## Our vision:

We believe Wikimedia **belongs in education**. When **students of all ages** contribute to **Wikimedia projects** as part of their learning, they gain significant **21st century skills**. By fostering a relationship between Education and the **Wikimedia movement**, we have the best chance to realize our goal that the sum of all knowledge will be accessible to everyone in the world for free.

Now, let's talk about  
Wikimedia Education

What are you doing?

What is its impact on your project?

What is your audience learning from it?

How are you evaluating it?

Wikimedia Argentina uses diversity as one of their evaluation tools to make sure the inclusivity of students and teachers who are benefiting from their edit in class education activities

CIS is supporting professors at Christ University to help students learn how to type in their mother language through transcribing cultural texts on Wiki Source.

We trained university professors in Ghana on how to use Wikipedia in the classroom to help students learn writing skills.
