## PREFACE.

In presenting this work to the Public, the Author offers his humble thanks to God, for having enabled him to accomplish it. He was aware, when he first set his hand to it, not only of its importance with regard to Abyssinia-its character, religion, history, and destinies-but also of the difficulty of the task which he had undertaken. There was previously no Amharic Grammar extant, except Ludolf's\*; which, however it attests the superior talents of its author, considering the circumstances under which it was compiled, is but a feeble aid in the grammatical exhibition of the language. Nor was there any other literary source, on which the Author of this Grammar could draw, except the Amharic Bible, and those Amharic works which he himself had prepared. Under these circumstances, he had very often to feel out his way, by a recollection of the living language, in which he conversed with the Abyssinian people while residing among This recollection, however, was kept alive by the Author's them. having been, without interruption, occupied with the Amharic press, from his arrival in this country from Abyssinia up to this day. The preparation and publication of the Lexicon, immediately preceding his commencement of this Grammar, was peculiarly suited to prepare him for this work; for whilst, on the one hand, it laid open to him the whole of the materials of which that language is composed, as far as they are at present known, it furnished him also with ample opportunities to investigate the grammatical rules by which it is regulated. Every one, who has

a judgment in these matters, will discover, when comparing the Dictionary with the Grammar, that the Author's own knowledge of the language has improved as he has advanced in his editorial labours. But although he is aware of the imperfections of his own works, he feels confident that a diligent study of this Grammar will, under the blessing of the Almighty, materially assist any Student in acquiring an accurate knowledge of the Amharic Language.

Although there is, as yet, no literature in the Amharic Language, its study is of considerable importance to Orientalists. Its Semitic origin cannot be questioned : it is evident in every feature. A little attention to what is said in this Grammar on the Nouns and Verbs, shows that it possesses a vigour and flexibility capable of expressing any idea; and that it may be very useful in throwing light on many subjects of difficulty in the cognate languages, especially the Hebrew, Syriac, and Coptic. Such a language, it is but reasonable to suppose, will be found rich in words. The Dictionary, which gives only those words which we at present possess, contains about 7000; and we may anticipate that a longer and more intimate acquaintance with the people of Abyssinia will furnish us with a great many more, and lead to important results, not only in reference to the Semitic, but also to the African Languages. With the latter the Amharic has much mutual interchange; as the Author has had opportunities to observe, in respect to the languages of the Danakil\*, the Somal, the Gallast, the Argobbans, the natives of Harrar (or Arargê), and those of Garaguê. But the advantages to be derived from the study of this language, which should be accompanied by that of its parent language, the Ethiopic, are not merely of a scientific

#### PREFACE.

nature. When the covetous Abyssinian offers his hidden treasures to the speculating European—when he opens his barriers to the travelling naturalist, to explore his Ambas and his K'wallas—when that country, which stands single in the whole history of Eastern Nations, as a Christian State that was not overwhelmed by the sweeping floods of Islamism, attracts different and, in some measure, conflicting interests of religion, philanthropy and politics the study of the living Abyssinian Languages, among which the Amharic stands foremost, will become indispensable; as is already experienced by those whom various motives induce to travel in Abyssinia.

With regard to the Church Missionary Society, the Author begs to repeat the same expressions of sincere gratitude, respect and solicitude, which he has uttered in the Preface to his Dictionary. Whatever the result of the present movements concerning Abyssinia and its future destinies may be; whether that nation is still to remain in its present uncivilized condition; whether it be doomed to fall a prey to that Spiritual Power which is assiduously endeavouring to regain the influence which it formerly possessed for a time, or whether it will open itself to the sound of the Gospel and its accompanying temporal and eternal blessings, and emerge into the light of truth and civilization; this Society has been the first instrument, in the hand of God, to offer the hand of Christian assistance and fellowship to them. If it pleases God to prosper their labours of love, they will be amply rewarded for all the difficulties and disappointments they have been subjected to, or which may be still awaiting them. May His blessing be upon them !

## AMHARIC GRAMMAR.

### INTRODUCTION.

#### ON THE AMHARIC LANGUAGE IN GENERAL.

I. THE Amharic Language (79767: 939:), a grammatical delineation of which the following pages propose to give, is that Abyssinian Dialect, which is spoken by the greater part of the population of Abyssinia: it prevails in all the provinces of Abyssinia lying between the Taccazê and the Abay or Abyssinian Nile, and in the kingdom of Shoa; and enters besides, extensively, into the languages of Argobba and Harrar. Its next cognate dialect is the Tigre Language (TTCF: TTE:); which is spoken by the inhabitants of Tigrê or the N.E. part of Abyssinia, and has its modifications in the Dumhoeto Dialect at Massowa, and the coast N. of that island, and in the language of Guraguê. Both the Amharic and the Tigrê Languages are modifications of the Ancient Ethiopic or Geez (合竹): 乳ウH:), to which they bear nearly the same relation as some of our Modern European Languages to the Latin; viz. that of origin and derivation. 5 However, the present language of Tigrê has preserved a greater similarity to the Ethiopic, and received much less mixture from other languages than the Amharic; the Amhara people being of a more changeable character, and having had intercourse with a greater variety of foreign nations than their Tigrê brethren.

II. The denomination "Amharic," which this language has received, is obviously attributable to the province called  $Amh\bar{a}ra$ , situate between Shoa, Godjam, Bagammeder, Lasta, and Angot. That province, which is now the seat of the Yedjows, Argobbans, and other Galla tribes—who partly speak the Argobba dialect, partly the Galla language—must have been considered the chief province of Abyssinia at the time the language obtained that name: for not only have all the countries in which the same language is spoken—excepting Shoa and Efat, *i.e.* all the N.W.

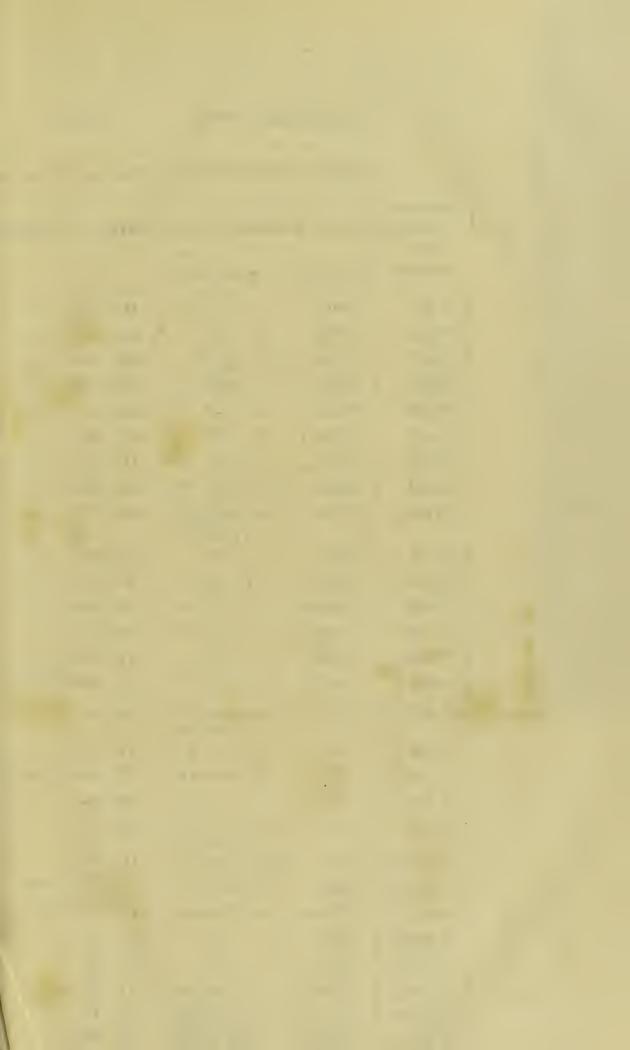

В

#### INTRODUCTION.

countries of Abyssinia to the W. of the Taceazê—been called Amhāra, but the natives also frequently apply it to their religion; so that the appellation *Amharic* is used synonymously with *Christian*, although at present the greater part of the population of that province are Mohammedans. But in what the superiority of that province consisted, and the time when it was so pre-eminent, remains still a matter of inquiry: for the reasons which Ludolf assigns, that Amhāra was in the neighbourhood of Shoa, from which the Royal Family of Solomon, which spoke this language, was restored, after the downfal of the Zagæan line; and that Amba Geshen (better  $G\hat{e}sh\hat{e}$ ), where subsequently the Princes of that family were confined, was situate in Amhāra—seem rather unsatisfactory; nor have we at present to offer any thing better in lieu of them.

III. From the fact of the Amharic Language being a descendant of the Ethiopic—which will be evident, from a superficial knowledge of both—it elaims the same affinity to the Semitic family as its parent; although it has adopted other forms and words from surrounding nations, which bear no relation to that family. A knowledge, therefore, of any of the Semitie Dialects, such as the Hebrew and the Arabic, facilitates, to a great extent, the study of the Amharic. We shall, in the course of this work, have frequent occasions to refer to the Arabic and the Hebrew; although it will be our endeavour also to suit the capacity of those who may have had no opportunity of learning any but European languages.

IV. According to the nature of a Grammar, this work will be arranged under the following heads: 1. *Phonology*; 2. *Etymology*; 3. *Syntax*: treating, in the First Part, on the Sounds and Letters; in the Second, on the different Parts of Speech; and in the Third, on the Grammatical Construction of Words into Sentences. There is, as yet, no occasion to speak on Amharic Prosody; but instead of this, we shall annex a variety of Amharic expressions, and a few Exercises.

## PART I.—PHONOLOGY.

#### ON THE

#### SOUNDS AND LETTERS OF THE AMHARIC LANGUAGE.

### CHAP. I.

#### ON THE AMHARIC ALPHABET.

 $T_{\text{HE}}$  Amharic Language is written with the same letters as the Ethiopic; each letter varying in seven different forms, in order to express different sounds; Vowels and Consonants not being separated. But besides the Twenty-six Ethiopic, the Amharic Language has seven peculiar Orders of Letters, which serve to express sounds not existing in the former : they are the following :

| ាំៈ        | ារ          | ព.ៈ      | រ៉ា:       | រោះ          | ìi         | រុះ :      |
|------------|-------------|----------|------------|--------------|------------|------------|
| ቸ፡         | 下:          | ቺ፡       | Ŧ          | ቼ፡           | ት፡         | ·ቸ፡        |
| ኝ፡         | <u>ጉ</u> ።  | Έ:       | <b>ና</b> ፡ | Έ፡           | 7:         | ₹:         |
| ኸ፦         | ኸ፦          | ኸ        | ኘነ፡        | `ቤ։          | ភាៈ        | Ť۲:        |
| н          | ŦF          | н÷       | ч:         | н            | H:         | <b>н</b> : |
| <u>R</u> : | ፻.፡         | <u> </u> | <b>Š</b> : | <u>R</u> :   | <u>R</u> : | <b>Q</b> : |
| ណៈ         | <b>a:</b> : | ពេ្.:    | ጫ:         | <b>ជេះ</b> : | Бе:        | દિલ્ટ ::   |

These, added to the 26 Ethiopic orders, give to the Amharic Alphabet the number of 33 orders of letters; that is, each order consisting of 7 forms or characters, 231 different characters. Add to these the 4 times 5, *i.e.* 20 Diphthongs, you have 251; which, to commit to memory, call for the close application of the student. The Alphabetical Table opposite embodies them all; giving a correct exhibition of the numerical arrangement of the letters, with their names and value; and the phonical order, power, and Ethiopical designation of the seven different orders, with the pronunciation affixed in English to each character.

Note.—A greater number of Diphthongs might have been added; as the Abyssinians, not being accustomed to write the language they speak, like to contract several sounds together, and to express them by single characters. Ludolf has given, in his Amharic Grammar, several specimens, showing how they apply this to foreign languages. We observe, here, that we have seen several instances of the same mode of proceeding in their own language: especially do they like to combine the fourth with the sixth form; e.g.  $\Upsilon$ : twā, for  $\Upsilon P \cong$ :  $G_{\bullet}$ : fwā, for  $G_{\bullet} \cong$ :  $\mathfrak{P} \cong$ : mwā, for  $\mathfrak{P} \mathfrak{P} \cong$  several is already large enough, and suited to express almost any sound, we have abstained from mentioning them in the Alphabet; noticing them here only, in order to put those on their guard who may happen, in their intercourse with Abyssinians, to meet such uncouth figures, that they may not be frightened.

#### NUMERICAL ORDER, AND NAMES OF THE LETTERS.

2. The Names of the letters have been delivered to us from remote antiquity; and as most of them, if not all, are significant, we think it but proper to preserve them. They must have been formerly in general use among the Abyssinians, else it is not conceivable how they should have been transmitted to Europeans: but the natives of the present day know nothing about them, except from the schools of the Missionaries.\*

3. The signification of most of the names of the letters is clear : they refer to the sound they express, adding the adjective termination  $\bar{a}wi$ , contracted into  $\bar{a}i$ , or mis-spelled  $o\hat{i}$ , for the masculine, and  $\bar{a}wit$ ,  $\bar{a}\check{u}t$ ,  $\bar{a}it$ , or  $\bar{a}t$ , for the

<sup>\*</sup> This, however, is no reason to omit them; because the Abyssinians do not at all dislike to have names put to their hitherto unnamed letters; many of which are the same as those which they know, from the Psalms, to belong to the sacred language of the Old Testament. Many of the most learned Abyssinians have applied to the Missionaries for the express purpose of learning the names of their own letters; and thought to have gained an invaluable treasure, when they had learned them.

feminine gender. A short analysis of these names, as far as it can be given, will establish this statement.

1. U: Hoï, UP: for YP: or YP: the h letter.

2.  $\Lambda$ : Lāwi,  $\Lambda \mathbf{P}$ : the *l* letter.

3.  $\mathbf{h}$ : Hāŭt,  $\mathbf{h}\mathbf{O}$ ' $\mathbf{T}$ : (f.) for  $\mathbf{h}\mathbf{Q}\mathbf{T}$ : the *h* letter.

4.  $\sigma \sigma$ : Māi,  $\sigma \eta \varrho$ : for  $\sigma \eta \varrho$ : the *m* letter.

5. W: Sāŭt, WOT: for WET: (fem.) the s letter.

8. **首:** Shāt, **首**宁: for **首望**宁::

11. T: Tāwi, TT:

12. **Ŧ**: Tshāwï, **Ŧ£**::

19. **(D** : Wāwï, **(PP ::**

27. **M:** Tāït, **MLT:** for **MLT:** 

28. m: Tsh'aït, ucht: for ucht::

29. X: Paït, XPT: for XPT::

The following names are derived from the cognate Semitic Dialects, probably from the Hebrew, since they have the names of the Hebrew letters in the Psalms:

| 6.  | ረ፡         | Rĕ-ĕs, | ርዕስ፡         | Heb. | ٦ | Rēsh.  |

| 26. | 7:         | Geml,  | ግምል:         | • •  | 2 | Gimel. |

With regard to their significations, the student is referred to the Hebrew Lexicon.

Concerning the rest, the signification of which is not so clear, we leave them for the amusement of such as will take the trouble of searching in the Ethiopic and the cognate dialects.

#### CHAP. III.

## ON THE VIRTUE, ORGANICAL CLASSIFICATION, AND PRONUNCIATION OF THE LETTERS, CONSIDERING THEM AS SIMPLE CONSONANTS.

1. As to the VIRTUE of the letters, we must state, first of all, that Consonants and Vowels are combined in the same characters; and on this account, each letter is able to present a syllable by itself. But laying aside, for the present, the Vowel question, we proceed at once to CLASSIFY the letters according to the organs chiefly concerned in their pronunciation.

2. According to the organs, the letters are divided—

- A. In Gutturals : ሀ: ሐ: ኀ: ኸ: ሺ: ប::
- В. In *Palatals*: **Ф**: **'n**: **Р**: **?**::
- C. In Linguals and Dentals: A: W: 2: 白: 门: 十: 干: 子: H: 田: 史: 义: ጠ: ጨ: ጸ: 日::
- D. In Labials: оо: **n**: **0**: **X**: **4**: **Т**::
- E. Nasal: 7::

3. In speaking on the **PRONUNCIATION** of these letters, we must refer to the Ancient Ethiopic, the various dialects of Abyssinia, especially the Tigrê, and the cognate Semitic Languages.

A. The Gutturals.—In the present Amharic, U: h: and  $\exists:$  are pronounced alike, like h in horse, and are often exchanged for  $\exists:$ , thus entirely dropping the aspiration. The Tigrê language shows us, however, that each of these letters must have formerly expressed a distinct and different sound; for in it, U: sounds like our h in horse, and answers the Arabic s, and the Hebrew  $\exists$ . h: is pronounced with a pressure in the lower part of the throat, like the Arabic  $\forall; \exists:$  like the Swiss ch, the Arabic  $\dot{\forall}$ , and the Hebrew  $\exists;$  and  $\exists:$  like the Scotch and German ch, in loch, nicht, and answering the Hebrew  $\exists$  without the Dagesh. This pronunciation of the  $\exists:$  is equally in use in the Amharic language.

 $\Lambda$ : and  $\mathbf{O}$ : are both pronounced alike, as the Greek Spiritus lenis ('); but in the Tigrê they are different among each other,  $\Lambda$ : being like Spiritus lenis, l, or  $\aleph$ , and  $\mathbf{O}$ : like the Arabic  $\varsigma$  and Hebrew  $\gamma$ , with the same pressure in the throat as the  $\tau$ , but without the aspiration.

#### B. The Palatals:

 $\Phi$ : corresponds with  $\beta$  in the Hebrew, and with  $\mathfrak{Z}$  in the Arabic Language. On account of its peculiar pronunciation, we may call it an *explosive* letter, such as  $\mathbf{M}$ :  $\mathbf{M}$ : and  $\mathbf{R}$ : in the third, and  $\mathbf{R}$ : in the

## CH. III.] VIRTUE, CLASSIFICATION, AND PRONUNCIATION OF LETTERS. 7

**'n**: sounds like our k, or c before consonants.

**P**: is pronounced like y as consonant, or like the German j &c.

 $\gamma$ : is pronounced like our g before a, o, u, and before consonants.

C. The Linguals and Dentals:

 $\Lambda$ : like our *l*.

**W**: and  $\square$ : may originally (perhaps answering  $\omega$  and  $\omega$ , D and  $\upsilon$  have sounded differently from each other: at present, they are pronounced alike, sounding like our s.

 $\mathbf{Z}$ : sounds like our r.

**i**: formed in the Amharie by the accession of the i sound to the  $\uparrow$ : and  $\mathbf{W}$ :, is the same as  $\mathcal{W}$ , and sh.

**T**: is pronounced like  $\smile$ ,  $\square$ , and t.

**\mathbf{T}:** formed by combining a soft sibilation with  $\mathbf{T}$ , sounds like *tsh*, or rather like *t* with a German *j*.

**\frac{1}{2}:** is the same as our n.

**H**: is like z.

**H**: like the French j.

**\mathbf{R}:** is the same with our d.

 $\mathbf{\tilde{X}}$ : sounds like the English *j*, or rather like the German dj: it is often used to express the Arabic  $\geq$ .

**M**: **CL**: and **X**: are the same sort of letters in this elass as the  $\Phi$ : in the Second, which we call Explosive; because they, as it were, explode from between the fore-part of the tongue and the roof of the mouth or the root of the teeth. We have in the Alphabet represented them by writing t, tsh, and ts. But as some more or less hissing seems to accompany this explosion, **M**: and **X**: frequently interchange.

 $\Theta$ : is pronounced like *ts*, or the German *z*.

 $\mathbf{\sigma}\mathbf{o}$ : is the same as our m.

**n**: the same as our b. In Tigrê, it generally sounds like  $v, \exists$ , or the Modern Greek  $\beta$ : and this pronunciation must have been formerly more general; for otherwise it seems unaccountable, how it could have been turned into a mere vowel o, as in **DD***f***C**:; whereas the soft b, our v, being a mere condensation of that Vowel, was more liable to that change.

**\mathbf{O}:** is the same as w.

 $\dot{\mathbf{x}}$ : the explosive letter of this class: the breath puffs off from between the lips, before the vowel is heard.

 $\mathbf{\mathcal{L}}$ : is the same as  $\mathbf{\mathcal{D}}$ ,  $\mathbf{\mathcal{L}}$ , and f.

**T**: our *p*, merely used for foreign words.

E. The Nasal  $\mathcal{F}$ : is pronounced similar to the French and Italian gn, or rather like the Spanish  $\tilde{n}$ .

4. The letters are to be further divided, as in other Semitic Dialects, into *Radicals* and *Serviles*. Servile letters are those which are employed in the process of grammatical formation, derivation, and flexion: the radicals are never so employed. The serviles are often radical, though Radicals are never servile. The Servile Letters are,

#### CHAP. IV.

ON THE SEVEN VOCAL ORDERS OF THE ABYSSINIAN LETTERS.

1. As the Abyssinian Languages differ from the other Semitic Dialects (except the Coptic), in being written from the left to the right; so they are likewise different from them, as well as from most other languages, in the manner in which the Voices or Vowels are expressed.

2. This is done in the Abyssinian Languages, not, as in the other Semitic Dialects, by any smaller points or figures written above or below the line; nor, as in other languages, by a distinct sort of characters of equal value with the Vowelless Consonants; but by a system of changes which the original letter itself undergoes; each letter *expressing Consonant* and Vowel in the same figure, and assuming seven different forms, according to the Vowels which are attached to it; which forms (after Ludolf) we call Orders of Letters.

[CII. III. IV.

### CH. IV. SEVEN VOCAL ORDERS OF THE LETTERS.

Note.—The terms "Consonant" and "Vowel" are not quite suitable to the Abyssinian Alphabet; as the Vowels themselves are but con-sonant, being inexpressible by themselves; and the Consonants being, as appears from the Sixth Order, in form more independent than the Vowels: but to be understood, we must use the expression.

3. The Seven different Voices or Vowels expressed by these Seven Orders are these:

A. Short ă, as in *fat*, *lad*, &e.; answering the Fat-ha ( $\leq$ ) in the Arabic, and the Pataeh ( $\equiv$ ) in the Hebrew. Like the former, it is modifiable, approaching the ĕ sound, or the short Hebrew Segol ( $\overline{\ast}$ ).

B.  $u_{i}$ , as in full, put, lucid; or  $o_{i}$ , as in move; or oo, as in fool, &e.

C. 1, as in pin, finger, hinder; or ee, as in bee, see; or ea, as in read, sea; or e, as in scene.

**D.**  $\overline{\overset{2}{\mathbf{a}}}$ , as in far, father, rather.

E.  $\ddot{e}$  or  $\hat{e}$ ; a sharp  $\hat{e}$ , with a slight  $\ddot{i}$  sound before it, as in the Slavonian Dialeets; as the German *je*, "ever," or the English *yea*.

F.  $\check{e}$  or  $\check{y}$ , as in *liv-er*, *ber-ry*. This order also is often mute or vowelless, as in the English and French Languages the mute  $\check{e}$ . In fact, it completely resembles the Shwa simplex  $(\overline{\cdot})$  of the Hebrew Language.

G. 6, generally sharp, as in so; or with w before it, as in woe, wonder.

4. In order to express these seven sounds by each letter, the Abyssinians have adopted the following plan:

A. The Original Form is used for the expression of the First Vowel ( $\check{a}$ ). It therefore is called, with its Ethiopic name,  $\Im \check{\partial} H$ : Gě-ěz, which signifies "original"; and is therefore applied to the Ethiopie Language in general ( $\mathring{\partial} \mathring{\partial} i$ :  $\Im \check{\partial} H$ :), in order to distinguish it from any translation. In reference to the letter forms, it means the original, simple, unaltered form,  $U: \Lambda: \Lambda: \&e$ .

B. The Second Vowel  $(\overset{\circ}{u})$ , which is called  $\overset{\circ}{\mathbf{h}}\overset{\circ}{\mathbf{0}}$ . Kā-ĕb, *i.e.* "altered," "second," is expressed by the affixion of a point (•) to the right-hand side of the letter, generally in the middle ( $\mathbf{U}$ :  $\mathbf{P}$ :  $\mathbf{O}$ :  $\mathbf{C}$ :); in four instances at the bottom ( $\boldsymbol{\zeta}$ :  $\mathbf{O}$ :  $\mathbf{R}$ :  $\mathbf{V}$ :); and in one instance, under the letter ( $\boldsymbol{\zeta}$ :).

C. The *Third Vowel* (i), which is called **MAN**: Sāles, *i.e.* "third," is generally represented by a similar point annexed to the foot of the letter on the right side, and below the line,  $(\Lambda: \Pi: \Lambda: \Pi: \mathfrak{L}:)$ . Where the original has no foot (*i.e.* line going downwards), a foot is formed; and in

9

order thereby not to enlarge the general size of the letter, the rest is diminished where it has been thought necessary  $(\mathbf{U}: \mathbf{U}\mathbf{U}: \mathbf{U}: \mathbf{U}:$ 

D. The Fourth Vowel  $(\bar{a})$ , called **Z.-NO**: Rābě' "the fourth," effects seven different changes:

- (a) A foot line is made as in the preceding order, but without point:
   Ψ: Φ: Ψ: Φ: Φ: Φ: ζ.:
- (c) A short horizontal line with point, is added, to the left at the bottom : **9**: **7**: **7**: **7**: **7**: **7**:
- (d) The same added to the right at the head: f: doubled f::
- (e) Foot line broken: **C**.::
- (f) Foot point to the left shortened:  $\mathbf{g}: \mathbf{\tilde{g}}:$

E. The change effected by the *Fifth Vowel* ( $\hat{e}$ ), ealled **370** $\hat{n}$ : Hāměs "fifth," is simple: it consists in adding a small circular line or eye to the right side at the bottom, or in the middle: in instances where the letter has received a foot line in the two preceding forms, at the bottom of that line; *e.g.* **4**: **A**: **G**: **B**: **G**: &c.

F. The greatest diversity is presented by the Sixth Order ( $\check{e}$  or  $\check{y}$ ) **TC:** *i.e.* "sixth." Instead of analyzing it, we recommend the scholar to examine that column himself in the Alphabet.

G. The Seventh Vowel (0) **1-110**: Sābě', *i.e.* "seventh," effects the following changes:

- (a) A small circular line is formed at the top: U: Λ: C: Φ: T:
   T: T: T: C: G::
- (b) Foot lines on the right side are shortened: ホ: ウ: ヴ: ウ: ズ: **か: ア: H: H: 足: 足: の: い: ネ: ネ::**
- (c) Foot lines on the left side or in the middle are formed : **qo**: **W**: **(D**: **D**: **D**::
- (d) Other forms are, P: 1: T::

5. As for the quantity of the vowels, it must be said, that those of the First and Sixth Order are constantly *short*; those of the Fourth and Fifth constantly *long*; and the rest are sometimes long, sometimes short.

Note. — Concerning the Diphthongs, as their pronunciation presents no difficulty, nothing remains to be said except what has been mentioned in Chap. I.

#### CHAP. V.

#### ON SYLLABIFICATION.

1. In the Abyssinian Languages, each letter, being Consonant and Vowel in the same figure, is able to constitute a Syllable; e.g. **112**: nă-gă-ră; **34.P**: nĕ-fā-k'ê. Such syllables, formed by single letters, we may call simple or open syllables.

2. But although this is the case, they can combine two or three letters (not more) together, to form one syllable; which will be called, if consisting of two letters, a *closed*; if of three, a *compound* syllable. Thus, e.g.  $\Phi \Delta$ : k'āl, "word," is closed;  $\Delta H \cdot \Omega$ : height "be called" is compound.

3. This is performed with the assistance of the Sixth Order; the vowel of which being short, and rather a semi-vowel, or the same thing as the Hebrew Shwā ( $\overline{\phantom{x}}$ ), is liable to become *mute*. Whenever this occurs, its letter must be added either to the preceding or to the following letter, in order to be pronouncible; *e.g.* **7C**: gă-r, "meek." **TAY**: běl-hā-t, "dexterity."

4. The question then is, When is the letter of the Sixth Order mute or vowelless? A few general rules, which will answer it, shall be laid down here.

A. Letters of the Sixth Order are MUTE at the end of words generally; e.g. UC: hăr, "silk"; ΦΔ: k'āl, "word"; ΥΊC: năgăr, "word," "thing"; ΘΛΩ: tsa-hāy, "sun"; ઉΔΦ: ā-lam, "world."

Note.—Seeming deviations, but no real ones, are those Ethiopic words which in the Amharic have been abbreviated: in such instances, the final letter of this form is not vowelless, reminding of the guttural letter, which is no longer written, but still pronounced:

> ሰም: să-mě', "wax." Eth. ሰምዕ:: ብር: bě-rě, "pencil." Eth. ብርዕ:: አንጅ: en-djỹ, "but." Eth. አንደይ::

A real exception is this, which occurs in Feminine terminations of Pronouns or Verbs, in the Second Person Singular of the Feminine Gender, which are sometimes written in the third, sometimes in the sixth form, and may be pronounced or not; e.g.  $\Lambda$   $\Im$   $\Xi$ : better  $\Lambda$   $\Im$   $\Xi$ : an-tshy, "thou (female)!"  $\Phi$   $\Sigma$ : or  $\Phi$   $\Sigma$ : k'ă-dj, or k'ă-djy, "draw (thou female)!"

B. The same letters remain MUTE, when the words to which they belong, receive such additions at the end, by which their form is not changed: e.g. **FC:** tshăr, "kind." **FCIT:** tshăr-năt, "kindness." **PA:** bā-l, "husband," "owner." **PA:** tit bāl-têt, "widow."

Note.—An exception is **PAF**: k'ā-lĕ-tshā, "sorcerer," "soothsayer."

C. When two letters of this order meet together at the end of a vowel, both are mute, unless want of organic affinity, or gemination, prevents their being so; but when such a word is augmented at the end, the last letter of this order is sounded:

| <b>(</b> <i>a</i> <b>)</b> | <b>ደርቅ:</b> dă-rk', "dry."                | ለመጽ: lă-mts', "leprosy."         |
|----------------------------|-------------------------------------------|----------------------------------|
|                            | ooch: mă-rz, "poison."                    | <b>ቀንድ:</b> k'ă-nd, " horn."     |
|                            | <b>5.23:</b> ā-ўn, "eye."                 |                                  |
| <i>(b)</i>                 | ሰግም: lĕ-gĕm, "superficiality."            | <b>Inn:</b> gĕ-bĕz, "hypocrite." |
|                            | <b>አቅም:</b> ă-k'ĕm, " measure."           | አጭር: ă-tsh'yr, "short."          |
| (c)                        | ற்றரு: sĕ-mĕm, "harmony."                 | <b>አልል</b> : ĕ-lĕl, "huzzah!"    |
|                            | <b>ክተተ</b> : kĕ-tĕt, " perfection," " ful | ness."                           |
| ( <i>d</i> )               | ቅድስና: k'ěd-sĕ-nā, "holiness."             | רפום-<br>tionship."              |

D. When a letter of the sixth form commences a word, its vowel is generally sounded:

| <b>ልደት :</b> lĕ-dăt, "birth." | ክሏ: kĕ-fǚ, " bad." |
|-------------------------------|--------------------|
| nn?: sĕ-t'ăng, "give me."     | ክረምት: kĕ-rămt.     |

E. In triliteral words, where all the three letters are of the sixth order, the first is generally sounded; the two following art not:

| ሕዝብ: hĕ-zb, "people."    | ጽድቅ: ts'ĕ-dk', "righteousness."  |
|--------------------------|----------------------------------|
| ድንቅ: dĕ-nk', "wonder."   | አርም: ĕ-rm, "a thing prohibited." |
| Сп.т. rĕ-st, "heritage." | መሽተ: mĕ-sht, "wife."             |

F. In triliteral words, where the two first letters are of the sixth order, the first is sounded; the second is not:

ግርσק: gĕ-r-mā, "majesty." አንጀ: ĕ-n-djā, "I do not know." ግምር : gĕ-m-dja, "muslin eloth."

But in many eases the second letter also is sounded:

ግሥለ: gĕ-sĕ-lā, "brown leopard." **ቅምቫ**: k'ĕ-mĕ-shā, "a bit." እጅጌ: ĕ-djĕ-gê, "sleeve."

G. In quadriliteral words, beginning with two letters of the sixth order, and terminating in — T: feminine, the first letter is sounded; the second is mutc:

| ፍልጠት: fĕ-l-ťăt, "megrims."  | G.CYT: fĕ-r-hāt, "fear."   |
|-----------------------------|----------------------------|
| 36.71: nč-f-gāt, "avarice." | 3.n2.1: ně-b-rat, "state." |

12

[CH. V.

CH. V. VI.

H. In quadriliteral feminine adjectives, whose letters are all of this order, the first and second letters are sounded, whilst the rest are mute:

ንጽሐት: ně-ts'ě-ht, "pure."ቅድስት: k'ě-dě-st, "holy."•ርክስት: rě-kě-st, "impure."ጽድቅት: ts'ě-dě-k't, "righteous."

I. In quadriliteral words, whose three first letters are of the sixth order, the first and second are generally sounded, whilst the third is mute, unless obviated by Lit. C.:

አልልታ: ĕ-lĕ-l-tā, "the shouting." ንጽሕና: nĕ-ts'ĕ-h-nā, "purity."

J. In pluriliterals, beginning with three letters of this order, these are generally formed into one syllable; either the first and third, or the second and third letters being mute:

## ክርስቲስ: Krĕ-s-tos, "Christ." ፍረምቢያ: frĕ-m-bĭā, "breast-bone."

Note.—These rules will meet most cases: we refrain from adding more at this place, as it would swell this chapter to too large an extent; while in the further course of the Grammar, especially in those parts which treat on the Pronouns and the Verbs, the rest will be easily deduced.

#### CHAP. VI.

#### ON ACCENTUATION, AND POINTS OF DISTINCTION.

1. The Abyssinians have no marks for their accents. Some general Rules for Accentuation are as follow:—

A. In words consisting of long and short syllables (long and short either by the number of letters or by the quantity of vowels), the long syllable generally has the accent:

**P 2.** : těrê, "raw," "genuine."**P 2.** : gěrā, "left."**N 1** : băgò, "good."**P 3.** : nětsů, "pure."**P 7.** : bādo, "empty."**H 2.** : zārê, "to-day."In these two latter instances, the first syllable has the accent, because the long ā of the fourth order is the longest vowel :

| אין פאלא מין 'convent."             | ንፈ'ዊ: něfāk'ê, "heresy."         |
|-------------------------------------|----------------------------------|
| <b>ፈ. ዋ. ድ.</b> : făk'ād, " will."  | ቅድነስ: k'ĕdus, " holy."           |
| σο " C: mănòr, " the dwelling."     | UQ'P: hodām, "voracious."        |
| መልካ ም: mălkām, "good," "beautiful." | HPP' R.F : zĕm'dĕnā, "affinity." |

B. In Verbs, the radix without afformatives, as well as with light afformatives (afformativa levia), has the accent on the antepenultima (on the third syllable from the end):

CH. VI.

ťበረ: năbără, "he was." ጥዋ/መጠ: tăk'ă'măt'a, "he sat down." ፖለጽሁ: gă'lats'hů, "I have revealed."

See, however, more under the Verbs.

C. Feminine Adjectives and Substantives of the form **39**, thave the accent on the last syllable; e.g. **C990'**†: rěgěm't, "cursed."

D. Other Dissyllabic words with short vowels require the accent on penultima:

ል'ደተ: lĕdăt, "birth." ን'ንዘብ: gă'nzăb, "property." ይ-'ንግል: dĕngĕl, "virgin."

E. The heavier Suffixes (suffixa gravia) and Afformatives require the accent directly to precede them:

ቀ/ምበር: "the yoke." መ/ለበ: "he brought back." መለባ/ችሁ: mălăsātshěhů, "you brought back."

2. The Interpunctuation of the Abyssinians is very simple. A simple colon (:) serves to divide words from words; and a double colon (::) to separate sentences from sentences.

NOTE (a)—The colon, which is to prevent words running together, and thereby creating confusion, was formerly a perpendicular line (1), as is evident from inscriptions found at Axum; but that line has been divided into two points, as it was otherwise liable to have been mistaken for the numeral  $\underline{\mathbf{I}}$  (10).

(b) The double colon (::) is, in Abyssinian manuscripts, generally reserved for the end of paragraphs; when five red points are inserted into it in the form of a cross, in this manner,  $\diamond \diamond \diamond$

IN ENGLISH CONSTRUCTION.

"In the time of the Apostles, there was such an union in the Church, that they (the Christians) were all one body and one soul. Christians were never (in no wise) separated in Christ. As all of them were Adam's children, after the flesh, and as in themselves and without Christ they

were lost sinners, so also (now) by faith they were saved through one Christ. They were all called with one calling; justified by one blood; and purified and sanctified by one Spirit. Peter also said to all believers: Ye are a royal and priestly people, a chosen and a sanctified generation, that ye should shew forth the works of Him that hath called you out of darkness unto His maryellous light."

#### CHAP. VII.

#### VARIOUS CHANGES OF LETTERS.

In order the better to comprehend the various euphonical changes occurring in the constitution of words in the different parts of speech, it is necessary to point out the rules by which the changes in the letters are regulated.

#### 1. Addition of Letters.

Speaking, in the first instance, of the ADDITION of letters to words, we regard them as they are joined either at the beginning, or in the middle, or at the end,—prosthesis, epenthesis, and paragoge.

A. When a word commences with a liquid letter, esp.  $\frac{1}{2}$ : or  $\frac{1}{2}$ :, the  $\frac{1}{3}$ : is often preposed; e.g.  $\frac{1}{3}CCP$ : for  $\frac{1}{3}CP$ : Nārēā. The preformative, also, to the First Person Plural of Verbs, in the Present Tense Indicative and Subjunctive, has  $\frac{1}{3}$ —: for the Ethiopic  $\frac{1}{3}$ —::  $\frac{1}{3}CDA\dot{\Pi}A\dot{\Im}$ : "we return"; not  $\frac{1}{3}ODA\dot{\Pi}A\dot{\Im}$ ::  $\frac{1}{3}C.\dot{\Pi}$ : for  $C.\dot{\Pi}$ : "head."  $\frac{1}{3}CT.\dot{\Pi}$ : for  $CT.\dot{\Pi}$ : "wet."

B. In the middle and at the end after long vowels, **D**: is inserted or affixed; e.g. **7,H.D**: for **7,H**: "time." **A.D.P**: "and the work"; for **A.P**::

Note.—This euphonical  $\mathbf{O}$ : must not be confounded with the suffixed pronoun  $\mathbf{O}$ :, which only by the context can be distinguished from it.

#### 2. Contraction of Letters.

CONTRACTION occurs most frequently to the vocal letters  $\lambda: (\mathbf{0}:) \mathbf{0}:$ and  $\mathbf{P}:$ , besides these to the gutturals  $\mathbf{U}: \mathbf{h}:$  and  $\mathbf{\mathcal{A}}::$  They answer the letters of the Hebrew Language, in their becoming quiescent. This is especially the case—

A. In verbs and words derived from them, which, originating in the Ethiopic, on their transition into the Amharic have dropped the gutturals, as not compatible with the character of the latter language. In compensation CH. VII.]

for this loss of the consonant, they have retained the vowel, and joined it to the preceding letter:

| Amharic.     |     | Ethiopic.    |                              |
|--------------|-----|--------------|------------------------------|
| ወዓረ፡         | for | ምሕረ፡         | "to pity," "have mercy."     |
| 86,:         | ••  | ጸሐፈ፡         | " to write."                 |
| ተማረ:         | ••  | ተመሀረ:        | "to learn."                  |
| መላ:          | ••  | መልአ:         | "to be full," "to fill."     |
| 70:          | • • | ገብአ፡         | " to enter."                 |
| ። ሰሌ።        | ••  | ሰርሐ፡         | "to work."                   |
| :.5W         | • • | <b>ሠር</b> ዐ፡ | "to order," "to constitute." |
| አፈሪ።         | ••  | አፍረየ፡        | "to bring forth fruit."      |
| <b>ጽ</b> ፈት፡ | ••  | ጽሕፈት፡        | " writing."                  |

B. When a word beginning with  $\bigstar$ : receives a preformative of the first, fourth, or sixth order, the  $\bigstar$ —: consonant is dropped, and the vowel absorbed by the preceding letter. If  $\bigstar$ —: stands in the first order, it changes the preceding short letter to one of the fourth order; if the fourth order precedes, no contraction takes place; if  $\bigstar$ : is of the sixth order, it sometimes changes the preceding short into a long letter, sometimes it does not at all affect it:

| አንገተ : "the neck."         | ባንንተ: "on the neck."            |
|----------------------------|---------------------------------|
| አርያ: "a swine."            | <b>ACP</b> : " to a swine."     |
| <b>አደረገው:</b> "he did it." | <b>PR270</b> : "he who did it." |
| <b>አገኝ:</b> "he found."    | ታገኛለሀ: "thou wilt find."        |

C. The same change, without loss of consonant, takes place with suffixes commencing with  $\bar{a}$ :

ስራችሁ: "your work," from ስራ: and ā ችሁ።

But when such suffixes are joined to letters ending in  $\bar{u}$  or *o*, these letters are changed into diphthongs:

ሰጠኋት: from ሰጠሁ: and āት: "I gave her."

When joined to letters of the fifth form, the suffix  $\bar{a}$  assumes the **P**:, as similar to the fifth vowel; and rendering that in the fourth form, deprives the preceding letter of its vowel:

ምሳልያችን: from ምሳሌ: and āችን: "our likeness." በርያቸው: and በሬያቸው: "their ox."

D. In those verbs which are called geminant, the two identical letters,

Ð

CH. VII.

*i.e.* second and third radicals, are, in several moods and tenses, contracted into one letter, which letter then is sounded as a double letter:

# ΦΛΛ: "it was light."ይΦΛΔ: for ይΦΔΛΔ: "it is light."ከደደ: "he sent."Pሚሰድ: for Pሚሰድድ: "he that sends."

Note.—The same change takes place in all languages. Cf. in the English: refer, referring; compel, compelled; man, manned; stir, stirring; stab, stabbed; &c. In the Hebrew, letters so contracted receive a compensative Dagesh (cf. عَنَّ, دُبَّ, رَحَبَّ, حَسَّ); in the Arabic, a Teshdid (إِجْدَا, رَحِبَّا, رَحِبَّا, أَنْ the Abyssinian Languages they have no mark for this gemination; but in pronouncing the contracted syllable, the voice dwells on it for the same length of time as it would on the non-contracted two syllables.

E. The same change takes place in the conjugations of Verbs ending in 1: in the Second Person Plural, and in a few other instances; e.g.

U1: "We became," for U31:: 9010: 0910: &c.

### 3. Elision.

A complete Elision, i.e. ejection without compensation, takes place-

A. At the end of certain words, with letters of the sixth order, which are not, or scarcely, pronounced; *e.g.* **199**: for **1990**: "wax." **16:** for **16:** "pencil." **732:** "but," for the Eth. and Tig. **7329**::

B. With the **P**: Relative Pronoun, and the **P**: of the Genitive Case, when Prepositions are prefixed to or precede the word; *e.g.* **P7: no32:p·i**: "In the house of thy brother, which I have seen"; instead of **nPP7: nPO32:p·i: \*32: †HH·i:** instead of **\*32: P†HH·i:** "As thou art commanded."

C. With the Preformatives  $\mathbf{\ddot{h}}$ : and  $\mathbf{\ddot{T}}$ : in Verbs and verbal derivations, beginning with  $\mathbf{\ddot{h}}$ : and  $\mathbf{T}$ :: e.g.

አደርጋለሁ: "I do"; አሥራለሁ: "I bind"; አበጽፈለሁ: "I order to write"; instead of አደርጋለሁ: አሥራለሁ: and አስጽፈለሁ:: ተዋበላለህ: "thou receivest"; ተመታላችሁ: "you will be beaten"; instead of ተተዋበላለህ: and ተተመታላችሁ::

D. The Preformative  $\uparrow$ :, with the negative h:, is often suppressed before  $\mathbf{T}: \mathbf{T}: \mathbf{\Omega}: \mathbf{\Omega}: \mathbf{\Sigma}: \mathbf{\dot{\Pi}}: \mathbf{\ddot{\Pi}}: \mathbf{X}:$  and  $\boldsymbol{\Theta}:: e.g.$ 

አጽ**ፍ**: for **አተጽፍ**: "Do not write." አጠብቅ: "Do not observe"; &c.

Nore.—To this rule may be reckoned **R**: before **n**: in one instance : **n**: instead of **nR**: "sixty."

CH. VII.

# 4. Changes produced and suffered by the letter **P**: and its corresponding vowels I and Ê.

Some of those changes have been noticed in the preceding. Here is to be added :

A. **Q**: of the sixth order, as preformative to Verbs, resolves into the more vowel i, when any letter of the same order is prefixed; *e.g.* 

|                 | instead of        | 1         | instead of                 |
|-----------------|-------------------|-----------|----------------------------|
| ሊሰራ።            | ልይሰራ።             | Մամ։      | .UGODU:                    |
| አንደሆን፡          | አ <b>ንድ ደ</b> ሆን። | ሲመለስ፡     | ስይመለስ።                     |
| <u>ከ, የገር</u> ፡ | <u>ክደናገር</u> ።    | ይወታ ቁሳው ፡ | <b>Ե</b> ֆո <b>Շ</b> ֆֆո:: |
| <u>እስኪጨርሱ</u> : | <u>አስክደጨር</u> ሱ።  | &c.       | &c.                        |

B. Under the same circumstances,  $\mathbf{P}$ : not only remains, but, for the sake of assimilation, changes the preceding letter into one of the third order; *e.g.* 

# **ሊያድርግ። ቢያልቅ። አንዲያወጣ።** &c.

C. The Vowel I, when applied, changes the following letters : W: and 内: into 门:: 个: into 干:: 3: into 子::  $\Lambda$ : into **P**:: H: into H:: P: into P:: M: 8: and 9: into Ma:: FOR ще: "painter".... чол: ነጋሽ: "regent" . . . . . . . ነጋሢ:: ምላሽ: "answer" . . . . . . . ምላሲ። ተመቸለሽ: "thou (f.) wilt be beaten," ተመተአለሽ:: ተድኛለሽ: "thou (f.) wilt be saved," ተድኒአለሽ:: **3H:** "prince". . . . . . . . **Э**Н :: ወላጅ: "parent" . . . . . . . ወላዴ። ሳጭ: "giver" . '. . . . . . ሳቢ:: **ዋ-ራ.ጭ:** "piece" . . . . . . **ዋ-ራ.ጺ**: or **ዋ-ራ.ቢ**:: 00986: "rebel" . . . . . . . 0092::

Nore.—Under the same circumstances, P: changes those letters into the fourth order.

D. When words ending in i and  $\ell$  receive any of the heavy suffixes (gravia), or the auxiliary  $\Lambda\Lambda$ : at the end, the third or fifth order is generally changed into the sixth, and **P**: follows:

በረ። " ox." በርያቸው። and በሬያቸው።

ጠባቂ: "guardian," "protector." ጠባቅይችን: "our protector."

#### PHONOLOGY.

[CH. VII.

# ትጠብቅያለሽ: "thou (fem.) observest," for ትጠብቂ፡ አለሽ። ጠብቂያለሁ: "I observe," for ጠብቂ፡ አለሁ።

E. When letters of the fifth order are shortened, they are changed into the third; when they are prolonged, they are changed into the fourth; and the original vowel  $\ell$  or i is represented by **P**::

፟፟፟ዿ: "he went." Imp. ሲ.ሮ: go! ቬጠ: "he sold." ተሻዋጠ: "he bought and sold," "carried on commerce."

5. Changes produced and suffered by the Letter **(D**: and its corresponding Vowels U and O.

The letter  $\mathbf{O}$ : is often contracted into the vowel o, and still further into  $\overset{3}{u}$ .

A. **(D:** is contracted into o. This occurs,

(a) With the second radical in verbs:

φσυ: for φωσυ:: Ηζ: for Hωζ:: χσυ: for χωσυ:

(b) In substantives:

ስዋወታ: "gift," is contracted into ስጦታ። ችልወት: "power," into ችሎተ። ሕይወት: "life," into ሕዮት። አልወት: " prayer," into ጸሎት።

B. **(D**: and *o* are further contracted into u.

(a) In the subjunctive, imperative, and constructive in verbs:

**ደቁም:** "let him stand." **ቁም:** "stand!" **ቁምዋል:** "he is standing."

(b) With the suffixed pronoun 3d person sing. masc., which, to nouns ending in a letter belonging to the sixth order, is attached as  $\mathring{u}$ ; but after a long vowel, and in verbs as **D**:, except after an  $\mathring{u}$ , where it is changed for **T**::

| <b>N.F:</b> "his house." |  | "ljm: "his master." |  |
|--------------------------|--|---------------------|--|
|                          |  |                     |  |

**MNPD**: "he observed it." **OD††**: "they beat him."

C. o and  $\mathring{u}$ , when an  $\tilde{a}$  is joined to them, change the gutturals and palatals into diphthongs of the fourth order, and put other letters into the sixth order, adding  $\Phi$ ::

| nr: "his saying."      | <b>ብልዋል:</b> "he is saying." |
|------------------------|------------------------------|
| ሰጠሁ: "I gave."         | ሰ៣ኋቸው: "I gave them."        |
| <b>[1]]:</b> "senate." | ሽንጋቸው። "their senate."       |

CH. VII.]

D. **D**: having been reduced to the vowel o in the radicals of verbs, is restored again when the first radical is amplified:

ΤΦΟσο: "he stood against," "resisted," from φσο: "he stood."

#### 6. Changes occurring with the Diphthongs.

| <b>ቍጠረ:</b> "he counted."        |                                  |
|----------------------------------|----------------------------------|
| Lengthened                       | Shortened                        |
| <b>τ⊈៣೭:</b> "he made accounts." | <b>ደቀ ጠር :</b> " let him count." |

#### 7. Reduplication of Letters.

Reduplication of letters takes place in the formation of nouns and verbs, generally with a design of giving intensity to the original meaning of the word, when the second or third radical is repeated :

| <b>ታና ሽ :</b> " small."             | ታናናስ: "very small."                 |
|-------------------------------------|-------------------------------------|
| <b>ታላቅ:</b> "great."                | ታላላቅ: "very great."                 |
| መለሰ: "he brought back."             | τοολή: "he walked," i.e. "went      |
|                                     | and returned," " went up and down." |
|                                     | <b>ተ</b> መለሰሰ: "he returned."       |
| <b>AR27:</b> "he did," "performed." | TRZ. 29: "a great work"             |

#### 8. Exchange of Letters.

The following letters are frequently changed one for another, as belonging to the same organ, or at least being similar in sound.

A. Gutturals.—O: for A:: A: for U: h: and 7:: U: h: and 7: for T:: They write:

አረፈ: "he rested," for ሀረፈ። አዛነ: "he regretted," for ሐዛነ። ሆነ: "he became," for ኾነ። ኋላ: " behind," for ዃለ።

አበቫ: "Abyssinia," for ሐበቫ። አፈረ: "he was ashamed," for ኀፈረ። ሔደ: "he went," for ኹደ።

B. Gutturals and Palatals.—U: h: and h: for h: e.g. h.g.h.: in vulgar language, for h.g.b.: "I go." σημά: and σστημά: for σσημά: "the middle."

C. Palatals and Dentals.— P: interchanges occasionally with M: Q: and R:: **A3PT**: for **A3QT**: "wood."

እስቂንዎቸዋለሁ: for አስጨንቃቸዋለሁ:: "I will harass them." Ps. xviii. 38. D. Palatals and Dentals.—7: and **只**: and **只**: e.g. たく夏: "to be old," for たく7:: すろスス: for すろ見の男子: "to rustle."

E. Linguals and Dentals.— $\Lambda$ : and I:: **W**: and  $\Pi$ :: **T**: and  $\overline{T}$ :: (**H**: and  $\mathbf{H}$ ::) **H**: and  $\overline{\mathbf{X}}$ :: **M**: and  $\mathbf{X}$ :: **X**: and  $\mathbf{G}$ :: e.g.

ልዋር: "pound," for ነዋር:: ሠመረ: "to please," for በመረ::

ምናልባት: "perhaps," for ምናልበች። ተበዝ: "to redeem," for ተበጀ።

ሞረጠ: "to cut," for ሞረጸ። ጸብ: "quarrel," for ዎብ:

F. Linguals and Labials.—Where  $\frac{1}{2}$ : precedes  $\mathbf{\Omega}$ :  $\frac{1}{2}$ : and  $\frac{1}{4}$ :, it is, as in the Greek and in other languages, exchanged for  $\mathbf{\sigma}\mathbf{D}$ : a liquid of the same order.

እምብልታ: "flute," for እንብልታ።

ወምፈተ: "a sieve," for ወንፈተ።

**A3 ½:** "a small tent," for the Greek  $\lambda \alpha \mu \pi \eta \nu \eta$ .

G. Labials.—σο: and **Λ**:: σο: and **Ο**:: **Λ**: and **Ο**:: **Hf** σο: "rain," for **Hf** -**Λ**::

OBAC: and OPAC: " chair," for OBAC::

۲٤: " to remain," (the D: resolved into the vowel o) from the Eth. الم

9. As for the liquids  $\Lambda$ :  $\sigma \sigma$ :  $\lambda$ :  $\zeta$ : and the changes to which they are liable, they having been embodied in the preceding remarks, nothing further remains to be said concerning them.

10. Transposition, and further Contraction of Letters.

Takes place merely in low language.

መርባት: "light," "candle," for መብራት:

ቅናቡግ: for ቅባኑግ: " nug-oil."

አዝጌር: for እግዙር: contracted from እግዚአብሔር: "God."

ክሶስ: "Christ." ክስያን: and ኩስታን: for ክርስቲያን: "Christian."

# PART II.—ETYMOLOGY.

#### ON THE DIFFERENT PARTS OF SPEECH.

·····

#### PRELIMINARY REMARKS.

In the Scmitic Languages, it has been the custom (which also Ludolf has followed, in both his Grammars, of the Ethiopic and of the Amharic Languages) to class the different Parts of Speech under three heads; *viz.* Nouns, Verbs, and Particles; beginning the Etymological part of the Grammar with the Verb, as containing the roots of the whole language. But modern Grammarians have, for important reasons, adopted another course; following the practice of some ancient Arabic and Hebrew Scholars : and as that tripartition presents several inconveniences, especially to such as are unacquainted with the other Semitic Dialects, we divide the Amharic Language into Nouns, Pronouns, Verbs, Prepositions, Adverbs, Conjunctions, and Interjections. None of the Abyssinian Languages possess the Article.

2. It will, in a great measure, facilitate the study of the language, before we enter on each part of speech in particular, to premise a few general observations on the original forms of words; because it is in them, and in the manner in which from them the various formations have proceeded, that the peculiarity of every language consists. We must observe, however, that the Amharic not being an original but a derived language (see Introduction, I. III.), we must have frequent recourse to the Ethiopic; and it presents several formations which, in the present state of its knowledge, cannot yet be accounted for.

3. Now the principal elements—as it were the skeleton—of words in any language, consists in the *Consonants*, which are animated by the different Vowels, according to the purposes of formation, flexion, and dialect: and in speaking therefore of original forms, we must look, not to the Vowels, but to the consonants.\* This, when applied to the Amharic, where Vowels are constantly attached to Consonants, signifies that the various orders of a letter do not come into consideration, but the letter itself.

4. One characteristic feature of the Semitic Languages is the prevalence

# (23)

<sup>\*</sup> This is more clear in the Hebrew, Arabic, and Syriac; in which the Vowels are represented by certain marks above and below the line, which are more frequently omitted than written.

of triliteral forms, which are partly derived from original biliterals, and partly amplified to quadri- and pluri-literals; but, for the greater part, are original, and form the majority. This peculiarity applies also to the Abyssinian Languages; although not to the Amharic with equal force, as to its parent, the Ethiopic.

5. We do not intend to enter into any inquiry about the logical priority of the Parts of Speech; although we believe, that, in the natural developement of the mind, the Noun has the precedence before the Verb; but in the grammatical formation of the Amharic Language, the Verb claims the priority, since all its roots are reducible to the first order, called Gěěz; *i.e.* "original." For the sake of convenience, however, we begin with the Noun, and follow the order stated under § 1.

#### CHAP. I.

#### ON THE NOUNS.

In speaking of the Nouns, we have to consider them according to their *Formation* (termination, species), *Gender, Number*, and *Declension*.

#### SECTION I.

#### Formation of Nouns.

1. As to the FORMATION of Nouns, they are either Simple, Augmented, or Compounds; either *Primitive* or *Derived*. Concerning their termination, they may end in any of the seven orders, except the first. We consider them, first, in respect to their *forms*, as simple, augmented, or compound; secondly, to their *formation*, as primitive or derivative.

2. Simple forms; consisting of two, three, or four letters.

A. Biliterals.

(a) Ending in the second order:

| ክሩ: bad.           | mH-: much.     | ምሉ: full.        |
|--------------------|----------------|------------------|
| <b>38.:</b> clean. | ብረ: clear.     | <b>ጽረ:</b> pure. |
| ሥሡ። cove           | tous, a miser. | Tir: spices.     |

Note.—Most of these forms are Ethiopic Verbal Adjectives, originating from, or rather representing, the Passive Participle.

(b) Ending in the third order, generally signifying an agent:

| nd: workman, diligent. | συζ: guide.                   | па: wide, spacious. |
|------------------------|-------------------------------|---------------------|
| HC: sower, seedsman.   | <b>4</b> . <b>Φ</b> : tanner. | HX: ebony.          |
| <b>In:</b> the inside. | <b>I</b> : current in trade.  |                     |

3. In speaking of *Augmented Nouns*, we do not refer to those casual additions they receive by inseparable Prepositions at the beginning, or Pronouns at the end; but we speak of those augmentations at the beginning, in the middle, and at the end, by which their original signification is modified. In order, however, not to fall into an unnecessary repetition, we postpone this subject till we come to speak of *Derived* Nouns. (See 5. c.)

4. Compounds are formed (a) from the Ethiopic status constructus; the nomen regens and the nomen rectum being combined into one word, as in our "house-door" for "house's door," only the reverse of our order. In the Ethiopic, as in the Hebrew, the word (nominative) which precedes, and which, according to our ideas, should have the nominative form, is changed; and the word (genitive) which follows, and which we should expect to be changed, is not changed at all. As this peculiarity does not affect the Amharic Language any further, we do not enter into it, but content ourselves with giving only a few instances.

Thus are many Ethiopic words compounded, especially their Christian names; e.g. JEA: OPC PPP: Haila Maryam, "the Power of Mary," commonly Hailu; Inc: እግዚአብሔር: or Inc: አምላክ: Gabra

Egziabehêr, or Gabra Amlāk, contr. Gabramlāk, commonly Gabru, or Zăĕgziabhêr, or Zăămlāk, "Scrvant of God," &c.

(b) From Amharic words, combining either noun with noun, or the noun with any other part of speech:

5. Primitive Nouns, strictly speaking, are those whose origin cannot be traced to any other source but to themselves. Now there are a good number in the Amharic Language which are easily recognised as Primitive in this sense; but there are many others which can be called so only in a relative acceptation of the word, because in the Ethiopic, from whence they are taken, they are not Primitive; although either the original word is not current in the Amharic, or the mode of its derivation is not accordant with the idiom of that language. The first of these two latter clauses induces us to consider a number of Amharic Nouns as comparatively. Primitive; whilst the second constrains us to leave to others the same derivative character which they have in the Ethiopic.

As the Primitive Nouns are found only among the *simple* forms, we refer to the above exhibition, N<sup>o</sup>. 2.

A. Biliterals:

Class (a) is entirely derivative.

Class (b) also.

Class (c) contains a number of Primitives; e.g. ሬካ፡ በደ፡ ቤዛ፡ በጋ፡ ካካ፡ ዋጋ፡ ገላ፡ ሸማ፡ ጨማ፡ ውን፡ ድን፡ ሥጋ፡ ነጋ፡ ማታ፡ ድደ፡ ሌባ፡ ቃራ።

(d) Primitives of the fourth class: 个个: 小星: 四位: 竹注: ጊዜ: 一个: 史之::

(e) In the fifth class, the majority are Primitives.

(f) In the sixth class, ሚሉ። ደር። ጀር። ነጀ። ኮሶ። ደቦ።

B. Triliteral Primitives :

In class (c), መንታ: ካምባ: ሽህላ፡ ባርያ፡ ተልባ፡ ወባሽላ፡ ነቍጣ: ወርካ፡

In class (d), ስንይ፡ ነሐሴ፡ ሐምሌ፡ ጀንይ፡ ክርቤ፡ ወጠቤ፡ ዕድሚ፡ ንማሬ፡

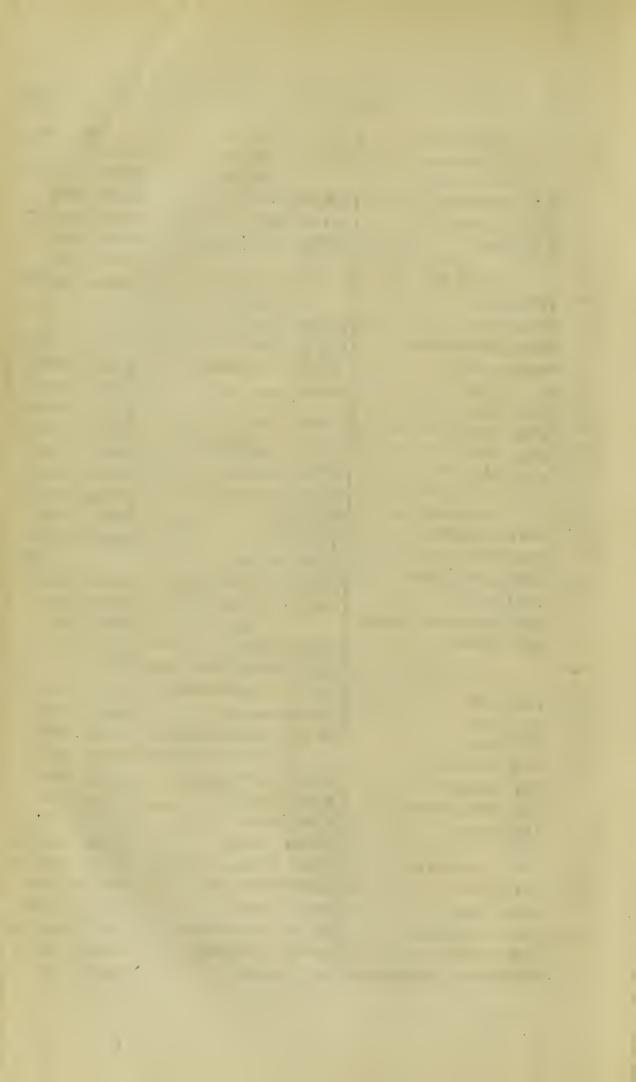

In class (e), almost the whole of the first ( $\alpha$ ); about half of the second ( $\beta$ );

In class (f), the greater part are Primitives.

C. Quadriliteral Primitives:

(a) None.

(b) መ3ጋጋ፡ ሠረገላ፡ ሽምብሪ.፡ አለ3ጋ፡ ኩብኩባ፡ ደብተሪ.፡ አዋማደ።

(c) Few; e.g. መንተሉ: በርበሬ።

(d) The majority.

# (e) መሰንቀ: ቀርቁር፡ ወይዝሮ፡ ዝንጅሮ፡ ይንቀሮ።

D. Those mentioned as simple *pluriliterals* are all Primitive.

6. Derived Forms take their origin either from Nouns, Verbs, or Particles; and are formed in various ways, either by contraction (elision), or by change, or by augmentation of their letters.

A. By Contraction (see Part I. Ch. VII. 2.), and Elision (ibid. 3.), they are changed more seldom within the limits of the Amharic than in their transition from the Ethiopic Language into the Amharic. It takes place most frequently in Biliterals:

| Amh.                           | Eth.              | Amh.               | Eth.               |
|--------------------------------|-------------------|--------------------|--------------------|
| <b>38.:</b> pure,              | from <b>ንጹ.ሕ።</b> | ምባ: dinner,        | from ምሳሕ።          |
| <b>∩∠</b> : ox,                | ። ዲ.አዕቡ …         | <b>Λ90</b> : cow,  | ·· ላህም።            |
| σης: honey,                    | መላር።              | щ <b>С:</b> grass, | ሢዕር፡               |
| <b><b>PR</b>: butter, oil,</b> | ·· ቅብእ።           |                    | sometimes Amharic. |
| ~                              |                   |                    | -                  |

Sometimes in Triliterals, derived from the Ethiopic Quadriliterals:

| Amb.          | Eth.              | Amb.               | Eth.                       |
|---------------|-------------------|--------------------|----------------------------|
| ብርቱ: strong,  | from <b>ብርፑዕ።</b> | <b>הססיסטי:</b> ha | armonious,                 |
| ባሕሪ: essence, | ባሕርደ።             | · · · · ·          | from <b>) συ Ö συ Ö ::</b> |

B. By change of one, two, or of all the primitive letters, according to the rules laid down in Part I. Ch. VII. 4, 5, 7. A few instances will suffice for illustration:

Derivative.

Primitive.

ቅይማ: Saturday, ቅደስ: holy,

ΦΩΓL: consecration,

PRI: sanctifier,

 $\Phi g g p$ : that which is before,

PLOU: saddle's pommel,

from **Pgn**: to sanctify.

| አ <u>ር</u> ኝ፡ hunter,<br>አ <u>ር</u> ን፡ game,            | } from AR1: to hunt.     |

C. Augmentation of letters in the derivation of Nouns takes place either in the beginning (preformation), or in the middle (reduplication), or at the end (afformation).\* The letters used for this purpose are  $\sigma \sigma$ :  $\dot{\eta}$ :  $\dot{\tau}$ :  $\dot{\tau}$ :  $\ddot{\tau}$ :  $\dot{\Lambda}$ :  $\Omega$ :  $\mathcal{P}$ :: Of these,  $\sigma \sigma$ :  $\dot{\eta}$ :  $\dot{\tau}$ :  $\dot{\tau}$ :  $\dot{\Lambda}$ :  $\Omega$ :  $\dot{\Lambda}\dot{\eta}$ : and  $\dot{\Lambda}\dot{\eta}\dot{\tau}$ : are prefixed; and  $\sigma \sigma$ :  $\dot{\tau}$ :  $\dot{\tau}$ :  $\ddot{\tau}$ :  $\Omega$ : and  $\mathcal{P}$ : are affixed. Reduplication takes place by repeating any of the radical letters.

(a) **Preformation**:

**oo:** is used for Infinitives, and retained in Nouns derived therefrom :

σοπηφ: the watching.

oomnag: watch-house, from mna: to watch.

T: T3: A: An: Ant: and A3: are retained in Nouns derived from those derivations of Verbs which have these characteristic Preformatives:

| Noun.             | Verbal derivation.               | Radix.                                       |

አ: is prefixed to Verbs, and one of the radical letters doubled; e.g. አገባብ: አቀማመን: አይሪ.ረግ።

ት: and ተ: are prefixed to Verbs to form Nouns of action ; e.g. ተዕግሥት: ተምሕርት።

Sometimes the A: or T: is cut off, and I: retained in these Preformatives:

\* This is analogous to the Hebrew This is and the Arabic يتسمنا Nouns.

#### SECTION II.

#### On the Species of Nouns.

1. Nouns are to be considered, either as *Substantives*, names of things, or as *Adjectives*, names of properties. In the Amharic, as in the other Semitic Languages, they both belong together; and they have been jointly treated in the preceding Section as to their Formation. It remains now to say a few words concerning the Adjectives.

2. As to their Formation, but few of them, as the preceding Tables show, are *original*: such are,

 በነ: good.
 ይህና: well.
 አሙላ: bad.

 ሞሳላ: oblong.
 ይጋካ: prominent.
 አሮጌ: old.

Even these are but primarily Adjectives; and when isolated, may be, and are, used as Substantives. Most Adjectives are of derivative forms, being derived either from Verbs (see Table II.) or from Substantives; e.g.

ባሩም፡ አዋቂ፡ መሪር፡ መልከኛ፡ መልካም፡ አባዊ፡፡ Participial Adjectives, የሚናገር፡ የታመነ:

3. As for Comparison, the Amharic Language, like the Hebrew, has no

Сн. 1.

Adjective form to express the Comparative or Superlative: we therefore must defer this subject to the Syntax.

4. The Numeral Nouns will be treated in a separate chapter.

We now proceed to the consideration of the Gender of the Nouns.

#### SECTION III.

#### On the Gender of the Nouns.

1. The Amharic Nouns have but two *Genders*, Masculine and Feminine. We shall endeavour to point out a few general rules, showing what Nouns belong to either of the two genders, and by which forms they are to be recognised. We have to complain, however, that there is yet much confusion; both masculine and feminine forms being alternately applied to words where the sex is not palpably distinguished.

A. Masculine are:

(a) The names of God, angels, and men; also the names of nations, and of all male animals:

| <b>አግዚአብሔር</b> : God, | ሰደጣን: Satan.    | ዓረብ: an Arab.              |
|-----------------------|-----------------|----------------------------|
| the Lord.             | ንብርኤል: Gabriel. | Unii: an Abyssinian.       |
| <b>አምላክ</b> : God.    | <b>ու</b> ասո.  | <b>ፍ.ረንሲስ</b> :aFrenchman. |
| Pirn: Jesus.          | Р-љ3п: John.    | <b>አንበባ :</b> a lion.      |
| መልአክ: angel.          |                 |                            |

(b) The names of the sun and the stars, of ranks and offices of men:

| ፀሐይ: sun.         | Tro: governor.    | <b>MNQ:</b> guardian. |
|-------------------|-------------------|-----------------------|
| <b>ՆՈՊ:</b> star. | <b>ЛЩ:</b> ruler. | MA: servant.          |

B. Feminine are:

The names of women and female animals; the names of the moon, the earth, countries, towns, &c.; plants; the names of female ranks and offices; collective names; and the names of several abstracts:

| оч <b>с у 9</b> 0 : Mary. | hrog: city, camp. | <b>D.Y.H.C:</b> princess, lady. |
|---------------------------|-------------------|---------------------------------|
| gc: hen.                  | ooggc: village.   | አመቤት: mistress.                 |
| ጨረቃ: moon.                | 13gc: Gondar.     | ראי: female servant.            |
| ምድር: earth, country.      | HG.: tree.        | 'ትባኤ: assembly, society.        |
| ሰበቫ: Abyssinia.           | አበባ: a flower.    |                                 |

And see 2.

C. Common, are several conditions of life; as, "child," "slave," and others, where the termination of the word does not distinguish the sex.

сн. г.]

2. The two Genders are distinguished,

(a) By the addition of distinct words denoting the Male and the Female. These are: **D**3**g**: and **t**1**it**: for Males, and **iti**: and **k**3**iit**: for Females: besides this, **kD** $\cdot$ **d**.: for several male animals, who are without this distinction considered as females; as, goats, fowl, &c.: *e.g.* 

ወንድ: ልጅ: a son, boy. የንስካ: ተባተ: male of animals. የንስካ: ተባተ: male of animals.

አውሪ:: G.PA: he-goat. አውሪ: ደር: cock (he-fowl).

In Shoa, they carry this distinction further; calling "clayish earth" **O'3C**: or **TUT**: **PCC**: (male earth), and "loose earth" **A'3NT**: or **ILT: PCC**: (female earth). They call wood which splits perpendicularly, **O'3C**: **A'3CC**: "male wood"; and wood which splits transversely, **ILT: 'A'3CC**: "female wood." Maria-Theresa dollars, which have the requisite coinage, **A'3NT**: **AC**: "female dollars"; and those which are any way deficient, being M. T. dollars, **TUT**: **AC**: "male dollars." The latter distinction obtains in all Abyssinia.

(b) The Female is distinguished by the termination  $\uparrow$ :  $\uparrow$ : and  $\uparrow$ :: (See the Table of Derivatives, II. 4. c.)

(c) The same by f: and it: (See Derivatives, II. 4. c.)

(d). The Primitives are mostly Masculines.

(e) As to the Derivative forms, the following rule obtains:

Classes I. 1. 2. 3. 6. and II. 4. f. g. are predominantly Masculine; and Classes I. 4. and II. 4. c. d. e. predominantly Feminine. The rest are of Mixed Gender.

3. The remaining Nouns are undetermined as to the sex; the Adjective and Verb being promiscuously applied to them in the Masculine and in the Feminine Gender.

4. Several Adjectives and Substantives, whose form is Masculine, are changed into a Feminine form:

| Masculine.          | Feminine.             |
|---------------------|-----------------------|
| ንጹ።                 | <b>ንጽሐተ</b> ። pure.   |
| ብሩ፡                 | ብርህት: clear.          |
| ግሩም:                | ግርም ተ: wonderful.     |
| ጠባቂ፡                | ጠባዊፑ: guardian.       |
| አሮጌ፡                | <b>አሮንት:</b> old.     |
| <b>06.11:</b> heir. | ወራቪቱ: heiress.        |
| ሀኬተኛ፡               | ሀሴተኛይቱ: lazy.         |
| አረጣዊ: heathen man.  | አረማዊት: heathen woman. |

#### SECTION IV.

#### On the Number of the Nouns.

1. The number is but twofold; viz. Singular and Plural. We might add the Collective; but that being considered either as a body, when it is Singular, or as an aggregate of individuals, when it is plural, it constitutes no particular form; and we therefore proceed to consider these two, the Singular and the Plural; there being no Dual in this language.

2. As the Singular is that form in which each Noun, before it is changed, presents itself, we need not say any thing about it, but direct our attention at once to the formation of the *Plural* Number.

3. The truly Amharic Plural is very simple; it has but one form, and that is the termination otsh (Tigrê ot); in which we recognise the Hebrew

i, the Arabic أنت, and the Ethiopic āt; e.g.

| Singular.      | Plural.                  |
|----------------|--------------------------|
| n.tr: house.   | <b>ቤቲዥ</b> : houses.     |
| ውቫ: dog.       | ውሾች፡ dogs.               |
| ልጅ። child.     | ልጀት፡ children.           |
| አባት: father.   | አባዮዥ: fathers.           |
| ጠባዊ: guardian. | <b>ጠባ  ች:</b> guardians. |
| חל: good.      | በጎች: good.               |

Note.—The Plural termination of several Nouns ending in the fifth order is divided into two Consonants; the original letter being put into the sixth order, and a  $\mathbf{P}$ : being added, to which the Plural  $\mathbf{F}$ : is affixed; *e.g.* 

ምሳልዮት: similitudes, from ምሳሌ::

4. But besides this Amharic, we have the following Ethiopic Plural forms; which sometimes are applied, although the true Amh. Plural always may be put.

5. It is well to attend to these various forms, as they frequently occur in the Amharic Bible as well as in conversation: but it must be borne in mind, that they are all of Ethiopic origin, and superseded by the simple Amharic form otsh; and a beginner will never be mistaken in using the latter, until he is sufficiently acquainted with the language to know where he has to apply any of the other forms.

# SECTION V.

#### On the Declension of the Nouns.

The Declension of Nouns is very simple and uniform. Nouns are inflected through four Cases, equally in the Singular and the Plural, *i.e.* the Nominative, the Genitive, Dative, and Accusative. One example may suffice to show the whole mode of proceeding:

Singular. Nom. **A.T**: a house. Gen. **PA.T**: of a house, a house's. Dat. **AA.T**: to a house. Acc. **A.T.T**: a house. Plural. በ.ተ.ች: houses. Pበ.ተ.ች: of houses. ለቢተች: to houses. በ.ተ.ች. houses.

### **OBSERVATIONS:**

(a) The Genitive answers the Eth. H:, and is not to be confounded with the Pronouns Relative or Distributive.

40

Сн. г.

сн. г. н.]

The Accusative Case must not be confounded with the Interrogative Adverb 7:, nor with the termination 7: of Nouns. On the Construction, and on the various uses of the Accusative, see Syntax.

2. It occasionally happens, that they make use of the Ethiopic Genitive or status constructus, i.e. that mode of construction which prevails in the Hebrew, and which has been noticed in the First Section of this Chapter, §4. The two nouns, which stand in a genitive relation to each other, one of which is the regens (Nominative), and the other the rectum (Genitive), are so closely connected as to appear as one word. The Genitive follows the Nominative, and receives the tone or accent; in doing which, the preceding Noun, the Nominative, is modified: in the Hebrew it is shortened: in our case, the last letter, if it is of the sixth order, is changed into the first, and the two words are considered as one compound, separated merely by the (:) colon; but even this, in the Amharic, is often dropped, especially when the Genitive begins with a vowel consonant, or when it is a short word:

ባለ: ቤተ: and ባለቤተ: " master of the house."

**NAR:** for **NA: UR:** "owner of debts," *i.e.* "creditor" or "debtor."

Another change is produced by the affixion of Pronouns to Nouns, of which we shall speak under the head of Inseparable Pronouns.

#### CHAP. II.

#### ON THE NUMERALS.

1. The Numerals are of two kinds, *Cardinals* and *Ordinals*. The Cardinals specify the number of things which are the subject of speech: the Ordinals exhibit the order in which they occur.

#### ON THE PRONOUNS.

1. The Amharic Pronouns are, as to their logical character, divided, as in other languages, into, 1. Personal; 2. Possessive; 3. Demonstrative; 4. Relative; 5. Interrogative; 6. Reflective; and 7. Distributive Pronouns. As to their forms, they are classed, as in other Semitic Languages, into Separable and Inseparable Pronouns. We begin with the Separable Pronouns. They are Personal, Possessive, Demonstrative, Interrogative, and Reflective.

#### SECTION I.

# Separable Personal Pronouns.

They are Three for the Singular, and Three for the Plural. The Singular has some peculiarities. The First Person has not the Gender expressed: the Second and Third have distinct forms for the Masculine and for the Feminine Gender: the Second Person has, besides, three distinctions of honour, as the following Paradigm shows:

SINGULAR.PLURAL.<br/>Com.Masc.Com.Fem.Com.1 Pers. $\overleftarrow{\lambda}$ : I. $\overleftarrow{\lambda}$ : we.2 Pers.  $\overleftarrow{\lambda}$ ?T: $\overleftarrow{\lambda}$ ?T:<br/> $\overleftarrow{\lambda}$ ?T: $\overleftarrow{\lambda}$ ?T: you. $\overleftarrow{\lambda}$ ?T: $\overleftarrow{\lambda}$ ?T:<br/> $\overleftarrow{\lambda}$ Crip: $\overleftarrow{\lambda}$ ?T: you.3 Pers.  $\overleftarrow{\lambda}$ Crip: he, it. $\overleftarrow{\lambda}$ CripP: she, it. $\overleftarrow{\lambda}$ CriFO: they.

Note. (a) On the application of the three different forms for the Second Person:  $\Lambda$ 3 $\uparrow$ : and  $\Lambda$ 3 $\uparrow$ : are applied to inferiors, to God, to intimate friends; and in universal address, where you need not pay any regard to rank, &c.  $\Lambda$ 3 $\uparrow$ : is used for a *lesser*;  $\Lambda$ C $\uparrow$ Q: for a *higher* degree of honour. These two forms resemble the German *Ihr* (in Switzerland *Er*), and *Sie*, and the Italian *Voi* and *Lei*, for the Second Person Singular.

(b) In speaking of a *distinguished* person, the form of the Third Person Plural is used, as a mark of honour.

**70'3 R'C:** has no Plural; and is defective in the Singular, having no Accusative Case.

Besides the preceding, they have the Interrogative Pronoun **Pit**: or Euphonic **Pit**: "what?" "who?" "which?" It is indeclinable, and used chiefly in forming Adverbs, by joining with Prepositions; as, **A32**: **OZ: :** &c.

# SECTION V.

#### Reflective Pronouns.

# SECTION VI.

# Distributive Separable Pronoun.

This is **A.P3R3R**: "each," "every," with Suffixes. As it is composed of a double **A3R**: and the distributive **A.P**:, it has been numbered already among the Distributive Numerals.

#### SECTION VII.

# Indefinite Pronouns.

These are the following:

oy390: any, each, every one, whoever, whosoever.

σης for: m. σης fres: fem. whosoever.

ሁሉ: all, each, every, any.

 $\Lambda\Lambda$ : other.

አንደች: some, something.

1. **09390**: **096 FO**: and **096 FP.7**: are used only in the Singular, nor receive they any Suffix. When used with the Verb in the negative, they adopt the reverse to their natural signification, "none," "none whatever."

2. U.A.: is rather the Substantive U.A.: "totality," with Suffixes. It assumes all Suffixes, and is declinable; but has no Plural.

3.  $\triangle \triangle$ : is used in both the Plural and the Singular Numbers, and is declinable.

4. 六72千: is declinable, and used only in the Singular.

5. **APA:** "some," "several," is declinable, and has but one number. Besides this, the words, "some" and "such," are circumscribed by Verbs; *e.g.* "Some men like it," **POP.O.C.T:** "AA: *lit.* "There are men who like it." "Such:" A3CU: PA: or *pl.* A3CU: PA:: "who is," or "who are so."

#### SECTION VIII.

#### Inseparable Pronouns.

They are, with regard to their character, Personal, Possessive, Relative, and Distributive; and with regard to their position, they are either Prefixes or Suffixes.

1. Personal Suffixes to Verbs.\*

They consist partly in modifications of the Personal Pronoun; and are annexed to any part of the Verb except the Infinitive; for that Mood, being considered in this respect as a Noun, assumes Nominal Suffixes.

Сн. пг.

<sup>\*</sup> We do not speak of those personal designations the Verbs receive at their beginning or end; because they are so intimately connected with the Verb, that we cannot consider them separately.

There is but one, which has been mentioned already, under the Numerals: it is, AP: or AP::  $API'III: \Phi3$ : "Every three days." Prepositions have the power of absorbing the first letter; when care must be taken not to confound the remaining P — with the Relative Pronoun; bearing in mind, that the Relative itself would be absorbed by the Preposition: nor stands it, except before Verbs.

#### CHAP. IV.

#### ON THE VERBS.

The Verb being, next to the Noun, the most essential part of speech, we are to give it our fullest consideration. In entering upon it, we treat, 1. On its Formation and Quality; 2. On the Derivations, or different Forms or Voices of Verbs; 3. On their Flexion; 4. On their Conjugation; 5. On the Affixion of Pronouns to Verbs.

#### SECTION I.

#### Formation and Quality of Verbs.

1. The Verb, in general, seems to represent the chief developement of those roots of the language which are contained in the Noun. The original idea of the Noun is exhibited as a thing of time, found in a certain condition, and undergoing or producing various actions and changes. This consideration implies, that the Verb, in general, originates in the Noun. In the Hebrew, we can trace its course from the Primitive Nominal Form, through the Participle (in Kal), to the 3d pers. masc. preterite; the latter being, in all the Semitic Languages, the grammatical root of the Verb. In the Amharic, the Constructive Mood, of which we shall speak afterwards, seems to be the medium of transition from the Primitive Noun to the 3d pers. masc. preterite of the Verb.

2. Now the latter, the 3d masc. pers. sing. of the preterite in the Simple Forms of Verbs, constitutes, as has been just now alluded to, the origin of all the other Verbal Forms; the same as, in our languages, the Infinitive; or in the Greek, the Latin, the Italian, and others, the 1st pers. sing. of the present tense: on this account it is put forward, for grammatical and lexical purposes, as the radix, or rather (because the true radices of the Verbs are contained in the Noun) as the stem, from which all the other forms branch off. In the Amharic, it presents various formations, as well as the Noun—bilitera, trilitera, quadrilitera, and plurilitera: but in it, as well as in the Noun, the majority consists of triliteral forms; which majority is still augmented, whenever the present contracted biliteral forms, and many pluriliterals evidently amplified, are restored to their original fulness or simplicity.

3. In reference to *Quality*, then, the Verbs present two grand divisions; *i.e. Perfect* and *Imperfect* Verbs, which again may be sub-divided in other classes. *Perfect* Verbs are those which are flexible in, at least, several Derivations, and throughout all the Moods, Tenses, and Persons in Conjugation, without losing any of their Radicals. *Imperfect* Verbs are either Defective, Augmented, or Irregular.

Note.—(a) Perfect Verbs may be divided into Primitives, *i.e.* whose origin cannot be traced to any further root; and Derivatives, which have for their origin either a Noun (Denominatives), or another Verb (Verbals). We subjoin here a few specimens of each.

#### PRIMITIVES.

ቀበረ: he buried. መለሰ: he turned, returned. ሰገድ: he worshipped. **PWL:** he chastised. **IL1:** he covered.

#### DENOMINATIVES.

ከበረ: he was honoured. ገለጸ: he revealed. መሰከረ: he testified. ሰነበተ: he remained. በረከተ: was flatulent. አማስዋለ: crucified. Original Noun. **ክብር**: honour. **ግልጽ**: the public. **ምስክር**: witness. **ሰንበተ**: Sabbath. **በረከተ**: blessing. **መስቀል**: cross, crucifix.

VERBS DERIVED FROM VERBS.

Original Verb.

**DOM 21:** he was glorious. **DOM 21:** he laid a foundation. **WZ:** it flourishe **WZ:** he built.

**11**: it flourished, he was glorious. **W2.**: he built.

(b) Under Defective Verbs, we mean, (1) Those which occasionally lose some of the Radicals; and (2) Such as have not all the Moods or Tenses, or Persons in conjugation. They will be mentioned in their proper places.

- (c) Irregular Verbs are of various kinds:
  - A. Such in which the Afformatives are irregular.
  - B. Such as have either the first or second, or second and third Radical Letters contracted.
  - C. Geminants.
  - D. Reduplicated and Transposed forms.

All these will be exhibited, with their respective Conjugations, after the Regular or Perfect Verb.

## SECTION II.

Various Derivations, or different Forms or Voices of Verbs.

1. In every language, the original idea of a Verb must be determinable by the relation of the subject to the object; and those various relations must be in some way or other expressible by the form of the Verb. The state of any subject of speech, or its action, is either confined to itself, or it exerts an influence on an object, or is itself the object of extraneous influence. This circumstance renders, in every language, three classes of Verbs, or three conditions of the same verb, necessary; *i.e.* neutrality (immanence), action upon other objects, and suffering. In the English Grammars, these qualities are called *Voices*; in the Semitic languages, *Conjugations*, or better, *Derivations*.

2. The ways to express these Voices are different in different languages, according to the pliability and vigour the latter possess.

The more original and vigorous a language is, we conceive, the more will it be able to derive all it requires, for the purpose of expressing the various relations of the verb, from the original verb itself, without the assistance of auxiliaries, and without circumscription: and this seems to show the superiority of the Semitic over the European Languages; because the former fully possess that power, while the latter are deficient in it.

In the English, the Passive Voice is not expressible, but by the Auxiliary  $To \ be$ . The Greek language has the power of expressing it by a change of the Active in the termination, converting  $\omega$  in  $o\mu\alpha i$ , &c. The Transitive is, in a few instances, formed by a change of the vowel, as "to fell" (*i.e.* make fall), from "to fall"; sometimes by Prepositions, as "to enforce," "to belabour," &c.; but, on the whole, European languages are deficient in this respect.

3. In the Semitic languages, the form of the original verb is altered, either by the mere change of vowels in the same radical consonants, or by an addition of servile letters with a suitable change of vowels, in order to express the various determinations and modifications, *i.e.* Voices or Conjugations, of which the verb is susceptible. Of these derivations, the сн. іу.]

Hebrew Verb has seven; the Arabic, thirteen; the Ethiopic, ten different forms. For the Amharic, Ludolf has assigned but four Conjugations; but an attention to the following will show that there are many more.

4. As the 'Triliterals are the most numerous and the most perfect words, we present the reader, first, with a list of all the Forms of Conjugation, to which the perfect Triliteral Verb is liable. And since all these forms do not proceed from any single stem, we take several stems together. The Verbs which will serve us for this purpose are the following:

| መለሰ: act. he returned.             | ሰበረ: he burst.          |
|------------------------------------|-------------------------|
| ከበረ: he was glorious, respectable. | ( <b>LAJ:</b> non occ.) |
| ሰደበ: he reviled.                   | አደረገ: he did.           |
| אוב: he said.                      | RiH: was blunt.         |
| oop-ip: he contradicted.           | ፈተለ: spun.              |
| συήΛ: he resembled.                | חלף: he fulminated.*    |
| OZE: he descended.                 |                         |

These Forms are not of equally frequent occurrence. Those occurring most frequently, are, Nos. 1. 111. 1V. V. VII. X. XIV. and XV. The rest are more rare.\*

5. Observations on this List:—Most of the forms it contains are analogous to the forms of derivation in the Hebrew, the Arabic, and more especially in the Ethiopic Verb; which will be evident from the following remarks:

1. **DOAT**: comprises the Ethiopic and Arabic 1. and 11. forms, and the Hebrew Kal and Piêl.

CH. IV.

<sup>\*</sup> We beg to observe here, that, on account of the haste in which the Dictionary was prepared for press, the Forms XVI. to XXIII. were not arranged in it under their roots; as the Author was not then aware, that they were simple derivations from the Triliteral Verb. To this conviction he arrived when drawing up this Grammar.

сн. іу.]

III. Khnz: answers to the Ethiopic IV. and v., and to the Arabic IV.

IV. TODAT: corresponds with the Eth. VI. and VII., and with the Arabic v.

v. XF72: "he made speak," answers the Arabic xI.

עו. דרוב: "he spoke," answers the Eth. עו. דכחב: and Arabic עו. تنفاعل

VII. **TJDP7T**: seldom occurs, and has no correspondent in the other languages.

vut. IX. and x. answer the Ethiopic and Arabic x. ۲۵۲۹۸۲:

The rest are peculiar to the Amharic; although modifications of the same forms occur, especially in the Arabic.

6. Before we proceed, we notice the Conjugations of the other classes of Verbs:

I. TRILITERALS WHOSE FIRST RADICAL IS A GUTTURAL.

They are affected by the rules laid down in Part I. Ch. VII. 2. B. 3. C. The following list contains their several conjugations:

## SECTION III.

On the Flexion of Verbs.

The Flexion of Verbs treats on their Moods, Tenses, Numbers, and Persons.

## 1. Moods of the Amharic Verb.

The Amharic Verb has Seven Moods: (a) the Indicative; (b) the Contingent; (c) the Subjunctive; (d) the Constructive; (e) the Imperative; (f) the Infinitive; (g) the Participle.

\* ). This class is most numerous, and comprises a great variety of Verbs, as the following List will show: መረኮዘ: ወሶሰካረ: መሰከወ: መነኩሰ: መነዘሀ: ሰበቀለ: ሰነክለ: ሰነዘረ: ሰነገለ: ሰነጠቀ: ሽመገለ: ሽነከረ: ሽነገለ: ቀለበሰ: ቀለወጠ: ቀለጠፈ: ቀመጠለ: ቀግረጠመ: ቀባጠረ: በረከተ: ተረጉመ: 'ተነኩለ: ኾነከረ: አመለከ: ሉነከሰ: ሉነጠሰ: ወነጀለ: (መነገሉ:) ዘነበለ: ዘነጉረ: ደነቅረ: ደነገዘ: ደነገጠ: ጉለመሰ: ጉነቀ-ሉ: ጉነበሰ: ጉነደሉ: ጉነጽፈ: ጠረቀመ: ጠናወተ: ጨነገፈ: ጸመለገ: ፈነተረ: ፈነቀሉ::

2. Most of the forms comprised in this List are Derivative; either from Nouns, as **סטוֹחֵל:** סטוֹחִיּחֹ: דְּיוֹחְלֵ: חְלָחִדָּ: or, as most of the rest, from Triliteral Verbs. The use of the liquid i: in this amplification of forms, is remarkable; *e.g.* גוֹחָה: is from the Arabic of the liquid i: from the Hebrew שבת, חוֹחָה: from the Eth. החחף:: חוֹחָל: from the Eth. הוֹחָל: &c.

A. The *Indicative* Mood has nothing particular. It has two Tenses, the Preterite and the Present (or Future); besides which, other Tenses are formed by the Contingent and the Constructive, in connexion with Auxiliaries.

B. The *Contingent* is the simple verbal form with the Personal Preformatives and Terminations, and serves for the Indicative as well as for the Subjunctive, according as it is either, (1) Simple; or (2) has Conjunctions prefixed, and what the nature of those Conjunctions is; or (3) whether any, and what sort of Auxiliary, is attached to it. (See pp. 66, 67.)

C. The Conjunctive or Subjunctive Mood is not used in the Amharic, except for the purpose of expressing a desire, or request, or obligation. Its peculiarity consists in its Radicals, after the prefixion of the Personal Scrviles, assuming the form of the Imperative. (See pp. 68, 69.)

D. A curious Mood, and peculiar to the Amharic and Tigrê languages, having its beginning undeveloped in the Ethiopic Infinitive, is the *Constructive*. It is formed by the simple root of the verb with Personal Afformatives; and has four forms; one simple, one augmented, and two compound forms. (See pp. 70, 71.)

E. The form of the *Imperative* (its nature being the same as in other languages) is short. (See p. 71.)

F. The *Infinitive*, or Verbal Substantive, is formed by the prefixion of **GO**: to the Simple Form.

G. The *Participle* presents five; viz. three Simple, and two Compound Forms. The three former, partaking of a nominal character, have been exhibited in the Table of Derivative Nouns: the two latter are formed by the Finite Verb Preterite and Contingent, to which certain Preformatives are prefixed; and they retain their flexibility, *i.e.* capability of being conjugated. Besides this, they are all declinable. (See pp. 72, 73.)

We come now to speak,

## II. Of the Tenses of the Amharic Verb.

They are not so exactly distinguished in the Amharic as in our European Languages: in fact, the Abyssinians have not, strictly speaking, more than two divisions of time; *i.e.* the *Past* and the *Present*; the Present being used also for the Future. The Past is subdivided into the Perfect, and Imperfect or Pluperfect; the Perfect being rendered by the simple Preterite form, and the Imperfect or Pluperfect, (which are not distinguished from each other) being composed either of the Contingent or the Simple Constructive, with the Preterite Auxiliary **in z**:: The Present, which might be, perhaps with propriety, called Aorist, because it is appliCHAP. 2.

··· 1.

## ON THE VERBS.

cable to the Future as well as to the Present Tense, is a form composed of the Contingent and the Auxiliary  $\hbar h$ :: In order to distinguish the Future from the Present, where the context is not in itself clear enough, certain phrases are adopted which leave no doubt that the time is yet to come in which the action &c. of the subject is to take place. But more of this afterwards. (See p. 66.)

3. The Number of Conjugation is but twofold, Singular and Plural.

## 4. The Persons.

There are, in reality, not more than *three* for each Number; viz. the person speaking, the person spoken to, and the person spoken of; but the grammatical forms are more, as has been shown under the article of Pronouns, Chap. III.; namely, seven forms for the Singular, and three for the Plural. Now the Semitic Languages have this in common, that the personal distinctions in the Conjugations of Verbs are expressed by certain letters affixed or prefixed, or both, to the Radicals of the Verb; and in so doing, the act of Conjugation is accomplished. We call the prefixed letters *Preformatives*, and the affixed ones *Afformatives*. The following List exhibits them.

What hitherto has been said, may suffice for the preliminaries: we therefore now proceed to the Conjugation of the Verbs.

## SECTION IV.

Conjugation of Verbs.

Before we enter upon the conjugation of the *Regular* Verb, we give the conjugation of the two *Auxiliary* Verbs:

እለ: he is. ነበረ: he was;

and of the Irregular and Defective Verb Substantive, 10: "he is."

A. 7a: Eth. **UAO**: contr. **UAO**: "he is," "there is" (French, *il y a*), is used only in the Present; but that has a Preterite form.

Note 1. — This verb is not to be confounded with the Irregular Verb  $\Lambda\Lambda$ : "he said"; which will be given, when we treat of the Irregular Verbs in general.

2. The 3d pers. sing. and plur., combined with Suffixed Pronouns, have the same signification as "est" and "sunt" in the Latin, with the Dative of the Personal Pronoun; e.g. Mihi est, "I have." So in the Amharic,

ጠር: አለን: I have (possess) money.

ልጀች፡ አሉተ: he has (possesses) children.

3. As Auxiliary, the 3d pers. sing. masc. is changed into TA: e.g.

ደሳል: for ደል: አል: he says.

ተቀምዋዋል: for ተቀምጦ: አል: he is sitting.

B. **Ind:** "he was," is used as Auxiliary for the Past Tenses in the Indicative and Subjunctive. It has only the Preterite.

CH. IV.]

Note.—When used as an Auxiliary, **InC**: serves often for any person Singular or Plural; e.g.

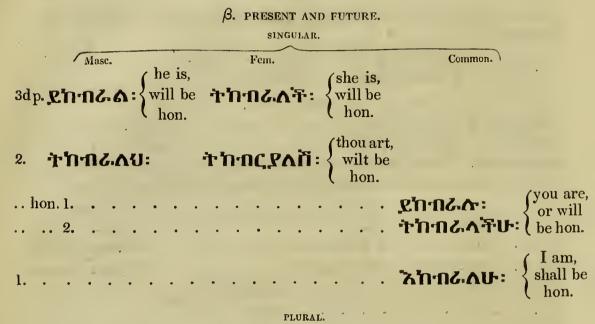

ተቀምጠው: ነበር: they were sitting. ትመጣ: ነበር: thou wouldest come.

## C. 30: He is.

This verb is singularly anomalous. It consists of merely one radical letter 1:, to which the Verbal Suffixes are attached, instead of Personal Afformatives. Is used only in one form, which we may call the Preterite of the Indicative, because it resembles that more than any other form.

CH. IV.

Common.

3d pers. ghnach: they are, will be honourable.

2d .. ተከብራለችሁ: you are, will be honourable.

lst .. '**גאהתצ**גא': we are, shall be honourable.

Note 1.—Whether this form, when it occurs, is intended for the Present or for the Future Tense, generally depends on the context. In order, however, to leave no doubt when they speak of future things, they use the simple contingent form with additional particles; e.g.  $\frac{1}{1}$  and  $\frac{1}{2}$ : "I have (am) to be honourable."  $\frac{1}{1}$  and  $\frac{1}{2}$ : "I have (am) to be honourable."  $\frac{1}{1}$  and  $\frac{1}{2}$ : "I have (am) that I am to be honourable," &c.

2. Personal Suffixes, and sometimes the Conjunction 90:, are infixed between the Simple Form and the Auxiliary.

As this form is used for both the Indicative and the Subjunctive, as well as for the formation of Participles, we have given no translation of it; but shall present a few instances here, to illustrate its use:

66

. CH. IV.]

RnnC: H3C: in order that he may be honourable.
AnnC: that he may be honourable.
A32 nnC: that he is honourable.
nnnC: or RnnC: A32U3: if he is (be) honourable.
nnnC: than that he should be honourable.
nnnC: while he is honourable.
PoginnC: he that is honourable.
KEnnCP: he is not honourable.

The Present and Future of the Indicative, also, is a composition of the Contingent with the Auxiliary  $\pi \Lambda$ : which is omitted whenever the word receives any augmentation at the beginning or at the end, except Suffixes or Copulative Conjunctions.

1. .. 'A 3710C: may we, let us be honourable.

Note 1.—As the Subjunctive is so nearly related to the Imperative, always expressing a wish, a request, or indirect command, it is natural that the Second Person Singular, in its direct form, and the same person in the Plural, is less frequently used than the remaining forms; for they use more generally the Imperative.

2. Several verbs are destitute of this form, and they use the Simple Contingent. It may therefore be of service to the Student, to give a list of those verbs of this class which have this form; and another of those which have not.

' 3. In verbs whose first radical has a diphthong, the latter is shortened into that diphthong which answers the sixth vowel order; e.g.  $\mathcal{R}\Phi^{-}\mathcal{L}\mathcal{T}$ : "let him cut," from  $\Phi_{-}\mathcal{L}\Pi$ ::  $\Lambda^{+}\mathcal{T}\mathcal{R}\Omega$ : "do not be deficient."

4. The Subjunctive is so nearly related to the Imperative, that it yields all its forms to serve the latter, where that is deficient. So in the negative orders, prohibitions or warnings, where the Imperative cannot be used for having no Servile Preformatives; e.g.

| አተንገር: do not tell. | አትውደቅ፡ do not fall. |
|---------------------|---------------------|
| አተግደል: do not kill. | አተቀ-ረዋ: do not cut. |

## (d) Constructive Mood.

This is a singular Mood, which has nothing corresponding, either in our European or in the other Semitic Languages; although its form, as

far as the Simple one is concerned, answers the Ethiopic Infinitives  $\exists \mathbf{n.C}$ : and  $\exists \cdot \mathbf{nC}$ :; but this Mood is not an Infinitive. It has nothing of a Substantive character; whereas the Infinitive is the first Verbal Substantive, possessing both the characters of Substantive and Verb. Nor is there any other Mood to which it exactly corresponds: neither Participle nor Gerund, nor Finite Verb, will answer it; although it may be occasionally translated by either, and sometimes by an Adverb. It occupies an intermediate station between the Infinitive and the Finite Verb; has four forms, one of which is Simple, one Augmented, and two Compound; and is flexible, like the Finite Verb, having Afformatives resembling the Suffixed Pronouns, partly of the Noun, and partly of the Verb. The Simple form is used for amplifying; the other forms, on account of the auxiliaries which are attached to them, for constituting sentences. When the nature of this Mood is understood, we hope the designation *Constructive* will be justified; not having been able to fix upon any better.

The Simple form **'n-nC**: (a modification of the radix **'n-nC**: "honour"), which may be considered as containing the idea of an agent, and of an action, or a concrete being, and an abstract state or condition, &c., assumes peculiar forms of Pronouns; which must not be taken as Possessive (Nominal), but as Personal (Verbal); nor as the other Verbal Suffixes which are in the Accusative; but they are Nominatives. Here it is:

The Augmented form has become Finite by the Auxiliary  $\Lambda \Lambda$ : being attached to the Simple form; but not in the same manner as it attaches itself to the Contingent, in constituting the Present and Future Tense. It serves for the Past and the Present Tenses.

#### Imperative. (e)

The Imperative has two forms; one which has the first Radical in the sixth, and the second in the first order; and another which has the first Radical in the first, and the second in the sixth order. All those verbs which have the Subjunctive form, have the Imperative in the first; and the rest have it in the second form. As a specimen of the first, we take the Imperative of mn2:; and of the other, that of mnp:: It is used only in the Second Person Singular and Plural.

## **OBSERVATIONS.**

1. The Simple Participial forms are used in their verbal as well as in a nominal character. This is evident in Active Verbs; e.g. MIP: "observing," watching," guarding"; and "guardian," "observer": which may have its object connected with it either in the Genitive Case, when it is considered as a Noun, e.g. PN7: MJ4: "a keeper, guardian, of sheep," "shepherd"; or in the Accusative Case, N73: MIQ: "one keeping, watching the sheep." The Passive forms are resolvable by the two compound forms  $(\aleph)$  and  $(\beth)$  of the Passive Conjugations.

2. The two compound forms of the Relative or Adjective Participle evince their Participial character (which consists in partaking-participiendo-of the properties of the Verb as well as of the Noun, and forming a connecting link between both) by the position in which they stand when connected with Nouns, as Adjectives; by the treatment they experience from other Transitive Verbs, when being put into the Accusative Case; and by the influence they themselves exercise on Nouns and Pronouns. As this subject, however, belongs more properly to the Syntax, we shall leave it for the present.

L

CH. JV.

Before we leave this subject, we beg to present to the Student those regular deviations which take place in those verbs whose third radical letter is liable to change, by the accession of the vowels  $\ddot{i}$  and  $\hat{e}$ , according to the rule laid down Part I. Ch. VII. c. This occurs in verbs ending in  $\Lambda: W: \dot{\Pi}: \dot{T}: \dot{I}: H: \mathfrak{K}: \Pi: \mathfrak{K}:$  and  $\Theta$ ;, with (1) the Feminine of the 2d pers. masc. in (a) the Present Indicative; (b) the Contingent Simple and Compound; (c) Subjunctive; (d) Imperative; (2) with the 1st pers. sing. in the Constructive Simple and its Compounds. #### SECOND CONJUGATION. *B*.

whose characteristic is a prolongation of the first radical, by which it is changed from the first into the fourth form. Its force is intensity of the idea of the original form.

**TRO:** he scolded exceedingly.

Its difference in form, from the First Conjugation, is as follows:

1. It retains the first long radical throughout; on this acccount, it

2. Has no peculiar form for the Subjunctive, but is served by the Contingent Mood.

3. In the Imperative, the first radical is long, of the fourth : the second short, of the sixth order.

4. In the Infinitive, the first radical is of the fourth; the second, as in all the conjugations, of the first order.

The mode of conjugating being the same as in the first species, we shall give only the Third Person, Singular and Plural, in those Moods and Tenses which have it.

tign: "he was reviled."

Its nature is pre-eminently *Passive* (objective), and reflective. Its characteristic is the Preformative  $\mathbf{T}$ : to the original form in the Preterite, Constructive, and Imperative, which, in the same manner as in the cognate languages, gives way to the other Preformatives in the process of conjugations. The second radical remains unchanged in all the moods, tenses, and persons, except in the Constructive Moods. So does also the first radical in the Infinitive Mood. These two remarks serve to distinguish this and the other Passive Conjugations from the rest.

## ON THE VERBS.

## E. FIFTH CONJUGATION.

ארזע: He made (caused to) speak.

The nature of this verb is doubly transitive, or *causative*. It combines the characteristics of both the second and the third conjugations; the prolongation of the first radical giving intensity to the transitively (by  $\pi$ :) augmented form.

## G. SEVENTH CONJUGATION.

**TTOPNZ:** he tried. TTOPNT: he disputed.

[сн. іv.

7. PARTICIPLES.

Simple, TPPh2: one who tries.

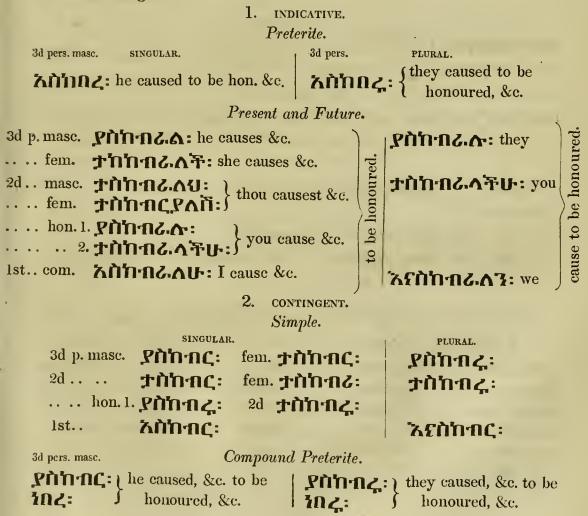

Relative (a) Perfect, PTPPA: he who tried, &c.

(b) Present, PoyouphC: he who tries, &c.

## H. EIGHTH CONJUGATION.

**Anna:** He caused to honour, caused to be honoured.

This is the most frequent form for the causative voice. Its characteristic is the prefixion of the two letters  $\Lambda \hat{n}$ : to the original form, with which it has nearly the same mode of conjugation. The second radical is, in the Contingent and all other forms derived from it, put into the sixth order. But it has no Subjunctive form. The Imperative has the Contingent form of the radicals. The Infinitive has the first and second radicals in the first order. The Personal Preformatives are put before the  $\lambda \hat{n}$ : absorbing the  $\lambda$ ::

## I. NINTH CONJUGATION.

አስመካለ: He caused to resemble; he flattered, dissimulated.

The difference of this conjugation from the preceding is so slight, that we do not find it necessary to give its flexion: it consists merely in the second radical being constantly long, except in the Constructive: in all the rest it is similar to the preceding Kinnz: As to the third radical A: we refer to the deviations marked under the First Conjugation, No. 1. This conjugation, by the way, is very rare.

CH. IV.

CII. IV.

እስተነገረ: He made to speak.

The force of this conjugation is Causative, as the two preceding ones. The difference consists in the form being augmented by three letters, **Ant**: instead of the two **An**::

## N. FOURTEENTH CONJUGATION.

roohnz: He counselled with others, gave and took advice, advised frequently.

τουΛΛή: He went and returned, went to and fro, *i.e.* walked.

The force of this conjugation is double intensity, reciprocity, and repetition of the action expressed in the verb. This is represented by reduplication and prolongation of the second radical. Its flexion and conjugation is quite the same as in the Sixth Conjugation.

#### O. FIFTEENTH CONJUGATION.

**TFJ12:** He conversed with another, spoke frequently.

The nature of this conjugation is the same as the preceding; and as to form, it differs only in having the first radical long, in conformity with the sixth species, which it resembles entirely in flexion and conjugation.

P. Q. R. S. SIXTEENTH, SEVENTEENTH, EIGHTEENTH, & NINETEENTH CONJUGATIONS.

እይነዘዝ: "To stiffen." Transitive.

The chief peculiarity of these four species consists in doubling the third radical, or gemination.—As we shall have an opportunity of treating more fully upon the Geminant Verbs, we merely mention these forms here; and pass on to the remaining forms of the Regular Triliteral Verb.

T. TWENTIETH CONJUGATION.

## Agfic: He talked one out of any thing, dissuaded.

This and the Twenty-first and Twenty-fourth species are rather remarkable for their singular Preformatives, which are not in use in the cognate dialects. The conjugation of **ARETA:** is similar to that of **ARE.27**: we therefore proceed.

U. TWENTY-FIRST CONJUGATION.

# 2. Conjugation of various Imperfect Forms of the Triliteral Verbs.

Having thus exhibited the conjugation of the various forms of the Regular and Perfect Triliteral Verb, we now proceed to the consideration of the Imperfect Forms of Triliteral, of Perfect and Imperfect Forms of Biliteral, and of the various forms of Pluriliteral Verbs. We shall endeavour to point out, especially by paradigms, where it is necessary, and the peculiarities in the flexion and conjugation of each; not in order to accumulate materials for the memory, but to facilitate the comprehension of the structure of this part or the language. We notice,

# I. TRILITERAL VERBS whose First Conjugation is A (A: or O::)

The chief peculiarity of these verbs consists in the liability under which they are to have the first radical contracted with every Preformative acceding to the Verb, according to the rule laid down in Part I. Chap. VII. 2. A.B. For the purpose of exemplifying, we select the two Verbs 700; "he believed," and 704: "he passed."

አስታመን: He accredited, attested, entrusted.

This form, which joins the characteristics of the Objective and of the Transitive Voice in nature and form, answers the Tenth Conjugation of the Perfect Triliteral Verb.

> FIFTH CONJUGATION. *E*. Intensive Voice.

TAAG: Passed and repassed, trespassed, varied.

In this form, which corresponds with the Fourteenth Conjugation of the Regular Triliteral Verb, the first radical, A:, is dropped; but the T: is retained when Prefixes are joined; e.g. Contingent, EtAAG .:: Infinitive, ootang ::

## F. SIXTH CONJUGATION.

Causative and Intensive Voice.

አስተላለፈ: He made pass in different ways.

In this form the Causative **An**: is joined to the preceding Conjugation.

## II. SECOND CLASS OF IMPERFECT TRILITERALS.

Triliteral Geminants.

(See page 56, II.)

These verbs seem to have been derived from Biliterals which are lost, but whose second radical has been doubled. (See Part I. Ch. VII. 2. D.) In conjugating these verbs, the geminant letters are often contracted into one; but that letter, although the Abyssinians have no mark for distinguishing the accent, shows its origin, by having the tone.

It will be observed, that there are, among the ten different Conjugations of this class, four which have the 3:, either with the Transitive 5:, or the Intransitive 7: prefixed.

In looking at the numerous verbs of this class, mentioned in the note, page 56, it will be seen that all classes of letters, except the gutturals and the vowel letters, are subject to gemination.

The general mode of conjugating being the same in this as in all other classes of verbs, attention is to be paid especially to those forms which have gemination, and to those which have the contraction.

After these preliminary remarks, we proceed to give the Paradigms.

## A. FIRST CONJUGATION.

**ΔΦΦ:** neut. He went away; act. He dismissed.

Gemination exists in this Conjugation—in the Indicative, Preterite, Subjunctive, Imperative, Infinitive and Simple, and Relative Preterite Participles: Contraction in the remaining Moods and Tenses.

አንጠሪ.ሪ.: and ተንጠሪ.ሪ.: He stretched himself.

The peculiarity of these two forms, the power of which seems to be the same, consists in the length of both the geminating letters. On account . of their length, they cannot be contracted. They assume, therefore, no Subjunctive form; and the Geminants retain their length, except in the

## III. THIRD CLASS OF IMPERFECT TRILITERALS.

Geminants whose first radical is X::

This class numbers only a few Verbs. They combine the imperfections of contraction in the beginning and at the end, *i.e.* the imperfections of both the preceding classes. For an exhibition, we select the Verbs  $\mathbf{\ddot{T}HH}$ : "he commanded," and  $\mathbf{\ddot{T}OOOD}$ : "it was painful."

This class has but four Conjugations; the first of which is Intransitive or Active; the second, Objective, Intransitive, or Reflective; the third, Causative; and the fourth, Intensive.

## B. SECOND CONJUGATION. Passive, Reflective, and Intransitive.

10000: He felt pain, was sick. THH: He was commanded, he obeyed.

In this conjugation, the **†**: is retained throughout; and contraction of the second and third radical takes place in the Constructive Mood only. No Subjunctive. Second radical is treated as in all the Objective forms.

## C. THIRD CONJUGATION. Transitive and Causative Voice.

# Kioooo: He made sick, gave or caused pain.

The first radical  $\bigstar$ :, absorbed in the Preformative  $\dashv$ :, undergoes no further change. Gemination prevails in the Preterite, Indicative, Imperative, Infinitive, and Simple and Preterite Participles; Contraction in the Indicative, Present, and Constructive; and both Gemination and Contraction in the Contingent. Respecting the latter, we think, that when it stands by itself, it is geminated; but when it receives any addition at the beginning or at the end, it is contracted.

## D. FOURTH CONJUGATION.

## Intensive Voice.

## አስታመመ; He nursed sick persons.

This conjugation corresponds with the Tenth of the Perfect Triliterals, and with the Fourth of the First Class of Imperfect Triliterals. Contraction takes place only in the Constructive Mood.

## 3. Conjugation of Biliteral Verbs.

Biliteral Verbs are, in the Amharic Language, exceedingly numerous; owing especially, as will be seen hereafter, to the many contractions from Triliteral Verbs, by which they became Biliterals. In treating on these Verbs, it will be best to divide them into four distinct classes; namely, (a) Perfect; (b) Imperfect; (c) Contracted; (d) Irregular and Anomalous Biliteral Verbs.

## I. FIRST CLASS.—Perfect Biliterals.

These are Verbs which have the two radical letters in the first form, do not begin with any vowel letter, and are conjugated regularly. They have this resemblance to some of the Contracted forms, that the paragogic  $\mathbf{\hat{\tau}}$ : is added to most of its Infinitives, and enters into the Constructives. They are conjugated through Eight different Species or Conjugations.

## ON THE VERBS.

## F. SIXTH CONJUGATION.

Causative and Reciprocative.

KNTPP: He made look at each other; placed over against

each other.

Is not, in form, different from the preceding; save the prefixing of  $\pi$ n: and the changes which that undergoes; and; that in the Imperative it has  $\pi$ n†PE::

## III. THIRD CLASS.—Contracted Biliterals.

This very numerous class is derived from Triliterals; which, in the Ethiopic and Tigrê Languages, have either a Vowel letter  $\Lambda: 0: P:$  or 0:, or a Guttural U:  $\Lambda: \mathcal{A}:$  or  $\Pi:$  contracted with the preceding letter. The letter to which their vowel has thus been joined has been made long; whilst the verb itself has become a biliteral one. In some few cases of Quadriliterals, two contractions have been made; and we have therefore Biliteral Verbs of two long radicals. Verbs contracted from Triliterals differ, as to whether the lost letter stood formerly in the middle or at the end; and this materially determines their form of conjugation.

(aa.) Verbs with an absorbed Guttural at the end.

## A. FIRST CONJUGATION.

Intransitive and Active Voice.

The second radical is always long; except in the Constructive Mood, and in the Simple Participle.

C. THIRD CONJUGATION. Passive and Intransitive.

T7n: impersonal. It was proper, It belonged.

Is treated like other Passives—has no Subjunctive. The Constructive has **T7-f1-f**: and in other respects it is like **71**::

> D. FOURTH CONJUGATION. Active Voice. **AJN:** He married.

The  $\mathcal{J}$ : is long throughout; and the Preformative  $\mathcal{K}$ : is treated as in all the Transitive forms.

E. FIFTH CONJUGATION.
Passive of the preceding. **TJ1**: Was married.

F. SIXTH CONJUGATION. Causative Voice. **XN77**: He caused to go in; introduced.

A geminating form. The long middle letter is retained throughout, and the rest treated like **71**::

#### H. EIGHTH CONJUGATION.

#### Intensive and Reiterative.

አገባባ: He frequently went in, often cohabited, behaved properly.

This conjugation is like a transitive of the preceding one: the long penultima is retained throughout, and the rest treated like **A79**::

## I. NINTH CONJUGATION.

#### **ARFF**: He comforted, strengthened.

The two middle letters remain long;  $\bigwedge$ : is treated as in all Transitive forms: there is no Subjunctive; and as to the rest, this conjugation is like the others of this class.

#### K. TENTH CONJUGATION.

#### Intense Passive.

#### **TRFF:** Was comforted.

Is treated like other Passives, retains the long penultima, and has the other peculiarities of this class.

## (bb.) Forms with an Absorbed Guttural in the Middle.

In these forms, the original guttural having been in the middle, on its absorption, the first radical has become long. It retains, however, its length only in the Indicative Preterite, the Imperative, and the Infinitive Moods of the Active; and through the whole of the Passive forms, except the Constructive. It has no peculiar form for the Subjunctive; but uses, as is generally done in such cases, the Contingent for the purpose. It has, besides, the paragogic '**T**: extremely seldom; because it appears that letter is intended for compensation for final absorbed letters, of which there are none in this class.

This class has seven different Conjugations.

(cc.) Forms with an Absorbed **P**: in the Middle.

These forms are determined by the rule laid down, Part I. Ch. VII. 4. E. On the absorption of the **P**: its corresponding vowel  $\hat{e}$  has been joined to the first radical; which, whenever it is shortened, changes  $\hat{e}$  into a short i; but when lengthened (as in the Fourth Conjugation), the first radical is put into the Fourth Order, and **P**: is restored. No paragogic  $\hat{T}$ : is in this class.

(dd.) Forms with an Absorbed **(D)**: in the Middle.

According to the rules laid down in Part I. Ch. VII. 5, and 6. the middle letter  $\mathbf{O}$ : has been absorbed; its vowel *o* attached to the first radical. This is further shortened, in the Subjunctive Constructive and Active Imperative, into  $\overset{\circ}{u}$ . But in those forms which have long letters,  $\mathbf{O}$ : is restored. In some of these, it forms diphthongs of the fourth order. Those forms of this class, whose first radical is a diphthong, as  $\mathbf{P} \cdot \mathbf{P} : \mathbf{P} \cdot \mathbf{A} : \mathbf{P} \cdot \mathbf{A} : \mathbf{T} \cdot \mathbf{A} : \mathbf{T} \cdot \mathbf{A} : \mathbf{T} \cdot \mathbf{A}$ ; which the forms with simple *o* have not.

#### SECTION V.

### On the Connexion of Pronouns with Verbs.

1. In other languages, this subject would be referred to the Syntax; but in the Semitic family, the Pronouns governed by Verbs are so closely joined to them, that it would be improper to do so, as the form of the verb is modified in no slight degree by this combination. We conceive it to be here the best place for exhibiting the mode in which it is performed, after having explained all the other processes to which the Amharic Verbs are subjected.

2. Before we entered on the consideration of the Verb, in the preceding Chapter, Sect. VIII. we mentioned those Pronouns which are joined to Verbs. We now give a brief statement of the regulations under which they are joined.

(a) All the forms of Verbs assume the Verbal Suffixes, except the two nominal forms, the Infinitive and the Simple Participle, which assume Nominal Suffixes; e.g. 法CI+3: 四個角章: "my keeping him." 「C3: Tiin可见了: "his armour-bearer."

(b) All the forms which assume the Verbal Suffixes do receive them at the end, except the two forms which are inflected with the Auxiliary  $\hbar \Lambda$ : *i.e.* the Present and Future Indicative, and the Aorist of the Constructive Mood; which place the Pronoun between the radical letters and the Auxiliary, so as to render it rather an Infix than a Suffix.

(c) With regard to the different degrees of power the Suffixes possess, of changing the letter to which they are joined, they are divided into light (*levia*) and heavy (gravia) Suffixes. The light Suffixes are those which are not preceded by a long  $\bar{a}$ : those which are preceded by a long  $\bar{a}$  are heavy Suffixes.

CH. IV.

#### ON THE VERBS.

(d) The light Suffixes attach themselves to ultimæ radicales of the first order, without change; and to ult. rad. of the sixth order, by converting the latter into the first order, sometimes without change. The heavy suffixes convert ult. rad., in either of those two orders, into the fourth order.

(e) Ultima radicalis of the second and of the seventh order, in accordance with Part I. Ch. VII. 5 & 6.

changes **O**: into **T**: α.

is changed, if it is a guttural or palatine, into a diphthong of the β. fourth order: if not, the vowel is detached from the consonant; the latter being put into the sixth, and the former becoming  $\mathbf{P}$ : of the fourth order, before all the heavy suffixes. Before suffix 2d pers. hon. 1., it is either left unchanged, or changed into the sixth order, leaving the suffix as it is.

(f) Ult. rad. of the third and of the fifth order changes none of the light suffixes; but agreeably to Part I. Ch. VII. 4. D., when being attached to the heavy suffixes, it is generally changed into the sixth order; and P: is added, to assume the long ā of the suffix.

(g) Ult. rad. of the fourth order neither suffers nor produces any change.

(h) With regard to the insertion or infixion of Pronouns, only this needs to be observed; that A: of the Auxiliary AA: being absorbed by the Pronoun, the latter, or, if it consists of more than one letter, its last letter, is put into the fourth order, U-: being changed into 1: or T::

These rules are illustrated by the following Table:

#### CHAP. V.

#### ON THE ADVERBS.

1. The Amharic Adverbs are either Separable or Inseparable; and the Separable Adverbs are either Simple or Compound. The Simple Adverbs, again, are either Original or Derived. We have to consider, first, the Simple Original Adverbs.

2. The Simple Original Adverbs are to be subdivided into two classes; the first of which comprehends such Adverbs as express their ideas by themselves; the second, such as are usually connected with the Verbs 70: "to say," 次史27: or 次前子: "to do," "to make," "to induce."

**50'F:** " when ?" n'3:1:: " how much?" " how many?" Φſ1: " calmly," " cautiously," " quietly." ·nf: "but," "only," "singly." Is used also with Suffixes in

the Accusative: nfP3: "I alone." nfu3: "thou alone," &c.

•₽ "quickly," " speedily."

ተላንተ: and ተላንተና: "yesterday."

አምና: "last year."

HBC: "this year."

**If:** "yet." With neg. "not yet."

(a) First Class.

**አሁን:** " now."

አንካ:: ስንካ: Shoa, and Vulgar : **አኮ**: "indeed," "even." አንካን: "no!" አንኟ: "but," "except," " not including." አንጀ: "I do not know." አወን: "yes!" **'nf**: "thoroughly,"- "wholly,"

> "fully." With negative "never," "nowhere," "not at all."

OTC: "always."

HZ: "to-day," "now," "at present."

| PARTICLE                         | INSTANCES.                      |  |
|----------------------------------|---------------------------------|--|
| ouc: of leaping, jumping.        | መር: ደላል: " he jumps."           |  |
| <b>7DC:</b> of bitterness.       | ምር: አለ: "it was bitter."        |  |
| ልግም: of carelessness, idleness,  | ልግም፡ ይላል: "he acts carelessly," |  |
| and eye-service.                 | "is an eye-servant."            |  |
| ሲጢፕ: of cracking.                | ቢጢፕ፡ ይላል: " it cracks."         |  |
| ሰፈፋ: of soaring.                 | ከፈር: ይላል: "it soars."           |  |
| Titt: of gliding.                | ሽተተ፡ ይላል፡ "he slips."           |  |
| <b>ΦΠ</b> : of caution, silence. | ዋስ። ደላል: " he acts cautiously." |  |
|                                  |                                 |  |

(b) Second Class.

## сн. v.]

#### ON THE ADVERBS.

ብልጫ: of glimmering, glittering. n't'3: of scattering. **ΥΛ**: of celerity. TG: of spitting from between the lips. **ΤΔ**: of neglect. እልል: of shouting. አምቢ: of refusing. እቪ: of compliance. 76.: of blowing, fanning. ክተተ: of fulness, completion. hq: of highness, elevation.

'HPP: of silence. Ήφ: of lowness. HA7: of tallness, &c. Rn: of joy.

**<u><b>Q**</u>**\Theta**: of slipperiness. ημημ: of celerity. GG: of completion. **87**: of silence, subsiding. G.PA: of moving forwards.

**6.17.** of gliding.

·በልጭ፡ ይላል፡ "it glimmers." 'በተ ን፡ ደላል : "he scatters." ተሎ። ደላል: "he does quickly." **ተፍ.: አለ:** "he spat."

ቸል: ደሳዋል: "he neglects him." **እ**ልል፡ በል: "shout!" እምቢ፡ አለ፡ "he refused." ሽቪ: ይላል: "he yields, " is willing." **አፍ: በል:** " blow," " fan." ክተተ፡ ደላል: "it is full," "done." hg.: kg21: "he raised," "elevated," "made high." ዝም: አሰኝው:: " he silenced him." ዝቅ: አለ: "he was low," "stooped." HAT: LAA: "he is tall and stout." ደስ፡ አሰኝው፡ "he rejoiced," " pleased him." ደፅ፡ አለ: "it was slippery." קאשיי: אה: "he went quickly." ጫ: አለ: "it was full," "entire." ጭቅ: of spitting through the teeth. ጭቅ: አለ: "he spat thro' the teeth." Xዋ: ሽለ: "it became quiet." ፈዋቅ፡ አለ: "he proceeded," "went further." G. JOD 1: KR27: "he made to glide."

Most of these particles seem to be originally intended for mere expressions of the natural sound of certain actions. Such is decidedly the case in 几爪子: 计兵: ጭ中: 六〇〇: 六兵: ዋይ: And their connexion with  $\Lambda\Lambda$ : "to say," giving the idea that e.g. "to crack" is "to say sit'it"; to spit," is "to say teff" or "tsh'ek"; "to shout" is "to say ellel" (as is really the custom in the East \*); "to blow" is "to say eff"; could lead us to rank the whole of this class rather with the Interjections, but that their connection with Verbs prohibits us, though several of these Particles are Interjections as well as Adverbs.

<sup>\*</sup> See, in the Amharic Dictionary, 766:

3. Simple Derived Adverbs are very numerous. They are derived from Nouns (Adjective and Substantive), and Verbs, and at least one Pronoun. Those derived from Nouns are not changed in form, but in the sense. Perhaps they may be considered as Accusatives, or having the Preposition  $\mathbf{\Omega}$ : omitted. Such Nominal Adverbs are the following:

| ORIGINAL SUBSTANTIVES.                   | ORIGINAL ADJECTIVES.          |
|------------------------------------------|-------------------------------|
| mge: { "outside," "abroad,"<br>"within." | መልካም: "well," "properly."     |
| "" ( " within."                          | ቅርብ: "near."                  |
| <b>1]</b> : "to-morrow."                 | ክд: "badly."                  |
| mag: "early in the morning."             | RUf: "well," "safely."        |
| ቅድም: "before," "previously."             | ታላቅ: "largely," "greatly."    |
|                                          | <b>እዮ 9</b> : "much." "verv." |

Besides these, perhaps every other Adjective may be used adverbially.

Simple Adverbs derived from Verbs:

| አደደለም፡ "no."                | <b>PAC:</b> Particle of forgiveness; e.g. |
|-----------------------------|-------------------------------------------|
| ያህል: "nearly," "about."     | <b>ደቅር: ደሳል</b> : "he forgives."          |
| <b>ደልቅ:</b> "more" (magis). |                                           |

The Simple Constructive Mood is altogether used for Adverbs; e.g.

| <b>Ladin</b> "               | በዝተ: "more."                            |
|------------------------------|-----------------------------------------|
| ደግሞ፡ ;<br>መልኮ: } "again."    | Φ <b>Υ</b> ·Φ: "before," "previously."  |
| ማልደ: "early in the morning." | አስዋድሞ: { "before," " in the beginning." |
| <b>ዋርቦ:</b> "near."          | beginning."                             |
| ብሎ: "saying," "thinking."    | ጉድሉ "wanting," "but."                   |
| አብር: "together."             | አድር <b>ጎ</b> : "doing."                 |

Adverbs of uncertain origin are: חע: (Shoa, חה: and הלא:) "readily," "with pleasure!"

4. Compound Adverbs are formed, (a) by Prepositions and Nouns; (b) by Prepositions and Pronouns; (c) by Nouns and Nouns; (d) by Prepositions, Nouns, and Particles.

חגח׳: "by the head-side." חצָ־ז: "by the hand-side."

חקר: "by the foot-side." חצעים: "near the door," &c.

5. Inseparable Adverbs are but few.

λΛ —: non-, un-, in-, &c. ΆΡ -: Distributive Particle.

-7: Interrogative Particle.

The Negative Particles  $\lambda - : \lambda \land - \mathfrak{P}$ : and  $\lambda - \mathfrak{P}$ : are joined to the Finite Verb.  $\lambda \land - \mathfrak{P}$ : is used throughout the Preterite, and with the 1st pers. sing. of the Present Tense. In the other personal forms, the  $\Lambda$ : is ejected, and  $\lambda - \mathfrak{P}$ : remains. The mere  $\lambda - :$  is used in the Subjunctive, and in all cases where the Negative Verb receives any additional Prefixes; *e.g.*

## CHAP. VI.

# ON THE PREPOSITIONS, OR PARTICLES OF RELATION.

1. The term "Prepositions" for that part of speech which falls under the consideration of this Chapter, is not entirely suitable. It is a class which determines the relation between Nouns, Pronouns, or Verbs; and which, because in our European languages they are generally placed *before* the

153

<sup>\*</sup> Mark the difference in pronunciation of the 1st pers. Present from the 3d pers. Preterite. The latter is pronounced "Almat'am"; the former "Alĕmat'am." In the 3d pers. sing. of the Preterite, the  $\triangle$ : is mute; but in the 1st pers. sing. of the Present, it is sounded, because in the latter the Preformative a: which the  $\triangle$ : absorbs, must be heard.

object of relation, have been called Prepositions, but would be better called *Particles of Relation*; as this term would suit also in cases where the Particle is placed behind its object.

2. The Amharic Particles of Relation are partly Simple, partly Compound. The Simple ones are always Pre-positions; the Compound ones consist of Pre- and Postpositions. The Simple Prepositions are either Separable or Inseparable. The Simple Separable Prepositions are the following:

n∧: "for," "for the sake of," "in behalf," "instead of," "in favour of," "because," "on account of," "concerning," "on."

**DQ:** "to," "towards."

**P∧**: "without."

እንደ: "as," "like as," "according to," "in proportion to."

እስከ: "to," "up to," "reaching to," "till," "until."

Inseparable Prepositions are,  $\Lambda -: \Pi -: \Pi -: T -: T -: T -: \sigma U -: \Lambda P -::$ 

 $\wedge$  —: "to," "unto," "in favour of," "to the benefit of," "belonging to."

**n** —: "in," "on," "upon," "at," "by," "through," "with," "against," "for (in exchange)," "over."

**`n**—: "of," "out of," "from," "(more) than," "to."

T-: "with (company)."

 $\mathbf{1} - :$  or  $\mathbf{U} - :$  vulgar, instead of  $\mathbf{n} - :$  and of  $\mathbf{n} - :$ 

**AP-:** "in proportion to," "according to," &c., and Distributive.

Illustrations of the preceding Simple Prepositions.

- (a) 市へ: 法判決不用法員: "For God's sake."
  市へ: ゴ風、木士: 法四寸へሁ: "I die on account (because) of my sins."
  市へ3寸: のの: "He came on thy account."
  市へ: の異見: ደደክማል: "He labours for (in behalf of) his friend."
  市へ: ምろድር: "wherefore?"
  ደህች: ምዕራር: 市へ: Ⴗደማኖኁ: 卞ናገሪ.ヘች: "This chapter treats on faith."
- (b) 法误: 前面: "as a man," "according to (the manner of) men."
  法误: 基乎C前: "like as," or "resembling Peter."
  法误: 孟身果: FRC刀合: "He does according to his will," ("as he likes").
  法误: 予定介: "In proportion to his strength."
- (c) の只: 小口门: 小只: "He went to Abyssinia."

   本节3: の只口口: 六只27: "He set his face towards him."

#### CH. VI.

- (d)  $\lambda n n$ : (sometimes  $\lambda n \tau$ :) is seldom used without a following **P**(2n):, but sometimes it is used by itself; e. g.
  - እስከ: ካንደር: ደሑደል: "It goes as far as Gondar," ("up to Gondar").
- (e) A : is used as a Universal Dative; e.g.
  A1: IMO: "He gave it to me."
  A1: IO: "It belongs to me."
  APD 7: (APD 3 C:) "what for?" ("wherefore?")
  - **ለክልኝ:** signifies both "send to me," and "send for me," (in my favour, or behalf, to somebody else).
- (f) **nnt:** "in the house."
  - በአግዚአብሔር: ያምናል: "He believes in God."
  - በወንጌል: ያስተምራል: "He teaches (in) the Gospel."
  - **NTP1:** "in the morning."
  - **በቀተር:** "at noon."
  - ngog: "on earth," "on the ground."
  - ng. 37 t: "on a sudden."
  - nnº3g3: "at (in) London."
  - **NRE:** "at the door."
  - ጻድቅ: በዓይማኖት: ይድናል: "The just shall live by faith."
  - በባሕርና: በምድር: "By sea and by land."
  - **በሚያስችለኝ: በክርስ ትስ:** "*Through* him that strengtheneth me; through Christ."
  - **NOCPf**: **N·NC**: **7HO·**: "*With* gold and *with* silver did he purchase it."
  - ጸላቲ: መጣበኝ: "My enemy came upon (against) me."
  - **Ea.2.Conta:** "He judges over him" (or, in contrast with **A**—: "pronounces judgment against, condemns him.")
  - ደቅር: በለነ፡ በኛ፡ ይለውን: "Forgive us that which is against us;" i.e. "forgive us our debts," Matt.vi.12.
  - በስድስተ፡ ብር፡ ይቬጠዋል: "He sells it for six dollars."

ድል: ነሣበት: "He gained the victory over him."

(g) **ከቤቱ: ወጣ:** "He went out of his house." **ከርኮ: ወ巾ድሁት:** "I took it from him." **ከኔ: ደበልጣል:** "He is greater than I." **ከርኮ: ያንካል:** "He is inferior to him."

CH. VI.

(h, i) T: and T: or U: are frequently used in vulgar, but not in good language. (See the Dictionary.)

(k) **AP**-: is a Preposition, Distributive and of Proportion. It is related to **ABC**: and has been mentioned already with the Numerals as a Distributive Particle. Other instances are these: **APHODE**: "according to its kind." **APMCGT**: "in his respective order."

3. The Compound Particles of Relation are formed by any of the Simple Prepositions, connected with Nouns, or other Particles. The latter (Postpositions) are either directly joined to the former, or follow after the Noun or Pronoun to which they refer. We shall first give here a list of Postpositions; then show how they are combined with Simple Prepositions; and afterwards exhibit their use, by expressions of daily occurrence in conversation.

## List of Postpositions.

| <b>DWT</b> : "the inside."            | H32:                                      |
|---------------------------------------|-------------------------------------------|
| えへ: "what is behind."                 | H3.C: } particles of company.             |
| AR: "high," "upper," "elevated."      | ድረስ: particle of extent.                  |
| د: " face," " fore-part," " surface." | መጠን: " proportion."                       |
| ታች: "that which is below."            | ልክ: " measure."                           |
| አጠገበ: "the side."                     | <b>ΠΦC</b> : particle of omission.        |
| መካከል: " the middle."                  | አከትል: "equal," "equality."                |
| H-C.P: "surrounding place."           | መክንያተ: " reason," " cause."               |
| <b>አንጻር:</b> "front."                 | <b>4.31</b> : "portion," "stead," "part." |

They are thus combined with Simple Prepositions:

በቤት፡፡ አንጻር፡ "opposite the house."

#### CHAP. VII.

#### ON THE CONJUNCTIONS.

- 1. The Amharic Conjunctions are either Separable or Inseparable.
- 2. The Separable Conjunctions are as follows:
  - (a) Copulative, and Reiterative : **gaqo**: "also," "again."
  - (b) Adversative, **17**: "however," "but."

(c) Disjunctive : **D**是: **D**是问: **D**: 

- (d) Causal: "ABE: "that." HBE: "in order that," "in order to."
- (e) Conditional, "73gu"3: (Shoa, 73g:) "if."
- (f) Conclusive, DAHU: "therefore."
- 3. The Inseparable Conjunctions are these:
  - (a) Copulative,  $-\mathbf{p}: -\mathbf{f}:$  "and," "also."  $\mathbf{h}-:\mathbf{t}-:$  "and," "by," (in counting).
  - (b) Copulative and Adversative :- n: n: "as for," "but," "indeed," "but."
  - (c) Conditional:

 $\mathbf{n}$ :  $\mathbf{n}$ :  $\mathbf{n}$ : " With the Negative  $\mathbf{\lambda}$ : ( $\mathbf{\eta}$ :) "if not," "unless."

(d) Conjunction of time,  $\mathbf{n} - :$  "when," "while." Negat.  $\mathbf{n} - :$  "ere," "before," "without."

(e) Final and Conditional: **\*72**: " that," " if," " to."

- (f) Intensive, እስክ—: "so that," "so as to." እስክ—: ድረስ: "until," "till."
- (g) Comparative, **'n**—: "than that."
- (h) Causal, —f: "for," "because."

Note.—The junction of these Particles to Verbs is effected according to the rules laid down in Part I. Ch. VII.

ON THE INTERJECTIONS.

1. We notice first those Particles which, when combined with the Vcrbs Λ : Λ ? Λ ? and Λ Π ?:, constitute Verbs (See Ch. V. 2.); but when used by themselves, are Interjections. They are the following:

	Particles	Signification.	Particles	Signification.

PART III.—SYNTAX.

ON THE ARRANGEMENT OF WORDS,

AND THEIR

CONSTRUCTION INTO SENTENCES.

·····

CHAP. I.

ON THE NATURE OF SENTENCES, ESPECIALLY IN THE AMHARIC LANGUAGE.

1. A sentence is an aggregate of words expressing a judgment of the mind. It is either simple, complex, or compound. The constituent parts of every sentence are, a subject, an attribute, a copula, and an object; the latter, however, being less necessary than the three former. Simple sentences are such as have nothing but these parts; e.g.

ምድር: ሰፈ: ናት: "The earth is spacious." ንጉሥ: መጣ: "The king has come." አንበሳ: ፈረስን: ገደለ: "The lion killed a horse."

Note.—The Copula, or Joining Verb, which connects the subject with the attribute, is frequently joined with the latter in one and the same verb; e.g. **37.**...: **DOM:** Here **DOM:** contains the attribute of **37.**...: ("king"), which is, "one that came," together with the Copulative Verb "is."

2. Complex sentences are such as are amplified by qualifying words in connection with either the subject or the attribute; e.g.

ΔΥ: Ηζ: συη: "My son came to-day."

Here is the subject, $\Delta \mathcal{R}$: "son," qualified by the pronoun ℓ , "my," and the attribute "who came," (contained in the verb **ooq**: "came," with the copula "is,") by the adverb $\mathbf{H}_{\mathcal{L}_{p}}$: "to-day."

3. Compound sentences are such as have either the subject, or the attribute, or the object, or all of them, augmented by additional or explanatory parts; e.g.

ወታደርና፡ ነጋይ፡ ገባሬም፡ የሚጠቅሙ፡ ሰወች፡ ናቸው፡

"The soldier, the merchant, and the farmer, are useful men."

Y ^

CHAP. II.

ON THE SUBJECT AND THE ATTRIBUTE, AND THEIR RELATION TO 'EACH OTHER.'

SECTION I.—On the Subject.

1. The subject is the principal or the reigning part of every sentence: it therefore stands always in the Nominative Case: e.g.

` **ሰው፡፡ ይሞታል፡** " man dies."

2. The ideal subject is always a Noun Substantive: the grammatical subject may be a Substantive, Adjective, Numeral, Pronoun, an Infinitive, or Participle: for words which express no perfect ideas by themselves, *i.e.* which are not substances, cannot form subjects of thought, unless they be at least ideally converted into substantives.

3. In every sentence, the subject precedes; the attribute and the copula follow; e.g.

አርነጉ: ይህና : ነው: "He is good."

This is always the case, whether the Subject be simple, defined, complex, or compound.

4. When the Subject is specified by a Substantive, an Adjective, a Numeral, Pronoun, or Participle, the specifying words precede; e.g.

የሰው። ልብ : ክሏ: ነው። "Man's heart is evil."

חל: מסי: ג'חתי. א good man is honoured."

ሰባተ: ዋን: አለፈ: "Seven days passed."

ደህ: በተ: ሰፈ: ነው: "This house is spacious."

PTWZ.: n.t: nA: Mor: "The house which has been built, is spacious."

አግዚአብሔርን፡ መፍሪ.ት፡ ከላንት፡ ጋሪ። ይሁን፡

" May the fear of the Lord be with you."-2 Chron. xix. 7.

5. A Compound Subject, which consists of several Nouns, Numerals, or Pronouns, has all these parts in the Nominative Case; e.g.

nongef: mg.C: gaga: "Heaven and earth shall pass away."

አልያ: መተ: ከሰማንያ: ሰውዥ፡ ሔይ: "Those hundred and eighty men have gone."

6. Where the Subject is connected with subordinate explanatory parts, it follows after them; e.g. Luke xii. 47.

CH. II.

сн. п.]

የጌታውን፡ ፈቃድ፡ አውቅ፡ ያልተዘጋጀ፡ አንደ፡ ፈቃይም፡ ያላደረገ፡ ባርያ፡ አጅግ፡ ይገረፈል፡

Literally: "His Lord's will knowing who prepared not himself, according to his will and did not the servant, much shall be scourged;" *i.e.* "That servant who knew his Lord's will, and prepared not himself, neither did according to his will, shall be severely scourged."

These two rules, No. 4, and 6, are so peculiarly in the Amharic idiom, that they cannot fail to impress themselves at once upon the mind of the Student.

SECTION II.

On the Attribute, and its relations to the Subject.

1. The Attribute may be a Substantive, or an Adjective, or Pronoun, or Participle: it may be separate, or implied in the Verb.

EXAMPLES.

እግዚአብሔር: መንፈስ: ነው: "God is a Spirit."

ደህ፡ ሰው፡ አዋቂ፡ ነው፡ "This man is intelligent."

ነገረ: ደህ: ነው: "The matter is this."

ፈዋደ: PT - 2 በ: ነው: "His resolution is decided." Acts xix. 7.

ሰወችም፡ አሥራ። ሁለተ፡ ነበረ። "And the men were twelve."

እርሱ: ደፈራል: "He fears," i.e. " is fearing."

2. Complex Attributes (see Ch. I. 2.) have their subordinate parts before them.

Example.

ይህ፡ ሰው፡ በስራው፡ ሁሉ፡ ተንኩለኛ፡ ነው፡

Lit. "This man, in his work all, is cunning."-" is cunning in all his doings."

3. The Attribute always follows the Subject. This is evident from the preceding instances.

4. It often agrees with the Subject in Gender, Number, and Case: often does not. As to the Gender, the concordance may be assumed, most of the Nominal forms being of Common Gender; and, in the Adjective Participles at least, the Gender is strictly attended to. Concerning Number, the Singular is more used in Adjectives than the Plural; which may be accounted for by the supposition, that they are regarded as an abstract mass, of which the individual subjects have their share; e.g.

አሌህ: ሰውች: ደህና: ናቸው: "These men are good." But when the Attribute is a Relative Participle, it must agree in Number, as well as in Gender, Case, and Person, (see Page 73.) with its subject; e.g.

ሎላልቱ፡ የታማኑ፡ ናቸው። "His servants are faithful."

The Number is especially uncertain, when the Subject is a Collective Noun; e.g.

ሰው። ሁሉ። ይሞታል: "All men (or every man) dies."

ሕዝቡ: ተሰበሰሰት: (Sing.) or **ተሰበሰቡ:** (Pl.) "The people was (or were) gathered together."

With regard to Case, we remember but one instance where the Subject and the Attribute do not agree; $\mathbf{n}\mathbf{f}$: with Suffixes; *e.g.*

አኔ: **חדP3**: **ነ3**: "I am alone."

Here is the Subject 72: in the Nominative, and the Attribute 17P3: in the Accusative Case.

m

CHAP. III.

VARIOUS USES AND CONSTRUCTION OF THE NOUN.

A. Construction of Substantives with Substantives.

1. Two or more Substantives connected together, denoting the same thing, are in a state of apposition, and must agree in Gender and Number; e.g.

አግዚአብሔር፡ አምላክ፡ "The Lord God."

OBC: ICP: "a man-slave."

ንጉሥ፡ **ደዊተ**: "King David," & **ደዋተ፡ ንጉሥ**: "David, the king." ቫንክሎች፡ ባርች: "Negroes," "slaves"; *i.e.* "Negro-slaves."

2. Nouns of Quantity are joined to other Substantives in the Nominative Case; e.g.

ዋቂተ፡ ብር: "a little silver."

አንድ፡ ነዋር: ቡን: "one pound (of) coffee."

አንድ፡ 'ነምቦ: ውንታ፡ " one jar (of) water."

3. Substantives of Quality, of Origin, or of Possession, are joined to other Substantives. They stand in the Genitive Case; e.g.

PR31, P: nit: "a house (made) of stone."

PMG: MNT: "Têff-bread-cakes."

ያገር: ሰው። "a man of the country"; or the Ethiopic expression, ባላገር።

רא: מאלו: "the farmer's plough."

More about this when we come to speak of the Genitive Case. (See p. 167.)

CH. II.

CH. III.] USES AND CONSTRUCTION OF THE NOUN. 165

4. On the construction of Object-Substantives with Subject-Substantives we shall speak when coming to consider the Verb. (See Ch. VIII.)

B. Construction of Adjectives with Substantives.

Adjectives may be connected with Substantives, (a) either as epithets to the Subject; or (b) as Attributes of the sentence; or (c) as modified by another accompanying Substantive.

1. As Epitheton of a Substantive, the Adjective generally precedes the latter; e.g. **n'i: 'imp:** "a good man."

2. In Number and Gender, the Epithetic Adjective does not always agree with its Substantive; but the following rules are observed:

(a) The Substantive may be in the Plural, and the Adjective in the Singular Number; never the reverse; e.g.

ደህና: መጻሕፍ.ት: "good books"; never ደህኖች: መጽሐፍ.።

(b) In the same manner, the Adjective is most frequently used in the Masculine form, when the Substantive is of Feminine Gender; but a Feminine Adjective is never used for a Masculine Substantive; e.g.

ክሩ: ሴተ: "a bad woman," but not ንጽሐተ:* ወንድ: "a pure man."

3. The preceding paragraph refers not to Participial Adjectives of the Relative form, as in them the strictest attention is paid both to Number and Gender. (See Page 163. §. 4.)

4. When the Adjective is *attribute* to the sentence, the rules laid down in the preceding Chapter, Sect. II. §§ 3, 4. obtain.

5. When another qualifying Substantive is connected with the Adjective, a Relative Participle is required as complement; e.g.

በልባቸው: ንጹሓን: ያሉ: ሰወች: "Men who are pure in their hearts."

C. Number of Nouns.

There is a strong tendency in the Abyssinians to use the Singular Number, where we would use the Plural. We shall point out several cases where the latter never, and others where it but seldom is used, although it would be impossible, in the present stage of our knowledge of the

^{*} We do not quote **AG.** At:, the Feminine form of **AG**.;, because it is not used in the Amharic, nor the Participle **Phd.** T:; because, when Adjective-Participles are used, the Gender and Number is always strictly attended to. (See the preceding Chap. Sect. II. § 4.)

CH. III.

Amharic language, to give rules for every case, and would exceed the bounds which must be assigned to this head. The following classes are, some of them, never, others, seldom used in the Plural:

1. Nonns denoting a mass; as, gold, silver, corn. wheat, honey, fat, dust, &e.

2. Several parts of the animal body; e.g.

An: "the heart."	י גע ין: "flesh."
UR: "the belly."	87-C: "hair."
go: "blood."	

3. The soul, and several powers and faculties of the mind :

ነፋ.ስ : " the soul."	Orge: "love."
Δ. P.C : "the will."	6.•C : " eharity."
አሳብ: " thought."	ደስታ: " joy."
ልቡና: "reason."	አለኝታ: hope."

4. Most Abstract Nouns, denoting quality, condition, action, quantity. We especially refer to the two Tables of Nominal Forms. Table I: Triliteral Radices of Verbs, No. 5. and Quadriliteral ones of No. 4.. Table II: Simple Forms of 3. A. a. 4. 6.; and Augmented Forms, 1. a. c.; some of d.; and almost all of e.

5. The following Collective Nouns are not often used in the Plural:

(a) Generical names of animals and of plants; e.g.

ጀግበ: "hyæna." አበባ: "flower."

(b) Names of assemblages of men, or other beings; e.g. **D'1'3**: "tribe," "sect," "kind," &e. The Plural of this word, **D'1f'F**: signifies the individuals belonging to the whole assemblage. **Ti3'1**: "court of justice," **T'1C**: "town," " country," and other words.

6. Certain periods of time: Φ3: "day." Δτ: and ΔΔτ: "night." ΠΩτ: "hour." ΦτC: "noon." ΖΔ.Σ: "forenoon." These are never used in the Plural number. Seldom: Ͻμ: "time." HOD3: "time," "period." ΔΟΟΤ: "year." ήΦΡ3τ: "week."

7. Several Nouns denoting confines, borders, shores, &e.; e.g. **RC**: "banks," "shores," "eoast." **RCF**: "borders." **D1**7: "eonfines," "borders." **HCG**: "seam," "hem."

8. As to the agreement in Number between Nouns in the same sentence, either Subjects or Attributes, see the preceding Chapter, Sect. II. 4.; and in this Chapter, A. 1. and B. 2.

D. On the Various Cases of Declension.

1. The Nominative is, in common conversation, often improperly used

CII. III. USE AND CONSTRUCTION OF THE NOUN.

where the Preposition **OR**: should stand; e.g. **A31AA: h.R**: "He went Angollala," omitting **OR**: "to."

2. It is applied in answer to the question, How long? How often? How much? e.g.

ኮስተ፡ ቀን፡ ተቀመጠ፡ "He remained three days."

nH.: 2H: mm: "He came many times."

አንድ። ማድጋ፡ ገብስ: "One mādĕga (a certain measure) barley."

3. The Genitive Case expresses :

(a) Possession :

ያባቲ: ቤት: "My father's house." Pንጉሥ: ኃይል: "The king's power."

(b) Origin :

PPP C: G.L: "The fruit of the earth."

የሐበቫ: ስው: "A man of (from) Abyssinia," *i.e.* "An Abyssinian." (c) Quality :

Pብረተ: አቃ: "Iron furniture." **Pg32.9:** ቤተ: "A house of stone." Here it supplies the place of Adjectives.

(d) Measure of time, space :

Pሰባተ: አመተ: ስራ.: "The work of seven years."

PUAT: 93: 00378: "Two days' journey."

(e) Price and Quantity:

PBC: n.3: "One dollar's (worth) of coffee."

4. When Prepositions precede the word which stands in the Genitive Case, the **P**: is dropped. See Part I. Ch. VII. 3. B.

5. When an Accusative follows the Genitive, the latter adopts the mark 3: of the former, so that the word seems to stand both in the Genitive and in the Accusative; e.g.

ያገርን: ከተማ: አየሁ: "I have seen the capital of the country."

የአግዚአብሔርን፡ የምላክህን፡ ስም፡ ከንቱ፡ አታድርገው፡

"Thou shalt not use the name of the Lord thy God in vain." Ex. xx. 7.

6. When the Genitive belongs to several Substantives in apposition, its **P**: is to be applied to each; when to a Substantive preceded by an Epithetical Adjective, it is applied only to the Adjective; e.g.

PRUF: nor: MC: "The words of a good man."

7. When the Genitive belongs to a Substantive having several Epithetic

Adjectives, the P: is applied to each Adjective, and may, or may not, be applied to the Substantive also; *e.g.*

የታላቅና፡ የመቢብ፡ የባላጠጋም፡ የሰሎሞን፡ ቤተ፡ መቅደስ፡ or የታላቅና፡ የመቢብ፡ የባለጠጋም፡ ሰሎሞን፡ ቤተ፡ መቅደስ።

"The temple of the great, wise, and wealthy Solomon."

8. The Ethiopic Genitive, or Status Constructus, has been mentioned, Part II. Ch. I. Sect. I. 4. and Sect. V. 2.

9. The Dative being formed by the prefixion of the Preposition Λ : (to, for, in favour, in behalf, &c.) to the Noun, we need only to refer to what has been said, Part II. Ch. VI. 2. e.

10. The Accusative Case is formed by the annexion of **7**: at the end: it serves to indicate the immediate or direct action of the Subject upon its object; and is required by all Active, Intensive, Transitive, and Causative Verbs; e.g.

ήው ን: Λgg: "He sent a man."

Although this rule is very plain, it may not be superfluous to specify it a little. The Accusative is governed—

(a) By the Verb Finite; e.g.

መልአክተን፡ ይጽፈል: "He writes a letter."

ተግባርህን: አድርግ: "Do thy business."

በተረን: ይዞ: ሐይ: "He took his stick, and went."

(b) By the Infinitive; e.g.

n'ነው ን፡፡ ስሪ.: መስሪ.ት፡፡ አያው ቅም፡፡ "He knows not to perform (cannot perform) good works."

(c) By Relative Participles; e. g.

EUT: PR27: "He who has done this."

۵٤, 7: POLOC: "He that loves his child."

(d) By Nominal Active Participles; e.g.

n.† 3: W2: "One that builds a house."

11. Besides Active Verbs, there are a few phrases in which the Accusative is used; e.g.

መንገይን: እሑደለሁ: "I go my way."

n.+3: 79 : "He entered his house."

•n \mathbf{F} : "alone," "single," with Suffixes, assumes the Accusative form, when it is converted into an Adverb; *e.g.*

ጠቻውን: ነበረ: "He was by himself."

12. When the Noun which stands in the Accusative terminates in a

٠.

letter of the third, fourth, fifth, or seventh order, a euphonic \mathbf{O} : is joined before the accusative $\mathbf{T}:: e.g.$

ጠባቂውን፡ መንጋውንም፡ በሬውንም፡ ቀበሮውንም፡ አየሁ፡

"I saw the herdsman, the herd, the oxen, and the fox."

12. Relative Participles in u, standing in the Accusative, have a euphonic $\mathbf{1}$: before the accusative $\mathbf{3}$: *e.g.*

PPሁተ3: P7gሉተ 3ም፡ በሬ: "The ox which I saw, and which they killed."

13. Accusative Nouns ending in the sixth order are euphonically changed into the second; Accusative Participles, into the first order; the latter receiving a euphonic \mathbf{Or} ; e.g.

መልካሙን: ዳጀ። "good wine." ያደረግሀውን: ኃጢአት። "The sin which thou hast committed."

14. When a Descriptive Adjective is connected with the Noun standing in the Accusative, the 3: is not generally affixed to both, but sometimes to the Substantive, sometimes to its epitheton; when the latter is a Participle, to the Participle: *e.g.* it is equally good to say **guf:** in**O**³: or **gufO**³: in**O**²: a good man," but with a Participle; *e.g.*

የበሳሽው ን፡ እንጅ ራ: "The bread which thou (f.) hast caten."

15. When several Adjectives are connected with a Substantive in the Accusative Case, the 2: is put to each of the Adjectives, but not to the Substantive; *e.g.*

ታላቁን፡ ወፍ.ሪ.መንንም፡ በጎ፡ ፍ.ሬ.ንም፡ የምታፈረ.ውን፡ ዛፍ.፡ ቀ-ረጡ፡ "They cut down a large, thick, and good-fruit-bearing tree," *i.e.* "a large and thick tree which bore good fruit."

16. Concerning the construction of the Genitive with the Accusative, see §. 5.

Z

CHAP. IV.

ON THE DEGREES OF COMPARISON.

1. The Amharic Language has almost the same mode of comparing things with each other as the Hebrew; namely, especially by prefixing the Preposition n: "of," "from," to the Positive Noun or Pronoun; e.g.

ከመታከት: መማር: ይሻላል: "Learning is better than to be idle."

2. In many cases, they add the Postpositive Particle **RAP**: which gives, however, no additional force to the idea of gradation already expressed by $\mathbf{\hat{n}}$; but it stands generally at the end of a sentence, and is used more for Verbs than for Adjectives; *e.g.*

ደህች፡ ዛፍ፡ ተረዝማለች፡ ከዚያች፡ ደልቅ፡

"This tree is tall, more than that one."

Here it would be equally good to say,

ደህች፡ ዛፋ፡ ከዚያች፡ ተረዝማለች፡ "This tree is taller than that one."

3. The Verbs $\mathbf{n} \wedge \mathbf{m}$: "is greater," $\mathbf{\lambda} \mathbf{i} \mathbf{n}$: "is smaller," "less," and $\mathbf{r} \mathbf{i} \mathbf{n}$: "is better," are in themselves of a comparative nature: nevertheless, when brought together with other Adjectives or Verbs for comparison, they require the \mathbf{n} —: as well as Adjectives or other Verbs; *e.g.*

<mark> ንበብ፡ ከከብተ፡ ይሻላል፡</mark> "Wisdom is better than wealth." ዝሆን፡ ከአይፕ፡ ይበልጣል፡ "An elephant is larger than a mouse." አንጎለላ፡ ከአንኮበር፡ ታንካለች፡ "Angollala is smaller than Ankobar."

4. Besides the preceding, every verb of quality, condition, or even of action, is capable of expressing a comparison when constructed with n: for the adjective is contained in that verb; e.g.

ተሪ.ሪ.: ከዛፋ: ደረዝማል: "A mountain is higher than a tree." ኃጢአት፡ ከሞተ፡ ተከፈለች፡ "Sin is worse than death."

Verbs of action, however, require **RAP**: e.g.

ከጴፕሮስ፡ ደልቅ፡ ጳውሎስ፡ ደከመ: "Paul laboured more than Peter."

5. The Superlative is rendered by $hhreftharpoonup \cdot$ (with Suffixes) and $hhreftharpoonup \cdot$ **RAP**: e.g.

ምድር፡ ታላቅ፡ ና ተ፡ ዓለም፡ ይበልጣል፡ እግዚአብሔር፡ ግን፡ ከሁሉ፡ ይበልጣል፡ "The earth is great; the universe is greater; but God is greatest (of all)."

ከሁላቸው። ደልቅ፡ አርሱ: ተማረ: "He learned more than they all."

CH. IV.

CHAP. V.

ON THE NUMERALS.

1. The Numeral does not, properly speaking, form a particular part of speech, but is either, as the Cardinals, a Substantive, or, as are the Ordinals, an Adjective, or, as the Distributive, an Adverb. We need therefore to say but little about their Syntax.

2. The Cardinal Numbers are always, when connected with other Nouns, to be considered as in apposition with them; and they always precede; *e.g.*

ሁለተ፡ ሰወች፡ "two men.

3. All the Numbers, from One upwards, seem to be considered as Plurals; wherefore they are of common gender, except **73g**: "one," which has in the feminine, **73g**:::

4. Notwithstanding this, the noun to which the numeral is joined, is not always used in the plural number. Although they use, in common language, the singular and the plural indiscriminately, the rule seems to hold good, that the round numbers, ten, twenty, &c. up to a hundred, and the large numbers, as hundred, thousand, ten thousand ($\Lambda \Delta G_{...}: \mu \upsilon \rho \iota \iota \iota)$, are more frequently constructed with the noun in the singular than in the plural, and the numbers between every ten generally in the plural; e.g.

ሁለተ፡ ሰወች፡ "two men." ሀየ፡ ሰው፡ " twenty man."

5. The Numbers ig: wai: Ach: Agoi: hgi: hgi: hag:hog: hag: hag: or f:: are generally used for Ordinals as well as forCardinals; or rather, as they do not like to adopt the ordinal form for thosenumbers, they place the cardinal behind the noun as a predicate; e.g.

መጽሐፍ: ህዖ: "book twenty," instead of ህዖሯ: መጽሐፍ.: "the twentieth book."

6. The form of the Ordinal Numbers is regularly derived from the Cardinals; except, as in our European and in other languages, the first; although in compound numbers that also is used in the regular form; e.g.

አሥሪ.: አንደኛ: "the eleventh."

When used in a simple form, **ABET**: signifies "unique," "sole," "only." In enumeration, they use **ODEOOCP**: "the beginning," or **ATE**: "the foremost," "first."

7. As for the Distributives, nothing needs to be added to what has been said Part II. Ch. II. §. 4.

m

SYNTAX.

CHAP. VI.

SYNTAX OF THE SEPARABLE PRONOUNS.

1. The Separable Personal Pronoun isused,

(a) When it is the subject of a sentence. 法: 法仇民众ሁ: "I go," although it is not necessary to use it.

(b) When an emphasis lies on the pronoun; e.g.

አርሱ፡ አላደረገውም፡ አኔ፡ አደረግሁት፡ አንጅ፡

"He has not done it, but I have."

2. The third person singular and plural is used for demonstration; as is the reverse in the Latin and Greek; e.g.

አሁን: ያልሀኝ: አርሱ: ነው: ያልሁህ: "That which thou hast now been telling me, is the same with what I told thee."

3. The Separable Possessive Pronoun is used only when a stress is laid upon it; e.g. **RU: n.t: PL: 10**: "This house is mine."

Cf. John xvii. 9, 10 : **ያንተ: ናቸውና። ለኔም: የሆነ: ሁሉ: እርሱ ^ንተ: ነው። ያንተውም: እርሱ። ለኔ: ነው:** "For they are Thine. And

all that is mine, the same is Thine; and Thine, the same is mine."

Where no such stress lies on the Possessive, Suffixes are used.

4. The Singular Masculine of both the *Demonstrative* Pronouns forms Adverbs, by the junction of Prepositions with the Genitive Case of those Pronouns. See Part II. Ch. V. 4. (b).

5. The Interrogative **097**: "who?" "which?" "what?" is used for persons: it is made use of, also, for inanimate subjects in the phrase **097**: 10: 100: or 100: **097**: 10: (**0910**:) "What is his (its) name?" On the contrary, the Impersonal **907**: is employed as a Personal Interrogative, by way of utter contempt, in the expression, **907**: **A97**: "What is his father?" Both these expressions are elliptical.

6. The Indefinite **Uיה:**, which may be considered, as it is in the other Semitic languages, as a Noun, **Uיລ:** (کُلٌ , ذِکْر) with suffixes, assumes no other suffix in the singular than the suffixes masculine and feminine of the third, person; but it takes all the suffixes of the plural: **Uיה: Uיລ U·ATO**: **U·ATU**: **U·ATT**::

7. When U-A: is absolute, it stands at the beginning of a sentence: when connected with Nouns or Participles, it follows them; e.g.

ሁሉ። ሐደ። "All is gone." ሁሉን። አደረገ። "He has done all." ሰው። ሁሉ። "All men," "every man," "people in general," &c.

CH. VI.

CH. VI. VII.]

8. U-A:, as subject of the sentence, and without any other suffixes, may have its verb either in the singular or in the plural: when connected with nouns or participles, or with other suffixes, the number and person of the verb are determined by those nouns, participles, or suffixes; e.g.

ሁሉ፡ ደጠፈል፡ "All will (sing.) perish"; or, ሁሉ፡ ደጠፈሉ፡ "All will (plur.) perish." ሁላችን፡ ባንደ፡፡ ነነ፡ "We are all together." ነገሥታት፡ ሁሉ፡ ተሰበሰቡ፡ ሁላቸውም፡ ተዋጉ፡ "All the kings

were assembled together, and all of them engaged in war."

9. አንደች: "some," "something," "any thing"; with negation, "no-thing"; e.g.

አንደችን፡ ሰጠው፡ "Give him something."

አንደችን፡ አልተቀበልሁም: "I received nothing."

10. እያሉ: signifies an indefinite number or quantity; *e.g.* አደሉ: ሰወች: ያምኑታል: አያሌ: ግን: ይጠራጠረበታል:

"Some men believe; others doubt it."

When it is predicate, it signifies a large quantity:

ከብቱ: አያሌ: ነው: "His property is considerable."

11. In order to express Reciprocity, the Abyssinians make use of the form ACIT: ACIT: ACIT: and a Reciprocitive or other Verb; e.g.

አርሱ። በርሳችሁ። ተዋደደ። "Love one another !"

12. An Indefinite Pronoun is **λ3†3**: which signifies, "The what's his name." Gr. δ δείνα; French, chose; German, Dingerich; e.g.

አንተን፡ አደሔድም : "The what's his name does not go."

CHAP. VII.

·····

ON THE AFFIXED PRONOUNS.

1. As to their position, that is determined, the Nominal Suffixes being joined to the final letter of the Noun (or Adverb); the verbal to the last radical of the Verb, or to the Verbal Afformative. Adjectives do not assume suffixes, except when considered as Substantives.

2. The Nominal Suffixes are to be considered as possessive; the verbal ones as objective; e.g.

ልጀ: "My child." መታኝ: "He struck me."

SYNTAX.

Adverbs with Suffixes are treated by them as Substantives, the nominal Suffixes being joined to them; e.g.

NAR: "over me."

3. Concerning the Verbal Suffixes, enough has been said in the preceding part of this work, Ch. IV. sect. V. We add here, that the suffix of the first pronoun in the singular is sometimes used pleonastically; e.g.

ሔድሁኝ: "I am gone."

CHAP. VIII.

CONSTRUCTION OF THE VERB.

Having discussed the nature and use of the Verb, and its various parts, rather extensively in the preceding part of this work, Ch. IV., we need not here go through it at full length; but shall offer, in the first place, such additional remarks on the Moods, Tenses, and Persons, as are deemed necessary; and, in the second place, to show the agreement of one verb with another, and of the verb with the other parts of speech.

SECTION I.

On the Tenses of the Amharic Verb.

1. The following Tenses are used for the *past* time: the Simple Preterite of the Indicative, the Compound Preterite of the Contingent, and the Compound Preterite of the Constructive.

(a) The Simple Preterite of the Indicative is used,

a. For the Perfect Tense; e.g.

አንግደ: መጣ: "A stranger has arrived."

ሕዝቡ: ተሰበሰቡ: "The people have gathered themselves together."

 β . For the Historical Tenses, the Imperfect and Pluperfect; e.g.

ከተራሪም፡ በወረደ፡ ጊዜ፡ ተከተሉተ፡ ብዙ፡ አሕዛብ፡

"And when he descended from the mountain, many people followed him."

Matt. viii. 1.

ት አዛዙን፡ ከፈጸመ፡ በኋላ፡ ከዚያ፡ አለፈ፡

"When he had finished his command, he passed over from thence."

Matt. xi. 1.

 γ . For the Present or Immediate Future, in a very few instances. So when visitors courteously ask leave to go, they do it by saying: **h.g.u**: "I am gone," *i.e.* "If you allow me, I go now." Or when a person is

CH. VIII.

"I come ! I come !"

frequently called, and does not come, he at last answers : OOGU: OOGU:

δ. With Conjunction Prefixes, it serves for the Potential and Optative Moods.—See Sect. II. §. 5. and Isa. i. 9.

(b) The Compound Preterite of the Contingent is used,

 α . For the Imperfect and Pluperfect of the Indicative; e.g.

እኔ: ሳልመጣ: እርሳቸው: ደበሉ: ነበረ: "Before I came, they had been eating."

 β . For the Imperfect and Pluperfect of the Potential Mood :

ብትለምነው። ቢሰዊህ። ነበር: "If thou wouldst ask him, he would give thee."

ደህነን፡ ካላደረግህ፡ ጠወድህ፡ ነበርሁ፡ " If thou hadst not done this, I should have loved thee."

(c) The Compound Preterite of the Constructive is used chiefly for the Pluperfect, and sometimes for the Imperfect of the Indicative; e.g.

ሰኆቼ: ነበርሁ: "I had given."

2. Tenses used for the *Present*, are, the Present of the Indicative; the Second, or Aoristic Constructive; and the Contingent with Conjunctions.

(a) The Present Indicative and the Aoristic Constructive are both used for the Present Indicative; e.g.

አርሱ፡ ተጫውተዋልና፡ አኔ፡ ዝም፡ አላለሁ፡

"Whereas he is talking, I keep silence."

(b) The Present Indicative is used for both the Present and the Future tenses: the Aoristic Constructive serves especially for an action, condition, state, or suffering, which continues; and therefore, although it is more frequently used for the Present, it is likewise made use of for the Perfect. This peculiarity of both these forms is owing to the Auxiliary Verb Substantive $\lambda \Lambda$: with which they are composed.

(c) The Simple Contingent Mood serves for the Present as well as for the Future Tenses, when connected with Particles; e.g. the Participles **POUDD**: "he that comes;" **DOD**: "when he comes;" **DEDD**: "before he comes;" Negative assertions: **DED**: "he comes not," "will not come;" Conditional expressions: **DED**: "if he end," or "if he ends;" Final and referential: **DED**: "that he writes." or "write;" Final: **DED**: "he rose to go out," where it is for an Infinitive; **DED**: **DED**: "He went to assist (that he might assist) his brother." 3. The Future time is generally expressed by the same forms which serve for the Present, except the Aoristic Constructive. Vide 2. a.—In p. 66 of this work we pointed out another mode of a decidedly future form; besides which they make use of the Contingent with $\Lambda\Lambda$: or with **RUFFA**: The one is found in the negative expression, Ezek. xvii. 9: $\Lambda \prec$: **ROOHH**: **PAPO3: G.2.O**: **R**- Δ **T**: **PAPO3:** "Shall not its root be extracted; and its fruit, shall it not be cut off." But these two latter forms are not confined to the Future: they are also used for the Present Tense.

SECTION II.

On the Moods of the Amharic Verb.

On this head, we shall add but little to what has been stated Chap. IV. of the preceding part, and in the preceding Section of this Chapter.

1. The *Contingent* serves for the Indicative, Subjunctive, Potential, and Participial Moods; as is shown in the preceding Section.

2. The Subjunctive expresses a desire, or an indirect request, order, command, or obligation.—See p. 72.

3. The Infinitive, as Verbal Noun, assumes Nominal Suffixes; but relates to and acts upon other nouns in a verbal capacity; e.g.

Λ'3ጉሥ: መተከዜ: "My obeying the King," "my being obedient to the King."

It is, however, likewise constructed as a Noun; e.g.

Pክርስተስ: መምጣተ: "The coming of Christ."

ፍራን፡ ለማፍራት፡ ተተከለች፡ "In order to bear fruit was it planted."

4. The Participles are of the same character, partaking of the nature of Adjectives (as the Infinitive does of the nature of Nouns), and of the Verb, as has been shown in the preceding Part, pp. 72, 73. The Simple forms, however, have more of a nominal; the Augmented forms more of a verbal character. The Augmented forms are verbally flexible through all the persons; besides their being capable of receiving Prepositions, and the Accusative 7: marking them as Nouns. An: PXF: no: 73C: 7H: PAD 7: 17C: ODAD 7: A COLTON: "A man of a determined character does not like to change his word which he once has spoken. G.2.O.7: APOL: SNE HC3: nogH2; "The gatherer of the fruit rejoices, more than those that sowed the seed."

5. There is in the Amharic Language no peculiar form for the Optative Mood: they express it by circumscription; e.g.

ח.שישה: חחדסקכטייה: "If it had been, if thou hadst instructed me, I should have liked it."

CII. VIII.]

SECTION III.

Construction of the Verb with the other parts of the Sentence.

1. The Amharic Verb having all the personal forms connected with it, it is capable of including the subject in itself; e.g.

ጠበቀ: "he observed." መታህ: "thou hast beaten."

And by the aid of Suffixed Pronouns and Prepositions, it is further capable of expressing a whole sentence in itself; e.g.

oom ny: "He came upon thee." oot UO: "Thou hast struck him."

2. But when, as is more usual, the subject is separate from the Verb, the latter should agree with it in gender, number, and person; e.g.

3. Collective Nouns, however, which admit of a Plural, have the Verb sometimes in the Singular, sometimes in the Plural : e.g.

ሕዝቡ: ተሰበሰበጉ: "The people gathered itself together"; or ሕዝብ: ተሰበሰቡ: "The people gathered *themselves* together."

4. When there are more than one subject in a sentence, the Verb stands either in the Third Person of the Plural, or it is determined by what is considered as the chief subject; e.g.

ወንድና: ሴተ: መጣ: "Male and female came."

37. WE. QT: Toop: "The king and his army were beaten."

When the person who is addressed forms one of the subjects, the Verb follows in the Second Person Plural; e.g.

ከ ይን፡ ንብረም፡ አንተም፡ ልተማረ፡ ና ችሁ፡

"Kiddan, Gabru, and thou, (you) are to learn."

When the speaker is included, the Verb is to be in the First Person Plural:

አርሳቸውና፡ እኛ፡ ተለየነ፡ "They and we are separated."

5. When the subject consists of several Infinitives, the number is not multiplied, and the Verb is used in the singular; e.g.

መማርና: መስሪ.ተ: ደጠቅማል: "Learning and working is useful."

But when the subject consists of several Participles, which are considered as Nouns, the Verb must be in the plural; e.g.

no. a murderer came upon him."

6. Active and Transitive Verbs have their objects in the Accusative A A

SYNTAX.

Case: see Ch. III. 10. Transitive and Causative Verbs may have a double Accusative; e.g.

መልኙክተን: አስጻፈው: "He caused him to write a letter."

But as these Verbs may sometimes be used as Intransitive, the use of Prepositions is frequently applied; e.g.

acent: "He judged over (or against) him."

ጻፈበተ: "He wrote in it."

ሰውን: አስመጣለተ: "He caused a man to come for (or to) him."

7. Intransitive Verbs are generally connected with their objects by Prepositions; e.g.

በቤተ: ነበረ: "He was in the house."

ወደገረ: ሔደ: "He went to his country."

nopone: "He sat upon his chair."

8. When the object of the sentence is another Verb, that is expressed by the Infinitive, or by the Contingent with Conjunctions; e.g.

መማር: ይወደል፡ "He likes to learn"; or, ይማር: ዘንድ፡ ይወደል፡ "He likes that he may learn." መድገም፡ያው ቀል፡ "He can read."

9. The reigning Verb should be always at the end of the sentence, whether the object be simple, or complex, or compound; e.q.

ሰው፡ ያልወደደው ን፡ ነገር፡ አያደርግም፡

"What man does not like, he will not perform."

"What God in His law has prohibited, man does commit."

በአግዚአብሔር ፡ ቃል ፡ አናምን፡ ዘንድ ፡ በኃጢአታችንም ፡ አዝን፡ የኮስ ፡ ክርስቶስ ፡ ቦስሪውን ፡ ወድ ኃኒት ፡ በዓይማኖት ፡ አንቀበል ፡ ዘንድ ፡ ወንጌል ፡ ያስተምረናል ፡ "The Gospel teaches us to believe in the Word of God, to repent of our sins, and to receive in faith the Salvation which Christ has wrought out for us."

CONSTRUCTION OF THE REMAINING PARTS OF SPEECH.

As the doctrine of the Particles, *i.e.* Adverbs, Prepositions, Conjunctions, and Interjections, has been pretty fully exhibited in the Etymological Part, Ch. V. to Ch. VIII., we do not think it necessary to add any more: and so we finish here the Amharic Grammar, adding only a few Specimens of Common Conversation, and a few Exercises.

PART IV.

SOME SPECIMENS OF CONVERSATION,

A FEW EXERCISES.

1. CONVERSATIONAL MODES OF SALUTATION.

In conversation, the Abyssinians are very polite towards each other, without using quite such a bombastic style as is common among the Arabs and other Eastern nations. When speaking of the Pronouns and under the Verb, we have mentioned two honorific distinctions for the second person in the singular, and that they speak of a third person of respect in the plural. A neglect of these distinctions is overlooked in foreigners, whilst learning their language; but amongst themselves it is taken as an offence, except with intimate friends, and in a few other instances. In saluting, the various times of the day, the state of health, frequency of intercourse, season of the year, and some other circumstances, are to be regarded as determining the mode of address.

As for the time of the day when persons meet, four times are distinguished, for which four separate Verbs are used; viz. (a) The morning, until the sun has finished half his course from the horizon to the meridian, i.e. between nine and ten o'clock A.M. During this time, when meeting, the verb TRZ: " to spend the night," " to rest," is used in the Preterite: when parting, the verb $\angle \underline{A} \underline{R}$: "to spend the forenoon," $\land \underline{\Pi} \underline{\angle A} \underline{R}$: "to make spend the forenoon," or $\Psi \land$: "to spend ($\land \Psi \land$: "to make spend) the middle of the day," in the Imperative or Subjunctive Mood. (b) The forenoon, from about nine to eleven o'clock A.M. At meeting, they salute each other with the verb **ZGR**: " to spend the forenoon," in the Preterite: when parting, with the Verb \mathbf{PA} : or \mathbf{APA} : (c) Noon and afternoon, to sun-set. When meeting, they use \mathbf{PA} : in the Preterite: when parting before five P. M., APA: when after five, the Subjunctive of አስመካן: "to make pass the evening," or Imperative or Subjunctive of ooi: "to pass the evening." (d) Evening and night, from sun-set to the first break of the day. When meeting, the Preterite of our when parting, either the Subjunctive or the Imperative of AR2: "to pass the night," "to rest," or Subjunctive of Ange: "to make pass the night," &c. is used.

<u>Roy</u>C: "May He (*i.e.* God) be gracious!" and **<u>R</u>AON**: "May He heal," "restore!" both with Suffixes, is used for addressing sick persons. The former wish also is used when a person sneezes. **71**:, in the Preterite, is used when meeting a person who has newly arrived at the place: in the

AND

Subjunctive with Suffixes, when parting with a person who goes to another country. ninr: "to pass the time from one interview to another," is used in the Preterite, when persons meet who have not seen each other for some time. Anint: "to make pass &c., is used at parting, when they do not expect to meet again for a considerable time. Then they add, PIF 31: "May He bring us together again !" '1200: "to pass the rainy season," and Ann 200: its transitive, is used in the same manner.

The following Specimens of Conversation will illustrate the preceding remarks. We choose the imaginary meeting of the servant Gabru, with his master Kiddana Maryam, after his return from an errand to a friend, Aito Malku, who lives in a distant part of the country. The meeting is supposed to take place in the morning.

I had a good journey. I arrived there in three days after I had started from hence, and staying there one day, I returned, and in two days and a half arrived here.

What does Aito Malku say?

"Are you well? Are you well? Are you well? Have you been quite well since our last interview? Âre you well? Have you passed the rainy season well? My friendship amounts to heaven and earth," he said. - What you sent to him

He agreed to do it.

Very well. Now eat thy dinner, and go to Walleta Gabriel, a sick woman, and (give her my respects, and tell her that I sympathize with her in her illness) say for me, "May God have mercy on thee, and restore thee! Doest thou not feel a little better to-day?"

Very well. I go then.

If thou learn this (Geography) perfectly, thou wilt, even whilst remaining at home, become like a man that goes into a distant country: and of nations, whose very name thou didst not hear before, thou wilt find here 'their residences, their nature, employments, their state and conditions. And all these are thy brethren; all of them, great and little, civilized and barbarians, good and evil, are thy relations, the sons of Adam, thy father. Know them, learn of them; and examine into their works. Whatever thou findest good in them, keep, and flee from Love them all, as God wills evil. that thou shalt love thyself. But above all things, ask thyself, saying,

If thou askest in this manner, the Holy Scriptures will satisfactorily answer thee. Hear them, and follow them!
