

the so-called practical difficulty in education is only a Parliamentary difficulty; that it has little concern with actual teaching; that when "you come within the school"—to use Mr Forster's phrase—you forget all about it. And certainly at first it does seem absurd that the ablest men in the country should debate at length and with eagerness, and occupy the time of Parliament for whole nights, about the religious difficulties of poor "urchins" of ten years old, who do not know the most elementary information, and cannot for the most part have arrived at the stage where doubt and thought begin. But extreme absurdity is rare in the world. There is commonly some good reason for wise men acting as they do, though on the surface that reason may not be apparent. The religious difficulty is a very practical one really, and Mr Forster later in his speech showed very clearly how it was so. He gave many instances of parents who would not send their children to a school where no religion was taught. They did not—at least often did not—know or care what that religion

The elaborate care therefore which is being spent on this preliminary is well spent; the instinct of the English people as to matters familiar to them tells them that unless some fair settlement of this religious controversy be arrived at all else will be in vain, for the scheme agreed to, however excellent otherwise, will never work in practice. But if we are to deal with it, there are only three ways of so doing. First, we might—and this was the ancient plan—select some one religion which we might endow and teach exclusively. Old churches without number were so created, some of which still exist. But in modern times it is seen that the State cannot effectually choose out of a number of competing creeds and churches which is the real truth and which is not. There could not be a debate in the whole House on that subject, neither could you go into committee upon it. Or again, admitting that it is impossible for the State to choose the one true creed, it may aid and endow all creeds. And this is what in educational matters is now called denominationalism. Each sect asks and receives the aid of the Government in teaching its tenets, No doubt a refinement has been invented that we do not pay denominational schools for the religion they teach, but for the secular knowledge which they also teach. But if a man feeds a sheep, whatever he may

# THE ECONOMIST.

[June 25, 1870.

say, he aids in producing both wool and mutton. The denominational school could not live unless the Government paid it, and up to this (though now it is proposed to reform that matter) the State has inspected the religious teaching as well as the secular, and taken care to have inspectors who were conversant with each religion, and who were acceptable to those who believed it. In reality the Government pay enables each denomination to teach its peculiar tenets, and if a regular payment of large amount year by year with that effect does not amount to an endowment, it is difficult to say what would amount to it. And the evils of such a system are very serious. It commits the whole ration to the opinion of Mr Forster's poor parents, that you must, above all things, teach some religion, bat that in comparison it hardly matters of what sort that religion is. It tends to imply that the State thinks that all religions are of equal value, and one not much truer than another, as if, in Gibbon's phrase, they were all "useful" in politics, though in philosophy none were true. If indeed these religions only differed in minor particulars, and if they gave their respective scholars much the same teaching, denominationalism, though still not good in theory, might not have much bad effect in practice. But in fact the differences between the sects endowed are irreconcileable. If on the right side of a street the State pays a strong Protestant teacher to teach that Roman Catholics will perish everlastingly, and on the left side it pays a Roman Catholic teacher to say that Protestants perish everlastingly, can the effect of the whole teaching on the aggregate State religion be beneficial ? Surely the impression, if anyone thinks on the subject, must be that the State thinks neither of these religious teachers is much to be attended to, or it would not hire them both to teach and hire them equally. The popular effect of endowing all sects is to depreciate them all equally, and to make out that as they are inconsistent, teaching so often the contrary of one another, in the eye of Government the teaching of no one among them is of substantial value.

And it must be observed that if this new Bill passes, denominationalism will be more absurd still. By it, which is quite new, a secular school can be established, and there is no provision in it that secularists shall not teach their main doctrine that there is no true religion in the world at all, and that what profess to be such are pure and pernicious errors. Government will then be endowing all religious sects to teach each its own doctrine, on the ground that some religion is wanted (no matter which), and an unreligious sect to teach "that no religion can be wanted, for that there is no such thing whatever."

It will be said, if denominationalism is so great an evil in education, how did it come to exist i why did sensible, welljudging men establish it i The answer is, that they only established it because they were obliged to do so, if they were to do anything for education at all. On the one hand no ordinary State education scheme was possible. Even Sir Robert Peel's Government, the only very strong Government of those times, the only Government in strength at all like the present, had tried to found a Government system and had failed. No direct State teaching—no school board—was then possible. On the other hand there were many sects who wanted to teach, each no doubt its own creed, but all secular knowledge. They came to the State and asked for its help, and statesmen chose to cooperate with them because they were in earnest, and would do much, while no one else could or would do anything. Denominationalism was accepted as a necessity : it was not selected as an advantage.

But if the endowment in education of one sole true sect is impossible, and if the endowment of all sects is pernicious, what are the merits and demerits of the third plan of the State ? endowing no sect, and confining itself to secular instruction only. And on this point there is fortunately a recent example to teach us. About thirty years ago the London University was founded on this principle. It was said to be irreligious—to be opposed to the principle that "Christianity is part and parcel of the law of the land"—to be likely to bring a curse on the country. But nevertheless the University throve, and has been thriving from its foundation till the present time. Now it is one of the established institutions of the country; it has a new building erected for it; the Queen opens it; the leader of the Conservative party attends and approves. Surely such a precedent, so recent and so apt, should be to a certain extent considered, Purely secular education cannot now be regarded as purely

i- evil, when one of our influential and recognized Universities is ad based upon it.

It is said indeed that there is a great difference between the instruction given to young men at a University and the teaching given to poor children at a school. And of course But which way does that difference tell in this partithere is. cular matter ? Sectarian instruction at a college is likely to be at its best ; it is given by able men, addressed to competent persons, verified by books, and carefully defined by authorities. In the village school sectarian instruction is likely to be at its worst ; it is given by a half-educated man, to uneducated boys, without check, without criticism, and without remedy. A distinguished Anglican divine once drew a distinction between Romanism on paper-that is, Romanism such as it is taught from books to intellectual students; and Romanism in action -that is, the same doctrine as illiterate priests teach it to illiterate men; and he showed that the worst abuses were in. the practice but not in the books. The reasons against denominationalism for poor children are stronger than those against it for young men, for the children learn all creeds in their. most gross form, young men in their most refined form.

Again, it is said that some young children—the street: Arabs for example—will never learn any religion unless they learn it at school. They have no parents who choose toteach it to them. But is it to be hoped that an average teacher can produce much religious impression in school hourson an average street Arab? The gifts of a regular schoolmaster and the gifts of an effectual street missionary are different. A man of peculiar organisation may possess both, but it will be one case only among a thousand. If you mix the two callings, probably neither will be efficiently followed. The street Arab will learn an erroneous religion and only half his letters.

The system of secular education by the State, it should be seen, not only admi's but really aids religious teaching by religious bodies. It prepares the way; it converts the street Arab to civilisation; it teaches him order, discipline, the elements of useful information. Each sect could have a religious teaching in its own tenets, and the best would have the most effect. There would soon be efficient auxiliary schools for religion if only writing and reading were well taught by the State first.

But it will be said that all this is unpractical; that we cannot have a purely secular system if we would ; that the proposition is even more unpopular than the London University twenty years ago. And we admit that we cannot at once, have what we wish. But we can approximate. The use of knowing what we want is that we can judge accurately of any particular proposal; we can see what it obtains for us and what it fails to obtain. As to the present Bill, as respects the rate-supported schools, it establishes a mitigated denominationalism, and probably we must be con-tent with that for the present. Perhaps it will not much please anyone when it is put in practice. Each sect will dislike being restricted from using its usual means of instruction, its own formulary and catechism, and gradually the school will become more secular and religion be taught else-As to this where-where it can be taught more effectually. first kind of school, a person who hopes ultimately for a good secular State system may well support the Government proposal; but not as to the second kind-the voluntary schools. If any denominational or secular school can satisfy certain preliminary inquiries, the education department is to pay 50 per cent. of its expenses. But this is perpetuating denomina-tionalism for ever, and it ought not to be agreed to.

# THE FOREIGN LOANS OF THE WEEK.

THIS week has given ample encouragement to the promoters of foreign loans. Hardly has a Spanish loan been taken up at less than the current rate, on the mere strength of the name of the financial agents and the doubtful pledge of special securities, and a Peruvian loan of much larger amount, invited by a country almost destitute of real revenue of any kind, and under circumstances of the greatest suspicion,—than we find other Governments supplying themselves with money in our markets with almost equal facility. The State of Buenos Ayres has got a loan of a million at what is nearly seven per cent.; and Honduras, 2,000,000*l*, at what is equivalent to about 13 per cent. Our alarm at the temper of the public shown in the Spanish loan is, we think, amply justified by these new incidents. Neither of the States which come be-

fore us this week should be able to borrow without their claims being carefully scrutinised, and one of the loans is perhaps as bad as anything that can be imagined. Mischief is sure to come of this facility in lending, as the briefest investigation of the securities offered will show.

With regard to Buenos Ayres, though there is perhaps less necessity for warning than is the case with some proposals, there is at least necessity for caution. The peculiarity is that Buenos Ayres is not now an independent Republic but a province of a larger State, and that some doubt rests upon its resources. The prospectus speaks with manifest vagueness of the provincial sources of revenue, and does not furnish any account of provincial receipts and expenditure by which an investor might be guided. We have no doubt it is true, as stated, that five-sixths of the Argentine Republic's revenue from Customs comes from Buenos Ayres ; but if the Central Government has the revenue, it is no security to the creditors of the dependent State. No one, it is evident, should lend to a State within a State without knowing the constitution, and what are the nature and amount of the revenues and the limits of taxing power which the dependent State retains. There is a flaw, besides, in the character of Buenos Ayres. When it was independent it repudiated, though it afterwards did something to repair its fault by issuing bonds representing deferred in-terest. Nor is there perfect stability, such as to satisfy quiet people, in the regions of the Plate. The Paraguayan war has left severe wounds here as well as in Brazil, and the turbulence of the political factions is not entirely extinct. Those who know the country and the people and the nature of the immigration-which is one of the best signs of their future-will also know whether to lend or not; but we are speaking to people who must be without such knowledge, and will be confidently encouraged by some to risk their money without it.

Bat the Honduras loan is most significant of the temper of the public. The truth is that if people are willing to advance large sums to States like Honduras, there is no Government, however obscure, or destitute of resources, or remote from intercourse with England, which may not, if it has only the name of a Government, and has an envoy in London, borrow freely in our market. The difficulty about Honduras is that it is hard to get any certain information. It is certainly about as far as can be from the condition of a State with a tangible settled Government on which people can depend. The few facts we get in the Annuaire de l'Economie Politique are that it has a revenue of 172,0001, of which 50,0001 is from Customs and about 120,0001 from tobacco and "acajou"; that its population is 400,000, and that its imports and exports are a little over 300,0001, principally to and from England-though we have a suspicion that in the latter case the figures are those of British Honduras and not those of the native State at all. The facts such as they are would not lead one to expect that such a State would be able two years ago to incur a debt of 1,000,000/, bearing 10 per cent. interest, and an additional one now of 2,500,000/ at the same rate. The interest and drawings alone of the first loan would be very nearly equal to the whole revenue of the State, and of the two loans together they will represent a sum of nearly half-a-million, or about three times the annual revenue. Of course the interest has been and will be paid out of the capital which the lenders have advanced, but the process cannot be of very long continuance. It will be said that the lenders are really entering into a railway speculation, that what they trust to is a share in the profits of the carrying trade now monopolised by the Panama line and the Atlantic and Pacific Bailway; but the loan is also put forward as a Government loan, and lenders should know what sort of State they are trusting. But as a railway loan with the revenues of the future railway pledged, there is a good deal about it which lenders should consider. It is a good general rule that wherever it is unsafe to lend to a foreign Government, it is not very safe to invest capital in its territory. But lenders are not even investing independently of the Government. They are only helping at best to give a very poor Government, the half-civilised Government of a rude and undeveloped State, a profitable source of income, which will no more be to their advantage than the ordinary special pledges which needy Governments offer, and which are always to be jealously guarded against. For ourselves, we should doubt very much the prospects of great profit held out. The Panama line has

been very profitable, perhaps the most profitable railway that ever was constructed ; but it is not a third of the length of the proposed Honduras line, so that whatever may have been the original cost the working expenses cannot but be much less. Nor is the Panama monopoly what it was. The Atlantic and Pacific Railway has abstracted a large share of its California traffic; a Liverpool and Valparaiso line of steamers has injured its South American trade. In the prospectus of the first loan in 1867 the agents of the Honduras Government were careful to state the profits of the Panama railway, and their silence on the point now is significant. The Honduras line at best will compete for the share of an injured monopoly, in which profits of 12 per cent. can hardly be assumed as certain. And there is a prospect of more competition. It would not be easy to reckon up the endless projects for crossing the Central American isthmus by canal or railway or road, but it is not unlikely that one or more schemes will shortly be tried besides that of Honduras. Only this week it is announced that the Mexican Government is about to propose an arrangement of its foreign debt, based on the project of a road and railway across the isthmus of Tehuantepec. This scheme may of course come to nothing, but it is seriously enough promoted, there is new country to be opened up, and the ad-vantages are so equally balanced with those of Honduras or Nicaragua that the threat of competition must be formid-Sanguine people will say there is business for all, but able. there will certainly not be business of the kind which has filled the pockets of the Panama shareholders.

There are some curious contrasts besides between the original prospectus and the present one, to which attention should be given. Some things which were prominent in the first prospectus, like the profits of the Panama Railway, are comparatively slurred over in the second. A feature of both prospectuses again is the mortgage of the Honduras State domains, but while the phrase is merely used in passing in the new prospectus, the fact of a first mortgage being given upon the whole of the domains and mahogany forests of the State of Honduras, "which according to official report are " of immense value," is represented in the first prospectus as most important. It was also stated to be "araanged that "the whole of the produce of the above mortgaged State " domains and forests shall be consigned direct to London "by the Honduras Government to Messrs Bischoffsheim " and Goldschmidt, who will pay over the proceeds of " the sales towards the annual interest and sinking fund " and the construction of the remaining sections of the rail-"way." One would like to know a little what the actual " way." history of these consignments has been, and what funds have thereby been raised for the construction of the railway. It was further stated :--- "Careful estimates have satisfied the "Honduras Government that the surplus revenue of the State "domains and forests will be amply sufficient to complete "the whole line, without any farther issue of stock; but in " case it should be found advantageous, on account of increas-" ing traffic, to accelerate the opening of the railway from sea " to sea by raising more money, further stock will be issued " for the construction of the remaining sections of the "railway." There has thus been some departure from the original programme; not only is stock issued without increasing traffic, but it is issued before even the first section is completed for traffic at all. The probable reason of this

change of programme is obvious. We have thus stated the available facts regarding our new borrowers. We must repeat our alarm at the facility with which such States can have money advanced to them. It shows that the temper of the public mind is once more favourable to adventures which are not even plausible—that there is a readiness to be tempted by high interest or profit and wholly illusory securities. It is tolerably certain that more of these attempts will be made upon the public purse with consequences it is not difficult to foresee.

### THE LORDS ON THE MARRIED WOMEN'S PROPERTY BILL.

THE Lords on Tuesday night did not *debate* the Married Women's Property Bill; they apparently conspired to ignore everything that could be said in favour of those of its provisions with which they were not disposed to agree. It was a very curious instance of the power of prejudice to hoodwink independent and supremely able men. It was also a still more curious instance how impossible it is to secure any

THE ECONOMIST.

[June 25, 1870.

varieties of creed at all corresponding to the varieties of the popular creed, without the agency of representation. One would have thought that if ever there were certainty of securing a variety of views corresponding to the various con-ceivable intellectual positions which might plausibly be occupied and defended on a great social question, it would be in an assembly of men who are thoroughly well versed in the vexed issues of law and of society, and whose high position renders it in the highest degree unlikely that they should be influenced by motives of self-interest. In point of fact, however, the conversation in the House of Lords on Tuesday was nothing better than the chorus of a cliquish tea party reiterating the views of a leading lady in the set. The only man who ventured even to hint the state of the case as it really is was the Tory leader, Lord Cairns, who had charge of the Bill. Lord Penzance led the Opposition in a speech remarkable for misleading reasoning and unfortunate taste, aiming at humour, and so far succeeding as to excite the laughter of a House eager to laugh at remarks couched in a certain vein, but which, judged by any ordinary standard, would be said to be elaborate jocosities of a highly conventional type. Lord Westbury was even more comical than Lord Penzance, and also more irrelevant. He gave the House of Lords dramatic specimens of the dialogue which might be expected between husband and wife after the passing of the Bill, but Lord Westbury's dramatic inspiration was certainly conventional and in a high degree irrelevant to his subject. Lord Shaftesbury found nothing better to do than to translate the remarks of his predecessors into heavy common-place, so far as that part of the Bill was concerned, which their Lordships agreed to condemn; while the Lord Chancellor, Lord Lyveden, and the Duke of Cleveland, each and all expressed what seems to us a purely unintelligent and unreasoned horror of permitting a wife to do with unsettled property what every wife with a strictly settled income has the unquestioned power of doing with that income. The cry, "subversion of the whole law of "marriage," "revolutionary change of the principle of "marriage," was repeated with all the pertinacity and little more than the intellectual groundwork of a parrot's favourite apothegms. Had it not been for a certain amount of invincible rationality about Lord Cairns, the dialogue in the Lords would have been a perfect model of hysteric unanimity.

Now let us see what it was in the Married Women's Property Bill, sent up from the Commons with a decisive majority, which has so outraged the feelings of the Lords, and driven Lord Penzance and Lord Westbury into an elaborate exertion of their vivid imagination in the sphere of domestic dialogue. They all admit with one voice the wrong of nct securing to a married woman the right of disposing of her own earnings or wages, but they all cry out with one voice against the scandal of permitting a married woman to hold property of her own exactly as she might if she were unmarried-i.e., as if, for instance, she were a sister keeping house with her brother, instead of a wife keeping house with her husband. Lord Penzance is scandalised beyond measure at the right which the Bill gives to a wife to sue her husband and a husband to sue his wife on any matter of contract which it might please either to allege. "It is difficult to conceive," said Lord Penzance, "the relations of a man and wife, plaintiff and defendant " in an action, sitting down to breakfast together, passing the day " together, consulting their respective attorneys, and then dining " together. A married woman, moreover, being at liberty to " carry on any trade, a man might be startled by the informa-" tion that his wife had determined to set up a shop in the " neighbourhood-which at present was prevented by her " inability to contract,-and still more startled at hearing that " she had entered into partnership with her cousin, who need " not be a woman. A husband who expected his wife to "keep his home and attend to the children might find her " opening a Berlin wool shop with her cousin John as a " partner." Now how complete an answer to these sensational presages it is to remark, as Lord Cairns did, that all these dangers exist, substantially in the same form, for all women with settlements at the present moment, and that, so far as we can see, the Bill has not the smallest tendency to increase them, while it confers enormous advantages on women with no settlements. As to the power of husband and wife to sue each other, as Lord Cairns very pertinently remarked, not a sun rises even now that does not shine upon a husband and wife who are suing one another. "Every woman in

"England," pursued Lord Cairns, "who had property "England," pursued Lord Callis, who had property "to her separate use, might make contracts, accept "bills of exchange, or buy racehorses if she had a "mind to do so, and every one of these contracts "would be valid." No doubt the machinery would be somewhat different. A woman with money settled to her separate use could open an account in her own name with a banker, and her husband would practically be debarred from all power over that account. If he attempted to get at it against his wife's consent the Court of Chancery would restrain him from touching it, and the bankers, knowing that the Court of Chancery would do so, would refuse to give him any control of the money, and would honour only his wife's cheques. In this way a married woman is always protected in the disposal of her own separate income at her own pleasure, and if she chose to start a business with it in which cousin John were the sole acting partner, we do not see how the suppression of her name in the matter would in the least degree alleviate the injury to the husband's feelings. The simple fact of the matter is that the whole theory of equitable settlements has been invented to restrict and almost destroy that absolute power of the husband over the common property of the family, for which the Lords appeared to be so eloquently contending on Tuesday night. The Lord Chancellor says that if the husband wishes to go to Italy to live and the wife wishes to remain in England, it would be most mischievous to divide practically the controlling power of the household. But we should very much like to have heard from the Lord Chancellor how the proposed Bill would divide the controlling power more than it is already divided in all cases where the wife has a separate settled estate of her own. Suppose it to be the wife's money settled upon her on which the family is living, and the wife dislikes going to Italy to live, how is the husband to compel her ? She will decline to draw the cheques for that purpose; she will not supply the money for going to Italy; and how is the husband to compel her? As far as we know he has absolutely no power to do so now, which he would not have in equal degree under the new Bill. If he has money of his own to go with he can go, and use any authority the law gives him over his wife just as much if her property is her own by right as if it be invested in trustees, and only the income paid to her separate banking account. As far as we understand the arguments, jocular or serious, of the various peers who are opposed to giving married women the power to deal with their own property just as if they were unmarried, their arguments go to arraigning the decisions of the Courts of Equity, and to subverting all settlements to separate use, if they be worth anything at all. If the real object be to sustain the autocracy of the husband in his home and prevent a serious division of powers as well as interests, the only way to do so is to prohibit all the devices by which for so many centuries the law has been limiting the power of the husband to squander his wife's money, and consequently sustaining the moneyed wife in opposition to her husband's will.

But it is not enough to say that the Lords were very inconsistent in complaining that the Bill would subvert the whole principle of our existing marriage law, and yet approving the very devices by which equity has already subverted that We go further and maintain that the so-called principle. principle of our marriage law, so far as it ignores the wife's rights over her own property-which of course it does in the case of all unsettled personal property-and gives them to the husband, is simply barbarous and mischievous, and that it causes a great many more quarrels than it settles. No doubt the legal incapacity of wives to deal with their own personal property as if it were their own, has produced a great deal of artificial feminine incompetence for doing what women are naturally at least as well fitted to do as men,-looking after their own invest-ments and protecting their own interests. We admit the force of the assertion that the proposed change, if it prevents a settlement, where a woman's property would otherwise have been settled, will often act injuriously to the wife and beneficially to the husband, for a vast number of women who might otherwise have been protected against themselves, would in that case give all their property to their husbands, or per-haps even invest it foolishly themselves, and so lose their hold of it. That no doubt will be so, and it cannot be helped. You cannot give the negroes their freedom without making them free to do a vast number of foolish things which will be for their own disadvantage, and from the suffering caused by which they will have to learn wisdom. So you cannot put women in the same position of proprietary inde-pendence as men without preparing for them many a waste and many a loss. But there seems to us to be no reason in the world why women should be legally merged in their husbands, and we are persuaded that instead of its contributing to the harmony of family life that this should be attempted, it only contributes to the sense of grievance and injustice in which so many quarrels arise. As a matter of fact, when the husband and the wife have resources independent of each other, the only real harmony arises out of the affection and sympathy existing between them; and that affection and sympathy are far more likely to exist and to be strengthened if there is a frank recognition on each side of the other's independent rights, and no attempt to override them by the exercise of a very capricicus authority. Mutual concession is a far better guarantee of mutual respect than the legal fiction of a wife's coverture. If the Lords succeed in limiting the operation of the Bill to the protection of a married woman's earnings or wages, and in striking out the part which enables a married woman to hold property exactly as if she were un-married, they will have succeeded, to our mind, in postponing the recognition of a very gross blunder of principle by preventing the logical application of the right principle to one of the most ordinary of all the inferences which flow from it. If a married woman is to be incapable of holding the principal of a sum left to her, she ought to be incapable also of receiving the interest to her separate use. If she is to be refused the right to spend her own fortune, she ought to be refused the right to spend her own wages. Their Lordships seem to us as illogical in retaining the part of the Bill they wish to retain, as they are irrational in rejecting the part of the Bill they propose to reject.

### THE PROPOSED REMEDIES FOR THE OVERWORK OF THE HOUSE OF COMMONS.

MR GILPIN has once more brought forward, and once more failed in remedying, a very serious grievance,—the overwork which falls on the House of Commons. Of late years the House has always been more or less over-burdened; but this year, owing to the introduction of so many Bills of high political importance, it has been thoroughly worn out. It sits at least two days and very often four days in the week till 2 a.m., beginning again at noon; its prominent members grow ill with toil and excitement; its rank and file stay away till business of the first importance is settled by a clique, and still it fails to overtake the work. Everything except the great measure of the hour is postponed; changes of immense importance pass unnoticed—for example, the Order in Council throwing open the Civil Service, has never been so much as mentioned; and administrative Bills of the most urgent character cannot be brought in. Nor is there any reasonable chance that this pressure will be diminished. When all Irish affairs have been disposed of we are still but on the threshold of most exciting and difficult legislation, intended to reform the army, the Poor Law, legal procedure, county government, municipal arrange-ments, and the like, while private members show a growing disposition to throw ideas of their own into the form of Bills, and the so-called private business assumes ever increasing proportions. If some improvement cannot be effected, we are in danger of a deadlock, or of what would be most injurious, the virtual suppression of all discussion not

initiated by the Government of the day. It is natural that members who feel that the machine is becoming overweighted, and who personally suffer from the tax placed upon their powers, should look anxiously around them for relief; but it is excessively difficult, as Mr Gladstone admitted, to devise any method of relief. The plans suggested during the sitting of Tuesday were singularly feeble, and Mr Gilpin's especially so. An earlier hour for closing business would not really relieve anybody, for the time gained would be spent in society, while it would greatly increase the pressure upon members of the Government who want the day for departmental work, and upon the large and increasing class of members who must work in the day time at their usual avocations. Night sittings relieve both Ministers and barristers; and if business is to be done at night, it is easier to finish it off than to allow of incessant postponements. The health of members is important, but Mr Gilpin's notion that members would gain much by going to bed at one instead

of two, is, we suspect, somewhat of a delusion, the total quantity of sleep being physiologically much more important than the hour at which it is taken. The House was therefore in the right in rejecting Mr Gilpin's motion; while Mr Bouverie's suggestion that members should be "considerate," is only a request that the difficulty should take itself away; and Mr Greene's, that speeches should be short, only tends to encourage desultory and inexhaustive conversation.

There are, we believe, just three methods in which it is possible to diminish the pressure of work upon the House, and to each of the three there are serious, it may be fatal, objections. One very often proposed and never accepted is to transfer some portion of the labour to the House of Lords. That House, however, has never shown any disposition to do even its full share of drudgery, and would scarcely accept, certainly not perform, any larger amount. The country, we believe, would be quite willing to make it nearly absolute over private business, but it is with the utmost difficulty that Lord Redesdale keeps his Committees together even now, and the Peers would certainly not consent to be worked to death. On the other hand, political business cannot be entrusted to the Lords. The majority of the Upper House are so opposed in feeling to the representatives that they would throw out any innovating Bill which did not come up from below, or send it down in a shape in which the Commons would have all their work to do afresh. They could not take over entire departments, because the Lower House would never be satisfied to relinquish its own ultimate right of control, even over matters which the Upper House understands best, as for instance Indian and Foreign affairs, and there is no other way of dividing the work. Another and very plausible scheme is to reduce the number of debates and no doubt something might be done in this way. If, for example, there were no debate on the first reading, but the bill were introduced by its author with a written exposition of his objects and reasons, a great saving of time might be effected, and members we believe would be better informed than they are at present. The debate on the second reading would then be on the principle, and the Bill would only have to be discussed in Committee to pass or be rejected at a third reading without debate. This would be a great saving of time, but we fear that members deprived of their old opportunities would speak in greater numbers during the debate on the second reading and in Committee, and thus we should lose as much as we gained. The substitution of writing, how-ever, for speaking is a line in which some partial remedy for the present oppression may possibly be obtained.

Then comes the most plausible suggestion of all, a surrender or diminution of the present practice of going into Committee of the whole House in favour of the continental system of referring each Bill to a Committee selected to attend to that branch of business. This system works well in France and Italy, and in the Senate of the United States, and would we have little doubt immensely relieve the House, but it is exposed to one most serious objection. The Committee or bureau must either sit in public or in secret. It it sits in public, it will be a little Parliament elected by double election for a certain department of legislation, and would supersede the Houses in that department-a system which might work very well, but is not exactly government by representation of the country. If on the other hand it sits in secret, the people would lose the educating influence of discussion, and we should be face to face with the worst impediment to good government on the Continent, the chasm which exists between the intelligence of the electors and the intelligence of the representatives. Acts would be passed before the public appreciated the necessity for them, and we should have what in this country we have usually escaped, reactions against laws after they have been passed. The Contagious Diseases Act was in fact passed in that way in silence after submission to an informal "bureau," and that Act is almost the only one passed in our time which has produced any very serious reaction. A standing Committee of Supply would not, it is true, be exposed to any such danger, and might perform most important service; but if we create such a body-which is scarcely constitutional-it must still remain open to any member not included in it to move the disallowance of any particular vote.

On the whole our impression is that the evil is grave, that no remedy yet offered is worth much, and that the Cabinet

THE ECONOMIST.

# itself should, during the next recess, thoroughly consider the matter, receive careful reports on the proceedings of foreign assemblies-we are told for example, but do not know, that the Dutch procedure is very effective—and should then, if it can, propose a bold reform. The matter has passed the point at which Select Committees can manage it. The House of Commons has become sovereign, and it has become matter of Imperial policy to devise the best system by which its matured and instructed will can best be transmitted to the Executive and the country. The adoption of that system will, we feel convinced, produce changes altogether beyond the grasp of any but responsible Ministers, possibly involve what would be the greatest change of all-the delegation by Parliament of some portion of its power.

## BUSINESS NOTES.

THE CITY OF LONDON BROKEES' BILL.-We have already given our support to the Bill which Mr W. Fowler has intro-duced to abolish the jurisdiction of the City of London Corporation over brokers within the City. Although the debate on the second reading on Wednesday was adjourned, we still hope that the Bill may be pushed forward this Session, and not disappear in the crowd of unsuccessful measures at the The principle of the Bill is very simple. It aims close. at destroying a special jurisdiction over a particular class of traders, which is pernicious and annoying just because it is special. If brokers are to be controlled in a peculiar way by a corporation there is no good reason why bankers and merchants should not be compelled to give similar illusory securities for their good behaviour, and submit to the processes of a most incompetent tribunal. It is enough that all classes of traders should be subject to the ordinary law, and for some local authority to attempt a kind of police supervision is simply to cause irritation without doing any good. There is no answer to Mr Fowler's charges of the absurdity of the so-called supervision, and the frequent injury it produces by people being exposed to libellous and unfounded complaints. The offence of the City's jurisdiction is aggravated moreover by the absence of any similar supervision over brokers in other large towns, and by the fact that brokers, through associations of their own, do exercise a really vigilant and effective supervision over their members in the public interest. The City of London aldermen pretend to supervise, and in so doing only irritate and annoy, while enabling many improper persons to pursue the calling of brokers under cover of their authority; and all the time there is a real supervision which does protect the public independent of them. The grievance may not be a great one, though there are individual instances of grave hard hip, but its character is utterly inde-fensible, and the case absolutely clear for its removal. The Bill, it should be kept in mind, does not touch the money privileges of the city ; the brokers do not object to pay the fees ; and the City has thus no locus standi in opposition. The only question is one of public advantage.

THE PATENT LAW.—The case of Rushton v. Crawley, tried by Vice-Chancellor Sir R. Malins, is another specimen of the gratuitous danger of litigation, and other hindrances to trade which our patent law inflicts upon manufacturers. The object of the suit was to restrain the defendants, Messrs Crawley and Son, of Wood street, Cheapside, from infringing a patent obtained by the plaintiff on 24th June, 1867, "for "an invention and improvement in the manufacture of arti-ficial hair for ladies' headdresses and frizettes." This precious "invention" was a process for converting "animal "fibre, by preference Russian wool or wool of a coarse "texture," into an imitation of human hair. It was stated for the plaintiff that human hair had become scarce and dear by the great demand for chignons ; that horse-hair pads were not good enough imitations; that he had patented a manufacture of mohair in imitation of human hair, but neither would that do; but at last he had succeeded with a preparation of coarse wool. So far, whatever may be thought of the invention intrinsically, it would seem to come quite within our patent law. It professed to be the adaptation of a known material to a new purpose, and if patents are to be given for all inventions it is not for the State to object that the subject-matter is trivial. But the objections to the patent were of a kind that can be made to a great many. The defendants maintained that they had arrived

at the alleged improvement in the ordinary process of their business; that they had used it before the plaintiff, and he had in fact got it from them; that they did not think it of sufficient importance for a patent. The only effect of the the patent law was in effect to obstruct them in the ordinary course of their business. The Vice-Chancellor decided for them and condemned the plaintiff in costs, holding that the them and condemned the plaintin in costs, holding that the proof of the prior user was sufficient; but it is undeniable that many small manufacturers would have preferred paying "blackmail" to a litigation, and that our patent law in furnishing pretexts for litigation is a heavy obstacle to industry. The large capitalist who can fight is unduly favoured, and the free competition of small capitals is checked. The Vice-Chancellor expressed a strong condemnation of the plaintiff's patent on the ground that it was too comprehensive and embarrassed trade, preventing people from knowing what they might or might not use; but the facts brought out showed that there was sufficient embarrassment to trade in the attempt, apart from the generality of the terms employed.

THE CHINA CONVENTION.-In reply to the memorandum of Sir Rutherford Alcock which Lord Clarendon lately communicated to the Committee of China merchants on the subject of the Chinese Convention, the Committee through their chairman state that they find no grounds in the memorandum "for changing or modifying the views they have already ex-"pressed concerning the Convention; and it is satisfactory to "them to know that, so far as time has admitted of informa-"tion being received, the mercantile bodies throughout the " country have arrived at a similar conclusion." The chairman adds :-- "I have only further to express their unanimous "hope that Her Majesty's Government will not hesitate to re-"commend the rejection of a treaty, the provisions of which "seem so little calculated to improve our commercial relations with China, although they trust it may not be found impos-"sible to reopen the negotiations upon the basis of mutual ad-"vantage without any undue sacrifice of the just rights and " privileges of either country."

THE DRAWBACK ON SUGAR .- The following extracts from the Treasury Minute on the subject of the drawback on sugar have been published. It will be seen that they confirm exactly the account we were able to give of the Government concessions last week :-

concessions last week :--1. That upon all foreign and colonial sugars upon which the higher rates of duty chargeable before the 13th of April had been paid, but which still remained in the bonded warehouses at that date, a return of the difference of duty, deducting 1s 6d per cwt, shall be allowed.
2. That an allowance equal to the difference of drawback, subject to the same deductions of 1s 6d per cwt, shall be made on the stocks of British refined sugars known as crystals, pieces, and bastards, which, on the evening of the 12th of April, were in the hands of refiners, either on their own account or on account of customers.
3. That a similar allowance, subject to the same deduction of 1s 6d per cwt, shall be made for all stocks of such sugars, being in quantity not less than 100 cwts, and in packages unbroken in the hands of dealers, on the evening of the 12th of April, provided such stock had been received direct from the refinery.
4. That a similar allowance, subject to the same deduction of 1s 6d per cwt, shall be made on the stock of sugar under process of manufacture on the premises of the refiners, on the close of the 12th of April.

THE BEVENUE OF THE NEW FINANCIAL YEAR .- Mr Goschen, in his able speech last Friday evening on the material condition of the country, mentioned, among other proofs of revival, that while the revenue of the quarter had been estimated at 15,645,000*l*, it had actually produced at the rate of 16,117,000*l*. The weekly accounts which have been published, though they exhibit some contradictory symptoms, contain sufficient evidence that the revenue is really in a satisfactory state. Actually up to the 18th of June there had been received only 14,585,000l, as compared with 16,639,000l received in the same period last year-a falling off of more than two millions; and this is superficially unsatisfactory. When we look into the account again it appears that in every branch of revenue from taxation, except the excise, there is a deficiency. Customs, stamps, taxes, income tax, and Post office have all yielded less. But this is only the superficial aspect of the matter. The increase in excise, which amounts to 274,0001, viz.-

# THE ECONOMIST.

is really very considerable, especially when it is remembered that the corresponding quarter of last year was itself in excess of the corresponding quarter of the year previous to it. The receipt on this head is no doubt somewhat irregular, but it has been continuously large for a long time, and though a slight diminution would have been consistent with an increased total at the end of the year no such diminution has taken place. As to the other branches of revenue it has to be remembered that the remission of the sugar duty must tell on the Customs, and in the corresponding quarter of last year the abolished corn duty was still operative. In stamps again there are also corn duty was still operative. In stamps again there are also sundry remissions operative now which were not operative at a fair prospect of a surplus of two millions next year.

this time last year, so that the fact that there is only a trifling falling off is altogether satisfactory. With regard to the taxes and the income tax, the change in the mode of collection suf-ficiently accounts for their irregularities. The Post Office is apparently an exception, but the payments into the Exchequer on this head are irregular, as the weekly accounts have shown, and we see no reason to expect any material falling off, if any. We have the official assurance that the revenue is already £500,000 better than the estimate with which the year was begun; and, as the weekly account is really corroborative of

#### PUBLIC COMPANIES.

### RAILWAY COMPANIES.

RAILWAY COMPANIES. Madras.— The gross receipts for the half-year were 293,557l, as compared with 281,116l; the average mileage worked over being 702 miles, as compared with 666 miles. The net receipts for the six months on the South-West line were 87,244l, and on the North-West line 55,752l An amalgamation of the two sections is recommended; joint capital outlay, 8,380,359l. Bank of South Australia — The directors are enabled to recom-

Bank of South Australia .- The directors are enabled to recommend a dividend of 10 per cent., free of income tax, for the year 1869, after appropriating 5,795l to the reserve fund. They are looking forward to a more satisfactory state of trade; and in the

meantime the business of the bank has been well sustained. British Linen.—The year's report stated the profit at 136,073l, after providing for bad and doubtful debts. Two dividends, together of 11 per cent., absorbed 110,000/, and a bonus of 2 per cent. required 20,000/. 5,000/ was applied to the bank premises account, and the balance was added to rest, now 346,220/. The

dividends were declared free of income tax. Chartered Mercantile of India, London, and China.—A dividend of 4 per cent. for the half-year, free of income tax, is announced. Colonial.—Half-year's dividend of 6 per cent. and a bonue of 2 per cent. recommended.

2 per cent. recommended. Provincial of Ireland,—A half-year's dividend of 4 per cent., and an extra dividend of 30s per 100l share, and of 12s per 10l share, are announced.

FINANCE, CREDIT. AND DISCOUNT COMPANIES. Australian Trust.—The liquidators' report was adopted at the meeting. It announced the return to the shareholders of a further sum of 5l, making 20l in nine months on the shares, with 25l paid.

#### ASSURANCE COMPANIES.

British and Foreign Marine Insurance .- An interim dividend at the rate of 10 per cent. per annum is abnounced. English, Scottish, and Law Life.—The payment of 5s per share

as interest is announced. Law Life Assurance.—The directors' report, adopted at the Law Life Assurance.—Ine directors' report, adopted at the meeting, stated that the total assets, including both the guaran-tee and assurance funds, on the 31st December last, amounted to 5,537,281*l*, and that the number of policies remaining in force was 6,887, assuring 8,578,390*l*, with reversionary bonuses amounting to 1,671,574*l*, making the total sum at risk on that

day 10,249,964l. Royal Exchange Assurance.—A dividend of 21 per cent., making

25 per cent. for the year, free of income tax, has been declared. Universal Marine.—Half year's interest at the rate of 5 per cent. per annum, free of income tax, is announced.

### MISCELLANEOUS COMPANIES.

Argentine 6 per Cent. Loan .- Bonds representing 33,500l have

Argentine 6 per Cent. Loan.—Bonds representing 53,300t have been drawn for redemption on the 1st July. Assam Company.—The report states :—" The net proceeds of the crop sold in London amounted to 100,828l, and sundry receipts in India to 1,580l, making together 102,408l. The total expenditure was 79,066l, thus leaving a profit for the year of

25,342*l*, out of which an interim dividend of  $2\frac{1}{3}$  per cent. has already been paid. We now propose to pay a further dividend of  $3\frac{1}{3}$  per cent., payable on the 20th of July next, making together 6 per cent. for the year. These dividends will absorb 11,229*l* of the profit, and there will remain 12,112*l*, which your directors consider it right to retain towards making up the loss sustained in 1867." sustained in 1867.

Bombay Gas.—At the half-yearly meeting it was stated that the company had made satisfactory progress. The general revenue account showed a balance of 7,488*l*, out of which a dividend was declared for the half-year at the rate of 6 per cent. per annum.

British Australian Telegraph .- The 5 per cent. per annum interest is announced.

British Land,-An interim dividend of 21 per cent. has been declared.

declared. Buenos Ayres 6 per Cent. State Loan, 1870.—Messrs C. de Murrieta and Co. have received applications for this loan for 1,034,700l sterling, at an issue price of 88 per cent., payable—5 per cent. on application; 15 per cent. on allotment; 15 per cent. on the 3rd August; 15 per cent. on the 1st October; 18 per cent. on the 20th November; and 20 per cent. on the 30th December. The bonds to bearer, in sums of 100l, 500l, and 1,000l each, bear interest payable in sterling in London on the lat of April and 1st of October: and the redemption is provided 1st of April and 1st of October; and the redemption is provided for at par in about 33 years by means of accumulative annual drawings of 1 per cent. on the principal sum of 1,034,700*l*. The first r payment will be made on the 1st October, 1871. The first r payment will be made on the 1st October, 1871. proceeds of the loan are to be applied "exclusively to works of public industry."

Canada Company.-The directors propose, at the general meeting to be held on the 30th inst., to recommend a division Canada Company .out of the assets in hand of 1l 15s per share, free of income tax, as and by way of dividend for the half-year ending the 10th July next, and also to divide a further sum of 2l a share as a

Stirly next, and also to invide a further sum of 2: a share as a fifth instalment towards the repayment of the paid-up capital. *Ceyloa Company.*—The adopted annual report stated that the net profit, including 2,069l brought forward from last year's account, and after defraying all current expenses, amounted to 74,264l. Out of this, a dividend at the rate of 7 per cent. per each original annum on the paid-up capital (amounting to 7s on each original and 3s 6d on each A share) was declared; this absorbed (with the interim dividend paid in December, the interest on deben-tures, and a sum of 22,000*l* carried to reserve) 67,296*l*, and left a balance of 6,968l.

Charles Cammell and Co.-The report for the year ended March last, to be presented on the 29th inst., shows a profit of 56,946l, out of which the directors propose a dividend of 5*l* per share, which will leave 6,946*l* to be carried forward. At the same time the reserve fund of 68,0451 will receive an addition of 17,011l, raising it to 85,056l.

Colonial Company.—Year's gross profits, 95,742l; net, 60,956l. After adding 12,750l, the former surplus, 73,706l is made avail-able. From this has to be deducted—Interest due to vendors, 1,250l; ad interim dividend of 10s per share, declared in July, 1869, 14,759l; ditto, declared in January, 1870, 14,759l; leaving a balance of 42,937l. The directors recommend that a further dividend of twelve shillings per share be now declared, which will amount to 17,711l. The total dividend thus declared, being will amount to 17,7114. The total dividend thus declared, being thirty-two shillings per share, is at the rate of 8 per cent. per annum. The directors propose that the dividend for the year shall be free of income tax. An addition of 15,000l has been made to the reserve fund, making the total reserve 90,000l. The undivided profits to be carried forward will be 10,225l. Colonial Company.—At the meeting, the proposed dividend of

8 per cent. for the year was declared. Ebbw Vale Steel, Iron, and Coal.—At the meeting, a dividend of 20s per share for the half-year was declared. Great Northern Telegraph.—Interest at the rate of 5 per cent.

per annum is announced.

Honduras 10 per Cent. Railway Loan for 2,500,0001 .- To complete the inter-oceanic railway now under construction between Puerto Cabello and the Bay of Fonseca, this second 10 per cent. Ioan is raised by the Honduras Government. Messrs Waring loan is raised by the Honduras Government. Messrs Waring Brothers and McCandlish have contracted to complete the entire line in 1872; and the railway revenues and proceeds of State domains are hypothecated to the service of the loan. The domains are hypothecated to the service of the loan. The Plenipotentiary of the Honduras Government has instructed the London and County Bank to receive applications for the above issue in 25,000 bonds of 100*l* each; the issue price being 80 per cent., payable up until the 15th of December next by monthly in-stalments. The first half-yearly coupon falls due on the 1st January next. The redemption is provided for at par in 15 years by a 3 per cent. accumulative sinking fund, to be applied yearly on the 31st of December, commencing this year. England, France, and the United States guarantee the neutrality of the France, and the United States guarantee the neutrality of the line when completed. The first section of the line is to be ready by November.

Hudson's Bay.—The 300,000l paid to the company by Canada is to be paid to the shareholders; but in the unsettled state of Red River affairs no further dividend is to be proposed this halfyear.

Imperial Continental Gas.—The transfer books are announced to be closed for a period of fourteen days from the 1st July, preparatory to the allotment of new shares and the issue of new certificates

Indian Tea of Darjelling .- The liquidator announces a return

Indian Tea of Darjetting.—Ine inquidator announces a return of 4s per share at once. Jamaica 4 per Cent. Loan for 367,6001.—The tenders were opened by the Crown agents on the 23rd instant, the minimum being fixed at 104. 276,8001 was applied for at and above that price, and a further 23,2001 was taken up immediately. The balance, 67,6001, was left open for subscription at 104. John Brown and Co.—Business is reported improving, espe-cially in the demand for armour plates and Bessemer steel. The directors propose to pay a dividend of 61 per share, which will

directors propose to pay a dividend of 6l per share, which will dispose of the profits as follows :--Profits of year's working, 75,675l; dividend at 6l per share, being at the rate of about 8g per cent., 60,000l; balance carried to next year's account, 15,6751.

15,675!. National Steamship.—An interim dividend at the rate of 10 per cent. per annum for the half-year is announced. Palace and Burlington Hotels.—The half-year's gross returns, 17,614!, exhibit some falling off. The net profit has been 4,226!, making 5,001! available for dividend. A distribution at the rate of 10 per cent. per annum, free of income tax, leaves 305!. Peruvian Loans.—Messrs Thom-on, Bonar, and Co. have announced that the half-yearly dividend of the Five per Cent. Ioan of 1865 will be paid on the 1st of July. On the same day the bonds for the eleventh half-yearly redemption at par, amounting to

for the eleventh half-yearly redemption at par, amounting to 320,000*l*, will be drawn, making the total amount of this loan redeemed 3,120,800*l*. They also notify that the coupons of the loan of the National Pisco Yca Kailway Company will be paid on the 1st of July. Peruvian Six per Cent. New Loan.-Special settling day, Mon-

day the 27th inst.

San Domingo Six per Cent. Loan, 1869.—Bonds representing 6,900l were drawn on the 15th instant for redemption at par on the 1st July.

South Australian .- The report recommends a dividend at the rate of 8 per cent. per annum. MINING COMPANIES.

Anglo-Argentine.—A call of 2s 6d per share upon the 15 per cent. preference shares is to be paid by the 23rd of July. *Cafartha Lead.*—A call of 2*l* per share is payable on the 7th

July. Great Wheal Vor.-At the quarterly meeting the accounts showed a balance of 4,074l, out of which a dividend of 3s 6d per Great Wheal Vor .share was declared; surplus, 3,040*l*. St John Del Rey.—The report states that progress has been

made with the two shafts in course of execution for re-opening the Bahu and Cachoeira mines. The total cost up to the end of April on these works has been 17,068*t*. The Morrovelho mine shows a year's working profit of 3,796l.

## Agriculture.

### CROPS AND PROSPECTS

PERHAPS something more nearly approaching to drought has been telt in this country during the present year than at any time within living memory. From January to June less than half the average rainfall has occurred, and the results in some respects are most serious. But it is drought of quite a different kind to that we occasionally experience. During the winter and spring, though there was much want of moisture, the weather was cold and there was no great amount of avancestion. In was cold, and there was no great amount of evaporation. In March and April vegetation appeared to stand still. Every-thing was backward, but all the spring corn and pulse crops were well sown, and the seed came up with vigour and regularity. The wheat plant, especially upon light soils and in exposed places, suffered from the many and rapid atternations from front to they of the post plant, especially upon light soils and In exposed places, suffered from the many and rapid alternations from frost to thaw of the past winter, and in April and the early part of May there were justly considerable forebodings of evil. That there could not be what is called a heavy crop of wheat seemed certain, for there was not that amount of plant on which a heavy crop is borne, and on the thin gravelly soils a good deal of plant had been lost. Then, the plant did not tiller out as it frequently does after an ungenial winter, and a thin plant was rather the rule than the exception. But since the end of April, and particularly during the two last weeks of May and the two first of June, the improvement in the wheat eroops (with comparafirst of June, the improvement in the wheat crops (with compara-tively small exceptions) has been very great. Though the plant first of June, the improvement in the wheat crops (with compara-tively small exceptions) has been very great. Though the plant generally is not a thick one, and the straw for the most part is short, the straw is straight and vigorous, the colour remarkably healthy, and the ears are strong and level. Blooming has already commenced, and, save upon poor or very ill-farmed lands there is little doubt that in proportion to the straw the yield of wheat will be a good one, even should we not get any considerable amount of rain. With rain we believe the wheat throughout the country will fully reach an average crop. Next to wheat the oat crop seems to have suffered least from the absence of moisture, and though the straw is short, the ears are coming out moisture, and though the straw is short, the ears are coming out with every promise of a fair yield. A wet July would be of

more value to the oats than to the wheat, for there is plenty of plant, and a moderate quantity of rain would give length to the straw and breadth and fulness to the ear.

Barley is perhaps more in danger than the other cereal crops. Except on strong, rich, or very well cultivated soils, the straw is short, though there is no deficiency of plant, and the ear is being rapidly developed. No doubt that on some of the shallow barley soils, and where in fairly moist seasons the finest crops of barley are grown, there is some danger of a deficiency; but the barley crop is as well as the wheat, and oats have wonderfully improved during the last month. Of beans and peas much improvement during the same period must be reported, and although both are in straw th ere will be straw enough to carry fair crops of each kind of pulse.

It is certain that in dry seasons our grain and pulse crops are always better than appearances in the field would indicate, as in wet seasons we commonly find the yield of grain less than from wet seasons we commonly find the yield of grain less than from the aspect of crops when growing might have been anticipated. Hitherto though ve have had bright weather, there has been none of that scorching sunshine, which sometimes proves too much for the crops in a dry season. It must however be ob-served that the time of the year for scorching weather is only now at hand, and a continued absence of moisture with very

great heat may yet alter our cereal prospects for the worse. It is worthy of note that mangold and swedes are, in spite of the dry weather, in most districts in fair plant, and less injury is being sustained from the fly than in many seasons when there are rapid alternations of hot and wet weather. Of course mois-ture will be anxiously looked for to carry on the root crops. But the setting out and hoeing these crops is being done very effectively. Great progress has been made generally in draining the lend. So far our agricultural prospects, if not actually of the brightest, are far from gloomy. But when we come to the hay, brightest, are far from gloomy. But when we come to the hay, both artificial and meadow, the prospect is anything but cheer-ing. Clover and rye grasses are but indifferent crops, and the meadow hay is well nigh a negative quantity. Throughout the fine meadow lands of the Midland counties there is, in most cases, iterally no erron —there is nothing worth mowing.—and the literally no crop,-there is nothing worth mowing,-and the majority of farmers are allowing their hay meadows to stand in the hope that July may bring rain, and that a late second growth

of grass may give them some hay. There has not been, for many years, so little grass in the third week of June as at the present time. Nor are the pasture lands any better. Not only is the grass so short that scarcely one-half the usual stock can be carried, but the great want of water is being felt. The Midland farmers complain that their brooks and the grass have soldow here so both the scale of the scale of the springs have seldom been so low thus early in the season, and the anticipations of the graziers are becoming very serious. Unless we soon have rain, and a good deal of it, there will be a vast quantity of both cattle and sheep forced to market in barely half fat state, much to the present and future loss of the graziers and the public.

Yet, with all this dry weather, potatoes, both in the field and in the garden, promise remarkably well, and that fruit of all kinds will be most abundant seems certain.

As yet stock have been free from disease, but a very dry summer usually results in more or less of epidemic complaints amongst cattle. On the whole, it is to be feared that farmers will not find the present agricultural year one of much proit, and such of them as may come through it without loss may be well content.

### Joreign Correspondence.

the coin and bullion. In consequence of the large purchases of grain abroad it was thought that a demand for specie might have already arisen; but there has been none, and on the contrary there is an augmentation since last week of 7,089,000*i*. The discounts present an augmentation of 19,712,000%, and the private deposits of 11,049,000%. The circulation of notes is 990,000% 100 er.

Bourse operations have continued inactive during the past week. Recorts that the Emperor is in very bad health have been again spread, but they are officially declared exaggerated. The state of the crops has also been much dwelt on as a reason for disquietude; and though prices of grain have fallen at Paris and Marseilles, the representation has produced effect. French rente is lower, and those of other countries, with the exception of the United States, are lower also. The week's quotations are somexed :-

The St Gothard railway question mentioned last week has been brought before the Corps Legislatif, and has ended in nothing. The Government, as was expected, did not find it convenient to furn it into a weapon of offence against Prussia on account of the subvention she has consented to give to the line: it said (in substance) that though the projected railway by facilitating commu-nications between Germany, Switzerland, and Italy, and by shortening the distance between England and Brindesi, the new route to India seemed to so ne to menace the economic interests of France, it did not do so, and would be advantageous to the Eastern France, it and not do so, and would be advantageous of the Estern provinces of the latter,—...lso, that was if the fact were otherwise, France could not oppose the measures foreign nations thought fit to adopt to extend their common relations, particularly as in so dring they were only imitating what she had herself done. With respect to the all-garion that the prijected railway would, in the event of war, enable Prossia to menace the neutrality of Switzerland in a manner danger us for France, the Government felt no disquietude on that point, the treaty about the railway rendering Switzerland absolute mi-tress of the line on her own territory, and Switzeriand having given the assurance that she was as determined as ever to maintain her independence,— added to which France could, on the arrival of war, easily make the railway useless to her enemies. The Government having said what precedes, suggested that France could make herself cer-tain that the St Gothard route would be of no practical inconvenience to her, by giving a subvention to the Company which had undertaken to construct a railway via the Simplon into Italy—a line comparatively easy to execute, whilst the St Gothard one would take fifte n or sixteen years, and would cost 200,000,000 or 220,000,000?. In accordance with this suggestion, some deputies hastened to present a Bill for according the Simplon Company 10,000,000f annually for ten years. This result seems

793

215,060 0 000,000 0 ,980,755 14 ,575,187 21

[June 25, 1870

to confirm the suspicions that were entertained in certain quarters that the outery egainst the intervention of Prussia in the St Gothard route was destined to prepare the way for a demand for a subvention to the Simplon one. The Company to which the Simplon concession was originally granted became bankrupt long ago; but the affaire is now said to be in the hands of some powerful capitalists.

The affairs of the City of Paris have given rise to much nego-tiation in political and financial circles. It is necessary to provide for or to postpone the payment of the heavy sums due, and to obtain funds for continuing the works commenced. Several projects have been proposed, but all have encountered obstacles. In default of a better, a Committee of the Corps Legislatif has recommended the raising of a loan of 520,000,000f, as originally suggested. The same committee has also, it is said, resolved to make the City claim from the Credit Foncier the 17,000,000f paid as commission and interest for discounting the famous "delegations" of Baron Haussmann, by means of which he incurred an enormous debt without letting anybody know. But the payment though high was, the Credit Foncier will say, nothing more than what as a banking institution it had the right to exact for assistance rendered.

The Manchester Chamber of Commerce a few days back sent a deputation, composed of Mr Ashworth, Mr Armitage, and Mr Slagg, to the Committee of the Corps Legislatif, charged with the inquiry into the working of the treaties of commerce. These gentlemen stated that the war in America had produced profound perturb tion in the cotton industry of England as well as in that of France; that great distress had existed among working men in the former country, and that large sums had had to be dis-tributed for their relief; that under the treaty the export of cot-ton goods from England to France had been relatively insigton goods from England to France had been relatively insig-inificant; that the existing duties in France afforded sufficient and even exaggerated protection; that, all things counted, there was no great difference between the cost price of production in France and in England; and that the French were able to compete with English manufacturers in Manchester itself. The deputation gave information on numerous other points, and in so doing they destrayed many of the allegations of M. Pouyer-Quertier and the Protectionists. Their evidence was listened to with interest by the Committee, but they would have produced greater effect if they had been able to speak French fluently, and if they had understood the full signification of some of the questions **put to them**. put to them.

A Bill approving a convention for establishing money orders between the post offices of Great Britain and Ireland and of France and Algeria is now before the Corps Legislatif. It fixes the maximum to be transmitted at 250f, or 10l, and the charge in France at 20c for each sum of 10f or fraction of the same, and in England at 9d for less than 2l, 1s 6d for from 2l to 5l, 2s 3d from 5l to 7l, and 3s from 7l to 10l. These rates seem rather high, but as it is a great advantage to have a money order system between the two countries, they must be accepted. Why so simple a thing the two countries, they must be accepted. was not introduced years sgo, when railways gave an extraordi-nary impetus to travelling and to trade, is one of those mysteries which official people will never explain. A new loan for the Pope is spoken of, and an "operation" of

some kind for Russia is said to be in preparation. The "syndicate" formed for driving up the last loan of the Viceroy of Egypt, and which succeeded in the operation, has

turned over the affair to a new syndicate. A conversion of the railway lottery loan of Turkey, or some modification of it, is said to be seriously contemplated. The

modification of it, is said to be seriously contemplated. The object is to get the new stock admitted to the market of Paris, from which by order of the Government the lottery is excluded. The interest due 1st July on the Portuguese loans of 1848 and 1853 and subsequent years is announced for payment from that date by Messrs Erlanger. The Transatlantic Steam Navigation Company makes known that it will pay from 1st July 3f 750 per share as helence of

that it will pay from 1st July 3f 75c per share as balance of dividend for 1869, and 12f 50c interest on obligations.

The Company of the Southern Railway is from 1st July to pay 20f interest on shares and 7f 50c on obligations.

The Lyons to Mediterranean R ilway Company is to pay from 1st July the interest on its own debentures and on those of the different companies with which it is amalgamated. The amount varies from 7t to 27f.

The Northern Railway Company from 1st next month will pay 42f as interest and balance of dividend on shares; 34f on jouissance shares; and 7f 50c interest on obligations. The Eastern Bailway will not form 1st Jack 25f on its Mon-

jouissance shares; and 7f 50c interest on obligations. The Eastern Railway will pay from 1st July 25f on its Mon-tereau obligations; 12f 50c on the Strasburg to Bale; 7f 50c on the Disuze to Avricourt; and 7f 50c on the Ardennes. The South of Austria and Upper Italy Rails ay will pay from 1st July the interest on obligations, which is 7f 50c. Several other comparises are to make ; ayments from 1s<sup>.</sup> July— the Paris Omnibus 25f on slare; 12f 50c on obligations; the Magasing Generaux de Paris 12f 50c shares; the Orleans to Rouen Railway 7f 50c on obligations; the Bordeaux t. La Sauve Railway 7f 50c; the Frameries to Cheinay Railway a coupon; the Vosges Railway 12f 50c; the Herault (local interest) Railway 7f 50c; La Vendee Railways 8f 75c on shares; the Treport

Railway 5f 46c shares, 7f 50c obligations; Perpignan to Prodes, interest on shares and 7f 50c obligations; the Union des Gaz (Paris) a coupon on obligations; the Carmaux coal pits 7f 50c on ditto; the Graissessac coal pits 15f shares; the Fives Lille (engine building) 12f obligations; the Docks Entrepots of Havre 7f 50c ditto: Busi Seine et Oise Steam Tug 45f, balance of divided ditto; Bissi Seine et Oise Steam Tug 45f, balance of dividend; Spanish Credit Mobilier 15f shares; Banque de Belgique 35f. The Company of the Messageries à Vapeur, which employs locomotives on common roads, has resolved to increase its capital from 500,000f to 550,000f, and to issue obligations to the amount of 1.000.0001.

The report from the markets is as follows

The report from the markets is as follows :-FLOUR.-At Paris, yesterday, eight marks, 71f 75c the sack of 157 kilogs; superior, 71f 25c. Last week, the prices were 75f 75c and 74f. WHEAT.-At Paris, yesterday, choice, 43f to 45f 50c the sack of 120 kilogs; first quality, 42f to 43f; other sorts, 39f to 41f 50c. Last week, the quotation of the first sort was 45f 50c to 46f; of the second, 44f to 45f; of the third, 41f to 43f 50c. COTTON.-At Havre, in the week ending Friday, 11,098 bales were taken. In the closing quotations, compared with those of the preceding week, United States were put 1f to 2f lower; India, 1f to 2f; and for Surat, 4f to 5f. New Orleans very ordinary was consequently 119f the 50 kilogs; Oomrawuttee good ordinary, 105f; Tinnevelly ditto, 110f; Bengal ditto, 100f. This week, the demand has been rather active, but prices of New Orleans very ordinary yesterday fell to 118f. COFFEE.-At Havre, this week, Rio, 53f to 59f; Santos, 58f and 72f; Hayti, 53f to 64f; Ceylon and Cazengo, prices not stated; Java, 72f; Rio washed, 70f and 71f; Bahia, 54f; Nicaragua, 73f. At Bordeaux, last week, some lots Santiago, 110f to 118f; 1,450 sacks La Guayra, 75f to 90f; 400 Mysore, 99f and 99f 50c; 504 Rio, 60f to 78f; 150 Bahia washed, 73f; 122 Costa Rica, 101f; 190 Java, 105f; some French West India, 47f 50c and 46f. This week, 39 bales Reunion, 125f; and 14 ditto, prices not stated. This week, as alse. At Marseille, last week, there were no sales, and none this week. Stoare,-At Havre, in the week ending Friday. French West India

and 14 ditto, prices not stated. This week no sales. At Marseilles, last week, there were no sales, and none this week.
SUGAR.—At Havre, in the week ending Friday, French West India, 50f 50e the 50 kilogs, duty paid, for bonne quatrieme; and for delivery, 50f; also 49f to 64i 25c for usine; San Domingo, 50f 50c; 2,902 casks Havana, 34f to 34f 25c, No 12, in bond. This week, usine, 61f 25c to 66f; bonne quatrieme, 49f 75c. At Bordeaux, last week, some French West India, 49f, bonne quatrieme; 2,349 casks Havana, 34f, No 12, in bond. This week, French West India, 49f 50c, bonne quatrieme; usine, prices not given. At Nantes, last week, 100 sacks Mayotte, 52f 50c; some French West India usine, 57f to 65f; 6,596 sacks Reunion, prices not stated. No sales this week. At Marseilles, last week, about 1,500 hogsheads French West India, 30f 50c, bonne quatrieme; 410 casks 500 sacks Bahia, 32f, No 10; 4,200 sacks Pernambuco, 30f, No 10. This week, Havana, 33f 25c, No 12.
INDIGO.—At Havre, in the week ending Friday, 26 chests Bengal new, 2 Java, 37 serons Guatemala, at about established prices. No sales this week. At Bordeaux, last week, 19 chests Kurpah, 12 Bengal, 4 Madras; no change in prices. This week, Bengal, Kurpab, and Mexico.

Mexico

Mexico.
HIDES.—The sales at Havre were this week :—Buenos Ayres dry ox mataderos, 116f and 110f; ditto salted saladeros, 52f and 62f; Rio Grande dry, 111f; ditto mataderos, 55f 55c; salted ox, 58f 25c; Bahia dry, 108f; Monte Video salted cow, 66f; Rio Janeire salted ox, 52f; cow, 58f 25c; Valparaiso salted ox and cow, 57f 50c.
WOOL.—The sales at Havre, in the week ending Friday, were 285 bales La Plata unwashed, the greater part at 1f 374c to 1f 624c the kilog, the next at prices not stated; 93 Chili unwashed, 1f 65c to 1f 78c; 75 La Plata sheepskin ditto, 70c to 1f 20c. This week, Buenos Ayres unwashed, 95f to 167f 50c; Bande Orientale ditto, 215f.

### COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for trade have received, from the Secretary of State for Foreign Affairs, a despatch from Her Majesty's Chargé d'Affaires at Lima, stating that the Peruvian Government has issued a decree establishing a new Custom house in the roadstead of Moche, in the province of La Libertad. This new port has received the name of Puerto Salaverry. The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a copy of a despatch from Her Majesty's Minister at Madrid, enclosing a copy of a decree which has been issued by the Spanish Government, permitting appeals from the decisions of the directors of Customs in the Spanish colonies to be made to the local tribunals. During the week ending June 21 the imports of the precious metals

During the week ending June 21 the imports of the precious metals were:-gold, 591,856/; silver, 111,071/. The exports were-gold, 26,553/; silver, 22,474/.

1860, the Great Eastern had sailed for New York. The sals for the new Russian  $4\frac{1}{3}$  per cent. loan of 8,000,000l ust been issued, at a price equal to 903 News had been red of the loss of the Peninsular and Oriental steamer, bar. The advices from British Columbia mentioned fresh cations from the notorious General Harney.

1867, the money market was active. The issue of a an 7 per cent. loan of 1,120,920/ had been announced by rs J. S. Morgan and Co. Cotton and corn were dull and oing.

1868, the Suspensory Bill had been introduced into the The Southern Railways Amalgamation Bill r House. been withdrawn. The Midland Railway Company had mined to raise 2,000,000l fresh capital in 16l shares, ing a preferential dividend of 5 per cent. The Kurskkow Railway loan for 1,876,800l had been introduced on ontinent.

1869, the Bank rate had been reduced to  $3\frac{1}{2}$  per cent. Irish Church Bill had passed a second reading in the r House. Rumours were current of a new Portuguese The conversion of the Austrian Sterling Bonds was carried out, under protest, through the London and ty Bank.

e amount of the "other" deposits, as compared with other" securities, showed, in 1860, a deficiency of ),8131; in 1867, a deficiency of 2,243,9701; in 1868, cess of 1,370,8351; and in 1869, an excess of 507,9421. 370, there is a deficiency of 2,899,456l.

SCOUNT AND MONEY MARKET .- The continued flow of to the Banks of England and France exercises still the influence upon the value of money. The present total by the Bank of England has recovered to the high point ned about two years since, while in the case of the Bank ance the increase this week of 280,000l has brought the up to 52,737,0001, the largest ever held. The defor discount in Threadneedle street has apparently immaterial during the week, but apart from increase in the Government balance and the inof bullion a considerable sum has been transferred he outside market, as shown by the decrease in the her deposits." The operations which are unavoidably g on in connection with the preparation of the half-yearly nce sheets appear to be drawing some of the idle money the Bank of England into the open market. The ency of the discount rates outside has been towards er ease this week; but more as regards short r and loans for short periods than for long paper. The award course of values in the home railway market and in some of the foreign stocks has been caused by speculative holders having received intimation from their bankers that the working capital which had been placed at their disposal would, until the June balance had been struck, be required in the form of cash. The re-payments thus necessitated have left the borrowers no alternatives in many instances but to get the money directly or indirectly probably from the Bank. The effect of this would be, at the present moment, to increase the balances in the general market available for short loans, and to cause a reduction in the terms at which lenders would be willing to do business The rather than allow the funds to remain idle for a day. subscriptions to the Buenos Ayres, Honduras, Spanish Quicksilver, and Peruvian loans have been to a good extent, according to report, from the provinces, which would rather tend to cause an accumulation of money in London for the moment, whatever the ultimate effect on this market of these loans may be

Upon the Stock Exchange the charge for short loan<sup>8</sup> against Government security is 21 to 3 per cent.

ENGLISH GOVERNMENT STOCKS .- The further accumulations of bullion, and the generally strong position of the Bank of England and also the Bank of France, do not apparently counteract the heavy tendency of the English funds. Consols stand now at almost precisely the same price as at the corresponding period of last year, but for the corresponding week of 1868 there is a difference of about 2 per cent., the price to-day being 925 as compared with 945, the closing price of the 27th of June two years ago. It may be pretty safely inferred, therefore, that the influence upon the price of securities paying only something over 3 per cent. has been materially due to the introduction of new foreign loans, new telegraphs, mining and other joint stock undertakings, and that so far the commercial demand for capital has not been largely instrumental in lowering the price of English Government stocks. Apprehensions as to withdrawals of bullion from both England and France as an ultimate result of the latedrought are subsiding, not only on account of the change in the weather, but from statements showing that the reports which had reached us from the continent were much exaggerated as they travelled, if they were not to some extent false from the beginning. The Funds close  $\frac{1}{8}$  better for the day, at  $92\frac{5}{8}$  to  $\frac{3}{4}$  for money, and 92 11-16 to 13-16 for the account. Reduced and New Threes, 925 to 3. Bank of England stock is lower for the week. at 233 to 5.

BRITISH GUARANTEED SECURITIES .- Tenders for 367,6002 Jamaica Four per Cents., guaranteed by the British Government, were received yesterday by the Crown agents for the colonies. The applications amounted to 415,100%, at rates varying from 105/ 10s downwards. The minimum price was 104/, at and above which rate tenders for 276,800/ were accepted. The Crown agents having then notified their wil-lingness to dispose of the remainder at the minimum a further sum of 23,200*l* was immediately taken, and it was stated that the balance, amounting to 67,600*l*, would be allotted to the first applicants at 104*l*. The price obtained in this instarce is, notwithstanding the more favourable condition of the money market at the present moment and the advantage of quarterly over half-yearly payments of interest, considerably below that realised for the Canada Guaranteed Four per Cents., placed on the London market in July, 1868.

Exchequer Bills.—Par to 5s prem. FOREIGN STOCKS.—On Monday Messrs C. de Murietta and Co. invited subscriptions for a Buenos Ayres Six per Cent. State Loan. Under the authority of the State laws of Nov.

17 and 18, 1868, and Jan. 27 and 28, 1870, Feb. 18 and 19, 1869 (as varied by a further law of Sept. 3 and 4, 1869), and Jan. 27 and 28, 1870, for 1,034,700l sterling in bonds to bearer for 100l, 500l, and 1,000l each, the interest payable half-yearly in London, the loan to be redeemed at par by annual drawings in about thirty-three years, by means of an accumulative sinking fund, which, however, the Government reserves to itself the right to increase, so as to redeem the loan at an earlier period. Price of issue, 88 per cent. A sinking fund of 1 per cent. will be applied annually, together with the interest on the bonds paid off ; the scrip closes this evening at 3 to 1 prem.

The closing of accounts, usual at this season, has kept this market dull all through the week, and in nearly all cases values have been moving downwards. The very weak supports upon which the prices of Turkish stocks rested a week ago have been proved by the gradual decline since we last wrote. It is felt that there is too much stock unabsorbed in the market, and that the maintenance even of existing values, as regards a great many of them, depends more a good deal, than a market with any pretence to stability should do, upon the existence of the status quo as regards money. In this department there are more than half a dozen "scrips" and other new loans talked of. There are not perhaps more securities offering to the public than the great savings of this country can absorb, as regards the total of them, but the two essential things to look at are, firstly, the quality, and secondly, how they are supported. Honduras scrip closes at 13 to 21 prem. ; Peruvian, 3 to 11 prem. ; and Spanish quicksilver, 14 to 4 prem.

The following communication has been addressed by the Committee of the Stock Exchange to the Austrian Ambassador in reply to his Excellency's letter of the 16th inst., with reference to the Anglo-Austrian debt :---

June 17, 1870. Sir,—The Committee for General Purposes of the Stock Exchange have received a copy of a letter which your Excellency addressed to Mr G. Worms on the 13th instant, with the request that it might be communicated to the Committee. They learn with regret that the Austrian Government views the course adopted by them in reference to the claims of Anglo-Austrian bondholders as indicating a hostile attitude on the part of the Committee, and that corresponding the discovery of the Committee and the correspondent it does not feat on the part of the Committee, and that consequently it does not feel itself in a position to propose a Bill for the next Reichsrath to meet the claims of the English holders of the Austrian stock.

The Committee feel it incumbent on them respectfully to represent to your Excellency that in dealing with the facts submitted to them they acted strictly in accordance both with precedent and with the provision of a well-known rule, and that their proceedings do not therefore appear to afford legitimate ground for the indefinite postponement of the settle-ment contemplated by the Imperial Government.

The Committee trust the foregoing explanation will suffice to dissi pate the impression which appears to have influenced the Imperial Government, and that the consideration of a subject which has so im portant a bearing on public credit will be resumed by the Imperial Government at a fitting opportunity.

I am desired to request that you will communicate this letter to Count Beust, and I have the honour to be, Sir, your Excellency's obedient servant, FRANCIS LEVINE, Secretary. To His Excellency Count Apponyi, Austro-Hungarian Ambaseador, &c.

The change in the weather has improved the tone of the foreign market towards the close, and a slight improvement is shown in prices.

The transactions recorded in the official list are as follow : -Brazilian 41 per Cent., 1863, 811; ditto 5 per Cent., 1865, 92; Chilian 5 per Cent., Scrip, 73/ paid, 61/2 prem.; Danubian 8 per Cent., 1867, 97; Egyptian 7 per Cent., 1862,  $87\frac{1}{2}$ ; ditto, 1864,  $91\frac{1}{6}$ ; ditto, 1868,  $82\frac{3}{4}\frac{1}{2}$ ; Greek 5 For Cent., 1865,  $91\frac{2}{5}$ ; ditto, 1864,  $91\frac{2}{5}$ ; ditto, 1868,  $82\frac{4}{5}$ ; Greek 5 per Cent., ex Coupons,  $11\frac{1}{5}$ ; Honduras Government Railway Loan, 876; ditto, 500l, 86 $\frac{1}{5}$ ; ditto, 100l, 87 $\frac{3}{5}$ ; Mexican 3 per Cent., 16  $15\frac{7}{5}$   $16\frac{1}{5}$ ; ditto, 1864,  $7\frac{5}{5}$ ; Peruvian 5 per Cent., 1865,  $91\frac{7}{2}$   $2\frac{1}{5}$ ; ditto, 1870, Scrip, all paid,  $82\frac{1}{4}$ ; Portuguese 3 per Cent.,  $33\frac{5}{5}\frac{3}{4}$ ; ditto, 1869,  $33\frac{3}{4}$ ; Russian 5 per Cent., 1822, 87; ditto  $4\frac{1}{5}$  per Cent., 1850,  $91\frac{1}{4}$ ; ditto 5 per Cent., 1862, 87; ditto Angle Dutch 1864, 1004 ditto 5 per Cent., 1862, 87; ditto Anglo-Dutch, 1864, 100/, 941; ditto ditto, 1866, 100/, 94; ditto 4 per Cent., Nicolas Railway, 691 1; ditto 5 per Cent., 1870, Scrip, all paid, 877 8 73; ditto, 1001, 88; Spanish 3 per Cent., 31; ditto ditto, 1867, 31<sup>§</sup>; ditto ditto, 1869, 31<sup>1</sup>/<sub>4</sub>; ditto 5 per Cent., Quicksilver Scrip, 55*l* paid, 1<sup>§</sup>/<sub>8</sub> prem.; Turkish 6 per Cent., 1854, 88  $6\frac{3}{4}$ ; ditto ditto, 1862, 100*l*, 74<sup>1</sup>; ditto 5 per Cent., 1865, 52<sup>5</sup>  $\frac{3}{8}$ ; ditto 6 per Cent., 1865, 74  $3\frac{1}{2}$ ; ditto 6 per Cent., 1869, 63<sup>3</sup>; ditto ditto, 100*l*, 63<sup>3</sup>; Italian 5 per Cent., 1861, ex 25 france, 587.

ENGLISH	RAT	TAVA	v ST	ogu	· .	The	tom	rible	accident	noa

ENGLISH RAILWAY STOCKS .-The terrible accident near Newark, which has so depressed the price of Great Northern stock, especially the "A," which stood at 135<sup>1</sup>/<sub>2</sub> to 136 at the which stood at 1355 to 136 at the time of the catastrophe, and subsequently touched 1301, has unfavourably influenced the course of prices in this department. It may be said, and perhaps truly, that there was still too much speculative tension, owing to the continued ease in the money market, which disinclines lenders to call in more loans than they can possibly help, and that the circumstance referred to has given rise to a num-ber of precautionary sales which would not otherwise have been made. One of the apparently strongest stocks in the market—North-Eastern Consols—has been subjected to a degree of fluctuation hardly credible under the circumstances, but confirms the view that many speculators who have profited out of the last six months' rise were still endeavouring to squeeze something more out of it. The price of Metropolitan Ordinary stock has been very unsteady owing to the renewal of the old gambling operations. To-day there has been a better feeling and a recovery has taken place, especially in North-Eastern Consols, Great Western, London and North-Western and Metropolitan.

FOREIGN RAILWAYS.—Subscriptions on Monday last were invited by the London and County Bank for an Honduras 10 per cent. Government Railway Loan of 2,500,000/, at 80 (or about 78, reckoning allowances), to complete from the Atlantic to the Pacific the Interoceanic Honduras Railway now in course of construction, and which is to be finished in the autumn of 1872. The instalments are to extend to the 15th of December, and the loan is to be redeemed at par in 15 years by an accumulative sinking fund of 3 per cent. per annum

The latest Lombardo-Venetian Railway traffic return shows a decrease of 3,839*l* compared with the corresponding period of last year.

AMERICAN SECURITIES.—The general tendency to diminish holdings with the approach of the half-year has extended to these securities, although there has been but a triffing reduction in the price. The 1862 5-20 Bonds reached at one time  $19\frac{1}{4}$  to  $19\frac{1}{2}$ , but in spite of the decline in the exchange on London and the consequent less probability of the export of American gold the figures have gradually relapsed to 90 to 90 $\frac{1}{4}$ . The States bonds have improved  $\frac{1}{8}$ to-day—Eries  $\frac{3}{8}$  to 19 to 19 $\frac{1}{4}$ , and Illinois 1 to 113 to 114.

Advices from New York mention that the State of Arkansas, which more than 30 years ago attempted to repudiate its engagements, and stopped payment of the interest on its debt of 4,300,000 dols, has passed an Act providing for the issue of new bonds for every dollar of the old and for all the overdue coupons thereon, and providing for the future payment of interest and principal. These bonds bear interest at 6 per cent. per anuum, and are secured by the assets of the real estate and State banks, consisting of mortgages on land and property, and by a special tax of  $\frac{1}{4}$  per cent. levied upon all the taxable property of the State. Of the old bonds 1,500,000 dols are held by Mr Holford's heirs, London, 350,000 dols by other English capitalists, 1,800,000 dols by the United States' Government as trustee for the Smithsonian Institute, and the balance by sundry parties unknown.

BANKS.—The following are the principal changes for the week :—Anglo-Austrian have advanced 2, to 16 to 18 prem.; London and Westminster  $1\frac{1}{2}$ , to  $61\frac{1}{2}$  to  $62\frac{1}{3}$ ; and Bank of British Columbia 1, to 16 to 18; also, Chartered of India, Australia, and China, at 17 to 18; London Bank of Mexico and South America, at  $1\frac{1}{2}$  to  $\frac{1}{2}$  dis.; and Union of Australia, at 46 to 47, have improved  $\frac{1}{2}$ .

TELEGRAPH SHARES.—The following are the principal changes for the week :—Anglo-American Stock, at 82 to 5; and Submarine, at 245 to 50, have advanced 2; China Submarine have improved  $\frac{7}{3}$ , to  $2\frac{5}{3}$  to  $\frac{3}{2}$  dis.; and Anglo-Mediterranean,  $\frac{3}{4}$  to 15, to  $\frac{1}{2}$  ex div.; also Atlantic, at  $12\frac{1}{4}$  to  $13\frac{1}{2}$ ; British-Australian, at  $2\frac{5}{3}$  to  $\frac{3}{4}$  dis.; and West India and Panama, at 7 to  $\frac{1}{2}$ , are each  $\frac{1}{4}$  higher.

MISCELLANEOUS SHARES.—It has been notified that the Governor and the Committee of the Hudson's Bay Company intend to recommend that the 300,000/ received from the Dominion of Canada be returned to the shareholders, but that in the present uncertain state of affairs at Red River they do not propose to declare a dividend at the ensuing meeting.

The following are the changes for the week :-Bolckow-Vaughan have advanced 4, to 35 to 45 prem.; Telegraph

# THE ECONOMIST.

[June 25, 1870

Construction  $1\frac{1}{4}$ , to  $26\frac{7}{2}$  to  $27\frac{1}{8}$ , ex return ; and India Rubber and Gutta Percha shares 1, to 45 to 46; also Anglo-Austrian Bondholders' Committee Certificate, at  $1\frac{1}{2}$  to  $2\frac{1}{2}$ ; City Offices, at  $23\frac{1}{2}$  to  $22\frac{1}{2}$  dis.; and North-British and Mercantile, at 2 9 to 30, have improved  $\frac{1}{2}$ ; on the other hand, Peninsular and Oriental Steam have declined 1, to 41 to 43; and Hudson's Bay  $\frac{1}{2}$ , to  $12\frac{8}{5}$  to  $12\frac{1}{2}$ .

FOREIGN EXCHANGES.—The rates on St Petersburg and Italy are more favourable to this country.

BULLION.—The sum of 55,000*l* has been sent into the Bank this day. The Java has arrived from New York with 31,800*l* in bullion. The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The Bank has received nearly the whole of the late arrivals of gold, and there is but little now left on the market for disposal. The amount sent in since our circular of the 16th inst. is 446,000*l*; and as the Continental Exchanges are still very high, all sums coming to hand will be retained here. The Silesia has brought 23,500*l* from New York, and the Hanover has brought 19,600*l* from New York—total, 43,100*l*.

Silver remains firm at 60<sup>1</sup>/<sub>2</sub>d per oz standard, the demand being for Holland and Japan. There are no orders whatever for India. We are without any arrivals to report.

Mexican Dollars.—We continue to receive shipments of this coin from New York, the Weser having brought 24,000/. The Cuban has also brought 11,900/ from the West Indies. The demand continues good for China and the Straits, and the price remains firm at 59gd per oz.

Exchange on India for Banks drafts at 60 days' sight remains as quoted in our last, viz., 1s  $10\frac{3}{4}$ d to 1s 11d per rupee.

India Government Loan Notes.—We quote 4 per Cents.  $92\frac{1}{2}$  to 93, 5 per Cents. 102 to 103, and  $5\frac{1}{2}$  per Cents.  $109\frac{1}{2}$  to 110.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0d per oz std, firm; ditto containing 5 grains gold, 5s 0d per oz std; last price; fine cake silver, 5s 5d per oz; Mexican dollars, 4s 11gd per oz, last price, firm. Quicksilver, 7l 17s per bottle; discount, 3 per cent.

The Bank of England notifies that on and after 1st of July it will receive in London, and at the country branches, light gold coin at the rate of 3l 17s 9d per ounce, instead of at the present price of 3l 17s  $6\frac{1}{2}d$ .

The Stock Exchange Committee have appointed Wednesday, 29th June, a special settling day in the shares of the Thetis Marine Insurance Company (Limited), and the Mauritius Gas Company (Limited), both to be officially quoted, but the latter company in the bi-weekly list only.

The special settling in the scrip (and paid-up scrip) of the Peruvian Government Consolidated Bonds will take place on Monday, the 27th inst.

# COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane to-day, the attendance of millers was limited, and the supply of English wheat was small, but fully equal to the inquiry. Owing to the cessation of the French demand there was much inactivity in the trade, and the general tendency of the quotations was downwards. No actual decline, however, was reported in values. In foreign wheat a limited business was transacted on former terms. All spring corn ruled very firm, notwithstanding the vains which have fallen in various parts of the country, and the recent advance in prices was well maintained for both barley and oats. Beans and peas commanded extreme currencies, owing to the discouraging accounts received of the growing crops. The flour trade was very inanimate, and country growing crops. The flour trade was very inanimate, and country marks could be bought on easier terms. The imports of foreign and colonial produce into London this week has amounted to 2,010 qrs of wheat, 8,000 barley, 43,610 o.ts, 2,250 sacks and 3,150 barrels of flour. At Liverpool and Wakefield this morning the wheat trade

ruled dull, and sales could only be effected at a slight decline.

The Liverpool cotton market has fluctuated considerably during the past week, m re especially as regards cotton afloat. On Monday and Tuesday a good busines was done, buyers being induced to opera e more freely at the low prices current; since then how-ever the market has again relapsed, and closes at the worst point of the week, quotations generally showing a d cline of  $\frac{1}{5}d$  to  $\frac{1}{4}d$  per lb since last Friday. The total sales for the week are 54,980 bales, of which the trade have taken 44,580 bales, speculators and exporters 10,400 bales. The imports are 63,190 bales ; the actual exports, 4,427 bales; and to-day's stock is estimated a 642,350 bales. Quotations for American descriptions have declined  $\frac{1}{4}1$  per lb; East Indian  $\frac{1}{8}1$  to  $\frac{1}{4}d$  per lb; and Bengals,  $\frac{1}{8}d$  per lb since this day se'nnight. To-day the market closes depressed; sales 7,000 bales, at prices rather in buyers' favour.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 23, 1870:-

	Imported.		Exported.
Americanbales	35,901		2,150
Brazilian	5,868		324
East Indian	22.023		5,545
Egyptian	3.187		90
Miscellaneous	3,824	********	298

At New York, on June 23, midding Upland cotton was quoted at 21<sup>1</sup>/<sub>2</sub> cents per lb. Bombay advices to June 23

quoted Dholie ah cotton dull, and declining in value. Messrs E. B. Liddell and Co., of Alexandris, have furnished the tollowigh report, dated June 10:-We have no change to note in cotton since our last of 4th inst., the same depression

hanging over our market. Transactions have been too limited to alter quotations. The news of declining prices in the English market has however made sellers easier. Fair to fully fair, 12<sup>1</sup>/<sub>2</sub>d to 12<sup>3</sup>/<sub>2</sub>d per lb, f.o.b.; good fair to fally good fair, 12<sup>1</sup>/<sub>2</sub>d to 12<sup>3</sup>/<sub>2</sub>d, di to; good to fine Gallin, 13<sup>1</sup>/<sub>2</sub>d to 14<sup>4</sup>/<sub>2</sub>d, ditto. Freight for Liverpool for steam pressed cotton about <sup>15</sup>/<sub>16</sub>d per lb. Value for November and December delivery has not undergone any change, and re-mains stationary as quoted in our last, with a quieter market. October delivery, 12<sup>5</sup>/<sub>2</sub>d per lb, f.o.b.; November delivery, 12<sup>5</sup>/<sub>8</sub>d, ditto; December delivery, 12<sup>3</sup>/<sub>8</sub>d, ditto for steam pressed cotton. Hydraulically pressed costs ab ut <sup>3</sup>/<sub>8</sub>d per lb less than the former. Exports. Exports.

The colonial produce markets have ruled very quiet throughout he week. Tea has sold on former terms, but the transactions the week. have not been numerous. Good coloury coffees have been steady in value, but inferior parcels have not been inquired after. Rice afloat has been in improved request, at very ful quotations. Sugar has ruled flat and rather lower. The public sales of colonial wool have progressed steadily, at very full currencies. The annexed is dated Havana, May 1 :-- Clayed sugars-The

fall of 6d in London announced by the cable early in the mon h produced no perceptible effect on our prices. The market was dull for a few days, reviving however very shortly, with pretty extensive transactions on the basis of  $8\frac{1}{4}$  rs to  $8\frac{1}{3}$  rs No. 12 current sorts, and  $8\frac{5}{8}$  rs to  $8\frac{3}{4}$  rs for crystalised, and which afterwards became of more importance on receipt of cable intelligence of a recovery of 3d in London, and notwithstanding recent advices of that removery having been lost, and likewise of lower prices in New York, the market continued active and even higher, cl sing last Saturday firm at  $8\frac{3}{8}$  rs to  $8\frac{1}{2}$  rs for No. 12 current sorts, and  $8\frac{3}{4}$  rs for crystalised. To-day, how-ever, we have cable advices of an advance of  $\frac{1}{8}$ c in New York, while on the other hand a further decline of 3d is reported from London. But those fluctuations have not affected the market, our last figures being the current r tes of the day. The month's transactions amount to about 130,000 boxes, the bulk of which was for Europe, whither a fair proportion of our crop is finding its way, so far considerably in excess of the quantity sent for ward last year, while shipments to the United States exhibit a large decrease (in boxes) as shown by the following figures :- Exports to Europe and the United States hence and from Matanzas to date -Europe, 654,499 boxes and 26,726 hhds, against 415,113 boxes and 11,254 hhds in 1869; United States, 201,944 boxes and 72,857 hlds, against 374,365 boxes and 56,818 hlds in 1869. Muscovadoes were in fair demand, and would have been operated in more extensively bet for holders demanding more than buyers could afford to pay. We heard of the following transactions on the spot, which include sales effected to-day, at an advance of  $\frac{1}{4}$  rs to  $\frac{3}{5}$  rs after the rise in New York was known—say about 800 hhds common at  $6\frac{3}{4}$  rs to  $7\frac{1}{4}$  rs, 1,700 hhds fair at  $7\frac{1}{4}$  rs to  $7\frac{5}{8}$  rs, and 2,500 hhds good to prime at  $7\frac{1}{2}$  rs to 8 rs. The market closes very strong at  $7\frac{5}{8}$  rs for fair, and  $7\frac{3}{4}$  rs to 8 rs for good refining. On the we heard of the following sales :-

1.513	Good Refining.				Fa	ir.		Common.				
Matanzas Cardenas Sagua {Town Boca Caibarien	$1,500 \\ 700 \\ 1,000$	at at at	7777	@ 7779	hhds 6,700 2,300 800 3,200 1,200	at at at	7777	@ 710014334	300	at	rs 6 <u>1</u> 7	rs 7 7 <del>1</del> 7 <del>5</del>

Annexed is Messrs Durant and Co.'s circular:-At the periodical public sales of silk, the quantity offered was 1,150 bales Bengal, 2,500 bales China, 700 bales Japan, 1,600 bales Canton silk, with about 200 bales Bokhara, and 200 ballots Persian silk. The whole was allowed to pass rapidly without bidding, except some few hundred bales of various sorts which were printed "to be sold without reserve," and these were taken at very irregular prices—generally at considerable reduction upon supposed value. The general market is very quiet—still conflicting estimates from Europe, and no telegrams from China. The deliveries are good and consumption continues without diminution, but all is suspense for the moment.

The annexed is dated New York, June 11 :- The general markets are characterised by the usual quiet incident to the season, though we not ce here and there a little more activity in some departments, resulting from the reduction of railway freights by the trunk lines to the West, consequent upon the renewal of hostili-ties between the Erie and Central managers. The export trade in breads uffs to Europe continues quite brisk, in consequence of reduced supplies and unfavourable crop prospects in Eugland and

# THE ECONOMIST.

France, and the falling off in receipts from Russian ports. There is a general disposition among the trading classes to pursue a conservative course, and, with good crop prospects and an easy condition of monetary affairs, the feeling as to the future of trade is, on the whole, as hopeful as could be expected. As regards prices, there have been no very marked changes, though in a majority of cases buyers have the advantage. The rates for call loans remain a to 5 per cent., and commercial paper 5 to 7 per cent.

### THE COTTON TRADE.

#### LIVERPOOL.-JUNE 23.

The cotton market was much depressed on Friday and Saturday, but on Monday the decline attracted the attention of buyers, and with increased sales higher prices were paid. On Tuesday the business was considerable, with some degree of animation, particularly in purchases to arrive; but yesterday and to-day the sales have again been limited, and a duil tone has appeared, the quotations showing a decline of  $\frac{1}{2}d$  to  $\frac{1}{2}d$  per lb from the rates of Thursday last. Sea Island sells slowly, and the medium grades of Florida being freely offered, are 1d lower. Common continues to be neglected, while the better kinds bring full prices. American has been in general request, but declined considerably on Saturday. On Monday and Tuesday prices rallied  $\frac{1}{2}d$  to  $\frac{1}{4}d$  per lb, but have since receded, and are now  $\frac{1}{4}d$  per lb below the rates of Thursday last. New York advices to the 23rd instant quote middling Upland 23 $\frac{1}{2}$  cents, costing to sell in Liverpool 11d per lb, by steamer. Brazil has been in moderate demand, and prices are  $\frac{1}{2}d$  to  $\frac{1}{4}d$  per lb. In East Indian the business continues restricted, and to effect sales holders have submitted to a further reduction of  $\frac{1}{2}d$  to  $\frac{1}{4}d$  per lb.

reduction of ½d to ½d per lb. In transactions "to arrive," after considerable depression on Saturday, prices recovered, and showed on Tuesday an advance of ¼d to ½d per lb, but yesterday a reaction took place, and the last quotations are—American, basis of middling, from any port, Octover-November shipment, 9¾d, 9¾d; June-Jaly, 10d; May 10d. Mobile, ship named, not below good ordinary, 10d. Dhollerah, fair new merchants, Cape or Canal, May shipment, 8¼d; 8 ¼d, 8¼d; Cape, May, 8¾d; 8¼d; May-June, 8¼d, 8¾1; Canal, May, 8¼d per lb.

The sales of the week, including forwarded, amount to 54,980 bales, of which 4,480 are on speculation, and 5,920 declared for export, leaving 44,580 bales to the trade.

JUNE 24.—The sales to-day will probably amount to about 8,000 bales, with a dull market.

The actual stock of cotton in Liverpool will be taken on Thursday next, and declared on Friday morning, 1st July.

The above figures show :-

In speculation there is a decrease of 122,160 bales. The imports this week have amounted to 63,195 bales; and the quantity of American cotton afloat to Great Britain (including Cable advices to June 18) is 108,000 bales. The actual exports this week have been 4,427 bales.

#### LONDON-JUNE 23.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :-

London Cotton Brokers' Association :--During the week large sales have been effected in cotton to arrive at fluctuating prices, closing generally at  $\frac{1}{3}d$  to  $\frac{1}{4}d$  decline since our last report. On the spot a fair amount of bus ness has been done, and prices at the close are  $\frac{1}{3}d$  to  $\frac{1}{4}d$  per lb lower. PRESENT QUOTATIONS.

#### NEW YORK .- JUNE 10.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 10. From the figures thus obtained it appears that the total receipts for the seven days have reached 17,995 bales, against 22,441 bales last week, 30,737 bales the previous week,

# [June 25, 1870.

# June 25, 1870.]

# THE ECON JMIST.

and 44,055 bales three weeks since, making the aggregate since Sept. 1, 1869, up to this date, 2,792,879 bales, against 2,072,187 bales Sept. 1, 1809, up to this date, 2, 32, 673 dates, against 2,072,187 dates for the same period in 1868.9, being an increase this season over last season of 720,692 bales. The exports for the week ending this evening reach a total of 22,962 bales, of which 16,489 bales were to Great Britain and 6,473 bales to the conti-nent, while the stocks at all the ports, as made up this evening, are new 263.886 bales. Below we give the exports and stocks now 263,886 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-unght:-

We have had a duil market the past week, with prices declining almost daily. The continued heavy movement at Bombay, and the less favourable news from the manufacturing districts, added to the fact that most of the markets are well supplied with goods, have rather discouraged holders and given buyers the advantage. There appears to be a growing belief that rates must further decline unless our own crop reports become unfavourable, as with the large India movement the visible supply is gradually increas-ing and the new crop year is likely to open with increased stocks. Our spinners are, therefore, taking only enough to supply their more pressing wants, while exporters confine their purchases to a few unimportant orders which they find it necessary to fill. Yesterday, however, there was a slight revival of confidence arising from an improvement in the tone of the foreign advices, but to-day this improved feeling was not sustained, although continued steadiness was reported at Liverpool, and our market closed heavy, with but very little inquiry. For forward delivery the description reach 10,500 bales (all low middling or on the basis of low middling), of which 5,050 bales were for June, 400 at 214,

100 at 21 $\frac{3}{8}$ , 1,050 at 21, 1,000 at 21 $\frac{1}{8}$ , 200 at 21 $\frac{1}{4}$ , 400 at 20 $\frac{3}{4}$ , 230 at 20 $\frac{1}{3}$ , 1,500 at 20 $\frac{5}{8}$ , and 200 at 20 $\frac{1}{4}$ ; 2,700 bales for Jaly, 100 at 21 $\frac{1}{4}$ , 600 at 21, 500 at 20 $\frac{1}{14}$ ; 300 bales for August at 21 $\frac{1}{4}$ ; 700 bales for September, 200 at 19 $\frac{7}{5}$ , 200 at 20 $\frac{1}{18}$ , and 300 at 20; 1,650 bales for O tober, 1,300 at 19, 150 at 19 $\frac{3}{5}$ , and 200 at 19 $\frac{1}{5}$ . The total sales for immediate delivery this week for up 8,159 bales, of which 3,367 bales were taken by spinners, 319 bales on speculation, 4,373 bales for export, 100 bales in transit, and the following are the closing quotations : following are the closing quotations :-

### MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 23 .- The past week has been a very inactive one in our market, both for yarns and goods, but prices do not recede much, owing to the engagements of producers, and the absence of stocks. The decline on the week is only about  $\frac{1}{2}d$  per piece in goods. The India and China merchants have bought very sparingly, and only in little lots, for so we pressing orders. The prospects of the home-trade is improving, but present orders can principally be supplied from stock. For the Continent we hear of very little doing as yet, and the Levant merchants are almost out of the market, as advic s from that quarter indicate no business in progress. Our market closes very quietly, and prices in favour of buyers.

animation, the amount of actual business being comparatively There is a steady business still doing in lustre and fancy small. yarns for immediate consumption. There has been rather more activity in the piece market. Prices are steady.

DUNDEE. - Our flax market continues exceedingly firm; rather more business has lately been doing, at improving prices, and in some cases holders refuse to sell, unless at a further advance in There has been some inquiry for fine tows, but the high prices. rates required by holders tend to check business; in medium qualities some transactions have been reported, at steady prices. The market for jute has remained quiet. The yarn market con-tinues very firm, and some kinds of flax yarns are still in active demand, at steady prices. The demand for linens, although not so active as to enable manufacturers to establish any important advance in prices, is fair, and those engaged in the trade are in general fully employed, although, in some cases probably, not to much advantage.

### CORN.

#### AMERICA GRAIN AND FLOUR MARKETS.

NEW YORK, June 10.-The whole market the past week has been active, excited, and unsettled, with decided fluctuations in prices. Flour has come forward but very moderately for the season, the leading shipping brands continue scarce, and the demand showing some improvement. Prices have advanced in that particular 50 cents per barrel, while for other descriptions 25 cents per barrel will cover the improvement. Supplies of flour continue small in all the leading markets, and to secure large lines buyers are compelled to contract with millers for the flour to be made. On Wednesday several thousand barrels extra State sold at \$5.60, on yesterday several thousand barrels more at \$5.75, and to-day prices ruled very strong at the advance, with a good degree of activity. The finer qualities of flour from spring wheat have advanced to \$7.25, but do not readily bring that figure. Flours from winter wheat are scarce. The wheat market was very excited early in the week by large orders from France and the speculation which those orders stimulated. On Wednesday No. 2 Milwaukee had advanced to \$1.321, or 19c above the lowest point Then there came a pause, owing to dull private acin April. counts from Paris, and yesterday at the close the decline was 4c a bushel, No. 2 Milwaukee having sold at \$1.28. To-day there was a better feeling; the receipts were not so liberal as expected; French orders again appeared in the market, there was a brisk speculation, and for winter wheats the English demand was large. speculation, and for winter wheats the English demand was large. The business embraced about a dozen boat loads, mostly at \$1.31 for No. 2 Milwaukee, and 50,000 bushels amber winter at \$1.43 to \$1.45 in store. Corn has been in better supply, but the de-mand has been fair, and latterly prices have known more firmness; several boat loads of good to prime new Western mixed sold yesterday at \$1.4 to \$1.5 afloat,-to-day the market was rather stronger but quiet. The receipts at the West are considerably in excess of last year. Outs have been very dull for some days, a few car-loads sell at full prices, but full boat-loads were not sale-able at the close at over 63c to 65c in store and afloat.

### LONDON MARKETS.

# STATE OF THE CORN TRADE DURING THE WEEK

MARK LANE, FRIDAY EVENING. The wheat trade during the past week has shown few symptoms The wheat trade ouring the past week his shown lew symptoms of excitement. It now appears that the heavy purchases of wheat inde on French account were the result of a speculative feeling, induced by the unf-wourable accounts of the growing crops. Whatever may be the real prospect of the wheat harvest in France—and we believe that the accounts recently received were much exaggerated-there appears to be little doubt that stocks on the Continent are light, and that the spring corn crops generally have suffired from drought. The recent upward move-ment in values here was therefore amply justifiable as a precau-tionary measure against being drained of the rather limited supplies

of breadstuffs at present available. With the cessation of purchases by French buyers the market has become inanimate, and, though no actual decline has taken place at Mark lane, the tendency of prices is decidedly downwards. The decline, however, is checked by the firmness with which farmers persist in withholding their by the firmness with which farmers persise in withholding their produce from market; which, while it prevents large sales, enables factors to demand full rates. Supplies of English wheat at Mark lane have been very small throughout the week, but have been quite equal to the demand, which has ruled very languid. There has been no disposition on the part of either factors or millers to conclude business, and the transactions have been in retail only. Our reports in regard to the prospects of the crops have been embodied in an article which will be found in another column.

Feeding stuffs of all kinds have continued very firm in value. Barley has commanded extreme rates, while maize and oats have sold at a furth-r rise of 1s per quarter. Beaus and peas have been nominal in value in the absence of sufficient business to test To-day flour was extremely dull, and country marks might have been bought on easier terms.

Mr George Dornbusch thus reports the state of the floating grain to arrive a large business has been done. Wheat-Only 1 cargo has been offered on sale off the coast, for which over last week's prices have been asked, and the cargo remains still un-In cargoes on passage and for shipment, the few sales made sold. In cargoes on passage and for shipment, the few sales made have been at about late prices. Maize—Only 1 cargo has been offering off the coast, and sold at fully late prices, viz., 33+ per 480 lbs. In corn to arrive large operations have been entered into at improving prices. In barley to arrive a large business has been done at an improvement of about 3d to 6d on the week. Rye - At first prices declined, but since a rally has taken place. The reported sales are as follows: --Wheat--1 arrived cargo: Ghirka Orlessa, at 488 6d per 492 lbs. On passage, 4 cargoes: Winter to New York, 50s 3 i per 480 lbs; Caucasian, 485 per 492 lbs; Chillian, 525 per 500 lbs. Shipped or to be shipped, 1 cargo:--Red Winter to sold. 508 31 per 480 lbs; Caucasian, 488 per 492 lbs; Chillian, 528 per 500 lbs. Shipped or to be shipped, 1 cargo:—Red Winter to Montreal, 528 64 per 480 lbs. Maize—on passage about 20 car-goes: Fox nian. 32s per 492 lbs; Danubian, 308 6d to 318 6d; Ibrail, 308 94; Kustendji, 308 9d to 318 6d; Italian, 318 6d per 480 lbs; Galatz, 318 10 $\frac{1}{2}$ d to 328 6d; Rachova, 328 6d per 492 lbs. # THE ECONOMIST.

#### COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK. FOR REPORT OF THIS DAY'S MARKETS SEE " POST

# MINCING LANE, FRIDAY MORNING.

SUGAR.—The market continues excessively dull, and business has again been principally in floating cargoes of foreign purchased by out-port refiners. The trade do not appear to be influenced by the reports of a probable deficient yield of beet sugar owing to the drought. In West India the sales to yesterday (Thursday) evening amounted to only 1,069 casks. The Barbadoes was again mostly held above the value, and in East India descriptions hardly any business has been transacted. The landings continue heavy, and the surplus in the stock here has been increased to over 12,000 tons. Mauritius.—About 300 bags brown have been sold at 22s per cwt.

Mauritius.—About 300 bags brown have been sold at 22s per cwt. Bengal.—200 bags brown realised 21s per cwt. Penang.—266 bags sold by auction at 26s to 27s 6d for soft yellow.

422 baskets common soft brown were withdrawn. Natal.-277 bags brought 21s to 21s 6d for ordinary brown

Foreign.-192 bags dry grainy yellow taken in at 38s. Privately 50 tons muscovado Manila at 20s per cwt. Afloat three cargoes of Porto Rico at 23s 10 d to 24s; and one of Cuba muscovado at 24s per cwt. Refined is without improvement in demand, and for pieces lower

prices have again been accepted. MOLASSES.—Very little inquiry has been experienced, and sales are

MoLASSES.—Very little inquiry has been experienced, and sales are confined to a few puncheons West India at previous rates. RUM.—West India descriptions are steady; but Jamaica continues the most readily saleable. 150 puncheons have been sold at 3s 8d to 4s 2d. 20 puncheons Berbice at 1s 11½d, and 30 puncheons Leewards at 1s 10½d. Mauritius is in large supply and cheaper. 190 puncheons sold at 1s 5d per gallon. The deficiency in the stock has been some-that reduced this week. sold at 1s 5d per gallon. what reduced this week.

What reduced this week. COCOA.—The trade demand is very limited, and, as importers show some inclination to realise prices, have slightly given way. 229 bags Grenada partly sold at 48s to 64s 6d. 1,511 bags Trinidad partly sold at 65s to 107s 6d for common to superior. 273 barrels St Lucia sold at 45s 6d to 46s. 2,821 bags Guayaquil, 282 bags Bahia, and 44 bags Caraceas were withdrawn. The stock of colonial is rather in excess of her provide but forcing a force of the stock of colonial is rather in excess of

last year's, but foreign shows a deficiency. COFFEE.—The result of the Dutch sale of Java being more favourable COFFEE.—The result of the Dutch sale of Java being more favourable than was anticipated has had a good influence on the market, and plan-tation Ceylon has realised better prices than could have been obtained last week. 2,294 casks 1,157 tierces, barrels, and bags plantation Ceylon at auction sold: grey, 598 6d to 67s; coloury, small to mid-dling, 61s to 68s 6d; good middling to fine, 71s to 85s 6d. 704 bags native partly sold at 44s 6d to 51s for small to fine bold. 29 bales fine Mocha sold at 132s per cwt. 47 cases 272 tierces Neilgherry brought 61s to 84s 6d for small to fine bold bright coloury. 150 casks 81 bags Jamaica sold · pale, 48s to 51s; mixed palish to good coloury, 59s to 78s per cwt. Of foreign 7,692 bags Costa Rica mostly sold at 56s to 72s 6d for dull greyish to good coloury. 868 bags Guatemala were withdrawn. Clearances at this port continue large, but arrivals

bes to 728 od for dull greyish to good coloury. 868 bags Guatemala were withdrawn. Clearances at this port continue large, but arrivals being heavy the stock has further increased. Ricz.—There is still an inquiry for soft grain for arrival; and a further slight advance has been paid. Four cargoes Necrancie have been sold at 10s to 10s 3d; two of Bassein at 9s  $10\frac{1}{2}$ d to 10s  $1\frac{1}{2}$ d; two of Rangoon at 9s 9d to 10s  $1\frac{1}{2}$ d; and one of field Siam at 8s 6d landed. Privately on the spot about 700 tons white Bengal: old at 11s; fine new, 12s 3d to 12s 6d ner owt. Of 13 143 bags Necrancia in auction a new, 12s 3d to 12s 6d per cwt. Of 13,143 bags Necrancio in aution a small part sold at 7s 9d for ordinary. 12,400 bags Rangoon partly sold at 8s to 9s 6d. 700 bags old Ballam obtained 8s 6d; and 685 bags fine white Bengal at 12s per cwt.

DRNALTERY GOODS.—For cutch and gambler there is very little inquiry: of the former a parcel of good pegu in auction was bought in at 22s 6d per ewt. Myrabolanes bring former prices. Safflower continues firm. 170 bales Bengal sold at 8/ 15s to 17/ 10s for common to fine.

SHELLAC, with an increased demand, has risen 2s per cwt.

400 cases sold. Native orange, 85s 6d; good second orange, 94s 6d to 96s 6d; and livery garnet, 85s to 85s 6d per cwt. JUTE.—There has been little inclination to buy this week, and of about 11,000 bales offered in auction, only one-third was taken off, prices in some cases being rather lower. METALS.—The upward movement in iron has continued. At one

time 61s was the quotation for mixed Nos., but latterly sales have been made 6d under this price. Rails and bars are firm. In spelter there is an entire absence of transactions. Tin has been rather pressed for sale, and straits have been recently done at 132s 6d per ton. Lead is still diffi-cult of disposal. Copper has again been in demand, and higher prices realised, large sales of Chill being made at 68/ 10s to 69/ 10s per ton.

realised, large sales of Chili being made at 68/ 10s to 69/ 10s per ton. LINSEED.—There has been less doing this week, but the market has a firm appearance. Calcutta, 63s 6å to 63s 9d on the spot, and 65s 9d for floating parcels. Rapeseed has become slow of sale, but no decline in value has resulted as yet. OILS.—For common olive oil there has been somewhat more demand. Sperm oil is flat at 90/ to 91/. Pale seal is quoted at 38/ to 39/. Cocoa-nut oil has been extremely dull, chiefly owing to the excessive heat. Ceylon quoted at 38/ to 38/ 10s; and Cochin, 44/ to 45/. Palm oil is neglected at nominal value, 38s 6d to 39s per ewt. Linseed has been without important change, ruling at 31s 6d per cwt. Brown rape has been sold at 43s, being cheaper. Refined is offering at 45s and 48s per cwt respectively for English and foreign. PERFOLEUM.—Sales are restricted to small lots at 1s 7d for S.W. TALLOW.—Petersburg has slightly advanced, the present quotation being 45s 9d on the spot. For delivery last three months 46s 3d to 46s 6d per cwt is the quotation. PARTICULARS OF TALLOW—Monday, June 20, 1870. 1867. 1868. 1869. 1870.

POSTSCRIPT. FRIDAY NIGHT. SUGAR.—The market is rather less depressed in tone to-day. 217 casks Barbadoes in auction mostly sold, and the sales of West India for the week amount to 1,450 casks. Two cargoes of Porto Rico sold affoat —one at 24s for the United Kingdom, and one at 24s 9d for a near port.

the week amount to 1,450 casks.

COFFRE sold steadily. 74 casks plantation Ceylon partly sold by auction at 63s; 1,373 bags native Ceylon at 45s 6d to 54s 6d for small to superior bold; 813 bags fine Mysore at 70s to 81s 6d for small to bold palish: 4,350 bags Costa Rico at 54s 6d to 73s 6d for mixed palish to for high fine blue.

SHELLAC.—289 chests sold at previous rates. RICE.—1,364 bags fine new white Bengal sold at 12s 6d to 13s 6d per cwt.

RUM.—Further large sales of Mauritius at 1s 5d per gallon. OILS.—Cocoa-nut sold at auction rather cheaper.

Tallow.-Some old P.Y.C. sold by auction on lower terms. Austra-lian sold steadily.

#### ADDITIONAL NOTICES.

REFINED SUGAR .- The home market is without change, at steady

rates. Dutch crushed remains quiet; sales have been made for August and September next at 30s 6d for first marks, f.o.b., Amsterdam. GREEN FRUIT.—The report of Messrs Keeling and Hunt state that oranges have a good sale. Lemons improved in value in consequence of warm weather. Nuts in demand from the scarcity of home grown fruits.

uits. West India pine apples sell freely. ENGLISH WOOL.—Very slow sale; demand principally for long wools.

FLAX.-Market steady. HEMP.-Market firm, and higher prices paid this week. SKEDS.-The continued drought causes the seed trade to rule excessively firm, and holders anticipate higher prices. TOBACCO.-The transactions in North American tobacco during the

TOBACCO.—The transactions in North American tobacco during the past week have been upon a very limited scale, prices, however, continue firm; for fine selections a triffing advance is saked. In other growths there have been but little doing, and supplies are but small. LEATHER AND HIDES.—During the past week the transactions in leather have been generally limited in extent. At Leadenhall on Tues-day there was a moderate supply of fresh goods; the attendance of buyers was small, and the demand was chiefly for prime light English butts, light dressing hides, English and foreign bellies, calf skins of all weights, and English horse hides. Prices are unaltered. METALS.—A small steady business has been doing in several metals.

Weights, and English horse hides. Frices are unaltered. METALS.—A small steady business has been doing in several metals. Copper has been bought in small quantities daily, and prices are firmer. Iron is unchanged. Tin finds a moderate demand for consumption, which is keeping prices steady. Spelter is rather neglected. Lead also is little inquired for. Tin plates are in fair request. TALLOW.—Official market letter issued this evening :—

#### METROPOLITAN CATTLE MARKET.

MONDAY, June 20.—The total imports of foreign stock into London last week amounted to 8,168 head. In the corresponding week in 1869 we received 12,488; in 1868, 7,410; in 1867, 10,779; and in 1866, 11,568 head.

The continued warm weather has had a somewhat depressing influence The continued warm weather has had a somewhat depressing influence upon the cattle trade, and butchers have consequently had the advantage. Business in the dead meat market has been slow, but purchases of stock have been made sparingly. In many parts of the country store cattle have been forced upon the market in consequence of the scarcity of feed, and values have receded. There was not much falling off in the quality of the beasts exhibited here to-day, but the general character of the sheep on sale was inferior. Really choice beasts were without change in value, 5s per 8 lbs being the top price of best Scots. All heavy breeds

were dull, and lower to sell. There was a fair number of sheep in the pens, but, owing to the deterioration in the quality of the animals, and the falling-off in the demand, the quotations were slightly easier. Large and inferior sheep were 2d per 8 lbs cheaper, but best Southdowns and half-bred wothers commanded last week's currencies, say 5s 4d per 8 lbs. This price, however, was rather exceptional, good quality animals being scarce. Lambs met a dull sale on rather lower terms, our quotations being now 6s to 6s 8d per 8 lbs. The calf trade was quiet at stationary currencies, but pigs met a fair inquiry. SUPPLIES ON SALE.

#### HOP MARKET.

HOP MARKET. BOFFOUGH, Friday, June 14.—The hop market has been in a quiet state, but prices have continued steady. From the plantations the ac-courts are favourable. The bine has made rapid progress, and looks re-markably well. Mid and East Kents, 7*l* to 12*l* 12s; Weald of Kents, 6*l* to 8*l*; Sussex, 5*l* 12s to 6*l* 12s; Bavarians, 6*l* 6s to 7*l*; French, 5*l* to 6*l* 10s; A mericans, 4*l* 5s to 6*l*; Yearlings, 1*l* 10s to 3*l* 15s per cwt.

#### POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 24.—Fair supplies of new potatoes have been on sale, but the show of old has been limited. The trade has been quiet, at our quotations:—English Regents, 6s 6d to 7s; Spotch Regents, 6s 6d to 7s 6d; and Rocks, 6s 6d to 7s per cwt.

### LIVERPOOL MARKETS.

#### WOOL

(FROM OUR OWN CORRESPONDENT.) FRIDAY, June 24.—Our market continues very inanimate, buyers showing no inclination to purchase beyond what is required for immediate wants, and the tendency of prices turns in their favour. CORN.

(FROM OUR OWN CORRESPONDENT.) (FROM OUR OWN CORRESPONDENT.) FRIDAY, June 24.—The attendance at the market te-day was very FRIDAY, June 24.—The attendance at the market were FEIDAY, June 24.—The attendance at the market te-day was very limited, and the demand was so-restricted that prices of wheat were nominally without alteration from Tuesday last. The same must be quoted with regard to flour. Indian corn is rather more inquired after, and 3d advance has been paid. Beans and peas have been in limited supply, and prices have been slightly in sellers' favour. Oats maintain the late advance. Oatmeal has been steady. WAKEFIELD, Friday, June 24.—The business transacted in wheat to-day has been quite of a retail character. Prices are 1s lower than last Friday. Stocks here are, however, so small, and prices so much lower than in agricultural markets, that factors show little disposition to press sales. Spring corn is fully as dear.

sales. Spring corn is fully as dear.

# FALMOUTH, GIBRALTAR, & MALTA TELEGRAPH COMPANY. LIMITED.

#### DIRECT SUBMARINE ROUTE TO INDIA.

OPENING OF NEW CABLE-REDUCTION OF TARIFF.

TELEGRAMS from the United Kingdom are NOW SENT by the Falmouth and Anglo-Mediterranean Company's Cables to Egypt, and thence by the British-Indian line to Aden and Bombay. The lines are worked throughout by English clerks. Messages will be received at the Company's Station, No. 74 Old Broad street, and at all the Postal Telegraph Offices in Great Britain and Ireland at the following rates :-For Telegrams of

	Te	en W	ords	Twen	ty V	Vords.
	£	8	d	£	8	d
		16			8	
, Bombay, Calcutta, Madras, and other stations West of Chittagong	1	17	0	 . 2	17	0
", Ceylon and stations in India East of Chittagong	2	1	0	 . 3	1	0
" Egypt (Alexandria)				 . 1	10	0
". Ditto (Cairo and Suez)				 . 1	14	0
". Gibraltar and Malta				 . 0	10	0
" Portugal (all stations)				 . 0	9	0
" Spain (ditto)				 0	9	0

Half the 20 word rates for every additional ten words. From the Provinces and Ireland, One Shilling extra. To ensure the transmission of messages to Egypt and India by the new submarine route, the public should order them to be sent "Via Falmouth," these words being signalled as an instruction by the Postal Authorities free of charge.—By order, 66 Old Broad street, London, June 14, 1870. JOHN T. BURT, Secretary.

# HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmos-

be the most durable and beautiful paint known, does not scale of discould with the adder phere of large towns, and by their process, which is patented, is cheaper than White Lead. It is especially adapted for painting ircn, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron

exposed to Salt Water. <u>ADULTERATIONS.</u>—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work. Each Cask of Pure White Zinc is stamped

"THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET. "For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The remain is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

# RUPTURES-BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the cura-tive treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the regulsite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much case and closeness that it cannot be setected, and may be worn during sheep. A descriptive circular may be had and cuoseness that is cannot be accelered, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

hips being sent to the Man uncenter. Mr WHITE, 228 Piccadilly, London. Price of a single 'Iruss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 52s, and 52s 6d; post-age, 1s 8d. HOLLOWAY'S PILLS EXERCISE HOLLOWAYS PILLS EXERCISE: most wonderful power in promoting appetite, im-proving digestion, regulating the bowels, and removing nervousness and debility. The weakest will take no harm from the use of this alterative and tonic medi-cine, but will gradually regain their health. The strongest will preserve themselves from the many of the mishaps into which their boasted stren, the and fearlessness of results often betray them. Long-suffer-ing invalids may look towards this rectifying and re-vivitying medicine with a certain hope of having their malaoies mitigated, if not removed, by its means. In short, for all ages, circumstances, and conditions, Holloway points out the tratment which is com-petent to check the progress of disorder in, and expet-its seeds from, the human frame.
