PART 3290—TEXTILE, CLOTHING AND
LEATHER

[Conservation Order M-328, Direction 80]

INCREASED PRODUCTION OF CERTAIN MEN'S
WEAR RAYON LINING FABRICS

The following direction is issued pursuant to Conservation Order M-328:

(a) *Purpose.* There is a serious shortage in the supply of rayon twills and serges, 88 to 140 sley, inclusive, for use in linings for men's suits and other apparel. A substantial increase in production of these fabrics is expected to follow after certain amendments have been made by the Office of Price Administration in its regulations concerning the ceiling price of the fabrics.

This direction explains how any producers of such fabrics may apply for approval by the Civilian Production Administration of proposed increases in their production, in order to qualify for increases in their ceiling prices fixed by regulations of the Office of Price Administration, and states what action may be taken by the Civilian Production Administration on applications, and the effect of such action.

It also provides for production reports from all producers of such fabrics.

This direction, and the filing or approval of applications under it, do not require any person to produce, or prohibit any person from producing, any quantity of lining fabrics. However, any increases in ceiling prices under regulations of the Office of Price Administration desired by applicants because of increased production, will be required to have approval under this Direction

in order to qualify for increased ceiling prices under the amendments in Office of Price Administration regulations.

(b) *Applications.* Any producer of the lining fabrics (in the gray) referred to in paragraph (a) above, who proposes to increase his production of such fabrics, and wants an approval of the increase by the Civilian Production Administration, should file Form CPA-4395 with the Civilian Production Administration, Textile Division, Washington 25, D. C. These forms should be filed as promptly as practicable and not later than the date specified in the form.

(c) *Action by Civilian Production Administration.* (1) The Civilian Production Administration may approve any application, in whole or in part or upon conditions. In general, applications will be approved to the full extent necessary to assure the increased production required for an adequate supply. In particular cases, approval may be withheld if the increased production proposed by an applicant would result in decreased production of other fabrics also in short supply and needed for other essential purposes, or approval may be given upon condition that the proposed increase in production is not obtained by decreasing production of other fabrics specified by Civilian Production Administration.

(2) Civilian Production Administration will give notice in writing of its action upon each application, to Office of Price Administration and to the person filing the application.

(d) *Effect of approval.* (1) The approval of an application by the Civilian Production Administration applies only to any increased production which is not contrary to any conditions stated in the notice of approval, including any limitation upon the quantity of increased production for which approval is given.

(2) Persons whose applications are approved, and who increase their production in accordance with the approval which is given, may qualify for any increases in their ceiling prices permitted by the regulations of Office of Price Administration, as now or hereafter amended. Applicants should consult MPR-23 or other applicable regulations of the Office of Price Administration as to the price increases which will be permitted.

(e) *Reports by all producers.* All producers of rayon twills or serges, 88 to 140, sley, inclusive, including those who are producing for their own account or for the account of others, and whether or not they file application under paragraph (b) above, shall file reports on Form CPA-4394, with the Civilian Production Administration, Textile Division, Washington 25, D. C., at the times specified in the report form, giving the information required.

NOTE: The reporting requirements in this direction have been approved by the Bureau of the Budget under the Federal Reports Act of 1942.

Issued this 6th day of February 1946.

PART 3290—TEXTILE, CLOTHING AND
LEATHER

[Conservation Order M-84, as Amended
Feb. 5, 1946]

MANILA (ABACA) AND AGAVE FIBER AND
CORDAGE

The fulfillment of requirements for the defense of the United States has cre-

ated a shortage in the supply of manila and agave and products made from them for defense for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 3290.221 *Conservation Order M-84—*
(a) *Restrictions on processing of fiber or yarn into rope.* (1) No processor may put into process manila fiber or manila yarn to manufacture rope except for an end use allowed in Schedule A.

(2) [Deleted Feb. 5, 1946]

(b) *Restrictions on processing of fiber or yarn into other products.* (1) No processor may put into process any manila or agave, or yarns made from those fibers, to manufacture any product (other than rope) except rope twine as permitted in Schedule B, or as specifically authorized or directed in writing by the Civilian Production Administration. The use of agave, other than cantala or sisalana from Java and Haiti, may be authorized from time to time by the Civilian Production Administration for binder or baler twine.

(c) *Further restrictions on processing.* (1) The Civilian Production Administration may issue specific directions to processors who have received manila or agave, or yarn by allocation under this order or any other Civilian Production Administration order or by delivery from any United States Government agency, as to the purpose and kind of product for which the fiber may be processed and as to the extension of more critical fibers by mixture with less critical ones (i. e. use of "extenders") in the manufacture of any product.

The Civilian Production Administration may from time to time issue specific instructions regarding the percentage of extender to be used in the manufacture of agave sisalana rope.

(d) *Restrictions on delivery of rope and twine.* (1) No processor or dealer may sell, deliver, or accept delivery of new rope or new twine, produced in the United States in whole or in part from manila or agave fiber or yarn, for end uses for which the product may not be manufactured under this order.

(2) No person may sell or deliver new binder or new baler twine if he knows or has reason to believe that:

(i) The binder twine will not be used with mechanical harvesting equipment or in the growing, harvesting or delivering of agricultural crops, or that the binder twine will be converted into rope or any other product.

(ii) The baler twine will not be used in a self-tying machine for baling hay, straw or other fodder crops.

(3) No person may use new binder or new baler twine to manufacture rope for sale.

(5) [Deleted Feb. 5, 1946]

(e) *Allocation of non-military cordage.* (1) The Civilian Production Administration may in accordance with Priorities Policy Decisions, state the quantity of manila and agave which each processor must, out of his production during stated periods, process into

¹ Filed as part of the original document.

cordage, as allowed by Schedules A and B, to be delivered or set aside for delivery only to fill non-military orders and only to the extent specified for particular non-military uses. From that quantity, the processor may not fill any other orders, except orders rated AAA. When that cordage is sold by the processor, he must inform the buyer of the particular non-military use for which it must be used. The buyer may use or sell that cordage only for the specified non-military use or an AAA order.

(f) *Allocation of fiber and yarn.* No processor shall make or accept delivery of any manila or agave fiber contrary to directions which from time to time the Civilian Production Administration may issue. The Civilian Production Administration may from time to time allocate to processors the available supplies of manila and agave fiber and specifically direct the time, manner, and quantities in which deliveries to processors shall be made or withheld. Allocations will be made upon the following basis: the aggregate allocation of manila and agave fibers to each processor for rope will be in proportion to his average monthly sales of both types of rope during the period January 1, 1939 through December 31, 1941; the manila fiber to each processor for rope will be in proportion to his average monthly sales of manila rope during the period January 1 through December 31, 1939; and the agave fiber to each processor for rope will be in proportion to his aggregate allocation for both fibers, less that for manila. A manufacturer who was not in the hard fiber cordage business during 1939-40-41 may apply to the Civilian Production Administration, Textile Division, Washington 25, D. C., for an allocation. The application should be filed by letter stating the quantity of fiber desired, and should include a statement of the facilities available for the manufacture of cordage products, as permitted under Order M-84, the maximum poundage of fiber which can be processed with his facilities on the basis of a 40-hour week, and the minimum poundage of fiber needed for economical operation during a three-month period. Applications from new manufacturers will be considered on an equitable basis in view of the allocations given to other manufacturers.

(g) *End use information.* No person may sell or deliver any product controlled by this order to any person who he knows or has reason to believe will use the product in a manner which this order does not permit. He should satisfy himself as to this in some reasonable manner before delivering. He may, but need not, require a statement in writing showing the specific purpose or use for which the item is ordered.

(h) *Restrictions on the use of damaged material.* Any processor or dealer who has in his possession damaged or defective manila or agave fiber or cordage, may report by letter the extent of the damage and state to the Civilian Production Administration the percentage not suitable for the manufacture of products or for use permitted by this order. He may then upon receipt of acknowledgment, without objection from the Civilian Production Administration, use or dispose of any portion unsuitable for the manufacture of products permitted by this order, free from its restrictions.

(i) *Reports.* (1) Processors of manila and agave fiber shall report monthly on CPA-2901, Sections 1 and 2.

(2) The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(j) *Imports.* The importation of material or products covered by this order shall be made in conformity with the provisions of General Imports Order M-63, as amended from time to time.

(k) *Definitions.* In this order:

(1) "Manila" means fiber, spinnable over machinery which is commonly known in the trade by this term and also known as abaca or Manila hemp, wherever grown (either stripped or decorticated), but does not mean the fiber grades of T2 and T3, O or Y, or equivalent, as established by the Insular Government of the Philippine Islands, processor's mill waste or bagasse.

(2) "Agave" means fiber, spinnable over machinery of the species agave sisalana, agave fourcroydes, and agave cantala, of all grades and qualities including tow and fiber under 20" in length, commonly known in the trade as sisal, henequen, cantala, and maguey, and sometimes preceded by an adjective designating the country or district of origin, but does not include processor's mill waste or bagasse.

(3) "Rope" means any rope or cable, treated or untreated, composed of three or more strands each strand composed of two or more yarns, but does not include strings and twines of whatever construction which are commonly used for tying, sewing, baling or other commercial packaging use.

(4) "Twine" means any single or plied yarn or roving, including marlin, for use as a tying material, for sewing or for any similar purpose, but does not include any product falling within the definition of "rope", "binder twine" or "baler twine."

(5) "Binder twine" means a single yarn twine usually containing agave, but sometimes containing manila, istle, jute, coir, hemp, cotton or paper, suitable for use in a harvesting machine and of the type customarily heretofore manufactured. It is put up in balls of approximately five to eight pounds, packed six to ten to the bale. It measures five hundred feet to the pound with a plus or minus tolerance of five per cent, and contains a lubricant of at least ten per cent of the weight of the twine and an insect repellent. It is also known as binding twine.

(6) "Baler twine" means a single yarn usually made of agave fiber and used in a self-tying machine for baling hay, straw or other fodder crops.

(7) [Deleted Feb. 5, 1946]

(8) [Deleted Feb. 5, 1946]

(9) "Processor" means any person (other than a United States Government agency) who spins, twists or otherwise uses any fiber or yarn in the manufacture of rope or twine, or who uses manila or agave fiber in the manufacture of any other product.

(10) "Non-military" as applied to use or orders means any use or order not for direct or ultimate delivery to, or incorporation into any material for direct or ultimate delivery to the U. S. Army, Navy, Maritime Commission, or War Shipping Administration or to facilities controlled by the War Shipping Administration. It includes cores and centers for wire rope, regardless of their ultimate use.

(l) *Appeals.* Any appeal from the provisions of this order should be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(m) *Applicability of regulations.* Except as specifically otherwise provided this order and all transactions affected thereby are subject to all applicable provisions of the regulations of the Civilian Production Administration as amended from time to time.

(n) *Violations.* Any person who willfully violates any provision of this order, or who in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance by the Civilian Production Administration.

(o) *Communications.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to the Textile Division, Civilian Production Administration, Washington 25, D. C., Ref.: M-84.

Issued this 5th day of February 1946.

CIVILIAN PRODUCTION
ADMINISTRATION,
By J. JOSEPH WHELAN,
Recording Secretary.

SCHEDULE A—MANILA CORDAGE END USE

This list specifies the permitted end uses for which rope may be manufactured from manila. It does not, however, restrict manufacture for and delivery to the Army, Navy and Maritime Commission.

Fibers other than manila may be used in the manufacture of rope for any end use subject to applicable provisions of any Civilian Production Administration order dealing specifically with such fibers.

NOTE: Items "Cracker," "Drilling cables" and "Falls-Lifeboat" amended, and item "Manila rope" added Feb. 5, 1946.

End use	Definition
Auxiliary line-Lyle gun	A 3" circ. hawser-drawn to or from a vessel by means of a whip line and which is used to support a breeches buoy.
Cracker	A short length of fiber drilling cable used in conjunction with a wire drilling cable affording spring or elasticity to the wire line.
Drilling cables-oil, water and gas wells	Used for operating the tools in "cable tool" drilling.
Falls-Ammunition	The hoisting rope used to raise and lower ammunition.
Falls-Lifeboat	A rope used generally in conjunction with a pair of davits, used to raise or lower lifeboats which contain people.
Falls-Purse boat	A pair of tackles suspended from davits used to raise and lower the purse boats and seines which weigh about 5 tons.
Falls-Powder tank	Used in handling powder tanks (lowering and hoisting).
Life line	See auxiliary line-lyle gun.
Manila rope 1 1/4" diam (3 3/4" cir.) and larger	Any use.

Torpedo lines-Oil well	Approximately 1/4" diam. rope used to lower explosives into oil or gas well preparatory to "shooting" the well.

SCHEDULE B—TWINE END USE

This list specifies the permitted end uses for which twine may be manufactured from manila and agave. The use of agave fiber for the manufacture of binder and baler twine will be authorized as stated in paragraph (b) (1). Manila is not permitted at present for twine and agave is permitted only where indicated.

End use	Definition	Manila	Agave
Bale rope	A heavy wrapping twine for securing large bales or bundles

PART 3293—CHEMICALS

[Conservation Order M-387, as amended Feb. 6, 1947]

ROSIN

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of rosin for defense, for private account and for ex-

port; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3293.646 *Conservation Order M-387—(a) Definitions.* (1) "Gum and wood rosin" means gum and wood rosin as defined by the Naval Stores Act of March 3, 1923, and the regulations issued

by the Acting Secretary of Agriculture on April 22, 1941 under that act. However, the term "rosin" when not expressly limited to gum or wood rosin, means the gum or wood rosin content of any intermediate product as well as gum or wood rosin as such.

(2) "Intermediate product" means any product containing gum or wood rosin capable of use in the manufacture of a Schedule A product. The term includes but is not limited to mixing and grinding vehicles containing rosin, esterified rosin (ester gum), rosin modified phenolic resin, rosin modified maleic or fumaric resins, rosin modified phthalic alkyd resins, gloss oil, heat-treated rosin, stabilized rosins, polymerized rosin and metal resins. The only intermediate products which need not be considered for the purpose of this order are specified in paragraph (e) (2).

(3) "Manufacturer" means any person who uses rosin in the manufacture of any product, or any person who has rosin manufactured for him into any product pursuant to toll arrangement.

(4) [Deleted Feb. 6, 1946.]

(5) [Deleted Feb. 6, 1946.]

(6) [Revoked May 30, 1945.]

(7) [Revoked May 30, 1945.]

(8) [Deleted Aug. 28, 1945.]

(9) [Deleted Aug. 28, 1945.]

(10) "Printing ink" includes any fluid or viscous material or composition of materials used in printing, impressing, stamping, or transferring upon paper or paper-like substances, wood, fabrics or metals by the recognized mechanical reproductive processes employed in printing, publishing and related service industries.

(11) "Protective coating" means any liquid organic coating, thinner, or remover which either alone or mixed with other materials is normally applied to any surface by brush, spray, dip, roller coat, or other method of application. The term includes but is not limited to paint, varnish, enamel, lacquer, dope, lacquer or dope thinner, paint or varnish remover, stain and polishing waxes. The term does not include adhesive, cement, printing ink, coating for the manufacture of coated fabric, coating for leather (limited to hides, skins and splits, etc., which have not been incorporated into any product), coating for footwear (of any material, including leather) and coatings for manufacture of linoleum or felt base covering.

(12) "Soap" means the water soluble product formed by the saponification or neutralization of rosin, fats, oils, or their fatty acids, with organic, ammonium, sodium or potassium bases; or any composition containing such products. The term includes all types of shaving soaps and shaving creams, but shall not include soap used for nondetergent purposes and soap for industrial degreasing of metal tooling or metal fabrication.

(13) "Put into process" means the first change made by a manufacturer in the chemical or physical properties of gum or wood rosin, or of any intermediate product which he uses as such in the manufacture of a Schedule A prod-

uct. For example, if gum or wood rosin is added as such to a kettle of other material in the final process of making a protective coating, the gum or wood rosin in question would be considered to have been "put into process" when it was put into the kettle. On the other hand, if gum or wood rosin is first compounded into a synthetic resin, and the synthetic resin subsequently is added to the kettle of other materials in the final process of making a protective coating, the rosin content in question would be considered to have been "put into process" when the synthetic resin was added to the kettle in the final stage of manufacture of the protective coating.

(b) [Deleted Feb. 6, 1946.]

(c) [Deleted Feb. 6, 1946.]

(d) [Deleted Feb. 6, 1946.]

Intermediate products	Estimated rosin content (solvent free basis)
Esterified rosin.....	96 lbs. of rosin per 100 lbs. of resin.
Rosin-modified phenolic resin.....	85 lbs. of rosin per 100 lbs. of resin.
Heat-treated rosins.....	100 lbs. of rosin per 100 lbs. of heat-treated rosins.
Stabilized rosins.....	100 lbs. of rosin per 100 lbs. of stabilized rosins.

Rosin oil.....	100 lbs. of rosin per 100 lbs. of rosin oil.

(2) *Special exemption for certain intermediate products.* No manufacturer shall include the rosin content of the following intermediate products for the purpose of calculating his past or current consumption of rosin in the manufacture of Schedule A products, for the purpose of the reporting provisions, notwithstanding any other provisions of this order:

Resinated colors.

Any intermediate products containing not more than 1% rosin by weight (solvent free basis).

(3) *Special provisions for mixing and grinding vehicles.* Any manufacturer who produces his own mixing or grinding vehicles for incorporation into Schedule A products which he himself produces, may charge his rosin consumption at the time he completes production of the mixing or grinding vehicle, if he so desires, instead of at the time when he uses the mixing or grinding vehicle in the manufacture of the Schedule A product. However, he must use the same timing basis in the production cycle for the purpose of computing current and past consumption, and must continue to use the same timing basis for present and future computations under this order.

(f) *Inventory restrictions on rosin.*

Inventories of rosin are subject to the provisions of Priorities Regulation 32, including paragraph (c) (1) and Interpretation 1 (inventories in seasonal industries) of that regulation.

(g) [Revoked Feb. 6, 1946.]

(e) (1) *Method of computing rosin content of intermediate products.* Since the provisions of this order refer not only to gum and wood rosin as such put into process in the making of Schedule A products, but also refer to the rosin content of intermediate products put into process for the manufacture of Schedule A products, it is necessary for manufacturers to determine rosin content of intermediate products in some cases, for the purpose of reporting provisions. In figuring the rosin content of the intermediate products listed below, a manufacturer shall use the estimated rosin content appearing after each of those intermediate products in order to determine his consumption. For all other intermediate products, the rosin content must be ascertained.

use and inventory report for that quarter on Form CPA-4131, in the manner prescribed therein, on or before the 20th day of the month following the close of that quarter. One copy of each report shall be retained and one copy shall be forwarded to the Civilian Production Administration, Chemicals Division, Washington 25, D. C.

(k) *Appeals.* Any appeal from this order must be filed by letter in duplicate addressed to the Civilian Production Administration, Chemicals Division, Washington 25, D. C., Ref: M-387, setting forth the reasons for the appeal and the necessary supporting information.

(l) *Budget Bureau approval.* The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(m) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the Civilian Production Administration, as amended from time to time.

(n) *Violations.* Any person who willfully violates any provision of this order, or who in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(o) *Communications to Civilian Production Administration.* Communications concerning this order shall, unless otherwise directed, be addressed to the Civilian Production Administration,

FEATHER FILLED PILLOWS AND UPHOLSTERY CUSHION INNERCASINGS

A statement of the considerations involved in the issuance of this amendment has been issued simultaneously herewith; and it has been filed with the Division of the Federal Register.

Maximum Price Regulation No. 584 is amended in the following respects:

1. Section 8 is amended to read as follows:

SEC. 8. *Manufacturers to calculate maximum prices on retail sales of new pillows.* (1) If the manufacturer's maximum price for sales of a particular single new pillow is determined by reference to Table I-B of paragraph (a) of Appendix A, the manufacturer shall calculate the maximum price for sales by retailers of that pillow in the following manner:

(i) He deducts five cents from his maximum price for a sale of that single new pillow to retailers, exclusive of the quantity and Far West Zone differentials; and

(ii) He multiplies the result of (i) by 175 percent. The amount obtained by this multiplication is the maximum price for sales by retailers of the particular pillow.

(2) In all other cases, the manufacturer shall calculate the maximum price for sales by retailers of a single new pillow by multiplying his maximum price for sales of that single new pillow to retailers, exclusive of the quantity and Far West Zone differentials, by 180 percent. The amount obtained by this multiplication is the maximum price for sales by retailers of the particular pillow.

(3) The Far West Zone differential provided in paragraph (c) of Appendix A shall be added to the retail price calculated under (1) or (2). The price, so calculated, may be rounded to the nearest five cents. However, if the price, so calculated, results in a figure exactly midway between the next higher and the next lower five cents, it shall be rounded to the next lower five cents.

2. The footnote at the end of the table in § 10 (a) (8) (ii) is amended to read as follows:

(i) If the manufacturer's maximum price for sales of a particular pillow is determined by reference to Table I-B of paragraph (a) of Appendix A,² the maximum price of a jobber for his sale of that pillow shall be 123 percent of either the maximum price of the manufacturer for his sale of the particular pillow, or of the actual net invoice price, to the jobber, whichever is lower, plus the freight charge paid by the jobber for delivery to him.

(ii) The maximum price of a jobber for his sales of all other articles covered by this regulation shall be 125 percent of either the maximum price of the manufacturer for his sale of the particular article, or of the actual net invoice price, to the jobber, whichever is lower, plus the freight charge paid by the jobber for delivery to him.

¹ This refers to pillows made with new chicken and turkey feathers or fibre and mixtures thereof with crushed waterfowl quills.

NOTE: All weights listed are minimum filling weights in ounces. All prices listed are maximum prices.

If the components of the filling mixture of a pillow contain more than three percent of colored chicken and turkey feathers or fibre, the maximum price of the pillow shall be determined as if such feather and fibre components were one hundred percent colored.

If the filling components of a pillow include both chicken and turkey feathers and chicken and turkey fibre, the price of the pillow shall be determined as if such feather and fibre components were one hundred percent chicken and turkey feathers.

The maximum price for sales to retailers or to institutional users of pillows 21 inches by 27 inches in size containing percentage compositions other than those listed in Table 1-B shall be the maximum price of that pillow listed in the table having the percentage composition next lowest to that of the pillow being priced.

PART 1499—COMMODITIES AND SERVICES [SR 14C, Amdt. 16]

PACKED RIPE OLIVES

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.

Section 4.8 is added to read as follows:

SEC. 4.8 Packed ripe olives—(a) Maximum prices which processors may charge for packed ripe olives. The processor's maximum price per dozen containers or other unit, f. o. b. shipping point, to any class of purchasers for an item of packed ripe olives shall be his maximum price as established by the

General Maximum Price Regulation¹ for sales to the same class of purchasers plus 16% of that price.

(b) Maximum prices which distributors other than wholesalers and retailers may charge for packed ripe olives. The maximum price for an item of packed ripe olives, f. o. b. shipping point, of a distributor who is not a wholesaler or retailer shall be:

(1) The maximum price of his supplier, f. o. b. shipping point, plus incoming freight paid by the distributor, if he purchased the particular goods being priced from a supplier other than a wholesaler or retailer.

(2) The "net cost" of his supplier under Maximum Price Regulation No. 422,² 422³ or 423,⁴ plus incoming freight paid by the distributor, if he purchased the particular goods being priced from a wholesaler or retailer.

(c) Notification of new maximum prices. With the first delivery after February 6, 1946, of an item of packed ripe olives, in any case where a seller determines his maximum price pursuant to this section, he shall supply each wholesaler and retailer who purchases from him with written notice, reading as follows:

(Insert date)

Notice to Wholesalers and Retailers

Our OPA ceiling price for (describe item by variety, grade, brand, style of pack, container type and size) of packed ripe olives has been changed by the Office of Price Administration. We are authorized to inform you that if you are a wholesaler or retailer pricing this item under Maximum Price Regulation No. 42, 422 or 423, you must refigure your ceiling price for this item on the first delivery of it to you containing this notification on or after February 7, 1946. You must refigure your ceiling price following the rules in section 6 of Maximum Price Regulation No. 421, 422 or 423, whichever is applicable to you.

For a period of 60 days after determining such maximum price for the item, and with the first shipment after the 60-day period to each person who has not made a purchase within that time, each seller shall include in each case, carton or other receptacle containing the item, the written notice set forth above, or securely attach it to the outside. However, for sales direct to any retailer, the seller may supply the notice by attaching it to, or stating it on, the invoice covering the shipment, instead of providing it with the goods.

(d) Reports which processors must file. Within 10 days after the date of his first sale of any item for which he figures his maximum price under this section, the processor shall file with the Office of Price Administration, Washington, D. C., a report in duplicate and signed by him showing:

(1) A description in detail of the item being priced, including its grade and

brand name (if any) and the variety of olives used in the item.

(2) His maximum price, f. o. b. shipping point, as established by the General Maximum Price Regulation for sales to each class of purchasers (for example, government procurement agencies, wholesalers, retailers).

(3) His maximum price, f. o. b. shipping point, as figured under this section for sales to each class of purchasers.

(4) A list of his customary discounts, transportation and other allowances and price differentials.

(5) The volume of the item he has produced from the 1945-1946 crop of olives and the volume of the item he expects to produce from that crop during the following 12 months.

(c) *Individual adjustment of processors' maximum prices.*—(1) *When adjustments may be made.* Either on his own motion or upon application in accordance with Revised Procedural Regulation No. 1,⁵ the Price Administrator may adjust a processor's maximum price figured under this section for sales to purchasers other than government procurement agencies, or for sales to government procurement agencies when the processor has entered into or proposes to enter into a government contract or subcontract, where it appears that:

(i) The maximum price is below the median price at which sales of the item (regardless of brand) may be sold to the same class of purchasers by processors located in the general processing area;

(ii) The processor would be entitled to a price increase under the standards set forth in subparagraph (2), below; and

(iii) In the judgment of the Price Administrator, an increase in the processor's maximum price would be in furtherance of the purposes of the Emergency Price Control Act of 1942, as amended, the Stabilization Act of 1942, as amended, and Executive Orders Nos. 9250, 9328, 9599 and 9651.

(2) *Amount of adjustment.* The maximum price, as adjusted under this paragraph, shall in no event be higher than the median price at which sales of the item (regardless of brand) may be made to the same class of purchasers by processors located in the general processing area. Subject to this limitation and the limitation of subparagraph (1) (iii), above, the adjusted maximum price shall not exceed the following amount:

(i) Processing costs for the item if the processor's percentage of net operating profits (before income and excess profits taxes) to net sales of packed ripe olives, during the most recent fiscal year, was 5% or higher; or

(ii) Total costs for the item, if the processor's percentage of net operating profits (before income and excess profits taxes) to net sales of packed ripe olives, during the most recent fiscal year, was less than 5% but no lower than 3%; or

(iii) Total costs for the item plus a profit of 5% of the adjusted maximum price, if the processor's percentage of net operating profits (before income and excess profits taxes) to net sales of

packed ripe olives, during the most recent fiscal year, was lower than 3%.

(3) *Contracts with government procurement agencies pending disposition of application for adjustment.* Upon the filing of an application for adjustment under this paragraph of a maximum price for sales to government procurement agencies or within 30 days prior thereto, and until final disposition of the application, contracts may be entered into or proposed with, and bids submitted to, government procurement agencies at the price or prices requested in the application, and deliveries may be made under such contracts, except that the processor may not receive and the buyer may not pay the amount by which the price exceeds the maximum price unless and until an order granting a higher price has been issued. The processor shall include in any sale, contract to sell, or offer to sell at the price requested in an application the following:

(i) His maximum price for sales of the item to government procurement agencies.

(ii) A statement that the quoted price is subject to approval of the Office of Price Administration.

(iii) A statement that an appropriate application has been filed, or will be filed within 30 days, with the Office of Price Administration.

Any government agency may appear as an interested party in the case of any such application.

(4) *Time, form and place of filing application.* No application for adjustment shall be filed before the processor has completed a substantial part of his pack of the product from the current crop. Applications shall be filed with the Office of Price Administration, Washington, D. C., in duplicate on Office of Price Administration Form No. 6039-2526, and shall contain the information specified in that form. Copies may be obtained from any field office of the Office of Price Administration or from the Wholesale-Retail and Fruit and Vegetable Branch, Food Price Division, Office of Price Administration, Washington, D. C. The Office of Price Administration may request the processor to file any additional cost data based upon operating experience.

(5) *Determination of limitations on adjustment in certain cases.* If the particular item (regardless of brand) is not the "basic item" of that variety of packed ripe olives, for the purpose of making adjustments the Price Administrator may determine the applicable median price at which sales of the item (regardless of brand) may be made to the appropriate class of purchasers by processors located in the general processing area, by customary differential from the reported maximum prices for the basic item of the same variety sold by processors in the same or nearest general processing area.

"Basic item" of any variety of packed ripe olives means the item (regardless of brand) for which the greatest number of maximum prices have been reported.

(6) *Determination of adjustments for grower-processors (including grower-*

owned cooperatives). For the purposes of this paragraph, "net operating profits (before income and excess profits taxes) to net sales of packed ripe olives" for a grower-processor (including a grower-owned cooperative) means the amount by which net sales of the commodity exceeded total costs computed on the basis of the weighted average price paid by his most closely competitive processor who is not a grower-processor for the 1944-1945 crop of each variety grouping (as described in subparagraph (7) (ii) (a), below) used in producing packed ripe olives.

In determining adjustments under this paragraph, "processing costs for the item" or "total costs for the item" shall be computed in each case on the basis of the weighted average price paid by the grower-processor's most closely competitive processor who is not a grower-processor for the 1945-1946 crop of each variety grouping of ripe olives, as described in and subject to the limitations of subparagraph (7) (ii) (a) below.

(7) *Definitions.* When used in this paragraph the term:

(i) "Net sales" means total sales less return sales of finished product.

(ii) "Processing costs for the item" means current:

(a) Actual cost per unit, delivered to the factory, of all ingredients and packaging materials for which maximum prices have been established, figured at no more than the current maximum prices applying to the class of purchasers to which the processor belongs, or, if no maximum prices have been established, figured at no more than their current market prices (but in the case of ripe olives, not in excess of a weighted average price of \$370.00 per ton for Sevillano-Ascolano varieties or \$270.00 per ton for all other varieties);

(b) Direct labor costs per unit, figured at no more than lawful current rates; and

(c) Other costs of processing per unit, such as indirect labor (figured at no more than lawful current rates), depreciation, factory rental, insurance, machinery repairs, and other cost factors generally pertaining to processing operations, but not including general administrative and selling expenses.

(iii) "Total costs for the item" means processing costs plus current general administrative and selling expenses per unit.

(iv) "Median price" means the middle price of a series of prices arranged in order of size, or, if the series consists of an even number of prices, the simple arithmetic average of the two middle prices.

(v) "Government contract" means any contract with the United States or any agency thereof or with the Government or any agency thereof of any country whose defense the President deems vital to the defense of the United States under the terms of the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States."

(vi) "Subcontract" means any purchase order or agreement to make or furnish any commodity needed for the performance of another government contract or subcontract thereunder.

⁵ 9 F.R. 10476, 13715, 11295.

(8) *Effect of prior adjustments.* In determining adjustments under this paragraph, changes in prices resulting from the granting of prior adjustments to other processors under this paragraph shall, so far as practicable, be disregarded.

(9) *Relationship with Revised Supplementary Order No. 9.* No application for adjustment filed on or after February 7, 1946, under Revised Supplementary Order No. 9⁶ with respect to maximum prices of processors for sales to government procurement agencies of commodities covered by this section will be granted.

(f) *General definitions.* When used in this section the term:

(1) "Processor" means a person who processes any part of what he sells of the kind and brand of product being priced. The term includes a person who has the goods "custom-packed" or "toll-packed" by another.

(2) "Distributor" means a person who purchases all he sells (for his own account) of the kind and brand of product being priced and resells it without processing any part of it.

(3) "Wholesaler" and "retailer" mean the persons respectively referred to as "wholesalers" and "retailers" in Maximum Price Regulations Nos. 421, 422 and 423.

(4) "Item" means a kind, variety, grade, brand, style of pack, container type and size of product.

(5) "Packed" means processed and enclosed in any container, whether or not hermetically sealed.

(6) "Ripe olives" includes only whole unpitted ripe olives, whole pitted ripe olives and chopped ripe olives.

(g) *Relationship with the General Maximum Price Regulation.* Except to the extent that maximum prices under the General Maximum Price Regulation are modified by this section, the provisions of that regulation apply to sales of packed ripe olives by persons other than wholesalers and retailers.

This amendment shall become effective February 7, 1946.

NOTE: All reporting requirements of this amendment have been approved by the Bureau of the Budget, in accordance with the Federal Reports Act of 1942.

Issued this 7th day of February 1946.

JAMES G. ROGERS, Jr.,
Acting Administrator.

Approved: February 4, 1946.

TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

Chapter I—Veterans' Administration

PART 5—ADJUDICATION: DEPENDENTS' CLAIMS

EVIDENCE REQUIRED IN ESTABLISHING PROOF OF BIRTH RELATIONSHIP, MARRIAGE, DEATH AND DEPENDENCY

§ 5.2517 *Proof of marriage.* Proof of marriage shall be shown by evidence as provided in § 2.1050 of this chapter, except that in the claim of a widow and/or child or children of a colored or Indian veteran, who enlisted prior to March 4, 1873, and whose death was due to service in line of duty, no evidence of marriage, other than satisfactory proof that the parties were joined in marriage by some ceremony deemed by them obligatory or habitually recognized each other as man and wife and were so recognized by their neighbors and lived together to date of enlistment, if death was in service, otherwise to date of death, will be required.

(Sec. 4705, R. S., U.S.C. Title 38, sec. 198)

§ 5.2519 *Cause of death, direct or contributory.* (a) The death of a veteran will be considered as having been due to a service-connected disability when the evidence establishes that such disability was a principal or contributory cause of death. In determining whether the service-connected disability contributed to death, it is not sufficient to show that it was merely concurrent or coexistent, but rather it must be shown that it contributed substantially or materially; that it combined to cause death; that it aided or lent assistance to the production of death. It is not sufficient to show that it casually shared in producing death, but rather it must be shown that there was a casual connection. When, after careful consideration of all procurable and assembled data, a reasonable doubt arises as to whether a service-connected disability was the principal or contributory cause of death, such doubt shall be re-

solved in favor of the claimant. (43 Stat. 608; 38 U.S.C. 426)

No change in (b).

(a) *Manufacturer's ceiling prices.* The Glenwood Range Company, Taunton, Massachusetts, may increase its ceiling prices for the coal ranges which it man-

ufactures by 8 percent of each such ceiling price.

(b) *Ceiling prices of purchasers for resale.* Purchasers for resale of such articles which the manufacturer has sold at ceiling prices adjusted under this order shall determine their resale ceiling prices, as follows:

The determination of a resale ceiling price in this way need not be reported to the Office of Price Administration. Each seller, however, must keep complete records showing all the information called for by O.P.A. These ceiling prices are f. o. b. seller's city. A wholesale distributor who, at the request of the dealer, provides the consumer with delivery, installation and any service necessary in connection with the sale of the range may make an additional charge per range (which must be separately stated)

no greater than the differential he had in effect during March 1942, for a similar sale on a similar basis or, if he had no such differential in March 1942, no greater than the differential charged for such servicing by his closest seller of the same class who had such a differential. In all other respects these ceiling prices are subject to each seller's customary terms, discounts, allowances and other price differentials in effect on sales of similar articles.

If a range cord set (customarily referred to in the industry as a "pigtail") is required and is furnished by the retail dealer, he may add \$3.50 to the above OPA retail ceiling price. In all other respects these ceiling prices are subject to each seller's customary terms, discounts, allowances, and other price differentials in effect on sales of similar articles.

(b) At the time of or prior to the first invoice to each purchaser for resale at wholesale after the effective date of this order, the manufacturer shall notify the purchaser of the ceiling prices established by this order for resales by the purchaser. This notice may be given in any convenient form.

(c) The manufacturer, before shipping any range covered by this order to a purchaser for resale, shall attach securely to the outside panel of the oven door of each range a label which contains all the following information:

2. Its OPA retail ceiling price.
3. A statement that the ceiling price shown includes the Federal excise tax, delivery, a one year warranty and installation where the installation requires only that the range be connected to the electric facilities provided by the purchaser and such connection does not require any additional materials.
4. A statement that if the installation requires the use of a range cord set (customarily referred to in the industry as a "pigtail") and such a set is furnished by the retail dealer, he may add \$3.50 to the OPA retail ceiling price of the range.

(d) This order may be revoked or amended by the Price Administrator at any time.
