

いては、犯罪や青少年連には一連の演習が保たれて
います。故へに児童連委員と少年司佐保護委員と
の因果密な連絡がある。相互協力が必要であり、
この意味から青少年司佐保護委員を増員し、
各村一先には、市所には充分の配置を要行し、
現場に於ける青少年不良化防止犯罪や青少年
歳化に共同して實際にあらう事が必要であります。

Nagano

Opinion to the enforcement of
Child Welfare Law

— Nagano Child Welfare Center

Since Child Welfare Law was carried out, it became so effective to find out questionable child quickly due to the brisk activity of Child Welfare workers. As these children are protected and instructed so quickly, present condition of preventing children from becoming delinquent & seems to be strengthened in its first line. Especially, every female child welfare worker endeavoured to instruct general female groups, and Mothers club was organized ^{everywhere in this prefecture} in order to prevent boys and girls from becoming delinquency. The present activities and importance of female child welfare workers are acknowledged everywhere in this prefecture.

2
and gave strong pride and self-confidence to general female group, it seems that female child welfare workers should be increased more and more in view of their present activities and lifting up their standpoint in future.

In accordance with the popularization of Child Welfare Law, case works which should be charged by child welfare workers in first line are increased on and on, and as it is necessary for the improvement of child's quality to strengthen their instruction power, child welfare workers should be increased by one man per 400.

Unless numbers of child welfare workers are increased, their activities will come to a standstill and there will be much difficulty to improve child welfare and to prevent children from becoming delinquency.

Most of criminal child are attending school and greater part of crime is

theft. We can see as present tendency that after they are stealing money or goods within school building, also many of them are committing crime by threatening their companions.

These criminal children should be cultured by school teachers because their living centers are in school.

We desire Article 26 and 27 of Child Welfare Law reformed so as to ask teachers instructions and guidance on every child. From the standpoint of child welfare,

this prefecture is encouraging every city, town and village and endeavouring to encourage their works to establish child's park, child's library, Child's Club or association etc. and fortunately these are ^{actually} increasing day by day.

Through prefecture, P.T.A. was organized and the guidance program was established. According to this program, outside school education

is regarded very important, and this will be much aid to prevent child from becoming delinquency. Therefore, good using of P.T.A. may be an excellent measure for the improvement of child.

Criminal child whose age is under 14 years is treated by Child Welfare Station and whose age is between 15 and 18 is treated by Local Juvenile Protection and Observation Station.

Treatments on ^{according to the age} those children are legally different, but there is a series of relation in criminal youths and children. Therefore, cooperative work is necessary between Child Welfare worker and juvenile Probation Officer.

From this meaning, it is necessary to increase ^{number of} juvenile Probation Officers by one man per village, and give sufficient members to every town or city for ^{the} cooperative work to prevent

5

children from becoming delinquency
also to culture them.
