Paper-White Bulbs

For Early Greenhouse Forcing and Retail Sale

(In water; bowls; with pebbles, etc.)

Please let us tell you how wonderful the Texas Grown Paper-Whites have been this year. All bulbs produced two extra large blooms and some three to five smaller blooms. Thanks.

Vincent's Greenhouse,
Ionia, Mich.

The Texas Grown Paper-Whites you shipped us last year were the best American grown Narcissi that we have had since the embargo.

Texas Grown Narcissus Bulbs Lead Them All for Early Blooming

In 1932 we had the finest and largest crop of Paper-Whites ever produced in America. More than 2,500,000 bulbs were delivered to the florists and dealers of America. The praise we received from the customers who received these bulbs is still ringing in our ears. 1934 has been kind to us to give us the same crop. Plenty of large bulbs measuring 15, 16 and 17 ctm. and some over, all single nose with one center shoot. We have sent samples to our Canadian customers and they prefer them now to the French grown, although Canada can still import. We challenge the world to produce a quality of Paper-Whites equal to that produced this season in Texas of our Lone Star Brand. Every case marked "Lone Star Brand" for your identification. More than 1,500,000 already sold to our customers. We are still booking orders.

Our representative from Chicago visited the growing establishments of the northwest during the blooming season to determine the healthiness of the bulbs while the bulbs were in growth and flower. This examination is imperative at this season of the year. We safeguard our customers with our own expert examination. Our confidence in our supplies, their reputation in their community and their fairness in their dealings enable us to offer you assurance that no bulbs leave the west coast in any way superior to the quality you receive through us.

Important! Guaranteed!! Every bulb shipped to us that we reship to you is a guarantee that no flowers have been cut at any time for market or otherwise. For years we have tried, and through the assistance of many of our customers, have appealed to the Narcissus growers of America not to cut flowers to enter in competition with the florists who buy bulbs to force in the greenhouse.

First—it deteriorates the forcing quality of the bulb. Second—it deteriorates the reproducing quality of the bulb by weakening the stock. Third—it affects the market and enters seriously into competition with the greenhouse bulb forcer.

We are on record to the west coast growers to embody in their code that no cut flowers are to be shipped to the eastern markets by bulb growers signing the Growers' Agreement Code. We are glad to inform you that 98 per cent of the bulb growers do not cut or ship flowers to the market.

Customers desiring extra large bulbs, those handling private estate trade, can secure from us a limited quantity of **King Alfred** measuring 25 ctm. and up. **Four and five flowers are not uncommon in our extra size King Alfred.**

LILIES

Our importation of Easter and Hardy Lilies during the fall of 1933 was the largest in our history. This was quite a surprise to us, as we did not think it possible to establish such a record, due to the curtailed purchasing power.

Our total sales direct to the florists of 17,000 cases, we believe was due to the reasonable prices and the high quality. We control one of the oldest and most reliable shippers in Japan, which assures us the "cream of the crop." Our customers have the assurance, when placing orders with us, of receiving first quality healthy stock, uniform strain and grading.

We know the locality where all our Lilies are grown. Our long and extensive experience in handling Lilies enables us to eliminate strains and types that do not give satisfactory results.

The new 1934 crop will soon be in our possession. As prices have not been established at the time of going to press, we will appreciate receiving a list of your Lily requirements for the coming season, and we will be pleased to quote you our most favorable prices.

**A New Development in "All Double"
Large Flowering Fringed Petunias**

FOR EARLY SOWING

Offered Under the Title of A. B. C. "DE LUXE"

FOR FIFTY YEARS or more, flower-seed specialists have tried by every possible device and experiment to obtain a double Petunia that would reproduce more than 50 per cent of double flowers, but their efforts have been of no avail.

It gives us great pleasure, therefore, to be able to introduce to our customers a strain giving practically 100 per cent of fully duplexed and beautifully fringed flowers of supreme value for pot plants, window boxes and general bedding work. We offer this strain with every confidence.

SPECIAL NOTE!

These 100% double Petunia strains have had a most thorough test during the past 2 years and are fully qualified in every way. "World Beauty" in particular, has proved a real money-maker for pot plant growers while the "mixtures" have also obtained the greatest favor.

"WORLD BEAUTY"

Illustrated in color on front cover of A. B. C. 1934 spring catalog. It produces large double fringed flowers of the most beautiful rosy carmine color; plants of dwarf compact growth which makes this grand new sort particularly desirable for pot plants as well as bedding. Petunia growers will, we believe, do well to culture "World Beauty" in a large way. Price: Tr. pkt., \$2.00; 3 tr. pkts., \$5.00.
