christmas bonus in recognition of the fact that they had contributed materially to the closing of the company's biggest year.

In addition to this Christmas bonus, every employe in the Heineman executive and sales offices throughout the country was presented by Mr. Heineman with a \$5 war saving certificate, and accompanying this certificate was a suggestion from Mr. Heineman that the employes recognize the Government's splendid thrift plan embodied in this war saving stamp plan.

VICTOR FRENCH COURSE IN DEMAND

Represents a Timely Contribution to the War Needs of the Country From the Talking Machine Trade—Being Strongly Featured

Victor wholesalers and retailers generally are evincing more than usual interest in the new Victor course in practical French for the American soldiers, which, as has been announced in The World, is contained complete in three double sided records, accompanied by explanatory text books and selling retail at \$2.50 for the course.

The Victor Co. has issued for use and distribution by the retailers a most attractive folder explaining the idea back of the preparation of the course and some facts regarding it. The folder is illustrated by interesting photographs of the American soldiers in France and a sec-

Victor Poster Design of French Course

tion of the first lesson is also reproduced to give an idea of its character.

The new course, as it stands, represents a most notable contribution to the war needs of the country from the talking machine trade, and in announcing the course in the booklet the Victor Co. says:

"The directors of the Victor Talking Machine Co., desirous of contributing to the comfort, the welfare and the safety of our gallant troops, ordered the preparation of a practical course in French which would take care of the soldier's immediate needs, serve as a working basis for further development, and be put on the market at a small fraction of the usual cost.

"To accomplish any such ambition it was necessary to make sweeping departures from precedent. It meant endless study, endless consultations with recognized authorities, endless elimination of nonessentials. This finally has been achieved and a practical, comprehensive system has been devised through which a working knowledge of French may be obtained quickly. Instead of costing \$40 or \$50, it costs \$2.50."

The point is made that the course is in no sense intended to be a grammatical treatise on the French language, but is designed to enable the American fighting man to make his needs known directly and in idiom if necessary.

It is expected that many thousand sets of the records will be sold in the near future to follow the thousands of sets that have already been ordered.

EXTRA VICTOR CO. DIVIDEND

The Victor Talking Machine Co. has declared the regular quarterly dividend of 1 3/4 per cent. on the preferred and 5 per cent. on the common stocks; and an extra dividend of 15 per cent. on the common. The extra dividend was payable December 15.

The Columbus Stradivara Co., of Columbus, O., has been incorporated with a capitalization of \$100,000 for the purpose of manufacturing musical instruments, William J. Shaver being one of the principals.

KOCH-O-PHONE
\$24.50

No. 23

The KOCH-O-PHONE is the FORD of the Phonograph world. There is no charge for the name or expensive advertising added to the cost. Most people would rather pay \$48 (resale price) than \$100 for the same amount of pleasure. Plays all makes of disc records. No disconnecting needed in exchanging from one make of record to another. Simply turn the sound box and change needle to suit make of record. This machine for tonal quality and volume is not excelled by any \$100 machine on the market.

No. 23—Height 43 in., width 19 1/2 in., depth 22 in.; double spring worm driven motor; 12 in. turntable, all metal trimmings are nickel plated; made in mahogany finish. With tone modifier; weight about 125 lbs. \$24.50

GROWTH IN THE DEMAND FOR TALKING MACHINE PARTS DISCUSS PLANS FOR THE NEW YEAR

Illustrated in the Development of the Business of the Doehler Die-Casting Co., of Brooklyn—New Fireproof Building Recently Occupied by This Company Most Completely Equipped

The Doehler Die-Casting Co. are completing a year of great advancement. Not only is the

increase shown in volume of business but in the actual size of their Brooklyn plant. During the year a seven-story glass and concrete addition was added to their already large plant, running through and facing on the next street. This new building at Court and Ninth streets, Brooklyn, is already filled and contains the general and executive offices of the company.

This building is entirely fireproof and offers the best of working conditions to the many employes. It is modernly equipped and contains among its features a "First Aid" room and employes' restaurant. During the year the aluminum die castings of phonograph parts, perfected by the Doehler Co., have become very popular in the trade.

The remarkable growth of this firm is shown by the fact that ten years ago they employed twenty men and now they operate four factories

Branch Managers of Otto Heineman Phonograph Supply Co. Visit Headquarters in New York to Talk Over Future Campaign

Otto Heineman, president of the Otto Heineman Phonograph Supply Co., was the host during the New Year holidays to several of his branch managers who visited New York to talk over plans for the new year. Among these visitors were S. A. Ribolla, manager of the branch in Chicago, and C. T. Pott, manager of the Canadian branch at Toronto.

Both visitors spoke enthusiastically of the business outlook in their respective territories for 1918 and substantiated this optimism by bringing with them good sized orders to be filled immediately. Their sales totals for 1917 indicated that the Heineman business in their sections had far exceeded expectations, but they expressed the belief that 1918 will far out-distance these figures.

While here, Messrs. Ribolla and Pott conferred with Mr. Heineman regarding the important new plans to be announced in the near future and made arrangements whereby the manufacturers in their territories will be afforded excellent service during the coming year. Both of these visitors, in addition to the other Heineman branch managers, will spend some time in New York the end of this month, when the annual conference of the Heineman sales staff will be held.

Main Entrance Doehler Die-Casting Co.

Executive Offices of the Company

Where Estimates and Costs Are Figured situated at various points throughout the country and employ well over one thousand men.

The Doehler Die-Casting Co. are very optimistic over the new year, which so recently made its debut, and are making plans accordingly.

BUYS BETHLEHEM T. M. CO.

Penn House Furnishing Co. Buy Assets and Good Will of Company Formerly Owned by E. J. Delfraisse—Business in Good Shape

BETHLEHEM, PA., January 14.—The assets, stock, fixtures, leases and good will of the Bethlehem Talking Machine Co. of this city was purchased last week by the Penn House Furnishing Co., of Allentown, Pa., Max Chanoch, president.

The Bethlehem Talking Machine Co. has been conducted for the last two years by E. J. Delfraisse, who has become Western representative of Jacob Doll & Sons, of New York. The company had no liabilities, which speaks well for a talking machine business, as seldom, when changes of this kind are made, are there nothing but assets to figure on. A. F. Jones, who has been connected with Mr. Delfraisse, will remain under the new management.

PARAGON MFG. CO. INCORPORATED

HICKORY, N. C., January 7.—The Paragon Mfg. Co., of this city, has been capitalized at \$30,000 for the manufacture of talking machines. The company is planning to produce three styles of cabinet machines and will merchandise through the dealers.

ST. LOUIS, MO.

BEARING OF FREIGHT SITUATION ON CINCINNATI TRADE

Western Manufacturers Watching Situation Carefully in Expectation of Increased Demand for Local Products—Deliveries by Motor Trucks—R. J. Whelan Resigns—Review of the Trade

CINCINNATI, O., January 5.—Talking machine manufacturers of the Middle West believe that a continuation of the present freight and express conditions in the United States will create markets for their output right in their own centers, thereby completely changing the situation of this important industry.

As is generally known, the larger manufacturers are located in the Eastern markets and the factories about Cincinnati believe that if these are to be handicapped in the future in the delivery of the finished product it will cause dealers to turn to producers nearer home. That is the way the present condition of traffic is being figured out. In the meantime, talking machine manufacturers as well as the piano industry of the Middle West is looking about for some one to institute a truck system between the larger centers in the Ohio Valley, which method of transportation will be relied upon by "home" manufacturers as an outlet for their energies.

Richard J. Whelan has retired as manager of the Cincinnati branch of the Columbia Graphophone Co., the change taking place this week. His successor has not been appointed. The branch is temporarily in charge of F. F. Dawson, of the New York office. Mr. Whelan's plans for the future have not materialized. He has had charge of the Cincinnati district slightly over seven years.

There was a falling off in the holiday business in the Middle West and Manager Greulich, of the Cable Piano Co., who is an enthusiastic Victor dealer, believes this may have been due to the appearance of the Government's questionnaire, which reached the homes of prospective selectives the week before Christmas. That appears to be the only excuse that can be given for the decrease. The trade generally found the

buyers wanted medium-priced machines and the average payment was higher than was the custom during the holiday rush of a year ago.

Chas. L. Byars, manager of the Vocalion department of the local Aeolian store, in commenting on the December trade, said that while the volume of Vocalion business was not as big as hoped for, yet the quality of accounts opened could not have been better. He remarked:

"The dealers and merchants of the country can do considerable toward allaying the apprehensions of the people by talking and acting in an optimistic manner concerning business conditions. If a dealer himself will be convinced that there is no shortage of money in the land, a very small percentage of unemployed, a higher average wage than ever before, he will have no trouble in taking an optimistic view of conditions."

Manager Dittrich, of the Victor department of the Rudolph Wurlitzer Co., said:

"The New Year has started off with a rush, especially in record business, and record stocks are disappearing rapidly. Most of the dealers report that it is absolutely impossible to keep their record stock complete, owing to the tremendous demand, which exceeds anything previously known in the talking machine line.

"In reviewing the holiday business, we find that December started off in good shape, but that towards the middle of the month business began to fall behind that of last year. Last week, however, proved to be the busiest week that Cincinnati merchants ever remember having experienced.

"While machine sales came up splendidly during the latter part of December, the record business was the one big surprise of the season, and as most dealers were well prepared, splendid results were secured.

"With conditions rapidly becoming normal, and many problems being solved, there is no reason to expect anything else but a most successful talking machine year during 1918. The big question will be stock, and it will be necessary for the progressive dealer to look far ahead in placing orders for his requirements for the year."

New models are to be produced about February 1 by the Crystola Co. One will sell for less than \$110. The style and details of the other have not been formally adopted. Ben Schwenger, the Cleveland district representative, was in town this week, arranging for his year's supply of Crystolas.

Mr. Neumeister, of the Otto Heineman Phonograph Supply Co., is getting through a satisfactory amount of his required supplies and generally speaking is well satisfied, considering conditions.

The Fritzsche Phonograph Co. will enter the South American field, having arranged to be represented there by the North Brazil Machinery Syndicate, with headquarters at Fortaleza Ceara, Brazil. The South American firm represents some thirty-eight American concerns. The Fritzsche house, launched less than a year ago, has twenty dealers to its credit, including a firm in Australia, and is doing a splendid business. Their products are winning much genuine appreciation.

The All-Ohio Singing Contest, as conducted by the Columbia Graphophone Co., in connection with the Scripps newspapers, came to a close last month, at Columbus, O., when Miss Ruth Stein, of Akron, and E. C. Mulholland, of Toledo, O., were selected as winners. H. A. Herrick, the Columbia's special representative, personally escorted the winners to New York, where they will have their voices recorded in the Columbia's laboratory. It is expected now that the records will be ready for the market the latter part of January, and all are anxiously looking forward to hearing the records of the successful contestants.

BRILLIANTONE STEEL NEEDLE CO.

New Company Organized in New York With B. R. Forster as President to Specialize in Steel Needles—Offices in the Marbridge Building

The new year has ushered in a new needle house into the talking machine industry. It is entitled the Brilliantone Steel Needle Co., of

B. R. Forster

New York. Although the firm is new, the "men behind the guns" are not new to the trade.

B. R. Forster, the president and treasurer of this new concern, has been connected for some years as the general manager with I. Davega, Jr., Inc., and in that position developed an enormous needle business for that house.

H. Ettinger, vice-president, has had a large experience and acquaintance throughout the trade through his former connection as the

manager of the talking machine department of Kranich & Bach.

H. A. Acton, another experienced man, is appointed as secretary.

The Brilliantone Steel Needle Co. opened offices on January 2 in the Marbridge Building, Broadway and Thirty-fourth street, suites 657 and 658, and Mr. Forster extends a cordial invitation to members of the trade to visit them

H. A. Acton

at the above address and to his out-of-town friends to make their offices their headquarters while in town.

This company will specialize entirely in steel needles, in medium, half-tone, loud and extra loud grades, and have selected for their slogan the following line, "Highest quality uniformly pointed steel talking machine needles made in America by American labor." They plan to begin deliveries of needles on February 1.

SAFETY HINTS FOR EDISON WORKERS

Pertinent Suggestions As to Means for Avoiding Factory Accidents Offered by John D. Otis and M. M. Jones at Recent Committee Dinner

Safety suggestions of value to workers were given by John D. Otis, of the American Museum of Safety, and by M. M. Jones, personnel department of Thomas A. Edison, Inc., following a dinner of the Workmen's Committee of the Edison Phonograph Works, in the clubhouse of the Thomas A. Edison Association, Orange, N. J., recently. The speakers gave an outline of what safety committees can accomplish and advised the men to specialize their investigations so as to become experts in eliminating dangerous hazards, and to secure the greatest possible benefits from their study of conditions in the plant. The need of teaching workers to anticipate and avoid dangers which naturally follow carelessness and lack of caution was pointed out and the speakers urged the men to at all times "think safety," as well as to act safely, when going about their daily work. Co-operation between men on the safety committees with foremen was pointed out as an excellent method of securing good results.

The human element, Mr. Otis pointed out, is the biggest factor in plant accidents. All the guards in the world, in his opinion, will not save a man from injury unless that man keeps his mind fixed on his tasks and at all times pays strict attention to the operation he is engaged in. He paid a compliment to the safety committees and declared that, owing to the interest taken by them in their work, the co-operation of other workers is being secured, and the men are disposed to listen to suggestions made from time to time for their safety.

Motion pictures were also shown, illustrating accidents of various kinds, each film presenting a different lesson.

Costs No More Than a Good Stand!

Purchasers of small Victrolas want a Converto Cabinet the minute they see one—because: it takes the place of a stand, covers the machine, converts it into a handsome cabinet type, provides dust-proof record compartment—all at a cost no higher than for simply a good stand that has none of these features.

Lundstrom
CONVERTO
PATENT APPLIED FOR

**Talking Machine
Cabinet**

It appeals likewise to present owners of small Victrolas. At little additional cost it gives them a cabinet machine. It revives interest in their machines and in buying new records.

Front doors of machine open through upper doors of cabinet and combine to make a continuation of the horn. The Converto is broadly protected by patent. Two sizes, retailing for \$20 and \$25—allowing a good profit to dealers.

This is a substantial proposition attested to by many of the country's leading dealers.

MORE USE FOR THE PHONOGRAPH

Cortina Academy of Languages Using That Argument as Basis for Campaign

The Cortina Academy of Languages are carrying on a campaign along the lines of getting more use out of the phonograph. It is their contention that the phonograph in the home is too often reserved for purely entertaining purposes. Through various forms of advertising literature and car cards, the owner of a machine is advised of the possibilities in their phonograph for acquiring the knowledge of one or two additional languages. Through the use

Cortina Illustrative Idea

of attractive "home" photographs, one of which is here reproduced, the ease and comfort of self-education in the home is attractively portrayed.

The necessity of acquiring a knowledge of military French was anticipated by the Cortina Academy and the result was a set of military French records that are proving very popular throughout the country.

While this campaign is, of course, primarily intended for the increased sales of Cortina records, the effect is bound to be felt by the trade in general through supply sales as well as instruments, and to the dealers carrying the Cortina line the campaign should prove especially helpful.

TO INCREASE OUTPUT OF NEEDLES

Factory Making the Wall-Kane Steel Needles Enlarged to Meet Growing Demands

"It is a sound business principle that in order to succeed any merchant must give the public the greatest value for its money," said D. F. Tauber, president of the Progressive Phonographic Supply Co., New York, sole distributor of the Wall-Kane steel needles. "This principle certainly applies to the needle business and our dealers tell us that they have been able to give their patrons splendid service and value in the Wall-Kane needle. This needle, through the use of chemical processes, plays ten records perfectly, and these same processes give the point of the Wall-Kane a coating that benefits the record and adds to its longevity.

"At the present time our needle is being handled by progressive jobbers throughout the country and our recent factory enlargements will enable us to increase our output materially during the coming year. I may add further that we have received quite a number of letters from dealers, referring to the excellent tone quality of the Wall-Kane needle and the satisfaction it is giving all users."

The Daniels Music Co. recently opened elaborate Edison parlors at 106-108 East Fifth avenue, Arkansas City, Kansas, where they are featuring a full line of Edison Diamond Disc phonographs and records.

JOE SCHWETZ GENERAL MANAGER

Placed in Charge of Wholesale Victor Department of I. Davega, Jr., Inc.—Company Reports Excellent Business Record for 1917

I. Davega, Jr., Inc., Victor distributors, 125 West One Hundred and Twenty-fifth street, announce that Joe Schwetz, who has been connected with the firm for years, has been appointed general manager of the wholesale department. Mr. Schwetz succeeds B. R. Forster, who recently resigned and is now in business for himself. Mr. Schwetz has been Mr. Forster's assistant for some time and is thoroughly conversant with the work.

Mr. Schwetz has a wide acquaintance in the field and his efficient management, together with that of Abram Davega, who has general supervision over all affairs of the company, gives great promise of a fine year ahead for that company.

Records show that I. Davega, Jr., Inc., have just concluded one of the best years in the history of the firm. During the coming year it is announced that they will handle Victor products exclusively. As a further aid to dealers, they have obtained a supply of record cabinets for 4's and 6's, of which they have a large stock on hand.

SOLDIERS LIKE WESER PHONOGRAPH

Members of 21st Company, 153rd Depot Brigade, Send Letter of Appreciation to Weser Bros.

A Weser phonograph has been a source of entertainment for many of the soldiers at Camp Dix, Wrightstown, N. J. The machine was presented to the Twenty-first Company, Sixth Battalion, 153rd Depot Brigade, who have expressed their appreciation in a letter to Weser Bros., 520-530 West Forty-third street, New York, which was signed by every man in the company, as well as Capt. W. H. England. A number of records were also sent with the machine.

MME. MUZIO VISITS PATHE SHOP

Prominent Pathé Artist Inspects New Retail Quarters Opened in Philadelphia

PHILADELPHIA, PA., January 7.—One of the recent visitors at the new Pathé Shop, recently opened by the Philadelphia Pathephone Co., at 1026 Chestnut street, was Mme. Claudia Muzio, the prominent operatic soprano, who is a member of the Metropolitan Opera Company, and an exclusive Pathé artist.

Mme. Muzio has made several Pathé records which have been very well received by the dealers, and when she visited the Pathé Shop she expressed her keen appreciation of the handsome warerooms which the Philadelphia Pathe-

Mme. Muzio and the Pathé

phone Co. have established, congratulating Mr. Eckhardt upon the progress he is making and upon the exquisite decorations in his retail shop.

INCORPORATED

The National Phonograph Co., Chicago, has been incorporated with a capital stock of \$10,000. The incorporators are Martin Rasmussen, Harry Rasmussen, and Frank Cummings.

The Trade Is Advised

DESIGN OF CABINET

That I have been granted United States Letters Patent No. 1,244,944, dated October 30th, 1917, on a cabinet for Talking Machines (the design of which is shown herewith) and for which the following claims are made:

1. A cabinet for a talking machine having a top on which the casing of the machine is adapted to be supported, an inclosure rising from said top, and formed of cleats which are adapted to engage the sides of the base, certain of the cleats being fixed to said top and another cleat forming a gate for entrance into the space of the inclosure, and means for holding the gate in closed position and permitting its opening.

2. A cabinet for a talking machine having a top on which the casing of the machine is adapted to be supported, cleats rising from said top forming an inclosure for the sides of the base of said machine and adapted to interlock therewith, one of said cleats being separate from the other cleats and movable forming a gate for the insertion of said base into the space of said inclosure, the inner sides of the cleats overhanging so as to form interlocking joints with said base.

I am prepared to protect my interests under said patent to the fullest extent and all infringers will be prosecuted vigorously.

HANDSOME NEW DELPHEON MODELS

New Hepplewhite Model Table Machine and William and Mary Model Cabinet Machine Recently Added to This Comprehensive Line

The Delpheon Co., Bay City, Mich., has just placed on the market two handsome art models which are shown in the accompanying illustrations. The table machine will be known as the Hepplewhite model and the cabinet machine as the William and Mary model. The latter will retail at \$200 and the former at \$400. The William and Mary model will be equipped with all

The Hepplewhite model measures fifty-six inches long, thirty-six and one-half inches high and twenty-five and one-half inches deep. It is made of the very high grade mottled mahogany and the experience and knowledge of the Delpheon finishing department is used to excellent advantage in giving this instrument a most beautiful finish. It has a beautifully carved grille and the posts are also carved. A heavy plank top is used. The center front section curves outwards, while the two end sections curve inwards.

On each side of the grille are the standard Delpheon individual compartment record files

An electric motor will be used. The reproducing equipment is the same as on the other models, with the exception of the resounding chamber,

Hepplewhite Model Delpheon

Delpheon features, including the three spring motor playing seven ten-inch records. Only the very choicest five-ply mottled mahogany is used throughout.

working on slides and giving a total capacity of 210 records. This model will be equipped with gold hardware with the exception of the drawer pulls, which will be finished to match the wood.

William and Mary Model Delpheon which is of unusual size and gives a remarkable tone quality.

In spite of the fact that the Delpheon Co. has not yet sent out photographs or descriptive literature featuring these two art models, the first order on each model given to the factory has been sold out. From all indications these two instruments will be very successful and the factory is planning to devote considerable time to the production of these art designs.

ACTION ON STEPHENS BILL COMING

Predicted That Congress Will Take Up the Discussion of Measure Early This Year

WASHINGTON, D. C., December 30.—Congressional action on the Stephens Standard Price bill early in the coming year was confidently predicted to-day by E. A. Whittier, secretary-treasurer of the American Fair Trade League, who is in Washington following the opening session of Congress. Mr. Whittier has kept in close touch with the progress of the measure and his prophecy, therefore, carries some weight. Mr. Whittier also took occasion to reply in no

uncertain terms to the statement issued by the National Retail Drygoods Association concerning the recent complaints filed by the Federal Trade Commission against Mishawaka Woolen Mfg. Co. and the Cudahy Packing Co., and charged that the statement was issued without any real knowledge of the facts in the case.

"Mr. Howe is quoted as saying," declared Mr. Whittier, "that 'the fact that advocates of price maintenance are seeking a new law is in itself evidence that the present law (the Clayton Act) prevents their doing what they would like to do without laying themselves open to prosecution.' This certainly indicts Mr. Howe's intelligence, or his sincerity, for everybody else

knows, even if he does not, that the Stephens bill was introduced and actively supported in Congress a year before the Clayton Act was drawn. Moreover, it will be difficult for Mr. Howe to find anything in the Clayton Act which even remotely involves the Stephens bill stabilization principle for the prevention of predatory price cutting. Rather, its whole theory supports that principle and eliminates cut-throat competition and unfair discrimination."

It has been said we don't succeed so much on our own acts as we profit by the mistakes of others. And there's a lot of truth in the statement.

HOW NEW YORK TALKING MACHINE CO. STAFF CELEBRATED

Executives Prepare a Very Pleasing Surprise for Entire Force at Christmas Time—Substantial Evidence of Appreciation of the Work of the Men—Entertained Also at Travers Island

On Christmas Eve, as a surprise to the office and sales force of the New York Talking Machine Co., the executives had set up, trimmed and brilliantly lighted, a beautiful Christmas tree, which seemed to symbolize the spirit pervading the whole organization.

As the members of the New York Talking Machine Co. gathered around this tree singing

more tangible form than mere words the company's sincere appreciation of the loyal services rendered throughout the year.

The week following, on New Year's Eve, part of this group, composed of the sales and office force with their wives and sweethearts, were the guests of Vice-President R. J. Keith at the Travers Island Club House of the New York

Christmas Party of New York Talking Machine Co. (Sales and Office Forces Shown in Picture) the beautiful old Christmas carols and wishing one another a "Merry, Merry Christmas," a spirit of good-will, fellowship and loyalty to one another was evident on all sides. Christmas to the employes of the New York Talking Machine Co. meant more than long hours and the handling of a tremendous volume of business.

Piled high underneath the tree were gifts and packages for everyone. A. D. Geissler, president, after distributing the many gift boxes, surprised each of the group with a Christmas envelope, which, as he stated, expressed in a

Athletic Club. Gathered about the table, which was artistically and gayly appointed for this occasion, were a happy group of people. The dinner, dancing, and merrymaking made New Year's Eve a memorable one for Mr. Keith's guests, one of whom was Miss Marie Morrisey, the attractive and talented concert contralto.

At 12 o'clock Mr. Keith wished to the group, and to each one individually, a New Year filled with health, happiness and prosperity, and the return toast to him voiced the feeling of fellowship, good-will and co-operative spirit that

is a very noticeable feature in the New York Talking Machine Co. organization.

335 STARS IN EDISON SERVICE FLAG

Service Banner Measuring 20 by 12 Feet Now Hangs at Entrance to Laboratories

At the entrance of the Edison Laboratories in Orange, N. J., hangs the great Edison service flag, twenty feet long and twelve feet wide, and bearing 335 stars, each one representing an employe who has gone from the Edison plants to render active service to his country in this present emergency. The flag not only serves to eulogize those who have entered the service, but likewise acts as an inspiration to those who are still following their peaceful pursuits while awaiting their turn to serve.

SOME NEW CORPORATIONS

The Superior Mfg. Co., Wilmington, has been incorporated under the laws of Delaware with a capital stock of \$350,000 to engage in the manufacture of talking machines.

The Electrone Co., Inc., Dover, has been chartered under the laws of Delaware with a capital stock of \$100,000 to engage in the registration of vocal and instrumental sounds on discs, etc., in other words, to make talking machine records.

The Uniset Reproducer Co., Chicago, has been incorporated with a capital stock of \$25,000 to manufacture mechanical devices for phonographs and musical instruments.

Articles of incorporation have been filed by the Melodious Reproducer Co., of Milwaukee. The capital stock is \$25,000, and the promoters are Clarence M. Ustick, Everard H. Grove and D. C. Van Dyke.

The National Phonograph Co., Chicago, has been incorporated with a capital stock of \$10,000. The incorporators are Martin Rasmussen, Harry Rasmussen and Frank Cummings.

BRUNSWICK PROGRESS IN THE EAST

Exceptional Holiday Demand for Brunswick Phonograph—Sales Conference in New York—New Representatives Announced—Anxiously Awaiting the New \$1,500 Art Model

The New York offices of the Brunswick-Balke-Collender Co. have concluded an exceptionally fine holiday season, exceeding in volume of business the same period of the year previous.

During the last week of December a sales conference of twenty-five representatives of the company was held at Thum's, on Broadway, after which all "did their bit" at a banquet which was served. At this meeting plans were made for the coming year and new policies were adopted increasing the already high facilities of the organization.

It is announced that the following new salesmen have joined the Brunswick staff: F. H. Walter, E. S. Campbell, J. H. Wengrovius and Chester Abelowitz, men who are well known in the field and experienced.

All members of the sales staff are awaiting eagerly the coming of the new \$1,500 model of the Brunswick, which is expected to arrive almost any day. Advance information states that this new model will be finished both in English brown mahogany and American walnut and equipped with the universal electric motor. As no advance photographs of the new machine have as yet been received there is a great amount of interest in its arrival.

The New York office have been very busy opening new accounts during the past month. Among them might be mentioned, Edward Strauss, 94 Court street, Brooklyn; the Flatbush Music Co., 932 Flatbush avenue, Brooklyn; the Riley-Hogan Co., 125th street, and a department in the large department store of H. C. F. Koch & Co., 125th street. In the last case the New York office of the Brunswick-Balke-Collender Co. operate the department themselves. Reports already received from these new dealers indicate the popularity of the Brunswick machine in their locality.

NEW COMPANY FORMED IN TEXAS

Verhalen-Delphoon Sales Co., of Texas, to Distribute Products of Delphoon Co., Bay City

DALLAS, TEX., January 8.—A company has been organized in this city for the purpose of distributing the products of the Delphoon Co., Bay City, Mich., in Texas, Oklahoma and the Southwest. This company will probably be known as the Verhalen-Delphoon Sales Co. Walter Verhalen, of Dallas, is at the head of this organization, and is now making plans whereby the dealers in this territory will receive efficient service and co-operation. Mr. Verhalen made a trip to Chicago some time ago to look over high-grade lines of talking machines. While there he saw and heard the Delphoon, and was so favorably impressed with this instrument that he visited Bay City and closed the deal for distributing rights in his territory.

NEW REPRODUCERS ANNOUNCED

New England Talking Machine Co. Calls Attention to New Line of Perfection Flexi-tone Reproducers and Points Out Their Advantages

BOSTON, MASS., January 5.—The New England Talking Machine Co., of 16 Beach street, this city, announce their new Perfection Flexi-tone reproducers to the trade. These new reproducers allow for great interchangeability of records among the various talking machines. A very attractive circular is being sent to the trade calling the attention of the dealer not only to the many merits of the reproducer, but also the great sales help it affords the dealer. Perfection Flexi-tone reproducers attached to Perfection ball bearing tone arms Nos. 3 and 4 play all lateral cut records on all types of Edison disc machines and Perfection Flexi-tone reproducers Nos. 3, 6 and 7 are designed to fit all types of Victor and Columbia machines. It is claimed for these reproducers that they have a wonderful clarity of sound and will reproduce the sounds as perfectly as the recording at the laboratories, from the highest to the low-

est sounds. The New England Talking Machine Co. and its president, Chas. P. Trundy, are well and favorably known to the trade and their new product will, no doubt, receive the high popularity that it deserves.

PLAN TO SIMPLIFY BUSINESS

Credit Men Suggest Rules After Studying Office Procedure That Are Worthy Consideration

In order to co-operate to the greatest possible extent in supplying the nation's need of men for war service, the National Association of Credit Men recently made a study of office procedure, with a view to economizing labor there by simplifying processes. As a consequence J. H. Tregoe, secretary and treasurer of the association, was provided with three rules, copies of which he has sent out to all members of the association, with the statement that they were drawn up by the Committee on Commercial War Economy, and the request that they be observed. The rules are:

"1. That checks received in the course of merchandising, and unimportant letters and communications, be not acknowledged.

"2. That every dispensable and non-productive office or business device or system that can be released without decreasing the real abilities of the business be suspended during the war.

"3. That credit departments shall not inquire of other departments in unimportant cases, and that promiscuous and merely general inquiries be discontinued."

Mr. Tregoe, in the letter accompanying these rules, points out that even small economies of this description in office procedure may not only, in the aggregate, prove of value in conserving the working resources of the nation, but may also be vitally important in enabling the individual business to weather the hard times of the war period. These suggestions are well worth adoption by talking machine dealers who are seeking efficient methods of transacting their business.

LOS ANGELES BREAKS ALL PREVIOUS TRADE RECORDS

Every One Pleased With Volume of Business for 1917—Uneasiness Regarding the Securing of Stock in View of Transportation Conditions—Window Displays Receiving Much Consideration

LOS ANGELES, CAL., January 5.—In spite of the shortage of stocks and the slowness with which freight has been moving during the fall months, all previous records were broken in the talking machine business during the month of December. The demand for the medium-priced machines was noticeable, but a great many more than usual were disposed of during the holidays. Not that the large models were entirely overlooked, as a good many nice sales were made by the local dealers in the more costly designs, but the mass of the people seemed to be interested in machines from \$100 to \$150. Both record and machine stocks are very low at present and there are probably fewer machines and records in Los Angeles to-day than ever before at this time of the year. The outlook is not good for a replenishment at present, as the jobbing houses are not holding out any hopes for any shipments in the very near future. Just what the outcome will be is problematical, and in the meantime dealers are talking up the models they have in stock.

Just what effect the taking over of the railroads and steamship lines by the Government will have on our transportation facilities is a question at present. However, all local dealers are hoping for the best, as they figure that unless freights are entirely stopped they cannot be any worse off than they have been for the past six months. All indications point to a good business during January, as great activity is being shown in all lines of business. This part of the country is badly in need of rain, and although no damage has been done so far some of the crops will be much shorter than usual if we do not get some rain in the very near future.

Barker Bros. had a banner holiday trade and C. B. Boothe, their manager, says that all past records for December were broken. Barker's had the usual trouble in getting records and certain models of machines, many of which were entirely out of stock before Christmas. Mr. Boothe reports the sale of one of their own make period models. This was a very handsome machine and was so constructed that either the Edison Disc, Victor or Columbia interior could be installed. Price, \$1,250. The volume of business was so great that Mr. Boothe was compelled to close the talking machine department at 5.30 on Monday, the 24th, in order that the force could catch up with their orders.

C. S. Ruggles, manager for Sherman, Clay & Co., local Victor jobbers, says that he is thinking seriously of taking a vacation unless he is able to get some goods in the near future. Victor dealers all over Southern California are clamoring for machines and records and the Sherman, Clay & Co. stock is, of course, getting perilously low.

The Diamond Disc Distributing Co., local Edison jobbers, report a tremendous business in both Edison disc and cylinder machines and records. The C 250 and C 150 models were the best sellers during the holidays and Mr. Lovejoy, the manager, says they are running short on these two models and future shipments from the factory are uncertain. There was a big demand for the new Edison period model, the William and Mary, and all the dealers were sold out before Christmas. This is bound to be a popular machine and a ready sale for it is assured when the jobbers receive a new shipment.

The Southern California Music Co. just closed a most prosperous holiday business and many more machines and records were sold than ever before at this season. A large number of standard models were sold, but the medium-priced machines were mostly in demand.

The Columbia Graphophone Co., wholesale, report a fine business during December, and were in a better position to supply their dealers than the other jobbers, as they had an extra large stock on hand before the demand became so heavy. The Columbia Co. has put in quite

a number of new licensed dealers in Los Angeles during the last year, and report that they are all doing well and steadily increasing their business.

All local dealers are paying more attention to their windows than ever before and during Christmas week some very unique and beauti-

ful window displays were on exhibition, and attracted an unusual amount of interest and comment. This city has long been famous for its fine show windows, and during the last two or three semi-annual Fashion Shows the music stores and window displays have compared favorably with some of those of the smartest shops on Broadway. The people of this city are great "window shoppers," and the talking machine dealers are awaking to the fact that their windows can be dressed in such a way that they will greatly increase their business.

THE VALUE OF GOOD ADVICE

A New York business man relates that an employe of his, after being in business about eighteen months, found it difficult to meet his obligations. He said, in commenting on the case:

"As it not infrequently is found to occur in such cases, he was fairly beside himself and requested me to call on him. After giving me a résumé of his affairs his first impulse was to consult a lawyer. Instead of doing this I advised him to see his creditors, be open and

above-board with them, and explain affairs as they actually existed. At first he remonstrated, but when I demonstrated to him that no possible harm could result in doing this he finally decided to adopt my idea, and he called a meeting of his creditors.

"His creditors, almost without exception, acted splendidly toward him, with the result that he is still in business and gradually getting on his feet again.

"I am strongly of the belief that if more and wider publicity were given to this method it would be an advantage to debtors and creditors."

DETROIT TRADE STARTS THE NEW YEAR IN BUOYANT MOOD

Closed Most Satisfactory Business in 1917—Freight Congestion and Shortage of Stock Badly Felt—Detroiters Without Exception All Optimistic—Good Work of the Local Association

DETROIT, MICH., January 7.—Well, one more year has passed and it is indeed gratifying to know that the talking machine industry has prospered during the preceding twelve months and that the coming twelve months are very encouraging for good business. With very few exceptions every dealer in Detroit says he enjoyed a very good trade during 1917—better than the year before—and that the new year has started off excellently. The holiday business in December was very brisk, even if it did come in the ten days before Christmas! The early part of the month was just fair, but it brightened up considerably right after the 15th. The shortage of some particular models did not seem to make much difference because dealers were able to sell the customers something else. The announcement by many dealers that prices would advance January 1 had a lot to do no doubt with getting people to buy in December. December was a good month, and January will be a good month as compared with a year ago.

Record business is excellent even right now and has been. Patriotic popular numbers, such as "Over There," are in demand and are selling fast, as are also good dance numbers.

Now that the old year has elapsed some of the dealers are planning an early departure south for recreation and rest. C. A. Grinnell, of Grinnell Bros., will leave any day for his winter home at Sea Breeze, Fla., while Max Strasburg is planning to go golfing at Pinehurst. Others will take short vacations, feeling that they have earned the same after the strenuous December.

The coal situation is proving somewhat of a setback to business, many families doubling up, and not buying machines as they had previously intended. However, this condition is not interfering with the record business, which, as before stated, is just as brisk as ever.

The Edison Shop, according to R. B. Alling,

had a dandy year in 1917, many good dealers having been added to the list. Retail business in Detroit and throughout the entire territory has been on the increase.

Frank Bayley, Edison dealer on Broadway, says that his Edison business ran far ahead of expectations. He and the Edison Shop comprise the only downtown dealers and naturally their business would be good. The Edison Shop used many half and full pages in the local papers during December, which helped all Edison dealers.

Ed Andrew, manager of the talking machine department of the J. L. Hudson Co., says: "We more than reached our quota for December, also for the twelve months of 1917—so that we haven't the least complaint to make. We have been very careful in our credit department so that our collections have been unusually good. You know it's not always how much goods you can sell as how much you can actually collect each month." The Hudson store is now selling both the Victrola and the Sonora, and has been boosting both of them very strong.

Wallace Brown, now dealer for Brunswick phonographs, said he had a dandy holiday business, selling a great many more machines than he had really planned for. He is determined that 1918 shall be even better. Frankly, Mr. Brown did not expect a big business during 1917 on Brunswicks, feeling that it would take six or seven months properly to introduce the phonograph to the Detroit public.

The Detroit Talking Machine Dealers' Association has accomplished excellent results during the year just passed. Some very bad trade evils have been eliminated, partially or wholly, and only by proper co-operation. The organization has been working harmoniously and every member feels that he has received more than his "money's worth" for his dues. During 1918

even greater results will be accomplished, if the plans in contemplation do not go amiss.

Generally speaking, Detroit looks mighty good for 1918. Its industries are staple; war orders for trucks, munitions and shells, running into millions and millions of dollars have already been let, and a number of new million-dollar factories are being erected to handle nothing but war orders. In addition, it is expected to make Detroit the center of the manufacture of airplane motors and parts, and already several big orders in Detroit have been placed by the Government. Detroit business men are all optimistic and really believe that 1918 will be one of the greatest years in the history of the town.

Keenan & Jahn did a nice December business with the Aeolian-Vocalion. It was really their first month with this line. John D. Angeli, manager of the new department, says that a great many people have been in "looking" with promises that they would buy later.

Sam Lind, Columbia manager, says he has had a very big year, with more and better dealers than ever before.

Williams, Davis, Brooks & Hinchman Sons, Michigan Pathé jobbers, had more business in 1917 than they thought it possible to secure, and are exceedingly well pleased with their affiliation with Pathé. They have disposed of more machines and records than they originally planned on, and have surprised the factory several times with telegrams for more goods. They now have a big stock and are in excellent condition to fill orders from their dealers.

LOCATED IN NEW QUARTERS

The M. A. Barker Music Co., Poplar Bluff, Mo., is now located in new quarters in the Greer Block, that town, where they are featuring Columbia Graphophones, Starr phonographs and other musical goods.

The Browne-Wolf Drug Co., of Healdsburg, Cal., with headquarters on West street, has taken the agency for the Victor talking machine.

"off the shelf"? You spend time and money freely on the design of a cabinet, why compromise on the tone arm? Why don't you put the same thought into the tone arm? Make it at least as distinctive as the cabinet.

We have experts who are specialists in designing tone arms that will blend with your cabinet in quality and appearance—that will continue quality unbroken from sound chamber connection to stylus groove.

These men are ready to serve and prove to you by sketches and figures that "INDIANA" made tone arms will increase the value of your machine and make it a better selling proposition.

Bear in mind that acceptance of this service does not obligate you in any way and anything developed for you is for you exclusively, and is not sold or sampled to your competitors.

OVER 500 VICTOR MEN IN SERVICE

Roll of Honor, Bearing Names of All Those Now in Armed Service of Country, Now Installed in Hall of Administration Building

In paying tribute to the hundreds of their employes who have entered the military service of the country, the Victor Talking Machine Co. has departed from the service flag idea and as a result there now appears in the main hall of the Administration Building in Camden a tall mahogany pedestal, surmounted by a silken American flag and bearing, on swinging panels, the names of the Victor employes to the number of over five hundred who have entered the service of Uncle Sam, together with the department in which they had been employed. Surmounting the roll of honor is a placard on which appears the following: "In appreciation of the splendid display of loyalty by members of all departments, the directors of the Victor Co.

have ordered that this roll of honor, containing the names of the employes who are known to have gone direct from this plant to join the armed forces of the country, be posted and maintained during the period of the war."

ENTERS THE FIELD IN MILWAUKEE

Triumph Phonograph Co., Organized in That City, to Manufacture Machines of New Type

MILWAUKEE, WIS., January 7.—As the result of years of study of the reproduction of the human voice by mechanical means, Albert C. Ehlmann, a well-known singer and musician, has evolved a new phonograph which will be manufactured and marketed under the name of the "Triumph." Mr. Ehlmann has organized the Triumph Phonograph Co. with a capital stock of \$25,000 for this purpose, and with him are associated Julius E. Kiefer and Robert A. Kiefer. Offices have recently been opened in this city.

The Triumph Co. has decided for the present to contract for the manufacture of its product. It has made connections with concerns specializing in such work so that the machine will be constructed strictly in accordance with the plans of the designer and under his direct supervision. Mr. Ehlmann has been elected secretary-treasurer and general manager of the new company. Julius E. Kiefer is president and Robert A. Kiefer is vice-president. An active selling campaign is now being planned.

GRAND RAPIDS DEALERS TO MEET

GRAND RAPIDS, MICH., January 7.—The annual meeting of the Grand Rapids Retail Music Dealers' Association will be held on January 17. An elaborate program is now being worked out for the occasion. Otto Friedrich, of the Friedrich Music House, and Clayton Hoffman, of the Herrick Piano Co., are in charge of the arrangements.

HELPS MUSICAL APPRECIATION

The Important Part Played by the Talking Machine in Stimulating a Love for Music Forms Subject of Editorial in Munsey's Magazine

In the December issue of Munsey's there was an excellent editorial in which the importance of the talking machine and the player-piano as factors in musical development and appreciation was dwelt upon in a very sympathetic way. These two instruments were estimated as among the most notable inventions of the age, and it was pointed out that the true musical artist neither feels nor affects contempt for the talking machine or the player-piano. In this connection the writer says:

"He (the artist) knows that the roll of perforated paper can sound chords which the fingers of Paderewski cannot compass; that the earliest appreciation of musical timbre and orchestral coloring may be derived from half a dozen black discs.

"In music, as in every other art, the first requisite to the development of a sound and cultivated taste is frequent contact with the work of artists. A person of sufficiently acute mind, hearing music and more music and more music of all kinds, could conceivably end by deducing for himself every principle on which music is based. A person of merely average intelligence who will use it as he listens will, if opportunity to hear music comes often, arrive eventually at a fair understanding of what constitutes good music. More than that, he will have some inkling why it is good, and will appreciate what he hears at somewhat near its actual worth.

"The case for vocal music is even stronger. We shall have an unusual lot of it this winter, and the reference is not to concert platforms, but to chorus-singing in the home, in the church, in the camp. The chorus is a community enterprise hitherto undeveloped in America, but less likely to suffer neglect in the future. Interest in choral singing has been powerfully stimulated by the plans of Major-General Franklin Bell and others to make the American soldier a singing soldier because, as General Bell rightly declares, a singing soldier makes a fighting soldier. Choral singing is capable of developing more enthusiasm than any other form of the musical art. It can progress to the heights of Parnassus, and it carries the singer with it.

"The secret does not lie in the artistic knowledge and appreciation acquired, but in the kindling of generous emotions, their liberation or 'motor discharge,' as psychologists would say;

above all in the creation of that contagious fellowship and general good-will which are vital to the success of an army and richly profitable to the life of each single human soul."

COLUMBIA MANAGERIAL CHANGES

Geo. W. Hopkins, General Sales Manager of the Columbia Co., Makes Important Announcement

Geo. W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, has announced the following organization changes effective as of January 1:

R. J. Whelen, manager, Cincinnati branch, resigned.

F. F. Dawson, of the general sales department, temporarily in charge of the Cincinnati branch, as acting manager.

F. A. Denison has been appointed manager of the San Francisco branch.

K. Mills has been appointed assistant manager of the New York branch.

S. H. Nichols, at his own request, has been appointed manager of the Pittsburgh branch.

H. A. Yerkes has been appointed field sales manager, and, as the title indicates, will actively represent the general sales department in the field.

CATALOG OF THOMAS PHONOPARTS

Details of the Dayton Motor and Other Talking Machine Accessories Made by Thomas Mfg. Co. Set Forth in Elaborate Manner—New and More Comprehensive Catalog Now in Work

A booklet that should prove of interest to talking machine manufacturers or those who contemplate entering that field is the elaborately designed illustrated catalog of phonoparts issued by the Thomas Mfg. Co., of Dayton, O., recognized as among the largest manufacturers of motors, tone arms, sound boxes and talking machine parts for the trade. The present catalog of the company serves to show various models of the Dayton motor complete and ready for installation, and with the various excellent features clearly indicated.

Facing the pictures of the motors there appear plates showing the various parts disassembled. Each part is carefully numbered, and the name of each appears in a list printed underneath the plates.

The second section of the catalog is used to illustrate and describe the various models of tone arm and sound box combinations, with the specifications of each detail carefully set forth. Special attention is given to descriptive matter regarding the Dayton sound boxes. Turntables and other Thomas Co. products also receive attention in the catalog.

Of general interest are excellent views of the exterior and interior of the great Thomas Mfg. Co. plant, illustrating the actual work of making phonograph parts, and two pages given over to a semi-editorial on building business and emphasizing the qualities of the service idea.

The Thomas Mfg. Co. announce that they have now in preparation a new and more elaborate catalog which will be ready for publication in a few weeks.

OVERENTHUSIASM UNWISE

Many advertisements are made misleading, not through any deliberate intention of being dishonest, but because of the overenthusiasm of the advertising man who somehow seems to think that the goods and values his store has to offer are far better than those of any other store. He feels that each item advertised has to be lauded to the skies, although, as a matter of fact, it is just an ordinary piece of merchandise at a fair price. That is the reason many old established stores prefer to print advertisements with little descriptive matter.

The Wasech Phonograph Co., Salt Lake City, Utah, has changed its name to the Ashworth-O'Loughlin Co.

Why the WALL-KANE STEEL NEEDLE

is superior to any ordinary steel needle and why it plays 10 records perfectly

No. 1

No. 2

The Wall-Kane Steel Needle is the finest grade of ordinary domestic steel needle, wonderfully improved by chemical processes, which, briefly described, are as follows:

The highest grade of steel needle of domestic manufacture, and playing one record only, is first subjected to chemical processes by which the grain of the needle is made very much finer (see illustration under magnifying glass).

After this process the needle looks all black, like illustration No. 1. Considerable quantity of the charcoal in the original needle is now eliminated, and the needle greatly strengthened by the finer grains and the elimination of the charcoal.

The needle is then subjected to various chemical processes, which result in softening the point so that the grooves of the record are very much benefited. While in this process the needle looks like illustration No. 2.

Three different coats of certain chemical solutions are then placed on the point of the needle, so that, by the protection afforded by these coatings, the needle will positively play at least ten records before the friction with the grooves reaches the original grain of the point.

BEWARE OF IMITATIONS

This handsome metal enamel display stand holds 60 packages, 2 doz. extra loud, 1 doz. medium and 2 doz. loud; each package containing 50 WALL-KANE NEEDLES, retailing for 10c. Price of stand to dealers, \$4.00. Single packages, 6½c.

WORKING IN CAMP FUNSTON ZONE

The Schmelzer Arms Co., of Kansas City, Are Catering to Needs of Uncle Sam's Boys—Handle Great Volume of Holiday Business

KANSAS CITY, Mo., January 3.—The Schmelzer Arms Co., prominent Victor wholesalers and dealers, who have as their slogan: "The most interesting store in Kansas City," report an unusually active holiday season, despite the fact that they saw real money getting away from them owing to a serious shortage of Victor goods. The Schmelzer Arms Co., however, in addition to being talking machine jobbers, are also one of the largest sporting goods houses in the world, and have a building with a 125-foot frontage, devoted to sporting goods of all kinds. There is even an entire floor devoted to toys which is a mighty active place just before Christmas.

The talking machine business during the holidays was notable for the demand for the higher priced machines, although there were quite a few medium priced outfits purchased for the boys in the military camps.

The Schmelzer Arms Co. recently opened a completely stocked store in the zone established just inside the reservation at Camp Funston, Kansas, which is one of the largest camps in the country. The space in the zone is leased to concessioners by the Government and each concessioner must erect his own building, although all must be of uniform design. In the zone are to be found three theatres, a billiard and pool hall, and stores of all sorts, the idea being to meet the demands of the soldiers without requiring them to leave the reservation and meet the temptations in the various towns nearby. The prices in the zone are practically governed by the general managing, and are in every case to the advantage of the soldiers. The Schmelzer Arms Co. building there is fifty feet square, and two stories high, and contains about practically everything in the sporting goods line from

clothes to fishing tackle. There are also talking machines and records on hand.

The company has closed the banner year in its history, due largely to the untiring efforts of the officers, who are Chas. J. Schmelzer, president and treasurer; Harvey J. Schmelzer, vice-president and secretary; Arthur A. Trostler, assistant secretary, and Stanford S. Madden, assistant treasurer.

ENLARGES ITS BOOTH EQUIPMENT

The Delpheon Sales Co., of New York, Augments Its Conveniences for Dealers

The Delpheon Sales Co., 25 Church street, New York, local distributors for the products of the Delpheon Co., Bay City, Mich., recently added a number of booths to the equipment of its New York ware-rooms in order that out-of-town dealers and interested music lovers might have maximum convenience at their disposal when listening to this successful phonograph. These booths are furnished attractively and comfortably, the furnishings and decorations being in complete accord with the musical qualities of the Delpheon and the success which it has achieved throughout the country.

J. D. Manton, head of the Delpheon Sales Co., is a firm believer in the value

of attractively decorated warerooms, and his stores are models in this respect. Well lighted and ideally arranged, his establishments have won the enthusiastic approval of all visitors. The Delpheon line is completely "at home" in New York, and the Delpheon Sales Co. is preparing to handle an extensive wholesale business in this territory during the coming year.

MISS TRUSSLER JOINS NAVY

Miss E. A. Trussler, a member of the Columbia Co.'s advertising department, has been appointed a yeoman in the U. S. Navy, and on January 1 assumed her new duties at the Brooklyn Navy Yard. Miss Trussler leaves for this patriotic work with the good wishes of all her associates, with whom she has been very popular for several years past.

The Attractive Quarters of the Delpheon Sales Co.

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
H. SCOTT KINGWILL, Ass't. Mgr.

World Office
Republic Bldg., 209 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., January 10.—What is the use of trying to do a thing yourself when you can get others much more competent to do it for you? The proper thing to do at the present time is to review the talking machine business for the last year and to make a forecast regarding the future. With this idea in mind the Chicago representative of The World asked a number of leading men in the talking machine trade of Chicago to do this very reviewing and prophesying. Of course, this is a very busy time. Inventories are in progress and plans are in the making for the new year. By no means all of the men who were written letters on this subject responded, but those who did accomplished the task to the entire satisfaction of the inquirer, who is very sure that the trade at large will read with great interest these communications. Here they are:

Griffith P. Ellis' Interesting Views

Griffith P. Ellis, sales manager of the Chicago Mfg. Machine Co., in discussing the business situation, said:

"After closing our books with the most successful month of the largest year in our history, I can't feel anything but pleased over general conditions in the talking machine business for 1917.

"The year was one that brought its alarms to the talking machine industry, just as it did to all others. It was a period of mental readjustment to wartime conditions, with no precedent to guide the trade, as in previous wartime periods the talking machine industry was not of any substantial proportions.

"When war was first declared there was a feeling of anxiety as to the future, but as the first few weeks passed after the declaration of war and retail sales remained about normal, the feeling of confidence returned.

"The two offerings of Liberty Loan Bonds also proved upsetting for perhaps three or four weeks around the period when the strong drive was on; but the lull in business was only temporary and was subsequently offset by increased purchases by the public shortly after the close of the bond selling campaign.

"Had these various economic disturbances been predicted at the start of 1917, it is quite possible it would have had a psychological effect on the campaigns of retailers, and it is

quite likely the results would not have been nearly so satisfactory. As nothing of this kind could be guessed at with any degree of accuracy early in the year, the trade naturally laid plans as in previous years and set out with the full determination to surpass 1916—the banner year in the talking machine industry.

"So well formed were these plans that practically without exception retailers were able to meet the emergencies arising out of our entrance into the war and pull through with a highly satisfactory year's business. Most retailers showed a splendid increase over the previous year's business, and I think I can say that without exception every account on our books showed an increase in record sales.

"Probably the most gratifying feature of the year's business just closed is the effort that was made by the more aggressive retailers to concentrate their efforts toward the increase of their record sales. Quite a few retailers showed the wisdom of devoting as much as 75 per cent. of their total annual advertising appropriation to featuring records.

"Many novel ideas were devised throughout the year, and the result was a very largely increased record business. In fact, this was the general condition with most of our accounts, and I think I am safe in saying that practically 98 per cent. of the accounts on our books showed record increases anywhere from 30 per cent. up to 200 per cent.

"It is a great satisfaction to feel that the retailers have come to a realization of the possibilities of this vitally important and profitable end of their business.

"The wholesaler had burdens to bear in the way of increased corporation income taxes and war taxes on floor stocks of machines and records that were not passed on to the retailer, and which made serious inroads in the net profits of the wholesalers. Our company, for instance, had to pay thousands of dollars in war taxes to cover our floor stocks—not one cent of which was passed on to the retailer or to the public.

"The Victor Co.'s action in absorbing the entire war tax on records gives splendid and praiseworthy evidence of their willingness to carry, in so far as they were able to do so, the increased burdens brought on us by the war.

"The reports of our traveling representatives

indicate there are no stocks in dealers' stores, and such machines as they are receiving from time to time are going right out immediately to take care of sales already made. The demand seems insatiable and there appears little likelihood that retailers will be able to accumulate any considerable quantity of machines during this year. The goods are sold before they reach the dealer's floor.

"With twenty billions of dollars being spent by the Government—with labor fully employed at higher wages than ever before—and with savings deposits for 1917 showing an increase of millions and millions of dollars (in spite of all the money that was invested in Liberty Loan Bonds, Red Cross, Y. M. C. A. and other wartime contributions) I can't see anything but a wonderful year ahead of us in 1918.

"I am, first of all, an optimist; but in view of the fact that the Victor Co. have orders for machines and records which will more than take their entire output for months to come, I can't see anything but hopeful signs for our business; and I believe that even the calamities of the world's greatest war will not bring about anything but continued good business, limited only by factory production."

Why Business Will Stand Under Stress

Lester E. Noble, manager wholesale talking machine department of Chicago branch of the Rudolph Wurlitzer Co., said:

"In going over the talking machine business for the year 1917, the most striking feature to my mind is that the business has proven itself to be one which will stand up under stress, such as has pervaded the country during that period. That fact signifies that the talking machine business is a standard line of endeavor and also signifies that the talking machine itself is a necessity. This latter point is proven by the fact that businesses consisting of the handling of articles that are not necessities have suffered terrifically during the last year, while the talking machine business has not only held its own, but has gone ahead of last year, in demand at least. Difficulties that manufacturers have encountered have tended to diminish the normal supply of merchandise, or at least to eliminate or cut down the usual increase in supply, but this fact, while appearing to be a handicap in the face of

(Continued on page 89)

THE "WADE" FIBRE NEEDLE CUTTER Is a Consistent Performer

The Wade

Fibre Needle Cutter No. 1
Price \$1.50

An Athlete or Race Horse is said to be a "consistent performer" when past performances are regularly repeated.

This is particularly true of the Wade Fibre Needle Cutter. It is now more than nine years ago that the "plier handle" fibre needle cutter was invented and patented by Samuel O. Wade and at no time since then has it failed in "consistent performance."

Nothing has yet equaled the simplicity and ease of operation of this plier principle—it gives 18 or 20 new, perfect points to a fibre needle even in the hands of a child—it is strong and durable and its material and workmanship are guaranteed.

"Consistent performance" is the secret of its large sales.

EVERYTHING KNOWN IN MUSIC

Lyon & Healy

VICTOR DISTRIBUTORS
CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 87)

increased demand, has proven to be a benefit to the talking machine trade generally. It has proven a very great benefit from the standpoint of credit. The talking machine retailers have taken the instalment and record approval features of their business so much for granted that in a great many cases this feature of their business, which normally may be very good features, have become detriments to the business generally through loose manipulation. The shortage of incoming stock has tended generally to make them handle credits more conservatively as regards initial payments and length of terms, and logical limits with regard to approval sales, and in a great many cases which have come to the writer's notice, retailers have discovered that these features were not being properly handled heretofore. Another very good feature, brought about not entirely by the shortage of merchandise, but also by general conditions throughout the country, is that the buying of talking machines is being done more logically by the different classes of people. That is, people are buying talking machines of a price that is within their means, thereby making the business generally more healthy from the financial standpoint than has been the case heretofore.

"From the writer's viewpoint, the prospects for 1918 are very bright. The demand will, without doubt, be normal, and there is strong indication at the present time that the supply will be very nearly normal, and that there will be no radical interruption of manufacture."

The Government Should Encourage Business

Charles F. Baer, manager Chicago office Columbia Graphophone Co.:

"The year opened with a rush. Business was excellent, showing a substantial increase month by month over the previous year, notwithstanding that war was declared the early part of the year—the flotation of two issues of Liberty Bonds—which money would have under natural circumstances gone into the purchase of talking machines, musical instruments, automobiles, and what not.

"The public had just about survived the first bond issue and business was again commencing to get back into a normal state, when the second bond issue was floated and we are now recovering from that.

"The press and the public speeches of some of our bigger men have not been conducive to the proper advancement of business as a whole, for instead of dealing out encouragement, they have dealt out discouragement and yet with all this our business has been better than it was last year.

"There is no question but that the civic morale of our people in this country is bound to right itself, for in that respect we are the greatest nation in the world, and with all classes of labor in demand, with money flowing back and forth throughout the country, there can be only one answer for the year 1918—and that is: It will be substantially satisfactory from a business point of view."

Lyon & Healy Service

"Advertising is all right if you advertise all right" is the fundamental principle on which the service department of Lyon & Healy are working, and for that reason they are offering to their dealers printed announcements and cuts of every description in order to further the idea and instruct their numerous dealers as to the proper methods to employ in getting business. Not only is this department offering printed announcements to their dealers, but subscribers for their advertising service are given cuts to use along with their advertising "copy" that are very original and artistic in every detail. The price of this service is very nominal, and an idea of what this company is offering may be had from the following:

For Victrola advertising service they submit fifty-two cuts a year, or one each week, and for the Victrola half service twenty-six cuts a year or one cut every second week. For featuring records they have replaced the old style envelopes for mailing supplements and have gotten out a very interesting Victor folder for the dealer to send to his customers. Records are also popularized by Victor display cards which are gotten up under the personal supervision of a highly trained and specialized advertising manager, who has under his personal jurisdiction not only a large and highly competent force of copy writers, but also a staff of commercial artists, whose work is considered as being among the best in the city. The drawings that these artists turn out have all the simplicity of composition and line at their command that it is possible for artists to have. The figures used in these cuts, whether they be of line drawing, crayon or color, contain the necessary action and proportion that is necessary to make a drawing that will pass the eye of the most critical observer. Piano advertising is also handled by this service department and is offered to the dealers who represent the Lyon & Healy line of pianos. Circulars and prices are furnished upon application and a good idea of the draftsmanship that is rendered by the art department may be seen on the full-page advertisement of Lyon & Healy in this issue.

C. L. Davidson Recuperating

C. L. Davidson, president of the Talking Machine Shop, who was mentioned in the columns of *The World* last month as being confined to the hospital suffering with an attack of appendicitis and gall-stones, has improved very favorably since his operation and is now resting up at his home in Park Ridge.

Returned From New York Convention

Chas. F. Baer, general manager of the Chicago branch of the Columbia Graphophone Co., returned last week from New York, where he attended the annual convention held by that company on January 1, 2 and 3. They had three days and one night of solid session of interesting and enthusiastic business talks and much valuable information pertaining to plans and propaganda for the sales for 1918 were discussed. The information gained by Mr. Baer

was conveyed by him to his sales force at a banquet, which was held at the Palmer House, Chicago, on Monday of this week. There was a very interesting and enthusiastic meeting held after the banquet during which Mr. Baer conveyed the information he had obtained at the convention in New York. Every man in the sales force went away with a determination that he would "go over the top" in 1918.

G. I. Stanton Improving

G. I. Stanton, advertising manager of the Columbia Graphophone Co., has for the past two weeks been confined to the German Deaconess Hospital, where he is suffering with an attack of bladder trouble. Whether an operation is imminent is uncertain at this time, but it is thought by the physicians in charge that this will not be necessary as he has been improving greatly within the past few days.

Not Books, Why Music?

"Our business has stood the shock of diving into war with remarkable steadfastness, in spite of a great shrinkage in the market value of nearly all the gilt-edge securities, and in the face of a propaganda of retrenchment apparently backed by the Government the public does not see fit to lay aside the music of the phonograph," said C. E. Goodwin, manager of the Phonograph Co., Chicago.

"I quote a paragraph from a letter from Mr. Maxwell, vice-president of Thomas A. Edison, Inc., for the benefit of those in the trade who may at times have misgivings or qualms of conscience about keeping this trade in the front right now when there is so much strife and suffering in the world. Mr. Maxwell says: 'When you meet a man or woman who thinks a phonograph is an extravagance ask that man or woman if good books are an extravagance. There is scarcely anyone who would dare say that books are an extravagance, yet books have limitations that music does not have. Music, next to religion, is the world's greatest solace. Don't be afraid to stick up for music.'"

Sales Increased 100 Per Cent.

Messrs. Schiff, who control the destinies of the Vitanola Talking Machine Co., state that the sales of 1917 showed an increase of 100 per cent. over those of 1916. This is due in a large measure, no doubt, to the attractive new models that they have recently adopted. Vitanolas are good machines inside and out; so are the Schiffs, or they could not have accomplished what they have accomplished.

Made Life of Boys More Happy

The Armstrong Drug Co., Pontiac, Ill., recently opened a new Brunswick Shop. Dave C. Miller, manager of the new store, with the assistance of E. S. Bristol, special representative of the talking machine department of the Brunswick-Balke-Collender Co., formerly opened the affair, and nightly concerts were held for a week and were attended by great numbers of the townspeople. One of the most interesting happenings of the event was made possible through the courtesy of D. T. Trumbo, assistant super-

Prompt Deliveries

—as wanted

—when wanted

(The second of a series of advertisements giving reasons why you should sell The Brunswick.)

With direct factory branches in the 36 leading trade centers, we are always in a position to make prompt deliveries to meet your requirements. This means your order will be shipped when you want it, as you want it. Disappointments are avoided. Our manufacturing conditions are such that we are able at all times to supply all models in all finishes promptly.

This enables the dealer in small towns and remote places to have the same advantages as the dealers in the large cities. A service enabling them to be in a position to make almost immediate delivery of any model listed. An advantage that means much in these days of close competition.

The Brunswick Proposition

tells in detail, the other advantages of an affiliation with The House of Brunswick. It points the way to more and bigger profits. It also describes the many points of Brunswick superiority and exclusive selling features. Write or wire for this proposition. There is still some open territory.

Illustrated is Model 175 which retails at \$180. Height, 49½ in. Width, 23½ in. Depth, 24½ in.

Plays all records, including the famous Pathé for which a special sound box is furnished.

Has wooden-walled sound chamber and 9 other exclusive Brunswick features.

Other models \$32.50 upward.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 89)

intendent of the Pontiac Reformatory, who gave permission for Mr. Bristol to give a benefit concert for the boys of the institution. Mr. Bristol took one of the large-sized Brunswick machines over to the cell house on Sunday evening and played numerous Pathé records on the machine. The cells of the institution are arranged in five tiers in rows about 320 feet long. There are four of these blocks of cells altogether, each separated by a fire wall, and it was, therefore, necessary for Mr. Bristol to give four individual performances in order that all the boys of the institution could hear the music. Mr. Trumbo, the assistant superintendent, was very pleased over the success of the affair and said that that was the first time anything of this kind had ever been attempted in the institution and stated that any time a talking machine man came to town he would be more than pleased to have him give a concert for the boys. On Monday, the day after the concert, Mr. Bristol, the Brunswick representative, paid a visit to the institution's work shops and with the permission of Mr. Trumbo interviewed many of the boys regarding what they thought of the idea. All interviewed showed their appreciation of the event and hoped that Mr. Bristol would return soon and give them another concert. There is in this institution a band composed of the boys, which frequently gives concerts, but this idea was new to them, and the McCormack records, patriotic songs, band pieces and cornet solos that were rendered on the machine were something that they do not frequently hear, and they were, therefore, very enthusiastic to have Mr. Bristol play for them again.

He Went Broke

The Chicago Talking Machine Co. recently received a letter containing a check and the following information: "The paying teller at the First National Bank of Chicago refuses to honor this check. Therefore, I am returning it to you asking that you straighten out this matter,

as the above bank informs me that they no longer carry this checking account." The check in question caused a great deal of wonderment as to what kind of a fellow it was who could hold on to a dollar, the amount the check called for, for such a long time, as it was dated February 24, 1899! One of the officials of the company remarked: "It certainly took a long time for that gink to go broke, but 'Sherman was right, this war sure is ——."

Some Record on Deliveries

In order to help make Christmas deliveries on time both A. B. Stoll, manager of the Brunswick Shop, and C. V. Yates, of the sales department, came down to the warerooms the Sunday before Christmas and each donned a pair of overalls and worked all days as "Hikers" on one of the delivery trucks. This was necessary, owing to the fact that there was a shortage of delivery men and over seventy-nine machines were promised for delivery that day. Five auto trucks were employed to take care of the work, but only eight helpers showed up instead of ten.

"Two Aces Change Places"

C. L. Egner and W. F. Fries, both travelers for the Victor Co., have recently been changed from their old territories and new districts have been allotted to them. Mr. Egner formerly traveled throughout the State of Missouri, but is now transferred to the territory embracing Illinois and Wisconsin. Mr. Fries formerly looked after the company's interests through Michigan, but will now look after the Iowa territory.

Record-Lite Attachment Popular

"Music in the Home," by Anna Shaw Faulkner, author of the popular work entitled, "What We Hear in Music," is now on sale at the Edison Shop and has created quite a demand and is receiving much favorable comment. The accessory department has also been having quite a demand for the "Record-Lite" attachment for phonographs for the past month. The demand

for these lights has increased to such an extent that it has become necessary to lay in a larger stock than was the custom heretofore.

Hold Educational Convention

Mrs. Frances E. Clark, head of the educational department of the Victor Co., with headquarters at Camden, N. J., presided at an educational convention which was held in the Congress Hotel on January 2, 3 and 4. Fourteen traveling representatives of the Victor Co.'s educational department attended and various means and methods applicable to this department were discussed.

The Six Best Sellers

The six best sellers in the Victor library for the month are: "Somewhere in France Is the Lily," and on the reverse side "My Sweetheart Is Somewhere in France"; "Missouri Waltz"—"Danny Boy" (vocal selection by Schumann-Heink); "I'd Love to Be a Sailor" (a new Lauder selection); "There's a Green Hill Out in Flanders," and reversed, "Say a Prayer for the Boys Over There"; "The Rainbow of Love."

The six best Columbia sellers for the past month are: "Over There," and on the reverse side "I May Be Gone for a Long, Long Time"; "From Me to Mandy Lee," reversed, "All Bound Round With the Mason Dixon Line"; "Send Me Away With a Smile," and reversed side "My Sweetheart Is Somewhere in France"; "Life in a Trench in Belgium" (parts one and two) "Poet and Peasant" (parts one and two, overture); "Livery Stable Blues," fox-trot, and reversed "That Jazz Band."

The six best Edison sellers for the past month are: "Battle Hymn of the Republic" (Old plantation melody) "Explanatory Talk for La fatal pietra" (The Fatal Stone); "Aida," and reversed "La Fatal Pietra"; "Awakening of Spring" and "Pirouette"; "New York Blues," and reversed "Saxophone Sobs"; "Ellis March," and reversed "One, Two Three, Four Medley Waltz"; "It's Nice to Get Up in the Mornin'."

It Is Not Too Late to Make the Best New Year's Resolution You Ever Made

THAT is, to investigate the Empire Dealer's proposition, and to apply for the exclusive agency in case same is still open for your City.

Empire dealers all look back on 1917 as their most prosperous year, and forward to 1918 as being still more prosperous. Not in the actual money profits alone, but in the more permanent profits that come from a clientele of satisfied customers. They are all Empire boosters, and are glad to pass the good word for Empire products and policies along to other Dealers. This has been evidenced in numerous instances recently, where good sized orders were placed by dealers that we had never even quoted, who took the Empire agency on the recommendation of an Empire dealer.

Write today for our complete catalogs of Empire Machines and Empire Records, and full information regarding our Splendid Dealer Helps :-

The Empire, Model B, conceded to be the greatest value ever offered in a high grade talking machine.

and reversed "When the Bonnie, Bonnie Heather Is Blooming, I'll Return Annie Laurie to You."

The six best sellers for the month in the Pathé library are: "Within the Garden of My Heart" and "Love, Here Is My Heart"; "Arrival of the U. S. Troops in France," and reverse side, "Hail, Hail, the Gang's All Here!"; "It's a Long Way to Berlin," and on other side "That's What Ireland Means to Me"; "Till the Clouds Roll By," and reversed "Just You Watch My Step"; "Allah's Holiday," from Katinka, and reversed "Merry Widow Waltz"; "When the Boys Come Home," and on the other side "Danny Deever."

The six best Emerson's for the month are: "My Sweetie," and reversed "Good-bye Dollie Gray"; "I Don't Want to Get Well," and reversed "Cocoanut Dance"; "Joan of Arc," reversed "Hands Across the Sea"; "The Dixie Volunteers," and on other side "Washington Post March"; "Hail! Hail! the Gang's All Here!" and "Cold Turkey"; "Hello, My Dearie," and on the other side "Chü Chin Chow."

New Hiawatha Line

The Ottawa Pianophone Co. recently presented to the trade their new Hiawatha phonograph, which they feel marks the attainment of an ideal, being the result of a definite intention to produce a musical instrument that will incidentally be accepted as a standard of perfection. The new machine is an expression of quality and refinement in every detail and is indeed a masterpiece in mechanical perfection. The design is neat and the dignified lines lend grace and charm to the beautiful furnishings. A feature of this machine is that the modifier is built in and is a part of the machine and not an attachment. The machine plays all records with the same attachment. At present they are offering six cabinet machines ranging in price from \$50 to \$100 and one table machine which comes in mahogany and oak, high polish or dull finish. They are equipped with double springs, powerful and silent motors, automatic stops, tone modifier, speed regulator, etc. The new

factory at Ottawa, Ill., has splendid railroad facilities, being situated directly on the side of the Rock Island Railroad. This factory is equipped with modern machinery and is operated by skilled workmen under the supervision of a man who has had many years of experience. The plant is up-to-date in every particular, operating its own power plant seasoning rooms, which guarantee against warping, and this wood after getting out of the season room is guaranteed to pass a most rigid inspection. The capacity is 300 machines a day, thereby enabling the company to render prompt and efficient service.

Empire Talking Machine Co. Improvements

The Empire Talking Machine Co. report that they have had an exceptionally good start for the new year, and that the business of 1917 succeeded the biggest year in the history of that company. Not only does this apply to talking machines but also to records, and from present indications January will be a very good month. This company has just issued a sixty-four-page record catalog which includes their January and February supplements. This catalog contains sixteen more pages than any they have issued previously and is very beautifully illustrated. Many new artists have been added to the Empire list and the new records just being issued by that company are far superior to any they have previously put on the market. The surface noise has been eliminated to a minimum and in some records it is absolutely undiscernible. The Empire machine has been steadily proving its worth and is receiving favorable comment throughout the trade. The new motor this company is installing in its machine is guaranteed to play five twelve-inch records with one winding and the style and finish of the cabinet is very beautiful. This company is now in splendid shape to take care of their dealers' needs and has added several expert and experienced shipping clerks to its already large shipping department, which in itself is an assurance

that the dealers' needs will be taken care of immediately.

Wade & Wade Cutters

About nine years ago, when the late Samuel O. Wade introduced his first needle cutter on the market, there was much speculation as to whether it would prove successful or not. A great many maintained that it was a very simple contrivance, but that, being operated on the "plier" principle the same as a plier used by an electrical worker, that there could, therefore, be no precision made in the cut as there was bound to be a certain kind of spring to the jaws when the tension was put on the handle. Nevertheless Mr. Wade "nursed his invention" and kept plugging away with the dog determination for which he was characteristic and shortly before his death a few months ago put upon the market the cutter that worked on the "plier" principle, an instrument that was perfect in every detail. It is said by many in the trade that nothing as yet has equaled the simplicity and ease of operation of this "plier" principle. The little workshop in which the present Wade & Wade fibre needle cutter was founded has grown in the nine years it has been in existence to wonderful proportions and this institution has now attained a point where it can turn out thousands and thousands of these "pliers" in a year. The material of which these "pliers" are made is strong and durable and the workmanship is positively guaranteed. Each cutter is also guaranteed to be foolproof and constant in operation.

New Repair Company

After careful investigation as to the wants of the dealers in the trade, E. O. Chapman and J. J. Elwart discovered that dealers in the phonograph business in general were without proper repair service and for that reason they put their heads together and inaugurated the Mid-West Phonograph Repair Co. They are prepared to handle all kinds of repair business

in general and are lining up numerous dealers whose business is not large enough to have a repair department of their own. Both of these gentlemen have been in the motor manufacturing business for a number of years and are thoroughly experienced along this line, thereby being able to guarantee absolute satisfaction.

Salter Holiday Outfit

The Salter "trade winning holiday outfits" which were especially put out in combination with the regular Salter line to take care of the holiday trade were in far greater demand during the holiday season than had been anticipated. These cabinets were made to harmonize with the portable models of standard machines and enabled the dealer to offer to his trade outfits which served to land customers who would otherwise escape. A feature of these particular Salter cabinets was the felt-lined compartments of which this company were the originators. Each record has an individual compartment for itself and is thus protected from scratching, breakage and dust, and is instantly accessible. The many Salter dealers in order to insure delivery in time for the spring trade are placing their orders now. They are doing this as a precautionary means, as from present indications there will, no doubt, be more business done in the next few months than ever before.

Personals and Visitors

Recent visitors to the city were: H. T. Smith, Cable Piano Co., and G. Herman, J. L. Hudson Co., both of Detroit; Miss Minnie Springer, Pearson Piano Co., Indianapolis, Ind.; Ed. NEW DEVICE FOR FILING RECORDS

Interesting Details Bearing Upon Latest Device Placed on the Market by the Automatic Container Co., of Chicago

CHICAGO, ILL., January 10.—Manufacturers, as well as dealers, will be interested in the new device for filing talking machine records, which is being marketed by the Automatic Container Co., 301-303 Tacoma building, this city. Their full page "ad" appears in this issue, featuring

The Automatic Container

a new line of individual filing cabinets in which dealers will be especially interested. Manufacturers, however, will be particularly interested in the "Automatic" filing device as applied to the standard talking machine cabinet. The cut accompanying this article illustrates the practicability of the new automatic container built into a standard cabinet.

This "automatic" record container, which is a patented article, is beyond a doubt one of the most attractive devices for record filing which have yet appeared on the market. When the containers are filled to their capacity, the cabinet contains a solid mass of records separated by thin guides, only. The space usually taken up by shelves, racks, partitions and albums is eliminated. Maximum filing capacity is therefore afforded; actually from 50 per cent. to 100 per cent. more records can be filed in a given space than by albums, racks, or other device.

When the container is drawn from its place in the cabinet, the weight of the records automatically throws the side rods of the container outward, thus giving the necessary expansion and making each record immediately accessible. The opened file-pocket remains open until the record has been returned to its proper place. The simplicity and convenience of this device should appeal to manufacturers and dealers.

The Automatic Container Co., marketing this device, is a new corporation which has purchased, and is enlarging, the business formerly carried on by Frank P. Read, the inventor, of Chicago. Mr. Read is president and general manager of the new company, and Fred M. Sargent, of Evanston, Ill., is secretary and treasurer. The company enters the field with bright prospects for a good business.

MUSIC A REAL WAR NEED

Some Timely Reading Matter Being Sent Out With Lyon & Healy Letters

A new and very tasty envelope stuffer is now being sent out on an extensive scale by Lyon & Healy. It is included in practically every letter sent out by this great Chicago institution and is entitled "Music Serves a Very Real Need in War Time." It is printed on an antique stock in blue ink, and contains pertinent quotations from a number of sources. The quotation from the Chicago Tribune is as follows:

"It may not be amiss to bring out the fact that in war time music is an essential. It is a necessity in the ranks of the fighting men, for it instills the firmness of morale necessary to success in war; it is important in the lives of civilians, because it strengthens moral fiber and dissipates depression. Whether it be the stirring strains of the sonorous band, or the sounds of a soothing symphony, it is a tonic in war time; it is the mental exhilaration that engenders physical recuperation."

There is also a pithy bit of comment by Lyon & Healy which is worthy of consideration:

"And if music is a powerful aid to men of action, its importance to those who can do little but 'stand and wait' is even greater. Every old person and every child who can have recourse to music for an hour a day is thrice blessed.

"There is no magic about music. Every man or woman who works intensely for a long period finally lowers the nerve force and the result is an irritable and excited condition.

"Listening to sweet music, preferably melodies that awaken pleasant recollections, slows down the nerves and in a short time makes almost a rebirth of the individual."

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 95)

THE PAST, PRESENT AND FUTURE

Discussed by L. C. Wiswell, Manager of the Victor Dept. of Lyon & Healy, for The World

CHICAGO, ILL., January 11.—L. C. Wiswell, manager of the Victrola department of the house of Lyon & Healy, when interviewed by a representative of The World this month, said:

"The retail trade in general during the past year was very fortunate indeed and did a bigger business than they had ever dreamed of or dared anticipate. The one factor that kept the trade down and which exerted a major influence in keeping it from reaching greater proportion was the shortage of machines as is well known. This shortage did not apply to one particular line only, but existed in all the well known makes, which was very unfortunate indeed. With the records, however, the situation that prevailed throughout the year was exceptionally favorable and during the holiday season the dealers in general sure went "over the top" for once in their life anyway.

"I have talked with the heads of various other houses and have been assured by them that the situation was absolutely satisfactory in every detail with the possible exception of the aforesaid shortage of machines. The year of 1918 is bound to be an excellent one and can only be measured by the amount of energy and pep that the dealers exert. There has, within the past few months, been a great number of new machines placed in homes. It therefore naturally remains that the record departments will benefit greatly by this. The pace set by various wholesale dealers and jobbers in the trade during the latter part of the year was amazing. Some said it was only a spurt and that they were merely trying to unload for the holiday season. This, however, has proved untrue as these very same wholesalers and jobbers are today working just as hard as they were before the holiday season began and are shipping in as

great quantities as they did during the holiday season and the tendency is, as may be judged from the way orders are coming in, that they will keep right at it indefinitely.

"Another thing that is worthy of mention is the amount and quality of publicity that was given to the various makes of machines in the local papers for the past few months. These newspapers have been commenting upon this fact themselves. Never in their history have they had a like amount of space devoted in their papers to talking machines and the art work contained in some of these advertisements are really masterpieces in themselves. This condition still prevails in the papers, and for that reason I base my opinion that this young new year will go down in the history before the new one comes along as being the greatest ever known in the talking machine trade."

A CHANGE IN CHICAGO

CHICAGO, ILL., January 11.—The Hallet & Davis Piano Co., of Boston, discontinued on January 1 their Pathé jobbing agency in this city, which was located in the Shops Building on Wabash avenue. This does not mean that the Hallet & Davis Co. are going out of Pathé distribution by any manner of means. It simply means that they are going to cultivate more thoroughly than ever before the New England and Eastern States. Hallet & Davis have transferred their accounts in this territory to the Fuller-Morrison Co., the great wholesale drug house which has recently taken on Pathé distribution in this territory. B. O. Ainsley, who is manager of the Hallet & Davis talking machine branch here, will go East about the middle of January. J. C. Tidmarsh, who has been associated with him, is now traveling for the Fuller-Morrison Co., and helping in getting the Pathé department organized and in good running order.

The Fuller-Morrison Co. is the largest establishment of its kind in the world and keeps a

force of over fifty salesmen on the road constantly. M. P. Mears, sales manager of the company, says that they have the situation well in hand at present, and that this section of the country will be covered thoroughly is assured.

LET THE PUBLIC KNOW

The Chicago Talking Machine Co. have prepared and are sending out to their dealers a very handsomely illustrated Victor window card featuring the "Missouri Waltz" and "Kiss Me Again Waltz." This card is mounted on very heavy material and portrays in the foreground a couple waltzing and also an illustration of a large Victor cabinet machine. In the background are several more couples, the interior of a ballroom being suggested. This display is a beautifully colored hand-lithographed window sign 22-inch by 28-inch and was prepared especially to increase the sales of Victor dealers.

ADD TO CHICAGO MOTROLA OFFICES

Ernest Horcher is now in charge of the service department of the Chicago offices of the Jones Motrola Co. Mr. Horcher was formerly connected with the New York branch of this company, but came on to Chicago last week. Robert E. Rae, sales manager, and Harry E. Merrian, electrical expert, both of the same company, with headquarters in New York, spent the last week visiting Manager Hey, of the Chicago office of the company, and attending to details.

ANGELUS TRADE-MARK INJUNCTION

Judge Manton in the Federal Court last week granted a temporary injunction to the Wilcox & White Co., manufacturers of the Angelus piano players, against Frank J. Leiser, doing business as the Angelus Phonograph Co. Infringement of trade-mark and unfair competition was charged.

HIAWATHA

FINISHES

Walnut and mahogany, in the dull or high polish. Oak in high polish or fumed. Every cabinet built in a thorough manner. *Hiawatha* construction is guaranteed to last indefinitely, not merely glued together but dove-tailed.

TONE QUALITY

The tone of the *Hiawatha* can best be described in one word, "natural," reproducing the artist's voice or selection in the full rich natural tone.

MOTORS AND EQUIPMENTS

Our motors are made of the highest grade material obtainable, using double spring in all hand power machines, are silent and powerful, equipped with automatic stop and speed control. Electric Motors \$25.00 extra, every motor guaranteed fully for the period of one year.

PLAYS ALL RECORDS

Your selections are not limited to records of any single make, as the *Hiawatha* plays all makes of records with the same attachment.

CABINETS

Made of five ply stock of genuine Veneer, given five coats of finish and each cabinet hand rubbed, which gives to *Hiawatha* cabinets the wonderful polish such as is found only in the most expensive furnishings.

TONE CHAMBER

Made of genuine spruce, is known as the straight way type, extending from the mouth of the tone arm, with no obstructions to break the sound waves. The use of spruce wood in the Tone Chamber has the same effect in reproducing the tone as it has in all high priced violins.

TONE MODIFIER

(Patent applied for)

Built in on top of motor board as part of the machine, not an attachment, modifying the tone to suit every taste.

"ALL ORDERS F. O. B. FACTORY"

UNISSET REPRODUCER INTRODUCED

This New Reproducer Is Said to Be an Absolute Departure From Other Sound Boxes on the Market—Will Play All Kinds of Records—The Men Behind the Company

CHICAGO, ILL., January 10.—The Uniset Reproducer Co., Cable building, this city, which has just incorporated, is putting a new reproducer on the market, which many term one of the greatest inventions that have appeared in the talking machine field for many years.

This reproducer is an absolute departure from all the other sound boxes which are now on the market. It will play all records, of no matter which make or description, such as the Victor, Columbia, Edison, Pathé and Gennett records, etc., in one and the same position, without any change of any kind.

We understand that this reproducer can easily be slipped on all the tone arms of the standard made machines, and once it is put on, it will remain in one and the same position, reproducing all the different records equally well. In consequence the possibilities of this Uniset Reproducer are tremendous.

Manufacturers and assemblers of phonographs will be able in the future to employ a perfectly straight tone arm and thus do away with all the disadvantages which are common to tone arms that have joints, bents and kinks, which very often work loose, rattle and create other unpleasant noises when playing the record. Another vast field for the Uniset Reproducer is amongst jobbers, dealers and the individual owners of machines.

There is no question but that the average talking machine owner does not care to be confined to one particular make of records; there are many beautiful records and titles in other catalogs which he may not be able to enjoy, but his sound box will not reproduce such records.

Although, of course, there are arrangements in the market that make it possible to play different makes of records on a phonograph, it is reasonable to assume that the Uniset Reproducer will receive special consideration, as it is simplicity in itself, and as it is not necessary to change the position, which means more or less trouble, to the user of the phonograph. The Uniset sound box will sell at \$5.00, n. p. retail; \$6.00 for the Edison machines, and the gold plated sound boxes will possibly be \$1.00 more. We understand that the Uniset Reproducer will be ready for delivery about the first week of February, and orders are now being accepted.

The president of the Uniset Reproducer Co. is James B. Orth, prominent business man of Chicago. W. Hadert, the vice-president and general manager, is a man of twenty-two years' experience in talking machine trade. He knows all branches from factory and recording to selling. He has traveled for important concerns all over the world and is by virtue of all this experience well equipped for managing a concern of this kind and for marketing the product in a most efficient manner. Joseph Juttler, secretary and treasurer, is a gentleman of wide experience in the business field, a man with a personality and is to be considered as a distinct acquisition to the company. The board of directors is constituted of the above, together with Richard Bauer, of the well-known Chicago piano manufacturing house of Julius Bauer & Co., and Wm. Meissner, the inventor of the Uniset reproducer.

SPECIALIZES IN PLATING

Joseph Musante, electro-plater and silvermith, 168 Centre street, New York, has recently entered the trade, specializing in the plating of phonograph parts. His special process of finishing in gold which prevents turning black has already strongly appealed to a number of houses in the trade. The other finishes used are silver, nickel and antique.

It ain't the individual nor the city as a whole, But the everlastin' team work of every hloom-in' soul.—Adapted from Kipling.

FRENCH RECORD POSTER

Victor Talking Machine Co. Issues Attractive Poster Featuring French Records

The Victor Talking Machine Co. has just issued a large three-color poster featuring its series of French language records. There are three records in this series, the records containing those French words that will be found of greatest use to the American who finds himself "somewhere in France," and the French words and their English equivalents can be learned more readily through the medium of a talking machine than through almost any other way. The poster itself represents an American soldier talking to a French soldier and a pretty little peasant girl. The poster is not only artistic in every sense, but should prove a valuable aid towards popularizing this very practical series of records issued by the Victor Co.

No use talking, the individual who makes a habit of looking efficient is cultivating the habit of being efficient.

RED CROSS QUILT BRINGS \$700

Embroidered With Names of President Wilson and Thos. A. Edison and Is Auctioned Off

One might think that a quilt which would bring \$700 would be embroidered in gold, but such was not the case with the Red Cross quilt auctioned off December 29 at the Edison Laboratories at Orange, N. J. This particular quilt had embroidered on it the names of President Wilson and Thomas A. Edison, both being contributors. The quilt consisted of many small squares with red crosses in each, the name of the contributor being embroidered in each square around the cross. The quilt was made by Mrs. A. Q. Almquist, of West Orange. After much spirited bidding the quilt went for \$700, which goes to the West Orange Community Unit of the Orange Chapter of the Red Cross.

If at times you find embarrassment in meeting customers, make it a point to study the manners and methods of successful people and see how they meet strangers.

Stewart Single Spring Motor

Rigid cast frame. Simple design. Hobbed gears. Powerful and silent. Plays one 12" or two 10" records. Furnished with side or top speed regulator control.

We are furnishing this remarkable Stewart Motor to some of the large phonograph manufacturers. It will pay you to get our prices.

Our large plant, equipped with special machinery for economical production in large quantities, places us in a position to offer phonograph manufacturers parts of quality at exceedingly attractive figures.

It will pay you to use Stewart parts. Our facilities enable us to handle large orders promptly. Write for detailed information and prices.

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our dealers, including those who make, and those who sell, talking machines. Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 176 Sixth Avenue, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

EQUIPMENT FOR MAKING REPAIRS

There are many dealers who are driven away from the idea of making small repairs and adjustments by the fact that they think the tools and equipment necessary for the work would cost more than the benefit derived from immediate adjustments.

On the contrary the cost of the necessary tools is surprisingly low and I am going to give a list and the approximate cost price of those needed for making small repairs and adjustments and also a list of the average repair parts which a dealer should always carry in stock.

In the first place a suitable space should be set aside for the placing of a work bench. In the absence of suitable lumber for its making use can be made of machine cases. It is possible to get from four or five of these packing cases sufficient suitable material to make an ample sized and strong enough work bench.

The first purchase in the tool outfit is the bench vise, and in selecting it you should be careful to get one which will open far enough to hold the largest sized spring cage. A suitable sized vise can be obtained for from \$3.50 to \$6.00.

The following list of bench tools are all that are necessary for making small repairs on motors, to which can be added those special tools made and sold by the several talking machine companies for use in adjusting their particular makes of motors, and which can be obtained from the distributors of these companies:

- 1 riveting hammer.....\$.50
- 1 ball hammer60
- 3 sizes of screwdrivers.....each, .30
- 1 round file20
- 1 flat file20
- 1 three-cornered file25
- 1 nail set10
- 1 oil can15
- 1 jackknife45
- 1 pair round nose pliers..... .85
- 1 iron bench block..... .50

For sound box adjustments it is almost imperative, for good results, to have those tools supplied by the respective companies and aside from these it is only necessary to have a small alcohol lamp, small screw driver, and a very light hammer. A 1x56 tap for threading thumb screw hole in Victor needle bars and a 2x56 tap for the same purpose for Columbia sound boxes are necessary. These are obtainable at about 25 cents each.

Lubricant for springs can be obtained from the various companies, or if you prefer to mix it yourself use Dixon's No. 633 graphite mixed with heavy oil to about the consistency of molasses. For heavy springs like the Columbia a better mixture is Dixon's Graphitoleo. It is also necessary to have a small can of good oil, and vaseline for use on gears and governor spirals. Some gasoline for cleaning purposes, a small bottle of white shellac for glueing mica to gaskets in sound boxes, and some emery cloth constitute the balance of supplies.

If you are a Victor dealer the following parts will be found to be in almost daily demand by the repairman.

	Catalog No.
Main springs	3014A. 2141A.
Winding ratchets	3017A. 1949P.F.
Pawls	183P.F. 2512C.P.
Winding shafts	3041A. 2510A.
Turntable spindle gears.....	2758B. 3029B.
Governor spindles	3275P.F. 963P.F.
Governor springs	282P.F. 1729P.F.
Governor spring screws.....	3075P.F.
Governor spring screw washers...	3066P.F.
Automatic brake springs.....	2810P.F.
Brake leather	1057P.F.
Rubber washers	883P.F.
Turntable felts	393P.F. 750P.F.

For Victor sound boxes the following are always in demand:

	Catalog No.
Needle set screw.....	1228Bl.
Rubber insulators	304P.F.
Mica diaphragms	414P.F.
Needle bar tension springs.....	487Bl.
Diaphragm screw	471P.F.
Diaphragm screw washer.....	1030P.F.

The Columbia dealer will find the following parts very necessary: main springs, governor springs, spring cage tab screws, winding ratchet and gear assembled, pawls, winding shafts of

various lengths, main drive gears, turntable spindle gear, governor spindles, mica diaphragms, gaskets and needle thumb screws.

The dealer who equips his repair man with the tools, supplies and repair parts as I have outlined above will find that he will be able to handle nine out of ten repairs.

Overcoming Noise in Motor

"A. H. Dodin,

"Care of Talking Machine World.

"I am stuck on a Heineman No. 7 motor. If it is wound just a little it runs very nicely, but if it is more than half wound it is very noisy. I find that touching the turntable just a little will stop the noise. The turntable must be touched several times during the playing of the record to insure quietness. It is just like applying a light brake. It must be a very simple adjustment and I do not like to bother the maker of the machine or the motor with it.

"SCOTT LANE."

The trouble is without doubt in the adjustment of the governor—either the governor spindle is too tight in its bearings or the spiral worm of governor sets too far into the fibre gear cuts. Try adjusting at these points but do not attempt it until you are sure the motor is entirely run down.—Andrew Dodin.

MICKEL BROS. CO.'S GOOD REPORT

Victor Wholesalers in Omaha Pleased With Results for 1917 and Prospects for Future

OMAHA, NEB., January 5.—Geo. E. Mickel, general manager of the Mickel Bros. Co., Victor wholesalers of this city, reports that 1917 was a very good year for his company, despite the problem of getting stock, and that they are looking forward to 1918 to be even better than the year just passed even though they have the problem of transportation and shortage of goods to meet. Mr. Mickel has been on a visit to dealers in the territory and finds the majority of them in a most satisfactory condition.

ALL FOREIGN MAIL CENSORED

Government Policy in This Respect Announced by Postmaster-General

WASHINGTON, D. C., January 7.—Postmaster-General Burleson recently made formal announcement that a censorship of all mail entering or leaving the United States is being conducted at New York as well as the Canal Zone, Porto Rico and larger seaports of this country. The announcement reads:

"Censorship of international mail has been inaugurated pursuant to Section 3 of the Trading With the Enemy Act and Sections 14, 15 and 16 of the executive order of October 12, 1917."

AN OPPORTUNITY

to secure a TALKING MACHINE at a very low cost

We have left over from a large contract a number of cabinets, all of which we have equipped with mechanisms, making a complete Talking Machine, as illustrated. While they last, we offer them at **\$6.50 each**, net cash, F.O.B. our factory. Orders for less than five machines will not be accepted.

Specifications

Oak or Mahogany Cabinet, 15 in. wide, 17 in. deep, 8 in. high. Nickel-plated Tone Arm and Soundbox. Single Spring Motor. 10 in. Turntable.

THE GEORGE A. LONG CABINET COMPANY
HANOVER, PA.

WAREROOMS THAT ARE "DIFFERENT"

New Establishment of the Silverstone Music Co. the Center of Interest During the Holiday Season—Initial Recital Held—Formal Opening Will Occur Some Time This Month

ST. LOUIS, Mo., January 4.—The new warerooms of the Silverstone Music Co., Edison jobber, which will be formally opened at a date this month as yet unset, are different from any other in this city, and Mr. Silverstone says that he has carried out many ideas that are entirely original with him.

The first floor fixtures, which consist of a recital hall and three demonstration rooms, are built entirely of quartered oak, finished in what is known as silver gray. The entire floor side-walls are paneled in oak. The windows and doors have the small, long glass, the effect in the recital hall being that of a small chapel.

The decorations are carried out with specially made lighting fixtures, small busts of musicians and specially designed and stained desks and chairs. The recital hall, although smaller than the old one, seats more because of a different adjustment of the space. On the blank wall side of the recital hall a door was put in to relieve the effect there. It is a real door with open panels and back of it to lend space idea is a looking glass.

The third floor is the machine sales floor, and as the customer steps into a small hallway, for all the world like the hallway in an old-fashioned house, he finds in front of him a room that duplicates a formal parlor, slightly stiff in furnishings, and in front of him a phonograph. The salesman sees the customer seated and asks to be excused to get some records. In an alcove, well curtained off, he starts another machine. So entirely unexpectedly the prospect hears a machine play. In some instances this has been taken for real music and in all trials the effect has been good.

This entire floor is finished with ceiling-high partitions and the various rooms are decorated and furnished as the different rooms of a flat. The effect is very good.

The second floor, finished in white and gold, is a record sales floor. It is frankly a business floor with everything for the convenience and comfort of the customer, with no space wasted.

The warerooms include two shops, one for the mechanical parts and another for the wood-working department. There are storage floors, a large shipping room. Mr. Silverstone has a private office on the second floor and the cashier's force and the sales offices are on a balcony over the shipping department.

The initial recital in the warerooms, which

the Silverstone Co. occupied before the Christmas rush, was by Marie Alcock, who came here to sing solo parts with the Pageant Choral Club in the "Messiah." The affair was entirely informal but very successful.

The best test of the new Edison quarters was during the holiday trade when, with the second floor not yet finished, the largest retail trade of any similar period was handled without serious trouble. It is true that the recital hall was used for record demonstrations, and that the areaway on the first floor was used, but everybody was waited on.

TRADE PERIL IN ENGLISH BILL

Proposed Law Would Remove From Register Trademark Used as Name of Article

A despatch from London states that representatives of American manufacturers in England are much alarmed over a bill pending in Parliament providing that if the proprietor of a word or trademark so uses his mark as to lead the public to regard it as the name of an article it shall be removed from the register of trademarks. If the bill is passed many American articles which have become popularized through name trademarks will probably be imitated under the same name and Americans will have no redress, thus entailing untold loss to them financially if not the ruin of their business in England.

Americans here say that cargo space for England is now so restricted that the trade in many articles has already become greatly affected, and that if the bill becomes a law imitators may be successful in getting control of all the business before the cargo space is increased and normal conditions are resumed between the United States and England commercially.

The attention of the American Consul-General, Robert P. Skinner, has been called to the seriousness of the situation, and if the representations of American representatives and officials here are unavailing, Washington will probably be asked to intercede with the British Government for the removal of certain objectionable features of the bill.

EXPANSION WITH OGDEN CO.

The sectional record cabinet and sales system manufactured by J. B. Ogden, of the Ogden Sectional Cabinet Co., Lynchburg, Va., continues to grow in popularity throughout the country. Since moving to the new factory they are much better equipped to supply the needs of the trade, and this business promises to be a very important one during 1918.

DEMAND FOR MELOPHONE LINE

Advance Orders for the Products of This Company Indicate Continued Prosperity for 1918

Henry Sobel, president of the Melophone Talking Machine Co., in a recent statement to a representative of The World, stated that the new dealers handling the company's line of machines are steadily increasing. He says the outlook for the present year is exceptionally bright, as the number of advance orders for shipments for the first few months of the year has been quite heavy. While the Melophone Co. have been featuring their expensive machines during the past few months, the demand for the popular-priced machines has by no means been small, all of which made the year 1917 one of great prosperity for the company.

"BUBBLE BOOKS" POPULAR

CHICAGO, ILL., January 11.—The local branch of the Columbia Graphophone Co. has recently received an exceptionally large stock of "Bubble Books." This was made necessary owing to the great demand which has sprung up for these books within the past few weeks. The book is devoted exclusively to childhood songs and stories, such as "Tom, Tom the Piper's Son," "Mary Had a Little Lamb," etc. It was illustrated by Rhoda Chase and is gotten out by the Columbia Graphophone Co. in conjunction with Harper & Bros., publishers. The book contains a printed text of these little childhood songs and stories on pages which are made in the form of an envelope, each envelope containing a six-inch Columbia record. When the record is put on the machine and is started off one may read the words that are being sung or spoken on the pages, and on the opposite page is a picture illustrating the song or story. The book has a hard cover and is printed in four colors. It contains three records and retails at \$1 per book.

ANENT EXPORTS TO LATIN-AMERICA

Since the war began American exports to Latin-America have increased 100 per cent. in value, while those of Germany have disappeared entirely, declares the American Exporter, New York, in its current issue. In 1913 we shipped to Latin-America merchandise values at \$323,775,885. In 1917 we shipped merchandise to the same market valued at over \$650,000,000. Our exports to-day to Latin-America actually exceed in value Germany's annual exports before the war to the combined markets of Canada, the United States, Mexico, the West Indies, Central and South America, plus those to Russia.

No. 100

Our factory leader. Simple in design; priced within reach of all, yet artistic enough for the most discriminating.

No. 200

Heavily gold plated on all exposed metal parts. Sound chamber has special carved doors opening out from it.

No. 150

Needle receptacles set in tandem in sliding disappearing receptacles. Heavily nickel plated on all exposed metal parts.

These instruments are made of genuine mahogany of exquisite workmanship and design, and compare favorably with the most expensive standard machines now upon the market. They are unapproachable in their priced class anywhere.

The prices of all standard makes of Phonographs have been increased. We have determined to keep ours the same until after the Holiday Season. Write us for our agency proposition TODAY.

JUST TEAR THIS OFF

Put it in an envelope with your business card or letter head and we will send you immediately free of charge a beautiful illustrated catalog of high-grade cabinet machines.

WHY MUSICAL INSTRUMENTS ARE ABSOLUTELY ESSENTIAL

Will Payne Handles This Subject in a Masterly Way in the Current Issue of the Saturday Evening Post—Believes in Winning the War Without Destroying Industry

As has been said before, some of those in authority in Washington and other parts of the country, and the general public at large, will not be convinced of the fact that musical instruments are absolutely essential by the emphasis that has been laid upon that fact by manufacturers and dealers in musical instruments or by trade publications. The really convincing argument must come from those on the outside, and with no mercenary interests in the music industry.

It is particularly gratifying, therefore, to note the manner in which Will Payne, the noted writer, in an exceptionally able article on "Business That Isn't Necessary," in the Saturday Evening Post last week, upholds the cause of music and of the making and selling of musical instruments from the practical, rather than the theoretical, standpoint. Mr. Payne emphasizes the great economic danger that lies in shutting down any industry no matter how non-essential it may appear, suddenly and without warning, and how it is absolutely necessary to provide for the resumption of all industry on a basis as near normal as possible immediately upon the declaration of peace. His conclusions are understandable and sensible.

"Shutting down the factory is quite simple," he says. "All you need do is lock the door and walk away. Anybody can do that. But starting it up again after a long period of idleness, repairing the deterioration, assembling the materials and labor force, and so on, is much more difficult. It isn't merely the factory. There's no use starting up a factory unless you have an outlet for its product. These particular factories have an elaborately organized outlet covering the entire country—their agents and dealers in every considerable town. Except the youngest of them, those agents and dealers were doing something else before they went into the business. They have put their skill and energy and capital into that. If the business were shut down a good many of them would be broke; most of them would be out of a job. Mainly they would, of course, begin seeking something else to do. The whole extensive organization of the business would begin to fall apart and vanish. No scratch of the pen could build it up again out of hand."

He touches right on the music trade when he says:

"The music shop on the corner looks non-essential enough; nothing in it that you can eat, wear, throw at an enemy or raise the winter temperature with for more than a few minutes. It represents also consumption of materials and labor. If you look over the materials you will find they consist largely of expensive woods that are of very little utility except for an ornamental purpose. So far as waging war or down-to-brass-tacks subsistence is concerned the lumber used in building a small reviewing stand from which the mayor inspects a parade would be worth many times all the wood in the shop. Aside from wood, there is perhaps a hundred pounds of wire. But all the material in the shop, for war or hardpan subsistence, would hardly be worth carrying away.

"And if you sorted out all the labor you would probably find that much of it was not very useful for military purposes or hardpan subsistence. It is largely labor that is especially skilled and valuable for that particular kind of work.

"Nowhere has the war strain been more severe than in France; but the luxury shops of Paris have by no means been cut out. Many of them are open and doing business as usual. They are woven into the business fabric of the country. To cut them out would start a raveling that would probably weaken the business fabric even for war purposes. They produce war taxes and bond subscriptions. A good many people subsist by them. True, it is not

absolutely necessary that those people should subsist. They could just go and jump into the river, thereby decreasing the consumption of food. But France doesn't wish them to do that.

"Our music shop contains nothing to eat, wear, hurl or raise the temperature. But the hardest-pressed belligerent finds it advisable to maintain military bands. I am told that the German Government—whose rigorous efficiency for war is daily held up for our emulation—expends a good deal of money, labor and precious materials for the purpose of keeping a supply of talking machines in the rest and concentration camps all along behind the battle front, because it finds that popular music played on these machines invigorates the men's mind and makes better fighters of them. The military critics are always talking about the morale of the different troops—that is, about the state of their minds. By the common judgment of experts nothing is more essential in this war than those

imponderable things which keep men in a high, resolute state of mind. To that crucial end music contributes as well as canned beef."

Then, again, says the writer:

"Cutting out is simple enough, but building up is another matter. The vital thing in any business is its organization—the human associations by which it is carried on. Shut it down and the organization immediately begins to disintegrate. Building it up again takes time and effort. No business organization whatever should be destroyed. Cut down where necessary but never cut out. Prune but leave roots and trunk.

"Say it is a talking machine business. If there is war work—time fuses, small shells, uniform buttons, or what else—that it can do to advantage, turn some of its capacity over to that—gradually so as not to disorganize the factory—and preserve the business organization. We want it now to pay taxes and buy Liberty Bonds. Sure as sure can be we shall decidedly want it to help take up the slack when war production ceases and the millions of hands now engaged therein must turn to other employment."

WINDOWS AS TRADE ATTRACTORS

How the Goldberg Co. Emphasize the Value of the Talking Machine as a Solace and Entertainment in Military Hospitals

The Goldberg Furniture & Carpet Co., 161st street and Third avenue, New York, one of the most successful furniture houses in the upper

The Goldberg Co.'s Attractive Window part of the city, recently utilized its large show windows for a very attractive Columbia display, shown in the accompanying illustration.

This display is particularly interesting at this time in view of the fact that it is intended to depict the solace and entertainment provided in military hospitals by the Grafonola and Co-

lumbia records. Incidentally it may be mentioned that this display is built around the material prepared by the new Columbia dealer service department.

The Goldberg Furniture & Carpet Co. has built up an extensive Columbia following in its section of the city, and Manager Gall has made it a point to offer his patrons efficient Grafonola and record service. The Columbia department is growing rapidly, and a portion of this success may be attributed to the up-to-date and progressive sales and merchandising methods which are utilized at all times.

GEORGE W. LYLE LEAVES FOR WEST

George W. Lyle, assistant to President Widmann of the Pathé Freres Phonograph Co., Brooklyn, N. Y., left last week for a month's trip to the Pacific Coast. Mr. Lyle will visit the Pathé jobbers throughout the country, and will also call upon many of the Pathé dealers. There are a number of important deals for Pathé representation now pending, which will be closed by Mr. Lyle while he is away on this initial trip of the new year.

Enthusiasm is a habit, belief is a habit, persistency is a habit, politeness is a habit, salesmanship is a habit.

C. K. BENNETT REVIEWS CONDITIONS

General Manager of Eclipse Musical Co. Reports 1917 as a Most Successful Year in Cleveland Territory—Thoroughly Optimistic Regarding Outlook for Future

CLEVELAND, O., January 7.—In discussing business conditions during the year just closed and the future prospects of the talking machine business in this section, Chas. K. Bennett, general manager of the Eclipse Musical Co., prominent Victor distributors of this city, remarked: "I am pleased to say from a personal observation that this section of the Middle West has just passed through a most successful year, in fact, the most successful one in the history of the talking machine business. Even though a great many dealers were constantly calling for more goods, every dealer's business will show a splendid increase over 1916, in fact the percentage will amount to a great deal more than that which the factory produced.

"I have talked personally with a great many dealers in the last few days and without an exception each one has told me personally the same story with regard to the quality of business done, and more particularly the fact that cash sales during December were three and four times as great as during the same period in 1916.

"The record end of the business comes in for a big share of the credit for increased sales, this applying not only to the large exclusive shops and department stores in the larger cities, but to the little fellows in the small towns. I had a verbal report from one small dealer whose purchases during the year of 1917 will not exceed \$800 and whose record sales during the month of December amounted to over \$342. Success such as this reflects great credit on the Victor Co. for the publicity given the line and the demand which they are helping to create, to say nothing of the wonderful qualities placed in the goods.

"Another very conspicuous item that I have observed was the fact that a great many more high-priced machines were sold during the past two or three months than during the same period of 1916, indicating beyond question of doubt that the prosperity in our country is now being enjoyed by a different class of people than heretofore, who, like the wealthy man, enjoy the good things of life equally well.

"Business since Christmas has kept up at a very pleasing gait, in fact most of the large stores have retained the extra help taken on for Christmas, and the demand indicates that this rush is going to continue for some little time.

"The success of the dealers above mentioned during the holidays was so pronounced and their surprise so great that this has inspired them to continue the active campaign and thus reap the full benefits.

"The talking machine business has never been in a more healthy condition, nor has the demand been greater, and with every dealer fully

realizing this condition the clamor for goods is just as pronounced as it was before Christmas, and with every other condition equal I predict that 1918 will show up even more prosperous than any year in the history of the business."

BETTER BUSINESS BUREAU REPORTS

Secretary C. L. Dennis Issues Comprehensive Statement of the Activities of the Bureau During November—Eight New Cases Taken Care of and Many Complaints Investigated

MILWAUKEE, Wis., January 5.—C. L. Dennis, secretary of the Better Business Bureau of the National Association of Piano Merchants, has just issued a most exhaustive report of the activities of that bureau during the month of November.

During the month the bureau gave direct attention to eight new cases, and two old cases, growing out of charges of misleading advertising and also investigated a number of miscellaneous complaints. The work was carried on where possible in co-operation with the secretaries of local Vigilance Committees. Of the eight new cases handled two were due to overpricing, two to "explosive" advertising of special sales, one to "factory prices" advertised by a "gyp" dealer, one to questionable special sale, and one to the efforts of the manufacturer to protect his rights against encroachment by a dealer. Price comparisons were the cause of the trouble in most cases.

The report emphasized particularly the activities of "gyp" dealers in many cities, and it was found that the present situation in the country is being taken full advantage of in forwarding this class of operation. It is suggested that complaints regarding "gyp" dealers be forwarded to the bureau as soon as possible with full information in order that prompt action may be taken.

Of the eight new cases taken up by the bureau during November two were in Indianapolis, one in Chicago, two in Davenport, Ia., one in Peoria, Ill., one in St. Louis, Mo., and one in Stroudsburg, Pa. The miscellaneous complaints taken care of came from a score or more cities.

The trade has been much interested in the report of the bureau's work being sent out by Secretary Dennis, and the members have expressed themselves in complimentary terms. A full report of the bureau and its work will be made at the meeting of the executive board, committees, and State Commissioners of the National Association of Piano Merchants, to be held at the Biltmore Hotel, New York, January 30 and 31, 1918.

UNCLE SAM'S MEN HEARD FROM

Roy J. Keith Gets Interesting Letters From W. G. Porter and Morris Owens

Roy J. Keith, vice-president of the New York Talking Machine Co., received a few days ago a very interesting letter from W. G. Porter, who was formerly one of Mr. Keith's "right-hand men", in the executive offices, and who resigned to become a member of the Ambulance Service in the U. S. Army.

Mr. Porter, who has a host of friends in the local talking machine trade, is now serving his country "somewhere in France," and his letter reflects the good cheer and optimism which made him one of the most popular members of the local wholesale fraternity. Mr. Porter is serving in the same company as Joe Swan, another member of the New York Talking Machine Co.'s staff.

Mr. Keith also received in his New Year's mail an interesting communication from Morris Owens, who was formerly a member of the company's sales staff, and who is now with the 104th Field Artillery at Camp Wadsworth, Spartanburg, N. C. In his letter Mr. Owens expresses only one regret, namely, that his former associates—Messrs. Porter and Swan—managed to reach the firing line in France before he did. In other words, his letter emphasized the spirit of patriotism and unselfishness which is going to be an important factor in the conflict "over there."

L. W. Essex, secretary of the Manophone Corp., Adrian, Mich., has resigned his position with this company. His plans for the future have not as yet been announced.

H. L. WILLSON'S MESSAGE TO TRADE

General Manager of Columbia Graphophone Co. Extends New Year Greetings to Columbia Dealers Through Columns of The World

H. L. Willson, general manager of the Columbia Graphophone Co., sends the following message to Columbia dealers, through the columns of The World:

"By the courtesy of The Talking Machine World, I am able to send a New Year greeting

H. L. Willson

to Columbia dealers, through the news columns of a trade paper which for years has stood staunch and true to musical instrument manufacturers and dealers.

"Nineteen hundred and seventeen has closed with a bigger year, bigger prospects, and greater satisfaction to the Columbia Graphophone Co.

and we believe to Columbia dealers than any previous year. We are entering the New Year full of confidence in our dealers, in our product, and in our policies, and in 1918 we hope to give you heartier co-operation and better service, and exert a little more effort in every direction in order that you may reap bigger sales, bigger profits and greater satisfaction in your representation of our company.

"We take the opportunity of thanking all Columbia dealers for their splendid loyalty and co-operation in 1917, and wishing them a happy and satisfactory New Year in the efforts we know they will make in 1918 in their own and our behalf."

BAKER JOINS TRAVELING STAFF

George A. Baker, connected with the local wholesale branch of the Columbia Graphophone Co., for many years has been appointed a member of the company's traveling staff, and will visit the Columbia dealers in Brooklyn. Mr. Baker assumed his new duties the first of the year, and from all indications will achieve very pleasing success.

During the past few years Mr. Baker has been in close touch with Columbia dealers in this territory, and his intimate knowledge of the details of talking machine merchandising well equips him to fill his present post. He understands the dealers' problems, and is in a position to render them efficient service and co-operation.

SOMEWHAT PERSONAL!

For a store salesman, especially, the habit of shaving every morning, for example, is a good habit. No man can shave himself without following it up with clean linen, brushed clothes, a shine, and a smile which begins at his heart and spreads out. Omit the morning shave, and you have not only discounted your appearance for the day, but you have discounted your efficiency for the day.

IT WAS TO BE EXPECTED

Ready File Co. Tells of the Results Secured Through Advertising in The World—Many Orders Received From Foreign Countries

C. Stanley Garrison, advertising manager of the Ready File Co., Indianapolis, Ind., writes as follows to The World regarding the results secured by that company through its advertisements carried in the columns of this paper. He says:

"You will be interested in knowing of some of our advertising experiences in The Talking Machine World.

"As a result of our double-page spread and our page spreads, we have received orders from Canada, Cuba and England and several fat ones from here at 'home.' While we expected results from local circulation, we will admit our surprise at the way The World pulls abroad."

NOW LOCATED IN MEMPHIS

John A. Hofheimer, who was formerly connected with the Maison-Blanche Co., New Orleans, La., is now associated with B. Lowenstein & Bros., Memphis, Tenn., where he is making an excellent record in the talking machine department of that business. Mr. Hofheimer is a practical, progressive man, who has given much consideration to the problems of the industry and their solution.

VALUE OF CO-OPERATION

Every one of us needs the very closest co-operation of the other fellow. If you are selling, try to know your merchandise better, be enthusiastic about it, be agreeable to your customers, look neat—in a word, sell better than you ever sold before; or, if you are in the executive end of the business, do your work in such a way as to be satisfactory to your department and to yourself. Remember, you are the final judge of the honesty of your labor.

"MICKEL"

A Great Name in the Victor Game

How Many of Those MILLIONS of Victor Records are YOU Going to Sell During 1918?

It's a big game. So big, in fact, that one cannot sit down and realize it all at one sitting. But if you are properly set for it you know you are going to get *your share*. A little hustle, "punch," vim and energy will sell you far *more* than your share. Let's get together on the *Victor Record* question *now*; there are many things we can tell you about the game. Will you meet us half way by writing us, *Now?*

PAYS TRIBUTE TO TALKING MACHINE

Bishop Mitchell, of St. Paul, Tells People of Toronto the Blessings of the Talking Machine in the Home and in the War

Bishop Mitchell, of St. Paul, Minn., recently preached in a Toronto church on the importance of education because of its effect in enlarging the vision of the soul. In illustrating his thought he said: "Unfortunately I myself had not the early advantage of a thorough musical education and for many years my ear was dull to the concord of sweet sounds. Thanks to the player-piano and the talking machine I have gained an understanding of some of the great music of the world and my power of appreciation is wonderfully enlarged. To that extent my life has been made fuller and more interesting. Some musicians, generally those whose performances are only indifferent, affect to look with contempt upon what they are pleased to call 'canned music.' They are surely wrong. Not long ago a young woman assured me that she could not endure a player-piano, it was so mechanical. If it were half as mechanical as the playing of this very young woman the inventor would not be proud of it.

"I come home after a hard day. I ask one of the greatest artists in all the world to sing to me. If I do not like his song I can stop it in the middle without discourtesy. If I like it, I say 'Sing it again,' and he sings it again in the same glorious and fervent tone. I may even cry 'Sing it again,' and he sings. To me the talking machine and the player-piano have opened a new world of beauty and discovered a very universe of splendor."

The eloquence of the bishop was not ill-placed. Beyond the shade of a doubt, the public appreciation of the best music has advanced more since the invention of the phonograph than in a hundred years previous to its appearance. On the remote prairies of Alberta, Scotti and Destinn and Rappold and Caruso are singing every evening. In the miner's cabin, on the frontiers of civilization, on the widespread seas as well as in the luxurious city home men and women are gaining an insight into the glories of an art formerly obscured by clouds and darkness. Even on the battle front the art of the greatest living musicians may be appreciated. Many significant stories have come to us from the war zone, but one thinks most frequently, perhaps, of the request of the unlucky Townshend force captured by the Turks in Mesopotamia more than a year ago. While besieged at Kut el Amara and cut off from the relieving force proceeding up the river they got a message through the enemy's lines. "Send us some phonograph needles." The needles were delivered by aeroplane.

VICTOR NUMERICAL CATALOG

The Victor Co. has just issued its new numerical catalog listing all records up to and including the November supplement for use in combination with the November record catalog.

In this numerical catalog extra pages are provided for adding to the catalog the new records issued every month.

The suggestions made on the inside of the front cover are particularly valuable. Properly used, this catalog will insure efficiency in ordering and handling records. This is particularly true in meeting the requirements of the smaller stores.

The six divided spaces before each record number afford a most convenient method for keeping track of the demand for each particular record—a most important essential in the successful conduct of a business and one which should be taken advantage of.

"A NEGLECTED WAR ASSET"

President Bird, of Manufacturers' Association of New Jersey, Tells of the Service That Trade Organizations Can Render the Government by Giving Accurate Information

Under the heading of "A Neglected War Asset," J. Philip Bird, president of the Manufacturers' Association of New Jersey, has emphasized the value of existing trade associations in assisting the Government in its war work, by providing the authorities with accurate information regarding capacity, equipment and organizations of various manufacturing plants that might be utilized for Government work. The suggestions of Mr. Bird are fully in accord with what has been done, and is being done, by the Music Industries Chamber of Commerce and are therefore of interest to the music trade men. He says:

"In the possession of our long established national craft organizations is practically all the information needed by our Government officials for the prosecution of the war as to location of plants, number of men employed, capacity, etc. These American craft bodies have at their fingers' ends concrete, definite and up-to-the-minute information on the ability of every industrial plant in their respective and correlated lines. They know every minute of the day where labor is scarce and where it is adequate or plentiful. They have authentic knowledge as to supply and demand for important raw materials.

"If this highly perfected machinery and organization were taken advantage of by the Government, it would unquestionably save our officials the expenditure of considerable time, energy and money now being devoted to the gathering and usage of such necessary information on our economic and industrial resources.

"The patriotic co-operation of the thousand and one craft organizations ought to be availed of. The Government would be most willingly served with trustworthy trade data by the steel men, rubber men, live stock men, hardware men,

implement makers, engineers, garment producers, paint manufacturers, etc., through their well established trade associations.

"An arrangement of this kind would, with proper authority behind it, almost automatically avoid the evil of any district shortage of labor or raw materials causing delay in placing or delivery of important rush orders for badly needed supplies. It would place the industries of the nation under the practical and most effective control of a patriotic, voluntary and co-operative dictatorship, similar to the present voluntary censorship which our American newspapers are working under so satisfactorily. A properly drawn up set of rules, fixed by official promulgation as a supplementary method, would likewise solve the much mooted problem of essential and non-essential industries.

"Each craft association being a specialist in its own line, it is evident that no single national chamber of commerce, manufacturers' association, or even a State chamber or association, has the necessary facilities for doing what trade or craft bodies can do. This machinery for the carrying on of America's most gigantic enterprise—winning the war—should not be neglected.

"Let us cease encouraging 'Manufacturers' War Congresses,' etc., etc., who pass resolutions and go home, and turn our efforts to the utilization of this neglected war asset. The present instrumentalities are adequate to the present demand."

CLOSED SATISFACTORY BUSINESS

The Phonograph Clearing House, Inc., New York, which carried its first announcement to the trade in last month's World, reports the closing of a very satisfactory business during the past few weeks. S. N. Rosenstein, president of the company, states that his concern found one hundred items for as many manufacturers and dealers, and that he had received inquiries from all parts of the country and more are coming in every day.

TALKING MACHINE RECORDS FOR SOLDIERS AND SAILORS

New York Evening Journal, in Cartoon and Poem, Urges Public to Send Disc Records to Men Now in Training for Military Service—The Value of Music in Preserving Morale

The important part that the talking machine plays in the life of the soldier or sailor has the Y. M. C. A., who so far as possible will see that they are distributed in accordance with the

©Star Publishing Co., 1917.

OVER HERE--AND OVER THERE

It is only a half-worn record
Of an old, familiar air,
And you hardly know that you hear it
As you doze in your Morris chair.

The sleet on the window rattles,
While the blasts of Winter blow,
But what do you care for Winter
By your fireside's cheery glow?

What is a half-worn record
And a ditty of other days—
It is Just a Song at Twilight,
Heard through a dreamy haze.

Cheer up our boys in camp or aboard ship by sending them any disc talking machine records you can spare. They will keep our soldier and sailor lads in good spirits these long Winter evenings. Any Army or Navy agency will gladly forward whatever records you may turn in.

N. Y. Evening Journal Cartoon and Poem Urging Gifts of Records to the Boys in Service

been strongly emphasized recently through the energetic campaign being carried on by the New York Evening Journal to have talking machine owners contribute new and old records for the use of the men in camps or on ships. Several days recently the Journal ran special front-page stories emphasizing the desirability of talking machines for the fighting men and publishing letters from soldiers and sailors asking for records or telling of their appreciation of gifts of records received.

On one evening the Evening Journal covered four columns of its editorial page with the cartoon and accompanying bit of poetry reproduced herewith, and it is reported that the effect of the campaign has been immediately apparent, with the result that practically every camp and a great majority of the ships had new supplies of records for the Christmas season. The contributions of records are being collected by

It is only a half-worn record
Of some old, familiar air,
Yet it makes of the dreary dugout
A bit of home over there.

Gone are the shivering trenches
And the stretch of bloody loam;
Every heart with the music's turning
Back to the Old Folks at Home.

And each for his Annie Laurie
Would lay him down and die—
Strange how a half-worn record
Brings a tear to the soldier's eye!

C. B. Q.

expressed desires of the donor. The campaign carried on by the Evening Journal demonstrates that the value of the talking machine is being universally recognized.

COLUMBIA MEN IN U. S. SERVICE

Imposing List of Officers, Directors and Employes of Columbia Graphophone Co. in Service of the Government in Various Capacities

The accompanying list of the officers, directors and employes of the Columbia Graphophone Co., New York, who have entered the service of the Government, is a remarkable tribute to the patriotism and unselfishness of the members of the Columbia organization. President Whitten is devoting almost all of his time to the U. S. Navy, and every Columbia employe who has entered the service of the Government is proud of the fact that the head of the company is sacrificing all of his personal interests to assist the United States in its fight for democracy.

The Columbia factories at Bridgeport, Conn., can also boast of a service flag that is a tribute to the whole-hearted patriotism of the employes at this plant. At the present time 285 members of the Columbia factory staff are "doing their bit" for the Government, constituting a splendid body of well trained men:

List of Enlisted Men

Officers and Directors—F. S. Whitten, president, lieutenant in navy; Capt. John J. Phelps, director, navy.

Executive Office Employes—M. D. Easton, army; J. E. Barry, army; E. L. Manning, army; E. C. Nelson, navy; Edw. Shannon, navy; Edw. Prink, army; C. C. Couper, army.

Baltimore Branch—Jos. Heilman, navy.
Boston Branch—Eugene Martin, army; D. E. Ballou, army; Wm. Townsend, army; F. L. Dickinson, army; F. D. McCutcheon, army.

Chicago Branch—Vincent Farnham, merchant marine; Gregory Dorian, navy; A. B. Russell, signal corps; M. C. Master, radio division navy; Wm. Finger, mechanical staff, ordnance department.

Dallas Branch—E. B. Shiddell, army; Fred Winkle, navy.
Kansas City Branch—Walter Hoag, army; Marco Randazzo, aviation.

Los Angeles Branch—W. O. Ryle, army; Lawrence Powers, army.

New Haven Branch—W. W. Knott, army; Harold Wilson, navy.

New Orleans Branch—A. F. Fortier, army; E. J. Hymel, army.

Warren St. Branch, New York—J. A. Sieber, navy; J. A. Johnson, navy; W. E. Guthrie, army; J. D. MacDonald, army; R. Wagner, army; Wm. Strohmeyer, army; Joseph Jones, army; Edw. Flanagan, army; Walter Gaffney, army; J. Turbidity, army; C. R. Rhodes, army; A. Vernon, army; D. S. Barr, army.

Philadelphia Branch—Joseph Callahan, army; John Kelly, army; Chas. Glasgow, army; Benj. Thomas, army; Jos. Mollick, navy; Albert Lancaster, army; Wm. Page, army; W. H. Appleby, navy; Wm. Wagner, army.

Pittsburgh Branch—B. D. McCampbell, army.
Portland, Me., Branch—Clyde Skinner, navy.

San Francisco Branch—Andrew C. Love, army; Kirk Kuhn, army; Quinton Worthington, army.

St. Louis Branch—Clyde Roos, army.

List of Drafted Men

Executive Office—D. V. B. Allen.

Baltimore Branch—William Freeman.

Chicago Branch—F. Lindgren, J. Peterson, L. Batchelor, G. Simpson.

PHONOGRAPH APPLIANCE CO., 109 West Broadway, NEW YORK

FINANCIERS SAY BUSINESS WILL BREAK RECORDS IN 1918

Leaders in Important Lines Predict That the Industrial Activity of the Nation Will Be on a Tremendous Scale During the Year Just Beginning—Optimistic Viewpoint Heartens All

Industrial and financial activity on a tremendous scale is foretold for 1918 by representative men in various important lines, whose views have been gathered for the January number of *System*, the "magazine of business." Demands of the war will, of course, be of chief importance and will engage general attention. Income of supply agencies will be greatly augmented, but the outlook in other directions is also for prosperity because business of every character will adjust itself to the war situation, and the experience of 1917, in which unprecedented Government requirements were met without disturbance of business, will be continued, according to the best opinion. High wages will be coincident with widespread economies.

Following are some of the views sent to the magazine:

Nation's Aim Is to Win War

W. P. G. HARDING, Governor of the Federal Reserve Board—The paramount business of the United States at this time is the winning of the war, and the activities of the American people are directed to this end. The production, manufacture and transportation of those articles which are necessary for the maintenance of the population of a nation engaged in war and for the support of its armies in the field must be stimulated in every possible way. The Government is the largest purchaser of supplies, the chief customer of business, and its financial requirements will be very heavy. The people are fast learning habits of thrift, of industry and of economy. Over 10,000,000 of them are holders of Government obligations in which they have invested their savings and for which many have themselves gone into debt, thus pledging their future earnings and economies for the support of the Government.

ELBERT H. GARY, chairman of the board of directors of the United States Steel Corp.—It is up to us to prove our continued loyalty to the Government; but, more than that, our loyalty to ourselves in the performance of duty. If our country is defeated in the pending military conflict your property and business and mine will be of little value. We shall have retraced our national steps a century and a half. The wealth of the country will be seized and retained as prize money by other nations. We have been forced into the war and we are com-

pelled to fight in defense of our persons, our property and our sacred honor. There is no escape. We are in the war to the end, however costly and bitter the struggle. No man, no country, was ever engaged in a more righteous or a more compulsory defense.

Business Dominated by War

FRANK A. VANDERLIP, president of the National City Bank—The business situation in 1918 will be dominated by the war, and the energies of this country must be concentrated as fully as possible upon winning the war. In the aggregate the production of the industries both in quantities and values will be enormous; they will be greater than ever before, employment will be complete and the aggregate of payments in wages will be far ahead of any previous year. The income of our farmers will be larger than ever before. There will be an unusual distribution of income among the masses of the people, and this purchasing power will make a large market for necessities and essentials, not to speak of what may be classed as luxuries. There is a great resource as yet hardly touched in the army of women who have never gone into industry but who will respond now to our appeal to their patriotism. The problem of America is to speed up its productive machinery to the highest possible limit.

Schwab Is Bullish

CHARLES M. SCHWAB, chairman of the board of directors of the Bethlehem Steel Corp.—I have always been bullish on the United States. I can see nothing ahead to make me modify my attitude; a tremendous significance attaches to how squarely we meet the problems, apparent or not yet apparent, which lie before us. We can think only of the successful prosecution of the war—in its every phase—for the end of the war is nowhere in sight. We shall be successful in the measure that we put business before pleasure.

CHARLES H. SABIN, president of the Guaranty Trust Co.—Demand for additional capital is greater than ever because of general business activity, but the Government's demand for money also is unprecedented, so the bankers must bear the double strain of colossal loan flotations and the financing of unexampled trade activities. In addition, a considerable volume of maturing obligations must be provided for. Fortunately, the machinery for relieving much

of the pressure exists in our strong, centralized banking system and its great credit resources.

GEORGE E. SMITH, president of the Manufacturers' Export Association—We must buy from neutral countries in order to carry on our own war preparations; if we buy from them we must also sell to them or we shall not be able to pay for what we buy. Therefore, I think that it is a very high duty to develop our export trade in the most intensive fashion and with the highest possible efficiency. We may not—probably we shall not—have goods enough for both the home and the foreign markets; that which is sold in foreign markets helps us to pay our way in the war, and hence I should give the foreign markets the preference over the domestic.

B. D. CALDWELL, president of Wells, Fargo & Co.—I do not believe there will be any let-up in the business of this country during the coming year or, indeed, during the war, the end of which does not appear to be in sight. The performance of our part in the successful prosecution of the war is the greatest business we have ever undertaken, and will require that every enterprise which can help in the least degree shall strive for the high-water mark in activity and efficiency.

Demand Exceeds Supply

ALBA B. JOHNSON, president of the Baldwin Locomotive Works—War involves prodigious expenditures and these produce business activity. Therefore, as long as the present conditions of war exist, there must continue to be a demand exceeding the supply, resulting in strongly sustained prices.

CHARLES E. MITCHELL, president of the National City Co.—When the exigencies of the times have come home to all, then will America awake. She will bear taxation without grumbling. She will treat her railroads fairly, that they may wax strong for her needs. She will stamp out sedition, which now flames about her very skirts. She will lend every assistance to her corporations that they may produce in abundance. She will, while demanding fair play for her laborer, insist that he toil unremittingly for the common good.

EXHIBIT AT AUTOMOBILE SHOW

The Doehler Die-Casting Co., Brooklyn, exhibited at the National Automobile Show held at the Grand Central Palace from January 5 to 12. Although the exhibit was naturally devoted in a larger way to automobile die-castings, there was shown a very fine exhibit of die-castings of talking machine parts. The display was varied and wide in scope and contained die-castings of sound boxes, tone arms, tone arm necks, in fact, every possible part of a talking machine that could be die-casted. The exhibit was well visited by the thousands attending the show.

MUSIC FOR "OUR BOYS"

"Music for Our Boys in the Service" is the heading of a timely and effective poster mailed to Columbia dealers this week. The text of this poster reads as follows: "Send some Columbia records to your soldier. There's a Columbia Grafonola in his Y. M. C. A. or Knights of Columbus Army Hut. Bring your records to us and we will deliver them for you." It is interesting to note that a Columbia Grafonola may be found in the army huts mentioned, as it indicates the remarkable popularity of this instrument.

LEAVES ON WESTERN TRIP

Leonard Markels, well-known motor manufacturer, left New York Sunday for a Western trip, and according to his present plans will visit Chicago, Milwaukee, St. Paul and Minneapolis. During the past few months Mr. Markels has received letters from many Western manufacturers regarding contracts for 1918, and will close these contracts while away on his present trip.

TALKING MACHINE ARTISTS TO TOUR

Collins, Harlan, Campbell, Burr, Meyers, Murray and Others in Group Giving Concerts in the East—Of Particular Interest to Talking Machine Owners and Retailers Everywhere

As is announced on another page of The World this month, the Popular Talking Machine Artists, the men who have made records of the popular kind for so many years that their names are known and esteemed in the majority of homes, and who are represented in all the leading monthly lists, are now preparing for their spring concert tour.

At intervals during a year or more, these artists, including Henry Burr, Arthur Collins, George H. Meyers, Albert Campbell, Byron G. Harlan, Fred Van Eps and Billy Murray, with Theodore Morse, the noted composer, at the piano, have given concerts in various cities in the East and have met with unqualified success, through co-operation with local talking machine dealers.

The voices of Collins and Harlan, Albert Campbell, Billy Murray and the rest of them, have long been familiar in the homes of the country through the talking machine, and the public generally, especially in the smaller cities and environs, have shown a surprising interest in the opportunity to hear these artists in person on the stage, and to see them at close range. Whether they appear on the records as members of the Peerless Quartette, the Sterling Trio, or as individuals, the interest has been the same, and it has been a rare occasion when the artists have not played to capacity audiences. Instances are cited where talking machine enthusiasts have traveled from fifty to seventy-five miles each way just to see and hear their favorite record artists in the flesh.

The concerts given by the artists are made up of solos, and chorus numbers, and comedy bits, which, with a generous number of encores, run somewhat over two hours. Where practical the concerts are held with the co-operation of the local newspapers and talking machine dealers of the various lines, for, as the artists without exception sing for at least two record companies, and in some cases for a half a dozen or more companies, practically every dealer in town has some direct interest in their work and stands to benefit by their appearance before his customers. In some cases one dealer will arrange for the concert by himself, and more often dealers will co-operate to bring the feature to their city. Instances are on record where newspapers have printed two and four-page supplements featuring the concert, the artists and talking machines generally, and carrying a substantial amount of advertising from local retailers to make the venture pay and to give it impressiveness.

As one newspaper puts it in a review of the concert: "It is something unusually interesting to hear a coterie of the men who, taken together, have made more talking machine records than

any other people on earth." Another says: "It is particularly pleasing to see and hear this aggregation—to gaze directly at persons who have been announced on the printed covers for years." Still another paper says: "This is an event of special interest to owners of talking machines, as it affords them the rare opportunity of seeing these artists in person and watching the manner in which they 'put across' the various songs and instrumental numbers that have become so popular the world over."

Among dates scheduled by the Popular Talking Machine Artists for next month are: February 6, Syracuse; 7, Buffalo; and 8, Rochester, all the dates being made through the co-operation of local talking machine wholesalers and dealers.

GROWING IN POPULARITY

The Widdicomb Line of Phonographs Has Won Favor Among Lovers of Artistic Creations in Phonograph Making and Designing

GRAND RAPIDS, MICH., January 9.—The Widdicomb line of phonographs recently introduced to the trade is meeting with a very cordial re-

Widdicomb Queen Anne Model

ception. The experience of the Widdicomb Furniture Co. in catering to the furniture trade has enabled them to offer a line of phonographs whose cabinets have achieved instantaneous popularity even before the fine tone of the phonograph is heard. The accompanying illustration shows one of their console models in the Queen Anne style. Their years of furniture experience had taught them that the Queen Anne style ranks high among the various period styles. The other popular periods are all represented in the various artistic models in the line made by this company. It is their contention that as phonographs are essentially pieces of living room furniture great care must necessarily be given to the cabinet and its harmonious relation to the other furniture in the room.

The Widdicomb Furniture Co. have also seen to it that every other part of the machine matches in perfection to the cabinet that contains it. This is notably evident in the remarkable reproducing qualities of the instrument which contains so many distinctive features, among which is the modulator which is featured in the phrase "Play it yourself."

TO PRESERVE GREAT SPEECHES

Society Formed to Make Talking Machine Records of Speeches in Congress

St. Louis, Mo., January 10.—Guy Colterman, a prominent attorney of this city, has founded a society to be known as The Nation's Forum, which will make the talking machine aid in winning the war. The society plans to use records of speeches by American leaders in Liberty Loan campaigns and other patriotic activities all over the country. It is also planned to make permanent records of great speeches and messages in Congress and elsewhere, so that posterity may listen to the voices of the war leaders of 1918.

ADVANCE RECORD PRICE

On January 15 Emerson records heretofore retailing at 25 cents will be advanced to 35 cents retail, thus affording a much larger profit for retailers and jobbers. In addition, the company is beginning to shift its new 65-cent records which, from all indications, will meet with an active demand from dealers handling machines that do not include record lines.

The company states that, by the use of more economical methods in manufacturing and selling, it succeeded in reducing its expenses considerably during the past few months. This saving, added to the increased profits derived from a larger volume of business, enabled the company to close a very satisfactory year.

War service and business service should and can go hand in hand these days.

A. D. GEISSLER CHATS OF WAR, BUSINESS AND PROSPECTS

President of New York Talking Machine Co. Discourses in His Usual Interesting Way on Business Conditions and Prospects—Lessons Learned in 1917

The representative of The World was thinking of business conditions more than world-wide conditions when he visited recently the offices of Arthur D. Geissler, president of the New York Talking Machine Co.

The first question asked Mr. Geissler was worded "A lot happened last year, didn't it?" the aim of this question being to get Mr. Geissler's ideas on the different changes in organization, methods of distribution, etc., which had transpired during 1917.

In answer to this question Mr. Geissler said: "Yes, not only last year but the year before that and the year before that. But now, what a different atmosphere seems to pervade, that we have the first inklings of peace and that we can, for a moment, stop and consider all the dreadful debauchery and waste of homes, lives and treasure since this war began.

"And now that we are in it, how fortunate it was that France was ready—that Great Britain was ready with her navy—that little Belgium was able to throw herself into the breach until France could gather herself together and hold the onrushing tide—and then Britain was able to sustain that support!

"What must be the feeling to have them 'over there' now to know that we, too, are really 'in it!' The months of recruiting and enlistment—the filling up of officers' instruction camps—the draft bill—the shipping and food regulation—the huge appropriations—and finally, for them to realize the glow of heart with which we greeted their Joffre, their Balfour and their Italian Mission—'Vive L'Italia,' I say. She understands and must—sore beset as she has been.

"We have had our drives for money—it has been a year of preparation. Our resources—our resolutions—are the things now that must count this year.

"You ask me to predicate business condi-

tions. How can anyone say what is to be?

"The largest industries in the country have offered their entire resources to the Government. I understand the Victor Talking Machine Co. was amongst the first to do so. If labor, material, fuel and transportation conditions permit the Victor Co. to make even as much merchandise as they made last year, then the business of the retailer and the wholesaler will be as large as last year.

"We are selling Victrolas and Victor records, that is true, but essentially what we sell is music—a product no longer considered a luxury, but a necessity—shown by the liberal ap-

DEMAND FOR FIBRE NEEDLES

Continues to Grow, Judging From the Increased Activity With the B. & H. Fibre Needle Co., Chicago—A Chat With President F. D. Hall

CHICAGO, ILL., January 10.—"From present indications," said F. D. Hall, of the B. & H. Fibre Mfg. Co., when called upon by a representative of the World this month, "it looks as though the trade in general is threatened with another avalanche of business for the coming year. Not only in this country has business been exceptionally good, but there has been an enormous increase in the export trade lately. Shipments to Central and South America and Australia are being handled in a more expeditious manner than for some time past, and now that the Government has taken over the rail situation, the trade can rest assured that all freight in transit hereafter will be sent over the quickest possible routes and that there will be no delay at the point of destination. This will have an effect upon the dealers to whom the goods are being shipped of giving them the necessary stimuli to get out and do more business than they have

propriations made by the Government for provision of music to its soldiers and sailors, realizing that mental and physical strength comes not through food alone. And through the Victrola, we are furnishing to the people the most *inexpensive* medium, of relaxation, pleasure and inspiration.

"You ask me what was the greatest lesson learned in 1917? I feel that through the Liberty Loan issues we have learned that huge sums of money can be raised by the Government without disturbing business seriously. Through the placing of these funds in the hands of the best consumer that business has ever known—the Government—we have a consequent speeding up of industries which has caused the country at large to look upon Washington with confidence, and feel that big business, small business and the laborer will be treated fairly."

done, knowing that their orders will be taken care of promptly. The freight situation prevailing towards the latter part of the old year was a major factor in keeping a great many dealers from taking in all the business that was possible for them to do.

"The raw material which we use for the manufacture of fibre needles is of better grade and quality than we have ever had before, and the Porto Rican fibre, samples of which the Government sent us some time ago, has proved its merit and is equal, if not superior, to the material that we have been receiving from the Orient.

"We have installed many new and improved machines for the manufacture of our needles and are turning out a product that is far superior both in quality and workmanship than ever before. Of course, this necessitated a large increase of our forces and we have made all preparations to take care of the trade for the coming year, which, no doubt, will be a banner one. We have also made many improvements and have added several new features to our latest needle cutter and are also prepared to take care of the demand that has been increasing so rapidly."

TALKING MACHINE MEN TO MEET

New Applications for Membership and Annual Reports to Be Acted on at Coming Meeting

The next meeting of the Talking Machine Men, Inc., will be held in the directors' room of the Merchants' Association, on the ninth floor of the Woolworth Building, at 2 p. m. on January 16. Many important matters will come up for discussion at this meeting, and all members are urged to attend. Arrangements for the annual dinner will be submitted, and the reports of the various standing committees will be read. Among recent applications for membership, to be acted upon at this meeting, are those of the Berlin Department Store, 1013 Broadway, Brooklyn, and Schmuckler & Singer, Inc., 133 Canal street, New York City.

NEW QUARTERS IN MINNEAPOLIS

Nye's Brunswick Shop Now Located in the New LaSalle Building, That City

MINNEAPOLIS, MINN., January 5.—One of the first business concerns to move into the recently completed LaSalle Building, this city, is Nye's Brunswick Shop, conducted by Ex-Mayor Wallace G. Nye and Geo. M. Nye, and in which the Brunswick phonograph is featured, together with Pathé records. The new quarters are most elaborately furnished. In addition to a full line of phonographs, the Shop also has on display a big assortment of billiard outfits which are also manufactured by the Brunswick-Balke-Collender Co. With the opening of the new shop, Wallace G. Nye remarked: "I find the harmony of the Brunswick Shop most agreeable in contrast with the discord of public life."

Miss Frieda Hempel, the Metropolitan opera soprano, will start on an extended concert tour early in February.

To Our Clientele

¶ During this period of unusual conditions we are doubling our efforts in order to maintain our service and assist you in every possible way in marketing Victrolas and Victor records, which have won recognition as an *essential product* in the camp as well as in the home.

¶ As a Victor retailer you are therefore "doing your bit" to provide the necessary entertainment and relaxation for the public and the "boys" in camp, in addition to helping the Government carry its economic burden.

WM. MAXWELL OPTIMISTIC OVER THE TRADE OUTLOOK

Vice-President of Thos. A. Edison, Inc., Tells of Great Business in 1917 and Gives Reasons Why There Should Be a Large Purchasing Power This Year

Reviewing the business situation at the request of The Talking Machine World William Maxwell, vice-president of Thos. A. Edison, Inc., writes:

"Our phonograph business in 1917 was the largest in our history, and was 20 per cent. ahead of 1916. The present indications are that our orders for 1918 will be considerably in excess of 1917, but we may not be able to manufacture as many phonographs as we made last year. We expect our record production to be materially larger than last year.

"Among a certain class of bankers, particularly the smaller bankers who absorb their opinions on broad financial questions from the public statements of large bankers, it has become quite the fashion to speak with gloomy foreboding of what the future holds in store for the musical instrument industry. It has been reported to me that various small bankers have said in effect that under present conditions they can't conceive of anyone buying pianos or phonographs.

"The pleasing fact remains, however, that people are buying phonographs and pianos in very large quantities—particularly phonographs.

REARRANGE SUPERVISORS' DISTRICTS

New Schedule for Edison Phonograph Supervisors Became Effective on January 1—Visit Factory for Get-Together Conference

The following rearrangement of Edison phonograph supervisors' territories has been announced by the musical phonograph division of Thos. A. Edison, Inc., as having become effective on January 1. The supervisors and the territories which they will cover are as follows: H. R. Skelton, with E. F. Bedford, as mechanical instructor for the territory embracing Boston, New Haven, Albany and Syracuse; C. S. Gardner, with J. C. Knipper, as mechanical instructor, for New York, Philadelphia, Williamsport, Pa., Pittsburgh and Richmond; N. Johnstone, with J. Finlayson, as mechanical instructor for Cleveland, Cincinnati, Detroit, Indianapolis and Chicago; L. A. Zollner, with A. E. Schiller, as mechanical instructor for Milwaukee, Minneapolis, Des Moines and Sioux City; C. W. Burgess, with D. Lawson, as mechanical instructor for El Paso, Kansas City, Omaha, Denver, Ogden, Utah, and Helena; J. A. Shearman, with C. A. Harrington, as mechanical instructor for Dallas, Atlanta, New Orleans and St. Louis; D. M. Martin, with H. D. Gumaer, as mechanical instructor for all of Canada.

Over the Christmas holidays Supervisors Skelton, Gardner, Johnstone and Martin, and the entire staff of mechanical instructors, were at Orange to participate in a get-together conference, during the course of which they were entertained at dinner by the company.

These bankers make the not uncommon error of ascribing to everyone else their own state of mind, or that which they observe in their immediate associates. The class of people with whom a banker comes most frequently in contact is not the class from which the phonograph dealer will get his business in 1918. The workingman and the farmer are the people who will make the phonograph business good in 1918. There are literally millions of families in the United States who heretofore have felt that they could not afford phonographs, but who, in 1918, because of increased earning capacity, will (despite the high cost of living) feel both able and inclined to make their homes better places to live in by purchasing phonographs. These people will not feel that they are committing an extravagance when they purchase a phonograph. On the contrary, they will feel, and feel rightly, that they are making an investment for the benefit of every member of the family circle.

"The thing that worries me now in connection with our phonograph business is the possibility that the increased purchasing power of these millions of families will find our dealers and ourselves unprepared to meet the demand."

MOST APPRECIATIVE OF OFFER

Otto Heineman, president of the Otto Heineman Supply Co., has received a letter from Major General George Barnett, Commandant, Headquarter U. S. Marine Corps, Washington, D. C., acknowledging Mr. Heineman's offer to furnish each of the U. S. Marine Corps stationed in Cuba and at other points with a Vanophone and collection of Emerson records, for which this company acts as export agents in the Latin-American field.

In a chat with The World Mr. Heineman expressed great pleasure at having an opportunity to provide some amusement for "our boys." Mr. Ackerman, export manager of the company, states that the U. S. Marine boys are anxious to be sent "over there." Their enthusiasm can be readily appreciated, for outside of the patriotic spirit involved the Marine Corps is as fine a body of men as ever have fought for Uncle Sam, and this division offers special attractions to the young American with red blood in his veins. Service on land, at sea, or in the air is open to him, and the fact that the Marine Corps contains no conscripted men appeals to many young Americans who desire to offer their services to the Government, in preference to waiting for the draft.

From F. W. Woolworth: "There are plenty of opportunities for young men today. Many fail because they are not willing to sacrifice. No one ever got far who was in bondage to the body." This is especially true to-day when a great war is facing us.

A POPULAR COLUMBIA MAN

Frank K. Pennington, Assistant General Sales Manager of the Columbia Graphophone Co.

We take pleasure in presenting herewith Frank K. Pennington, assistant general sales manager of the Columbia Graphophone Co., New York, and one of the most popular members of the Columbia organization.

Although he has been connected with the Columbia for less than a year, Mr. Pennington

Frank K. Pennington

has already won the esteem, friendship and admiration of every one of his co-workers. His door is always open for visitors to the executive officers, and his many years of practical sales experience, combined with his magnetic personality, has given Mr. Pennington an entree into the heart of every Columbia man. He is proving an invaluable assistant to George W. Hopkins, general sales manager of the company, and it is Mr. Pennington's earnest hope and ambition that he will soon find time to visit every Columbia branch and become personally acquainted with all his co-workers.

EDISON MAN GIVES LIFE TO COUNTRY

The first man of the Edison organization to give his life for his country was Leslie Parker Colton, of the record stock department, Edison Phonograph Works, Orange, N. J. He was a sailor on the Battleship "Missouri." His death occurred the day following the date originally set for his marriage. Mr. Colton had been three years with the Edison organization.

L. P. Colton

He enlisted in the navy and had seen but two weeks' service.

No man can help an organization to become greater, better, more successful and more efficient without making himself the same.

SOSS

INVISIBLE HINGES

Preserve Beauty

In many beautifully designed, finely finished Talking Machines, Pianos, Music Cabinets, Piano Players, and Benches, the elimination of the unsightly protruding Hinge is essential to preserve the beauty of the design.

Design and Construction

The fine cabinet work which is required in many instances to preserve the disguise of the instrument requires that the hinges be as inconspicuous as possible. SOSS Hinges are *Invisible*.

ELECTRICALLY EQUIPPED OPEROLLOS

All Models in 1918 Line to Be Provided With Electric Motors, It Is Announced

DETROIT, MICH., January 7.—Simultaneously with the new year comes the announcement of the

Operollo Phonograph Co., Inc., of this city, that the 1918 models of the Operollo phonograph will all be equipped with electric motors. They announce that their motive in bringing out an electrically operated phonograph is in response to the numerous and repeated demands of the buying public to which they have ever lent an attentive ear. The choice in the matter is still left to the buyer, however, as these models will be equipped with double spring motors if desired. Electric motors are only one of the many fine features to be found in

the new models, it is also reported by the firm.

office files and sectional bookcases, and the company's policy provides for maximum service to its dealers and the public. The Globe-Wernicke Co. has attained very pleasing success with the Brown disc record cabinet, which is carried in stock by progressive dealers from coast to coast.

THE ANSWER SHOULD BE "YES"

Geo. W. Pound, counsel and general manager of the Music Industries Chamber of Commerce, calls attention to the fact that on the second page of the questionnaire, which registrants under the draft are required to fill out, are these questions:

"Is your business essential to the conduct of the war?" to which it is urged that all men from this industry answer "Yes."

"What is your business?" to which the answer should be "Music."

There are many thousand men employed in the various branches in the industry who will be called upon to fill out the questionnaires, and it is pointed out that the answers outlined as above will do no harm and will perhaps set those with whom they come in contact to thinking of the importance of the music trade.

PROMPT SETTLEMENTS NECESSARY

Credit Men Should Remember That Present Conditions Should Discourage the Carrying of Long-Standing Open Accounts

In line with its advice to credit men that "the nation is at war, and it is time to put your house in order," the December letter of the National Association of Credit Men points out that the carrying of a large number of open accounts results in an expensive waste that ought not to be permitted under present conditions.

In the opinion of the association, prompt settlements should be expected, and asked for where they are not made voluntarily. The merchants who are slow by habit or custom should be pulled up and shown that they cannot expect credit favors unless they arrange to take proper and reasonable care of their accounts. The merchant disposed to be a little shrewd in his practices, taking advantage of unearned discounts, returning merchandise freely, or doing those little tricks which add to the burdens of

the credit man, it is felt, should be shown without hesitation that the days for the indulgence of these practices are past, and that, if he expects the best in treatment and prices, he must give his best.

"This is no time," continues the letter, "for the credit man to be flabby in his treatment of accounts, to be a jellyfish in the hands of his debtors. Rather he must remember that prudence, skill and fearlessness can do a world of good in credits generally, and put his own house in a position that will make it solid, no matter what may happen, and give it ability to contribute its part to the national defense."

LIMIT FIFTH AVENUE SIGNS

Ordinances Just Passed Bar Signs of All Kinds Which Overhang More Than One Foot

Another step toward the conservation of Fifth avenue has been taken by the Board of Estimate in the adoption of two ordinances regulating the placing of signs on buildings on the avenue between Washington Square and 110th street. The Fifth Avenue Association has been working for these ordinances for some time. They prohibit business signs or signs of any nature being carried out over the building line more than one foot. Illuminated signs are not permitted to extend at all over the building line.

SOLVE THE FREIGHT PROBLEM IN MISSOURI TERRITORY

Shipments by Express so Slow That Many Dealers Use Their Own Cars—St. Louis Trade Surpassed Expectations as a Whole—Interesting News Items From the Saintly City

St. Louis, Mo., January 8.—In the main, the talking machine business in St. Louis this year undoubtedly surpassed expectations and expectations were for a larger business than last year, despite conditions. The stocks of machines were very heavy at the beginning of the holiday season and they held out well. Practically all lines were broken as to certain styles, but there were enough machines of every kind to supply needs if the person insisted on a certain make and was not exacting as to style.

Several heretofore exclusive dealers added machines to meet the holiday demand, taking on lines that do not demand the carrying of record stocks. In this manner the Smith-Reis Piano Co. and the Vandervoort Music Salon added the Brunswick and the Grand Leader Department Store added the Sonora. These firms made liberal window displays of these types of machines before the holiday season closed.

One unexpected condition put a number of country dealers at a disadvantage. That was the complete congestion of the express companies as to outgoing freight. Several dealers located fifty miles or so from St. Louis declined to accept the explanation of no shipments from local wholesalers and came to town to see about it. The machines ordered were loaded again and taken to the station and seldom did the dealers succeed in getting them shipped.

Manager Staffleback, of the Pathé line, turned a new deal in this connection. He got his drivers out at 4 a. m. and loaded his shipments onto trucks and applied at the express offices for shipments this early in the day. As a rule, he found the outgoing cars not loaded at that time and his shipments were accepted, but when the available cars were loaded, all later offers were refused. Some dealers twenty miles from the city sent their own trucks to obtain goods.

The Aeolian Vocalion had a very merry Christmas, according to Manager Guttenberger, of the talking machine department at Aeolian Hall. Business far exceeded previous records, it is reported, with a big call for higher priced machines.

This recalls that every sales manager in town is remarking on the high percentage of cash on sales and the short term credits asked. The record made this year never has been equaled, so say all of them. But, strange to

say, the advertising for long terms was never more noticeable. Several of the large dealers published offers of terms that allow eighteen months on machines at \$100 and less and twenty-four months on machines at \$200.

C. R. Salmon, of the Columbia wholesale department, is again in possession of the Columbia sales cup for record distribution. He was the first winner and also he is the first salesman to win the cup the second time. He may not realize on his ambition to win the cup enough times to gain ownership, as on the day the cup arrived Mr. Salmon filed his National Army questionnaire and waived all claim for exemption. He expects to be called for service in the spring, but is hoping in vain, he thinks, that he will have time enough to cinch the cup ownership.

Record sales were extremely heavy this year and the dealers have noted with great pleasure the number of persons, even those not owning machines, who have adopted the rule of giving records as gifts. It is notable that a good many of these gifts were high priced records, those which machine owners had expressed a desire to own, but did not feel they could afford. This note in the sales is reported often by the Victrola dealers.

The Silverstone Music Co. is trying the effect of talking machine music on egg production, having loaned an Edison Disc machine to a local newspaper for use in the paper's booth at the poultry show, which is running at this writing.

TRADE CONDITIONS IN VANCOUVER

Kent Piano Co. Tone Tests—Pathéphone Advance in Vancouver—British Columbia Talking Machine Co. Incorporated

VANCOUVER, B. C., January 8.—During the early part of the month the Kent Piano Co., Ltd., of this city, conducted a series of tone tests at Vancouver, Victoria, Grand Forks and Trail. These were by Hardy Williamson, of the Edison list of artists and well known in Ontario through his recitals with the Edison Diamond Disc. In Vancouver the Kent Piano Co. issued invitations for a recital in the ballroom of the leading hotel. W. E. Townsend, of the Hudson Bay Co.,

was recently in Toronto and reported splendid sales of Pathéphones in Vancouver. The Hudson Bay Co. are strongly featuring the Pathéphone and are putting splendid selling effort behind it, which is bound to bring good results.

Walter F. Evans, Ltd., recently devoted considerable space in the daily newspapers, comprising a series of Victrola advertisements pertaining to construction, educational in character, illustrated and cleverly written.

The Hudson Bay Co., since adding the Columbia line a few months ago, through the efforts of Manager E. Gowan have created a wide and profitable clientele for this department of the firm's business.

The British Columbia Talking Machine Co., Ltd., have incorporated at Vancouver, B. C., with a capitalization of \$10,000.

Informal Friday evening recitals in the store of Fletcher Bros., Victoria, have been found very profitable by the house. These recitals are held on the ground floor, where there is a large phonograph and piano display floor, into which the main entrance opens. Many sales are attributable to these Columbia recitals.

PRAISE FOR STARR PHONOGRAPH

Son of Starr Co. Retail Manager Tells of Value of Starr Phonograph Trench Kit

RICHMOND, IND., January 1.—Charles Curtis, First Class Private, Field Hospital No. 149, Third Division, Camp Shelby, Miss., son of E. S. Curtis, manager of the Richmond retail wareroom of the Starr Piano Co., spent his Christmas vacation with his parents in this city. While here he was a visitor at the Starr store and also at the Starr Piano Co. factory. He was very much interested in the new Starr phonograph trench kit now being manufactured by the Starr Co., and said that music was one of the most enjoyable luxuries of camp life. "In the evening, after our day of hard work, we always have songs and the boys play on their guitars, banjos or mandolins, and we never get tired of it," young Curtis said.

"The boys of the training camps will certainly enjoy these phonograph trench kits, as they are just the thing to furnish a good supply of fun."

Henry Gennett, president of the Starr Piano Co., in behalf of the company, presented Private Curtis with a complete Starr phonograph trench outfit for his division, and also a good supply of Gennett records.

The company officials were assured that the gift was very much appreciated and that nothing could have pleased the men more.

NEW FORM FOR EXPORTERS

War Trade Board Prepares New Form of Agreement Which Is of Interest to Manufacturers of Musical Instruments Who Are Exporting

WASHINGTON, D. C., January 5.—The War Trade Board has prepared a new form of agreement for shippers exporting goods to their own branches or agencies abroad to supersede all previous forms. In issuing the form the board warns shippers that the mere signing thereof does not necessarily mean that licenses will be granted. Heretofore when the War Trade Board granted a license to the shipper to ship to his own branch it exercised no control over what the branch might do with the goods on their receipt. The branch might sell such goods to an enemy house.

It is therefore to make the bureau more effective and at the same time not to work hardships to reputable shippers who have branch houses in foreign countries that the new form has been prepared.

Why is it that the man who prepares for good business usually finds it? Because, subconsciously he fights to live up to his own expectations.

Chas. H. Mumby, 226 Broadway, Bayonne, N. J., has secured the agency for the Sonora phonograph.

were entertained at dinner at Little Hungary.

Papers Read on Friday

On Friday morning the real work of the conference started, and the managers assembled at the recital hall of the Columbia Co.'s Fifth Avenue Shop. With Mr. Hopkins as chairman of

Geo. W. Hopkins

the conference, and President Whitten as the first speaker of the day, the conference was launched auspiciously, the following vital talks being given: "The Big Vision," Francis S. Whitten, president; "Drifting," G. W. Hopkins, general sales manager; "Reports—What They Mean to You and to Us," O. F. Benz; "Supplements," Paul Hayden; "Ordering of Records," A. R. Harris; "Dealer Service Department," H. L. Tuers; "Team Work," F. K. Pennington, assistant general sales manager; "Educational Department and How it Helps You," Frederic Goodwin, educational manager; "International Record Department and 'E' Series Records," Louis E. Rosenfield, sales manager, international record department; (Anton Heindl, manager of this department, was confined to his home with a serious attack of grippe); "Recording Laboratory," E. N. Burns, vice-president; "Export Sales," E. F. Sause, manager export department; "Artists," Theodore H. Bauer, concert and operatic director and adviser; "Artists' Follow Up," Lester L. Leverich; "Outstanding Points of This Day's Conference," G. W. Hopkins; "Period Design Grafonolas and the Fifth Avenue Shop," H. E. Speare, manager Fifth Avenue Shop.

Theatre Party Friday Evening

On Friday evening a theatre party at the Hippodrome served to act as a balance to the serious work which the managers and department heads had accomplished during the day.

Saturday's Conference Subjects

On Saturday morning the conference was resumed, and the following addresses were enthusiastically received: "Advertising Plans for 1918," W. H. Johns, vice-president, George Batten Co.; "What This Advertising Means to Salesmen and Dealers," R. W. Knox, advertising manager; "Co-operation Between Sales and Advertising," G. W. Hopkins, general sales manager; "How You Can Help the Dictaphone," Frank Dorian, general manager, the Dictaphone; "Technical Work We Are Doing for You," C. M. Goldstein, manager, research department; "Musical Menus," A. R. Harris; "What an Audit Means to You," Marion Dorian, auditor; "Retail Merchandising," G. W. Hopkins; "Representation," F. K. Pennington; "Question Box,"

Before adjourning, the visiting managers expressed their keen appreciation of the splendid program of business talks which had been prepared by the sales department. Mr. Hopkins and Mr. Pennington were congratulated upon the careful thought and consideration which they had bestowed upon every detail of the program, and the managers were unanimous in stating that the conference would enable them to greatly enhance the efficiency of their individual organizations in 1918.

Banquet at the Hotel McAlpin

On Saturday evening the managers, executives, members of the executive departments in the Woolworth Building and the members of the Dictaphone selling organization were the guests of the officials of the company at a banquet held at the Hotel McAlpin, which was a most enjoyable affair in every way. The Dictaphone division had also held its annual conference the week of January 2, and had succeeded in making their conference of practical value in every respect.

At the banquet on Saturday evening N. F. Milnor, general sales manager of the Dictaphone division, presided as toastmaster, and filled this important post with his customary good cheer and ability. He prefaced his introductions of the speakers of the evening with the remark that all of the addresses would be informal, and that each speaker would talk for only a few minutes.

Francis S. Whitten, president of the Columbia Co., was the first speaker of the evening, being accorded an enthusiastic reception from the members of his organization. Mr. Whitten paid a tribute to the men with whom he is associated, and smilingly told the guests that they should all feel the company was "their company," giving them some idea of the expectations of the Columbia executives for the new year.

Mr. Whitten was followed by several members of the Columbia executive organization, all of whom spoke pertinently and in a manner which won the hearty enthusiasm of every Columbia man present: H. L. Willson, vice-president and general manager; Frank Dorian, general manager of the Dictaphone division; Edward N. Burns, vice-president; George W. Hopkins, general sales manager; Frank K. Pennington, assistant general sales manager; Marion Dorian, chief auditor; C. A. Hanson, general manager of the Columbia factories. George Edward Smith, president of the Royal Type-writer Co., and prominent in industrial and financial circles, was another speaker at this dinner who earned the hearty applause of the diners.

Musical Entertainment on the Program

One of the surprises of the evening was the introduction of Licut. Gitz-Rice, of the Canadian Army, who had returned only a few days previous from the battle front abroad. Mr. Gitz-Rice proved to be an entertainer of exceptional ability, and his rendition of topical patriotic songs, as sung by the boys in the trenches, together

with his fund of timely stories, evoked encore after encore.

The musical program at the banquet called for the appearance of many popular Columbia artists, whose records have achieved phenomenal success in all parts of the country. Theodore H. Bauer, concert and operatic director of the Columbia Co., was in charge of the musical entertainment, and well deserved the hearty congratulations he received at the close of the banquet.

Prince's Orchestra, which is an exclusive Columbia organization, accompanied the artists, with Chas. A. Prince, director of the orchestra, at the piano. Among the artists who appeared during the course of the evening were the following: George Barrere, Henry Burr, Collins and Harlan, Frank Croxton, Miss Amperita Farrar, Arthur Fields, Chas. Harrison, José Mardones, Theodore Morse, Van and Schenck, Miss Genevieve Zielinska and the Peerless and Stellar Quartets. All of these artists were obliged to render many encores and were the recipients of congratulations from everyone.

Prizes Awarded Dictaphone Men

One of the pleasant events of the evening was the presentation of prizes and medals to the members of the Dictaphone selling organization who had made their quotas in 1917 and in previous years. N. F. Milnor officiated as the donor of these gifts and complimented each member of the organization upon his splendid work in 1917, which had enabled the Dictaphone division to close the biggest year in its history.

E. N. Price, of the Pittsburgh branch of the Dictaphone division, who had won fifteen prizes during the year, on behalf of the Dictaphone Sales Club presented Frank Dorian and Mr. Milnor with diamond studded gold fobs, as a mark of appreciation and personal esteem.

"Columbia Convention Camouflage"

One of the features of the banquet was the appearance of an attractive booklet entitled "Columbia Convention Camouflage." This booklet was also prepared in the shape of a record which was presented to everyone in attendance at the banquet. Arthur Fields sang the record, which was composed by Howard Johnson. This booklet, under the heading, "Columbia Medley," read as follows:

It costs some dough, as we all know, to buy a phonograph.
I tried to buy one just last week, and couldn't help but laugh,

The agony a man goes through selecting a machine;
They try to grab your coin so hard they make the eagle scream.

I looked at different makes till nearly dead:
At last I met a gentleman who said:

The Columbia's a gem when in motion,
Won't you come to our offices and see?
It's famous from ocean to ocean,
Come down and look it over, please, with me.
So I thought it over and said I'll go along,
When we hit the office, I could see I stood in strong.
Everyone I saw there had a smile upon his face,
I was introduced to everyone around the place.

There was Mr. Hopkins, he's the fellow, don't you know,
Put the Pep in Pepsin gum so many years ago.
Try and get away from him, you'll get it in the neck;
He can sell you stuff until your bankroll is a wreck.

CONFERENCE OF COLUMBIA MANAGERS A DECIDED SUCCESS

(Continued from page 114)

Next was Mr. Hanson; he's the factory support;
When I looked him over, I could see he was a sport.
He gets all complaints, and puts them all upon the shelf;
He just says forget it, boys and then forgets himself.

There was Mr. Willson, tho' he's quite severe he's nice,
Tho' they call him the big boss, he's not without a "Vice."
When the day is over, he is never through his toil,
Business is so rushing that he burns the midnight oil.

Next was Mr. Hayden, and I noticed by his hair
That he was a genius who had missed the barber's chair.
In his eyes he had a look as wild as it could be,
Maybe some wild women gave it to him, don't you see.

There was Mr. Tuers, quite the nicest little thing—
These remarks are all in fun, so don't mind what I sing—
When I looked him over, there were two things that I missed:
Flower in his buttonhole and watch upon his wrist.

I saw Mr. Pennington, he's bigger than an ox;
Everybody says that he's as crazy as a fox.
Tho' his hair is redder than the blush of any quince,
All the boys agreed and told me that he was a "prince."

Next was Mr. Heindl, he's a man of many tricks,
Speaks a lot of languages—I think it's thirty-six.
When I talked a bit with him, he took me by the hand,
English was the only thing he didn't understand.

Next was Mr. Benz, the man who's never known to shirk,
When I looked at him I knew he was a bear for work.
All day long he dictates, many letters he will write;
He dictates all day, but still his wife dictates at night.

Next I met a fellow, who is known as Mr. Jell,
If I didn't mention him he'd be as sore as—well
If I had my way I'd like to put him on the pan;
All that I can say is that he's just a married man.

Mr. Knox was on the job, I shook his hand with ease;
Knox was pasted in his hat, and Kno(cks) were on his knees.
As the advertising man friend Knox was introduced,
So you see that goes to prove that ever Kno(ck's) a boost.

There was Mr. Burns, the man who picks the records out,
When it comes to picking he is there beyond a doubt.
If the records turn out good that don't increase his fame;
If they're bad, it's always Mr. Burns who gets the blame.

Next comes Mr. Sause, the man who makes the foreign sales,
When you speak of traveling he'll tell you many tales.
My advice to Mr. Sause is really not the worst:
Speaking of America, why don't he see it first?

Then came Mr. Bauer. Talk of Oscar Hammerstein,
Bauer makes old Oscar look as tho' he were a shine.
What I'm going to tell you now is worse than any crime:
Harris says that Bauer has a temper all the time.

When I mention Harris, then I mean a friend of mine,
Also of each jazz band that you meet along the line.
He played me a record that he values more than pearls—
You all know the one I mean, made by the Watson girls.

Next was Mr. Dorian, who sells the Dictaphone,
Friend of all stenographers who like to work alone.
Wives of all the business men declare that he is great;
Hubby cannot alibi, "I'm at the office late."

I saw Mr. Goodwin; he's an educated chap;
He's a "highbrow"—I could tell by looking at his "map."
I must give him credit in these simple little terms:
He's the guy that puts it over on the other firms.

I saw Mr. Milnor, also of the "Dictaphone."
Milnor is a name that has a meaning all of its own;
He can trim you when you buy, you'll all agree to that,
But he is one (Milliner) who has never trimmed a hat.

Next was Lester Leverich, the marvel of the age,
Faster in the office than the boy they call the "page."
Ninety miles a minute is his record, so they say;
Don't know where he's going, but he knows he's on his way.

Now my little tale's nearly all over, all over,
But there's one man who's a Rover.
We wish the battle was all over, so he'd be here as of yore.
"Big Vision" Whitten, our president, I mean,
He's in the navy, and here he's seldom seen.
So pray for the day when it's all over
He'll come back to us once more.

At the start of the banquet a silent toast was drunk to the memory of Edward D. Easton, former president of the company; F. K. Warburton, former vice-president, and Andrew Devine, former director.

A toast was also given in honor of Lieut. Mortimer D. Easton, a director of the company, who is now serving his country with credit "somewhere in France."

Those Who Were Present

Among the managers who attended the con-

ference were the following: Westervelt Terhune, Atlanta; W. S. Parks, Baltimore; Fred E. Mann, Boston; O. M. Kiess, Buffalo; C. F. Baer, Chicago; A. W. Roos, Cleveland; F. R. Erisman, Dallas; S. E. Lind, Detroit; Ben L. Brown, Indianapolis; E. A. McMurtry, Kansas City; W. F. Stidham, Los Angeles; W. L. Sprague, Minneapolis; H. M. Blakeborough, New Haven; W. F. Standke, New Orleans; Lambert Friedl, New York; A. J. Heath, Philadelphia; K. Mills, Pittsburgh; G. P. Donnelly, Portland, Me.; L. D. Heater, Portland, Ore.; C. V. H. Jones, San Francisco; G. H. Williams, Seattle; I. W. Reid, St. Louis; James P. Bradt, Toronto, Ont., Canada; W. C. Fuhri, F. A. Denison, H. A. Yerkes, R. F. Bolton and S. H. Nichols.

SITUATION IN THE TWIN CITIES

General Shortage of Stock Felt in That Section—Working Hard to Catch Up on Orders—Business Totals for Year Show Big Increase

ST. PAUL and MINNEAPOLIS, MINN., January 7.—The talking machine business in the Twin Cities of St. Paul and Minneapolis is chugging along like an automobile full of gasoline. Before Christmas the dealers, both retail and wholesale, had all they could do to supply the machines, and after the holidays they had all that they could do to supply records. This does not imply that no machines are being sold. On the contrary, the dealers still have considerable difficulty in supplying machines.

W. J. Dyer & Bro., the St. Paul jobbing house, has not yet caught up on orders and despite the best efforts of Mr. Dyer and George Mairs, head of the talking machine department, they are unable to ship certain styles of machines. Beckwith-O'Neill Co., the Victor jobbers in Minneapolis, substantially relate the same story. The situation is somewhat less restrained than it was two months ago, but the house is short of many popular styles. The record demand is something tremendous, and an extra force has been organized to fill the calls from every part of their territory.

Likewise the Edison business was at a feverish pace. President Laurence H. Lucker, of the Minnesota Phonograph Co., the Edison jobber in this territory, reports that the volume of sales for December, 1917, equaled the grand total for

ILSLEY'S GRAPHITE PHONO SPRING LUBRICANT

Ilsley's Lubricant makes the Motor make good
Is prepared in the proper consistency, will not run out, dry up, or become sticky or rancid. Remains in its original form indefinitely.

Write for special proposition to Jobbers.

MANUFACTURED BY
ILSLEY-DOUBLEDAY & CO., 229-231 Front St., New York
Established 1853

the year 1913. Numerous new accounts were opened within the territory and the entire organization is riding at high tide, as there has been but little diminution in sales after the holiday season. There still is a shortage of goods in the more popular styles, but the want is being supplied rapidly and normal conditions soon will prevail.

The Columbia concern has had a remarkable record in this territory. Manager Sprague at present is in New York to reap the rewards of his success, in which are included a silver cup and many high praises. His record includes a 100 per cent. increase in December over the best previous December in this territory, a 100 per cent. increase for the year 1917 over 1916, and the opening of scores of new accounts. In December alone he opened thirty-one new accounts with substantial houses in South Dakota and introduced the Columbia machines in some of the best stores in the Twin Cities. According to all reports, he earned the silver cup and then some.

Minneapolis is making a new talking machine. It is called the Munola and is financed by Minneapolis capital. It was advertised rather extensively during the holiday rush.

F. J. Pellegrini, associated with the Columbia Co. for seven years, leaves the concern this week to enter a new line of business in Chicago.

In general it may be stated that the talking machine trade in the territory tributary to the Twin Cities is in a most satisfying condition. A holiday activity is observable in all the houses, whether wholesale or retail, and there is every indication that everything will be moving in good style for weeks to come.

GEORGE E. BRIGHTSON A GUEST

George E. Brightson, president of the Sonora Phonograph Corp., New York, was a guest last Wednesday evening at the dinner of the first panel of the Sheriff's Jury, held at Delmonico's. This dinner was attended by several hundred of the most prominent members of the industrial, financial and legal circles of New York City.

The Bliss Reproducer

Will Play All Records

A new superior and scientifically constructed sound box—no mica, rubber or cork used.

Beautiful full, rich tone quality, clear articulation. It individualizes each voice and instrument in the record. Greater volume with lighter needles, thus minimizing wear on records.

A demonstration of the Bliss reproducer means a sale—each sale brings another, for every music lover who hears the Bliss reproducer wants one.

Comparative tests solicited. Write today for dealer proposition.

WINNERS OF EDISON PATCHWORK ADVERTISEMENT CONTEST

Thos. A. Edison, Inc., Announce Decision in the Interesting Contest Inaugurated During Edison Week—First Prize of \$1,000 Won by Earle Insley—Interesting Compilation

Owing to the enormous number of entries in the Edison Week Patchwork Advertisement Contest conducted by Thomas A. Edison, Inc., Orange, N. J., from October 20 to 27, 1917, inclusive, the announcement of winners has just been made. The sales and advertising forces at

narrowed the advertisements down to one hundred, which selections were presented for the final consideration of Edison officials. It was from this hundred that the winners were selected after many readings and re-readings by the officials charged with the responsibility of selecting the winners, who emerged in the persons of the following:

Phil. Inquirer Dispatch

N.Y. Evening Mail — The most marvelous machine can never be a person, but Thomas A. Edison, the inventive wizard, has at last mastered (a human voice) reproducing instrument that does not betray itself in the very presence of the artist. *Phil. Inquirer Dispatch*

St. Louis Republic — It is a wonderful thing to see and hear an instrument re-creating a human voice that is right there beside it. *St. Louis Republic*

St. Francisco Examiner — the singer thrilled by the consciousness of a second personality. *St. Louis Republic*

St. Louis Dispatch — The problem "to hear ourselves as others hear us" has been solved by the Edison Diamond Disc Phonograph. *Phil. Inquirer*

The Boston Herald — Miss Christine Miller, the noted concert contralto, demonstrated in a recital at Symphony Hall, Boston, how thoroughly Edison has made it possible to reproduce all shades of tone and sweetness of the human voice. *Waco Times Herald*

Cleveland Press — standing beside one of the Phonographs, sang in unison with her self, it being impossible to distinguish between the singer's living voice and its Re-Creation. *The Boston Herald*

The Boston Herald — She sang a few bars and the instrument blended perfectly with her voice. *St. Louis Globe Democrat*

Waco Times Herald — She ceased and the instrument continued the air with the same beautiful tonal quality. Had Miss Miller attempted such a concert in Salem, in the early days of this country, she would have been hanged for a witch. *St. Louis Globe Democrat*

St. Louis Globe Democrat — The large audience of music-lovers sat enthralled under the spell of the wizardry which reproduced a human voice, the most delicate violin tones and the blare of a brass band with such fidelity that no one hearing also the same music at first hand, could tell which was the real. *Brooklyn Daily Eagle*

St. Louis Globe Democrat — The instrument was a stock phonograph intended solely for the home. *Germania Herald*

Phil. Inquirer — Perhaps the artistic merit of Mr. Edison's invention can in no way so well be attested as by the fact that 600 members of the Handel and Haydn Society of Boston were present. *The Boston Herald*

The Winning Edison Advertisement Prepared by Earle Insley

Orange had expected to make all readings of the advertisements from the preliminary to the final reading, but the quantity of advertisements was so far in excess of what had been expected that the task was beyond the capacity of even the extensive organization at the Edison laboratories. When it was realized that the force at Orange could not cope with the situation alone, it was decided to turn over to the senior class of the School of Journalism at Columbia University the preliminary readings. These readings

Fifth prize, \$50—Won by Gordon Roper Diver, 88a Girouard avenue, N. D. G., Montreal, Canada.

Ten prizes, each \$10—Won by Mrs. Florence Bassett, 430 N. Beaudry avenue, Los Angeles, Cal.; J. G. Bourns, 513 Washington street, Olympia, Wash.; Miss Katherine Gest, 1203 Second avenue, Rock Island, Ill.; Harold H. Hertel, 56 Loomis street, Naperville, Ill.; Mrs. Ray Keegan, 407 Gore boulevard, Lawton, Okla.; Alphonse Kirschner, 234 East Third street, Brooklyn, N. Y.; Miss Vida Laughrey, 44 North Mar-

ket street, Oskaloosa, Ia.; Mrs. A. E. Peterman, Theodore, Ala.; Miss Katharine Sartelle, 419 Sterling place, Madison, Wis.; Josephine A. Sheehan, 33 Gage street, Fitchburg, Mass.

The details of the Edison Week Patchwork Advertisement Contest were announced in full-page advertisements in a list of national publications appearing in September. The principal requirement of the contest was that advertisements submitted must be made up in their entirety of excerpts taken from the booklet, "What the Critics Say," a compendium of the criticisms of the famous Edison Tone Tests taken from approximately 1,500 newspapers throughout the country.

Prospective entrants were furnished an entry blank, together with a specimen patchwork advertisement, either by the local Edison dealer or direct from the company at Orange.

The final decisions in the contest were made the week preceding the Christmas week. Telegrams were sent to the winners, advising them of the fact, so as to reach them Christmas morning.

Professional advertisement writers and all employees of the Edison Co. or connected with the organization in any way, or members of their families or households, were barred from the contest, in order to put the contest on as fair a basis as possible.

The advertisement that won the first prize will be reproduced in a forthcoming advertisement of the Edison Co., which will appear in a list of weeklies and monthlies of national circulation.

First prize, \$1,000—Won by Earle Insley, Nanuet, N. Y. This prize-winning advertisement was made up of words, phrases and sentences clipped from tone test notices appearing in twenty-eight of the leading papers of the country, and was arranged in the most effective manner to so join the different sections as to make the strongest kind of endorsement of the Edison product and its reproductive qualities and of the performance of the Edison artists.

Second prize, \$500—Won by Edward Crede, 337 Fourth avenue, Pittsburgh, Pa.

Third prize, \$250—Won by Miss Jane P. Kelly, 318 South Water street, Crawfordsville, Ind.

Fourth prize, \$100—Won by Miss Leta Worrall, 1034 West Seventeenth street, Des Moines, Ia.

SAYS COLLECTIONS ARE REMARKABLE

The credit manager for one of the largest wholesale houses of its kind in the country is authority for the statement that there is nothing in the present condition of collections that could be taken to confirm reports heard in various quarters of poor business on the part of the retail trade. "Taken as a whole," he said to the New York Times, "collections were never better in the history of this house. The way the Southern trade is paying up is really remarkable, and high-priced cotton is the answer. While other sections of the country can hardly be said to be settling up as rapidly as the South, there is absolutely no fault to find with the way remittances are coming in generally. December, as a rule, is not a big month for collections, and yet we can already see evidences that the money which will come in this month will not be a great deal less than the amount received during November."

Most people don't turn over a new leaf until the old one is full.

"STERLING" Tone Quality

Style 501

Style 900

STERLING phonographs have been specially designed throughout for the true reproduction of the original music.

Let us show you why the **STERLING** has "made good".

Every **STERLING** phonograph is equipped with our specially designed durable spring worm gear motor, playing *five ten-inch records* with one winding, a motor that is used regularly in machines retailing at \$100. All models are equipped with our Universal Tone-Arm.

Your request for samples will have immediate attention. Write Today,

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

LONDON, ENGLAND, E. C., January 3.—At this period with this harrowing war still proceeding, and the prospects of its end seemingly as remote as ever, it is not so easy to offer the usual New Year's greetings, or indulge in prognostications regarding business for the New Year. It goes without saying that manufacturers, factors and dealers are determined to make the gramophone business as live an issue during 1918 as it is possible with conditions as they are to-day. We enter the New Year with the peoples of the world at death's grip—battling to-day as never before in living history, to achieve a permanent peace, for enemy people as much as for the people of the allies. To that sentiment—to its early achievement—must we dedicate our thoughts and wishes on this, the opening of the New Year. Our New Year's wishes must be for an early triumph over the common enemy of mankind, at the same time registering a silent vow to act his or her best in a spirit of determination to "carry on" until to all men are secured those inalienable rights that are essential to civilization and to the world's progress.

To Soothe the Savage Breast

One is somehow reminded that music hath charms to soothe the savage breast, and though perhaps the connection is not too close, it is a relief to switch over one's mind from the all-absorbing horror of war to the charm and consolation of good music. Its dissemination by means of gramophone records has brought untold comfort to thousands of sorely stricken and nerve-wrecked people, and it is not too much to say that this concentrated value of music is recognized, even officially, as a national tonic of incalculable worth. The gramophone trade can therefore justly regard its existence

with a certain amount of pride, and "carry on" in the knowledge that as an industry it is in reality less a luxury than a national necessity, for by no other means is music so widely and usefully distributed. As the music channel of the masses, our trade is more justified in its existence than is the pianoforte, organ, sheet music, or other section. To my mind, it is too obvious for argument, and I have the satisfaction of knowing that in the circumstances of this painful war, not alone at home, but in the trenches, the first thing the soldier, sailor, or munition worker turns to for relief and nerve-soothing effect, is the glorious, the invincible, gramophone! It is a logical sequence, then, to find that the demand for machines and records is more insistent than ever. The instruments have to be rationed when possible, so as to secure as wide a distribution among dealers everywhere as is compatible with output. But when it comes to records—well, output is nothing short of gigantic. Manufacturers are working at high pressure all day, and night where labor is available. In like measure is the situation from the retail viewpoint, and altogether this season bids fair to create a wartime sales record!

Price of Needles Up—Reuse of Old Needles

The correspondence published in these columns the last few issues anent the subject of utilizing waste steel needles by the simple method of re-pointing them, continues to meet with the support of the trade, and certainly has aroused a degree of interest generally, all of which is most encouraging. From recent inquiries and reports I am more than ever convinced that the scheme is a practical one. More important still, and this is becoming widely rec-

ognized, is the absolute necessity for immediate experiments along the lines suggested, in view of the war demands for all available supplies of high-grade steel.

This fact brings to mind that the price of new needles is steadily on the increase. From time to time announcements are made by this or that firm to this effect, the most recent being an intimation from "His Master's Voice" Co. increasing the retail price of their needles to eighteenpence per box of 200, 7/6 per thousand, subject to the usual trade discount. This in itself indicates, and indeed confirms more than anything else, the need for steel economy. Let us not try to balk this solid fact; it has to be faced, and the sooner the better. Individually, a few members of the trade have shown sufficient foresight to plan ahead. They are making experiments with a view to discovering the best possible method for re-pointing old needles, and in one case at least resharpened needles are actually on sale. I am not going to say that they are, ipso facto, as good as new, being slightly more scratchy, but I assert, after experiment, that these needles offer good results, and excellent prospects of complete success.

To my mind, it is a sufficiently important matter for an official trade investigation. I am not satisfied to leave the matter to individual effort; I want to see action taken by a committee expressly convened by the whole trade for that purpose. The faults of one experiment might easily be remedied by another, and this is considerably less difficult to achieve by co-ordinated effort than it is by uncontrolled individual attempts to solve the problem.

The secretary of the British music trade de-

fense committee has again been approached with a view to securing his co-operation and advice. By our next issue I shall hope to be in a position to report progress in this direction, as obviously the music trade committee is in the best possible position to raise discussion on the subject among its members with a view to arranging the terms of reference upon which to commence official investigation.

The First Resharpening of Used Needles

Meanwhile, of especial interest is the sub-joined letter from L. H. Mealey, of Seacombe, who may justly pride himself upon being the first to take up in a practical way the question of resharpening used needles:

"DEAR SIR—I hope you will give me an opportunity of explaining my process of sharpening gramophone needles. During the summer months finding that it was almost impossible to obtain needles from factors, I decided to try and sharpen used needles. My first attempt was with foot power, and later I had a small electric motor installed. I obtained the correct grade of wheel for sharpening and had an automatic machine made by which it was possible to repoint many thousand needles per hour. All went well until I received my first order to sharpen 5,000. Amongst these were about twenty different sizes and shapes of needles, and I found that the automatic arrangement would take one size of needle all right, but would not take various sizes and shapes. I then had to resort to hand tools, and although this process was slow at first, I found that a little practice was all to the good. I am now able to turn out a very good number of needles per hour. I had window hills printed, and also packets for packing needles. One window hill which I exhibited brought in 100 needles in the first fortnight, but we are collecting now from shop customers alone on an average 8,000 needles a week. On July 29 I wrote to Johnson Talking Machine Co., Ltd., Liverpool. They were delighted with the idea of resharpening needles, and I have sharpened several thousands for them since. I supplied posters to two other Liverpool factors and several dealers who made good use of them, and I also wrote to J. E. Hough, Ltd., as well as to the Columbia Graphophone Co., Ltd.

"I find there is no difficulty in collecting needles and none in sharpening, and I think if factors and dealers will only wake up to the fact that there is almost a famine in needles, and start collecting used needles, they will find that the present shortage can be got over.

"Personally I have not bought any new needles for three months, and I have sold quite a few thousand to factors and dealers. Yours faithfully L. H. MEALEY."

A Home Needle Repointing Apparatus

I am now able to offer an illustration of the extremely clever device for resharpening used needles, about to be marketed by the Johnson Talking Machine Co. This attachment is easily fitted to any make of gramophone, and is described as follows:

A.—Wheel composed of carborundum and polished material, is fitted on the outside with a band. This wheel revolves when put in action against the turntable.

B.—Base which holds lever D. Under this base is fitted a spring to cause pressure on the turntable of the wheel.

C.—Standard to hold needle clip, fitted with swivel at top to allow tube which holds needle clip to move up and down.

D.—Lever which allows wheel to engage or disengage on the turntable.

E.—Tube fitted with standard C, through which needle holder fits.

F.—Needle holder, which pushes through tube E. This holder clips needle and is held in position in tube E by rings 1—1. The needle holder can be made for various ways of holding needle.

G.—Tension spring. This can be made to fit any position, so that it will cause the needle to bear with pressure on the sharpening wheel.

H.—Screw which holds wheel on to rod D. 1—1. Rings which are fixed to keep needle holder in position.

"Everybody who has seen this device," writes Mr. Johnson, "prophesies a big sale for it, but unfortunately it is almost as difficult to get labor and material to make the apparatus as it is for us to buy needles. But I hope, if I have any luck, within the next month to have some of them ready for the market."

The Hertford Record Co. Makes Its Debut

Though within the knowledge of, so to say, the inner circle of the trade for the last few months, it will be news to many that the London and Hertford businesses of the Carl Lindstrom and Fonotipia Cos. have been bought out

by a new concern styling itself the Hertford Record Co., Ltd., of which Sir George Croydon Marks, M.P., is chairman, and H. M. Lemoine, one of the first directors.

This sale at last finally disposes of the sole remaining enemy tainted concern, though in saying this we take the opportunity of recognizing the proper conduct consistently displayed throughout a trying period by its then British directors.

The new company is thoroughly all British throughout its personnel and capital. The sub-joined letter issued to the trade this month is in itself sufficiently explanatory, and we cannot do better than quote it at length. It is issued by the Hertford Record Co., Ltd., from their London office, 62 Oxford street, West 1, and reads as follows: "We beg to inform you that we have now completed the purchase from the controller appointed by the Board of Trade under the Trading With the Enemy Amendment Act, 1916, of the business heretofore carried on under the names of Carl Lindstrom (London), Ltd., Fonotipia, Ltd., and others, and that this company is now in possession of the works, premises and stock alike at Hertford and at City road, E. C. We shall continue the chief business of manufacturing records as heretofore, but everything will be under the sole and direct personal control of the directors of this newly-formed British company, which has been registered with the express sanction of the Board of Trade and His Majesty's Treasury. We hereby give you notice that all prices and conditions of sale relating to the orders that are in hand at the works will be withdrawn as and from Monday, November 19, and that all orders executed as and from that date will be the subject of an increased price concerning which we will write you early next week, giving you the new prices and the new conditions of sale.

"While we have had the responsibility in connection with these works so far as the purchase is concerned as and from the day the deposit was paid on May 12 last, we have not been able

FROM OUR LONDON HEADQUARTERS—(Continued from page 118)

to take over the control until now. We, therefore, take this opportunity of thanking you for the consideration that you have given to the controller, the staff, and all those concerned with the manufacture and supply of the goods in connection with the orders that you have favored the controller with during the extremely difficult period that is now closing, and we look forward to the continuance of the friendly relations with perhaps a closer connection than has heretofore been possible, as we are desirous of serving you in the future to the fullest extent in our power. The chairman of this company is Sir George Croydon Marks, M.P., well known for many years as chairman of the National Phonograph Co., Ltd., and of other companies in which T. A. Edison was interested, while H. M. Lemoine, formerly assistant manager of the National Phonograph Co., Ltd., and latterly manager of Associated Copyrights, Ltd., will be actively and personally concerned as a director of the company. The whole of the existing members of the staff and others engaged at the Hertford Works, also the recording experts, are being retained by this company. Yours faithfully, Geo. Croydon Marks, chairman."

It only remains to record our welcome to the new company, and this we do right heartily, feeling assured that with such men at the helm as Sir Geo. Croydon Marks and H. M. Lemoine, its future commercial progress will be crowned with complete success. Apart from its experienced personnel, the company possesses a very fine up-to-date factory at Hertford, admirably planned and equipped for handling a large output of quality records expeditiously. It will be interesting to know under what name the records will be christened, as presumably new names will be adopted, and, as stated in the company's letter to the trade, whether or not the price increase foreshadowed will be in conformity with the alterations recently made by the leading record manufacturers, i. e., from 1/6 to 2/—.

Opening of Pathé Frères' English Factory

As announced in these columns several months back, the great French house of Pathé had planned to open up on British soil a suitable record and machine factory for the purpose of insuring complete and prompt deliveries of their goods to the British trade. In pre-war days most of the Pathé goods were made in the great Paris factory. Difficulties of manufacture and transport were then unknown, but since the outbreak of war great and increasing trouble in this respect has been experienced. I need not elaborate the reasons; they are all too obvious. It is sufficient to say that matters had reached such a pass during the last few months as to render the establishment of an output independent of Paris vitally necessary. Hence, with characteristic common sense, plans were prepared to the desired end. This in itself was a task of no mean magnitude, bearing in mind the official mobilization of industries, labor, idle factories,

machinery, etc., all over the country. Nothing daunted, the company's British manager, A. E. Beckett, set about his task. District after district was scoured, most to no purpose from the results viewpoint, until at last his persistence and energy were rewarded by the discovery of a likely place at West Drayton, Middlesex, a few miles from the great "His Master's Voice" factories. Having come to terms with the powers that be, Mr. Beckett was next met with the difficulty of putting into effect the necessary alterations and improvements to the existing buildings. Resources were none too easily available for the purpose; labor and material were scarce; time was pressing. All things came to "them as wait," and it may be added, to "them as are determined." And so, in due time the factory was ready for its new occupants.

Here then, at West Drayton, is established for the first time in the history of our trade, the foundation of a large and progressive French enterprise, which, it may be confidently predicted, is but the forerunner of a great expansion, to take effect as and when circumstances permit.

With these new facilities of quick output at their disposal Pathé are on the high road to remove the handicap under which they operated commercially in the past, in relation to the prompt marketing of current music.

The situation of the factory for water power, rail and road transport, could not be better, as every such facility exists in close proximity thereto. An up-to-date record-pressing plant has been installed, and suitable arrangements made for machine, sound box and other assembling shops. The present buildings occupy but a portion of the land available for new shops. This land will eventually be covered, as circumstances not unconnected with wartime exigencies permit, with new buildings, record and cabinet plant, etc. It only remains to heartily congratulate the Pathé people upon their excellent start this side of the channel.

First Records by Granados, the "Sussex" Victim

Invested with a special interest, therefore, are the records of Granados' Spanish dances, which have been recorded specially by Sir Henry J. Wood and his orchestra for Columbia, the first two of which are announced this month. These are the "Villanesca" (or Rustic Dance) and the "Andantino quasi Allegretto." It was on his return voyage from New York, in 1916, where he had scored a huge success with these dances, that the gifted composer fell a victim to German "Kultur" in the ill-fated "Sussex."

The Gramophone Trade Roll of Honor

Apropos the suggestion made in our last issue anent the above I have received from the Columbia Graphophone Co. the following list of gallant gentlemen, formerly members of the Columbia Wandsworth factory staff, who have given their lives in the service of their king and country: Tom Woods, Sixteenth Middlesex; R. Nye, London Rifle Brigade; B. Robertson, W.

Soundboxes

IF you are after a genuine offer of soundboxes, you'll do well to communicate with us immediately. We have tens of thousands of perfect soundboxes, fitted with the best quality mica. Confidently recommended for cheaper machines, absolutely reliable and give excellent reproduction. Price to clear \$50 per gross, F. O. B. London.

Popularity of "Guardsman" Records

The Invicta Record Co. has just issued a most attractive supplement; it is full of good things, so good that it seems invidious to make a selection.

I was not surprised to hear that, despite almost overwhelming difficulties incidental to the critical time in which we now live and that business men have to face in every direction, the export trade of this enterprising company steadily increases. The extraordinary foresight with which they appear to be gifted enables them to anticipate the popular demand in a way that can only be described as telepathic. We strongly advise our readers to get into touch with the Invicta Record Co., Ltd., by sending immediately a request for their complete catalogue and latest supplements.

The Man of Many Parts

Such is the slogan adopted by W. H. Reynolds, Ltd., of City road, London. Its immediate success has inspired competitors to imitation, the best possible compliment. What it means is that Reynolds' stock of machine parts and accessories, if not as multifarious as in pre-war days, is nevertheless still amazingly big, circumstances considered. Practically every line is cataloged, and a copy of this diverse and useful price-list may be obtained by any bona fide trades upon written application to the firm.

Cables: Duarrab, London

1 New Inn Yard, London, E. C., England

FROM OUR LONDON HEADQUARTERS—(Continued from page 119)

In addition to this side of the business, Messrs. Reynolds factor high-class disc records, and carry their own lines of machines, of which their specialty at the moment is the "Bijouphone," a compact portable model which wants a lot of beating. It is of remarkably sweet tone quality, is equipped with reliable motor and fittings, and has compartment room for about twelve records. A really wonderful instrument, is the general verdict!

Unmusical Warfare

Apropos the occasional complaints ventilated in the press by suburban sufferers anent the abuse of gramophone playing, usually by a near neighbor, a highly amusing article recently appeared in the London Star newspaper, as a comment upon an advertisement in the Times. The article in question bears the startling caption: "Advertiser who is arming for record reprisals," and proceeds: "If you have one of those great three horse-power gramophones that your neighbors are tired of, here is a chance to dispose of it. An anguished advertiser in the Times is looking for a loud (second-hand) gramophone wanted for reprisals. No delicatoned drawing-room instruments need apply. What the advertiser wants is a brazen-lunged, bellowing contraption, a six-cylinder machine with a funnel like a tunnel, and an effective range of about two miles. The sort of thing that Hammersmith people buy to amuse the folk of Kew. There ought to be brave doings when that gramophone comes home. Shortly after dawn this morning the enemy opened fire with their ten-inch records, 'Ipecacuanha,' 'They're Wearing Them Higher in Hawaii,' and 'Hicky-Wicky-Yaka-Hoola.' Our twelve-inch batteries replied, and put in some effective fortissimo work with 'The Cellar Door by Moonlight,' 'Drinking,' and the 'Soldiers' Chorus.' Reinforcements in the shape of a dust-bin lid obligato were brought into action, and by breakfast time the enemy batteries were silenced, and the man next door was heard to go out for more oil and records. Except for a few bricks and a summons the rest of the neighborhood has so far preserved its neutrality.

"It would be interesting to know in what suburb this harmonious warfare is being waged. House property ought to be cheap there in a day or two."

Thos. Edens Osborne Keeps It Up!

War or no war, the value of advertising does not diminish. Politically, there are many adverse elements to good business existent in Ireland to-day, but the natives, whatever their political outlook may be, never fail of their homage to good music. Hence, our Belfast friend, Mr. Osborne, keeps up his interesting editorial advertisements in the local press to good advantage. Business, I learn, is excellent, the demand being almost beyond the limits of supply. This is as it should be. Nevertheless, a meed of praise is due to Mr. Osborne for his consistent methods in the face of not altogether favorable conditions.

Grand Opera in English

A new artistic and sales field of endeavor has been opened up by the enterprise of His Master's Voice Co. During the last few years grand opera in English has become increasingly popular, and will be all the more appreciated by the music-loving public now that this company has embarked upon the issue of a large number of records carrying the best songs from most of the popular operas sung in English by the leading British operatic artists. The first list was issued in August, with additions during the succeeding months. The result from a sales point of view is eminently satisfactory, for, with succeeding monthly issues, the November returns have shown a sales advance of well over 1,000 per cent, compared to the August figures. Of course, the Gramophone Co. know how to do things in the way of smart advertising, but without depreciation of this expenditure, the enormous sales advance indicates of itself that there exists a rich and wide field for commercial cultivation. Dealers have been quick to recognize this by stocking up on these records to the fullest possible extent.

More Records Increased in Price

As foreshadowed in this department, other record manufacturers have followed the price-increase example set by the leading companies. The further price changes in question apply to "The Popular" series of records, which are now up to 1/8, the "Clarion" disc, now 2/—, the "Clarion" cylinder record—to 1/4, the "Cameo" record—to 1/3, and the "Bull-dog" record to 1/8. With the exception of the "Clarion" ten-inch double disc, the price increases are very small, but it is sufficient to confirm that which I have all along maintained—the absolute necessity for higher charges in view of the rapid advance of all manufacturing, carriage, labor and other costs.

Some H. M. V. Statistics

The latest issue of "The Voice" to hand contains many interesting tips, of value to all dealers, apart from other pithy items pertinent to "His Master's Voice" service. Of the latter, subjoined are a few instances. A little lubricating oil goes a long way, and yet the company use in their factory no less than twelve thousand gallons per year, in addition to two hundred thousand gallons of cutting and cooling solution for automatic machines!

To give some idea of the extent of the H. M. V. works it may be mentioned that the length of leather belting used to drive the machinery—if put end to end, would measure close upon fifteen miles.

The machine factory is a building of six floors, having a total floor area of 140,000 square feet. This is stated to be only about one-quarter of the ultimate buildings it is expected will be erected at some future date. The window area of this building is as much as 42,000 square feet, so that it is obvious the maximum of natural light is secured.

Another little item tells us of the great in-

terest the war staff takes in doing its little bit towards the provision of solace for the troops. The collection box is sent round weekly, and so well is it supported that since June, 1915, a grand total of 750,000 cigarettes and 360 pounds of tobacco has been sent to men on active service.

Lauder's £1,000,000 Scheme for Disabled Soldiers

"If it comes to pass that after the war disabled soldiers are found selling matches or bootlaces at street corners, then I wish to God that my son had not laid down his life for his country." Such were the moving words addressed by Harry Lauder to a great audience at the St. Andrew's Hall, Glasgow, in his appeal for £1,000,000 to be devoted to keeping in comfort disabled Scottish soldiers and sailors. To aid this scheme the Gramophone Co. have published a record by Mr. Lauder, one side of which carries his appeal for help, and the other his famous song, "Shoulder to Shoulder." A proportion of the profits from the sale of this record will benefit the fund, and this generous action on the part of the company will doubtless infuse all dealers with the desire to support the fund by putting forward their best efforts in the sale of the record. In addition to this dealers might well co-operate in assisting Harry Lauder to collect as large a sum as possible, not only to swell the gramophone trade contribution, but to secure the required total as speedily as possible. We have no doubt that the Gramophone Co., Ltd., Hayes, Middlesex, would willingly acknowledge on behalf of the organizer any contributions their dealers and other members of the trade might feel disposed to make.

New Record Issues of the Winner Co.

A champion list of records is that issued recently by the Winner Co. The titles itemized make a wide appeal by reason of their diversity. They are entirely in keeping with the high character of the previous list which includes records of Captain Bruce Bainsfather's successful musical production, "The Better 'Ole," of which are recorded Selections I and II, introducing most of the local hits of the piece. It is a record of "some" merit, the recording and rendition thereof by the Royal Court Orchestra being of extreme quality. This same orchestra is also responsible for some diverting selections from the two popular revues.

The handsome fifty-page catalog, No. 91, introduced by the company last month includes all records issued up to and including last October, and should be in the hands of every member of the trade.

WORLD'S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "Situation" advertisement intended for this Department to occupy a space of four lines, agate measure, and it will be inserted free. Replies will also be forwarded without cost. Additional space will be at the rate of 25c. per line. If bold faced type is desired the cost of same will be 25c. per line.

WOULD you pay not less than \$7,000 yearly? I am a sales creator! Do you want a high-class sales manager as well as a thorough advertising manager? Do you want a man who will increase your business; who will create a large number of new customers—and originate selling ideas—and keep those customers everlastingly plugging for your product? In other words, are you willing to pay not less than \$7,000 yearly (or \$5,000 yearly and interest in business) at the start to the man who will walk into your office, sit down at his desk, and do business "right off the reel?" Will you pay for brains, ability and experience? But last and best of all, do you want a man who will bring the business to your office with letters, reading like this: "Gentlemen: find enclosed, check and order, etc., etc." Cash with order business direct from dealers? I am the man who can put this over, provided you have honest goods, goods that will stand up to every honest statement I make in my correspondence. You must have a high-class product, I don't care whether it be phonographs (or other line of merchandise), I will make good. Twenty-seven years of successful salesmanship through the mails, advertising and with a sales force is worth to any high-grade concern not less than \$7,000 yearly. If my "ad" interests you let's get acquainted. Address me "Box 484," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—A thorough experienced Edison jobbers' traveler and also manager with all the constructive dynamic attributes of character, a live wire and hustler. Can hold and build up trade, enthusiastic and convincing. Highest references from headquarters. Address "Box 485," care The Talking Machine World, 373 Fourth Ave., New York.

RECORD EXPERT with fifteen years' experience wants position as **RECORDING—LABORATORY**—or **MANUFACTURING** man. References. Please write "O. H. W. 15," care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—Middle-aged man with fifteen years' experience in phonograph construction, would like to become associated with honorable concern desiring to build or building talking machines. I have several valuable inventions to offer along with my knowledge of the art for the right concern. Address "Box 486," care The Talking Machine World, 373 Fourth Ave., New York.

MANAGER OF VICTROLA DEPARTMENT—Doing one hundred thousand dollars, desires a change January 1 or thereabouts. The vicinity of New York City preferred. Age 27, salary \$3,000. Further particulars by letter. Address "Box 479," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—A small outfit for recording lateral ten-inch records with a complete outfit for manufacturing records. Address, with full details, "Box R. M.," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED by expert mechanic with thorough knowledge of motors, assembling, cabinets and inspection of finished production. Competent to take full charge. Address "Box 487," care The Talking Machine World, 373 Fourth Ave., New York.

SALESMAN—Calling on talking machine and piano dealers, to handle a profitable side-line that may be developed. Territory open. Proposition one that most dealers will not refuse. Steady return on repeat business. Address "Box 488," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Experienced salesmen in the talking machine and piano trade (having a slight knowledge of wood finishing will be an asset), to sell a meritorious article as a side line. Write for particulars at once, as territory is going rapidly. Our offer to the trade gets the business for the salesman. Address Master Mfg. Co., Box 96, Camden, N. J.

FOR SALE
A talking machine business in a city of over 300,000, established over ten years, doing over \$50,000 per year, will sell stock, fixtures, lease and Victrola contract. Will take from \$15,000 to \$20,000 to swing. A golden opportunity. Reason for selling, owner has made enough to retire. Address Golden Opportunity, care The Talking Machine World, 373 Fourth Ave., New York.

FOR SALE
Long established furniture factory, well and favorably known and successful—factory well equipped—150,000 square feet floor space—has had considerable experience in making high grade cabinets—labor conditions good, no unions or labor troubles—cheap labor—good reasons for selling. There is an excellent opportunity for the right men, with unlimited earning possibilities. Give full particulars in first letter. This is a proposition that will place the right men with one of the best equipped manufacturers in the trade. Address "Box 477," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—By a New York distributor an assistant repair man. Salary to start \$14. Address "Repairs," Box 478, care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—Experienced Edison manager and salesman open to offer January 10. Hold similar position now. Broader field wanted. Address "Box 482," care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—After first of year by experienced Grafonola salesman. Texas or California territory. Warrant department will positively get results. Address H. Burdge, 4207 Oak, Kansas City, Mo.

POSITION WANTED—By two experts in manufacture of disc records. Thoroughly familiar with latest and best method of recording, electrotyping, pressing and equipments. Address "Box 378," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—First-class finishing-room foreman for high-grade cabinet work; also several cabinetmakers. Address "Cabinetmaker," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Experienced talking machine repair man desires position. Chicago preferred. Address "N. O. 2," care The Talking Machine World, 209 South State St., Chicago, Ill.

WANTED—By an established New York manufacturer, an experienced salesman to visit the dealers. Excellent proposition for the right man and a side-line arrangement will also be considered. Address "Opportunity," care The Talking Machine World, 373 Fourth Ave., New York.

INSTALL COLUMBIA DISPLAY IN LOBBY OF HAVANA THEATRE

The Frank G. Robins Co., Columbia Representatives in Havana, Cuba, Now Carrying Complete Line of Grafonolas on Display in the Lobby of the National Theatre of Cuba

The Columbia Graphophone Co., New York, was recently advised by its representatives in Havana, Cuba, the Frank G. Robins Co., that they had leased the lobby of the National Theatre of Cuba, and in that famous and magnificent opera house would carry a complete line of

ments to be found in any part of the world.

For a number of years past the Frank G. Robins Co. has handled the products of the Columbia Co. as exclusive representatives in that country, and it has built up a business which has reached phenomenal sales totals. The line

ilege to occupy this valuable space was keenly contested for by the leading merchandising houses in Havana, the Frank G. Robins Co. emerged successful, and now occupies the entire lobby with its Grafonola display.

In addition to this artistic display the Columbia line will also be shown in Havana in the new ten-story building now being erected by the Frank G. Robins Co. for their exclusive use on Obispo and Havana streets. This building, with the exception of the edifice occupied by the National Bank of Cuba, will be the finest commercial building in Havana.

The illustrations of the Columbia display pre-

Views of the Columbia Grafonola Display in the Lobby of the National Theatre of Cuba, in Havana

Columbia product. The significance of this location may be gleaned from the illustrations herewith, for the space occupied by the Frank G. Robins Co. in the lobby of the National Theatre of Cuba constitutes one of the finest and most artistic talking machine establish-

has been displayed at retail in a store on San Rafael street, the principal business street in Havana, but the sales of Columbia product grew so rapidly that the company was obliged to look for new quarters. It finally secured them in the National Theatre's lobby, and although the priv-

sented by the Frank G. Robins Co. as shown herewith, following closely on the recent opening of the magnificent Columbia Shop in New York, indicate that the artistic possibilities of the Columbia line are now being recognized the world over.

AMERICAN GRAPHOPHONE CO. PLANS

Reorganization of Concern Under Way—New Title to Be Columbia Graphophone Mfg. Co.—Exchange of Stock to Be Made

Arrangements have been made by the American Graphophone Co. for a plan of reorganization and exchange of stock, and a circular signed by President Francis H. Whitten, outlining the details of the plan, has just been mailed to the stockholders. It involves the incorporation of a new company, the Columbia Graphophone Manufacturing Co. of Delaware, to succeed the present American Graphophone Co. of West Virginia, and stockholders are asked to exchange their present holdings for shares in the new company. The present company has outstanding \$2,500,000 non-cumulative preferred and \$7,500,000 common stock, both of \$100 par value. The new company is to have \$15,000,000 7 per cent. cumulative preferred, of \$100 par, and 150,000 shares of common stock without par value. This capitalization is considered sufficient to meet the financial needs of the business for some years.

Stockholders are offered four options under which they may exchange their holdings, the options expiring on May 1 next, with the provision that President Francis S. Whitten may terminate it any time between February 1 and May 1, 1918.

The holder of 100 shares of preferred can exchange his stock for 100 shares of preferred and 25 shares of common of the new company; or he can exchange it for 110 shares of new common. If the holder wishes to divide his option he can get 50 shares of new preferred for 50 old preferred and 67½ shares of new common for the other 50 shares of preferred.

The holder of 100 shares of common stock can take 100 shares of new preferred and 20 shares of new common, or he can take 105 shares of new common in exchange. If he desires to divide his option he can use 50 shares for a like amount of new preferred and the other 50 shares can be exchanged for 62½ shares of new common.

There will be considerable of the capitalization of the new company remaining after the exchange is completed and this stock will be kept for future needs. The change of the name from the American Graphophone Co. to the Columbia Graphophone Manufacturing Co. is for the purpose of associating the name of the company with the name of its product—the Columbia Graphophone.

It is asserted that the business increased considerably this year and sales for the eleven months, both in America and Europe, were between 25 and 30 per cent. ahead of the same period of 1916. Each month's sales last year showed an appreciable increase over the same month of 1916.

NEW HOFFAY CATALOG ISSUED

Volume Intended, Primarily, to Prove Source of Information for Dealers and Salesmen—Features of Hoffay Instruments Described

The Hoffay Talking Machine Co., Inc., recently issued a new catalog which is intended, among other things, to be a source of information to the dealers and salesmen of Hoffay instruments. All the patented features of the Hoffay talking machine are described minutely and are accompanied by illustrations showing the parts from several angles. The Hoffay "Airtight" sound box and the "Resurrectone" diaphragm are shown to particularly good advantage, and the qualities of these parts are minutely described. The several models of the Hoffay machines are shown and the new retail prices accompany the illustrations. The book is artistic from every standpoint.

CHANGE NAME OF BRANCH

The Columbia Graphophone Co., New York, announced recently that the name of its Philadelphia branch had been changed from the Pennsylvania Talking Machine Co. to the Columbia Graphophone Co. This branch, which handles the Columbia products exclusively at wholesale, is under the management of A. J. Heath, and is one of the branches in the territory of W. C. Fuhri, district manager.

Do You Collect Your Accounts?

FOR some time past we have been using a follow up system of collecting both our installment and open accounts that has brought us wonderful results. 90% of the work done right in your office. Saves attorneys' fees and keeps the good will and patronage of your customer.

The complete layout, simply explained, sent for \$5.00. Cash with order. We refer you to any Victor, Edison or Columbia Jobber in our section as to our reliability.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., January 8.—PHONOGRAPH.—Edward Rogers, Rosedale, N. Y., assignor of one-half to William A. Courtland, Brooklyn, N. Y. Patent No. 1,243,980.

This invention relates to phonographs and has for its primary object to provide an improved construction, combination and arrangement of parts in an instrument of this character whereby a plurality of disc records can be played thereon in succession without the intervention of an operator. One of the objects of the present invention is to provide improved means which will automatically remove a record from the turntable of the phonograph as soon as such record has been completed and replace it with the next record in order. A subsidiary object of the invention is to provide record holders of improved construction which are adapted to automatically start the reproducing needle at the beginning of the records and control the removal of said records from the turntable.

Figure 1 is a plan view of a phonograph constructed in accordance with the principles of the invention; Fig. 2 is a side elevation of the same; Fig. 3 is a side elevation at right angles to Fig. 2, parts being removed and parts shown in section; Fig. 4 is a sectional view of one of the record holders; Fig. 5 is a detail section on the line V—V, Fig. 1; Fig. 6 is a detail section on the line VI—VI, Fig. 1; Fig. 7 is a frag-

mentary detail in elevation; Fig. 8 is a fragmentary detail on an enlarged scale.

PHONOGRAPH.—Lewis Cole, Chicago, Ill., assignor to the Talk-Sing Co., same place. Patent No. 1,244,588.

This invention relates to phonographs suitably arranged for use in toys and other devices, such as cigar cutters, clocks, dolls, savings banks, etc.

The objects of the invention are to provide simplified and improved means for starting, stopping and governing the speed of devices of this class; to provide improved means for automatically disengaging the stylus at the end of operations of the device and restoring the stylus carrying arm to its initial position, ready to repeat operations and to provide improved means for causing the stylus to resiliently engage a record.

Figure 1 is a front elevation of a phonograph constructed according to this invention. Fig. 2

is a rear view. Fig. 3 is a left side view. Fig. 4 is a right side view. Fig. 5 is a plan view. Fig. 6 is a sectional elevation taken on the

line 6—6 of Fig. 4. Fig. 7 is a detail in section showing the record support. Fig. 8 is a sectional detail taken on the line 8—8 of Fig. 2, and shows part of the starting and stopping spring lever.

TOY PHONOGRAPH.—Lee A. Collins, Louisville, Ky. Patent No. 1,245,568.

This invention relates to an improved phonograph and has as its primary object to provide

a device of this character which will constitute an attractive toy.

The invention has as a further object to provide a toy phonograph designed for attachment to a wall or other support and which may be easily mounted in position to be operated. And the invention has as a still further object to provide an improved and simple means for manually operating the phonograph.

Figure 1 is a side elevation of the improved phonograph showing the manner in which the device may be connected to a wall or other support and particularly illustrating the mechanism employed for manually rotating the record carriage of the phonograph. Fig. 2 is a top plan view of the device with the sound box removed, and Fig. 3 is a fragmentary perspective view showing a slightly modified form of operating mechanism for the device.

DRIVE MECHANISM FOR COMBINED PHONOGRAPHS AND PLAYER-PIANOS.—Melville Clark, Chicago, Ill., assignor to the Melville Clark Piano Co., same place. Patent No. 1,246,053.

The purpose of this invention is to combine in a single casing a phonograph mechanism and a player-piano mechanism, and to arrange for driving the phonograph from the same motor which drives the take-up roll of the player mechanism. The invention consists in the features and elements of construction contributing to this result and their combinations described and shown in the drawings: Figure 1 is a perspective view of a player-piano having a phonograph mechanism embodied in its casing in ac-

cordance with this invention. Fig. 2 is a plan sectional view of most of the drive gearing for the take-up roll and the phonograph. Fig. 3 is a detail elevation of certain portions of the drive gearing shown in Fig. 2. Fig. 4 is a detail elevation of a gear shifting device. Fig. 5 is a detail view of a clutch shifting device for the take-up roll. Fig. 6 is a diagrammatic view of the pneumatic connections between the tracker board and certain pneumatics adapted for automatic control of the two mechanisms. Fig. 7 is a detail view of a disengageable connection in a tempo-controlling means. Fig. 8 is a detail elevation of speed-varying means for the ro-

tary table of the phonograph. Fig. 9 is a detail section showing a manually operable winding gear for the motor. Fig. 10 is a detail section of a sound-controlling curtain for the phonograph amplifier. Fig. 11 is a front detail

elevation of a spring motor for driving the mechanism associated with this invention. Fig. 12 is a diagrammatic side elevation of certain gear trains of the motor shown in Fig. 11. Fig. 13 is a detail of the motor brake. Fig. 14 is a detail view of the speed-controlling cam for actuating the brake and the reversing train.

TALKING MACHINE.—Louis Lumiere, Lyon, France, assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,246,763.

The main objects of this invention are to provide an improved talking machine including a cabinet, sound reproducing means including a comparatively large vibratory diaphragm

included in the cabinet, and sound amplifying means included in the cabinet and arranged to co-operate directly with the diaphragm; to provide improved means for supporting a diaphragm in position to co-operate with a sound record; to provide improved means for supporting and rotating a sound record in co-operation with sound reproducing means; to provide improved means for holding a rotary record support against rotation; to provide improved sound reproducing means and other improvements. In the drawings herewith Figure 1 is a fragmentary top plan view of a talking machine constructed in accordance with this invention; (Continued on page 124)

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 123)

Fig. 2 a fragmentary end elevation partly in vertical transverse section on line 2—2 of Fig. 1; Fig. 3 a fragmentary vertical section on line 3—3 of Fig. 1; Fig. 4 a fragmentary side elevation of a portion of the machine shown in Fig. 1; Fig. 5 a fragmentary top plan view of a modified form of this invention; Fig. 6 a fragmentary front elevation partly in vertical transverse section on line 6—6 of Fig. 5; Fig. 7 a fragmentary side elevation partly in vertical section of the machine shown in Figs. 5 and 6; and Fig. 8 an enlarged fragmentary vertical section on line 8—8 of Fig. 5.

PHONOGRAPH NEEDLE.—Frederick L. Wood, Meriden, Conn. assignor to the Aeolian Co., New York. Patent No. 1,246,694.

The present invention relates to a novel phonograph needle for use in reproducing sound from sound records. The advantages of said needle will be apparent to those skilled in the

art from an understanding of the drawings. In the latter, Figures 1 to 4 inclusive are more or less diagrammatic representations of different stages in the process; and Fig. 5 is a mid-longitudinal section of the finished needle shown in Fig. 4.

RECORD FOR TALKING MACHINES.—Ademor N. Petit (deceased), Orange, N. J., assignor to John L. Lotsch, Brooklyn, N. Y. Patent No. 1,246,651.

This invention relates to records of the type wherein a sinuous groove of substantially uniform depth is cut into a tablet which is caused to rotate beneath a cutting tool of the proper shape and configuration, and its object is to produce an improved record groove, the walls of which are so proportioned and shaped as to reproduce the sounds which were employed to produce the original record with more clearness and distinctness than has been possible from records heretofore devised.

Another object is to produce a record groove which will retain its shape and reproduce the recorded sounds with fidelity and without false tones.

A further object is to produce a record groove wherein the reproducing tool will always properly engage the record surface notwithstanding the wear to which the tool may be subjected.

Figure 1 is a sectional view of a portion of a talking machine showing a recording tool in

operative relation thereto. Fig. 2 is a sectional view of the same, taken at right angles to Fig. 1. Fig. 3 is an enlarged sectional view of a record groove and cutting tool. Fig. 4 is a similar view of the groove showing a reproducing stylus of ordinary construction engaging with the groove. Figs. 5, 6, 7 and 8 are sectional views of modified forms of groove. Fig. 9 is an enlarged plan view of a portion of the record groove.

REPRODUCER.—William Troupe Lakin, Cumberland, Md. Patent No. 1,246,616.

This invention is an improvement in reproducers, and has for its object to provide a device of the character specified, wherein the stylus bar is mounted parallel with the diaphragm, and is supported in knife edge bearings and points, to give it the greatest possible freedom of movement, which influences the diaphragm.

In the drawing: Figure 1 is a front view of the reproducer. Fig. 2 is a section on the line 2—2 of Fig. 1. Fig. 3 is a partial rear view. Fig. 4 is a section on the line 4—4 of Fig. 3. Fig. 5 is a perspective view, looking from below, of the stylus bar. Fig. 6 is a similar view

of one of the supporting pins for the stylus bar. Fig. 7 is a perspective view of one of the mounting brackets for the bar. Fig. 8 is a perspective view of one end of the fulcrum of the stylus bar looking from above, and Fig. 9 is a partial edge view of the reproducer.

SOUND BOX ADAPTER.—Anthony Vasselli, Newark, N. J., assignor by Mesne assignments to Otto Heineman Phonograph Supply Co., Inc., New York. Patent No. 1,246,506.

This invention relates to devices whereby the talking machine may be adapted to play records of the laterally undulating type or records of the "hill and dale" type and it consists primarily in the tone arm of the usual construction having at its free extremity a peculiarly shaped connection to which the sound box may be attached and by which the sound box may be shifted from a position in which a diaphragm lies in the vertical plane to a position in which the plane of the diaphragm will be at an angle of about 60 degrees to the plane of the record and this without removing the sound box in any way or changing the radial distance between the center of the tone arm pivot and the point of the needle.

In the patent to Catucci No. 1,156,130, dated October 12, 1915, an adapter is disclosed which

is designed as an attachment for one of the well-known types of talking machines now on the market so that when in use records of the "hill and dale" type may be played, or by removing the adapter and fastening the sound box to the tone arm in the usual manner records of the laterally undulating type may be played. In the present invention none of the parts are removed, and it is only necessary to swing the sound box from one position to the other and vice versa to play all styles of records now on the market.

Figure 1 is a side elevation of the improvement with a well-known sound box attached thereto and so much of a tone arm as is necessary to illustrate the invention arranged to reproduce records of the "hill and dale" type. Fig. 2 is a plan view of the same. Fig. 3 is a side elevation similar to Fig. 1 but showing the sound box arrangement to play records of the lateral undulating type. Fig. 4 is a plan view of the same. Fig. 5 is a fractional view partly in section of the improvement. Fig. 6 is a cross section of line 6—6 of Fig. 5. Fig. 7 is a cross section of line 7—7 of Fig. 4, and illustrates an improved sound box connection with the tone arm, or adapter. Fig. 8 is a plan view of the screw used in such connection. Fig. 9 is a side elevation of said screw showing one of its flattened sides.

A further object is to provide improved means embodying a joint, whereby the sound box is adapted for vertical adjustment and improved means whereby any wear on the parts of the joints may be readily taken up and the joint maintained tight.

Figure 1 is a side elevation of a tone arm em-

bodying this invention and showing the sound box in position to play one type of record. Fig. 2 is a top plan view of the parts shown in Fig. 1. Fig. 3 is a view similar to Fig. 1 showing the sound box in position to play another type of record. Fig. 4 is an elevation of the sound box and the adjacent portion of the tone arm as taken from the opposite side of Fig. 1. Fig. 5 is a detail sectional view taken on line 5—5, Fig. 1. Fig. 6 is a detail sectional view taken through the tone arm and fastening means for the sound box.

PHONOGRAPH SOUND BOX CONNECTION.—Charles S. Burton, Oak Park, Ill. Patent No. 1,247,219.

The purpose of this invention is to provide an improved connection between the sound box and the tone arm of a phonograph, adapted to permit swiveling of the two connected parts for adjustment of the sound box to two positions, and particularly adapted to permit such adjustment for adapting to zigzag and hill-and-dale records, the specific purpose being to insure the adjustment from one position to the other being made completely and not halted with the parts at an intermediate position.

In the drawings: Figure 1 is a side elevation of a portion of the tone arm and sound box em-

bodying this invention in one of its forms. Fig. 2 is a section axial with respect to the two inter-telescoping and swiveled members. Fig. 3 is a detail side elevation showing the two parts at a different adjustment from that shown in Fig. 1. Fig. 4 is a side elevation of a modified form, the parts being broken away and shown in axial section. Fig. 5 is a detail section at the line 5—5 on Fig. 4. Fig. 6 is a detail section at the line 6—6 on Fig. 4. Fig. 7 is a view similar to Fig. 3, showing a modified form.

CIRCLE LINE WAVE DOUBLE-DISC RECORD FOR SOUND PRODUCING MACHINES.—John A. Sowell, Sacramento, Cal., assignor of one-half to E. E. Sowell, same place. Patent No. 1,247,163.

This invention relates to improvements in double-disc records for sound producing machines, the object of the invention being to produce a record which will carry a greater number of impression lines to a given diameter than the discs now commonly used.

A further aim of the invention is to so construct the record that it will allow of a better reproduction especially as the needle of the sound producing machine moves toward the center of the record.

The invention embodies a record formed in radial waves with a slight inclination upward from the outer edges of the valleys between the waves to the inner edges thereof so that as the needle travels toward the center of the record it will move on a slight inclination upward, caus-

ing it to maintain a slight frictional action which will greatly increase the efficiency of the sound production. Also by reason of these waves the impression lines are relatively longer than they would be on flat surface, and hence a greater number can be placed on a record of a given diameter than on the now commonly used flat records.

In the drawings similar characters of reference indicate corresponding parts in the several views.

Figure 1 is a top plan view of the improved record. Fig. 2 is a sectional view taken on a line N—X of Fig. 1 and twice enlarged. Fig. 3 is an edge view of the record as shown in Fig. 1.

\$3,000,000,000 TRADE BALANCE

Figures Show Economic Resources of U. S. to Wage Winning War

WASHINGTON, D. C., January 2.—America's exports were estimated to-day at the Department of Commerce to have passed the \$6,000,000,000 mark in 1917, a new high record. Imports were below \$3,000,000,000, and the trade balance in favor of the United States probably will be more than \$3,150,000,000, when final statistics are computed.

The country's gold supply showed less increase than last year because of the substitution of credits for cash in handling allied purchases after the United States entered the war. Imports of gold in March amounted to \$139,000,000, but in November were less than \$3,000,000. The total for the year was estimated at \$537,000,000, compared with \$686,000,000 in 1915.

Exports of gold showed a heavy increase over the preceding twelve months, due chiefly to the large movement to Japan, Spain and South American countries. The total was estimated at \$374,000,000, compared with \$155,000,000 last year.

The trade balance of more than \$3,000,000,000 with the country at war was regarded by officials as the best evidence that this country has the economic resources necessary to defeat Germany.

A NEW INCORPORATION

The Automobile Record Container Co. has been incorporated under the laws of the State of Delaware for the purpose of manufacturing talking machines and parts. The capitalization of the concern is \$50,000, the incorporators being Frank P. Read, of Chicago, Ill.; Fred M. Sargent, of Evanston, Ill., and Harry G. Chamberlain, of Glencot, Ill.

The TALKING MACHINE WORLD

For the
makers &
sellers of
talking
machines

Published Each Month by Edward Lyman Bill, Inc., at 373 Fourth Ave., New York, February 15, 1918

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly*.

The Highest Class Talking Machine in the World

THE INSTRUMENT OF QUALITY

CLEAR AS A BELL

SONORA
PORTABLE

\$60

THIS, the highest grade Portable, is a big seller. It has the characteristic rich Sonora tone and appeals instantly to automobilists, vacationists, students, soldiers, and all who have use for a small, *quality* phonograph. Plays all makes of disc records, all sizes. *Weight only 15 pounds complete.*

LAST year Sonora's sales were over one hundred times what they were four years ago.

Only a phonograph of extraordinary excellence, you realize, could make such a phenomenal record. *Sonora dealers make money.*

Sonora's big sales are the result of Sonora's exceptional merit, Sonora's liberal, progressive selling policy, and Sonora's original, forceful advertising. *Now*—(not six months from now when you may be troubled because of delayed deliv-

eries owing to the filling of previous orders of more foresighted dealers)—*now*—investigate the remarkable opportunities which are offered to you through the sale of this superb instrument which, point for point, is *unequaled*.

At the Panama-Pacific Exposition Sonora won highest score for tone quality

IMPORTANT CHANGE IN TACOMA

Shaw Supply Co. Takes Over the Eilers Talking Machine Co. and Now Handles Three Leading Lines of Machines and Records

TACOMA, WASH., February 1.—John Ramaker, manager of the phonograph supply department of the Shaw Supply Co., 1015 Pacific avenue, announces that his company has taken over the Eilers Talking Machine Co.

"We have been handling the Edison and Columbia machines," said Mr. Ramaker, "and with the addition of the Victor machine we will now be carrying the three standard makes of talking machines. We are enlarging our space to accommodate our new stock and will have three new record rooms, making a total of eight record rooms."

Mr. Ramaker also announced that with the addition of stock the Shaw Supply Co. will introduce a novelty into Tacoma in the form of daily talking machine recitals. The artistically and comfortably furnished record room at the front of the Shaw Supply Co. will be used for these recitals, which will be given daily from 10 a. m. until 5 p. m.

"When I was East recently," said Mr. Ramaker, "these novelty recitals given daily by the various music houses were very successful. Some of the houses even served tea during the afternoon. Women down town shopping would drop in and listen to the music for a few minutes. We will commence these recitals at once and invite all Tacomans to attend."

W. M. RANDOLPH WITH B. H. ROTH

Takes Charge of Victrola and Sporting Goods Departments in Big Stores in West New York, N. J.—Expects to Increase Business

William M. Randolph, formerly connected with Landay Bros., New York, is now associated with B. H. Roth, of West New York, N. J., one of the largest exclusive Victrola dealers in Hudson County. Mr. Roth has enlarged his parlors and taken the two adjoining stores, adding large and well stocked sporting goods, kodak and toy departments. Mr. Randolph will have full charge of the Victor and sporting goods departments and expects to increase the business materially. The sporting goods line is not new to Mr. Randolph, for he was formerly buyer of sporting goods for a large New York house. He also has had wide experience in the talking machine field.

TALKING MACHINES FOR HAITIANS

Natives of West Indian Island Show Strong Desire for American Products

Since the occupation of Haiti by the United States there is said to have developed throughout the island a strong demand for merchandise made in this country, says the New York Times. The latest manifestation of this development is a number of orders for low and medium priced phonographs which exporters in this city have received during the last few weeks from Haitian importers to replace goods formerly obtained in Europe. Some of the higher-priced machines have also been sought, though in more or less limited quantities. The South American trade in American phonographs seems to be continuing strong in spite of high freight rates and the difficulties of transportation.

The advertising of your store is a reflection of its personality! You are as much a part of the store's advertisement as the printed daily store news! You are part of the "inside adv.," the daily paper and auxiliaries represents the "cover and trimmings!"

GALLI-CURCI SCORES IN NEW YORK

Noted Victor Artist Heard With Chicago Grand Opera Co. in New York—Her Remarkable Career—Puts Royalties Into Liberty Bonds

One of the stars who are making history with the Chicago Opera Company, which has attracted large audiences at the Lexington avenue Opera House, New York, the past few weeks, is Amelita Galli-Curci. This distinguished soprano was not entirely unknown, either here or in the West, for her voice, through the Victor records, has long been appreciated. Naturally the desire to hear this artist was strong, and there was much uneasiness when it was rumored

Mme. Amelita Galli-Curci, Soprano

that owing to a needed rest she would not be able to sing in this city, but this newest of prima donnas, unknown in this country a year and a half ago, appeared in New York and conquered. As a matter of fact she swept musical New York off its feet.

Mme. Galli-Curci's career is an interesting one, and it appears that she has never had a singing lesson in her life, that as a girl she heard all the operas at La Scala; that Mascagni, her piano teacher (she was a professional pianist before she became a singer), told her singers were born, not made; and, having found she was so born, she had taught herself. And never would she let any one, not even her husband, hear her practice (if practice is the right word for what coloratura sopranos do when in training). She locked all the doors, she said, and made her piano her only intimate.

The Italian soprano confesses that in an incredibly short time she has collected royalties from 450,000 talking machine records and put this money into Liberty Bonds—practical and patriotic, isn't it? Mme. Galli-Curci and her painter husband, Luigi Curci, who is a marquis but doesn't mention it, who are "at home" at 27 West Sixty-seventh street, have expressed themselves as delighted with New York and its people.

Next spring Mme. Galli-Curci expects to visit California. One fact stands forth, that no matter where she goes her voice and her ability will be known in advance by reason of her Victor records—among the greatest aids to public appreciation existing to-day.

INTERESTING THE CHILDREN

The children of to-day are the men and women of to-morrow. Build for the future of your store by cultivating the children to-day. Impressions are easily made. It will not be hard for a talking machine dealer to win their friendship, he has such a fascinating line to interest and entertain them. And they'll not forsake you later, when they grow up.

AFTER MISLEADING ADVERTISERS

Talking Machine Trade Should Be Interested in Efforts of Music Industries—Better Business Bureau to Protect Legitimate Business

The Music Industries Better Business Bureau, which has headquarters at 432 Broadway, Milwaukee, Wis., with C. L. Dennis as secretary, is doing good work in checking fraudulent advertising of musical instruments in various sections of the country.

As has been stated before in *The World*, the bureau makes a monthly report of its activities and the report for December recently issued is particularly interesting. Although the bureau was organized under the direction of the National Association of Piano Merchants, Secretary Dennis has also directed his attention to advertising of all types of musical instruments, including talking machines. Among the cases handled by the bureau during December were two in Chicago, Ill., both concerning the advertising of talking machines in a misleading manner.

One dealer used the name of a prominent machine as the basis for selling his own instruments, and the other made most extravagant statements regarding the capacity of the factory producing his machines and the profits that could be made by selling them. In the first case several papers were persuaded to refuse the advertising, and similar action is expected in the second instance.

Talking machine dealers throughout the country who are suffering at the hands of unscrupulous advertisers and "gyp" dealers, would do well to acquaint the Better Business Bureau with the facts.

PRICE CUTTING A MENACE

Damaging to the Manufacturer and Inimical to the Public Welfare—Points Worth Considering

Price cutting is not only damaging to the manufacturer but also inimical to public welfare. Careful buyers do not care to deal with the price-cutter. They rightly question his good faith, suspect he has a different price for different buyers, and are convinced that when he loses on a standard article this sacrifice is made up on other articles. The person who never buys unless he can get a bargain, the haggler over prices, is the advocate of the price-cutting practice. Fixed prices have stabilized business and given a fair field to the small dealer, who is hardest hit by the price-cutting practice. We are glad, therefore, remarks *Leslie's Weekly*, that one of the leading makers of an advertised commodity has determined to fight in the courts the Government indictment that the company's refusal to sell its products to dealers who persistently cut prices is in violation of the Sherman law. We agree with Mr. Sidney Colgate that a "great ethical principle" is here involved that affects vitally the entire manufacturing industry, that every manufacturer has "the moral and legal right to protect his good will and his good name."

HOW JARDINE IS "DOING HIS BIT"

A. E. Jardine, who conducts the Sonora Phonograph Agency at 711 Boardwalk, Atlantic City, N. J., has just lost his best demonstrator in the person of Fairfax A. Jones, who has joined the Aviation Service. Last April Mr. Jardine's son, who was acting as sales manager of this establishment, joined the Naval Service, and is now a commissioned officer on the U. S. S. "Wisconsin" "somewhere at sea." Meanwhile, Mr. Jardine is not only loyally contributing to the forces of Uncle Sam on land and sea, but he is "doing business as usual," and thus helping to stabilize industrial conditions.

Why the Salesman Who Oversells His Customer Is Not Exercising Good Business Judgment

The average talking machine salesman if he can induce the prospective purchaser of a \$50 machine to take one worth three or four times as much feels that he has done a good piece of work, that he has justified the term salesman as applied to himself and is looking out for the interests of his house. In a great many cases the salesman is right, but there are some cases where to induce a customer to invest several times the amount originally intended shows bad business judgment, and may lead to embarrassment later.

It frequently happens that a man feels that he has \$50 or \$60 to spend for a talking machine and starts out to buy one at that price, with the intention of paying cash for it. He is also prepared to buy a few records, and with his machine payment out of the way at one time may be expected to keep on buying records, possibly in small quantities, at regular intervals. If the salesman gets hold of such a man and persuades him to invest in a \$150 instrument, for instance, the customer, finding that he cannot pay in cash, grabs eagerly at the regular terms of the house which may be as low as \$10 down and \$10 a month. The result is that fourteen months are taken in paying off the obligation, the house has to wait for its money and the customer, meeting his payment every month, has little left to buy records, and the whole deal is indeed most unsatisfactory to both parties. If this same man had been permitted to buy his \$50 machine and a few records each month, the total sales during the fourteen months would have approximately equaled in amount the price of the \$150 machine, and the few records bought with it. Meanwhile, the dealer would have had the use of the cash he received from the customer.

There are, of course, many instances, on the other hand, where people inquire about cheaper models who could well afford the more expensive styles. The salesman owes it to himself to be able to judge in some manner the customer's buying power and govern himself accordingly. The salesman who oversells the customer, however, is not only placing on his customer a burden he should not bear, but is adding to the dealer's troubles, by giving him a new account to fret over, for the customer who has not contracted to pay more than he really feels he can afford to pay is going to be slow in meet-

ing his obligations, and will keep the collection department hustling to see that the payments are met.

In closing any kind of a sale, too, the salesman would do well to look at the cash side, and to endeavor to close on that basis if possible. There are too many salesmen who at the first sign of hesitancy on the part of their customer immediately emphasize the point that the machine can be bought on very low terms. In other words, they place all their cards on the table at once. It is just as easy to concentrate on the sale of the machine first and talk

*"Selling the
Customer What He
Can Afford to Buy
Is Good Business"*

terms afterward. If the demonstration is so effective that the customer feels that he really wants to buy the machine and certain records, he is much more easy to handle than if he is sold on the question of terms alone.

When the customer feels favorably impressed with the machine but hesitates to buy with the explanation that he is in doubt if he can afford it just then, that is the opportunity for the salesman to announce that the instrument can be purchased on time if desired, and suggest that 20 per cent. down and 20 per cent. a month would prove satisfactory. He will find that just as many machines will be sold on that basis as when he rushes to put forth the minimum terms of 10 per cent. down and 5 per cent. or 10 per cent. a month.

There are some salesmen who are so anxious to sell records, for instance, that where the customer is paying for a machine they will insist adding the price of half a dozen records to his account, to be paid for on a monthly basis, rather than be satisfied with the sale of three records

for cash. They forget that if the customer really wants the records and does not feel like paying for them at the time, he will most likely come back and get them a little later, and that if he once finds out that his record purchases may be added to his account without argument, he will be inclined to overstep the bounds and keep his account on the books for an indefinite period. Credit is a mighty valuable thing, whether it is individual credit or business credit, and it should not be handled carelessly.

It is cash business that helps men to pay the rent and discount bills, and the salesman who leaves it to the customer to ask for credit and to suggest terms will find that his volume of cash business will show a most satisfactory increase.

MISS MORRISEY'S 35,000-MILE TOUR

Popular Young Contralto Gave 74 Concerts on Recent Tour—Visited Many Military Camps

Miss Marie Morrisey, contralto, the brilliant young Edison artist, who is recognized as one of the foremost concert singers of the day, is a true American musically as well as patriotically. Her programs show her loyalty to American composers, and she featured American songs in a recent record-breaking three months' tour on which she traveled 35,000 miles and gave seventy-four concerts—ten of the concerts just "doing her bit" singing for the soldiers in the camps.

"Just a-Wearying for You" and "Last Night When You Said Good-bye," well known to Diamond Disc owners, and "Happy Days," which is soon to be recorded, found a much-encored place on her program.

"American audiences love American songs," declared Miss Morrisey the other day, "and they are going to have a chance to hear many of them. One good effect of the war will be the bringing forth of American composers. This country is not lacking in composers, but heretofore there has been rather listless encouragement for them, and very little opportunity to be heard. Now, with many foreign composers left off our programs, there is a great cry for American composers, musicians of great talent, who have been patiently waiting, and who successfully are answering the cry."

SINCERITY

That's the slogan back of every factor in

AN IMPORTANT ACCESSORY—ALBUMS FOR FILING DISC RECORDS

The enormous demand for "National" Record Albums keeps pace with the ever increasing demand for machines and records, and our output capacity has been enlarged to meet the greater needed supply. Record Albums have proven themselves to be the best and most convenient, as well as economic, method of filing and keeping disc records.

THE PULLING TEST—THE STRENGTH IS THERE

STRENGTH AT THE STRESS AND STRAIN POINT

PRACTICALLY UNBREAKABLE FOR REGULAR USAGE

Albums are an **Indispensable Requisite** in the talking machine business and wherever records are sold. An accessory that is necessary and worth while. Practical and handy. Save time and records. A **profitable adjunct** to the business. All owners of machines and records want Albums to file and preserve their records.

We manufacture disc Record Albums containing 12 pockets to fit cabinets of all sizes and styles. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc records.

For durability, finish and artistic design, our Albums are unsurpassed. We have unexcelled manufacturing facilities, and considering quality our prices are the lowest. Write us giving quantity you may desire, and we will quote prices.

OUR ALBUMS ARE MADE TO CONTAIN VICTOR, COLUMBIA, EDISON, PATHÉ, AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO., 239 S. American Street, PHILADELPHIA, PA.

CHANGING WINDOW DISPLAYS PAY

Butler's Music House, Marion, Ind., Believes in This Policy—Patriotic Records Featured

MARION, IND., February 8.—Despite the severe winter weather and the abundance of snow that kept many people off the streets, Butler's Music House of this city, of which Edwin Butler is the head, followed its usual practice of changing

Butler Bros.' Record Window Display

the window display each week, and even under the most unfavorable weather conditions the efforts put into this work were more than repaid by the sales registered.

The company has been paying particular attention to featuring patriotic records, and the accompanying illustration shows one of their recent windows devoted to that purpose. As will be seen, the Victor French Course for Soldiers, embodied in three records, is strongly advertised in the center of the display, while on the right appears the company's service flag with

its five stars. The background for the display consisted of large-sized flags of our Allies with the Stars and Stripes in the center. Opportunity was also found for showing the popular models of the Victrola and the Edison Diamond Disc phonograph, for the company handles both lines. The display of records about the floor served to facilitate the making of selections by those who stopped to look.

That the entire display was effective was proved by the increased volume of record sales.

DEATH OF BENTON M. HARGER

Harger & Blish, Inc., Des Moines, Ia., have sent out memoriam cards announcing the death of Benton Merritt Harger, president of that corporation, who died recently at his home in Hollywood, Cal., where he had resided for some years past. Mr. Harger had not been prominent in the trade of late years, merely retaining a financial interest in the corporation which bears his name. Following the death of his wife two months ago, Mr. Harger suffered an epileptic stroke from which he rallied, but a second stroke proved fatal. Mr. Harger was born in Syracuse, N. Y., April 12, 1839, and during his long, active life had been one of the foremost citizens of Dubuque.

The man who attracts attention is the man who is thinking all the time, and expressing himself in little ways. It is not the man who tries to dazzle his employer by doing the theatrical and spectacular.

MAKE BIG RECORD IN SMALL CITY

Huntley-Stockton-Hill Co., Greensboro, N. C., Sell 178 Edison Phonographs in a Six Weeks' Holiday Drive—Good Team Work

The Huntley-Stockton-Hill Co., of Greensboro, N. C., who handle the Edison line of phonographs and records, report an unusually active demand for those goods, a demand stimulated considerably by the energetic efforts of the company's staff.

During the six weeks' holiday drive, ending January 1, the company disposed of 178 machines as a result of competition developed by two selling teams.

In a letter to C. B. Haynes & Co., Edison jobbers, of Richmond, Va., the company says regarding its holiday drive:

"On about the 17th of November we divided our sales force into two teams and told them that the team that sold the most machines would receive a fine dinner and twenty-five dollars (\$25.00) in gold. There were only three or four machines sold until the first of December, when they began to get busy, and by the first of January one team had sold eighty-seven and the other ninety-one, making a total of one hundred and seventy-eight machines, which we feel is a very good showing for a town of this size, and also taking into consideration that we have only had the Edison line for a little over one and one-half years.

"We feel that if you could have supplied us with all the machines that we wanted we could easily have sold two hundred and fifty. We want to thank you, as well as the Edison factory, for the co-operation you have given us in the way of advertising matter, and we expect to sell twice as many machines in 1918 as we did in 1917."

The company's record of business is particularly good when it is considered that Greensboro has a population of approximately 30,000, of which about a third are negroes.

NEW YORK, FEBRUARY 15, 1918

ORDER well in advance, and order up to the hilt, is the advice that should be followed by the talking machine wholesaler and retailer just at the present time. For, remember, placing orders and getting the goods are two widely separated and distinct things at present.

The freight situation continues serious. With fuel, foodstuffs and munitions having the right of way on the railroads, and with the Government in control of the transportation systems to see that this priority order is enforced, the shippers and consignees of freight not coming within those favored classes must take their chances of delivery, and they are long chances.

Until weather conditions improve, there are only certain days when freight of certain classes will be received by the railroads, and then only in limited quantities. Moreover, there have been tight embargoes placed on the bulk of freight by several Eastern railroads, and there probably will be more embargoes in the future. The wise and logical thing to do, therefore, is to get the jump on the situation wherever possible by having goods on order and ready to ship at every opportunity.

Freight received by the jobber and dealer in normal times within a week or so after shipment—now takes anywhere from six weeks to three months en route. That means that the jobber and retailer must work at least that far ahead.

There has been much talk of the curtailment of the manufacture of "non-essentials," or all those goods not required to provide the necessities of life. Such curtailment would depend upon the point of view of the men issuing the order, and who might or might not have full appreciation of what music means in the present crisis. Assurances from Washington, however, are to the effect that no such discrimination will be practiced by the authorities, that any curtailment order will apply broadly to all manufacturers, and no one group of industries will be singled out for special attention.

The Garfield order can be accepted as proof of this attitude, and with assurances of a square deal from Washington the trade can go ahead and by foresight and the exercise of the proper spirit keep at least even with the game.

IT may interest talking machine men to know that there is a strong movement among piano merchants in the East, backed by the National Piano Merchants' Association, to eliminate the advertising of instalment terms, and to leave that question for

adjustment between the customer and the salesman as circumstances warrant.

It has been proven to be a fact that where minimum terms are quoted in an advertisement, such as \$1 down and \$1 a week, or \$5 down and \$5 per month on the various models, simply as a bait, the prospect comes into the store filled with the idea that those amounts are all he is expected to pay on the instrument he selects, and consequently most of the business is done on that basis, although in many cases the customer is in a position to pay either cash or substantial amounts each month. Where it is advertised that the terms may be arranged to suit the customer's convenience, provided they are within reason, the average amounts received as first payments and the instalments arranged for each month are much higher than the average.

The ordinary business man in making a \$200 purchase, for instance, would hesitate to offer \$5 or \$10 to bind the bargain and agree to pay a similar sum monthly. He realizes the amount of the investment and generally offers an initial payment averaging at least 20 per cent. of the amount of the purchase. Advertising of terms does not affect the talking machine dealer as much as it does the piano dealer, but while in the former case the average value of an individual purchase is smaller, there is at the same time an equal tendency to cheapen the products. A \$200 machine for which the dealer will accept \$5 or \$10 as first payment does not seem nearly as valuable to the purchaser as would be the case if he had to pay \$25 or \$50 down.

Advertising that the dealer will accept the customer's own terms, if in reason, appears to the ordinary reader to be a most generous proposition. The customer feels that he is safe to make a purchase because he can pay for it any way he sees fit, and his terms, ninety-nine times out of one hundred, will be better than the minimum terms that the retailer has been in the practice of asking. Just now every dollar in cash has an added value, and if by adopting this idea of the piano man the talking machine dealers can bring in the cash on their sales in larger quantities and with greater rapidity, then it certainly is worth trying.

THE drastic orders of Fuel Administrator Garfield closing down practically all of the industries located east of the Mississippi River for the five-day period from January 18 to 22 inclusive, and for each of the nine Mondays following, naturally hit the talking machine trade hard, although probably no worse than it hit hundreds of other industries.

Wherein the talking machine trade suffered, and will suffer, particularly, is that the majority of the larger factories are far behind in the production and delivery of orders booked for machines and records, and had relied on uninterrupted work during January and February to catch up in some measure with the demand so as to fill the holes in the retail stocks left by the holiday rush.

The spirit of the trade, however, was admirably shown in the observation of the Fuel Administrator's order to the letter. In practically every instance the factories shut down tight on the days named, keeping only a portion of the office force on hand to look after the mail.

Certain manufacturers in many industries apparently found a loophole in the order permitting the heating of plants and offices sufficiently to prevent damage to stock and the freezing of sprinkler systems. The heating thus deemed necessary ranged from 35 to 50 degrees, and it was found that employes could do certain work in that temperature without discomfort. In view of the fact that the greater part of the work in talking machine and record manufacturing is done by machinery, even to the varnishing of the cabinets, and that the use of machinery was absolutely prohibited on the "fuelless" days, however, put the bars up against any manufacturing activities.

Although there was naturally a strong protest immediately the order was issued, the talking machine men, manufacturers, jobbers and dealers fell in line with other business interests and accepted the order as a war necessity, and made the best of a bad situation.

According to reports from Washington, it seems, as this is written, that the effect of the five-day closing down and the subsequent workless Mondays has not been as satisfactory as hoped for in effecting a saving in coal, and in permitting of trans-

portation of fuel in increased quantities on those days. Therefore, instead of the order being rescinded in part, it is not improbable that it may be, in some manner or other, extended.

Meanwhile indications are that the trade has adapted itself to the changed conditions and is working along lines that will overcome in a considerable measure the effect of the shut-down, by increased efforts during the five working days, and overtime occasionally, when feasible. There are still many who grumble against the severity of the Garfield order and who are not yet thoroughly convinced regarding its necessity, but these are war times, and the great majority of the people of the United States comprehend that there must be fire where there is smoke and have set themselves to grin and bear it, regardless of personal opinions—in other words, to use a familiar advertising slogan, "there's a reason."

A little extra effort, a closer attention to details, and the go-ahead spirit will enable the trade to overcome these and other obstacles and, barring unforeseen conditions, make 1918 just as good a year for the talking machine industry as has been predicted.

THE merchant and his salesman should bear one fact in mind, that the first impressions are the most lasting, and if you give a man a good impression of your place when he enters you have accomplished half the battle of separating him from his money. A quick walk forward, a pleasant greeting and close attention are not hard things to give, but they will make sales where a glum dyspeptic countenance, with mouth drooping at the corners and a general look of having liver trouble, will put a customer in an antagonistic mood that will mean a hard fight to win his trade.

THE desirability of applying the trade acceptance to all classes of transactions in buying and selling merchandise is becoming more generally understood in all the leading industries of the country. Leading trade associations are recognizing the value of this plan of putting credits into available liquid form, in this way expanding the use of commercial paper.

There is no doubt but that the war, through its related activities, has done much in forcing developments which formerly and for some time recently had appeared disposed to hang fire. For instance, the trade acceptance, an institution whose merit is obvious, and which for years has been included among the fundamentals of commercial systems in practically every other civilized business country of the world, was up to a year ago understood but by a small number of people in this country, while a greater number considered the matter hardly worth their time or effort. What a change, however! Today every merchant and business organization is giving this subject the closest consideration.

The matter of credits has been much in the public mind since the United States entered the war, and business men in particular have become alive to the beneficial results of the use of trade acceptances, with the result that this subject is before the country in a new light. People are getting a better comprehension of how it will broaden industry by liquidizing credits, and thus give the merchant greater opportunities for trade expansion.

MANUFACTURERS and jobbers are giving considerable attention these days to the subject of advertising. Every live man to-day concedes that advertising is a necessity, one that returns good dividends on the investment when space is properly utilized. In this connection it is well to bear in mind that every advertising medium has two costs—space cost and service cost. One gives use; the other gives results. Space cost is fixed. Service cost varies. The amount this varies determines the amount of results—that is, the amount of value received. But this varies always in proportion to the circulation of the medium. The more representative the circulation the higher the service. Since you purchase advertising space to put it to use and secure results, it is false and momentary economy to consider any but the medium of greatest representative circulation. Results, through use, soon offset any initial saving in cost of space. Service includes safety. It protects your reputation and guarantees your sales. Let "Service First" be your motto; it is ours—it is a winning policy.

And, talking about advertising, there are many concerns in this and other industries which, through lack of courage or for other reasons, during the war, have set about curtailing expenses by cutting down, or eliminating their advertising appropriations, and thus undermining the value of their sales departments.

Economy along these lines is not sound nor sensible. The concerns that will reap the harvest when the harvest time of peace comes will be those which have had the courage to push their businesses in the face of war, and the foresight to maintain their advertising campaigns, and keep their sales organizations just as close to normal as conditions will permit.

Money spent along this line is not money thrown away by any means. It is money definitely invested for future dividends. It insures a permanence of name value and develops a cumulative effect that cannot be extinguished—one that will bring most satisfactory returns.

The business men who lose courage and plan to hibernate during the period of the war are, unless peace comes unexpectedly, going to find themselves and their advertising forgotten and their names but distant memories. The time the live ones spend in going ahead the others must spend in starting up again—a handicap which no successful business man desires to have placed upon him.

WASHINGTON'S POLICY

in taking the worst night for crossing the Delaware helped him to succeed. It's easy to sell machines, but the fact that so few dealers specialize on selling Victor Records is a BIG reason why you would make more money by devoting more energy to the work.

You will celebrate a year of unusual record profits by beginning right now to SELL MORE RECORDS, and to use

The Need for Music

Food, raiment and shelter are absolutely essential to existence. But it is not these necessities that make life worth living, they merely make existence possible. In order to sustain the highly developed life of today the individual requires something more than physical sustenance.

In striving for a better, a higher, a more ideal existence, the absolute necessities bear no part but the sustaining of physical life. Life, without many things which are often misnamed "luxuries," would not be "living" at all, it would be mere existence.

Who but the most narrow-minded could possibly call music a luxury. A luxury is anything that can be taken out of our lives without actual suffering. Music could not be taken out of our lives without real suffering. It is honey to the soul. It speaks in all tongues and all ears understand. It brings man into closer touch with his Creator and with his fellow-man than any other medium. It speaks to the souls of men, and

men respond with the noblest and purest deeds of heroism. Inspired by it they make the sublimest sacrifices with a smile on their lips. They go into battle—they go down on ships at sea singing songs.

People buy food, clothing and shelter simply because they *must* have them. We are very proud to feel that they invest in the instrument of Music's Re-Creation because they *want* it; not because it is *absolutely* essential to *existence* but because they very deeply feel that they *need* it to round out their lives, to help make living worth while, to brighten leisure hours and to bind the home ties closer.

Music's Re-Creation is helping to sweeten the bitter cup that the world now holds to its lips, and every loyal member of the Edison organization is doing his part to make the influence of Mr. Edison's new art felt in every American home.

What a privilege—what a satisfaction it is to be associated with such a wonderful factor in the life of today!

It Doesn't Pay for the Salesman to Laugh at the Mistakes of His Customers

It is not difficult for the average talking machine salesman to recount the humorous instances that occur in the course of his experience in the store, of the people who have come in without any knowledge of what they wanted or with the wrong name for the desired record, and people who have been confused as to artists and makes of machines, and brought their troubles to the salesman. These instances for the most part are really funny, but the time to laugh at them is when the customer has left the store, and when there are no outsiders to hear.

We all know of the story of the brawny Irishman who entered a talking machine store and demanded a record by "Al. McGluck." The incident is related as a story, but the average salesman has to meet demands equally as ridiculous every day in the week. Every customer is not well versed in the names of musical compositions, nor can everyone pronounce correctly the names of foreign artists. In fact, there are many salesmen, supposed to be authorities, who have weird methods of pronouncing some of the artists' names.

When a customer enters the store and asks, as did the colored woman, for the record "Human Rest," it is up to the salesman to inquire casually if the record wanted is not "Humoresque," and to act as though the customer had simply made a slip of the tongue. No matter how peculiar may sound some of the demands of customers, to the salesman who knows his line of records there is always a possibility of associating the customer's demand with some record in stock. The words may be different, but there is a phonetic similarity that cannot be mistaken. To grasp that similarity upon the instant and to save the customer embarrassment by bringing the desired record forward without delay is one of the traits of the salesman who knows his business.

We have seen incidents where the salesman has smiled in a superior way at the demand of a customer, and taken long enough to explain to that customer just where he, or she, was in error in pronouncing the name or indicating the desired selection. We have seen these customers flush with embarrassment, or more frequently with anger, and hurry out of the store before completing a purchase. Even when the customers did stay after being corrected, they acted as though their feelings were hurt and only bought the one record asked for to prevent the further embarrassment of having the salesman sneer as they went out empty handed. We have seen occasions where salesmen have smiled and actually laughed at the mistakes of a customer. It doesn't require statistics to prove

that the customer once laughed at is a customer lost.

One of the great problems of the talking machine has been to bring into the lives of the musically uneducated the greatest works of the masters. The man or woman who formerly depended for his music upon the vaudeville theatre or even the hand organ can now play at home and by means of the talking machine the great arias and symphonies that under ordinary conditions would be as foreign to him as Chinese. It is but natural that the average mortal cannot delve into this new musical world

*"Take the Customer
Seriously—Laugh
With Him,
But Not at Him"*

without making some mistakes, and every mistake thus recorded in the talking machine store may be accepted as proof positive that another convert has been won over to the cause of good music.

The man or woman who comes in and pronounces the name of some foreign composition or some foreign artist casually and without hesitation generally has much experience with the higher types of music, but the person who comes in and stumbles is exploring a new realm, and the salesman who is looking towards the future of the business should make a special effort to make that exploration pleasant and to remove the stumbling blocks of almost unpronounceable names with courtesy and tact. Then the customer leaves the store with the feeling that he has been well treated and will come again, rather than with the feeling that he has been laughed at and that his trade is not wanted.

Moreover, if after the exit of the customer making the humorous mistakes the salesman sees fit to laugh by himself, or in company with his fellows, that fact is noticed by other customers who happen to be present, and we may be sure, if any among them is not quite sure of his ground, he is going to think awhile about coming into that store again, unless for a record that is perfectly familiar to him. Of

course if the salesman's sense of humor is strong enough to overcome his sense of business and he can only control himself sufficiently to let the customer get out of the store, why, there is generally a stockroom in the basement or in the rear of the talking machine store to which he can repair and roll on the floor in glee for a few moments to relieve his feelings.

When he is selling records the salesman is not paying for and should not expect free entertainment. The customer comes into the store not in the role of a comedian but in the role of a purchaser and should be treated as such. The adage "Laugh and grow fat" is all right under certain circumstances, but the salesman who laughs at customers' mistakes is going to grow thin through lack of nourishment and the wherewithal to purchase same.

NEW WAR USE FOR THE TALKER

Kansas Cattleman Finds That Cows Fatten Quicker Under Influence of Music—Should Help Increase Meat Production of Country

KANSAS CITY, Mo., February 5.—Now comes Arnold Berns, of Peabody, Kan., pioneer cattleman, one who has seen the Texas longhorn give way to the grade Hereford and Shorthorn in the cattle industry, and declares that the phonograph can be made a great factor in fattening cattle. At the meeting of the Kansas State Board of Agriculture at Topeka, Kan., Mr. Berns said that the phonograph will serve to quiet the nerves of cattle in the fattening stalls and make them more susceptible to the grains and feeds given them and that they will take on fat faster by being quiet and less nervous.

"Many of the cattle in our Western feed lots and stalls," said Mr. Berns, "have been raised on the ranges of the West where the howl of the coyote has been the music of the range. These cattle taken off the range and confined in close quarters naturally become restive and nervous and miss the sounds and music of the ranges.

"Two bunches of cattle fed under identically the same conditions near Peabody, Kan., differed in weight and price when marketed. The man who sold the higher priced bunch of cattle was asked for an explanation by his less successful neighbor and was told that the seller of the higher priced bunch of cattle had arisen from his bed when he heard the cattle running around in nervous excitement in the feed lot at night and had gone down and talked soothingly to them until they became passive and their fright had passed away.

"Not many of us would care to get up of nights and go to the feed yard to talk or sing to a restive nervous bunch of cattle that were not taking on fat because of their nervousness,

"The phonograph could be employed to take the place of the human voice under such circumstances. We could start with a coyote record that would cause the range cattle to forget their homesickness and the longing for the freedom of the open prairie ranges and then we could educate them up to some of Caruso's or Melba's wonderful arias or the "Marseillaise" or some of the patriotic airs. Think of how undefeatable an army of soldiers would be if fed on beef that had been fattened to the music of such soul-stirring war airs as we are all hearing these days."

Mr. Berns spoke on "Cattle Feeding as a Business" and his introductory remarks were in relation to phonographic music as a feature of cattle feeding. His address was easily the leading feature of the Topeka meeting.

The Brunswick Shop, Dallas, Tex., has installed a stock of Columbia Grafonolas and records.

Globe-Wernicke

(BUILT-TO-ENDURE)

Sectional Cabinets For Disc Records

The better the facilities you furnish your customers for housing records the greater the quantity of records you will sell.

Look carefully at the cabinet.

It invites you to fill it, in fact, you cannot resist the temptation to fill it. No matter how many sections are bought there will be empty compartments and these are always in sight, inviting you to fill them, and the records too are always in sight, inviting you to play them. Any record is so easily found and quickly replaced that this cabinet adds an extra charm and fascination to the playing of records.

Suppose each of your customers had this cabinet and you had a sample on your salesroom floor to remind them to buy additional sections. Not only would the sale of the cabinets increase but what a tremendous increase in the sale of records would result and there is excellent profit in the sale of both.

Each section has 90 compartments numbered consecutively from 1 up. Globe-Wernicke Catalogue No. 317 T W describes and illustrates these goods fully.

← No. 351 Art-Mission Top.

← No. 0328 Art-Mission Disc Record Section for ten-inch records.

← No. 0328 Art-Mission Disc Record Section for ten-inch records.

← No. 0329 Art-Mission Disc Record Section for ten- and twelve-inch records.

← No. 357 Art-Mission Base.

Section by section it grows with the growing record library.

C. K. BENNETT HEADS OHIO ASS'N

Manager of Eclipse Musical Co. Elected President of Talking Machine Dealers' Association of Northern Ohio—Annual Banquet of That Organization to Be Held on February 20

CLEVELAND, O., February 2.—At the recent annual meeting of the Talking Machine Dealers' Association of Northern Ohio, held in this city, Charles K. Bennett, manager of the Eclipse

Charles K. Bennett

Musical Co., Victor distributor, was elected president for the year 1918, with H. E. Roos, of the Columbia Graphophone Co., vice-president; James Card, of the Lakeside Music Co., secretary; A. L. Maresh, of the Maresh Piano Co., treasurer, and E. B. Lyons, of the Eclipse Musical Co., recording secretary.

The annual banquet of the association will be held at the new Hotel Winton on February 20, and the program on that occasion will be an elaborate one. Among the speakers will be Henry C. Brown, assistant to the general manager of the Victor Talking Machine Co.; J. Raymond Bill, associate editor of The Talking Machine World, and a representative of the Columbia Graphophone Co. An autographic message from Thomas A. Edison is also looked for.

KEEPING SHOW WINDOWS CLEAN

Those who are located in regions where the illuminating medium is natural or artificial gas have experienced considerable difficulty with a peculiar greasy deposit on plate glass windows, which gives to them a bluish appearance regardless of the amount of energy expended in the cleaning. If after having followed the ordinary procedure of cleaning a piece of glass, a small sack be made of coarse cheese cloth and filled with lamp black and the glass thoroughly polished with this and then polished with a clean cloth, it will assume a brilliancy unobtainable by any other means.

TALKING MACHINE AT THE FRONT

Major H. H. Noyes, Who Formerly Traveled for W. D. & C. N. Andrews, Buffalo, Writes of Experiences With Pershing's Army in France —Asks About the War Sentiment Here

BUFFALO, N. Y., January 21.—"The Frenchman warms himself by suggestion. He builds a fire in the fireplace and so long as he can see a small blaze he is content."

This was one of the many interesting comments of life in France by Major H. H. Noyes, who traveled in the Buffalo territory for W. D. & C. N. Andrews of this city for five years. Major Noyes is now serving his country in France. He is with Pershing's army and an interesting letter from him was recently received by Mr. and Mrs. C. N. Andrews.

Referring to the subject of heat Major Noyes said: "We are different. We build a fire and put in a good-sized chunk of wood for a back log and really get some heat. We bought wood at about \$14 a cord. Coal is a luxury. If one has a piece of hard coal he wears it on his finger in place of a diamond. The houses here are cold and have no furnaces.

"The weather here is so rotten that I cannot wax very eloquent over the scenery. There are wonderful roads and lots of woods, which are mostly planted. Conservation is a religion here. They plant trees which they are not allowed to cut for thirty years or more.

"We eat, sleep and work war, but still you

folks know more about the war than we do," continued Major Noyes. "We are concerned with our own particular little world and have our hands full. Would be glad to learn the mental attitude of the people in the United States. Are they taking this war seriously or not? They should and the pacifist and slacker should not be allowed to sport and exhibit their views, for they are a menace. The pacifist is the worst enemy we have—worse, in fact, than the boche, and that is beyond one's comprehension. I have personally seen things over here on my trips to the British and French fronts that make one wonder whether or not civilization is more or less of a myth.

"One group of German prisoners wouldn't believe the American army was here. They thought we were British dressed in the uniform of the U. S. A., just to impress and mislead the Germans. A German prisoner, who had lived in America for several years, said to one of our men that the entrance of America in the war would make no difference. He also said that although we might get a few men over casually, a U. S. troop ship would never reach Europe. The funny part of this is that while he was talking a big fleet of transports was steaming in and he hadn't noticed them. When his attention was called to the fleet and he was told it was one of several already landed, he looked dazed for a minute and then turned away—licked."

Do your bit—but don't talk of it beforehand!

Talking Machine Aids Piano Technicians In the Study of Tone Composition

There is in Chicago a group of technicians in the piano trade who meet at regular intervals and discuss scientific matters relating to the designing and construction of pianos and the development of tone with a view to finding some means for improving their product where possible. A recent meeting of the technicians was devoted to the study of tone composition, and of particular interest from the viewpoint of this industry was the consideration which was given the talking machine, which helped to illustrate many points in the discussion.

In his opening remarks F. E. Morton, acoustic engineer of the American Steel & Wire Co., the chairman, said: "A knowledge of acoustics may be had by any one who can hear. In instruments and voices we learn to recognize certain combinations of those partial tones making up the entire tone and without specific analysis we hear a sound and say: 'That is the sound of a cornet or the sound of John's voice.' When we understand why we can tell one sound from another the pleasure of hearing and comprehending is multiplied. There is not a sound that you hear during the day that is not interesting from a scientific viewpoint. The fact that a sound may be reproduced, whether the characteristics are quite the same or not, is a matter of tremendous interest from the days of the little cylinder with the tin-foil around it up to the present day when the sound and reproduction are so nearly identical. That it is not exactly the same in quality as recorded is obvious to the listener. I have more respect for the talking machine now that I know its limitations than I had before I learned them. I also know more of its possibilities. I want to explain briefly for your direction in listening that first we will hear the natural voice and then the reproduction of that voice on this talking machine. The recording studio is a factor. Any room is a reverberating chamber and hence there are echoes.

"The diaphragm of the recording instrument possibly has a better ear than we have and the echo is recorded. The better the reproduction the more obvious the echo. The voice energy enters a receiver—a horn. That horn has a certain number of cubic inches of air which determines its pitch. The column of air vibrates more intensely in response to its own keynote than to any other. The horn material also responds with a greater degree of intensity to its own keynote, which may or may not be the same as the column of air contained. The diaphragm also has its keynote to which it responds with a quality peculiar to flat bodies. It responds to odd numbered high partials with greater intensity than to other partials. In the reproducing the process is reversed and the same conditions obtain. If the reproductions were made by the same diaphragm through the same horn and into the same room as that in which the record was made each augmented partial would be doubled. If reproduced through another instrument having another horn of different cubical content, a different keynote of horn material, a different keynote of diaphragm, other odd numbered higher partials would be augmented as would also the reverberation in the room. And so it is that we have a number of sounds foreign to the one to be recorded.

After very many repeated experiments there is no doubt in my mind that a talking machine record of a banjo number gives a better banjo tone than the banjo itself. The same is true of the xylophone. Those partial tones characteristic of the banjo and xylophone are the ones augmented. There are certain voice qualities which are improved by recording and reproduction. There are other voices and instruments which are not improved, but all are changed.

With a knowledge of that change we have no difficulty in appreciating all.

"You recognize another's voice but it is doubtful if you would recognize your own voice recorded and reproduced. Let us go back to our accepted piano tone composition, having a relative intensity of 50 per cent. in the fundamental and the other six partials in sequentially decreasing intensity until only a trace of the seventh is audible. A heavy stroke on a piano key brings out partials to or above the twenty-

"Talking Machine Demands the Respect of Practical Acousticians"

fourth. By means of the resonators they may be heard.

"The horn material and the diaphragm are loads carried by the talking machine and constitute its limitations. If these loads were eliminated a true reproduction would remain. Break a talking machine record and with a microscope observe the track of the needle and you will find there truly recorded all the tone it was given and more, because it recorded the vibrations of part of its own material."

"It is not a limitation of failure to record but of faithfulness. If a horse hauls a wagon weighing a ton and the contents weighing one-half ton the limitation cause of hauling capacity is the weight of the wagon, or one ton. The horse hauls both. I am not criticizing the talking machine. It is a wonderful instrument. E. H. Rose will now sing for us, alternating with his own record on the talking machine as a demonstration."

Mr. Rose (Prince Lei Lani, Hawaiian tenor)

sang "Pua Sabinia," "Aloha Oe" and the "Rosary" (Schumann-Heink), taking one period with his voice, the next with the record and so on throughout the number.

"Applying the same theory to the reproduction of piano tone," remarked Mr. Morton, "I confess I spent many hours trying to find the cause of some apparent distortions. I couldn't understand why a piano record sounded so much like a cross between a banjo and a xylophone. The limitations are not failure to record or reproduce, but are caused by other partials, other tones. In volume I think we could approach very closely the volume of the original instrument. The augmented partials would become more obvious than in the talking machine of smaller tone chamber, or horn. We can't magnify the good without magnifying the evil. The relative intensity of partials contained in a tone determines its quality. If that relative intensity is disturbed the quality is changed. The mere increase in intensity of one partial above its normal degree would change its quality and this factor, as I have already mentioned, would account for its distortion. It is wonderful that we get as true an effect as we do with that handicap. If you have a nasal-toned piano, with odd numbered high partials, you put your tone regulator on the job, expecting him to make a perfect-toned piano. When such tones appear on a talking machine record we are apt to condemn the talking machine. By the collaboration of the piano manufacturer and the talking machine manufacturer that fault may be eliminated. We are fortunate in having the assistance of Mr. Harold Triggs, who will play for us. We will then have the reproduction of this number on the piano itself—an instrument not yet on the market, a Brambach electric player grand—and reproduced by the autograph roll, then reproduced on the talking machine." Mr. Triggs played "The Polonaise Militaire," which was then reproduced on electric player grand.

Mr. Morton (at talking machine): "I am playing a certain sustained portion of the composition over where the echo occurs. It is in effect not unlike a 'shake' which follows what

(Continued on page 18)

Phon d'Amour

THE TONE MASTERPIECE

TO realize the wonders of the Phon d'Amour you must see it, examine it, hear it play and compare it. To read a list of adjectives about it is not enough. Come to our showrooms. Let us explain the remarkable Fritzsches inventions, the reproducer, the wooden diaphragm, the sound amplifier. Then inspect the Fritzsches craftsmanship that has given to every Phon d'Amour the enduring value of a fine violin.

And last of all hear the Phon d'Amour play—any record of any style or make. Listen to its glorious tone production. Note how it exalts the finest records and eliminates imperfections from less worthy ones. Compare the Phon d'Amour with any other phonograph. Then you will appreciate that here indeed is an epoch-making instrument and that to be satisfied with any other phonograph is to be content with something less than the final, ultimate achievement in phonograph making.

You are invited to see and hear the marvelous new phonograph that has set a new milestone in musical progress

“What would you like to hear?”

No matter what musical taste may be expressed in the customer's reply, the Columbia salesman can meet it.

Popular and patriotic songs, opera, plenty of Columbia's own unequaled dance music, sparkling gems of violin and piano, the grand harmonies of a great symphony orchestra, brass band music—all are to be found in Columbia's offerings for March.

Artists? The assemblage includes Stracciari, Lucy Gates, Godowsky, Eddy Brown, Vernon Stiles, Oscar Seagle, Mme. Miura, Al Jolson, Samuel Ash, Gene Green, Brice and King, Greek Evans, Henry Burr, Arthur Fields, Malachy White, Charles Harrison, Collins and Harlan.

As for the new and novel—there are two splendid features. The first of the Thornton Burgess Bedtime Stories, told for Columbia kiddies, in the author's own voice, are “Johnny Chuck Finds the Best Thing in the World” and “The Christmas Joy of the Beautiful Pine.” Lacalle's Spanish Orchestra makes its Columbia debut with “Alegrias” and “Los Crotalos,” two mad dances from the sensational New York musical success “The Land of Joy.”

We've given you just an idea of the good things in this March list. Examine it in detail, and you will realize its surpassing excellence.

Let one Grafonola sell another

Columbia music is always good music, whether the Grafonola on which it is played costs \$18 or \$250.

People buy Columbia Grafonolas in order to enjoy Columbia music. The wise dealer's first aim, in making a sale, is to sell Columbia music. He is not over-anxious that the Grafonola purchased be an expensive model.

He knows that many a home hungry for good music is not yet ready to purchase a Grafonola of the more costly type. But such a home has a place, today, for the model at \$18, or \$30.

The dealer who sees that this want is met has made two sales. The inexpensive instrument will establish the enjoyment of Columbia music, and some day there will be an exchange for a higher-priced model—with a second profit.

HOW THE TALKING MACHINE AIDS PIANO TECHNICIANS

(Continued from page 15)

sounds like a 'plucked' tone. It is not improbable that this results from the reflection of energy by the walls of the studio, and that this 'shake' is really an echo. You could build on the tone of a piano almost any combination by addition. The upper part of the register is much better than the lower."

"Now note particularly the difference in the lower and upper registers (demonstrating). From about middle C up the tone more nearly approaches the tone of the piano. From middle C, the farther down the less fundamental is observed. Mr. White has expressed just what I wanted to bring out and with that this point: Analyses have been made of the tone of the various parts of the piano scale. By means of the phonodeik it was determined with whatever degree of correctness the instrument might show, that the low notes—wound strings—had very little fundamental. If I recall, down in the next to the last octave there was barely a trace of the fundamental. That seemed unreasonable to me because we can determine the pitch of those notes, and it is the fundamental which determines the pitch. A possible explanation might be that the 'taps' on the atmosphere are less frequent at a point where there are only sixty-four vibrations per second than two octaves higher when there are 256. When the rate is only sixty-four per second the intensity, or rather carrying power, is not so great as in the upper register. At the same time I have a strong impression that, given a piano of such size that bass strings of correctly proportioned length and pliability may be used, the recording diaphragm will respond with sufficient intensity to influence favorably the reproduction. If we get a stronger fundamental with a long pliable bass string than we do with a short stiff one, it would be fair to assume that a balance of tone would result, and also that any company making records would be glad to pay the price for a piano that would improve the reproduction."

After considerable discussion on the question of piano tone, and the necessity of having a long string in order to produce the desired fundamental tones in the lower register, the question of reproducing music on the talking machine again came up, and it was agreed that much of the trouble lay in the diaphragm, as it is difficult if not impossible to design a diaphragm that would be suitable for reproducing very rapid vibrations or very slow ones with

equal faithfulness. For the diaphragm would respond to its own keynote with a greater intensity than it would to that of another pitch.

In the course of his discussion Mr. Morton offered some interesting suggestions regarding the recording of voices. "I suggest to those making records of male quartets," he said, "that the second bass be placed closer to the horn, the first bass a little farther, etc. It would rid us of the predominant tenor and give us the grateful fundamental.

"I feel that the public will be much more interested in all records having full strong fundamentals, however produced, than they will in the average present records, both orchestral and vocal. If those in charge of studios will understand that when the public says: 'This is a good and this is a poor tone' and we analyze both it will be found that the one which the public says is good has a dominant fundamental and the one which the public says is poor has little fundamental, they will effect a grateful change."

"I would like to ask what instrument records sell most readily to the public," asked one piano man, to which E. H. Rose replied: "'Cello, violin and harp records."

"There are some very excellent tones reproduced," declared Mr. Morton, "but their relationship is distorted. Take two violins, viola and 'cello. The 'cello is usually too light. We glory in a passage where it comes out strong. We like to hear a male quartet with a good substantial second bass. To determine in a flat vibrating body the true pitch—the fundamental—you can use this instrument known as a phenendoscope. You can locate sounds foreign to the desired tone in your piano, vibration of case, plate, etc. When you get through with it you can put it on your car and locate engine trouble. It is an aid to listening and any aid to listening is very well worth while. And now, to return to the talking machine, the diaphragm being flat and vibrating in odd-numbered segments, the attempt has been made to crown it. Just as soon as you near the arch you approach the unresponsive. It has too much resistance. It is not practical. Some day we will get away from the diaphragm entirely. The horn idea will never be entirely satisfactory as a true recorder or reproducer. The horn idea, or tone chamber, is distorting.

"In the meantime we have records to-day that couldn't be replaced by any other means. Think

Read the Trade Mark carefully—
hear the machine, and you'll agree
that it is truly

The World's Musical Instrument

Improves All Records
Send for our Special Proposition

HOFFAY TALKING MACHINE CO., Inc.
3 West 29th Street New York City

what the record of ancient history would mean in our talking machine studios to-day. Think of some of the great speeches by Roman senators handed down for us to-day as phonograph records. If there is anything on earth that should be encouraged it is the talking machine industry and everything pertaining to it. Give it its proper place. It has a big place and is one which will redound to our glory if we back it up strongly. The talking machine doesn't take the place of the piano. It never will and never can. The reproducing piano probably is the closest we can come to-day to a reproduction of an artist's work. The gradations are not as fine as we would like to have them, but we are progressing."

SOME GOOD PUBLICITY IN DENVER

C. B. Wells, Publicity Manager of Knight-Campbell Music Co., Gets Interesting Story on Music on Farm in Representative Papers

DENVER, COLO., January 19.—C. B. Wells, manager of publicity for the Knight-Campbell Music Co., is doing some excellent work in the interests of music and musical instruments generally. Only last week he succeeded in having printed in the Weekly Rocky Mountain News an interesting story on "Music Greatest Asset of the Country Home," the writer being Burt Wells himself, lover of music, cowman by experience and inclination, farmer by pre-natal instinct, by the grace of God a penpusher. The story told of the lonesome hours spent by women on farms and ranches far from the center of things and how music provides enjoyment in the evening for all hands. Of course the Victrola and the player-piano were referred to particularly. In addition to having the story in the Weekly News, which reaches about 25,000 country homes, it also appeared in the annual stock show souvenir edition of the Record Stockman, which circulates in a vast territory in the West. The story was accepted at its face value and cost the Knight-Campbell Co. nothing, although in fairness be it said that the company's name did not appear throughout the article. Mr. Wells is of the opinion that the same idea could be worked out profitably by piano and talking machine men in other sections of the country.

ASSOCIATION DUES NOT TAXABLE

War Tax Law Held to Apply Only to Social and Athletic Organizations

WASHINGTON, D. C., February 5.—Commercial organizations, even though they have social features, are not subject to the war tax, according to a ruling just issued by the Commissioner of Internal Revenue. The Commissioner ruled:

"Particular attention is called to the fact that the tax is imposed only upon dues or membership fees, including initiation fees, paid to any social, athletic or sporting club or organization, where such dues or fees are in excess of \$12 per year. The tax does not attach upon dues paid to chambers of commerce or other business organizations primarily organized and maintained for the furtherance of business interests. Such organizations may have social features without incurring liability to tax, provided such social features are entirely subordinated to the predominant purpose of the organization."

NEW INCORPORATION

The Audion Phonograph Co., New York, has been incorporated, with a capital stock of \$5,000, by A. LaGattuta, V. Himmer, Jr., and W. L. Sawyer.

The successful venture anchors to an achieved success, no matter how minor or humdrum the job was.

TALKING MACHINES VALUED BY SOLDIERS AT THE FRONT

Some Interesting Facts in This Connection Set Forth by Junius B. Wood, a War Correspondent Who Tells of the Joy They Bring in the Hospital and in the Camp

What a talking machine and even a limited supply of records means to the soldiers at the front, and particularly in the military hospitals, was set forth recently in a graphic manner by Junius B. Wood, who, writing for the New York Globe, said:

"In a certain unnamed spot a few miles back of the French front are the long one-story frame barracks of a regiment of American railroad engineers. These buildings, with those of a French hospital, near which is a cemetery that is daily growing larger, form a mushroomlike military city. Day and night the Americans take trains up under fire and return to sleep and rest in the barracks.

"Every morning, and sometimes oftener, according to how the fighting goes, they bring in a long train which stops at an equally long platform, while its load of helpless, suffering and bandaged humanity is carried into the wards of the adjoining hospital. Each one who is more seriously wounded is taken farther to more comfortable and better equipped permanent hospitals in Southern France. The wounds have been bandaged in the temporary field dressing stations, but only in a few cases has there been an opportunity to wash off the dirt of the trenches before the patients are hurried to this evacuated hospital. Then starts the fight to fan back the flickering flame of life.

"In that war-born city is one phonograph. Grand-opera singers, amusing actors and entertaining speakers do not come to that hospital in the war zone. A single box of "canned music" is all they have to relieve the monotony of the puffing locomotives, the stifled groans of their fellow wounded and their own gnawing pain. Occasionally German bomb-dropping machines seem reluctant even to permit these fragiles of humanity to escape.

It Is Never Silent

"One thoughtful New York mother sent this ray of brightness to her son, a captain in a railroad regiment. He turned it over, records and all, to the hospital so that all might use it. Now it is never silent day or night until taps sounds. Early in the morning it starts on its rounds through the hospital wards and by evening it reaches the Y. M. C. A. hut and finishes the night on a rough pine board table in the officers' quarters grinding out the old, familiar homesick tunes.

"Occasionally when work is slack the owner goes himself to run the machine. Here is his description of a Sunday afternoon in that strange city of the ill:

"I spent an hour and a half playing the machine in a ward where two men carried in the records. There were from sixty-five to seventy-five men in the ward. Some were suffering from pneumonia and still others were terribly burned by mustard gas. Nearly half of the remainder had not seen daylight for a long time. All eyes seemed to be bandaged and there was an everlasting coughing.

"I started off with the "Marseillaise" and every last man who had an ounce of strength left in his system sat up on his cot at salute and tried to raise a bandaged hand if one was left. After that we had some American marching songs, comic opera, grand opera, and everything left on the worn-out records.

Records Nearly Worn Out

"We have used these records until they sound like the proverbial tin can. I wrote to America a couple of months ago for more, but they never materialized. The machine works all day in the hospital and we use it only when the patients have gone to sleep. It would be a calamity if they were deprived of its solace."

"For military reasons I am not permitted to give the name or location of this American regiment which, in addition to its war work of carrying forward ammunition and supplies and bringing back the wounded and dying, is also spreading the Good Samaritanism of music. How-

ever, anybody who wishes to answer the appeal can send records to me and the American post-

GRAFONOLA IN MOTION PICTURES

Release to Be Made Shortly Will Feature Mae Murray and the Columbia Grafonola

The Universal Film Mfg. Co. will shortly present a new picture entitled "The Eternal Columbine." The star in this film will be Miss Mae Murray, one of the most popular and successful motion picture actresses now appearing

Miss Mae Murray and the Grafonola

before the public. A Columbia Grafonola plays quite a part in this new picture, and the accompanying photograph presents a scene in which Miss Murray and the Grafonola occupy the center of the stage.

C. F. Paige & Co., Athol, Mass., have fitted up a special room in their store to house the Victrola department, the business of which is increasing steadily.

office here will see that they are delivered. Anything in the line of music is a balm in the ears of the wounded, even of the French Poilu, who does not understand English. Send all you can and what you can in care of Junius B. Wood, war correspondent, American Expeditionary Force in France."

IMPORTANT FACTOR IN CREDIT WORK

How Good Correspondence Can Be Utilized Effectively in Cleaning Up Bad Accounts

Is the art of letter writing lost—an art than which there is none more important for effective credit work? We must lead men to understand that there can be no more expensive neglect than failure to appreciate the value of good correspondence.

The question arises, what is a good letter? This is a question difficult to answer. Surely, a letter should be neither too brief nor too long, yet thorough so that all points are covered. No important part of the subject under consideration should be neglected. The letter should be courteous, yet, as was expressed by a thoughtful credit man in a recent state conference, it should not "slop over." Fulsomeness is bad and creates a strong suspicion; but the proper expression of courtesy is one of the strongest features of good correspondence.

The letter should aim to accomplish its purpose without offense, leading rather than driving men, and yet sometimes it may happen that the best purpose of a letter may be accomplished if the party addressed is offended temporarily, because, as the editor of The Credit Man points out, some men never awake to a serious situation unless first made angry.

The unnecessary letter should never be written—the necessary letter never neglected—there should be careful thought given to each communication, for merely setting down in a moment of heat without digesting the real purpose and necessities of correspondence will fail of its purpose in the majority of instances. By the digestive process, the exercise of careful thought, the holding in mind of the purposes that are to be accomplished, a letter can perform a wonderful service, be a driving power and bind men together who otherwise would have no points of contact.

Letter writing is a neglected art, yet, by restoring it and making correspondence the subject of careful study and thought, we shall have accomplished much in making this work effective.

E. H. LANSING
611 Washington St., BOSTON

SAN FRANCISCO OFFICE, Room 530 CHRONICLE BLDG.
WALTER S. GRAY, Manager

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, Mass., February 6.—It is of special interest that, despite general conditions, the month of January proved to be a far better month for most of the dealers than they had looked for. Most of them were able to show a business fully up to that of a year ago, while others went considerably ahead of January of 1917. This is doubly interesting in view of the fact that the business day is now shorter by one hour and there is a whole day, Monday, taken out of each week in deference to the request of the fuel administrator, which for the month has considerably shortened the hours, although the Monday closing did not really begin until the middle of the month. For the current month the situation will be worse, for there will be four Monday shut-downs and Washington's birthday, and all in the shortest month of the year. It will be interesting to see how the period will show up.

One good business asset just now is the demand for machines and records that comes from the Navy Yard, the forts down the harbor, Camp Devens at Ayer, and other places where soldiers and sailors may be stationed. The immense quantities of second-hand records that are sent away of course do not affect the dealers, but there are in addition a large number of records that are bought and sent away by friends. This is a most appreciable aid to business.

Oppose Instalment Plan of Doing Business

The trade is interested in the position lately taken by the Retail Credit Men's Association at a meeting held at a Boston hotel, when a resolution was passed abolishing the instalment plan of doing business. The reasons given for taking this attitude were that conservation is the watchword in the present crisis; that with the increase in the cost of merchandise a proportionate increase in capital becomes necessary; that it is neither wise nor economic to tie up large sums of capital in this form of credit; that it is essential to the national welfare to keep capital liquid, and therefore that all goods sold on credit be paid for on the first of the month following the date of purchase and in no case beyond thirty days from the date of purchase. A copy of this resolution was submitted to the Boston Chamber of Commerce for action by that body.

Fifty Victor Machines for Camp Devens

Herbert L. Royer, who has a well-appointed

Victor and Sonora shop in Chauncy street, a few feet from Summer street, is being congratulated by his friends on having successfully completed a deal whereby more than fifty Victor machines are soon to be sent to Camp Devens at Ayer. The purchase was made by a committee headed by Francis H. Spalding, which is interested in supplying music for the boys in camp. The money was largely secured by sums being raised from the proceeds of the sale of a large flag, which was made by Mrs. Martha Pierce Chute of Cambridge and Manchester. With these machines Mr. Royer was able to sell nearly 300 records. The outfits are to be distributed among different companies at the camp.

Dealers' Co-operation Service

Earl J. Silliman, who was transferred a while ago from the Vermont territory of the Columbia to the Boston wholesale headquarters, has been put in charge of the new record demonstration room where dealers, especially those from out of town, who are not familiar with all the details of good selling, may be coached. It is what might be called dealers' co-operation service.

Magnificent Display of Brunswick Phonographs

The dealer not acquainted with the line of phonographs carried by the Brunswick-Balke-Collender Co., at 94 Washington street, will be really surprised at the display which is on the second floor of the building. R. H. Booth is in charge of this phonograph department, and he has two men constantly in the field presenting the merits of the Brunswick machine, F. H. Walter and E. S. Campbell, who have between them all of New England with the exception of Connecticut, which is handled from the New York end. There is A. J. Kendrick besides, who is the district manager, with headquarters in Boston, and between these three live wires the Brunswick is getting a good showing in this field. There are several new styles of Brunswick machines soon to be put on the market which are sure to interest present and prospective agents.

Branching Out Into Larger Fields

R. S. Hibshman, manager of the Aeolian Vocalion, says that the business during January was good, all things considered. This house has begun to branch out into larger fields and to establish wholesale accounts around the city. The large department store of Magrane-Hous-

ton Co. in the downtown retail section has contracted for the Vocalions, and at the present time there is a good display in one of the large Washington street windows. This wholesale end of the business has been placed in charge of C. C. Westervelt, who has been with the Emerson Phonograph Co. J. F. Meade, the treasurer of the concern, who makes his headquarters in New York, was a Boston caller a short time ago.

Takes Charges of Victor Department

The Victor department of the Henry F. Miller Co. is now in charge of P. R. Smith, who has lately assumed the position. Mr. Smith has had a good experience in the phonograph business, for he was Thomas A. Edison's personal representative for some time and as such was called upon to go into many territories to straighten out knotty business problems facing the Edison dealers. Lately he has been in the employ of the United States Government.

Generous Action of A. M. Hume Co.

A space in the A. M. Hume Music Co.'s Victor warerooms has been generously donated to the Greater Boston Women's Committee, and authorized by the National War Work Council of the Y. M. C. A., whose purpose is to provide music and other forms of entertainment for the soldiers and sailors. Members of this committee are at the Hume warerooms for three hours each day and the Victor proposition is one that especially appeals to them as a desirable form of music.

Reports an Excellent January Business

Manager Fred E. Mann of the Columbia Graphophone Co. makes a most encouraging report of the January business just closed and says that while the demand for goods was naturally light at the beginning of the month, there was considerable speeding up as the days wore on, so that the sum total was considerably in advance of the January business last year. Manager Mann was over in Springfield a while ago looking over the territory and arranging to give that field as good service from the Boston end as it formerly had when there was a local headquarters in that city.

M. C. Perkins, who is now assistant to Mr. Mann, since the closing of the Springfield quarters, is rapidly making good in his new line and he is fast familiarizing himself with his new work, which for the time consists

Habits Have to Grow

For several years past Eastern Victor Service has made a specialty of speeding up the record end of the Victor business.

We have therefore contracted the *good habit* of giving the Victor dealer efficient record service.

EASTERN TALKING MACHINE CO.

177 TREMONT STREET

BOSTON, MASS.

THE TRADE IN BOSTON AND NEW ENGLAND—(Continued from page 20)

largely in perfecting the service stock department where several new men have had to be taken on owing to the demands which the draft has made upon the local Columbia employes.

Pleasant Surprise for Billy Fitzgerald

Wholesale Manager Billy Fitzgerald of the Eastern Talking Machine Co. got a pleasant surprise a few days ago, when he received a package which, upon being opened, brought back vividly to his memory an incident which happened back last summer when he played the part of lifesaver. A woman was crossing Tremont street almost in front of the Eastern establishment when she got mixed up between several teams and she was in danger of being crushed when gallant Bill rushed to the scene and dragged the frightened woman to a place of safety on the sidewalk. The gift was accompanied by a card which spoke the appreciation of the woman.

Tells Story of Progress

Business throughout the Edison territory handled by the Pardee, Ellenberger Co., Inc., is reported as excellent by Manager Frederick H. Silliman, but the staff of traveling men who have Northern Massachusetts, Maine, New Hampshire and Vermont as their fields have interesting stories of the amount of snow to be found in that territory these days.

Announce New Sonora Agencies

Joseph H. Burke, who is associated with Richard Nelson in the local management of the Sonora Phonograph Co. has been doing some telling work lately, and one of the good-sized deals which he lately put through was the placing of the Sonora agency with three of the Blake Co.'s large piano houses at Lynn, Attleboro and Pawtucket, R. I. The local management also reports that the large Springfield house of Forbes & Wallace has lately taken on the Sonora line. Both Mr. Nelson and Mr. Burke were in Hartford, Conn., lately in attendance on the salesmen's convention, when plans for the current year's business were considered from every angle.

Franz-Yahn Service Tells of Progress

The wholesale department of the Columbia Graphophone Co. is highly gratified over the volume of business which is being done by F. E. Yahn, who is head of the newly organized concern known as the Franz-Yahn Service, which maintains departments in the Poole Dry Goods Co. in Springfield, the Steiger-Cox Co. at Fall River and the Steiger-Dudgeon Co. at New Bedford. Mr. Yahn maintains an exclusive Columbia department in the Springfield establishment, and in arrangement and volume of goods displayed it makes one of the best show-

ings to be found anywhere about. Mr. Yahn has been in the talking machine business for several years and at one time was connected with the Springfield warerooms of the Columbia, and he is well informed with every phase of the business.

Doing Good Business in Lowell

Thomas Wardell, a Lowell dealer in Victor and Edison outfits, was a caller on Boston dealers a few days ago, in fact he comes up here frequently to buy goods. Mr. Wardell bought out the Ring Piano Co. in Lowell a couple of months ago, and has been meeting with good

success especially in his talking machine line. Mr. Wardell has had considerable experience on the stage and is full of interesting reminiscences. He is a veteran in the talking machine business, having been one of the early dealers in the days when the cylinder records were the only thing to be had.

Some of Our Distinguished Visitors

Visitors on the Boston dealers lately have included H. L. Tuers, manager of the Columbia's national dealers' service department, who came to Boston to take his examinations for the

aviation unit, which by the by he passed most successfully. Another caller was L. L. Spencer of the Silas Pearsall Co., a Victor jobber in New York, and H. M. Blakeborough, manager of the New Haven branch, who was in town for two days.

Joins the Nation's Service

The Eastern Talking Machine Co. has lately lost three more of its men, who have gone into the nation's service. They are John Maguire, who is in the Naval Reserve and is stationed at Hingham; Bernard Finnegan and Byron Corcoran, who are with the railroad engineers at Camp Devens.

Patriotic Atmosphere at Steinert's

The windows of the Arch street store of the M. Steinert & Sons Co., are full of a patriotic atmosphere for February, which month is so full of reminders of the two great men of the nation, Lincoln and Washington, whose birthday anniversaries come within these four weeks. In one of the windows, which is the happy conception of Robert Steinert, the manager of the talking machine department, is a liberal display of red, white and blue. In the center on a pedestal is a large bronze eagle from whose beak radiate streamers of the national colors.

PORTSMOUTH BUSY TALKER CENTER

J. M. Hassett Getting a Good Share of Trade From the Sailor Boys

PORTSMOUTH, N. H., February 2.—Joe M. Hassett has one of the busiest places, at 115 Congress street, that there is in the city. His establishment is one that formerly was operated by Fred W. Peabody, who conducts a chain of successful stores. The one in this city Mr. Hassett purchased some time ago and he has made a marked success of it from the start.

Just now he is getting a good share of business from the boys at the Navy Yard, where many men are coming and going all the time. Mr. Hassett carries the Victor, Edison and Columbia lines of machines and of these he keeps a large stock always on hand. He has a large number of friends in the business who never pass through the city without making a stop at his place for a handshake.

The object of advertising being to make public one's goods with the view of effecting sales, a dealer must first decide if he has the goods the people want, and then, how to apprise them of the fact.

There are standards of colors and President Wilson's picture finds a place in the arrangement, together with likenesses of Washington and Lincoln. Several high-priced Victrolas are in the window. The opposite window is more largely given over to a display of records and this, too, carries out the patriotic idea.

R. O. Ainslee Remains in Boston

When R. O. Ainslee came to Boston to attend the wholesale men's convention of the Hallet & Davis Co.'s Boston local warerooms it was to remain here, and make his home permanently in our midst. Mr. Ainslee came from Chicago, where he was in charge of the phonograph department of the Hallet & Davis house in that city; and coming here he is now occupying the same post. He will give all his attention to the wholesale end of this branch of the business, and as a man of considerable experience he promises to make good. The department will now be built up considerably, for Mr. Ainslee is a man of ideas and understands the art of developing business.

Joins the Naval Reserve

William McAuliffe, of the record department of the Columbia Co., is the latest of the staff to join the colors. A few days ago he reported at Hingham as a member of the Naval Reserve. He is the fifth one from that Columbia department to enter the service.

EDISON THRIFT STAMP CLUB FORMED

Employees of Edison Laboratories Form Organization for the Purpose of Encouraging Sale of Thrift Stamps to Help the Nation

The Edison Thrift Stamp Club was organized at the Edison Laboratories, Orange, N. J., late last month. The meeting was presided over by Charles Edison, who briefly outlined the purposes of the club, and was followed by Mr. Durand, manager of the Ediphone division, who explained the plan of the sale of Thrift Stamps to employes in full detail. Mr. Mambert, vice-president and financial executive; Mr. Wilson, vice-president and general manager, of Thomas A. Edison, Inc.; Mr. Philips, credit manager, also of the Thomas A. Edison interests, and Mr. Bachman, vice-president and manager of Edison storage battery, assisted in the organization work.

The object of the meeting was to bring together all captains and stamp station attendants for the purpose of outlining the plan and scope of the club.

A captain has been appointed from each department of the organization for the purpose of selling stamps direct to employes. The captains secure stamps and thrift cards from the

stamp stations and turn in all pledges, money and surplus stamps to the stations every night, the attendants of which in turn send all returns to the treasury service department, presided over by Harry Miller, treasurer of Thomas A. Edison, Inc. Upwards of one hundred captains and stamp station attendants were at the organization meeting.

The method of operation is as follows: The captains present a pledge card to the employes on which they pledge themselves to purchase at least one 25-cent thrift stamp per week. The captain sells the stamps direct to the employe

Mr. Edison With Thrift Card

and takes the money for them, which he turns over to the station attendant. The employe then receives a United States Government Thrift Card on which the stamps are pasted.

An effort is being made to have 100 per cent. of the employes purchasing thrift stamps regularly every week. In spite of the fact that many Edison employes are still paying on Liberty Bonds, the Thrift Stamps have very readily been purchased by the large army of Edison employes. Herewith is shown a picture of Thomas A. Edison holding in his hand a Thrift Card with the first Thrift Stamp purchased through the Edison Thrift Stamp Club attached.

Tie the new to the old. Capitalize your tried-out knowledge rather than fancy's rainbow pots.

The Eclipse Outlook

ECLIPSE

The 1918 outlook is extremely bright for the Victor dealer who goes about his business, spurred by the knowledge that the war chiefs are placing increasingly heavy emphasis on the war value of music in general and of the Victrola in particular. During 1918 patriotic inspiration will add increased ginger to "Eclipse Victor Service". 'Nuf said!

ECLIPSE MUSICAL COMPANY
CLEVELAND OHIO

FIXED PRICE ARGUMENTS BEFORE U. S. SUPREME COURT

Trade Interested in Arguments Made Before U. S. Supreme Court in Appeal of the Boston Store, Chicago, From Injunction Enjoining It From Selling Columbia Records at Cut Prices

The appeal of the Boston Store of Chicago from the injunction granted by the United States District Court in Chicago in September, 1915, enjoining it from selling Columbia records at cut prices was argued before the United States Supreme Court recently. The case came before the Supreme Court upon a certificate from the United States Circuit Court of Appeals in and for the Seventh Circuit.

It appears from the certificate that the appellant, the Boston Store of Chicago, entered into an agreement in writing on October 15, 1912, with the Columbia Graphophone Co., acting as the agent for the patentee, the American Graphophone Co., under the terms of which, among other things, the Boston Store agreed to maintain prices on the Columbia product. Subsequent to entering into the contract the Boston Store secured a stock of Columbia records and prior to the filing of the suit had sold at retail to the public the records which it had thus obtained, at prices less than the Columbia Co.'s official retail list prices. The records in suit were covered by United States Letters-Patent.

It was contended on behalf of the Graphophone Cos. that a patentee may, while exercising any of his three co-ordinate monopoly rights of making, using and selling, reserve, by proper agreement, such portion thereof as he may see fit, and that such a proper reservation was made upon the monopoly right to resell by a contract directly with the Boston Store, which was entered into at the very instant of the transaction. It was also contended on behalf of the Graphophone Cos. that the grant of the patent gave the article a status which enabled monopolistic bargaining and that the rules respecting ordinary sales did not apply.

Counsel for the Graphophone Cos. pointed out that the Columbia price maintenance system was based upon a contract—a direct contract

between patentee's agent and its immediate vendee, the Boston Store. No attempt was made to go beyond this, or by a mere "notice" to enforce its price system against any concern which was not a party (or privy) to a contract as in the Victor-Macy and Sanatogen cases recently decided by the Supreme Court.

It was further contended on behalf of the Graphophone Cos. that inasmuch as competitive conditions existed to protect the consumer, the contract between the Graphophone Cos. and the Boston Store, which imposed a resale price upon the latter, was valid as being a reasonable restraint of trade, and that the question as to the validity and legality of such a contract was not foreclosed by the decision of the Supreme Court in the Dr. Miles case.

The Boston Store claimed that under the recent Supreme Court decisions it had the right to sell the patented articles at any price it saw fit notwithstanding the fact that it had agreed by contract to maintain prices on them.

The questions certified to the Supreme Court were the following:

1. Does jurisdiction attach under the patent laws of the United States?
2. If so, do the recited facts disclose that some right or privilege granted by the patent laws has been violated?
3. Can a patentee, in connection with the act of delivering his patented article to another for a gross consideration then received, lawfully reserve by contract a part of his monopoly right to sell?
4. If jurisdiction attaches solely by reason of diversity of citizenship, do the recited facts constitute a cause of action?

The case was argued by Elisha K. Camp, general counsel for the Graphophone Cos., and Daniel N. Kirby and James M. Beck. Walter Bachrach and Hamilton Moses made the argument for the Boston Store.

knocked off him, the creases ironed out of him and he will become an accommodating diplomat with everybody's confidence and good-will. He will be known as a man with a "personality" or "character"—call it which you will—and he may view his future with confidence and serenity.

At the time Woodrow Wilson made the above remark he probably had no thought of becoming President of the United States. He had

enough to think about steering Princeton University with the finances of the institution tugging in one direction, the faculty in another and the students and their needs in a third. It hardened and toughened him into the kind of a man who could steer calmly through the midst of the most appalling state of international affairs any American statesman has ever had to face. The salesman who sinks his identity into the needs of a small country store need not be surprised if he finds that he has unconsciously developed in himself the kind of personality capable of heading the sales department of a big business.

TALKING MACHINE TRADE IN NORWAY

Figures on the Extent of the Industry in That Country—Prices at Which Talking Machines and Records Are Sold—Methods Used

WASHINGTON, D. C., February 5.—United States Consul Charles Forman has recently sent to the Bureau of Foreign and Domestic Commerce some interesting figures regarding the talking machine trade in Norway. The value of talking machines imported in the kingdom annually averages about \$100,000. They are received from Germany, France and the United States, but figures showing the exact amount from each country are not available.

Most of the talking machines sold in Bergen are imported by agents at Christiania. The most popular machines retail at \$26.80 (100 crowns); other and better machines range from 300 to 400 crowns. The retail prices of records vary from 80 cents to \$4.34.

Talking machines pay an import duty of 0.50 crown per kilo net weight (6 cents per pound). The rate of duty is applicable to talking machines from all countries entitled to most favored nation treatment.

The usual method of selling talking machines and discs is through agents in Christiania, who have a sole agency for Norway. Newcomers into the field may adopt this method, or if they prefer, may appoint an agent for Bergen, who should have a certain well-defined territory, and prices preferably should be quoted c. i. f. destination in dollars.

The usual terms of sale are 2 per cent. for cash, but credit of three months is extended, if desired. Dealers make a profit of 50 per cent. on machines and 33 per cent. on disc records.

A list of dealers has been forwarded to the Bureau of Foreign and Domestic Commerce, which may be procured from the department by referring to File No. 78,596.

CHARACTER—THE BASIS OF SUCCESS

What the Development of Character Means to the Salesman Most Interestingly Set Forth in an Article in "The Voice of the Victor"

"Character is a by-product," as Woodrow Wilson in one of his illuminating talks once told a group of college boys. Everybody knows that a salesman's success is largely determined by his power of impressing his "character" on his customers. For this reason many salesmen go after character much as though it were money—something they could put in their pocket and forget about until needed, says "The Voice of the Victor." What they get when they do this is not character, but another by-product, a sort of self-consciousness that is more of a liability than an asset.

If a man attends simply to his duty he will unconsciously develop the kind of character best calculated to help him carry on his work. Take the policeman, for instance. He probably never thinks about his "character" or "personality." The uniform, the discipline, the nature of his work all combine to harden and toughen him until he is fit to cope with criminals and to view with alertness a world that to him is always more or less under suspicion. Unconsciously he develops a "cop" mind, and becomes one of Squashville's "bravest." Precisely the same thing will happen to the salesman who attends to his work. His plain duty is to consider his customer's interests and his employer's interests and to make the two fit in with each other. He must be tactful and yielding over things that are open to discussion, and gracefully firm over things that are not. He must be equally as courteous to the bargain hunter, the fidget, the suspicious buyer, the nervous old lady who fears she is going to spend too much, as to the most accommodating customer on his list. If he does this, he may be assured that one by one the corners will be

INDISPENSABLE TO DEALERS

What a Prominent Canadian Merchant Has to Say of The Talking Machine World—Believes in Getting as Near as Possible to a Cash Basis

Day after day The Talking Machine World receives communications from dealers located in all parts of the world, expressing words of appreciation for the merits of this publication, and the great value it is to them in the conduct of their business. For example, one which came to hand last week from Wm. Lee, Ltd., 618-622 St. Catherine St. West, Montreal, is interesting in this connection. It reads:

"We are very much alive to the benefits received through your very excellent magazine, The Talking Machine World. It is very interesting to hear the views of America's successful merchants from a financial standpoint. Finance in the musical instrument business means credit, and the advanced ideas of getting this talking machine business on a nearer cash basis is a very excellent move, as we are all beginning to recognize that the talking machine is to-day a necessity in every household, and when the general public gets educated to the cash basis, or short term payments, there will be just as many machines sold, and the dealer's risks will be at a minimum. Enclosed find check for the following year's subscription to your publication, which no talking machine dealer to-day can afford to be without."

WILL A. WATKIN CO. EXPANSION

The Will A. Watkin Co., Dallas, Tex., are doing an excellent business with the Columbia and recently installed several new demonstration rooms. They are carrying on a very forceful campaign of publicity in the local papers, in which the Columbia records are featured in a very striking and effective way. James I. Cruse, of the talking machine department of this house, is making a specialty of adjusting and repairing, and is building up quite a clientele.

EXPORTS OF TALKING MACHINES

The Figures for November Presented—Exports Show Machines and Records Both Increase

WASHINGTON, D. C., February 5.—In the summary of exports and imports of the commerce of the United States for the month of November, 1917 (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following figures regarding talking machines and supplies appear:

Talking machines to the number of 4,523, valued at \$164,762, were exported in November, 1917, as compared with 6,039 talking machines, valued at \$163,111, sent abroad in the same period of 1916. The total exports of records and supplies for November, 1917, were valued at \$173,159, as compared with \$169,224 in November, 1916. For the eleven months 79,117 talking machines were exported, valued at \$2,000,371 in November, 1917, and 56,009, valued at \$1,414,631 in 1916, while records and supplies valued at \$1,663,196, were sent abroad during 1917, as against \$1,121,885 in 1916.

NEW DELPHEON DEALERS IN TEXAS

DALLAS, TEX., February 4.—The Verhalen-Delphoeon Co., of this city, which was recently formed to act as distributor for the products of the Delphoeon Co., Bay City, Mich., has been closing a very satisfactory business. Walter Verhalen, head of the company, recently made a trip through the territory and closed a number of important deals. One of the new dealers which he appointed is the firm of Knight & Pevoto, of Sherman, Tex. This house is a very successful furniture concern and is making plans for an aggressive Delphoeon campaign in its locality.

There is rarely ever much work for the chemical engines and hose carriages when a man starts out to set the world on fire.

ISSUE A CLEVER CIRCULAR

Schmidt Music Co., Davenport, Ia., Utilizes Briggs Cartoon in Calling Attention to the Desirability of the Aeolian-Vocalion

DAVENPORT, IA., February 3.—In featuring the Aeolian-Vocalion, the Schmidt Music Co., of this city, recently conceived a very clever announcement for direct-by-mail advertising. The keynote of the circular was a reproduction of a cartoon by Briggs, showing the staid head of the family off his guard and jiggling delightedly to the music issuing from a phonograph. The caption was "It Happens in the Best Regulated Families." The caption appeared immediately under the name "Aeolian-Vocalion" in large letters at the top, thus making a very striking combination. The circular also bore a reproduction of a poem by Augusta Kortrecht, entitled "Since Father Bought the Phonograph," which appeared originally in "The Aeolian" magazine.

The Schmidt Co. states that the circular attracted widespread attention and comment, and judging from results apparently served to stimulate machine and record sales to a certain extent at least.

W. C. BETZER RESIGNS

Wm. C. Betzer, who for the past five months has had the management of the Victrola department of the James Black Dry Goods Co., Waterloo, Iowa, has tendered his resignation, which became effective February 1. Mr. Betzer has been connected with some of the largest talking machine departments in the country, both wholesale and retail, and his loss to the retail trade in Iowa will be deeply felt. The ill health of Mrs. Betzer is the cause attributed for the change being made.

Build on the thing that's yours. The eye that tags opportunity lets the horizon alone; it focuses on the foreground chance—briefly put, a bird in hand is worth two in the bush.

-WHY- Do You Use Tone Arms

"off the shelf"? You spend time and money freely on the design of a cabinet, why compromise on the tone arm? Why don't you put the same thought into the tone arm? Make it at least as distinctive as the cabinet.

We have experts who are specialists in designing tone arms that will blend with your cabinet in quality and appearance—that will continue quality unbroken from sound chamber connection to stylus groove.

These men are ready to serve and prove to you by sketches and figures that "INDIANA" made tone arms will increase the value of your machine and make it a better selling proposition.

Bear in mind that acceptance of this service does not obligate you in any way and anything developed for you is for you exclusively, and is not sold or sampled to your competitors.

100,000 FOR A NAME

NOTICE

Attention is called to the following changes in the conditions of our name contest, which were not included in the announcement of the contest made in the January issue of The Talking Machine World:

The contest closes at noon on March first, 1918. In the event that more than one person submits the name which is regarded as the best or most appropriate, the full prize of 100,000 needles will be given to each person submitting such name.

EVERY good product desires a good name. We want the Talking Machine trade to supply us with a good name for our product, needles made right to play right.

To the person or persons who suggest the most appropriate name for our needles we will offer as a reward 100,000 needles. None is barred from participation. We prefer the suggestion of some coined word that can be copyrighted.

To assist in selecting the proper name we wish to state that we will manufacture the best steel needles that can be put on the market.

Needles should be changed for each record played. Our process of manufacture will be such as to insure the reproduction of every delicate shading and tone. Continued use of our needles by your customers will mean contented patrons at all times.

We are desirous of hearing from distributors of needles who wish to establish a source of supply which can be depended upon at all times for quality, price and real service.

The contest will close at noon on March first, and the name chosen for our quality needles will be announced in the March issue of this periodical. In the event that more than one person suggests the prize-winning name, the full reward of 100,000 needles will be given to every one who submits said name. Anyone interested in the Talking Machine industry is invited to participate. All we ask is prompt action and to indicate at the same time the name of machine handled and firm with which you are connected.

PORTLAND A BUSY TRADE CENTER

Some Record Sales During Holidays and January—Furniture Stores Taking on Talkers—Manufacturing Activity Gives Labor Greater Increased Buying Power—Some Big Brunswick Sales—News of Month Worth Recording

PORTLAND, ORE., February 4.—The sale of talking machines in Portland during the holidays and the month of January far exceeded all sales of previous years. Eilers Music House had a tremendous trade. H. A. Rayner, manager of the talking machine department, and his assistants had more business than they could handle. One day's sales amounted to \$7,000 and records were sold by the hundred. Such records as "Long Boy," "Joan of Arc," "Lil' Liza Jane" and other popular "Rags" or "Jazz" music were also sold out quickly, and the higher-class records were sold in large quantities.

The beautiful demonstration rooms of the G. F. Johnson Piano Co. were thronged with Victrola buyers during the month and the trade is excellent.

James Loder, manager of the Victrola department of the Wiley B. Allen Co., says they were practically sold out of Victrolas at Christmas and the sale of records by this house is unprecedented.

The Bush & Lane Co. report a big trade. The Sonora continues to gain in popularity among Portlanders. Several very high-priced Sonoras were sold by this firm.

The Wakefield Music Co. sold twenty-two Brunswick phonographs during the last month. These phonographs are now carried by a number of Portland houses and are selling rapidly.

The Hyatt Talking Machine Co., which carries the Columbia, the Edison and the Victrola machines, is one of the busiest places in Portland. E. B. Hyatt, manager of the company, says the business during the last two or three months exceeded that of any former year.

C. Collins, head of the talking machine department of the Reed-French Co., says that the holiday trade was exceptionally good. Edison and Columbia machines went like hot cakes. H. G. Reed, head of the Reed-French Co., is well satisfied with the business outlook of Portland and the surrounding country. This house will devote much of its attention to rural trade.

Meier & Frank's big department store carries Victrola, Edison and Columbia machines and has one of the largest stocks on the Pacific Coast. The trade of this house for December and January was immense.

The Lipman & Wolfe department store handles the Victrola, and Miss F. Isaacs in charge reports big sales during the past two months. This department has been moved to the ninth floor and in connection with the piano department makes a very handsome display.

A number of the principal furniture stores in Portland are selling talking machines. The Powers Furniture Co. had a big sale of Victrolas during the holidays. The Edwards Furniture Co. are selling the Brunswick and Unola phonographs and H. Jennings & Sons Furniture Co. sell the Grafonola and Windsor.

Shops, ship yards and lumber yards are all busy and giving work to both men and women of Portland and vicinity. This puts much money in circulation and the music dealers are reaping the benefit with the others. Many schools are being supplied with phonographs and the edu-

cational value of the machines is daily becoming more evident.

That the Victor is a favorite talking machine is evident from the fact that A. D. Hulburd, of Umatilla Co., Ore., came into the G. F. Johnson Piano House here and bought a Victor school machine, paying for it out of his own pocket, being convinced that the school directors of his district would approve of the purchase and buy it for the school. These school machines are very popular in Oregon and are materially assisting in the musical education of the children.

Nat Dumphy, of the Bush & Lane Co., accompanied by Thos. Wilkinson, manager of the firm, went to Seattle, Wash., recently to attend the annual banquet given by the Bush & Lane people. Mr. Dumphy was kept so busy selling Sonora, Victor and Columbia machines that a little relaxation was greatly appreciated.

The Stradivara machine, which is carried by a number of houses in this city, is becoming more and more popular. Eilers Music House had a big trade in these instruments during the holidays. The Remick Song Shop carries this machine and reports an increasing demand for it. The Hudson Arms Co., one of the most important sporting goods houses in Oregon, have added the Stradivara to their stock and are extensively advertising it.

Taylor C. White, manager of the phonograph department of Sherman, Clay & Co. here, after an unusually busy month got a three days' vacation which he spent in Seattle, Wash. Mr. White reports big sales of Victor machines.

A. R. Palmer, manager of the talking machine department of Olds, Wortman & King, this month visited Saginaw, Mich., to purchase Brooks talking machines for the firm.

WESER PHONOGRAPHS

For 39 years the piano trade has recognized in Weser instruments the highest piano and player piano value. It always has been our delight to invite comparison of the Weser products with those of other makers. Many of our best dealers have been acquired by such comparisons.

Weser Phonographs are making rapid headway in the same manner. Compare them with the world's most expensive makes—in tone quality—in appearance—in reliability, and solidity of construction, and we are content to abide by your decision.

The **Weser Phonograph** will play any record. Made in satin finish mahogany. Other woods on special order. Electric motor will be furnished if desired. Write for catalog.

WESER BROS., Inc.

520-530 West 43rd Street

NEW YORK

Necessity—The Mother of Invention

(Enlarged facsimile of package)

The Great World War has taxed the resources of the human mind, both lay and professional, to produce substitutes for articles made scarce.

Humanity has benefited by this, for in experimenting many new substitutes have been brought to light that are an improvement on the original articles.

These are here to stay.

We are now offering the trade a new needle—the Vallorbes Semi-Permanent Needle for playing lateral cut records.

At present, they retail for 15c per package of five and will return far more reproductions than 15c worth of the ordinary changeable steel needles will. They will not damage records. The points are parallel and as they wear down do not enlarge the lateral surface as do the tapered steel needles, thus conserving the life of the record.

Reverse side of package—Actual size.

Package enclosed in waterproof waxed paper envelope.

Send 25c in stamps for a sample package. We will also send you dealer's discounts, etc.

Originators and Largest Manufacturers of DIAMOND POINTS

LANCASTER, PA., U. S. A.

"Vallorbes Semi-Permanent Needles" are made in Soft, Medium and Loud Tone. They are packed 100 packages to a carton.

WHY ONE PRICE POLICY IS RIGHT

The Right Price for the Right Product Insures Satisfaction and Makes Better Business for the Salesman and Satisfies the Customer

The desire is born in the majority of people to purchase an article a little bit lower than the quoted price. Even though the original price may not be so high, a feeling of elation pervades the being of the person who has succeeded in beating the shopkeeper down. It flatters his vanity, and after a successful deal he considers himself an excellent business man. But does he ever take into consideration the fact that if a man lowers a price on his goods it really wasn't worth the first price, anyway, and probably isn't even worth the second price? How disappointing it is to a man who purchases an overcoat after beating down the salesman to see a duplicate of his coat in the window the following week tagged at least \$5 cheaper!

The one-price house eliminates all the dissatisfaction that arises from the thought that the lapse of a week or so will probably see the lowering of the price of a purchased article. Those people who are unable to buy anything without haggling over the price need not trade with a one-price house. But the person who desires real satisfaction will find it in that house and in that house only.

Another advantage of this system is that it makes it easier for both the salesman and the customer. If the price quoted is too high, the buyer is privileged to look at other goods not quite so expensive. No friction arises between the two; no argument is possible when the goods are permanently priced. The manager of the department is left in peace and is not called to make an article any cents cheaper than it is marked; he is enabled to carry on his end of the business without any unnecessary interference.

Of course, it takes time to educate some people to this system. It takes some time to impress upon them the desirability of a process in which it is impossible for human nature to enter and prove that the "Survival of the Fittest" is the winning law. This great system is a time saver and an energy saver. It does not leave the salesman utterly exhausted, so that he is cross and uncivil to the next customer he waits upon. It does not make his day one constant battle of wits. But what it does is to give him more time to display his goods and explain their value to each customer as he comes along.

And what does it do for the customer? It gives him more time to go from shop to shop and get exactly what he desires. He does not have to buy in the first shop he enters because

he can beat the salesman down lower there. It does not leave him so weary after the long struggle that he is incapable of making another purchase that day.

But this deplorable state of affairs will not exist when every retail firm in the country adopts the only system that really gives satisfaction to both the customer and the shopkeeper.

PATHE ARTISTS IN GRAND OPERA

Artists of the Chicago Opera Co., Who Have Made Pathé Records Were Featured During the Season Recently Opened in New York

The advertising department of the Pathé Frères Phonograph Co., New York, has called the attention of Pathé dealers to the fact that a number of famous artists, who are members of the Chicago Opera Co., record exclusively for the Pathé library. As the Chicago Opera Co. began recently a four weeks' stay at the Lexington Avenue Opera House, Fifty-first street and Lexington avenue, these Pathé artists are being featured extensively by the Pathé Frères Co., in the local newspapers.

The members of the Chicago Opera Co. who are exclusive Pathé artists are the following: Lucien Muratore, world-famous tenor; Anna Fitziu, Rosa Raisa, Rimini, Maguenat, Marcel Journet and Chenal.

These artists are appearing during the company's New York season, and the Pathé dealers are taking advantage of their appearances by featuring their records in every possible way.

GEORGE DEACON BECOMES MANAGER

George Deacon, former traveling representative for the New York Talking Machine Co., Victor wholesalers in Pennsylvania territory, has been appointed manager of the Economy Music Co., Scranton, Pa., well known Victor retailers. During his association with the New York Talking Machine Co., Mr. Deacon won the esteem and friendship of the Victor representatives in his territory and his intimate knowledge of dealers' problems will doubtless enable him to achieve pleasing success in his new post.

A QUESTION WORTH CONSIDERING

"What have I personally done the last year to help increase profits?" is a pretty good straight forward question to put to ourselves. Each one knows in his heart what the answer shall be; whether he has put his shoulder to the wheel, or let the other fellow take care of profits. That is not the point, however. The past is gone, but it can help us to take stock and plan for the future.

EDISON DISC JOBBERS TO MEET

Annual Convention of Association to Be Held at Hotel Knickerbocker on February 18 and 19—An Interesting Program Planned

The annual convention of the Edison Disc Jobbers' Association will be held at the Hotel Knickerbocker, New York, on February 18-19.

As is usually the case, an elaborate program is being arranged for the affair. There will be papers on important business subjects read by members of the association, talks by factory officials and comprehensive discussions of business conditions. Although nothing official has been announced it is believed that the factory will provide the usual entertainment for the visiting jobbers, which generally includes a dinner and theatre party.

The present officers of the association are: Walter Kipp, of Indianapolis, president; L. N. Bloom, of Cleveland, vice-president; F. E. Bolway, Syracuse, N. Y., secretary; and H. H. Blish, Des Moines, Ia., treasurer.

OPTIMISTIC REGARDING BUSINESS

R. W. Gresser Finds Delpheon Jobbers in Atlanta and Dallas Steadily Expanding Their Agencies Throughout an Important Territory

BAY CITY, MICH., February 6.—R. W. Gresser, sales manager of the Delpheon Co., in this city, returned from a trip to Atlanta and Dallas, where he visited the Delpheon jobbers who established headquarters in these cities during the past few months. Mr. Gresser states that these jobbers are very optimistic regarding business for the new year, and he was pleased to learn that they had established a number of important agencies in their respective territories, which means enlarged sales.

Mr. Gresser states that the greatest difficulty of the Delpheon Co. at the present time is in getting machines to these jobbers soon enough to meet the demand. He states that the Delpheon product is being accepted enthusiastically, and that it is being sold with push and earnestness. He is quite optimistic regarding the way in which the Delpheon is being received and contracts already closed will triple the factory output for 1918.

AL WILLIAMS TAKES CHARGE

SCRANTON, PA., February 8.—Jack Davis has resigned as manager of the Victor establishment of Stoehr & Fister, of this city. He is succeeded by Al Williams, who formerly occupied this position and is well known in the local Victor trade.

NYOIL

is the last word in the refining of high-grade oils, for every impurity is taken from it, leaving nothing but what is required to keep machines in perfect condition, being combined of four oils perfectly blended.

Will not Gum, Chill or become rancid; is free from acid. It is colorless and has no sickening smell, being absolutely odorless.

"The finest and most delicate pieces of mechanism do not prove efficient unless properly lubricated. Skill, Genius, Invention and Workmanship must have the proper Oil. Stop and consider this when you have to buy an Oil for household use."

Hundreds of satisfied customers have written us that they would never use anything else for **TALKING MACHINES, GRAPHOPHONES, PHONOGRAPHS AND SEWING MACHINES**

NYOIL will lubricate the machinery and polish all woodwork

and can be obtained of any "Up-to-date" Talking Machine Dealer in the world, and is manufactured by Wm. F. Nye, who for 50 years has made 80% of all the Watch, Clock and Chronometer Oil that is used in America.

WM. F. NYE, NEW BEDFORD, MASS., U. S. A.

NYOIL is put up in the following sizes:

- No. 1 Bottle 1 ounce
- No. 4 " 3 ounces
- No. 8 " 8 ounces

NYOIL is put up in the following sizes:

- No. 16 (Cans) 1 Pint
- No. 32 " 1 Quart
- No. 128 " 1 Gallon
- No. 540 " 5 Gallon

BUILDING UP or TEARING DOWN?

Which are you
doing in your

Talking Machine Business?

Just remember that unless you are putting real quality—super merit—into the working parts of every Talking Machine you make, you are tearing down instead of building up. Every poor machine sent out hurts you, hurts the dealer and displeases the customer. The success of your business depends on your motor.

Build quality into your product. Use the one best motor, because it is the life of your machine.

The Dayton Motor

is considered
by manufacturers
as being the

Best Motor in the World

The highest engineering skill was appealed to, and responded with designs for the "Dayton." The machine is built by careful workmen, trained in such enterprises as National Cash Register, Delco, Computing Scale, Wright Airplanes, and others which have given Dayton the title, "The City of Precision." Its workmanship had to be the highest to equal the merit of the design. It has made good wonderfully in thousands of machines.

You will gain reputation and re-orders if you equip your Talking Machines with it, and you will have no motor troubles. Why take chances on other makes when the "Dayton" means satisfaction?

Dayton Tone Arms are universal, playing any disc record. Five styles.

Dayton Reproducers are scientifically correct, and thoroughly practical. Two styles.

Write and let us tell you how to enhance the value of your machines at no more cost. Get our new phono-parts catalogue.

THE WORLD PROMINENT IN EXHIBIT

This Publication, Together With The Music Trade Review, Featured as Representative Organs of Two Leading Divisions of Music Trade at Trade Journal Display in Newark

Two of the outstanding features at the Trade Journals' Exhibit now being held in the Library Art Gallery in Newark, N. J., under the auspices of the Newark Free Public Library and the Newark Museum Association are The Talking Machine World and The Music Trade Review, which have been given a prominent place as the representative organs of the two divisions of the industry which they cover.

The World and The Review are placed in conspicuous positions on sloping screens near the entrance of the exhibit, so that they may be readily seen and examined by those who attend. Altogether there are about one thousand trade journals covering all branches of business in the industry, many of them little known by the laymen. The exhibit, however, serves to emphasize the importance of strictly business publications, for there is hardly a trade that has not at least one representative publication in the group.

The Newark Library has a business branch which makes a specialty of "Prints for Business Men." Over 250 trade journals, 350 house organs, and hundreds of publications along other and similar lines are on file at all times and the library subscribes for about \$3,000 of such publications annually.

The library officials have long been urging the use of trade publications in the schools, and literature recently issued says:

"Why does the teacher teach children to read and give them practice in reading fiction, poetry, essay, drama, literary description, and give them to read so little of directly informational material? Children ask for facts, Heaven knows; and we give them only fancies. Why does the teacher teach children to write friendly letters, anecdotes, descriptions of natural scenery, biographic sketches, moral homilies, yea, even poems, and fail to practice them on clear narratives of How the Clothes Wringer Works, and What to do to a Squeaking Hinge, or descriptions of the Purse I Lost, or Jack's Bob-sled? Why do librarians act as though their buildings were constructed and their salaries paid for lending light literature to be lightly read by light heads? And, for that matter, why do business men fail to demand that the existence of things written for the business world be recognized in libraries, and finally, why does not the business man read what the libraries do have of material that would be of value to his life and his business?"

"This exhibition stimulates one to the asking of these questions. If they will come to see it, it will doubtless stimulate some members of the community to answer them."

COLUMBIA EXPANSION IN CANADA

Mervin E. Lyle, of the executive office staff of the Columbia Graphophone Co., has been appointed to the Canadian division of the company for the time being as assistant to James P. Bradt, general manager of the Columbia, in the installation and organization of a new Columbia factory in Canada. Mr. Lyle's many years of experience in the manufacturing division of the Columbia Co.'s activities ideally equip him to render Mr. Bradt invaluable assistance in the establishment of the new plant.

FILE SCHEDULES IN BANKRUPTCY

Phonograph Specialties Mfg. Co., of 120 Walker street, New York, has filed schedules in bankruptcy with liabilities of \$11,091, of which \$3,337 are secured claims. The assets of the concern are listed at \$4,891.

The Peyer Music Co. has opened showrooms at 415 Cedar street, St. Paul, Minn., where they are featuring Columbia Grafonolas and Sonora phonographs. W. H. Simpson is manager.

TRADE SITUATION IN SWITZERLAND

U. S. Consul at Berne Tells of Class of Talking Machines in Demand in That Country

WASHINGTON, D. C., February 7.—United States Consul at Berne reports that there are some very strong concerns producing talking machines in Switzerland, but German products have a very large sale. Talking machine parts are manufactured extensively in and near Geneva. The greatest concern is the Deutsche Gramophon Gesellschaft at Berlin, represented in this district by Kaiser & Co., Markt-gasse, Berne. No talking machine discs are manufactured in Switzerland. Mostly all of them are imported from France and Germany.

Current prices are: German (American) makes, from \$32 to \$350; German, \$8 to \$120; Swiss, \$7 to \$100; French, \$10 to \$110. German, French and Belgian discs are on the market at \$0.40 to \$1.50. Since the war started prices have increased 15 per cent.

The German Gramophon Co. of Berlin and Pathé of Paris have the largest share of the trade. The German imports, including German-made American machines, amounted in 1914 to \$47,828, and French imports to \$15,488, while the direct American imports were valued at \$1,752.

Talking machines without horns have the widest sale, but the demand has been reduced by the war. Orders are regularly executed by Germany, however. Twenty to 35 per cent. is granted to dealers on talking machines and discs. France is a keen competitor in discs.

The exports of talking machines, cinematographs and similar machines in 1914 amounted to \$384,573; the imports, to \$70,755. The duty on phonographs, according to the Swiss customs tariff No. 955, is \$3.86 per 220 pounds.

The Victor Talking Machine Co. contributed \$2,500 to the \$50,000 fund being raised by the Knights of Columbus, of Camden, N. J., for work in the army cantonments.

BAYONNE, N. J., DEALERS ORGANIZE

Talking Machine Men Form Association for Purpose of Bettering Business Conditions

The talking machine dealers of Bayonne, N. J., which is not far from New York City, have organized a local association and adopted for it the name of "The Talking Machine Men of Bayonne," with Louis Gurans, president; E. G. Brown, secretary, and S. Wolfson, treasurer.

The association was organized at a meeting held recently in the store of the Bayonne Talking Machine Co., under the direction of Mr. Gurans, and it was believed that by getting together the dealers it might aid in eliminating the various trade abuses, and otherwise improve trade practices.

E. G. Brown was named a committee of one to draft and submit a constitution and by-laws for the new association, the charter members of which are Mr. Brown, S. Feldman, Louis Gurans, Harry Gleich, T. H. Kefer, S. Wolfson, J. H. Marshall and E. F. Mumby.

FEATURING HEIFETZ RECORDS

Victor Co. Issues Handsome Posters for the Use of Talking Machine Retailers

The four new Victor records by Jascha Heifetz represent the latest sensation in the Victor catalog, for this young violinist has taken the musical world by storm. The Victor Co. has planned its advertising to give full prominence to the Heifetz records and has sent to dealers most artistic posters bearing a life-size portrait of the violinist, together with an announcement of his exclusive contract with the Victor Co. and the production of his first records. Special advertising electros are also provided.

The Mid-West Phonograph Co., Chicago, has been incorporated with a capital stock of \$2,500 by Marion Luce, Anna Thustrup and H. A. Boissat.

Manufacturers—Jobbers—Dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION ball-bearing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison Disc machines. Made in nickel and 24 carat gold finish, extra fine quality disc.

Tone arms fitted to Edison machines only

PERFECTION FLEXI-TONE reproducers No. 3, No. 6 and No. 7 fit all types of Victor and Columbia machines. Made in nickel and 24 carat gold finish, extra fine quality.

These reproducers and arms are the very finest made mechanically. The PERFECTIO FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from highest pitched soprano, to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Phonograph manufacturers can have PERFECTIO FLEXI-TONE reproducers fitted to their machines Write for prices, information, etc.

SAN FRANCISCANS OPTIMISTIC ANENT TRADE OUTLOOK

Believe Action of Government Has Done Much to Help Freight Conditions—Considerable Stock on Way From East—California Phonograph Co. Takes Over Kohler & Chase Department

SAN FRANCISCO, CAL., February 5.—The demand for talking machines of all grades continues very good in this city and at all the Bay points. Shipments are slow in coming in and the stocks of some of the more expensive machines, especially those in art cases, are practically exhausted. The Eastern blizzard and consequent tie-up of freight and the subsequent order of Fuel Administrator Garfield shutting down industrial plants for a period of five days caused some despondency at first. But when realization came that the order was for the purpose of relieving the freight situation a more optimistic spirit prevailed. Last year's business was so satisfactory and this year's demand has kept up so well that the dealers feel that they will get enough stock to keep them going, even if it is not just the kind that they want. The public is beginning to understand the situation as it applies to phonographs, much better, and in most instances the would-be purchasers are selecting some other case when they cannot get just what they wanted. This keeps the stocks moving, and notwithstanding the clouds of doubt in the sky for the present business is good.

Enthusiastic Over the Convention

F. A. Dennison, formerly district manager for the Columbia Graphophone Co. and newly appointed local manager of the San Francisco office, accompanied by C. V. H. Jones, the former San Francisco manager, together with T. O. Moore and Paul West, of the dictaphone department, have just returned from the company's convention in New York. They are all enthusiastic over the convention and the prospects for the coming year. During the absence of the district and local manager A. G. Farquharson had charge of the business. Both managers speak in high terms of his efficient management while serving in the dual capacity of district and local manager. W. F. Stidham, local manager of the Columbia at Los Angeles, returned with the San Francisco boys, and spent several days in this city before returning to his duties in the South. W. W. Weaver has joined the local sales force.

Buys Stock of Fox Piano Co.

The Jackson Furniture Co., of Oakland, which was negotiating for the talking machine department and stock of the Oakland branch of Kohler & Chase, could not reach an agreement with the latter and broke off negotiations. This week the Jackson Co. bought the stock of the Fox Piano Co., and with the purchase secured a Victor sales agency.

California Phonograph Co.'s Important Move

Kohler & Chase, of this city, have sold their entire stock of talking machines to the California Phonograph Co. and gone out of that end of the music business. As yet they have not sold their stock in the Oakland store, although it is understood there are several dealers negotiating for it.

The California Phonograph Co. by the purchase of the stock of talking machines formerly handled by Kohler & Chase, secured the Victor agency to add to the Columbia and Edison, which they already possessed. This company started as a branch of Eilers music house and later became independent. It moved to its present quarters just before Christmas, retain-

ing display on the ground floor of Eilers until the middle of this month when it moved the balance of its stock and the last thread binding it to the parent house was severed.

Plans an Active Campaign

The Steger talking machine, made by the Steger piano people, is said to be attracting some favorable attention on the Coast. George Heidinger, who represents the company, says he is going to make an active sales campaign with the machine this year.

Stern Talking Machine Corp. Branching Out

Frederick Stern, of the Stern Talking Machine Corp., is looking for openings in several Coast cities. This company was formed only a couple of years ago and now has stores in Oakland, Los Angeles and Richmond as well as San Francisco. Mr. Stern says his only difficulty is in getting stock. He finds the easiest part of business is to raise money to finance new stores and to sell machines.

Progress of Brunswick Phonograph

The Brunswick-Balke-Collender Co., with headquarters in this city, has established an agency in every city of any size in the State, and is planning a big campaign for 1918. The local manager is a "live wire."

Geo. W. Lyle Enthusiastic Over Pathé Prospects

George W. Lyle, general manager of the Pathé Co., is making a tour of Western cities with San Francisco as his temporary headquarters. While here he went over the situation with the managers of the Western Phonograph Co., who act as agents for the Pathé machine. Mr. Lyle is enthusiastic over the outlook for the present year, and says that his machine is constantly growing in popularity.

Sells Carload Quickly

George T. Hively, manager of the phonograph department of the Eastern Outfitting Co., says that he received a carload of Columbia phonographs shortly after the first of the year, and nearly all of them were sold before they arrived. The rest, he says, were quickly snapped up and now he is trying to get some more rushed through.

Anxiously Awaiting Victrola Shipments

Sherman, Clay & Co. have received notice that a shipment of Victrolas has been started to them, and A. G. McCarthy, the manager of the department, says that their arrival will be very welcome, as his stock is very much depleted. Under normal freight conditions they ought to arrive in about twenty days, but under present conditions he cannot predict when the machines will get through.

Developing Pacific Coast Trade

The senior member of the firm of Passow & Sons, of Chicago, who make the Musicrola, has been in San Francisco for some time assisting in making their talking machine better known on this Coast. The Century Co., which has two stores in this city under the management of Miss Field, is the agent for the Musicrola, and during his stay Mr. Passow makes his headquarters at these stores.

Featuring Lansing Khaki Covers

W. S. Gray, Coast manager of the Domestic talking machine, has moved his office to 530 Chronicle Building, where he is planning to open up a general manufacturers' agency for lines used by talking machine dealers. He is now representing the Lansing khaki moving covers made by E. H. Lansing, of Boston, and should be able to place these necessary supplies with every live dealer on the Pacific Coast.

Edison Shop Pleased With January Trade

The Edison Shop in this city reports that its last year's business was more than gratifying, and that the way business opened up in January it looks as if this would be a banner year unless something unforeseen happens.

Joins the Baldwin Sales Force

William Lawrence, who for a long time was with the phonograph department of the Em-

porium department store, and more recently in the same department at Kohler & Chase, has, since the latter discontinued its talking machine department, made connections with the Baldwin Co., in this city.

Making Machines in Pasadena

Coops & Sons, who have been manufacturing talking machines in Pasadena, are said to have improved their machine so that it will now play all makes of disc records. The company is establishing agencies all over the Pacific Coast.

MEXAPHONE CO. INCORPORATED

The General Mexaphone Co. of West New York, N. J., has been incorporated for the purpose of manufacturing mexaphones with a capital stock of \$500,000. The interested parties are: Henry T. Crapo, Boston; Willis A. Farnsworth, Winthrop, Mass.; James H. McClellan, Brookline, Mass.; William Walser, West New York.

Series

**A Popular
Century
Style**

No. 20—Quartered Oak
or Genuine Mahogany,
24 x 24 x 49½, \$200.00

What the Century Represents

The dealer who handles the **Century Phonograph** is not handling an experiment or a fly-by-night product, but a substantial, established and **guaranteed** phonograph.

Why the Century Leads

The Cabinets are manufactured by the largest talking machine cabinet manufacturers in the world, the Century Cabinet Co. The tone quality is pronounced by experts as unsurpassed and every part is a distinctive **Century** product. The Universal tone arm on the Century phonograph is the best on the market and an established success—every part on this phonograph except the motor is a Century guaranteed product, and the motor is the best obtainable.

What We Offer the Dealer

We offer progressive dealers a **complete** line of machines and a liberal proposition, backed up by a company that is in business to stay—not for a few weeks or months.

What Amount Should A Dealer Spend to Make Publicity Profitable :: :: By W. Denville Simons

The talking machine dealer who avoids advertising bids fair to become as extinct as the dodo before very long. Here and there may be found firms or individual traders who, by virtue of a good position contiguous to some more enterprising rival, are able to "reap where they have not sown," and benefit by efforts to increase trade to which they have contributed nothing.

Such firms nowadays are, however, in the exception, and the item of advertising looms more or less largely among the expenses which have to be watched warily so as to attain the greatest possible results for the outlay.

In the face of competition, which grows keener every day, advertising is absolutely imperative and necessary if a respectable profit would be shown.

Certain expenses are incidental of course to every business, and it is a well-known axiom that "one must spend money to make money," and this cannot be avoided.

The money for rent, light, taxes, delivery charges, and salaries, all has to be spent before money can be earned to constitute a profit, and in the same way advertising is coming to be regarded more and more as an inevitable charge.

There is no experimental work in advertising nowadays, as it has been conclusively proved to be a profitable investment, but the question is, what is the right amount to devote to this indispensable item? In this article it is proposed to endeavor to fix a standard of advertising cost whereby individual cases of advertising may be tested and a more or less satisfactory working basis arrived at.

Many traders working under different conditions in different localities have given the writer the benefit of their experience, with the result of such information imparted being of considerable value.

Broadly the trade must be classed as national and local, each having its own distinct problems to solve. It is not proposed to deal with the national advertising problem, though doubtless investigation here would demonstrate that advertising nationally is even more costly than the local. The reason to be borne in mind is that the large city stores making any State their field of operations are considered general advertisers to a degree that would never pay a local store to emulate. Consequently we are here concerned only with the traders with a definite circumscribed sphere of influence.

The average local trader who sometimes runs several departments finds his advertising a distinct problem and therefore this is the object of our consideration.

After making every inquiry and giving careful thought to the whole subject the writer believes the average figure to be somewhere about four per cent. on the gross turnover, which should cover all work and mailing charges on your mailing list and whatever press advertising is done. This may be rather a generous estimate to some, though many successful traders place it higher.

Below this figure is just enough to make advertising an irritating expense, but not sufficient to make the expenditure an investment. No man can advertise a business of this kind scientifically and profitably on less than four per cent., although it ought to be nearer the five per cent. mark.

A dealer advertising to a better class clientele at slightly under this figure obtains a small measure of results, while the aggressive dealer or store out for the trade of the Tom, Dick and Harry type, to supply everything that brings in a profit at all, must be prepared to come nearer the five per cent. of his gross turnover towards his advertising expenditure. The above

figures are arrived at by actual experience of men who regularly advertise and who should know. Furthermore, the firms who have given the writer the above information are now successful and progressive, and not likely to continue spending money without being perfectly assured it is for their own benefit and profit.

For the benefit of the doubters as to the advantage of spending so much money, a few words as to what advertising really means to a business man would not be out of place.

Far too many business men consider advertising a bugbear—they feel they ought to ad-

vertise, and when they make a spasmodic attempt, it has the experience of a nightmare, and is a constant worry until it is safely handed over to the postal authorities for distribution.

Can you wonder why such men doubt if it pays? Then again, that class of advertiser expects too much for his advertising, as should his announcement fail to produce an immediate return of orders the whole system is put down as being no good, money thrown away, etc. That is the fetish of "direct results" which has a deterrent effect on many a man who could advertise to his own great advantage, but fails to grasp the real significance of what advertising can do for him.

One of our cleverest American copywriters once said: "The essence of advertising is reputation that is indispensable to any considerable advance being made." That is a solid

truth and nothing will create reputation quicker than smart and careful advertising. It goes without saying that the written word must be backed up by the performed action, otherwise it were best that it were not written.

The greatest value of any advertisement, in the writer's opinion, however, lies in the power of suggestion. It is now well recognized that people do not always buy merely the things they want in a strict sense of the word. If that were so many talking machine houses would find, like Othello, their occupation gone.

It's the things people believe they want after reading a carefully drawn out advertisement that increase the turnover, and the fellow who draws up the advertisement helps the "almost persuaded" to make up their minds. A salesman must have his customer in front of him before he can do anything, whereas the work of the advertisement can be done anywhere, and this is its chief value.

Any particular line advertised may not be asked for at once if the talking machine is used as a side line in the business, but they have stimulated interest and brought the folks into the store to spend. That is what you pay the 4 per cent. for and it is worth it every time. Don't let it be believed that the writer has no belief in the possibility of direct sales from advertising. Such is far from the case, but the contention is that the ordinary retail business must look for more or less indirect results, in fact, will find it more satisfactory to proceed on such lines and be guided by the collective effort.

Advertising is but one link in the chain of business. One wheel in the machine set up to attract custom. Do not expect one wheel or that one link to work alone and do not expect an undue share of work from other parts by omitting it.

The consideration of one other aspect of the case must suffice for the present time. The favorite cry of one who never advertises is, "we give too good a value to be able to afford to advertise." In reality it is the advertising firm that gives good value every time, because, un-

(Continued on page 34)

The Bliss Reproducer Will Play All Records

A new superior and scientifically constructed sound box—no mica, rubber or cork used.

Beautiful full, rich tone quality, clear articulation. It individualizes each voice and instrument in the record. Greater volume with lighter needles, thus minimizing wear on records.

A demonstration of the Bliss reproducer means a sale—each sale brings another, for every music lover who hears the Bliss reproducer wants one.

Comparative tests solicited. Write today for dealer proposition.

TO MAKE PUBLICITY PROFITABLE
(Continued from page 33)

like the man who does not advertise, they have promises to live up to. Such a claim of non-advertisers is farcical as a deeper examination will prove. Take two of the most common prices in the trade, namely, 75c. and \$1. In one case it is three cents, and in the other case a consideration of four cents on each record sold. Surely it is worth such an additional outlay to increase your trade.

To pursue this argument further would soon demonstrate what a very little extra business has to be expected before the advertising pays directly for itself, but that is not a part of the purpose of this article, which has been written with a view to rendering some assistance to the man who feels the necessity of deciding the important question (what ought I spend on advertising?).

It may not be out of place to mention in conclusion of the subject having been dealt with from the point of view of an established business, although a newly started dealer would find it necessary to spend a little more.

JOS. C. ROUSH NOW IN FLORIDA

The Heatless Days in the North Will Not Bother Talking Machine Man for Some Time

Joseph C. Roush, president of the Standard Talking Machine Co., of Pittsburgh, Pa., and secretary of the National Association of Talking Machine Jobbers, spent a day or two in New York recently to confer with President Blackman of the association before leaving for his annual winter vacation with his family in Florida. Mr. Roush stated that he planned to visit all the principal resorts and would return to the North when the birds told him it was time to migrate.

JOINS VICTOR EDUCATIONAL FORCE

Miss Frances E. Ryan, formerly supervisor of music in the public schools of Escabana, Mich., is a recent acquisition to the Victor educational forces and is covering the schools in New Jersey, demonstrating the advantage of the school Victrola. Mrs. Frances E. Clark, manager of the educational department of the Victor Talking Machine Co., has outlined a splendid program that will mark a distinct advance in Victor educational work throughout the country this spring.

PUBLICITY THAT AIDS PRESTIGE

An Illustration of How Ads With a Strong Amount of Newsy Personal Flavor Help to Interest Public in a Talking Machine Store

The recent newspaper advertising of the Martin Bros. Piano Co., of Springfield, Mo., offers

MARTIN'S
DOUBLE GROUND FLOOR SPACE
HERE'S CONVINCING PROOF THAT
Martin's Music Service Is Superior
Owing to the unprecedented growth of our Victrola and Edison departments, we are forced to double our ground floor space. An inquiry has been cut to the vacant store room adjoining, thus adding 2000 square feet of floor space.
When we moved into our new building on M. Daniel Avenue in June, we thought we had provided adequate floor space to care for the wants of our customers for some time to come. The holiday rush proved our calculations wrong. It became a common occurrence for us to have every one of the half dozen world-famous Victor and Edison demonstration booths filled with customers, while others stood outside waiting to take their place.
And the Holiday Rush Has Continued—The American People Are Realizing That
Music Is a Real Necessity—Now
IN WAR-TIME MORE THAN EVER.
Our business since Christmas has proved that the rush was not just a seasonal activity, but a constantly increasing demand for music.
HENCE THE DECISION TO DOUBLE OUR FLOOR SPACE

We're Mighty Proud
Our Service Flag Has Seventeen Stars
WE are justly proud of these seventeen men who have put aside their personal ambitions and hopes to help make the world safe for democracy.
We hear from "our boys" every now and then, but we don't hear one word of complaint. Undoubtedly conditions are trying, as the life is new to them. But they have pitched in like all good Americans are doing.
We predict that they will all be men of whom Uncle Sam will be proud.
When it's all over, and the boys come home, they will find good positions awaiting them here.
Any man who leaves the Martin Bros. Piano Co. to fight for Uncle Sam is going to get his position back when he returns. That's the least we can do for him.
And we're proud of the patriotic spirit of our employees who are still with us. They are ALL doing their bit and helping to "keep the home fires burning."
They have made it possible for us to say that
Martin Employees Are
100% Liberty Bond holders
100% Red Cross and shell stamp holders
100% Red Cross members and subscribers
100% Y. M. C. A. fund contributors
With Such a Spirit, It Is Any Wonder That
Martin's Music Service Superior

How Martin Bros. Help Uncle Sam

retail talking machine department. The second piece of "copy" is a very striking way of letting the local community know about "the boys who have joined Uncle Sam's fighting forces." Particularly in the smaller-sized cities this latter type of advertisement must have a strong amount of newsy personal interest.

SUCCESS FOR THE PRESENT YEAR

The Peptimist, Issued by the Columbia Graphophone Co., Contains Interesting Forecast of Possibilities for Success This Year

Under the heading of "Success in 1918" the following timely and interesting article appears in the current issue of The Peptimist, the successful house organ published by the Columbia Graphophone Co. for and about Columbia men:

"The new year finds our world among events without historic precedent. Nations, commerce, industry, the lives of every man and woman in the civilized lands of the earth are changed. Business has changed—you must change to meet the new front.

"Success will be made of sterner stuff in 1918 than in the year past. The keynote of the world's life to-day is sacrifice. Not a home in America but gladly bears its share of the burden. At the threshold of a year which holds within its palm unguessed lines of fate and fortune we Columbia men stand, earnestly willing and solemnly prepared to do the best in our power for our country, our homes and our neighbors.

"Success is still our aim but a new one. Where is the secret of the new success?

"Success in 1918 will follow and come, and only come and follow Service. The sacrifices of millions of homes must be met with service to millions of homes.

"It is with implicit faith in its truth we state the Columbia has its share, a true and big one, in serving its country. Already from our factory, sales branches and executive offices over four hundred Columbia men have joined the colors of the greater Columbia. And those at home have a duty as well—a duty to cheer, inspire and comfort not only our boys at the front but the homes behind the boys on the firing line.

"Music is a gift to man which few can count in words but all have felt in spirit.

"A singing nation and a singing army can conquer all the powers of darkness and silence. Music serves the spirits which serve their country. Music rests the weary body, soothes the worried mind. Our highest patriotisms are expressed in song. 'Give me a singing army,' once exclaimed a great general. 'Keep on singing,' Lloyd George has exhorted his countrymen.

"And the Columbia recognizes its privilege in having a share in keeping America a singing nation. It is a service. It is this service Columbia men will keep in mind in this new year. You are not selling for the gold you can get but for the good you can do. Sell to serve.

"You are dealing with homes and hearts. 'The success in 1918 is in service. 'May your share be large.'"

ORIGINAL IDEAS ALWAYS IMPRESS

How W. G. Fulghum Told of Victrola Owners in Richmond—A Sales Developing Idea

Business is certainly humming down in Richmond, Ind., where Walter G. Fulghum is now engaged in the retailing of Victor talking machines and records. Mr. Fulghum the latter part

A Window Display With a Purpose of January informed The World regarding several of the new plans he is trying out.

One of the especially commendable ideas Mr. Fulghum introduced during the holiday season consisted in a window display, the central feature of which was a large map of the city of

Mr. Fulghum and Car in Front of Store Richmond. On this map tacks had been set in to represent every Richmond home in which a Victrola was already resident. This unique tabulation not only offered concrete evidence of the great popularity of the Victrola in Richmond homes, but also aroused considerable interest among the local inhabitants, who frequently gathered before the window in order to pick out their own personal friends in town who owned a Victrola. The size of the map made it easily possible to tell exactly what home each individual tack stood for.

Another idea, apparently simple and yet full of value, that Mr. Fulghum is now employing is what for lack of an official title may be called a score-card calendar. This presents on each sheet the days for just one month. As soon as the first machine sale is made a cross is marked through the first day of the month. Each machine that is sold thereafter means the crossing off of another day on the calendar. The goal is to sell one machine for every day in the year and at the present time the crosses have already been registered several days ahead of the actual date. This plan has developed a remarkable "esprit de corps" among the salesmen as every one in the organization watches the calendar with keen interest and fights to keep the sales right up to scratch.

Two Fords comprise Mr. Fulghum's motor fleet. One of these is a delivery car and the other, a picture of which is herewith shown, is utilized for direct personal solicitation.

TRAVELERS' LICENSE IN CHILI

The United States Consul General L. J. Keena at Valparaiso, Chili, reports that importers in that country are urging enforcement of the law of December 22, 1916, imposing a license tax of 1,000 pesos (about \$240) on foreign commercial travelers. The importers threaten to refuse to do business with any salesman who has not obtained the necessary license.

EDISON PHOTOGRAPHED IN TYPE

Wm. Maxwell Presents a Masterly Review of Edison's Ideas and Ideals in American Magazine

In a five-page article captioned "Edison—the 'Original Man From Missouri,'" William Maxwell, vice-president and general manager of Thomas A. Edison, Inc., and who enjoys a wide reputation as a writer, has set forth in the American Magazine for February a most interesting analysis of Thomas A. Edison, written from the viewpoint of one who has been closely associated with him and knows what he demands of his associates and of himself, as well as something of his ideas and ideals.

Mr. Maxwell emphasizes particularly Mr. Edison's wonderful capacity for work and his ability to get at the bottom of a problem. He mentions that there are few golfers in the Edison organization, because the men are kept so busy that they do not find time for that particular sport. Mr. Edison, their boss, demands that a thing be done thoroughly, that an employe must not skim the surface, but must dig into the fundamentals of his work.

Of the kind of men Mr. Edison has associated with him Mr. Maxwell says: "Mr. Edison likes men who will dig down to the roots of every problem they encounter. He has small patience with the man who is content to look superficially at a problem and theorize concerning the number and character of its roots. That is why he likes industrious men.

"You, perhaps, have a 10 per cent. greater brain equipment than I, but if I work twelve hours a day and you work only eight, Edison would prefer me to you. He recognizes, of course, that some men are smarter than others; but in his estimation there is no degree of ability that will outweigh laziness or lack of application. The nonchalant genius of business fiction has no place in the Edison organization. No man can last or, at least, no man can achieve importance in Mr. Edison's eyes, unless he is a tireless worker."

Mr. Maxwell has succeeded in drawing a word picture of Mr. Edison that will prove a revelation even to those privileged to have a business acquaintance with the great inventor. He has brought out facts often overlooked in the average biography, and portrays Mr. Edison not as a man apart but as a man among men. He points out that there are two Edisons—"one is the Edison of coldly scientific mind, who reasons ruthlessly and relentlessly to a conclusion far beyond the average man's foresight. The other is an Edison vividly human, intensely sympathetic, extremely generous and incessantly active in the interests of mankind. Edison can be the lion that he resembles, he can even be unjust; but he is never avaricious, and he is unfailingly generous."

A full-page photograph showing Mr. Edison in a characteristic pose accompanies this vivid and interesting human interest article.

FINE BUSINESS RECORD IN LOUISVILLE

The talking machine department of the Kaufman-Straus Co., Inc., Louisville, Ky., of which H. V. Boswell is manager, has been moved to the second floor, a much better location than heretofore, where a good stock of Edisons and Columbias is being shown. Business last month showed an increase of 25 per cent. over the same month last year, while an idea of the holiday business may be gleaned from the fact that the day before Christmas the department sent out thirty machines, all sold for cash.

SOME PERTINENT POINTERS

Customers are guests, and more, they are guests that pay. Be sociable with your customers; they like it. The more people you know personally, the greater can be your hold upon your trade. If people talk about your store, if it becomes noted, you will do business. Get all your store improvements commented upon in the news columns of your papers. It costs you nothing and it all counts.

The DELPHEON COMPANY
BAY CITY MICHIGAN

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., February 4.—The month of January was a profitable one for talking machine dealers in this city, despite conditions that served to keep the trade guessing most of the time. The poor transportation facilities handicapped the jobbers considerably in the shipment of their machines, but the fact that it was hard to ship machines out of the city worked to the advantage of local dealers in carting distance of the jobbers warehouses.

Although there was considerable improvement in the Victor machine situation during the month, both jobbers and dealers were only able to get a percentage of their record orders filled from the factory. Due, it is believed, to various conditions, including labor, governing record production. Dealers in Columbia and Edison lines also reported stock shortage, due to delayed shipments from the factory. The trade, however, is keeping up courage, and for the most part is optimistic regarding the future.

New Columbia Dealers' Service Pleases

The Columbia Graphophone Co. (formerly the Pennsylvania Co.) report that their business in January was quite satisfactory, and especially so considering the circumstances. Their new dealers' service has been meeting with hearty approval, and the latter appreciate the assistance the Philadelphia office is giving them in the exploiting of the Columbia, both machines and records. They had an enormous record business in January, and having had the foresight to order heavily, they felt little the inconvenience in the delay of shipping, caused by the weather and the freight embargo.

W. C. Fuhri, formerly the district manager here, has gone on a trip to Florida for a rest, and will not return until the end of the month. The Dictaphone office of the company, now at 924 Chestnut street, has changed managers, C

J. Welford being replaced by Clifford Malliet.

O. F. Jester, formerly connected with the Baltimore store of the Columbia, has joined the Philadelphia offices as salesman. The local manager says that he is very optimistic over the business this year and adds: "I feel that if we get some relief from this transportation condition, it will be the greatest year in the talking machine business."

Business Good With Buehn Co.

Louis Buehn, of the Louis Buehn Co., says that their business has been very good, considering the situation. "We were tremendously handicapped by the lack of goods, especially records, and by shipping difficulties, but in spite of all these troubles we have had a very good month. Our machine shipments this month have been about on a par with last year."

Gillies Co. Buys Connor & O'Neill Stock

The James B. Gillies Co., talking machine dealers at Broad and Susquehanna avenue, have purchased the stock of Connor & O'Neill, and has removed it to his store. The Connor & O'Neill firm have been located, for a number of years, on Fifteenth street, below Chestnut. Mr. Gillies has one of the finest stores up town, and is constantly being compelled to enlarge it.

Increase Prices

G. Dunbar Shewell, who is the eastern representative of the Cheney talking machine, has announced in the papers the past week that the Cheney will be raised in price from \$15 to \$25 beginning the first of February.

Dictaphones for Large Companies

The Dictaphone Co. report that their business was very fair in January, and they believe it will be very good from this on. Owing to the great scarcity of stenographers and typists they have just placed a complete outfit of the Dictaphone in "The Grit" office at Williamsport;

with George Wharton Pepper; the Lehigh Portland Cement Co., of Allentown; and the Atwater-Kent Mfg. Co. have added a large complement of machines during the month.

Penn Co. Stocking Up

Manager Barnhill, of the Penn Co., says that "In January our business was about as good as could be expected under the weather conditions, the freight embargo, and the impossibility to move stock promptly. Records have been very scarce and especially in the better grades." Mr. Barnhill, however, believes that business is going to be first rate this spring and summer, when transportation again becomes normal, and they are getting in a stock that will assure them the ability to fill all orders, and with promptness. J. Fisher, of C. C. Mellor Co., Pittsburgh, Pa., was one of the recent visitors to the Penn Co.

Weymann's War Music Display

H. A. Weymann & Son have this week a very attractive window, in which they show how the Victor talking machine is an absolute necessity in war times. They have the machines and records done up in non-destructible packages, and about these packages are war relics picked up in many sections, and especially from the war front in France. They report that their Victor business in January was very good, and believe that the remainder of the winter and spring is going to make an excellent showing, for Mr. Weymann says that music, he believes, has become a war time necessity.

Pathé Shop Getting Results

The Pathé Shop has been having a most excellent business in January. While there were only nineteen working days in the month, they have put forth their best efforts and have made every minute count. Their business was not

BUEHN SERVICE

AGGRESSIVE Victor Record selling is the key-note of 1918 work. You cannot exhaust the record sales mine. Doubling of record aggressiveness this month actually increases your sales for March, too.

And so it goes—an endless chain of profits.

A stimulated record buying sustains its own buying power if you maintain the momentum with suggestions.

BUEHN SERVICE sees that the records you recommend are in your store to DELIVER. It is the deliveries of sales that prove the value of your record work and Buehn Service is most vital to record sales success.

Buehn Service does only one thing—"delivers the goods." And with the deliveries goes the co-operation that is helpful because it represents the nucleus of the information on problems solved by other dealers.

Buehn Service means a great deal to you in 1918.

THE TRADE IN PHILADELPHIA

(Continued from page 36)

quite as good as in December, but of this they have no cause to complain. They are finding considerable difficulty in making shipments to their dealers, but through judicious management they have been able to keep all their dealers and have added a number to their already long list during January. They report that business looks very promising for February. Walter Eckhardt, the head of the Pathé Shop, was in New York on Wednesday of this week. They expect, in February, to make quite a publicity campaign, and are arranging some extensive recitals to be given at their warerooms.

The Pathé Shop must be seen to be appreciated. It is one of the show places of the city. It is most artistic in its color effect and the arrangement for business, and customers cannot go away without a most pronounced impression of everything about the place, whether it is the Pathé machines and records, or the fine accommodations that Mr. Eckhardt has made for their comfort and convenience.

Closed Great January Business

Herbert Blake, of Blake & Burkhart, reports that their business was very good in January. It was the biggest January they have ever had with the exception of 1916, when their sales were extraordinary for that month. This month, Mr. Blake says, has started off very good, and that it looks very promising. He is especially pleased with the February list of Edison records, which contains many Broadway hits.

Gathering of Edison Dealers

On Tuesday night next at the monthly meeting of the Edison dealers here, which will be held at the Bingham House, T. J. Leonard, the sales manager of the Edison Co., will address

the association. Charles Gardner, the district superintendent for this district, will also be present and is expected to make a speech. They expect to have present about twenty-eight to thirty dealers.

DOMESTIC CORP. CHANGES

Horace Sheble Resigns as President and General Manager—George Anderson, Treasurer of Company, Now in Charge of Business

George Anderson, recently elected treasurer of the Domestic Talking Machine Corp., of Philadelphia, became acting head of that concern on January 26. Mr. Anderson succeeds Horace Sheble, the former president and general manager. Mr. Sheble's retirement is entirely voluntary and it is rumored he is to take up Government war work. He carries with him the best wishes and hearty good will of his associates and the board of directors.

DEATH OF MRS. D. K. WENDHEISER

Mrs. Delia Kivel Wendheiser, widow of the late Peter Wendheiser, founder of the Wendheiser Music Store at Rockville, Conn., and mother of George P. Wendheiser, at present a well-known piano and talking machine dealer in that city, died recently at the family homestead.

PLANT DESTROYED BY FIRE

The plant of the Carolina Veneer Co., Columbus, S. C., was totally destroyed by fire last week with a loss of \$100,000. Among the stock destroyed was much cabinet veneer intended for talking machine manufacturing, the shipment of which had been held up by traffic conditions.

TALKING MACHINE MEN MEET

First Session of New Year Held on Wednesday—Amendments to By-Laws Passed—To Determine Membership Status of Jobbers

The first meeting of the new year held by the Talking Machine Men, Inc., took place on Wednesday, January 23, in the rooms of the Merchants' Association in the Woolworth Building, New York. President J. T. Coughlin, of the association, presided, and one of the most successful meetings held in some time resulted.

The action of the executive committee at a recent meeting making an amendment to the by-laws to require seven days' notice of intention to propose a new member, was adopted and the amendment will provide two days for the membership committee to investigate the candidate and allow the secretary to give the usual five days' notice by mail to every member of the organization.

The committees appointed several meetings ago to solicit new members and also try and persuade the larger stores to charge 6 per cent. interest on instalment sales reported progress and a new committee was appointed to assist them in their endeavors. It is thought that with a campaign along these lines during the next few months the association will be able to announce that every dealer in the Greater City is charging 6 per cent. interest on time sales. Already a number of local dealers have put the interest clause into effect and this has also been done by dealers who are located in the New Jersey district.

The executive committee also sent out a letter a number of days ago to the leading jobbers to find out the consensus of opinion in regards to whether they wish to continue as active or associate members. This is a question that has come up many times during the past year, and the letters from a number of jobbers show the majority of them feel they can be of more value to the organization as associate members than otherwise. This includes the opinion of Chas. H. Ditson & Co., S. B. Davega & Co., Ormes, Inc., American Talking Machine Co., Emmanuel Blout, and I. Davega, Jr. A letter from J. Newcomb Blackman, of the Blackman Talking Machine Co., who has been interested in the Talking Machine Men, Inc., since the birth of the organization, gave it as his opinion that the jobber and distributor can be of more assistance as non-member. A letter from him stating his views was read and made a distinct impression upon the meeting.

The law committee was instructed to draft an amendment to the constitution which will embody the ideas of the distributors as well as the association in regard to their activities as members. This will be done after an amicable agreement is reached with the distributors as to the fee they should pay for membership. The constitution will be amended to take in the distributors as associate members at a somewhat larger fee than is now in force, which is \$3.

The secretary was instructed to address a communication to every member to find out their views in regard to the suggestion to close all talking machine stores at 9 p. m. If it is not feasible to close in every district at that time it may be found a good idea in certain localities, and, with the expressed opinion of all the members, agreements in different sections can be made.

TRADE CONVENTION POSTPONED

Fifth National Foreign Trade Convention to Be Held April 18, 19 and 20

The executive committee of the National Foreign Trade Council announced this week that, owing to the railroad congestion and the desire of the Council to co-operate with the Government in the relief of the situation due to the war, the dates of the fifth national foreign trade convention, to be held at Cincinnati, O., have been changed from February 7, 8 and 9 to April 18, 19 and 20.

THE VICTOR TALKING MACHINE COMPANY, in recognition of his twenty years of active service as Manager of the Traveling Department, has appointed
Mr. GEORGE D. ORNSTEIN

a Wholesaler of Victor Products in the city of Philadelphia and the neighboring territory. In order that the retailers of that district may enjoy the benefit of Mr. Ornstein's unique experience, the undersigned company has been incorporated to carry on an exclusively wholesale business, with temporary quarters at **9 North Eleventh Street, Philadelphia**, for the purpose of providing the retail trade with the most direct, efficient and satisfactory service.

Very sincerely yours,

THE GEO. D. ORNSTEIN COMPANY.

INDIANAPOLIS DEALERS REPORT LARGE JANUARY TRADE

Record Business Has Been Exceptional—People Staying More at Home Has Helped Sales—How Victor Publicity Helps—Good Demand for Talking Machines But Difficult to Get Them

INDIANAPOLIS, IND., February 5.—Although the month of January was the coldest in the history of the local weather bureau and in spite of the closing orders of the national Fuel Administrator, the local talking machine dealers generally report that they did better business during the month than they had expected.

All of the dealers said the record business was exceptional and they attributed this to the fact that the closing of theatres on Tuesdays, together with the extremely cold weather, indicated that people were staying at home and enjoying their talking machines.

The weather moderated considerably during the last few days and this had the effect of stimulating the sale of machines. Most of the dealers express the opinion that the Monday-closing order simply makes Saturday or Tuesday a bigger day in sales and that the loss of Monday does not figure to any extent on the week's business.

"Our record business increased during the month and the sale of eight machines on the first Tuesday after the first Monday holiday indicates that we are making up for the lost Monday business on Tuesdays," said A. H. Snyder, manager of the Edison Shop. The total January business was ahead of last year in the same month, he added. Mr. Snyder is working his outside salesmen in zones and his plan is panning out well.

H. A. W. Smith, manager of the Pathé Shop, said that Tuesday business was showing up well, but he doubted whether it was offsetting the loss of Monday. The January business as a whole was good, he said.

H. E. Whitman, manager of the talking machine department of the Pearson Piano Co., reported that the record sales were far ahead of January of last year. Both the Edison and Victor machines were in steady demand, but a shortage of stock has been the worst problem, Mr. Whitman said.

This Christmas the Pearson Co. did not send out larger machines to be exchanged later for the smaller models when they arrived and as a result it was able to sell most of the largest machines.

C. P. Herdman, manager of the Columbia department of the Baldwin Piano Co., said that while the weather had naturally affected business it had held up well and that with a change in weather conditions he believed it would soon be back to normal.

A. E. Pfeiffer, manager of the Starr Piano Co. store, said that the Starr records and machines had enjoyed a good business in spite of the weather, although the Monday holiday closing was affecting business to some extent.

George Standke, manager of the Brunswick Shop, ran an ad on optimism on the first Monday closing holiday and he received congratulations from many persons on its timely appeal.

He was in Chicago this week conferring with the factory managers and company officials. The art model, No. 1500, of the Brunswick has attracted considerable attention on display in the shop.

Among the wholesalers the chief complaint has not been a lack of demand for talking machines but the shortage most of them have to worry with due to transportation.

R.-B. Goldsbury, of the Pathé department of the Mooney-Mueller-Ward Co., said that January had been better than anticipated, the record business being exceptionally brisk. A number of new contracts have been signed with dealers.

Edgar Eskew, formerly manager of the department, has resigned.

The People's Outfitting Co. has had an exceptional run on Pathé machines. During the last six months only one-half of one per cent. of the records shipped to dealers have been returned, Manager Goldsbury said, adding that this indicates the strong demand for records throughout the State.

At the Stewart Talking Machine Co., Victor jobbers, it was said that the demand for machines was much heavier this January than in 1917, but that transportation difficulties had kept the business down.

The national advertising done by the Victor Co. is bringing practical results, according to the Stewart Co. From fifteen to twenty inquiry cards sent to the Victor Co. by prospective buyers have been reaching the Stewart Co. every day. These cards are in turn sent to the nearest Victor dealer.

The local Victor dealers are expecting a large demand for the records of Jascha Heifetz, the Russian violin marvel, who will play in Indianapolis February 14.

The appearance here last week of Victor Herbert with the Cincinnati Symphony Orchestra boosted the sale of the Herbert records. A large number of the latest musical comedies are scheduled to appear here in the next few weeks and the record song hits of these shows will be in demand.

O. C. Maurer, in charge of the Sonora department of the Kiefer-Stewart Co., was a guest at the convention of Sonora dealers held under the auspices of the Yahr & Lange Drug Co., of Milwaukee, Wis., recently. Mr. Maurer said that the enthusiasm evinced by the Wisconsin dealers in spite of the cold weather that prevailed was notable and he added that he obtained a number of good points from the meeting.

Walter E. Kipp, of the Kipp Phonograph Co., Edison distributors, said that there was no complaint to make about the demand for Edisons.

H. A. Verkes, field sales manager of the Columbia Co., and Ben Brown, manager of the local branch, went to Louisville, Ky., last Mon-

day. The Grafonola Co., of Louisville, enjoyed an unusually big January business, the chief difficulty being in getting the machines, Mr. Brown said.

KEEPING UP ORDER DELIVERIES

Boston Book Co. Makes Good Shipping Progress Despite Handicaps—Pays Employees in Full for Time Lost on "Workless" Days

The Boston Book Co., manufacturer of record albums, has been making reasonable progress in the shipping of its orders despite the condition now affecting the railroads. The company has been in a nice position in regard to the materials entering into its products as it has large quantities on hand and in storage for now and future use. J. M. Alter, president of the company, in speaking of trade conditions recently, said: "The demand for our albums is greatly on the increase and from the indication of the orders arriving in every mail the talking machine industry is preparing for a year of great prosperity." The Boston Book Co., in following out its plans of keeping its labor standards on the highest plane, paid its employees in full during the recent five-day closing period and will continue to pay them for the lost Monday of each week. During the period when coal was scarce the company bought oil heaters to supplement the low pressure in the steam pipes, thereby keeping the temperature of the plant up to normal.

We are all inclined to kick when difficulties come our way, and it is a well-established fact that some of the keenest pleasures of life come from successfully overcoming difficulties.

SHORTAGE OF STOCK IN CLEVELAND A SERIOUS PROBLEM

Matters of Interest to Be Discussed at Coming Banquet of Talking Machine Dealers' Association of Northern Ohio—Displaying Records at Food Show—Fischer Co. Doing Fine Pathé Business

CLEVELAND, O., February 6.—Shortage of stock, for which the responsibility is divided between the factories and the railroads, workless days, as prescribed by the Fuel Administrator, and other conditions similar to those affecting business throughout the East, serve to put a slight damper on the talking machine trade in this city, although the jobbers and dealers are going right ahead endeavoring to get the best results possible in the face of the handicaps.

C. K. Bennett, general manager of the Eclipse Musical Co., and the new president of the Talking Machine Dealers' Association of Northern Ohio, states that at the annual banquet of the association, to be held on February 20, an effort will be made to thresh out the problems for the benefit of the dealer. He states that one particular point will be emphasized, the necessity of pushing stock records that do not have the call under ordinary conditions. He says this is the time for the real salesman and not for the fellow that travels along the line of least resistance.

At the annual Cleveland food show this week a practical demonstration of how phonograph records are made is being given by C. A. Johnson in the booth of an exhibitor. He explains in detail how records are turned out so they may furnish pleasing music in cafes and dining rooms while diners enjoy their meals. This feature of the show has greatly excited the interest of the thousands of visitors.

The annual meeting of the Cleveland Music Trades' Association will be held February 14 at the Hotel Winton. Several talking machine dealers are members and out of town guests are expected.

This association recently expelled one of its members, who, it was declared, resorted to unfair methods in advertising. It was declared he

advertised second-hand instruments without using the word "used" in his ads.

Not for months has Cleveland seen a bigger campaign of publicity for any talking machine than that launched January 27 by the Young Furniture Co. This concern operates two immense stores in Cleveland, one in the swell shopping center of the upper Euclid avenue section, and another in West Side. Full newspaper page advertisements pointed out the merits of the phonographs handled by this house.

The Muehlhauser Brothers Piano Co., organized last October, opened a modest sized store at 1613 Euclid avenue, somewhat out of the lower shopping district, and began an active fight for business. It came right off the reel, in Hallet & Davis pianos and Sonora phonographs. The firm of four brothers did not have to make its name known, for the brothers had already established their reputation with the Cleveland trade. Since opening an additional storeroom has been found necessary, so the firm's future is assured, despite the handicaps met at the start in getting stock.

The Fischer Co., 25 Taylor Arcade, Ohio distributors for Pathé phonographs and records, is doing a splendid business despite war conditions.

Buescher's, 1016 Euclid avenue, still glories in the sale of Victrola outfits and Victor records. This firm carries a large stock of records and machines.

Gennett records reproducing Helen Ware's violin music are features widely advertised by the Starr Piano Co. The firm carries a complete library of Gennett records.

The Clifton Furniture Co., Madison avenue and West Ninety-ninth street, has joined others using phonographs to attract patrons.

The McMillin Music Co., 2053 East Ninth

street, continues to champion Victor records accompanied by their slogan, "Cleveland's Leading Music Store."

John McCormack, great tenor, is coming to sing for the Red Cross in Keith's big Hippodrome, March 3. As soon as McCormack's coming was scheduled dealers handling McCormack's songs and records reproducing them got busy with window displays and catchy ads. Meanwhile everybody is trying to get educated to McCormack's wonderful songs which the talking machine has popularized in every music-loving home in Cleveland.

The Fischer Co. declares the Edison record, "On the Banks of the Brandywine," is one of the winter's best sellers, while Harry Lauder's "Wee Hoose 'Mang the Heather" is another of the Victor records having a phenomenal run since Lauder appeared here in person.

The Eclipse Musical Co. has been having a run on Victor records reproducing the music of Jascha Heifetz, the new Russian violinist, who will appear in person in Gray's Armory tomorrow night. Cleveland violinists pronounce the new Russian a wonder with "his fiddle."

A Pathé record that is a winner here is the "Arrival of the U. S. A. Troops in France." Fred Fairbanks' "It's a Long Way to Berlin," another Pathé record, is also a big seller at stores handling these favorites.

Song hits which carry inspiration for the boys in military camps and "over there" characterize the offerings of most of the talking machine dealers. "La Marseillaise," by the Gennett Military Band, is a Starr hit among the latest records. "The Royal Hymn of the Republic" is another Starr catch.

The New Edison is attracting attention and selling rapidly at the two establishments of the Phonograph Co., whose main emporium is the entire third floor of the building, 1240 Huron road.

The Dictaphone Co., 1375 Euclid avenue, reports a good January business, particularly the latter half of the month.

"MICKEL"

A Great Name in the Victor Game

YOUR Part of the Country Is No Different Than Any **OTHER** Part of the Country, and Victor Record Sales Are Increasing Daily, Hourly, in **EVERY** Part of the Country!

The point we want to make, is THIS—Are you making the most of the situation? Are you making the most of our superior sized stocks? Are you making the most of the "SERVICE" we offer? There are so MANY things to be gained if you will make an immediate contract with—

80 records with album
space.

Price \$150—with electric
motor \$175.

"Play It Yourself"

Quality Wins Again

The talking machine trade has shown its enthusiastic appreciation of a high grade product by ordering liberally. So liberally that the initial cutting of the Widdicomb Phonograph was not sufficient to supply the insistent demand.

But during March we will be able to ship to all buyers.

*The
Widdicomb*

A Finished Product

The most expensively constructed and intelligently assembled phonograph in the world in its respective class is now ready for those dealers who believe in "quality first" last and all the time.

THE WIDDICOMB PHONOGRAPH IS MADE

*For the dealer who wants to offer better value for the money
For the dealer who wants a better profit than usual
Do you come under this classification?*

If so send for our catalogue *now*, and secure a Widdicomb agency or still better—send for a sample instrument and "*Play It Yourself.*" Compare it point by point with the machine that you consider the best.

Aside from the beautiful case, noiseless precision motor, efficient filing device, and great attention to all details, you will be greatly impressed with the perfectly natural tone reproduction of the Widdicomb and will enjoy the sensation of controlling that sound from a distance by the medium of our sound modulator with which each Widdicomb is equipped.

These good points all mean sales for the Widdicomb dealer.

**Aggressive jobbers will do
well to connect with this line**

MILWAUKEE DEALERS ARE TOO PATRIOTIC TO COMPLAIN

Believe in Carrying Out Instructions of Government—Dealers Had Excellent January—Jobbers Short of Stock—Sonora Dealers in Convention—Entertained by Yahr & Lange—News of Month

MILWAUKEE, Wis., February 10.—Milwaukee talking machine dealers are just a bit too patriotic to make serious complaint over the effect of the Federal Fuel Administration order which restricted business to five days a week during the last half of January and early part of February. Nevertheless, it is a fact that the curtailment has cost all of them a considerable volume of business and the only compensating feature is that every other line of business suffered, too.

Under the circumstances, local talking machine dealers have been doing mighty well since the holiday season passed. Although one full business day has been taken away from them, they have made the best of an unfavorable situation and worked so hard on the other five days of the week that most of them have been able to equal or even improve upon the volume of business for the corresponding period of 1917. It can be imagined how it would have been possible to show good gains if the "fuelless Monday" order had not been promulgated.

Local jobbers state that they still are not able to procure all of the stocks that are required to fill the demands upon their retail dealers, and they express the opinion that under existing conditions in manufacturing, traffic, and other phases of the situation, it is not likely that a surplus can be accumulated for some time to come. It is felt, however, that it is better to have a shortage than a considerable surplus, and by this token existing conditions are better than those of the reverse.

Harry A. Goldsmith, secretary of the Badger Talking Machine Co., Victor jobber in Wisconsin and Upper Michigan, says that the business situation in the territory served by the house is unusually favorable, considering war-time conditions. While the Badger Co. is in a somewhat better position to fill orders than in recent months, including the holiday rush, there is still a large shortage of numerous styles. Records, needles and other supplies are not to be had in the volume demanded by the state of business. As a matter of fact, the shortage of supplies and accessories is relatively greater than that of machines.

A. G. Kunde, Columbia jobber and retailer, expressed the opinion that business is being maintained at a level that is rather surprising under the conditions. While trade could hardly be expected to be as brisk during the first month and a half of the new year as it was during the last two months of the old year, it is better than anticipated.

At the Edison Shop, Edison jobber and retailer, much time in recent weeks has been devoted to overcoming the effects of the big fire which caused a heavy loss early on Christmas morning and wiped out a considerable part of the wholesale stock. Shipments have been coming in fairly good volume and while stocks are not yet what they should be the Edison dis-

tributors are much gratified over the situation.

Paul A. Seeger, manager of the talking machine department of the Edmund Gram Music House, representing the Aeolian-Vocalion and Columbia, is very much pleased with the condition of business. It has been Mr. Seeger's experience that the higher-priced styles have been selling relatively better than others. This does not mean that medium and low-priced styles are not moving, for many excellent sales of these are being made right along. Yet the tendency has been toward the costlier machine, due probably to the better financial position of buyers who patronize the Gram house.

Yahr & Lange, Sonora jobbers for Wisconsin and Upper Michigan, recently entertained more than one hundred of its retail representatives at a first annual sales convention and banquet at the New Plankinton House in Milwaukee. Fred E. Yahr presided as toastmaster at the dinner, and among the principal speakers were F. D. Andrews, Minneapolis, and O. C. Mauer, Indianapolis. Since taking the wholesale representation of the Sonora a year ago, Yahr & Lange have built up a remarkable organization

ARRANGE TO MEET ALL DEMANDS

Vice-President Ravis, of the New York Album & Card Co., Tells of Increased Facilities—New Representative for New England

In a chat this week with *The World*, Philip A. Ravis, vice-president of the New York Album & Card Co., 23-25 Lispenard street, New York, commented as follows regarding general conditions:

"With the additional facilities that we are now utilizing in the production of our albums we have every reason to believe that we will be in a position to supply our clientele promptly with albums the coming season. However, I would suggest that the dealers anticipate their requirements wherever possible in view of shipping difficulties at the present time and in order to make sure that the albums will be on hand when they need them. With the additional space which we now occupy we have also increased our facilities for printing delivery envelopes, and this branch of our business is steadily growing.

and given the Sonora one of the finest introductions ever enjoyed by a talking machine line in this territory.

George F. Ruez, president of the Badger Talking Machine Co., Victor jobber, and interested in numerous other concerns of note in the talking machine world, has been elected a director of the Merchants' and Manufacturers' Bank of Milwaukee.

A fourth store has been opened at Thirty-second street and North avenue by Kroeger Bros. Co., operating department stores at First and National avenues, Fifth avenue and Mitchell street, and Eighteenth street and Fond du Lac avenue. The Pathé departments establishment on December 1 in the three stores have been extended to the fourth store.

Edward Quick, 180 Villard avenue, North Milwaukee, is a new retail representative of the World phonograph.

H. L. Sorenson, Neenah, Wis., has recently enlarged his store and added a complete display and stock room, with demonstrating booths, to accommodate his rapidly growing Victor department.

Miss Gertrude Louise Gram, daughter of Edmund Gram, Steinway and Aeolian-Vocalion representative at Milwaukee, was married Saturday, February 9, to Frank W. Magin, a well-known manufacturer of Milwaukee.

"Our new No. 1012 album is meeting with a ready sale throughout the country and the dealers are greatly pleased with the distinctive features embodied in this album. Our metal-back album continues to be a prime favorite with our clientele and is giving excellent service everywhere."

L. W. Hough, well known in the New England talking machine trade, has been appointed New England representative for the New York Album & Card Co., with headquarters at 20 Sudbury street, Boston, Mass. Mr. Hough will carry a complete line of the company's albums in stock at all times and will also carry a stock of delivery and stock envelopes.

NOW SOLE PATHE DISTRIBUTORS

The Pathephone Sales Co. of New York, Inc., 111 East Fourteenth street, New York, is now the sole distributor for the Pathé products in the metropolitan territory, having taken over the interests of the Pathephone Distributors Co. and the Stilwell Co.

ADAMO DIDUR

INVENTS NEW RECORDING METHOD

New York Engineer Applies for Patent on Multiple Diaphragm Phonograph—Each Instrument of Orchestra Recorded Separately on Film—Reproduced in Synchrony

H. Hartman, electrical engineer of New York, has invented and applied for patents on a multiple diaphragm phonograph, or electric orchestra, which offers a brand new idea in the recording and reproduction of musical sounds. It is claimed by Mr. Hartman that recording for talking machine records as at present conducted is limited in its possibilities, owing to the fact that a single diaphragm must take and record the tones of a great variety of instruments at one and the same time. He points out that as the musical vibrations produced by a violin and contrabasso are widely different, as are the vibrations produced by other orchestral instruments, it is not scientifically possible to record perfectly all the instruments at one time, because the diaphragm cannot respond simultaneously with the great variety of vibrations.

In recording for Mr. Hartman's electric orchestra he uses, in place of the usual records, a special film on which the tones of every instrument in the orchestra, to the number of forty-eight, if desired, are recorded in a separate track. By recording the music of each instrument separately the diaphragm can confine its action to the particular vibration of the one instrument and therefore there is no confusion or distortion of sound.

For the purpose of reproduction the film is wound on a reel and is led from a special compartment over guide rollers to a long, narrow and horizontally arranged department which contains as many sound boxes as there are record lines on the film. The sound boxes are separated as far as possible, and each is provided with a separate trumpet, the various trumpets being arranged in rows facing the audience. In order to regulate the movement of the film it is taken up over a sprocket wheel or on a drum at the opposite side of the cabinet. It is stated that a film of 1,500 feet in length will play continuously for more than an hour, and when the end is reached can be readily replaced by another film bearing other music. The sound boxes are fixed in position, welded to one another and rest freely upon the film, with the needle in a certain sound line. Sapphire and diamond needles are used to avoid the necessity of changing needles. It is claimed by the inventor that the device has been so perfected that perfect synchronization is obtained between the various instruments in the reproduction of the record.

Mr. Hartman is also the inventor of the "speaking clock," which also uses a flexible film, two inches wide, in place of the usual type of record. Operation of the clock is so arranged that the exact time is announced every fifteen minutes. A continuous film is used that runs twelve hours before regulating.

ONE PLAN FOR SAVING SALES

John F. Ditzell, of the Famous & Barr Store, Takes Advance Orders for Machines and Has Customer Make Payments Until Machine Is Delivered—Follows Automobile System

ST. LOUIS, Mo., February 6.—Several models of Victrolas have been very scarce in this market since the holidays, notably those formerly sold for \$100, \$125 and \$75. It was impossible for most if not all of the dealers to make deliveries of these machines in popular finish. John F. Ditzell, of the Famous & Barr talking machine department, solved the selling problem and it was not the old-time solution of putting in another make machine.

Mr. Ditzell's solution was the selling of ownership certificates. He explained it to the customer in this way:

"There are many popular articles of merchandise that you must wait your turn for. For years buyers of Ford automobiles have paid their money to get their names on the delivery program of that company. They cannot be insured delivery without paying a part or all of the money. Victrolas are like the Fords, the demand at present exceeds the supply.

"We do not know just when we can deliver this machine to you, but if you begin paying now you will get the first machine of this model that we receive. We will deliver it just as soon as we can."

It is surprising to many folk that the plan has succeeded and some of the most surprised persons are on Mr. Ditzell's force. They predicted that the plan would not sell any machines, but it has. In one case the buyer not only paid in full for the machine, but he has visited the store several times to hear records and make his selection and these are paid for and have been put aside to be delivered to him when the machine arrives. This many, and the others who have not paid as much, are content because they are going to get exactly what they want as soon as it is possible.

Mr. Ditzell tells rather an amusing story in this connection, which illustrates the point. E. C. Rauth, the Victor wholesale distributor here, had ordered a Buick car of a certain model. The company did not have that car, so Mr. Rauth made a payment and was assigned to a place on the delivery list. Some time later Mr. Ditzell decided to buy a Buick car, but he picked another model and this sort was ready for delivery, so, despite the fact that he started later than Mr. Rauth, he was driving a Buick first. This fact, he said, rather surprised Mr. Rauth, but he told him that it was exactly the

same proposition as the Victrola situation. Those who selected the models in stock got immediate delivery, while those who selected other models had to pay their money and wait.

BUILDING UP SUCCESSFUL BUSINESS

The Faultless Caster Co. Closes Many Contracts With Talking Machine Manufacturers

The Faultless Caster Co., Evansville, Ind., one of the most successful manufacturing concerns in the Middle West, has closed a number of contracts with prominent talking machine manufacturers whereby the company's casters will be used exclusively on 1918 product. The Faultless Caster Co. manufactures a complete line of high-grade casters, suitable for all kinds of furniture, and has perfected a special caster for talking machines designated as C-6-5 which has won the endorsement of well-known manufacturers, including Thomas A. Edison, Inc., the Sonora Phonograph Corp. and the Aeolian Co.

The C-6-5 caster is a nickel-plated, steel wheel caster, and as the company guarantees all of its casters against imperfection of workmanship and material, talking machine manufacturers using this caster have called the attention of their dealers to its merits and the fact that it is absolutely guaranteed.

The Faultless caster was awarded a gold medal at the Panama-Pacific International Exposition, and in fact this caster has won recognition from the most successful furniture manufacturers as a product which embodies all the necessary requirements for use on the most expensive manufacture. The Faultless Caster Co. manufactures 500 styles of casters for different uses.

A recent circular issued by the company featuring the C-6-5 caster for talking machines emphasized the following points of superiority as compared with the ordinary caster: (1) All the weight rests on a round-headed pivot stem; only one point of contact in each caster—friction reduced to a minimum. (2) Springs fitting into the neck of the stem never allow the caster to drop out of the socket. The caster, however, can be pulled out at will. (3) A washer fitting around the track plate strengthens and gives long life to the socket. (4) The steel wheel is made of two shells, one fitting inside the other. The outside shell being rimmed leaves the edge smooth and this evenly corresponds with the other side of the wheel. (5) A reinforcement around the bushing holds it tight and gives the wheel double strength and long life. (6) Stem made of screw stock steel is tapered so the caster will be held in true alignment—always ready for maximum service with minimum effort.

HEAVY RECORD DEMAND A FEATURE OF BUFFALO TRADE

Dealers Building Up Great Business—Remarkable Industrial Activity in Buffalo Helping Trade—Goold Bros. Enlarge Capital—Slow Deliveries Hurt Machine Trade—Delays in Shipments Hurt

BUFFALO, N. Y., February 7.—A heavy demand for records is the dominating feature of the talking machine trade this month. The booths are crowded, the demonstrators being kept busy from morning to night in taking care of the customers. Machines, however, are as scarce as sugar, coal and other staple articles. Added to the shortage reported at the factories are the delayed shipments on account of railroad embargoes. The dealers are closing their stores on the "heatless Mondays" and are trying to crowd six days' business into five and most of the dealers are satisfied with their receipts during the short weeks.

One great source of hope for plenty of trade during the coming year is Buffalo's remarkable industrial activity. According to the State Industrial Commission, the total amount paid wage-earners here in 1917 was 168 per cent. more than the total in 1914. The number of wage-earners in Buffalo was increased 70 per cent. in the past three years. There is not likely to be a let-up of this activity for many months.

Goold Bros., Inc., has filed a certificate of incorporation, with a capital stock of \$150,000. This firm handles the Victor line at its store at Main and Utica streets. The directors are George A. Goold, T. Amesbury Goold, Fred L. Armstrong, Gertrude A. Armstrong and William Goold.

"Our business stands practically as before," said T. Amesbury Goold. "My brother and I hold 95 per cent. of the stock in the company. There will be no change in policy. Our trade is in an excellent condition."

By means of vigorous advertising and extra good values the store of Victor & Co., Pathéphone jobbers, is crowded these days. The Pathéphone is always well represented in the firm's advertising and window displays and superior results are attained.

The Adam, Meldrum & Anderson Co. is conducting a series of Pathéphone recitals.

"The train service is slow and all the dealers are crying for goods," said C. M. Logan, traveling representative of W. D. & C. N. Andrews. On account of slow trains Mr. Logan has experienced many delays in covering his territory.

"We have a pretty good supply of the New Edisons," said Charles J. Hereth. "We were afraid of embargoes some time ago and played safe by laying in a good stock. This was before the advance in prices. We made no mistake in stocking up because the demand for the New Edison is steady even during this severe weather."

"You can see that our booths are always crowded, so we are doing a wonderful record business," said W. R. Gardner, manager of J. N. Adam & Co.'s Victrola department. "The cold weather seems to create a desire on the part of people to stay at home and enjoy their selections."

"We are supplying a heavy demand for the Heifetz records," said C. H. Heineke, manager of Denton, Cottier & Daniels' Victrola department. "This demand shows that he is one of the most popular of the Victor artists." Heifetz will give a recital in Buffalo on the evening of March 22.

Harold E. Kuhn, of Kuhn Bros., talking machine dealers, has been engaged temporarily as organist and chorister at St. Paul's Church, this city.

Trying to have "the bad check" law enacted in New York State is engaging the attention of the Buffalo Association of Credit Men, of which some of the talking machine dealers are members. The proposed law would make the issuing of a bad check prima facie evidence of intent to defraud and subject the maker to fine and imprisonment.

H. A. Brennan, manager of the William Hengerer Co.'s Victrola department, has returned from New York City, where he looked over the trade and received some new ideas for the coming season. Another purpose of his trip was to try to overcome the machine shortage in his department.

Howard W. Webb, talking machine dealer at 150 East Genesee street, is a member of the Jackson Glee Club of this city.

"The Missouri Waltz records are in great demand," said H. G. Towne, manager of Robert L. Loud's Victrola department. "The heaviest demand for records at this store is on Saturdays from 2 o'clock in the afternoon until 10 o'clock at night."

GEO. L. SCHUETZ THE FINAL WINNER

George L. Schuetz, of the Indianapolis branch of the Columbia Graphophone Co., is the final winner in the Pittsburgh district of the individual salesman cup donated by President Whitten for each district, his third victory in November giving him permanent possession of the trophy. He now enters the Columbia "Hall of Fame," along with L. C. Ackley, of the Los Angeles branch, who won the cup offered in the Pacific Coast district. The contests in Philadelphia, New York and Chicago territories are still undecided, a three-time winner in these districts having not yet been registered.

VICTROLA SPEEDS UP TYPISTS

PORTLAND, ORE., February 4.—The High School of Eugene, Ore., has adopted an original and effective method for speeding up the typewriting classes of the commercial department. A Victrola is used and at each beat of music a letter must be struck on the typewriter. As the typists develop speed the class strike two letters to each beat. Not only is speed acquired, but a smooth, steady movement is obtained.

They don't give rain checks for the Seats of the Mighty.

Victor Records

GALLI-CURCI RECORDS !!

They Are Profit-Makers For You. Order From Us NOW

The appearance of this greatest operatic soprano in the Chicago Opera Company's engagement NOW running in New York—the big musical event of the year—makes her records the most active in the list.

TALKING MACHINE SHORTAGE BADLY FELT IN NORTHWEST

Dealers Complain That Manufacturers, Transportation Officials, Federal Government and Weather Man Are Making Life Miserable These Days—Sonora Men Meet in Minneapolis—News of Month

ST. PAUL and MINNEAPOLIS, MINN., February 5.—Talking machine men in the Northwest, whether they be in the retailing branch or the jobbing branches, have distinct and adequate cause for complaint against almost everybody except the ultimate consumers. The manufacturers, the transportation officials, the Federal Government and even the weather man are combining to make life miserable for the trade men by hampering and limiting shipments of talking machine goods while the people are clamoring for instruments and records.

Yet one will travel far to hear any talking machine man offer a direct criticism. They realize full well that no complaint and no agitation that they make will aid them one iota and the best that they can expect is that fate will be as kind as possible.

The general Northwestern situation for the entire business is well stated by Eugene F. O'Neill, of the Beckwith-O'Neill Co.

"The machine receipts in this territory during January virtually amounted to nothing as the factories centered more on Eastern points as the holidays approached. The early January shipments have not come through and hardly can be expected before the middle of February on account of the uncertain traffic conditions. In the meantime the record situation has become fully as complicated as the machine situation and our afflictions instead of disappearing after the holidays only are increasing. I speak only for the Victrola situation as my information concerning other machines naturally is very limited.

"The dealers in what might be considered non-essentials will receive an awful jolt some day if they do not realize that war-time conditions now prevail and will govern every angle of the business from the production of the raw materials, through the factories and jobbers to the retail dealers.

"We must face every new cross with the best grace possible and trust that the future will bring a marked improvement in our affairs, but, to tell the truth, the labor situation, the difficulty in obtaining raw materials, and the transportation problems hardly warrant one in bubbling over with enthusiasm."

Sonora dealers from all over the Northwest will gather at the West Hotel, Minneapolis, February 6, for their annual convention and banquet. The Minneapolis Drug Co., distributor of the Sonora products, will do the honors, with Sewall D. Andrews as the chief steward. President Brightson, of the Sonora Co., was heralded as one of the headliners with some of the leading Eastern distributors in his supporting company.

W. L. Sprague, manager of the Minneapolis branch of the Columbia Graphophone Co., is back with the fine trophy he won at the Columbia convention. Having won the honor three times in succession the trophy becomes the permanent property of his branch. Although greatly hampered by various conditions, the branch increased its business for January, 1918, by 100 per cent. It could have shown much better results had certain matters been more favorable.

E. F. O'Neill, of the Beckwith-O'Neill Co., returned Friday from Boston, after an absence of two weeks. He was summoned to his old home by the death of a sister.

Several of the dealers in musical instruments are exhibiting in the Industrial Exposition, which is a winter fair and the outgrowth of the annual automobile shows. The exposition is conducted in the immense assembling plant of the Willys-Overland Co. The Minnesota Phonograph Co., in conjunction with Bostwick & Brown, Ediphone distributors, have four booths for the display and demonstration of products of the Edison laboratories. Laurence H. Lucker personally supervised the arrangement of the Edison display.

Columbia Grafonolas and Dictaphones were shown in a suite of four booths, with W. C. Hubbard, Dictaphone expert, and W. L. Sprague in charge. The show, opening February 2, will close late February 9, and is drawing thousands of visitors, mainly from St. Paul and Minneapolis, but also from the rural districts. Included among the latter were the Sonora dealers.

R. E. RAY NOW SALES MANAGER

Takes Important Post With Jones-Motrola, Inc.,—G. K. Stickle Returns to Canada

R. E. Ray has been appointed sales manager of the Jones-Motrola, Inc., New York, the manufacturers of the Jones-Motrola. Mr. Ray has already taken up his new duties and will organize the sales force of the company along most efficient lines. He is now making a short trip.

G. K. Stickle, sales manager of the company since its organization, has resigned to enter another line of business in Canada, while C. E. Reiss will continue in charge of the New York office.

The Jones-Motrola has steadily gained ground and has been endorsed by various prominent talking machine companies, among the latest being the Brunswick-Balke-Collender Co., manufacturers of the Brunswick phonograph, having recommended the Motrola to their dealers.

THE PATHE IN PORTLAND, ORE.

PORTLAND, ORE., February 4.—Ten days before Christmas Calef Bros., of Portland, Ore., began selling Pathé machines. The Calef Bros. have a big furniture store and never handled talking machines before. They have the exclusive sale of Pathé for furniture houses in Portland and are amazed at the success they are having.

SILVERSTONE MUSIC CO.'S OPENING

Handsome New Warerooms in St. Louis Open to Public With Special Ceremonies During Week of February 4—Tone Tests Given

St. Louis, Mo., February 6.—The Silverstone Music Co. held the formal opening of their new warerooms this week. There was no formal program, but there were daily tone test recitals all week by Prof. Chas. Kaub, a violinist of the St. Louis Symphony Orchestra, and Mme. Blanche Skrainka, a local soprano. As an added attraction, a band of Hawaiian stringed instrument players were brought on for the week and proved to be a popular attraction.

Despite the fact that this opening was first planned to be in December, there was much work to be done at the last moment. Working men to put on the finishing touches to the interior were scarce and materials hard to get and even the removal of the eight booths from the old warerooms to the new, where they were installed on the second floor as record demonstration booths, proved to be a work of weeks, instead of days. It required a grand rush to get all of the reserve stock out of boxes and into the new bins before the opening day came.

There are those who accuse Mr. Silverstone of second sight in the renting of an additional five-story building across the street and stocking it with machines several weeks ago in anticipation of the present conditions. That is what he did and it is this stock that is supplying the means for the present trade.

In his opening advertising, Mr. Silverstone featured a letter from Mr. Edison explaining that he was unable to attend the opening because of his work "for Uncle Sam" and he invited people to come and see the first Edison machine, the massive iron affair that was fashioned in 1878.

Asking a customer to call again helps some, but the thing that counts for most is to treat him so well that he will come without asking.

Manufacturers— Jobbers—Retailers

If you are ready to take advantage of the enormous demand for *good* talking machines, we can serve you two ways.

Harponola

We are in the position to sell you the finest looking and scientifically constructed cabinets at reasonable prices.

We can sell you fully equipped machines under your own trade mark or ours, in carload lots at jobbing discounts.

If you are a dealer, please bear in mind that we manufacture only high grade cases and are installing the best mechanical equipment that money can buy. A postal will bring you our catalogue with full details.

Our prices and discounts are fair to the manufacturer, liberal to the *jobber*, right to the dealer and just to the public.

Write us today as we are now placing orders for raw material for our 1918 requirements.

THE CELINA FURNITURE CO.
CELINA OHIO

NEW COLUMBIA HOME IN BALTIMORE

Local Branch of Columbia Graphophone Co. Plans to Occupy Handsome New Five-Story Building on South Howard Street on March 1

BALTIMORE, MD., February 4.—Announcement is made by W. S. Parks, the local manager for the Columbia Graphophone Co., that the local branch will shortly prepare to move to larger and more commodious quarters at 16 South Howard street. There they will have a five-story building with an entrance on German street as well as Howard.

The new Columbia headquarters will have three times the floor space of the present home and it is planned to occupy it on March 1. The first floor will be devoted to handling incoming records on the Howard street side and they, together with machines, will be shipped out of the German street side of the building. A model show window will always be kept trimmed as a suggestion to dealers how to properly display their machines and records, with the aim of increasing business. The first floor will show display rooms as models, after which dealers who want to improve their business may easily pattern. The second floor will be used principally for general offices. Mr. Parks plans to spend most of his time outside on the firing line looking after the sales and the headquarters will be practically taken care of by S. C. Cooke, the assistant manager, who did such fine work for the company during Mr. Parks' illness. The Baltimore headquarters looks after business in Maryland, Virginia, West Virginia, North Carolina and the District of Columbia. Business at this branch is gone away ahead of many of the branches and is now in good position with only New York, Philadelphia, Chicago and Pittsburgh leading in sales.

Mr. Parks has just returned from a tour of Virginia and among the places he visited were Richmond, Norfolk and Petersburg, Va., and also Washington. Mr. Parks says he found all of the merchants happy and confident that business would show from 50 to 100 per cent. increase this year over the past year. The trip was in part taken for the purpose of introducing A. C. Creal, the new district salesman, to the trade in that territory. Mr. Creal has joined the Columbia forces and will be in charge of the selling end in eastern Virginia and District of

Columbia. He was formerly advertising manager of the Eagle Furniture Co., of Memphis, Tenn. William Korhammer will be in charge of sales in the western part of Virginia. W. B. Sibbet, formerly in charge of the Dictaphone end of the business here, has become city and State salesman for the talking machine line and is succeeded in that branch by C. F. Smythe, formerly of the A. B. Dick Co., of Boston. A. Hoffman has been added to the Dictaphone department sales force.

THE TRADE SITUATION IN ATLANTA

January Business Very Good Considering Conditions—Future Prospects Unusually Bright—What the Dealers Are Doing

ATLANTA, GA., February 4.—Everything considered, talking machine business for the month of January in this section was quite satisfactory. The South, in common with the whole country, having recently come through the most severe weather in years, has been affected in a business way, but with the advent of better weather and the fact that cotton, the South's great staple, is bringing the highest price in years, the phonograph business at present is large and broadening.

I. M. & R. D. Bame, Victor dealers, have added the Sonora to their line, and are enjoying a fine business on same.

The Haverly Furniture Co. have taken on the full line of Pathéphones and Pathé records, in addition to their leading line, the Columbia Grafonola.

Phonographs, Inc., local Edison jobbers and retailers, have been enlivening their store with tone tests and recitals. At the time of this writing Miss Anna Case is due in the city for a concert at the Auditorium and will doubtless be favored with an enormous crowd.

The record business with all phonograph stores is quite active, the late patriotic and war hits being in great demand.

A. J. Endres has purchased the entire interests of the Bruett Piano Co., Gay Building, Madison, Wis., and will continue to feature the Kimball piano and phonograph line. A. J. Bruett, founder of the company, has returned to Milwaukee and will engage in the piano and talking machine business in that city.

NEW BRUNSWICK SALES MANAGER

Edward Strauss Takes Charge of Wholesale Phonograph Department of Brunswick-Balke-Collender Co. in New York—Other Changes Among the Salesmen—Trade Good

Edward Strauss, long connected with the Brunswick-Balke-Collender Co., manufacturers of the Brunswick phonograph, at their offices in Chicago, has come to New York as manager of the wholesale phonograph department here, with headquarters at 29 West Thirty-second street. Mr. Strauss has made a thorough study of the phonograph field and comes to his new post well equipped to develop business for the Brunswick phonograph in the East.

The sales organization of the company is being strengthened constantly. J. J. Brophy, formerly with the New York office, will in future travel through New England, with headquarters in New Haven.

A. J. Kendrick is returning to the West to continue his promotion work in establishing exclusive Brunswick shops. This work was temporarily suspended on account of readjusting the Eastern situation. The work now being resumed, it is planned to enlarge its scope and several Eastern cities may be included in this campaign.

These specialized shops, now fourteen in number and established throughout the Middle West, are based upon an idea of diversified merchandising carrying several of the Brunswick products. The Brunswick phonograph is, however, the prime factor in each case.

The Brunswick phonograph has recently been exhibited in the various furniture shows held in New York, Grand Rapids and Chicago. In every case the Brunswick booth was well visited and the results from each exhibit were gratifying.

Among the recent visitors at the New York headquarters of the house were J. F. Ditzell, of Famous & Barr, D. J. Nolan, of the May Co., enthusiastic Cleveland Brunswick dealers, and O. A. Field, of Field-Lippman, St. Louis, who are Brunswick dealers in that city. Mr. Field reports that the holiday business transacted in Brunswick phonographs was particularly fine.

The progress of the Brunswick phonograph in and about New York has been most satisfactory and the outlook for the year is declared to be excellent.

GOOD RESULTS FROM MILWAUKEE ADVERTISING CAMPAIGN

Talking Machine Men Enthusiastic Over Co-operative Publicity Plan of Milwaukee Association of Music Industries—Standards of Practice Adopted by the Trade

MILWAUKEE, Wis., February 6.—No members of the Milwaukee Association of Music Industries are more pleased with the results of the co-operative advertising campaign conducted by the association at a cost of \$3,000 for ten weeks ending in the middle of January than the talking machine men. For direct results, as shown by the talks with patrons, the campaign did wonders for the men of this industry. They have been able to trace a large volume of business to the publication of ten full-page advertisements, one of which was devoted exclusively to the talking machine and the others being combinations of sales effort directed at all types of pianos and talking machines.

A result of the advertising campaign has been the adoption by the association of a code of ethics, or standards of practice, which place the Milwaukee dealers in a most commanding position as a progressive organization, and one which has ventured perhaps further ahead than any similar body in the United States. The code consists of ten articles and has been aptly styled "The Ten Condemn-ments." It reads as follows:

**Standards of Practice
(Ten Condemn-ments)**

1. This association condemns advertising of, or otherwise offering by any dealer, instruments not regularly carried in stock by such dealer with the consent of the manufacturer, unless the instrument or instruments so advertised or offered shall first have been offered to the manufacturer thereof or to the nearest regularly authorized agent at cost.
2. This association condemns the practice of advertising instruments not regularly carried, unless the advertiser offers them in good faith and stands ready to sell said instruments at once to any buyer.
3. This association condemns the breaking of sales or malicious criticism of any instrument by a dealer or salesman for the purpose of dissatisfying the buyer after the sale of such instrument has been consummated.
4. This association condemns the advertising of used instruments stating the prices originally asked for the instruments when new.
5. This association condemns the breaking of offering of instruments at prices higher than the standard market value as represented by prices fixed in a majority of sales actually made.
6. This association condemns the advertising of private sales at residence addresses and places not recognized as regular trade locations.
7. This association condemns advertising as "Free" those articles included in the purchase price of the instrument, such as bench, scarf, etc.
8. This association condemns advertising of "Manufacturers' Sales," and the offering of instruments at "Factory Prices," and the advertising of "Special Sales" in which instruments

"Must Be Sold Regardless of Cost or Value."

9. This association condemns "Puzzle Contests" and "Guessing Contests," as the result of which "Purchase Coupons," orders or vouchers are given.

10. This association condemns advertising in which high-grade instruments and cheaper grades are listed indiscriminately, with the lowest prices and terms quoted to appear to apply to all.

The Milwaukee association, which was organized in February, 1917, has been incorporated under the laws of Wisconsin, and at its first annual meeting as a corporation elected the following officers: President, Henry M. Steussy, general manager Steussy-Schulz Piano Co., representing the Magnola and Pathéphone; vice-president, Paul F. Netzow, secretary-treasurer Milwaukee Piano Mfg. Co., representing the Imperial; secretary, Richard H. Zinke, general manager Badger Talking Machine Shop, Victor dealers; treasurer, William R. Winter, president Winter Piano Co., representing the Columbia; directors, Edmund Gram, representing the Aeolian-Vocalion; Fred B. Bradford, Victor dealer, and Leslie C. Parker, manager of the Victor department of Gimbel Bros.

Edmund Gram was president during the first year of the association's existence and Mr.

Steussy was secretary. The latter's splendid work in that position made him the unanimous choice for president when Mr. Gram announced his determination to retire because of the extraordinary demands upon his time by the presidency of the National Association of Piano Merchants of America and his private business affairs. In electing Mr. Zinke as secretary, the association gave deserved recognition to one of the most prominent and influential talking machine men of the Middle West. The association has a total of forty-one members, embracing practically every reputable music house in Milwaukee, and has made a splendid record since its inception.

SECURES THE EDISON AGENCY

The Lund Jewelry Co., Seymour, Conn., has been appointed representative for the Edison Diamond Disc Phonograph and Edison Re-Creation, and the establishment will be known in the future as The Edison Shop. The store has been remodeled, to admit of the installation of demonstration rooms and a large reception room.

MULTUM IN PARVO

Take all the men who have failed since Creation; take all the causes of their failure; and, though there be ten, or ten million, not one is proof of your failure. Every man is master of his own destiny.

Anticipate Your 1918 Requirements Now

by investigating at once the merits of our improved Veeco Electric Motor and Vitraloid Turntable for electrically equipping your higher grade machines.

The Veeco motor runs on either A. C. or D. C. of 100-125 volts without any adjustment, and can be supplied to run on any voltage from 6 to 250.

To dealers we supply the motor mounted on either 12" or 12½" square mahogany boards, all ready to install.

*Send for a sample and try it out.
Orders for 1918 should be placed at once.*

TRANSPORTATION THE BIG PROBLEM IN ST. LOUIS TRADE

Talking Machine Men More Interested in Getting Stock Than in Making Sales at Present—Fire Destroys Mozart Talking Machine Co. Factory—General Trade Conditions Reviewed

St. Louis, Mo., February 6.—Local talking machine dealers are talking transportation more than sales at present. It is their belief that the talking machine dealer who has an ample stock in this section is the one who will reap the harvest this spring. Stocks of certain styles of machines are exceedingly short and with other companies records are the difficult point. The Columbia Co. was considerably embarrassed for a time because the after Christmas shipments of records expected for the first of the year were lost in transit. The Victrola line of machines has been short of the styles selling for \$110 and the styles priced above and below this have been entirely out of stock.

Robert Cone, of the Artophone Co., said that the freight question had become a very serious one with that company. They had a large number of machines almost ready for use but that the minor parts were several weeks past due and machines that were to be shipped on after Christmas shipments were still held. "Some of our working men have shown considerable ingenuity in getting by the scarcity of certain parts," he said, "and we have kept up fairly

well with the most acute demands, but we are much farther behind than we like to be. As to cabinets, we are well fortified by reason of precautions taken last summer and recent tracers have shown that our most needed shipments are making progress."

One of the unfortunate happenings of the month was the burning of the Mozart Talking Machine Co. plant the second day after it had begun operations. The plant was formerly known as the Colonial Cabinet Co. and was bought by the Mozart Co. after a fire. It had required six months to re-equip the plant, chiefly because of the delay in obtaining motors and certain machinery. The plant had been in operation only two days when it was again destroyed by fire. The plant was well covered by insurance and so the heaviest part of the loss will be in the disarrangements of plans and the necessary wait to get a new plant equipped under the war conditions. In the meantime President Fitzgerald expects to find means of continuing the production of the Mozart machines.

Despite the handicaps of the shipping, trade has been very good, according to all reports.

Of course, it could be better with the full stocks of records and machines, but some of the houses will show an increase over any previous January, they assert. The jobbing trade has been excellent, counting by orders filed. Not so good if counted by orders delivered.

Manager Irby W. Reid, of the Columbia Co., spent a busy month-end after his return from the New York conference of branch managers, which he termed "the greatest sales meeting ever held." He was anxious to get his wholesale staff together and pass on some of the ideas and enthusiasm brought back from the East, but was unable to call this meeting until February 4 because of the pressure of business.

The new Columbia records made by Handy's jazz band at Memphis has proved a winner in the St. Louis district, where that band was well-known and its fame is secure for the present kind of music. The records have proven to be wonderful sellers in the country districts and especially in that section nearer Memphis.

TO ISSUE "TRADE NEWS SERVICE"

I. Davega, Jr., Inc., to Render Practical Cooperation to Dealers—Important Move

I. Davega, Jr., Inc., Victor factory distributors, 125 West 125th street, New York, are compiling a "News Service" for Victor dealers. This publication will be named "Trade News Service" and will be full of live news and timely helps for the dealers. It will be compiled and edited by Abram Davega and Joe Schwetz, who have a wide and varied experience in the merchandising of Victrolas and supplies. It will prove a very valuable assistant to the dealer and numerous requests have already been received to have their names placed upon the list. The initial issue is expected to make its appearance within about one month.

TO AID TRADE ACCEPTANCES

Council Asks War Credits Board to Insist on Their Use by Manufacturers

With the view of hastening the more general adoption of the use of trade acceptances, the American Trade Acceptance Council has suggested to the authorities in Washington that the War Credits Board, which looks after the granting of advances to manufacturers and contractors doing Government work, should adopt the policy of refusing to approve advance payments until the applicant has availed himself of his own credit by resort to trade acceptances in the purchase of goods. It is felt that, while the Government cannot itself pay for goods on the trade acceptance plan, by reason of certain legal obstacles, there is no valid reason why the contractor should not reduce the financial burdens of the Government by using trade acceptances to the widest possible degree. It is believed by bankers that these manufacturers and contractors should receive advances only after they have entirely exhausted their own credit facilities.

TRAVELING MEN'S TROUBLES

They Are Multitudinous in These Days of Disrupted Train Schedules

The troubles of traveling salesmen these days are not confined to paying taxes and enforced idleness on Mondays, says the New York Times. One traveling man who just recently returned from a trip through the South relates that, due to the curtailed passenger service on the railroads, he was delayed for three days in one town, and that in order to pay his swollen hotel bill he had to pawn his watch. He explained that, while his expense checks had been mailed by his firm on the prescribed dates to various points along his route, it had taken him so much longer to get from one point to another that it was frequently impossible to make his last check cover his expenses until he reached the town at which the next one would be waiting.

Big Profits—Quick Sales

DEALERS who are selling the Elmbrola are making big profits because the machine is right and the price is exceptionally low. The handsome appearance of the beautiful Elmbrola, together with its clear, distinct tone, makes it one of the easiest phonographs to sell you ever saw. Space prevents us from telling you about the many exclusive features of the

Model B Elmbrola

"Sounds Clear — Made Sound"

Model D Elmbrola

but a postcard or letter will bring you full particulars and some beautiful pictures.

We Guarantee Prompt Deliveries

When you take on the Elmbrola, your orders will be shipped to you promptly the same day we receive them. But the big reason why you should find out all about the Elmbrola is the exceptional profits you can make.

The Elmbrola is really a beautiful machine—its clear sweet tone wins all who hear it. Compare it with any other. See the handsome woodwork, the finish—and then put on a record.

ELMBROLA TALKING MACHINE CO., Dept. A, ST. PAUL, MINN.

Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the twelfth in a series of articles on the general subject of the musical possibilities of the talking machine. The aim of the series is to develop these possibilities from all angles, thus opening up fields for sales expansion oftentimes neglected wholly or in part.—Editor.]

RECORDS OF STRING MUSIC

The other day, at one of the meetings of the Chicago Piano Technicians' Conference, the statement was made that the most popular type of instrumental talking machine record is that of violin, harp and flute trio. The assertion was made by very high professional authority, and all the information I have seems to confirm it, generally speaking. The point is interesting and important, and involves certain considerations which ought, I think, to be clearly understood by all to whom the musical possibilities of the talking machine are rightly sensed.

It is hardly necessary for me to repeat what already is a hackneyed saying about the need for greater musical knowledge on the part of those who sell talking machines, in the light of the rapidly advancing musical taste of the public. Nor should it be—though it is—needful to point out that as this taste continues to grow, that which is expected and demanded of the talking machine in the way of mechanical and musical excellence becomes ever more clearly conceived and definitely formulated.

In brief, the talking machine has to satisfy a more refined public taste. The salesman must therefore know what a refined taste is, and must possess something of the same himself. More than all else he should be thoroughly well posted on the powers and the limitations of the talking machine and should know its strongest and its weakest musical points thoroughly.

The necessity to know of these things constitutes the *raison d'être* of articles like this one. The particular musical point which I am now bringing up is of enormous importance, and a thorough knowledge of it cannot fail to improve the selling ability of any man who deals with the public at retail.

The Popular Trio

To begin at the beginning, why is the violin, flute and harp trio so popular? To answer this question, get a record of, say, Schubert's *Serenade*, played by this combination of instruments, take it into a quiet place, where you won't be disturbed, put on the machine a soft-tone needle and listen critically. The effect is undoubtedly pleasing, but I think you will agree with me that the pleasure is, as it were, not evenly divided between the three instruments. Whenever I listen to a trio like this on the talking machine, I always notice clearly the modifications of tone-quality which so clearly come out. The harp, for instance, is certainly good, for it seems that plucked tones, as harp, mandolin or banjo, come out very well; but even so it sounds more like a mandolin at one end and a guitar at the other than like a true harp. No! it is not the harp that merely gives the pleasing effect.

On the other hand, the smooth and clear beauty of the flute, without any emotion or brilliant color in it, carries something soothing and superficially most attractive. Yet its tone is not of lasting attractiveness, for one tires of it too soon; it is too monotonous. The violin's tones, on the other hand, possess just the color that the flute lacks, have just the sustained quality which the harp has not, and seem to attract any and every kind of musical taste from lowest to highest alike.

Yet it is a fact that, in the upper part of the scale, the talking machine reproductions of flute and of violin are almost indistinguishable. The low tones of the violin can be distinguished readily from those of the flute, but the higher tones of both instruments seem to melt into each other, each losing something of its true

quality while gaining nothing worth while in exchange.

The Quartet of Strings

These facts have more than an academic interest. The violin and its big sisters, the violoncello and viola, are, beyond doubt, the loveliest and most generally attractive of all instruments to the ear, taking into consideration all possible advantages and disadvantages, and balancing one against the other. It is, however, a well-known fact that violin records do not sell so well, on the whole, as those of the 'cello, while the viola is hardly known. But what is more important still is that none of these instruments is as popular among buyers of records as its qualities would make one expect it to be.

To what extent, now, should one suppose that the peculiar modification of the violin tone in the upper registers, which makes it sound like a flute in these regions, is responsible for the relative slowness of sale, of which I have spoken? Candidly, I don't think we should put too much importance upon this fact, although it is one that ought to be mentioned and taken into consideration. As I said above, when you listen to a trio of violin, flute and harp, you undoubtedly like the violin tones best. Why then should not the records of solo violin playing be even more popular

The Source of Trouble

To tell the plain truth, I am pretty well convinced that the whole trouble is to be found in the retail stores. I think it would, in fact, be wrong to blame on the record or on the instrument itself what is really not of enough importance. I felt sure that someone would speak of the well-known facts regarding the reproduction of high violin tones; so I also spoke of them. But, while this is all true, it is also true that a trio of violin, flute and harp, where two of the three instruments sound almost wholly alike in certain registers, is a very popular form of instrumental music with record buyers. Then there must be some other reason for the slowness of which I complain.

In fact, we come back to the old facts. The violin is not appreciated by record buyers as it should be, any more than great violin playing is appreciated as it should be when it comes

out before the public in the person of an Ysaye, a Powell or a Heifetz. Of course, the musicians rave over it; but the musicians are only a small minority. Now, I believe that one of the undeveloped fields in record selling is right here in solo violin and solo 'cello reproductions; and I feel sure that if intelligent and well-informed work is put into promoting these, any salesman can reap a rich reward in his community, and among those who habitually visit him to buy.

The Great Players

The list of great artists who have made and are making records of their violin playing for the various talking machine record makers is formidable in quantity and dazzling in quality. Fritz Kreisler, Eugene Ysaye, who shall choose between them? Maud Powell and Kathleen Parlow; are they not the greatest women players of the world, unsurpassed since Norman-Neruda herself? Albert Spalding, Francis Mac-Millen and Eddy Brown, are they not making patriotic Americans proud of their country? Indeed, there are plenty of great violin players from whose records the best of violin music can be chosen at one's own sweet will anywhere and at any time.

But I shall perhaps be excused for remarking that here, as elsewhere in the record game, one finds a narrow-mindedness on the part of the retailers which can only be put down to want of familiarity with the contents of the catalogs. It is simply incredible that any man who has once heard the lovely playing of Kathleen Parlow in that exquisite slow movement of Mendelssohn's violin concerto could fail to recommend the record to his customers. Of course, you cannot expect the latter to know for themselves; the very word "concerto" will frighten most of them. But the salesman owes it to himself to know at least the sound of every record made by a well-advertised artist; simply because, in the first place, the Victor, Columbia, Edison and Pathé people do not promote and exploit an artist unless he or she is really *Al*, and because, in the second place, these manufacturers have a right to expect that the labor they and the artists expend, not to mention the money and time, in getting out fine records,

THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 53)

shall not go in vain even to the smallest degree. When I add that the violin and 'cello records are all eminently worth while and that they are suitable to every kind of decent taste—to every kind of taste that is not actually degraded—I have said all that need be said to recommend them. It only remains to point out that records as good as these can and should be made hot-cake sellers.

Taste!

In this respect may I say just a word on that very much discussed subject, public taste? Nothing is easier than to argue from one's own standpoint about other persons' ideas; and nothing is more fallacious. When a sensational, salacious newspaper is accused of degrading public taste, it always replies that it gives the public what it wants. The truth is that it gives the public what its own vulgarity wants; and the public responds to the suggestion in numbers always large enough to look superficially impressive, yet never really representative. The same thing is true with music; the vulgar mind wants only trash, when it does not actually want filth; and instinctively says that this is what the public want, too. Yet it is a serious mistake all the time! The taste of the public is always better than it is supposed to be. That does not mean that the plain people are all educated in the latest musical ideas and fads; but that the public taste is always towards the sane, the healthy and the clean in art, when it has a chance to go in its own direction to suit its own ideas.

That is why it is always much easier to sell high-grade instrumental records than it seems to be; when the salesman himself knows what he is selling and cares for it.

Getting Acquainted

Now, then, what is easier than to make a sort of at-home study of the stringed-instrument records during the next few weeks, with a view

to becoming acquainted with them more completely and definitely? I am convinced that there exists a great and almost undeveloped field for exploitation in this particular department of record selling, and I know, from observation, from talks with owners of talking machines and the statements of men in the business who know how to look for themselves at facts, that ignorance and not indifference or dislike is at the bottom of any public slowness to take up the reproduction of violin and 'cello music.

Some of Them

Just a word must follow about some of the violinists and 'cellists and about some of their records.

It is always safe to introduce a prospect to Kreisler or to MacMillen. Kreisler is manly, energetic and tonally lovely in his playing. His interpretation of the Dvorak Humoresque has sold well, but his other pieces have been badly neglected. I should like to have every one listen to his records of his own adaptation of Viennese dance tunes, to his Tambour in Chinois, and to some of the lighter music he has recently played. MacMillen is charming, gentler and less energetic. He has as yet done too little, but the two or three light bits he has recorded will tickle the ear and fancy of even an untrained music lover.

For clear, virile calmness, commend me to Spalding. He, too, is an American and a fine one; and now I believe is in the service. Get some of his Edison records and try them. You will enjoy them and him.

Pure glory of tone and pure serenity of thought are Kathleen Parlow's. Her playing of that lovely Andante of the Mendelssohn violin concerto is the best thing she has yet done. Its title is against it, but if you don't want to be out of date in heaven's name get out that record and listen to it. Then go and sell it.

Maud Powell might almost be called—apolo-

gies to a charming lady—a "veteran" of the concert stage. Her very fine violin and her super-fine playing have been exhibited through Victor records for some time, but she is yet to be spared to us, let us hope. She has done the Dvorak Humoresque, a Chopin valse arrangement, and, I think, the finale of Mendelssohn's violin concerto. She is a woman without "nerves," but all "nerve," a woman whose musical thought reflects her true self, in its pure clarity and perfect cleanness, in its classic beauty of outline and abstract beauty of tone. She is a wonder. Don't neglect her.

Pablo the Bald!

Just a line about the 'cellists. Casals! Kreisler calls him "the greatest artist that ever drew a bow." I heard that little bald-headed Spaniard play a set of variations for 'cello and orchestra with the Chicago Symphony Orchestra; and he drew tears to the eyes. And I, for one, don't care for 'cello concertos and show-pieces. His 'cello recordings are marvelous. Listen to his playing of the Adagio (slow movement) from that charming concerto in D minor by Papa Haydn, a little thing more than a century old; and know something of what lovely tone really is. Try his air for the G string by old Bach, still more aged, and learn for yourself that the sometimes whining 'cello may be a glorious baritone voice sending its harmonies rapturously heavenward.

There are other 'cellists, good old Kronold, Kindler, Kefer, and a number of others. But of them I must talk some other day.

Perhaps some one will feel like taking a bit, anyway, of this advice, humbly and sincerely offered by one who believes in the talking machine and in its wonderful mission.

BRILLIANTONE NEEDLE SHIPMENTS

Ship Needles Far in Advance of Advertised Date
—Eugene Latham Joins Force

The Brilliantone Steel Needle Co. are now well established in their new offices in the Marbridge Building at Sixth avenue and Broadway, New York. B. R. Forster, president of this new company, reports exceptionally fine business, the sales of the first month having far exceeded the amount anticipated. He says that in spite of this unexpected heavy demand all orders have been promptly filled. In this respect the company have even gone ahead of their plans.

It was originally announced that deliveries of this new needle would commence on February 1. Orders were accepted on this basis. Mr. Forster announces that large quantities of the needles were shipped during January, far in advance of the advertised date.

The Brilliantone Steel Needle Co. announce that Eugene Latham, well known in the talking machine field, having been connected for a number of years with the Silas E. Pearsall Co., has joined their sales staff. Through ill health Mr. Latham severed his connection with that organization and for almost a year has been in Atlantic City regaining his strength. Now fully recovered, Mr. Latham comes to this new organization, ready for the big work ahead of him.

Through an error last month it was stated that H. Ettinger, vice-president of this company, had been connected with the Victor department of Kranich & Bach. The credit for these years of service in this capacity should be given to H. W. Acton, secretary of the company, although Mr. Ettinger is also well known to the trade.

WHY NOT? SAY WE

Says a merchant who has done it himself: If your individuality and personality do not attract sufficient business or if you be weak in that respect, why not hire a good manager who has the qualifications that you are lacking? Your time and efforts may be profitably employed in the accounting department of your store, instead of the managing and sales department.

KOCH-O-PHONE

\$24.50

No. 23

The KOCH-O-PHONE is the FORD of the Phonograph world. There is no charge for the name or expensive advertising added to the cost. Most people would rather pay \$48 (resale price) than \$100 for the same amount of pleasure. Plays all makes of disc records. No disconnecting needed in exchanging from one make of record to another. Simply turn the sound box and change needle to suit make of record. This machine for tonal quality and volume is not excelled by any \$100 machine on the market.

No. 23—Height 43 in., width 19½ in., depth 22 in.; double spring worm driven motor; 12 in. turntable, all metal trimmings are nickel plated; made in mahogany finish. With tone modifier; weight about 125 lbs.\$24.50

Cabinet alone, complete with needle cups . . \$15.00
Equipped with tone modifier . . . 50 cents extra

FEATURING EDUCATIONAL SIDE OF THE VICTROLA

What Dealers in Various Sections of the Country Are Doing to Impress Upon the People in Their Communities the Value of the Victor in the Schools—Original Ideas Set Forth

PHILADELPHIA, PA., February 4.—One of the important forces operating for the advancement of music lies in the work being done by the educational department of the Victor Talking Machine Co. Within the last few years such remarkable headway has been made in introducing talking machines into the schools, as a means of educating young America, that today the list of public and private institutions of learning equipped with Victrolas includes several thousand cities in the United States alone.

The possibilities of the Victrola along strictly educational lines are, of course, being empha-

display utilizes the blackboard and desks, but in addition has introduced dummies to represent the children and the teacher, thereby add-

An Illinois Conception

ing a human element that is decidedly attractive. The Calder window features the school model Victrola and shows several very interesting pictures of the Victrola being put to use for educational purposes.

NEW STORE OPENED

The Munn-Brunswick Phonograph Co. has leased the Boehmler business block at 209 Main street, Cedar Falls, Ia., and has installed a complete line of phonographs and other musical instruments.

OPEN NEW BRUNSWICK SHOPS

Handsome Establishments Opened in Boston and Quincy by Arthur Koerner

BOSTON, MASS., February 6.—Arthur Koerner, prominent in the affairs of this city and an officer in the American Bankers' Association, is interested in two specialized Brunswick phonograph shops, one in this city and one in Quincy. It is announced that he has made arrangements to open up additional departments and stores to be conducted as exclusive Brunswick shops. He will devote his entire time to these establishments. It is reported that these will probably number eight or ten. The addition of these stores is a direct result of the success of the two stores mentioned above, which were only opened last September. A. J. Kendrick, of the Brunswick-Balke-Collender Co., who consummated this deal, left the early part of the week for New York.

LYRIC RECORDS ARE POPULAR

The Lyraphone Co. of America, manufacturers of the Lyric records, report that the sales of their records during the past two months have exceeded the expectations of the management. The February releases have met instant response from the dealers, who seemed to be especially pleased with the concert and operatic numbers. Both the February and the March lists contain a goodly number of the late popular songs.

LOCATED IN NEW QUARTERS

Clifford A. Wolf, manufacturer of diamond and sapphire phonograph points, is now situated in new quarters at 229 Fulton street, New York. The new offices greatly exceed the space formerly occupied and are combined with the manufacturing end of the business. Mr. Wolf reports the continuance of good business and is optimistic over the future.

A Connecticut Window

sized in many constructive ways by the educational department of the Victor Co. But it is not a single-handed crusade, for many of the prominent Victor jobbers have within the last year or two created educational departments of their own, and the movement has also been

A Pennsylvania Display

taken up in earnest by leading Victor dealers throughout the country. In most cases the educational departments of the retail establishments are headed by women, who have been previously trained to understand the psychology of children and how best to please and interest and at the same time teach them.

The accompanying pictures show window designs which have been presented by H. A. Weymann & Sons, of Philadelphia, John W. Calder & Co. of New Haven, Conn., and the Pontiac Music Shop of Pontiac, Ill. Each of these window displays has been built around an educational theme, and typifies to a nicety the way Victor dealers are co-operating in helping the public to appreciate the educational mission of the talking machine.

The Weymann window utilizes the school desks and a blackboard for "color." On the blackboard is written "The Victrola in the School for Drills, Games, Marching, Dancing, Singing Games, Physical Education, Stories and Games, Band Accompaniments and Chorus Singing." The mounted pictures shown in the window illustrate the Victor being used for each of these different purposes. The Pontiac window

Tone—the vital thing

If you, as a manufacturer, can talk and prove *tone superiority* in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you can talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

Parr Magnetic Reproducer fitted with the Vibratone Patented Diaphragm

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most *vital feature*. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek perfection.

The indestructible, non-crystallizing, always resilient VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of mica diaphragms, it overcomes all mica's bad features. Guaranteed uniform in quality, free from bubbles, blisters and waves, the Vibratone Patented Diaphragm is non-porous, non-absorbent.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

PARR MANUFACTURING CORPORATION 1 UNION SQUARE At Fourteenth St. NEW YORK

Take the Parr Magnetic Reproducer—

The most sensitive of reproducers. The permanent magnetic device, an integral part of the reproducer, acts on the stylus box. Its possibilities in giving warmth and delicacy in the tonal reproduction of quiet passages make old-style sound boxes seem obsolete. And in fortissimo passages where ordinary reproducers create unpleasant, music destroying blasts, caused by the needle jumping and losing its grip, the Parr Magnetic Reproducer, with its marvelous flexibility, follows every wave and vibration in the record and takes everything the record holds.

Quality and Economy—Plus

The New Edison
Diamond Amberola
Model 75

FOR highest quality at a low price we do not know of any line of merchandise that compares with the New Edison Diamond Amberola and Edison Blue Amberol Records.

¶ The New Edison Diamond Amberola repeatedly has defeated the best known makes of talking machines costing from two to four times as much in side-by-side "tone" comparisons before unbiased, uninfluenced audiences of phonograph experts.

¶ Incidentally—no needles are required to play the Amberola because it has a permanent stylus (reproducer point) made from a genuine diamond, beautifully rounded and polished, and Edison Blue Amberol Records are practically unwearable and unbreakable.

¶ If you would know the "reasons why" the New Edison Diamond Amberola is so much superior musically to talking machines costing several times as much, and if you are interested in the profits being made by Amberola dealers, address :

INCREASED MACHINE DEMAND EXPECTED IN KANSAS CITY

Prospective Prosperity in Agricultural Sections Encourages Talking Machine Men—Working Hard to Prepare for Demand—Excellent Reports From Both Jobbers and Dealers

KANSAS CITY, Mo., February 6.—The present prospects indicate that a much larger number of persons will want talking machines than bought them last year, and local dealers generally are laying their plans for a substantial increase this summer, and for a good trade in the fall and winter. The statement is made advisedly that they are thus laying plans considerably in advance, since many of them realize the possibility that freight conditions might hamper shipments, and that war conditions may interfere with the production of machines. The distributors at Kansas City have made an even more careful survey than usual of the conditions, and have been closely in touch with their dealers. The recent extremely cold weather in this territory has been stimulating to optimism among business men and farmers; chiefly because it was accompanied by heavy snows, which provided needed moisture for planted wheat, and for the soil which will bear corn and other crops in the spring.

The spirit of co-operation has not been exemplified any more interestingly in Kansas City territory than at a "convention" of Edison dealers at Coffeyville, Kan., Tuesday, January 29. A score of Edison dealers gathered from eastern Oklahoma and eastern Kansas for a conference, the meeting resulting in the effecting of a definite organization. M. M. Blackman, manager of the Phonograph Co., Edison distributor in Kansas City territory, and C. L. Smith, of the same office, were among the "outsiders" present, Mr. Blackman especially joining in the discussions of sales methods and of trade matters. The dealers present reported a great deal of benefit from the discussions, and also much pleasure from the extension of acquaintance to other members of the Edison family.

F. J. Mortboy, formerly with the Manhattan Furniture Co., Manhattan, Kan., is now traveling for the Edison Co. in western Missouri, eastern Kansas and Oklahoma. This territory was formerly covered by C. L. Smith, who now has duties in the sales department of the Kansas City distributing headquarters.

Kansas City business men are up against the same problem that business men in other cities are with reference to office help. While there seems to be a bountiful supply, the turnover is extraordinarily fast. The Dictaphone, naturally, is helping with this problem. The branch office in Kansas City probably received more voluntary inquiries with reference to Dictaphones in the last two or three months than at any other time in its history.

The Henley-Waite Music Co. is taking time by the forelock and anticipating any possible inconvenience with reference to freight shipment by ordering six months' supplies in advance, and designating shipment. This company, like most of the others, is not afraid for the business that will develop this year. It looks like a big trade during the summer and of course next fall a repetition of the increases of the past year.

Mrs. Nellie Williams, manager of the Victrola department of the Jones Store Co., stated that their business for January was the biggest January the department had ever had, in fact, that the sales went way over those of last year. She added that were it not for the shortage of machines, thousands of dollars' worth more of goods could easily have been sold—in fact, many sales were lost outright for this reason while in others substitutions were made. Mrs. Williams stated also that the record business had been especially good, especially the sale of out-of-town records, which has increased 200 per cent. John McCormack's concert on January 31, as usual, greatly stimulated the sale of his records. Before the opening of the store on the morning of February 1, people were calling up and asking for the records of the songs McCormack had sung the night before.

Burton J. Pearce, manager of the talking machine department of the J. W. Jenkins' Sons Music Co., stated that a tremendous volume of business has been done, ever since the holidays, both in the wholesale and retail departments, the only handicap being the insufficient supply of goods.

Miss Patsy Ann Epperson, head of the record department, says that the sale of records continues to be wonderfully good. The firm's extensive advertising to the effect that the war spirit of sadness should be counteracted by lots of music in the home seems to have a direct effect on the sale of records.

A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co., is in the East where he will stop off at the Victor factory.

The Junkins-Riley Co., Pathé jobbers, report business having slowed down considerably since Christmas but say that collections are holding up splendidly. This great plentitude of money on the part of the people is particularly true in Oklahoma. Business has never been better there, especially right in the heart of the oil district. Here the new art models are a great favorite.

F. G. Abernathy, Highland, Kan., a Pathé dealer, recently died following a short illness.

Baily Bros., Greencastle, Mo., recently took the agency for the Pathé machine and say the initial business has been really excellent.

Otto D. Standke, manager of the talking machine department of the Geo. B. Peck Dry Goods Co., stated that business was better than ever before—the department having made a very substantial increase over last year's volume. Like every one else, however, Mr. Standke lamented the shortage but said that it was only recently that he had been seriously handicapped, as he had been fortunate enough to have had a fair supply on hand.

The Wunderlich Piano Co. has been having its usual steady business in Victrolas. Of course, it has felt the lack of machines and is, in fact, practically cleaned up on almost all models.

Miss M. E. Tower is the new assistant to Mr. Hall in the Hall Music Co.

The Edison Shop recently put on another stunt which, like its Hawaiian players, drew the crowd. In a series of recitals, Spalding records and other violin records were used in conjunction with the playing of Gilbert Jaffy, the "Boy Wonder" of Kansas City. This boy, who at fifteen is considered an embryo genius, was recently "discovered" in the city's Little Italy quarter.

Miss M. Ellis, Architects' and Engineers' Supply Co., Pathé and Sonora dealers, is a new assistant in that department. She was formerly with the J. W. Jenkins' Sons Music Co.

The Kansas City Photo Supply Co., which is in the center of the shopping district, installed on October 15 the Columbia line. It was an experiment, but it has developed in less than four months into a big retail distributing point. Practically one-half of the floor space of the company has been turned over to its use. Three additional rooms for demonstrating machines and record stocks in addition to a beautiful rest room are now in the course of construction. H. P. Laseter is in charge.

The Brunswick Shop, 923 Walnut street, which has not yet been in existence a year, has had a steadily increasing volume of sales until the owners now feel that they can well hold their own with some of their oldest competitors. Their most popular model has been the \$180 in Adam brown. The more expensive records have not been as popular as formerly but collections are holding up fine on all sales of machines.

AN INVALUABLE ASSET

Courtesy is a good thing that any man can use, because the only thing he has to spend to acquire it is a little thought and care.

Two Artistic Window Suggestions Described for Talking Machine Dealers

By Ellis Hansen

The hearty response from dealers all over the country to the small but effective Washington that would be astonishing only a few years ago. Such beautiful instruments deserve artistic set-

tings and real skill in decoration to make the picture of the window harmonious and attractive.

An ideal setting for a fine period cabinet would be a music room furnished in the same historic design as the instrument. This is being done by at least one big store in Chicago (Lyon & Healy) and the result is very beautiful. But the average store has not the space nor does the expense justify such a realistic window display. There is, however, some well-defined and specific decorations used for music rooms that could be applied to the average show window and which would make that sympathetic and appropriate environment that adds its charm to the tastefully decorated music salon. Music suggests allegory and symbolism. Nowhere is the power of symbolism more attractively manifest. The musical instruments pictured in allegorical decorations lend themselves beautifully to decorative effects. The accepted meanings of some of the symbols most useful for music dealers (in window as well as printed advertising) are here recorded.

Pan Pipes: Music.

Lyre or Harp: Heavenly music.

Mask: Dramatic art, light or grand opera according to expression of mask.

Lamp or Torch: Learning, education, wisdom.

An Interesting and Idea-Suggesting Edison Grand Opera Window—No. 1

Birthday display, illustrated and described in last month's World, and of which all of the ready-made display material was disposed of, not only to the Eastern dealers but as far west as Fresno, Cal., has proved without a doubt that dealers are very much alive to the importance of good talker trims.

Going over my file of letters received during the last year (this being the twelfth article on window displays) I find that some of the most effective displays have been criticized and complained about on account of being too large, too costly and too difficult to make to be practical for the average dealer. Among the dozen or more described the two finest are to my mind, undoubtedly, the silhouette display in the May, 1917, issue and the Edison prize display published in the November issue. In this article I have simplified these very fine displays and, in doing so, I have reduced the size about one-half, which will enable the great majority of stores to make use of them.

The tendency in the making of musical instruments, and particularly so in talking machines, is to produce the artistic and beautiful. Just look at the improvement in the appearance of talking machines the last few years! Some of the fine period cases now on the market are veritable works of art. But even the inexpensive instruments are in many cases convincing proofs of the skill of the designer, with a dignity of line

Details of a Simplified Arrangement of the Above Window—No. 1

Bell: Joy, earthly music, call to worship, invitation.

Candle: Study, information, attribute of Christmas (with holly wreath).

Trumpet: A message, a warning.

Scroll: Poetry, ancient learning.

Laurel: Victory, earthly success, reward.

But the richest field for the decoration for music windows are the thousands and thousands of paintings and panels on musical subjects from which the thoughtful decorator can choose the motif that is suitable for his purpose.

The most attractive features of the two displays herewith illustrated are the symbolic pieces.

In the Edison grand opera window, No. 1, and in the silhouette display, the joyous and triumphant groups of dancing and playing children tell the true story of the joy and happiness that music adds to life.

All the several features that made the two original displays so successful have been retained, as will readily be noticed by comparison.

(Continued on page 60)

Relief Art Utilized Most Effectively in This Window Display—No. 2

Here's the kind of record that makes the customer's eyes sparkle, and makes him reach for his pocketbook. It's A2475, the Columbia debut of Lacalle's Spanish Orchestra!

Woolworth Building, New York**

TWO ARTISTIC WINDOW DISPLAYS FOR "TALKER" DEALERS

(Continued from page 59)

Every one and all of the other twelve displays pictured the time this series of articles appeared can be simplified and reduced in size and cost the same way.

Dealers should be able to adapt for their

Description of Silhouette Display No. 2

The frame work is identical with the Edison display except the circle on top, which is intended for the trade-mark, monogram or any other effect wanted. The silhouettes are hand-

Details of Simplified Relief Art Window (No. 2) Shown at Bottom of Page 59

own needs the most important display features in any display described in this journal suitable for their own particular clientele and their own particular location. No other people on the face of the earth appreciates "Yankee ingenuity" more than the people in the land of its birth, and Yankee ingenuity is only another word for originality, and this applies equally to window trims as well as to Ingersoll dollar watches and other distinctive American inventions.

Display Adapted From Edison Window No. 1

This display consists of three frames made of wood and enameled ivory ornamented with one-inch black velour strips, as plainly seen in picture. Four ornamental wood supports serve to keep the side frames securely fastened to bottom of floor. The art panels consist of hand-colored figures mounted on black velour, which makes a very rich and striking contrast. The open space with the flower wreaths is intended for the name of the phonograph that is to be featured.

cut from black reinforced velour and mounted on white silk. The large center panels in the two uprights are intended for showcard and poster work.

STEINBACH & CO. EXPANDS

ASBURY PARK, N. J., February 7.—Steinbach & Co., of this city, one of the leading department stores in this section of the State, has purchased the Victor business of the Zacharias Co. Steinbach & Co. have opened up a very attractive Victor department on the fourth floor of their building, and according to their present plans will give the Victor products an aggressive representation, fully in accord with their prestige and quality.

Sometimes we feel that the ultra-progressive stores are to-day suffering from over-management as much as some of the old-timers have been suffering from neglect.

STILL JOINING THE SERVICE

Ernest Fontan, of the Traveling Staff of the New York Talking Machine Co., to Serve Uncle Sam—This Company Now Has Twenty-Three Stars on Its Service Flag

Ernest Fontan, one of the most popular members of the traveling staff of the New York Talking Machine Co., New York, Victor wholesaler, who has been covering New Jersey territory, was accepted this week as a member of the new National Army and according to present plans will enter the service of Uncle Sam the end of the month.

With Mr. Fontan's entry into the Government's service the New York Talking Machine Co. now has twenty-three stars in its service flag and this number is considered one of the finest records proportionately that has been attained by any commercial organization, in view of the fact that the company's staff is comparatively limited. At the present time several of the former members of the sales force are "somewhere in France" while others are in camps getting ready to leave for "over there" in order to do "their bit" in the war for democracy.

It is also understood that five members of the shipping force will soon be called for duty in the second draft giving the company's service flag a grand total of twenty-eight stars.

WM. L. GARBER RETURNS

William L. Garber, who was formerly associated with the New York Talking Machine's executive offices for several years and who enlisted as a member of the artillery corps some months ago, has just returned to New York and has rejoined the company's sales staff.

Mr. Garber was ready and willing to serve his country, but after spending several months in camp the medical examiners found that he was suffering from an "athletic heart" and this ailment necessitated his return home.

"I'm going to break a record one of these days," remarked the athletically inclined youngster.

"Fine," said his dad. "What record?"

"One of the phonograph records," replied the boy.

VALLORBES JEWEL CO.'S NEW NEEDLE

Manufacturers Well Known in the Sapphire Trade Introducing New Semi-Permanent Needle for Talking Machine Records

LANCASTER, Pa., February 6.—The Vallorbes Jewel Co., of this city, have recently perfected a new needle for the talking machine, playing lateral cut records. It is to be known as the "Vallorbes Semi-Permanent Needle," and is attractively carded in sets of five and then placed in a moistureproof waxed envelope.

The Vallorbes Jewel Co. have been engaged in the needle business for some time, and claim to be the originators of the diamond point. As their name would imply they have hitherto restricted their output to the Vallorbes sapphire ball needle, which has made quite a name for itself in the trade, and diamond points. W. F. Meiskey, president of the company, realizing the demand for needles and their scarcity, due to the great worldwide war and its prior claims on the steel industry, set about to produce a needle which would be semi-permanent in form. The Vallorbes semi-permanent needle, he announces, is not only a "conservation" needle but a great improvement as well. Necessity has brought forth many new inventions during these wartimes that have proved a great boon to industry. The Vallorbes semi-permanent needle, it is claimed, is one of these and is here to stay. These needles are made in soft, medium and loud tones.

EFFECTIVE COLUMBIA PUBLICITY

A Timely and Attractively Arranged Advertisement in the Saturday Evening Post Has Come in for Considerable Notice and Much Praise

The Columbia Graphophone Co., New York, used a very attractive advertisement last week in the Saturday Evening Post featuring a picture that was recently shown in the Talking Machine World which portrayed a family in England seeking shelter from the bombs dropped by German air raiders and taking along with them a Columbia Graphophone to relieve the wait until the "all clear" signal was given. It is said that this photograph pictures a scene very usual in the London district.

Under the heading "What Would You Have Taken With You?" the text of this interesting advertisement reads as follows:

"The people in this picture are seeking shelter from the bombs dropped by German air raiders. When the 'Take Cover' siren sounded they hustled to the dugout. You will notice that there are seven people here, and a Columbia Graphophone (as the English prefer to call it) is the only thing they are taking along.

"You who have never been bombed, and you who have never owned a phonograph may think this a queer choice. Some might have taken bed clothing, others food, others silverware and valuables, others a card-table and a lamp.

"But this family, owners of a phonograph, do not appear to have hesitated.

"Only the people who are actually feeling the horrors and dangers of war can completely appreciate the necessity for music.

"Music allows you to forget the discomforts of the present hour—it helps you to remember happier things and to dream of still happier seasons.

"The Columbia Grafonola, by virtue of the diversity of records, songs, dances, and instrumental selections that it will play, represents the greatest relief from boredom or oppression that is known.

"Incidentally, for the benefit of the curious, we will state that this is a Columbia instrument shown in the photograph. Any good phonograph would have been desirable in the dugout, but this happens to have been a horn type of Columbia Grafonola. They are very popular in Great Britain and all her colonies.

"In the United States the most popular Grafonola is the standard type, with the horn enclosed in the cabinet."

SOME WARTIME SUGGESTIONS

If yer want ter get ter somewheres,

Walk ahead!

Don't yer loiter by de roadside

Playin' dead.

Walk, an' whistle when yer walkin'!

Smile, an' do some friendly talkin'!

An' you'll get there without balkin'!

Walk ahead!

MAKING SONA-TONE PHONOGRAPHS

The Sona-Tone Phonograph Co., Inc., Organized With Men of National Prominence Interested to Manufacture This Instrument—Some Prominent Purchasers of the Sona-Tone

Thomas Dixon, author of "The Birth of a Nation," recently wrote the following letter to the Sona-Tone Phonograph Co., Inc., referring to a Sona-Tone phonograph which he had purchased for his New York home from E. W. Ladd, inventor of this instrument: "I am enclosing you my check for the Sona-Tone phonograph which we have played almost continuously in our home for the past week. I find it the clearest and sweetest toned musical instrument I have ever heard."

Two years ago Mr. Ladd, who holds patents on several successful and widely used mechanical devices, became interested in phonographic reproduction, and particularly along the lines of greater resonance. He worked to produce an instrument that would practically eliminate the noises due to accidental imperfections or the ordinary wear of the record, and as a result of his experiments the Sona-Tone was placed on the market and soon won considerable praise.

The commercial success of the line attracted the attention of a group of local business men, and a company was formed with Mr. Ladd as head of the production department, and controlled by interests identified with the United States Steamship Co. and its subsidiaries. The following are the officers of the Sona-Tone Phonograph Co., Inc.: President, B. G. Higley, vice-president and general counsel of the United States Steamship Co.; vice-president, H. F. Morse, president of the Hudson Navigation Co. and vice-president of the Groton Iron Works; secretary and treasurer, T. A. Sherman, counsel for the United States Steamship Co.

It is planned to manufacture a complete line of instruments, and among the recent purchasers of Sona-Tone phonographs are the following: Mrs. John F. Yawger, president of the New York City Federation of Women's Club; I. H. Griswold, president of the Bell Telephone Co., Plattsburgh, N. Y.; Stuart Gibboney, member of the law firm of Barker, Watson & Gibboney; George Hodgson, prominent in Buffalo social and religious circles; H. C. Hequemburg, president of the Dunkirk Iron Works, Dunkirk, N. Y.

BROAD IN CHARGE AT SCHIRMER'S

Henry Broad, well known in the Victor trade, is now in charge of the Victor department of G. Schirmer, Inc., 4 East Forty-third street, New York. This department will be under the general supervision of Mr. Andrews, the manager of the various retail departments of G. Schirmer, Inc. Mr. Broad succeeds H. O. Hunter, who resigned as manager of the Victor department last week.

DISTRICT MANAGERS' CUP TO YERKES

Field Sales Manager, Making His Headquarters in Chicago, Wins President Whitten's Sterling Silver Trophy Offered to District Managers

George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, announced recently that H. A. Yerkes, field sales manager of the company, had won the President

Cup Won by H. A. Yerkes

Whitten district managers' cup, a handsome sterling silver trophy, which had been donated by Mr. Whitten, and which had been keenly contested for among the district managers throughout the country. The terms of this contest provided that permanent possession of the trophy rested with the district manager who won the cup for three months, and notwithstanding the fact that he did not register his first victory until October, Mr. Yerkes won the cup with three consecutive victories.

Mr. Yerkes won the President Whitten district managers' cup as district manager of the Middle West territory, and W. L. Sprague, manager of the Minneapolis branch, is also being congratulated upon this victory, for his branch was a most important factor in bringing the trophy to the Chicago division. The final result of the contest was in doubt until the last moment, for several of the district managers had been winners for two months, and needed only one more victory to clinch their right to permanent possession of the cup.

H. A. Yerkes is one of the most popular members of the Columbia sales organization, and was recently appointed field sales manager. He is at present making his headquarters in Chicago.

PRESSER CO. TO HANDLE VICTROLAS

Philadelphia Music House to Inaugurate New Talking Machine Department on March 1 With A. D. Proudfit in Charge as Manager

PHILADELPHIA, PA., February 8.—It has been announced that the Theodore Presser Co., prominent music publishers and dealers of this city, have arranged to open a new Victrola department with a store at 1710 Chestnut street, adjoining their present quarters, on March 1. The new store is being fitted up in a most elaborate manner with a full equipment of sound-proof demonstrating booths. Passageways will be cut from the present store of the company into the new Victrola section. The Victrola department will be under the management of A. D. Proudfit, at present manager of the retail piano store of the Estey Piano Co., New York, and formerly connected with the piano and Victrola department of Frederick Loeser & Co., Brooklyn, N. Y., as assistant manager. Mr. Proudfit has had much experience in handling Victrolas with the Loeser house and is considered well qualified for his new post.

TO ISSUE "EMERSON SPOTLIGHT"

Emerson Phonograph Co. Bringing Out House Organ for Its Dealers

The Emerson Phonograph Co., New York, manufacturer of the Emerson records, has announced the publication of a new house organ which will be known as the "Emerson Spotlight." The company decided to publish this house organ in order to keep its dealers posted on the latest developments of the Emerson business. The first issue of the house organ is now in the hands of the printers and will be in the mail by the end of the week. The "Emerson Spotlight" is essentially a practical publication and aims to tell the dealers how to increase the sale of Emerson records. If the first issue is any indication of the future numbers, this new periodical will be helpful, entertaining and useful to every storekeeper handling Emerson records.

Success is an easy thing to understand after it has been attained. The great problem is to understand in advance how to acquire it.

GRAFONOLAS POPULAR IN OREGON

M. E. Everitt, of North Bend, Selling Many of These Instruments in His Territory

PORTLAND, ORE., February 4.—The local branch of the Columbia Graphophone Co. recently received an interesting photograph from M. E. Everitt, North Bend, Ore., who owns one of the finest drug stores in the State. Mr. Everitt handles the complete Columbia line and is an enthusiastic "booster" of all of the Columbia products.

The accompanying photograph shows a shipment of Grafonolas recently received by Mr.

Big Columbia Shipment for M. E. Everitt

Everitt, this shipment of machines being the third shipment sent to Mr. Everitt during the last few months. Up to about six months ago there were no railroads in the town where Mr. Everitt is located and most of the machines which he sold were taken out from this town with either a rowboat or a gasoline launch, up the various rivers to the dairy farms and logging camps.

PATHE WINDOW HANGER FOR MARCH

The Pathé Frères Phonograph Corp., New York, has sent to its dealers a very attractive hanger featuring the new Pathé March records. This hanger contains a splendid picture of Grace Hoffman, a prominent coloratura soprano who records for the Pathé library exclusively. Miss Hoffman has a new record in this March list which will doubtless meet with a ready and extensive sale.

The March supplement of Pathé records also contains a number of well-known popular hits, dance records, Hawaiian numbers, standard vocal records, instrumental solos, band and orchestra records and a specially selected list of Irish records.

RECENT HEINEMAN EXPANSION

Otto Heineman Phonograph Supply Co., Inc., Takes Over Portion of Second Floor in Present Building in Order to Accommodate the Steadily Growing Volume of Business

In order to accommodate its fast growing business and in order to provide its employes with maximum convenience and comfort the Otto Heineman Phonograph Supply Co., Inc., manufacturer of the Heineman products, Meisselbach products and the Dean steel needle, has materially increased the floor space that it occupies in the Central Building at 25 West Forty-fifth street, New York. In addition to occupying the greater part of the sixteenth floor at this address the company has made arrangements to also occupy a considerable portion of the second floor of this building.

Otto Heineman

According to the plans of Otto Heineman, president of the company, the executive and general offices will be located on the sixteenth floor and will be given over exclusively to the shipping department. This arrangement will enable the company to augment its office staff in various directions and give the shipping department sufficient room to meet the requirements of the Heineman business.

For several months past the Otto Heineman Co. has been seriously handicapped by the fact that the executive officers were obliged to work in cramped quarters and the office force could not be enlarged in view of the limited space available. This condition has been relieved by the leasing of space on the second floor which is ideally suited for the Heineman shipping department.

The offices on the sixteenth floor will include the private office of Otto Heineman, president and general manager of the company; Adolph Heineman, assistant to Mr. Heineman and in charge of the John M. Dean division; W. C. Pilgrim, assistant general manager; F. Aufrichtig, treasurer; Paul L. Baerwald, Eastern sales manager.

The export department which has steadily increased in importance during the past year will also occupy several rooms on the sixteenth floor, and R. C. Ackerman, manager of the Heineman export department, will have ample opportunity to adequately take care of this important and active division of the Heineman business.

The shipping department in its new home on the second floor will be in a position to render efficient service to the Heineman clientele and will leave nothing undone to co-operate with the users of these products in expediting shipments of goods that can be handled from New York.

CORLEY CO. EXECUTIVES IN TOWN

John G. Corley and Frank Corley Bring Good Business Reports From Richmond

Among the recent visitors to New York was John G. Corley, head of the Corley Co., Victor distributors and piano merchants of Richmond, Va. Mr. Corley was accompanied by his son, Frank Corley, who is in charge of the wholesale and retail Victor departments of the company. Mr. Corley, Sr., attended the meetings of the Board of Control of the National Association of Piano Merchants, of which he is an ex-president. He stated that business in Richmond was thoroughly satisfactory during the holidays, and that judging from results in January there was a good year ahead of the talking machine dealers in his section of the country.

LIQUID MUSIC IN PORTLAND, ORE.

Phonograph Cases Found to Contain Imitation Machines Lined With Five-Gallon Kegs of Whiskey—Columbia Co. Manager Through Error Aids in Foiling the Smugglers

PORTLAND, ORE., February 4.—Phony phonographs they proved to be, all done up in Sonora boxes and billed to the Columbia Graphophone Co., this city. Liquid music indeed it was which was sent from San Francisco to Portland. When Deputy Sheriff Christofferson opened the cases at the county jail he found instead of phonographs five five-gallon kegs of perfectly good jazz whiskey which hadn't any business in dry Oregon.

The shipment was consigned to an unknown person, but the boxes bore the address and name of the Columbia Graphophone Co. They came up on the steamer "Beaver" from San Francisco, and were lying round in everybody's way waiting for somebody to come and take them away. Finally, in order to relieve the

congestion the dock officials telephoned to S. D. Heater, of the Columbia Co., to send for the boxes. This he did, and when the boxes arrived at the house wonderment was expressed that they should be Sonora cases. Down into the basement the janitor moved them. Mr. Heater went down shortly afterward and found the janitor trying hard to shove something quickly back into the cases. Examination showed a five-gallon keg of liquor.

Mr. Heater promptly notified the sheriff's office and the offending cases were removed. Inside the cases were tall fir boxes painted a mahogany red to imitate the conventional talking machine. Inside each box, securely fastened, was snugly resting a five-gallon keg of liquid music.

The person to whom the shipment really belonged appeared at the dock with a bill of lading covering the shipment after it had gone and demanded his goods. Upon being informed what had become of it he disappeared abruptly and has not been seen since, although the sheriff is looking for him.

We Do Not Retail

How Best to Weld the War Spirit and the Sales End Advantageously :: :: :: By Warfield Webb

The only way to sell talking machines and to increase the sale of records is the method that will attract customers to your store. You want to get a legitimate trade and you want to increase the sales in a manner that will not smack too much of side-show methods. You want to line up the customers with a novel method that will give you an opportunity for real business getting. Why not make your talking machine department a feature? Why not make it appeal with something of a novelty that will attract without undue publicity?

In this way there is possible the sales that would not otherwise come to you. The war and its many phases and its appeals now to the people has brought about a newer meaning for the talking machine. Feature a window display with a soldier camp and a talking machine that has real human interest in it.

Make a display that will really appeal and then show the desirability of getting some records for the boys and sending them to the camp for the enjoyment of the soldiers.

Have a feature in your store and give a

prominent part to the playing of national anthems of all the allied countries. Have these played on frequent occasions and in this way familiarize the people with the various national hymns of those countries. Create in this way a little more patriotism, and at the same time give your talking machine an opportunity to help you make your sales larger. Get the people to seek you and have frequent concerts that will attract the people to your store. Getting the people inside will be a big help. The sales will often follow as a natural course.

TRADE NEWS FROM BALTIMORE

Dealers Complain of Shortage of Machines and Records—Bad Weather Delaying Shipments and Hurting Trade—New Pathé Dealers Established—Reports From Leading Dealers

BALTIMORE, Md., February 5.—With a general cry of shortage of machines and records from most of the firms, business went ahead in January of the previous year, despite the difficulties faced by all dealers. The most severe January that the retail trade has had to face from the standpoint of weather in the history of the industry was the lot of these merchants in this city and this section. One snowstorm followed another in rapid succession, and even with a vigilant street cleaning department it was not possible to keep the streets clear of snow in the retail shopping centers.

Stores having talking machine departments away from the main centers improved their business until the shortage of records of the late numbers stopped them. The freight congestion is the most serious phase of the situation, and even goods shipped by express are just as

hopelessly delayed as those sent by the freight route. Some of the Baltimore jobbers are now taking up the question of bringing in goods by motor trucks from New York and Philadelphia, a motor truck line being in course of organization at this time. This will take care of the freight problem in a measure, for Victor goods will be brought down over the line from Camden.

W. C. Roberts, manager of E. F. Droop & Son, Inc., is in anything but a pleasant frame of mind. He says January business went back considerably over last year, not because of business conditions, but because of lack of instruments and records. It would have been easy to have increased business had he been able to get goods. There was a demand for 10 per cent. more records and 20 per cent. more machines than could be taken care of. "I am in conference with a motor truck company," said Mr. Roberts, "and plan to have shipments brought in on five-ton trucks. This will help to relieve the situation, but the difficulty we are facing in this plan is that we have to get shipments up to New York or Philadelphia because there is more tonnage in New York to come here than

can at present be handled. I am hoping that this congestion will improve because the business is here and we ought to be able to get hold of it."

Jesse Rosenstein, for the National Piano Co., Pathé distributors, says that business went ahead last month, but not very much, owing to the shortage of records and instruments. He looks forward to showing big improvement in business just as soon as the goods that have been in transit for a long time arrive. A. Sindler & Son, furniture dealers of this city, have signed up a Pathé contract and will handle the line in a new music department to be established by them.

C. H. Eisenbrandt, of H. R. Eisenbrandt, Victor distributors, says that business showed an increase in January despite the shortage of instruments. He expects to see further improvement if only shipments of goods reach him.

HIGHER PRICED MODELS IN DEMAND

Victor Department of Ludwig Baumann & Co., New York, Tells of Increasing Demand for the More Expensive Types of Victrolas

In a chat this week with a representative of The World, F. J. Conn, manager of the Victor department of Ludwig Baumann & Co., Thirty-sixth street and Eighth avenue, New York, commented upon the fact that business the past month or so had been marked by an increased demand for the higher priced models of Victrolas. This is particularly gratifying in view of the fact that Mr. Conn's department during the past year has been the largest consumer of the smaller models of Victrolas in the city, and it is pleasing to learn that a new class of buyers is now in the market for cabinet Victrolas with an evident appreciation of the true musical qualities of the Victrola. Mr. Conn states that business has kept up very well so far this year, and judging from all indications these activities will continue for some time to come in the talking machine trade.

D. A. CREED A NEW YORK VISITOR

D. A. Creed, vice-president and general manager of the Chicago Talking Machine Co., Victor wholesalers, was a visitor to New York last week. Mr. Creed left Chicago for this city in company with A. D. Geissler, president of the New York Talking Machine Co., and the Chicago Talking Machine Co. Mr. Geissler had planned to spend a week or more in Chicago, but was called home suddenly owing to the illness of his little daughter, Martha. Mr. Geissler's many friends will be glad to know that this little lady has fully recovered from her recent operation and has now regained her usual good health and spirits.

YOU'VE GOT TO KEEP SHOVING

Graspin' opportunity ain't the only thing. You've gotta put your shoulder to it and shove and keep shovin'. When you get a big thing movin' it's easier to keep it movin' than to stop and rest.

"Lundstrom"
IT GROWS WITH YOUR BUSINESS

Standard Sectional Record Cabinet

A practical, inexpensive, convenient cabinet for dealers; made on the sectional principle, affording the following advantages:

It grows with your requirements: You first purchase just the number of sections you actually need for your present requirements; as you need more space, add more sections.

Adapted to any space: As many sections as desired may be placed in a stack; as many stacks may be used side by side as wall space will permit. Each section or shelf is indexed by a letter and each compartment by a number, forming a system of filing unsurpassed for simplicity and convenience.

Neat in appearance: No empty shelves; no overcrowding. Case always complete, yet always capable of additional expansion.

Carefully made and beautifully finished in plain and quartered oak, and in imitation and genuine mahogany.

Made in two sizes; to hold 10-inch and 12-inch records. Each section holds 200 records (100 Edison records). Stack may be made up with all sections of the same size; or sections for 10-inch records may be used above sections for 12-inch records by means of a reducing section as shown in accompanying illustration. Record sections furnished with or without doors.

Price for section \$3.00 and up

Cases shipped on approval direct from factory at considerable saving to you; on orders amounting to \$10.00 and over we pay freight to all points East of Montana, Wyoming, Colorado and New Mexico. To points in and West of these states, we equalize freight charges. For further particulars and full list of prices for the different sections in the different grades, write for illustrated circular No. 80.

Fifteen Years' Experience Making High Grade Filing Cabinets and Bookcases

RECORD MAKERS APPEAR IN BUFFALO

Favorite Recording Artists Draw Capacity Audience at Concert Given in That City on February 7 Under Auspices of Dealers

BUFFALO, N. Y., February 7.—Buffalonians of all classes who own talking machines thronged Elmwood Music Hall to-night to see in the flesh, and to hear at close range, the artists who have made records for years and with whom they have been long acquainted through that medium. The occasion was the concert given by the Peerless Record Makers, a group of favorite recording artists brought to this city by the Talking Machine Dealers' Association of Buffalo, and the event proved successful beyond all expectations.

Those who appeared with the Peerless Record Makers included Henry Burr, Billy Murray, Arthur Collins, Byron G. Harlan, J. H. Meyers, Albert Campbell, Peerless Quartet, Theodore Morse, Fred Van Epps and Sterling Trio.

The dealers threw plenty of human interest in their advance notices to the public regarding the program. Everything was done to herald the importance of the unique concert. This was one of the typical announcements of the dealers: "Recognizing the popular desire to hear the famous Record Makers, we have arranged this concert at great trouble and expense and through special arrangements with the recording laboratories. This is Buffalo's first and probably only opportunity of hearing these artists. Your record library contains selections by one or more of these artists and you will welcome this opportunity of hearing them sing and play just as they do when making records for their millions of admirers. A varied program, which will include many standard and up-to-the-minute numbers as well as old-time favorites, will make an appeal to every taste. Knowing these artists as you do, you can appreciate that their personal appearance in a concert will be an unusual treat."

The plan of bringing the Peerless Record

Makers to Buffalo was presented to the local association by C. N. Andrews about a year ago. Mr. Andrews did considerable correspondence in the matter, but arrangements for the Buffalo appearance could not be made at that time. When the present concert was recently considered Mr. Andrews, O. L. Neal and C. H. Heineke were appointed a committee to make the arrangements.

President T. A. Goold also appointed the following committee on advertising and tickets: V. W. Moody, Neal, Clark & Neal; F. G. Hohm, Bricka & Enos; John G. Schuler, Schuler Piano Co.; O. M. Kiess, Columbia Phonograph Co.; banquet committee, W. J. Bruehl, Neal, Clark & Neal; H. A. Brennan, William Hengerer Co., and H. G. Towne, of Robert L. Loud's store.

Thousands of circulars advertising the concert were furnished free to the dealers and were enclosed with their monthly lists. The dealers all sold tickets and everyone was appointed a booster. This personal canvassing of friends by the dealers helped greatly in swelling the attendance. No details were overlooked in the use of window signs and billboard and newspaper advertising. Many reading notices of the event appeared in the local press.

H. G. Towne, secretary of the Talking Machine Dealers' Association, sent to each member a comprehensive notice regarding the entertainment.

It is believed this concert will be a powerful impetus to the sale of records in this section.

At the conclusion of the concert the record makers were entertained at a special banquet by the local dealers and were heartily congratulated on the success of the entertainment. W. J. Bruehl paid tribute to the singers in several original parodies.

Last night the Peerless Record Makers gave a very successful concert in Syracuse under the auspices of the local talking machine dealers and have also arranged to offer their two hours of welcome entertainment in other cities in the East in co-operation with the members of the trade.

MEETING OF COLUMBIA DEALERS

To Be Held at Columbia Shop on Fifth Avenue on February 15 Under the Auspices of the Local Wholesale Branch of Columbia Co.

An informal meeting of the Columbia dealers in the metropolitan district will be held to-day, February 15, in the recital hall of the Columbia Shop, 411 Fifth avenue, New York, under the auspices of the local wholesale branch of the Columbia Graphophone Co. Lambert Friedl, manager of this branch, is responsible for this meeting and, according to his present plans, Columbia representatives in this territory will have an opportunity to discuss practical problems and hold a general "pow-wow" regarding merchandising and sales activities.

Mr. Friedl has prepared a program that includes many topics of vital interest to the dealers and he has planned to balance the serious part of the program by arranging for the appearance of several well-known Columbia artists, who will render a number of selections during the course of the afternoon.

In a chat this week with *The World* Mr. Friedl stated that business had kept up splendidly during the past few weeks and commented upon the fact that the Columbia Co. is leaving nothing undone to co-operate with the dealers in this territory. Referring to the difficulties incidental to securing goods at the present time, Mr. Friedl said: "We are going to almost unreasonable expenses in order to co-operate with the Government as well as our customers. In other words, we are making the Columbia Co. the third consideration in our business activities."

"The other day we paid express charges totaling several hundred dollars in order to secure some machines from the factory, and our dealers can therefore readily understand that the cost of doing business has increased tremendously during the past few months. However, we are charging this increased expense to patriotism and loyalty to our dealers."

TORONTO CONTINUES TO BE VERY ACTIVE TRADE CENTER

Leading Makes of Talking Machines and Records in Demand—Steady Expansion in Stores and New Concerns Indicate That 1918 Will Be a Big Year in This Progressive City

TORONTO, ONT., February 6.—The Robert Simpson Co., Ltd., the well-known department store, is the newest addition to the local list of "His Master's Voice" dealers. The company's "Music Studio" is located on the sixth floor, where they have no less than eight demonstration rooms. It is in charge of Mr. Brown, formerly manager of the Mason & Risch Victrola department in Vancouver, and more recently on that firm's selling staff in this city.

The Canadian Symphonola Co., Ltd., have just received at their factory an interesting souvenir of the Halifax disaster. A couple of their De Luxe Symphonolas that had not yet been opened by W. H. Phinney & Co., Ltd., the Nova Scotia distributors of these lines, came back for repairs, the cabinets being badly used up by fire and water, and the packing cases being broken, scorched and soaked.

"No records exchanged" is the policy of the Toronto Grafonola Co. A notice to this effect is displayed in each of the twelve demonstration rooms. In discussing this policy H. Ritz, manager of the company, stated that he could credit increased record business to it.

"A very good January trade," report A. R. Blackburn & Co., "in both the piano and Victrola departments." The same report was made by R. F. Wilks & Co., who handle Columbia Grafonolas.

The branch store opened up at 1657 Dufferin street, this city, last fall, by Toronto Grafonola Co., is reported by H. Ritz to have proven a good addition to their business.

"We are well satisfied with the amount of business developed during 1917," said I. Montagnes, referring to the Canadian distribution of Sonora phonographs, for which line his firm have the Canadian representation. E. Van Gelder of this firm has just recently returned from New York, where he visited the Sonora factory to arrange for 1918 deliveries. In their retail department they report good success in closing cash sales for the higher priced makes, a number of Toronto's best-known citizens being among recent purchasers. Harry R. Braid, manager of this department, said that the Christmas and New Year's business arising out of the December campaign was very gratifying.

The R. S. Williams & Sons Co., Ltd., are now running a newspaper series of lists of Edison re-creations.

Domestic records are now being distributed in Canada by the Pollock Mfg. Co., Ltd., who maintain factories in Kitchener and Elmira, Ont.

H. L. Willson, New York, and C. A. Hanson, Bridgeport, vice-president and general works manager, respectively, of the Columbia Graphophone Co., visited the Canadian branch during the past month. This was Mr. Willson's first visit to Canada and was the coldest day ever experienced by him until his return to New York.

Patrons and friends of the Music Supply Co., Columbia distributors, were pleased to receive with that firm's good wishes for Christmas and New Year's a neat little vest pocket tickler. This with renewable fill came in a fine quality of seal with the Columbia trade-mark in gold.

With the calendar year Pathé Frères Phonograph Co. of Canada, Ltd., have started out on their second year. "The first year's results exceeded our anticipations," remarked Otis C. Dorrian, general manager of that firm.

Arthur M. Tanney, general manager J. A. Banfield of Winnipeg, Man., was among the January visitors to the Columbia factory in this city. The Banfield house has a Columbia department in which Mr. Tanney stated more business had been done in the last six months than they had thought could be done in a year.

Messrs. Wettlings and Dupont, Welland, Ont.; Mr. Britton, Grand Valley, Ont.; Mr. McKibbon, Wingham, Ont.; Alex. E. Creemore and H. Judson Smith, Brantford, Ont., have secured the agency of the Brunswick phonograph and records of this make.

"Music in the Home" ideas are incorporated in some Columbia Grafonola copy being run in the local newspaper by A. & H. Wideman of Markham, Ont.

George Dodds, who opened up on Danforth avenue, this city, a couple of years ago with His Master's Voice lines, has lately improved his selling facilities by adding a new demonstration room.

Frank Stanley is making extensive alterations for the equipping of what appears to be one of the most beautiful recital halls, to be used almost entirely for the sale of phonographs.

In the Edison Week Patchwork Advertisement Contest, from October 20 to 27 last, Gordon R. Diver, Montreal, won fifth prize.

J. C. Pott, Canadian sales manager of the Otto Heineman Phonograph Supply Co., Inc., accompanied by Mrs. Pott, spent the Christmas and New Year's holidays in New York. Mr. Pott is of the opinion that 1918 will see great developments in the Canadian phonograph business.

P. K. Wood, of the local branch of the Thomas Mfg. Co., makers of Dayton motors, recently spent a week at the firm's factory in Dayton, Ohio. Mr. Wood reports that the management are installing additional machinery to double their capacity.

Mr. Burgess' place on the road in Ontario with the Pathé Co., Toronto, will be taken by C. Le Voi, an experienced and successful talking machine salesman, whose apprenticeship was passed with the Columbia Co. During the last three months Mr. Le Voi has been in charge of the talking machine departments of Messrs. Jury & Lovell in Oshawa and Bowmanville. During that time he established a record for sales which will be difficult to beat in towns of this size.

The Pathé Co. have just received the first examples of some new art designs in Pathephones. They are in the shape of console tables, and include examples of Jacobean, William and Mary, and Sheraton. They retail for \$350. A fine display of these machines was made in one of the Yonge street windows of the Robert Simpson Co.

E. C. Pelton, formerly of Kentville, Ont., who moved into Ottawa a couple of months ago, taking with him Sherlock-Manning representation, has added the Starr line of phonographs and records. Until taking on the Starr Mr. Pelton had never connected up with the talking machine business.

John A. Croden of the Canadian Phonograph Supply Co., London, Ont., who are distributors in Canada of Starr phonographs and records, paid a visit to the factory at Richmond, Ind., recently.

New firms handling Brunswick phonographs and records include Alex Earle Creemore and H. Judson Smith & Co., Brantford, Ont.

J. P. Bradt, general manager of Columbia Graphophone Co.'s Canadian division, with headquarters at Toronto, attended the convention in New York of Columbia division managers and executive heads. At the same time the division salesmen and the district managers of the Dictaphone Co. had their convention.

Harry E. Wimperly, who is making a success of upstairs piano salesrooms, in the Ryrie Building at Yonge and Shuter streets, has added "His Master's Voice" line of talking machines.

Gerhard Heintzman, Ltd., are now listed among His Master's Voice dealers, having stocked Victor lines in their stores at Toronto, Hamilton and Kitchener. "The New Home of the Victrola" is the slogan featured in recent advertising of this department.

New premises at 864 Bloor Street, West, this city, have been purchased by J. H. MacMillan, suburban piano and talking machine man dealer. At present Mr. MacMillan is handling with good success the Aeolian-Vocalion phonograph.

The John Raper Piano Co., Ottawa, Ont., report the showing in their Victrola department for 1917 as remarkable. They trebled the 1916 sales of Victrolas and Victor records.

The Great War Veterans' Association, Toronto, Ont., in a recent letter from the secretary, W. E. Turley, to the R. S. Williams & Sons Co., Ltd., expressed himself as follows with regard to the new Edison Diamond Disc machine:

"The Edison is much appreciated by the members of this association. During the several months we have had the use of it at the clubhouse headquarters it has been the means of providing splendid entertainment for the members of this association. We have never had the slightest difficulty with it during that time and it has proved itself to be of sound construction, giving splendid reproductions of musical and vocal numbers. We believe it will provide fine entertainment for returned soldiers for many years to come."

Previous to the appearance in Toronto of Louise Homer, Mason & Risch, Ltd., ran a complete list of Homer Victor records preceded by a photo of this popular Victor artiste. The results from this particular piece of newspaper copy were splendid.

The Treadgold Sporting Goods Co., Kingston, Ont., has taken the agency for the Brunswick.

Mahood Bros. report good Victor business in Kingston, Ont.

New talking machine firms recently registering in Toronto, Ont., include The Phonograph Shop and the Concertola Mfg. Co.

In the Columbia Graphophone Co.'s newspaper advertising of recent date they say: There is a Columbia Grafonola in every Y. M. C. A. and Knights of Columbus Army hut. Following their name and address of the company, they finish up as follows:

"Food will win the war. Don't waste it."
James Malcom, president of Pathé Frères Phonograph Co. of Canada, Limited, has been elected mayor of the town of Kincardine, Ont.

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 68)

TO OPEN PATHE DISTRIBUTING BRANCH IN MONTREAL

Move Necessary to Take Care of Growing Business—Talking Machine Men Have Successful Meeting and Dinner—Berliner Gramophone Co., Ltd., Enlarge Quarters—General News

MONTREAL, QUE., February 5.—Owing to the rapidity with which their business is growing in the Province of Quebec, the Pathe Co. have decided to open a branch in this city to take care of that province. This branch will be under the management of R. W. Burgess, who has been so successful in handling the wholesale business in Ontario. Mr. Burgess' promotion is a well-earned one, and will cause great satisfaction to his friends in the trade. His territory will be a large one, but with his long experience and natural ability he should have no difficulty in handling it successfully.

The Talking Machine Men's night out entertainment and dinner, this is the way the tickets read, will take place at Cooper's February 8, when it is expected a large assemblage of talking machine, piano and musical men will be present. The purpose of the gathering is to foster and stimulate an interest outside of business amongst the members of the trade, and no doubt this informal gathering will be the nucleus of an association for social enjoyment, to create better fellowship and have the members of the trade become better acquainted. The idea is not to form a business association but to confine it strictly for social purposes.

In conformity with their policy of service, the Berliner Gramophone Co., Ltd., are making material enlargements to their record output and facilities for carrying larger stocks. An entire new building, with a private siding on the Grand Trunk Railway, has just recently been leased for a term of years.

The entire stock of Victrolas will be stored in this building along with materials for record manufacture, so that the parent factories and warehouses will be devoted entirely to the record branch of the business, head offices and sales department.

The building just leased and of which possession has already been taken, gives the firm an additional 23,000 feet of floor space or an increase of 50 per cent. It is being fitted up to the requirements of the company, while extensive alterations in the record storage warehouses in the way of additions are being made. Not only is the factory output increased and the storage facilities enlarged, but even greater stocks of records will be carried at the company's distributing houses in Toronto, Winnipeg and Calgary, making possible quick deliveries, so essential in record retailing.

A particularly interesting feature of the Berliner plant in Montreal is the recording department. Experiments and research work carried on by H. S. Berliner, vice-president of the company, personally, and with a staff of expert assistants for a number of years, has made recording in Canada possible. His Master's Voice dealers have been able to stock many hits, while still hits, through the efficiency of this recording department, which has also made possible records of special value in this country and specials by Canadian artists, as events made recordings of particular titles desirable.

Henry Burr recently made a special trip to Montreal to record two songs.

The Pratte Piano Co., Ltd., manufacturers of the Pratte piano, have registered their manufacturing phonograph department under the name of the Prattephone Co.

Almy's, Ltd., report an exceedingly heavy volume of business in January for Columbia Grafonolas and Columbia records, and Miss Vezina, who has charge of this department, is very much pleased that there has been no apparent falling off after the record business established by her department in December last. The amount of business already done in February promises a good outlook for its continuance.

The Berliner Gramophone Co., Ltd., report no falling off in sales of Victor machines and records as compared with their record Decem-

ber business of Victor machines and records, and state that it is wonderful the way business is keeping up, their various stores presenting an appearance of holiday times.

AFTER MISLEADING ADS IN CANADA

Amendments to the Criminal Code Advocated As a Means for Checking That Evil—Text of Proposed Law—Grafonolas in Army Camps

TORONTO, ONT., February 2.—The subject of fraudulent advertising has been a vexed question for some time past. Many parties have been accused of advertising in such a way, but owing to the loopholes existing in the present law many cases that seemed to present fraudulent methods have been allowed to escape through technical difficulties in its enforcement.

To meet these difficulties, amendments of the criminal code have been suggested and will come up for consideration in the near future. The original act, passed on June 12, 1914, is reproduced herewith, with the inclusion of the proposed amendments:

"His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

"I. The Criminal Code, chapter 146 of the Revised Statutes, 1906, is amended by inserting the following section immediately after the section 406 thereof:

"a. Every person who either himself or by his agent, servant, employe, or anyone on his behalf, knowingly publishes or causes to be published any advertisement for either directly or indirectly promoting the sale or disposal of any real or personal, movable or immovable property, or any interest therein, containing false or misleading statement, or false representation which is of a character likely to or is intended to enhance the price or value of such property or any interest therein, or to promote the sale or disposal thereof, or is liable to mislead anyone as to the true value of such property, shall be liable upon summary conviction to a fine not exceeding two hundred dollars or to six months' imprisonment, or to both fine and imprisonment, or in the case of a corporation to a fine not exceeding five hundred dollars.

"The production by the informant of any advertisements containing any statement alleged to be false or misleading shall be prima facie evidence that the same was knowingly published by the person whose name shall be mentioned therein, as the advertiser, or proprietor, owner, agent, manager, as the case may be, of the business referred to in said advertisement. The word person shall include an individual or partnership company or corporation."

WITH THE TRADE IN WINNIPEG

Stocks Coming Along in Better Shape and Dealers Find Business Active—Robert Shaw to Make Eastern Trip—Some Records That Are in Strong Demand at the Present Time

WINNIPEG, MAN., February 4.—Columbia Grafonolas and records are now coming along more freely to the Western Fancy Goods Co., who are the Western distributors for the company. January is reported as being one of the biggest months in this firm's history. There is a decided increase in the call for the higher priced machines.

Robt. Shaw, Western manager of the Columbia Grafonola Co., will shortly leave for a visit to the Columbia factory in Toronto.

Babson Bros. report satisfactory January trade in New Edison Diamond Disc machines and Edison records—a decided increase in sales being shown for the months of December and January.

Mason & Risch, Ltd., are handling a large

Miss Perrault, saleslady of the Berliner Gramophone Co., Ltd. (East End store), was married on January 22, as was also Miss Beau regard, cashier of the company's new store, on January 28.

Harold Dewar, late of the Berliner Gramophone Co.'s retail selling staff, and to whom has been made at various times in these columns, has gone overseas. H. M. Reece is at Key West, Fla.

volume of Victrola business both in machines and for His Master's Voice records.

Campbell & Campbell, of Brandon, are active in the retail talking machine field with the Pathe and Brunswick lines.

The Western Gramophone Co. report an enormous Christmas and January trade in Victor machines and records, "Somewhere in France" and "Missouri" waltz records being tremendous sellers.

Cross, Goulding & Skinner report a remarkably good talking machine business during the month of January. Heintzman & Co., Edmonton, Alta., report the most popular Victor selling records of the past week as follows: "Wait Till the Boys Come Home," sung by Green-MacDonough; "My Sweetheart Is Somewhere in France," sung by Elizabeth Spencer; "Say a Prayer for the Boys Out There," sung by Peerless Quartet; "When We Wind Up the Watch on the Rhine," sung by Henry Burr; "I Love to Be a Sailor," sung by Harry Lauder; Hungarian Dance, No. 5, played by Philadelphia Orchestra; "She Wandered Down the Mountain Side," sung by Alma Gluck.

Mr. Hood, who was until recently in charge of the phonograph department of Stanwoods, Ltd., has severed his connection with this firm, his position being filled by Mr. Roberts of the Brunswick Co., Toronto.

Ralph & Limon, Ltd., Calgary, Alta., are handling the Veolian and the Playola, both cabinet phonographs.

J. W. Kelly, president of the J. J. H. McLean Co., Ltd., His Master's Voice dealer here, recently visited Toronto and Eastern points.

SELLS AUTOS AND PHONOGRAPHS

Dohan's, Ltd., of Quebec, Adds Pianos and Edison Phonographs to Line of Automobiles—Makes Profits During the Winter

QUEBEC, QUE., February 5.—Dohan's, Ltd., Palace Hill, who handles several makes of automobiles, recently took on the agency of the Martin-Orme line of pianos and players and the Edison Diamond Disc phonograph and Edison records. These lines are side by side in this firm, showrooms. When asked if the lines conflicted in any way with his automobile business he replied that they did not, in fact one often helps out the sale of the other he remarked. Mr. Dohan also conducts an exclusive phonograph and piano warerooms in another part of the city, and was at one time actively connected with the piano business, but having a good opportunity of renting his premises at that time took advantage of the situation and vacated, going into the automobile business. In winter especially, when business in automobiles is quiet, Mr. Dohan finds the piano and phonograph business a desirable one, especially during the months of December and January. Mr. Dohan is to the best of our knowledge the only automobile dealer in Canada exploiting motor cars, pianos, phonographs and records, and his example might be easily followed by other aggressive merchants who could turn their idle minutes (during the winter) into profits. Mr. Dohan has not gone into the phonograph business half heartedly, as he has had several demonstration booths built for the purpose of demonstrating machines, records, pianos and players. His showrooms for an automobile buyer present a most up-to-date appearance, the floors nicely carpeted, easy chairs, splendidly lighted with up-to-the-minute electric fixtures, etc. Mr. Dohan is well satisfied with his recent idea of combining these lines.

CINCINNATI TRADE OPTIMISTIC

Excellent Business for January Gives Rosy Tint to Future—Many New Dealers Enter the Field—Freight Embargoes Handicap the Trade

CINCINNATI, O., February 4.—Fair deliveries of records and a good demand for this phase of the talking machine business resulted in the trade accumulating a good record for the first month of the year.

It can be stated without question that the volume of disc sales in January was considerably above the anticipation of the trade. Much of this may be attributed to the prolonged cold spell and the heavy snows during the month, which caused a decline in the amount of street travel and forced people to remain at home and entertain themselves with concerts. Constant playing brought about a demand for additional records and the trade benefited accordingly.

The Fritsch Phonograph Co. is looking forward to a decided increase in its business this year. Many new openings have been established and the officers expect to continue this work for several months. Among the agencies established in January were the Roberts Jewelry Co., Augusta, Ky.; Phonograph Record Exchange Co., Huntington, W. Va.; Smith Music Store, Parkersburg, W. Va.; Burgen Music Co., Charlestown, W. Va., and the Intermont Drug Co., Appalachia, Va.

The Phonograph Co., Edison dealers, according to O. A. Peterson, manager, is daily expecting a decided increase to its depleted storage department. His assistants have spotted several cars and an opening of the weather, now apparently under way, is expected to enable the railroads to rid themselves of many "dead" cars. These have been on sidings for weeks, no attempt being made to haul these while the Middle West was suffering from lack of coal.

F. F. Dawson, acting manager of the Graphophone Co., is still on the job at the Cincinnati branch and is not likely to be relieved until March 1. His assistant, Herbert Schmiedeke,

has joined the colors, the vacancy not being filled.

The Crystola Co. is handicapped by embargoes placed against outgoing shipments. Dr. A. J. Swing, of the company, reports many inquiries and looks for a big year.

A LIVE NORFOLK, VA., INSTITUTION

Columbia Co., Inc., Doing Very Well in That City With Columbia Line Exclusively

NORFOLK, VA., February 6.—One of the most successful retail establishments in this city is the talking machine store conducted by the Columbia Co., Inc. This store handles the products of the Columbia Graphophone Co. exclusively

Store of Columbia Co., Inc., Norfolk, Va. and through the use of aggressive sales methods has built up a substantial demand for that line.

T. J. Carey, president of the company, is a firm believer in the value of efficient merchandising, and during the eight years that the Columbia Co., Inc., has been in business has left nothing undone to render service and co-operation to the store's patrons. Mr. Carey attributes the success of the company largely to the fact that it carries a complete stock of everything listed in the Columbia catalog, both Grafonolas and records. It also maintains an expert repair department which proves of great advantage.

CLOSE MANY IMPORTANT DEALS

Century Cabinet Co. Steadily Expanding Its Line of Phonograph Representatives Throughout All Sections of the Country

The Century Cabinet Co., New York, manufacturer of the Century phonograph, has closed a number of important deals the past few months whereby this high-class instrument will be handled by representative dealers in different sections of the country. Some of these new Century dealers are leaders in mercantile activities in their respective cities, and are in a position to give this line splendid representation.

The Century Cabinet Co. is recognized as the largest manufacturer of talking machine cabinets in the country and the Century phonograph is therefore the product of a concern which has already won the confidence of the talking machine trade. James T. Lee, president of the company, is personally supervising the production and merchandising of the Century phonograph and is keenly interested and gratified in the fact that these products are being well received by the dealers.

PRAISE BRUNO DISPLAY CARDS

This Enterprising Firm of Victor Wholesalers Issue Most Artistic Announcements

C. Bruno & Son, Inc., Victor wholesalers, have received several letters from Victor retailers praising the display cards which this company is issuing monthly. These cards, which are 14 by 22 inches, are painted by a well-known artist and contain a sales appeal that acts as a stimulant to the sales of the records that are featured. One of the attractive cards in this month's series presents the hit of "Chu Chin Chow," entitled "At Siesta Time," and if this card is displayed properly it is certain to increase the sales of this particular record.

Pettiness in money matters encourages pettiness in many matters.

REPAIRS

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our dealers, including those who make, and those who sell, talking machines. Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 176 Sixth avenue, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

SOME INQUIRIES ANSWERED

WEST ALLIS, WIS., January 31, 1918.

Editor, The Talking Machine World:

I would like advice on the following items, as I find phonograph people do not seem to agree on these points:

What is the correct playing weights of points on records of various standard makes of machines?

Is there a definite angle at which to place the needle or jewel point when in playing position on the record? If so, what determines this angle?
H. H. R.

ANSWER—The weight or pressure at the needle point of the Edison Diamond Disc sound box is between three and four ounces, and at the needle point for sound boxes playing lateral cut records, should be about six ounces. A diamond point needle should track the groove of the record at an angle of about 50 degrees to the surface of the record, steel needles at about 45 degrees. In some cases a little more or less degrees of angle will give better results.

The angle is determined by setting the sound box in the position giving the least blast. For instance, a sound box might play satisfactorily at the angle of 45 degrees, but would blast at an angle of 50 degrees, etc.

NEW YORK, N. Y., January 30, 1918.

Repair Department,

The Talking Machine World:

Some time ago one of the governor springs in a machine in my store was broken, and I was forced to substitute a spring not quite so long, but carrying a governor ball of about the same weight as the two that remained. Although the motor apparently runs at proper speed, there is a peculiar grinding noise coming from the governor, although it seems to revolve all right. Could the shorter spring have that result?
M. M.

ANSWER—If there is one short spring and two long ones in the governor it will naturally be thrown out of balance and is most likely to cause grinding or knocking noise. I would suggest that you write to the manufacturer of your motor for a complete set of springs and governor balls of the same size and attach them to the governor.

BOSTON, MASS., February 2, 1918.

A. H. Dodin,

care The Talking Machine World:

Is it possible to sharpen steel talking machines needles so that they may be used again without damage to the record? I understand that the shortage of needles has resulted in the placing on the market of machines for sharpening them. Can these machines be used safely?
J. H. W.

ANSWER—Steel needles of the usual type are generally hardened at the point by some special process, and if this hardened surface is not entirely worn away by use it should be possible to repoint them successfully. The point and sides of the needle, however, will have to be ground smoothly, and then polished until no roughness is discernible. There have been needle-sharpening devices on the market here, but they have met with indifferent success, owing to the plentiful supply of needles up to this time. It may be that if there is a genuine needle shortage an improved sharpening machine may make its appearance.

NEW JOBBER IN PHILADELPHIA

The George D. Ornstein Co. Appointed Victor Jobber With Quarters at 9 N. Eleventh Street

PHILADELPHIA, PA., February 4.—George D. Ornstein, who recently severed his connection as manager of the traveling department of the Victor Talking Machine Co., and in direct charge of the company's traveling representatives throughout the country, after over twenty years in the Victor service, is president of the new George D. Ornstein Co., which has been appointed wholesaler of Victrolas and Victor records in this city, and opened quarters at 9 North Eleventh street on February 1. Associated with Mr. Ornstein in the new venture is George A. Lyon, who for several years past

George D. Ornstein

was his assistant in the traveling department of the Victor Co.

It is doubtful if a single man in the talking machine trade is as well known among Victor wholesalers and dealers as Mr. Ornstein, for he has covered the country thoroughly and has kept in close personal touch with all developments from coast to coast. He has a keen knowledge of the talking machine business in all its phases, and has the ability of training new material to become effective in the field.

As a Victor wholesaler, Mr. Ornstein is particularly well equipped to win success. He is in a position to render distinct service to the dealers in the matter of giving advice, and his company is planning some original things in the matter of general service.

The company will confine itself to wholesale business exclusively, and starts with a floor space of nearly 10,000 square feet in the business center of Philadelphia, a location most convenient in every respect.

INCREASED WIDDICOMB DEMAND

This Artistic Phonograph Grows in Favor With the Trade, Judging From Orders Placed

GRAND RAPIDS, MICH., February 9.—The Widdicomb Furniture Co., of this city, report that the demand for the Widdicomb phonograph has far exceeded their expectations, and appreciative words regarding this meritorious product are heard on all sides.

The Widdicomb phonograph was the object of much interest at its debut at the Furniture Show held in Grand Rapids during the month of January. The full line was exhibited, four upright models and four console types. The popularity of the line was attested to by the fact that they were entirely cleaned out of a number of the models. It is announced that they are now able, however, to resume uninterrupted deliveries. With the immense facilities of the Widdicomb Furniture Co. at its back the phonograph division will be enabled to expand to take care of all business.

With such an auspicious start, H. C. Howard, manager of the phonograph division, looks for great things during the coming year. It is his opinion that a large part of the success the Widdicomb line has built up for itself has been through the prospective jobber or dealer following their suggestion to "Play It Yourself."

ISSUE FRIEDA HEMPEL FOLDER

Thomas A. Edison, Inc., have just issued an artistic and impressive folder calling attention to the fact that Frieda Hempel, the noted Metropolitan opera prima donna, has been added to the already extensive list of Edison artists, as announced in The World last month.

The folder, which is produced in two colors, contains an excellent portrait of Miss Hempel, together with something about her career in opera, and the announcement that the Edison Re-Creation of her voice will soon be available.

A WAR POLICY

Being an Announcement from
Stephenson, Inc., New York

WE have entered this war to see it through to a deadly finish; an end that will insure for always the homes of civilized peoples against unbelievable ravage..... Stephenson Precision Made Motors are manufactured by DeCamp & Sloan, Incorporated, of Newark, N. J., whose enviable reputation for the manufacture of precision machinery has brought to them much work for the Government..... tools and dies of infinite accuracy..... parts for munitions, for aeroplanes. Thus, it has been their duty to apply their skill to things that wound and maim and kill; and, in the strange way of Fate, to apply the same skill to parts that gladden the heart..... the phonograph in the home, where a service flag means a son at the front..... and phonographs in the camps of the boys "over there."

And their war policy is to do their bit in every way. To apply their skill on Government work..... and always to apply the same skill on our work—the manufacture of the Stephenson Precision Made Motor. For, surely, music as well as shrapnel, has its part in war..... and who shall say it has a lesser part?

Frank V. Nutze

Vice-President

STEPHENSON, INC., One West 34th St., New York

DETROIT TALKING MACHINE DEALERS ELECT OFFICERS

S. E. Lind Heads Organization as President—Annual Convention of Grinnell Forces Tells of Progress—Busy Pathé Jobbers—Edison Shop Looks for Big Trade—The Business Outlook

DETROIT, MICH., February 7.—We have had many adverse conditions confronting us for the past thirty days owing to the coal situation. People in almost every section of the State have been without coal, and so serious has been the lack of coal and fuel that numerous cities have had to shut down their retail stores and industries almost completely. Railroad traffic has been tied up, and freight and express shipments have been the worst in their history. Notwithstanding this condition of affairs, it is really remarkable the encouraging reports one hears from dealers of talking machines and records. We don't mean to infer from this that all dealers are reporting a brisk business, but it is true that most of them report that business is entirely satisfactory. There are complaints by some dealers of their inability to get certain popular-priced models of machines, while others report a shortage of records. The wholesalers attribute the shortage to poor railroad shipments. Several dealers who ordered talking machines from outside jobbers had them sent by express and even then it took nearly thirty days to get them through to destination.

The Detroit Talking Machine Dealers' Association held its annual meeting in January at the Hotel Charlevoix with a very good attendance, the meeting itself being one of unusual interest and enthusiasm. The election of officers resulted as follows: President, S. E. Lind, Columbia Graphophone Co.; first vice-president, George W. Smith, Detroit Music Co.; second vice-president, Wallace Brown, Brunswick dealer; secretary, W. D. Trump, Jr., Max Strasburg Shops; executive committee, A. A. Grinnell, Sidney J. Guest, Phil B. Lang and Edward Andrew, Jr. The association passed resolutions to render unanimous and hearty support to the city and State fuel administrators; also to put on the proposed concert some time around Easter, the money for tickets sold to be turned over to one of the patriotic funds. Reports of the various past officers and committees showed the association had prospered, and that with a larger membership than ever the new year gives promise of great things.

Grinnell Bros., operating twenty-four branch retail stores, held their fifteenth annual convention at Detroit from January 29 to 31. It was the greatest meeting of its kind in the history of the company. C. A. Grinnell, vice-president of the company, presided at the business sessions. Among the numerous subjects discussed were the Victrola retail and wholesale departments. Reports showed that these departments enjoyed splendid business during 1917—probably the best of any in the Detroit or branch stores. A. A. Grinnell, vice-president and treasurer of the company, and C. H. Grinnell look after the Victrola departments both as to buying and distribution.

Max Strasburg, of the Max Strasburg Shops, who had planned to leave early in January for the South, has postponed his trip until some time in February. He will probably be "chasing the white ball on the green" under balmy skies ere this issue of The Talking Machine World is off the press.

Williams, Davis, Brooks & Hinchman Co., Michigan distributors for the Pathé line, are very well pleased with their sales the past year on Pathé machines and records, and both Mr. Chambers and Mr. Saunders, of this department, report that 1918 is going to be much better. In their building at Bates and Congress streets they have fixed up a very attractive room of what can be termed a "perfect Pathé Shop." It is of special interest to those who are already in business or who contemplate entering the talking machine business. The room shows just how a modern Pathé Shop should look as to decoration, booths and display as well as stock-keeping.

The East Detroit Music House and the J. L.

Hudson Co. are doing a good business with the Sonora phonograph.

R. B. Alling, of the Edison Shop, is confident that 1918 is going to be a big year for all Edison dealers in his respective territory. The Phonograph Co., of Detroit, which is the job-

S. E. Lind, President T. M. D. Association member for Edison phonographs, and of which Mr. Alling is also manager, is taking on new accounts right along, but they are the kind that produce results and this means profits to the dealer. Daily recitals are given at the Edison Shop, and too much praise cannot be given the two young ladies who have charge of these recitals. Both are high-class artists themselves and the in-

creasing attendance shows that they are worthwhile and worth the effort. The Edison Shop is the only phonograph store in Detroit that actually boasts of a recital hall—and it is right on the main floor.

S. E. Lind, local Columbia manager, was in New York during the early part of January, to attend the convention of Columbia branch managers. He is still effervescing over the convention, and he is determined that regardless of adverse conditions his books shall show an increase over the great record he made in 1917.

W. F. Huttie, sales manager of the Starr Piano Co.'s branch in this city, assisted by five other branch managers, were in Grand Rapids most of January in connection with the midwinter exhibition of furniture manufacturers. Their purpose in spending so much time in Grand Rapids was to sign up furniture dealers for the Starr line of phonographs and records. Mr. Huttie had splendid success, as did the other men there.

J. Henry Ling, Columbia dealer, Detroit, was hurt February 1 in a motor car accident, but is now on the road to recovery.

H. L. TUERS IN AVIATION SERVICE

Manager of Dealer Service Department of Columbia Graphophone Co. Joins Aviation Section of the Signal Officers' Reserve Corps

H. L. Tuers, manager of the dealer service department of the Columbia Graphophone Co., New York, has been accepted as a member of the Aviation Section of the Signal Officers' Reserve Corps and expects to be assigned to his new duties in the near future. Mr. Tuers is in line for an officer's commission at the end of the technical ground school course and the usual flying examinations. His successor has not yet been appointed.

A bluff is good (when you have enough reserve power to protect yourself should the bluff be called).

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN,
Manager

World Office
Republic Bldg., 209 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., February 11.—While the manufacturing end of the Chicago trade has been materially handicapped by the recent five-day shut-down and the "heatless Monday" edict, there is no grumbling among the dealers from this source, their only means of complaint at present being the poor shipping facilities throughout the country. They are having a great deal of trouble in securing the necessary cars to make deliveries and when they are fortunate enough to secure some of the railroad rolling stock and place their product aboard they are out of the woods by no means, as then begins the real trouble. Owing to the fact that the railroads have discontinued the use of their car tracers, many consignments are miscarried while in transit, as there is a likelihood that a shipment consigned to New York may turn up in New Mexico or vice versa.

A great many of the manufacturers were also inconvenienced somewhat by the recent coal shortage, which was brought about by the big blizzards during the middle of January, but the fuel administration proved its worth in the emergency by literally commandeering numerous train loads of coal throughout the South and heading them off to Chicago. The railroad situation is bad throughout the entire country at present, as is well known; and for this reason jobbers as well as the retail dealers handling the products of the old-established concerns located in various parts of the country have suffered from a shortage of goods. The medium-priced machine has created such a strong demand throughout the trade that the stocks of the dealers have been rapidly depleted.

While the "heatless Monday" edict has been a means of curtailing the retail business to a certain extent so far as the sale of instruments is concerned it has had a tendency to cause impetus in the record business. Those of the people who already owned machines are at present coming down on Saturdays and loading up with records that will tide them over the "double holiday." There is also quite a demand for records on Tuesdays, owing to the fact that theatres and moving picture houses are compelled to close that day and people are prepared, therefore, to spend the evening at home. The dealers who keep their fingers on the public's pulse by watching the bookings of the big

shows that are billed for Chicago are the ones reaping the harvest in the record business at present. For example, the demand for popular music such as is being used by the Ziegfeld Follies at present in Chicago is very brisk. The wiser dealers have got in their supplies of these songs months ago, and are therefore, able to take care of the demand. There are musical shows that will reach Chicago in the near future which will also create a demand for other selections, and those dealers who have been farsighted enough to watch the bookings of these big shows have a plentiful supply of records on hand to care for the demand as it arises. There is still the shortage of steel needles, but not so great as during the holiday period, as shipments of these are coming in in fair shape at present, having been ordered several months ago.

Discusses Conditions Exhaustively

H. P. Ellis, of the Chicago Talking Machine Co., reports that they are still inconvenienced by the bad shipping conditions. "We have," said Mr. Ellis, "deliveries on the way that had been shipped from the factory on December 12. They are some place between here and the Victor factory, but just where we don't know. As the railroad companies are using their car tracers for other purposes, the shipper has to look out for himself. We have, therefore, employed a man who does nothing else but tear up and down the railroad tracks trying to locate our shipments for us. The only way we are receiving the goods from the Victor factories at present is through a very roundabout route. The city of Camden seems to be entirely tied up so far as the railroads are concerned, and for this reason shipments are being sent by boat through either Norfolk or Newport News, and then placed upon the cars and shipped to their destination over the B. & O. and C. & O. We can trace our cars, up to the time they are loaded on the trains at these points, but after that it takes a veritable Sherlock Holmes to find them.

"Records are coming in by express and this is increasing our overhead expenses materially. The record situation so far as popular selections are concerned is very grave at present. The demand is exceedingly strong, and the factories are working to capacity. Nevertheless shipments are a bugbear in this instance also. A

great many of our dealers who profited by our advice and ordered ahead way back in October and November are profiting. There are also a great many dealers who have a large supply on hand of records other than the popular ones, but they never took the trouble to use their salesmanship ability in selling these records. They just merely put them in stock and took a chance on their being called for, as they devoted their time to selling the popular numbers. These dealers are now having a demand for popular stuff, but are unable to fill them. They have, therefore, taken the trouble to go over their stock and are finding numerous selections that can be sold with little effort, as they are selections that give satisfactory returns to the purchaser. All that these records needed was a little energy behind them, and now that they are being pushed they are selling in the majority of cases better than the popular ones. We have a plentiful supply of these records on hand, and, therefore, can take care of the demand, as they are all good sellers and are liked by the purchaser if he is given the opportunity to hear them. By pushing these records the dealer cannot only relieve the situation materially, but can continue to do a good business as well if he will just expend a little energy towards pushing these numbers. In machines, the demand for elevens and fourteens got beyond the control of the dealers and the demand for these instruments grew to such proportions that the dealers' stock was rapidly depleted in many instances early in the season. The wise ones, therefore, began pushing the tens and sixteens, and these models have proved very satisfactory in taking care of the demand."

New Repeating Device

The Repeat-o-graph Co., of Illinois, is being incorporated with a capital stock of \$100,000 for the manufacture of a new device for a repeater and stop for talking machines. The attorney for the company says that their clients do not wish to make any announcement at present, although they will furnish details regarding their organization and product in the near future.

Exhibitors at the Furniture Show

The January furniture show in Chicago was a big success notwithstanding trade conditions that were not considered altogether favorable.

THE "WADE" FIBRE NEEDLE CUTTER

The "Original" Repointer Which Gives 20 or More "Original" Repoints

The term "Original" applies to the Wade Fibre Needle Cutter in several interesting and important ways.

The Plier-handle principle (protected by patent) of the "original" Wade Fibre Needle Cutter was the "original" idea of the "original" Mr. Samuel O. Wade, an inventive genius and skilled mechanic of great ability and wide experience.

The "original" intention of Mr. Wade to make the very best, most economical and durable Fibre Needle Cutter on the market has long since been fulfilled.

The "original" Wade Fibre Needle Cutter is simple in operation, strong and durable,

AND BEST OF ALL, IT GIVES 20 OR MORE "ORIGINAL" REPOINTS as shown by accompanying illustration.

CHICAGO HINGED COVER SUPPORT AND BALANCE CO.

2242 WEST 69th STREET, CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 77)

In the various buildings on Wabash avenue devoted to exhibits there were a number of displays of talking machines, and the exhibitors all seemed to be satisfied with the amount of business done. Among those having displays were the Brunswick-Balke-Collender Co., Elmbrola Talking Machine Co., Vitanola Talking Machine Co., Mandel Mfg. Co., and the United Phonographs Corp.

B. & H. Fibre Co. Preparedness

"Notwithstanding existing conditions," said F. D. Hall, president of the B. & H. Fibre Co., "there seems to be no let-up in the amount of orders coming in for our product. These orders are not coming in from any particular part of the country in excess to other parts, but it is general all over the country, and for this reason I am inclined to believe that the only thing that will interfere with the trade in general this year will be transportation. While several of my most expert and valuable employes have been called to the colors there has been no interruption to our progress. It is, of course, a hard matter to get workers to make fibre needles, as it takes from four to five months to drill them properly. Nevertheless, I was prepared in a measure for the loss of some of my most valued employes, because I always keep several in training prepared for any emergency that may arise. The absentees who have been called to the colors have been assured by me that whenever they return their same positions will be waiting for them, and not only that, but I think that I will have a mighty pleasant little surprise awaiting each one just as soon as he returns, as I am keeping their names on the salary list, and every payday I put their salary into a savings account which was taken out under their name. Therefore, should any of them come home and be physically unfit for work they will have a little nest egg waiting for them which they don't expect.

"I have been receiving a great number of testi-

monials from people all over the country who have purchased the B. & H. fibre needle pointer. Some of these letters are very amusing and others are written by intelligent, keen thinkers, and the prevailing statement which seems to appear in all of them is "best I have ever used." In making this statement, perhaps one is apt to be skeptical and accuse me of braggadocio; nevertheless I make this statement in all fairness. It is only the quotation contained in a great number of these testimonials which have been received recently, and, therefore, is not original on my part."

Gets Responsible Position

Miss H. McCormack, formerly with the talking machine section of the Hillman department store, is now connected with the Wade Talking Machine Shop, and is in charge of the record department. Miss McCormack is a very capable young lady and, although having been in the talking machine business for a little over a year, has proven her worth in this short space of time and is considered a valuable asset to the Wade Shop.

Acquire Canadian Patents

The Orilla Furniture Co., of Orilla, Canada, have recently made arrangements with the Automatic Container Co., of Chicago, whereby they have acquired the Canadian patent rights to manufacture the automatic filing devices that are produced by the latter company. A. V. Taylor, superintendent of the company, has written a letter to Mr. Read, president of the Automatic Container Co., in which he states that there is a very big demand for this product throughout Canada. The holiday trade reached proportions far beyond their expectations, nevertheless with their completely equipped factory and their unlimited stock on hand they were able to take care of the demand.

Mr. Read states that the business of the Automatic Container Co. has progressed steadily of late and had grown to such proportions that

it has become necessary to enlarge their factory facilities. For this reason he has made arrangements with a cabinet manufacturer located in Buffalo to make the necessary cabinets in that city and handle the Eastern trade from the Buffalo factory.

Arthur D. Geissler a Visitor

A. D. Geissler, president of both the Chicago Talking Machine Co. and the New York Talking Machine Co., spent last week in Chicago looking after the business interests of both companies.

New Victor Store

The Pearson Piano Co., of Anderson, Ind., a branch of the Pearson Piano Co., of Indianapolis, have acquired the Victor stock of the Meyer Bros. Drug House, of Anderson. The Pearson Piano Co. have a well-established warehouse in Anderson, and are better able to take care of the talking machine business, being a piano house, than were the Meyer Bros. Drug House. They have been located in their present premises for the past year and a half and have a very fine trade established. They have fitted up their wareroom with the necessary demonstration booths and have a competent sales force to handle this business.

Brunswick Doings

"The year of 1917 surpassed our expectations and the new year has started off with a rush," said H. B. Bibb, sales manager of the phonograph division of the Brunswick-Balke-Collender Co. "The number of new contracts coming in daily is very gratifying indeed. We are very fortunate in having our factory located in Dubuque, Iowa, as it is west of the Mississippi river and does not come under the Garfield fuel saving order. Our plant is working overtime and while some difficulty is being experienced in moving freight to the Eastern territory, we are able to keep our different branches supplied with stock by making express shipments.

Are One-Record Phonographs Doomed?

A Frank Discussion of a Situation Which Faces Every Dealer

HERE are two kinds of fine phonographs now, the one-record instruments and the all-record Brunswick. Many dealers, noting the welcome of this new, final-type phonograph, are wondering about the future.

And they may well spend time in studying the trend of public demand the changing attitude.

Up to now, the music lovers have had to content themselves with one-record instruments. They have been compelled to take one certain line of records, barring all the others. This has meant a limited selection and the uncomfortable feeling that they were deprived of many favorites.

No One-Record Maker Offers All the Great Singers and Musical Selections

Indications point strongly to the fact that music lovers prefer to make up their selection of records by names of singers of musical organizations instead of by name of record makers.

The Brunswick plays *all* records.

This includes Pathe Records.

An alliance between Brunswick and Pathe gives each Brunswick dealer the right to handle Pathe Records. This includes one of the largest musical collections in the world—all the latest hits, all the great operas, all the instrumental and band selections.

The Brunswick is the premier instrument with the *all*-record feature. All Brunswick dealers unite in the belief that this new-day phonograph is destined to dominate the entire musical world.

Nine customers out of ten, once they hear The Brunswick and compare it with others, prefer it. And no Brunswick owner would ever go back to an old-type machine.

Dealers with a vision of tomorrow's trade, men who want to know more about the tendency of the times, are invited to write to us so that we may present further interesting and important facts. For those who are looking ahead, we have a very interesting proposition.

ALL PHONOGRAPHS IN ONE

"A large contract has been closed with Martin Bros. Piano Co. by our representative, K. McInnis, who travels out of a St. Louis office. C. W. Kalder, who was in charge of our exhibit at the recent Grand Rapids furniture show, closed a number of contracts with some of the largest furniture dealers in the U. S."

G. F. Gamble is the new Brunswick representative in the New Orleans territory.

The large wall map of the United States hanging in Mr. Bibb's office, which designated by means of small tacks the location of Brunswick dealers throughout the country, is beginning to look like a forest. The central States are completely covered and the Western States as well as the Pacific Coast States are filling up rapidly.

A. G. Kendrick, in charge of the Brunswick's Eastern territory, is showing some speed in securing new accounts.

Edward Strauss, formerly connected with the Chicago office of the Brunswick Co., has been transferred to their New York office, of which he will be general manager.

Wallace Brown, the live wire Brunswick dealer of Detroit, hopped into Chicago on a visit one day last week, stirred things up a bit and then hopped back to Detroit.

Among other Brunswick visitors to Chicago within the past week were J. Lane, of the Brunswick Shop, Toledo, and G. F. Standke, manager of the Brunswick Shop, Indianapolis.

E. S. Bristol, who covers in a most intensive way thirty-six counties in northern and central Illinois, has been spending a week or so in Chicago attending the furniture show. Mr. Bristol has had remarkable success in the restricted but populous territory covered by him.

The New F. & W. Sound Box

The F. & W. Mfg. Co., of this city, is about to place on the market a new and distinctive sound box. It is constructed on new lines, inasmuch as the sound waves have no direct communication with the tone arm, but are passed through a separating partition into an acoustic

or tone chamber, then through proper channels, into the tone arm. The stylus bar or needle holder is suspended in an entirely new manner, making perfect connection, yet without friction, thus the sound is amplified with excellent results in point of tone and detail. Its reproduction of both vocal and instrumental music is decidedly realistic.

With this sound box, it is claimed that one can use the fibre needle and get better detail, and in most cases a volume of tone equal to the ordinary box with the steel needle, thus saving wear and tear on records.

The sound box was invented and perfected by Elmar Fletcher, of Chicago, an old-time phonograph man, having been in the business both in the making and reproducing of records, before the molded record was known. The box will be marketed by Roscoe L. Wickes, a well-known business man of Chicago, and Mr. Fletcher under the firm name of the F. & W. Mfg. Co., 6 East Lake street. The trade will be duly notified when the box will be ready for the market.

H. A. Yerkes' New Post

H. A. Yerkes has been appointed field sales manager of the Columbia Graphophone Co. and will shortly leave his present office in Chicago to take up his new duties at the Columbia headquarters in New York. He has just returned from a successful tour of the Central States, having visited Indianapolis, St. Louis, Kansas City, Omaha and Minneapolis and reports that the business throughout the sections of the country he had just visited is in fine shape and the dealers he visited are very optimistic. Mr. Yerkes has just received an announcement from the New York headquarters that he has won the President Whitten district manager's cup, a handsome sterling silver trophy, which had been donated by Mr. Whitten, and which had been keenly contested for among the district managers throughout the country. The terms of this contest provided that permanent possession of the trophy rested with the district man-

ager who won the cup for three months, and notwithstanding the fact that he did not register his first victory until October, Mr. Yerkes won the cup with three consecutive victories.

Mr. Yerkes won the President Whitten district managers' cup as district manager of the Middle West territory, and W. L. Sprague, manager of the Minneapolis branch, is also being congratulated upon this victory, for his branch was a most important factor in bringing the trophy to the Chicago division. The final result of the contest was in doubt until the last moment, for several of the district managers had been winners for two months, and needed only one more victory to clinch their right to permanent possession of the cup.

"All Through the Night"

Mr. Griffith, in charge of the stockroom of the Chicago Talking Machine Co., came down to work the other day wearing a big grin on his face, said good morning to everyone in the office, and then began to pass cigars around to the boys. When asked the reason of his generosity he replied: "The stork brought a new baby girl to our house last night, so I have a sneaking suspicion it is up to me to receive congratulations." After giving everyone in the office a cigar he tipped his hat over one eye and sauntered majestically to his desk in the stockroom. Soon after, strange and various well-known lullabies issued from a Victrola in the stockroom.

Talking Machine Shop News

C. L. Davidson, of the Talking Machine Shop, reports that they are still doing a nice business regardless of weather conditions and "heatless Mondays." "Our business for the past month compares very favorably with the January of last year," said Mr. Davidson, "and we therefore have no reason to kick. We have a good supply of records on hand, just exactly the stuff that people want at present. We are, therefore, able to fill 90 per cent. of our orders. The trade so

(Continued on page 83)

Convincing Proof of Merit

are the unsolicited testimonial letters which come to us from  dealers and owners in every day's mail:

A characteristic letter from an Empire owner sent to us by the dealer who sold him the machine:

"The Model B Talking Machine I bought of you reached me last Saturday in splendid condition.

"This machine was my choice among a number of different ones which I looked at and heard play. I heard 8 other leading machines and none of them came up to the Empire. A friend of mine here also has a Model B. The Empire records are all good, some of them very good. The machine in appearance is as good as any \$200 cabinet I have seen and the quality of tone and the simplicity of operating are superior to anything I have seen for the price."

Our files contain many letters from dealers similar to this:

*"We are in receipt of the Model B Empire Phonograph and must say that it is all you claim it to be, and for that reason we are mailing you order for four models today. Please ship these out **at once** as we have only one machine on the floor at this time."*

“Uniset Reproducer”—greatest progress in Phonography

UNISET REPRODUCER CO.

Cable Building, Jackson Boul. & Wabash Ave.

Telephone, Harrison 1166

CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 81)

far this month has been steadily picking up, and at present is far ahead of the first two weeks in February, 1917. I think that trade in general has a good year before it, as we are now settling down to business, and the people are not as flighty as they formerly were when they read a newspaper, but are taking a more philosophical view of the situation."

Miss Ruth Lundgren, formerly with the Wade Shop, is now connected with the sales force of the Talking Machine Shop, having taken the place of Mrs. Myrtle Frame, who has joined the forces of the Davis Phonograph Co. on Adams and State streets.

Eddie Cantor, with the Ziegfeld Follies Co., who plays the part of the son of the character taken by Bert Williams, just returned from college, came tearing down the street the other day and dashing into the Talking Machine Shop, approached Miss Pauline Tishler and whispered savagely, "I must have them at once!" "What?" stuttered Pauline. "The four new Heifetz records—oh, boy, some music—I must have them."

To Handle Paroquet Record

C. J. Woodward, 57 East Jackson boulevard, has secured the representation for Chicago and Cook County of the Paroquet record, made in New York. He plans an active campaign in his territory for these products.

Mandel Mfg. Co. Plans Big Things

The Mandel Mfg. Co., Inc., with headquarters at 501-511 South Laflin street, have consummated arrangements whereby they will bring their full line of talking machines to the attention of the trade in this country in a most prominent way during the present year. They have concentrated considerable attention on this branch of their business and are turning out a very attractive line which shows extreme taste in designing, and better still, a most careful attention to details, as far as tone reproduction is concerned. The Mandel phonographs of 1918 represent the combination and concentration of

some of the keenest minds in the industry, to the end that their products may be of a standard to win the approbation of the most critical purchasers. That this enviable position has been attained is evident from the fact that the output last year far exceeded expectations, while the volume of orders which have been reaching this company since the first of the year, is of such magnitude as to demonstrate that the Mandel phonographs are constructed along lines that please the critical purchaser.

Open New Victor Department

Elbe Bros., South Bend, Ind., will formally open their new Victor department this month. The new department is beautifully decorated and is situated on the ground floor of the building. They have installed twelve beautiful soundproof record demonstrating booths, and this, together with their large record department, gives them the largest Victor department in the State of Indiana.

New Hillman Manager

Forrest Edwards, formerly connected with the Rhinehart Piano Co. at Sixty-third and Halsted streets, is now manager of the Victor department of Hillman's department store. This department is operated by the National Talking Machines Sales Corp. of Boston.

New Wilson Manager

W. E. Cotter is now in charge of the retail phonograph department of the Thos. E. Wilson & Co. warerooms on the corner of Monroe and Wabash avenue. Mr. Cotter is very well known throughout the trade, having been for the past twelve years connected with the firm of the W. W. Kimball Co. as wholesale traveler, representing them as salesman for pianos and talking machines. He has for his assistant Miss Margaret Campbell, a very pleasing and charming young woman, who is an experienced "Columbian" girl, having been connected with many of the largest talking machine departments throughout the city. Mr. Cotter stated that they contemplate enlarging their phonograph depart-

ment and adding four new soundproof demonstrating booths, as well as a new series of record bins. "Our business has shown a decided improvement for the past month," he stated, "and is rapidly increasing, due to our extensive advertising throughout the local daily papers as well as from the combined efforts of twenty-four women we have working for us on the outside. These women are bringing in great numbers of prospects and as a result we are making some very satisfactory sales. We are handling both Columbia and Sonora machines as well as the Wilson talking machine, which is manufactured by ourselves, and, therefore, have an exceptionally good line that will please the most exacting purchaser."

New Company Formed

There has just been organized in this city a new firm which has been incorporated in Illinois for \$10,000 and is known as the National Phonograph Co., Inc. They are located at 2713 West Twelfth street and occupy the three-story building which was formerly the plant of the Elkin & Seidel Mfg. Co. They are equipped with the most modern machinery both steam and electrical and have the capacity of turning out 1,500 cabinets a month. Their specialty is to produce a complete machine for the trade. Frank Cummings, an experienced and capable man, is the manager of the company, he was formerly connected with the World Phonograph Co., and had had charge of the finishing, machine shop, cabinet and assembling departments. The new company at present has two beautiful and original models prepared for the general trade and already over 200 machines are on the floor awaiting delivery.

Maurice Hebert represents the new company as chief designer. He is well known to the trade as one of the most capable artistic and original draftsmen in the country. He is known not only for his work in the talking machine industry which is in itself remarkable but also as

Bigger Things for 1918

Bigger for You — Bigger for Us

We have planned and prepared for BOTH a larger output — insuring better services, prompt deliveries, and even a better product than in 1917

THE Mandel line of talking machines, varying in retail price from \$35 to \$250 and meeting the price demands of every class of trade, has been improved in many details which means in the aggregate a considerable increase in intrinsic value.

This is a line which has proved a distinct satisfaction giver from the start.

Every part of every Mandel—Case, Motor, Tone Arm, Sound Box, Horn, Tone Chamber not only is distinctive but made in the Mandel factories, thus securing standardization and uniformity of output.

Do you want to handle just this type of machine?

It costs you nothing to investigate.

Let us send you model No. 3, illustrated here on FREE TRIAL.

Write today for full information and descriptive literature.

Retail Price, Model No. 3

New Lakeside No. 4 JUMBO TONE ARM

Only foolproof arm on the market, as *all* adjustments are *permanent* and *user* has *no* adjustments to make.

- Best mica used so fastened to the stylus to prevent same from pulling out.
- All parts machined to make a perfect mechanical fit.
- No adjustments when shifting from Victor to Edison.
- Heavy massive design best for correct reproduction.
- Permanent adjustment for all records except Pathé, when a weight is applied (see cut), which makes it just exactly right for playing Pathé. This weight also serves as a retainer for Edison and Pathé needles, which usually are mixed with the steel needles or lost.
- Arm fitted with long telescopic neck to make longer or shorter.
- Punched sound box clamping ring has a curvature preventing rubber gasket from working out.

the designer of palatial residences. He is the man who designed the million-dollar residence of Charles M. Schwab, the steel magnate, and is a man of international reputation.

Organize New Company

The Empire Phono Parts Co. was organized at Cleveland, O., on February 2, and the officers elected were J. MacNamara, president, and John H. Steinmetz, secretary and treasurer. Mr. MacNamara is a pioneer manufacturer of tone arms, sound boxes, and accessories and was until recently president of the Union Phonograph Supply Co., of Cleveland, which succeeded the Union Specialty and Plating Co. He is well known to the trade as a producer of these products. Mr. Steinmetz is president of the Empire Talking Machine Co., of Chicago, and as is well known is an exponent of quality in any of the products that he offers to the trade, and in identifying the Empire trade-mark with the product of the Empire Phono Parts Co. the trade is assured that the product of this new company will conform with standard of quality that appeals to those seeking excellence and dependability rather than "price" alone.

The Empire Phono Parts Co. occupies the factory located at 1008 West Main street, Cleveland, which is directly opposite the Union Depot. This factory is equipped with the most modern machinery and is capable of turning out accurate products, and also includes as part of its assets what is considered to be one of the best plating plants in the State of Ohio, and is under the personal supervision of Mr. MacNamara. They are already turning out a considerable quantity of their products and manufacturers who have

seen and tested these products are enthusiastic about them. They have also applied for design patents on their new tone arm, thus protecting not only themselves but their patrons. They will cater to the phonograph manufacturers by producing standard goods of recognized merit. The sales offices are located at 427 South Wabash avenue, Chicago, and are in charge of Mr. Steinmetz. All inquiries relative to samples, etc., may be addressed in his care. They have prepared other attractive specialties which will be announced later. The illustration shown herewith is their number nine tone arm shown with connections and motor board equipment. The sound box is turned back permitting inser-

Empire Tone Arm and Sound Box No. 9

tion of the needle. This feature appeals to the consumer, as there is no possibility for the needle or jewel point to be set at an improper angle. The Empire equipment allows no chance, therefore, to injure the record while changing needles and all movable joints connecting with the sound box are screwed joints, which assure no looseness of parts.

Some Recent Visitors

Among the visiting dealers to Chicago this month were: H. E. Whitman, manager Pearson Piano Co., Indianapolis, Ind.; John F. Ditzell, manager Famous-Barr Co., St. Louis, Mo.; Thor Norberg, proprietor Norberg Music House, Moline, Ill.; Miss Mary E. Carroll, manager J. C. Baxter Piano Co., Davenport, Ia.

Magnola Progress

The Magnola Talking Machine Co., which, as everyone now knows, is backed by the same capital and the great experience of the M. Schulz Co., one of the largest piano manufacturers in the world, is having wonderful success with the Magnola talking machine. Representing years of experience in the acoustic field and also in the production of high-grade cabinet work these people have just naturally produced a talking machine in the Magnola that is distinctive and right. Furthermore, it has been a comparatively easy thing for them to build up a large trade, because they have the confidence of piano dealers everywhere. In the first stage of their existence the Magnola was sold largely in the piano trade. All they had to do was simply tell dealers they had a talking machine, and the dealers said

to themselves, "A product made by a company of which Otto Schulz is president," and ordered without seeing the machines. They have had no occasion to regret their action as steadily increasing repeat orders has clearly shown.

Ribolla's Interesting Comment on Trade

"Reports coming in from our Canadian office show a striking gain in business for the past year. This increase tends to progress steadily, and from present indications the talking machine business of Canada will be bigger than ever this year," said S. A. Ribolla, sales manager of the Chicago office of the Otto Heine-man Motor Co. "Similar conditions existing to-day in this country now existed in Canada at the beginning of the war. Up there they were disorganized to a great extent and business in general was demoralized when the war broke out, but conditions have adjusted themselves to such an extent that at present they are running on in a normal manner and business is nearly back to its normal condition. The war had a tendency in that country to stimulate the music industry and this is steadily gaining from day to day.

"This situation in Canada is the fact upon which I base my convictions that war conditions in the United States will ultimately make business better," continued Mr. Ribolla, "and for that reason I see a good year ahead of us. The Canadian Government has practically stamped music as a necessity. We know that the big limited companies who make a specialty of talking machines throughout Great Britain and her possessions show a more material increase in their business than they have for many years. There would be a greater increase if their capacity were not limited by the war departments as they are compelled to do a certain amount of governmental work. The little slump experienced in this country for the few months preceding the holidays has passed. A great many

dealers are carrying over a large amount of business. With more women wage earners than we ever had before, combined with the wonderful crops we had all over the country in the past year, which necessarily brought with them better wages than ever before, there is bound to be a notable improvement in business in the near future."

Returns From Eastern Trip

L. E. Noble, manager of the wholesale Victrola department of the Rudolph Wurlitzer Co., returned last week from a trip through the East, where he visited several of the large Eastern cities, as well as the Rudolph Wurlitzer headquarters at Cincinnati. "I received quite a shake-up on January 23," said Mr. Noble. "While aboard the Manhattan Limited, running through Philadelphia about three miles outside of North Philadelphia, something happened and all the coaches piled up. One man was killed and eight men were injured severely, but I managed to escape unscathed. The visit I paid to the Victor factory left me full of optimism, as

they certainly are doing things down there. Many of our dealers have reported that their business has increased materially in the past year and that the holiday trade was very satisfactory."

The Six Best Record Sellers

The Columbia library announce the six best sellers for the month as follows. "Alleluia Haec Dies" and "Veni Jesu" (Paulist Choristers of Chicago); "Barbiere Di Sivighia," "Largo Al Factotum" (Make Way for the Factotus); "Battle Hymn of the Republic" and "Star Spangled Banner"; "The Best Things in Life Are Free" and "For You a Rose"; "Calling Me Home to You" and "There's a Long, Long Trail"; "Caprice Viennois" (Opus No. 2) and Thais "Meditation," a violin solo.

The six best sellers for Pathé for the past month are: "The Honeysuckle and the Bee" and "Pansy Faces"; "Liberty Loan March" (Sousa) and "The Invincible Eagle" (Sousa); "Gold and Silver Waltz" and "Jack o' Lantern" (Medley Fox Trot); "The Darktown Strutter's

Ball" (Fox Trot) and "Homeward Bound" (Medley One Step); "Leave It to Jane" (Medley Fox Trot) and "Umbrellas to Mend" (One Step); "Pigtails and Chopsticks" (Xylophone Solo) and "Concert Polka" (Xylophone Solo).

Edison's six best sellers for the month are: "Battle Hymn of the Republic" (Old Plantation Melody); "My Heart at Thy Sweet Voice—Samson and Dalilah" and "Triumphal March—Aida"; "Loin du Bal" and "Marché Lorraine"; "New York Blues (Rag Classical)" and "Saxophone Sobs"; "Ellis March (Instrumental Duet)" and "One, Two, Three, Four Medley (Waltz)"; "It's Nice to Get Up in the Mornin'" and "When the Bonnie, Bonnie Heather is Blooming (I'll Return, Annie Laurie to You)."

Victor six best sellers for the month are as follows: "My Sweetie" and "Some Sunday Morning"; "Midsummer Night's Dream" (Orchestral); "Over There" and "Laddie Boy"; "Stars and Stripes Forever" and "Fairest of the Fair" (Sousa); "Somewhere in France is the Lily" and "My Sweetheart is Somewhere in France"; "Modern Maiden's Prayer" and "That's the Kind of a Baby for Me."

Big Order for Uniset Reproducer

The Uniset Reproducer Co., which is located in the Cable Building, Jackson boulevard and Wabash avenue, expect to make deliveries of the "Uniset Reproducer" the second week in February. Manufacturers who have tested this reproducer are enthusiastic over its great possibilities.

W. Hadart, vice-president and general manager of the company, has just closed contracts with a large phonograph company in the Middle West, which manufactures 75,000 machines a year. This is only one of several important deals that emphasizes how the "Uniset Reproducer" will play a prominent part in the industry this year.

As was mentioned in this department last month this reproducer is an absolute departure from all other sound boxes that are now on the market. It will play all records no matter of what make or description, including Victor, Columbia, Edison, Pathé and Gennett, etc., in one and the same position without change of any kind.

Charles H. Green Coming

Charles H. Green, who will be the manager of the National Music Show at the Grand Central Palace, New York, during the piano convention in June, will be in Chicago this month. He will be prepared to outline in detail the plans for the show to the local manufacturers. Mr. Green was very successful in his conduct, not only of the previous piano exhibitions, but also of shows in other lines, consequently the Music Trade Exhibitors' Association is to be congratulated on having secured him for this year's event.

Talking machines will be featured at this year's show on an elaborate scale, as they were last year in this city.

FROM OUR CHICAGO HEADQUARTERS (Continued from page 86)

A PROGRESSIVE CHICAGO MAN

Wm. Tures, of Combination Attachment Co., Has Built Up an Excellent Business With the "Orotund" Universal Tone Arm and Sound Box

CHICAGO, ILL., Feb. 10.—Wm. Tures of the Combination Attachment Co. with headquarters in the Republic Building is a man who conducts

Wm. Tures

his own business in such good shape that the men observing him want to avail themselves of the same intelligence and energy. Mr. Tures has recently been made a director of the Republic Merchants' Association, who conduct the wonderful service system in the great building in

which the Combination Attachment Co. is located. He is also a member of the publicity committee of the same organization. The Republic Item, a sprightly little monthly published in the interests of the Merchants' Association, recently told the history of his life and also printed the photo cut of him. Mr. Tures in a recent talk with The World described the latest introductions in the line of "Orotund" universal tone arms and sound boxes—combinations which give an excellent tone and also are adapted to both hill and dale records. Talking about the combinations represented by either number 3A or number 3B tone arms and sound boxes, Mr. Tures said:

"Is mechanically correct as it can be adjusted to any condition so that the proper angle is obtained, regardless of the height of the turn table or the size of the sound box. It is the only tone arm in which such adjustments can be obtained. The special adjusting sleeve construction and the continuous tapering elbow enables the arm to be lowered or raised, also the tone is carried unobstructed down into the throat of the tone chamber.

"The graduated or tapering effect is correct to produce perfect acoustic conditions.

"The tone produced by the sound box is conveyed to the tone chamber in such a way as to produce rich, clear, musical tones.

"The base of the arm is mounted to swing on ball bearings, a patent construction not found in any other tone arm and the only ball bearing arrangement where all bearings are in contact at all times, and have a perfect rolling action.

"A perfect turn back joint which also can be adjusted, is the most convenient method for changing needles.

"The universal sound box centers perfectly when changing from the hill and dale jewel record to the lateral cut record position.

"The weight is correct so that any record can be played safely and the fibre needle can be used universally on all records. This cannot be said of any other tone arm construction.

"The 'Orotund' universal tone arm and sound box is a work of art, as it is symmetrical and very attractive in appearance. It is an ornament on any talking machine. It was not the idea of the designer to see how cheap it could be made, but to embody all the best and important features to make it the highest grade tone arm on the market and to produce it at a fair price."

TO EXHIBIT AT NATIONAL MUSIC SHOW

Among the leading talking machine companies in the East who have reserved space at the National Music Show, to be held at the Grand Central Palace, New York, in June, and of which Charles H. Green is manager, are Thos. A. Edison, Inc., the Columbia Graphophone Co. and the Pathé Frères Co.

NEW EMPIRE RECORD CATALOG

Attractive Volume Just Issued Includes All Records Up to January, 1918—It Is Carefully Indexed and Interestingly Prepared

The Empire Talking Machine Co., Chicago, has just issued a comprehensive record catalog which lists in convenient form all Empire records issued up to and including January, 1918. For the convenience of machine owners the records are first listed in alphabetical order, and then, according to the type of selection whether concert music, dance music, etc. For the further convenience of the reader there is also a list provided in the back showing the pages upon which records of a certain price and size may be found.

The volume is carefully indexed, and makes a most impressive showing. It also indicates the substantial progress that has been made by the Empire Talking Machine Co. to date in the production of records.

CHRISTINE MILLER MARRIED

Popular Edison Artist Married to Daniel M. Clemon, of Pittsburgh—Spending Their Honeymoon in Chicago, Many Congratulations

CHICAGO, ILL., February 12.—The many friends in this city of Miss Christine Miller, the distinguished contralto, who is widely known in the talking machine trade through her Edison tone tests and her large repertoire of Edison records, were somewhat surprised to-day to learn of her marriage. The happy man is Daniel M. Clemon, formerly one of Carnegie's partners, and one of the big magnates of Pittsburgh, where it is stated he has prepared a \$500,000 home for his beautiful and talented wife. Mr. and Mrs. Clemon are spending their honeymoon in Chicago to-day, and are receiving the most cordial felicitations of a host of friends in the talking machine trade, for there are few artists who have such an army of admirers in and outside the industry.

WANTS TO SEE THE TRAINS MOVE

Just a Little Sunshine and Rain Needed, Says L. C. Wiswell—Lyon & Healy Resume Concerts—Bartlett Markets Die Castings—New Morenus Phonograph—Other Timely Topics

CHICAGO, ILL., February 11.—“All we want is just a little sunshine, just a little rain, That will melt the snow—so the trains can go, And the trade will smile again,” mused L. C. Wiswell, manager of the Victor department of Lyon & Healy, when called upon by *The World* this month. “But,” he continued, “that’s getting to be an old story now, sad but true. Too much snow and not enough trains. If the train service of the country had been normal through the past month, I don’t believe there is a dealer in the country who would not be doing an enormous business to-day, more even than he would have dared anticipate. It is really surprising, when one stops to consider, how great the demand for talking machines is to-day.”

“A great many dealers ask me this question,” continued Mr. Wiswell. “If the factories are working to capacity how is it that there are not more machines produced than formerly?” “Now that is a very simple question to answer,” he continued, “if one stops to think. In normal times there is an average of twenty-six working days during the month. But take January of this year for example. To begin with there was the usual New Year’s holiday, four Sundays and four half-day holidays on Saturday making the average of sevendays that the factories were idle that month. But added to this we have had packed on a five-day shutdown on account of conserving fuel, as well as two heatless Mondays, which makes a total of fourteen days that were lost out of the thirty-one. For the month of February we have before us, counting Sundays, Saturday half days, Lincoln’s and Washington’s birthdays as well as the four heatless Mondays a total of twelve full days out of the

month that will be lost. Taking these facts into consideration, in spite of the factories working at full capacity, how can anyone wonder why they are not producing the same amount as formerly? That is a concrete example of the situation at present, but just as soon as the railroads are in good working order again and there are no more added holidays there is certainly going to be a busy season ahead.”

A Good Sales Puller

Lyon & Healy have resumed their concert season and attracting large numbers of people daily with their three afternoon performances. One of the features of these recitals are two very talented and entertaining young ladies who appear during each performance. Miss Olive June Lacy, one of the pleasing entertainers, demonstrates to the audience the applicability of the Victrola to the student of vocal culture by singing duets, accompanied by the instrument, while the other young lady, Miss Edna Baum, is accompanied by various instrumental selections in presenting classic and fancy dances. Many inquiries from prospective purchasers of machines are resulting from these concerts and numerous sales have already been made.

They Market Die Castings

E. P. Bartlett & Co., jobbers and manufacturers’ agents of steel copper products, 15 North Jefferson street, this city, represent the Indiana Die Casting Co. of Indianapolis, in Minnesota, Michigan, Indiana and Illinois. They not only take orders for die castings, but also market the company’s complete tone arms, sound boxes and stylus bars. They are in a position to manufacture to order practically all parts for talking machines. They report excellent business.

New Morenus Phonograph

The Morenus Piano Co., well-known manufacturers of pianos and player-pianos on West Superior street, corner of Orleans street, Chicago, have entered the talking machine trade with a line which is well worthy of the attention of dealers everywhere. R. F. Morenus, presi-

dent of the company, himself a practical piano manufacturer of many years’ experience, naturally turned his attention to the acoustic proposition at the start. The horn of the Morenus machine is shaped like a saxophone and enters the tone chamber from the bottom instead of the top. It is made entirely of wood and the tone, which is big and vibrant although large in volume, is in no way unpleasant. Play the machine with a fibre needle and you get the fine result. It is equipped with a unique graduating tone modifier, which Mr. Morenus himself designed. The machine has a high-grade reproducing tone arm and many little conveniences which are calculated to please the consumer. It is equipped with a Chicago hinged cover support. The Morenus is made in three attractive styles, retailing respectively at \$110, \$125 and \$150.

Ottawa Pianophone Co. Progress

The Ottawa Pianophone Co., with general sales offices at 802 Republic Building, Chicago, states that the factory at Ottawa, notwithstanding the deterrence caused by the “fuelless Mondays” and difficulty in making their shipments, is now rapidly heading towards the desirable state of being able to make shipments of Hiawatha talking machines with some degree of promptness. They also show some very fine letters from dealers who have been selling these excellent machines in direct competition with other machines, all of which goes to show that the merits of the Hiawatha are being widely recognized.

Death of Mr. Ryde, Sr.

James Ryde, father of J. B. Ryde, assistant manager of the Victrola department of Lyon & Healy, died at his home, 7239 Princeton avenue, Wednesday, January 30. He is survived by his widow, two sons and one daughter. Albert Ryde, one of the sons, is at present in training at the Great Lakes Naval Station, Great Lakes, Ill. The funeral was a private affair, the services being conducted at the family home and interment was at the Oakwoods Cemetery.

Different—But Practical

The MORENUS Phonograph is a Distinct Departure from a Tonal Viewpoint.

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the *bottom*, not the top. The tone is big and full but mellow, and the reproduction of the artist’s voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are *right* and the cabinet work and finish unexcelled.

The MORENUS is in 3 STYLES

PATRIOTISM ON RECORDS

**Words of Leaders Will Be Heard All Over the
Country—Campaign to Start Soon**

The Four-Minute Men, who now make speeches to audiences on the war work of the country, will soon have their rivals in the addresses of leaders of America and her allies, which will be taken on the talking machine and delivered far and wide to public meetings throughout the country. The new idea was conceived by Guy Golterman, a St. Louis attorney, who is now in the East in the interest of the Nation's Forum, the organization which he has founded to push the work. He is indorsed by the Committee on Public Information, which sees in this new method the possibility of getting the war speeches of America's leaders, not only in their own words, but in their own voices, before the entire country.

Among the American leaders who have already made five-minute records for the movement are Secretaries McAdoo, Daniels, Baker and Lane; Frank A. Vanderlip, Samuel Gompers, Senators Harding and Lewis, Champ Clark, James W. Gerard and Otto H. Kahn. Mr. Golterman expects to add to this list General Pershing and the leaders of the armies, navies, and civil governments of Great Britain, France, Italy and Belgium. The master records on which the speeches have been recorded are on plates of steel and will be preserved in the Government archives at Washington. For use at public meetings, in moving picture theatres, lodge rooms, assembly halls, Y. M. C. A. auditoriums, and similar gathering places, other records will be manufactured in great numbers, and on the reverse of each record will be a

selection of patriotic music. These records will be spoken by especially manufactured talking machines, which will project the voice for a distance much further than usual.

"The idea came to me," said Mr. Golterman,

"as I looked at the facsimile of Washington's farewell, and the original of Lincoln's Gettysburg address, in the Congressional Library. I profoundly wished that the vitality of their voices could have been preserved."

LIVE PUBLICITY OF WALLACE BROWN PHONOGRAPH SHOP

DETROIT, MICH., February 12.—Wallace Brown, the well-known talking machine man of this city, is a hustler, and especially so when it comes to concentrating the attention of the public on the Brunswick Shop, which he controls, and the Brunswick phonograph, which he handles. The illustrations herewith give a very impressive idea of his activity in this direction. One shows two different sign boards which are used by Mr. Brown on the roads leading to Detroit, and the second illustration shows Wallace Brown's Brunswick Shop ad, which he is using in this city. This is advertising of a result-producing kind.

Two Signboards Used by Mr. Brown on Roads Leading to Detroit

Sign Used by Mr. Brown in the City of Detroit

**TEST offered to dealers to
prove the superiority of
Wall-Kane Steel Needles**

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

Beware of Imitations

Package of 50 WALL-KANE needles. Loud, Extra Loud and Medium, greater value than 500 ordinary steel needles, retails for 10c, costs the dealer 6 1/2c. Jobbing territories open.

FORM MILLION DOLLAR CORPORATION

The Aluminum Ware Mfg. Co., of Elmira, to Take Over Toyphone & Woodware Co.

ELMIRA, N. Y., February 8.—A new million dollar corporation, with its plant and home offices in this city, has been formed recently under the name of the Aluminum Ware Mfg. Co., of Elmira. The consolidation effected absorbs the National Aluminum Works of this city, the Toyphone and Woodware Mfrs. Corp., of New York City, and the Aluminum Distributing Co., of New York. The latter is a sales company headed by James H. Opp and this company undertakes to sell the whole production of the three plants.

The Aluminum Ware Mfg. Co., in taking over the Toyphone and Woodware Co., New York, secures the patents for a talking machine which this company has made and exploited during the past year. This machine has met with considerable success and all of the parts will be manufactured at the new company's plant in Elmira.

The Mirrorphone Co., of Troy, O., has been incorporated with a capital of \$10,000 to take over the output of the Lorimer-Hicks Co., manufacturers of the Lorophones.

"COMBINATION" PLAN INTERESTS

Trade Well Pleased With "Combination" Plan of Otto Heineman Phonograph Supply Co.

In a chat with The World this week, Otto Heineman, president of the Otto Heineman Phonograph Supply Co., Inc., New York, commented upon the fact that the manufacturers throughout the country are very well pleased with the "combination" plan that the company featured in last month's issue of The World.

In this plan Mr. Heineman called attention to an ideal combination for an \$85 machine; this combination including the Heineman motor No. 77, tone arm No. 11 and Ideal sound box No. 2. An ideal combination for a \$165 machine was featured as the Meisselbach motor No. 18, tone arm No. 98 and sound box No. 20.

These two combinations are being used to excellent advantage by talking machine manufacturers who state that the motors, tone arms and sound boxes featured are ideally adapted for the different types of machines presented in this combination plan. The Heineman motor No. 77 and Meisselbach motor No. 18 are recognized as two of the most popular motors on the market and talking machine manufacturers state that they are giving excellent service.

THE TELEPHONE AS A SALESMAN

How Eugene E. Hardie Has Increased Columbia Sales by Demonstrating Records Over the Phone—His Plan of Operation Interesting

BUTTE, MONT., February 11.—A novel idea has been introduced by Eugene E. Hardie, who has charge of the Columbia Graphophone department of the Newbro Drug Co., of this city, for increasing the sales, by demonstrating records over the telephone. He has had a telephone installed specially for this purpose and has fixed up a separate booth and apparatus which allows any person to hear any record over the phone just as clear as if they were standing by the machine. And from the success that the Newbro Drug Co. has had there is no doubt it would be to the advantage of any dealer to try Mr. Hardie's plan. He says that during the cold and wet weather they had to have a demonstrator specially to take the calls and demonstrate the records, and, if the calls increase, that they will have to install more telephones and special booths. If you don't think this works call

up No. 162 Butte, Mont., and Mr. Hardie will demonstrate personally and to your satisfaction.

MORE TIME FOR INCOME TAX RETURN

Time Limit Moved From March 1 to April 1 by Internal Revenue Commissioner Roper

WASHINGTON, D. C., February 11.—Internal Revenue Commissioner Roper announced to-day that the time for filing income and excess profits returns had been extended from March 1 to April 1. The ruling applies also to reports on payments of more than \$800 a year to be made by employers and business enterprises, and covers incomes both above and below \$3,000 and corporation incomes.

Delay in the preparation of blank forms and regulations was the principal cause of the postponement.

J. C. Fulton has arranged to carry a line of phonographs and records in his sewing machine store at 231 South Broad street, Middletown, Pa.

WM. A. SCHREINER GETS NEW POST

Is Appointed Manager of Sales Promotion Department at Local Wholesale Branch of Columbia Co.—Well Known in the Trade

William A. Schreiner has been appointed manager of the sales promotion department of the wholesale branch of the Columbia Graphophone

Wm. A. Schreiner

Co., at 55 Warren street, New York. This department is a division of the local branch which devotes its entire time to co-operating with the Columbia dealers in the development of Columbia Grafonola and record business. This department carries out the activities of the executive dealer service department, which plans and prepares all such material for the Columbia dealers throughout the country.

Mr. Schreiner is well known in the local trade, having formerly been a member of the Columbia Co.'s sales organization and also occupying important posts in various retail talking machine establishments. He is therefore splendidly equipped to render the dealers efficient service in his new position, as he thoroughly understands their problems and can handle their requirements adequately.

RAISE PRICE OF SCHUBERT MACHINES

Bell Talking Machine Corp. Will Assume War Tax, However—Also Introduce New Style—Extra Charge for Walnut Machine and Electric Motor—Mr. Rummell Discusses Situation

The Bell Talking Machine Corp., 44 West Thirty-seventh street, New York, has announced an increase in prices of the Schubert phonographs, and the introduction of one new style, to be known as Standard No. 75. The increase in the price averages about \$15.00 per machine, and the company assumes the war tax, while an extra charge is made for machines of walnut, the regular styles including mahogany and oak. A charge of \$30.00 is to be made where it is desired to have a machine equipped with electric motor. The new prices, which will go into effect on April 1, are as follows: Unity, Style 60, \$60; Standard, No. 75, \$75; Opera, No. 100, \$100; Melody, No. 115, \$115; Concert, No. 165, \$165; Grand, No. 215, \$215.

L. Rummel, speaking to a representative of The World this week, said: "We have taken great care to see that our regular customers are provided for, and during the last year, even through the holiday season, we made this our policy, not taking on new customers until our regular trade had been well taken care of. Owing to the increase and cost of material we have been forced to increase our prices, and are laying plans for a greater increase in facilities, so that we may give even better service than we have in the past."

Frank T. Nutze, vice-president and sales manager of Stephenson, Inc., New York, manufacturers of the Stephenson Precision motor, who has been visiting the Western trade, going as far as the Pacific Coast, has booked some large orders.

SOUTHERN CALIFORNIA TRADE NEWS

January Proved a Better Month Than Was Predicted—C. S. Ruggles Visits New York—Fitzgerald Music Co. Recitals—Other News

LOS ANGELES, CAL., February 6.—January proved a better month than was predicted by most of the local dealers. Scarcity of stock has, of course, been a great handicap to the merchants, and now it is not a case of ordering from your jobber, but take what he can give you and be satisfied.

The demand for the large models continues brisk, and most of the dealers are entirely out of them by now, with little hopes for future deliveries.

Southern California is experiencing the driest winter season in years, and this year's rainfall is far below normal. Not much damage has been done so far, but if the rains do not come soon some of the crops are bound to suffer. The new draft will take a number of salesmen who were exempted before, and at the present writing a number are already on the way to American Lake.

C. S. Ruggles, manager for Sherman, Clay & Co., Victor jobbers, has left for New York to see his youngest son, Wesley Ruggles, who is due to sail for France in the near future. Mr. Ruggles will be gone three or four weeks, and will visit the Victor factory before returning to the coast. R. B. Bird, from Sherman, Clay & Co., San Francisco, is taking charge of the local branch during the absence of Mr. Ruggles.

The Wiley B. Allen Co. have lost two of their boys this week, Robert P. Raygust having already been called to the colors, and Walter Allee expecting to leave in the near future.

The Andrews Music Co. report a fine business during the month of January, and expects to also have a good February trade, providing the stock holds out that long.

Mis Juanita Brown, of the talking machine department of Barker Bros., was married on Monday, January 21, to Walter Mack, who left the next day for the Aviation Training Camp

at Atlanta, Ga., preparatory to service in France. The bride remains in the employ of Barker Bros.

The Fitzgerald Music Co., which in its phonograph department handles the Edison exclusively, recently gave two Glen Ellison and Edison tone-test recitals. The first was held on Tuesday of last week and the second on the Friday following. Both were attended by crowds that packed the company's recital rooms to their full capacity, about 500 persons. They were naturally made the most of in an advertising way. Mr. Ellison left Los Angeles after the second recital for Des Moines, Ia.

THOS. A. EDISON NOW 71 YEARS OLD

Well-Known Inventor Passes a New Milestone in Life—At Present in Florida—No Formal Celebration at West Orange Factories

Thomas A. Edison, head of the Edison interests in Orange, N. J., and honorary president of the Naval Consulting Board, celebrated his seventy-first birthday anniversary on February 11.

Owing to his absence there was no formal celebration at the West Orange plants as has been the custom for several years past, but his associates and employes did not let the occasion go by unnoticed. Since the declaration of war Mr. Edison has been working for the Government in an effort to solve the U-boat problem and has taken only one short vacation. He is at present in Florida with Mrs. Edison.

The "Edison Pioneers," an organization composed of the old associates of Thomas A. Edison, gave a luncheon at the Lawyers' Club on Monday in celebration of the inventor's birthday, there being forty-five present, and they took the occasion to send the inventor the following message:

"We, the Edison Pioneers, assembled at our first annual luncheon to celebrate your birthday, express our pride in your present patriotic occupation and send you our warmest love and hearty congratulations on this anniversary."

Secretary Daniels also sent the following telegram to Mr. Edison:

"Congratulations upon your birthday. Your friends rejoice in your youthful optimism and clear vision of national needs. It has been a privilege to be a co-worker with you."

CONDITION OF INTERNATIONAL TRADE

Secretary Redfield Discusses on the Likely Course of Foreign Trade—Declares Present Condition Is Deliberately Abnormal

That the current condition of international trade is deliberately abnormal is the opinion expressed by Secretary of Commerce Redfield in a statement addressed to the Bureau of Foreign and Domestic Commerce on the subject of foreign trade organization by industries after the close of the war.

"It seems to me," he writes, "there are two abnormal stages through which we must go before what we may call the normal ebb and flow on international trade will, after the war, resume its movement.

"First, the current condition is deliberately abnormal. All the great exporting nations are directly interfering with the progress of their export and import trade and treating it as a war measure on a strictly and avowedly different basis from that of peace.

"Second, another abnormal state must follow immediately after the war, which may be described as like the process of settlement to rest of particles suspended in a fluid in order that the fluid may become clear. In other words, there will be a long period of international reconstruction. It will take the form, at the beginning, of excessive demands for raw materials of many kinds, and probably for finished lumber and machinery and certain kinds of equipment. The whole object during this time will be restoration toward a normal economic manufacturing and productive basis. This period must be gone through fully before the third period, which I speak of as the normal condition, shall arise."

"Pathé Records"

Their Significance to the Dealer:

They signify not only the largest record collection in the world, but they signify the only records that bear the Pathé Record Guarantee:

Pathé Records Won't Wear Out

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of TONE.

They signify:

No Needles to Change

THE PATHÉ SAPPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

They signify the world-wide Pathé Record Repertoire: Music new to America—vocal and instrumental celebrities of European fame.

And the Pathé monthly list of patriotic, popular, musical comedy and sentimental songs and dance hits—

Plus the brilliant Pathé artist personnel:

Muratore, Muzio, Ober, Cavaleri, Didur, Thibaud, Ganz, Bispham, Grace Hoffman, Slczak, Urlus, Weil, Fitziu, Sammarco, Ruffo, De-Cisneros and others.

Of further significance is the fact that Pathé Records, despite their unique guarantee, cost no more than other makes of records—

And the fact that they are subject to a dealer's discount so generous it will well repay you to investigate—*to-day*.

The Pathé Phonograph Plays All Makes of Records

Each Pathé Phonograph, at any price, plays not only Pathé Records, but all other makes of records.

The Pathé "Controla"

With the Pathé "Controla" you may increase or decrease the tonal volume of the Pathé Phonograph at will.

EXHIBITION OF COLOR PICTURES

The New Process of Producing Motion Pictures of Color of Nature Invented by Leon F. Douglass Is Demonstrated in New York

Under the direction of Thomas Boyd, of San Rafael, Cal., a private exhibition was given on February 12 and 13 in Wurlitzer Hall, New York City, of the new process for producing motion pictures of the colors of nature invented by Leon F. Douglass. Mr. Douglass is well known in the trade as the chairman of the board of directors of the Victor Talking Machine Co. In discussing Mr. Douglass' latest invention Mr. Boyd said to The World:

"Mr. Douglass for many years devoted his time to inventing processes which would bring superior tone qualities to the talking machine, and it was due in part to his efforts that the Victrola has been brought to the high standard of excellence as a sound reproducer which it enjoys to-day. Having mastered the laws of sound, he took up, at San Rafael, Cal., the problem of reproducing pictures in their natural colors, and for many years made a most exhaustive experiment to develop a theory which he had formulated when he first began this work. Success has been attained, and the pictures show how faithfully the invention is able to reproduce every hue, shade and tint of the colors of nature.

"The process is not only practicable, but is comparatively inexpensive. By means of a small and not costly device that may be attached to any motion picture camera, several color values of the image photographed are given to the negative, from which positive films are printed by a chemical process which I am not at liberty at this time to divulge. A film is thus produced which contains a series of images so colored as to give, when projected, a moving picture in natural colors, without the use at all of the rotary colored shutter which is usually required.

By this contrivance the brilliancy and intensity of the projected colored picture is increased and a stereoscopic effect is obtained, impossible in black and white. There is no more light required than is used in projecting black and white, and a speed of only twenty-four to the second is required, and through certain experiments being made this speed will be reduced. The cost of producing pictures by this process is slightly more than that for making black and white, while the advance in the art of producing motion pictures is considerable.

"The effects obtained are marvelously true to nature. The range of tint and hues unlimited. The presence of grays and neutral tints which are always present in nature, and which soften and tone down the harsh colors, are plentiful in these pictures. Thus, in addition to showing the vivid colors, all of the delicate shades and hues of flesh tints, of clothings and draperies, of the gradually changing sky tints of sunrise and sunset are reproduced with magical subtlety.

"The art of producing motion pictures of great brilliancy, showing every slight difference of the various shades of color, by a practicable and inexpensive process, has been accomplished."

INCREASES LINES HANDLED

S. N. Rosenstein, of the Phonograph Clearing House, New York, announced this week that he is now handling a number of well-known lines in addition to those that he has represented during the past few months. The latest additions to Mr. Rosenstein's line are the products manufactured by the Automatic Record Container Co., Chicago; the Scotsford line of phonograph accessories manufactured by the Barnhart Bros. & Spindler Co., Chicago; the lines made by the Weber, Knapp Co., Jamestown, N. Y., and the Crescent Talking Machine Co., New York. Mr. Rosenstein is planning to give these lines aggressive representation in New York, and judging from his activities the past few months the success of his company is assured.

TO INTEREST SHORTHAND WRITERS

How Talking Machine Records May Be Utilized by Students in the Taking Down of Actual Dictation—Some Pointers of Interest

It is herewith suggested that talking machine dealers investigate the possibilities of selling records to the students who are learning shorthand. After a student has mastered the symbols of stenography there is a period of several weeks' duration during which the student must practice taking down actual dictation. At first the student cannot keep up with the speed of ordinary conversation, and it is only by continued practice that he or she learns to work fast with shorthand. While the student is learning to write fast he is often hard put to get somebody to read or dictate to him, as the occupation is exceedingly boring for the person lending the "helping hand." This is just where the talking machine can fit in, for there are many records in the catalog of recitations, speeches, poems, etc., which the student could play to his heart's content and at any desired rate of speed. While the record was playing he could take down what was said in shorthand and then afterwards be able to verify the accuracy of his stenographic effort. In this way the student would not have to bother any one else while he was going through the "practice makes perfect" stage.

In a great many cities located throughout the country there are commercial colleges teaching shorthand. The talking machine dealer can interest the instructors in these institutions to introduce the idea of listening to records for dictation as part of the course. Shorthand is also taught in the majority of the public high schools and arrangements could be made with the local teachers to suggest that their pupils practice by listening to prose talking machine records. The many people learning shorthand by correspondence would also be excellent prospects for the progressive talking machine dealer to consider.

PUTNAM, PAGE CO. DOING THEIR BIT

The Putnam, Page Co., Victor wholesalers, Peoria, Ill., are certainly doing their bit for the country. Roy Page, junior member of the firm, enlisted when war was declared with Germany, and is now a First Lieutenant in the U. S. A. Next in line to volunteer was Arthur Graham, who is in the Aviation Corps, and last week William Dane joined the Radio Electrical Corps and will doubtless be sent to Chicago, after which he will obtain a six months' course at Harvard University.

A SIGNIFICANT LETTER

Fred A. Girdwood, druggist and stationer, Perth, Ont., Canada, a Talking Machine World subscriber, writes as follows: "We are now handling Victor records and Victrolas, and find them the best paying side line we ever introduced, in fact, if we are not careful, the drug business will soon be the side line." This letter is a significant tribute to the growing popularity of the talking machine throughout Canada, and the prospects are for a wider appreciation as time goes on.

MCCORMACK'S POPULARITY GROWS

John McCormack, the famous Irish tenor, whose Victor records are so widely popular, has been scoring a great success with the Metropolitan Opera Co.'s forces in New York this season. His splendid aid toward raising funds for the Red Cross has also come in for a large measure of public recognition. Next summer he plans to visit France and sing to "our boys" who are "over there."

A New Record Repertoire and Greater Record Sales for the New Year!

NOT only do Pathé Records represent the largest and most unique record repertoire in the world: music of which America still knows little—the great voices of all Europe; romantic instrumental ensembles of the Old World's Bohemia; the famed military bands, the songs and melodies of lands that *live* romance; the brilliance and beauty of a world of art so far a closed book to most Americans—

To say nothing of the regular monthly list of up-to-date patriotic, sentimental, musical comedy and popular song successes and dance novelties—

But they represent *continuous* sales

And increased "record dividends" to the dealer—

because there is a fast-growing demand for records that play without needles. And Pathé Records mean:

No Needles to Change

THE SAPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

Pathé Records Won't Wear Out

We guarantee every Pathé Record to play at least one thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone.

The Pathé Phonograph Plays All Makes of Records

Each Pathéphone, at any price, plays not only Pathé Records, but all other makes of records.

The Pathé "Controla"

With the Pathé "Controla" you may increase or decrease the tonal volume of the Pathé Phonograph at will.

No Needles to Change

THE PATHE SAPHIRE BALL takes the place of needles. And it is permanent. It never wears out.

Pathe Records Won't Wear Out

Here's the Pathé Record Guarantee: "We guarantee every Pathé Record to play at least a thousand times with the Pathé Sapphire Ball without impairing the unexcelled beauty of tone."

Pathé recordings are not merely phonographed recordings of such world-famed artists as Muratore, Muzio, Cavaliere, DeCisneros, Grace Hoffman, Ober, Slezak, Urlus, Bispham, Sammarco, Ruffo, Weil and others. They are the *realism* of those voices.

Pathé Records cost no more than other records and because they offer the dealer an unusually generous discount.

Write for details TO-DAY.

DEALERS' ASSOCIATION IN LOS ANGELES JUST ORGANIZED

Herman Beck Elected President of Organization at Recent Meeting—Association to Try for Trade Betterment—To Take Up Question of Approvals and Time Sales

LOS ANGELES, CAL., February 7.—One of the most important happenings that has taken place in the talking machine business in Los Angeles for some time was the organization recently of the Retail Talking Machine Dealers' Association of Southern California. The meeting was called at the Hotel Clark and was attended by twenty-six dealers, or their representatives. The following stores were represented: The Vernon Music Co., Mr. Hollands, proprietor; the Hollywood Music Co., Messrs. Chamberlin and Tilden; Southern California Music Co., George Marygold, vice-president, and William Hobbs Richardson, manager, talking machine department; Zellner Music Co., Mr. Patten; George J. Birkel Music Co., Messrs. Geissler and Beck; Colyear's Furniture Co., Curtis Colyear; Bartlett Music Co., Frank Salyer, manager; Glockner Music Co., Mr. Glockner, proprietor; Platt Music Co., Mr. Gallagher; Overell's Furniture Co., Mr. Stoll; Eastern Outfitting Co., Mr. Brown; Lyon-McKinney-Smith Co., Howard Brown; Shireson Bros., Mr. Shireson; Holmes Supply Co., Mr. Gibson; Fitzgerald Music Co., Mr. Earl Dibble, manager; Barker Bros., Mr. Boothe; Wiley B. Allen Co., Mr. Tucker; Andrews Talking Machine Co., Irving Andrews; Barnes Music Co., George Barnes.

The following officers were elected for the ensuing year: Herman Beck, president; Curtis Colyear, first vice-president; C. B. Boothe, second vice-president; Earl Dibble, secretary; George Barnes, treasurer.

The object of the association is for the betterment of the trade in general and to try to regulate the approval system on records, and also fix a limit to the time for contracts to run. This is to be strictly a business organization

to meet once every month at the different stores. It is the intention of the officers to have three or four open meetings during the year when all employes in the trade will be welcome and a special program is to be provided for their benefit.

SEEK SPY EVIDENCE ON RECORDS

U. S. Secret Service Operatives to Examine Many Discs Brought in by "Nieuw Amsterdam" for Dangerous Messages From Enemy

One thousand phonograph records brought to an Atlantic port last week aboard the Holland-American liner "Nieuw Amsterdam" are to be tested by United States Secret Service operatives, who believe the discs may bear code messages for German spies.

The records are in several languages, and none will be passed until it has been translated, read backwards and forwards and sidewise, tested for acrostics and musical note alphabets and examined microscopically for marks that might be messages.

Many messages have been cleverly concealed among the words and the apparently meaningless "tra-la-las" of song records. And frequently messages have been hidden under the labels of discs.

MARCH VICTOR RECORD SUPPLEMENT

Little Volume Is as Usual Full of Interesting Text and Illustrations

The Victor record supplement for March is a most interesting volume gotten up in the usual elaborate form and with pictures of unusual

character. The cover design illustrates the Barcarolle from "Tales of Hoffman," with descriptive text on the first inside cover. Then there is a full-page portrait of Jascha Heifetz, the latest Victor acquisition, pictures of DeLuca engaged in the popular pastime of knitting, a view of John Philip Sousa leading the band of the Great Lakes Naval Station, and a picture of Lieut. Gitz-Rice in the trenches leading a group in song. The two center pages tell of the Victrola's service to the nation, and quotes from the comments of Walter R. Creighton, son of the late Lord Bishop of London, on the value of talking machine music in the trenches.

TALKING MACHINES FOR SOLDIERS

Talking Machine and Record Committee for Army and Navy Base Hospitals Doing Good Work in Getting Outfits for Sick Soldiers

An important war work is now being conducted by the Talking Machine and Record Committee for Army and Navy Base Hospitals, which is headed by Arthur L. Lawrason, of the Nevada Apartments, Broadway and Sixty-ninth street, New York. The object of the committee is to get talking machines of all makes with disc records and needles to provide for the amusement and diversion of our soldiers when they return wounded or invalided, as well as for the sick already in camps and hospitals. Mr. Lawrason is a Canadian who is unable to serve in the army, but has done excellent work both in that country and the United States for the comfort and welfare of the fighting men. Those who have no machines or records to donate are appealed to for cash donations for the purchase of same.

Stracciari, the baritone and Columbia artist, scored a big success with the Chicago Opera Co. at his debut last week.

Standard Stock With Leading "Victor" Dealers

The Lundstrom Patented "Converto" Cabinet, now in its second year, has experienced an unusually rapid growth in sales and popularity. Convertos are now carried as standard stock by a large number of the leading Victor dealers and distributors. In spite of the increased facilities it is and always

has been difficult to keep supply up to demand. This is due to the distinct advantages of the Converto for user, dealer and distributor. It houses a small Victrola—converts it into a handsome cabinet type, completely encloses the machine, takes the place of a stand, provides dust-proof record rack; it revives interest in records, helps dealers meet low-priced competition in cabinet machines; it costs no more than a good stand and gives dealers a good profit.

LIEUT. J. H. GILES A VISITOR

Former Member of the Blackman Traveling Staff "Doing His Bit" for Uncle Sam—A. D. Robbins Has Joined the Aviation Corps

A visitor this week to the offices of the Blackman Talking Machine Co., New York, Victor wholesalers, was Lieut. James H. Giles of the 104th Field Artillery, now stationed at Spartanburg, S. C., and preparing to leave for "over

Lieut. James H. Giles

there" in the very near future. Lieut. Giles, who is now an acting captain, was formerly a member of the company's traveling staff, resigning to "do his bit" for Uncle Sam.

A. D. Robbins, who has been a member of the Blackman Talking Machine Co.'s sales staff for several years, and who has been visiting the Victor dealers in this territory for the past year, has enlisted as a member of the Aviation Corps, and is now stationed in Texas, preliminary to sailing for the other side.

George W. Lyle, assistant to the president of the Pathé Frères Phonograph Co., Brooklyn, N. Y., is at his desk again after a month's visit to the Pathé jobbers throughout the country, including the Pacific Coast.

ATTENTION OF MANUFACTURERS AND ASSEMBLERS

I have just completed a new kind of talking machine motor, and have a perfect model ready for demonstration. The motor can be used for machines retailing from \$20.00 upward. Would manufacture the same for the exclusive use of one large assembling house that can use a substantial quantity, or turn it over to a responsible manufacturer on a royalty basis. Address "Box 498," care The Talking Machine World, 373 Fourth Ave., New York.

1917 FOREIGN TRADE RECORD

Total of \$9,178,000,000 Reported; \$1,300,000,000 Over 1916

WASHINGTON, D. C., February 5.—America's foreign trade surpassed all records in 1917, amounting to \$9,178,000,000. Official figures just issued by the Department of Commerce showed that there was a gain of nearly \$1,300,000,000 over the preceding year. December exports of \$589,000,000, an increase of \$100,000,000 over November, caused the big increase. The year's exports amounted to \$6,226,000,000, and imports to \$2,952,000,000. Free imports formed 72 per cent. of the total.

The balance of trade in favor of the United States has nearly doubled in the last two years, amounting to \$3,274,000,000 in 1917, compared with \$1,776,000,000 in 1915.

Gold imports amounted to \$538,000,000, against \$686,000,000 in 1916, the decrease being due largely to the fact that since the United States entered the war purchases by the Allies have been financed by credits. Exports of gold totaled \$372,000,000, compared with \$156,000,000 in 1916.

Silver imports were \$53,000,000, against \$32,000,000 in 1916, and exports \$84,000,000, against \$71,000,000.

The general outlook as far as foreign trade is concerned is certainly improving.

TRIBUTE TO THE TALKING MACHINE

It is silent when you're weary
And therefore, unlike your friend,
It never bores nor gossips,
Never borrows, never lends.

It is always waiting for you
With the thing your mood most wants,
Whether raggy, jaggy music
Or the dreamy kind that haunts.

You sit back in a corner
With the shadows all about
And the music sets you dreaming,
And your pipe goes out.

Fairies gather round you,
Sometimes whispering in your ear,
Sometimes kissing shut your eyelids,
Leaving on your cheek a tear.

Ghosts of long ago peer at you,
Bringing back forgotten things,
When the record on your graphophone
Plays melodies or sings.

There's the tinkle of a cow bell
Or the gurgling of a brook,
Then a strain recalls to memory
Some sweet line from a loved book.

There's the scent of apple blossoms
And the murmur of the sea;
And a cupid comes a-whispering,
"Won't you listen, Love, to me?"

And he throws a few love kisses
From the record where he stands
And he dances to the music
While he waves his chubby hands.

Then comes a strain that makes you hear
A voice that's long been still;
And you see the grass and withered flowers
On a narrow slab-marked hill.

Then the fairies came back laughing,
(Music must give joy or pain);
Begging you to cease your sighing
And to light your pipe again.

All your heart is with the phantoms
As they dance about your chair
Ah! But when you try to touch them—
They're but music in the air.

SUPPLY MUSIC TO THE SOLDIERS

Company K at Camp Logan Proud of Their New Edison Phonograph

KEWANEE, ILL., February 10.—W. A. Bowen & Son, who handle Edison phonographs and records in this city, recently supplied an Army and

Navy Edison phonograph to Company K, at Camp Logan, one of Uncle Sam's virile fighting forces. This firm have built up a very excellent business for the Edison in this territory.

CONGRATULATIONS FOR F. P. OLIVER

Fred P. Oliver, vice-president of the Blackman Talking Machine Co., New York, Victor wholesalers, is receiving congratulations from his many friends in the trade upon the arrival on Sunday morning of a baby girl. Miss Oliver has been christened Virginia, and, if early signs are any indication of the future, her career as a vocal star is almost assured.

The Mickel Bros. Co., Victor wholesalers in Omaha, Neb., and Des Moines, Ia., closed a large volume of business the past month.

PITTSBURGH, PA., February 12.—The appearance in this city of Jascha Heifetz, the latest wonder violinist, whose first Victor records have created

ADVERTISING AND SELLING PRACTICE

Excellent New Book, Treating of This Subject in a Most Comprehensive Manner, Written by John B. Updycke and Published by A. W. Shaw Co.—Thoroughly Practical

"Advertising and Selling Practice" is the title of a most interesting and valuable volume of information for the advertising man and salesman, written by John B. Updycke, specialist in advertising training in the New York City schools, and published by the A. W. Shaw Co., Chicago and New York. Price, \$1.25 net.

The book explains the origin of advertising and shows just how modern advertising and selling developed. It shows how to study the specimens of early advertisements which are reproduced, and to compare them with advertisements in the papers and magazines to-day.

But the book is not limited to the history and theory of advertising and selling. It also gives specific plans and knacks which distinguish the superior from the mediocre merchandiser, and the well-selected illustrations will help greatly in quickening the interest of the employes.

The preparation of copy, the style of copy that builds business, how to judge the effectiveness of advertisements, what mediums to use, methods for checking returns, the advertising morgue, etc.

Mr. Updycke also takes up some principles of selling and explains the policies and methods that pay best in merchandising, giving a careful analysis of the fields and kinds of advertising and salesmanship.

All the way through the book he guides the beginner in a practical, helpful manner with problems at the end of each chapter to cover the text matter and require the reader to think for himself. Here is a problem selected at random: "Make a chart of the advertising you find in your community, in all mediums, and account for the mediums selected by certain advertisers for certain commodities."

In addition the book includes a most comprehensive bibliography on advertising and selling.

WANTS UNIFORM CITY POSTAGE

Senator Calder's Bill Would Abolish Increased Rates Between the Five Boroughs

To establish a uniform rate on first-class mail matter within the confines of Greater New York, Senator Calder has introduced the following amendment to the pending Post Office Appropriation bill:

"Provided, that the rate of postage on drop letters of the first-class, mailed in the City of New York for delivery within the confines of that city, shall be 2 cents an ounce or fraction thereof."

The effect of this amendment will be to provide a 2-cent rate on all first-class matter mailed in any of the five boroughs of Greater New York, a most necessary move.

One of the Display Rooms of the Delpheon Co., Inc., Atlanta

Delpheon Shop, a photograph of which is shown herewith. This store is considered one of the finest talking machine establishments in this State, and the company is planning to conduct it on a basis which will impress music lovers with the quality of the Delpheon phonograph.

D. G. Sunderland, who is the head of the Delpheon Co., Inc., of Atlanta, is leaving nothing undone to give the Delpheon aggressive representation in this territory. The Delpheon Shop has already been the subject of several news-

such a sensation, is not to go unnoticed by the local dealers if the Standard Talking Machine Co. can prevent it. The Standard Co. has sent out elaborate notices of Mr. Heifetz's concert at the Shriners' Mosque on March 11, with the Philadelphia Orchestra, and has made arrangements to receive subscriptions from dealers for tickets to the concert. The special slips supplied by the company for the ticket orders are coming in at a rapid rate and indicate that there will be a large attendance.

CLOSE IMPORTANT CONTRACTS

Leonard Markels During His Recent Trip West Closed a Number of Deals Whereby the Markels Motor Will Be in Demand This Year

Leonard Markels, well-known motor manufacturer, recently visited the manufacturers throughout the West and closed a number of important contracts whereby Markels products will be used exclusively by these manufacturers during 1918. These contracts include both the customers who used the Markels motor in 1917 and manufacturers who were so impressed with the samples of Markels motors that they re-

The Markels "Butterfly" Motor

ceived recently that they desired to place good sized orders for the coming year.

Mr. Markels states that the demand for the "Butterfly" motor is exceeding all expectations and that in order to keep pace with the orders which he is receiving for this motor, he has been obliged to materially increase his factory output. This motor has won the enthusiastic praise of manufacturers throughout the country, who state that it embodies the necessary requisites for a successful silent running motor. According to present plans, the Markels factory will produce in 1918 a motor output considerably ahead of last year, and the "Butterfly" will be one of the leaders in this production.

D. R. Doctorow, credit and sales manager for Leonard Markels, will leave for Canada during the next few days in response to several requests that have been received at the executive offices from well known Canadian manufacturers who contemplate using the Markels' products in 1918.

JOIN COLUMBIA SALES FORCE

A. B. Creal, formerly a member of the sales staff of a prominent Memphis furniture house has been appointed a member of the sales force of the Baltimore branch of the Columbia Graphophone Co., W. S. Parks, manager.

A. E. Landon has been appointed a member of the sales staff of the Columbia Co.'s Cleveland branch, A. W. Roose, manager. Both Mr. Creal and Mr. Landon have been spending some time in New York, prior to assuming their new duties.

HOFFAY CO. MARKETS SPECIALTIES

Decide to Put the "Resurrectone" and New "Half Fork-Tone" on the Market in Response to Numerous Requests for Those Products

The Hoffay Talking Machine Co., Inc., manufacturers of the Hoffay "Airtightphone" and the "Resurrectone," the special Hoffay sound box and diaphragm, have decided to place the "Resurrectone" and a new "Half Fork-Tone" sound box and diaphragm on the market. Joseph Hoffay, president of the company, decided on this move some time ago in answer to many requests the company has received throughout the past year. In speaking of the release of these products Mr. Hoffay said: "I owe a lot of apologies to those to whom in the past we refused our products to, owing to the policy of the company in force up to this time."

The Hoffay announcement appears on another page of this issue of The World, and among other things of interest to the trade is technical description of the action of vibrations on the diaphragm.

The Hoffay Co. will shortly inaugurate a campaign of publicity in behalf of their product. The various specialties will be illustrated and every feature will be numbered in accordance with an accompanying description.

SOLDIERS AND THE VICTROLA

Squad in New York Transports Machines and Records Very Carefully Through Streets

A convincing illustration of the part played by the talking machine in the life of the soldier was seen on one of the principal streets in New York recently. A squad of twelve or fourteen men in charge of a corporal was parading alongside the sidewalk in the column of twos, the first two men carrying between them a Victrola IX and one of the men in the rear transporting a sizable bundle of records. The Victrola was fully exposed so the public could gaze and be impressed with the instrument and the guard of honor that accompanied it, just to show, as it were, how essential is music.

"THORNTON BURGESS" WEEK

February 25 to March 2 Designated by the Columbia Co. as "Thornton Burgess" Week—Under Auspices of Educational Department

The week of February 25-March 2 has been designated by the Columbia Graphophone Co. as "Thornton Burgess" week, and under the auspices of the company's education department, an interesting and practical campaign will be instituted to stimulate the public's interest in the Thornton Burgess Columbia records during this week.

As announced recently in The World, Thornton Burgess, creator of the famous "Bed-Time" stories for children has made a series of these famous stories for the Columbia Co., exclusively. These records have already met with a remarkable sale throughout the country, and Columbia dealers are unanimous in acclaiming them as the best selling children's records that have yet been introduced.

According to its present plans "Thornton Burgess" week will be observed by the use of full-page advertisements in the Saturday Evening Post and the Youth's Companion featuring these records. These pages will appear in the issue of February 28, and three other advertisements will appear in the long list of newspapers that are included on the Columbia advertising schedule. The value of this publicity is tremendous, and this advertising, together with the special window display, counter-cards, leaflets, etc., prepared by the Columbia advertising division cannot fail to arouse the public's interest in these "Bed-time Stories."

TALKS BY GEORGE W. HOPKINS

Will Give Series of Advertising Talks at Ad Men's Club—Arthur C. Erisman in Town

George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, will make a series of advertising talks on alternate Fridays at the headquarters of the Advertising Men's Club of New York. Mr. Hopkins gave the first talk in this series last Friday, his subject being "Practical Application of Business Psychology," and the interest which was accorded his address is indicated by the fact that there was a larger attendance at the clubhouse to hear Mr. Hopkins than at any similar event in the history of the club.

Arthur C. Erisman, president of the Grafonola Co., of New England, exclusive Columbia dealer, was a visitor last week at the executive offices of the Columbia Co., in the Woolworth Building, New York. Mr. Erisman spoke optimistically of the business situation in his territory, stating that his company's sales for the past six weeks had been far ahead of expectations, and indicative of a gratifying industrial outlook for the new year.

Other visitors this week at the Columbia executive offices were Messrs. White, representing the Southern Furniture Co., Richmond, Va.; Mr. Koteen, representing the Virginia Mercantile Corp., Norfolk, Va., and Mr. Kades, of Miller & Kades, Harrisburg, Pa.

EXPEDITING FREIGHT DELIVERY

A. J. Marshall, an Authority on Electric Vehicles, Proposes Means for Eliminating Confusion Now Existing in Trucking

Interesting suggestions for remedying inefficiencies at railroad terminals and in the present methods of hauling goods to and from such terminals have been submitted by A. Jackson Marshall, secretary of the Electric Vehicle Section of the National Electric Light Association. The subject is of immediate interest to members of the talking machine industry.

To emphasize the need of improvements Mr. Marshall makes the statement that where the cost of transporting freight from Philadelphia to New York by rail is 27 cents a ton, the terminal charges amount to no less than \$3.65. Even for the long haul between Chicago and New York the terminal charges are 65 cents more per ton than the rail charge.

Considerable delay and consequent confusion result from uneven demands on terminals for service. Trucks deliver freight at the terminals and call for freight at the same time, the result being that long lines of vehicles wait for service. This lack of schedule, and the inability to serve trucks properly, owing to inadequate facilities at the terminals, not only block the streets but entail considerable monetary loss due to idle investments represented by the waiting trucks.

Mr. Marshall suggests that a more reasonably uniform demand on terminals would reduce congestion, make possible the use of fewer trucks and drivers, and improve traffic conditions in the streets. He thinks that co-operation of individual trucking interests, resulting possibly in an arrangement whereby a few well-organized truck concerns would handle the bulk of the freight, would tend to expedite freight handling. Co-operation with experienced concerns such as the express companies is also urged. Another suggestion is that a plan could be worked out whereby the railroads themselves, or operating through a co-operative truck concern, could handle freight directly from shipper to consignee, thus minimizing confusion and effecting many economies.

The interesting proposal is made that much of the freight could be handled at night by noiseless trucks, with trailers if necessary. These trucks would not have to contend with the usual daytime congestion in the streets, and would in fact help to reduce such congestion. The railroads work on a 24-hour schedule, and it is expecting too much of the terminals to hold up their end with only a ten or twelve hour day.

The Commercial Economy Board, Council of National Defense, has been investigating the subject of co-operative deliveries, and has found that when such systems are properly organized and managed savings of no mean proportions have been effected. Mr. Marshall thinks that the country is likely to witness extensions of co-operative delivery systems in the not-far-distant future, especially if the war continues for any length of time.

Make your store a receiving headquarters for talking machine outfits donated to the fighting men—it will help.

BUILDING UP GOOD BUSINESS

How the Armstrong Drug Co. Is Featuring the Brunswick Phonograph and Pathé Records in Pontiac, Ill., to Good Purpose

PONTIAC, ILL., February 9.—The photograph of the store of the Armstrong Drug Co., of this city, illustrates the manner in which talking machines can be carried and displayed effectually in connection with other lines and where the space is limited. The Armstrong Drug Co. handles a full line of Brunswick phonographs

Armstrong Drug Co.'s Brunswick Display

and Pathé records and is pushing this end of the business vigorously. Mr. Armstrong has the able assistance of Dave C. Miller and Mr. Horn, and the results of the holiday trade made them very enthusiastic regarding Brunswick phonographs as an annex to the drug business. They are not only getting a good business from the town, but are going aggressively after the country trade and are getting it. The Armstrong deal was engineered by E. S. Bristol, who travels the northern Illinois territory for the Brunswick people. He is a man who believes in service of a constructive kind as the dealers he calls on can justify.

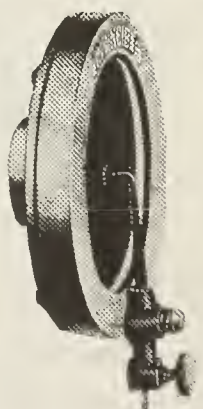

THE BRONX EXPOSITION

Governors of Several States and Others Associated in an Advisory Capacity

The management of the New York Permanent International Industrial Exposition, which opens in the Bronx next Memorial Day, has announced the association with the project in an honorary advisory capacity of the Governors of a score of States, United States Senators, members of Congress, Mayors of many large cities, and men prominent in financial and commercial affairs throughout the country. The chairman of the committee is Governor Charles S. Whitman, of New York.

Invitations to join the committee and to assist in the effort of the Exposition management to establish in New York a permanent nation-wide market place have been extended to the Governors of additional States and the Mayors of the larger municipalities. It is hoped that in this manner the manufacturing interests throughout the entire country will be interested in joining in a concerted effort to expand American trade in foreign lands, especially South America, and in the education of the masses of the people along lines of thrift and economy.

Now is the time to push those "slow-selling" records.

The "INVINCIBLE"

ENLARGE CAPACITY OF DEAN PLANT

Demand for Dean Needles Necessitates This Important Move—Doing Phenomenal Business—Looks Like 1918 Will Be Biggest Year

Adolph Heineman of the Otto Heineman Phonograph Supply Co., Inc., who is in charge of the John M. Dean division of the company, states this week that arrangements are now being made whereby the capacity of the Dean needle factories will soon be tripled. Mr. Heineman and his associates are working indefatigably to co-operate with the Dean clientele, and it now seems as though these efforts will be productive of gratifying results.

Mr. Heineman states that the company has closed a phenomenal business the past few weeks, the total business being limited only by the factory capacity. The Dean steel needle is winning new friends day by day and Mr. Heineman has expressed his appreciation of the broad-minded spirit of the company's patrons, which has taken into consideration the many obstacles and handicaps that have confronted manufacturers since the first of the new year.

REMOVE EXECUTIVE OFFICES

The New Jersey Reproducer Co., Now Located at 847 Broad Street, Newark, Has Considerably Larger Floor Space—Business Excellent

The New Jersey Reproducer Co., manufacturer of the "Invincible" sound box has removed its executive offices from 10 Oliver street to 847 Broad street, Newark, N. J. In its new quarters the company has considerably more floor space than in its old home, and moreover, the present offices are in the heart of the business section of the city, easily accessible to all modes of travel.

Hector Pocaroba, sales manager of the New Jersey Reproducer Co., is now away on a Western and Canadian trip, and to date has been very successful in interesting the trade in the company's sound box. He states that in his opinion it does not require an expert salesman to sell the "Invincible," for a demonstration of its tone quality invariably results in the placing of an order.

Mr. Pocaroba recently returned from a trip through the New England States, where he closed several deals with prominent houses, and made arrangements whereby the "Invincible" will be included in the equipment of a number of successful machines. He states that the fact that the "Invincible" plays all types of records has helped materially in the introduction of this new sound box.

DON'T LIKE SLOW ACCOUNTS

How credit conditions are viewed in other industries is of interest to members of the music trade industry. For instance, the New York Times says: "There is a retail credit man in this city who takes issue with those of his profession who insist that certain accounts are good even if they are slow. His contention is that no account which is always slow can ultimately be good, and in addition to this it is a very hard account to handle. 'Suppose an account is slow sixty days,' he said yesterday. 'That makes an actual loss of 1 per cent. for the store. Even if interest is paid on an account of this kind, there is still a question of loss through the creditor's not being able to use his money in the meantime for earning discounts on merchandise he buys, etc. For this reason, if no other, it must be conceded that a slow account cannot be profitable in the long run and should be avoided.'"

RECORD VERSUS SHEET MUSIC SALES

One Publisher Sells Only 40,000 Copies of a Certain Song But Receives Royalties on Over 70,000 Records From a Single Company

When the present copyright law, that of 1909, first went into effect with its provision that the owner of the copyright receive 2 cents per copy for the mechanical reproduction of his music, there was considerable unfavorable comment from music publishers and song writers regarding that phase of the measure. With checks for hundreds or thousands of dollars received regularly from talking machine companies in settlement of royalty statements, these complaints have dropped off to practically nothing.

Just what the talking machine records do towards increasing the income of the copyright owner, who is most generally the publisher of the music, was brought to light in a recent case in New York, where one talking machine company made a return of 2 cents each for 71,000 records of a certain number, while the sale of the number in sheet music form totaled only slightly over 40,000 copies. In other words, there were nearly two records sold for every copy of the music itself.

AN INTERESTING LETTER

Recording Department of Columbia Co. Receives a Letter in Spanish From Would-be Recording Artist Who Admits He Is a Wonder

The recording department of the Columbia Graphophone Co., New York, received the other day a letter which brought a smile to the most confirmed pessimist in the building, for if self-valuation can be considered as a recommendation the writer of this letter is destined to become one of the world's greatest singers.

In this letter which is written in Spanish, the sender makes a request to be enrolled as a Columbia artist, and in part says:

"In this community my name has obtained so much fame that I am considered one of the best singers in the northern section of my State, and if you will consider me as such on the strength of my word, I will be ready to give you entire satisfaction, because I have always won fame which was practically impossible of attainment.

"I am voluntarily demonstrating the gift with which God endowed me. I should like to show the public in general the little success that I have obtained in my profession. It doesn't make any difference, I can even sing songs in English, and I hope to the omnipotent God that some day I will be one of the greatest singers in history.

"While it is true that up to the present I have not taken any lessons to sing for phonographic recordings, judging from my ability I figure that it would not take me even one-quarter of the time that it takes others, and I am only twenty-nine years of age.

"If you don't avail yourselves of my services after I have given you the first chance, and wherefor I shall wait until I receive your answer to see whether I can secure a place with you, I shall be obliged to communicate with the _____ Co., to whom, I believe, I have already been recommended."

R. B. CALDWELL AT HIS DESK

The many friends in the trade of R. B. Caldwell, sales manager of the Pathéphone Sales Co. of New York, Pathé distributors, will be glad to learn that this popular "veteran" of the talking machine industry is now on the road to permanent recovery, after being confined to his home for fourteen weeks. On election night Mr. Caldwell was waylaid by highwaymen on Eighteenth street, New York, and injured to such an extent that his condition was considered critical for several weeks. He suffered two relapses in December and January, but is now back at his desk, and visiting the Pathé dealers in his territory.

**THE WONDERFUL
 "RESURRECTONE"
 and the
 "HALF-FORK-TONE"**

Here are illustrated and described the two supreme reproducers, which are now sold to fit machines of other makes, to show what is the minimum tone that can be expected from the "HOFFAY"—the unusual "Airtight-phone."

PRICE: Nickel-plated \$10. 22 karat gold plated \$12.50. To fit Victors, Sonoras, and attachments for Edison machines, etc. Money refunded if reproducer returned within 5 days from receipt.

Naturalness of sound requires accuracy of diaphragm vibration, which varies according to pitch. For instance, when the Bass strikes "E," there are 160 vibrations per second; when the Tenor strikes "C," there are 512 vibrations; and when the Soprano strikes "C" (high C) 2048 musical vibrations are transmitted to diaphragm every second of time. The terrific rapidity of vibration bends the one arm lever which moves the diaphragm to the extent of the resiliency of the lever, each bending adding additional superfluous vibrations (on account of the "reaction" of the one arm lever) thus making sounds higher in pitch and "strident"—in fact, artificial.

In the "RESURRECTONE," the diaphragm is vibrated by a "tuning-fork" working on both sides, the resiliency of the two arms being automatically "taken up," accuracy of vibration and "naturalness" of sound being therefore accomplished facts.

In the "RESURRECTONE," the connection of the two arms to the diaphragm is of the HOFFAY flexible kind, which is another exclusive feature making this reproducer absolutely superior to all others. In the "HALF-FORK-TONE" a one-arm lever rigidly connected vibrates the diaphragm, instead of the "tuning-fork."

The "HALF-FORK-TONE" is still much better than reproducers of other makes because the lever is supported by the other remarkable exclusive features of the "RESURRECTONE"—including the "flexed" Piano Wire Mounting which "tunes-up" the sound, and which has the additional great value of being "insulated" from the casing of the reproducer.

PRICE: Nickel-plated \$6. 22 karat gold plated \$7.50. To fit standard machines and attachments for Edisons. Money refunded if reproducer returned within five days from receipt.

Order a sample; improve your machine; increase the value of your records, and learn by actual test how much better the complete "HOFFAY" instrument must be than most other machines. "Tone" requires "airtightness" and the "RESURRECTONE," "HALF-FORK-TONE," as well as the "HOFFAY" are absolutely "airtight."

READY TO DELIVER NEEDLES

Blackman Talking Machine Co. Reports That Supplies Are Now More Plentiful

The Blackman Talking Machine Co., New York, has frequently called the attention of its dealers to the fact that the needle situation has been so uncertain the past few months that it has been unable to do other than try to fill the very urgent orders. J. Newcomb Blackman, president of the company, has just advised the trade, however, that the company is now able to see a little "daylight," and is ready to make reasonably prompt needle deliveries.

The Blackman Talking Machine Co. is sole distributor for the "Playrite" and "Melotone" brands of steel needles, both of which have attained considerable popularity throughout the country. A timely suggestion from the company advises the dealers to anticipate their needle orders wherever possible in order to take advantage of the slight improvement in the general situation.

HOW SELFRIDGE MET CONDITIONS

Famous English Merchant Tells How He Re-adjusted His Business to Meet War Needs—Some Lessons for American Business Men

The pressure brought about through war demands in the United States has resulted in no small degree of pessimism among certain manufacturers and business men, who professedly are patriotic, but who apparently suffer from "cold feet." To those people who feel like dropping their advertising, laying off their force and closing up shop, metaphorically speaking, we commend the attitude of Gordon Selfridge, the prominent London merchant, who was one merchant in England who refused to lose his head when the war broke out; who refused to cut salaries, or slash expenses; who refused to

OHIO EDISON DEALER GIVES PROOF OF GOOD BUSINESS

The excellent volume of holiday business handled by N. E. Olin & Son, Edison phonograph dealers at Kent, O., and particularly the

some of the cases were occupied by machines so they could sell them over again, and thereby take care of the steadily growing demand.

Each Empty Case Represents an Edison Phonograph Sold by N. E. Olin & Son

number of machines sold, is indicated by the array of empty cases which contained machines disposed of during Christmas time. Now the members of the company wish at times that

Olin & Son report that business for January has opened up most satisfactorily and they are exceedingly optimistic over the business outlook for 1918.

believe that the end of the world had come. That merchant happens to be an American, and last year his store paid the English Government an excess profits tax of \$200,000.

"When the war broke out," Mr. Selfridge told George T. Bye, of The Nation's Business, "it was the general opinion that the end had come for business. Many merchants reduced staffs and cut wages. The second or third day of the war I was waited upon by a committee of our buyers, who informed me that they were sure of heavy losses, and that they wished to see it through with me on a half-salary basis.

"But I wasn't sure business was going to be bad, and, with thanks for their loyalty and good spirit, I told every one in the house that Self-

ridge's would make no changes for the present. To that stand we owe something of our present prosperity. By keeping on our brightest face, spending more money for advertising, and serving our patrons with greater attention, we have increased our business to a volume of over \$15,000,000—a gain of \$2,500,000 in one year."

Mr. Selfridge took advantage of every twist in the war situation. He advertised that every person in his store during any German aeroplane attack was insured free, without preliminary registration, to the amount of \$5,000 for death resulting directly from the raid. The result was to make every woman turn to his store as a safe place to shop and lunch; and to direct public attention to its solid concrete construction. He has consistently sold "war bread" a cent or two cents a loaf lower than any one else in London—another great trade attracter.

But most important has been the maintenance of his personnel, and the adaptation of his line of goods to meet the changed conditions.

As fast as men have been called away, he has substituted women workers; and many of these, he says, will never be replaced by men. And he has foreseen each shift in the public demand, and provided for it. The luxuries of the rich early ceased to be a factor in his trade, as social life in London quickly diminished; but the luxuries of the poor—inexpensive pianos and jewelry and the like—have rapidly grown more important as the wages of workers have risen.

His advice to the American merchant is:

"Keep your business going at high pressure. Watch with the greatest care your organization, and your ability to fill with women or men above enlistment age the posts vacated by men called away. Watch the market, and keep your stock as full and up-to-date as you can."

R. F. BOLTON IN NEW POST

Appointed This Week as Sales Manager of the International Record Department of the Columbia Graphophone Co.

George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, announced this week the appointment of R. F. Bolton as sales manager of the Columbia international record department. Mr. Bolton has already assumed his new duties, with headquarters at 104 West Thirty-eighth street, New York.

R. F. Bolton

R. F. Bolton is one of the most popular and best-posted members of the talking machine industry, having been associated with the Columbia Co. for twenty years. During this time he has occupied posts of importance and responsibility, and has always been in close touch with the Columbia dealers. He enters his new work with the determination to co-operate with Columbia representatives in every possible way, with the idea of materially increasing their foreign record sales.

The success of the Columbia Co.'s international record department has been one of the salient factors in the company's remarkable growth the past few years. Anton Heindl, manager of this department, is thoroughly versed in all the intimate details of this important branch of the business, and as one Columbia dealer remarked the other day: "The combination of Heindl and Bolton will doubtless mean big things for the Columbia international record department."

HONOR EDISON ON BIRTHDAY

Edison Disc Jobbers' Association Pay Strong Tribute to the Patriotic Work of Thomas A. Edison on Occasion of 71st Birthday

The Edison Disc Jobbers' Association, made up of the jobbers of Edison phonographs and records throughout the United States and Canada, recently sent the following letter to Thomas A. Edison upon the occasion of his seventy-first birthday anniversary on February 11.

Indianapolis, Ind., Feb. 11, 1918.

Mr. Thomas Alva Edison:

Greetings and congratulations to you on your seventy-first birthday. The Edison Disc Jobbers' Association, representing the entire body of distributors of the Amberola and Edison Disc phonograph products in the United States of America and the Dominion of Canada, unite in extending to you a warm greeting on this, your seventy-first birthday.

Our association with the name of Edison is always the source of great personal satisfaction to each and every one of us, but as we extend our greetings to you, sir, on this, your seventy-first birthday, we bring with them a deep sense of gratitude for your untiring devotion to your country and the cause of democracy throughout the world.

We are proud of you, Mr. Edison, and while you are throwing your great energy into the fight against the brutal autocracy that threatens the future of every liberty-loving people of the earth, please accept our pledge of unswerving loyalty to you and yours, through each trying hour of the task you have so nobly and cheerfully undertaken for mankind. We will try to profit by your splendid example and courage and we wish you many, many happy returns of this day.

Very obediently yours,

WALTER E. KIPP, President,
L. N. BLOOM, Vice-President,
FRANK E. BOLWAY, Secretary,
H. HARGER BLISH, JR., Treasurer,
A. H. CURRY, Executive Committee,
W. L. F. ROSENBLATT,
E. BOWMAN.

A PHILADELPHIA INCORPORATION

The North Philadelphia Talking Machine Co., Philadelphia, Pa., has been incorporated, with a capital stock of \$10,000, by Henry A. Gautschi and others.

Pudney & Howland, a new firm which will open a music store at 18 Broad street, Ossining, N. Y., on March 1 will feature Victrolas as well as pianos.

MURATORE WINS IN NEW YORK

Leading Tenor of Chicago Opera Co. Accorded Great Reception in Metropolis—Pathé Records of His Voice in Great Demand These Days

One of the outstanding factors in the remarkable success achieved by the Chicago Opera Co. in its New York season which recently started at the Lexington Theatre has been the individual honors accorded Lucien Muratore, leading tenor of the company, and one of the greatest artists of the present generation. Mr. Muratore has appeared at a number of performances at the Lexington Theatre, and every

Lucien Muratore

role in which he has been presented has served to enhance his fame and renown. Not since the days of Jean de Reszke has any tenor won such public acclaim.

Although Muratore had been accorded the most enthusiastic praise by Chicago musical critics, and his appearance with the Chicago Opera Co. in this city had been heralded as one of the "star" events of this company's local season, the New York music-loving public was hardly prepared for the superb brilliancy of Muratore's voice. Every local critic referred to his New York debut as an epoch-making event in operatic history, and each succeeding performance helped to augment this spontaneous praise and acclaim.

Muratore is an exclusive Pathé artist, and his Pathé records have been sold in large quantities by Pathé dealers everywhere. The Pathé Frères Co. has been congratulated upon their acquisition of Muratore as one of their artists, and this company's local representatives have taken advantage of the New York season of the Chicago Opera Co. to feature Muratore's records to excellent advantage.

AN OPPORTUNITY

to secure a TALKING MACHINE at a very low cost

Specifications

Oak or Mahogany Cabinet, 15 in. wide, 17 in. deep, 8 in. high. Nickel-plated Tone Arm and Soundbox. Single Spring Motor. 10 in. Turntable.

THE GEORGE A. LONG CABINET COMPANY
HANOVER, PA.

PRIZES AWARDED FOR EDISON WEEK WINDOW DISPLAYS

Adam Schaaf, Chicago, Wins First Prize, With Capwell's Department Store, Oakland, Cal., Second, and A. D. Elster, Meriden, Conn., Third—Great Interest in Contest

Winners of the three grand prizes of \$300 for first prize, \$125 for second prize and \$75 for third prize in the Edison Week (1917) Dealers' Window Display Contest have just been announced. They are: First, Adam Schaaf, Chicago; second, Capwell's Department Store, Oakland, Cal.; third, A. D. Elster, Meriden, Conn.

This contest was entirely in the hands of Edison jobbers with the exception that the Edison Laboratories offered to give three prizes to the best three photographs submitted in the United States and Canada. Each jobber conducted a contest in his zone in accordance with rules laid down by him and gave from three to seven prizes, winners of first and second prizes being eligible for the grand prizes. This method necessitated a considerable length of time to eliminate non-winners in the various zones, to forward all of the photographs to Orange and have the non-winners in the grand prize contest eliminated.

An unusually large number of attractive displays were entered in the contest which is indicated by the three prize winners illustrated on this page. A considerable improvement over the previous year's display was readily noticeable, not only from a purely decorative standpoint but from the success of the dealers in telling the story of Mr. Edison's new art—Music's Re-Creation—by means of their displays. Many displays

a clever illusion, was in continuous movement. In front of the Faust scene were arranged six

Edison Re-Creations from "Faust" and the same number of Gioconda selections in front of the other scene.

CARD No. 1

Faust Re-Created on the New Edison
Gounod's opera "Faust" is recognized as one of the world's greatest operatic masterpieces. To every voice is allotted a superb aria—each one in itself sufficient to make Faust famous.

Adam Schaaf Store, Chicago, Winner of First Prize

The Jewel Song—soprano solo, Alice Verlet. Edison Re-Creation No. 82086.

The Flower Song—contralto solo, Eleanora de Cisneros. Edison Re-Creation No. 82519.

All Hail Thou Dwelling Lowly—tenor solo, Paul Alt-house. Edison Re-Creation No. 82096.

Even Bravest Heart—haritone solo, Thomas Chalmers. Edison Re-Creation No. 82060.

In addition to these magnificent solos, there is the great swelling Soldiers' Chorus—Edison Re-Creation No. 80121, and the graceful, melodious Faust Waltzes No. 80353. With the New Edison you can Re-Creat "Faust" right in your own home and by artists noted for their exquisite interpretation.

Another interesting feature was the ten news clippings from such well-known papers as the New York Tribune, Philadelphia Ledger, Detroit Free Press, San Francisco Chronicle and other famous newspapers. The heading of each paper was obtained and posted on the showcards and the wording was arranged as on the front page of the newspaper with cuts of the different Edison artists as they appeared in the concerts described.

CARD No. 2

A Musical Triumph in the Life of Edison
The ten news clippings here reproduced contain extracts from articles written by musical critics of five hundred of America's principal newspapers, after hearing artists sing in direct comparison with Edison Re-Creations of their work. Two thousand five hundred different materials and compositions had to be tried and discarded, and more than one million dollars expended in research work, before Mr. Edison obtained his desired result.

Capwell's Department Store, Oakland, Cal., Second Prize Winner

included life-size figures standing beside the laboratory model of the New Edison to represent Edison artists as they sing in direct comparison with the New Edison at the tone tests, which have been witnessed by upwards of 2,000,000 music lovers and music critics on approximately 1,500 different occasions, with the result that the auditors failed to distinguish the faintest difference between the actual voice and the New Edison's Re-Creation of it. Thirty noted Edison artists have participated in these tests, which have taken place in all parts of the United States and most of Canada.

The first prize winning display in the Grand Prize Contest was truly a masterpiece in the art of window dressing, as one glance at the reproduction on this page will readily confirm. The following description of this window will help to visualize its attractiveness:

Several novel ideas were introduced in this display, among which the most noteworthy were the two stage pictures—the garden scene from "Faust," portraying Alice Verlet singing the Jewel aria, and the very beautiful ship scene from "La Gioconda." These scenes were painted by artists and arranged exactly like stage settings, lighted by twenty incandescent concealed lights, and made a very realistic appearance. Even the moon appeared in one of the scenes and the moonrays were playing on the water, which, by

Display of A. D. Elster, Meriden, Conn., Which Won Third Prize

Joseph C. Smith and his famous dance orchestra are now making records for Columbia. Like all Columbia Dance Records, they sell themselves.

**Columbia Graphophone Co.
Woolworth Building, New York**

The color scheme of the display was pink, black and gold, and the friezes representing grand opera were painted in light water colors and mounted on black velvet which made a very beautiful and strong contrast. Five New Edisons and twenty Edison Re-Creations were displayed.

AN INTERESTING ANNOUNCEMENT

Name Desired for the New Steel Needles of the Record Needle & Mfg. Co., Milwaukee

The Record Needle & Mfg. Co., of Milwaukee, Wis., have a very interesting announcement in another part of The World, in which they ask the co-operation of the trade in selecting a fitting name for their new steel needles. H. A. Goldsmith, who is actively interested in this enterprise, is a practical talking machine man, who is fully acquainted with the needs of the trade, and it goes without saying that whatever he and those associated with him place on the market will be most reliable and satisfactory. The company are planning to conduct a large volume of business during 1918, and they have already booked some very large orders.

O. K. HOUCK AIDS HOSPITAL FUND

Well-Known Piano Man of Memphis Works Hard to Corner the Dollars

MEMPHIS, TENN., February 5.—O. K. Houck, of the O. K. Houck Piano Co., is one of the most active workers in raising a fund of \$200,000 for the Baptist Memorial Hospital in this city. Mr. Houck has not only worked hard in getting actual subscriptions, but has been one of the principal speakers at the various meetings held to stimulate the work. Mr. Houck's well-known fund of humor has in many cases gotten more results than some of the more serious discussions of other business men.

E. L. THOMPSON A WINNER

E. L. Thompson, a member of the local wholesale branch of the Columbia Graphophone Co., 55 Warren street, was the winner of the President Whitten individual salesman's cup for the month of December in this district. This was Mr. Thompson's first victory, and the contest for permanent possession of the trophy continues to be "fast and furious."

TWO COLUMBIA ARTISTS SCORE

Mme. Barrientos and Hipolito Lazaro Win Triumph at Metropolitan Opera House

Two famous Columbia artists, Hipolito Lazaro and Mme. Maria Barrientos, figured prominently in New York's operatic news this month, for both made their initial 1918 appearance with the Metropolitan Opera Co. Mme. Barrientos had made her debut with this opera company in the season of 1915-1916, but Lazaro's performance in "Rigoletto" last week marked his initial appearance at the Metropolitan Opera House.

Both of these artists won the enthusiastic praise of the musical critics, their performance in the leading roles in "Rigoletto" being re-

debut with the Metropolitan Opera Co. was one of the sensations of that season.

Hipolito Lazaro is considered one of the greatest tenors of recent times, and his appearance in Spain, Italy, Buenos Aires, London

Mme. Maria Barrientos

ferred to as one of the finest renditions of this popular opera that has been heard in recent years. These artists are scheduled for a number of performances this season at the Metropolitan Opera House, and their 1918 debut augurs well for their continued success at America's celebrated opera house.

Mme. Maria Barrientos and Hipolito Lazaro are both exclusive Columbia artists, and their Columbia records have already met with a very favorable reception throughout the country. Mme. Barrientos is a coloratura soprano who has achieved fame here and abroad, and her

Hipolito Lazaro

and Havana has given him international renown. He has won praise from distinguished critics for the remarkable range and power of his voice, and his Columbia records have served to add to his laurels as a tenor who will be an invaluable contributor to the history of operatic music.

announcements of manufacturers, though unfortunately the average dealer this side fails to grasp the value of coupling up his activities and publicity propaganda therewith. One day, I suppose, dealers will come to realize that, as the link between supply and demand, it is up to them to work in close association with the manufacturer, and thus double the value of the latter's expenditure. As it is, the enterprise is all on one side, with the result that a percentage of its selling power—how much it is impossible to estimate these times—is absolutely lost. Now and again one hears of a few real live dealers, like Jake Graham, of Liverpool; Thos. Edens Osborne, of Belfast; Paskell, of London, apart from the big stores, who actively co-operate with manufacturers, but taking the average dealer his apathy in this regard is very disappointing. Indeed, it is fair to say, of at least 50 per cent. of retailers, that they do not sell gramophones and records; people come in and buy them. That is a basic truth, notwithstanding the great difficulties which surround us.

war German monopoly. If this is to be achieved, however, I would suggest that the trade co-ordinate its plans so as to embrace a definite offer of encouragement of any and all legitimate efforts to secure to British interests alone the British gramophone market. This co-ordination should take the solidly practical form of financial support, if possible, and certainly the actual placement of a good order, after a satisfactory demonstration of the motor. Such action would materially assist the manufacturer, enabling him to plan a definite post-war campaign in the interests of British Empire trade. I am not aware that this matter has yet received the attention it deserves at the hands of our trade as a body, though individual support along the lines suggested has not been, and is not, wanting. In this connection, however, there is need for the establishment of a central authority for the encouragement and introduction of a settled plan of campaign along lines of more or less general agreement in conformity with the trade's aims and ambitions, based upon an intimate knowledge of the situation. A "prepared" policy is much preferable to any hasty or haphazard plan evolved at the last minute. The trade should know in advance of peace what it is hoped to accomplish. The best incentive to the success of those aims is to enthuse individuals with the thought that it depends largely upon personal effort of an active, not a passive, nature. Let us try and get each member of the trade to realize this.

LONDON, ENGLAND, E. C., January 30.—As in most countries, the period immediately succeeding Christmas tide is somewhat slack from the viewpoint of talking machine sales. In normal times the British market quickly recovers, and indeed the volume of trade often surpasses the ephemeral pre-holiday rush. To-day all this is changed. The trade recovery is considerably slower, the demand for records and machines being non-progressive. From inquiries around the trade and in conversation with retailers I learn that sales, of records especially, are only just picking up again after a period of somnolence, and now that the pantomimes are in full swing there is every prospect of increasing business. Every gramophone concern has published a list of records bearing the catchy numbers from the chief pantos, which, by the way, are very well patronized; aerial and other wartime exigencies considered. The lure of the theatres directly reflects itself in favor of the dealer; every theatregoer possessing a gramophone being a potential buyer of records. This fact is utilized to good advantage in the publicity

In the machine domain trade conditions are somewhat better than when last I wrote. Motors are coming along in larger quantities from Switzerland, at least for a period, and deliveries are more prompt. The British output of motors is still poor. There is, I am told, not much hope of improvement while the war is on, as it continues to absorb all available labor and material. Nevertheless, it is a matter of satisfaction to the trade that experiments are progressing along lines which should insure a big output immediately the situation permits, and, in any case, render it unnecessary for any Britisher to entertain the thought that we need ever again allow to be re-established the pre-

FROM OUR LONDON HEADQUARTERS—(Continued from page 107)

tain amount of interest this side, in view of the increasing quantities of used needles which are collected and dispatched for re-pointing. This class of business has developed considerably of late and one of the most important questions involved is, whether these needles should be re-sold as new.

The re-pointing process is in the main pretty good, though it falls a little short of being rightly considered equal to the fine, smooth, evenly-tapered points of new needles. Were it otherwise, the question would lose much of its value. As it is, if these re-pointed needles are sold without any notification that they are other than new, one could not avoid the feeling that an unintentional departure is made from equity. This very question was noted in a previous article devoted to an encouragement of re-pointing of old needles, and I then took the opportunity of stating that in my opinion every box of these needles should carry a clear indication that they were "resharpened needles." The position is a well-defined one, which, to my mind, permits of no quibbling. Unless he is informed to the contrary, the purchaser of a box of needles is rightly entitled to assume that they are new ones. That being so, to continue the sale of resharpener needles, except as such, is committing a pious fraud on the public. I honestly believe that this aspect of the case has not occurred to those who are developing this new field of economizing steel, but now that it has received publicity I think any of our friends whom this subject may affect will respond to the justice of the case, and adopt a policy which in itself will answer in the negative the question raised herein.

How They Do Things in the Navy

Warships which possessed a harmonium and a competent musician to operate it have in the past received an official grant of two shillings weekly. A new order endeavors to make it clear that the harmonium player need not really exist, the instrument itself being sufficient justification for the payment. It takes a column of close print in the London Gazette to explain this simple fact in official language, though nothing is said of the more modern and diverse musical instrument—the gramophone, or whether, as a contemporary puts it, the naval harmoniums are to be fitted with an automatic player attachment which will operate upon insertion of the Admiralty grant in the slot.

Steel Wire for Gramophone Needles

The first official action having for its object the rationing of steel for needles terminated on November 28 last. In the present ration of twenty-five tons of steel-wire is an official renewal which expires on February 28. It is expected that from this latter date permission will be given for the same amount of steel-wire to be allocated for the purpose named, each quarter, or otherwise as supplies permit. The ministry stipulate that the whole of the needles made from this ration, in which, by the way, all firms are entitled to participate, shall be utilized

for army and navy demands, and for no other purpose. The needle manufacturers must distribute supplies proportionate to their customers' previous ratio. We look like getting down to business at last.

Anent Branches in Enemy Countries

At the recent annual general meeting of the "His Master's Voice" shareholders, the chairman made interesting reference to the position of the company's branches in enemy countries and allied continental territory in enemy occupation. The statement is self-explanatory, and is just now of particular interest. He said: "In other parts of the world where business has been possible, sales have also been good. Our branch managers and agents have done everything humanly possible, steadfastly and loyally keeping up our trade and good name under circumstances of exile, hardship, privation and even personal danger. We thank them all most heartily and sincerely. Those of you who are acquainted with our history and have followed from time to time what I have been able to tell you at our annual meetings will know that our German branch is a separate German company, all the shares being owned by this company. We have been informed that our shareholding or ownership has, under orders from the German Government authorities, been sold by public venter to the highest bidder. Our information is meagre, and I merely mention the bald fact so that it may be within your knowledge. We have lodged a claim with the controller here as to our assets in enemy territories, and as it is understood that the balance of accounts between Great Britain and Germany is largely in Great Britain's favor it is open to hope that we shall not eventually be losers in respect to the reported sale. You will also know that we have, or had, a large record factory at Riga, which seaport town has recently passed into enemy hands. In July, 1915, when the Germans previously threatened Riga, the whole of our plant, machinery, and effects of every description, including boilers and plant, were moved to new premises in Moscow, where they have since been utilized for our purposes. Our total loss in Riga is therefore confined to the value of the land and the stripped building."

W. H. Reynolds, Ltd., in New Quarters

A recent call at W. H. Reynolds (1915), Ltd., revealed the interesting fact that a wartime removal is in progress. Their present location, 45 City road, is a building of many historic associations. For the past decade it has been occupied by successive firms, though I cannot say the place has proved over lucky from the viewpoint of enterprising occupants. The present tenants, Messrs. Reynolds, may certainly be considered an exception, as witness their need of the more commodious building they have now been forced to acquire, owing to trade expansion. The new home is almost opposite—22 City road, and removal thereto is now in course of operation. Upon visiting the new

place, I am of opinion that it is in every way more suitable for our class of business than is No. 45. It is a large airy warehouse of five floors, not counting the basement; plenty of natural light; steam heated throughout, and so equipped as to insure prompt handling of gramophone repairs, the hundred-and-one parts and accessories stocked, packing and dispatch of complete machines, etc. In the basement there was to be seen a pleasing sight in the shape of several cases of Swiss motors, of which, I was assured by the director, there would be reasonable supplies for some time ahead. This enterprising firm evidently mean to maintain output on the highest possible level, quality being the declared keynote of their future policy. That is as it should be; the British trade has had enough of the cheap and nasty. We progress!

New Supplies of "Guardsman" Records Ready

The recent fire at the factory of the Invicta Record Co., which caused damage sufficient to disorganize output, is being made good as quickly as possible. At the time of writing the best possible report is to hand anent the progress of the rebuilding operations, and I learn that the pressing of records has again commenced in earnest. It will, of course, be some time before conditions can permit of normal output, but the company are sanguine, given a continuance of the present rate of progress, that rebuilding operations will be completed within the near future.

New "Winners" for 1918

The first new year Winner program of records is, in quality and value, an excellent augury of the company's 1918 service. Last year's sales are rumored to have reached unexpected proportions, and by the list under mention it certainly looks as though J. E. Hough, Ltd., are out on the right road to an eclipse of all previous records. The new list embodies vocal, band, orchestral and descriptive numbers galore, recorded by first-class artists. I don't hesitate to say that every title is a "cinch." There is a goodly leavening of panto "hits" amongst them, and some real tongue twisters, as for instance—"Sammy Salter Salted Sausages in Salter's Shop." Say it quickly, if you can! Altogether a fine sales list.

The Murdoch Trading Co.

Owing to the recent disastrous fire which entirely destroyed their large London warehouse, John G. Murdoch & Co., Ltd., are now carrying on their business at 59 Clerkenwell road, London, E. C., under, be it noted, a new title—The Murdoch Trading Co. The business has nat-

DEALERS PREPARED TO DO BUSINESS ARE INVITED TO COMMUNICATE WITH

Proprietors and Manufacturers, J. E. HOUGH, Ltd., 62 Glengall Road, London, S. E. 15, England

FROM OUR LONDON HEADQUARTERS—(Continued from page 108)

urally been very considerably disorganized, and though every effort is being made to satisfactorily straighten things out, the indulgence of the trade at such a time will be much appreciated. It is perhaps scarcely necessary to mention this, in view of the general sympathy of the trade already expressed to Messrs. Murdoch. A sad feature of the disaster is that while endeavoring to combat the outbreak of fire one of the oldest employes lost his life. He did his duty, and more, under circumstances that one day shall be told in full. The World begs to tender to the firm its sincere sympathy.

"Over There," the American war song which has achieved among the "Sammies" a rage only to be likened to our own "Tipperary," has just been announced by the Columbia Co. as a special issue. The song was brought over to this country by Albert de Courville and introduced by that astute producer into "Zig-Zag" at the London Hippodrome, sung by Shirley Kellogg.

Marie Corelli Buys a Compactophone

Miss Marie Corelli, the world-famed novelist, has just purchased a Regal Compactophone for sending to the soldiers. The famous writer has largely suspended her fiction writing activities and is devoting great energy to matters of war interest, of which this purchase of a Regal Compactophone is striking evidence. The sale of the instrument was effected by Keys Phono Depot, of John Bright street, Birmingham.

Not From the States This Time

Those who keep in touch with the taste of the public in popular songs will know that for some seasons past the big song of the year has been of the coon type. Thus we have had "Down Home in Tennessee" and "Down Where the Swanee River Flows," to quote the most recent examples. This year, again, the fashion reigns, but while those mentioned are airs that came to us from the U. S. A., it is interesting to note that this season's newcomer is by English authors and an English composer, A. J. Mills, Fred Godfrey and Bennett Scott, to wit. The song is "Down Texas Way," and even in advance of pantomime its merry catchy melody had already established a unique niche for itself. The song is issued on Columbia this month, sung by the Unity Quartet and Geo. F. Murray, tenor.

"Almost Uncanny"

Unquestionably the surprise of the present season have been the Columbia records of "Daddy" and "Love's Old Sweet Song," sung by Madame Clara Butt. The divinely gifted contralto has been responsible for many remarkable records since her association with Columbia, but, in all her glorious career she has never made records that compare with these.

"Rigoletto" Sells "Aida"

It is an accepted axiom of business that one good line sells another, but the Columbia Co. say they were not altogether prepared for the new "boom" which has suddenly set in for their complete opera of "Aida." It can only be

due, they say, to the favorable reception accorded to the newest issue of the complete "Rigoletto."

Alleged Injustice of a Copyright Society's Policy

Some interesting correspondence has recently been published by The Times newspaper from eminent composers relative to the methods of working the provisions of the Copyright Act, 1911, by the Performing Rights Society. The initial letter, which is signed by such eminent men as Sir Joseph Beecham, Sir Frederick Cowen, Dr. Walford Davies, Sir Edward Elgar, W. Landon, E. Ronald, Dr. Ethel Smyth and others, complains of the injustice which the policy of the Performing Rights Society inflicts alike on the public and the composer, and continues—"unless and until the Performing Rights Society produce and make available, at a reasonable inspection charge, to those interested, a full list of the works they claim to control, stating the prices they mean to charge for performing rights, composers of Allied and British nationality will continue to suffer by the inference that expensive legal consequences will result from the performance of their recent works, and those interested will be compelled to avoid their music and confine themselves to undoubted out-of-copyright or enemy works."

In his reply to this letter William Boosey, the president of the society, stated "that the society's composers and authors were perfectly satisfied with the manner in which their business was conducted and with the financial results of the same, and claimed for the society freedom to conduct their own business in their own way."

Whether or not this is a reasonable claim we leave to the good sense of our readers. There can be no doubt, however, that concert managers feel a grievance in this matter, and while "that lasts the position must remain exactly as set forth by the complainants.. We do not know what the Performing Rights Society imagines it has to lose by the publication of the names of the composers, etc., whom they represent, and a little light on this dark subject would doubtless give all concerned the key to a better understanding.

The Photographic Light of the Voice

In one of his lectures at the Royal Institution, Professor J. A. Fleming explained to his juvenile audience that by an invention of his own the vibration of the human voice upon the diaphragm of a telephone receiver, or on a phonograph record, could be visually reproduced, and shown on the lantern screen. By an apparatus connected with the motor of a gramophone he could cause the voice to make rays of light which by being reflected upon a circulating mirror were shown on the screen as a circle of light vibrating in accordance with the "waves" of the voice. Proceeding to the experiment he placed a record on his gramophone and played the national anthem, and the voice circle on the screen aroused considerable interest among the audience. "My invention," said the lecturer,

Industrial Fairs Postponed

It is announced that the new accommodation for the British Industries Fair (Glasgow), 1918, may not be entirely completed by February 25, and as it is of great importance that the British Industries Fair in London and Glasgow should be held simultaneously, the Board of Trade have decided to postpone the opening of both fairs for two weeks. Accordingly, the period for which the British Industries Fairs in London and Glasgow open, will be March 11 to March 22.

Prohibited Exports From Sweden

The news is published by the Swedish Chamber of Commerce for the United Kingdom that plates and cylinders for gramophones, phonographs, and like instruments, also worn out plates and cylinders, have been added to the list of goods which are now prohibited for exportation from Sweden to all countries.

Of Special Interest to Advertisers

A recent official announcement makes known that "The unrestricted dispatch of trade catalogs and price lists from traders to traders is permitted up to January 31, 1919. Other classes of advertising circulars may be distributed up to the same date on the basis of one-third of the total weight of such matter distributed between February 1, 1916, and January 31, 1917. Annual reports of companies or societies issued to their own members, auctioneers' and surveyors' catalogs and price lists, prospectuses and application forms dispatched by insurance companies in response to requests in writing are definitely excluded from the order.

FROM OUR LONDON HEADQUARTERS—(Continued from page 109)

Makes an Excellent Financial Showing

At the recent general meeting of the Gramophone Co., Ltd., E. T. L. Williams, the chairman, stated that the company became a controlled firm under the Munitions Act in September, 1915, and since then it had been impossible until now for the directors to submit any accounts. It was only during the first week of last month that the accounts for the year ended June, 1916, were finally settled. The adjustment of the 1917 accounts was also then possible. The balance was one upon which they might well congratulate themselves. The position was given in a nutshell by that paragraph of the report which dealt with the net assets. These net assets, after deducting debenture stock and all other liabilities, amounted on June 30 last to £1,148,539 3s. 6d., this being more

J. Stead & Co., Ltd.

than double their ordinary share issue capital, and being in excess of the net assets shown in the previous balance sheet by £257,079. This

splendid financial showing met with the hearty approval of the stockholders of this enterprising and patriotic company.

No January List of Records

Owing to the great and continuous rush of orders, and to permit factory record stocks to be brought up-to-date, the Gramophone Co. announced that the usual monthly supplementary list would not be issued in January. Something good may be expected in February, though, and I should advise oversea dealers to keep well in touch with events. Some fine classics have lately been issued, and the grand opera in English records are all the rage. For the latter, especially, sales are progressive beyond all expectations, and there are more of these records to come! This appreciation of opera records in English is a healthy sign.

NEW JERSEY REGIMENTS EQUIPPED WITH ARMY AND NAVY MODEL EDISON PHONOGRAPH

This photograph, taken in front of Phonographs, Ltd., Newark, N. J., shows a few of the Army and Navy Model New Edison Phonographs Recently given to the New Jersey Regiments, the purchases being made with a fund raised by the Newark Call at a Benefit Recital given by Edison Artists at the Broad Street Theatre, Newark

TWO SALESWOMEN GO WEST

PORTLAND, ORE., February 4.—The talking machine trade in the East has contributed several members to local sales staffs recently, among them being Miss Alma Hartman, formerly with Lyon & Healy, Chicago, and now with the rec-

ord department of the G. F. Johnson Music House, and Miss Helen Zedell, of New York, who has taken charge of the record department of the Graves Music Store. Evidently the familiar slogan embodying the advice to the male sex to journey west must now include the fair sex—a tribute to woman's new place in the commercial world.

(4) It is said on good authority that our enemies are now registering United States trademarks in countries mentioned in clause (1) through "dummies." The result is obvious; manufacturers who anticipate exporting trademarked products will find themselves blocked in their effort to do so.

More and effective business would result, says this institution, if American merchants and exporters would state exactly who their representatives are in Argentina. By making this information more public, the local Argentine buyer, when in the market for goods, would then not need to write the head office, and thus much time would be saved.

The decided drop in freight rates from \$1 per cubic foot to 70 cents in the past few months for shipments to South America is very encouraging.

FACTS ABOUT THE KENT ATTACHMENT NO. 1

To Play Lateral Cut Records on the Edison Diamond Disc Phonograph

Patented March 2, 1915

It has been recognized by experts the most perfect device of its kind on the market. It has been on the market ever since the Edison Diamond Disc made its appearance. It can be had with or without reproducer, and is made in two lengths. It is guaranteed by the Manufacturer in every way.

F. C. KENT & CO.
 Manufacturer of Phonograph Accessories
 24 Scott Street Newark, N. J.

SOUTH AMERICAN IMPORT FACTS

Some Important Data Which Exporters to South America Should Remember

Manufacturers and exporters selling trademarked goods in foreign countries, particularly South America, may be interested in these few vitally important facts as set forth by the First National Bank of Boston:

- (1) In Argentina, Bolivia, Chili, Costa Rica, Cuba, Guatemala, Paraguay, Peru and Venezuela, trade-mark titles absolutely depend upon priority of registration. Furthermore, any one may lawfully register a United States trademark (registered or unregistered) and thus prevent entry of the goods into the country.
- (2) In Brazil, Cuba, Guatemala and Panama the trade-mark must be registered in the United States Patent Office before it can be registered in these countries.
- (3) In Ecuador, Mexico and Nicaragua no suit may be brought for infringement of a trademark without registration.

B. H. WOLFMAN APPOINTED MANAGER

Bernard H. Wolfman has been appointed a member of the traveling staff of the local wholesale branch of the Columbia Graphophone Co., 55 Warren street. Mr. Wolfman will cover the territory in the southern part of New York State and, although he is a newcomer in the talking machine industry, his previous experience with several prominent organizations well equips him to work in close co-operation with the Columbia dealers in his territory.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., February 8.—PHONOGRAPH SOUND BOX CONNECTION.—Charles S. Burton, Oak Park, Ill. Patent No. 1,247,220.

The purpose of this invention is to provide an improved connection between the sound box and the tone arm of a phonograph, adapted to permit swiveling of the two connected parts for adjustment of the sound box to two positions, and particularly adapted to permit such adjustment for zigzag and hill-and-valley records, the specific purpose being to insure the adjustment from one position to the other being made completely and not halted with the parts at an intermediate position.

In the drawings: Figure 1 is a side elevation of a portion of the tone arm and sound box embodying this invention, a portion of the sound box being broken away to show other parts which are in section with respect to telescoping and swiveled members. Fig. 2 is a similar view

with the sound box in the other of the two positions to which it is adjustable for adaptation to the different types of records. Fig. 3 is a section at the line 3-3 on Fig. 2. Fig. 4 is a section similar to the sectional part of Fig. 1, showing a modification in certain details.

ATTACHMENT FOR TALKING MACHINES.—Lester Moroney, Manhattan Beach, Ore. Patent No. 1,247,441.

This invention relates to a means adapted to be attached to a talking machine of the Edison type, whereby to cause the raising and lowering of the cover to perform various detail operation now required to be performed manually and which usually are found more or less irksome. The invention provides a means whereby the horn is automatically swung to bring the sound box over the record, and then lowered, the operations being performed in proper sequence by the lowering of the cover, and the reverse operations taking place by the raising of the cover. The attachment includes means to automatically stop and release the turntable with the swinging of the horn, and a means automatically adjustable to the size of the record to govern the movement of the horn-actuating means.

Figure 1 is a perspective view of the attachment and indicating the cabinet of the talking machine in dotted lines, the view showing the position of the parts when the cover is in the raised position. Fig. 2 is a fragmentary plan view. Figure 3 is a view similar to Fig. 1 with

the cabinet cover lowered, certain trip elements being indicated in the positions they assume just as the cover reaches its lowermost position before the final movement of the said trip devices; Figs. 4 and 7 are views similar to Fig. 2 but showing the parts in different positions; Fig. 5 is a fragmentary plan view with parts broken away and in section, the view being

given to show the relation of the brake device to the depending brake flange of the turntable. Fig. 6 is a perspective view similar to Figs. 1 and 3 with the parts in the position after the sound box has moved to the center of the record and which results in the automatic stop being brought against the turntable.

LUBRICATING AND POLISHING PAD FOR TALKING MACHINE RECORDS.—Patrick B. Delany, South Orange, N. J. Patent No. 1,247,232.

This invention comprises a pad of peculiar construction and make-up for treatment of talking machine records for the purpose of incidentally removing dust but primarily to polish or smooth and lubricate the surface of the record and lubricate the needle which traverses it.

Figure 1 is an elementary form of this device that experience has demonstrated to be highly efficient; and Fig. 2, shows a modification. The device comprises a pad of appropriate soft materials adapted to be superficially coated or

impregnated with graphite. The pad shown in the drawing may be a piece of felt, plush, corduroy, fustian or other fabric, all of good quality.

SOUND BOX.—Herman L. Berger and Francis C. Knochel, New York. Patent No. 1,248,062.

This invention relates to sound boxes for talking machines, and has for an object the provision of an improved construction whereby the vibration of the sound box will not be transmitted to the stylus.

Another object in view is to provide a separate support for a stylus formed independent of the parts forming the sound box proper, in order that none of the vibration or movement of the stylus caused by the grooves in a record shall be transmitted to the diaphragm.

In the accompanying drawing: Figure 1 is a rear view of a sound box disclosing an em-

bodiment of the invention. Fig. 2 is an edge view of the sound box shown in Fig. 1.

RECORD CLEANER FOR SOUND REPRODUCING MACHINES.—Jos. Newcomb Blackman, New York. Patent No. 1,248,064.

This invention relates to record cleaners for sound reproducing machines of the type described and claimed generically in United States patent to Henry A. Place, dated September 25, 1906, No. 831,987, and shown in United States patent to C. E. Tackman, dated November 28, 1916, No. 1,206,168, in each of which a brush-holding arm is fixed to an attaching clamp having opposite spring fingers to clasp the sound box, sound tube, or other part of the reproducer, which moves over the record, so that the cleaner can be attached to or detached from the movable member, and will brush and clean the record in front of the following stylus.

In the specific examples of said invention illustrated in said patent to Place, the brush-holding arm is made integral with and fixed directly to the reproducer clasp.

In the present improvement, the inventor makes the adjustable reproducer clasp of elastic or resilient metal or material to embrace yieldingly the sound tube and bend and extend the elastic material thereof almost horizontally toward the stylus so as to form a light vertically surring arm, to the free end of which the brush clamp is attached. By this construction the brush can be adjusted on the sound tube both radially and vertically with respect to the record, and when properly adjusted will bear yieldingly and lightly on the record in front of the stylus, so as to accommodate itself to all variations in the record or reproducer mechanism, while bearing at all times with uniform light pressure on the record.

Figure 1 represents a record cleaner embodying the present invention applied to an ordi-

nary phonograph of the Victor type. Figs. 2 and 3 are enlarged detail views of the said cleaner embodying the present invention, applied to a phonograph of the Columbia type. Figs. 5 and 6 are enlarged detail views of the latter cleaner.

RECORD CLEANER FOR SOUND REPRODUCING MACHINES.—Jos. Newcomb Blackman, New York. Patent No. 1,248,063.

This invention relates to record cleaners for sound reproducing machines of the type described and claimed generically in United States patent to Henry A. Place, dated September 25, 1906, No. 831,987, and in which a brush-holding arm is fixed to an attaching clamp having opposite spring fingers to clasp the sound box, sound tube or member which moves over the record, so that the cleaner can be quickly attached to or detached from the movable member, and can be adjusted thereon so as to bear at the proper point and with the proper amount of pressure on the record directly in front of the following stylus.

In Letters Patent No. 865,674, issued September 10, 1907, is described a specific improvement on said generic invention, in which the spring fingered reproducer clasp is formed integrally with the brush holding clamp and arm. The specific examples of the invention shown in the said Place patent are also made in this way.

The disadvantage of this specific construction is that whereas the material of the brush-holding clamp should be soft and pliable properly to bind the brush bristles when set thereon, and the reproducer clasp should be of elastic material so as properly to grip the reproducer, the integral construction of the brush clamp and reproducer clasp does not permit such a divergent construction.

The present specific improvement on the said Place invention, therefore, consists of a pli-

able brush clamp permanently attached to an elastic reproducer clasp.

Figure 1 represents a record cleaner embodying the present invention, attached to the sound box of an ordinary Victor talking machine. Figs. 2, 3, 4 and 5 are enlarged detail views showing the novel construction of the said record cleaner.

SOUND REPRODUCING APPARATUS.—Samuel D. (Continued on page 112)

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 111)

Mott, Passaic, N. J., assignor of one-half to Arthur B. Sullivan, Allendale, N. J. Patent No. 1,247,861.

This invention relates to sound reproducing apparatus known as a "disc machine."

Among the objects of the invention is to attain a sound reproducing machine using a disc record in which the stylus will maintain the same relation to each record groove in which it is traveling without the provision of special compensation devices and attachments for varying the position of the stylus needle as it travels in the record groove. The most advantageous relation for the reproduction of sound is to position the stylus or needle so that it will be tangent to the record groove in which the stylus is engaged. By maintaining this position for all grooves of the record, increased life is given to the record and a more perfect reproduction of the sound is attained, as when the position of the stylus varies from tangency, the needle breaks or chips the walls of the grooves and destroys the record as well as failing in accurately reproducing all the sounds registered in the groove. It has been heretofore proposed, especially in machines in which the record disc rotates on a fixed support and the sound box travels across it, to vary the relation of the sound box to the record as it moves across it by mechanical compensating devices of various designs, but such expedients have failed to come into commercial practice owing to the undesirability of increasing and complicating the mechanism of sound reproducing machines with the attendant unreliability. By this invention the sound box is maintained in a stationary position and causes the rotating record disc to travel with relation to it in such manner that tangency of the stylus with the groove in which it is traveling is maintained.

By this invention it is also possible to successfully employ records of almost any diameter without providing the special compensating devices above referred to and which permits the reproduction of compositions heretofore not practical.

Other objects will be apparent from the subjoined description, among which might be mentioned the reduction of the number of movable joints or connections in the reproducing arm to which the sound box carrying the stylus is attached whereby the liability to loose connections owing to continued use and the consequent imperfect operation of the arm is practically overcome.

In the accompanying drawings Fig. 1 illustrates in plan view the mechanism, in accordance with this invention, for rotating the record and for causing it to travel bodily, the balance

tion is to provide a device which can be quickly and easily attached to a talking machine and which will efficiently operate to effect the movement of the reproducing elements of the talking machine to repeat the record.

Another object is to so construct the invention that it will not injure any of the several parts of the talking machine or record.

Another object is to so design the invention that it will be durable and of comparatively simple construction.

Figure 1 is a top plan view of the improved repeating device. Fig. 2 is a section on the line 2—2 of Fig. 1. Fig. 3 is a section on the line 3—3 of Fig. 1. Fig. 4 is a section on the line 4—4 of Fig. 1. Fig. 5 is a section on the line 5—5 of Fig. 1. Fig. 6 is a section on the line 6—6 of Fig. 1. Fig. 7 is a fragmentary sectional elevation showing certain of the elements of the invention. Fig. 8 is a section on the line 8—8 of Fig. 7. Fig. 9 is a fragmentary plan view showing a modification of certain of the parts

illustrated in Fig. 1. Fig. 10 is a section on the line 10—10 of Fig. 9. Fig. 11 is a section on the line 11—11 of Fig. 9, and Fig. 12 is a view of a cross arm employed in combination with the ordinary form of phonograph needle and instead of the specially constructed needle shown in Figs. 7 and 8.

PHONOGRAPH.—Magnus W. Turnquist, Chicago, Ill. Patent No. 1,249,251.

This invention relates to phonographs, and its principal object is to provide improved means for returning the tone arm and therewith the reproducer and needle to their starting place, whereby the musical selection or other sound produced may be repeated automatically without any further attention on the part of the attendant. Another object is to provide a simple, comparatively cheap, efficient and practical mechanism for accomplishing this result. Another object is to provide a repeating mechanism for phonographs, actuated by the turntable or disc which supports the record. Another object is to produce a repeating mechanism for phonographs, having adjustment means to accommodate various sizes of record discs.

Figure 1 is a plan of a fragment of a phonograph, showing a simple embodiment of the present invention applied thereto; Fig. 2 is a view partly in side elevation and partly in ver-

tical section of the parts seen in Fig. 1, the line of section being indicated at 2—2 in Fig. 1; Fig. 3 is a view partly in plan and partly in horizontal section, the line of section being taken at 3—3 in Fig. 2; Fig. 4 is a detail plan of a fragment of a certain oscillatory and reciprocatory frame; Fig. 5 is a detail vertical section taken on the line 5—5 of Fig. 3; Fig. 6 is a detail, vertical section taken on the line 6—6 of Fig. 3; and Fig. 7 is a detail end view of certain anti-friction bearing rollers.

PHONOGRAPH AND THE LIKE.—Henry B. Tremaine, Westfield, and E. S. Votey, Summit, N. J., assignors to the Aeolian Co., New York. Patent No. 1,248,757.

This invention relates to improvements in phonographs and the like and more particularly to means which readily permits the instrument to be used with any one of a plurality of sound boxes. This permits the ready interchange between sound boxes of both the hill and dale and lateral cut record types and between different sizes and qualities of sound boxes of the same type, also the same ready interchange between tone arms appropriate to the several sound boxes.

In the drawings, Figure 1 is a fragmentary vertical section of a phonograph showing the improvements in side elevation, the section being

taken on the line 1—1 in Fig. 2 looking in the direction of the arrows; Fig. 2 is a plan view of the same; Fig. 3 is an enlarged detail of Fig. 2; Fig. 4 is a vertical section partly in elevation on line 4—4 in Fig. 3 looking in direction of the arrows; Fig. 5 is a vertical section partly in elevation on line 5—5 in Fig. 3 looking in direction of the arrows; and Fig. 6 is a detail view of the lower portion of Fig. 5 seen from the left.

PHONOGRAPH.—Leslie McArthur, Kenilworth, Ill., assignor to the Stewart Phonograph Corp., Chicago, Ill. Patent No. 1,249,791.

The purpose of this invention is to provide an improved construction in several details of a phonograph, or talking machine, so-called.

In the drawings: Figure 1 is a side elevation of a phonograph embodying the features of this invention. Fig. 2 is a plan view of a tone arm and sound box. Fig. 3 is a section at the

line, 3—3, on Fig. 2. Fig. 4 is a detail section at the line, 4—4, on Fig. 3. Fig. 5 is a detail section at the line, 5—5, on Fig. 3. Fig. 6 is a section at the line, 6—6, on Fig. 3.

Mrs. Frank J. Herms, of Quaker Ridge, New Rochelle, N. Y., last week donated a Victrola and a goodly number of records for the soldier boys in response to an advertisement of Mrs. Wm. E. Ogden, who is making a very strenuous campaign to supply the soldiers with music as a means of entertainment.

of the apparatus being removed. Fig. 2 is a side elevation and partial cross-section through a sound reproducing apparatus constructed in accordance with this invention, the cabinet containing the amplifying horn being broken away. Fig. 3 is a similar view illustrating a slight modification in the disposition of the disc driving mechanism. Fig. 4 is a similar view to Fig. 3 showing the parts as shifted to position to return the turntable to its original position. Fig. 5 is a plan view of the apparatus.

REPEATING DEVICE FOR TALKING MACHINES.—George F. Voith, Philadelphia, Pa. Patent No. 1,248,041.

This invention consists of a repeating device for talking machines. One object of the inven-

PLAN TO RELIEVE FREIGHT JAM

**Merchants' Association of New York Devises
Pick-up System Which Should Help Restore
Transportation Facilities to Normal**

In order to relieve the congestion at the freight terminals in New York City, both in the handling of incoming and outgoing freight, the Merchants' Association of New York has evolved a "store door delivery" and "pick-up" system to free the railroads from the accumulation of freight and likewise to serve the interests of the consignees.

As conditions now stand, a truck may stay in line all day in order to reach an unloading pier, and carry away a single case of goods. Under the proposed plan, as fast as the freight is received it will be placed in charge of a trucking company controlled by a carrier, according to the zone in which the consignee is located, and immediately delivered to him. By this system one truck could handle as much incoming freight in a day as a dozen trucks do under present conditions. The association urges that the carriers be permitted to form trucking companies or that present trucking companies be permitted to consolidate under Government supervision for the purpose of following out the system.

For outgoing freight the "pick-up" method would be followed, the trucks on their way back to the piers stopping at various points and gathering up freight intended for shipment.

BEAUTIFUL NEW HOME OF THE PHONOGRAPHS, LTD.

Reference has been made in The World before to the beautiful new home of Phonographs, Ltd., at 871 Madison street, San Francisco, Cal. A further idea of their comprehensiveness may be had from the picture herewith. The four views show the general office,

"Many of us know Mr. Ireton as the former general sales manager of Thomas A. Edison, Inc. We are more than glad to make his acquaintance as a jobber. We hope to see him in New York at the Jobbers' Convention in February. And you, Mr. Dealer in the San

Views of Phonographs, Ltd., New Home in San Francisco with A. C. Ireton glancing over his desk; the store front; the ground floor with disc instrument stock, and the record stock department and shipping department. In using these views in Edison Diamond Points, the editor says: Francisco zone, will find it well worth your while to pay A. C. Ireton a visit. We know him. We know what he did for our Edison education. We know what he can do for yours." A pretty nice tribute.

CLEAR AS A BELL

the talking machine taught Galli-Curci!!

from an interview with Amelita Galli-Curci in New York Times

"I HAD no training such as most opera singers have. I learned all I know about the voice while studying the role I was to sing. . . . When I tried to sing in New York several years ago there were in my voice faults that worked against me, and now I know that these imperfections sent me away from the wonderful city. To get rid of them I turned to the talking machine. I knew that I could correct them if I could hear them myself. I used many, many records, each time listening for the faults and the next time trying to correct them. I may say that my most painstaking teacher was the talking machine."

FOR the instruction of singers, for the learning of foreign languages, for the entertainment of family and friends, for delightful dance music, for cheering up the boys in camp and those left behind, nothing can equal the phonograph.

1918 sales will break the 1917 big records.

The preference of the public is for the highest class instrument. The Sonora with its superb tone which won highest score for quality at the Panama Pacific Exposition, its many superior and exclusive design and constructional features, and its unequalled prestige, is the phonograph for *you* to handle.

Sonoras sell with astonishing ease, they delight the purchasers and make splendid money for the dealer.

Write *today* regarding *your* agency!

VOCALION PROGRESS IN ST. LOUIS

Distributing Center for That Line Established by the Aeolian Co. on March 1

St. Louis, Mo., March 5.—Aeolian Hall, here, became a wholesale station for the Aeolian-Vocalion March 1. Arrangements for the establishment of the jobbing agency here were completed during a visit of General Wholesale Manager Alfring, of New York, last month. Assistant Manager Stevenson, of the Famous & Barr Co., Victrola department, has gone on the road to establish retail dealers. The territory is southern Illinois, Missouri, eastern Kentucky and eastern Tennessee.

"This was, of course, very good news to us," said Manager Guttenberger, of the Aeolian Hall Vocalion department, "for it means that an increased supply of machines is assured. No such step would be taken without assurance of machines to meet the greatly increased demand.

"We believe that this territory is ripe for this move. For a long time we have been having numbers of out-of-town customers come in and inquire for our instrument. Some of these had heard of it from owners, others had been impressed by our advertising and others had learned of it through the gradual spread of the fame of the machine. While we have been working in the local field, we have created a demand throughout a good-sized trade district, and we have on file a number of requests from

merchants who are anxious to undertake the distribution."

Shipping conditions have been the bane of Manager Guttenberger's existence recently. At Christmas time he sold a number of machines for which he had bills showing that the shipment had been started several days before. These machines reached him late in February and two others that he needs to settle all debts were still missing the first of the month.

ENTIRE PLAY NOW ON RECORDS

Entire Production on "Why Marry?" Recorded in Order to Facilitate the Presentation of the Play in Other Countries—An Important Move

The members of the "Why Marry?" company, playing at the Astor Theatre recently, completed the recording of the entire play on talking machine records. One set of the records is to be preserved in the offices of Selwyn & Co., managers of the piece, and the other sets are to be used later when the play is produced in England, Australia, South Africa and other countries. It is believed that the records will greatly facilitate the training of the various foreign companies, and will save considerable expense in sending over special directors, particularly in view of the upset condition of overseas transportation. It is believed to be the first time that a complete play has thus been recorded, although various actors have recorded their particular parts before.

MME. GALLI-CURCI'S TRIBUTE

Noted Soprano, in Interview, Declares That Talking Machine Enabled Her to Learn of and Remedy the Faults in Her Singing

Mme. Galli-Curci, of the Chicago Opera Co., and who made a sensational debut in New York recently, is one of the noted artists who pays high tribute to the talking machine as a medium for voice training. Mme. Galli-Curci, as is well known, is under contract to make records exclusively for the Victor Co., and her records have been in tremendous demand.

In an interview in the New York Times following her appearance in opera, Mme. Galli-Curci declared that the talking machine had enabled her to correct various faults in her singing, and was, therefore, largely responsible for her success. She said in part:

"I had no training such as most opera singers have. I learned all I know about the voice while studying the roles I was to sing. The master, Mascagni, helped me very much, but I did not go through the long hours of vocal labor that are the bane of most artistes. Always to me singing was a joy. It was never work. Perhaps that is why I was able to win New York.

"My friends have always helped me. Of them, Mr. Thorner, of the Chicago Opera Association, has always been so kind. He heard me in Catania, Italy, five years ago and told me I had a voice. When I tried to sing in New York several years ago there were in my voice faults that worked against me, and now I know that these imperfections sent me away from the wonderful city. To get rid of them I turned to the talking machine. I knew that I could correct them if I could hear them myself. I used many, many records, each time listening for the faults and the next time trying to correct them. I may say that my most painstaking teacher was the talking machine. I hope to go on improving, and shall work to do so, but I do not think I shall ever have the perfect voice. For eight years I have sung in public, and they have been eight years of the most joyful work ever done. Perhaps when I have sung eight years more I shall have been able to improve! Who knows? But no matter how long and where I sing, never do I expect to have the thrill of that first New York night in 'Dinorah,' when I knew that the New York which had once refused to hear me had taken me to its heart."

STUDYING FRENCH WITH THE TALKER

Uncle Sam's Forces at Spartanburg, S. C., Making Good Progress in This Direction

It is interesting to note that in the recent news from the camps at Spartanburg, S. C., special attention is paid to the fact that the members of several regiments are studying French with the aid of talking machine records. Notices to this effect have been published in the local newspapers, and have attracted considerable attention. The use of records for the study of French is another significant indication of the importance of the talking machine in war times, and the fact that it can be considered as a first-line essential in the true meaning of the term.

IMPORTANT PURCHASE IN DALLAS

DALLAS, TEX., March 2.—The Phonograph Shop, at 1300 Elm street, this city, recently purchased from the Western Automatic Music Co. that concern's entire stock of phonographs and records. The deal places the Phonograph Shop in the position of controlling exclusive selling rights for Edison phonographs in this city and vicinity.

This war should teach us to do without many things—except real loyalty.

A "TALKING" MECHANISM DEVELOPED OVER 160 YEARS AGO

According to John Wesley Mr. Miller, of Lurgan, Ireland, Anticipated Dr. Erasmus Darwin in Producing a Device Which Formulated Articulate Sounds—Some Interesting Data Presented

In a recent issue of The Talking Machine World reference was made to a letter written by Dr. Erasmus Darwin, grandfather of Chas. Darwin, to Benjamin Franklin in 1772, in which he said: "I have heard of somebody who attempted to make a speaking machine. Pray is there any truth in such reports?" Dr. Darwin was interested, it seems, because he himself had given considerable attention to the formation of articulate sounds and was working on a mechanism which, with the aid of pneumatics, would pronounce some short words somewhat like the human voice.

Meanwhile a correspondent informs us that Dr. Darwin should have directed his inquiries to Ireland, not America, for it appears that something in the form of a talking machine was known in Ireland in 1758 (many years before Darwin was interested), according to no less authority than John Wesley, who, like our Washington, "couldn't tell a lie." Writing in his journal under date of Monday, April 26, 1762, he said: "In the evening I preached to a large congregation in the market house at Lurgan, Ireland. I now embraced the opportunity, which I had long desired, of talking with Mr. Miller, the contriver of that statue, which was in Lurgan when I was there before (May 16, 1758). It was the figure of an old man, standing in a case, with a curtain drawn before him, over against a clock which stood on the other side of the room. Every time the clock struck he opened the door with one hand, drew back the curtain with the other, turned his head, as if looking round on the company and then said, with a clear, loud, articulate voice, 'Past one, two, three,' and so on. But so many came to see this (the like of which all allowed was not to be seen in Europe), that Mr. Miller was in danger of being ruined, not having time to attend to his own business. So, as none offered to purchase it, or to reward him for his pains, he took the whole machine to pieces."

Under date of Monday, June 14, 1773, a further entry occurs: "After preaching at Lurgan, I inquired of Mr. Miller whether he had any

thoughts of perfecting his speaking statue, which had so long lain by. He said he had altered his design; that he intended, if he had life and health, to make two, which would not only speak but sing hymns alternately with an articulate voice; that he had made a trial and it answered well. But he could not tell when he should finish it, as he had much business of other kinds to attend to, and could only give his leisure hours to this. How amazing it is that no man of fortune enables him to give all his time to the work."

The above data is certainly interesting and emphasizes afresh that there is "nothing new under the sun." Of Mr. Miller little is known, but Dr. Darwin, who was a sort of prophet in his own way, having crudely anticipated the possibilities of many of our more modern developments, had undoubtedly given considerable attention to the creation of some form of predecessor of the phonograph. In a note on his poem, "The Temple of Nature," which was published in 1803, the year after his death, the following appears:

"I have treated with greater confidence on the formation of articulate sounds, as I many years ago gave considerable attention to this subject for the purpose of improving shorthand; at that time I contrived a wooden mouth with lips of soft leather, and with a valve over the back part of it for nostrils, both of which could be quickly opened or closed by the pressure of the fingers, the vocality was given by a silk ribbon about an inch long and a quarter of an inch wide stretched between two bits of smooth wood a little hollowed; so that when a gentle current of air from bellows was blown on the edge of the ribbon it gave an agreeable tone, as it vibrated between the wooden sides, much like a human voice. This head pronounced p, b, m and the vowel a with so great nicety as to deceive all who heard it unseen, when it pronounced mamma, papa, map and pam; and had a most plaintive tone when the lips were gradually closed."

We present these interesting facts for further consideration and enlightenment.

How Recognition of the Pride of Race Will Increase Record Sales

By Frank E. Parsons

Pride of race is something that will not be downed even in these abnormal times, and the existence of that fact should provide many opportunities for the talking machine dealer to realize at least more than ordinary results from his record-selling campaign.

We all realize that it is the Italian to whom Italian records most appeal, or the Swede who takes most interest in Swedish records, and so on, but there are many records in the catalog proper, records of the popular, or standard, type sung in English, that will make a special appeal to certain classes—something connected with them, either the title of the piece, or the name and nationality of the singer.

This fact has been emphasized particularly by a live talking machine dealer in an Eastern city, who has practically doubled his sales of McCormack records. There is a large natural demand for McCormack records from musical people of all classes, but this particular dealer realized that the voice of McCormack sounded particularly sweet to the Irishman. He, therefore, sees to it that announcements regarding the new McCormack records as they appear find a place in the Irish and Catholic weekly papers and in the bulletins issued by the Catholic churches in his section. The success of the plan is demonstrated by the fact that the sales of McCormack records, even though good before, have practically doubled with this dealer as a result of this special publicity. The same plan was followed in connection with the publications of the various Knights of Columbus Councils, and with the same gratifying results.

Take the case of Caruso records, for instance. Practically everybody who buys records buys one or more of the recordings of this famous tenor, but even the lowliest Italian, unacquainted with English to any extent, can nevertheless be appealed to in his native tongue through special publications reaching him by the fact that the great tenor himself is an Italian.

There is a certain Polish singer who has recorded the songs of his native land for one of the prominent companies, and who has stimulated his royalty receipts tremendously by bringing his records personally to the attention of his compatriots. Not only that, but he has increased the sale of several of his records in English by that same direct means.

There are in the leading catalogs, and not all

in the foreign sections by any means, records that lend themselves particularly to exploitation in certain fields. There are, for instance, records that are designed particularly for use in the ceremonies of various fraternal orders—records that find a place in the ritualistic workings of the Masons, Elks, Odd Fellows, etc. Just simply to have these records on the shelf and to call attention to them in a desultory way, is not enough. All of these orders have special

publications issued at regular intervals and devoted to their interests. These publications offer the logical mediums through which the talking machine dealers can call attention to special records of the fraternal-order type.

By advertising in mediums that go direct to the people most interested, there is a saving of wasted circulation, and consequently of considerable money. It is the same principle that influences manufacturers to advertise in trade journals. They might advertise to the dealer in national publications with circulations running into the millions, but of all that circulation only 1 per cent. would be interested in the proposition, and the 99 per cent. remaining would be wasted, even though paid for. In the trade journal the manufacturer appeals directly to those whom he desires to reach, and thus gets the benefit, at a restricted cost, of 100 per cent. circulation.

The talking machine dealer who studies racial sympathies, and in his publicity makes a special drive along that line, studying his records, what they offer, who the singer is, and whom he is most likely to appeal to, is going to get results that count.

There are almost as many people who will buy records because they are sung by artists of their own nationality, and through pride of that fact, as well, buy the records solely for their musical value. It is the ability to appeal directly to those people on a logical basis that will save exploitation expense and effort, and produce maximum sales.

There are a great many dealers to-day who have on their shelves, and classed as slow-selling records, selections that, if presented to a special class of buyers and in a special way, would move with a very satisfactory rapidity. The question is worth thinking about and studying.

MOZART PHONOGRAPH CO. RESUMING Overcoming Effects of Recent Fire and Will Be Working at Capacity Soon

St. Louis, Mo., March 4.—The Mozart Phonograph Co. will be working to full capacity again this month, according to a recent statement by President Fitzgerald. One of the buildings of the former Colonial Cabinet Co., which were acquired for Mozart production, is now working full time following the fire in January, and the second and more seriously damaged building will be entirely repaired and restocked soon. "We are taking care of the orders now coming in," said Mr. Fitzgerald, "but business threatens to get too good."

CAN RECORD READINGS FROM NOVELS

Apparently the American law does not prevent talking machine companies from making records of readings taken from novels. It does protect plays against such reproduction.

The question arose recently when records were made of chapters from "Pollyanna," the reciter merely cutting out descriptive paragraphs. The secretary of the American Publishers' Copyright League, after examining the law, gave it as his opinion that there had been no infringement of copyright.

SUFFERS HEAVY FIRE LOSS

The building occupied by the Emil Granberg Mfg. Co., manufacturers of talking machines and furniture, was the scene of a fire recently causing damage to building and stock of about \$8,000.

AN IMPORTANT ACCESSORY—ALBUMS FOR FILING DISC RECORDS

The enormous demand for "National" Record Albums keeps apace with the ever increasing demand for machines and records, and our output capacity has been enlarged to meet the greater needed supply. Record Albums have proven themselves to be the best and most convenient, as well as economic, method of filing and keeping disc records.

MAKING THEIR SELECTION

Illustrating the daily actual usage of the Album, the most convenient and satisfactory record filing system extant.

THE ALBUM

soon pays for itself in time-saving and preserving records. The initial cost is really an investment which comes back fourfold.

THE PERFECT PLAN

The pockets holding the records are substantially made from strong fibre stock, firmly joined together and bound in attractive covers.

A PLACE FOR EVERY RECORD AND EVERY RECORD IN ITS PLACE

Albums are an **Indispensable Requisite** in the talking machine business and wherever records are sold. An accessory that is necessary and worth while. Practical and handy. Save time and records. A **profitable adjunct** to the business. All owners of machines and records want Albums to file and preserve their records.

We manufacture disc Record Albums containing 12 pockets to fit cabinets of all sizes and styles. We also make Albums containing 17 pockets. With the indexes they are a complete system for filing all disc records.

For durability, finish and artistic design, our Albums are unsurpassed. We have unexcelled manufacturing facilities, and considering quality our prices are the lowest. Write us, giving quantity you may desire, and we will quote prices.

OUR ALBUMS ARE MADE TO CONTAIN VICTOR, COLUMBIA, EDISON, PATHÉ AND ALL OTHER DISC RECORDS

NATIONAL PUBLISHING CO. : 239 S. American Street : PHILADELPHIA, PA.

PROSPEROUS TIMES IN ATLANTA

Leading Establishments Make Cheery Reports Regarding February Trade and Are Optimistic About Outlook for March—News of Month

ATLANTA, GA., March 8.—The talking machine business in this city was very active during February, and the outlook for March would indicate that we are entering on a very prosperous era in this section.

The Diamond Disc Shop, Edison retailers, report that their February business was larger than that of December, 1917, which is unusual, as December is everywhere recognized as the banner month in the talking machine business. The Edison dealers, however, have been advertising consistently and the results are now becoming apparent in their increased business. The Edison from \$165 up, including the \$215 and \$265 models, has certainly taken the market in a larger proportion than ever.

The Delpheon Shop, dealers in the Delpheon phonograph, are meeting with fine success in Atlanta, and they have qualified recently as Columbia dealers, having had such insistent demand for Columbia product, as to necessitate their taking on this old and popular line.

The Atlanta Talking Machine Co., Columbia and Vocalion dealers, report a \$200 cash sale of records, this being one of the nicest sales of the kind that your correspondent has heard of in this city, for some time.

The Aeolian-Vocalion records which have now been on the market for some weeks are marvels

in respect to their smooth finish and beautiful appearance.

The Cable Piano Co., large Victor dealers, are enjoying a very satisfactory business. In many cases sales are only limited by the ability of the dealer to get the stock.

Mischa Elman, Victor artist, was recently in the city, and entertained a very large audience at the local auditorium.

Phillips & Crew, the oldest Victor dealers in Georgia, report a large and growing business. Some time since H. Phillips completely reorganized this business and injected new life into it.

The Haverty Furniture Co., Columbia and Pathé dealers, state that their February business

TALKING MACHINES FOR THE NAVY

Navy League Desires to Secure Machines and Records for Uncle Sam's Boys Who Go to Sea—They Help to Entertain and Instruct

The Navy League of the United States is making a special appeal for talking machines of all kinds and records for the men who are going to sea, and in this connection Mrs. W. H. Hamilton, publicity chairman, has sent out the following letter:

"The men are subject to times of great dependency, and one of the surest ways to fight these spells of ennui is to place a musical reproducing machine of some kind on board all ships.

"Several weeks ago a ship loaded with ammunition for France was held up five weeks in

this year is about 25 per cent. larger than in 1917. Their initial payments are larger and their monthly terms better. The cash record business with them is at least three times larger than during 1917.

The Columbia Graphophone Co., wholesale distributing headquarters for several Southern States adjacent to Atlanta, report that their business is far ahead of anything they have ever known, and is growing by leaps and bounds. An interesting feature has recently developed with them, in that they have employed a number of young women in their wholesale record department.

All talking machine dealers in Atlanta anticipate a very large March business.

our harbor for lack of coal. No one could leave the ship but the captain, according to regulations. So there in sight of land an entire crew stayed cold and idle. 'We would have gone mad if it had not been for the Victrola you gave us,' one of the men said.

"A submarine chaser about to start has just become the proud possessor of a Victrola given it by the Navy Club, and among the records is a set of French ones made by the Victor Talking Machine Co., so the men can study French on the way over.

"Another ship carrying many men goes over in the near future. 'We have no Victrola on board. Do you think you could get us one?' said one of the men. It means cheer and hominess, and gives a comfort where otherwise the boys might grow homesick and discouraged for lack of entertainment.

"You use your Victrolas but seldom; they will use them constantly. There are three ships waiting for a response to this notice; and the response has always been so wonderful I feel that many may be willing to make the sacrifice to brighten up the days in crossing which are so monotonous—those first days, the hardest for the troops and the crews of the ships. Donations are received at the headquarters of the Navy Club, 509 Fifth avenue."

NEW YORK, MARCH 15, 1918

ANOTHER month has gone by and still the talking machine trade, every branch of it, continues to be faced with many problems involving both manufacturing and distributing. The bright spot in the situation during the past month has been the withdrawal of the fuelless Monday order, thereby giving back to the industry several days in which to endeavor to meet demands. It is steadily becoming more apparent that the question facing the trade is one of adjustment, and quick adjustment, to conditions that promise to continue for an indefinite period and which will most likely become worse before they get better. In other words, the companies, or individuals, in the trade, who sit still and decry the situation in general and wait for times to change for the better, are simply stirring up trouble for themselves.

Conditions are real. They must be faced, and every endeavor should be made to so regulate existing business demands and practices that a minimum of inconvenience may be occasioned. If stocks of machines and records are scarce, and there is every indication that they will be scarce for a long time, the problem resolves itself into doing the largest amount of business, and the best class of business, with the stocks now on hand, or that can be obtained. If the popular hits of the day cannot be secured from the factories, feature the records lying on the shelves, those selling at higher prices. If the leading styles of machines are unobtainable, develop some salesmanship and sell the styles that are in stock or can be secured from the factories, those machines that will bring in more money to the house.

Shorten terms of credit and get after the cash business, for there is plenty of it for the seeking. In fact, now is the time, as old Omar Khayyam would say, to "take the cash, and let the credit go."

One genuine consolation is, if we may accept assurances from Washington, that the talking machine trade, or for that matter the music industry generally, will suffer no more than hundreds of other industries in any action taken to conserve fuel and metal supplies, clear up the transportation tangle, or curtail production. Forceful arguments presented at Washington have convinced the administration that there is really no such thing as a "non-essential" industry, the hysterical economy talk of prominent bankers and others to the contrary notwithstanding. It has been found that one industry depends so much upon the other, and plays such a prominent part in

the business and social fabric of the country that to cripple a single line of trade would threaten wide disaster.

War conditions are not pleasant. We are getting abundant proof of that fact, but with the assurance of a square deal from the Government, the trade is in a position to grin and bear it, to make the most of the opportunities that are offered, and to bring about an adjustment that will reduce possible loss to a minimum.

ON and after May 1, 1918, the subscription price of The Talking Machine World will be \$2 per year. For a period of twelve years, since 1906, to be exact, the subscription price has been \$1 per year, and has been maintained in the face of increasing production costs, meaning a steadily growing loss on every subscription. Pre-eminent in its field, and the representative organ of the talking machine trade at large, it is but natural that the circulation of The World should increase by thousands each year. The size of the paper, too, has increased tremendously, reflecting as it does the great development of the industry as a whole, and the confidence of our advertisers based on profitable returns. The steady rise in the cost of paper, of printing and of all the elements that go to make a newspaper has placed a burden on the publishers of The World that can no longer be borne and still observe good business practice.

For several years past members of the trade, as well as other publishers, have marveled that we could produce and offer a publication of the size and scope of The World at such a small subscription price. Up to now, however, we have given to our readers the full fruits of The World's development at the subscription charge fixed over a decade ago. At the new price of \$2 we promise to our subscribers, who have so loyally supported us, still further development and greater value. An announcement in another section of The World tells how the present subscription rate can be enjoyed for some years to come. It is worth reading and acting upon.

THE value of the talking machine as an entertaining factor and gloom dispeller in the great army and naval camps in this country, and in the American military headquarters and trenches in France, is emphasized by the numerous letters sent by the soldiers to their folks at home and by the correspondents to the magazines and to the daily papers. Week after week pictures appear showing how the talking machine is utilized in the great social centers which are fathered by the Y. M. C. A. and the Knights of Columbus, and high tributes are paid to its power to bring joy and pleasure into the lives of these men who are serving Uncle Sam, and who are preparing to battle for the rights of man against the rights of might in the great field of war in Europe.

While the piano and the player have aroused enthusiasm among the soldiers, yet the talking machine, through its ability to bring into the camp the voice and personalities of the great operatic and concert artists, as well as the music of the symphony orchestras and the great bands of the nation, give a variety of music that has made the strongest kind of appeal to the soldiers, because of its educational influence. Moreover, in connection with popular army songs, the "talker" has proven a veritable song leader, for "the boys" have taken up these songs and joined forces with the talking machine in making them still more popular.

Music in war times is truly a necessity, and not only in the camps, but in the homes, the talking machine and its music appeals to the emotions and stimulates the imagination. In these days of stress and strife the people who can weld music into their daily affairs are blessed, for what can compare with the talking machine in this respect? Through its medium even the very poorest home can afford to have the best of music as well as the palaces of the rich.

THE average business man cannot but view the provisions of the income tax and excess profits tax sections of the War Revenue Act, which he will be called upon to meet very shortly, with more or less misgivings. No matter how anxious a business man is to bear his fair share of the country's war expense, he is bound to be troubled by the complexities of the law in determining just what he should pay and how he should pay it.

Out of the darkness, however, comes one bright light, and

that is the fact that in obeying the law and making his tax returns even the most indifferent merchant will be compelled to take an accurate inventory of his business for the inspection of the Government. He will have to give the matter thought, and is more than likely to come across facts that surprise him.

Taking an inventory for the purpose of making a good showing for the year's business is quite different from compiling an inventory that will mean the basis for tax assessment. Facts and not alone pretty figures will be demanded, and in the long run perhaps it is a good thing that some merchants in our own trade, for instance, will be compelled to find out just where they stand financially and what their business amounted to during 1917.

IN an interview in the New York newspapers, following her sensational debut in New York with the Chicago Opera Company last month, Mme. Galli-Curci gave full credit to the talking machine for aiding her in training her voice properly. The noted soprano emphasized the point that it was by means of talking machine records that she learned of the various faults in her singing and was enabled to correct them.

The statement of Mme. Galli-Curci is important as coming from an artist of recognized standing, and is practically in line with the claims that have been made for the talking machine as something more than a simple entertainer. Leading artists have long ago learned that the talking machine record presents their voice exactly as it is, with imperfections and all. Before an audience, and on the concert stage, personality may be made to counteract existing faults in singing, but on the talking machine record personality does not count. It is the singing itself that must pass the test. When the artists reach the point where they can, without prejudice, study the recordings of their voices and profit thereby, then is the full value of the talking machine realized.

IT may be a difficult task to convince the average manufacturer or dealer that when business is slow it is oftentimes advisable to increase his advertising. Too many overlook the importance of publicity as a prestige builder and as an educational factor in bringing directly to the attention of the purchasing public the fact that the house that keeps its name before the public is the house that can supply the goods they require most promptly and most completely. And even when a shortage prevails in certain products, as now, the public expects from the "live" houses that advertise, the best and quickest service when the opportunity affords.

The accepted rule among a great many institutions is to reduce the advertising appropriation when trade quiets down a bit. No greater mistake can be made. Experts in advertising who study the game from a cold, scientific standpoint—that is for pro-

TO OUR SUBSCRIBERS

If your copy of The Talking Machine World does not reach you on publication date, or a few days thereafter, do not assume that it has gone astray. The existing railway congestion has had a serious effect on the handling of mail, particularly second class matter, and brought about unusual delays. Kindly wait a few days longer than usual before writing to us, as the paper will probably arrive safely.

ducing results—are a unit on the proposition that a lull should mean increased advertising if anything.

With the professional advertising man such ways and means are the best to adopt that have "pulling" power; they therefore advise no curtailment of the publicity campaign when business is slow. Then is the time to make still further efforts. Where this plan has been followed success has always crowned the endeavors of the advertiser. Quite a few talking machine men are wise enough to pursue this course and are reaping the reward. Would that there were more, and these observations apply with equal force and cogency to every branch of the trade.

AMOST praiseworthy tendency to feature in an unusually energetic manner the better class of records is noted among talking machine dealers in many sections of the country. In their advertising they call particular attention to the records by the noted artists—records that retail at \$1 up, and at least one dealer has gone so far as to publish in his advertising special articles on the desirability of a library of records of the better sort. We all know that records are scarce, and that it is the proper thing to make the most of the records on hand, and the limited number that can be obtained, by featuring them in an unusual way. The logic of paying particular attention to the high-priced records is that the gross amount received for their sale is much larger and, therefore, serves to measure up with the total sales volume of popular types of records in normal times from a monetary standpoint. In other words, if a normal business cannot be done on accumulated profits, the condition can be offset to a certain degree by doing a smaller business on large profits.

IF a bill before the New York State Legislature becomes a law, it seems as though merchants in all industries in this State will be compelled to observe a one-price policy regardless of their personal desires. The bill seeks to amend the personal property law in order to make it compulsory upon the merchant offering goods on contract, or conditional sale, to place upon the article both the cash price and the conditional sale price. If the bill becomes a law it should prove of material aid to merchants who are already observing the one-price policy, and it should likewise serve to increase the number of cash sales by presenting to the customer the saving he can effect by buying for cash.

Edison Message No. 18

To take music out of the world would be a calamity. To withhold music from the home would be a tragedy.

¶ Today music is doing its part, a tremendously effective part, in feeding the soul of America and vitalizing the spirit of her sons and daughters—in soothing tensed nerves—in sustaining the pitch of efficient living and doing—in keeping the world from falling below present standards and keying it up to higher standards—in helping to save the world for democracy.

¶ The Edison dealer who comprehends that, in Music's Re-Creation, he has in his hands a power for great good in his community, and who exercises that power, is a true citizen and a valuable member of the Edison Organization.

Why the Sales of High Priced Records Should Be Featured Just Now

The present record shortage is not a thing to be dismissed in the belief that it is solely a manufacturing problem and therefore impossible of solution outside of the record factory.

As far as the present shortage affects the dealer's profits, the real solution lies right with the dealer himself. Here is what The World recommends, and our suggestion is based on the premise that it is as easy to press operatic records as to press records devoted to ragtime.

We recommend that every dealer get down to brass tacks and utilize every possible idea that is practical that will boom the sale of high-priced records. In this way, it will be possible for both wholesalers and retailers to do a greater cash turnover than last year, but on a numerically smaller record stock.

In the past dealers have relied pretty much on national advertising and other outside influences to sell both talking machines and records for them. The public has acquired the habit of coming in, making its own choice, and taking home whatever it pleases. Because of this practice there has been comparatively little hard pan selling—selling that convinces the buyer he wants what you want him to select.

Without doubt the national advertising of the record manufacturers, the record bulletins, and the numerous attractive store posters have gone a long way toward creating a demand for specific records. But there are few dealers who have taken up the problem in earnest where the manufacturer is forced to leave off. Examples are not over frequent where retailers are conscientiously engaged in devising ways and means for increasing the sale of high-priced records. There remains, therefore, a very broad field for expansion along this line. It is folly to think aggressive work on the part of the dealer and his staff of salesmen will not materially augment the sale of high-priced records. The personal element and the "home town" element can certainly be made to produce more sales for high-priced records than is now the case.

If the dealer will inject into his entire sales force the fact that every \$3 record sold is equivalent to selling three \$1 records or four 75-cent records, it is reasonable to suppose his sales force will soon be offering good practical suggestions for increasing the sale of the high-priced stock.

At this writing we will not discuss in detail, plans for selling high-priced records. Broadly speaking, however, there are five excellent channels to work through, five channels the possibilities of which have to date been developed by the dealer to a small degree only. They are: one, newspaper advertising; two, window display; three, direct mail communications; four, featuring of selected records after the customer enters the store and the booth; five, conversation engaged in by the salesmen and saleswomen. Considered in a general way here is

"Five Channels to Work Through In Promoting Sales of Expensive Records"

what these five different ways and means of selling high-priced records offer:

1. Newspaper advertising offers an opportunity to introduce the pictures of famous artists. Individual selections can be featured, and it would not seem advisable to run a list longer than ten records in any one advertisement. The playing up of specific pieces and of popular artists will introduce a very newsy element into retail advertising, and it will therefore be possible to use small-sized space very effectively.

2. Window display offers the opportunity for originality on an extended scale, with an option between simplicity and extravagance. Just as Hawaiian windows have, for instance, been built around Hawaiian dance records, just so can window displays be built around famous opera scenes, etc.

3. In direct mail communications to regular and prospective customers, feature circulars, etc., can be built around individual records of the high-priced class, thereby helping the public to select from the current record bulletins in favor of the high-priced records and thereby offer-

ing the chance of bringing back to mind some of the high-priced records of an earlier date.

4. Many plans may be devised for featuring records inside the store and in the demonstration booth. Special racks, special posters, special records left apparently carelessly on the machine in the booth, special display tables in the middle of the store, etc., etc., add the limit of human ingenuity.

5. Great things can be accomplished by having the salesman carefully study the nature of each client, so that he can suggest in an artful and diplomatic way certain high-priced records. Weekly meetings of the sales staff will help bring out the effective ways of working along this line.

All in all, the present is a time when the talking machine man who sits back and says "records are short" and lets it go at that is a slacker. The present is a time when men of action are needed, men with ideas to promote the sale of high-priced records. Every wholesale and retail record department will profit by bearing this thought firmly in mind, and the industry will have the satisfaction of knowing it is making good in spite of a numerical shortage and at the same time will be definitely advancing public appreciation for music of the better sort.

MME. GALLI-CURCI IN CONCERT

Amelita Galli-Curci, the great operatic soprano and Victor artist, whose records are so much in demand these days, gave her first song recital in New York on Monday, March 4, at Carnegie Hall, under the auspices of the Rubinstein Club, of which Mrs. W. R. Chapman is president. The club bought the entire floor platform seats and lower boxes, and had as its guests 150 presidents of women's clubs in Manhattan and Brooklyn. Mme. Galli-Curci will give one other concert, her last this season, on Sunday, March 17, at the Hippodrome.

JOINS MERCHANTS' ASSOCIATION

The Blackman Talking Machine Co., Inc., the well-known talking machine distributor of 97 Chambers street, New York, has been elected to membership in the Merchants' Association of New York. Several other talking machine houses are also enrolled in the association.

THE BROOKS Automatic Repeating Phonograph

Plays Any Kind of Record—Any Desired Number of Times and Then Stops Automatically—The Phonograph Sensation of the Age

MR. DEALER:—

You cannot duplicate the value we offer for twice the price. In size and appearance the "Brooks" compares favorably with Instruments retailing for \$300.00 and up.

In tone qualities it is unexcelled by any talking machine on earth! In mechanical equipment and automatic features it is years in advance of its nearest competitor. We have been building talking machines for three years—last year our sales doubled every four months. The BROOKS DEALER has no competition. The machine creates interest and discussion—it is self-advertising. Send for particulars, terms, prices. Do it Now.

BROOKS MANUFACTURING COMPANY
Talking Machine Dept. - SAGINAW, MICH., U. S. A.

View of Controlling Dial

This dial sets, starts and stops the machine. Will play any desired number up to nine or continuous.

Simplest Machine to Operate

Instructions

Set the needle at the inner edge of record cutting and then move pointer to the figure designating the number of times you wish record played.

That is all. You can now forget the machine. When the record has been played as many times as set for, the machine will stop automatically with the tone arm suspended in the air above record.

Globe-Wernicke

(BUILT-TO-ENDURE)

Sectional Cabinets FOR DISC RECORDS

The better the facilities you furnish your customers for housing records the greater the quantity of records you will sell. Look carefully at the cabinet.

It invites you to fill it, in fact, you cannot resist the temptation to fill it. No matter how many sections are bought there will be empty compartments and these are always in sight, inviting you to fill them, and the records too are always in sight, inviting you to play them. Any record is so easily found and quickly replaced that this cabinet adds an extra charm and fascination to the playing of records.

Suppose each of your customers had this cabinet and you had a sample on your salesroom floor to remind them to buy additional sections. Not only would the sale of the cabinets increase but what a tremendous increase in the sale of records would result and there is excellent profit in the sale of both.

Each section has 90 compartments numbered consecutively from 1 up. Globe-Wernicke Catalogue No. 317 T W describes and illustrates these goods fully.

THE UNIT IDEA

of sectional construction was originated and brought to the highest state of mechanical and artistic perfection by the Globe-Wernicke Co. It applies equally to Bookcases and Disc Record Cabinets for the home, and to Filing Equipment of every kind for the office.

The Value of G/W Sectional Construction

Service is the keynote of this idea. You buy only what you need to-day—knowing that you can add to your purchase to meet the growth of your record library.

The important thing is to start right—get the first section or unit to match your furniture or furnishings—of a style that will be permanently artistic and useful—and one that you know you can duplicate at any future time.

The name Globe-Wernicke on any section is a guarantee that you can duplicate it exactly this year or the next generation. This assurance of permanent service is inherently a Globe-Wernicke attribute.

The Unit Idea

← No. 351 Art-Mission Top.

← No. 0328 Art-Mission Disc Record Section for ten-inch records.

← No. 0328 Art-Mission Disc Record Section for ten-inch records.

← No. 0329 Art-Mission Disc Record Section for ten- and twelve-inch records.

← No. 357 Art-Mission Base.

Section by section it grows with the growing record library.

Brown Disc Record Cabinet

For every talking machine made

Brown Disc Record Cabinet

Every record right in front of you always.

No searching—No confusion.

Records lie flat when drawer is closed—No warping.

Records are vertical when drawer is open. Every record at your fingers' ends.

A separate compartment for every record.

No Scratching—Rubbing—Cracking or Breaking.

The Brown Disc Record Cabinet was devised to preserve a record perfectly and thereby insure Perfect Reproduction of Sound.

Ask for Catalogue No. 317 T W

TRI-STATE VICTROLA DEALERS' PLANS

Officers of New Association Elected at Recent Meeting in St. Louis—Will Assist Dealers in Reaching Adequate Understanding of All the Important Phases of Their Business

St. Louis, Mo., March 4.—The Tri-State Victrola Dealers' Association, which effected a temporary organization here November 21, has been permanently organized and the temporary officers continued. They are: President, Arthur M. Magoon, Kieselhorst Piano Co.; secretary, C. F. Lippman, Field-Lippman Piano Stores; treasurer, E. H. Lehman Music Co., East St. Louis. These three, with Val Reis, of the Smith-Reis Piano Co., and John A. Ditzell, of the Famous & Barr Co., are directors.

President Magoon, following the permanent organization meeting, said that he believed that the Exchange Bureau, under the management of John A. Ditzell, would be the big feature of the organization, judging from the comment of new members and the dealers in the district that have inquired as to memberships. This bureau, undertaken at the suggestion of Mr. Ditzell, is modeled after the similar bureau of the Victor jobbers. Any member dealer having a surplus of records or machines can file an inventory with Mr. Ditzell, and these will be reprinted and distributed to all members, who will then arrange an exchange among themselves. Mr. Ditzell will have nothing to do with the actual exchange. His part is completed with attending to the prompt distribution of the lists. It also has been decided that the bureau will not attempt to pass on credits. Prospective exchangers, wishing credit information, can get such data by applying to the jobber. The association rule is that all exchanges must be settled by cash for the balance due within thirty days. Preliminary reports are that there is much dead stock on certain shelves that will prove very live stock on other shelves. Informal arrangements were made for extensive exchanges at the last meeting.

The prime object of the association is to assist the Victor Co. and Victor dealers in reaching an adequate understanding of their business. The territory originally contemplated was Missouri, southern Illinois and Arkansas. But the membership will extend beyond these lines, as applications are coming in from eastern Tennessee and the southeastern part of Kansas. It may reach into Iowa, it is said.

Charles I. Taylor, an advertising counselor who has had much experience with Victor advertising, spoke at the last meeting on the benefits of organization and his co-operation with the association is assured.

An employment bureau for experienced talking machine help will be organized under the direction of Secretary Lippman. Blanks will be drawn for the job seeker to fill out and these will be open to members seeking experienced help. The association has been incorporated. Salesmen and other staff members will be admitted as associate members. Some of the dealers elected to membership at the recent

meeting are: Highfill & Neifind Furniture Co., Caruthersville, Mo.; Vandervoort Music Salon, St. Louis; F. S. Gravenhorst, Effingham, Ill.; J. F. Lechridge, Mayfield, Ky.; Boveris Store Co., Ste. Genevieve, Mo.; Meach & Son, Mansfield, Mo.; R. V. Johnson, Memphis, Tenn.; W. C. Daumueller, Lebanon, Ill.; H. A. Arsularis, Neisha, Mo.; Walter H. Rhiem, Belleville, Ill., and Frank H. Ferand, Granite City, Ill.

TACOMA A BUSY TRADE CENTER

Rhodes Brothers Department Store Doing Big Victor Business

TACOMA, WASH., March 7.—Business of all kinds in Tacoma is active these days, and the talking machine people are getting their share of it. One of the lively Victor departments is that conducted by the Rhodes Brothers Department Store, with P. H. Seva as manager. The volume of business transacted has been growing so rapidly that it is planned to enlarge the department, moving into a better floor location and making it three times as large as it is at present.

The great complaint with this concern, as with all the Victor stores, is the shortage of goods, but it is expected that with the improvement in the weather, and the quicker railroad shipments from the East, this condition will be overcome to some extent.

A recent acquisition to the sales force of Rhodes Brothers is B. L. Miller, who was formerly with Sherman, Clay & Co. in Seattle. He is making a good record.

RECORDS FOR “BOYS” IN TRENCHES

Emerson Phonograph Co. Sends 10,000 Disc Records to the Y. M. C. A. for Entertainment of Uncle Sam's Boys at the Front

The Emerson Phonograph Co., New York, manufacturer of Emerson records, has sent out to the Y. M. C. A. 10,000 Emerson disc records to be forwarded to the boys in the trenches. Forty of the most popular selections have been selected for this purpose; the kind that the boys in camp will like—catchy song hits, dance, instrumental, humorous—the kind of music that will keep them in joyful spirits. Two hundred and fifty sets made up of these fifty selections are on their way, and will be distributed from the headquarters of the Y. M. C. A. Needless to say they will be welcome.

In a chat with The World the secretary of the Emerson Phonograph Co. said: “This is just the first of a series of contributions which we anticipate making to the boys. We feel that it is only our patriotic duty to do this, and that every phonograph company, whether manufacturer or retailer, should send as many records as possible to the boys in camp and in the trenches. This should also apply to the music-roll houses, to the sheet music companies, and, in fact, to everyone whose product can afford entertainment for the boys who are ‘doing their bit’ for their country.”

When you “take time by the forelock,” be sure it is your own time you're taking!

SCHUBERT PHONOGRAPH

FOR 1918

There will be some slight changes in the cabinets of some of the models for 1918, not very material, however, because the Schubert cabinets have always out-classed other phonographs in attractiveness, materials and workmanship.

Cuts are being made and as soon as sheets are printed we will notify dealers.

Give Them What They Want!

The tremendous demand for PATHE PATHEPHONES during the past year is UNQUESTIONABLE PROOF that the people are no longer satisfied with a ONE-RECORD machine.

The people have been educated regarding Records—They know that there are good Pathe Records—They know that there are good Victor Records—that there are good Columbia Records and good Edison Records—

The people want to hear ALL makes of records and they must have a talking machine THAT WILL PLAY all makes of records—

The *Pathe* Pathephone

Is the Only Standard Talking Machine That Gives You This Great Selling Advantage

It Isn't Wise to Judge Prospective Purchasers by Their Outward Appearance

By Alfred Parsons

In the business of selling talking machines, or in the music trade field as a whole, the outward appearance of prospective purchasers is not always a safe guide to judge of their purchasing ability. There is a time-worn story in the piano trade of a rural gentleman who entered a fine piano wareroom, was side-stepped and joshed by all the star salesmen, and finally was turned over to a "rookie" for final consideration. The old gentleman tried out the piano with fingers knotted by earnest toil, and with finger nails in deep mourning. The final outcome was that he bought a magnificent grand and paid cash for it, taking the money out of a greasy old wallet dragged from the depths of one of his overall pockets. The illustration is one that draws deep laughter from the all-wise salesman.

One of the first pieces of advice which capable managers give to salesmen is to treat every customer with equal courtesy and consideration, regardless of their apparent circumstances. That this should be the natural attitude without suggestion goes without saying, but it doesn't require a psychologist to note how fine clothes and a suave, cultured manner win the immediate attention of talking machine salesmen, as compared with the indifference shown the ill-dressed, uncultured visitor. An excellent illustration of how this attitude works in another branch of the industry is pointed out in the experience of a man who related it to *The World* in this wise:

Some years ago a salesman entered the employ of an up-State piano house and worked hard to make a record. It was when player-pianos were new and the selling of them was hard work. This salesman was lolling about the warerooms hoping for the best, when late one afternoon an old chap, who would have been better off for a good scrubbing, and whose clothes were not only unkempt but had the fragrance of the stable about them, entered the wareroom. The salesman sized the visitor up either as a poor farmer or a stable hand. He was about to pass some bright and witty remark when there flashed through his brain the story of the old farmer. He said to himself, "Well, I have nothing else to do this afternoon, I might as well talk to this man."

"I want to see one of these here piano players," said the visitor. The salesman looked him over, and finally decided that it wouldn't do any harm to let him look at them, so he conducted him to the upper floor where the player-pianos were displayed and proceeded to demonstrate. As he played, the old gentleman's feet began to quiver, and finally ended by beating time to the music.

"Pretty fine piano," he said, "how much?"

"Seven hundred dollars," answered the salesman.

"That so? Got any better ones?"

"Sure," said the salesman, and conducted him to a large and massive instrument.

"This sells for \$850."

"How much for cash?" asked the visitor while the salesman's brain began to reel.

"Seven hundred and sixty-five dollars for cash," was the answer.

"All right, deliver it to-morrow" said the customer, and proceeded to draw from the inner recesses of his coat a long black stocking, simply full of money of all kinds, small change, bank notes and checks. The \$765 was counted out, a receipt given and the sale closed.

The salesman was naturally curious, and at the first opportunity stopped at a nearby town where the player was delivered, ostensibly to see if it had given satisfaction, and found that the man was a prosperous farmer and well off. Moreover, he had come to the store direct from the court house where he had settled an estate

for his niece amounting to something over \$100,000—hence the stocking full of change.

"After that," declared this salesman, who, by the way, is now a successful executive of a talking machine concern, "the rougher they looked the better I treated them."

During Christmas time in a town not far from New York, two of the most expensive styles of talking machines were purchased by customers whose outward appearance would not indicate that they could afford to buy a \$15 ma-

chine. The salesman was so unimpressed with the appearance and supposed financial inadequacy of his visitors that the head of the business, who happened to be around at the time, was forced to the opinion that these people were not being handled discreetly. He took them in hand himself and sold each of them a \$200 machine, much to the amazement of the salesman who first dickered with them when they entered the store. As a matter of fact, clothing doesn't always proclaim the size of the pocket-book.

Needless to say that circumstances like these

are unusual, for there are few businesses where the salesmen are so efficient, so courteous, and so attentive as in the talking machine trade.

But there are exceptions in this as in every other trade, and these remarks are meant for the "exceptions"—the men who sometimes fail to keep in mind the initial, elementary advice to salesmen to treat visitors to the store, no matter what their station in life may be, with equal consideration. There are many rough diamonds among talking machine buyers in this great country of ours.

PROSPERITY PROOFS IN LOUISVILLE

LOUISVILLE, Ky., March 4.—H. V. Boswell, manager of the Edison and Columbia department of the Kaufman-Straus Co., Inc., this city, reports that business for February showed an increase of 100 per cent. as compared with the same month last year. In fact, at the present time this house is doing the largest talking machine business in its history, and judging from the outlook at present it expects an increase of 120 per cent. in March. The demand is for high-class instruments, and 75 per cent. of the sales made are for cash. Mr. Boswell is a hustler, and believes that business can be secured if it is gone after properly. A handsome new motor truck has been purchased exclusively for the use of the talking machine department.

WANTS PHONOGRAPHS FOR CUBA

S. Sarmiento, of Manzanillo, Cuba, has notified the Foreign Trade Bureau of the Commercial Museum, Philadelphia, that his concern is in the market for phonographs and disc records to be marketed in Cuba. It is stated that correspondence should be in Spanish.

VICE-CONSULADO DEL PARAGUAY
WILMINGTON, DELAWARE
E. E. U. U. DE A.

January 28, 1918

New England Talking Machine Co.
16-18 Beach Street,
Boston, Mass.

Gentlemen:

I am indeed pleased with the PERFECTION FLEXI-TONE Reproducer that you sent me for use on my phonograph. It does all that you claim for it--and a lot more. It makes certain lateral-cut records that seemed thin before, full and rich when played with your reproducer.

I tried it on --- records, using an "elbow" attachment that is adjustable, and by centering the stylus properly to the --- record grooves, obtained with your reproducer a very rich and beautiful tone, and of course, all necessary volume. It also plays the ----- records very clearly and beautifully.

I congratulate you on a most remarkable product.

Very truly yours,

N.B.—This is only one of many letters we have received praising the **NEW PERFECTION FLEXI-TONE REPRODUCER**. You can see and hear for yourself by sending for a sample to

NEW ENGLAND TALKING MACHINE CO., 16 Beach St., Boston, Mass.

Columbia Records

Wonderful Choral Records Feature Widely Varied April Program

Father Finn's Paulist Choristers took New York by storm; their tour is a triumphal success. These famous boy singers, who make records exclusively for Columbia, have two splendid numbers in the April list—Tchaikowsky's "Legend" and Bach's "Sing Ye to the Lord."

Stracciari, who won new laurels in his recent appearance with the Chicago Opera Company, sings with tremendous power and fervor for the Columbia April program the heart-touching song to the courtiers from "Rigoletto."

Al Jolson revels in melodious ecstasy over a priceless gem—his "Lump of Sugar Down in Dixie."

A pair of song hits from Chu Chin Chow—swirling, coaxing, compelling dance records by Handy Jazzers; Jazarimba Orchestra; Jockers Brothers and Prince's Band—the very newest war songs—Cohen at the Telephone Again—these give just an idea of the straight-through superlativeness of Columbia's April offerings.

Give them half a chance, and they'll sell themselves. Order early.

Woolworth Buil

Columbia Grafonolas

Sell the Joy of Good Music—Let the Price Fix Itself

No matter how little money a customer can afford to pay for good music, there's a Columbia Grafonola to suit his purse.

The one he can afford to buy is the one to sell him. For, though it is the instrument that is delivered at his home, what he is really buying is the joy and comfort of music.

The low-priced model, at \$18 or \$30, will give him his desire. A moderate expenditure for an instrument will enable him to buy more records than if he puts nearly all his available purchase money into a higher-priced Grafonola.

Acquaintance with the Grafonola, increasing enjoyment of the wide variety and splendid quality of Columbia music, will make your customer a regular purchaser of Columbia Records, and an advertiser of his Grafonola among his friends.

Some day he will buy a higher priced instrument. That day will take care of itself, if you take care of his present desire in the right way.

Columbia superiority is as marked in the lowest priced instrument as in the Grafonola de luxe.

JAN RUBINI AND THE PATHE

Famous Pathé Artist Gives Informal Recital in Curtis-Colyear Warerooms

LOS ANGELES, CAL., March 1.—Jan Rubini, the famous violinist, who records for the Pathé Frères Phonograph Co.'s library, was a recent visitor to this city, and gave an informal recital in the establishment of the Curtis-Colyear Co., the prominent Pathé dealer in this city.

Jan Rubini's Recital in Curtis-Colyear Co.'s Phonograph Department

Mr. Rubini, who is internationally prominent, has made a number of Pathé records which have

been very successful. His concert at the Curtis-Colyear store was commented upon very favorably in the local papers, and this progressive Pathé representative took advantage of the opportunity to use some effective publicity in behalf of their Pathé department.

KNOWING THE RECORD NUMBERS

Persons who buy talking machine records probably have noticed that most of the dealers possess the faculty of remembering the numbers and do not have to refer to the catalogs when a record is asked for by the title and not the number, remarks a writer in the New York World. It's all a matter of practice, according to a Chambers street dealer, who said: "It's all in the day's work. You see, remembering the numbers of records is just about the same as remembering telephone numbers. Some are good at it and some are not, but the average dealer in records usually has the numbers of the records at his finger tips."

VICTOR WIRELESS COURSE READY

Instruction in Wireless Telegraphy by Means of Records and Instruction Books Heralded as a Distinct Aid to the Government

The Victor Talking Machine Co. has just announced a special course of instruction in wireless telegraph by means of records and accompanying books of instruction. In announcing the course the company says in part:

"Higher pay and better rating are two benefits which the Victor retailer may now help our soldiers to obtain. He may also assist the nation in overcoming a critical need.

"In co-operation with the Marconi Institute in New York, we have prepared a course in wireless telegraphy with that object in view.

"The United States Army and Navy are in need of thousands of skilled wireless operators and a complete course of study may be carried on by means of these records, in camp and at home, at a very small fraction of the expense that is ordinarily involved.

"The course consists of six ten-inch double-faced records with book of instructions, all securely packed in a special container in which they may be transported readily. Our retail price is \$5.00 per set.

"Here again the Victor retailer is in position to assist solving one of the big national problems and enable the individual soldier to promote himself from the ranks.

"A special poster and descriptive folders will be used to feature this new product, and to give these records the widest circulation is a patriotic duty no less than a business proposition."

Special posters and descriptive folders will be issued for the use of the dealers in featuring this latest Victor product, which should meet with a ready demand.

Arrangements have recently been made with the Marconi Institute in New York to accept orders through Victor dealers for the books on wireless, "Practical Wireless Telegraphy," and "Military Signal Corps Manual," as well as subscriptions for the magazine, "The Wireless Age." A discount will be allowed on the orders.

L. L. LEVERICH AS A WRITER

Assistant Advertising Manager of the Columbia Co. Clever With His Pen—New Cohen Record

In the April list of new Columbia records will be featured a record to be added to the already popular "Cohen" series. This record will be designated as A2488, and will contain two recordings: "Cohen at the Real Estate Office" and "Cohen Calls His Tailor on the 'Phone.'" It is interesting to note that the former selection was written by Lester L. Leverich, assistant advertising manager of the Columbia Co. Mr. Leverich has achieved signal success as a writer and composer of witty song and verse, and a number of his compositions have been published in magazines and newspapers. It is said that his "Cohen" record is well calculated to compare in popularity with the original "Cohen" selection, the sales of which have reached phenomenal totals. Both sides of this new record are recorded by Joe Hayman, who has made all the "Cohen" records to date.

FIRE IN ALBANY STORE

The stock of the Standard Phonograph Co., 618 Broadway, Albany, N. Y., was badly damaged by fire last week. After the blaze it was found that several talking machines had been stripped of their electric motors and an investigation is being made.

AIDING WAR STAMP CAMPAIGN

Charles K. Haddon, vice-president of the Victor Talking Machine Co., is directing the War Stamp sale movement in Camden County, where it is expected \$3,500,000 will be raised by the sale of the stamps.

\$1,000,000 IN SONORA ORDERS

Frank J. Coupe Returns From Whirlwind Trip in Which He Booked Big Orders for 1918—Big Selling Campaign Now Being Planned

Swinging out from the executive offices in New York, Frank J. Coupe, sales and advertising director of the Sonora Phonograph Sales Co., Inc., jumped from city to city visiting the trade, and after a two weeks' whirlwind trip (with fourteen nights on sleepers), returned recently with over a million dollars' worth of 1918 orders for Sonoras. The first stop was Indianapolis, the next Chicago. Business in phonographs in the Windy City is excellent, Mr. Coupe reports, the local representatives, C. J. Van Houten & Zoon, ordering very heavily for the coming year's business.

At Milwaukee Yahr & Lange, Sonora distributors, were the hosts at a banquet given to the Wisconsin Sonora dealers. In this section everyone has money, is spending it for talking

Frank J. Coupe

machines, and the prospects are splendid. Two of the out-of-town guests at the Milwaukee meeting were Sewall Andrews, of the Minneapolis Drug Co., and Oscar Maurer, of the Kiefer-Stewart Co., of Indianapolis, two important Sonora distributors. Many new dealers were signed up, Sonora 1917 sales having been so extensive that it was clearly apparent to every prospective dealer that the Sonora is an extremely easy instrument to sell, decidedly popular, and in strong demand. Many dealers were almost completely sold out and rush orders for immediate delivery by express were commonplace.

At St. Joseph, Mo., a salesman's meeting was being held by C. D. Smith & Co., and Mr. Coupe outlined the policies of the Sonora Co. for 1918 with reference to the plans for extensive and unique dealer co-operation and assistance which the Sonora advertising department now has in preparation.

Business in Salt Lake has been phenomenal and the Strevell-Patterson Co. were found to be highly enthusiastic over the merits of the Sonora and are preparing for a great year.

That the farmers are cashing in on wheat, corn and other high-priced food products and are buying Sonoras was attested by the Southwestern Drug Co. of Wichita, Kansas, who expect that the coming twelve months will establish new high-selling records. Dealers everywhere were urged by Mr. Coupe to order early this year because of extraordinary transportation and manufacturing conditions.

The results of this short trip of Mr. Coupe's were highly gratifying to George E. Brightson, president of the company, who also visited some of the dealers during this period.

The distributors all along the line were at stations to welcome "Frank J," as he is popu-

"TALKING MACHINE IS THINKING MACHINE" SAYS LAUDER

Well-Known Singer Points Out That the Thoughts It Inspires in the Soldiers at the Front Are Pleasant Thoughts of Home and the Dear Ones Left Behind

"When I was across in France seeing the boys," said Harry Lauder, "I often thanked the inventor of the talking machine for not having lived in vain. A record out yonder, where the mud is much deeper than even in the streets of dear auld Glasca on the worst winter day, a record brings back the sniff o' the hills, the wee ingle neuk, and the days o' auld lang syne. It's graun, I'm tellin' ye! What an invention! Voices o' loved ones always wi' you; sangs o' the hameland, the mountain and glen to inspire you, to fill your heart and strengthen your arm. Aye, the talking machine is a thinking machine, and the thoughts that it inspires are pleasant thoughts—thoughts o' hame and the dear ones left behind."

Such is Harry Lauder's description of music among the men at the front in an interview with the London Phono-Record shortly after his return from his recent visit to the Western front. "I'll tell you a wee story," he proceeded in his own pawky and inimitable way, "an' it's no' a madeup yin, min, I'm telling ye! This is a story of how a gramophone backed up the gallant soldiers o' a gallant Scottish Regiment. The day's duties had been long and arduous, and for hours and hours the Jocks had been

under a fierce bombardment—without a rest and without a halt. Then day gave way to night. Shells were continually bursting; Lazy Lizzies, Whistling Willies and a' the rest o' the devil's messengers. Now the rain came on. Sheets and sheets o' it—rain that looked as if it never would stop, and made one wonder where it all came from. Even the trenches were flooded. That night passed and at dawn the Germans were scattered and new positions were taken. But still it rained."

Harry at this stage quietly chuckled, puffed away at his pipe, and went on. "Several hours later the boys were relieved, and tramped miles back to their rest camp—amid mud to the knees all the road, and with the water streaming down their necks and squelching in their boots. It was evening before they arrived at the place where warm tea, warm clothing, and a good dry bed awaited them, but, man, even before a helmet was doffed one o' the Jocks made for the company gramophones. He slipped on a record, wound up the machine, and started it agoin'. And the discomforts of the past thirty-six hours were sent into oblivion when the machine calmly churned out, 'When You Come to the End of a Perfect Day.'"

larly known, and when this cheerful sales manager told of the coming period models and outlined the new plans for aiding the dealers in increasing sales (which for the present must remain confidential), the Sonora dealers were a unit in declaring that in selling methods the 1918 Sonora program is bound to prove an eye-opener to those who do not realize that the phonograph industry is one of the fastest growing and most progressive lines in the country, and that despite all pessimistic talk the war is bound to increase and not decrease sales.

Mr. Coupe stated that the more expensive models from \$150 up are in surprisingly good demand, and the Sonora officials are all gratified that the Sonora idea of making the "Highest Class Talking Machine in the World" rather than the largest number of the lowest-priced talking machines, is being emphatically approved by the public.

It requires as much courage to go over the top of a rut as to go over the top of a trench.

ADDRESS GRAND RAPIDS DEALERS

L. C. Wiswell and C. B. Gilbert Principal Speakers at Recent Annual Meeting of Retail Music Dealers' Association in Grand Rapids

GRAND RAPIDS, MICH., March 2.—Among those who attended and spoke at the recent annual meeting of the Grand Rapids Retail Music Dealers' Association were Leslie C. Wiswell, manager of the wholesale Victrola department of Lyon & Healy, Chicago, and C. B. Gilbert, representing the Victor Talking Machine Co., Camden, N. J.

Mr. Wiswell dwelt at length upon present existing conditions in the trade and their effect on the distribution of both machines and records and stated that now was the time for the development of closer co-operation between the merchants in the various cities. Mr. Gilbert also reviewed the present trade situation from the standpoint of the factory man, and gave the retailers some valuable information.

E. H. LANSING
611 Washington St., BOSTON

SAN FRANCISCO OFFICE, Room 530 CHRONICLE BLDG.
WALTER S. GRAY, Manager

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

BOSTON, MASS., March 5.—As emphasized a month ago February was a very short month, the shortest one on record, because of the coal shortage which closed up tight three successive Mondays so far as business was concerned. As to the advantages of this Monday closing, which all told continued for five successive weeks, there is much difference of opinion. Spring is approaching, the weather is milder, the days longer, and all this means the use of less fuel for which the business interests certainly are most grateful. It is not surprising, therefore, that business has been rather light, but the one thing that has acted as a welcome stimulus has been the visit of the Chicago Opera Co., which is treated at more length in the succeeding paragraph. One thing that the talking machine men must be given credit for: they have uniformly accepted the unpleasant conditions gracefully; there have been no murmurings, no complaints, and they have come forward generously in response to every appeal for assistance, and there is not a week going by that some new campaign is not inaugurated. Two forthcoming whirlwind campaigns are to be the second drive for the Red Cross and the third Liberty Loan, and the trade may be depended on in advance to do its share. All honor to the patriotic stand which the trade is taking.

Chicago Opera Co. Stimulates Trade

With the appearance of the Chicago Opera Co. in Boston for two weeks, its season at the Boston Opera House ending on March 2, the various talking machine houses in Boston were keenly alive to the importance of exploiting the records of the various artists. Incidentally the company made a great success, a far greater one than had been expected, and the publicity manager, Rufus Dewey, showed himself an adept in giving proper prominence to the company and in working in effective unison with the talking machine headquarters managers. At all of the Victor distributing centers, notably the Oliver Ditson Co., the Eastern Talking Machine Co., M. Steinert & Sons, C. C. Harvey Co., George Lincoln Parker and A. M. Hume Music Co., there was a great call for the Galli-Curci records, for this artist made as pronounced a hit in Boston as in New York. The Columbia stores featured Stracciari, Baklanoff and Mary Garden, all exclusive Columbia artists. The Pathé, which does the recording for Muratore, Fitziu, Chenal, Rimini and Raisa (the latter won new laurels

for her work here) featured these singers in their advertisements.

In the opera program there were advertisements by the Vocalion Co., the Pathé Phonograph Co. with Hallet & Davis Co. mentioned as one of the dealers; the Brunswick-Balke-Collender Co., which used a picture of Muratore in calling attention to the Brunswick machine; M. Steinert & Sons Co., the Oliver Ditson Co., the Grafonola Co. of New England, the C. C. Harvey Co. and the Victor Co. itself, which had the whole of the back page.

Increases Executive Force

Oscar W. Ray, the New England manager of the Emerson Phonograph Co., is rapidly filling in his field with a staff of competent men, and there is growing evidence of the value of the school for salesmen which the parent company has started over in New York. One of Manager Ray's new men is H. L. Coombs, who comes from New York and will handle Connecticut and western Massachusetts. The local headquarters also have lately connected up with several important stores in the western part of the State through which such cities as Fall River and New Bedford and others will handle the Emerson line. Copies of the first issue of the "Emerson Spotlight" have reached this city and dealers are delighted with its appearance. Mr. Schwartz, who is in charge of the Emerson foreign department, was a visitor in Boston the latter part of February, making his headquarters with Manager Ray. Mr. Ray, by the way, was up in Montreal a while ago looking over the Emerson business there. On his way he encountered severe storms and cold and saw no less than eight engines stalled between Rouse's Point and Montreal.

L. W. Hough Increases Line Handled

L. W. Hough, of 20 Sudbury street, who is well known as the representative of the George A. Long Cabinet Co., manufacturers of disc record cabinets, has added a general line of albums for records which are manufactured by the New York Album & Card Co., in whose line of goods discriminating representatives of the trade are interested. Mr. Hough is ready at all times to give prompt attention and service to his customers, for whose inspection there will always be a full line of goods.

Steinert Co.'s Patriotic Records

M. Steinert & Sons Co., Victor wholesalers, have issued two booklets of a patriotic nature.

One is a little song book with words and music of seven patriotic numbers; the other is an essay on "Your Flag and Mine," with reproductions of famous pictures and colored facsimiles of the various flags of American history. The Victor warerooms of the Steinert Co. at Arch street and at the Boylston street stores have been experiencing very good business these past few weeks, despite the comparatively few business days.

About Will Ellsler

Townsend Walsh, dramatic critic for the Boston Traveler, thus writes in his paper of a well-known salesman at Arthur C. Erisman's establishment in Tremont street, one, it may be added, who has a great many friends in the business:

"I ran across Will Ellsler on Washington street the other afternoon. No more road-touring for him, he sagely said; at least not till theatrical conditions regain their normal equilibrium. Mr. Ellsler is the son of John A. Ellsler, one of the pioneer managers of the Middle West who was responsible for launching Abraham L. Erlanger in the business. Effie Ellsler, the one-time favorite, is Will's sister. Mr. Ellsler is now located here in a trustworthy position with the Grafonola Co. of New England."

Some Grafonola Co.'s News

Louis Besserer, who has been a valued member of Arthur C. Erisman's staff in the Grafonola Co. of New England, is in service, and is attached to the Charlestown Navy Yard, where, as he is an experienced musician, the violin being his specialty, he has been placed in charge of the orchestra.

Stanley B. Bowman, who left the Grafonola Co. of New England some time ago to associate himself with the Columbia distributor at Portland, Me., has returned to his first love, where his old associates are glad to again have him with them.

Lillian Dunnigan has severed her connection with the Grafonola Co. of New England after having served as cashier for five years.

Makes "Hit" at Pilgrim Publicity Dinner

George W. Hopkins, general sales manager of the Columbia Co., arrived in Boston on the first of the month especially to be present at the dinner that night of the Pilgrim Publicity Association. Mr. Hopkins came here from Chicago and at the conclusion of the dinner took the midnight train back to New York, which

Habits Have to Grow

For several years past Eastern Victor Service has made a specialty of speeding up the record end of the Victor business.

We have therefore contracted the *good habit* of giving the Victor dealer efficient record service.

EASTERN TALKING MACHINE CO.

177 TREMONT STREET

BOSTON, MASS.

made his visit here with Manager Fred E. Mann a very short one. The topic of his address at the advertising men's dinner was "The Psychology of Merchandise." Mr. Hopkins got a big reception from his Boston friends, who are legion here, and he has fond memories of the days he lived in this city.

Books Good Brunswick Phonograph Orders

F. H. Walter, of the Brunswick-Balke-Collender Co.'s staff, has just returned from a very successful trip taken to Providence, Fall River and New Bedford, in all of which places he was able to quicken the spirit of dealers as to the merits of the Brunswick line of machines. Just now the Boston headquarters are pushing the sale of Pathé records as well as Brunswick phonographs and the demand throughout New England is rapidly growing. Mr. Walters has the sympathy of his friends in the loss of his mother, which occurred three weeks ago in New York.

Recovered From Indisposition

A. M. Hume, head of the A. M. Hume Music Co., Victor dealers, was confined to his home in Melrose for a few days lately with a severe cold. He is now back at the warerooms, we are glad to say. Herman Baker, also of this house, is back from a trip taken to Philadelphia a while ago.

Perfects New Flexi-Tone Reproducer

The New England Talking Machine Co., with which Charles Trundy is closely identified, has finally perfected its new Perfection Flexi-Tone reproducer, on which Mr. Trundy has been diligently at work for some time. Demonstrations are being given at the factory, and a number of talking machine experts are dropping in to study this reproducer at close range.

Composite Victor Retail Publicity

The Eastern Talking Machine Co., Victor wholesalers, has just worked out a scheme of local advertising which is finding immediate favor with those directly interested in the plan. It is a sort of composite advertising in which sixty or seventy Victor dealers are co-operating. The advertisement, which is two columns wide, is to appear weekly throughout the year in one or more of the Boston dailies, and each week there is some special artist featured at the top.

Visiting Columbia Artists

R. F. Bolton, who has lately been made sales manager of the Columbia international record department, was in Boston for a short time toward the end of February. Another local caller at the Columbia wholesale quarters was L. L. Leverich, the company's assistant advertising manager, who came here largely in the interests

of some of the Columbia artists who at the time were appearing with the Chicago Opera Co. at the Boston Opera House. S. J. Pabske, a salesman of the international sales department, is spending some time in this territory just now looking over the local field.

Good Reason for His Pride

Wholesale Manager Billy Fitzgerald, of the Eastern Co., is proud of the fact that he now has three nephews in the service of the country. The last one to ally himself with the great cause is now a lieutenant of engineers in the 101st Regiment. Another nephew is a lieu-

tenant in the Regulars, and the third one is a radio inspector.

Good Showing for Shortest Month

R. S. Hibshman, manager of the Aeolian-Vocalion, says that despite the short month business made a good showing in the machines which his house handles. Mr. Hibshman is regretting the anticipated loss of one of his good men, Albert Feldman, who is expecting to be called any day now to enter the service. He is to be connected for a time with the army and expects to go to Dartmouth College for a course

(Continued from page 21)

of training. Mr. Feldman has made a marked success in selling Vocalion machines.

Closed an Excellent Month

The Pardee-Ellenberger Co., Inc., reported having had a very good month in Edison phonographs and records despite the brevity of the working days in February. Manager Silliman says that March has made an excellent start, all the traveling men are out and sending home encouraging reports of trade conditions, which are rapidly improving, and the prospects, generally speaking, are rosy for a good spring business. He states, also, that little difficulty was experienced from the coal shortage, that there were only a few hours on one day when when the

DEATH OF GEO. A. WALDRON

Old-Time Talking Machine Man Who Has Been Closely Associated With Its Mechanical Development Passes Away in Quincy, Mass.

BOSTON, MASS., March 8.—The talking machine world will be sorry to learn of the death of George A. Waldron, familiarly known as "Pop" Waldron, which occurred recently at his home in Quincy following an operation, which was the first illness he had had in many years. His relation to the talking machine business covered a period of twenty-seven years, he having entered it in 1891 as master mechanic for the New England Phonograph Co., then located in the Boylston Building at the corner of Washington and Boylston streets. He was one of the original talking machine men in the country, and invented many devices for cylinder machines which he never had the good fortune to get patented, and these he held closely to himself to the time of his death. In those early days he was associated with Carl G. Childs, who to-day is manager of the Victor recording laboratory at Camden, N. J.

Mr. Waldron was the originator of the first dictating machine, which he installed in the Boston police department and in the offices of several local lawyers, and from this beginning came the more complete machines of to-day that are in widespread use. The Eastern Talking Machine Co. possesses two of these original dictating machines.

Mr. Waldron used the old wax cylinder record and he used to shave these in a back room at his home in Quincy. He had been associated with the Eastern Co. for the last thirteen years as master mechanic. He was a native of Quincy, and is survived by his widow and two daughters, both school teachers. He was fond of hunting and duck shooting, and he often could be found sailing his craft in the waters of Quincy Bay.

The man with money may succeed, but he must have more than money; he must have brains to handle the business in which that money is invested.

steam got down to a point where inside work was uncomfortable.

To Form a Victor Dealers' Association

A Boston visitor, welcomed among the Victor trade, has been J. A. Frye, a representative from the home office who makes periodic trips to this city. He is here at this time in the interests of forming a Victor dealers' association, a plan which has met with considerable encouragement, and of which there will be more to report in a subsequent issue of The World.

Well Satisfied with Results

The C. C. Harvey Co. feel well satisfied at the business done in both Edison and Victor outfits in February. The early closing had some effect on trade conditions but there always seemed much to do in Manager White's department from morning till closing time.

ATTRACTIVE PATRIOTIC WINDOW

Buffham & Co., of Idaho Falls, Idaho, Make Timely Display of Grafonolas

IDAHO FALLS, IDAHO, March 2.—The patriotic window display of Grafonolas made by Buffham & Co., of this city, has attracted a great deal of

Buffham & Co.'s Window Display

attention and praise. The general scheme of coloring is carried out in the National colors, the central design being two Columbia machines. The ribbon crepe paper is alternating red, white and blue, and the floor is covered with red, white and blue crepe paper. Records of a patriotic nature are displayed to good advantage. The window is not an expensive one, but is very attractive and effective, as may be judged from the illustration herewith.

OFFERS PRIZE FOR WINDOW FEATURE

In a recent issue of "Printers' Ink" there was published over the signature of the Emerson Phonograph Co. an announcement offering a \$50 prize for the best suggestion with sketch or drawing and color scheme submitted before March 15 which would provide something permanent for the windows of the dealers selling Emerson records. It is suggested that this suggestion be something unique and telling which Emerson dealers can utilize to stimulate and increase sales.

FEATURING BROOKS PHONOGRAPH

Some Interesting and Informative Literature Bearing Upon the Phonograph Made by the Brooks Mfg. Co., Saginaw, Mich., Recently Sent Out to the Trade—Tells of New Model

The Brooks Mfg. Co., Saginaw, Mich., has issued a very attractive large-sized circular devoted to a detailed description of the 1918 model of the Brooks phonograph. This model embodies a number of distinctive improvements over the 1917 design, and in its present form is one of the most attractive instruments that has been offered the dealers during the past six months.

The Brooks phonograph has won considerable comment from talking machine dealers throughout the country, owing to the fact that it is the only machine on the market that is equipped with an automatic repeater that plays and repeats any size and any make of disc records any number of times and then stops automatically at the will of the operator. This is all controlled by means of a small dial which sets, starts and stops the machine, and which will play any desired number up to nine or continuous. The dial is a model of simplicity, and when a record has been played as many times as set for, the machine will stop automatically with the tone-arm suspended in the air above the record. There is no necessity of lifting the needle off the record to change records, as this is done automatically. In operation the needle is lifted from the inner edge of the record, and gently deposited at the outer edge of the record cutting, accurately and perfectly.

Other improvements in the 1918 model include a counter-balanced lid support. Large nickel or gold-plated casters replace the smaller ones formerly used. The greatest improvement of the 1918 model, however, is a lever that may be moved with the finger which throws the repeater on or off. When this lever is placed in the off position the phonograph operates the same as the ordinary phonograph, thereby allowing the user to utilize the repeater at will.

The Brooks Mfg. Co., which is one of the country's leading high-grade furniture manufacturers, has a fifteen-acre plant at Saginaw. It has been manufacturing the Brooks phonograph for three years, and during 1917 its sales doubled every four months. It manufactures only one size of phonograph, retailing at \$165 with the repeater nickel-plated, and \$200, with the repeater gold-plated.

TALKING MACHINE BUSINESS MOST ACTIVE IN ST. LOUIS

Great Record and Machine Demand—Educating Brunswick Dealers—Value of Window Displays Emphasized by Columbia Co.—Victor French Course Admirably Featured—Art Models Popular

St. Louis, Mo., March 5.—The talking machine business in this community is as good as the traffic can bear. Both records and machines are making high-water marks of sales where the dealers, jobbers or retailers, have the stock to meet the demands. Even the used-machine dealers report unusually good business. Collections are reported very good from a retail standpoint, although some of the jobbers and manufacturers report that country dealers in some instances are a trifle slow.

Manager Jackson, of the Brunswick agency, is changing the method somewhat of introducing his machines to the dealers. Traveling Representative McGinnis will, hereafter, spend a longer time with each dealer to better equip him to meet the problems that arise. A good many of the Brunswick dealers now being signed are new to the talking machine business and the idea is to prepare them to give service from the start. The Brunswick distribution in this district has exceeded expectations, but the only embarrassment in meeting demands has been the freight traffic situation.

One of the recent successes in retailing has been the window displays distributed by the Columbia Co. These have scored a decided success in bringing to the front the records named and dealers without exception note instant increase in sales. C. R. Salmon, of the Columbia wholesale department, says that while there was much trouble in getting dealers to order the displays at first, now they are signing contracts for an entire year. Mr. Salmon, by the way, has finished with the draft board. After waiving all exemption and going in Class 1A, he has been set back to Class 5 because he is too light for his height.

The effort to push the Victor French course created a good deal of interest. The Famous & Barr Co. rather scored on this feature. Manager Ditzell had obtained the approval of the French Consul on the records before he began his advertising campaign, and when the special days came he had present at the record rooms the consul and a visiting French airman, both of whom added to the attractions of the sale and gave their best efforts at showing the people that they were good records. An adequate number of records were in stock but later demand cleaned up even what was regarded as reserve stock, but more arrived by the time it was planned to make a second drive on them.

Ben Phillips, for two years retail sales manager for the Columbia Co., has been transferred to the wholesale department and will travel in north Missouri. His early reports indicate that he is taking hold on his new job. L. Tippen, who came to St. Louis from Pittsburgh, where he has been in the employ of Columbia dealers, is in charge of the wholesale store at present. The Columbia Co. is planning a rather energetic advertising campaign on behalf of records by Helen Stanley, Bert Williams and Eddie Brown, who are to be attractions here shortly.

Guy Golterman, the former manager of the St. Louis Symphony Orchestra, whose plan for reproducing the addresses by President Wilson and other notables by talking machine records, returned from the East a few days ago and brought some of his records with him. These will be produced through "The People's Forum." Soon after his return he called a meeting of the local committee, consisting of Homer Bassford, a local newspaper man, A. L. Condon, of the Baldwin Piano Co. staff, and himself to try out the records in the public buildings here. Manager Irby W. Reid and C. R. Salmon, of the Columbia Co., were called upon to accompany the committee and they went to the Coliseum to try the records in his hall, the largest in the city and in which something like 20,000 persons can be seated. A \$60 horn machine was placed in the middle of the main floor and the records could be plainly heard in all the galleries. Those

privileged to hear the records declared that they were a most pronounced success.

President Silverstone, of the Silverstone Music Co., Edison jobbers, has gone to French Lick Springs, Ind., for an extended vacation. He was ordered away from his business by his physician, who declared that he was on the verge of a nervous breakdown. Mr. Silverstone had been working exceedingly hard since he began his plans to remove his store to the newly opened warerooms and the delays pertaining to building at present, the constant changing of plans to make the new warerooms more distinct and the trouble of moving and the subsequent opening plans were too much for him and he was unable to attend any of the opening festivities. When he left here he planned to leave the health resort long enough to go to New York to the Edison jobbers' meeting and then return there. Before going Mr. Silverstone installed Myron Goldberg, of Philadelphia, as vice-president and general manager of the Silverstone Music Co.

The Artophone Co. reports an excellent retail trade and that the jobbing trade is all that the firm can handle. Among the recent notable shipments was one that went to Chile, putting this comparatively new institution in the ranks of exporters.

The last week in February the talking machine trade in the four department stores was seriously disturbed by a strike of many of the clerks in those stores, who sought recognition of a clerks' union. While none of the sales folk in the talking machine departments "went out," the trade conditions in the stores were very seriously disturbed and trade was more or less slack all week, especially the record trade. Many persons would not go into the stores for small purchases while pickets were on duty. The machine trade was less affected as persons seeking to make larger purchases braved the

pickets and the ill will of organized labor. The strike did not reach the violence stage.

Late in February considerable interest attached to the window displays on Olive street of high art models. The Silverstone Music Co. displayed a \$1,600 Edison machine, the Field-Lippman Piano Stores the Brunswick Italian Renaissance model and the Columbia Co. the \$600 model. One of these machines was put into the window without signs and with all doors closed, and it was amusing to stand outside the window during the period that it was so exhibited and hear the speculations as to what it was.

A. H. Curry, an Edison jobber at Dallas, was a recent visitor. He wished to see the local stores with a view of getting suggestions.

A recent peculiar circumstance was that Miss Rose Marshal and Miss Bessie Platt, experienced and efficient saleswomen with the Thiebes Piano Co. talking machine department, resigned to go into the millinery business. It has been very seldom that the talking machine folk have quit the game to go into something else here. Usually, the talking machine trade draws from other lines.

MAKING IMPROVEMENTS IN STORE

WILKES-BARRE, PA., March 4.—The Landau music and jewelry firm at 70 South Main street, this city, are making important changes and improvements in their store which will cost several thousand dollars. Recently they closed a new lease of the building for ten years, and plan to install several elaborate Victrola salons on the second floor, and also enlarge their sales and display rooms throughout the building. The Landau firm, which is one of the oldest and most progressive in the State, having been located on South Main street since they began business in 1893, is composed of S. Landau, H. Landau and H. M. Michlosky.

Never mind about the regular way of doing things if you have a better way.

To the Talking Machine Man Who
Is Not Selling Pianos—Why?

When Piano Dealers started to sell Talking Machines with so much success, did they do so at the expense of their piano business? NO—the combination proved to be an instantaneous success—each has helped the other.

Your business, selling talking machines only, is probably as big as an exclusive business as you can make it. Why not branch out? You can do with Pianos what the piano man did with Talking Machines.

With little additional investment and the same overhead expense, you can sell Pianos and Player Pianos profitably. Your piano business will help your talking machine business, and you will make more money. For particulars address

TEAR OFF THIS COUPON AND MAIL

BUFFALONIANS ARE CROWDING THE RECORD DEPARTMENTS

Impossible to Supply Demands for Grand Opera Records—H. A. Brennan With Victor Co.—New Brunswick Dealers—Some Changes in Sales Staff—New Pathé Dealers—Sonora Line With Goold

BUFFALO, N. Y., March 5.—Buffalonians are crowding the record departments of the local stores these days and are clamoring for the latest records. Their enthusiasm is unbounded and their purchasing power seems to fall little short of this standard, but everywhere the oft-recurring report is made: "The supply of records, like the machines, is far less than the demand." Jobbers and dealers say that unless factory output and railroad conditions prove an insurmountable handicap this will be a banner year in the trade. Expanding business in machines and records has caused one concern to seek larger quarters. New dealers are being appointed in the Buffalo territory and the list is to be augmented as the year advances.

It is reported that the recent performance of the Peerless Record Makers in this city has helped the local sale of records materially.

O. M. Kiess, manager of the local branch of the Columbia Graphophone Co., has let contracts for new Columbia quarters at 733-737 Main street. There will be two floors, with 10,000 square feet of space. The place will be ready for occupancy by May 1.

C. M. Wall, assistant manager of the Columbia, is spending the greater part of his time on the road. G. B. Stacey, in charge of the Dictaphone, reports that that branch of the business is increasing rapidly, and that he has equipped some of the largest business houses in Buffalo.

Charles Powers, of Neal, Clark & Neal's shipping department, and O. H. Williams, traveling representative of that firm, have joined the colors.

H. A. Brennan has resigned as manager of the Victrola department of the William Hengerer Co. to go with the Victor Talking Machine Co. Mr. Brennan successfully reorganized the Hengerer Co.'s Victrola business, which in 1917 was the largest in the history of the firm.

J. R. Flynn is manager of the Buffalo branch of the Brunswick-Balke-Collender Co., and Fred G. Eigenbrod is in charge of the Brunswick phonograph department of this branch. These firms were recently appointed Brunswick dealers: J. G. Seeger & Sons, Buffalo; E. W. Edwards & Son, Rochester, and the Kane Furniture Co., Kane, Pa. These concerns, as well as Froess Bros. and Stafford & McArdle, both of Erie, Pa., and the H. H. Roberts Trading Co., Blossburg, Pa., all report good business on the Brunswick.

Arthur Gesser has been appointed a salesman in J. N. Adam & Co.'s Victrola department. W. R. Gardner, manager of this department, will conduct shortly a spring Victrola week. He will be backed by plenty of newspaper advertising and window displays.

In the windows of Denton, Cottier & Daniels are military posters advertising "new Victor records of popular patriotic selections."

Victor & Co., Pathéphone jobbers, have appointed McNamara & Sharro Pathéphone dealers. This last-named concern is opening an exclusive Pathéphone shop at 335 Elk street, Buffalo.

C. N. Andrews, O. L. Neal, V. W. Moody, O. M. Kiess and T. A. Goold recently attended a Cleveland meeting of the Talking Machine Dealers' Association of Northern Ohio.

Albert Schwegler, of Schwegler Bros., Victrola dealers at 219 Genesee street, is building an attractive bungalow in Butler avenue.

W. D. Andrews, of Syracuse, a member of the firm of W. D. & C. N. Andrews, was a recent visitor.

The H. D. Taylor Co., 99-115 Oak street, is jobbing the Perfectrola talking machine in Buffalo and vicinity.

John G. Schuler, Sonora dealer, who received considerable publicity last fall by taking a sen-

sational ride in a Curtiss aeroplane, says he intends to repeat the performance "as soon as the frost is out of the ground this spring."

The Hoffman Piano Co., Sonora dealer, reports that embargoes have somewhat lifted and that shipments are coming through more promptly.

J. H. Hackenheimer, of C. Kurtzmann & Co., has returned from a Western trip. Roy S. Dunn, representing that firm, is in the South.

Lawrence H. Montague, Columbia dealer, has written a new "America," which is being used at the various military camps and by Billy Sunday choruses.

The Ediphone is being widely advertised in the Buffalo newspapers. This machine is being handled by the Roach-Reid Co., 316 Mutual Life Building, Buffalo.

Goold Bros., Inc., have taken on the Sonora line. This is in addition to the Victor line, which they have handled for some time.

The Boston Music Co., of 218 Genesee street, features the Columbia. Harry Fairbanks, proprietor of this store, has been a violin instructor in this city for several years.

The Verbeck Musical Sales Co. reports active spring business on the Columbia and Delpheon.

MUSIC FOR FORESTRY REGIMENT

Thirty-eight Grafonolas Ordered for Great U. S. Regiment of Engineers Now in France

The Columbia Graphophone Co., New York, received recently an order from P. S. Risdale, editor-in-chief of the "American Forestry" magazine, Washington, D. C., for thirty-eight Grafonolas No. 15, enclosed in regular army trunks for the members of the Twentieth Engineers (Forest). These instruments were donated by the Welfare Committee for Lumbermen and Foresters in War Work, and the American Forestry Association. The Grafonolas were shipped to Chaplain Smith, headquarters, Twentieth Engineers (Forest), Washington, D. C., and will subsequently leave for France, where the regiment will be stationed.

These Grafonolas are for the use of thirty-eight separate companies of the Twentieth Engineers (Forest), the largest regiment in the world. This regiment is composed of the country's leading forestry experts, who are equipped to render invaluable service to the armies of Uncle Sam and the Allies abroad. Some of the companies in this regiment have already reached the "other side," and their reports home are typical of the cheery, optimistic spirit which is characteristic of America's fighting forces. These forestry engineers are welded together in an efficient, result-productive organization which is giving tremendous assistance to the "boys" in the trenches.

INDIANAPOLIS TRADE COMPLAIN OF STOCK SHORTAGE

Business, Both Wholesale and Retail, Very Active—Conference of Pathé Dealers—Stewart Co.'s Big Victor Business—Standke Boosts Brunswick—Ready-File Co.'s Expanding Trade

INDIANAPOLIS, IND., March 5.—Business for local talking machine dealers picked up briskly during the closing days of February and rounded out a good month for most of them.

The wholesale dealers report their business as exceedingly good with the chief difficulty being in getting sufficient machines and records from the factories to supply the demand.

W. E. Pearce, of the phonograph department of the Brunswick-Balke-Collender Co.'s branch here, reports that the Brunswick business has been exceptionally good since the first of the year. George McCarty, of Fortville, Ind., is making a record on the number of the higher-priced Brunswick models he is selling.

J. E. Nash & Son, of Franklin, Ind., who also do business in Greenwood and Edinburgh, are

showing good results with the Brunswick. Jensen Brothers, who run the Brunswick Shop of Terre Haute, Ind., are figuring on opening a larger store soon.

T. H. Bracken, manager of the Starr Piano Co.'s branch, said that he is looking for a big year for talking machines. Mr. Bracken is planning to push this end of the Starr business this year.

The Stewart Talking Machine Co., distributor of the Victor line, reports that the dealers have been doing a phenomenal record business, and Emerson Knight, advertising manager for the company, says that the national advertising done by the Victor Co. continues to "pull like a team of oxen."

Miss Agnes Fryeberger, of Minneapolis, will

come to Indianapolis soon to talk to Indianapolis school teachers on the use of Victor machines in the schools. The Stewart Co. is planning on calling a meeting of its dealers to have Miss Fryeberger, who has written several texts on this subject, address them.

A. H. Snyder, manager of the Edison Shop, does not believe in letting conditions control his business.

"The business is here to be got, just the same as it was before the war," said Mr. Snyder. "But we have different conditions to meet and must adjust our tactics to meet them.

"The dealer who sits in his store and expects the buyers to come in might as well close up his shop. You've got to get out to the homes and take your proposition to the homes to do the business." Mr. Snyder has been very successful in working his salesmen in zones in which he has divided the city.

George Standke, manager of the local Brunswick Shop, gave the Brunswick a big boost before the American Club in the Chamber of Commerce. This club is composed of about sixty business men who meet every Monday and each member is allowed a day to boost whatever business he is in. Mr. Standke brought a Brunswick machine to the meeting on his boosting day and the machine did the work in great style. He also gave souvenir calendars away.

M. C. Rosner, manager of the Vocalion department of the Aeolian store, said that business picked up during the last days of February, and that the record business had been exceptionally good since the holidays.

The Mooney-Mueller-Ward Co., distributors of the Pathé, are planning to invite their dealers to a conference to be held within the next two weeks. R. B. Goldsbury, in charge of the company's Pathé department, reports that many contracts have been signed in the last month, and that business for 1918 is looking fine. Lambert Bertha, of La Fayette, Ind., has been engaged to assist Mr. Goldsbury.

H. A. W. Smith, manager of Pathéphone Shop, reports that February business was normal, and that indications are for a good business.

H. E. Whitman, manager of the Victor and Edison department of the Pearson Piano Co., says that the record business continues unusually brisk while the sale of machines runs only fair during January.

Officials of the Ready-File Co. are highly pleased with the way Edison dealers in convention at New York recently took to the Edison machine ready-files which will be ready for the market soon. The company has been unusually successful with its file for Victor machines.

Ben Brown, manager of the Columbia store, reports that February business was satisfactory. George W. Hopkins, general sales manager of the Columbia Co., visited the store Tuesday.

The Ideal Phonograph Co., Rockford, Ill., has been incorporated with capital stock of \$5,000 by B. J. Swanson, John Kinge and M. H. Gustafson.

STEELCRAFT NEEDLES

“MADE RIGHT TO PLAY RIGHT”

Harry R. Leithold, of the Fred Leithold Piano Co., La Crosse, Wis., wins 100,000 Needles for sending us the “first choice” name for talking machine needles of

“STEELCRAFT”

What influenced Mr. Leithold in submitting the name “STEELCRAFT” was our recent announcement in this publication in which we said:

“To assist in selecting the proper name we wish to state that we will manufacture the best steel needles that can be put on the market. Our process of manufacture will be such as to insure the reproduction of every delicate shading and tone. Continued use of our needles by your customers will mean contented patrons at all times.”

“STEELCRAFT” means PERFECTION. This name emphasizes that the Steelcraft Needle is the supreme achievement of modern craftsmanship.

Remember the name **“STEELCRAFT”** when ordering needles from your wholesale distributors for Steelcraft Needles are **“Made Right to Play Right.”**

Why Grand Opera Artists Are Heard at Their Best Through Talking Machine Records

No greater tribute to the perfection of talking machine record making can be conceived than the remarks of critical purchasers these days when selecting records of noted opera artists whom they have heard in New York, Chicago and Boston, that their records are not only equal to their voices, but in some respects the numbers are sung with a perfection and artistry that even transcends the work of the artists in person on the operatic stage.

This is not surprising, for it is a well-known fact that almost without exception many grand opera stars would rather sing before the most critical audience than before a talking machine. The latter is a critic that records every imperfection, and when the test comes it often tells the story of slipshod work. The grand opera singer must sing 100 per cent. perfect in making a record, and this is oftentimes impossible on the opera stage. Hence it is that talking machine records of the grand opera artists are so absolutely perfect.

One would think that it is the simplest thing in the world to stand up before a talking machine and sing, and it might be if the singers did not have to use any more care than they do before an audience.

In the first place it is rather uncanny, standing in a big empty room before a mammoth horn protruding from between curtains, with the conductor away up high where he will not interrupt the sound waves, and the orchestra made up in number and instrumental quality especially for this work.

The singer stands on a wooden platform at the mouth of the receiving trumpet. A few hurried directions are given, and then strict silence is the rule. No human voice or sound

but that of the singer and the music must now disturb the atmosphere, for the machine behind the curtain relentlessly records every little sound wave.

A red light is flashed, and the orchestra gets to work. Then at the crucial moment the artist has to sing to this strange little assembly with the same zest he would under the inspiration of brilliant lights, beautiful clothes, splendid settings and an applauding audience. It is an ordeal, because he has to sing with far greater care in front of the talking machine than is required when an audience is to be pleased. The slightest variation means a start-over, a slight clearing of a throat, a deep breath or slight shuffle of the feet—and the revolving discs record every one of these faults—and the record is spoiled. But these faults are all criticized by an experienced record-director, and it is his business to see that nothing short of the perfect records are produced—because from these first moulds are made all of the thousands of records that go into so many homes.

When the artist has finished, the record is played over and the imperfections criticized. The weak spots are rehearsed, and the whole trying business commenced over again.

And so it is acknowledged by many of the operatic, concert and music-hall stars that to produce a record of pure and distinct tone is far harder than to make their way successfully through a whole operatic score. It is a tremendous task to get a set of the perfect records from the opera favorites. It has been said that Caruso has been forced to spend over four hours of untiring work before he was able to perfect his "Ridi Pagliacci" in the opera of "I Pagliacci," and in that time was forced to

make over thirty fresh starts before a disc of pure and distinct tone was obtained. This may be fiction, or extravagance of statement, but every operatic artist, whether Caruso or Mme. Galli-Curci, knows that when they make records they are singing to millions rather than to the thousands in the opera house, and the most particular pains are taken to have them right—absolutely perfect.

EXPANSION OF DELPHEON BUSINESS

Sales Manager R. W. Gresser Says That the Business of the Delpheon Co. Has Tripled in Volume During the Past Two Months

BAY CITY, MICH., March 5.—The Delpheon Co., of this city, manufacturer of the Delpheon phonograph, is making rapid progress in all parts of the country, and R. W. Gresser, sales manager of the company, states that the Delpheon business has practically tripled itself in the past two months. It has grown so rapidly that the company is only able to barely keep up with the demand, and it seems as though immediate preparations to provide for adequate expansion are imperative.

Mr. Gresser states that the company is in a better position to do this now than a year or even six months ago, as the work in the factory is now thoroughly systematized, and it is possible to turn out the completed Delpheon phonograph with far less work than before, and on a far more efficient basis.

Orders are being received daily from the Delpheon distributors in the South, and, judging from their reports, there is an era of stability and prosperity in this section of the country.

Foreign Records, too, —at Grinnell's

WE HAVE A LARGE STOCK OF ALL
THE FOREIGN RECORDS

Those of foreign birth, irrespective of country, are, almost without exception, music-lovers, and if there are such in your territory you are missing a fruitful source of added business and profits if you are not provided with vocal selections in their own tongue or instrumental music characteristic of the country from which they came.

Glad to go into this matter with you further and give you fullest information regarding any and all details.

Grinnell Bros

Distributors Victrolas and Records

First and State Streets, Detroit

We are of course splendidly equipped to supply you with any of the other Records issued by the Victor Company.

You Should Have a Stock of the Marconi-Victor Wireless Telegraph Records.

They meet a present, and very great demand—they provide a service that is not only unique but of definite value to the country—they demonstrate your progressiveness and up-to-dateness—they afford another source of profit for you.

No better time to order them than TODAY!

Let us add your name to those receiving our advance list of Records likely to be the best sellers. The service is free—and you'll find it of great value.

Will you spend three cents to get rid of that vexing sales problem? That's all the expense necessary—a letter to the Columbia Dealer Service Department will bring you the answer you need.

Woolworth Building, New York

MAKING TOUR OF WHOLESALERS

W. P. White, Manager of Wholesale Victor Department of Thomas Goggan & Bro., Houston, Tex., Making a Most Interesting Trip

A recent visitor to New York was W. P. White, manager of the wholesale Victor department of Thomas Goggan & Bro., Houston, Tex., who is at present on a tour that is taking in the principal cities east of the Mississippi. Mr. White is devoting his efforts to calling on Victor wholesalers, and negotiating the purchase, sale or exchange of surplus stocks, and is meeting with an excellent measure of success. On the way to New York he called on a number of Southern jobbers and also visited the Victor factory. He also called on the trade in New England, and on his way home will visit Pittsburgh, Cleveland, Detroit and nearby cities.

Mr. White, who took charge of the Goggan department about a year ago, was before that time connected for some months with the trav-

eling sales department of the Victor Talking Machine Co., covering New England, and thus has an excellent knowledge of the problems of both the Victor wholesaler and the Victor dealer.

TO AMEND PERSONAL PROPERTY LAW

Bill Now Before State Legislature Provides for Cash and Instalment Prices Being Shown

A bill has been introduced in the New York State Legislature by Assemblyman H. W. Smith to amend the Personal Property Law in relation to displaying the selling price on goods sold under contract or conditional sale. The bill (Assem. Int. No. 537, Pr. 580) adds new Section 68 to the Personal Property Law providing that a conditional vendor who displays or exhibits goods to be sold under conditional sale, shall attach to such goods or chattels, sample or samples, in a conspicuous place, a statement of the selling price for cash and under conditional sale. Violation is a misdemeanor.

L. M. COLE WITH GIBSON-SNOW CO.

Appointed Eastern Representative for New York State Distributors of Sonora Line

L. M. Cole, the "Sonora Man," whose well-prepared booklet on phonograph merchandising

L. M. Cole

received favorable comment from the trade some months ago when Mr. Cole was manager for John G. Schuler, Buffalo, N. Y., prominent Sonora dealer, has been recently appointed Eastern representative for the Gibson-Snow Co., Inc., New York State distributors for the Sonora line.

Mr. Cole's thorough knowledge of the Sonora line ideally equips him to render valuable and efficient service to the Sonora dealers in the territory he will visit, and there is no doubt but that his previous retail experience will stand him in good stead in his present post. The Gibson-Snow Co. is planning an aggressive wholesale campaign, and judging from their business to date, it will be productive of excellent results.

INCORPORATED

The Bolway Co., Inc., Syracuse, was incorporated in Albany, N. Y., last week with a capital stock of \$40,000 for the purpose of dealing in sporting and athletic goods. Those interested are F. E. Bolway, the well-known phonograph jobber, of Syracuse; A. W. Fielder, New York, and E. V. Powell, Chicago.

Manufacturers—Jobbers—Dealers

PERFECTION FLEXI-TONE reproducers attached to PERFECTION ball-bearing tone arms No. 3 and No. 4 play all lateral cut records, on all types of Edison machines. Made in nickel and 24 carat gold finish, extra fine quality.

Tone arms fitted to Edison machines only

The PERFECTION Flexi-tone reproducers will also play Victor and Columbia records on all types of Pathe machines, as they can be attached to the joint that is being sold with the machine for playing these records.

PERFECTION FLEXI-TONE reproducers No. 3, No. 6 and No. 7 fit all types of Victor and Columbia machines. Made in nickel and 24 carat gold finish, extra fine quality.

These reproducers and arms are the very finest made mechanically. The PERFECTION FLEXI-TONE reproducers are the most perfect phonograph reproducers built, reproducing all lateral cut records, from highest pitched soprano, to lowest pitched bass, as perfectly as the records were recorded in the recording room. Wonderful clarity of sound, as well as great volume. Extra fine quality of finish guaranteed. Manufacturers, jobbers and dealers will find in this line of reproducers just what they have been looking for, as they are assembled by skilled workmen especially adapted to this kind of work, producing a product built with watchlike precision.

All accessories in stock ready for immediate shipment. Phonograph manufacturers can have PERFECTION FLEXI-TONE reproducers fitted to their machines. Write for prices, information, etc.

NEW ENGLAND TALKING MACHINE CO.
16-18 Beach Street BOSTON, MASS.

Ohio Talking Machine Dealers Hold First Annual Banquet

CLEVELAND, O., March 4.—The first annual banquet of the Talking Machine Dealers' Association of Northern Ohio, Hotel Winton, the evening of February 20, marked a new era for the members of the organization.

The spirit of the meeting reflected the determination of everybody present to make 1918 a banner year despite handicaps imposed by the European war. The attendance was representative, several out-of-town men prominent in the talking machine business being guests.

The "messages" from the Victor, Columbia and Edison factories delivered by representatives of these big producing plants were stimulating and assured retailers that the manufacturers are not discouraged but will drive straight ahead turning out machines and records as fast as physical conditions will permit.

Charles K. Bennett, general manager of the Eclipse Musical Co., qualified as president and acted as toastmaster. The other officers installed are: First vice-president, A. W. Roos, of the Columbia Graphophone Co.; second vice-president, Elsie E. Baer, of the M. O'Neil Co., Akron, O.; secretary, James G. Card, of the Lakewood Music Co.; treasurer, A. L. Maresh, of the Maresh Piano Co.; assistant secretary, E. B. Lyon, of the Eclipse Musical Co.

Mr. Bennett will not announce his standing committees until the March meeting of the association—the third Wednesday of the month.

There was a splendid menu of eatables and popular and patriotic songs, in which the diners joined, helped to put every one in good humor.

President Bennett Reviews Conditions

President Bennett started the speech-making with an excellent address, during the course of which he said:

"I cannot help but feel that we all have been well repaid for our efforts in organizing this association, and which I am quite sure will develop into one of the strongest and largest organizations in the country; first, because we have represented here merchants from all over this State showing the spirit and desire to cooperate for the good of the business, and secondly, because we have a great number of large cities and all within a comparatively short distance of each other, thus making it possible to have these get-to-together meetings frequently.

"I am firmly convinced that it is the intention of each individual member of our organization to keep his shoulder to this wheel of progress and do his and her part to uphold the policies and principles looking towards the uplift of the business, and as President Hart, of the local Music Trades Association, said the other evening, 'the more open frankness and the better acquaintance we have with one another the more satisfactory will be our business,' and I wish to urge that we adopt this slogan ourselves and carry it out with a view of becoming intimately acquainted with each other.

Many Changes Due to War

"It has been necessary for us to make a great many changes in our business as well as our social life during the past year, and undoubtedly it will be necessary for us to make others in the future, but in no case has the Government interfered with our business, because Mr. Wilson has no intention of so doing. If anything, the President has made our business better because he fully realizes that music is one of the most, if not the most, essential in developing and keeping up the morale of this army and navy that we are now building. Music is, therefore, in more demand to-day than ever before, and that in a measure accounts for the scarcity of machines and records, and with but few exceptions every dealer here to-night showed an increase in his business over 1916. However, he did not come anywhere near supplying the demand that was made upon him.

"The war has opened up a world of new machine and record prospects, as we read in the papers that nine billions of dollars are to be distributed among the working people in the United States this year in return for their labors. These same workers in the past never hoped to be able to earn more than \$15 or \$20 per week, but are now earning \$35 and upwards. These same

laborers never even dreamed of such a condition and so shaped their lives to live within the \$15 limit. To-day, with the prosperity they are enjoying, they do not know as a matter of fact just how to spend this money, and saving is almost beyond their imagination. They do not enjoy the fine luxuries, such as fine homes and fine clothing, and outside of the larger cities they find it difficult to secure amusements such as theatres, and the 'booze' question is being curtailed to a most marked degree. The conclusion, therefore, is a very plain one.

"This new field open to us now is that section in the mill and factory districts. These work-

President Charles K. Bennett

ing people, like you and I, love music, and in the past have been contented with the 10-cent record and the \$5 machine, and besides did not feel that they were welcome in the exclusive shops, and grand opera music was beyond their comprehension. I had a personal experience this last Christmas with an individual coming into our retail store, dressed very poorly and without even a collar on, smoking a big black cigar, and his hat tilted on one side of his head. He stated that he was looking for a Victrola, something very good, and further explained that they now owned a small \$50 machine. 'You see I am making more money now,' he stated, 'and am traveling in better society, and we really need a big machine.' That describes my thought very clearly, and I want to ask if it is not a fact that there are a great many more just such characters in this city, and in fact, throughout the entire country. They are plentiful, and like my

Important addresses made by President Bennett, Geo. W. Hopkins, Henry C. Brown, J. Raymond Bill, C. H. Grinnell, an Interesting Letter from Wm. Maxwell

old boss used to tell us boys on the road, 'the proposition is just like gold mining, you have got to dig it out'—and so it is you must dig out these fellows who are making good salaries, and you will flatter them, offering them the popular-priced machines as well as to offer the service of your up-to-date store. I could keep on enumerating a lot of other ideas that could be worked and given serious thought; however, just take this little tip and go after the working class as you will find them ready buyers and quite liberal spenders."

Thos. H. Davies' Pertinent Poem

Following Mr. Bennett, Thomas H. Davies made a short address flavored with lots of good humor along the line of existing machine and record shortages. He closed with this poem:

Another year has now passed by,
The future greets us with a sigh.
When e'er machines we try to buy,
The shortage reaches to the sky.
It stares at us as we pass by,
All we can say is, me, oh my.

The jobbers use their old excuse,
And make us all feel like the deuce.
They tell us all there is no use
To pester them, they don't produce
They say they try to do their best
But that machines keep going West.

They told us this a year ago,
And we all thought that it was so.
We dealers do not want to crow
We all have made a lot of dough.
Machines came slow but fast they go,
Let's hope it will be ever so.

And as we get down to facts,
I'm sure we'll all agree
We're lucky that we're living
And in a land that's free.
Our business has been very fine,
Let every one keep this in mind.

We've all made money in the past,
Now is the time we must hold fast.
Our ship is in a heavy storm
Our duties we must all perform.
Let's help each other this year through,
That is the least we all can do.

A. W. Roos was the next speaker and he dwelt briefly on the efforts to be made during the coming year along the line of preserving the present high merchandising ethics of the talking machine retail business.

A "Message From the Victor Factory"

Henry C. Brown, in his "Message From the Victor Factory," declared the ladies are largely responsible for the great demand for talking machines and music. He drew a picture of the early days of talking machines and said the Victor Co. will continue to do what it has done from the start—aid dealers in building up business and placing it on a high basis.

"There is no limit to our business," said he. "Talking machines have added much to the life of our people; they have added both pleasure and profit to the world. Before the advent of talking machines the voices of the world's great singers died when they passed away. We have no way of comparing the voices of artists now dead with those of the great living singers, but the talking machine and its records have made it possible to preserve the human voice, so that when its owner dies posterity will be able to make comparisons between the singing and playing of living and dead artists.

"Before the coming of the talking machine the great artist was silent forever after his or her life was done. Now their efforts are preserved to posterity, like the sculptor's or the painter's."

"Our business is one of the greatest in the world. We should look at it from a high viewpoint. There is no place in our ranks for the fellow who gets discouraged.

"The Victor Co. is probably the largest advertiser."
(Continued on page 32)

Father Finn's Paulist Choristers are taking the country by storm; their New York appearance was a triumph. Are you among the many dealers who are sending in repeat orders for their exclusive Columbia records? A new one in April that will go big.

**Columbia Graphophone Co.
Woolworth Building, New York**

OHIO TALKING MACHINE DEALERS HOLD ANNUAL BANQUET

(Continued from page 31)

tiser in the world and we expended on publicity much more than \$2,000,000 last year and are going to keep right on spending in 1918. I believe in uplift advertising. We are doing it and we are going to keep on doing it. We are optimistic at our headquarters and are trying to spread this optimism all over the country. We are apportioning as much money for publicity in 1918 as we expended in 1917. We are going to give you the same support we did last year and want your co-operation.

"We gave you more goods in 1917 than you got in 1916," said he. "We are going to keep right ahead giving you goods as long as it is physically possible to produce machines. No man can foretell the future cost of goods. Labor, raw material—everything—has advanced and is going higher. The price of some articles has jumped 1,600 per cent. We have solved problems as they came before us and will continue to do so." He cited an instance where representatives of the Victor went to a big brass center to get materials with which to build machines. They were able to get the materials but could not get them accepted by the railroads. Trunks were bought, automobiles hired, and the goods transported 250 miles in this manner to the Camden factories.

In referring to current shortages Mr. Brown said:

"The higher ups set the pace for the buying of talking machines, and naturally when the better classes buy machines the lower classes fall into line. The Victor people could vastly increase their output and their sales if they allowed inferior workmanship and put forth an inferior grade of products, but we will not do this. Every machine that leaves our factories is tested. We invite honest competition, but we have no use for the thief in the dark. It is up to you to defend and stand by the merchandising principles which have made your business what it is to-day. We will protect dealers and the trade as far as we can, if the Federal Government will aid us."

Mr. Brown also explained the needle shortage, and described the Tungs-tone stylus and its particular merits. He explained that the taper point of the ordinary steel needle wears away so that it does not fit down into the groove, while the point of the stylus is of the same diameter its entire length, and wears away evenly and thus always fits into the groove. He recommended the use of the Tungs-tone stylus as it will help relieve the needle shortage.

George W. Hopkins Talks on Salesmanship

George W. Hopkins, general sales manager of the Columbia Graphophone Co., who was scheduled to deliver a "message from the Columbia Factory," really delivered a most inspiring address on salesmanship, in which line he ranks as an expert. In opening his remarks Mr. Hopkins declared that the heart of Columbia employes, each and every one of them, is in the company they serve.

"I went to accept the resignation of a certain man," said Mr. Hopkins, "but when I saw a card in his office reading, 'To hell with yesterday—what's doing to-day?' I did not ask for the resignation, believing that this employe was determined to overcome everything in his path. This typifies the new spirit in the hearts of Columbia employes. We are seeking to put the buyer in the picture with Columbia Grafonolas. If a buyer is in a snap shot with a machine the buyer is in the picture.

"A retailer can start two ways—right or wrong. The phonograph business is different from other lines. Retailers, or many of them, must learn how to merchandise their wares properly in an honest-to-God way.

"It is unfair not to charge interest on instalments. The cash buyer should have a discount equal to the interest on instalment payments.

"The human eye is a finance committee in seeking selling goods. In too many stores goods are not changed about. You find the same old thing in the same old place from day to day and the result is that no attention is paid to such displays. The ways of our grandfathers get us nowhere in business to-day. We must learn to look out—not in. We should get out and talk business methods with other men to get their viewpoint and to swap ideas. When two men swap dollars each has what he had before the trade, but when two men each swap an idea each has two ideas instead of one.

"We are apt to look too much at big sales—and not to watch the small affairs in our business. The man behind the counter should have his chance. The best advertised line of goods in the world can easily be damned by clerks and salesmen who have been offended.

"I would make the clerks of a retail store responsible for the store. Place these men on their merits and their mettle. I would impress upon this class of help why I engaged in business and endeavor to have them look at the results through my eyes and with my ambition to succeed.

"If Tom, Dick and Harry were my clerks I would give each one of them an opportunity to run the store. Each would vie with the other in seeking new ideas, new ways to dress shop windows, etc. In a short time this trio of clerks would be exchanging views with clerks all over the city and gaining ideas to build up my business. It pays to make thinkers and originators out of mere clerks behind the counter.

"I would pass from clerk to clerk when patrons were in my store and offer suggestions which would make the clerks know that I was personally interested in pushing their sales. I would impress my personality on every patron when I could.

"Don't play your game the way the other fellow plays it, for he will beat you; play it a new way, one of your own. Six months is the usual life of a talking machine, so it is up to us to find a way to prolong this life—that is, give the

machine a new lease on life by offering buyers records which reproduce the proper music—melodies that are wanted. The better-grade music, if reproduced at the psychological moment in trying to make a sale, will start a phonograph on a new lease of life.

"Soldiers want music, yet wherever I go I hear pleas for cigarettes for our boys—but seldom a plea for music.

"We will have more failures than ever this year. The rich will buy less, but there is another class making war wages that must be taught how to buy. The fellow who up to now has never had spare cash does not know really how to buy. The two great themes for our educational propaganda are "What to buy" and "How to buy." By advertising the advantages of buying a talking machine we will educate the greatly enriched laboring class to long to own a talking machine. In other words, teach them what to buy. By advertising how to buy a talking machine we will reach that class whose income has been cut down by the war and who therefore are now interested in spending judiciously and with good reason, where heretofore they spent freely and without special thought."

William Maxwell Discusses Non-Essentials

Owing to the fact that he was called upon to attend the annual convention of the Edison Disc Jobbers' Association in New York, William Maxwell, vice-president of Thomas A. Edison, Inc., was unable to be present at the local banquet as expected, but sent a paper, which was read by President Bennett. After a characteristic introduction Mr. Maxwell, in his paper, launched into the discussion of the question of non-essentials and said in part:

"A while back there was quite a number of prominent gentlemen who were pulling long faces and urging that the manufacture and sale of non-essentials be discontinued. A great deal of time was devoted to the preparation of a list of non-essentials. Finally, however, it was discovered that nobody knew what a non-essential really is. I understand that one gentleman said the only non-essential he could think of was lager beer. I do not know why he did not include Bourbon whiskey. Perhaps he is a man who packs a flask on his hip. Another gentleman thought that maybe perfume was a non-essential, but we married men who are familiar with the secrets of feminine toilettes know that perfume is regarded in certain quarters as quite essential.

"The dollar-a-year man and others who were railing against so-called non-essentials apparently did not get very much encouragement from President Wilson. Mr. Wilson intends to

win the war and will go to any necessary lengths to accomplish that result, but it is very evident he does not intend to hamstring business. I cannot understand what ails some of the men who have aired their views as to the proper way to win the war. Take the following for example:

"First, cut out the production of luxuries and non-essentials. Second, cut down the additions to permanent improvements and equipment, restricting them to such only as will aid in carrying on the war and essential industries. Third, keep enough people employed upon the necessities to support the country and the army and put the others to war work. Fourth, turn into the treasury, through taxes and loans, the money

"The spirit of cheery confidence," in spite of what all the preachers of melancholy from Frank Vanderlip down may say, has been our great national asset during the war.

"Happily for the nation, many of the 'preachers of melancholy,' if that is the name to call them, have experienced a change of heart. It is no longer quite so popular as it was to preach the wrecking of business as an aid in winning the war, and I do not think the national instrument trade needs to fear any drastic action on the part of the Government. The musical instrument industry, as an act of patriotism, stands in readiness to take a back seat to war industry whenever it is necessary. As soon as the freight tangle is straightened out I believe we can look

up to the retailer to get in touch with his share of the 9,000,000 families to compensate for his share of the several hundred thousand families.

"Retail business depends upon the earnings of money makers. The 1910 census showed that at that time there were 30,000,000 male money makers in this country and that there were 8,000,000 female money makers. Of these 33 per cent. were engaged in farming; 2 per cent. in mining; 28 per cent. in manufacturing and mechanical industries; 7 per cent. in transportation. In other words, about 70 per cent. of the money makers in this country are making more money than they ever made before, and, when I say making more money, I am taking in full account our old enemy—the high cost of living.

"I do not think I am naturally an optimist. But I can say to you gentlemen that, in my opinion, nothing short of some great calamity

Annual Banquet Talking Machine Dealers' Association of Northern Ohio, Hotel Winton, Cleveland

At Speakers' Table, Left to Right: C. H. Grinnell, A. W. Roos, G. W. Hopkins, Louis Meier, Retiring President of Association; Charles K. Bennett, New President of Association; Henry C. Brown, Leo. Hall, President Pittsburgh Talking Machine Dealers' Association; Thomas H. Davies and J. Raymond Bill.

released which was previously paid to these people now released from private service to war work.'

"I could scarcely believe my eyes when I read the foregoing expression of an opinion. Is not that fourth proposition a corker? Let us assume that a manufacturer of so-called non-essentials has a pay roll of \$100,000 a week. He discharges all of his men, tells them to go out and get work in the shipyards and munition factories. True, he no longer has to meet his pay roll, but, on the other hand, he would have in a very short time no money to meet it with, or to pay his taxes or to contribute in any other way to the support of the Government. His employees, even if they did find other employment, would be put to great expense in changing their place of residence. All the distributors who sell the manufacturer's products would be put out of business or seriously crippled. For every dollar thus 'released from private service to war work,' \$5 would be rendered unavailable. The particular banker who expressed this opinion overlooks an economic principle, which I once heard tersely expressed by a man who was running a drop case layout on a country fair ground. The gambler kept shouting, 'come on, boys, money won't grow in your pockets like the hair on your head.' We need to grow money, otherwise new wealth, in this country, and I am very thankful to say that I believe the President and his trusted advisers realize this necessity. There has been a great deal of exaggeration in regard to the scarcity of labor. Of course, there is a scarcity of labor in certain quarters, but when you think of what Canada has done, you will realize that if we do anywhere near as well, we can do all that our Allies expect us to do and still keep business getting better than usual.

"A great many consider Mark Sullivan, editor of Collier's Weekly, the best magazine editor in the country. Certainly he has a clear grasp of national affairs. Recently he said:

forward with absolute confidence to a year of unusual prosperity. We must not forget, however, that conditions are somewhat changed. The purchasing power of the country has been shifted around considerably. At least 9,000,000 families are better able to purchase phonographs this year than they were last year. Opposed to these are several hundred thousand families whose purchasing power has been reduced. It is

to the nation can prevent 1918 from being an exceedingly prosperous year for every live merchant in the musical instrument trade. Music is not a non-essential any more than literature. Accordingly, musical instruments are just as essential as books. There are certain levels of civilization where food and drink are the only essentials, but thank goodness that is not the

(Continued from page 33)

kind of civilization we have in this country. In America food for the body is only a little more important than food for the mind. Next to religion music is the greatest mental solace. Everyone of you members of the association ought to be proud you are in the musical instrument business and you ought to be insulted if anybody hints that music is a non-essential. We are going to win the war and we are going to make every necessary sacrifice, but the President of the United States, in my opinion, will do his best to see that no unnecessary sacrifice is made. I have confidence in his wisdom and the sincere belief that he possesses the courage of his convictions at all times. I am not a Democrat, but I take off my hat to Woodrow Wilson, the greatest of all Democrats and perhaps the greatest of all American statesmen."

J. Raymond Bill's Address

J. Raymond Bill, associate editor of *The Talking Machine World*, spoke in part as follows:

"My sole message is to enter a plea that we music men of America bend every effort toward making our nation intensely optimistic. No doubt mistakes have been made at Washington, but many of the errors have already been rectified and if the next six months are characterized by as much forward progress as the last six months have been, Uncle Sam will be in line for hearty congratulation.

"These days it is important to look at things from the very broadest viewpoint possible, if we would not have our enthusiasm sapped by that worst of parasites, pessimism. Viewed with regard to the immediate present, the fuel shortage, the rail congestion and the non-essential bugaboo might have offered grounds for alarm. And yet we all know mild weather is the certain solution of the fuel and transportation problems. During the last two months, moreover, those in close touch with Washington have seen a definite knockout delivered to the non-essential bugaboo. Banker Vanderlip, chief

exponent of what I choose to term irrational economy, has subsided to California where, let's hope, history will repeat itself in that California will not be heard from for some time. Along the same line, I would call attention to two articles appearing in the February issue of *The Nation's Business*, the official organ of the United States Chamber of Commerce. One article is by Dr. Garfield and the other by Mr. Noyes. Both are important figures in the National Fuel Administration and both in their articles directly refute the idea that there is any such thing as a non-essential. It, therefore, remains for us of the music industry to convey to the consumer public the common sense attitude that now prevails in official Washington.

"There are many other signs of a highly encouraging nature. Take, for instance, the practice of the modern army. It has been definitely established that the soldiers cannot and will not endure the fearful waiting periods of modern warfare without relaxation. The generals have found that army morale seriously deteriorates when the men are favored with only the so-called essentials of life—food, raiment, lodging. The military experts have found the modern man is not a savage and that his list of essentials is somewhat longer. To-day we, therefore, find theatres, reading matter of all kinds and music have joined the colors both with the American Expeditionary Force abroad and with our troops in the national cantonments at home. Three things, which one not versed in human psychology might imagine unnecessary, have proven to be in fact bulwarks of army morale. And if the fighting forces can't do without these things, it is folly to imagine the great civilian populace will dispense with such obvious life-essentials.

"I do not hesitate to predict that the music industry will come sooner or later to be recognized as a war industry proper. In the meantime, as I see it, our slogan might well be 'Cheer Up, America' and our purpose, if the

ladies will pardon the reference to Sherman, might well be to show Germany that Uncle Sam can fight to victory and at the same time endure the hell of war with a smile on his face."

What Pittsburgh Dealers Have Done

French Nestor, scheduled to tell about what has been accomplished in Pittsburgh by the dealer association in that city, could not attend, and Leo. Half, president of the Pittsburgh Dealers' Association, spoke in part as follows:

"First of all we got together and got acquainted—both with each other and with each other's problems. We learned to call ourselves and our mistaken methods by their right names. We canned the spirit of antagonism and retaliation and instituted instead a real honest-to-God desire to help each other in trade matters, to build up clean methods of advertising, etc.

"All that we have accomplished or hope to accomplish we attribute solely to getting started right and to maintaining the closest possible friendly relations, to frank discussions in open meetings, and genuine desire on the part of all members to keep conditions and competition clean. Do we believe in competition? We do. We believe in more business just as strongly as in better business and we have religiously avoided from the start any ruling or policy that would limit members. We favor complete freedom to formulate and carry out one's own sales policies and to advertise them in his own way—so long as the essential principles of fair play and trade betterment are observed.

"It is our policy to encourage initiative and 'pep' of whatever variety or kind.

"True, we believe in co-operation for trade building, but we realize success of the individual merchant depends solely on his own individual effort, energy and foresight. We do not jolly ourselves into believing that our association guarantees us continued prosperity, unless each member puts the right amount of effort and energy into conducting his particular business.

"We believe in music as a prime human necessity. We believe absolutely in the future of the talking machine industry, because the talking ma-

-WHY- Do You Use Tone Arms

“off the shelf”? You spend time and money freely on the design of a cabinet, why compromise on the tone arm? Why don't you put the same thought into the tone arm? Make it at least as distinctive as the cabinet.

We have experts who are specialists in designing tone arms that will blend with your cabinet in quality and appearance—that will continue quality unbroken from sound chamber connection to stylus groove.

These men are ready to serve and prove to you by sketches and figures that “INDIANA” made tone arms will increase the value of your machine and make it a better selling proposition.

Bear in mind that acceptance of this service does not obligate you in any way and anything developed for you is for you exclusively, and is not sold or sampled to your competitors.

OHIO TALKING MACHINE DEALERS HOLD ANNUAL BANQUET

(Continued from page 34)

chine and records to-day are the most convenient and satisfactory form of music for the average American home. Talk about industry having reached the peak is all 'bunk.' More talking machines and records will be sold this year than ever before provided only they can be produced and distributed under present conditions. The dealer who lies down is on the wrong track. If certain machines or records cannot be procured, he should push other types that can be procured.

"An important change coming out of the war conditions is the development of higher service standards. In the future the retail merchant must give closer and more studied attention to the actual helping and assisting of his patrons—to rendering a distinct service value wholly beyond and outside the article of merchandise delivered. The customer is rightfully entitled to this form of helpfulness in return for money spent through the dealer.

"We believe co-operation should not be confined to separate districts. We believe districts should co-operate. For example, there should be closer co-operation in trade matters between Pittsburgh, Cleveland, Buffalo, etc.

"We believe trade organizations in important centers should encourage the formation of smaller local associations to co-operate with the central association."

C. H. Grinnell Talks on "Value of Co-operation"

The next speaker on the program was C. H. Grinnell who made a special trip from Detroit, and who discussed "The Value of Co-operation" in the following interesting manner:

"The Detroit Talking Machine Association was organized February 7, 1916, with a membership made up of forty-two of the leading dealers of talking machines in the city of Detroit and Highland Park.

"To say that the association has been a tremendous influence for good among the talking machine dealers would be putting it mildly. In my judgment the one great cardinal feature which it has accomplished above all others has been the personal element which has been injected into the business.

"Previous to the organization of the association the various dealers, located at their several stations throughout the city, were practically unknown to one another and as a consequence irritation was very common among them and it was with reluctance that they fraternized with one another. After a period of two years this heretofore disturbing element has been entirely corrected. By the monthly meetings friendships have been cultivated between the various dealers and in many instances the prefixes of Mr. have been entirely disposed of and John meets Frank and Frank meets Bill.

"Much more could be said on this point, but why should I continue lest I be called presumptuous?"

"In passing I wish to mention some of the special things which the dealers of Detroit feel have been accomplished through the efforts of the association. There has been a noticeable shortening of time of the life of contracts which are now secured upon talking machines. The approval business has been helped tremendously. Previous to the organization of the association it was not uncommon for records to be out for at least seventy-two hours. Through the concerted efforts of the association at the present time twenty-four hours is a maximum and practically one-third of the records taken are kept by the various people who avail themselves of the approval privilege.

"Further, the association has encouraged the carrying of packages which are small and the returning of small record orders, thus co-operating with the United States Government in this world-wide war for democracy's safety.

"The sending of records upon a Saturday and days preceding holidays has been entirely dispensed with and the ten days preceding Christmas of the year 1917 no records whatsoever were sent out on approval.

"A departure from the old-established precedent previous to the organization of the talking machine association would have been impossible to have accomplished—the upholding of the interests upon contracts has been generally complied with. Previous to the organization of the association it was found that department stores failed to recognize the import of the interest loss. Since the advent of the association they have refrained entirely from newspaper advertising, bills, cards, etc.

"In conclusion, the one great thing that has been accomplished by bringing the different dealers together is an extremely kindly feeling for one another. Honest differences that were practically impossible to adjust previous to the organization of the association are now adjusted to the satisfaction of all concerned."

Send Protest to President Wilson

V. W. Moody was called on for an impromptu report on what the dealers' association in Buffalo has accomplished, and following this a telegram was sent to Woodrow Wilson as follows:

"Cleveland, O., February 20, 1918.

"To His Excellency Woodrow Wilson,

"President of the United States.

"The Talking Machine Dealers' Association of Northern Ohio, assembled at their annual meeting at the Hotel Winton, raises a voice of protest against the ruling of the Justice Court, prohibiting the recording of Bohemian, Polish and Slavish airs, on the grounds that the above-mentioned peoples are an alien enemy.

"These unfortunate countries, especially Bohemia, have sent thousands of volunteers to the Allied armies to join in the fight for freedom, from the tyranny of the Hapsburg dynasty, so that the whole world will have everlasting peace.

"The Slavs in America, as records show, are the most law-abiding and peaceful citizens. This law may create unrest and bitter feeling if enforced.

"Therefore be it resolved, that the Talking Machine Dealers' Association of Northern Ohio plead with Your Excellency to rescind this order and proclaim and place these peoples upon an equal footing with all other true and loyal Americans."

Those Who Attended

Among those present at the banquet were: Mr. and Mrs. T. H. Towell, Mr. and Mrs. P. J. Towell, Mr. and Mrs. C. K. Bennett, Mr. and Mrs. E. B. Lyons, Mr. and Mrs. Jack Kennedy, Mr. and Mrs. Norman H. The Bliss Reproducer

Will Play All Records

A new superior and scientifically constructed sound box—no mica, rubber or cork used.

Beautiful full, rich tone quality, clear articulation. It individualizes each voice and instrument in the record. Greater volume with lighter needles, thus minimizing wear on records.

A demonstration of the Bliss reproducer means a sale—each sale brings another, for every music lover who hears the Bliss reproducer wants one.

Comparative tests solicited. Write today for dealer proposition.

WILSON LAIRD PHONOGRAPH CO., Inc.

29 West 34th Street, New York City

Canadian Distributors: HAWTHORN MFG. CO., 145 Yonge St., Toronto, Can.

THE TRADE IN PHILADELPHIA AND LOCALITY

PHILADELPHIA, PA., March 6.—The talking machine business in Philadelphia during the month of February has been as good as could reasonably be expected, from the general condition of affairs. It was hardly as good as February a year ago, but then this country had not entered the war, and the February of 1917 was an exceptionally good month, and the question of meeting war demands did not enter into the situation, tending to curtail the output.

During February the Victor Co. have delivered a fair percentage of the machines ordered, but they have been shy on records, and many of the most popular sellers have been hard to obtain, and therefore the amount of business has been somewhat curtailed. The freight situation has eased up a bit and the jobbers and dealers are getting out their goods very much more satisfactorily.

Larger Quarters for Geo. D. Ornstein & Co.

George D. Ornstein & Co., recent retailers and jobbers of the Victor talking machine, who for a brief period were located at 9 North Eleventh street, have taken very large and commodious quarters at the southeast corner of Eleventh and Chestnut streets, where they will occupy the second, third and fourth floors of that large and spacious building. They began to move in the past week, and are having the place shelved and will have as much floor space for the handling of machines and records as any firm in this city. The offices of the firm are on the second floor, and they will have fine elevator service.

Two new Victor dealers in this city are Theodore Presser, the big music publisher, and the Estey Piano Co. at Seventeenth and Walnut streets.

Busy Times With Columbia Co.

The Columbia Graphophone Co., at 210 North Broad street, report that their business has been remarkably good for the past month. During the early part of the month they were pretty well tied up with freight embargo, but this was lifted, thereby enabling them to get records from the factory in sufficient quantities to keep the dealers supplied, especially with the popular sellers. Machines from the Columbia factory have been coming through in fairly good volume. Among the visitors at the company's offices the

past week was F. K. Pennington, assistant general sales manager of the Columbia Co.; W. A. Quint, of the office force, has enlisted in the navy and has been sent to Fort Trumbull, New London, Conn.

Solving the Freight Problem

J. E. and W. H. Nace, Columbia dealers at Hanover, Pa., took the freight troubles by the horns the past week. They came to Philadelphia with four automobile trucks, loaded them with Columbia machines and records and returned home. The only trouble they experienced being the running short of gasoline, one puncture and one blowout. The drivers of the trucks were W. H. Nace, Allen G. Nace, George T. Adams and C. B. Myers.

WEYMANN SERVICE

Good Report From the Louis Buehn Co.

Louis Buehn, of the Louis Buehn Co., Inc., states that his business in February was very satisfactory on the whole, but showed a loss against February of 1916, due entirely to their inability to secure goods from the factory. "The record supply question," Mr. Buehn says, "is very serious at present, and it has been almost impossible to secure the most popular of the records. Machines in February came through on a par with last year." Mr. Buehn does not believe that conditions will improve to any great extent during the spring and summer, owing to the supply and manufacturing situation.

Among the Buehn visitors the past week were Leon Wittich, of Reading, and Mr. Kleinhaus, representing the Werner Co., of Easton, Pa. Edward J. Bliss, of the Buehn sales force, who recently enlisted in the navy radio service, has been transferred from the Navy Yard here to the Marcus Hook station, where he will be in charge of the wireless plant.

Good February for Penn Co.

February was the best month the Penn Phonograph Co. has ever had, "strange as this statement may seem to the trade," said Mr. Barnhill, but it was due to a condition, the stating of which would reveal a trade secret. Mr. Barnhill states that business looks very promising for March.

Charles A. Reed, who has a large talking machine store at 3718 North Fifth street, has put in two new hearing rooms, and otherwise improved his store.

Minnie M. Hart, of Chester, Pa., has just opened a new store and fixed it up with new booths, and had a very satisfactory opening a few days.

At "The Home of the New Edison"

Blake & Burkart, "The Home of the New Edison" in Philadelphia, are very much elated over the business they done in February. "We are going at it strong this month," says Mr. Blake. "Machines and records are coming through very well, except the delay in shipments." If the delay should continue they are contemplating bringing the goods here by auto trucks. They have placed an attachment on the Edison machine in their store which is called the C and E

(Continued on page 38)

SELL RECORDS

JASCHA HEIFETZ

If Victor dealers will adapt themselves to war conditions by pushing the sale of the higher priced records, it will be possible to do the same cash turnover with a numerically smaller stock.

PENN PHONOGRAPH CO.
17 S. NINTH STREET PHILADELPHIA

Four words only of the English language end in CION.

But EVERY sale of a Victor Record ends in COIN.

So we can create "Record-coin," which is most essential for your business vocabulary.

Make this new word your slogan for Spring record sales. Buehn Service has been telling you for years about selling more records and has been backing it up with such efficient record co-operation that altho it operates locally in one sense, its reputation has become National.

You would be surprised to know about the many record orders received by Buehn Service from all over the country; it does make deliveries if we have a surplus, but our main efforts are exclusively for the Victor dealers of Philadelphia territory.

The Victor factory sends you many good points on HOW to sell more records and Buehn Service delivers the records when you want them.

Create a prestige as "the record house" of your city.

Every Victrola in your city should have a Record-Lite. It corresponds to searchlight on an automobile. It gives more light where the Victrola owner needs it and nets you a good profit for your interest in his behalf.

THE TRADE IN PHILADELPHIA

(Continued from page 36)

Repeater. It is a very useful device for its purposes, the attachment lifting up the arm of the machine and carrying it back and placing it in the proper starting position on the record, making possible the playing of a record over and over until the machine runs down.

Blake & Burkart have begun the issuing of a little magazine of information, which is entitled "Re-Created Notes." It is attractive in appearance, is utilized for the advertising of every part of their business, as well as the exploiting of the Edison machines and records. They are preparing an elaborate celebration for their Anniversary Week, which occurs April 14-20.

Pathé Shop Starts Publicity Campaign

The Pathé Shop here has started an advertising campaign in the local papers and with telling effect. In February Mr. Eckhardt says there was a constantly increasing interest and sale for the Pathé products, and notwithstanding the limited number of days they were able to do business in February, the month ended with a most satisfactory finish. Mr. Eckhardt says: "The finish was even beyond our most sanguine expectations, the month's business having exceeded somewhat the quota that had been established. It is quite evident that the local trade and patrons in this vicinity are becoming aroused to the advantages of the Pathé line, and we have made some very valuable and high-class connections."

A new addition to the Pathé Shop sales force is Louis Winch, the well-known singer. He has been making records for other companies for some time. H. H. Smith, a former Columbia employe, has joined the sales force at the Pathé Shop. The Pathé is represented in this city and vicinity by seventy dealers at present, and others are being constantly added.

George W. Lyle, of the Pathé Co., spent a day in Philadelphia recently, his first visit to the Pathé Shop. He was more than well impressed with the institution and organization.

The New Pathé Recordings

Manager Eckhardt says that he has only the highest compliment for the Pathé Co. in its record offerings, the April list representing a number of records which they have been permitted to put on special sale, and he says they are of the class that cannot help but make a deep impression for the artistic interpretation as shown in the recording.

Lively Demand for Dictaphones

C. A. Malliet, manager of the Philadelphia Dictaphone Co., reports that they have had a very good February in spite of the short num-

ber of working days. March looks fine to him. They have at length gotten their school in thorough operation, and it is in charge of Miss Belle R. Kinsloe. Among the recent visitors was William Kobin, of the executive offices of the company. They have added several new men to their selling force.

The Dictaphone Co. had a very interesting exhibit of the machine at the Atlantic City convention the past week of the National Educational Association. C. P. Hanson was in charge.

Cheney Machines Forging Ahead

The Cheney talking machine has been rapidly forging to the front in this city. A number of new agencies for the machine were created in February. G. D. Shewell, who represents the machine in this city, spent nearly a week at the Chicago factory recently. One of the most substantial of the dealers who started the handling of the machine in February was the Mather Brothers of New Castle, Pa. Marion

Cheney, a son of the inventor, whose home is in Philadelphia, and who is a sergeant in the army, was in Philadelphia on a ten days' furlough.

Victor Display at Weymann's

The Weymann firm is this week making a very fine window display of the Victor. They have a miniature British tank with military surroundings which is attracting a great deal of attention. The Weymann business in February was very satisfactory. They succeeded in securing large orders for the Marvel Victor Record Display Holders from firms who have come to recognize in this the best device on the market for the attractive display of records. The dealers who have used it find that it materially increases the sales of Victor records. The firm have placed in their Victrola department the past week Freda Robson and Leo Sandman to take the place of their men who have gone into the Government service.

ONE OF H. A. WEYMANN & SONS' PATRIOTIC WINDOWS

PHILADELPHIA, PA., March 4.—There are a thousand and one ways in which American business has adjusted itself to war times. Among others is the introduction of the war motive into window display, and along this line a recent window of H. A. Weymann & Sons, Inc., of this city, challenges all comers for attracting the attention of passers-by.

The display shown in the accompanying picture was made possible through the cooperation of a Philadelphian who recently returned from active service in France. A typical fighting trench has been built up by the use of sand bags and a foliage screen. Behind the sand-bag wall a dummy man clad in a British officer's uniform is shown listening to a portable model Victrola. Several close-up war photographs are shown in the foreground and numerous war trophies are appropriately placed in the trench scene. The war trophies are all genuine and

include gas masks, the knives of the African Chasseurs, a rifle, a ukulele, shell noses, steel helmets, and other paraphernalia of the battle-

Window That Attracted a Large Measure of Interest

field. The effect is striking, so much so that a photograph is inadequate to convey an idea of its merits.

WESER PHONOGRAPHS

For 39 years the piano trade has recognized in Weser instruments the highest piano and player piano value. It always has been our delight to invite comparison of the Weser products with those of other makers. Many of our best dealers have been acquired by such comparisons.

Weser Phonographs are making rapid headway in the same manner. Compare them with the world's most expensive makes—in tone quality—in appearance—in reliability, and solidity of construction, and we are content to abide by your decision.

The **Weser Phonograph** will play any record. Made in satin finish mahogany. Other woods on special order. Electric motor will be furnished if desired. Write for catalog.

BUSINESS VOLUME BREAKS ALL RECORDS IN MILWAUKEE

Comparative Figures That Are Most Impressive—Another Co-operative Advertising Campaign—New Brunswick Dealers—Badger Co.'s Big Victor Business—Edison Popularity—News of Month

MILWAUKEE, Wis., March 12.—One of the most remarkable things in these remarkable times is the fact that talking machine business in Milwaukee during the first two and one-half months of 1918 has been much greater in volume than the transactions for the same period of any previous year. The situation is described as remarkable because not a single talking machine man in this city had looked for or even dared to hope that 1918 would bring a business as good as that of former years—probably because of the general feeling that one must expect poor business under conditions such as the trade is contending with. But Milwaukee dealers started out the new year with a firm determination to throw off that feeling, and the results speak for themselves.

January, 1918, showed a fine gain over the same month of 1917 on the books of most dealers. February showed up even better, and the tone of business so far in March indicates that the same will be true of the third month. Trade is being accelerated in a really surprising manner, and if local dealers are given the benefit of ample stocks for the remainder of the year, there seems to be no question that 1918 will prove most satisfactory.

The co-operative advertising campaign conducted from the middle of November until the middle of January has stimulated business to a remarkable extent. As a matter of fact, the influence of the campaign really is only beginning to be felt. It takes time to absorb such things. The absorption period has ended and the results are now becoming evident.

To keep the public mind alive to the meaning of the campaign, and to follow up the advantage already gained, the association has put into definite shape a plan to undertake a second campaign, which it is hoped to start next week. It will not be so expensive or elaborate a publicity drive as the first, but it is predicated thereon and doubtless will serve to even improve the present fine state of business.

About the most interesting item of news that has developed in the local trade during the last few days is the appointment of Charles J. Orth, 504 Grand avenue, as distributor for Wisconsin and Upper Michigan of the Puritan line, manufactured by the United Phonograph Corp., of Port Washington, Wis., and New York. During the last two years Mr. Orth has earned a place among the largest and most progressive talking machine dealers by his success in retailing the Sonora in Milwaukee and suburbs.

The Puritan already is widely known throughout the country, and particularly Wisconsin, where it is manufactured. The United Phonograph Corp. maintains large factories in Port Washington, Sheboygan and Grafton, Wis., and studios and recording rooms in New York City and at Grafton. They make the entire machine and the records as well.

The success of the Pathéphone departments established December 1 in the four stores of Kroeger Bros. Co., Milwaukee, has induced the company to open piano departments in connection with each store. A. J. Bruett is manager of the new departments and co-operating closely with the Pathéphone.

The Brunswick-Balke-Collender Co.'s Milwaukee branch at 275-279 West Water street, of which Thomas I. Kidd is manager, has increased the number of its retail dealers in the city of Milwaukee to nine, and is enlisting new dealers throughout the State almost every day. Manager Kidd says that business is so good that the demand for Brunswick rights in Wisconsin and Upper Michigan at this time is even greater than during the recent holiday season, which is considered excellent testimony that the Brunswick is growing in popularity at a rapid pace. Retail jewelers of Wisconsin are especially anxious to represent the line, and Manager Kidd oftentimes encounters many perplexing problems in deciding which of numerous applications from a single community shall be accepted.

At the Badger Talking Machine Co., Victor jobber, The World representative found that the same old problem—the question of obtaining adequate stocks—continues to be the most perplexing. In fact, the problem is more acute now than three months ago, when the retail trade was swinging into the last lap of holiday trade. Although practically as many machines are being provided now as then, the demand is much greater from all points in Badger territory. The situation is such that incoming stocks rarely reach the wareroom floor, but are marked up for the dealers practically on board freight cars. Harry A. Goldsmith, secretary of the Badger Co., says he has never experienced so overwhelming a rush for goods as during February and so far in March.

Yahr & Lange, Sonora jobbers for Wisconsin and Upper Michigan, report that they are meeting with a constantly increasing degree of success in wholesaling the line throughout the territory. The retail drug trade is taking a particular interest in the Sonora and, in addition, retailers in many other lines are applying for local dealerships in large numbers.

The New Edison is passing through the most

remarkable period since the first Edison machine was marketed in Wisconsin. The Edison Shop, Edison jobber and retailer, is getting further and further behind on its orders, although it is getting practically the largest supply of machines since its establishment. William A. Schmidt, manager of the house, virtually has been swamped with business for sixty days—and the end is not yet.

H. B. Gibbs, traveling representative of the Rudolph Wurlitzer Co., Chicago, recently spent several very busy days in the local retail Victor trade.

Richard H. Zinke, manager of the Badger Talking Machine Shop, Victor retailers, is back at his desk after a siege with pneumonia, which almost cost him his life. Mr. Zinke was taken with an attack of the grip early in February but insisted upon going about his duties as usual. The result was that he was sent to the hospital and for more than two weeks hovered between life and death. His robust constitution pulled him through, however, and while still weak, he attends to his duties every day.

Theodore J. Mueller, proprietor of the Central Drug Co., 6324 Greenfield avenue, West Allis, is remodeling and enlarging his store to accommodate a full-fledged Sonora department being established along "big city" lines. Mr. Mueller owns probably the largest pharmacy in West Allis, the big manufacturing suburb of Milwaukee, and is the first retailer in the city to open a complete and distinct talking machine store.

Henry Clusen, Victor dealer and jeweler, Manitowoc, Wis., suffered a considerable loss by fire and water on the night of February 21.

The Apollophone, the new creation of the Melville Clark interests, made its formal bow to the public during the week of February 18, when it was exhibited and demonstrated in a public display of the Artapallo under the direction of Miss Ursula Dietrich, New York, at the Hotel Wisconsin, who was brought to Milwaukee by the J. B. Bradford Piano Co., 411 Broadway.

Mrs. Anne Shaw Faulkner, of the Bureau for the Advancement of Music, New York, spent several days in Milwaukee late in February and arranged with the National League for Women's Service to undertake the collection of talking machine records for distribution among army cantonments.

Frank F. Koch, manager of the photographic department of the Voigt Drug Co., Appleton, Wis., has been appointed a Sonora dealer.

IMPORTANT COLUMBIA CHANGES IN PITTSBURGH DISTRICT

J. F. Henk Forms Columbia Music Co.—Wholesale Division Moves to Larger Quarters—Dealers Connect Publicity With Noted Artists' Appearances—Pittsburgh Association's Advertising Plans

PITTSBURGH, PA., March 6.—The Columbia Graphophone Co., Sixth street and Duquesne way, has announced an important change involving both the wholesale and retail departments of this branch, whereby the two departments will be operated separately. The new arrangement became effective March 6. Following out the policy adopted in other cities, the retail agency has been sold to the Columbia Music Co., which concern is continuing that end of the business at the present location. The Columbia Music Co. is owned and managed by J. F. Henk, formerly assistant manager of the Columbia Graphophone Co.

The wholesale department of the Columbia Graphophone Co. is moving to new and larger quarters at 632-642 Duquesne way, where it will have greatly improved facilities for handling its trade. Manager E. H. Nichols states that the change has been made necessary by the vast increase in the business of this distributing agency and to permit a still greater expansion. The spacious building leased by the Columbia Graphophone Co. is well adapted to the needs of the business, and will be one of the finest wholesale talking machine establishments in the country. Further announcements of the reorganization and rearrangement of the Columbia wholesale branch are to be made in the near future, Manager Nichols states.

The Pittsburgh Talking Machine Dealers' Association is now carrying on a very aggressive newspaper publicity campaign, in which the idea is being effectively developed that music is a vital wartime necessity. The seven leading newspapers in the city, and over forty nearby out-of-town newspapers are being used in this campaign.

Leo Half, of Half Bros., Homestead, Pa., president of the Pittsburgh Talking Machine

Dealers' Association, delivered an address before the Cleveland Talking Machine Dealers' Association on February 20 on the subject of "The Value of Association Work and Dealer Co-operation," in which he outlined in a graphic manner the evidences of the successful furthering of this work from the history of the Pittsburgh Association. Mr. Half also outlined the "wartime" campaign now under way here.

The Standard Talking Machine Co., local Victor wholesale distributors, aided the Victor dealers of Pittsburgh and vicinity in the work of connecting up their advertising with the appearance here of two of the foremost Victor artists the week of March 4. One of these events commanding wide attention is the appearance of Galli-Curci, the famous coloratura soprano, at Syria Mosque, March 8. The other is the appearance of Jascha Heifetz, the noted young Russian violinist, at Syria Mosque, March 11; and at the Nixon Theatre, March 12. The Standard Talking Machine Co. supplied the dealers with printed matter, cards, etc., and with seats to sell to record patrons to still further connect up their stores with these Victor artists.

John O'Melia, manager of the Standard Talking Machine Co.'s record department for several years past, left on February 23 for Chicago, where he enters a course of instruction in preparation for Y. M. C. A. war work. Mr. O'Melia is the fourth member of the Standard organization to take up some line of war work, three others having enlisted in various branches of the service.

J. C. Roush, president of the Standard Talking Machine Co., is spending several weeks' vacation at Sea Breeze, Fla., accompanied by Mrs. Roush and their two children.

Manager Brennan, of the Pittsburgh Pathéphone Co., reports continued active trade in this

territory, and the dealers in the midst of an aggressive drive for spring business. The following additions have been made recently to the list of live Pathé retailers in western Pennsylvania: Gross & Rosenblatt, Beaver Falls; W. F. Beck & Son, 36 Belfont avenue, Lock Haven; and A. D. Ritz, Falls Creek.

Manager George Meyer, Jr., of the Brunswick-Balke-Collender Co., First avenue and Wood street, reports business quite active, the only handicap being the shortage of machines and delays in transportation. The Brunswick-Balke-Collender dealers in this territory continue to show a nice increase in sales over last year, Mr. Meyer states, and the outlook is quite favorable.

J. A. Endres, of the talking machine department of the Brunswick-Balke-Collender Co., is visiting for a week at his home in Buffalo, N. Y.

Cooper Bros., New Kensington, Pa., have just completed an addition of six handsome demonstration booths to care for their rapidly increasing trade. The Victor line is handled exclusively.

EDYTHE GLADYS EPSTEIN ARRIVES

Louis Epstein, Well-Known Victor Dealer, Proud Father of Bouncing Girl

Louis Epstein, big Victor dealer of 2976 Third avenue, New York, could hardly give his attention to business the past couple of weeks, owing to his excitement over a new arrival in his household in the person of a bouncing baby girl. The young lady is named Edythe Gladys Epstein, and was born early in the morning of February 17 at Mr. Epstein's home, 827 Cauldwell avenue, the Bronx. Both mother and daughter are in fine shape, and Mr. Epstein has again come so close to normal that he feels safe in having the various buttons replaced on his vest.

The greatest master is master of yourself.

“The Greatest Move You Ever Made WE’RE SELLING MORE and MAKING MORE”

These are the words expressed just as definitely and even more enthusiastically by dealers all over the country.

“At first we thought that the increase in price might temporarily reduce our Emerson sales volume,” said one of these dealers last week, “but it has had quite the opposite effect.

“There must be something about human nature which makes people readier to buy something for which they pay 35c or 3 for \$1.00.

“We have sold more people 3 records than previously we had sold only one.

“The number of people buying Emerson Records hasn’t decreased, but the quantity purchased by each buyer has gone up.”

This is the report sent in from all parts of the country concerning

Emerson Records

Retail 3 for \$1.00 or 35c Each

But this is only one-half the advantages of the new scale of prices. The new fact about Emerson Records now is that you make more on every Record that you sell than you did before.

Emerson Records now cost you 21c in unbroken packages, and 22c in broken packages of less than 25 records of a selection,

The new list is the best we have ever issued. Included in it are most eminent stars; backing it is some of the finest display material we have ever printed.

FLAG RAISING DAY AT EDISON LABORATORY, ORANGE, N. J.

Ceremonies Also Included the Flinging to the Breeze of a Service Flag Containing 362 Stars—Stirring Address by General Sales Manager Leonard a Feature of the Celebration

Flag raising was the order of the day February 22 at the Edison Laboratories, Orange, N. J. Following the annual custom Old Glory was raised to the top of the flagpole on the roof of Mr. Edison's laboratory. An added feature of this year's ceremony was the flinging to the breeze of a service flag containing 362 stars, each star representing a man from the Edison organization who has gone into the service of Uncle Sam. The service flag hangs out of one of the top windows of Mr. Edison's laboratory and faces Valley road, where it is in full view of all passersby.

The Edison Employees' Band participated in the exercises by marching from their headquarters in one of the buildings around to the front of Mr. Edison's laboratory and into the laboratory yard where they played the "Star Spangled Banner" while Old Glory was raised on the top of the laboratory, and "America" when the service flag was run out of the window, all in the midst of a lively snowstorm. Thomas J. Leonard, general sales manager of the musical phonograph division, was master of ceremonies and made a most appropriate and splendidly delivered address following the raising of Old Glory and preceding the breaking out of the service flag. Mr. Leonard said in part:

"At the call of their country in its hour of need and inspired by the example of their employer, serving the Government devotedly and as modestly as the humblest soldier in the ranks, 362 Edison men stepped into the service of Uncle Sam. This is a magnificent showing, but probably not more than might be expected from the organization which set a standard for all other manufacturing organizations in its response to the Liberty Loan appeals and which, through its individual employes, has contributed with corresponding generosity to the successive forms of wartime demands.

"We gather to-day to pay a simple honor to our comrades and associates who have joined the colors. The day is especially well selected, for the principles for which the father of his country fought the good fight are the same principles that are to-day imperiled by the false doctrine of Prussianism."

After some eloquent comments regarding the origin of the service flag and what it is intended to typify, Mr. Leonard continued:

"There is another significance to the service flag. It is a reminder of our duty to the boys who are going to the front. Nothing is too good for our boys in the service. These boys, the chosen defenders of our flag, are willing to suffer hardship and every inconvenience that you and I may be permitted to live in peace and security. Remember that they are no more under obligation to risk their lives than you and I are. It is our country as well as their country—our responsibility as well as their responsibility. Yet these boys—our boys—are willing

to make the supreme sacrifice to protect our homes and our wives and children—yes, they are willing to go through hell itself that this great

of that duty. Let it have this additional significance. Let it inspire you to subscribe to the necessary things which will help win the war and make the task of our boys easier.

"All these will call for a sacrifice on your part, but this is the season of sacrifice and sacrifice is the least duty you and I can perform. Let the service flag on the old 'Lab' wall be a

Raising the Service Flag at the Edison Plant on Washington's Birthday

TALKING MACHINES AND PIANOS

Herbert Simpson, Vice-President of Kohler & Campbell, Inc., Formerly in Talking Machine Industry, Knows Requirements of Dealers—Is Ready to Aid Dealers Who Can Handle Pianos

The results of harmony between the talking machine and piano industries have been force-

Herbert Simpson

fully manifested during the last few years in many instances where piano dealers have found

it profitable to handle talking machines in connection with their piano business. There have been many men who, previously connected with the piano industry, have been very successful in merchandising talking machines.

Believing that a greater harmony between the two industries will promote even greater success to both Kohler & Campbell, Inc., Fiftieth street and Eleventh avenue, New York, one of the largest and most progressive piano manufacturers in the country, have been carefully studying the requirements of the talking machine industry, and have developed a department for meeting the requirements of the retail talking machine trade, so far as pianos are concerned. Their familiarity with the talking machine trade has been greatly augmented by the fact that Herbert Simpson, vice-president of this concern, was at one time assistant advertising manager of the Victor Talking Machine Co. Upon leaving this organization he became advertising manager for Kohler & Campbell, and through his success in the field of merchandising he has gradually worked his way up the ladder to his present capacity. During his affiliation with the talking machine industry, Mr. Simpson made many fast friends, who appreciate his capabilities and who realize that he has a thorough knowledge of the requirements of the talking machine dealer.

The tremendous manufacturing facilities of Kohler & Campbell, Inc., places them in a position not only to give the trade pianos and play-pianos of highest quality, but also an unexcelled service both in deliveries and merchandising aids.

The Jersey City Talking Machine Co., Jersey City, N. J., was incorporated this week with a capitalization of \$10,000.

PRIZES FOR BEST WINDOW DISPLAYS

Emerson Phonograph Co. Make Announcement Regarding Sales-Producing Record Displays

Prizes to the value of \$200 in Emerson records are offered to dealers in a new store and window display contest just inaugurated by the Emerson Phonograph Co. These prizes will be given for the most original and best sales-producing displays in either the interior or in the window of the dealer's store.

The dealers are asked to send photographs of the displays to the offices of the Emerson Phonograph Co. before April 15, and in order to assist the dealers in every possible way the company's advertising department has prepared a special package of hangers, announcements, etc., which the dealer can secure upon request.

It is planned to print the various winning photographs in early issues of the "Emerson Spotlight," the company's house organ. The first prize is \$75 worth of Emerson records, the second prize, \$50 worth; third prize, \$25 worth, and five prizes of \$10 worth of Emerson records each. Only those records that dealers had on hand before March 1 may be used in their displays.

WANT RECORDS IN NAVAL CAMPS

Phonograph records to be sent to the aviation training camps throughout the country are greatly needed, says the aeronautic committee of the Woman's Naval Service, and its members make an earnest appeal to the public to aid in supplying them. Several thousand are required. They may be sent to the Woman's Naval Service, 289 Madison avenue, in care of Mrs. Charles A. Van Rensselaer, chairman of the aeronautic committee.

TWIN CITY DEALERS ENDEAVORING TO MAKE ENDS MEET

Make a Strenuous Effort to Meet Demands Pending Improvement in Transportation and Receipt of New Stocks—Machines Being Brought in by Express—General Trade Very Satisfactory

MINNEAPOLIS and ST. PAUL, MINN.; March 6.—Between the shortage reported by manufacturers and transportation delays the local talking machine trade are much upset owing to their inability to supply their customers with machines as rapidly as they sell them. They are hopeful, however, that with better weather things will mend.

F. M. Hoyt, of the Beckwith-O'Neill Co., showed the writer twenty-six contracts on which he had taken first payments, but has been unable to deliver Victrolas that the contracts called for.

"It cost me \$2,000 extra expense for express charges in February alone," remarked W. L. Sprague, manager for the Columbia Co. in this district. "With improved weather conditions we are hoping for better service, but are somewhat consoled because of a growth of 80 per cent. in the volume of business for February as compared with the same month of 1917, and also because we have become the permanent owners of the \$400 silver trophy which this branch won in three successive months."

"Six carloads of Edison machines, ordered sent by express are being held up somewhere in America," said Laurence H. Lucker, president of the Minnesota Phonograph Co. "Virtually the entire shipment will be transhipped the moment it arrives. Express is slower than slow freight was a short time ago and we are ready to become Bolsheviks or almost anything else if it will help the industrial and railway situation. The carload of records I obtained on my visit to headquarters in January is all gone and not as much is obtainable as we had hoped."

"I just dread it when we run out of a line and must give the factory an order," complained Jay H. Wheeler, who manages the Pathé department for G. Sommers & Co. "It takes from six to eight weeks to get an order through by freight and fully twenty days by express, at greatly additional expense. We hope for a better showing now that the weather has improved."

The only jobber in the Twin Cities who is not complaining is R. L. Kern, manager of the Brunswick-Balke-Collender Co., manufacturers and distributors of the Brunswick phonographs. He has started four travelers through the Northwest and is opening new accounts almost daily. Incidentally, although a recent arrival in the field, he hopes to make some of his veteran competitors move very lively.

Thirty Sonora dealers in this territory, which includes Minnesota, North Dakota, South Dakota and Montana, attended the first annual Northwest Sonora Dealers' convention and banquet at the Hotel Rogers, Minneapolis, last month, as guests of the Minneapolis Drug Company, Sonora distributors. Sewell D. Andrews did the honors as representative of the house and made the dealers acquainted with the Sonora officials. Those attending the convention and banquet were George E. Brightson, president of the company; Frank J. Coupe, general sales manager; Superintendent Fahr, of the Saginaw factory; Fred E. Yahr, of the Yahr & Lange Drug Co., Milwaukee, and Walter J. Hamlin, of C. J. Van Houten Zoon Co., Chicago. Sonora distributors also attended the convention and made themselves generally amiable to the dealers. The latter returned to homes enthusiastic Sonora boosters.

The Minnesota Phonograph Co. announces a gross increase of 25 per cent in the volume of the Edison sales in the Northwest for the year 1917 as compared with 1916. It may be said that the company officials are contented with the showing and hope that they will be able to repeat.

Miss Salome Batton is to change her name via the marriage route this week, but will not retire from business at once, as she had expected. The lady selected to become her suc-

cessor as manager of the Victrola department of the Cable Piano Co.'s St. Paul branch was taken seriously ill just before the time for her departure and Miss Batton consented to remain until a successor was obtained.

Thirty-five salesmen are talking Pathé machines throughout the Northwest for G. Som-

mers & Co. Thirty are general salesmen and also talk other articles, but four give their entire time to Pathé products. The growth of the business has quite exceeded expectations, according to Manager Wheeler. The latter will leave soon for the East to order stock for the coming season.

F. M. Hoyt, with the Beckwith-O'Neill Co., returned last week from an Eastern tour, during which he visited Victrola jobbers in Chicago, Buffalo and New York and also the Victor headquarters in Camden.

FINDS CANNED PROPAGANDA

Chicago Official Discovers Praise of Kaiser on Phonograph Record

A dispatch from Chicago says that United States District Attorney Clyne is investigating what he believes to be active pro-German propaganda conducted through phonograph records.

The text of one of the German language records seized by Federal officials, which was given

out yesterday without comment by the district attorney, lauded the Kaiser and war lords of Germany. The record in question, according to the district attorney, was made for the Mozart Lodge of New York.

Joseph Fische, of 1442 Third Avenue, president of the Mozart Lodge, New York, when seen said that while the lodge had purchased such records a long time before the war, the practice had been discontinued as soon as the United States entered the world conflict.

Model A Elmbrola

There's an Elmbrola Model for everyone—a low priced machine, a reasonably low priced machine, a medium priced machine, and a very fine machine at a price way below what you would expect to pay for it. This is what makes the Elmbrola so easy for dealers to sell—but there are still more exceptional selling features to the Elmbrola.

Model B Elmbrola

Handsomely Finished In Beautiful Woods

There's a distinctive, high class appearance to every Elmbrola. The appearance is so out of the ordinary and the finish is so beautiful that your customers are surprised when you tell them the remarkably low price. You feel proud to display these wonderful Elmbrolas, because your customers are bound to be pleased.

Sweet And Clear In Tone

Sit down for a minute and listen to the Elmbrola play. Its clear, sweet tone is so delightful that you want to hear it play for hours. Never before have you heard a tone that surpasses the tone of the Elmbrola. Thousands of people say that nothing can equal it, but judge the machine for yourself.

"Sounds Clear — Made Sound"

The dealers who are selling the Elmbrola are making big profits because the machine is right and the price is right. You should be handling the Elmbrola right NOW, and you certainly will handle it if you get our special low dealer prices.

Wonderful Improved Tone Regulator

This big feature enables you to get all the delicate shades of tone so necessary in the perfect reproduction of sound. You can play loud or soft as you wish by simply turning the button.

Model C Elmbrola

We Guarantee Prompt Deliveries

When you handle the Elmbrola, your orders will be shipped to you promptly the same day we receive them. There's no waiting—no delay. Our factory turns out the machines as fast as you can sell them.

This Is Your Opportunity To Cash In

Now is the time to sell the Elmbrola. Get our special proposition to dealers and see what big profits you can make. We have a Sales Plan for you that is a winner. Write us at once for full particulars—there's no obligation whatsoever.

ST. PAUL, MINN.

SAN FRANCISCO BUYERS MEETING DEALERS HALF WAY

Show Willingness to Accept Available Styles of Machines or to Place Orders for Future Delivery
—More Commodious Quarters for Columbia Co.—General Trade News of Interest

SAN FRANCISCO, CAL., March 4.—The talking machine dealers are well satisfied with their February business. While there has been a shortage in some makes and styles the dealers say that their customers are accepting the situation good naturedly, and either ordering the machine they want, to be delivered when it arrives or accepting a substitute that is nearest to the machine desired. During the past ten days of the month several cars of machines, some of them shipped almost sixty days ago, arrived, and the dealers feel that the worst of the shortage is now over. Of course, in those factories where sufficient help cannot be obtained the shortage will continue. That is the manufacturers' problem and one that must be solved by each manufacturer for himself. The demand is here and the people have the money. Now, if the manufacturing end can be solved and the transportation end improved 1918 will prove a banner year in San Francisco. From the viewpoint of the local merchant the number of traveling salesmen who have been sent into this territory during the past month is an indication that the manufacturer is not worrying to any great extent over his output, and San Francisco rejoices accordingly.

Receives Records by Express

George T. Hively, manager of the talking machine department of the Eastern Outfitting Co., says that he has kept up his stock of records during the period of the worst freight congestion by having them sent by express. These additions to the heavy stock he had on hand have prevented him from feeling any serious shortage. Mr. Hively says that he placed heavy orders for future shipments nearly a year ago, and he does not anticipate any shortage during the present year.

Lease New Columbia Quarters

The Columbia Graphophone Co. has taken a lease on more commodious quarters in the Halliday Building at 130 Sutter street. The company will move by the first of April to its new quarters, where nearly twice as much space will be available as was provided in the old location. The Halliday Building is a new structure erected by the regents of the University of California, and is locally known as the "Daylight" building. The entire front is of glass and excellent light is provided everywhere without recourse to electricity. The first floor of the building is occupied by a clothing house and a large office furniture store. The Columbia Co.

will occupy the portion of the second floor over the clothier. The location is more desirable than the old one and the additional space makes the move one for congratulation.

Victor Business Exceptional

The California Phonograph Co. reports that its business for February was exceptional. The company does not complain of a shortage of machines or records except of Victors. As it was only recently that the company took over the Victor agency, with the purchase of the talking machine business of Kohler & Chase, this shortage is easily explained.

Andrew G. McCarthy's Views

Andrew G. McCarthy, of the talking machine department of Sherman, Clay & Co., says that there is plenty of demand for talking machines, but comparatively few are arriving. He has placed enormous orders for Victors at the factory, but as his company are jobbing the Victor as well as selling it at retail in their several stores the business of the Victor on the Coast passes through their hands. With such a demand he finds it impossible to keep everyone well supplied.

Humphrey Making a Fine Record

Edward Humphrey, who was recently put in charge of the talking machine department of Byron Mauzy, is making a splendid record in his department. Chas. Mauzy, the general manager of the company, says that his department is far ahead of the previous year despite the fact that a real shortage of Victor records and Victor higher-priced machines exists in the store. Mr. Humphrey has had his department redecorated and fitted up for the greater convenience of his customers, and the results are showing themselves in the record of the sales.

Kohler & Chase Sell Stock in Oakland

Kohler & Chase have sold their Oakland stock of talking machines to the John Breuner Co., a furniture dealer of that city, and they have now retired definitely from the talking machine business in both cities. By this purchase the furniture company acquires the agencies of both the Victor and Columbia machines.

Salesman Badly Injured

F. A. Smith, of the Brunswick-Balke Phonograph, says that his business for February was very satisfactory. He has just received information that James F. Mahoney, salesman for the company, met with a painful accident at Fresno on February 27, which may incapacitate

him for some time. According to the information in Mr. Smith's hands Mahoney slipped while boarding a train at Fresno and either sprained or broke his ankle. An X-ray will be necessary to ascertain the extent of the injury.

Noted Artists Coming

The announcement that McCormack and Gallucurci will sing in this city at early dates has already stimulated the demand for Victor record of their voices. It is expected that the sale will increase still more and continue for some time after their appearance.

Dealers to Hold Dance

The talking machine dealers of San Francisco are making ready for their second annual dance to be given at St. Francis Hotel on April 2. William Morton, of Sherman, Clay & Co., will have charge of the dance as chairman of the committee appointed for the purpose.

Some Trade Brieflets

F. B. Travers, of the Sonora Phonograph Co., has just returned from a trip through the southern part of the State. While there he covered the territory in company with E. M. Bonnell, the company's regular representative.

E. N. Clintsman, one time manager of the wholesale talking machine department of Kohler & Chase, and at another time in the general talking machine business in the Northwest, has recently been appointed deputy assessor of Alameda.

Charles S. Ruggles, who has charge of the wholesale Victor sales for Sherman, Clay & Co. at Los Angeles, has returned from a trip East, where he visited with his son, Wesley, who recently finished his military course and is leaving for France.

The San Diego branch of the Wiley B. Allen Co. has greatly enlarged the floor space of the talking machine department.

G. E. Morton, recently with the Columbia Graphophone Co. in New York, has been appointed manager of the talking machine department of the Emporium.

Serious Question of Labor

A. G. McCarthy, of Sherman, Clay & Co., says that one of the difficult problems which the dealers in talking machines have to solve is the question of labor. The number of young men wishing to go into the business in the past has always been ample. Now, however, so many have gone into the service of Uncle Sam that the dealers have been taking on younger boys. The call of the shipyards with pay of \$5 or \$6 a day is now depleting this supply and many are having recourse to girls. Girls with any experience are now scarce, and many dealers are really short-handed because they do not feel that they can take the time to train green girls.

On Selling Records

There are many excellent ideas the Victor Dealer can use to stimulate the sale of slow moving stocks. Some of these ideas have already been put into practice, others have not yet been discovered. We urge Victor dealers to encourage their salesmen in originating new plans for selling records, and along the same line our travelling representatives will be glad to offer several good suggestions.

ECLIPSE MUSICAL COMPANY
CLEVELAND OHIO

DROOP'S EDUCATIONAL PUBLICITY

E. H. Droop's Campaign to Inculcate a Better Appreciation of High-Class Music Excites Commendation—Helps Industry as a Whole

WASHINGTON, D. C., March 8.—E. F. Droop & Sons Co., Victor wholesalers and dealers, have been carrying on an original and most effective advertising campaign in the local newspapers in the interests of high-class Victor records. The advertisements are in the form of articles credited to E. H. Droop, head of the company, and give Victrola owners some new angles from which to regard their record libraries. In one of the articles, for instance, Mr. Droop says:

In our previous article we dwelt on the lack of knowledge possessed by the average Victrola user of the higher and better forms of music known as "classic" or "semi-classic" compositions.

It is not surprising that this condition should exist, and it must be said in justice to the great masses of our people that it is of comparatively recent date that they have had made available to them a medium through which every form of music could be brought right into the home—the Victrola—and then quite naturally they took up with the more catchy and trivial things in music, because these amused and entertained them; little thought has been given to the more serious forms of music—which are not only far more beautiful and lasting than the catch-penny airs that are whistled to-day and forgotten tomorrow—but they have an educational value which proves a great help as progress is made in the study and understanding of music.

Again we make the statement that if we can interest you to listen attentively for a little while to a few good selections chosen from the lighter classics—explaining what the composer had in mind when he wrote his tone picture, and helping you to clearly understand its rhythm and "phraseology," as it were—you will, if you persist in hearing similar selections, rapidly grow into appreciation of the masterpieces with which the great minds in music have endowed the world, and a realm of melody will be opened which you will never cease exploring—

Music is a vital force and from the cradle to the grave plays an important part in our lives; it entertains, refines, educates, soothes, comforts, and inspires, and now that the Victrola records have made it available, the best music by the best artists and musical organizations of the world should find a place in every heart and home.

We are at your service to help in building up a library of choice records of which you will not tire and which will always reflect credit upon the owner's taste.

Whether you want to buy or not—our Victrola booths are at your disposal and we invite you to call and try out the suggestion we have made. Suppose you hear some or all of the latest records.

It may be said that the articles have been effective in bringing about increased sales of the higher class Victor records, and it is planned to continue the series of talks for some time to come.

No matter how perfect a locomotive may be, it takes steam to drive it. No matter how clever a man may be, he will get nowhere without hustle.

FAULTLESS PIVOT BEARING CASTERS

Casters that roll easily across the floor—and smoothly. No chatter—no unsteadiness.

Simple construction—no complicated parts to get out of order, nothing to retard easy movement. Strong—plenty of metal in required places to resist strains.

Silent—neat appearing—a real necessity to YOUR talking machine, these FAULTLESS CASTERS.

Full Size—C-65

Made with leather, fibre, felt, steel and lignum-vitae wheels. A word from you puts all our caster experience at your service and brings you a copy of Faultless Catalog "G."

GIVES TALKER TO JAPANESE SCHOOL

PORTLAND, ORE., March 5.—Away off in far-away Japan will be felt the generosity of a music dealer of Portland, Ore., Harold S. Gilbert, of the Harold S. Gilbert Piano Co., who has presented a Columbia graphophone to the Doshisha Girls' School of Kyoto, Japan. Mr. and Mrs. Gilbert have had as their guest Miss Denton, a missionary from the school at Kyoto,

which is a school supported by the Congregational Church. The interest which Mr. and Mrs. Gilbert felt in the school after hearing Miss Denton's description of conditions resulted in the handsome gift.

SECURES ORDERS FOR VEECO MOTOR

H. A. Robbins Has Most Successful Trip in the Interests of His Product

One of the recent visitors to New York was H. A. Robbins, treasurer of the Veeco Co., Boston, Mass., manufacturers of the Veeco electric motor for talking machines. Mr. Robbins had just completed a tour of the West, spending some time in Chicago, and succeeded in securing orders from a goodly number of representative manufacturers. He also garnered a substantial bundle of orders in New York before leaving for his Boston headquarters. Mr. Robbins had with him the new model Veeco motor, which embodies many improvements over the older models.

IMPROVED TRANSPORTATION HELPS CINCINNATI TRADE

Although Conditions Are Far From Normal Retailers Can Get a Fair Amount of Stock—Automobile Deliveries Are Popular—Demand for Both Machines and Records Very Strong

CINCINNATI, O., March 8.—An opening of the lanes of transportation in and out of Cincinnati, which took place to a fair degree towards the close of February, put pep into the trade and exhilarated the retail situation. While certain of the lines are still in the embargo class, enough territory is open to enable the talking machine merchants to do some shipping.

So crying is the need of Edison machines around Bellefontaine, O., over 100 miles from Cincinnati, that J. C. Smucker, of Smucker Bros., representatives of the Phonograph Co., this city, travelled with a truck to the Queen City Friday to secure what goods he could get. It was Smucker's idea, and he benefited. Two weeks ago Manager Peterson's house secured goods from New York City which had been in transit since early in November. E. J. Stevens, Middletown, likewise came to the city in a machine during the past week and secured Edison goods.

Carload shipments are coming through to the Columbia house. It has been doing some shipping by express, and the breakage out of Cincinnati has been so great in recent months that R. L. French, traffic manager, came here last week from the Bridgeport, Conn., factory to get a line on the situation. F. F. Dawson, who took charge of the Cincinnati branch in December, expects to remain here several more months. He reports having an increase of almost 100 per cent last month over February of a year ago. J. L. Dubriel, of the general sales department, arrived in the city Saturday to temporarily fill the position of assistant manager. G. W. Hopkins, general sales manager, passed through earlier in the week, en route to St. Louis. Another of Mr. Dawson's visitors was W. C. Fuhri, of the Chicago branch, en route home from a Florida vacation.

C. W. Neumeister, local representative of the Heineman Phonograph Supply Co., is spending the week in New York City, attending a convention of the outside agents. Just before leaving he reported quite a boom in business in his territory.

A. J. Swing, of the Crystola Co., is in the East on several important matters in connection with the local factory.

J. M. Dolby, manager of the Dictating Machine Co., left to-day for Nashville, where he will open a branch office for the Ediphone.

Mr. Byars, Vocalion manager of the local Aeolian store, reports a very gratifying volume of Vocalion business for the month of February, just closed. He reports that a number of the new period designs have been received, and several were sold in the last few weeks. One of the largest and most elegant of these models is being shipped to one of Louisville's most prominent citizens. It is the Hepplewhite design, with the hand-painted front and inlaid front and top. This instrument is going into

one of the elegant new homes in Louisville, and will unquestionably create considerable interest in that locality among the members of Louisville's elite society.

Mr. Byars has just organized a new sales force, and now has four new recruits in his selling department in training. These men are all very promising, and from every indication the Vocalion forces are going to keep up a red-hot campaign this spring and summer in spite of the war and other handicaps. This is the spirit that spells success.

Wm. J. O'Neil, formerly on the Vocalion sales staff, is now in the Quartermaster's department of the U. S. Army, stationed at Camp Meigs, Washington, D. C. Robert Casey, for two years connected with the Vocalion sales staff, is now taking orders for Buick automobiles with the Leyman-Buick Co. of this city.

"The tremendous demand for Victrolas and records," said Manager Rudolph Dietrich, of the talking machine department of the Rudolph Wurlitzer Co., "continues without any diminution, and the demand, in fact, has been greatly strengthened by the shortage existing during the past sixty days. Better conditions, however, are in sight, as the transportation companies will undoubtedly recover to very great extent and this will bring a corresponding increase

in delivery as well as less delay in shipments.

"Inasmuch as during the past year it has been a question of supply rather than demand, we can only hope for the future and trust that the factory output will in a measure take care of the requirements of the dealers.

"We find that the demand for the March records was exceptionally heavy and, as this list is a very good one, the demand will undoubtedly be lasting. The appearance of Jascha Heifetz in Cincinnati caused a tremendous demand for records of this order. His appearance here about the time the records were released was a very happy coincidence and the demand was undoubtedly taken advantage of to its fullest extent by all of the local dealers."

NEW CONCERN IN TROY, O.

The Mirrophone Co., Troy, O., has been incorporated with capital stock of \$10,000 by George M. Jackson and others, and it is stated that the company has been formed to take over the output of the Lorimer-Hicks Co., manufacturers of the Lorophone, which company is at present in the hands of a receiver.

BUILD ON ROCK OF SOUND VALUES

Thy business is not built upon the sands of speech, be it ever so well spoken; it is built upon the rock of sound values. If ye have not sought and found that foundation, seek it for the good of thy house.

PROTECTION OF TRADE NAME

Recent Decision in Favor of the Aeolian Co. of General Trade Interest

The Aeolian Co., New York, was successful recently in a trade-mark case which should prove interesting to the talking machine industry as indicative of the value of trade names. This decision in the Aeolian Co.'s favor was handed down by the Circuit Court of Appeals, from whose decisions there is possible no further appeal.

Some time ago a talking machine company made application for the registration of the trade-mark "Orchestrola" for a talking machine. The Aeolian Co. filed a claim in opposition to the granting of this trade-mark in behalf of its well-known instrument the "Orchestrelle," an automatic pipe organ which has been on the market for many years.

After the case had passed through the usual trade-mark channels it reached the highest court in the land, which handed down an opinion denying the talking machine company the right to use the name "Orchestrola." This decision is clear and concise, one section, which gives the most important factor influencing the opinion, reading as follows:

"Assume that a person who had a good opinion derived from use or otherwise of an automatically-operated organ produced by the Aeolian Co. and marked 'Orchestrelle' desired to purchase a phonograph (the Aeolian Co., as we have seen, now produces phonographs), and is shown one marked 'Orchestrola,' would he not be likely to think it was produced by the same company as produced the organ and buy it on that account?"

"Perhaps if the two instruments were placed side by side, one marked 'Orchestrelle' and the other 'Orchestrola,' he would be able to detect the difference between the marks; but where

they were not so placed, and he was compelled to rely upon his memory only, unless he possessed one remarkably accurate in its impressions—the law considers the ordinary, not the extraordinary in cases like this—we believe he would not distinguish the one from the other. To be sure, they have points of difference, but the points of resemblance dominate and give character to the terms.

"We entirely agree with the Assistant Commissioner that the two words are 'confusingly similar' and would be likely to mislead not only as to the goods themselves but also as to their source of manufacture, and hence his decision is affirmed."

DEBUT OF "EMERSON SPOTLIGHT"

The first issue of the "Emerson Spotlight," the new house-organ published by the Emerson Phonograph Co. for benefit of Emerson record dealers, made its appearance a fortnight since, and has already won the enthusiastic approval of the Emerson selling organization and Emerson representatives throughout the country. It is planned to publish this house-organ monthly, and there is good reason to believe that it will be a pronounced success.

The first issue contains a number of practical suggestions to Emerson dealers how to boost Emerson record sales; these suggestions appearing under the headings "Phone Customers," "Attractive Packages," "Special Bulletins," "Newspapers Free," "Dance Programs," etc. There are some timely hints as to ad. helps, and the dealers are acquainted with the likenesses of some of the most popular artists in the Emerson record library.

When Service and Quality keep house together, Satisfaction hangs up its hat for a long stay.

THE "TALKER" AT THE FRONT

Uncle Sam's Forces Rapidly Learning French Through the Talking Machine

The talking machine as an educator is proving quite a favorite with Uncle Sam's forces who are now in France "doing their bit" to make the world safe for democracy. As a means of learning the French language they find the talking machine invaluable. In a recent letter from the front we read:

"The American soldiers attend a class in French every day at the Y. M. C. A. or at the Soldiers' and Sailors' Home, where an American volunteer or French professor gives lessons. The boys know a few set phrases when they land, but they are adding to their vocabulary all the while. Professors are rather scarce at the camps, but lessons are given by the talking machine. The Americans have found that a deep knowledge of French is not necessary for the short time they are here, in Paris, and especially so since they trade only in shops where at least one of the clerks speaks enough English to carry through a deal. Some of the college fellows have carried on their reputation of slang making, and they have invented funny phrases both in English and French.

"The Americans like the talking machine method. Its voice may be metallic and the tone monotonous, but the machine is a patient teacher and the pupils make it go over the words till they are satisfied. It is effective for pronunciation, for it does not vary, and the constant call on it for phrases does not wear on its voice. No living teacher could be put through such stunts.

To make this year one of the best you've ever had in "making good"—is a good resolution to make!

IT HOUSES A SMALL VICTROLA

The Lundstrom "Converto" Cabinet converts the small "Victrola" into a handsome cabinet type, completely enclosing the machine. It takes the place of a stand and

provides a dust-proof record rack for 60 records. It revives interest in records. It helps you meet low-price competition in cabinet machines and gives you a *good profit*. It costs the customer no more than a good stand! It has proven very successful for many of the country's leading Victor dealers.

DETROIT TRADE BUOYANT REGARDING GENERAL OUTLOOK

Removal of Restrictions Helps Business Expansion—A. A. Grinnell's Interesting Views—Burton Collver With Cheney Co.—Pathé Jobbers Pleased with Outlook—Some Noted Visitors

DETROIT, MICH., March 9.—The worst is over so far as adverse conditions are concerned in the talking machine business in Detroit. We do not mean by this that business has been dull, but simply that certain conditions have prevented sales being much greater. During the months of January and February dealers were up against the crisis in the coal situation—the extreme cold weather, freight congestion, and the after-effects of December holidays. On top of this came the restrictions on business hours and workless Mondays. Now, however, all this is over—there are no restrictions on business hours, the crisis in the coal situation is passed, and freight shipments are improving. It's a positive fact that of all the lines of business investigated recently by The Talking Machine World correspondent, except those devoted to war orders, the retail talking machine business is the very best.

A distinguished visitor was in Detroit the last day in February—being none other than H. C. Brown (and wife), of the Victor Talking Machine Co., of Camden, N. J. The visit of Mr. Brown was a combination of business and pleasure. He spent a few minutes with A. A. Grinnell and C. H. Grinnell, of Grinnell Bros., who are Victor jobbers, and E. P. Andrew, general manager of the J. L. Hudson music store. A part of his time was spent with Mrs. Brown in motoring about the city.

At 247 East Jefferson avenue, Detroit, is the wholesale branch of the Brunswick-Balke Co., State jobbers for the Brunswick phonograph. F. S. Kratzet is in full charge. While the company handles the full line of Brunswick products, the window is invariably given over to the display of Brunswick phonographs, the displays being changed very frequently so as to show off the different models. In Detroit the principal Brunswick dealer is Wallace Brown, 33 East Grand River avenue,

who has a national reputation for hustling. But Mr. Kratzet has other live dealers throughout the state, and is gradually developing good accounts in every town of 10,000 population or over. A large stock is always carried at the Detroit branch, so that dealers can always feel assured that their orders will be filled promptly.

C. H. Grinnell, manager of Grinnell Bros., wholesale Victrola department, was in Cleveland the last of February to address the Northern Ohio Talking Machine Dealers at their first annual convention. The address was devoted to the accomplishments of the Detroit talking machine dealers' association during its two years' existence.

A. A. Grinnell, treasurer of Grinnell Bros. and who devotes a great deal of his time to looking after the talking machine department, says that "1918 looks mighty good." Mr. Grinnell feels that it may be a while before the business is booming, still he feels that 1918 will be one of the best years the industry has ever seen. He continues that it is not a question of seeking orders but that his company could more than double the business now on its books if it could only get the merchandise. "Collections are very good," he said. "Our stock is large, although not quite as large as we would like to see it."

Ed Andrew, manager of the talking machine department of the J. L. Hudson store, spent the last week in February in Cleveland and Philadelphia. He plans to visit quite a number of other cities during March just to get a line on local conditions in various sections and to see where there is room for improvement at the Hudson store. "It is a paying proposition to the manager and to the department to get out occasionally and go to some other city and see what the dealers there are doing," he said. Mr. Andrew, by the way, has been elected sec-

retary of the Detroit Music Trades Association. That dealers believe that this is no time to be pessimistic is proven by the increasing amount of talking machine advertising in the daily newspapers. There is hardly a live dealer—yes, we don't know of a single one—that is not using space either in the dailies, the street cars, billboards or theatre programs. And the space per dealer is larger than it has ever been at this season of the year. The new concerns that have entered the retail field are also going after business by advertising so that the talking machine is brought forcibly to the attention of the public, no matter where the people look.

Burton Collver, one of the leading salesmen with the player-piano department of Grinnell Bros., resigned sometime ago to become sales manager of the Cheney Talking Machine Co., of Chicago. He has given up his residence in Detroit to be near the home office. He spent the month of February in Grand Rapids and Detroit attending furniture expositions and conferences.

The Detroit Talking Machine Dealers are perfecting plans for the coming recital which is scheduled for sometime in April or after Easter. We previously reported that the proceeds of the recital will be turned over to some patriotic fund. President Sam Lind is working hard to offer a program that will draw crowded houses.

Williams, Davis, Brooks & Hinchman Sons, wholesale jobbers in Michigan for Pathé, report very good business, larger stocks than ever and more orders than ever before. "Yes, business is coming along just splendidly," said Mr. Chamberlain, in charge of the sales of this department. "Our business the first two months under the adverse conditions has been far beyond what we had expected and we have every reason to feel that 1918 is going to be a good year, with business improving each month." The miniature Pathé store in the company's building is attracting unusual attention and it is proving of great help to dealers who are taking on the line. It shows them just how a modern, up-to-date shop should be laid out.

Max Strasburg, of the Strasburg Shops, judging from letters received, is having a very enjoyable time in the South playing golf at every opportunity. He expects to return to Detroit the last of March.

A. F. Noble Piano Co., Woodward avenue near Warren, is now retailing the Cheney talking machine.

Keenan & Jahn, who are retailing the Aeolian-Vocalion, are going after business harder than ever—even exceeding their efforts at Christmas time. Sales have been growing in numbers, and the new records that are coming in are proving very popular. John DeAngeli is in charge of this department.

Wallace Brown, Brunswick dealer, says this is no time to sit back and wait for business, but this is the time when the dealer must awaken interest in the talking machine business by judicious advertising, publicity and salesmanship. He is giving his attention to all three phases of business and is getting results.

The Edison Shop celebrated Thomas A. Edison's birthday in February by special recitals, special vocalists and giving away gratis a book containing the biography of Mr. Edison. The year 1918 is going to be a big one for the Edison Shop, judging from sales the first two months and the number of prospects now in view. The same statement can apply to the Phonograph Co., of Detroit, state jobbers for the Edison. Both firms are managed by R. B. Alling.

The number of international artists from a musical standpoint who have been in Detroit for recitals the past sixty days has proven a splendid stimulant to the record business. In fact, there is no better stimulant to the sale of records than the noted artists who come for recitals. Before and after their coming record sales are big.

The Majorana Graphophone Co., Louisville, Ky., has been incorporated with capital stock of \$50,000 to engage in the manufacture and merchandising of talking machines. The incorporators are G. B. Shumate, Peppino Majorana and S. M. Raffo.

KOCH-O-PHONE

\$18.00

No. 18

The KOCH-O-PHONE is the FORD of the Phonograph world. There is no charge for the name or expensive advertising added to the cost. Most people would rather pay \$36 (resale price) than \$75 for the same amount of pleasure. Plays all makes of disc records. No disconnecting needed in exchanging from one make of record to another. Simply turn the sound box and change needle to suit make of record. This machine for tonal quality and volume is not excelled by any \$75 machine on the market.

No. 18—Height 40 in., width 18 in., depth 18 in.; double spring worm driven motor; 12 in. turntable, all metal trimmings are nickel plated; made in mahogany finish. Weight about 100 lbs.....\$18.00

Cabinet alone, complete with needle cups . \$10.00

BRUNSWICK OUTFIT FOR HOSPITAL

"Red Cross" Brunswick Machine and 400 Records Donated to Lilly Base Hospital in France by Brunswick Shop and the Public

INDIANAPOLIS, IND., March 5.—The base hospital unit in France equipped by the Eli Lilly Chemical Co., of Indianapolis, and known locally as

Brunswick for Lilly Base Hospital, France the Lilly Base Hospital, will soon be enjoying a "Red Cross" Brunswick machine with about 400 records.

George Standke, manager of the Brunswick Shop, decided the Indiana men and women who have patriotically donated their services to the Government by joining the hospital unit company, were deserving of anything that could be done for them. The owners of the shop heartily endorsed Mr. Standke's idea of sending the unit a "Red Cross" machine. The 400 records representing all kinds and makes were donations from Indianapolis people who saw the machine in the window of the Brunswick Shop.

The machine is ready for shipment and will soon be cheering the Indianaians who are toiling behind the battle lines of France.

CLOSE IMPORTANT CONTRACTS

Southwestern Distributor of Delpheon Phonograph Tells of Company's Progress—M. C. Collier Joins Traveling Sales Staff

DALLAS, TEX., March 5.—Walter Verhalen, of this city, Southwestern distributor for the Delpheon phonograph, has announced the appointment of H. C. Collier as a member of his traveling sales staff. Mr. Collier is visiting the dealers in this territory, and has already closed a number of important contracts, among which are the Durham Dry Goods Co. at Waxahachie, and Ray Royell, of Waco.

Mr. Collier has had an extensive experience in the musical business for the past twenty-five years, having been State agent and wholesale representative of one of the largest piano companies in the country. He has also had several years' experience selling phonographs at wholesale and expressed himself recently as most enthusiastic regarding the musical qualities of the Delpheon phonograph, which he states is certain to meet with success throughout this territory and in all parts of the country as well.

A DEFINITION OF ECONOMY

A good definition of economy is that it is good management. Economy carries with it the idea of saving, of careful spending, but talking machine men should bear in mind that it does not mean niggardliness. It relates as much to what you get as to what you spend. In advertising it is possible to spend a million dollars as economically as it is to spend ten dollars. Many times the expenditure of a small sum will prove to be more extravagant than the expenditure of a much larger sum, since the larger sum may bring better proportionate results than the smaller.

NINETY-TWO VICTROLAS IN ONE CAMP

Rhodes-Mahoney Furniture Co., Chattanooga, Does Nearly \$8,500 Worth of Machine and Record Business at Camp Near That City

CHATTANOOGA, TENN., March 4.—The important position held by the talking machine as a means of entertainment at the various military encampments is strongly emphasized in the record just hung up by the Rhodes-Mahoney Furniture Co., this city. Through the efforts of H. G. Ray, manager of the Victrola department of the company, there were sold to various individuals and organizations at the army camp here ninety-two Victrolas valued in all at \$5,448.65, together with over \$3,000 worth of records. The machines were bought in some cases by officers, and in other cases by company units, and Victrolas IX, X, XI and 14, were surprisingly frequent in the list. The figures, as offered, were compiled up to and including February 26, and several outfits sold since that time are not included.

Mr. Ray has made a complete list of sales to the camp, including the name of the purchaser, style of machine, and the price, and it makes a most impressive showing, one of which the company can feel proud.

PUT ON YOUR DEDUCTION CAP

When a goose lays an egg, she just waddles off as if she was ashamed of it—because she is a goose. When a hen lays an egg—ah, she calls heaven and earth to witness it! The hen is a natural-born advertiser. Hence the demand for hens' eggs exceeds the demand for goose eggs, and the hen has all the business she can attend to.—Andrew Lang.

Arthur F. Odell, a jeweler of Quincy, Ill., has bought out the Quincy Phonograph Co., at 411 Hampshire street, that city, and has placed Theo. Arnold in charge as manager.

Victor Records

How Scarce Records May Be Obtained

TO VICTOR RETAILERS

Instruct us what records you desire us to hold on order and to ship whenever received from the factory. We will thus be able to fill in your stock on the good numbers.

Very often good numbers arrive after your order has been filled and unless we have instructions to back order, the opportunity of getting them is lost.

The retailer who places his order in this manner has the advantage over the one who doesn't.

Get the advantage—Order NOW.

Magic-Tone

VICTROLAS—SUPPLIES—NEEDLES

Mr. Dealer:

Do you know that if you seat your prospect in a comfortable chair before the

GABELOLA

and "*Just Push the Button*"

that it will sell itself?

You can say with perfect frankness and without fear of contradiction that—

"This super-talking machine is winning its way in the thousands of homes where something more than a mere talking machine is desired."

It is self-operating—you *don't have to change needles*, records, or wind it up because these things are taken care of automatically.

STYLE 3

THE GABELOLA

Oak Finish—Height 66 inches, width 43 inches, depth 22 inches

Price, \$550.00

STYLE 1

THE GABELOLA

Circassian Walnut—Height 66 inches, width 43 inches, depth 20 inches

Price, \$600.00

The Needle magazine contains 600 needles, and a new one drops into place each and every time a selection is played.

The record container (which contains a repertoire of 24 selections) automatically changes the record just as soon as a selection is played.

The motor is electrically driven and controlled.

It is ideal for the home, dancing school and restaurant.

A personification of pleasure and entertainment "with all the bother left out."

You can say all this and more, but it would be unnecessary.

"Just push the button" and then have your order blank ready.

MANY NEW DEALERS ENTER THE FIELD IN BALTIMORE

Retailers Generally Have Fair Supplies of Goods Though Jobbers Are Kept on the Jump—Columbia Co. Occupy New Headquarters—Motor Truck Service Proves Big Aid

BALTIMORE, Md., March 5.—Talking machine business with the retailers is in fine shape in this territory, but the jobbers are not as well off, owing principally to the lack of goods to meet the demand of their trade. As the month closed, however, goods began to arrive in better shape, but not quite sufficient to meet the demand of the orders the firms have on hand. While some of the wholesale houses went behind on their shipments of goods the orders they have, if they could have been filled, would have run up a staggering total for increased business. At the same time there is a strong current of optimism among the dealers, who are looking forward to better shipping conditions and finally additional consignments of records, which have been coming in very poorly.

During the month the Columbia Co. ran a series of advertisements in one of the local papers featuring the Burgess Bed-time Stories for Children, which they have put on records. This paper carries the Burgess feature and the advertisements appeared on the same page. The local Columbia headquarters expects some good business from this plan, which was given but an experimental trial.

Several talking machine dealers also took advantage of the new music page, which is being conducted in The Star and appeared with the other piano houses offering pianos and players. The ads were attractive and all music dealers believe the page will make an increased music public and bring about business.

The Columbia Co. moved into its new headquarters at 16 South Howard street this week and are just getting things in shape to handle business for the coming season. W. S. Parks, the local manager, is delighted with the new home and is looking forward to big business, which will be handled with more facility and dispatch. Mr. Parks expects to devote most of his time on the road, and the general office work will be in the hands of S. Clifford Cooke, the assistant manager. Mr. Cooke just now is devoting most of his efforts to watching the shipping department and making every effort to get goods out. During the month A. B. Creel, W. T. Sibbett and P. W. Peck, of the sales force, were sent to the New York headquarters of the Columbia Co. to take a special selling course.

The Columbia Co. is using motor trucks to ship machines and records to Washington and points along the line. Many dealers in the outlying section are driving to the Columbia headquarters in their motor cars and obtaining their supplies of machines and records. Mr. Carlisle, of Gaithersburg, Md., who recently became a Columbia dealer, grew impatient in not getting his goods quickly and motored to Baltimore and obtained his supply. Mr. Bullock, of the Bullock Furniture Co., of South Carolina, was a visitor to local Columbia headquarters

during the week. February business with the city trade showed an increase for the Columbia Co., but the territory did not go ahead, owing to shipping conditions, and not the lack of orders. For the past three weeks Mr. Parks and Mr. Cooke have been getting on the job at daylight, and working until late in the evening with the force getting things in shape.

The Brunswick phonograph is now getting established in this territory, according to Mr. Loesch, of the local headquarters of the Brunswick-Balke-Collender Co. In Baltimore Bragers' department store is handling the line exclusively and showing good results. The following dealers have just been signed up to handle the Brunswick: Ira Wright, Seaford, Del.; York Record Exchange, York, Pa.; Hodnett-Chism Furniture Co., Danville, Va. Mr. Loesch is well satisfied with conditions and expects to announce additional dealers next month, there being several contracts in the making at this time.

W. C. Roberts, of E. F. Droop & Sons Co., Victor distributors, reports that business in the retail department showed up very well, but the wholesale end fell back 33 per cent. over the same month, shortage of goods and inability to ship being the cause. Mr. Roberts was made happy to-day, for while The World representative was speaking with him his shipping department reported the arrival of a shipment of goods, but the amount received will not begin to fill the orders.

Jesse Rosenstein, for the National Piano Co., the Pathé distributor, reports business fairly good, but held back for the lack of goods. George W. Lyle, vice-president of the Pathé Frères Phonograph Co., was a visitor to him during the month.

H. D. French, of the H. D. French Piano Co., W. W. Kimball representatives, is still handling all of the Kimball machines that are sent to him. He has not been able to properly introduce them to the Baltimore public because of the inability to obtain a sufficient number of machines to make a big drive.

H. M. Little, in charge of the retail depart-

ment for Cohen & Hughes, Victor distributors, reports a wonderful business in his department, despite the lack of back number records. The wholesale business of this firm was also held back because of lack of goods. During the month I. Son Cohen, of the firm, made weekly trips to the Victor headquarters in an effort to obtain more goods.

Retail business with H. R. Eisenbrandt & Sons Co., Victor distributors, was also good, and the firm managed to do fairly well in its wholesale department, being able to get out some shipments. This firm could also use more goods.

William M. Mueller, the largest music dealer in Highlandtown, and who handles the Victor line, has been doing a good business, but has not been able to meet the demands for either records or machines. He has curtailed his sales force about 50 per cent. and is thus able to handle the business at a good profit.

Joseph Fink, of the Kranz-Fink Talking Machine Co., Victor dealers, is well satisfied with business, and is planning to improve his department by installing three additional booths and a new record room.

The jobbers received many orders from Southern merchants during the past month, for this is the season that the Merchants' & Manufacturers' Association of Baltimore provides its rebates to visitors. More than 600 merchants from the South have registered with the bureau up to this time, the influx of merchant buyers to the city showing an increase of more than 100 per cent. over the same period for several years past.

C. H. HOPPER VISITS NEW YORK

C. H. Hopper, president of Hopper, Kelly Co., Seattle, Wash., was a visitor recently at the executive offices of the Columbia Graphophone Co., New York. Mr. Hopper, who is recognized as one of the most progressive talking machine men on the Pacific Coast, spoke optimistically of the business situation in his territory, and commented upon the fact that Columbia business is increasing by leaps and bounds. Mr. Hopper was gratified to learn that the Columbia Co. is making plans for a banner 1918, and was particularly impressed with the plans which the company is making for a record-breaking Columbia record business.

CRYSTAL EDGE MICA DIAPHRAGMS

**M

We use only the very finest selected mica, the best diaphragm material in the world.

PHONOGRAPH APPLIANCE CO., 109 West Broadway, NEW YORK

THREE YEARS PROGRESS

The last report of our Board of Directors to our Stockholders states that the increase of sales of "HOFFAY" products during 1917 was 1,808 per cent over those in 1916.

WHY?

Because we manufacture the perfect instrument. Because we manufacture the reproducer which has led the World for the last four years—the "RESURRECTONE," with its exclusive "Tuning-fork." Because we have the next best reproducer—the "Half-fork-tone." Because we manufacture the unique "Air-tight" mechanism from the Reproducer to the grill of the cabinet, which preserves the beauty of the "HOFFAY" tone.

If to a "wind" instrument you add or change the position of a hole or "key," the tone changes.

If a "string" instrument gets cracked the tone is lost.

If a "singer" loses a front tooth his tone is lost.

If a "cigar" gets broken the flavor is gone.

The same applies to a talking machine—that is why the "HOFFAY," although playing Victor and Edison types of records, is "Air-tight."

Spring (1) supports full weight of Tone-arm (2) and is insulated by felt padding A. Part of weight of Reproducer (18) is allowed to bear on Victor records, and this weight is just what it should be for this type of record. Edison records require more weight than Victors and this is automatically given by the "HOFFAY" because Edison records are thicker, and the principle of this form of spring is that the thicker the record, the more weight there is upon it.

Tone-arm (2) is supported by revolving base (3) at pivots (4). The Tone-arm is straight, there being no curves or joints hindering the sounds. Joint (13) is cemented and consequently air-tight.

Stationary base (5) carries balls (6) upon which revolving base (3) turns around for the horizontal movement of Tone-arm. Revolving base (3) is held by balls (7), the adjustment of which is made by ring (8), the weight of which is taken up by washer (9), leaving the balls free; thus a remarkable anti-friction mounting is obtained.

Flange (10) suspending from revolving base (3) goes into groove (11) in stationary base (5) without contacting with said groove, which is filled with lubricating material, and is continually lubricated mainly by capillarity; thus a permanent air-tight and anti-friction joint being provided.

Balls (6) and (7) are oiled through space (12) and as the end of revolving base touching the balls is sunk into lubricating material, the air-tight mechanism described above is reinforced.

Space (14) between Tone-arm (2) and revolving base (3) permits the up and down movement of Tone-arm. This space is absolutely closed by means of flexible washer (15) supported by ring (16) and by end (16) of Tone-arm, where it is fastened. This washer (15) leaves Tone-arm absolutely free to move, and is guaranteed to last for several years—also, it may easily be replaced. An ideal flexible and vertical air-tight device is exclusively provided by the "HOFFAY."

Equality of distance between stylus (20) and vertical axis (21) of Tone-arm (2) when Reproducer (18) is in position to play Edison records as shown in photograph 2, or in position to play Victor records shown in photograph 1, is essential for good reproduction of sound and for lengthening the life of records. This is afforded by the "HOFFAY" automatically, no screws to fasten nor detaching of Reproducer being necessary.

To obtain good tone it is essential that the diaphragm corresponds in line with the vertical axis of horizontal movement of Tone-arm. Photograph 3 shows a dotted line from axis (21) of Tone-arm (2) to diaphragm (25) inside of Reproducer (18), thus demonstrating that this essential requirement is fulfilled.

It is equally essential that stylus (20) be in line with axis (21) when playing Edison records and in photograph 5 will be seen that this requirement is also fulfilled.

Perfect air-tightness is given by padding (26) in Tone-arm (2), and by padding (27) in Reproducer (18). See photograph 3. These paddings contact with flat surfaces (29) and (30) of elbow (31), respectively, when playing Victor records. The two paddings contact with one another when playing Edison records.

To play Edison records loosen up screw (40) and press clip (35), which releases elbow (31). This elbow swings out of the way on steel pivots (32) supported by steel braces (33), thus permitting Reproducer (18) to be swung on steel pivots (34) into the Edison position. Spring (17) locks up Reproducer (18) by engaging with the steel screw-head (19), and in this way a fixed position for Edison records is obtained.

To change from Edison position (see photograph No. 5) swing Reproducer (18) to position shown in photograph No. 4 and press elbow (31) against Reproducer until plate (36) springs by itself over part (38) of said elbow. Then tighten up screw (40) so as to hold more firmly Reproducer (18) against elbow (31). In this way a fixed position is furnished by the "HOFFAY" for playing Victor records, and you know it's right because you hear it click. The braced construction is such that nothing but perfection is attained.

Either in "fixed" positions which the "HOFFAY" gives (and which prevent mistakes being made by the user of the machine); or in proper weights (for playing Victor and Edison records) given automatically by the "HOFFAY"; or in an absolutely air-tight construction (free from rotary joints, which in time loosen up, rattle and permit air to escape); or in an absolutely straight and air-tight Tone-arm; or in the most remarkable anti-friction and air-tight horizontal mounting for the Tone-arm, the "HOFFAY" fills all and every requirement for attaining perfection of sound and for fool-proof operation of the machine by the user.

Our new cabinets are beautiful and distinctive, befitting the perfect instrument they enclose.

SEND US A TRIAL ORDER TODAY

HOFFAY TALKING MACHINE CO., INC., 3 W. 29th Street, N. Y. City

Hoffay products are protected by patents granted and pending. Infringements will be prosecuted

THE WONDERFUL
"RESURRECTONE"
 and the
"HALF-FORK-TONE"

PRICE: Nickel-plated \$10. 22 karat gold plated \$12.50. To fit Victors, Sonoras, and attachments for Edison machines, etc. Money refunded if reproducer returned within 5 days from receipt.

PRICE: Nickel-plated \$6. 22 karat gold plated \$7.50. To fit standard machines and attachments for Edisons. Money refunded if reproducer returned within five days from receipt.

Naturalness of sound requires accuracy of diaphragm vibration, which varies according to pitch. For instance, when the Bass strikes "E," there are 160 vibrations per second; when the Tenor strikes "C," there are 512 vibrations; and when the Soprano strikes "C" (high C) 2048 musical vibrations are transmitted to diaphragm every second of time. The terrific rapidity of vibration bends the one arm lever which moves the diaphragm to the extent of the resiliency of the lever, each bending adding additional superfluous vibrations (on account of the "reaction" of the one arm lever) thus making sounds higher in pitch and "strident"—in fact, artificial.

Here are illustrated and described the two supreme reproducers, which are now sold to fit machines of other makes, to show what is the minimum tone that can be expected from the "HOFFAY"—the unusual "Airtight-phonograph."

In the "RESURRECTONE," the diaphragm is vibrated by a "tuning-fork" working on both sides, the resiliency of the two arms being automatically "taken up," accuracy of vibration and "naturalness" of sound being therefore accomplished facts.

In the "RESURRECTONE," the connection of the two arms to the diaphragm is of the HOFFAY flexible kind, which is another exclusive feature making this reproducer absolutely superior to all others.

The "HALF-FORK-TONE" is still much better than reproducers of other makes because the lever is supported by the other remarkable exclusive features of the "RESURRECTONE"—including the "flexed" Piano Wire Mounting which "tunes-up" the sound, and which has the additional great value of being "insulated" from the casing of the reproducer.

Order a sample; improve your machine; increase the value of your records, and learn by actual test how much better the complete "HOFFAY" instrument must be than any other machine. "Tone" requires "airtightness" and the "RESURRECTONE," "HALF-FORK-TONE," as well as the "HOFFAY" are absolutely "airtight."

Hoffay Talking Machine Co. Inc., 3 West 29th Street, New York City

RETURNS FROM SOUTHERN TRIP

Abram Davega, general manager of I. Davega, Jr., Inc., 125 West 125th street, returned around the first of the month from a pleasure trip through the South. He was well pleased with the business transacted during his absence and has come back with great plans for the future.

I. Davega, Jr., president of the company, and Mrs. Davega have left on a four months' tour through the South.

RATHER PARTICULAR IN BOSTON

BOSTON, MASS., March 5.—Henry Schultz, a talking machine dealer of 435 Broadway, South Boston, and his clerk, Robert Prohska, were fined \$10 each in the South Boston Court on Saturday on a charge of causing an obstruction on the sidewalk by operating a talking machine in the door of their store for advertising purposes. Both men have appealed from the decision.

VALLORBES NEEDLES IN DEMAND

The Vallorbes semi-permanent needle, which was recently announced to the trade, has jumped into instant popularity. The Vallorbes Jewel Co., producers of this new needle, and who are located at Lancaster, Pa., are in receipt of orders from practically every section of the country and are industriously tending to their filling.

ROY MARSHALL AGAIN AT DESK

The many friends in the trade of Roy Marshall will learn with pleasure that he has recently returned to his duties in the advertising department of the Victor Talking Machine Co. Mr. Marshall has just recovered from a severe siege of pneumonia.

The Brunswick-Munn Music Co., of Waterloo, Ia., has opened a new branch at Cedar Falls, Ia., making the third store now operated by that concern. The new store will handle the Brunswick phonograph and Pathé records.

T. McCREEDY NEW VICTOR TRAVELER

Thomas McCreedy has been appointed successor to Roger N. Lagow, on the traveling staff of the Victor Talking Machine Co. Mr. McCreedy will travel in the Middle West, concentrating his energies as a business ambassador in the State of Ohio.

JOINS THE NATIONAL ARMY

M. P. Fitzpatrick, who was formerly a member of the traveling sales staff of the Silas E. Pearsall Co., New York, Victor wholesalers, is now a member of the National Army, stationed at Camp Meade. Mr. Fitzpatrick is well known in the Victor trade, having visited the Victor dealers in the West before joining the staff of the S. E. Pearsall Co.

Edward Quick, of North Milwaukee, Wis., has been appointed distributor for the State of Wisconsin for the World phonograph, manufactured by the World Phonograph Co.

FREIGHT CONGESTION CHIEF DIFFICULTY IN PORTLAND

Volume of Business Only Limited by Ability to Meet Demands—Dealers in Every Line Under Stock Handicap—Early Relief Expected—Reserve Supplies Help Out

PORTLAND, ORE., March 4.—When the freight congestion is relieved Portland, Ore., will have talking machines in nearly every home—at least it so appears from the demand. This demand, by the way, is almost too great for the supply. Talking machines and records are short in stock in nearly every music house in Portland. Wheeler Dodds, head of the Victrola department of the Ira F. Powers department store, says it is impossible to get records enough to satisfy customers. The Gadsby Furniture Co., which has recently added the Columbia machine to its stock, while pleased with the success of the new department, regrets the freight conditions which seriously handicap the business. C. E. Moore is in charge of this department and its success is largely due to him.

All the music houses that carry the Victor, Columbia, Edison, Sonora, Brunswick and Stradivara are feeling the effect of the railroad difficulty. Eilers Piano House, which has one of the largest talking machine departments here, is selling the machines and records so fast that a new supply will be imperative in a short time. H. A. Raynor, manager of the phonograph department of this company, is cheerful in spite of a growing shortage of goods and predicts a good spring trade with plenty of goods coming.

Sherman, Clay & Co.'s immense stock of Victrolas is well looked after, but business is so good that even this big stock must be exhausted unless more Victrolas and records are received.

P. B. Norris, of the Wiley B. Allen Co., is also selling machines and records much faster than they are coming in.

Business men, in other lines as well as in the talking machine trade, believe, however, that there will soon be a great improvement in the transportation problems for the Pacific Northwest. The car shortage in Oregon on the Southern Pacific lines has been entirely wiped out in the last few weeks and a slight surplus recorded. A few months ago there was a shortage of more than 2,000 cars on this one line. The Oregon Washington Railroad & Navigation Co. has almost wiped out its car shortage and the Northern Pacific and Great Northern promise to have a surplus in a short time.

The Hyatt Talking Machine Co. has a big supply of Victors, Columbias and Edisons, but they are selling fast. Records are plentiful in the various houses, but there are certain popular records that are impossible to obtain.

The Harold S. Gilbert Piano Co., which is also carrying the Columbia, is running short of machines.

Bush & Lane is eagerly awaiting the arrival of a carload of Sonoras which are on the way.

The G. F. Johnson Co., which carries the Victrola, is looking for more goods, as is the Wakefield Music Co., which is doing such a big business with the Brunswick machine that the sup-

ply will have to be renewed in a very short time or there will be a lot of disappointed customers. The Edwards Furniture Co. has a big supply of Brunswick and Unola machines, but these cannot last all spring.

James Loder, formerly manager of the talking machine department of the Wiley B. Allen store at Portland, Ore., is now manager of the talking machine department for the Bush & Lane house here. Mr. Loder is so well known by Portland people and has such a big following that his customers depend very much upon his opinion. The Bush & Lane people consider themselves singularly fortunate in securing him. Mr. Loder is very much interested in the Sonora talking machine, which is sold exclusively in Portland by Bush & Lane. Mr. Loder says the Victrola, the Sonora and the Columbia make a splendid combination and satisfy the tastes of all customers.

Taylor C. White, manager of the local Victrola department of Sherman, Clay & Co., has made this department of the well-known music house one of the most efficient on the Pacific Coast. Maud Powell, the famous violinist, has been a Portland visitor for several weeks, giving a concert late last month. She visited the Sherman, Clay store and expressed her delight at the beauty and excellent service shown in the talking machine department.

Miss Powell said it was the most beautiful Victrola department she had seen on the Pacific Coast and she congratulated Mr. White on the attractive surroundings. Miss Powell, who makes records exclusively for the Victrola, may well be pleased with the appreciation shown her by Portland people whose demand for her records, which has always been great, has enormously increased since her concert.

Harry Lauder visited Portland, Ore., February 13 and gave a talk to the soldiers and gave two concerts, one a matinee and the other in the evening. Since then the demand for Lauder records has been enormous. Even before Lauder came to Portland the news of his approaching visit, which was announced as a final one, caused a rush for records.

A handsome Victrola has been purchased from Sherman, Clay & Co., Portland, Ore., by the Jewish women of the B'nai B'rith Society and sent to the Soldiers' Club at Tacoma, Wash., a club established by this society for soldiers and sailors of all creeds and denominations.

I. W. Lane, manager of the phonograph department of the Graves Music Store, Portland, Ore., is visiting friends in Waco and San Antonio, Tex. Mr. Lane will return in April.

Henry Schmidke, who has been traveling representative of the local branch of the Columbia Graphophone Co., has been promoted to the position of assistant manager. Charles V. Jones, former manager of the San Francisco branch, has been made factory traveling repre-

sentative covering the territories of the Portland and Seattle branches. Mr. Jones has been meeting with success in his first trip out of the Portland branch. R. C. Coltart, former assistant manager of the Portland branch, now becomes assistant manager of the San Francisco branch.

The Calif Bros. Furniture Store sold out all except one of its Pathé machines. A carload is reported on the way, due to arrive any day. Calls have been greatest for the \$75 and \$100 oak machines.

An attractive window display at the Edwards Furniture Co. has done much to enhance sales of the Brunswick machine. J. E. Allen, manager of the department, has succeeded in making it one of the best in the city.

A. R. Palmer, manager of the Olds, Wortman & King talking machine department, says that the Brooks machines have been finding a ready sale.

Good sales of the Stradivara machine are reported by the Hudson Arms Co. and the Remick Song Shop.

Visitors at the talking machine department of the G. F. Johnson Piano Co. are disposed to linger there because of the comfortable, well-ventilated, attractive demonstration rooms. The new house, which has been in business only four months, has many well-satisfied Victrola customers, due largely to the courtesy, efficiency and salesmanship of Mr. Johnson and his splendid corps of assistants.

The Wiley B. Allen Co. reports an unusual big business in the Victrola department. G. V. Taylor, head of the piano department, says that Paul B. Norris, the new Victrola manager, is making a wonderful record and that this indefatigable work is bringing results.

The Wakefield Music House reports large sales of Brunswick machines and records. February trade was a record-breaker and March has started off even better than February. Spring trade promises to be the greatest in the history of Portland.

Lack of records is one of the big features noted in the Portland trade. Miss Olga Binder, of the record department of the Wiley B. Allen Co., is almost dismayed at the lack of popular records in stock. While the Wiley B. Allen Co. has an enormous stock of records, the demand for patriotic and popular records has been so insistent that the immense supply is rapidly becoming exhausted.

BUTTERFLY MOTOR

Leonard Markels

This is the MOTOR whose phenomenal success made it necessary for us to double our factory capacity.

The "Butterfly Motor" has won the endorsement of leading talking machine manufacturers everywhere. It is giving excellent service under exacting conditions, and is a motor that is *guaranteed* in every detail. Read its specifications and you can readily understand why the Butterfly Motor is accepted as a standard in its field.

Try a Sample of The BUTTERFLY Motor. You will use it exclusively after a thorough test.

SILENT BUTTERFLY MOTOR

Jewel Bearing

Specifications

Beveled gear noiseless winding.
 New ratchet device that prevents clicking.
 Bakelite intermediate gear—absolutely silent.
 Plays seven to eight 10-inch or five and a half 12-inch records at one winding.
 Cast iron nickeled frame.
 Powerful, durable, compact, accessible.
 Built especially for the highest-grade machines.
 Guaranteed in every minutest detail.
 The perfection of mechanical genius as applied to the phonograph motor.

KANSAS CITY DEALERS ARE STRONG AFTER BUSINESS

Despite Shortage of Stock They Are Carrying on Strong Campaigns With the Goods on Hand—Junkins-Riley Co., Pathé Jobber, Turns Over Dealers to Wm. Volker—Other News

KANSAS CITY, Mo., March 5.—Despite shortage of stock, and the problems brought about thereby, talking machine dealers in this city and vicinity are not in any sense marking time. Although some of the more popular models of machines and the most desirable records are practically impossible to get, they are, nevertheless, carrying on strong campaigns to dispose of the goods already in their stores and to build for the future when conditions get back to normal. There is a lot of missionary work being done that cannot, and is not expected to, bring results for some time to come.

An interesting development of business in this section is found in the demand from the oil district. Fortunes are being made in oil over night, and the mechanic, or laborer, who yesterday was a prospect for a \$20 machine may to-day be in a position to buy one costing several hundred dollars. The pleasing part of the situation is that most of the deals with the oil men are for cash.

The Junkins-Riley Co., who have been Pathé jobbers for the Kansas City territory for a number of years, have sold a large part of their stock and turned over their dealers to the Wm. Volker Co., jobber of household furnishings. The Wm. Volker Co. is now the sole Pathé jobber of this territory.

The Junkins-Riley Co. will open an exclusive Pathé Shop (retail) in one of the best retail locations in the city. The shop will be designed by well-known architects and will be one of the best in this part of the country. Nothing definite has been done yet.

The Architects and Engineers Supply Co., Sonora dealers, report a big gain over last month and a bigger one over this time last year. They say that the demand for Sonoras is growing tremendously. Their record exchange department is also keeping up its big volume of business.

A. Einstein, of the Manophone Corporation, was a visitor among the trade recently.

"Our business continues to be simply wonderful," said S. G. Loewenthal, of the Henley-Waite Music Co. "The whole general line of Columbias seems to be in demand. We can't get enough of them. And our record business continues to be very, very good."

The Hall Music Co. management stated that the sale of Victors continues to be splendid and that, were it not for the shortage, business would be at the point of perfection. In records, the "Missouri Waltz" continues to be a leader.

Manager Lasseter at the Columbia department of the Kansas City Photo Supply Co. says that business is steadily on the increase. The additional record rooms, so recently built in, were only finished just in time—so fast has business increased. This company is a strong believer in the efficacy of advertising and has been doing extensive advertising both in the newspapers and on the street cars, the latter being particularly attractive.

The Brunswick-Balke-Collender Co., Brunswick jobbers in Kansas City, say that business all through this territory is on the boom, particularly in Missouri. As fast as the machines are shipped in to the dealers there comes a "big howl" for more and then more. The new Brunswick tone arm is making a big hit.

The Victrola department of the Jones Store Co. continues to have a very fine business. Of course they are handicapped by the shortage and sometimes so many substitutions have to be made that it requires the acme of diplomacy to put the deals across. "When we do get in some machines they are fumed oaks when the demand is for mahogany, etc.," said one of the salesmen. "However, we continue to take in the coin, so we should worry! Our business was far greater this month than a year ago."

The Brunswick Shop, which has not yet been established a year, now has a splendid business and verifies the belief of the management that just such an exclusive Brunswick Shop was needed in Kansas City. Sales continue to grow and the only difficulty is to supply the demand.

If the store dancing of the Edison company was merely a success at Peoria, at Clinton, and at East Orange, it took Kansas City by storm. On March 2, the end of the second week, the enrolment was up to 600 and more coming. And it was in Kansas City that, for the first time, the clumsy male insisted on coming to learn to dance. The first boys' classes were organized because the demand was so insistent. Those over eight years are not enrolled. But a large number between four and eight (garbed in gnome costumes of cheesecloth) put in a regular appearance and seem to enjoy it as much and more than baseball.

Miss Baldwin says that never before have the lessons been such a success. Hundreds of the little people come daily for registration while the mothers of many others register them over the phone. The lessons are being given in the basement of the Edison Shop (which has been fitted up splendidly for the purpose) and the mothers wait for the children in the concert room above and listen to the machines.

A unique feature at Kansas City is the large class of children from the city's slum district. They come every Saturday morning with a teacher from their ward school and to them that hour of dancing is a brief stay in Paradise. Many of them are Russians and the art of the dance is born in them.

STRONG DEMAND FOR PHONOGRAPHS

In a review of general business conditions, the New York Times had the following to say regarding the market for phonographs at the present time:

"The demand for phonographs continues strong, according to reports from several manufacturers with offices in this city. Though the hundred-dollar article seems to be the most sought, there is said also to be a good many of the more expensive lines selling, as well as a large number of the cheaper grades. The table cabinet continues in the lead among the higher grades. It is predicted that its sale this Spring and Summer will be unusually large, due to its being particularly well suited for the Summer cottage. It was explained that besides being a musical instrument of rare qualities it combines practical utility with beauty in a manner that is very pleasing."

Featuring the Musical Possibilities of the Talking Machine

By William Braid White

[Note.—This is the thirteenth in a series of articles on the general subject of the musical possibilities of the talking machine. The aim of the series is to develop these possibilities from all angles, thus opening up fields for sales expansion oftentimes neglected wholly or in part.—Editor.]

RECORDS OF PIANO SOLOS

At the present moment the world finds itself very much in a state of flux. Everywhere new ideas are being tried out with an enthusiasm which a few short years ago would have been thought almost inconceivable. Old notions are being revaluated and whatever does not seem to weigh up to standard is being thrown on the dust heap. Every business, whether directly or indirectly interested in the great war which is now engaging our energies, is feeling the impulse of new and fresh ideas. The business to which the energies of this paper are devoted is one which, before the war, could rightly have been called new, fresh and untrammèd, yet even in this hustling industry we find the signs of a still newer and quickening spirit. We live in great times.

It is my especial business to discuss with those who sell talking machines ways and means for improving and stimulating the retail interest, by showing how the musical possibilities of the talking machine may be turned to best advantage. In so doing I am forcibly reminded from time to time, by observing the current of events, how much in these days our business must be kept abreast of new ideas and new criticisms by a better understanding on our parts of its strengths and virtues.

The fact is not to be concealed that the public is learning to-day more quickly than it ever learned before. Its feelings are sharper, its perceptions quicker, its criticisms more pungent. Wartime is bringing increase in efficiency and corresponding increase in demand for the best of everything. The shoddy and the cheap look shoddier and cheaper than ever. The good is becoming more and more thoroughly appreciated and understood. All this is well. And it all has its moral for ourselves.

Records

In the retail selling of talking machines the record is, of course, the dominating feature. I mean that it is the record which excites the interest in the beginning, and mainly sustains it during the process of selling. The machine itself is, of course, complementary and essential; but the record is the interest-producer primarily. A fine set of records may be sold with a relatively cheap machine, but the finest machine cannot be sold without records. That much being plain, it becomes our duty in these days of wartime prices, keen public criticism, intense competition and smaller margin of profit, to develop intensively every branch of the business which shows good profit and helps to produce more business.

Piano Records

It is a fact that certain branches of the record business, which normally should be good sellers, have not been developed by retailers with quite the intensity to which their advertising value would properly entitle them. When we consider that violin records by Kreisler and voice records by Galli-Curci (to mention only two names that come to mind) sell extremely well, while piano records by Paderewski and Godowsky (again choosing at random) sell only moderately well, we must ask ourselves what can be the reason for such a contrast in demand. It certainly is not that the violin or the voice is necessarily more popular than the piano, of itself. Indeed, it is well known that the piano is by all means the most popular of musical instruments and that piano music is the most popular of all music. How is it that piano records do not sell as they ought to (that is to say, in

enormous quantities) and what can we do about the matter?

I need make no apology for choosing such a topic, since quite obviously high-class piano records are profitable to make and sell; and therefore any defect in the public demand for them should be investigated and if possible corrected. The task is harder than it sounds, perhaps, but while I must decidedly disclaim any ability or inclination to teach the manufacturers or retailers what they know better than I do, I must nevertheless be allowed to say some things which come to mind through long-continued observation, and which are without doubt useful in affording some gleams of light in a rather dark corner.

Two Reasons

There can only be two possible reasons for any lack of public demand for piano records, or for any slowness, even, of such demand. These reasons may be (1) some possible defect in the composition of the record, or (2) some lack of interest in the product on the part of the retailer. Let me briefly examine both of these ideas for our mutual benefit.

Ear vs. Record

Those who have watched the progress of recording are well aware that, until about ten years ago, scarcely any attempts to record solo piano music had been seriously made. The piano had been from the first used as an accompanying instrument in voice recording, but the support it affords in this respect is of only the slightest weight, being perceptible and no more. The art of recording solo piano work has progressed quite slowly, meanwhile, and it has gradually come to be seen that much technical refinement has yet to be brought about before the marvelous fidelity and power of the vocal records are approached. The piano record does not show the slightest defect in respect of its "hearing." Certainly the record takes up all the sounds that proceed from the piano. The only trouble is that the record picks up and fixes permanently a certain varying number of fugitive incidental sounds that accompany all playing of the piano, and reproduces these with complete fidelity. Indeed it reproduces them with more than complete fidelity, for it tends to

give us these incidental sounds in forms not indeed really exaggerated but in their actual right proportionate powers; something which our ear, when listening to piano playing, naturally and instinctively rejects.

Reverberation

In a word, we hear selectively. The playing of a piano in a small room produces a multitude of reverberations or echoes, from the reflection of the sound waves back from walls and floor. These echoes the ear rejects or ignores. But the record does not. Hence the record gives us certain incidental additional sounds mixed up with the intended sounds, in such a manner that an effect of "blurring" and of something that can only be described as an imitation of the jangle of a cymbal after it is struck sticks out from the sounds of the piano and perceptibly modifies them. It need hardly be added that the modification does not make for improvement.

Now, some of these matters have been discussed briefly at some recent piano technicians' meetings. A report of one of these appeared in the February number of this paper. I was glad to observe at this meeting evidences of respect for, and interest in, the talking machine and especially the plain indications that the piano itself is recognized by these practical piano men to be responsible for a good deal of whatever criticism may be leveled at records of piano music. Although it could not be said that any specially conclusive results were obtained, it is fair to say that all present were able to perceive that the piano, as played and built for ordinary playing, is not an ideal instrument for recording of sound.

Defects of the Piano

The defects of the piano may be briefly summed up. In the first place, the sounds which proceed from this instrument are too widely diffused over the field of sound-wave operation. In the second place, the sounds which proceed from struck strings begin with a great intensity which rapidly subsides, and so tend to reflection from the walls of a small room, thus producing reverberations and echoes which are picked up by the record and interfere

THE MUSICAL POSSIBILITIES OF THE TALKING MACHINE

(Continued from page 63)

with the clarity of the reproduction. In the third place, the bass strings vibrate in such a manner that the strong fundamental sounds which would best carry the tones of the piano to the record are swallowed up in a mass of incidental partial tones. In the fourth place, the vibration of the case and metal framing of the piano is sufficiently violent to produce additional reverberations which likewise interfere with clarity.

Remedies

The remedies are not entirely simple. Some of them may, however, be considered immediately practicable. The first is that piano recording should be done in large rectangular rooms, the walls lined with non-conducting material such as felt, with all re-entrant angles and elliptical concave corners eliminated. This will tend to reduce, if not eliminate entirely, reflection from walls, floor and roof. Secondly, such construction of the piano's case as will tend to deliver its sound waves in one given direction is highly desirable. This might be done by enclosing the piano, save only the keyboard, in a concrete box, having a tapered end with an opening to the talking machine horn, which also should be of concrete or similar non-conducting neutral material. Solid glass would be as good but more expensive.

The perfect piano for recording purposes will have to be built specially, I think. Such a piano must be above all longer, so as to permit of longer bass strings. I should like to see a twelve or even fifteen-foot grand built for the special purpose of talking machine recording. Many of the present difficulties would then vanish. The technical reason I have only been able to state briefly and inadequately; but so far as they go they are thoroughly valid.

Selling

So much for the recording side; but now what about the selling? After all, the facts that I have pointed out have not operated to prevent the sale of talking machine records of piano music, nor is there any particular reason why they should have. I have stated what any one can perceive for himself, but I have not failed to show likewise that the art of recording for the piano is in a state of progression. Why then wait for some imagined further improvement—which will come in good time—when we can have so much that is good already, and moreover can do our part towards educating the public into the desire for piano music records now? As the manufacturers solve, one by one, the problems of recording, they will increase the number thereof and will go after piano music more and more persistently. They will do this because the piano is the one most popular musical instrument; and because the player-piano and the hand-played player-piano record have awakened a new and vital interest in all that pertains to piano playing. All the ideas set forth above tend to show, in the aggregate, that the art of producing piano records relatively as perfect as those which the voice permits is a matter only of adjustment to certain conditions. Let the conditions be recognized and especially let the piano trade show a willingness to co-operate. The problem will then very soon solve itself.

"Push Them"

Therefore, it should be the aim of every wise retailer to push the sale of piano records with all his might. He should remember that, in the first place, many eminent pianists, with all the reputation and prestige of their names, have been willing to make records of their act. He will then realize that these men plainly see the possibilities in front of them and are not ashamed to associate themselves with a movement entitled to the highest respect and encouragement. He will likewise realize that any line of merchandise to which is attached the prestige of a great name is worthy of all encouragement and at the same time possesses an advertising value that does not pertain to any

which is not in the same position as to name. He will realize, in short, that he can sell talking machine records of piano playing, and make them profitable in every way.

Choices

Space does not allow me to do more than merely mention the names of a few records which might especially be studied by those who would sell piano music for the talking machine. But a word of suggestion may be useful. Numbers which involve brilliant runs, glittering scales and ornamental playing generally, but which do not call for heavy basses, deep sustained tones and the tragic side of the piano, as it might be called, sound best and will be the most popular. Such records as the Chopin study in G minor (double notes) by Bachaus, the Liszt Gnomenreigen by the same, Godowsky's record of the Chopin Valse in E minor

PLAN TO FINANCE EDISON DEALERS

Thos. A. Edison, Inc., Makes Arrangements Whereby Dealers May Utilize Instalment Contracts in Payment of Their Accounts With Distributors—Details of the Plan

Thomas A. Edison, Inc., have recently completed a plan for the financing of their dealers' deferred payment contracts. Under this plan, which is operated in conjunction with the Commercial Investment Trust, of 61 Broadway, New York, Edison dealers may utilize their retail instalment contracts in payment of their account with the distributors. The charges for the accommodation are within the amount now collected as interest from the retail purchaser of the phonograph.

In a recent interview Mr. Harrison Durant, financial supervisor of the Edison Co., had the following to say regarding the new plan:

"The financial plan formulated by the Commercial Investment Trust is a broad one, and decidedly advantageous. The charges are considerably less than those previously quoted by any of the regular discounting companies offering the same accommodation. The plan includes the insurance against loss or damage by fire, without additional cost, of all instruments in a purchaser's possession for an amount equal to the unpaid balance of the amount advanced. The plan is based on the well-known trade acceptance—in this case termed a 'collateral ac-

ceptance.' A dealer attaches his customer's paper to the acceptance, and receives credit for an amount not exceeding 84 per cent. of the unpaid balance of instalments. "The plan has our entire approval, and no doubt will be of great advantage and assistance to Edison dealers throughout this country and Canada. It is the only plan of its kind which the Thomas A. Edison, Inc., recommends to its dealers, and is the result of very sincere efforts on our part to relieve our dealers of some of the burden of their financing. The fact is that Edison instalment paper has terms which up to the present date have not been available to phonograph dealers."

The salesman can find many others of the same sort which a study of the catalog will suggest to him. This is a case where wisdom and discretion are desirable in every sense.

I believe in the piano record for the talking machine and in its future development. I want to see the public educated to it. It is a fine wide field. Let us get at it now with plough and harrow.

ceptance.' A dealer attaches his customer's paper to the acceptance, and receives credit for an amount not exceeding 84 per cent. of the unpaid balance of instalments.

"The plan has our entire approval, and no doubt will be of great advantage and assistance to Edison dealers throughout this country and Canada. It is the only plan of its kind which the Thomas A. Edison, Inc., recommends to its dealers, and is the result of very sincere efforts on our part to relieve our dealers of some of the burden of their financing. The fact is that Edison instalment paper has terms which up to the present date have not been available to phonograph dealers."

CONGRATULATION FOR W. H. BISHOP

W. H. Bishop, manager of the Trinity Talking Machine Co., 52 Broadway, New York, is receiving the congratulations of his many friends in the trade, upon the arrival at his home recently of Shirley Frances Bishop. This young lady is already taking a keen interest in Red Seal Victor records, and endeavoring to emulate the examples set by some of the famous Victor operatic sopranos.

The Trinity Talking Machine Co. is one of the most successful Victor retail establishments in the lower part of New York City, and Mr. Bishop has been an instrumental factor in developing the company's business to its present satisfactory totals.

EDISON DIAMOND DISC JOBBERS HOLD ANNUAL CONVENTION

Only Three Members of Jobbers' Association Fail to Attend—Important Trade Topics Discussed—All Officers Re-elected—Edison Officials Make Addresses—Banquet at Sherry's

The Edison Diamond Disc Jobbers' Association held its annual convention at the Hotel Knickerbocker, New York, on Monday and

close to those of other years, and included special papers read by various members of the association, talks on important topics delivered

All officers were re-elected for another year, they being: Walter Kipp, Kipp Phonograph Co., Indianapolis, president; L. N. Bloom, Phonograph Co., Cleveland, vice-president; F. E. Bolway, Bolway & Son., Inc., Syracuse, secretary, and H. H. Blish, Harger & Blish, Des Moines, Ia., treasurer. The advisory committee for the coming year will consist of A. H. Curry, Dallas,

Members of Edison Disc Jobbers' Association Tuesday, February 18-19, and, despite the unusual travel conditions prevailing, only three members were missing when the roll was called, the jobbers coming from all sections of the United States and Canada to attend the gathering.

The convention program in the main followed

Who Held Their First Wartime Convention at Knickerbocker Hotel, New York, February 18-19

by factory officials, and general discussions at an open forum.

The first business session was held on Monday, at which time various officers and committees made their reports for the year. The reports for the most part were very encouraging.

Tex.; Albert Buehn, Pittsburgh, Pa., and George Babson, of New York.

Tuesday's sessions were given over to the reading of special papers and addresses by members of the Association and by factory officials, the latter including William E. Maxwell, vice-

Banquet Tendered the Visiting Jobbers by Thos. A. Edison, Inc., at Sherry's, on Evening of February 19

president of Thomas A. Edison, Inc.; L. C. McChesney, advertising manager; Thomas J. Leonard, sales manager; Harrison Durant, the financial supervisor; Verdi E. B. Fuller, general supervisor of the Edison Co., and some others. Mr. Maxwell opened the morning session with an interesting talk on the present business situation, and what the future appeared to hold forth for the Edison line and those interested in it. He also told something of what the factory planned in the matter of future developments.

M. M. Blackman, of the Phonograph Co., Inc., next brought before the jobbers his recent book

Walter E. Kipp, President

on the Edison phonograph, which was discoursed upon to considerable extent. F. E. Bolway read a paper on "Retail Selling Plans," and H. H. Blish, Jr., read a paper on "Tone Tests."

The session broke up at 1 o'clock when the factory officials and supervisors were the guests of the jobbers at a special luncheon at the Knickerbocker.

The afternoon session was opened by Harrison Durant, who presented a new and interesting financial plan to the jobbers, following which A. H. Curry read a paper on "Wholesale Selling Plans," W. B. Eddy read a paper on "Accounting and Collecting," and B. A. Trestrail, Toronto, led a discussion of war and business in Canada and the United States.

At the conclusion of the regular program, an open forum was announced, and a number of interesting informal discussions were indulged in.

On Tuesday evening the jobbers were the guests of Thomas A. Edison, Inc., at an elab-

orate banquet at Sherry's, where addresses were made by William E. Maxwell, vice-president of the Edison Co.; Walter Kipp, president of the Jobbers' Association, and others. A number of cabaret artists provided entertainment for the occasion.

Wednesday morning the jobbers went to the Edison factory at West Orange, N. J., for an informal get-together and were served a special luncheon in the Edison restaurant, after which several of the newest Frieda Hempel Re-Creations were presented for their entertainment and information.

Among those who attended the convention were D. W. Schultz, Schultz Bros., Omaha, Neb.; Robert L. Proudfit, Proudfit Sporting Goods Co., Ogdun, Utah; A. H. Curry and F. C. Beattie, of the Texas-Oklahoma Phonograph Co., Dallas, Tex.; L. A. Walker, Montana Phonograph Co., Helena, Mont.; W. L. F. Rosenblatt, Phonographs, Inc., Atlanta, Ga.; R. B. Cope, Girard Phonograph Co., Philadelphia; H. H. Blish, Jr., Harger & Blish, Des Moines, Ia.; J. G. Harrison, W. H. Thorne & Co., Ltd., St. John, N. B.; W. O. Pardee and H. L. Ellenberger, Pardee-Ellenberger Co., New Haven, Conn.; F. H. Silliman, Pardee-Ellenberger Co., Boston, Mass.; M. M. Blackman, the Phonograph Co., Inc., Kansas City; Albert Buehn, Buehn Phonograph Co., Pittsburgh, Pa.; C. R. Lee, George Babson and F. O. Faul, Phonograph Corp., of Manhattan, New York; C. E. Goodwin, the Phonograph Co., Chicago; R. S. Williams, H. G. Stanton, G. B. Petch, T. A. Dillon and Miss Punton, R. S. Williams & Sons Co., Ltd., Toronto, Ont.; R. B. Alling, the Phonograph Co., Detroit; F. S. Hemingway, the Diamond Music Co., Inc., New Orleans, La.; Walter Kipp, Kipp-Link Phonograph Co., Indianapolis, Ind.; F. E. Bolway, W. P. Eddy, J. G. Brown and A. W. Fiedler, F. E. Bolway & Sons, Inc., Syracuse, N. Y.; W. B. Smith and L. N. Bloom, the Phonograph Co., Cleveland, O.; R. E. Oldman, the Phonograph Co., Cincinnati; W. A. Meyers, Williamsport, Pa.; W. C. Wyatt and H. Richards, the Denver Drygoods Co., Denver, Colo.; W. A. Schmidt, the Phonograph Co., Milwaukee, Wis.; N. D. Griffith and P. R. Hanley, American Phonograph Co., Albany, N. Y.; C. B. Haynes and E. Bowman, C. B. Haynes & Co., Richmond, Va.; Mark Silverstone, Silverstone Music Co., St. Louis, Mo., and Laurence H. Lucker, Minneapolis, Minn.

THE VICTOR "VOICE" FOR FEBRUARY

Interesting Series of Pictures Show How Victrolas Provide Comfort and Entertainment for Fighting Men on Land and Sea

The February number of "The Voice of the Victor" might well be termed a war or military number, for most of the illustrations are calculated to show the interest in music, and particularly Victrola music, displayed by the fighting men of the nation.

The cover design of the February "Voice" consists of over 500 service stars representative of the number of Victor employes who have entered the service of Uncle Sam to date. The big feature, however, is the reproduction of a yard in length of a photograph of something like 40,000 soldiers in camp at Tacoma, Wash., listening to the singing of Alma Gluck. The point is emphasized that the soldiers asked for the selections they had heard on the Victrola.

The center spread is made up of a group of eleven photographs taken on land and sea, and showing how Victrolas are utilized to provide comfort and entertainment for the soldiers and sailors. One photograph depicts the use of a Victrola in a hospital where its music serves to soothe the patient while he is undergoing an operation.

If you hustle so eternally that your system demands a vacation, you have gotten where you cannot do good work. If you have reached a point where you cannot do good work, you cannot enjoy a vacation.

No. 404 UDELL CABINET

For filing Victor or Columbia Records. Capacity 208 Records. It is 32 inches high and the top is 17 inches square. You can use Victrola IV A or VI A or Columbia Grafonola 25 or 35 with this Cabinet and make a most attractive combination.

Either Quartered Oak or Mahogany, the price is \$7.50.

There is one factor, but little advertised, that helps account for the ever-increasing popularity and self-selling ability of Udell record cabinets. That factor is the intimate knowledge concerning what the American homes are buying, which the Udell organization gleans through its extensive activity in the furniture field proper.

Our large interests in the manufacture of furniture for elite homes gives us an up-to-the-minute realization of just what woods, just what period styles, just what kinds of finish and just what shades of finish are most sought for by the American public.

All this valuable knowledge is utilized in the designing of the celebrated and trade-marked line of Udell record cabinets. Catalog on request.

TRADE CONTINUING ACTIVE IN TORONTO AND VICINITY

W. C. Willson Joins Pathé Organization—J. P. Bradt Tells of Columbia Progress—Canadian Phonograph Supply Co. Opens Local Starr Branch—Heintzman Opens Victor Store

TORONTO, ONT., March 8.—W. C. Willson, for the past fourteen years secretary-treasurer and manager of the Meadford Mfg. Co., Ltd., of Meadford, Ont., has joined the Pathé Frères phonograph organization in this city. He comes in the capacity of assistant manager of Pathé Frères Phonograph Co., of Canada, Ltd., and will have charge of the firm's internal organization. Mr. Willson brings to the Pathé organization not only a wide manufacturing experience, but also the energy and enthusiasm of a young man who has boundless faith in Canada's future and the part that Pathé Pathéphones and records will play in building up a musical and therefore a successful nation.

The R. S. Williams & Sons Co., Ltd., on March 12 will close an essay prize contest which they have been conducting for the best essay on Mr. Edison—his life and inventions—particularly his personal favorite among all his many inventions. The contest is open to the girls and boys of Toronto, and prizes of from \$2.50 to \$25—in all, \$100—are offered. This firm are now having daily Edison recitals for school children from 4 until 6 each afternoon, and all day on Saturdays.

J. P. Bradt, general manager of Canada for the Columbia Graphophone Co., has been planning ever since 1917 closed with a business with reports of a business 100 per cent. larger than 1916, how to keep pace with growing demands. Two things he found necessary—largely increased factory facilities, and an enlarged staff. The filling of the latter need is now announced, and factory negotiations are in progress. To aid in the direction of the greatly enlarged manufacture and growing business, Mervin E. Lyle has been transferred to Canada. Mr. Lyle comes from the head offices in New York. His experience of over fourteen years embraces every phase of the business. With such an experience Mr. Lyle will be of great aid to Mr. Bradt in upbuilding manufacture; in taking care of sales and the general development of the business to the benefit of dealers in Columbia products.

That music is being demanded more and more by Canadians, and that they have developed musically in the past three or four years is the experience of I. Montagnes & Co., distributors in Canada of Sonora phonographs. "Business increases every day," reports Mr. Montagnes. Shipments are now coming from New York by express as a result of the freight congestion, and stocks that they thought were ample for some months have been cleaned out.

"Specialists in Victor records," is the way Harry E. Wimperly describes the Victrola Service Co. recently opened up by him in the new Ryrie Building, this city. Having proved his theories right concerning upstairs piano salesrooms, Mr. Wimperly was encouraged to take on "His Master's Voice" lines, in which he is strongly specializing, being thoroughly familiar and enthusiastic as a result of his experience with the line when manager of the Bell piano salesrooms in Toronto. Mr. Wimperly has many original ideas that he is putting into effect, resulting in quite an extensive list of patrons for Victor records being built up in a very short time. By the way, Lieutenant Claude C. Wimperly, a son of Mr. Wimperly, is among the returned officers from the war front, attached for duty with the First Depot Battalion 1st C. O. R.

F. A. Trestrail, general manager of the Musical Merchandise Sales Co., who are Canadian distributors of Brunswick phonographs and records, has returned from a trip to Chicago, where he visited the immense factories of the Brun-

wick-Balke Co. The Musical Merchandise Sales Co. has started on its campaign of outdoor advertising, with a handpainted sign "at the Dom," Toronto, which is not apt to leave any passerby's mind unimpressed with the name "Brunswick."

Among the newest additions to "His Master's Voice" stores in this city is one opened up by Armand Heintzman, at the northwest corner of College street and Ossington avenue. Mr. Heintzman is vice-president of Gerhard Heintzman, Ltd., and superintendent of that company's factories. The retail Victor store is a personal venture "on the side," being an outcome of Mr. Heintzman's enthusiasm in connection with talking machine business in general, and Victor lines in particular.

The following is from a letter sent Columbia distributors in Canada by James P. Bradt, general manager of Columbia interests here:

"While we have for many months restricted our manufacture and sales of German, Austrian, Hungarian, Bulgarian and Turkish records, it has now been decided to withhold from the market every selection which could possibly arouse or foster hostile national sentiment among people of enemy-country origin resident in Canada. A list is being prepared and will go to you in a few days, showing what records we are suppressing. Upon receipt thereof you please immediately withdraw the prohibited selections from sale and advise us of your stock of each selection, if any.

"We also request that you send a copy of our list to every dealer on your list who may have in stock any of the prohibited records, with instructions to withdraw them at once. Please secure information as to your dealers' stocks and inform us. We do not intend to withdraw the records of standard composers, or other selections which are without objectional flavor."

To meet the convenience of their outside dealers visiting Toronto, the Canadian Phonograph Supply Co., of London, Ont., distributors of Starr phonographs and records in Canada, have arranged for a local branch. Samples of the various types will be on display. M. E. Stanfield, on the firm's selling staff, will look after this branch, in addition to handling his Ontario territory.

P. K. Wood, of the Thomas Mfg. Co.'s local branch, has returned from a visit to the firm's headquarters in Dayton, O.

Thomas Nash, the well-known "His Master's Voice" enthusiast, who is manager of "His Master's Voice," Ltd., Toronto, when not developing new ideas from which dealers can sell still more records, was a recent visitor to New York.

Mme. Barrientos, the eminent coloratura-soprano, exclusive Columbia artist, gave a song recital recently in Toronto and a large sale of records of her recordings is reported.

G. P. Sharkey, who is well known to the Canadian trade, has started business for himself under the name of Sharkey Novelty Co., and is offering the trade etched brass nameplates for pianos and talking machines.

Mr. Ruse is opening up with "His Master's Voice" lines. The store equipment will include a number of demonstration booths for the Victrola department.

CASSIDY'S, LTD., COLUMBIA DISTRIBUTORS IN WINNIPEG

Robert Shaw Continues as Manager—Grand Opera Season Helps Season of Record Sales—Trench Gramophone Appears—Berliner Gramophone Co. Enlarges Its Business—Other News

WINNIPEG, MAN., March 6.—The Western Fancy Goods Co., distributors of Columbia lines in the West, have now been taken over by Cassidy's, Ltd., and have moved into very much larger quarters. Robt. Shaw has been retained as manager, and Gordon Stark has been engaged as assistant manager. Mr. Shaw reports goods coming in considerable quantities—record shipments from factory, but there are thousands of orders for records still unfilled.

During the appearance of the San Carlo Opera Co. in Winnipeg the local phonograph dealers (Victor, Columbia, Edison and Pathé) took advantage of the occasion and used a whole page in the Winnipeg Tribune featuring each day a list of records of the opera playing that night.

A Winnipeg officer has just sent to his wife in Winnipeg one of the new trench gramophones, which are sold by a London firm. Small in construction, this little machine fits into a compact leather case and is most portable. Its most remarkable feature is the tone it produces. This is effected from a copper reflector which is fixed at the rear of the sound shutter, which resembles those shown in the new electric cir-

cular heaters. The great Harry Lauder, the soldiers' hero, was heard to great advantage on this wonderful little instrument which takes any sized record. Above the cannon's roar and the constant bursting of shells the lads in the trenches are able to enjoy the dulcet tones of Melba or the rollicking ballads of McCormack.

Cross, Goulding & Skinner, who are featuring the Columbia and Brunswick machines with great success, give favorable reports of activities in this department since the beginning of the year. The continued development of the talking machine business impresses this firm that the desire of the public for music in the home continues to grow.

The White House (the largest departmental store in St. Boniface) has taken up the Columbia line and is specializing in the French records on the Columbia list.

Stanwood's, Ltd., announce a big sale of the new Columbia record "Blighty." In connection with this record Mr. Shaw says the output was phenomenal, over one thousand being sold in the first day and a half.

THE RENÉ MANUFACTURING CO.
MONTVALE, NEW JERSEY

TRADE CONDITIONS IN THE DOMINION OF CANADA—(Continued from page 69)

All Columbia dealers have lately shared in a good distribution of Godowsky records, due to this artist's appearing in the leading centers of Western Canada and British Columbia.

The announcement of enlarged manufacturing facilities by the Berliner Gramophone Co., Ltd., Montreal, has been received with considerable elation by the management of the Western Gramophone Co., Western distributors of "His Master's Voice" lines.

Ashdown's have built new mahogany and glass

tone rooms and have very materially enlarged the Grafonola department, putting Chas. White in immediate charge under the direction of Ralph Patterson. Business is reported as brisk.

Babson Bros. report conditions and prospects good for immediate future trade in the Edison lines.

The Western Gramophone Co. say there has been a big demand for Victor records, and are looking forward to big times when Harry Lauder comes to Winnipeg.

cate of one recently purchased by Dr. Boyle, president of King's College, of that place.

The Black Diamond Needle Co. has been organized by Arthur Kempton, of Montreal, who is featuring a semi-permanent talking machine needle called the Black Diamond.

Pablo Casals records were featured by all Columbia dealers in the newspaper advertising both previous to and after his recital in Montreal and a large volume of sales is reported.

"We only wish we had taken on the representation of the Brunswick long ago," is the way the Cowan Piano & Music Co. expressed themselves to your correspondent. This firm are devoting considerable more space to the talking machine end of their business and purpose utilizing their upstairs studios for demonstrating parlors.

All the talking machine and piano dealers observed the recent heatless term of three days' duration.

Among the congratulations which have poured in upon Thomas A. Edison on the occasion of his seventy-first birthday were many from friends in Canada. Some of these messages are from men who recall the time when the electrical wizard sold papers and candy on the Grand Trunk trains.

RECENT DINNER OF MONTREAL TALKING MACHINE MEN

About Thirty-five Members of the Trade Have Most Enjoyable Reunion at Cooper's—Black Diamond Needle Co. Organized—Brunswick Phonograph Popular—Congratulations for Edison

MONTREAL, CAN., March 5.—A dinner free from long-drawn-out cut-and-dried speeches was that of the Montreal talking machine men held recently at Cooper's. The entertainment furnished by professional talent was given hearty applause and numbers of encores. Covers were laid for thirty-five and the dinner was of the high standard for which Cooper's is famed and was heartily enjoyed, of course. S. H. Brown, the versatile linguist and retail sales manager of the Berliner Gramophone Co., Ltd., who is excep-

tionally and most favorably known to the trade on the other side of the line, demonstrated that he could manage and conduct a dinner and entertainment of this nature as well as he conducts business. Those contributing to the program included Thomas Cowan, Lieutenant B. C. Hillium, S. R. Adamson, T. L. Rettie, Sergeant Harry Pearson, et al.

At a recital given in aid of the Red Cross at Windsor, N. S., a Starr phonograph contributed to the program. The phonograph was a dupli-

VALUE OF PERSISTENT PUBLICITY

Kirkman Engineering Corp. Tell of the Progress of Their Products—Advertising for Six Years in The World—Have Built Big Business

The Kirkman Engineering Corp., New York, manufacturer of automatic stops and other successful phonograph accessories, has been making rapid progress the past year, and in a chat with The World Thomas W. Kirkman, president and general manager of the company, stated as follows:

"We have been advertising our accessories in your paper for the past six years, and at the present time have a steadily increasing list of patrons, which includes manufacturers and dealers from coast to coast. As an indication of the value of persistent merchandising and advertising, it is interesting to note that the demand for our K-E automatic stops is far ahead of our expectations, and in advance of our manufacturing facilities.

"When we started to produce our automatic stops, the manufacturers of talking machines did not accept the idea with unanimous favor. Some argued that it was an added expense, and an unnecessary innovation, but our persistent campaign to the trade and the success of our device

has 'sold' the idea of an automatic stop to manufacturers and dealers everywhere.

"To-day we are selling the K-E automatic stops to many different talking machine manufacturers, including some of the leaders of the industry. From a new accessory, handled by the dealer only, it has progressed until it is now recognized as a part of the standard equipment of the high-grade, successful talking machine. We have weathered many storms in manufacturing and merchandising these stops, and as we look back upon our six years' experience in this field, we are inclined to believe that the practical merit of our device has enabled us to overcome all the obstacles which confronted us during the first few years, and gained for our product country-wide recognition."

CLAIMS PATENTS ARE INFRINGED

Mutual Talking Machine Co. Announces That it Plans to Prosecute Several Concerns for Imitating Its Ball Bearing Tone Arm

"During the past few weeks," said Wm. Phillips, president of the Mutual Talking Machine Co., New York, "my attention has been called to the fact that several concerns in the trade are infringing on the Mutual ball bearing

tone arm. Some of these infringements are sufficiently flagrant to warrant our attention, especially in view of the fact that this tone arm is a patented product, and patent claims have been granted on all of its distinctive features.

"It is our intention to prosecute vigorously all infringers of this ball bearing tone arm, and I have just placed in the hands of our attorneys proofs against two concerns whose infringements have been so serious that our customers have called our attention to their duplication of our product.

"We do not sell the Mutual ball bearing tone arm to motor manufacturers, but market it direct to the talking machine manufacturers or dealers, thereby eliminating the middleman, and enabling us to give maximum service to our clients. We, therefore, feel that the talking machine industry should be conversant of the infringers of our tone arm, particularly as this ball bearing tone arm is an original product, which is fully covered by patents. I may add that we intend to prosecute not only under the patent laws, but under the laws covering unfair competition."

Frank M. Elmer, talking machine dealer of Watertown, N. Y., has purchased a controlling interest in the Watertown News Co. here.

An Artistic Easter Window Suggestion Described for Talking Machine Dealers

By Ellis Hansen

This is the thirteenth of a series of articles on window display written by Ellis Hansen, who is recognized as one of the most practical designers of talking machine window displays in the United States.

Easter has come to be looked upon as the occasion for elaborate window displays.

Department stores, to which the world undoubtedly is indebted for the high standard of commercial art in the show windows of this country, generally make the Easter season the time for the "spring openings" and to-day—more than ever before—the success of any "opening" depends to a great extent on window displays. Years ago it was considered good form during the Easter season to use religious emblems, such as a giant cross made up of artificial flowers or wax figures made to represent angels with flapping wings, mammoth eggs with big dolls inside. Stuffed rabbits and live chicks were also noticed in many windows, all to signify Easter and jolly the crowds into the spirit of Easter shopping.

To-day such an appeal from the show windows of any self-respecting store would be considered coarse and poor in taste and, therefore, bad business. The idea to-day of a successful Easter display is rather to carry the spirit of spring, the rebirth of Mother Earth with the flowers, trees and all the living things so dear to all of us after the long cold winter sleep.

Detail of Card for Reproduction by Card Writer Put that spirit into the display. This is best accomplished by the discriminating use of flowers. The graceful Easter lily is very popular and justly so, but I would advise against lilies or other white flowers exclusively, for they might give a funereal air to the entire display and that, of course, by all means must be avoided. Lilies and roses, with the latter predominating, with plenty of vines and leaves make a good combination.

Another reason for talking machine dealers not to emphasize Easter too strongly is the short life of such a display. Easter comes unusually early this year, to be exact on March 31. It would be illogical to keep an exclusive Easter display in a dealer's window more than about a week or ten days after this date. On the other hand, a spring display could very nicely give four or six weeks' service. This would encourage dealers to spend more time and money on such a setting on account of the greater length of time it would serve.

Manufacturers have been in the habit of sending out circulars, hangers and show cards advertising Easter records. These, of course, should be made use of for the proper length of time and would, no doubt, add to the sale of Easter records. But such cards and other Easter advertising should be taken out of the windows before they have grown stale. Nothing is more out of place than a Christmas dis-

play in February and that same principle applies just as well to other holiday seasons.

The fixtures illustrated and described in this article should be made substantially and of good material and finish. This will increase the cost somewhat, but when it is taken into consideration that such fixtures can be used over and over again for the different seasons by changing

writer is able to make such a transparent sign, but, of course, an ordinary and less expensive card could be substituted. The size of the card should be twenty-five inches in diameter to give plenty of space to fasten at the back. The center opening is twenty-one inches, which would leave two inches all around. The floral decorations used consist of two potted palms for

Easter Window Display Suggestion for Talking Machine Dealers

the floral decorations and show cards the additional first cost will pay in the long run. The fixtures consist of two tall flower stands built on simple straight lines. The lower parts are intended for palms or other graceful leaf plants. The upper parts are made into a kind of flower basket not only intended for holding flowers and foliage, but also serving to support the center

the lower part of the stands, Easter lilies, tea roses, and foliage and separate palm leaves. These can be furnished by any dealer in artificial flowers.

Such decorations can be used again and again, but care should be taken in storing them away when not in use. The making of artificial flowers has reached a high degree of perfec-

Detail of Section of Above Easter Window Display

tion. Nearly all the high-class stores make extensive use of them in all kinds of displays. Dealers, however, must be careful not to use the flowers in the shape in which they are sent from the manufacturers, which is in a stiff and unnatural way. This is done to take up as little space as possible in shipping. The stems, flowers and leaves should be blended and arranged as they appear in their natural state. If

(Continued on page 72)

AN ARTISTIC EASTER WINDOW SUGGESTION FOR DEALERS

(Continued from page 71)

this is done some very effective results can be obtained.

Now for the making of the fixtures. The easiest way would be to have a carpenter give an estimate as to the cost, and if satisfactory let him make all of the woodwork.

But for those who can spare the time and want the fun of making it themselves, I shall try to describe the material needed and how to go about the job.

Basswood $\frac{5}{8}$ -inch thick should be used throughout the display except for the square strips as stated. The base should be made 6 inches high, 30 inches wide and 10 feet in length. The height of the two flower stands is 7 feet 6 inches, which added to the 6-inch base makes these 8 feet high. Four strips, $1\frac{1}{2}$ -inch by $1\frac{1}{2}$ -inch, is needed for each stand; the length of these should be 6 feet 3 inches. Now mark each corner of the base in the shape of a square $10\frac{1}{2}$ inches, saw out four square holes $1\frac{1}{2}$ -inch by $1\frac{1}{2}$ -inch, into which the four $1\frac{1}{2}$ -inch strips should fit snugly. It is best to lower them to the bottom of the base as they are the main support of the entire fixture. The stands are $10\frac{1}{2}$ inches square, which leaves $7\frac{1}{2}$ inches between the uprights on all sides. The lower part of the stands intended for the palms is 21 inches high and contains $1\frac{7}{8}$ -inch by $\frac{7}{8}$ -inch strips four on each side, divided up between the $1\frac{1}{2}$ -inch uprights. These should be $19\frac{1}{4}$ inches in length. The distance between the strips must be exact. The two baskets on top of the supporting uprights overlap the uprights $1\frac{1}{2}$ inches on all four sides, which makes the bottom of the baskets $13\frac{1}{2}$ inches square. These are made of strips like the lower part of the stand, but instead of four strips $1\frac{7}{8}$ -inch by $\frac{7}{8}$ -inch six pieces are divided up between the corner pieces. The height of the baskets is 9 inches, which makes the length of the $\frac{7}{8}$ -inch strips $7\frac{1}{4}$ inches. The "handles" of the baskets

are made of $\frac{7}{8}$ -inch basswood, $2\frac{1}{2}$ inches wide by $16\frac{1}{2}$ inches long. Four such pieces are needed for the two baskets. Four square holes $1\frac{1}{2}$ -inch by $1\frac{1}{2}$ -inch are sawed out in the bottom of the baskets to hold the four uprights in place.

Now for the center piece. First make the pattern. Get a piece of fairly heavy paper (wrapping paper will do) size 32 inches by 60 inches, which will make one-half of the pattern. First enlarge the working diagram to the proper size, make the inside circle 21 inches in diameter and use this as a basis. The distance between the upper and lower bars in the center piece is $13\frac{1}{2}$ inches; the bars are $1\frac{1}{2}$ inches wide, which makes the size over all correspond to the size of the basket, handles $16\frac{1}{2}$ inches. Copy and enlarge the outlines as nearly as possible. Then take the pattern to a mill and have it band sawed. The wood should be $\frac{5}{8}$ -inch bass wood as said before, and the size required for the center piece would be 32 inches wide by 10 feet long. Finish the woodwork in ivory enamel or any other color you might desire.

BOSTON BOOK CO.'S NEW HOME

Have Spacious and Central Quarters at Southeast Corner of Washington Square, New York

Herewith is shown a photograph of the new home of the Boston Book Co. This building, which is a daylight plant, is equipped with the latest time and labor saving machines. The building is situated at the southeast corner of Washington Square, New York, and overlooks the park, thus giving the workers a view of nature both winter and summer. J. M. Alter, president of the above company, is very solicitous after his employes' welfare, and the new home of the company was selected with the view

of having one of the most efficient factories, and at the same time, by the installation of every convenience, make the work of the employes a

New Home of the Boston Book Co. pleasure. While the Boston Book Co.'s plant is quite large the necessity of carrying large reserve supplies of paper stock has compelled the firm to negotiate for other space in which to store such material.

MAKES IMPROVEMENTS IN STORE

Since taking over the management of the Rudolph Wurlitzer Co. store in Hamilton, O., H. J. Lee has made a number of improvements in the arrangement of the various departments, special attention being paid to the display and demonstration of Victrolas and player-pianos.

TWO MILITARY GRAFONOLA TRUNKS

Now Ready for Styles 15 and 25—Have Tray for Records, Needles and Accessories

The dealer service department of the Columbia Graphophone Co. has just issued an attractive circular calling the attention of the Columbia dealers to the fact that there are now ready for distribution, two military Grafonola trunks, which hold Grafonolas Nos. 15 and 25.

Military Grafonola Outfit No. 25

These trunks were designed to meet the steadily increasing demand for such an article, and those dealers who have visited the Columbia headquarters are enthusiastic in their praise.

The trunks are equipped with a tray to hold a quantity of records, needles and accessories, and are especially built to hold Grafonolas securely at the bottom—the tone arm secured so as to permit no swinging, the winding crank fastens to the record tray. The whole, when locked, will adequately protect a Grafonola out-

fit from the most severe handling. Grafonola trunks are finished in olive drab, with brass and black-japanned fittings, locked with two keys, and leather grab handles provided for ease in handling.

This circular calls attention to the fact that Grafonolas are playing an important part in the life of American soldiers and sailors, being recognized as practical necessities in every military unit.

The Columbia Co.'s dealer service department suggests that the local dealers introduce Grafonola military outfits into the camps, and interest the local civic bodies and country organizations in the desirability of presenting these outfits to the boys who have joined the service from their communities.

By reason of the fact that the Columbia Co. has placed an order for a very large number of these trunks, Columbia dealers are enabled to purchase them at a very low price, and there is no doubt but that they can be featured by the dealer profitably and advantageously.

No. 25 Outfit, Ready for Shipping Tag or Quartermaster's Wagon

TAKES CHARGE IN DAYTON, O.

DAYTON, O., March 5.—Dovillo Gebhart, who has been engaged in the piano business in this city for the past few years, has become manager of the phonograph and record department of the Starr Piano Co. at 27 South Ludlow street, that city. Mr. Gebhart is very enthusiastic regarding the Starr phonograph and Gennett records, and has planned a strong campaign in that line.

UDELL WORKS ARE BUSY

Sales Manager Griffith Tells of the Active Conditions Prevalent at This Establishment

Tom Griffith, the well-known and popular sales manager of the Udell Works, Indianapolis, has recently joined the Indiana State Militia. Mr. Griffith does not come within the military service age, but very evidently is one of those practical Americans who, during wartimes, want to do their "bit" in a concrete fashion.

In a recent chat to The World Mr. Griffith remarked: "The Udell Works of Indianapolis, specialists in the building of cabinets for records and rolls, find themselves at this time with the biggest volume of business on their books that they have ever before enjoyed at this time of the year. In fact, the problem that we confront is getting men to make the cabinets and then getting them shipped. It is very evident from the demand for Udell cabinets that the talking machine business and the piano and player business is unusually good. It simply emphasizes the fact that in wartime people must have music to get their minds off the more serious side of this proposition.

"The Udell people take the position that the dealer is not rounding out a complete service unless he sells a cabinet, and from the good business standpoint he should sell the cabinet because he can make a profit on it and make a pleasing account. There is another angle on the cabinet sale which a dealer must not overlook, namely, that beyond any possible doubt the cabinet owner is a better buyer of new rolls. In this connection we recently received a letter from a prominent talking machine dealer in which he said:

"We found that the always satisfied owner of a Udell cabinet bought more records and rolls to start his library, and was a better repeat customer of the selfish desire to have a generous showing when he swung open the door of that well designed, properly constructed and beautifully finished Udell cabinet."

Style 150-E Retail \$10.00 Fits Edison C-150

Mr. Edison has given great thought and study to the tone of his truly marvelous instrument.

We have given untold thought and study to a device to simplify and facilitate the handling of the disc record.

The Eject-o-file Model 150-E

Has been designed and "BUILT TO FIT" the record compartment of the Edison Style C-150

Constructed with individual non-abrasive record compartments, filing and finding records is a pleasure when your machine is equipped with Eject-o-file.

Mr. DEALER, imagine it, you can now offer to your customer this device which embraces all the pleasure and joy of filing and finding you records at will. It greatly adds to the life and aids care of records. Just touch the button and the desired record is gently rolled into the hand.

Let us send complete details about this remarkable money-maker. A postal request will bring them at once.

The Ready File Co., Inc.

INDIANAPOLIS, IND.

Some Official Facts Regarding the Foreign Markets for Talking Machines

The development of the export business of this country in talking machines as a result of war conditions, and the shutting off of foreign manufacturing markets, is naturally a matter of much interest. More important perhaps than the present foreign demand is the question of securing a foothold in foreign countries in preparation for commercial activities after the war. The following review of the foreign market for talking machines, recently issued by the Bureau of Foreign and Domestic Commerce, is naturally of great interest, therefore, as indicating conditions as they exist at the present time, and offering a guide for American manufacturers seeking foreign outlet for their products. Reports issued by the Bureau follow:

French Indo-China

(Consul Horace Remillard, Saigon)

Talking machines are common in this district, and a good share of those sold here are of American make. American records are not so common, because of the small English-speaking population. Imports of talking machines and records for the period from January 1 to December 1, 1917, at Saigon, by countries, in kilos of 22 pounds were: From France, 219 kilos; America, 136 kilos; China, 110 kilos; Singapore, 23 kilos; Hongkong, 16 kilos; total 504 kilos. Most of the machines and records from "China" come from Shanghai, and many of them, as well as a great number of those from Hongkong and Singapore, are of American origin.

America pays the maximum duty on articles of this class. These duties, in francs per 100 kilos, are: Phonographs, gramophones, and similar machines, 90; cylinders or discs, not registered, 45; records registered on one side, 68; records registered on both sides, 90.

The prices obtained for talking machines and records are 40 to 50 per cent. higher than in the United States. Because of the distance and the slowness of transportation, machines and records, particularly the latter, should be carefully packed. As the chief towns are on or near the sea, there is no difficult inland transportation, and no conditions requiring special packing or preparation are to be encountered here.

France

(Consul William H. Hunt, St. Etienne)

Talking machines are classified under No. 604 of the French import tariff and pay an import duty of 90 francs per 100 kilos net weight (\$7.88 per 100 pounds). The rate of duty applicable to talking machines imported from countries having conventional or preferential tariff agreements is 60 francs per 100 kilos, but this rate does not apply to goods imported from the United States.

In order to obtain a footing in this market, it will be necessary for an American manufacturer either to open a branch in France or to grant an exclusive agency to some established firm. American phonograph companies now doing business here have successfully pursued both methods. If a branch or agency is established, it should be located in Lyons, Paris or Marseilles. St. Etienne is not sufficiently a center to serve as the seat of a general agency.

As the knowledge of English in French provincial business circles is not extensive, it is preferable that correspondence should be in French.

Manchuria

(Consul A. A. Williamson, Dairen)

The most popular talking machine in the Manchurian market, and one commanding by far the largest Japanese and Chinese patronage, is the "Nipponophone," made by the Nipponophone Co., of Japan. It is, distinctly a cheap machine, not to be compared with good machines of foreign manufacture, but its cheapness and the fact that it serves its purpose for two or three years is its greatest sales feature, and

one that American manufacturers who desire to sell to the masses here will find it hard to overcome. In fact, this firm once claimed that it had eliminated the competition of American manufacturers. Several well-known American makes, however, are on the market, and some business is done with them.

This class of goods is sold almost entirely by music stores or by stores handling them exclusively, although occasionally a jewelry store will carry them as a side line.

Records are on sale here, but they are almost entirely Japanese and Chinese music and pieces. The production of these records is a large business in the Far East. European music is seldom stocked locally, and those foreigners who have machines usually get their supplies of new records from Shanghai. Nipponophone needles are commonly used. An electric motor winder was imported some time ago, but apparently the importer has been able to do much with it.

Algeria

(Consul Arthur C. Frost, Algiers)

Phonographs, gramophones, etc., their accessories, separate parts, cases, and horns pay a duty of 90 francs per 100 kilos (\$7.88 per 100 pounds at the normal rate of exchange) when imported into Algeria. Freight and insurance rates at present are very high.

It is the custom of local houses to buy as largely as possible in France. This applies even to foreign merchandise, the local house preferring trade with a French agency to dealing directly with the foreign manufacturer. The French agency simplifies the negotiations, since the local house is familiar with French business methods and is able to obtain in France the quotations to which it is accustomed. It also simplifies customs formalities, as goods imported from France are admitted free of duty.

On account of the war the tendency is universal to dispense with luxuries. For this reason and because of high freight and insurance rates and the difficulties of transportation local houses are giving serious attention, with a view to immediate purchase, only to those American products for which there is an urgent present demand, and which can not readily be obtained in a nearer and more convenient market.

Considerable interest is being manifested in after-the-war trade with the United States, and business men are studying American products of all kinds with a view to deciding as to their suitability to the needs of the local market. To this end they appreciate receiving catalogs and advertising matter in French.

Switzerland

(Consul William P. Kent, Berne)

Talking machines do not yet have as impor-

tant a sale in Switzerland as in some other countries, but are being introduced slowly with great effort by German, French and Swiss manufacturers. Prior to the war Swiss manufacturers supplied about 20 per cent. of the market, but now their share amounts at least to 50 per cent. Cheap German products and German-made American machines are sold.

Current prices are: German (American) makes, \$30 to \$400; German, \$8 to \$120; Swiss, \$7 to \$100; French, \$10 to \$110. There are German, French and Belgian discs on the market at prices ranging from 40 cents to \$2. Since the beginning of the war prices have increased 60 per cent.

Import and Export Figures

The German imports, including German-made American machines, amount to \$47,828, and the French to \$15,488, while the direct American imports in 1914 were valued at \$1,752. In 1916 Switzerland exported \$330,000 worth of talking machines and cinematographs (the statistics include both classes of goods, but the figures represent chiefly exports of talking machines) to the United States. The increasing output of Swiss factories is clearly shown.

The talking machines that are sold here are chiefly those without horns. Commissions of 20 to 35 per cent. are granted to dealers on both machines and discs. France is a keen competitor in musical discs.

The total imports and exports of talking machines in 1915 and 1916 were:

Years	Imports		Exports	
	Pounds	Value	Pounds	Value
1915.....	153,000	\$55,285	2,152,813	\$680,383
1916.....	189,597	73,195	2,304,470	854,523

The duty on talking machines, according to the Swiss customs tariff, is \$3.86 per 220 pounds gross weight.

The chief Swiss manufacturers are Paillard & Co., Mermod Frères & Co., and Carl Lindström, all of Ste. Croix. A large credit house, with headquarters in Paris and branches in Geneva and La Chaux-de-Fonds, Switzerland, sells the French Pathé talking machines and discs by means of newspaper and magazine advertisements.

Requirements of Basel Market

(Consul Philip Holland, Basel)

American records for the most part are not satisfactory in Basel. There is practically no demand for voice records in English, and the European renditions of instrumental music appear to be as well done as those from the United States. There seems to be little, if any, interest in the high-priced voice records such as one commonly sees advertised in the American magazines.

TALKING MACHINE TROUBLES AND HOW TO REMEDY THEM

Conducted by Andrew H. Dodin

[This department of The Talking Machine World is designed for the service of all classes of our readers, including those who make, and those who sell, talking machines. Andrew H. Dodin, who conducts this department, has a wide and enviable reputation as a repairer of talking machines and conducts an exclusive talking machine repair shop at 176 Sixth Avenue, New York. Tell him your troubles through The World and he will help you if possible. The service is free.—Editor.]

THE NEW VICTOR MOTOR

During the past two or three months about every Victor dealer that I have met has asked me the following question: "Have you had much trouble with the new Victor motors?" Inasmuch as the average Victor dealer is more concerned with trying to get enough machines than he is for retaining in his memory answers to casual questions, I am going to outline the construction and give you my idea of the adjusting and repair of the new Victrola X. A. motor.

The spring barrel attracts our attention at our first sight of this new motor. Made of one piece of steel and containing the two main springs it is so entirely different from the usual Victor spring barrel that it stands out as the most important change in the method of construction.

Removing the sleeve screw (Part No. 5486 C. P.) permits us to push the spring barrel arbor (Part No. 5429 C. P.) through the casting bearings and so take the cage out of the motor. Place the cage on a bench—ratchet end down—then take hold of the main drive gear (Part No. 5428 A. C. P.) and pull straight up and we find that the sleeve slips out of the center of the main spring. We also find that, unlike the old style models, the spring center has no hole for the customary rivet but instead, the sleeve has a slot cut in its side, into which a V shape bend in the end of the main spring slides. On winding, the first turn of the spring presses this V part into the groove in the sleeve and the tighter the spring is wound the tighter the V part holds. This method of fastening the spring at its center does away with the old troubles of hooking the spring on the sleeve rivet and also prevents a lot of breakage of springs as the rivet head caused an uneven surface in the spring coil and had a tendency to cause springs to break a few inches from the center. Next the winding ratchet and gear (Part No. 5336 A. C. P.) are pulled out in the same manner as the

main drive gear and we are ready to remove the retaining ring (Part No. 3692 W. N.), take out spring barrel cap (Part No. 5363 A. W. N.) and take a look at the main springs. It is now necessary to take out the top main spring in order to get to the second one, and also the separating plate (Part No. 5334 P. F.) which will be found between the two main springs. In replacing the main springs care must be used to get them coiled back in the right direction, the one in the bottom of the cage is coiled to the right and the one at the top to the left.

Care must also be used in the handling of the main driving gear—that it is not bent out of true and that the teeth are not nicked or bent. The arrangement of the teeth of the top plate winding gear (Part No. 3861 A. C. P.) and the winding gear and ratchet (Part No. 5336 A.) makes this type of motor one of the easiest winding machines on the market to-day.

The balance of the motor is practically the same as the previous type Victor with the ex-

ception that the governor drive gear (Part No. 5357 B.) is larger in diameter than the old governor gear (Part No. 2757 B.) and the same is true of the governor spindle (Part No. 5354 P. F.) as compared to Part No. 3275 P. F. in the older type.

The long sleeve on the governor friction (1595 D. P. F.) will prevent the breakage of governor springs, for it will strike against the governor collar (Part No. 3299 A.) before the springs have spread enough to break. Another guard against governor spring breakage is the little pin in the casting frame which engages the screw on part No. 5331 A. and prevents the improper movement of the regulating shaft (Part No. 5358 W. N.).

Outside of a few minor adjustments I have very little trouble with this type of motor, and if it is carefully adjusted, properly graphited, oiled and greased there is no reason why it should not outlast and stay in adjustment longer than any other motor on the market to-day.

McCORMACK'S \$75,000 INCOME TAX

Noted Irish Tenor's Contribution to the Government Exceeds That of Caruso—Great Work for the Red Cross—Big Royalties on Records

John McCormack, the noted Irish tenor and Victor artist, put into the hands of Mark Eisner, Collector of Internal Revenue for the Third New York District, a check for \$75,000, a sum equal to the annual salary of the President, which represented Mr. McCormack's income tax for the year. This exceeds by \$16,000 the income tax paid by Enrico Caruso three weeks ago, and is believed to represent an income of approximately \$300,000 a year.

Accompanied by D. F. McSweeney, his associate manager; M. F. Doyle, his attorney; United States Marshal Thomas D. McCarthy, a friend of the singer, Mr. McCormack went to 1150 Broadway, one day last week. News that he was coming had spread among the employes in the office, and the singer was the object of much interest when he arrived. He was introduced to Mr. Eisner by Marshal McCarthy, and the necessary papers were drawn in about half an hour. After Mr. McCormack had signed the form he made out a check for \$75,000 and was photographed handing it to Mr. Eisner.

After leaving Mr. Eisner's private room, Mr. McCormack rejoined Marshal McCarthy and Mr. Sweeney, and remarked, as a broad grin overspread his face: "If my father ever found out what I paid inside he would curse the Germans more than he does."

Asked how he felt about giving up so large a sum to the Government, Mr. McCormack re-

plied: "It makes me feel happy to do my bit for the country that made possible my success. It certainly makes a man feel great when he knows he is doing his duty. You know the Bible says 'The Lord giveth and the Lord taketh away. Blessed be the name of the Lord.' Well, with me it has been a case of America giveth and America taketh away. Blessed be the name of America."

McCormack's income is derived from his public appearances and from royalties on talking machine records. His associates say his income the last year from the records alone amounts to more than \$180,000. This is said to be greater than any two other singers living. Caruso's income from talking machine records is said to be \$125,000, with an equal amount from his operatic work, making \$250,000 in all.

McCormack started this week on his trans-continental tour to raise \$100,000 for the Red Cross. He has already taken in \$28,000 toward this sum from performances in Washington, Philadelphia, Boston and Cleveland. The largest amount contributed to the Red Cross at any concert was \$12,000, in Cleveland, but the singer received a telegram yesterday that San Francisco is out to make a record of \$20,000.

When his obligations to the Red Cross are canceled, Mr. McCormack expects to appear at a series of concerts in behalf of the Knights of Columbus War Camp Fund. It would not be surprising if at the end of his last tour in May he went to France to sing for the soldiers. He was quoted as saying that if it was thought he could contribute to the success of the war by going to France he would be glad to do so.

ROGER N. LAGOW'S NEW POST

Victor Traveler and Foreign Trade Expert Now With Lightner & Leon, Wholesale Representatives of Victor Co. in South America

The resignation of Roger N. Lagow was accepted by the Victor Talking Machine Co. the first of this month. Mr. Lagow has for several years been an energetic member of the Victor Co.'s traveling staff, and in this capacity he has done much in the way of creating and applying

Roger N. Lagow

new and original sales and advertising plans for Victor dealers. Mr. Lagow, it should be added, has recently allied himself with the organization of Lightner & Leon, which firm is the South American wholesale representative of the Victor Co. His new position will mean an analytical study of the problems pertaining to wholesale export and import trade, for which work his past experience will stand him in good stead. Mr. Lagow, after graduating from Indiana University, took his Master's Degree at Harvard, and then for two years studied the romance languages in Paris, Madrid and Spanish America. At the conclusion of his foreign study he taught the romance languages at the University of Minnesota.

PLAN FOR BIG PRODUCTION

The Munzer Mfg. Corp. Have Produced Double the Number of Instruments Originally Planned for Their First Year—Big Plans Ahead

MINNEAPOLIS, MINN., March 9.—The Munzer Mfg. Corp., of this city, has now started its second year manufacturing Munola phonographs, and its success has been remarkable considering the short period of its business.

W. W. Munzer, director of sales, in an interview, states that their company have produced double the number of instruments originally planned during their first year. The most satisfying feature of their business has been the large number of repeat orders received from their various dealers. In fact, they are receiving repeat orders from approximately 85 per cent. of the active dealers in their organization. While they are hampered in selling machines through the Eastern part of the country on account of the transportation difficulties, they are overcoming this by the tremendous amount of business received from the Mississippi Valley and the Western United States.

While conditions are uncertain the Munzer Mfg. Corp. are planning a production for 1918 of 75,000 Munolas, and they claim they will sell double this amount if they can secure the material. While they have been specializing on the production of an instrument retailing at \$44.50, they state that they will turn out possibly one or two more models in addition to the original Munola.

DEATH OF JOHN C. ENGLISH

Prominent Talking Machine Inventor and Experimenter Passes Away in Texas

CAMDEN, N. J., March 4.—Word has been received from San Antonio, Tex., of the sudden death of John Clifford English, well known in New York and Philadelphia as a physicist, chemist and expert in acoustics. Mr. English had devoted the last eighteen years to the development of the art of sound reproducing, and was one of the men whose labors have done much to bring the product of the Victor Talking Machine Co. to its present state of perfection. Mr. English was in San Antonio for the benefit of his health, having on previous occasions found the climate there helpful. He leaves a widow.

MANY SWEATERS FOR SPALDING

Edison Artist in No Danger of Freezing or Starving to Death in France

The esteem in which Lieutenant Spalding, the Edison artist, is held by his many friends, is indicated by the fact that up-to-date he is reported to have received over eighty sweaters, and a great bulk of other knitted material since his arrival in France, to say nothing of huge quantities of tobacco, chocolates, books, etc. Mr. Spalding's present address in France is "Somewhere."

SERVICE FLAG ON LETTER HEADS

A clever adaptation of the service flag idea comes from the Standard Talking Machine Co., Victor wholesalers in Pittsburgh, Pa., who have printed in the lower corner of all their letter sheets, in colors, a service flag with four stars. The bright red border and blue stars show up most effectively and carry to every correspondent of the house the message that four Standard men are serving in the cause of democracy.

NEW BRILLIANTONE NEEDLE

Brilliantone Steel Needle Co. Announce New Long Tapered Steel Half-Toned Needle to Meet Demands—To Feature Export Trade

The Brilliantone Steel Needle Co., Marbridge Building, New York City, announce the addition of a new needle to their line. This new needle is a long tapered steel half-toned needle and was produced in response to insistent demands for this style.

B. R. Forster, president of the company, reports that the Brilliantone steel needle is not only immensely popular in this country but in foreign lands as well. Arrangements have just been concluded whereby one of the largest exporting houses in this country will represent this company in Shanghai, China. The Brilliantone steel needle is also enjoying popularity in points as far distant as Buenos Aires and Rio de Janeiro.

Eugene Latham, who was connected with this organization, has joined the United States Aviation Service and will devote the same energy he faithfully used in the selling of the Brilliantone steel needle to the services of his country.

SONORA DAILY PAPER PUBLICITY

The Sonora Phonograph Sales Co., Inc., has been using attractive advertising in the local newspapers, calling attention to the company's policy of selling its instruments without offering "easy" payments as the leading attraction. This copy has won favorable commendation from the company's dealers, who appreciate the fact that this publicity is helping them materially in developing Sonora business. The text states that "the Sonora is sold on a quality basis only, and you always get full value. When you buy a Sonora, you buy it for its quality, the terms being only secondary conditions."

"Is your daughter fond of the needle?"
"Very, if you refer to the gramophone needle."

"Lundstrom"
IT GROWS WITH YOUR BUSINESS

Standard Sectional Record Cabinet

A practical, inexpensive, convenient cabinet for dealers; made on the sectional principle, affording the following advantages:

It grows with your requirements: You first purchase just the number of sections you actually need for your present requirements; as you need more space, add more sections.

Adapted to any space: As many sections as desired may be placed in a stack; as many stacks may be used side by side as wall space will permit. Each section or shelf is indexed by a letter and each compartment by a number, forming a system of filing unsurpassed for simplicity and convenience.

Neat in appearance: No empty shelves; no overcrowding. Case always complete, yet always capable of additional expansion.

Carefully made and beautifully finished in plain and quartered oak, and in imitation and genuine mahogany.

Made in two sizes; to hold 10-inch and 12-inch records. Each section holds 200 records (100 Edison records). Stack may be made up with all sections of the same size; or sections for 10-inch records may be used above sections for 12-inch records by means of a reducing section as shown in accompanying illustration. Record sections furnished with or without doors.

Price for section \$3.00 and up

Cases shipped on approval direct from factory at considerable saving to you; on orders amounting to \$10.00 and over we pay freight to all points East of Montana, Wyoming, Colorado and New Mexico. To points in and West of these states, we equalize freight charges. For further particulars and full list of prices for the different sections in the different grades, write for illustrated circular No. 80.

 Chicago

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN,
Manager

World Office
Republic Bldg., 209 South State St., Chicago
Telephone: Wabash 5774

CHICAGO, ILL., March 12.—Both the wholesale and the retail trade of Chicago are feeling the effects of the loosening up of the recent freight congestion throughout the East. The record situation, while still acute, is in better condition than it has been for several weeks, due to the fact that manufacturers have been making use of the express service to send in their supplies. This, of course, adds somewhat to the expense of forwarding these records; nevertheless, the freight situation warranted this increased expenditure in order to relieve the situation. Another thing that the retail dealers are up against is how to appease the public demand for the popular song records, as the supply of these coming in is very limited. To meet the situation the dealers have been telling what they believe is true because, owing to the fact that experts in the record pressing departments have been drafted, they are working short-handed. It is further said that the process of pressing the record is not a "fly-by-night" proposition, but that it takes at least a year's training before a man can become proficient in the art of running one of these hydraulic presses and that it is estimated that at the end of that time his efficiency amounts to one-third, as two-thirds of the work he turns out will not pass inspection. These statements are being generally made by dealers who know the situation pretty thoroughly and bears considerable weight with their customers.

The wholesale dealers are facing a big situation in that they are getting a great many more orders than they have ever before received. This is brought about by the fact that the retail dealers are sending in their orders not to one place but to several places and in that manner making up their new stock lists; that is, the wholesaler is filling as much of the order as he can, making the shipment to the retailer, and the retailer is then taking the unfilled part of his order, returning it to some other wholesaler to see if he can add any more to the list. In this way the retailer is calling upon the resources not only of one but of several supply houses.

With the disappearance of the great snow blanket which covered the country last month, the railroads were enabled to relieve the shipping situation to a very great extent, and for this reason the wholesale dealers are getting in their machine shipments in a greater quantity

than heretofore. Where it formerly took at least six weeks for a shipment to go through, especially from the East, the same shipments are now coming in in from three to four weeks. The manufacturing plants are working to capacity and are turning out and shipping more machines than they have ever done.

While there is still a shortage of the medium-priced machines it is not so great as last month and the situation along this line is slowly coming back to normal. A great many of the manufacturers are preparing for the big "spring drive" which they anticipate will be launched in a short time, and for that reason have been putting on more employes and purchasing more materials so as to take care of the demand.

Ryde Enters Business

J. P. L. Ryde, who for the past twenty years was connected with the firm of Lyon & Healy, and for the last four years assistant manager of the Victor department, has resigned his position and is now located in Indianapolis, where he has purchased an interest in the firm of Fuller-Wagner Music Co. His new connection is a partnership with the firm and this company will now be known as the Fuller-Ryde Music Co. His successor at the Lyon & Healy establishment is H. J. Fidelke. Mr. Fidelke was formerly manager of the retail city credit department of that house.

The formal resignation took place on the evening of February 21, and on the previous evening Mr. Ryde was given a farewell dinner and theatre party by his former associates. The members of the firm who participated in the affair presented him with a silk umbrella and an engraved fountain pen, the presentation being made by L. C. Wiswell, manager of the Victor department of Lyon & Healy. There were fifteen members of the staff present at the party and dinner, one of the guests being W. Roche, who was in Chicago at the time on leave of absence. Mr. Roche was a former member of the firm of Lyon & Healy, but is now serving in the U. S. navy on the Battleship "Vermont," which is stationed somewhere at an "Atlantic port."

Six Best Sellers

Columbia Graphophone Co. announce for the past month the following six best sellers: "Long Boy" and "For You a Rose"; "Darktown Strutters' Ball" and "I'm All Bound Round With the

Mason-Dixon Line"; "Wait 'Til the Cows Come Home" and "Somewhere in France Is the Lily"; "Do Something" and "Liberty Bell"; "Hello, My Dearie" and "Ching Chong."

Six best sellers for the Victor Co. for the past month are: "Capricieuse" (Jascha Heifetz); "Gems From Leave it to Jane" and "Jack o' Lantern"; "Sweet Little Buttercup" and "Homeward Bound"; "Liberty Loan March" and "U. S. Field Artillery March" (Sousa's Band); "Maytime Waltz" and "American Serenade"; "Lorraine" and "Chimes of Normandy."

Pathé best sellers for the past month are as follows: "My Sweetie" and "Yock-A-Hilo Town"; "Give Me the Moonlight, Give Me the Girl" and "Hello! I've Been Looking for You"; "Homeward Bound" and "When the Boys From Dixie Eat the Melon on the Rhine"; "A Baby's Prayer at Twilight" and "Valley Rose"; "Liberty Bell" and "There's a Million Heroes in Each Corner of the U. S. A."; "Goulash" and "My Dough Boy."

Six best sellers from the Edison list for the past month are: "Leave it to Jane" and "Siren's Song" (Leave it to Jane); "Knit, Knit, Knit" (Jack o' Lantern) and "Jack o' Lantern Fox-Trot"; "Sweet, Emalina, My Gal" and "There it Goes Again"; "I Don't Want to Get Well" and "I'm All Bound Round With the Mason-Dixon Line"; "Naval Reserve March" and "Spirit of America."

The six best sellers for the Gennett records during the past month were as follows: "Largo" and "Meditation—Thais," violin solos (art tone record); "Hail! Hail! the Gang's All Here" and "I Don't Want to Get Well"; "Honolulu March" and "Kilima Waltz" (Hawaiian Instrumental Trio); "Over There" (one-step) and "Birds and the Brook"; "Paddle-Addle" (fox-trot) and "He's Just Like You" (one-step); "When the Bell in the Lighthouse Rings" and "Rocked in the Cradle of the Deep" (art tone record).

Perfects "Container" Distribution

F. P. Read, head of the Automatic Container Co., returned this week from Buffalo, where he had been making preparations with a large cabinet manufacturing company for the handling of their Eastern business. Mr. Read stated that he has also made arrangements with various manufacturing companies located in different

(Continued on page 83)

Service Feature Is of Immense Importance

Your greatest revenue, Mr. Dealer, is from record sales.

The average customer seldom buys more than one talking machine in a lifetime, but may be readily educated to systematically accumulate a record library and thereby become a constant source of revenue to you.

The Wade Fibre Needle Cutter Is the Connecting Link

It permits the use of Fibre Needles, with all their acknowledged advantages, at the minimum expense, with its 20 or more original re-points to each fibre needle, and is very cheap insurance on the life of their records.

Instruct your salespersons to use these sales arguments and you will soon have a Wade Cutter and Fibre Needle in every customer's home, which, will naturally result in increased record sales.

CHICAGO COVER BALANCE NO. 1

ISN'T IT TRUE?

You look for and insist upon style—finish and tone. Then again you insist upon a well-regulated motor, invisible hinges, and the best models of sound boxes and tone arms obtainable. Why not use the same judgment when selecting your cover support?

THE CHICAGO COVER BALANCE No. 1

is an absolute essential to the manufacturer who "produces the goods" instead of "talking quality."

CHICAGO HINGED COVER SUPPORT AND BALANCE CO.

2242 WEST 69th STREET, CHICAGO, ILL.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 81)

parts of the country to make their automatic record containers, the idea being that if orders are received from certain sections to turn them over to a manufacturer located in that particular territory, and thereby assuring their various dealers of prompt attention.

Mr. Read stated that the latest addition to their already large line, the salesman sample case, has met with much favor with the trade. This is a small compact leatherette case which consists of a simple automatic filing device and will carry twenty-four records. The case is small, light of weight and neat in appearance. It should prove popular.

New Assistant Manager

Miss Vera B. Jones, formerly connected with the Davis Phonograph Co. and for over six years associated with the J. Palmer Music Co., of Monfort, Wis., is now assistant to W. E. Cotter, retail sales manager of the phonograph department of the Thos. E. Wilson Co.

Hold Directors' Meeting

Among the prominent visitors to the trade this week was A. D. Geissler, of the New York Talking Machine Co., who was in town to attend a directors' meeting of the combined forces of the New York Talking Machine Co. and the Chicago Talking Machine Co. After the meeting Mr. Geissler, accompanied by R. J. Keith, D. A. Creed, H. P. Ellis and W. C. Griffith, spent a delightful evening at the Garrick Theatre.

What Is the Price?

One of the large drug concerns in Chicago have the agency for a small table talking machine which they advertised recently in their 1-cent sales. The method of advertising this machine has aroused much interest in the trade and is causing much wonderment as regards its actual retail price. The sale price of this machine varies in a way that would cause one to think that the quoted price was suggested by the weather bureau. The reason is this: One

day there is a special sale announcing, "This marvelous phonograph now on sale. Price \$15. Two for \$15.01." The next day or so the sign in the window is changed and reads, "This marvelous phonograph \$8.95." Then again the price changes to \$9.95. As the same machine is always shown it is little wonder that the trade in general is guessing as to its actual value.

Have Remarkable Sales

G. Harry Bent, manager of the retail piano department and the Victor department of the well-known firm of Geo. P. Bent, said that their sales of talking machines and records for the months of December, January and February were larger than the corresponding period of last year. While their sales of machines have increased somewhat the record sales are far beyond those of this time last year. The medium-priced machines were, of course, the best sellers, but they have been pushing the higher-priced machines more than ever for the past few months and have been getting good results. "Of course, the recent shortage held us back somewhat," said Mr. Bent, "but in taking inventory we discovered that we had a lot of good records on hand that would satisfy the trade if a little salesmanship were used; therefore, we started out and began pushing these records and soon discovered that our trade was satisfied, the result being that we increased our record materially."

Hold Patriotic Test

Under the auspices of C. E. Goodwin, general manager of the Phonograph Co., a patriotic contest and Edison tone test was held at Orchestra Hall on the evening of February 28. The price of admission was 10 cents, and the entire proceeds were used in purchasing Army and Navy model Edison phonographs for the various military and naval organizations. The Edison Shop, a subsidiary of the Phonograph Co., furnished the outfits at actual cost. The outfit consisted

of an Edison Army and Navy phonograph and \$30 worth of records. A special feature of the test was Glen Ellison, baritone, who sang in direct comparison with the Army and Navy model. The audience was well pleased by his masterly rendition of various Scotch songs, and his intimate knowledge and understanding of the Scotch and quaint whimsicalities enabled him to render the famous Harry Lauder songs with a fervor and vim that immediately places him in a class with that famed artist himself. The rent of Orchestra Hall, together with advertising and all other expenses, were borne by the Edison Shop. Each one in the audience was given a little ballot with which to vote for his favorite army or navy regiment. When these tickets were collected they were sorted out and the organizations receiving the greatest number of votes were awarded the machines. There was enough money taken in the box office to purchase two of these outfits, and one outfit went to Camp Grant. As no particular company was designated, Colonel Heistand was given charge of the machine and the records with the understanding that he make an investigation of the various barracks at the big cantonment at Rockford and determine which company was without a talking machine and donate it to that particular company. The other machine was won by Company E, 131st Infantry, at Camp Logan, Houston, Tex. As there were a great many of the jackies from the Great Lakes Naval Training Station present in the audience, one patriotic citizen suggested that there be a collection taken up and another machine purchased for the benefit of the boys at Great Lakes. This was done and enough was collected to buy the outfit for the jackies. The phonograph and the records were awarded to Company H, Third Regiment, at Camp Dewey.

What Happened at the Naval Training Station

A Phonograph Story That Points the Way for Every Phonograph Dealer

At the Great Lakes Naval Training Station are several club houses for the Jackies. In fitting up these camp homes, friends sent phonograph records, books, pictures and the like. The records were all DIFFERENT makes. Some were from one company, some from another. No single phonograph would have played them all—that is, none of the ONE-record type—so, naturally, a Brunswick was chosen.

THE Brunswick plays *all* records, whatever make. All the different kinds contributed were playable. None had to be laid away. This story could probably be told for many army and navy camps. Unless the all-record Brunswick is selected, many of the contributed records must be shelved. So this is a lesson in Brunswick superiority. It answers a question, a very serious one, in the minds of many dealers as to the future of phonographs. "Are *one*-record instruments doomed?"

Brunswick popularity indicates the readiness and eagerness of music-lovers to turn to the *all*-record type. Yet this feature alone does not sell all prospects. Brunswick tone is a paramount attraction. The absence of metallic and nasal noises is apparent.

Then The Brunswick has a dozen other new-day features that win. Not the least is its somewhat lower price. Every Brunswick Dealer has an opportunity to handle Pathe Records. The public likes Pathe operatic stars, late musical hits, band and instrumental selections. The offering each month is large.

Dealers who have not yet gone over the very profitable Brunswick proposition should write to us at once. A situation exists in the phonograph world which should cause every dealer to plan for the future. So write today.

in the banquet room of the Auditorium Hotel for the benefit of the Red Cross Society, one of the prizes which was raffled off consisted of a \$115 model Brunswick phonograph. This machine was donated by the Brunswick Shop and was won by a young lady who is a stenographer employed in one of the big theatrical booking agencies of Chicago.

Imitate Victor Trade-Mark

Federal Judge Carpenter, of the U. S. District Court of Chicago, last week entered an order under the "unfair competition act" restraining Garrett W. Woodward and Charles E. Gaven, of the Victor Inking Machine Co., from placing imitations of the Victor dog trade-mark on machines they manufacture. The label shown in court bore the familiar picture of the Victor dog, but the words "His Master's Voice" were omitted and "His Master's Ink" used instead. The firm name "Victor Inking Machine" also appeared on the label, and it was stated in some instances that the letter "I" was crossed so that it appeared to be the letter "T" and the following letter "N" being obliterated there appeared to be an abbreviation "T'king" for talking.

Henry C. Brown a Visitor

Henry C. Brown, assistant general manager of the Victor Co., accompanied by Mrs. Brown, visited Chicago this week. They stopped here en route to their home after paying a visit to their son Harry, who is a member of the British Royal Flying Corps stationed in Texas.

He's in the Army Now

George Derrig, assistant credit manager for the Chicago Talking Machine Co., recently left for Ft. Dodge, Des Moines, Ia., where now he is a member of Hospital Unit No. 11, stationed at that cantonment.

"Thumbs Down"

H. P. Ellis, of the Chicago Talking Machine Co., received a summons on Monday of this week to serve as a juror on cases now being tried in the Criminal Court. His numerous

friends in the trade are wondering what will happen if the man responsible for the recent freight congestion appears before said jury!

Place Orders for Cabinets Now

John F. Mortensen, president of the Salter Mfg. Co., in a chat with The World called attention to the fact that dealers would do well to place their orders for record cabinets at once in order to anticipate important advances in prices which are inevitable. "There have been further advances the last two or three months in practically everything entering into the construction of record cabinets," said Hr. Mortensen. "This not only includes lumber, veneers, but also hardware, shellac, varnish and even the felts with which the famous Salter felt-lined shelves are covered. For a limited period we will protect our customers at the old prices, in spite of the fact that we should have made material advances the first of the year.

Sachs & Co., the piano bench and talking machine house at 425 South Wabash avenue, have made arrangements for the Chicago city representation of the Salter lines of talking machine record and music and music roll cabinets. Both Sidney I. Sachs and G. C. Clifford are experienced men with a large following in the trade, and, no doubt, will do an excellent business on the well-known Salter lines.

Empire Activities

John H. Steinmetz, president of the Empire Talking Machine Co., reports that quite a number of new agencies have been taken on during the past month, and that these new dealers state that they are well satisfied with the results obtained through the medium of the Empire machines. During the past week the Empire Co. increased the proportions of its shipping room more than 50 per cent. by removing a wall in the rear of their building and occupying the space which was formerly used as a store room by another company. Mr. Steinmetz states that his company is now in better position than heretofore to render prompt serv-

ice to its customers, owing to these increased shipping facilities.

New Brunswick Travelers

C. J. Carroll, who for the past seven years has traveled for the Kipp Phonograph Co., of Indianapolis, Edison distributors, is now associated with the Brunswick-Balke-Collender Co., and has been assigned to the Denver field.

G. F. Gamble, who formerly covered the New Orleans territory representing the Brunswick, has been transferred to Minneapolis. He started the ball rolling by placing several large contracts in his new territory.

Doing Excellent Business

The Empire Phonoparts Co., which made its initial bow to the trade last month, has, in the short time of its existence, built up a trade that reaches in proportions far beyond its anticipations. It is the aim of this company to cater to a high-class trade and to supply its dealers with phonoparts of its own manufacture which embrace, besides the best material obtainable, essential features that cannot be obtained elsewhere. In this the company has been rather successful, and its clientele are enthusiastic over the products already turned out by the new company, especially the new tone arms and sound boxes.

Sell Entire Stock

The Hughes Music Co., of Oshkosh, Wis., recently sold out their entire Victor stock to the Wilson Music Co., of that city.

New Cheney Models

Many of the interesting features embodied in the Cheney talking machine have been greatly improved, as may be seen in the instrument that the Cheney Talking Machine Co. are offering to the trade this month. As already well known, the tone development and control are accomplished by a series of scientifically designed air chambers in the tone arm, throat and orchestral sections of the instrument. A tonal system such as this offered a large field for experimentation

Bigger Things for 1918

Bigger for You — Bigger for Us

We have planned and prepared for BOTH a larger output — insuring better services, prompt deliveries, and even a better product than in 1917

THE Mandel line of talking machines, varying in retail price from \$35 to \$250 and meeting the price demands of every class of trade, has been improved in many details which means in the aggregate a considerable increase in intrinsic value.

This is a line which has proved a distinct satisfaction giver from the start.

Every part of every Mandel—Case, Motor, Tone Arm, Sound Box, Horn, Tone Chamber not only is distinctive but made in the Mandel factories, thus securing standardization and uniformity of output.

Do you want to handle just this type of machine?

It costs you nothing to investigate.

Let us send you model No. 3, illustrated here on FREE TRIAL.

Write today for full information and descriptive literature.

Retail Price, Model No. 3
\$100

No bigger value for the money exists today. This is the machine we will send on FREE TRIAL just to prove that we have confidence in our product

Mandel Manufacturing Co., Inc.

FROM OUR CHICAGO HEADQUARTERS (Continued from page 85)

and it was in this field that Prof. Cheney, inventor of the instrument, and his corps of expert acousticians concentrated their efforts to bring about scientifically correct results. In this they have succeeded. Their accomplishments are, in a measure, far beyond their anticipation in that the results obtained place the latest Cheney models on a higher plane of standardization than their preceding machines. The various chambers of the orchestral section were given careful scrutinization and if any defects such as improper construction, etc., were found, they were scientifically remedied, thereby adding greatly to the value of the high, medium and low registers.

But inspection such as this does not apply only to the model used for experimental purposes in the Cheney laboratories. It applies to each and every machine turned out of the Cheney work shops. Each part of the machine, no matter how small or insignificant, has a definite service to perform, and this is taught to all employes engaged throughout the plant. The employes receive a thorough schooling along these lines and, for this reason, each individual part of the instrument produced by the Cheney Co. is manufactured with the understanding that the definite purpose to be performed by that particular part necessitates careful consideration if their unification as a whole is to bring about a certain standard of perfection.

Report Increasingly Large Business

The American Phonoparts Co. of this city are having an increasingly large business from manufacturers in two types of tone arm and sound box outfits, which are illustrated in their advertisement elsewhere in this issue. The company was organized in 1914 and has been an important factor in the manufacture of talking machine parts ever since. The No. 7 tone arm and sound box contains several features of particular merit. The sound box can be thrown back so as to insert the needle with one hand. It is the quality of tone produced that is notable.

The sound box is constructed with a rubber gasket in back, the object of which is to eliminate blasting caused by vibrations from the metal frame.

The No. 1W outfit has a reputation among the trade because of the special loudness and clearness of the tone. This also has a number of distinctive features, including spring screws which lock the sound box into either position for playing vertical or lateral cut records. Furthermore, the arm can be adjusted to the required length for centering sound box for playing either type of records.

Leaves for Washington

Frank J. Bowers, formerly general traveler for Pathé Frères Phonograph Co., left Chicago on Monday evening of this week for Washington, D. C., where he went to join the mechanical repair department of Unit 306 of the Quartermaster's Corps at Camp Meigs, which is now being organized for immediate overseas service.

Doing Things at Wilson's

"We are still making things hum around these corners," said W. E. Cotter, manager of the retail phonograph department, Thos. E. Wilson & Co., when called upon by The World this month. "We decided that there was a big bunch of business to be had in Chicago, so we increased our outside force and turned them loose. They sure are getting a nice batch of orders every day, and it certainly is surprising to see the number of prospects they can bring in."

W. C. Fuhri Returns to Chicago

W. C. Fuhri has returned to the Chicago organization of the Columbia Graphophone Co. and has assumed his old duties. Mr. Fuhri and C. F. Baer will operate in close harmony as they have done in past years. Under the plan of re-arrangement Mr. Baer will assume the title of assistant manager and Mr. Fuhri that of manager rather than district manager, as formerly. At the regular monthly dinner and meeting of the sales organization last night the attend-

ance was augmented by other important employes of the Chicago branch and the meeting was turned into a "welcome home" function for Mr. Fuhri, Mr. Baer presiding and joining with the others in saying a lot of graceful things.

Repointer Points

F. D. Hall, president of the B. & H. Fibre Manufacturing Co., makers of the B. & H. Fibre needle, is very enthusiastic over the splendid reception given by the trade to the B. & H. repointer. This handy little device for repointing the fibre needles with a minimum of waste and producing a maximum of tonal efficiency has brought many congratulatory letters from dealers and jobbers the country over. Daily re-orders testify to the sincerity of the tribute.

Patent Cabinet Designs

The Vitanola Talking Machine Co. of this city have recently been granted design patents from the United States patent office on all of their cabinet designs. This, of course, furnishes evidence of the distinctiveness of the Vitanola cabinets and is a step taken in the protection of the manufacturers as well as the jobbers and dealers. J. B. Schiff, company sales manager, vouchsafes the information that they have several new models now in work, samples of which will be on display in about two months.

Thomas Mfg. Co. Open New Offices

The Thomas Manufacturing Co., of Dayton, Ohio, manufacturers of motors, tone arms and sound boxes, have opened extensive sales offices and warerooms at 1026-28 Republic Building in charge of Fred E. Read, the company's Western sales manager. Mr. Read formerly had an office in the Otis building, but the steady growth of their Western business, coupled with the company's appreciation of the importance of Chicago as a talking machine manufacturing center, prompted them in the present move. A very complete stock of the company's product will be carried in Chicago enabling them to make immediate deliveries. Furthermore, Mr. Read

(Continued on page 88)

The Empire Tone Arm and Reproducer

MARKS A NEW ERA IN PHONOGRAPH EQUIPMENT

Never before has the Talking Machine manufacturer been offered an opportunity to equip his machines with a Tone Arm and Reproducer possessing so many points of excellence and at a price that will compete with the mediocre equipment with which the market is flooded. Empire equipment adds distinction and selling value to the machines on which it is used.

We solicit inquiries from high grade manufacturers of Talking Machines in position to place orders for a fair sized quantity of Tone Arms and Reproducers in monthly quotas, and for such will make it an object to adopt the Empire equipment.

In ordering samples, kindly state measurement from center of turn table shaft to center of horn hole on motor board.

Address all inquiries to our Chicago office

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 87)

has established a service branch in Chicago in charge of a competent mechanic. This will enable them to render real motor service. This man will make it his business to go into the factories of talking machine manufacturers using the Thomas product and give instructions and demonstrations regarding the construction and installation of the motors.

"I cannot fully express my satisfaction with the manner in which our product has been received in this territory," said Mr. Read. "We certainly are doing everything in our power to merit this recognition. It is the ideal of W. H. Mathews, president of our company, to turn out the best motors and talking machine parts that can possibly be made. Practically unlimited facilities are offered in our big plant at Dayton and any manufacturer of talking machines who is imbued with the quality idea would be interested in observing the care and precision which characterizes all of our manufacturing processes and also in the laboratory experimental work which is constantly in progress there. We are now making five types of motors and with our five patterns of tone arms and three types of reproducers we are able to offer five complete combinations of exceptional merit."

Mr. Read loosened up on a little item of considerable interest to the trade. In the near future the company will be prepared for the commercial production of an automatic stop which for simplicity and unfailing accuracy of operation he thinks will mark a distinct departure in the trade.

Becomes Manager of Record Department

E. C. Poore has been appointed manager of the record department of the Columbia Graphophone Co., having succeeded F. A. Tatner, who now has charge of the country correspondence for that company. Mr. Poore has been associated with the Columbia Graphophone Co. for the past ten years and was connected with their various branches throughout the middle West.

Lakeside Supply Co. Progress

The Lakeside Supply Co., of this city, has shown a remarkable growth within the past year and a half. In that short space of time they were not only compelled to seek larger quarters on two occasions, but their business has grown to such proportions lately that they are contemplating taking on several additional rooms in the building in which they are at present located.

W. A. Fricke

G. C. Fricke and his brother, W. A. Fricke, president and secretary of the company respectively, are the men at the helm, and it was through their incessant labors and ingenuity that the company has reached its present standard in the trade. The Messrs. Fricke have been associated in various manufacturing enterprises throughout Chicago for the past twenty years, G. C. having been a buyer for a number of years for various manufacturing concerns in Chicago, while W. A. devoted most of his time to working as an electrical engineer.

The Lakeside Supply Co. not only job in phonoparts, but also manufacture a full line of phonograph hardware. They are at present manufacturing a new universal tone arm which is known as the "Lakeside No. 4 Jumbo." This tone arm is made to fit all machines and will play all makes of records. There is supplied with this tone arm a small weight which is easily attached above the sound box whenever a selection of a Pathé record is desired. This tone arm is made in sections that interlock in such a manner that the arm may be easily and instantly lengthened or shortened by the use of a small setscrew as required.

The Lakeside Co. have recently been appointed Chicago representatives of the Stephenson precision motors. They not only will handle these well-known motors, but will also give Stephenson free motor service to their customers. They contemplate carrying a large supply of these motors as well as a large stock of motor parts.

Personals and Visitors

Herman Schefft, of Chas. Schefft & Sons, Milwaukee, Wis.; Ed. Winegar, of the Winegar Furniture Co., Grand Rapids; Don Elble, of Elble Bros., South Bend; C. W. Copp, South Bend; Mr. Hopper, of the Hopper, Kelly Co., Seattle, Wash., were all visitors to the Chicago trade recently.

H. T. Nolan, of the New York Talking Machine Co., was a visitor to Chicago last week. Mr. Nolan is connected with the sales department of the company.

J. S. Mitchell, secretary of the L. S. Donaldson Co. of Memphis, Tenn., called on the trade in Chicago last week.

H. E. Whitman, manager of the Pearson Piano Co., of Indianapolis, was one of the dealers who visited Chicago during the past week.

Train Sales Force

Arthur H. Cushman, director of sales of the Emerson Phonograph Co., of New York, spent the week in assisting F. W. Clement, manager of their Chicago office, in breaking in six new men for sales work. The new travelers were given a good coaching and drilling by both Mr. Cushman and Mr. Clement and were then sent out to take in the new Western and Northern territories, which were just being opened by the Emerson Phonograph Co.

Mr. Clement is in receipt this week of a sample of the first nine-inch Emerson record produced, which the company announced last month. He stated that the many dealers who called at his office each day were enthusiastic regarding the new record and are all anxiously awaiting its release.

PARAMOUNT RECORDS ON MARKET

New York Recording Laboratories Now in Position to Meet Demands of the Trade

CHICAGO, ILL., March 9.—M. A. Supper, sales manager of the New York Recording Laboratories of Pt. Washington, Wis., was in Chicago this week, and during a visit to the Chicago branch of The Talking Machine World told something of the progress that they are making with the Paramount records. "While we have been shipping records to some extent for some little time, we can now say we are ready for the market in the larger sense of the term," said Mr. Supper. "Paramount records, as you know, are recorded in our laboratories at 1140 Broadway, New York, which are in charge of recording experts and musical directors of long and practical experience. While in the introductory stage we lent ourselves mainly to the popular numbers, great stress will be laid in the future on selections both vocal and instrumental of the standard and familiar classical compositions. Plans are at work to this end which when announced will create great interest in the trade. In the meantime we have secured the very best talent for entertainment records of the popular

type. We have on our list of artists such people as Henry Burr, Peerless Quartet, Shannon Four, University Quartet, Charles Hart, Louis James, Grace Kerns, Arthur Fields, Sam Gardner, Van Epps Trio, Louise and Ferera, Edward Zinco, Allen Turner, George Hamilton Green, zylophonist, Miss Margaret Abbott and many others equally skilled in their respective lines. Our pressing plant at Grafton, Wis., located only a few miles from our general offices at Pt. Washington, is splendidly equipped and of ample capacity. We are rapidly booking up with responsible and enterprising jobbers all over the

country and are preparing for an advertising campaign which will carry the fame of Paramount records to the general public. No pains have been spared in the preparation of catalogs and bulletins of artistic character replete with interesting data regarding our artists together with the stories of the numbers and the show cards and other advertising matter we have prepared for the dealers are the subject of favorable and daily comment."

C. J. Woodward, who has his office at 503 Cable Building, has been made the Chicago representative of Paramount records.

sonal advertising. He pointed out that: "Personal advertising is the face-to-face, eye-to-eye, mouth-to-ear, man-to-man advertising. Summing it up in a few words it is personal contact between the customer and the house. As stated before, printer's ink brings prospective customers to your store and the moment a prospective customer enters through the door, at that moment personal advertising begins.

"The first one to come in contact with a prospective customer is the salesman. Now you have all heard the saying that the first impression is the lasting one. This saying is just as true to-day as when first coined, hence it is the salesman who at the first approach must make a favorable impression. In order to do this he must have a personality—should be of neat appearance, well groomed and pleasant of speech. I say pleasant of speech because personality lies in using words which the customer will understand, high flown speech, however, is seldom used to advantage in salesmanship.

(Continued on page 90)

L. C. WISWELL'S STRONG TALK ON SALESMANSHIP

Gives Some Excellent Advice to Members of Grand Rapids Music Dealers' Association on Subject of Selling Talking Machines to Greater Advantage—Urges Interest Charge

CHICAGO, ILL., March 9.—L. C. Wiswell, manager of the talking machine department of Lyon & Healy, made an address which was eloquent in the best sense of the word and full of practical wisdom, before the Grand Rapids Music Dealers' Association recently. He emphasized the importance of co-operation as illustrated in the good work that can be accomplished by trade associations, pointing out that through co-operation trade evils can be simplified and eliminated, thus enabling the talking machine business to be placed on a clean, substantial and successful basis.

Mr. Wiswell then took up the subject of advertising and emphasized the value of all kinds of publicity, whether in the newspapers, magazines, catalogs or circulars, but especially per-

He pointed out that one of the greatest goods the organization can accomplish is to obtain interest on deferred payment sales, and he remarked: "Gentlemen, do you realize that by your failure to obtain this charge you are losing hundreds and collectively thousands of dollars per year? Could you go to a bank and borrow money to make your purchases of merchandise without being obliged to pay interest? Of course not. Are you not obliged when buying merchandise on long terms from the manufacturers, particularly merchandise that is of staple quality, to pay interest? Surely you are. If this situation is true with you in the purchase of goods, why then should it not be likewise with the consuming public or the party to whom you sell the instrument, granting him a series of deferred payments in settlement of the purchase? Merchandise which you have delivered to your customer surely represents cash, it is money only in a different form. You cannot obtain money from a bank without the payment of interest. Why then should you loan money to your customers without exacting the same stipulation? There is a tremendous leak in your talking machine business if you are not charging interest. It is only a little thing but in time it will reach serious proportions.

"You can easily at this meeting here to-night adopt a resolution that beginning with, say, March 1, each and every one of you will make an interest charge of .6 per cent. on all deferred payment sales. If you do this it will mean more cash business which will give you an argument as to why a man should pay cash instead of buying on the deferred payment plan. As an organization you should get together on the question of uniform allowance for the turning in of used and out-of-date machines towards the purchase of a new machine and regulate the record approval system, and while I do not approve of it you will eliminate the record approval system entirely. Unless you have complete co-operation, complete harmony, proper results cannot be obtained."

Stops the scratch—restores the tone

Takes the noisy scratch out of old, worn records, and restores the tone of your old favorites. Improves the tone and prolongs the life of new records.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 89)

What conditions can be wrought out of these twenty-six little letters of our common alphabet! Words have been called 'terrific engines' since they can either serve or destroy. The salesman's mission is to use his words to serve. A customer, yes, every customer, judges the house with which he trades by the treatment he receives. If the salesman handles him in the proper way and in turn he is handled by the credit department in a businesslike way and lastly if his purchase is delivered in a satisfactory manner, he has only good to speak of your house. The requisites of a successful salesman are many. Successful salesmanship is a condition of the mind more than anything else. A salesman must believe in his goods just as implicitly as he believes that water is wet—this measure of assurance will produce the proper effect on the customer. A heated argument is the worst weapon. No one would argue that water is wet because he knows that it is and the moment a salesman begins to argue, the customer realizes that there is evidently need

of the argument. Moral: Never argue with your customer. If he makes some remarks about the competing line, agree with him as far as you consistently can, but at the same time point out to him in convincing language that your goods are much better.

"Again, a salesman must humanize his talk. Never talk over the shoulder or above the eye. James Whitcomb Riley, the noted Hoosier poet, was asked one day what made his every day, homelike poems, for example, 'The Old Swimming Hole,' 'The Old Man and Jim,' and others, sell so well, while the world's great sonnets written by the most noted poets grew dusty on the booksellers' shelves. He explained that there were only a few thousand people in this great land of ours who knew anything about the classics while everybody did know about the human heart, so in writing his poems he wrote more of the heart—in other words, he understood the masses and how to reach them.

"How many salesmen talk too technically? The personal advertising of your business is

done by your salesman. He must make the talk personal and he cannot do it in the language of the rhetorician, it must be done in every day common sense language. He must get on intimate grounds with his customers.

"Another silent but effective argument in salesmanship is that of integrity. 'Honesty is the best policy' will no longer do as a motto, it should be 'Honesty is the only principle.'

"Nothing drives away customers like an indifferent salesman. When a man or woman calls at your store it is because he or she is interested. They may want to buy. If you show no interest in them you certainly will not get their orders. People will frequently buy a different make of talking machine from the one they really desire rather than buy from a dealer or salesman who does not seem to care. And where is the man who has not gone out of his way to buy a thing he did not want simply for the pleasure of dealing with a certain salesman who was so courteous and considerate and took so much interest in his wants? The real business man goes in a straight path. He finds out the wrong in his business, then he rights the wrong, not haphazardly, but scientifically. There is as much science in the retail talking machine business as there is in the test tube. Business conditions of 1917 are different from those of 1916, and in the coming years they will be different from what they are to-day.

"Service, first, last and all the time is the twentieth century business motto. Should your business not conform to this truth you must pay the penalty in the subtraction from the otherwise possible total of your success. And please do not imagine for one moment that just being honest, loyal and truthful alone will enable you to serve nobly. It is a poor argument to say 'business is business' and proceed to take advantage of your customer. The first of all arguments is service well rendered. Connect personal advertising with service. Give good service to your trade, sell them what they want, make satisfactory delivery, handle their accounts in a businesslike way, be ever ready to look after their needs, no matter how trivial; by doing this you will deliver that character of service that will give you more opportunities to serve. Again, can you see, and do you realize the necessity to make every customer feel that he is getting the best for his money, not only in merchandise but in service. A dissatisfied customer can do you irreparable damage while a satisfied customer can speak more good words and bring you more business than many a good newspaper ad. I have known instances where salesmen by poor tact and poor salesmanship—yes, credit me, through lack of knowledge how to handle a customer—have lost sales that cost money to create.

"There are only two ways of advertising—printers' ink and the personal equation. Personal advertising must be done by a clean-cut representative of the house, therefore it be-

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 90)

hooves every firm to look well to their employes to see that they are of the highest efficiency and that they know their business from A to Z, and that those who come in contact with the people have an understanding of the following terse suggestions:

"There is always room behind the counter for a smiling face."

"Thank you can always be given in change."

"How would you like a salesman to act if you were his customer—that's the way."

"To get the customer's attention, give him yours."

"Talk with the man, not at him."

"A good salesman studies the book of nature."

"The pleasanter you look the pleasanter you will be."

"The man in front of you is entitled to all of your attention."

"Get on the most intimate terms with the goods you sell."

"Keep thinking of what the man in front of you will say when he goes out."

"Show the man with a grouch that you carry good nature in stock."

"A good countenance is the wireless to salesmanship."

"Good salesmanship does not even know failure by sight."

LEASES NEW QUARTERS

The Adams Music Co., Canton, O., leased new quarters in that city and will occupy them after they have been remodeled. The new features will include special soundproof booths for the Victrola department, and elaborate piano and player-piano warerooms.

J. L. Dubreil has joined the sales force of the Cincinnati branch of the Columbia Co., F. F. Dawson, manager in charge. Although a newcomer in the talking machine industry, Mr. Dubreil gives promise of being very successful in his new post.

OFFER NEW PLAN OF DISTRIBUTION

Mandel Mfg. Co. Outlines New System for Increasing Output and Marketing Product

CHICAGO, ILL., March 9.—The Mandel Mfg. Co., of this city, have started out the year with some large plans for Mandel distribution, and they are proving successful in the highest degree, according to M. B. Silverman, sales manager for the company, and who was a prime factor in the introduction and marketing of Mandel phonographs from the first. The company arranged for a much larger output for 1918, and they are already put to it to supply the demand. The plans are progressive, arranging for steadily increasing facilities and prompt deliveries are assured.

"We find that our dealers are very enthusiastic over certain special features of both the product and methods of doing business," said Mr. Silverman. "For instance, I have had a number tell me that they have swung sales simply on the argument that the Mandel phonograph is made completely by us; that we manufacture our own cabinets, our own motors and parts. These facts, of course, carrying with them as they do the assurance of reliability, as we are back of every part of the Mandel machine, coupled with the beautiful appearance and tonal qualities and various distinctive constructional features, give the dealer sales campaign ammunition which is irresistible. We are constantly seeking to improve our product in every possible way, and have a well organized experimental laboratory towards that end, in fact, machines which are being shipped this year, while not showing any marked change yet contain a number of little improvements which, while of no great importance individually, in aggregate spell improvement of product and increased satisfaction. Our trade may be assured that this is a settled policy of this concern, and that Mandel machines will continue to improve.

PRAISE FEATURES OF THE MAGNOLA

Many Dealers Handling That Line of Machines Emphasize the Various Original Points

CHICAGO, ILL., March 11.—Much interest is being maintained among the large line of dealers who handle Magnola talking machines, on account of the many exclusive technical features which tend to make Magnola something as original as it is efficient. Among these, special interest is exhibited in the remarkable system, as simple as it is remarkable, for the impulsion of the sound waves from the sound box to the air. The clearness of Magnola reproduction, which has always been a subject of favorable comment, is largely attributable to what is called the "Tone-Deflecting" system, whereby the sound waves, issuing from the sound box and traversing the gallery of the tone arm, are caused to throw upwards sharply in the course of their entrance into the tone chamber or concealed horn of the machine, so that they reflect against the upper surface of the chamber before issuing into the atmosphere.

The result appears to be that some of the mechanical sounds commonly associated with the tone production of the talking machine are eliminated altogether, and in consequence the whole tone production is clearer, less blurry and cleaner.

This is, of course, an important feature exclusive with Magnola and patents are pending on it. Other features such as the vertical filing system for records, built into the cabinet, and the tone control or graduator, are almost equal factors in Magnola popularity.

Business continues very brisk on all styles of Magnola and President Otto Schulz states to The Talking Machine World that his only difficulty is to get the machines out in sufficient quantities. With the improvement in the freight situation, however, early relief from the present congestion of orders is anticipated.

NEW BRUNSWICK REPRODUCER NOW READY FOR THE TRADE

The "Ultona" Sound Box Just Introduced—A New Method for Reproducing Various Types of Records—Distinctly Original in Design and Embraces Some Interesting Features

CHICAGO, ILL., March 9.—The Brunswick-Balke-Collender Co. announce to the trade this month that they have at last perfected their new "Ultona" reproducer and have already equipped two models of the Brunswick phonograph with this new method of reproduction. This sound box includes two distinctly new inventions for which revolutionary importance is claimed by the company.

The reproducer is constructed in form along

(1) Ultona Reproducer and Tone Arm Ready to Play Pathé and Other Vertical-Cut Records

the same lines as a spool; that is, it contains two diaphragms, and the various makes of records can be played by simply changing its position. It is scientifically designed to adapt itself to the various surface cuttings and tonal requirements of all records, by allowing for the changed weight of reproducer required to play the different makes of records. The pressure of the needle is controlled by a sliding weight placed in one end of the tone arm and is controlled by sliding this weight either forward or backwards. The accompanying "photos" show clearly the various figure number applications of the "Ultona." Figure No. 1 shows the reproducer in the position for playing Pathé and other vertically-cut records. This turns one face of the reproducer towards the records, and the sapphire ball or needle is then in the proper

position to play records of this make. When the other surface of the reproducer is turned

(2) Ultona Reproducer and Tone Arm in Position to Play Records of Edison Type

so as to face the record as shown in illustration No. 2, the reproducer is in position to play all vertically-cut records that necessitate the use of a diaphragm in this position. The lateral-cut records, which are played by means of either the steel or fibre needle, are played by turning the reproducer as is shown by figure three. This is accomplished by simply turning the sound

(3) New Brunswick Ultona Reproducer and Tone Arm Ready to Play Lateral-Cut Records

box so that the two diaphragms are parallel to each other. Another feature of the new Brunswick models offered to the trade is their new all-wood tone

amplifier. It is a vast improvement in tone projection in that the sound waves are projected through the all-wood horn, which is built like a violin. This tone amplifier is of all-wood construction and contains no metal whatsoever, thereby breaking away from or avoiding the usual custom of combining wood and metal in the construction of the horn. Not only have

Brunswick Mechanical Equipment Showing Brunswick Motor New "Ultona" Reproducer and Tone Arm, Autostop, Etc.

these two features been added to the latest Brunswick models, but this company has also adapted a new motor with which they are equipping all of their new machines. The following illustration which is a clever "phantom" wash drawing not only shows the new "Ultona" reproducer and tone arm, but also illustrates the automatic stop together with their new motor.

The new Brunswick motor is now used in all Brunswick phonographs. The motor illustrated above is of the three-spring type, but a two-spring motor is also being used for smaller styles of machines.

Beginning with the April 6 issue of the Saturday Evening Post the Brunswick-Balke-Collender Co. will launch their nation-wide advertising campaign. In this issue they will come out with a full-page Brunswick ad.; about the

Different—But Practical

The MORENUS Phonograph is a Distinct Departure from a Tonal Viewpoint.

The horn, which is entirely of wood, is built on the principle of the saxophone and enters the tone chamber at the *bottom*, not the top. The tone is big and full but mellow, and the reproduction of the artist's voice or instrument is faithful to an unusual degree.

Among the other features is a unique tone moderator which actually graduates: an exceptionally high grade and acoustically correct tone arm and reproducer, and a cover support which makes handling the lid a delight.

The case designs are *right* and the cabinet work and finish unexcelled.

The MORENUS is in 3 STYLES

same time the daily papers all over the country will begin featuring the Brunswick by means of their advertising columns, but the Brunswick Co. have not confined themselves to the papers for means of advertising. They have been working for several months and have completed their program for advertising by means of the billboards and lithographic color posters. These posters are in various sizes, ranging from a single sheet poster, which is approximately 24" by 36", up to the large size, twenty-four-sheet posters. This method of advertising will be applied mainly to the smaller towns, but the big billboard advertising throughout the larger cities will be handled by means of regular painted color signs.

NOW THE "STEELCRAFT" NEEDLES

That Name Selected by Record Needle & Mfg. Co., Milwaukee, as the Best of the Many Submitted in Recent Contest

The Record Needle & Mfg. Co., Milwaukee, Wis., which has recently been conducting a contest with a view to securing an original and at the same time properly descriptive name for their needles, announce that from the hundreds of names submitted in the contest the one selected for the prize was "Steelcraft," submitted by Harry R. Leithold, of the Fred Leithold Piano Co., Black Cross, Wis. Mr. Leithold, of course, was awarded the 100,000 needles for his effort. The Record Needle & Mfg. Co. plans now to feature the name Steelcraft in a big way in all its advertising, in accordance with its announcement on page 27 of The World this month.

The Unger Furniture Co., Rochelle, Ill., has installed a full line of Victrolas and records, and opened a special department for that purpose.

Nothing can be done successfully without system.

THE READY FILE CO. ANNOUNCES MODELS FOR THE EDISON

Now Prepared to Meet the Demand for an Efficient Filing Device for Edison Models 100-A and 150-C—Wins High Praise From Edison Jobbers at Recent Convention Held in New York

In response to a widespread demand on the part of Edison dealers for a convenient filing device for the lower priced models, the Ready File Co. has just announced the completion of models designed for the New Edison phonograph, Models 100-A and 150-C, as illustrated in the company's advertisement on page 74 of this issue of The World.

The new Ready Files were first shown at the Edison Jobbers' Convention, held at the Knickerbocker Hotel, New York, February 18 and 19. The enthusiasm with which they were received is indicated by the fact that they were endorsed by the convention, an honor which has seldom, if ever before, been accorded an accessory.

President Walter E. Kipp, of the Jobbers' Association, said of the Ready File: "We have long felt the need for such a device. The Ready File will enable the Edison dealer to offer a moderate priced instrument that not only gives a perfect re-creation of music, but also one that is wonderfully convenient. I think that I speak for every jobber here when I say that we extend our heartiest congratulations and good wishes to the Ready File Co."

The new Ready Files are very much like the models that have already become so popular among Victor dealers, except that it has been necessary in designing the Edison models to enclose the trays of the Ready File in a cabinet. In the model for the 150-C Edison this cabinet is composed of an ingeniously arranged wooden front, sides and back, with steel supports for the trays. The file is instantly installed in the instrument without alteration. In the model for the Edison 100-A the cabinet is made to fit on the shelf of the instrument, the design being such that the grace of line of the instrument is in no way marred. The cabinet work is of the very best, and the finish is fully as fine as that of the instrument itself. In both models the

instrument and the Ready File gives a harmonious effect, with none of the makeshift look so often found where articles from two different manufacturers are combined.

The Ready File Co., anticipating a heavy demand, has already started large scale manufacturing of these new models, and in accord with their usual policy, the Ready File Co. will conduct an aggressive campaign on the models for the Edison. Anent the new Edison file, the president of the Ready File Co. said: "The Edison dealer will be shown, as the Victor dealer has been similarly shown, that by placing Ready File in every model 100-A and 150-C on his display floor and in his booths, and by considering the instrument and the Ready File as a single unit, he can sell Ready Files with practically every instrument of these models that he sells, making a nice extra profit on each sale."

FIRE VISITS BUFFALO STORE

Causes Some Damage to Offices of Neal, Clark & Neal Co.—No Delay in Deliveries

BUFFALO, N. Y., March 11.—The wholesale department of the Neal, Clark & Neal Co., the well-known Victor wholesalers of this city, was visited by fire recently. Quick work on the part of the company's employes and the Fire Department resulted in confining the loss to the offices. The company reports that it will be able to take care of dealers' orders as usual.

HEINEMAN BRANCH MANAGERS HOLD ANNUAL CONFERENCE

Important Social Events Mark Week Spent at Headquarters of Otto Heineman Phonograph Supply Co., Inc.—Enjoy Business Discussions—Adolf Heineman Honored—Visit Factories

The managers of the different branches of the Otto Heineman Phonograph Supply Co., Inc., in this country and Canada convened in New York last week for their first annual conference, and during the course of the week a number of important social events were scheduled which balanced the serious part of the program. This conference was noteworthy for the practical suggestions which were offered by the managers and the executives, and Otto Heineman, president of the company, left nothing undone to provide maximum returns for the time spent by his managers in New York.

The managers arrived in New York on Monday, and during the afternoon attended the first of a series of important business meetings. Plans and policies for the coming year were discussed, and it was the unanimous opinion of everyone present that the conditions in the talking machine industry at the present time evidence a stability and strength which is most gratifying. The remarkable strides made by the company last year influenced the introduction of manufacturing and sales problems which were discussed at length by the company's executives and managers.

On Tuesday morning the business meetings were resumed, and at Tuesday noon the managers were advised that Otto Heineman had arranged for a luncheon at the Hotel Astor to celebrate the sixtieth birthday of his brother, Adolf Heineman, assistant general manager of the company.

Adolf Heineman's Sixtieth Birthday

Adolf Heineman has worked indefatigably during the past few years to place the Otto Heineman Phonograph Supply Co. in the front ranks of the talking machine industry, and the wonderful progress achieved by this company may be attributed in a considerable measure to his unceasing efforts and untiring energy. A capable executive and thoroughly conversant with every phase of the talking machine in-

dustry, he has rendered invaluable service to his brother in the foundation and expansion of the Otto Heineman Phonograph Supply Co. At the present time he is in charge of the company's Dean division, and his keen business acumen is reflected in the fact that this division is growing by leaps and bounds, and under his able direction and management is steadily adding to its prestige.

In addition to the branch managers, there were present at this luncheon the company's executives, a number of prominent members of the talking machine industry, and several invited guests. Everyone present was impressed with the fact that this gathering was an unusual one in many respects, and the congratulations which were showered upon Adolf Heineman made this veteran talking machine man thoroughly happy, although just a trifle ill at ease. A few hours previous he had entered his office to find it transformed into a veritable flower conservatory, and telegrams of felicitation from business and personal friends had been received continuously. The luncheon was a fitting finale to a well-deserved tribute to a man who has worked day and night for the success of the Otto Heineman Phonograph Supply Co.

The Luncheon at the Hotel Astor

At the start of the luncheon A. G. Bean, general manager of the Elyria plant, was introduced as toastmaster, and a better selection could hardly have been made. His introductions of the various speakers were timely and witty, and in his first remarks he paid a tribute to the policies and methods of the Otto Heineman Co. Growing reminiscent, he spoke of the days when the company's floor space consisted solely of a room in a downtown office building, which held two people comfortably, and three with inconvenience. He compared this with the company's present factories in Elyria, O., Newark, N. J., and Putnam, Conn., in addition to the various branch offices maintained in the leading

cities throughout this country and in Canada.

When called upon by Mr. Bean as the first speaker Otto Heineman commented upon the fact that this luncheon was being given in honor of his brother, and was not by any means a "company" gathering. In a stirring address that gave his auditors some idea of the bond of affection that exists between his brother and himself, Mr. Heineman said that any measure of success which his company had achieved must be attributed to the whole-hearted support that he had received from Adolf Heineman many years before the present organization was founded. He emphasized the fact that his brother had investigated and felt the pulse of the talking machine industry long before it had reached its present basis of strength and permanency, and paid a tribute to his brother's foresight and judgment which had been a powerful factor in making possible the establishment of the Otto Heineman Co.

In response to a standing toast to his continued good health and happiness Adolph Heineman was prevailed upon to make a brief address, but with his characteristic modesty, belittled the results of his many years' work, and in turn expressed his appreciation of the spirit of camaraderie and true affection which he and his brother had enjoyed in their personal and business association for many years.

Among the others present who made brief addresses, all of which contributed to the enjoyment of the luncheon were A. F. Meisselbach, S. A. Ribolla, John A. Noble, vice-president Harriman National Bank; H. B. Rosen, director Harriman National Bank; E. A. Widmann, president Pathé Frères Phonograph Co.; Jacob Schector, C. T. Pott, W. G. Pilgrim and Dr. J. J. Klein. It was the unanimous opinion of these speakers that Adolf Heineman had discovered the eternal spring of youth, for his sixty years rest as lightly on his shoulders as though he had just passed the two-score milestone in his busy career.

On Tuesday evening Adolf Heineman entertained the visiting managers, the executives of the company, and a number of invited guests at his home, a delightful dinner bringing this eventful day to a happy close.

A Visit to the Meisselbach Plant

On Wednesday the managers, accompanied by the heads of the Otto Heineman Co., spent the day at the factories of the Meisselbach division in Newark, N. J., and a trip through this up-to-date and thoroughly efficient plant gave the visitors the "reason why" the Meisselbach motor has won world-wide recognition as the leading motor in its field. A. F. Meisselbach, who is vice-president of the Otto Heineman Co., entertained the visitors at luncheon at the Downtown Club, Newark, N. J., where a resumé of the day's trip aroused hearty enthusiasm regarding the Meisselbach products and their unlimited future possibilities.

Thursday at the Dean Factories

On Thursday the party left Putnam, Conn., where the factories of the Dean division are located. The managers learned at first hand some of the intricate processes incidental to steel needle manufacturing, and with Charles E. Dean and John M. Dean, Jr., as guides, explored the large new factory which has just been completed. They marveled at the perfection in manufacturing which is evident in every department at this plant, and returned to New York imbued with a true idea of the important role that this "baby" in the Heineman organization is destined to play in coming years.

Friday was spent in a series of business meetings at the executive offices, and on Saturday the managers departed for their respective territories, tired and travel-worn, but heartily enthusiastic and optimistic regarding 1918 possibilities. The week was a signal success, and Otto Heineman, who arranged every detail of the week's activities, can well be proud of the capable and aggressive corps of managers who are making the Heineman products the standards of the talking machine industry.

FRANK W. CORLEY IN THE SERVICE

Head of Wholesale Victor Department of Corley Co. to Become Member of the Naval Flying Corps—His Good Work in the Trade

Announcement is made that Frank W. Corley, son of John G. Corley, the head of The Corley Co., Richmond, Va., and who is actively in charge of the wholesale Victor department of that company, has been accepted for service in the Naval Flying Corps. Although at the present writing he has not yet been called, the summons to duty is expected at any moment and Mr. Corley is ready.

The Corley Co., one of the leading musical houses of the South, has justly earned its slogan, "The House That Made Richmond Musical." Through the untiring efforts of Frank W. Corley their business as Victor distributors has reached large proportions. The Corley Fibre Victrola Trunk has been one of the products of this firm in which Mr. Corley has been especially interested. The sales of these fibre trunks have reached a very large figure.

Mr. Corley's genial nature has gained for him a host of friends in the trade, not only in the South but throughout the entire country. These friends will learn with interest and admiration Mr. Corley's determination to dedicate his efforts for the duration of the war to his country.

NOW WITH LORD & TAYLOR

R. O. Hunter, formerly manager of the Victrola department of G. Schirmer, Inc., and prior to that Victrola manager for Wm. Knabe & Co., New York, is now manager of the Victor department of Lord & Taylor.

CLEANRITE RECORD BRUSH

New Improved No. 10 Model for Victrolas Now Ready for the Trade

The Blackman Talking Machine Co., New York, has announced to the trade this week a new improved No. 10 model of the Cleanrite record brush for Victrolas. This new model

The Cleanrite record brush embodies a number of distinctive improvements over the former models, these improvements constituting patented features that were devised and patented by J. Newcomb Blackman, president of the company.

The Cleanrite record brush has been on the market for several years, and has achieved phenomenal success. It is in use in all parts of the country, and Victor dealers everywhere have expressed their approval of its many distinctive merits. It has been merchandised to the dealers on the principle that it insures long life to disc records and preserves the tone, and there is no doubt but that the proper use of this brush will result in both of these desirable features.

The most important improvement in the new No. 10 Cleanrite brush for Victrolas is a yielding spring, which eliminates the danger of too much pressure on the record, and thereby provides for maximum efficiency in the use of this brush.

The Blackman Talking Machine Co. has prepared attractive literature in behalf of this new model 10, which briefly calls attention to the fact that the Cleanrite brush automatically cleans the record grooves, and gives the needle a clean track in which to run. It preserves a clear reproduction, and by preventing the accumulation of dust and dirt in the record grooves prolongs the life of the records.

The Cleanrite record brush is a model of simplicity in its adjustment and use, and Victor dealers can present this brush as one of the most practical accessories that have been offered to Victrola owners in recent years.

THE BRUNSWICK LINE IN DENVER

Proving Very Popular and Many New Agencies Are Established Among the Dealers—C. J. Carroil Now in Charge of Department

DENVER, COLO., March 9.—The phonograph department of the local branch of the Brunswick-Balke-Collender Co., although established only about a year ago, has met with unusual success and reports that the Brunswick machines are meeting with general favor in this section. A large number of agencies have been established in Colorado and Wyoming, among the most recent being the Chamberlain Furniture & Undertaking Co., Casper, Wyo.; the Howell Drug Co., Ft. Lupton, Colo.; the Davis, Brown, McAllaster Mercantile Co., Berthoud, Colo., and L. E. Frazer, Windsor, Colo.

A recent addition to the staff of the local phonograph department is C. P. Carroll, who has been engaged in the talking machine trade in the Middle West for the past eight years. He will have supervision of the department.

The Fischer Company

Oldest Pathe Jobbers

The Fischer Company were the first to appreciate the wonderful merchandising possibilities of Pathe phonographs and Pathe records.

The growth of our organization has been remarkable. The dealers established by us have all been successful. All have made money. Our service and co-operation have been invaluable to them.

It has been the ONE idea of this house since its inception to give a LITTLE BETTER service than could possibly be expected. The recent establishment of a dealers' service bureau is a concrete example. The object of this department is to originate and perfect merchandising ideas and to give expert advice and assistance to our dealers.

Recent enlargements enable us to adequately serve a few more dealers. We respectfully solicit a trial order. Our ONE DAY SERVICE and SHIPMENTS COMPLETE in these times of crowded carrying conditions mean more sales.

Prospective dealers write for our book just published — "The Other 20%"

CONCERT AT TEMPLE OF MUSIC

Prominent Victor Dealers in Scranton Arrange Splendid Program and Prove That Concerts Are a Profitable Form of Store Publicity

SCRANTON, PA., March 6.—The Temple of Music of this city, prominent and successful talking machine dealer, recently held a very in-

View of Temple of Music Display Room teresting event in its concert hall, which achieved signal success. Guy Deetz, manager of this

View of Booths and Record Room store, and Mrs. Deetz were the guiding spirits in the presentation of this feature, which was commented upon very favorably in the local newspapers.

Mr. Deetz arranged for the appearance of four charming local girls, pupils of Miss Frederica Deerman, to give a series of interpretative dances, using the Victrolas and Victor records. In addition to these numbers, the new Victor records for March were presented.

Miss Deerman selected for this exhibition four of her prize pupils, the Misses Isabelle Diffin, Alice and Lois Smith and Jean Klonoski, three performances being given from 8 to 11 p. m. These dances were presented to more than 1,000 people and the street was crowded with interested music-lovers who were unable to obtain admittance. The concert hall at the Temple of Music faces the street, and as plate glass is used for the entire front, the dancers were visible to those standing on the other side of the street. The performance was enthusiastically applauded by the audiences, the young dancers finding the Victor records ideal for their interpretative dances.

The most important part of this feature is the fact that the business at the Temple of Music on the day following the dances was the largest the store closed since Christmas. Mr. Deetz is delighted with the success of his new plan, and promises to introduce some other innovations in the near future which will further add to the popularity of his establishment and the sales totals of Victrolas and Victor records.

A patriotic and philanthropic American has purchased thirty-eight Columbia Grafonolas with special carrying trunks for the members of the Twentieth Engineers (Forestry Division) who are now in training, and who expect to leave for France in the very near future.

F. F. DAWSON APPOINTED MANAGER

Takes Charge of the Columbia Graphophone Co.'s Cincinnati Branch

George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, announced this week the appointment of F. F. Dawson as manager of the company's Cincinnati branch. Mr. Dawson has been acting manager at this branch since the first of the year, and his appointment as manager is a well-deserved tribute to his ability and the success which he has already achieved in Cincinnati.

F. F. Dawson has been associated with the Columbia Co. for a number of years, and during this time has won the esteem of his associates and the Columbia dealers in the different territories where he has been located. He has always been a keen student of merchandising, and has left nothing undone to assist the dealers in the practical solution of their sales problems. He is thoroughly acquainted with every detail of Columbia product and its possibilities, and is generally recognized as a representative of the modern successful talking machine executive.

HELPING THE PUBLIC TO SELECT

The Orchard & Wilhelm Co., of Omaha, Neb., has recently issued a folder which is admirably adapted to helping the public make its record selections. The folder lists twelve individual records which it offers to send out on approval as a set. In explaining the system there is an introductory paragraph which runs as follows: "Sometimes you can afford a few minutes to look through the little book, but a glance over this list will tell you of twelve records that will satisfy, and you can order over the telephone with a confidence begotten of our recommendation."

A system of this sort offers an admirable opportunity to promote the sale of all new records and to specialize on selected numbers. It is also an idea which offers excellent opportunity to put out on approval certain records of unquestionable musical merit often overlooked.

HOME FROM COAST-TO-COAST TRIP

Frank T. Nutze, Vice-President of Stephenson, Inc., Motor Manufacturers, Finds Conditions Excellent Throughout Country

After a trip across the continent Frank T. Nutze, vice-president of Stephenson, Inc., manufacturers of the Stephenson "precision-made" phonograph motor, is again at his desk. While away Mr. Nutze visited several Pacific Coast cities and some of the larger commercial centers of the Middle West.

He reports both the retail and wholesale branches of the talking machine industry in the territory visited to be very prosperous, and the outlook to be healthy. In Chicago he found the talking machine manufacturers very optimistic, the majority of them feeling a constant increase in the demand for their products. One reason he stated for the better business situation in the West has been the absence of a coal problem on anything like the scale which visited the East. Then, too, he found shipping conditions much more favorable. While their shipping facilities are taxed they have avoided the critical conditions which developed in other parts of the country.

Mr. Nutze closed several business deals, some of which involve the shipment of quantities of Stephenson motors throughout the coming year. Arrangements for a Stephenson service station were closed for the city of Chicago and adjacent territory, the Lakeside Co., Inc., of that city, taking over that representation.

Since his return Mr. Nutze has been very busy catching up with his correspondence, and at the same time acting as traffic expert in seeing that the shipments of Stephenson motors are placed on the shortest and fastest routes, which is "some job" in these days of embargoes and freight congestion.

The Phonograph Co., Chicago, Edison jobbers, have increased their capital stock from \$25,000 to \$100,000.

Tone—the vital thing

IF you, as a manufacturer, can talk and prove *tone superiority* in your product, you have a selling argument to overshadow all the "talking points" of cabinets, and designs and accessory features.

And you *can* talk tone superiority. You can put out a product that will be a revelation in tone-purity, tone-quality, tone-volume. When you realize what vivid, lifelike, colorful tone can be produced and sustained by the talking machine equipped with

Parr Magnetic Reproducer

fitted with the **Vibratone Patented Diaphragm**

These two dominating and proven inventions open up wonderful possibilities for manufacturers eager to put their product at the top-notch of class and character.

You want your product to be RIGHT!

If you want your product worthy of your name, you certainly want that product to be right in its most *vital feature*. And it will be right if it is equipped with the Parr Magnetic Reproducer—the reproducer for those who seek *perfection*.

The indestructible, non-crystallizing, always resilient

VIBRATONE PATENTED DIAPHRAGM

Possessing all the good points of mica diaphragms, it overcomes all mica's had features. Guaranteed uniform in quality, free from bubbles, hlisters and waves, the Vibratone Patented Diaphragm is non-porous, non-absorbent.

It has a definite function and it performs it. It improves tone; in fact it creates new tone possibilities for every reproducer of other types.

PARR MANUFACTURING CORPORATION
1 UNION SQUARE At Fourteenth St. NEW YORK

Take the Parr Magnetic Reproducer—

The most sensitive of reproducers. The permanent magnetic device, an integral part of the reproducer, acts on the stylus box. Its possibilities in giving warmth and delicacy in the tonal reproduction of quiet passages make old-style sound boxes seem obsolete. And in fortissimo passages where ordinary reproducers create unpleasant, music destroying blasts, caused by the needle jumping and losing its grip, the Parr Magnetic Reproducer, with its marvelous flexibility, follows every wave and vibration in the record and takes everything the record holds.

Fill your store with laughter—put on the new April “Cohen at the Telephone.” Everybody who hears it will want it. Cohen buys a piece of submerged real estate, and a suit that fits him only here and there—all in one side-splitting record.

Woolworth Building, New York

SONORA DEALERS ENJOY BANQUETS

Yahr & Lange Drug Co. Entertain Retailers in Their Territory at Elaborate Spread—Minneapolis Drug Co. Follows Suit

The Yahr & Lange Drug Co., Milwaukee, Wis., distributors in Wisconsin for the products of the Sonora Phonograph Sales Co., has been achieving remarkable success with this well-known line, and during the past few months has established many important agencies throughout the State.

Fred Yahr, president of the company, is taking a personal interest in the activities of the Sonora department, and recently invited the

Minneapolis Drug Co. Give Banquet to Sonora Retailers in Their Territory

Sonora Dealers in Milwaukee District Entertained by Yahr & Lange Drug Co.

Sonora dealers in his territory to be his guests at a banquet held at the Plankinton Hotel in this city. This dinner was a signal success, and every dealer present expressed keen enthusiasm

regarding the sales possibilities of the Sonora line, and many practical suggestions were submitted during the course of the evening.

In addition to inviting the Sonora dealers in

Wisconsin to be his guests, Mr. Yahr also extended an invitation to the Sonora jobbers in surrounding territory, and a number of them accepted, including Sewall D. Andrews, Minneapolis Drug Co., Minneapolis, Minn.; O. C. Maurer, Kiefer-Stewart Drug Co., Indianapolis, Ind.; W. J. Hamlin, C. J. Van Houten & Zoon, Chicago, Ill. Frank J. Coupe, director of advertising and sales for the Sonora Phonograph Sales Co., was also present at this dinner, and contributed materially to the success of the banquet.

When Mr. Andrews returned to Minneapolis, he was so favorably impressed with Mr. Yahr's plan that he extended an invitation to the Sonora dealers in his company's territory to be present at a banquet which he gave in Minneapolis. This event was also a decided success, and in addition to the dealers and executives of the Minneapolis Drug Co., there were also present George E. Brightson, president of the Sonora Phonograph Sales Corp., accompanied by Mr. Coupe.

ENTERTAINS CHICAGO FORCE

Arthur D. Geissler, president, and Roy J. Keith, vice-president of the New York Talking Machine Co., Victor distributors, returned last week from a visit to Chicago, where they attended directors' meetings of the New York Talking Machine Co. and the Chicago Talking Machine Co. While in Chicago Mr. Geissler gave a theatre party and dinner to his associates and the members of the board of directors, and Mr. Geissler's well-deserved reputation as a genial host was further emphasized by the success of this party and dinner. The event was marked by a spirit of good-cheer and good-fellowship, and was a fitting finale to a very pleasant Chicago visit.

WHY NOT A TALKING MACHINE MEN'S CLUB IN NEW YORK?

Strong Movement Under Way to Establish a Social and Business Center for the Trade at Large—Plan Would Present Many Genuine Advantages—Piano Men Already Have Club

Why not a talking machine men's club in New York—a social center where members of the trade can meet their friends, and where out-of-town visitors may make their headquarters?

There is a strong sentiment in the trade at the present time for the organization of a talking machine men's club, along the lines of clubs organized in the piano and other trades, and which have proven so successful. It is felt that this industry has reached the point where such an institution would prove most desirable, and that the trade is big enough to assure the support of such a move without any difficulty.

As one well-known talking machine man said to *The World*: "What the trade wants just now is a permanent meeting place where the members of the industry and their friends may gather for luncheon, for dinner, for a social hour or two, to chat, smoke, or otherwise entertain themselves, or to listen to valuable addresses on business topics delivered by men prominent either in or out of the trade. At the present time our industry is one of the few of its size in the city that has not such headquarters, and the fact is to be regarded in the light of a handicap.

"The piano trade some years ago organized the Piano Club of New York, with headquarters in the Bronx, and the club has proven most successful, there being a representative showing for luncheon each day and some big turnouts at special events. One can drop in there most any hour of the day and find somebody, and it proves a most welcome center to which to take piano men from out of town for luncheon or a chat. If the piano men can do it why cannot the talking machine men, who are far more numerous?"

Although the club plan is still in a purely embryonic state, it has already attracted the at-

tention of some active lights in the industry, and one prominent furniture man who conducts a talking machine department in his store has volunteered to provide the furnishings for any quarters that may be selected for a clubhouse, whether simply a floor or an entire building. It is believed that a logical location for a talking machine men's club would be in the forties, somewhere between Fifth avenue and Broadway, convenient to the hotels, theatres and railroad terminals, and within easy reach of trade centers.

It is felt that many speakers could be prevailed upon to address the trade if some place were provided where a fair size audience could be gathered. Then, too, there would be a genuine advantage to the trade in the social intercourse of its members through such a club. Out-of-town visitors, and there are a goodly number of them, would find a talking machine men's club a congenial place in which to spend their leisure moments, and to receive their mail.

Those who have advanced the club plan emphasized the fact that such a movement might well be fathered by the Talking Machine Men, Inc., who with their present organization, representative of the trade at large, could do much to develop interest in the idea. It is pointed out that there are several hundred manufacturers, jobbers and dealers in the metropolitan district who could be depended upon to support a club, a sufficient number in fact to insure the financial success of the venture, if conducted along conservative lines, at a minimum of expense to the individual.

As has already been stated, one advocate of the club idea has volunteered to provide the furnishings for the clubrooms, and this is to be recognized as eliminating one of the big, initial expenses. With the furnishings taken care of, the club members would be called upon to pay

only the rent and the operating expenses, with a return revenue being realized upon any restaurant or refreshment privileges that might be incorporated.

The *World* would be glad to receive any expressions of opinion from the trade in reference to the club idea.

SONORA CO. ELECTIONS FOR 1918

George E. Brightson Again Heads That Concern for Coming Year—The Other Officers

The officers and directors of the Sonora Phonograph Corp. for the ensuing year, as elected at a recent meeting of the stockholders, are as follows:

The CHENEY PHONOGRAPH

Plays all records—better

The success of the Cheney, from a *selling* standpoint, is a tribute to the public's appreciation of *real musical and artistic worth*.

The serene purity of Cheney tone and its perfect renditions of all makes of records result from entirely new applications of acoustic principles. It puts the *real artist* into the record!

The Cheney is an artistic creation and as such it commands prestige and the subtle, but powerful "word of mouth" advertising that goes with the best.

Each sale becomes a permanent advertisement for your store.

Cheney cabinets cannot be excelled in beauty of design and quality of workmanship.

Cheney sales and advertising co-operation is in keeping with the high quality of the instrument.

MAKING SATISFACTORY PROGRESS

American Graphophone Athletic and Social Club a Social Center for Grafonola Makers

The American Graphophone Athletic and Social Club, which is composed of the employes of the American Graphophone Co.'s factories

ment and amusement which this club affords. The club holds its meetings monthly, and the object of these meetings is to stimulate the interest and activities of the members in athletic and social welfare. The club is meeting with the hearty support of the "Graphites," and has gone a long way in the promotion of good-fellowship among the employes. It is inter-

G. Langham secretary. The officers and their associates have worked with considerable energy during their term to make the club a success, and their efforts have been well rewarded. The members enjoy nearly any sort of diversion, such as cards, checkers, pool, athletic stunts, music, dancing, reading, etc.

The club has a service flag covered with a field of stars, which is rapidly climbing close

Meeting Room of Sport Club

One of the Reading Rooms of the Sport Club

at Bridgeport, Conn. (manufacturer of Columbia products), is making very satisfactory progress, and according to present plans the members will be afforded many opportunities to thoroughly enjoy and appreciate the entertain-

ment and amusements. The club has been ested in pool tournaments, card tournaments, bowling, basket ball, music, dancing and similar entertainments.

In the past year A. C. Whitehead has been president, A. H. Carpenter vice-president, and

to the half hundred mark, and the clubrooms have already won recognition from the enlisted and drafted members as a center where they may congregate, renew old friendships and see familiar faces.

THE NEW VICTOR WIRELESS POSTER

Most Attractive Piece of Publicity for Use of Dealer Just Issued by Victor Co.

The Victor Talking Machine Co. has just sent out a most attractive poster in colors for the use of the dealers in window and store displays, and featuring the special Victor records for wireless operators announced recently. The poster shows an army wireless station, back of an artillery position in France, with the oper-

ator sending messages to headquarters. The coloring is particularly effective, and the whole poster is of the sort to demand immediate attention. The Victor wireless records are produced in accordance with the Marconi system, and are, therefore, to be accepted as the standard.

With the wireless poster there has also been issued a second poster referring to the "Victrola Book of the Opera," showing actual reproductions of the book, with its attractive cover in green and gold.

NEW STORE OPENED

The Jamestown Piano & Phonograph Co. has opened a store in Jamestown, N. Y., featuring the Hallet & Davis pianos, as well as Pathé-phones and records. Special soundproof rooms are being installed.

The man who could earn more through greater effort, but who does not make the attempt, cheats himself—and he cheats the rest of the world.

MUNOLA

Retail Price
\$44.50

By economical manufacturing methods and quantity production we are able to offer what we believe to be by far the greatest Phonograph value to-day on the American market.

Its price places it within the reach of every American home. Its fine appearance makes it fit for a place in the finest home in the land. Its richness of tone and splendid finish and design will delight the most critical buyer.

Mechanically the MUNOLA leaves nothing to be desired. Our especially designed double spring motor plays three ten-inch records with one winding and is absolutely noiseless when running.

The tone arm, sound box and full sized all wood horn are scientifically designed and properly proportioned to produce a full, round, mellow tone. **PLAYS ALL MAKES OF RECORDS AS CLEAR AS A BELL.**

MR. DEALER: The MUNOLA will make you immense profits. It sells to every class of buyer because it is cheap enough for anybody—good enough for everybody. We are rapidly establishing Agencies in cities all over the country. If you are looking for the best and most profitable popular priced Phonograph proposition to be had to-day, write us at once for our dealer proposition and full particulars.

MUNZER MANUFACTURING CORP.

"The Quality Phonograph"

"Strong buying by the public of Pathé Records"

Pathé Phonograph \$225

Sounds like a market report, doesn't it?

It is a *fact*, however.

So great is this insistent buying demand among Pathé purchasers that the monthly release of Pathé Records is hopping along in increasing numbers.

Of course, there's reason for it.

Pathé is establishing a reputation for being first on the spot. Soon as a song, or other musical number, makes a hit, Pathé has it on a Record. That's service.

Then again—in the higher realm of song—such world-famed artists as Muratore, Muzio, Didur, Thibaud, Ganz, Hoffman, Rimini, Ober and a host of others, most of them exclusively Pathé, entrust their finest offerings to Pathé Records because of the *realism* and faithfulness of Pathé Record reproduction.

Get in on this Pathé prosperity.

OTTAWA PLANT DESTROYED BY FIRE

Ottawa Pianophone Co. Suffers Total Loss of Factory—Temporary Plant Opened in Chicago to Take Care of Current Orders

CHICAGO, ILL., March 11.—The plant of the Ottawa Pianophone Co., Ottawa, Ill., was totally destroyed by fire on Saturday night. The origin of the fire is unknown, but a high wind storm fanned the flames and firemen were delayed twenty-five minutes waiting for water to be turned on. Had there been a proper water supply the plant could have been saved.

A temporary plant has been secured in this city to take care of the orders on hand, and there is sufficient stock on hand to insure the trade an ample supply of the full Hiawatha line. Manager Fred Moynahan states that a new plant will be ready in sixty days on a location not yet determined upon.

PLANNING FOR JOBBERS' CONVENTION

Louis Buehn Heads Arrangements Committee to Look After Details of Annual Meeting to Be Held at Atlantic City in July

Plans are already under way for the next annual convention of the National Association of Talking Machine Jobbers, which will be held at the Hotel Traymore, Atlantic City, in July. The Traymore headquarters have proven most satisfactory to members of the association during the past two conventions, which accounts for the selection of that hotel for this year.

Of course, as they say in circus land, the coming convention will be bigger and better than ever. The trade is faced with unusual problems this year, and it would seem that every jobber would welcome the opportunity to meet with his fellow jobbers for the discussion of current problems as they affect the talking machine business.

Louis Buehn, head of the Louis Buehn Co., Philadelphia, has been appointed chairman of the arrangements committee for the convention, and is already hard at work lining up the details. Announcements of the various convention plans will appear in *The World* each month up to the time of the meeting.

SUPREME COURT RENDERS DECISION

Price Maintenance Suit of Boston Store of Chicago vs. American Graphophone Co. Decided in Favor of the Chicago Concern

WASHINGTON, D. C., March 5.—The United States Supreme Court handed down yesterday an important decision which in effect limits the rights of a patentee under the patent laws to control the resale price of an article. This decision was rendered in the case of the Boston Store of Chicago versus the American Graphophone Co.

In September, 1915, the United States District Court in Chicago granted an injunction against the Boston Store of Chicago enjoining it from selling Columbia records at cut prices. The case came before the Supreme Court upon a certificate from the United States Circuit Court of Appeals in and for the Seventh Circuit.

The questions certified to the Supreme Court were the following:

1. Does jurisdiction attach under the patent laws of the United States?
2. If so, do the recited facts disclose that some right or privilege granted by the patent laws has been violated?
3. Can a patentee, in connection with the act of delivering his patented article to another for a gross consideration then received, lawfully reserve by contract a part of his monopoly right to sell?
4. If jurisdiction attaches solely by reason of diversity of citizenship, do the recited facts constitute a cause of action?

The Supreme Court in its decision answered the first question in the affirmative, and all the other questions in the negative.

STOCKHOLDERS ASSENT TO PLAN

President Francis S. Whitten, of the American Graphophone Co. and the Columbia Graphophone Co., has sent out a letter to stockholders in which he says that over 90 per cent. of the stockholders have filed their assent to the reorganization plan, 60 per cent. being necessary. Temporary certificates of the Columbia Graphophone Mfg. Co., as the new company to take over American Graphophone will be known, will be issued shortly. The time for stockholders who have not done so to turn in their stock has been extended to March 15.

Style A

Price, \$225.00

Size 49 1/2 x 21 x 25

In Fumed Oak or Satin Mahogany

Triple Spring, Spiral Gear, Nickeled Motor, Tone Modifier, Plush-covered Turntable, Automatic Stop, Lock Needle-cups and Rests, Leg Sockets and Casters.

Record compartment opening on side through a rising and falling balanced door, fitted with five ten-inch and four twelve-inch high-grade albums, capacity 108 records.

All exposed metal parts heavily gold-plated.

The patented spun vibratory horn is finished in Roman Gold.

RECORDS BY NOTED MEN

To Be Used by the "Nation's Forum" in National Propaganda

St. Louis, Mo., March 8.—As announced recently in The Talking Machine World, Guy Golterman, a prominent attorney of this city, is the director of a new organization to be known as the "Nation's Forum," which has been formed to introduce records made by some of the most prominent men in public life. This

Guy Golterman

forum has already secured an imposing list of names, and several well-known men have already made records which are meeting with considerable favor.

At a recent meeting of the Chamber of Commerce at the Planters Hotel, in this city, a record made by ex-Ambassador Gerard was presented, and proved such a signal success that Edward Buder, chairman of the meeting, wrote the following letter to Mr. Gerard: "Please accept my thanks for yours of the 27th inst. You will be pleased to know that the Gerard talk made a decided hit at the meeting yesterday, and I take this opportunity of thanking you for the use of the machine and the record."

IMPORTANT CHANGE IN EL PASO

EL PASO, TEX., March 9.—The Tri-State Talking Machine Co. has been consolidated with the talking machine department of the El Paso Piano Co. However, the firm name of "Tri-State Talking Machine Co." will be retained, J. M. Spain and W. R. Schutz being the sole owners. The piano department of the El Paso Piano Co. will continue as usual and under its present name. W. R. Schutz is proprietor.

The entire business will be concentrated and conducted in the El Paso Piano Co.'s beautiful new location at 215 Texas street, formerly Everybody's Building, in a few days.

Richard S. Thompson, formerly of the advertising department of the Victor Talking Machine Co., is now a second lieutenant of infantry. He is a graduate of Plattsburg officers' training camp.

MUSIC "SOMEWHERE ON ATLANTIC"

Naval Officer Writes Interesting Description of the Playing of Phonographs on Transport Bound for "Over There"—How Various Kinds of Music Affect the Fighting Man

SAN FRANCISCO, CAL., March 7.—Is the musical instrument a necessity or a luxury? Ask the boys in the cantonments, on the transports or in the trenches. George McConnell, of Fraser & McConnell, piano dealers of this city, is satisfied that at least on the transports music is a very real necessity. In evidence thereof he cites a letter he recently received from a captain, formerly of San Francisco, written while the officer was "somewhere on the Atlantic" headed for "somewhere in France."

In the opening paragraph the officer said: "A phonograph is playing in the distance, sometimes a classic and sometimes a love song." And as he proceeds with his letter he interrupts himself from time to time to tell what the machine is playing. Now it is "A Little Bit of Heaven." And this brings to the soldier's mind visions of dear old San Francisco, as it was there he had a friend who loved to sing the song. Then comes the Largo from Handel and the sadness makes the boys feel that it is very hard to keep a stiff upper lip. But the lighter things of life constantly bob up in youth and the captain refers to one of his comrades who is lying in his bunk, where he "Just Can't Make His Stomach Behave." Towards the end of the letter he says: "Now we are going to have a march and then perhaps a rag," and his friendly communication takes on a sprightlier tone at the prospect. Truly, he says in conclusion, if it were not for the music it would be hard to keep up a fellow's spirits.

Can you not picture the young officer sitting apart from the group about the phonograph, holding commune with his friend by means of the written word, but his every thought dominated by the music that flows from the overworked phonograph? Can you picture such a scene and say that the musical instrument is not a necessity of warfare?

1918 METHODS OF ADVERTISING

BOSTON, MASS., March 5.—George W. Hopkins, general sales manager of the Columbia Graphophone Co., New York, was one of the speakers Saturday at the monthly dinner of the Pilgrim Publicity Association.

Mr. Hopkins chose for his subject "1918 Methods of Advertising," and gave one of his usual effective and inspiring addresses. He told the advertising men present that it is up to them to make business earn more dollars than ever, so that these dollars may be used in supporting the Liberty Loans.

"There never was such a time in history," he said, "for the making or breaking of men in business. I'm not at all pessimistic, but the American business man must get his affairs into such shape that he can take advantage of the \$7,000,000,000 that will be spent by the Government in prosecution of the war. The rich man, too, has less money to spend than he ever had before; and the poor man has more. You must accommodate your business to these changed conditions or you will go down rather than up."

He outlined the various selling appeals in the vending of merchandise. Concerning one change in the psychology of the buyer, he said that the draft has made a Beau Brummel of the private, and this change is reflected in the average man.

NEW HOFFAY CABINET MODEL

A new style of cabinet has been adopted by the Hoffay Talking Machine Co., Inc., and in the future all their models will be produced in this new style, which will make the Hoffay distinctive. A photograph of the new model is reproduced herewith and will give some idea of its attractiveness.

The Hoffay Talking Machine Co. are celebrating this spring their "three years of progress." Announcement of the accomplishments of the firm in that time appears elsewhere in this paper. The recent New Hoffay Style decision of the Hoffay Co. that they would release their two reproducers, the "Resurrectone" and the "Half-fork-tone," for general use to all manufacturers making the necessary arrangements, has brought a flood of requests for these reproducers to the Hoffay offices during the past four weeks.

MAKING IMPORTANT INSTALLATIONS

A. L. Van Veen & Co. Equip a Number of Important Stores With Their Booths

In a chat with The World this week Arthur L. Van Veen, head of A. L. Van Veen & Co., manufacturer of Van Veen bed-set booths, commented upon the fact that the company had been making unusually satisfactory progress in closing important installations in Brooklyn. At the present time, Van Veen booths are being installed in the establishments of several prominent Brooklyn talking machine houses, and in all parts of this territory the company's booths are rendering splendid service. Mr. Van Veen attributes this progress to the satisfaction his booths are giving the dealers, for many of these installations have been repeat orders.

In current literature issued by the company Mr. Van Veen called attention to the fact that in a recent advertisement used by the Columbia Graphophone Co. on the back cover of the Saturday Evening Post an illustration was used that portrayed the Van Veen booths. The illustration in question was the interior of the store of Hardman, Peck & Co., Brooklyn, N. Y., which ordered a Van Veen installation after thoroughly investigating the merits of these booths. As this back cover advertisement costs \$9,000, Mr. Van Veen is naturally gratified to feel that a store with a Van Veen installation was selected for use in this advertising.

Among the recent Van Veen installations in Brooklyn are the following: Ridgewood Grafnola Shop, Frederick Becht, Kirsner Bros., Stultz & Bauer, and a complete installation for the piano and talking machine rooms of Frederick Loeser & Co.

SERVICE FOR THE DEALER

The Service Department of the New York Talking Machine Co. Has Prepared a Series of Artistic Posters for Use of Dealers

The service department of the New York Talking Machine Co., Victor wholesaler, has prepared for the use of its dealers a series of unusually artistic feature posters that can be displayed to excellent advantage. It is the intention of this department to prepare one of these posters each month, and those issued to date have won the enthusiastic approval of the Victor dealers in metropolitan territory.

One of these recent posters featured the Victor records made by Jascha Heifetz, the phenomenal young violinist, who has taken the country by storm, and who records for the Victor Talking Machine Co. exclusively. This poster presents a cutout of Heifetz in full pose, and was executed by Louis Fancher, one of the leading poster artists in New York.

Another recent poster features the vocal record "Lorraine," which promises to be one of the most popular semi-patriotic songs that have been introduced during the past year. The subject of this poster is in keeping with the text of the song, and is well calculated to attract favorable attention from all Victrola owners. Another recent poster featured the Victor record of the "Missouri Waltz," one of the best selling waltz records that have been introduced in recent years.

The service department of this company has also instituted a special combination service plan, which includes a one-page insert that can be enclosed with the monthly supplements. This insert features ten records which the company has in stock, and this list contains selections that make a definite appeal to all music lovers. The headings of each insert are especially attractive, and usually feature some of the latest hits of the day.

In order to enhance the value of this insert a hanger has been prepared which also lists these ten records, and the progressive Victor dealer can use this hanger in conjunction with this insert, to stimulate the demand for ten records that can be promptly supplied.

NEW SONORA AGENCY OPENED

WEST ALLIS, Wis., March 12.—The exclusive agency for the Sonora phonograph in West Allis, one of the largest and most important suburbs of Milwaukee, has been placed with the Central Drug Co., 6324 Greenfield avenue, by Yahr & Lange, Milwaukee, distributors. The Central Co., owned by Theodore J. Mueller, is remodeling and enlarging its store in order to provide elaborate display and demonstration rooms.

REMOVE TO LARGER QUARTERS

Ready File Co., Inc., Compelled by Growth of Business to Move Executive Offices to the Fourth Floor of Castle Hall Building

INDIANAPOLIS, IND., March 8.—For the second time within the past year the Ready File Co., Inc., has been forced by the ever-growing volume of business to move to larger executive offices. This time the makers of this fast selling specialty for filing records have gone to the fourth floor of the Castle Hall Building, where they occupy a suite consisting of six departments and an experimental laboratory.

When seen in his new private office, F. O. Wilking expressed great pleasure over the new experimental laboratory. He said in part:

"We are all greatly gratified in having at last the laboratory that has been in our minds for the past several months. Here we can, I am sure, work out the plans for making the new specialties we have in mind. What these are I am not at liberty to disclose, as our patents have not yet been secured, but I may at least say that they are all related to the development of the talking machine. I rather think that before very long we will be in a position to supply many of the wants of the talking machine dealer, and to supply them better than has heretofore been done by any accessory company."

APPOINT NEW BRUNSWICK AGENCIES

Ten Dealers in This Section Take on Line During Month—Changes in Staff at New York Office—Staff Meeting of Sales Force

Both the wholesale and retail departments of the Brunswick phonograph at the New York headquarters of the Brunswick-Balke-Collender Co. report generally good business.

In the period from February 15 to date ten new agencies for the Brunswick phonograph were opened by this office. Seven of this number were opened since the first of the month.

Various changes of territory were made in the sales staff. Chester Abelowitz, formerly in the New Haven district, is now in New York City. F. W. Johnston has been transferred from New Haven to Brooklyn. J. J. Brophy, formerly in New York City, is now in New Haven. A. E. Wengrovius is covering Albany and H. D. Clark, Newark.

The salesmen met in the New York headquarters on Saturday last for a staff meeting at which time the new "Ultona" reproducer and tone arm for playing all records on the Brunswick phonograph was demonstrated.

INCREASES CAPITAL STOCK

Phonograph Co., of Milwaukee, Edison Jobber, Increases Capital From \$30,000 to \$50,000

MILWAUKEE, Wis., March 13.—The capital stock of the Phonograph Co. of Milwaukee, 213-215 Second street, Edison jobber in Wisconsin and Upper Michigan, has been increased from \$30,000 to \$50,000. It is stated that there is no significance in the increase excepting that it is demanded by the constantly growing volume of business. William A. Schmidt is manager of the company, which also controls the Edison Shop, retailers for Milwaukee and vicinity.

SONORA PRICE FOLDER ISSUED

The Sonora Phonograph Sales Co. has just issued an attractive folder which presents photographs of the complete Sonora line, together with list prices. These photographs are clear-cut and well defined, and as usual, carry out the Sonora idea of dignity and quality. The complete line of Sonora phonographs with their prices are as follows: "Supreme," \$1000; "Invincible" No. 1, \$375, No. 2, \$500; "Grand," \$300; "Laureate," \$215; "Elite," \$200; "Baby Grand," \$180; "Intermezzo," \$150; "Imperial," \$115; "Troubadour," \$90; "Rhapsody," \$60; "Mendelssohn," \$55; "Melodie," \$50.

WHERE BUYING POWER LIES TO-DAY

Some Interesting Comments on Changed Conditions From Edison Diamond Points

It is no exaggeration to say that the earning capacity of the working man is to-day much higher than it has been in years, says Edison Diamond Points. There are probably five million families in the United States and Canada who to-day are in a position to purchase what they had previously considered far beyond the reach of their purse. The high cost of living notwithstanding, the working man is better situated financially than he has ever been.

The buying power to-day is in the hands of the working man. We believe that in certain localities the large percentage of buyers of New Edisons in 1918 will be working men, men who to-day can afford to have those things that have long been out of their financial reach.

In January, we sent you a questionnaire about your business. The opening question was: "What percentage of your sales in November and December was made to the working class?"

A good many replies have been received, enough, in fact, to shed a good deal of light on your business in the future. There are numerous cities and towns in this country where anywhere from 90 to 100 per cent. of our dealers' business is transacted with men of the working class.

If you are situated in a large manufacturing community, you have an untouched field before you, but bear in mind that you are the one to do the tilling. Indications are that 1918 will be the best year on record for the man who goes after business—it may not be quite so good a year for the dealer who stands behind his counters and waits for business to come to him.

The J. B. Greenhut Co., Inc., the big New York department store, are closing out their business. They held a Victor jobber's license, although selling only at retail, and the Victor stock has been taken over by another local jobber.

THOS. A. EDISON AS A PROPHET

Article Written by Him Forty Years Ago Gave Accurate Forecast Regarding the Wide Sphere of Usefulness of the Phonograph

An article written by Thomas A. Edison for the North American Review May-June, 1878, recently came to light during a search among some old documents in Mr. Edison's laboratory. In this article Mr. Edison presented a number of categorical questions to which he appended answers, covering almost every phase of phonographic development, showing what has been successfully accomplished, as well as certain possibilities which subsequent developments prove that Mr. Edison was a prophet in his own country.

This North American Review article, which by the way, is being reprinted in full in the current issue of the Amberol Monthly for its historical importance, emphasized Mr. Edison's ideas regarding the future of the phonograph, almost forty years ago, in which many of the accomplishments of to-day were then set forth as among the certainties.

In his questions and answers he covered sound production in its various phases, record making and multiplication as well as the preservation of sounds. He said further: "Conceding that the apparatus is practically perfected in so far as the faithful reproduction of sound is concerned, many of the following applications will be made the moment the new form apparatus, which the writer is now about completing, is finished. These, then, might be classed as actualities; but they so closely trench upon other application which will immediately follow that it is impossible to separate them; hence they are all enumerated under the head of probab-

ilities, and each specially considered. Among the more important may be mentioned: Letter-writing, and other forms of dictation, books, education, reader, music, family record; and such electrotype application as books, musical boxes, toys, clocks, advertising and signaling apparatus, speeches, etc., etc."

Mr. Edison treats these subjects in detail and shows how phonographic books may be used in the home; how the phonograph may be used for educational purposes; as a musical entertainer; as a family record; for toys of various kinds, and points out the possibilities of the phonographic clock that will tell the time of day, how phonography may be used for advertising, for transmitting the great speeches of prominent men, posterity and lastly, and in quite another direction, tells how the phonograph will perfect the telephone and revolutionize present systems of telegraphy.

The article, which is very lengthy, certainly demonstrated Mr. Edison's complete grasp of the phonographic field four decades ago.

TELLS OF COMPANY'S PROGRESS

Phonograph Clearing House, Inc., Fills a New Field of Usefulness for Phonograph Manufacturers Generally—Centralizes Supplies

In a recent chat with The World, S. N. Rosenstein, president of The Phonograph Clearing House, Inc., New York, gave some interesting ideas in connection with the foundation of his house, and the success which it is achieving.

Before he established the Phonograph Clearing House, Inc., Mr. Rosenstein was connected with the phonograph industry in various ways for a number of years, and he states that he realized the need of a central depot for the busy manufacturer wherein he might find whatever he wanted without the least waste of energy.

"To this end," said Mr. Rosenstein, "I established connections with the manufacturers in the East and West, and can now supply the manufacturer with anything he wants from a needle to a finished machine. I wish to call the attention of the manufacturers, however, to the fact that, as a rule, when the manufacturer is in the market for a new tone arm, sound box, motor, or other part, he does not know exactly just what he wants, and is desirous of learning just what is on the market that would best suit him.

"He is, of course, hardly willing to enter as yet into direct communication with the 'parts' manufacturer, and that is where our clearing house can help him. We give the manufacturer the benefit of absolute tests on every article, and then sell him whatever he chooses to adopt without any additional cost, and certainly with less worry. In addition, we help many manufacturers dispose of overstock through our study of the sources of supply and demand."

The Texas-Oklahoma Phonograph Co., Edison jobbers, with headquarters in Dallas, Tex., have leased a large storeroom measuring 50 by 200 feet, at 906 Commerce street, that city.

DISTINCTIVE FEATURES HELP

Why the Brown Disc Record Cabinets Grow in Popularity With the Trade

The sales manager of the Globe-Wernicke Co., Cincinnati, O., manufacturer of Brown disc

record cabinets, in a recent chat with The World pointed out that the success of these cabinets may be attributed to the practical utility of its distinctive filing arrangements, and the favorable appeal which its other features make to the talking machine owner. The Brown disc record cabinet is so devised that a record may be found instantly, and the compartment from which it was taken is left open for its return. There is no danger to the record, as it is either on the machine, in the hands of the operator or in its compartment.

From the standpoint of attractiveness the Brown disc record cabinet harmonizes completely with the most expensive furniture in the living room or music room. It is splendidly constructed, and is made in four sizes; two-drawer, four-drawer, six-drawer and twelve-drawer. The Globe-Wernicke Co. has prepared an artistic catalog, designated as No. 317, which is devoted to the Brown disc record cabinet.

How It Operates

TEST offered to dealers to prove the superiority of Wall-Kane Steel Needles

Take two standard disc records of the same selection, play one ten times with the same WALL-KANE loud needle; play the other record, the same selection, ten times, but with ten, new, full tone steel needles.

You will find that the record played ten times with the same WALL-KANE needle will sound clearer, will have less surface noise, and that under the magnifying glass the grooves of the record played ten times with the ten steel needles will seem to be more disturbed.

Beware of Imitations

Package of 50 WALL-KANE needles. Loud, Extra Loud and Medium, greater value than 500 ordinary steel needles, retails for 10c, costs the dealer 6½c. Jobbing territories open.

“COLUMBIA RECORD” REAPPEARS

Popular House Organ of Columbia Graphophone Co. in New Dress and Full of “Live” Copy

The “Columbia Record,” the popular house organ, which was published by the Columbia Graphophone Co. for several years, and which was temporarily discontinued some time ago, made its reappearance this month in new form, and judging from the success of the first number the new “Columbia Record” is destined to become a most popular house organ.

The form of the new “Columbia Record” is decidedly individual and distinctive, the paper being issued as a four-page newspaper, each sheet measuring 18” by 27”. This makeup permits of the introduction of attractive illustrations with plenty of text.

On the first page of this new publication is presented a group of pictures showing how Columbia dealers have utilized the new window display service inaugurated by the Columbia dealer service department. There are also presented several letters received from Columbia dealers throughout the country commenting upon the value of these displays, and the impetus that they have given to record sales.

There is a column story on the first page regarding “Thornton Burgess Week,” and reproducing some of the fantastic characters which have made this author’s Bed-time Stories famous.

Other pages of this new “Columbia Record” reproduce some of the new Columbia car cards, which are multi-colored masterpieces of lithographic art, and which form one of the most effective links in the dealers’ advertising campaigns. There are also reproduced several of the new Columbia advertising cuts, free electrotypes of which are sent dealers on request.

One of the most valuable articles in this new “Columbia Record” is a list of the tentative tours of Columbia artists, giving a detailed account of the different cities at which they are scheduled to appear during the next few months. Among the Columbia artists listed in this section are Barrientos, Casals, Cincinnati Symphony Orchestra, Eddy Brown, Lucy Gates, Leopold Godowsky, Louis Graveure, Josef Hofmann, Margaret Keyes, Morgan Kingston, Florence Macbeth, New York Philharmonic Orchestra, Oscar Seagle, Helen Stanley and Eugen Ysaye. There are other practical suggestions in this first issue of the new “Columbia Record,” which is being ably edited by Paull Hayden. The purpose of the new publication is well summed up in the following editorial comment:

“You are the most important man in the Columbia business—because you sell Columbia product. Without your efforts there would be no Columbia factory, no Columbia Grafonolas, no Columbia records, in fact, no Columbia Co. You are the wheels, the belts, the pulleys, the engine, the coal, the steam, the power which is making Columbia what it is to-day and will make it what it will be to-morrow.

“Our factory knows unless they give you the

right product they will have to shut down. Our executives know that unless they give you what you want and what you can sell there is no excuse for their existence.

“Having proved to you your importance we are glad to announce the reissuing of the ‘Columbia Record.’ It is to help you be more important. It is to be one of the most unique and dealerish dealer house organs in existence.

“We want to tie up the smallest Columbia dealer in America with the biggest Columbia sales ideas.

“In addition to sales plans developed by our sales experts the ‘Columbia Record’ will tell stories of successful plans developed by other

Columbia dealers. Here’s where you come in again. Let us know any time you make a successful sale. Your success is as good as the next fellow’s and we want to give everyone the benefit of your ideas as well as give you the benefit of everyone else’s ideas.”

REPUBLIC CO. CREDITORS TO MEET

CHICAGO, ILL., March 11.—The first meeting of the creditors of the Republic Phonograph Co. of Illinois, which was adjudicated bankrupt on March 5, will be held at the offices of the referee in bankruptcy, Sidney C. Eastman, at 53 West Jackson boulevard, March 19.

Gentlemen;—

We take great pleasure in complimenting your good paper on the splendid results we have obtained from our advertisements in your monthly.

According to records which we have in our office and which are open for inspection, we have received inquiries from prospective buyers of talking machine needles, from all parts of the United States, Canada and foreign countries, who refer to having seen our add in the “Talking Machine World.”

As a constant advertiser in your paper, we believe that you would be pleased to know of these results. We can cheerfully recommend the Talking Machine World to any advertiser in search of an effective advertising medium.

Wishing your paper much success and assuring you of our hearty support, we are,

Yours very truly,

BRILLIANTONE STEEL NEEDLE CO.

BY-  PRESIDENT.

JOBBER’S ASSOCIATION APPROVES “REFERENDUM NO. 23”

Cast Affirmative Vote on Proposal to Discriminate Against Enemy in Trade After the War if Necessary for Self-Defense—President Blackman Explains Real Meaning of Proposal

The members of the Chamber of Commerce of the United States were recently requested to vote on a referendum, designated as “Referendum No. 23,” which related “to a proposal to discriminate against Germany in trade after the war, if necessary for self-defense.”

The vote on this referendum was overwhelmingly in the affirmative, and one of the associations that voted “yes” was the National Association of Talking Machine Jobbers, which cast its vote through French Nestor, national councillor, after a meeting of its executive committee.

When the referendum was first received J. Newcomb Blackman, president of the National Association of Talking Machine Jobbers, made a careful study of its different proposals, and about that time the newspapers started a controversy regarding the meaning of certain paragraphs in the referendum. After going into the matter very carefully, Mr. Blackman sent the following interesting letter to Mr. Nestor:

“I have purposely delayed voting on the United States Chamber of Commerce Referendum No. 23, as I wanted the benefit of the controversy, which I have noticed in the newspapers regarding it.

“The referendum itself was not read by me until to-day; and the newspaper articles gave me the impression that it called for a vote to boycott Germany after the war without qualification. I think that represents the prevailing idea.

“A careful analysis satisfies me that this referendum merely attempts to set forth the general belief of American business men, as well as the general public, that we were forced into this war through a military form of government in Germany.

“Furthermore, that, as President Wilson has so clearly pointed out in his various messages, we cannot hope to have a lasting peace if the fulfilment of its terms depends upon the present or some similar government which, in effect, is a military autocracy.

“It is to me a message to the German business man from the American that, to avoid what may possibly be the birth of a commercial war and the introduction of a boycott against Germany, it is absolutely essential that the present form of government give way to one set up by the German people and responsible to them.

“In other words, instead of our agreeing now to boycott Germany, as many seem to think this referendum calls for, we are merely setting forth our convictions, as the present form of German Government having been responsible for the war, and that unless after peace the enemy takes on a different form of government, we will be obliged to discriminate, in order that we will not help a militaristic autocracy regain its strength only to wage another war.

“Inasmuch as this referendum has been issued and must be voted on, I hope our members will have a clear understanding of its object and effect.

“The third paragraph on page 4 of same is a simple explanation and reads as follows:

“This proposal is concerned only in making clear to the business men of Germany that a continuance of the present German military autocracy will compel the rest of the world to unite in a business opposition to Germany as an act of self-preservation.”

“I have endeavored in this detail to discuss the subject, because I so fear a negative vote giving rise to the opinion that, regardless of circumstances, American business would not discriminate against Germany commercially.

“If among our members you have negative votes, and such would sway the balance, so that we should be obliged to cast our vote for the association accordingly, I hope that no time will be lost in bringing this squarely to their attention, so that through no lack of proper interpretation a negative vote will be cast.

“On the other hand, I am frank to say that were this referendum to concern nothing but an unqualified expression of determination to boycott Germany after the war, I would most emphatically vote ‘no.’ To me it means a strong presentation to German business interests of our sincere regret in being possibly forced to take such action and an expression of what would bring this action about, also how it can be avoided.

“If I can be of any further service in this matter, do not hesitate to call on me, for this referendum has been given much publicity, and now that it has come to issue, should be voted on in a most intelligent manner.

“I think we all agree that we are fighting this

war to insure permanent peace and liberty and are prepared to sacrifice everything to accomplish that end, so the least we can do is to leave no misunderstanding among ourselves, or even our enemy that will delay, hamper or defeat such an unselfish motive.”

STRIKING VICTOR ADVERTISING

Feature Value of Talking Machine Record in Preserving Voices of Noted Artists

In their recent advertising in the American Magazine, the Victor Co. has featured most impressibly the fact that the talking machine record renders a genuine service to posterity by permitting them to listen to the actual reproductions of the voices of the famous artists of the present day. The advertisement points out that, although the voice of Patti is lost to those of the younger generation who did not hear that noted songstress in the flesh, the golden tones of Melba will be preserved on talking machine records for all time to come. Both the illustration and the text convey a message to the public that cannot be mistaken, and represent an angle from which to view the importance of the talking machine which, although it may not be new, is nevertheless well worth considering.

The creditors of the Rex Talking Machine Corp., Wilmington, Del., held a meeting recently declaring a final dividend of 3.6 per cent.

ANNUAL BANQUET AND DANCE

Of the Talking Machine Men, Inc., Will Be Held at Hotel McAlpin, New York, on April 10—An Interesting Program Has Been Arranged

The entertainment committee of the Talking Machine Men, Inc., has advised the dealers in

J. J. Davin

New York, New Jersey and Connecticut that the association's annual banquet and dance will be held at the Hotel McAlpin, New York, on April 10. Plans for this event are now being formulated, and judging from the indefatigable efforts of the committee, this year's dinner will set a new high-water mark in point of attendance and enjoyment.

Sol Lazarus, chairman of the entertainment committee, and one of the most active workers of the Talking Machine Men, Inc., is being congratulated upon the acquisition of corps of aggressive and wide-awake associates for his committee. J. J. Davin, of the New York Talking Machine Co., is a member of the entertainment committee, and chairman of the reception committee, and in this important post is rendering invaluable service to Mr. Lazarus. Other members of the entertainment committee, who have "put their shoulders to the wheel" in a united effort to make the 1918 dinner a record-breaker are John E. Hunt, A. Galucie and Cass Riddel.

The committee has announced that the speakers of the evening will include Congressman Stephens, sponsor of the Stephens bill; H. C. Brown, assistant general manager of the Victor Talking Machine Co.; George W. Hopkins, general sales manager, and Marion Dorian, chief

auditor of the Columbia Graphophone Co.; J. Newcomb Blackman, president National Association of Talking Machine Jobbers, and J. H. Tregoe, secretary of the Credit Men's Association. James T. Coughlin, president of the association, will preside as toastmaster, and it is safe to say that this important position will be filled with adeptness and skill.

Through Mr. Davin's efforts, the association is enabled to present to the dealers something novel in the way of entertainment, which should insure the certain success of this part of the program. The Hawaiian Troupe, which has made a series of Victor records that have achieved phenomenal success, will render a group of songs and medleys during the course of the dinner, and after the close of the banquet will furnish their inimitable playing for the devotees of dancing. The entertainment committee is making extraordinary efforts to have the fair sex well represented at this year's gathering, and the program, with the Hawaiian Troupe as

Sol Lazarus, Chairman Entertainment Committee an added feature, should make a favorable appeal in this direction.

It is planned to have an exceptionally attractive musical program, and among the well-

known artists who will render a number of selections during the course of the evening are Charles W. Harrison, Arthur Fields, and others. This feature is a decided innovation for the association's banquet, and indicates the activities and progressiveness of the 1918 committee.

In order to make this year's dinner and dance a representative trade gathering, the entertainment committee is urging the dealers to bring as many of their employes as possible, and for those who are unable to be present during the earlier part of the evening, a cordial invitation is extended to enjoy the dancing and entertainment in the latter part of the evening.

The annual banquet of the Talking Machine Men, Inc., has been recognized for several years as one of the most important and enjoyable events in the activities of the talking machine trade, and each year's dinner and dance has outdistanced its predecessor. It is almost a foregone conclusion, however, that the 1918 gathering will leave last year's far behind in every respect, as the dealers intend to bring their families, employes and personal friends.

SUFFER LOSS FROM FIRE

James E. Donnelly, music dealer of Bridgeport, Conn., recently suffered a fire loss of \$2,500 to his stock of talking machines and records. Prompt work by the salvage corps of the Fire Department resulted in the saving of \$4,000 worth of records.

FIRE IN LAWRENCE, MASS.

A fire which caused \$150,000 damage to the furniture and department store of M. J. Sullivan, Lawrence, Mass., last week, destroyed practically the entire stock of talking machines and records on the second floor of the store. Several employes in the department had narrow escapes from the flames.

It's a very unusual trouble that most of us can't stand cheerfully—if it only belongs to the other fellow.

British Government Affording Genuine Aid to Industry in Preparing for Post-War Business Development—Gramophone Trade Triumphs Over Serious Obstacles and Still "Carries On"—Greatest Trouble Found in Getting Metal Parts, Particularly Motors—Machines and Records for the Soldiers—Live Publicity the Rule in the Trade—War Takes Its Toll—What is Found in the New Record Lists—Death of Mark Sheridan—Honors for Gypsy Smith—Government Taking More Men for War Work—"Neptune" Records Appear on the Market—General News of Musical Interest

LONDON, ENGLAND, E. C., March 1.—A war-weary determined democracy! Each separate unit in all walks of industrial and social life the world over heartily longing for a termination of Armageddon yet persistently determined to conclude it only on the basis of the triumph of reason over the fanaticism of Teutonic Kultural aberration. That is the spirit of the Allies. The march of civilization will progress the better once this Prussian cancer is removed. We may then look forward to a period of unexcelled prosperity, not merely commercial. But the maintenance of commerce is essential to the achievement of those ideals which the Allies have for their objective. For the moment politics and business must be inseparable companions, as in the future they must not be entirely the subject of that separatist pre-war policy which gave our enemies an enormous advantage, if not indirectly the means to wage war against the world. In this sense, therefore, I make no apology for the presentation of political thought in these columns, as I believe that politics and commerce should be linked to-

gether more strongly than in the past. One helps the other. The British Government has given it official recognition to an extent hitherto considered unnecessary. Additional trade commissioners for all parts of the world are being appointed, consultations arranged with representative business houses, commercial bureaus established, examples of foreign merchandise exhibited, and all necessary information thereto placed at the disposal of exporters and manufacturers. This, and much more that I may refer to another time, is indicative of the machinery set up by the Government with the object of placing British industry on a sure foundation for post-war development. Useful preparatory work is being done in other directions and valuable assistance provided for the cultivation of oversea trade. The remarkable statistics of British export values published each month illustrates the important consideration that every branch of industry, including the musical instruments, is maintaining effort to "carry on" against supreme difficulties. This is as it should be. The theme of my thoughts is to drive home to all traders the absolute necessity of stronger effort to-day; of maintaining a vigorous trade offensive, in order to provide the wherewithal out of income for the prosecution of the war—to achieve the humane ideals for which the world is fighting. No matter the difficulties; the discouragements—they are many; fight on—persistency will win out in the end sure enough. The small trader counts equally with the large; it's unity that stands for concentration of purpose—concentration of strength that moves mountains of difficulty.

As my American readers will appreciate, the British gramophone trade has experienced enor-

mous setbacks and is still in the throes of many elements adverse to good business. What of it? The British trade has fought and won; is still maintaining a remarkable volume of record sales, and means to keep it up! You will do the same—keep at it, that is all!

Let us take a peep at the machine side of our business, and we shall see what has been accomplished towards the maintenance of trade in the face of almost insuperable difficulties. When hostilities commenced, apart from the cabinets and an insignificant quantity of metal parts, the British market relied upon imported motors, etc., the bulk of which came from Germany. In 1915 transport difficulties were met with, and in 1916 onwards became so acute that official restrictions on supplies from Switzerland and America were imposed. To-day the difficulty of importing motors is very severe and less than 50 per cent. of pre-war supplies from these sources is coming through. What happened? The trade, or certain members thereof, got to work on an endeavor to induce suitable firms to start the manufacture of motors, tone arms, sound boxes, trumpets, etc. The need for metal horns failed with the demand for interior-horn cabinet models, but it must be remembered that this demand was purely and simply the outcome of action taken by the trade in developing a call for cabinet instruments as against the ordinary model. Thus was one difficulty successfully overcome. Not without considerable trouble several good firms were at last persuaded to develop on sound box, tone arm, and output of kindred parts, the position at present being very satisfactory as regards these supplies, and in speaking of this, too, as another

FROM OUR LONDON HEADQUARTERS—(Continued from page 111)

triumph, I must emphasize the fact that extreme difficulty was all along experienced in obtaining a sufficient ration of metals for the purpose. Indeed, it may be asserted with truth that the output of these articles is only limited by the small quantity of metal now allowed for their manufacture. We now came to the main attribute of a machine—the mechanism. Here the real trouble commenced. In the first place, few if any firms had experience in this class of work. A gramophone motor is an intricate piece of mechanism requiring high-class precision work. War output occupied all suitable shops, and recourse was had to inferior and less experienced firms. This resulted in great loss of time, owing to the necessity of experimental work and the constant alteration of jigs involved thereby. Just when one or two passable samples were produced, the metal scarcity became more acute, and in other cases the Government stepped in and switched the firms on to war articles. The trade continued its efforts, meeting with discouragements too many to mention. The present position is that several shops are all ready to go ahead as soon as labor and metal troubles can be overcome. One firm, I believe, is putting out a few motors by getting stampings and parts from different shops over the country and assembling them. But this does not make for efficiency. To sum up, we are still mainly dependent upon imports, and these are in quantity inadequate to complete all the machines ready and for which the demand exists.

Free Gramophone Ballot Scheme for Soldiers

In connection with the Daily Express Cheery Fund, which has been established for the provision of games, musical instruments, etc., to the oversea troops, a free gramophone ballot scheme has been started for soldiers and sailors. With the public's free will offerings all sorts of acceptable things are provided. The gramophone scheme has caught on better than anything, and as "Orion" reported in a recent issue—"A staggering number of applications to be included in the ballot arrived from the front over the week-end." The gramophone outfits include a complete trench gramophone, six records, and 1,000 needles, and the ballots will begin as soon as the first delivery is made by the Columbia Graphophone Co. Good luck to the Cheery Fund.

Winning "Winner" Record Publicity

Of the companies who are to any extent supporting their dealers on the publicity side, a meed of praise is due the Winner record people for the very attractive window bills and lists, which are issued monthly. The latest streamer to hand reads: "Winner Records Play on All Gramophones," etc., the lettering, coloring, and general design being so arranged as to reflect the message strikingly, even with a minimum amount of light behind. Each corner is gummed, thus rendering it easy to affix to the window. The company is doing some excel-

lent work on the advertising side, and theirs is an example which one or two other firms might emulate advantageously.

Final Notice in re Carl Lindstrom (London) Ltd.

A recent intimation in the press gave notice to all firms interested that creditors of the above concern who had not already sent in their claims would go by default unless such claims were received by the official controller on or before February 28. This business, by the way, has now been purchased by the Hertford Record Co., Ltd.

"No Dammed German Pianos"

At the Royal Society of Arts, Sir Frederick Bridge said that, in common with other musicians, he was out for the improvement of the musical taste of the country, which would do much to increase the demand for better pianos. He hoped that after the war our musicians would put their heads together and say: "No dammed German pianos shall come near me!" "You would hardly expect such language from an ecclesiastical," said Sir Frederick, amid much laughter; "I did not mean to say 'dammed,' but having said it—well, I'll stick to it. I, for one, will not play on a German piano!"

The Band of H. M. Irish Guards

This fine instrumental organization is generally regarded in musical circles as one of our very best military bands, whose playing is undoubtedly of the highest excellence. It is represented on the "Winner" record current list by six popular items of the quick-selling order. The Band of H. M. Irish Guards is, by the way, exclusive to the Winner Co. On the list under mention, January-February, there is itemized a galaxy of good up-to-date vocal and instrumental selections, including a descriptive record of an air raid, dramatic and realistic in its treatment. An air raid of this type will be welcomed by most gramophonists.

The Johnson Talking Machine Co.

In the wholesale field wartime difficulties are not less acute than in other departments of the gramophone industry, and it is a most encouraging sign that factors are displaying an optimism which influences the dealers to maintain the highest possible efficiency of effort in circumstances that are not always the brightest. The policy of the above concern has never permitted a relaxation of effort, and depressed conditions at times notwithstanding, they have managed to sustain a large trade in machines, records and accessories at both the Liverpool and Birmingham centers. The company is working hard on the forthcoming output of a new home needle resharpening device (particulars of which were published in our January issue), and I have just received news of a new needle called the "Apex," which is soon to make its appearance on this market. In this regard Mr. Johnson writes: "This is a very good line, but unfortunately we are only allowed a very small ration of steel wire and we shall not be able to execute more than about one-

quarter of the orders we expect to receive. . . . We are sharing out our stock of goods just the same as the grocers are sharing out their tea, sugar, and butter."

Whatever the position may be, I am of opinion that the trade may rest confident that this enterprising firm of factors will do the very best possible to insure an equitable distribution of those lines which may temporarily run short.

Another Life Laid Down

The trade will learn with extreme regret of the death of Lieutenant Cecil L. Henderson, who was killed in action in November last, when at the head of his men—facing the enemy. As the one-time outer-London representative of "His Master's Voice" Co., Lieutenant Henderson was well known to hundreds of dealers, with whom he used to crack a joke while keeping his eye all the time on the order book. He was a popular "Knight of the Road"—one of the good old sort, ever cheerful; ever businesslike, and successful! He joined up in the early days and was soon singled out for a commission. Although invalided out of the army twelve months ago, he rejoined after several unsuccessful efforts. Such was his spirit!

325,000 Bricks in New Chimney

A new chimney has made its appearance at the Hayes factory of "His Master's Voice." It is 150 feet high, weighs 1,632 tons, and has required for its construction no less than 325,000 bricks. The circumference at the base is 20 feet 8 inches; at the top, 13 feet. It will soon be emitting volumes of smoke in behalf of "His Master's Voice" output.

Blind Pianoforte Tuners

A new field for British soldiers who have suffered the great misfortune of lost or impaired sight, is opened up by the National Institute for the Blind, who are by press advertisements inviting the public to utilize the services of blind tuners. A worthy object which we think will receive the support it deserves.

A Johannesburg Dealer's Irreparable Loss

The story of the casualty lists is one of grief and pain. One day, the name of a friend; another, the name of one connected with the gramophone trade, brings home to us the terrible cost involved in the fight for humanity. This month we have to record the loss of another hero, Captain James Ivan Mackay, R.F.C., killed in action when in charge of his squadron over the German lines. He was regarded as a most promising officer, great things being expected of him, in view of the courage and skill always displayed on every occasion, before his

DEALERS PREPARED TO DO BUSINESS ARE INVITED TO COMMUNICATE WITH

Proprietors and Manufacturers, J. E. HOUGH, Ltd., 62 Glengall Road, London, S. E. 15, England

FROM OUR LONDON HEADQUARTERS—(Continued from page 112)

career was so untimely cut short. His spirit and wonderful example will live as an incentive to the young allied airmen who are coming forward in their legions to uphold the mastery of the air. Captain Mackay was the eldest son of James Mackay, the founder of the well-known "His Master's Voice" dealers, Mackay Bros., Ltd., Johannesburg, with whom the trade will deeply sympathize.

The Romance of Recording

In this month's issue of "The Voice" appears the first of a series of articles on the above subject, by Wm. C. Gaisberg, the "His Master's Voice" chief recording angel. His first contribution deals in a most interesting way with the recording tour undertaken in India during 1906. Speaking of the native girl singers and their songs, Mr. Gaisberg tells us that—"one never finds written music for these songs; they are handed down from father to son over hundreds of generations, some of the songs or poems, being 2,000 years old." It is a most instructive article, and one looks forward with interest to the next.

Clara Butt's War Work

As might only have been expected from a leader in her art, Madame Clara Butt, Britain's Queen of Song, has been unostentatiously carrying on a great war work ever since that fateful August, 1914. Those therefore who have remarked that her appearance on Columbia records has, perhaps, been of more frequent occurrence than her appearance on the London concert platforms, will find herein good reason why that is so. Since the outbreak of war Madame Clara Butt has raised between £30,000 and £40,000 for various charities. The British Red Cross Society has received most substantial help, and other charities such as the Scottish Red Cross, Queen Mary's Work for Women Fund, the Arts Fund, War Seals Foundation, Baby Week, Joan of Arc Day and Pageant of Fair Women on behalf of the Three Arts Workrooms. These Three Arts Workrooms were started at the outbreak of war to provide employment for poor musicians, etc., who were not physically strong enough for hard work. They are there taught to make toys, one of which was judged by the Board of Trade to be the finest British toy of its kind on the market. At a trades exhibition £2,700 worth of orders were received, but it was impossible to execute same, owing to lack of capital to purchase the necessary materials. Madame Butt decided to devote the proceeds of Joan of Arc Day and Pageant of Fair Women to place these workrooms on a really sound business basis, and over £2,440 was raised.

Abnormal Zonophone Sales

It means something unusually big to classify Zonophone record sales as abnormal, since ordinarily the demand is remarkable. That, however, is the position with regard to the January issues. Dealers everywhere report a difficulty in maintaining representative stocks,

though the company's output is greater than ever. The situation indicates public appreciation of the quality and variety of the Zonophone monthly programs; a state of things also due to the persistent advertising of these fine records. Some excellent publicity matter accompanies the January samples, and the retail trade will doubtless make the most advantageous use thereof.

Death of Mark Sheridan

The music hall and gramophone world sustained a severe loss in the death under tragic circumstances of Mark Sheridan, the famous rapid-fire comedian. His style was decidedly original and his makeup of tall hat, bell-bottomed trousers, and natty cane will never be forgotten. He gave the world a number of songs that were great successes of their time, among them being "At the Football Match Last Saturday," "One of the B-Hoys," his last big hits being "Here We Are, Here We Are, Here We Are Again" and "When Belgium Put the Kibosh on the Kaiser," both of which he recorded for Columbia and both of them being among the outstanding successes in war songs.

The New "Neptune" Records

A comparatively recent introduction on this market is the ten-inch double "Neptune" disc, which, selling at a popular price, has easily won for itself a "place in the sun." A goodly repertoire already exists and the catalog is being extended by new issues, comprising vocal and instrumental titles of the up-to-date order. The Neptune is marketed by Messrs. Curwen & Sons, Ltd., the well-known sheet music publishers, this city, and when conditions permit they intend to cultivate the patronage of over-sea buyers.

Gipsy Smith Honored

The famous singing evangelist, Gipsy Smith, was honored by the King by inclusion in the new year list of members of the Order of the British Empire. At first the honor passed unnoticed as the celebrated missionary was given as Rodney Smith, a name which few recognized as that of Gipsy Smith. In a day or two, it transpired that the Order had been conferred upon the evangelist for his splendid work in raising some £13,000 for the Y. M. C. A. during his six months' tour of the country. The constant large sales of the records of his Gospel hymns that he made for Columbia a year or two back, will doubtless receive a fresh impetus after this signal evidence of Royal favor.

Men Required From Luxury Trades

Notwithstanding the welcome assistance of the American forces, Great Britain is putting forward every ounce of her strength; is, in fact, speeding up rather than lessening her efforts, to bring this armageddon to a successful conclusion. A further comb-out of men from non-essential trades is proceeding. There are about half a million men of military age engaged in non-essential or luxury trades, a large number of whom are of low medical category and

Soundboxes

If you are after a genuine offer of soundboxes, you'll do well to communicate with us immediately. We have tens of thousands of perfect soundboxes, fitted with the best quality mica. Confidently recommended for cheaper machines, absolutely reliable and give excellent reproduction. Price to clear \$50 per gross, F. O. B. London.

unfit for general service. The Government expects to secure at least 100,000 of these before the end of this year, and doubtless many others will be switched off their present work on to more important duties connected with war material output. The music industry has already contributed its full quota, and apart from unfits there are few, if any, men of military age exempted from service. But a further call for men for national work is expected, especially now that pianoforte manufacturers are taking on such work. Additional female dilution is therefore the order of the day.

TALKING MACHINE MEN, INC., MEET

Interest and Membership Questions Taken Up at Monthly Session Held on February 20

The regular monthly meeting of the Talking Machine Men, Inc., was held on Wednesday afternoon, February 20, in the rooms of the Merchants' Association in the Woolworth Building, under the direction of the president, J. T. Coughlin.

The committee charged with the work of persuading all dealers to charge 6 per cent. interest on instalment sales reported progress and petitions were distributed to be circulated among the dealers in New York and vicinity for the purpose of securing their endorsement.

Six new members were elected and the membership committee reported excellent results. The question of changing the by-laws to make jobbers non-active members of the association was laid on the table until the next meeting.

A nominating committee was appointed to make its report at the March meeting.

SOUTHERN CALIFORNIA NEWS ITEMS

Crop Conditions Mean Good Business—Scarcity of Machines and Records Still Prevails—Value of Association Work—News of Month

LOS ANGELES, CAL., March 6.—The short month has passed and business conditions have not changed very much since the first of the month. There is still the scarcity of both records and machines in all makes with the end not yet in sight.

Southern California was blessed with a six-inch rain in February, and, as up to that time the weather man had only reported one inch for the entire season, it can readily be seen that the country was in desperate need of rain, and it was of inestimable value to this section. Most all of the crops were greatly benefited and everybody feels better regarding business conditions since the downpour. Just what the outcome will be here in the talking machine business is hard to predict, as stocks of records and machines are running perilously low. The railroads seem to be as congested as ever and freight moves very slowly.

The Fitzgerald Music Co., exclusive Edison dealers, report a fine business during the last month, especially in the larger models. Their Edison tone tests netted them some good prospects, and Earl Dible, their manager, says that they have made several sales as a direct result of them.

The Bartlett Music Co., of West Seventh street, exclusive Columbia dealers, are doing a good business in their talking machine department. They have one of the best-equipped departments in the South and carry a complete stock of machines and records.

The Retail Talking Machine Dealers' Association of southern California is already showing results, as at the last meeting the approval system was discussed and in the future a forty-eight-hour limit will be put in effect and the customer must guarantee to keep at least a third of all records taken from the stores. Also all persons wishing to take records on approval are requested to call for same and return them to the store, thus making a great saving in delivery. Machines sold on contract must be paid in full in fifteen months, which will have a tendency to make the terms higher, especially on the more expensive models. Los Angeles has long felt the want of just this kind of an association, and it is to be hoped that it will be the means of eliminating, or at least regulating, some of the evils that have been creeping into this business in the last few years.

Chas. H. Norberg, treasurer of the Daynes-Beebe Music Co., of Salt Lake City, is in the city for a short visit. Mr. Norberg says that business is fine with them. Their only trouble at present is in getting enough goods.

M. X. Dumas, lately on the road for the Brunswick Co., of El Paso, Tex., has joined the sales force of the Southern California Music Co. Mr. Dumas is a talking machine man of a great deal of experience in different parts of the country, and at one time was connected with the Edison Co. at East Orange, N. J.

C. O. Stillings, of Fillmore, Cal., who represents the Brunswick phonograph in his city, is in Los Angeles for the week-end. Mr. Stillings has a small but up-to-date department and says the prospects are good in his district.

C. S. Ruggles, local manager for Sherman, Clay & Co., Victor jobbers, has just returned

from a visit to the Atlantic Coast. While in the East Mr. Ruggles paid a flying visit to the Victor factory and saw Mr. Geissler and the heads of the different departments. Mr. Ruggles says conditions look as bad in the talking machine line in the East as in California, and the other Pacific Coast States. Everyone seems to be out of goods and unable to get any and no one seems to know just the reason. Mr. Ruggles is very much elated over the fact that since his return to the Coast his son, Leslie Ruggles, who is connected with the moving picture department of the United States Army, has been made a lieutenant, and has since sailed for France.

O. A. Lovejoy, manager of the Diamond Disc Distributing Co., is very well pleased with his business since January 1, and is congratulating himself that his stock is in fair condition. He reports the biggest demand for Models 250 and 150, and at present both are out of stock. However, Mr. Lovejoy is expecting a large shipment next week when he will have all models in all finishes. Harold Jackson, road representative for the above house, leaves to-day for an extensive trip through the central part of the State.

Dan Voorhies, who is looking after the Brunswick-Balke-Collender Co., of 845 South Los Angeles street, says business is booming for the "all record" machines, and reports new agencies in the following towns: Bakersfield, Lompoc, Santa Maria, Santa Ana, Pomona, San Bernardino, Pasadena, San Pedro, San Diego, Redlands, Taft and Glendale in California and Yuma, Jerome and Winkelman, Ariz. The Brunswick Co. carry and feature a full line of Pathé records.

The Southern California Music Co. have discontinued their Pasadena branch, and in the future will handle all business in that territory direct from the main store in Los Angeles.

The needle famine seems over for the present, and most all of the local dealers are able to get hold of a few needles, but not the real fine tone ones, which are quite scarce at present.

CO-OPERATION SPELLS SUCCESS

Aggressive Advertising Agency Co-operating With Ready File Co.

According to statements of its officials the Ready File Co., Inc. is particularly fortunate in its recent advertising connection. The McDermott Advertising Service, now in charge of the Ready File account, is one of the younger of Indianapolis agencies, but it is undoubtedly one of the most progressive and the fastest growing of that city.

Specializing, as it does, in musical instrument advertising, McDermott Advertising Service is exceptionally well equipped to work out the advertising problems of Ready File. Ordinarily the advertising agent has to spend a great deal of time and waste considerable effort in getting the readers' viewpoint, especially when these readers are members of a well defined class such as phonograph dealers. In the present case the preliminary work was largely unnecessary, as the heads of the agency were already familiar with the point of view and the problems of the phonograph dealer. In behalf of the Ready File and the numerous other accessories, McDermott Advertising Service is planning a vigorous nation-wide campaign.

Do You Collect Your Accounts?

FOR some time past we have been using a follow up system of collecting both our installment and open accounts that has brought us wonderful results. 90% of the work done right in your office. Saves attorneys' fees and keeps the good will and patronage of your customer.

The complete layout, simply explained, sent for \$5.00. Cash with order. We refer you to any Victor, Edison or Columbia Jobber in our section as to our reliability.

WORLD'S CLASSIFIED ADVERTISING

Any member of the trade may forward to this office a "situation" advertisement intended for this Department to occupy a space of four lines,agate measure, and it will be inserted free. Replies will also be forwarded without cost. Additional space will be at the rate of 25c. per line. If bold faced type is desired the cost of same will be 25c. per line.

WANT TO MEET a talking machine man or a business man who would like to enter the talking machine business, one who has large business acquaintance, to help me organize and finance the manufacture of a new and highly meritorious motor for which there is a big demand. Will make the right kind of a proposition to the right man. Address "Box 500," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Position as department manager. Either line, Columbia or Victor. Over twelve years' experience. Well posted on both record catalogs. Best references. Wisconsin preferred. Address "Box 501," care The Talking Machine World, 373 Fourth Ave., New York.

HIGH-CLASS salesman wanted; must possess unquestionable ability, also produce selling record. We want an experienced man. Salary and commission proposition. Car furnished. Address The Turner Music Co., 153 North Main St., Wichita, Kan.

ATTENTION, Edison jobbers and dealers. Experienced Edison salesman and manager, with some capital, will consider financial interest in established Edison agency in connection with position. Address "Box 502," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Experienced salesman, wholesale and retail, also expert mechanic, desires position with good house, Chicago and vicinity. Address F. B. 28, care The Talking Machine World, 209 South State St., Chicago, Ill.

TALKING MACHINE REPAIRMEN—Extra money easily earned when repairing machines, demonstrating new phonograph attachment. Every owner a possible customer. Address "Box 504," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—A thoroughly experienced Pathé and Victor retail man wishes a situation in or about New York City. Address "Box 506," care The Talking Machine World, 373 Fourth Ave., New York City.

WANTED—Large Gramophone company in London is anxious to procure spring motors, tone arms and sound boxes of the highest grade to assemble their machines. At present using 90 per cent. Swiss and the balance British parts, but would like to get hold of good American parts if they can import them. Manufacturers of these parts are requested to communicate with "Box British," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—A thoroughly experienced Edison Diamond Disc salesman. In applying state age, experience, and give as references names of former employers. A good opening for a high class man. Address "Box 493," care The Talking Machine World, 373 Fourth Ave., New York.

WHOLESALE SALESMAN desires to make change. Well known and has built up successful record. Can furnish best of references from present connection. Victor line preferred. Address "Box 497," care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—Man of 12 years' talking machine experience desires a road position, can produce. Make me a proposition. Address "Lyb," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Cabinet superintendent and designer wishes to connect with live concern March 1. Familiar with up-to-date methods. Good executive and knows how to obtain results. Now employed in New York City. Highest references. Forty years old. Address "Box 494," care The Talking Machine World, 373 Fourth Ave., New York.

POSITION WANTED—Manager or superintendent of phonograph factory will be open for position March 1. Now with a firm manufacturing high grade commercial phonographs. Output 125 a day. Am in a position to show how your production can be increased and your merchandise improved without increasing your cost. Specialize on designing period and modern styles, general construction, cost, elimination of waste. Executive ability in handling labor and labor problems. If it's production you need, address "Box 495," care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—Experienced Edison salesman and manager desires to make connection with live Edison dealer. Hold similar position now. Address "Box 496," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Capable, experienced, reliable person to take charge of disc manufacturing department. Address "Box 480," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—A position as manager of talking machine store or department. Young, married man of long, practical experience. All references. Middle West preferred. Address "E. B. 6," care Talking Machine World, 209 S. State Street, Chicago, Ill.

TRAVELERS visiting talking machine trade can make \$50.00 per week easily, selling our sensational novelty for talking machines as a sideline. Pocket samples. Excellent proposition. Only first class men need apply. State particulars, and district you cover. Address Uniset Reproducer Co., Wabash avenue and Jackson boulevard, Chicago, Ill.

POSITION WANTED—Would like to work in phonograph store or anywhere else in phonograph line. Address "Box 489," care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—Experienced Edison salesman and manager open to offer. Hold similar position now. Age 33, married. Address "Box 490," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—By a New York manufacturer, an expert man to develop a phonograph motor. Answer in-detail by letter only, state experience and salary expected. Address M. Weingarten, 286 Fifth Ave., New York.

FOR SALE

Patent and complete manufacturing equipment for new talking machine attachment of real merit. Address "Box 505," care The Talking Machine World, 373 Fourth Ave., New York City.

SITUATION WANTED—Superintendent at present employed, thoroughly familiar with every angle of the phonograph business, desires to make a change. Address "Box 491," care The Talking Machine World, 373 Fourth Ave., New York.

SITUATION WANTED—By high grade finishing foreman. Have had several years' experience on talking machines. Will be open for position February first. Want to connect up with a good, live, growing concern, one that would appreciate first class finishing, production and efficiency in every respect. State amount of men in finishing room, the output whether table or floor cases, the salary you would pay for an A1 man. Address "J. D.," 306 East South Grand Ave., Springfield, Ill.

SITUATION—Mechanical engineer thoroughly understanding the manufacturing of phonograph parts, complete machine assembling or machine work, is open for a position as superintendent or production manager. Highest credentials as to ability. Address "Box 473," care The Talking Machine World, 373 Fourth Ave., New York.

ENERGETIC—Young man with clerical, order and executive experience, familiar with the phonograph record line, desires position in any part of the country. Address Philip Greenberg, 2325 East Sixty-third St., Cleveland, Ohio.

SITUATION WANTED—If it were possible to secure a sales manager who has sold over \$21,000 worth of phonographs, personally, in one year, to manage your department, would you consider him? Have good position now. Will explain reasons for wanting to make a change. Will furnish signed statement of business done. Strictly confidential. Address "Box 472," care The Talking Machine World, 373 Fourth Ave., New York City.

POSITION WANTED by expert mechanic with thorough knowledge of motors, assembling, cabinets and inspection of finished production. Competent to take full charge. Address "Box 487," care The Talking Machine World, 373 Fourth Ave., New York.

SALESMAN—Calling on talking machine and piano dealers, to handle a profitable side-line that may be developed. Territory open. Proposition one that most dealers will not refuse. Steady return on repeat business. Address "Box 488," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Experienced salesmen in the talking machine and piano trade (having a slight knowledge of wood finishing will be an asset), to sell a meritorious article as a side line. Write for particulars at once, as territory is going rapidly. Our offer to the trade gets the business for the salesman. Address Master Mfg. Co., Box 96, Camden, N. J.

WANTED—An expert talking machine assembler by a manufacturer in New York City. Permanent position for a man who thoroughly understands the assembling of popular priced machines. Address "Expert," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—A superintendent for a talking machine plant who is a capable executive and who can organize an efficient working class. We want a progressive and thoroughly efficient man who can take complete charge of the plant, which is one of the most complete in the country. Give full details as to past experience, training, etc. All replies held strictly confidential. Address "Box 476," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—Experienced talking machine salesmen who are familiar with the wholesale trade, and who are capable of handling a first class line of machines and records. There is an excellent opportunity for the right men, with unlimited earning possibilities. Give full particulars in first letter. This is a proposition that will place the right men with one of the best equipped manufacturers in the trade. Address "Box 477," care The Talking Machine World, 373 Fourth Ave., New York.

WANTED—By a New York distributor an assistant repair man. Salary to start \$14. Address "Repairs," Box 478, care The Talking Machine World, 373 Fourth Ave., New York.

C. E. WARD CO. PLANS TO EXPAND

Will Shortly Open Branch Offices in California and Also in Canada

NEW LONDON, O., March 9.—The C. E. Ward Co., manufacturers of the Ward khaki moving and dust covers for talking machines, as well as other specialties, report that, although held up somewhat recently by the fuel shortage, their plant is now back to normal, and orders are now being turned out in the usual prompt manner. The company plans to open a branch office in California, and another in Canada in the near future for the convenience of the trade in those sections.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

WASHINGTON, D. C., March 8.—PHONOGRAPH RECORD CLEANER AND PROTECTOR.—Edward Loomis Christian, Douglas, Ariz. Patent No. 1,249,720.

This invention relates to an improved record cleaner and protector for phonographs and has as its primary object to provide a device of this character which may be attached to the sound box of the phonograph in the rear of the stylus and automatically operable to engage the phonograph record upon the movement of the sound box toward the record for supporting the sound box in position with the needle spaced from the record to thus prevent the marring or scratching of the record by the accidental fall of the sound box.

The invention has as a further object to provide a construction wherein after the sound box has been moved to engage the protector with the record of the phonograph, the protector may then be swung to inactive position for permitting the movement of the sound box to engage the needle with the record.

And the invention has as a still further object to provide a construction wherein the protector when swung to inactive position will provide a cleaner or sweep for the record for removing the dust therefrom as the record is revolved beneath the needle of the phonograph.

Figure 1 is a side elevation showing a portion of a conventional type of phonograph with the sound box thereof equipped with the improved protector, the protector being swung to inactive

position to provide a cleaner for the phonograph record in the rear of the needle. Fig. 2 is a similar view showing the protector in active position supporting the sound box with the needle of the phonograph spaced from the record, this view also illustrating in dotted lines the manner in which the body of the protector is adapted to gravitate to active position upon the movement of the sound box to seat the phonograph needle upon the record. Fig. 3 is a detail view showing the device detached with the parts thereof disconnected from each other, and Fig. 4 is a detail side elevation showing a slightly modified form of the invention.

RESETTING DEVICE FOR SOUND REPRODUCING MACHINES.—Thomas Ahearn, Ottawa, Ont. Patent No. 1,250,751.

This invention relates to improvements in resetting devices for sound reproducing machines, and the objects of the invention are to provide a simple and effective device adapted to lift the stylus when it reaches near the end of a record and reset it at the beginning thereof. A further object of the invention is to enable the resetting to be effected immediately and continuously, or at given intervals.

In the drawings, Figure 1 is a perspective view of a portion of a talking machine embody-

ing the present invention. Fig. 2 is a diagrammatic view of the electric circuit. Fig. 3 is a view partly in plan and partly in horizontal diagrammatic view of an alternative form of one of the circuits. Fig. 4 is a perspective detail of an alternative form of a device for returning the sound tube to normal position. Fig. 5 is a

diagrammatic view of an alternative form of one of the electric circuits. Fig. 6 is a side view of the lifting magnet. Fig. 7 is a perspective view showing an alternative form of the lifting device for the sound box. Fig. 8 is a detail in the elevation of the timing device.

RECORD REMOVING DEVICE FOR TALKING MACHINES.—Stefan Canda, Philadelphia, Pa. Patent No. 1,250,795.

This invention is an improvement in talking machines and has particular reference to a record removing device.

An object of the invention is to facilitate the removal of a record, after the completion of the reproduction thereof, from the turntable of a disc machine by raising the record from engagement therewith and, to this end, use is made of a member pivoted to the machine and having one end extending beneath the turntable and means adapted to engage the bottom of the record when the other end of said member is de-

pressed in order that the record may be raised from engagement with said turntable and then removed.

The inventive idea involved is capable of receiving a variety of mechanical expressions, one of which, for the purpose of illustrating the present invention, is shown in the accompanying drawing, wherein figure 1 is a fragmentary side elevation of a talking machine showing the invention applied thereto. Fig. 2 is a vertical sectional view. Fig. 3 is a top plan view of the record raising mechanism. Fig. 4 is a section on the line 4-4 of Fig. 3.

SOUND REPRODUCING MACHINE.—Percival J. Packman, Highbury, London, Eng, assignor to the Aeolian Co., Meriden, Conn. Patent No. 1,250,637.

This invention relates to sound reproducing machines in which "hill and dale" cut records are employed and has for its object to increase the capacity of a record without substantially diminishing the volume of sound.

It has been usual to cut a record of the "hill and dale" type with the groove in the form of a U in cross section which has necessitated the use of a reproducing stylus terminating in a small ball.

Owing to the U form of the groove, it is not possible to obtain a very long record on the usual size of blank, as the convolutions of the spiral cannot be brought very close together and be cut to the required depth to give a good volume of sound owing to the risk of the convolutions overlapping one another to some extent.

According to the invention there has been cut a "hill and dale" groove of substantially a V shape in section and a very fine or needle pointed stylus is employed for the reproduction by contact of its extremity with the bottom of the V shape groove. It will be understood that contrary to what is the case with a record formed by a U-shaped cutting instrument, there is a definite and distinct line of track, that is, the bottom of the groove cut by the point of the instrument, which always coincides with the true convolutions of the spiral or helix, and against which the point of the stylus fundamentally bears, as clearly seen from the drawing.

It will thus be understood that by securing frictional or bearing contact of the stylus with the bottom of the groove only, i.e., the line of track a substantial clearance space will be left on either side, that is to say the angle between the sides of the groove will be greater than the

angle of taper of the fine or needle pointed end of the reproducing stylus itself.

In the drawings, Figure 1 shows diagrammatically on a much enlarged scale by way of example a cutter of sapphire or other suitable substance for cutting the V on the record. The angle between the cutting edges is acute, and the cutting faces or edges are ground so as to leave a sharp point which will actually yield a very narrow space at the bottom of the groove against which the extremity of the fine or needle pointed reproducing stylus may contact.

The stylus used in carrying out this invention has a hard, fine or needle point, and is preferably made of the highest grade hardened tool steel. Figs. 2 to 6 show modified forms of tools adapted

to be employed for cutting the V-shaped groove in a record. The tools are drawn to a large scale for the sake of clearness. Fig. 7 shows a greatly enlarged plan view of a small portion of a track made according to this invention, showing the distinct line of track produced by the cutting of the groove and Fig. 8 shows a cross section of the same on the line A-B of Fig. 7. Fig. 9 shows diagrammatically to an enlarged scale a reproducing stylus in position with its fine or needle point in the bottom of the V-shaped groove of a record.

TONE ARM FOR TALKING MACHINE.—Pliny Cautucci, Newark, N. J., assignor to Otto Heine-man Phonograph Supply Co., New York. Patent No. 1,251,340.

The purpose of the present invention is to provide a tone arm for talking machines with means for adjustably relieving the sound box needle of a portion, or all of the weight of the tone arm, and a portion of the weight of the sound box, so that the pressure upon the surface of the record through the sound box needle may be very materially relieved and the life of the record correspondingly prolonged. The tone arm also embodies a novel form of construction in the swinging or swivel bearing of the tone arm with the stationary sleeve support therefor. It also is provided with detachable sound box tubes of a character to permit the same sound box to be used in connection with either the so-called Berliner record, or the so-called Edison records; that is to say, records wherein the sound groove is a zigzag spiral of uniform depth, or where the record groove is a spiral of varying depth.

Figure 1 is a plan view of a complete tone arm as constructed and ready for attachment to a talking machine case. Fig. 2 is a side elevation of the same. Fig. 3 is a vertical end elevation. Fig. 4 is a full-sized vertical section on line 4-4

of Fig. 1. Fig. 5 is a view of the tone arm detached from the swivel support. Fig. 6 is a corresponding view of the swivel elbow showing the location of the stop-slot. Fig. 7 is a detached view of a sound box tube for use with so-called Edison records.

SOUND PRODUCING DEVICE.—Harry H. Pratley, Kansas City, Mo. Patent No. 1,251,918.

This invention relates to sound producing devices and has for its principal object to provide a simple and inexpensive device whereby the sound recorded on a disc or like record may be reproduced.

Figure 1 is a perspective view of a sound reproducing device constructed according to the

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS—(Continued from page 116)

invention. Fig. 2 is an elevation of the same, the record and a part of the handle member being in section to better illustrate the clamping of the record on the handle. Fig. 3 is a detail perspective view of the needle slide. Fig. 4 is a longitudinal section of the same. Fig. V is an eleva-

tion of a part of the slide rod, showing a modified form of amplifier.

STYLUS FOR SOUND REPRODUCING MACHINES.—William W. Moyer, Camden, N. J., assignor to the Victor Talking Machine Co., same place. Patent No. 1,251,908.

It has been discovered that tungsten or tungstenic material is peculiarly adapted for styli or needles of sound reproducing machines. A stylus composed of tungsten or tungstenic material exhibits properties differing in a marked degree from those present in styli of other material. Among the characteristics are that a stylus of tungsten or tungstenic material has little injurious effect on the walls of the sound record groove during the reproduction of sound from a record and may be used a large number of times and on different records one after the other without injuriously affecting the walls of the sound record groove. It appears to rapidly wear at first until its sides in engagement with the sound record groove fit and conform to the shape of the groove, after which the wear is negligible or unappreciable throughout the reproduction of sound from the remainder of the groove of the record.

Tungsten is, however, a very difficult material to work, particularly when it is in the form of a wire, the diameter of which is substantially equal to the width of a sound record groove. Tungsten wire is brittle and tends to split. It is also expensive.

Since only a very small portion of a stylus is in actual contact with the walls of the sound record groove in reproducing sound from a record, it is obviously desirable to employ as little of it as possible. If, therefore, a steel shank be provided with a tip of tungsten or tungstenic material to engage and co-operate with the walls of the sound record groove, substantially all of the desirable properties of tungsten or tungstenic materials, as applied to this branch of this art, are utilized, and the present invention in a stylus having a shank of cheaper, more easily wrought material, and a record engaging tip on the point or insert of tungstenic material, firmly and permanently united therewith or attached thereto. The object of the invention is to provide a stylus for sound reproducing machines consisting of a tungsten tip or point of very fine tungsten wire of a diameter substantially equal to the width of a sound record groove, inserted into the end of the shank or stem of malleable metal, such as soft steel, the metal of said shank or stem around said tungsten tip or insert being swaged or forcibly compressed into permanent frictional holding engagement with said tungstenic insert.

The shank or body portion of the stylus may be swaged or compressed tightly around the tungsten tip or insert in any suitable manner, but in order that one way of making or constructing this stylus may be disclosed in this application, the steps of one process of making the same is illustrated in the drawings forming a part of this application in which the same reference characters are used to designate the same parts throughout the various views.

Figure 1 is a side elevational view of a rod or wire of malleable metal, such as soft steel, tapered and slotted at one end, the same being of the size of an ordinary steel sound reproducing stylus. In actual practice, the shank or body portion is less than one-sixteenth of an inch in diameter, and is about three-fourths of an inch

long. For the sake of clearness, the drawings are made on a greatly enlarged scale throughout the various views. Fig. 2 is an end view of the shank or body portion illustrated in Fig. 1. Fig. 3 is a side elevational view of a similar but modified form of shank, the slot in the free end thereof being slightly tapered or V shaped. Fig. 4 is an end elevational view of the shank shown in Fig. 3. Fig. 5 shows the shank or body portion illustrated in Figs. 1 and 2 held in a suitable slidable carrier and positioned in alignment with a die of hard steel. Fig. 6 shows the stylus body or shank together with its carrier, moved to bring the end of the stylus shank into engagement with the die. Fig. 7 is a front view of the die showing the cupped recess therein and the small central aperture at the bottom thereof through which the tungsten wire is adapted to be threaded. Fig. 8 is a cross sectional view on the line 8—8 of Fig. 6 showing the carrier in which the body or shank of the stylus is positioned, held, and moved during the practice of the steps of this process of making the same. Fig. 9 is a view similar to Fig. 6, but in which the tungsten wire has been inserted through the die and into the slot in the free end of the shank or body portion of the stylus. Fig. 10 is an end view showing the shank in the position indicated in Fig. 9 with the tungsten wire in position. Fig. 11 shows the swaging step in which a sharp blow or succession of blows or a high pressure of any kind is imparted to the rear end

of the carrier to force the tapered end of the malleable steel wire into the bottom of the cup-shaped die, to swage the tapered end of the shank and to make it conform to the shape of the bottom of the die, to close the slots on the sides of the tungsten wire, and to force the metal on the end of the shank into gripping engagement with the tungsten wire insert. Fig. 12 indicates the manner in which the tungsten wire is cut or severed at a short distance from the tapered end of the shank. Fig. 13 shows the carrier moved back to substantially the position shown in Fig. 5 and the tungsten wire tip firmly united with the shank. Fig. 14 indicates diagrammatically the grinding and rounding off, or beveling of the free end of the tungsten insert to remove any burrs or sharp edges which might be thereon and the simultaneous reducing of the diameter of a portion of the steel shank to make it more flexible at that point. Fig. 15 is a side elevational view of the completed stylus. Fig. 16 is an end view of the same.

SOUND BOX ADJUSTMENT FOR TALKING MACHINES.—Louis K. Scotford, Chicago, Ill. Patent No. 1,251,828.

This invention relates to sound reproducing machines and particularly to the adjustment of the sound box of such a machine on the tone arm or sound conveying tube.

The principal object of the present invention is to provide an improved talking machine comprising means for adjusting the sound box and stylus to either of two operative positions, in either of which the point of the stylus is the same distance from the pivotal axis of the tone arm about which the tone arm moves as the stylus moves across the record. Another object is to provide means for adjusting the sound box in different positions on the tone arm so that the diaphragm thereof may be disposed in the proper position for either of the two types of records above mentioned, and to provide means for effecting this adjustment while maintaining the

stylus or needle and the bore of the needle holder coincident with the axis of the end of the tone arm to which the sound box and parts carried thereby are attached. Still another object is to provide a sound box and tone arm having a detachable coupling for connecting the same, whereby the sound box may be adjusted to either of two operative positions, in either of which the stylus will be coincident with the axis of the coupling by which the sound box is connected to the tone arm. A further object is to provide an improved adjustable sound box carrying a stylus which will be located at all times in a plane containing the pivotal axis of the tone arm. A further object is to provide a tone arm having a

tubular extension telescopically engaging the same and connected to the sound box, whereby the telescoping parts may be disengaged to move the sound box from one to the other of two operative positions of the same with respect to the tone arm, in either of which positions the stylus is located substantially the same distance from and in a plane containing the pivotal axis of the tone arm. A further object is to make provision whereby a single sound reproducing apparatus may be adapted for use with either of the two types of records above mentioned.

In the drawings, Figure 1 shows a side elevation of a tone arm and sound box embodying the features of the invention, the sound box being in the position required for the reproduction of sounds from a record of the vertically undulating type. Fig. 2 is a side elevation of the construction shown in Fig. 1 after the sound box has been removed to a position adapted to a reproduction of sounds from a record having grooves of the laterally undulating type. Fig. 3 is a perspective view of the telescoping parts which form the detachable coupling, by means of which the sound box is adjusted in its relation to the tone arm. Fig. 4 shows an end elevation of the sound box and the tone arm when adjusted as shown in Fig. 1, and Fig. 5 shows an end elevation of the sound box and tone arm when adjusted as shown in Fig. 2.

PHONOGRAPH.—Joseph Hunter Dickinson, Cranford, N. J., assignor to the Aeolian Co., Meriden, Conn. Patent No. 1,252,411.

The present invention relates to improvements in phonographs and particularly to an improved expression device therefor, the features and advantages of which will be apparent from the following description with the drawings:

In the latter, Figure 1 is a partial vertical sectional view through a phonograph tone arm and

horn equipped with an expression device embodying my present improvement. Figs. 2, 3 and 5 show the value of the expression device telescoped to increasing extents into the throat; Fig. 4 is the same as Fig. 3 except that the parts are shown in elevation instead of vertical section, and Fig. 6 is a top plan view looking down upon the throat and valve, a portion of the throat being shown cut away.
