

EAST OF THE ROCKIES

Harvesting in Manitoba—Sund Ad- Journal—Montreal Steam Laundry Destroyed.

Shot on Whaling Schooner—Shaken up by a Collision—Wants \$5,000 Damages.

Winnipeg, Sept. 12.—Harvesting is now nearly over, except in the very low-lying districts of Manitoba where seeding was delayed by the wet weather in the spring. Reports are coming in from the threshers, the yields being disappointing in some cases and pleasing in others. The general average for wheat is about 19 bushels per acre. In Eastern Assiniboia and the Northwest Territories the crop was never better. There will doubtless be 90 per cent. more good wheat to market at territorial points than there has ever been in the past, and the sample of wheat generally is believed to be the finest that has ever been grown there. The Manitoba & Northwestern railway will not issue any more crop reports this season. The Northern Pacific report for the week is not in- day status, that harvesting is now in progress, and that threshing will be general next week. Owing to the increased number of machines there will not be the delay of former years in marketing the crop.

The general synod of the Church of England was adjourned. The next session will be held in Ottawa. A number of delegates will go to the Pacific coast before returning east, the railway having offered reduced rates. The Manitoba cabinet met in council this morning but only business of a routine character was transacted.

Attorney-General Sifton has stated to a reporter that there is no authority for the rumor of his resignation. He leaves for Ottawa to-morrow.

J. A. Ruddle has made his last visit West on behalf of the Dominion government. He returned from British Columbia to-day, and proceeds east by to-morrow's train to become principal of the Dairy School at Kingston.

Sir Roderick Cameron, who visited the city, will erect a second monument near Seven Oaks in honor of the old employees of the Northwest Company, who lived here prior to the amalgamation with the Hudson's Bay Company.

It is rumored that serious friction exists between Lieut. Governor Patterson and his ministers.

Montreal, Sept. 12.—The extensive new building of the Montreal Steam Laundry was burned early Thursday morning. The watchman first noticed the flames and gave the alarm, but before the firemen arrived the place was a roaring furnace. Everything was lost and the valuable machinery was entirely destroyed. The loss is estimated at \$200,000, with barely \$50,000 insurance.

Hamilton, Sept. 12.—R. Campbell has received word that his grandson Thomas was killed near Fort McPherson, near the Hudson's Bay, last March. He was shot while sailing on a whaling schooner.

The members of the Y. M. C. A. who went on an excursion to the beach over the new radial had a sensation not on the programme. Owing to a misunderstanding of orders, two trains came into collision and some of the occupants received serious injuries. The ladies, however, escaped with a bad shaking up and some ugly bruises.

Luther Crosswhite, of Salta Township, has begun an action for \$3000 damages for the alleged alienation of his wife's affections, against Esther Ann McMillan, Mary Crosswhite and Jos. and Hannah McPherson.

Quebec, Sept. 12.—A large number of fresh charges have been laid against City Treasurer Harvey, including allegations of embezzlement, larceny, falsifying books, etc. He was arrested the other evening, but released on bail, which, however, has been raised to \$10,000.

Toronto, Sept. 12.—The body found in Hamlet Bay was that of John Demeter, aged 17, who was drowned by the upsetting of a sail boat.

Quebec, Sept. 12.—Miss A. J. Emma Flynn, daughter of Hon. E. J. Flynn, premier of the province, is dead.

Toronto, Sept. 12.—The council of the Boys' Brigade of Canada met here on Wednesday. The annual reports showed that during the year 59 new companies had been enrolled, making a total of over 100 companies with 400 officers and 3500 boys as members. The Earl of Aberdeen was re-elected president, and the following with others were elected vice-presidents: Major Walker, of Calgary; N. W. T.; Rev. Canon Bestlands, Victoria.

Windsor, Sept. 12.—Mrs. Wilson, of Gesto, was put on trial before Judge Robertson at Sandwich on the charge of murdering her husband by administering a dose of poison. Nearly all the witnesses heard so far are like the prisoner herself, colored.

In a recent letter to the manufacturers Mr. W. F. Benjamin, editor of the Spectator, Rushford, N. Y., says: "It may be a pleasure to you to know the high esteem in which Chamberlain's medicines are held by the people of your own state, where they must be best known. An aunt of mine, who resides at Dexter, Iowa, was about to visit me a few years since, and before leaving home wrote me, asking if they were sold here, stating that if they were not she would bring a quantity with her, as she did not like to be without them." The medicines referred to are Chamberlain's Cough Remedy, famous for its cures of cold and croup; Chamberlain's Pain Balm for rheumatism, lame back, pains in the side and chest, and Chamberlain's Colic, Cholera and Diarrhoea Remedy for bowel complaints. These medicines have been in constant use in Iowa for almost a quarter of a century. The people have learned that they are articles of great worth and merit, and unequalled by any other. They are for sale here by all druggists. Langley & Henderson Bros., wholesale agents, Victoria and Vancouver.

THE WHALE ON EXHIBITION.

Interested Crowds View the Big Carcass at Tacoma.

Tacoma, Sept. 12.—The Henderson Bay whale has been placed on exhibition this morning at the Allport boat house, at the commercial wharf. It is enclosed in a high board fence and was seen by 2500 people the first day. The visitors kept coming until 9 o'clock at night. Many of those who saw the big carcass were school children, and they exhibited the greatest interest in it. The monster's huge jaws were propped open, so as to give the spectator an idea of how it appeared in its native element while sucking in tons of squid, jelly fish and herring. The back of the whale shows the effects of many an encounter it had with the various whale hunters before it was finally hooked on to be the intrepid Allport.

The entrails of the whale have been taken out and it was filled with ice and chloride of lime to preserve the huge carcass. Aside from the odor characteristic of the whale there are no disagreeable features about an inspection of it. It is thought that the body can be perfectly preserved in a week with the aid of ice and embalming fluids. After it has been exhibited at Seattle the whale will be rendered into oil.

Capt. Allger has made arrangements for placing the whale on exhibition in Seattle.

Joyful Intelligence

ANOTHER SUFFERER MADE HAPPY.

A Toronto Lady Says That Pain's Celery Compound Accomplishes All That It Claims To Do.

Those who are fortunate enough to use Pain's Celery Compound are always blessed physically and mentally. They receive what they most stand in need of—renewed health, vigorous appetite and healthy digestion.

When these blessings are restored to those who have suffered daily for long months, there is a generous flow of pity and sympathy toward others who are bound by the chains of sickness and disease, and a disposition to tell the good news that Pain's Celery Compound cures.

Mrs. Laura Garland, 676 Crawford street, Toronto, was long a sufferer from impaired digestion, causing continual pain in the head. Her appetite was poor and her general condition of health was of such a nature as to cause alarm to her friends. She wisely made use of Pain's Celery Compound, and was made well and strong, as the following extracts from her letter will show:

"Your Pain's Celery Compound has most wonderfully improved my health. Before using it my appetite was poor—almost gone; I was also weak and debilitated, and suffered severely from pain in the head.

"Pain's Celery Compound certainly does all that is claimed for it. I have recommended it to my friends, and they all speak highly of the results received from it. I wish Pain's Celery Compound the success it so richly deserves."

CATHOLIC KNIGHTS.

Meet in Convention at Kansas City—Another Catholic Edict.

Kansas City, Mo., Sept. 12.—The state convention of the Catholic Knights of America elected the following officers: President, Oscar J. Mudd, Kirkwood; 1st Vice-President, R. H. Holman, St. Louis; 2nd Vice-President, William E. Schaefer, Kansas City; 3rd Vice-President, R. M. Higgins, Hannibal, Mo.; Secretary, Anton Winsor, St. Louis; Treasurer, Jacob Newman, St. Louis; delegates to supreme council, E. Hanner of St. Louis, William Kelly of Kansas City, and Lee Farenkopf and Philip Frankenhach of St. Louis, alternate; Supreme Spiritual Adviser, Archbishop J. J. Kane, D. D., St. Louis. The next meeting will be held in St. Louis in September, 1896.

St. Louis, Sept. 12.—As in the law promulgated by the synod of Catholic priests of the St. Louis archdiocese, forbidding Catholics to sing in Protestant church choirs, many of the leading singers say they will not obey it. Henry S. Labaree, who has sung in the First Presbyterian church for fourteen years; Edward and Bernard Dierkes, who for ten years have sung in the Lindell and Methodist churches, all say they will not be bound by the law, and they do not believe any of the sinners will.

—Mr. C. Donnelly, wholesale liquor dealer, Alliston Ont., was troubled for years with itching piles. He was persuaded by James McGarvey, Alliston, liquor man, to use Chase's Ointment, which he did, was cured, has had no return of them and highly recommends this Ointment as a sovereign cure for piles.

STORY OF SHIPWRECK

Seattle and San Francisco Men Probably Drowned off the Coast of Vancouver.

The Wreck of a Launch Found on the Beach Near Cape Mudge.

A story of shipwreck and probable drowning, in which Seattle and San Francisco people are interested, reached this city last evening, says the Seattle P. I.

W. J. Becker, who furnished the information, says that about 150 miles north of Vancouver, B. C., a launch, on which were W. S. Anderson and D. McDonald, one from Seattle and the other from San Francisco, was found on the beach badly battered and full of water. In the boat were discovered several copies of the Post-Intelligencer, some books and a box filled with curiosities and shells and addressed to "Miss McFarland, Seattle."

Two days previous to the discovery of the wreck, Becker and his party, who were out cruising, had met and become slightly acquainted with its former occupants.

Becker says that there was a good tender attached to the launch, so that he has hopes that no lives were lost. Sometime between August 15 and 18 Becker and three friends started out on a cruise northward. On the journey they fell in with the launch, on which Becker says he learned that Anderson and McDonald, one from Seattle and the other San Francisco, but which man came from Seattle he did not know. The journey north was to a distance of over 150 miles from Vancouver, B. C., and each party turned back about the same time.

"They went through Seymour Narrows," said Mr. Becker, "while we took the Sirgey Narrows passage. On the night of the 20th, I think it was, they started from about five miles below Cape Mudge, near Vancouver island, to cross the gulf, a distance of twenty-five miles. In the evening it was moonlight, and a nice breeze was blowing. After they were out about two hours a storm came on, and they must have been caught in the Cape Mudge tide rips, for they have not been seen since, and two days later we found the launch washed on the beach, badly broken and full of water. There were several copies of the Post-Intelligencer, some books, and a box filled with curiosities and shells, addressed to Miss McFarland, Seattle."

"Below Cape Mudge there are four channels that come from the north, and the wind had a good sweep down the gulf. We came down the Lewis channel early in the evening and ran in out of the bow behind Reed Island. There were two steamers and two sloops anchored there. Those on board one of the sloops, which had just crossed the gulf, said they saw a small boat being beaten about, but that they were unable to render assistance on account of a rocky point. There was another boat swamped and taken ashore by the tide.

"Two of the party in Anderson's launch were good swimmers, and they had a good tender, so it is hoped that they, after leaving the launch, if they did, landed somewhere.

"I took everything that was of value from the wrecked launch, and have it with me, hoping to find some trace of the missing men. It is now over two weeks, and yet no news."

Mr. Becker is at Vancouver, B. C., now, but will go to Victoria in a few days. On his way to Tacoma he intends to stop at Seattle, and leave the things he found in the wreck. Despite a thorough search, nothing was discovered in this city last night to throw any light on the case. The directory gave the address of Miss Ada E. McFarland at 80 Columbia street. The people there said she had moved a long time ago to Terry avenue and Jefferson street. The neighbors in that section said Miss McFarland was living on Madison street near Eighth avenue. At last Miss McFarland was found at 307 Madison, and she said she did not think any of her friends had been out in a launch or yachting cruise.

Nervous

People find just the help they so much need, in Hood's Sarsaparilla. It furnishes the desired strength by purifying, vitalizing and enriching the blood, and thus builds up the nerves, tones the stomach and regulates the whole system. Read this:

"I want to praise Hood's Sarsaparilla. My health run down, and I had the grip. After that, my heart and nervous system were badly affected, so that I could not do my own work. Our physician gave me some help, but did not cure. I decided to try Hood's Sarsaparilla. Soon I could do all my own housework. I have taken

Cured

Hood's Pills with Hood's Sarsaparilla, and they have done me much good. I will not be without them. I have taken 12 bottles of Hood's Sarsaparilla, and through the blessing of God, it has cured me. I worked as hard as ever the past summer, and I am thankful to say I am well. Hood's Pills when taken with Hood's Sarsaparilla help very much." Mrs. M. M. Muzzey, Freehold, Penn.

THE EYES OF THE WORLD Are Fixed Upon South American Nervine.

Beyond Doubt the Greatest Medical Discovery of the Age.

WHEN EVERY OTHER HELPER HAS FAILED IT CURES

A Discovery, Based on Scientific Principles, that Renders Failure Impossible.

In the matter of good health temporary measures, while not by successful for the moment, can never be lasting. Those in poor health soon know better the remedy they are using simply a passing incident in their experience, tracing them up for the day, or something that is getting at the seat of the disease and is surely and permanently restoring. The eyes of the world are literally fixed on South American Nervine. They are not viewing it as a nine-days' wonder, but critical and experienced men have been studying this medicine for years, with the one result—they have found that its claim of perfect curative qualities cannot be gainsaid. The great discoverer of this medicine was possessed of the knowledge that the seat of all disease is the nerve centres, situated at the base of the brain. In this belief he had the best scientists and medical men of the world occupying exactly the same premises. Indeed, the ordinary layman recognized this principle long ago. Everyone knows that let disease or injury affect this part of the human system and death is almost certain. Injure the spinal cord, which is the medium of these nerve centers, and paralysis is sure to follow. It is the first principle. The true

CURIOUS MADAGASCAR.

A Land of Strange Animals and Dwarf Races of Men.

The National Museum has just received a collection of lemurs from Dr. W. E. Abbott, who is employed in exploring Madagascar, the great island newly annexed by France...

Even more monkey-like are the Beos, who occupy a densely wooded country among the hills of Bematara. They jump from tree to tree just like monkeys, and are not easily followed...

There is plenty of room for exploration and fresh discovery in Madagascar, which is the third largest island in the world. It is nearly four times the size of England and Wales...

One of the most remarkable species is called the "specter," because it is pure white and in going about at night has a striking and ghost-like appearance. Other kinds are black, with bands of yellow and red...

It is thought that the lemurs may have originated on the American continent and spread westward to Asia over a land route which has since disappeared. That is only a speculative theory...

The lemurs wandered about in flocks. By means of their strong hind legs they are able to leap from tree to tree distances of ten feet or more, so that they look as if they were flying. Occasionally they betake themselves to the ground, walking for short spaces erect and waving their arms over their heads in such a way as to present a remarkable effect...

Recent discoveries of fossils prove that lemurs of much greater size formerly inhabited Madagascar. Some of them attained a length of four or five feet. One important reason why these curious animals survived and flourished was that there are almost no large carnivorous beasts on the island...

At night the woods of Madagascar are vocal with the wailing cries of the lemurs, which sound like the lamentations of human beings in distress. These creatures have heads more fox-like than monkey-like, with sharp snuzzles and large expressive eyes. The smallest species of lemur is about the size of a big rat. Another kind has white whiskers, and yet another is provided with a bushy tail, which in repose is usually curled around the animal's neck like a comforter.

A very strange animal related to the lemurs and likewise peculiar to Madagascar, is the aye-aye. It feeds on wood-boring grubs that tunnel into the bark of trees. The beast cuts away the outer bark with its chisel-like teeth, and, as the worm retreats to the end of its hole, peeks after it with a finger.

This finger is a remarkable organ, evidently provided by nature for this purpose, being abnormally long and armed with a hook-shaped claw for dragging out the grub. The aye-aye has large eyes for seeing at night, and widely-expanded ears to catch the faint sound of the grub at work. The natives of Madagascar have a superstitious dread of the animal, and believe that a person who kills one will die within a year. This notion, together with the creature's nocturnal habits, makes it very difficult to secure a specimen.

Madagascar was never seen by Europeans until within the last 400 years, though it was well known to Arab traders at least 1,000 years ago. Presumably they saw there some of the eggs of the Aepyornis, a gigantic fowl which at that time doubtless still survived, and brought back the accounts which have been embodied in the fables of the Roc. The Venetian traveller, Marco Polo, speaks of Madagascar, though he never visited the island, and refers to the Roc incidentally. It is now known that there was quite an extensive family of Rocs, some of which were tall as an ostrich, while others were only the size of a turkey. Certainly the Aepyornis-Maximus laid the biggest of all known eggs—equaling six ostrich eggs or 148 hens' eggs. One of them brought to France in 1851 held two gallons; it was 4 inches in circumference. Science knew nothing of the Roc until certain Malagasy natives came to Mauritius and brought with them huge eggs.

THE KIDNEYS AND LIVER

THEIR DERANGEMENT THE SOURCE OF MUCH SUFFERING.

A Great Sufferer for Thirty Years Tell How He Obtained a Cure—His Advice Should be Followed by Others Similarly Afflicted.

From the Caledonia, N. S., Gold Hunter. Mr. George Uhlman, a well known farmer living near New Elm, is loud in his praise of the benefits he received from the use of Dr. Williams' Pink Pills. Recently while visiting his daughter in Hemford, he was interviewed by a reporter and to the scribe's satisfaction, "Well, Mr. Uhlman, you are looking ten years younger than you did two years ago," he promptly replied. "Yes, and I am feeling that many years younger. I am now in my 64th year and am feeling better than I did when I was 34. It is pretty generally known hereabouts that I suffered intensely for upwards of thirty years from kidney and liver trouble, during which time I was treated by different doctors, and I can hardly tell how many different kinds of patent medicines I used, but can say 'blessings' of it, but I got very little relief from them. Eventually I have found a cure and one which I

In impure or watery blood, or a shattered condition of the nerves is a long one, but in every case, Dr. Williams' Pink Pills will restore health and strength if given a fair trial. The genuine Pink Pills are sold only in boxes, bearing the full trade mark, "Dr. Williams' Pink Pills for Pale People." Protect yourself from imposition by refusing any pill that does not bear the registered trade mark around the box.

SUICIDES IN GREAT BRITAIN.

The increase of suicides is again attracting serious public attention in this country. The distinct falling off in the amount of violent crime during recent years has been made a subject of national congratulation for some time. When this is contrasted with the growth of suicidal mania far greater than the increase in population will account for, there is presented a mystery which nobody has yet been able to fathom. The official returns of cases of self-murder in the United Kingdom during the last three years have just been published. The number of persons who committed suicide in 1892, and who, so the coroners' juries certified, were insane, was 2,472. For 1893 the number was 2,704. The increase in the three years in England was more than 11 per cent; in Ireland it was 15 per cent. The verdict of insanity is returned in such cases almost without exception, but it means no more than that the mind was deranged. It is the survival of an old cus-

WHY SUFFER WITH PILES?

Dr. Chase's Ointment Will Cure Them at Cost of but 50 Cents.

Piles, scrofula, eczematous eruptions, scald head, salt rheum and all other annoying and painful skin diseases can be easily cured by Dr. Chase's Ointment. "I had protruding piles for ten years," writes H. H. Sutherland, commercial traveller of Truro, N. S.; "I tried many remedies and had doctors operate. It was no use. Was completely laid up at times. Chase's Ointment was recommended to me by Mr. Brennan, of the Summerside, P. E. I. Journal. I tried it and one box completely cured me." Mr. Statia, the editor of the Streetsville, Ont., Review, gives this unsolicited testimonial under date of Nov. 6, 1895: "Half a box of Chase's Ointment cured my daughter of eczema. That was six months ago and there has been no reappearance of the disease." T. Wallace, blacksmith, of Iroquois, Ont., was troubled with blind itching piles for twenty years. "I tried every remedy that came out in vogue," he writes, "until I tried Dr. Chase's Ointment. It was a Godsend. One box cured me." All dealers and Edmondson, Bates & Co., manufacturers, Toronto. Price 50c. Lard and turpentine are every mother's household remedy for coughs, colds

spread out at the extreme ends, as this keeps the joints in place and makes a strong and attractive foot. As to the shape of stockings, the single digital or one-toe stocking is the best.

Send it to His Mother in Germany. Mr. Jacob Eshensen, who is in the employ of the Chicago Lumber Co., at Des Moines, Iowa, says: "I have just sent some medicine back to my mother in the old country, that I know from personal use to be the best medicine in the world for rheumatism, having used it in my family for several years. It is called Chamberlain's Pain Balm. It always does the work." 75-cent bottles for sale by all druggists. Langley & Henderson Bros., wholesale agents, Victoria and Vancouver.

The Tumbler—Why do you want to give up the circus business? The Animal Trainer—Why, those beasts saw my wife pull me by the hair the other day and since then they have no respect for me.

CARTER'S LITTLE LIVER PILLS. A pointing hand icon.

CURE SICK HEAD

Headache, yet CARTER'S LITTLE LIVER PILLS are equally valuable in Constipation, curing and preventing this annoying condition, which they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cure.

ACHE

is the cause of so many ills that here is where we make our great head. Our pills cure it while others do not. CARTER'S LITTLE LIVER PILLS are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not grip or purge, but by their gentle action purge all who use them. In vials of 25 cents; five for sale. Sold everywhere, or sent by mail. CARTER MEDICINE CO., NEW YORK. Small Pill. Small Dose. Small Price.

JUST "SOMETHING TO GO ON WITH." Madame Premier—Nonsense! You'll get nothing but a little snack of biscuits and milk just now. It's five hours yet till dinner time!

shells to serve as receptacles. Marco Polo saw some huge "quills" represented to have been plucked from the Roc. They were 20 to 30 feet long. But it is now believed that these were in reality not quills at all, but midribs of a kind of palm. Crocodiles swarm in every river and lake of Madagascar. They are man-eaters, and the natives have a superstitious dread of them. Their eggs, about as large as a turkey's, are used for food to some extent. The giant tortoises formerly numerous on the island have been rendered nearly extinct, and are now found only on the small uninhabited Aldabra Isles to the north. Some of them are six feet long, weigh 1,000 pounds, and can carry a ton. There are many brilliantly-colored spiders in Madagascar. Some of them are big enough to cover a dining-table and spin immense geometrical webs across streams and roads which are anchored by cords so strong that an effort is required to break them. One species, whose bite is said to be fatal, is almost globular in shape, about the size of a small marble, and glossy black, with a red spot on the abdomen. It does not hesitate to attack a human being. Some unhappy persons who suffer from scrofulous and syphilitic sores—see Carter's Little Liver Pills, which are made especially for weak, sleepless, syphilitic sufferers. Price 25 cents.

believe is permanent, and if you are interested I am willing to tell you what it has done for me. While having a very bad spell and suffering intensely from the effects of liver and kidney troubles, I noticed an advertisement of Dr. Williams' Pink Pills and thought I would try them. After beginning their use I found a gradual improvement, and having suffered as long and as severely as I did, you may be sure that I determined to continue the treatment. Very steadily the improvement went on, and after a few months' treatment with the Pink Pills I felt that the last vestige of my trouble had disappeared. New blood seemed to course through my veins, and the organs which for so many years imperfectly performed their functions now work like a charm and give me not the slightest trouble. In addition to this my weight has materially increased, and I can stand a day's work on my farm better than I have been able to do in years before. Of course this may sound enthusiastic, but I know what Pink Pills have done for me and I naturally feel grateful, and I never lose an opportunity to say a good word for this great medicine. The secret of health, strength and activity is pure blood, and sound nerves. Dr. Williams' Pink Pills make pure, rich, red blood, and strengthen the nerves, and this is the secret of the marvellous success with which this medicine has met—the reason why it cures when other medicines fail. The list of diseases having their origin

tom which was originated, by coroners' juries in days when such a verdict made a difference in the treatment of the remains of the victim and in the disposition of his property. Now it is regarded as a concession to the feelings of surviving friends and relatives. In ninety-nine cases out of a hundred the act of self destruction is the only existence of unsound mind on the part of the deceased. The mortality returns of all the nations of Europe, more especially in northern countries, show a steady increase in the tendency of suicide. In England the increase has been uninterrupted for more than forty years. Occasionally the advances are sudden, as during times of great excitement and commercial disasters such as in 1890 and 1897. But there is never a return to the old proportion. A Million Cold Dollars. Would not bring happiness to the person suffering with dyspepsia, but Hood's Sarsaparilla has cured many thousands of cases of this disease. It tones the stomach, regulates the bowels and puts all the machinery of the system in good working order. It creates a good appetite and gives health, strength and happiness. HOOD'S PILLS act harmoniously with Hood's Sarsaparilla. Cure all liver ills. 25 cents. Japanese rugs, matting, etc., in abundance at Weller Bros.

throat and lung affections. Dr. Chase has disguised the taste and made the remedy pleasant to take. Large bottle only 25c. ABOUT SHOES. Never wear a shoe that pinches the heel, says Health Culture. Never wear a boot or shoe so large in the heel that the foot is not kept in place. Never wear a shoe or boot that has creases in any part of the sole to drop any joint or bearing below the level. Never wear a shoe with the sole turning up very much at the toes, as this causes the cords on the upper part of the foot to contract. Never wear a shoe that presses up into the hollow of the foot. Never wear the top of the boots tight, as it interferes with the action of the calf muscles, making one walk lurchy and spoils the shape of the ankle. Never wear one pair of shoes all the time unless obliged to do so. Two pairs of boots, worn a day at a time alternately, give much more service and are more healthful. Never wear leather sole flings to stand upon; white cotton drilling or linen is much better and more healthful. Never wear a short stocking, or one which, after being washed, is not at least a half inch longer than the foot. Bear in mind that stockings shrink. Be sure that they will allow four toes to

WHITE STAR BAKING POWDER PURE & WHOLESOME

...ALL GOES... "Merry as a Marriage Bell" IN HOMES WHERE White Star Baking Powder IS USED.

For the "Blue Devils" of indigestion cannot resist the pure and wholesome baking which so uniformly results from the use of this matchless powder.

WHITE STAR BAKING POWDER THE LARGEST DEMAND IN CANADA

OTTAWA ROBBERY.

In time to come the people of Canada may glean further knowledge of the methods by which their property was exploited by the Conservative government for the benefit of political friends. A case in point is the Langevin block at Ottawa...

that men of ordinary intelligence could be guilty of such absurd blundering. They could thus be defrauded of the money entrusted to them without being conscious of the fact. They did not allow the contractor to secure all the advantages disclosed on account of a natural inclination to blunder. That they had a knowledge of what they were doing, and received inducements to permit the people to be defrauded, must be the conclusion of every reasonable Canadian irrespective of party leanings.

THE FALL FAIRS. Following are the dates of the fall exhibitions, so far as announced, in order of time: Wellington, Sept. 10th. Nanaimo, Sept. 18th and 19th. Surrey, at Cloverdale, Sept. 23rd. Langley-Glenwood, Sept. 25th. Kelowna, Agricultural and Trades Association of Okanagan Mission (new association), Sept. 25th. Duncan, Sept. 26th. Chilliwack, Sept. 30th, Oct. 1st and 2nd. Comox, Oct. 1st. Ashcroft, Oct. 1st and 2nd. Delta, Oct. 3rd. New Westminster, Oct. 6th, 7th, 8th, and 9th. Kamloops, Oct. 7th, 8th, and 9th. Saanich, Oct. 9th and 10th. Richmond, Oct. 13th. Vernon, Oct. 14th and 15th.

A BALLOON ADVENTURE. The Berlin Yossische Zeitung publishes further particulars of the wreck of the balloon Jupiter, which was recently reported, supplied by Mr. Bolteux, one of the aeronauts. He says: "When we had risen 500 yards or more we found ourselves in such thick clouds that we could distinguish nothing. Suddenly the Jupiter lay on one side, and the car leaped terribly. At the same time we were lashed by large hailstones and heavy rain. We were driven forward with bewildering speed. In our fright we threw out everything that our hands came across. The balloon sprang upwards like an arrow and soon passed through the clouds. We were under a clear sky, in the light of the setting sun. Gradually it grew colder and colder, and our wet clothes were frozen stiff. Crepillon fell fainting to the bottom of the boat, and we others were not much better off. We were all bleeding from the head had wounded us. As I looked out I saw a large black cloud moving from the southwest to northeast. But we still rose. Then I saw nothing more. The blood streamed from my nose and ears. My hands were frozen as hard as a board. In a few minutes we had risen to a height of nearly five thousand yards. Then we began to sink, at first slowly, then rapidly. All at once we were again in complete darkness. We were in the midst of thunderclouds. Again, amid hail and rain, the wind drove the Jupiter on at a speed of ninety miles an hour. We were blinded by the hail and could scarcely breathe. But I did not lose hope of reaching the earth safely. The hail and rain now began to be mixed with leaves and particles of earth. The car was violently shaken, and we fell against each other, and had to hold on to the ropes. Then we began to drag along the ground. The balloon suddenly rose again, I let my rope go and was dashed to the ground. Legend believed that I had voluntarily jumped out. He jumped after me, and fell near me with a broken leg. Thus lightened of weight the balloon rose more rapidly. Rushing through the tree-tops it went on about six miles in the direction of Greys. As it hung on the top of a tree Fonceur tried to hang on to a rope, but was thrown violently to the earth. A woman saw the balloon hanging in the trees and sent the people at her inn to our assistance. Fonceur was found covered with mud and ice, his face all torn. He still breathed. When his head was raised with the intention of giving him stimulants he was seized with a convulsion and soon expired. As he was carried away a weak voice was heard, calling from the car for help. Two ladders were brought and tied together, and a gentleman climbed up to assist Crepillon. It took an hour to get him down. On reaching the ground he fainted away. He was cold as ice, and only regained his senses after continued friction. In a few hours he was out of danger."

RECENTLY DISCOVERED PAPYRI How are you to find your papyri? Mr. D. G. Hogarth says by digging for them, accompanied by Mr. Grenfell, the proper concession having been granted, two mounds at Fayum have been overhauled, and with excellent results, and so far there has been but a preliminary scratching. It is not so much the Egyptian papyri the gentlemen are after (all are fish for their net), but it is the Greek ones. You would not be likely to find a Sapphic ode in an old Egyptian tomb, but it would have been the verses of her dear Sappho should be buried with her. There is no reason, then, why some of the lost treasures of ancient literature should not come to light, and this may hold good particularly as to Greek, because after the Ptolemys came, Egypt was filled with well-to-do Greeks. American contributors to the Egyptian Exploration Fund will be interested in the exhibition now being held in London, made up of the papyri and antiquities found during the last season. Here are banking accounts, debts and credits, and what may be visiting cards. Then there is a fragment of a lost Greek tragedy, which is believed to have been written even before 250 B. C. As to Homer, there are many fragments; and in one of 200 B. C. there are variations from the accepted text. One fragment has 700 lines of Books XIII and XIV of the Iliad. Then, too, there are unknown fragments of Demosthenes. As to articles of domestic use, found in houses in Karanis and Bachiya, there are many, as locks, combs, scales, dice (one loaded), glass, and last, not least, what can be nothing else but a thimble, and made of alabaster. Besides that there are portraits on wood of the Greco-Egyptian period, some with the pigments still bright to-day; and the stock of silver in this world has been increased by several thousands of coins from the Roman mint at Alexandria.—Harper's Weekly.

GREENS FOR AUTUMN. Diamond Dyes Give the Richest Colors. The manufacturers of the justly popular Diamond Dyes constantly avail themselves of every improvement in the manufacture of dye-stuffs, thus giving to home-dyers all over the world each and every advantage possessed by the largest manufacturers on earth. Have you tried the Diamond Dye Fast Dark Green, Diamond Dye Fast Olive Green, and Diamond Dye Fast Bottle Green? For the dyeing of wools and silk goods, these greens are certainly triumphs of science. For the coming autumn, the above greens with their varied shades—Hunter's Green, Myrtle Green, Bronze Green, Russian Green and Old Green—will be all the rage for ladies' suits and dresses. Use only the "Diamond," and you will get the best results and colors. "How are you, old chap? Are you keeping strong?" "No, only just managing to keep out of my grave."

A NEGLECTED AFRICAN ISLAND.

Napoleon effectually prevented St. Helena from ever sinking into obscurity. Nevertheless, for some years past the island has been getting deeper and deeper into financial straits, while the population has been steadily diminishing. St. Helena is only some 1000 miles from Cape Town, and yet the island is comparatively unknown to South African colonists, as the outward and homeward bound steamers to and from Cape Town only call there once in three weeks and make a very brief stoppage. And yet this historic island is well worthy of a visit, not only from its associations with the great Corsican, but also because it possesses probably the finest climate in the world. A constant southeasterly trade wind, straight from the pole, blows over the island, and sweeps away those germs of disease which lie latent in less favored spots. As a consequence, the longevity of the inhabitants is probably much greater than in any other portion of the globe. In spite of all this, and proximity of the island to the cape, hardly a solitary African trader finds his way there from one year's end to the other. So much in reference to St. Helena as a health resort. Now let me briefly refer to a matter that is of more vital importance to the strategical advantage of the island. It has been fully realized by both naval and military experts, and the Royal Commission which was presided over by the late Lord Carnarvon recommended that it should be strongly fortified and constituted an important naval and coaling station for the vessels of the squadron within the Cape command. These recommendations have, however, not been carried into effect. Certainly something was done to improve the fortifications some ten or twelve years ago, but the guns are now of an obsolete type, and the diminutive garrison maintained in the island is utterly inadequate to defend it. Moreover, though St. Helena is supposed to be a naval coaling station, the admiralty maintain no coal supply there, the coal for the ships on the Cape and West Coast of Africa stations being kept at Ascension, which does not possess even a solitary gun, but is a cinder heap upon which many thousands are annually washed. The defenceless condition of St. Helena is a matter that intimately concerns the South African colonies, and should engage their attention. The island is utterly unable to help itself. The opening of the Suez Canal ruined its prosperity, and ever since it has been drifting nearer and nearer to bankruptcy. The greater portion of its adult male population has migrated to the Cape, and the whole revenue of the island is now only some £9000. There are only half-a-dozen officials, and the governor fills innumerable other offices, including that of chief (and only) justice. It is deplorable that Great Britain should allow one of its possessions to sink into such a condition of decrepitude, and especially an island which, lying in the direct route to the Cape, must ever be of considerable importance.—African Critic.

RECENTLY DISCOVERED PAPYRI (Continued) "Is your new maid satisfactory, Mrs. Osmond?" "I'm delighted with her. She is so homely that book agents never attempt to stop inside the front door."

SUNLIGHT SOAP. PICTURES WRAPPERS. A pretty colored picture for every 12 "Sunlight" or every 6 "Lifebuoy" Soap wrappers. These pictures are well worth getting. ADDRESS: LEVER BROS., Ltd. 25, Abchurch Lane, London, E.C. 4. C. B. KING, Victoria, Agent for British Columbia.

A BY-LAW.

To Authorize the Sale of Lands Within the City of Victoria Upon Which Taxes Have Been Due and in Arrear for Two Years.

Whereas it is expedient that all lands or improvements of real property within the limits of the Corporation of the City of Victoria, upon which municipal taxes have been due and in arrear for two years, shall be sold, and the proceeds applied to the reduction of such taxes: Be it therefore enacted by the Municipal Council of the Corporation of the City of Victoria as follows: 1. The Collector of the Municipal Council of the Corporation of the City of Victoria is hereby authorized and directed whenever taxes on any land or improvements or real property have been due for two years preceding the current year, to submit to the Mayor of the City of Victoria a list (in duplicate) of all the lands or improvements or real property liable under the provisions of this by-law, to be sold for taxes, with the amount of arrears against each lot set opposite to the same, and the Mayor shall authenticate such list by affixing thereto the seal of the Corporation and his signature, and one of such lists shall be deposited with the Clerk of the Corporation, and the other shall be returned to the Collector with a warrant thereto annexed, under the hand of the Mayor and the seal of the Corporation, commanding him to levy upon the land or improvements or real property for the arrears due thereon with his costs. 2. It shall not be the duty of the Collector to make inquiry before effecting a sale of lands or improvements or real property for taxes, as to whether or not there is any distress upon the land, nor shall he be bound to inquire into or form any opinion of the value of the land or improvements or real property. 3. The Collector shall prepare a copy of the list of lands or improvements or real property to be sold, and shall include therein, in a separate column, a statement of the proportion of costs chargeable on each lot for advertising and for the commission authorized by this by-law to be paid to him, and shall cause a copy of such list to be printed for a period of one month preceding the date of sale intended in some newspaper published in the City of Victoria. 4. The advertisement shall contain a notification that unless the arrears and costs are sooner paid he will proceed to sell the lands or improvements or real property for the taxes, on a day, a time, and at a place named in the advertisement. 5. The Collector shall, at least two months before the time of sale, also deliver to or deposit in the postoffice to the address of the owner of such property which is to be sold for taxes as aforesaid, or to the agent of such owner, a notice in writing of the amount of taxes due, and that the property is to be sold for arrears as aforesaid, and in case the address of the owner or agent is unknown, a notice to the same effect shall be posted upon the land intended to be sold, and also, at least two months before the time of sale, post a notice similar to the above advertisement in some convenient and public place, that is to say, at the Council Chambers, Victoria, and in the Post Office Building, Victoria. 6. The day of sale shall be the thirty-third day after the first publication in a newspaper of such list, exclusive of the day of such publication, except in case the said thirty-third day shall fall on a Sunday or holiday, in which case such sale shall take place on the following day at the Council Chambers, in the City of Victoria, and shall begin at twelve o'clock noon. 7. If at any time appointed for the sale of the lands or improvements or real property no bidders appear, the Collector may adjourn the sale from time to time. 8. If the taxes have not been previously collected, or if no one appears to pay the same at the time and place appointed for the sale, the Collector shall sell at public auction so much of the land or improvements or real property as may be sufficient to discharge the taxes and all lawful charges incurred in and about the sale and the collection of the taxes, selling in preference such part as he may consider the best for the owner to sell first, and in offering such lands or improvements or real property for sale it shall not be necessary to describe particularly the portion of the lot or section which shall be sold, but it will be sufficient to say that he will sell so much of the lot or section as shall be necessary to secure the payment of the taxes due, and the amount of taxes stated in the advertisement shall in all cases be prima facie evidence of the current amount due. 9. If the Collector fails at such sale to sell such land or improvements or real property for the full amount of arrears of the taxes due, he shall at such sale adjourn the same until a day he publicly names by him, not earlier than one week nor later than three months thereafter, at which adjourned sale he shall give notice by advertisement in the newspaper in which the original notice was advertised, and on such day he shall sell such lands or improvements or real property for any sum he can realize: Provided that in event of the price offered for any lot or section at such adjourned sale being less than the amount of arrears of taxes due in respect of such lot or section, the Collector shall have power, if he thinks so to do, to purchase such lot or section in the name of and on behalf of the said Corporation. 10. If the purchaser of any property or parcel of land fails immediately to pay the Collector the amount of the purchase money, the Collector shall forthwith again put up the property for sale. 11. Immediately after every sale the Collector shall return a list of the arrears satisfied by such sale to the Clerk of the Corporation, and shall at the same time pay in the proceeds to the Treasurer of the said Corporation. 12. The Collector shall be entitled to five per centum commission upon the sums collected by him as aforesaid. 13. This by-law may be cited for all purposes as "The Victoria Real Property Tax Sale By-law, 1896." Passed the Municipal Council the 20th day of June, A.D. 1896. Recollected, adopted, and finally passed the Council this 5th day of July, A.D. 1896. (L.S.) ROBERT BRAVEN, Mayor. WILLIAM J. DOWLER, C. M. C.

READ THE PROVINCE. "A Province I will give you."—ART. & CLERO. OFFICES AT VICTORIA AND VANCOUVER, B.C. Board of Public School Trustees, OF VICTORIA, B. C. Notice is hereby given that all pupils attending the High School of the age of sixteen (16) years or over will be required to produce to the Principal of the High School a permit signed by the Secretary of the Board. The above permit is obtainable at the office of the Secretary of the Board, 28 Fort Street, Victoria, B. C. Notice is also given that from and after Thursday, the 25th inst., no new pupils will be admitted during the present term in the primary or 8th Grade of the City Public Schools. In accordance with Article 2, of the Rules and Regulations for the Government of Public Schools in British Columbia, the Public Schools of this city will resume on Monday, the 15th August, 1896, at 9 A.M. R. WILLIAMS, Secretary. MR. GEO. SHEDDEN, Agent for Victoria and Vancouver B.C.

British Columbia.

NEW WESTMINSTER.

Application was made to Mr. Justice Hole by Mr. C. B. Macneil, to admit Hodgson, charged with the murder of a colored man named Stark at Nanaimo this morning in order to communicate with the attorney-general's office.

R. Law, late assistant principal of the High School in this city, leaves in a few days for Honolulu, where he intends to live in future. He goes as agent for a number of business houses in New Westminster and Vancouver, and expects to build up a thriving business in a short time.

VANCOUVER.

The police received information Thursday night of the suicide of Mrs. Rebecca Smythe, which occurred somewhat romantic circumstances, religious enthusiasm being the only cause that can be assigned for the unfortunate act of deceased.

The news has been received from Alberni of the death of Samuel Coldwell, shipmaker, on Monday afternoon. Coldwell was about 20 years of age and was a very popular young man, having been in Alberni over a year.

NANAIMO.

The news has been received from Alberni of the death of Samuel Coldwell, shipmaker, on Monday afternoon. Coldwell was about 20 years of age and was a very popular young man, having been in Alberni over a year.

ROSLANDER.

Mr. P. W. McLean has been out prospecting and staked a very fine claim on Lake Mountain, two or three miles to the southeast of town.

VERNON.

Tomatoes this year are in splendid crop, the long continued season of hot and dry weather having been particularly favorable for their growth.

Mr. Frank Wolfenden, of the Armstrong Flour Mills, was in town on Tuesday, and reports that wheat is coming into the mill in such quantities as to make it a matter of difficulty to handle it.

In response to a petition forwarded by the residents of the west side of Okanagan lake, came a reply last week from the department of education granting a new school for that district between Short's creek and Morden's landing.

Mr. S. Rae left on Tuesday for Sandon in charge of a carload of vegetables sent by the Shippers' Union of Kelowna. Mr. Rae has just recently returned from Calgary, where he disposed of a carload of Okanagan fruit and expects to sell several others this fall.

MIDWAY.

Jim Dale returned on Friday from a three weeks' prospecting trip on the west fork of the Kettle river. He located one claim, the Carmel, about 60 miles from Midway. The ore is quartz well mineralized, carrying galena, zinc blende and iron pyrites. The vein is about four feet wide.

Upon good authority it is reported that a very rich chate of ore has been discovered upon the volcanic claim in north fork of the Kettle river, owned by the new Olive Mining Company. The ore has only just been broken into, so that the size of the ore body has not yet been ascertained, but the character of the ore is everything that could be desired, as besides its gold value, it free, is impregnated with native copper.

On Monday last ten men started development on the Mother Lode in Deadwood. A bond was taken a short time ago on the Mother Lode by Mr. John Weir of New York, who, together with his associates, are at the present time developing two other of the principal claims in the Boundary creek district, viz., the Big Copper and the No. 7. The Mother Lode was located in the spring of 1891 by Mr. W. McCormick and others, and has always been considered a property that would upon development prove itself to be of enormous extent and richness.

The strength of the whole is in the healthfulness of the Part.

Its great advantage are the thoroughness with which it accomplishes the work, its simplicity, and the ease with which it is used, but we need not waste words, tell us its usefulness.

with some purpose. His glowing accounts of the Iron Horse property has induced a syndicate of business men in this city to send out an expert to examine the mine, and if his report is favorable the property will be purchased at the handsome figure of \$150,000.

The Josie is working a large force, and the mine presents a most excellent appearance. The ore chutes in the east tunnel contain about seven feet wide, a solid mass of iron and copper sulphides, without a particle of waste or gangue matter. Ore is taken from this drift alone faster than the freighters are able to take it away.

The constant rattle of ore into the cars of the Columbia & Western railway from the spacious ore bins of the War Eagle mine tells most plainly that this well known dividend payer is holding up its end in magnificent style.

The wonderful advance of the Nickel Plate from the uncertain class to the rank of a dividend payer is even astonishing to its owners. The raise from the east drift broke into a fine body of ore yesterday, while the chute in No. 2 shaft has widened out very considerably.

The Center Star is in fine shape, and a new ore pile is just being made for the high grade ore, which comes from the abandoned the War Eagle vein. This vein was cut into by the north cross-cut during the past week.

If you once try Carter's Little Liver Pills for sick headache, biliousness or constipation, you will never be without them. They are purely vegetable, small, and easy to take. Don't forget this.

She-Is this dress a fit? He-It couldn't be much more of a fit without being a convulsion.
