JOHN BORNMAN & SON, PRINTERS, DETROIT, MICH.

#### REASON THE WHY

M. FERRY & CO. possess, to a greater degree than has ever before been possible to any seedsman, • the three elements which are necessary to the production of uniformly good seeds. First, long experience in doing a great volume of business; second, adequate equipment; third, sufficient ital. We are compelled to have a large organization. The result is minute subdivision of labor so

capital. We are compelled to have a large organization. The result is minute subdivision of labor so that every man can be and is an expert in his own field. This Specialization is furthered by leaving out four scope the entire range of field seeds, potatoes, insecticides, etc., and confining ourselves solely to flower and vegetable seeds. These it is our business to know and we bring to the study every help that science can suggest.

Our stock seed farm is run at an enormous cost because only a fraction of the plants grown are depended upon for breeding. It is to our financial advantage to select only the best but many seed firms are prevented from so doing by lack of sufficient means. It costs money to wait for results.

It costs, too, to keep in touch with the seed industry of the entire world. Europe we visit every year. In America our corps of inspectors is kept busy observing and directing growing crops from the Atlantic to the Pacific. At our home gardens another force is busy "proving all things". In the past year we have made 35,422 soil tests for vitality and 4,159 quality trials, using for the latter 20 acres of garden soil, a record impossible to any other firm however earnest its desire to do good work.

These are fundamentally the reasons why our seeds are "standard". We have the knowledge, the equipment and the capital necessary to make them the world's best.

OUR TERMS ARE STRICTLY CASH WITH THE ORDER. We do not send C. O. D., as the cost of collecting return charges is quite an unnecessary item of expense and the prices being given, we can conceive of no necessity to war-rant goods being so sent.

HOW TO SEND MONEY. Remittances may be made AT our RISK by any of the following methods, viz.: POSTAL MONEY ORDER, DRAFT ON NEW YORK OR CHICAGO, OR EXPRESS COMPANY'S MONEY ORDER.

The rates charged for Postal Money Orders and Express Money Orders are now so low that these are the best ways to remit. We will bear the expense of sending money in either of these ways. Deduct the cost of the order from amount sent. Express Money Orders can be obtained at ALL offices of the principal Express Companies. They are CHEAP order Statement Statement Statement Statement Statement Statement Statement of the principal Express Companies. They are CHEAP and ABSOLUTELY SAFE.

When Money Orders cannot be obtained, letters contain-ing money should always be registered. Money in ordinary letters is unsafe. If currency is sent by express, the charges should be prepaid, and if local checks are used, they must be certified.

FREE OF POSTAGE OR EXPRESS CHARGES. PACKETS,

OUNCES, Two OUNCES, QUARTER POUNDS or POUNDS, ordered at list prices, will be sent free by mail or express. Customers ordering enough for a freight shipment, 100 pounds or more, or desiring to pay their own express charges, may deduct 10 cents per pound from prices of this catalogue on all seeds quoted by the pound or less.

PINTS AND QUARTS. PINTS, QUARTS and FOUR QUARTS, ordered at list prices, FIFTEEN CENTS PER QUART, TEN CENTS PER PINT, MUST be added for postage or express charges and they will then be sent free.

ONE-FOURTH BUSHEL, BUSHEL AND HUNDRED POUND LOTS. Where ONE-FOURTH BUSHEL, BUSHEL OR HUNDRED POUND lots are ordered, we deliver free at depot or express office in Detroit, Mich., the freight or express charges to be paid by the party ordering.

Where perishable or other goods are ordered to be sent by freight or express to such great distances that the cost of transportation will nearly or quite equal the value of the goods, we must decline to ship unless purchasers remit us, in addition to the price of goods, sufficient funds to pre-pay transportation charges. When this requirement is not complied with, we reserve the right of declining the order and returning money to the person ordering. and returning money to the person ordering.

SEEDS BY MEASURE. ONE-FOURTH BUSHEL and over sold at BUSHEL RATES; FOUR QUARTS and OVER up to ONE-QUARTER bushel sold at FOUR-QUART RATES; less than FOUR QUARTS Sold at QUART OR PINT RATES.

SEEDS BY WEIGHT. We supply HALF FOUND and over at POUND RATES; less than HALF POUND lots are charged at OUNCE, TWO-OUNCE OF QUARTER-POUND RATES; 25 LES. and over at 100 LE. RATES WHEN QUOTED.

**BAGS.** To every order for one-quarter bushel and upwards, to the amount of two bushels, 25 CENTS must be added for a new bag in which to ship.

SEEDS IN PACKETS. We offer the following induce-SEEDS IN PACKETS. We offer the following induce-ments to those wishing to purchase seeds in packets: Select packets to the value of \$1.15 and send us \$1.00; for \$2.35 send \$2.00; for \$3.60 send \$3.00; for \$4.85 send \$4.00; for \$6.15 send \$5.00; for \$12.50 send \$10.00; for \$26.00 send \$20.00. The seeds will be sent by mail, postpaid, but these low rates apply to seeds in PACKETS ONLY and at CATALOGUE PRICES and NOT to seeds by weight or measure.

NAME AND ADDRESS SHOULD ALWAYS BE GIVEN. We frequently receive letters containing money and orders, which we cannot fill because the sender has FAILED TO SIGN Which we cannot in because the senter has FALLED to sight his NAME on THE P. O. ADDRESS is omitted and the post mark being blurred, we are unable to fill the order, no matter how much we desire to do so. Use our Order Sheet and Envelope whenever you can, filling out the blank and signing your name and you will have no cause to censure us.

**GUARANTEE**. Complaints made that seeds are not good, should quite as often be attributed to other causes as to the quality of the seeds. There are hundreds of contingencies continually arising to prevent the best seeds always giving satisfaction, such as sowing too deep, too shallow, in too wet or too dry soil; insects of all descriptions destroying the plants as soon as or before they appear; wet weather, cold weather, frosts, chemical changes in the seeds induced by temperature, etc. For the above reasons it is impracticable to quarantee seeds under all circumstances.

temperature, etc. For the above reasons its impracticate to guarantee seeds under all circumstances. We give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

## D. M. Ferry & Co.

DETROIT, MICH., January 1, 1909.

#### Carnation, Marguerite

This beautiful and very fragrant Carnation is of easiest culture and blooms the first year from seed. The type of flower and a few of its many attractive shades of color are shown on the (See page 71 for other colored plate opposite. varieties of Carnation) Pkt. 5c.

#### Cyclamen, Margaret

The Cyclamen has come into general favor with florists as a winter house plant owing to its splendid color and long duration of bloom After a careful greenhouse trial we have decided to offer in addition to the two mixtures of Cyclamen on page 75, "Margaret," a clear white, which in size of flower and freedom of blooming will give the very best satisfaction. Pkt. 25c.

## Hollyhock, Early Flowering

This splendid strain blooms readily the first year from seed, affording a wide range of colors in single or semi-double flowers of largest size. No better annuals for background can be so easily obtained. (See page 78 for list of Double Hollyhocks) Pkt. 15c.

## Nasturtium, Queen Wilhelmina

This scarlet flowered trailing variety is remarkable for its beautifully and veined with lighter green and white. Pkt. 10c. (Our list of both Dwarf and Trailing Nasturtiums on page 81 are very complete. The mixtures are unsurpassed in range and variety of colors)

## Salpiglossis, Large Flowering Mixed

This hybrid mixture is a notable improvement on the ordinary variety in that the plants are more compact in growth and the flowers are much larger in size and more richly colored and veined. One of our most easily grown annuals affording long stemmed flowers very desirable for cutting and in the most beautiful shades and markings. Pkt. 15c.

SALPIGLOSSIS. LARGE ELOWERING

This variety affords a magnificent profusion of large and brilliant scarlet flower spikes which come into bloom nearly two weeks earlier than most sorts and remain in fine condition until late in the fall. (See full description, page 87) Pkt. 15c.

## Stocks, Early Flowering Brompton

The old Brompton Stocks are highly prized in Europe but their use in this country is very limited, as is that of any biennial. The Early Flowering Brompton is an annual strain with the splendid foliage and bloom of the older type but coming into flower as early as the German Ten Weeks and decidedly superior in length of stem and size of flower spike. We offer several beautiful colors.

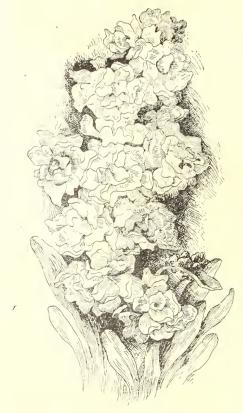

Belle of Naples, old rosePkt.	15c.
Camaldoli, dark violetPkt.	15c.
Snow White	
Vesuvius, dark blood-redPkt.	15c.
Mixed, the above named varietiesPkt.	15c.

A most easily grown annual of just the right size of flower and length of stem for cutting purposes. The brilliantly contrasting golden yellow petals and black centers are very effective. (*See colored plate, page 65 and full description page 88*) Pkt. 5c.

Sweet Peas We believe that the Sweet Peas we offer on pages 89 and 90 will be found exceptionally satisfactory. A bewildering list of varieties is now offered in English and American catalogues. We procure for trial every promis-ing variety and aim to list the very choicest. Our cover designs this year include many of the large flowering Spencer and Unwin types.

#### Verbena, Defiance

We have carefully grown and selected for many years this most brilliant shade so rare and desirable in Verbenas. (See colored plate page 65 and other varieties offered on page 91) Pkt.10c.

STOCK, EARLY FLOWERING BROMPTON

# CARNATION MARGUERITE

3

BLOOMS FREELY THE FIRST YEAR FROM SEED, VERY FRAGRANT.

PACKET 5c. (SEE PAGE 71)

#### Michigan White Wax Bean

We introduced this sterling variety in 1907 and already it is generally recognized as a bean possessed of exceptionally valuable features. Briefly described it is a white seeded Golden Wax; pods golden yellow and are fully as attractive as our well known Golden Wax and of the same exceptionally fine quality; vine is vigorous and unusually productive; seed white, a most valuable feature heretofore unattained in a bush bean of highest quality. (*See further description, page 12*) Pkt. 10c; Pt. 35c; Qt. 60c; 4 Qts. \$2.00; Bu. \$12.00

#### Ideal Pole Lima Bean

In our trials we have found this the largest podded most productive Lima bean yet introduced. Pods average eight inches long and are filled with five to seven large, tender and richly flavored beans (*See cut and further description*, *page 17*) Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

#### Detroit Dark Red Turnip Beet

Universally recognized as the best beet for the market, the home garden and for canning. The most uniform in shape and size, the most attractive in color and unsurpassed in quality. (*See colored plate, page 19 and full description opposile*) Pkt. 5c; Oz. 10c; 2 Oz. 15c; <sup>1</sup>/<sub>4</sub> Lb. 25c; Lb. 80c.

#### Early Snowball Cauliflower

Our thorough inspection the past season of the fields of the most expert Danish and other European growers of cauliflower has convinced us that the strain of Early Snowball we

f Early Snowball we offer is absolutely true to type and immeasurably superior to a great many stocks offered as genuine Snowball. The strain we offer is in type of plant, earliness of maturing and quality of

Columbia Celery maturing and quality of the curd the very choicest stock grown. With the utmost conditence and satisfaction we offer our Early Snowball to the critical American grower. (See colored plate opposite. Further description on page 25) Pkt. 25c; <sup>1</sup>/<sub>4</sub> Oz. 75c; Oz. \$2.50; 2 Oz. \$4.75; <sup>1</sup>/<sub>4</sub> Lb. \$9.00

#### **Columbia Celery**

This superb variety introduced by us in 1906 is now recognized as a celery of exceptional value. The excellent form of plant and stalk, its hardiness and vigor of growth, fine color and exceptionally fine quality, are features which combine in making this variety of first rank in the early market. (See further description on page 26) Pkt. 5c; Oz. 60c; 2 Oz. \$1.00;  $\frac{1}{2}$  Lb. \$1.75; Lb. \$6.00

#### Golden Bantam Corn

This very early, yellow grained sweet corn is very tender and of excellent quality. The stock we offer has been carefully grown and selected. (*See further description and cut, page 28*) Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

## D. M. Ferry & Co's Improved Large Purple Egg Plant

We have yet to find an Egg Plant that will produce as large, finely shaped and richly colored fruits as our Improved Large Purple. Some earlier strains have been offered under various names, but we have found none to equal this stock in which is highly developed the valuable combination of large size, dark color and great productiveness. (*See colored plate opposite*. *Further description*, *page 72*) Pkt. 5c; Oz. 50c; 2 Oz. 85c;  $\frac{1}{2}$  Lb. \$1.50; Lb. \$5.00

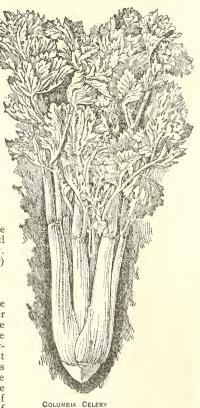

## Early Scarlet Turnip White Tipped Radish

The stock we offer is exceptionally attractive in its splendid coloring. The scarlet is unusually deep and affords a very distinct and pleasing contrast with the large clear white tip. (See colored plate opposite. Further description on page 49) Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 80c.

If corn or beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

MICHIGAN WHITE WAX BEAN

D.M.FERRY&CO'S IMPROVED LARGE PURPLE SPINELESS EGG PLANT. (See Page 32)

5

EARLY SNOWBALL CAULIFLOWER.

(See Page 25)

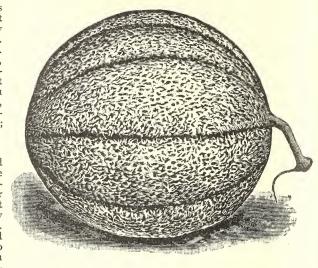

EARLY SCARLET TURNIP WHITE TIPPED RADISH. (See Page 49)

### Hoodoo Musk Melon

A new orange fleshed variety, ideal as a shipping melon and of the very finest quality. Vine vigorous, remarkably blight resisting and very productive. Fruits of medium and very uniform size. Netting exceptionally fine and dense, extending practically over the entire surface. Rind thin yet very firm so that the melons arrive in perfect condition in distant markets. Flesh very thick, firm, highly colored, of fine texture and delicions flavor. (See cut) Pkt. 10c; Oz. 35c; 2 Oz. 60c;  $\frac{1}{2}$  Lb. \$1.00; Lb. \$3.50

## Defender Musk Melon

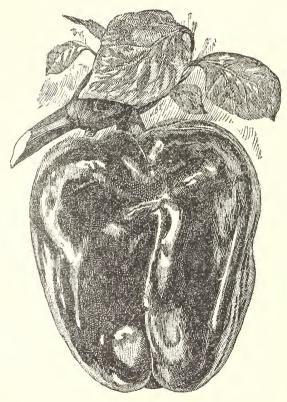

This splendid variety, originated and introduced by us in 1901, is one of the very best orange fleshed sorts for shipping and is considered by many far superior to any of this class. The fruit is of medium size, oval in shape, slightly ribbed and covered with gray netting. The flesh is exceptionally fine grained and highly flavored. We believe it to be unsurpassed in quality. Also known as Burrell's Gem. (See further description on page 37) Pkt. 5c; Oz. 20c; 2 Oz. 35c;  $\frac{1}{24}$  Lb. 60c; Lb. \$2.00

HOODOO MUSK MELON

## Extra Early Osage Musk Melon

Fully a week earlier than the old and well known Osage, a most valuable consideration, especially in the north. Fruits slightly smaller than those of the Osage but more even in size, more nearly round and the netting extends over more of the surface. These very desirable features combined with the thick, deep salmon colored flesh, delicious flavor and small seed cavity of the Osage, make this melon deserving of a place in every home and market garden. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

GIANT CRIMSON PEPPER

#### **Onion Seed**

No vegetable is harder to keep true than the Onion. Not only are there the ordinary dangers from crossing but if all conditions are not ideal scallions or plants without true bulbs are very likely to be formed. Moreover, good color and shape are never attained without many seasons of the most painstaking selection; otherwise the shade in the case of reds and yellows is weak and pale making the Onions much less attractive in the market. We have been breeding Onions for half a century and the results are all that the most exacting expert could desire. The major portion of our supply this year was produced from bulbs carefully selected from 32,000 bushels raised at Oakview in 1907 from stocks representing the offspring of numberless generations each the best of its time and kind. In uniformity and excellence of color and shape and in evenness of maturing there are few Onions in the world equal to those grown from our seed. There is none better.

#### Giant Crimson Pepper

The earliest maturing of the very large sweet peppers and surpassed by none in evenness of size and shape. The plant is vigorous and upright growing, larger than that of Chinese Giant and more productive. The very desirable shape of the fruit is shown by the cut on this page. The fruits ripen earlier than any of the very large sorts on the market and average heavier, as the flesh is unusually thick. Color deep crimson when matured; flavor very mild. Pkt. 5c; Oz. 75c; 2 Oz. \$1.25; ½ Lb. \$2.25; Lb. \$7.00

## Sutton's Excelsior Pea

This handsome, new, early wrinkled pea is the largest podded of any dwarf variety on our list. It is also the most vigorous in growth of vine and is unsurpassed in quality. The pods mature very nearly as early as those of Nott's Excelsior but are broader and with the foliage distinctly lighter green in color. We believe Sutton's Excelsior will soon be recognized as one of the most valuable dwarf sorts yet introduced. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

ALDERMAN

SUTTON'S EXCELSION

7

## Alderman Pea

This comparatively new pea is in many respects the very best early main crop variety of the valuable Telephone type. The vines grow nearly five feet high, are dark green, vigorous and exceedingly productive. Pods very large, long, dark green, similar to Duke of Albany and about the same in season. The peas are of largest size and unsurpassed in quality. Market gardeners are demanding the large podded, dark colored sorts which retain their fine appearance even after shipping a long distance. The Alderman answers these requirements and furthermore is the most productive variety of this class. We recommend it unreservedly. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

#### Early Detroit Tomato

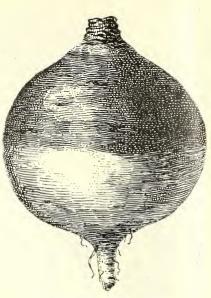

There has been considerable demand in recent years for a tomato similar to Beauty but earlier maturing. We have had in trial each year many tomato novelties for which much has been claimed but in several important particulars none has equalled the Early Detroit. The vine is more vigorous than that of Acme or Essex Hybrid and is more productive. Not only are more fruits produced but they average more nearly globe shaped, are heavier and are equally as firm, smooth and suitable for shipping. The fruits are of good size throughout the season, which is unusually long for so early a variety. We are confident that this rare combination of very desirable features will soon bring Early Detroit into general prominence as the best tomato of its class. Pkt. 10c; Oz. 75c; 2 Oz. \$1.25; ¼ Lb. \$2.25; Lb. \$8.00

#### Universal, or Canadian Gem Swede

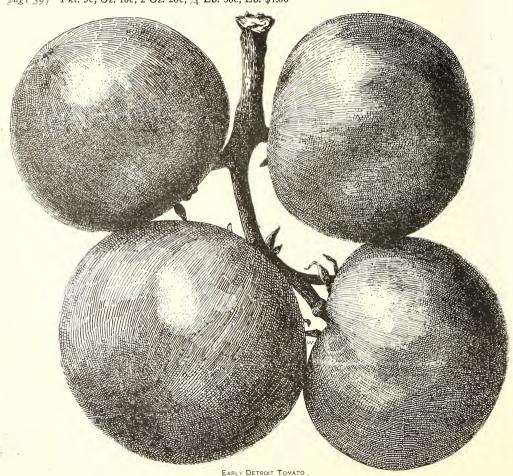

A handsome new variety, excellent for table use and already becoming very popular in Canada for shipping purposes. Roots purple above ground, yellow beneath, very small in neck and top, flesh yellow and of excellent quality. The variety is drought and mildew resisting to a remarkable degree. (*See cut*) Pkt. 5c; Oz. 10c; 2 Oz. 15c;  $\frac{1}{4}$  Lb. 20c; Lb. 60c.

## Chilian Water Melon

There is already a great demand for this melon on the Pacific coast and after careful trials we predict that its handsome appearance and splendid quality will make its ase general throughout the country. (See colored plate, page 39) Pkt. 5c; Oz. 10c; 2 Oz. 20c;  $\frac{1}{4}$  Lb. 30c; Lb. \$1.00

UNIVERSAL, OR CANADIAN GEM SWEDE

# BEAUTIFUL FLOWERS

**Good Soil** A rich, sandy loam is the best, but a fair desoil which can be made rich and friable. Vegetables of the best quality cannot be grown on barren sand, a cold, hard, lumpy clay, nor in the shade of orchard or other trees.

Tumpy clay, nor in the shade of orchard or other trees.
Liberal Manuring Asoli which does not need enriching in order to produce the best results is rarely found and very often success is in proportion to the liberality with which fertilizers have been used is the best; manure where straw bedding has been used is the best; manure where straw bedding has been used for bedding is not so good. Often wood ashes at the off preat benefit. Commercial fertilizers are excellent and may be used at the rate of 4 to 12 pounds to the square rod will be of great benefit. Commercial fertilizers are excellent and may be used at the rate of 4 to 12 pounds to the square rod will be of six pounds to the rod. A mass or lump of any of the commercial fertilizers, even if it is but a quarter of an inch in diameter, is liable to kill any seed or young plant which fertilizers be used that they be thoroughly pulverized and mixed with the soil.

mixed with the soil. Thorough Preparation uring will avail little without thorough preparation. The soil must be made friable by thorough and judicious working; if this is well done all that follows will be easy; if it is neglected, caly partial success is possible and that at the cost of a great deal of hard work. The garden should be well plowed or dug to a good depth, taking care, if it is a clay soil, that the work is not done when it is too wet. If a handful from the furrow moulds with slight pressure into a ball which cannot be easily crumbled into fine earth again, the soil is too wet and if stirred then will be hard to work 'all summer. The surface should be made as fine and smooth as possible with the harrow or rake. It is generally desirable to plow the whole garden at once and to do this in time for the earliest crops but the part which is not planted for some weeks should be kept mellow by frequent cultivation.

Good Seeds Properly Planted A seed consists of a minute plant enclosed in a hard and more

or less impervious shell with a sufficient amount of food stowed in or around the germ to sustain it until it can expand its leaves, form roots and provide for itself. Moisture, heat and a certain amount of air are necessary to secure germination. The first steps are the softening of the hard, outer shell and the leaves of the plant from the absorption of water, resulting in the changing of the plant food from the form of starch to that of sugar. In the form of starch the food is easily preserved unchanged, but the plant cannot use it. While in its sugary condition it is easily appropriated but perishable and if not used it speedly decays and the plant is destroyed. A dry seed may retain its vitality and remain unchanged for years, but after germination has commenced a check of a day or two in the process may be fatal. There is no time in the life of a plant when it is so susceptible of injury from the over abundance or want of sufficient heat and moisture as at the period between the from the leaves. It is just then that the gardener should aid in securing favorable conditions. These are:

**FIRST**—A proper and constant degree of moisture. The soil should always be moist, never wet. This is secured by making the surface of freshly dug soil so fine and the pressing it over the seed so firmly with a roller or the back of the hoe that the degree of moisture remains as nearly uniform as possible.

**SECOND**—A proper degree of heat, secured by sowing the seed when the temperature of the soil is that most favorable to the germination of the seed of that particular plant. Too high a temperature is often as detrimental as one too low. The proper temperature for each sort may be learned from a careful study of the following pages and the experience of the most successful gardeners. In your vicinity.

THIRD—Covering the seed to such a depth that while a uniform degree of heat and moisture is preserved the necessary air can readily reach the germinating seed and the tinv stem push the forming leaves into the light and air. This depth will vary with different seeds and conditions of the soil and can be learned only from practical experience. In general, seeds of the size of the turnip should not be covered with more than half an inch of earth pressed down, while corn may be an inch, beans an inch to two inches and peas one to three inches deep. **FOURTH**—Such a condition of soil that the ascending stem can easily penetrate it and the young roots speedily find suitable food. We can usually secure this by thorough preparation of the ground and taking care never to sow fine seeds when the ground is wet. Occasionally a heavy or long continued rain followed by a bright sun will so bake and crust the surface that it is impossible for the young plant to find its way through it, or a few days of strong wind will so dry the surface that the young plants will be killed. In such cases the only remedy is to plant again.

surface that the young plants will be killed. In such cases the only remedy is to plant again. Judicious Cultivation Not only should every weed be removed as soon as it appears, but the crust which forms after a rain should be broken up and the ground stirred as soon as it is dry enough to permit it. The more frequently and deeply the soil is stirred while the plants are young, the better, but as they develop and the roots occupy the ground, cultivation should be shallower until it becomes a mere stirring of the surface. The yield and quality of vegetables have often been decidedly lowered by injudiciously deep and close cultivation after the roots of the plants had fully occupied the ground. A very small garden, well cultivated and cared for, will give larger returns and be in every way more satisfactory than a much larger one poorly prepared and neglected.

## HOW TO BUILD AND MANAGE HOTBEDS

For early vegetables, some provision for starting certain plants earlier than can be done in the open air is desirable: for this purpose nothing is better than a good hotbed and its construction is so simple and the expense so slight that every garden should have one. A hotbed proper not only protects the plants from the cold, but supplies bottom heat. By this term the gardener means that the soil is constantly kept several degrees warmer than the air above, that being the condition, so far as heat is concerned, which is most the condition, so far as heat is concerned, which is most favorable for rapid and vigorous growth and gardeners usually secure it by making a compact pile of some fer-menting material and covering it with the earth in which the plants are to grow.

the plants are to grow. Heating Material is easily available is fresh horse manure, containing a liberal quantity of straw bedding. Such manure, if thrown into a loose pile, will heat violently and unevenly and will soon become cold. What is wanted in the hotbed is a steady and moderate but lasting heat. To secure this, the manure should be forked over, shaken apart and if dry, watered and allowed to stand a few days and then be forked over again, piled and allowed to heat a second time, the object being to get the whole mass into a uniform degree of fermentation and as soon as this is accomplished it is fit for use accomplished it is fit for use.

Sash Some gardeners use sash made especially for hot-beds and glazed with small lights cut from odds and **Dash** beds and glazed with small lights cit froni odds and ends and so furnished at very low rates. Such sash can usually be procurel in any of our large cities and costs much less than if male to order. For garden use, however, we much prefer a smaller sash that can be easily handled and the use of larger an l better glass. We recommend that for home gardens the sash be about two and one-half by four or five feet and that the glass be not less than 10x14, laid with not more than one quarter inch lap. In giving the order to one unaccustomed to the work, it would be well to state what they are to be used for and that they need to be made like skvlight sash. made like skylight sash.

**The Frame** This may be made of sound one-inch lumber, the back twelve to fourteen inches high, the front ten to twelve. It should be well fitted to the sash so as to leave as little opening as possible and yet allow the sash to be easily moved up and down, even when the frame is quite wet.

The Soil This should be light, rich, friable. Any con Siderable amount of clay in it is very objec-tionable. If possible, it should be unfrozen when put into the bed; for this reason it is much better to prepare it the fall before and cover the pile with enough coarse manure or straw to keep out the frost.

Making the Bed This requires careful attention, as future success depends largely upon the manner in which this work is done. Having cleared away snow and ice, build a rectangular bed one foot larger each way than the frame to be used, carefully shaking out and spreading each forkful an I repeatedly treading down the manner up to make the had as uniform to regular be done in the state of the state of the state. and spreading each forkful an I repeatedly treading down the manure so as to make the bed as uniform as possible in solid-ity, composition and moisture. It is of the utmost impor-tance that this shaking apart and evenly pressing down of the manure should be carefully and thoroughly done; unless it is, one portion will heat quicker than the other and the soil will settle unevenly, making it impossible to raise good plants. The proper depth of the bed will vary with the cli-mate, season and the kind of plants to be raised. A shallow bed will quickly give a high temperature which will soon bed will quickly give a high temperature which will soon subside; a deeper one, if well made, will heat more moder-ately, but continue much longer. For general purposes, a

subside; a deeper one, if well made, will heat more moder-ately, but continue much longer. For general purposes, a bed about two feet deep will be best. The bed completed, the frame and sash may be put on and fresh manure carefully packed around the outside to the very top (if the weather is at all severe, this outside banking should be replenished as it settles). The bed should then be allowed to stand with the sash partially open for a day or two to allow the steam and rank heat to pass off. The earth should then be evenly distributed over the surface of the bed and carefully leveled. The earth should not be shoveled or dumped in one or more places in the bed and then leveled: if this is, done uneven settling of the hed in. then leveled; if this is done uneven settling of the bed in-variably results. Care should be taken that the soil is dry and friable. If we for frozen soil rust be used, it should be placed in small piles until well dried out before spreading. The heat at first will be quite violent, frequently rising to and friable.

**Management of the Bed** The essentials for success are a steady uniform degree of heat and moisture: keeping the soil at all times a few degrees warmer than the air and the careful "hardening off" (by exposure to the air and diminishing the supply of water) of the plants before transplanting into the open air. Simple as these may seem to be, there are many difficulties in the way of securing them, prominent among which is overheating the air under a bright sun. Without experience one would scarcely believe how quickly the tem-perature inside of a well built hotbed will rise to 90 or 100 degrees upon a still, sunny day, even when the temperature degrees upon a still, sunny day, even when the temperature outside is far below freezing, or how quickly the tempera-ture will fail to that outside, if upon a windy, cloudy day ture will fail to that outside, if upon a windy, cloudy day the sash is left open ever so little. A rush of cold air driven over the plants is far more injurious than the same tempera-ture when the air is still. Again, in cloudy weather, a bed will go several days without watering, but will dry up in an hour when open on a sunny day. The details of manage-ment, however, must be learned by experience, but may be easily acquired by one who gives the matter careful attention, keeping constantly in mind the essentials given above.

is a simple construction of boards A Cold Frame is a simple construction of boards. Cabbage, Lettuce, Caulifower, etc. and is also useful to protect and harden off plants from the greenhouse or hot-

Cabbage, Lettuce, Cauliflower, etc. and is also used to protect and harden off plants from the greenhouse or hot-bed before fully exposing them in the open air. Select a dry, southern exposure, form a frame from four to six feet wide and as long as required. The back should be fourteen to eighteen inches high and the front eight to twelve, with a cross-tie every three feet. The frame may be covered with sash or cloth. Seeds of the vegetables to be wintered, sown in open Lorder early in September, will be ready to plant in cold frames about the last of October. The soil should be well prepared and smoothly raked before planting. Admit air freely on pleasant days, but keep close in severe weather. These frames are particularly useful in the south and may be covered more cheaply with cloth shades than by sash. The shades are made as follows: Make light but strong wooden frames to fit over the bed and of a width to receive some common brand of cotto cloth. The cloth

strong wooden frames to fit over the bed and of a width to receive some common brand of cotton cloth. The cloth may be unbleached and should be stretched over and securely tacked to the frames. We have found that Plant Bed Cloth which we have for sale, is superior to any ordi-nary cloth for this purpose.

**Transplanting** In transplanting, the main points to be regarded are: care in taking up the plants so as to avoid injury to the roots, setting ont as soon as possible to prevent the air coming in contact with the soon as possible to prevent the air coming in contact with the roots, setting firmly so as to enable the plant to take a secure hold of the soil and shading to prevent the hot sun from withering and blighting the leaves. Where a rank or soft growth of tops has been made in hotbed it is frequently desirable to true of some of the larger leaves before taking desirable to trim off some of the larger leaves before taking up to transplant so that evaporation later may be retarded. In transplanting from a hotbed, harden the plants by let-ting them get quite dry a day or two before, but give an abundance of water a few hours before they are taken out. It is most apt to be successful if done just at evening, or immediately before or during the first part of a rain, about the worst time being just after a rain, when the ground being wet it is impossible to sufficiently press it about the plant without its baking hard. If water is used at all it should be used freely and the wet surface immediately covered with dry soil.

Watering The best time to water plants is early in the morning or in the evening. Water may be given to the roots at any time, but should never be sprinkled over the leaves while they are exposed to bright sunshine. If watering a plant has been commenced, continue to supply the ait is readed on more pinyur then good will result from It watering a planchas been commenced, continue suppry-it as it is needed, or more injury than good will result from what has been given. One copious watering is better than many scanty sprinklings. The ground should always be stirred with a hoe or rake before it becomes so very dry as to cake or crack.

## D. M. FERRY & CO'S DESCRIPTIVE CATALOGUE

**VEGETABLE SEEDS** WITH GENERAL DIRECTIONS FOR CULTIVATION

ARTICHOSE The plant is very different from what is known in America as Artichoke or Jerusalem Artichoke, in which the edible portion is the tuber. Late in the fall cut off the old tops and thoroughly protect the crowns with leaves or straw to the ground in July, the rapidly growing shoots which then start up may be tied and blanched like celery. As Artichoke the start for general use, Buds large, nearly round: scales pale green, shading to violet at the base, thick and feshy. Pkt. 5c; 0z. 40c; 2 0z. 75c; 4 Lb.\$1.25; Lb.\$4.00

**Large Globe, or Paris** violet at the base, thick and fleshy. Pkt. 5c; 0z. 40c; 2 0z. 73c; <sup>1</sup>/<sub>4</sub> Lb.<sup>§</sup>1.25; Lb.<sup>§</sup>4.00 **ASPARAGUS** Beds are usually formed by setting roots one or two years old which can be procured of us. If you wish to grow plants from the seed yourself, pour hot but not boiling water on the seed and let stand until cool; pour it off and repeat two or three times with fresh about one inch apart and give frequent and thorough cultivation during the summer. If this has been well done, the plants will be fit to set the next spring. The permanent beds should be prepared by deep plowing or spading and thoroughly enriching the ground with stable manure or other fertilizer; a moist, sandy soil is best. If the subsoil is not naturally losse and friable, it should be made so by thoroughly stirring with a subsoil plow or spade. Set the plants about four inches deep and one to two feet apart in rows four to six feet apart. After the plants are well at the plant frequent and double the quantity of fresh wood ashes to each square rod and cultivate well as long as the size of the plants will permit, or until they begin to die down. The next season the bed may be cut over two or three times, but if this is done, all the shoots, no matter how small, should be cut. After the final cutting, give a good dressing of manure, ashes and salt. Cultivate frequently until the plants meet in the rows. In autumn after the tops are fully ripe and yellow, they should be cut and burned. A bed 15x50 feet, requiring about one hundred plants, if well cultivated and manured, should give the following season an abundant supply for an ordinary family and continue productive for eight or the years.

A very early maturing and prolife variety, producing an abundance of very large, deep green shoots of Palmetto the finest quality. SEED-Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c. Conover's Colossal A mammoth, green sort of the largest size and of good quality. One of the best known and most generally cultivated varieties. SEED-Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c. ROOTS-Postpaid, \$1.50 per 100; by freight or express, not prepaid, \$1.00 per 100; \$6.00 per 1000 Cartambian Mammoth White Introduced by us in 1898. Shoots of largest size and clear white until four to six inches above the surface. Nearly all seedlings will produce clear white

shoots and the green ones can be readily re-jected when setting out jected when setting out the permanent bed. SEED-Pkt.5c; 02.10c; 2 0z. 15c; ½ Lb. 25c; Lb. 75c. RO OT S-Postpaid, \$1.50 per 100; by freight or express, not pre paid, \$1.00 per 100; \$6.50 per 1000

BEANS

No crop responds more readily to good soil and cultivation:

No crop responds more readily to good soil and cultivation; and a light, rich, well drained loam which was manured for the previous crop is most desirable. If too rank manure is used it is apt to make the plant run too much to vine. Beans are very sensitive to both cold and wet and it is useless to plant them before the ground has become dry and warm. The largest return will result from planting in drills from two to three feet apart and leaving the plants two to six inches apart in the row. Up to the time of blossoming they should have frequent shallow cultivation, but any mutilation of the roots by culti-vation after the plants come into bloom is likely to cultivation, but any mutilation of the roots by culti-vation after the plants come into bloom is likely to cause the blossoms to blast and so cut off the crop. The cultivation of beans should always be very shallow and it is useless to expect a crop from a field so poorly prepared as to need deep stirring after planting.

after planting. Varieties should be selected so as to give a suc-cession both of string and green shelled beans. The wax varieties will degenerate into a mixture of green and wax podded plants unless there is constant attention given to the removing of any green podded plants which may appear in the seed crop. Hence it is very important to use seed from reliable sources only.

## DWARF, BUSH OR SNAP WAX PODDED SORTS

Under this name are classed all the low growing orts called in different localities Bush, Bunch, Snap, String or Dwarf Beans. We give careful attention to selecting and improving the different varieties and keeping them pure and invite the most critical comparison of our stocks with those of any other sorts called stocks with those of any other grower.

Challenge Dwarf Black Wax Continued experience has satisfied us of the great merit of this variety as the earliest wax podded bean. The enormous demand for it proves that it meets popular requirements and has all the sterling qualities we claim for it. In all our many comparisons of this bean with other extra early sorts, we have found it the first to give a full picking of pods which were unexcelled by any in quality. The pods are clear waxy-white, quite round, very fleshy, crisp, tender and stringless. Seed jet black, longer and more curved than Prolific German Wax. The best extra early wax bean for the home or market garden. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

CHALLENGE DWARE BLACK WAX

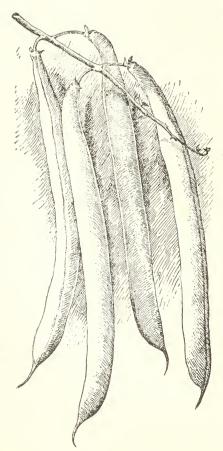

If beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

## BEANS-DWARF, BUSH OR SNAP WAX PODDED SORTS-Continued

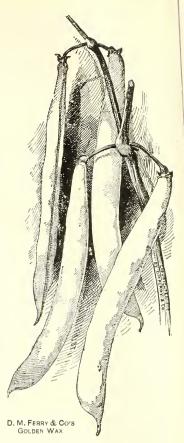

D. M. Ferry & Co's Golden Wax This bean was introduced careful tests have convinced us that none of the so called improved strains is equal in general excellence to the seed we offer, which has all been carefully selected and grown from the original D. M. Ferry & Co's Golden Wax. Early, very productive; pods long, nearly straight, broad, flat, golden vellow, very fleshy and wax-like; cooking quickly as snaps, shelling well when green, and of the highest quality used in either way. Seed medium sized, oval, white, more or less covered with two shades of purplish red. The amount and shade of color on this and all partic-colored beans will be affected greatly by conditions of soil and ripening. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

4 Qts. \$1.25; Bu. \$6.50 Michigan White Wax This new wax bean has proved of exceptional demand for a white seeded wax bean of the highest quality. At last we were able to produce it. Briefly described Michigan White Wax is a white seeded D. M. Ferry & Co's Golden Wax but in several vital features it is distinctly superior to that excellent and exceedingly popular variety. The vine is a little larger, more robust and vigorous: follage a little hearier. The handsome pods are produced in greater abundance and are very uniform in size and color which is a very attractive light golden yellow; pods comparatively broad, meaty and of the same superior quality as our Golden Wax. The seed is clear white. This feature alone gives the variety a very decided advant uge over all other early wax podded beans in that as snaps they cow without discoloring and thus are more attractive on the table, while as dry beans they are very handsome and quite as useful as any of the staple white beans. We believe canners have never been offered a bean so fully meeting their requirements as to earliness, color and splendid quality. (See cut in Supplement, page 4) Pkt. 10c; Pt. 35c; Qt. 60c; 4 Qts. \$2.00; Bu. \$12.00

Grenell Rust Proof Wax Vine a little more upright and hardier broader and flatter but slightly inferior in quality. Seed in color and size similar to our Golden Wax but darker. A very popular sort with some gardeners. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

Keeney's Rustless Golden Wax Early in the season this seems to be a pole bean but the runners are short and soon become self-supporting. The pods, which are produced in abundance, are stringless, white, wax-like and handsome. Seed similar to a light colored Golden Wax. Pkt. 10c; Pt.20c; Qt.30c; 4 Qts. \$1.00; Bu. \$6.00

Refugee Wax The stock of our own growing which we offer is much superior to that commonly sold, being very early. Every plant can be depended upon to produce thick, fleshy, wax-like pods of fine quality and of a clear, creamy white color, none of the plants being green podded. Seed yellowish drab, heavily splashed with a bluish black. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

- D. M. Ferry & Co's Detroit Wax Vines very hardy, productive and erect growing. Pods straight, broad and flat, and as nearly rust proof as any wax bean. Seed white with more or less irregular dark brown or black markings about the eye. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00
- Prolific German Wax, Black Seeded This variety of the old black wax or butter bean and is much better in every respect. Vines medium sized, very vigorous and hardy. Pods medium length, borne well up from the ground, curred. cyliadrical, fleshy and of a clear, creamy white color and remain a long time in condition for use as snaps. Seed small, oblong, jet black. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50
- Pencil Pod Wax This comparatively new wax podded bean is particularly handsome, also medium early. hardy and very prolific. Pods are long, straight, round, fleshy and of a bright yellow color; tender, absolutely stringless and of excellent quality, they are produced during a long season. Seed long, round, rather small; color black. Pkt 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

Round Pod Kidney Wax Some and very desirable, especially for the home garden. Vine dwarf, spreading and very productive. Pods are long. slightly curved, very white and wax-like, stringless and of the best quality. They are uniformly perfect, an ill shaped one being rarely seen. Seed long, cylindrical, nearly white with a little dark marking about the eye. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6,50

If Beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

ROUND POD KIDNEY WAX

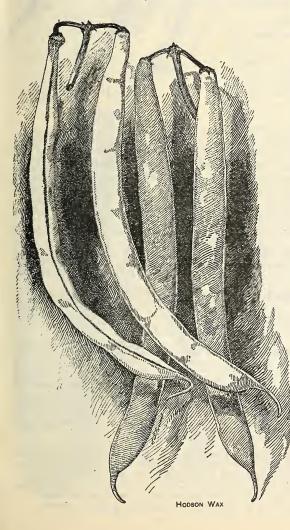

## BEANS-DWARF, BUSH or SNAP WAX PODDED SORTS-Continued

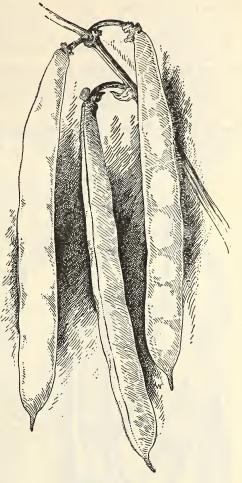

Currie's Rust Proof Wax rust proof and we have found it like the betroit Wax, as nearly rust proof as any good wax podded bean can be. Vine very vigorous, harly and productive. Seed kidney shaped, purplish black. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

**But. \$6.00** Wardwell's Kidney Wax Golden Wax, yields a large crop of long, nearly straight, broad, creamy white, handsome pods. These are of good quality and always command a ready sale, making the variety one of the most profitable for the market gardener. Seed large, kidney shaped, white with dark markings about the eye. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

Davis Wax The most hardy and productive wax podded bush bean in cultivation. Vine rustless and very vigorous. The pods are invariably long, white, straight and handsome and when young are crisp and tender. Seed kidney shaped, clear white and excellent for baking. One of the best for shipping as snap beans and of the greatest value as a market variety. The length, uniformly perfect shape and fine color of the pods and the clear white seed make it desirable for canners' use. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$5,50

Scarlet Flageolet Wax Especially well in the south and is a favorite with many truck farmers. The vines are large, strong growing, erect and produce very long, flat, rather coarse, but beautiful wax-fike pods which, though often curved and twisted, are always handsome. Seed large flat, red. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts.\$1.00; Bu.\$6.00

WARDWELL'S KIDNEY WAX

- Violet Flageolet Wax Known also as Perfection Wax. Pods wery large, a little longer and more twisted than those of the Scarlet Flageolet Wax. When well grown it is one of the most showy of wax beans. Seed large, dark violet. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00
- Hodson Wax The most vigorous of any dwarf and the yield of large, handsome pods is enormous. Its dense foliage so completely protects the pods that their color is an unusually clear creamy white. Pods very long, straight or slightly curved, flat but fleshy, quite stringless and of very good quality. While late in maturing the remarkable vigor of the plant is an effectual safeguard against blight and other bean diseases. Seed long, cylindrical, uniform in shape; color light yellowish brown heavily splashed with dull crimson. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00
- Crystal White Wax Distinct but not strictly a wax bean. Vines white, short, curred, round or thicker than wide, with crease in the back; very fleshy and brittle. Very desirable for pickles. Seed small, oval, white. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

If Beans are ordered by mail or express prepaid, add 10 cents per pint, 15 cents per quart, for charges.

## BEANS-DWARF, BUSH OR SNAP **GREEN PODDED SORTS**

**Extra Early Refugee** An extremely early, green podded sort fur-nishing oval, fleshy pods of fine quality. Vines of the late Refugee; seed much the same in shape and color. Our stock is uniform, the vines ripening pods well together and long before those of the Refugee or Thousand to One. Seed long, drab, nearly covered with dark purple blotches. Pkt.10c; Pt.15c; Qt.23c; 4 Qts. 75c; Bu. \$1.75

Round Yellow Six Weeks, Improved Round Pod While this variety does not differ from the Early Yellow Kidney Six Weeks in size or general appearance of the vine, pods are shorter, much thicker, fleshier and mature fully one week earlier. Seed round, light yellow with slightly darker marking about the eye. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.75

Early Yellow Kidney Six Weeks branching, very pro-ductive, with large leaves; pods long, straight, flat, handsome and when young of good quality; seed long, kidney shaped, light yellow with darker marks about the eye. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Ots. 75c; Bu. 54.50 4 Qts. 75c; Bu. \$4.50

50
 Early Mohawk This sort is so much hardier than the others that it can be planted earlier and often will furnish beans fit for use before any other kind. Vines large, stout, with large coarse leaves; pods long, straight, coarse, flat, with long tapering points; seed long, kidney shaped, variegated with drab, purple and brown. Pkt. 10c; Pt.15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

Black hardy and Valentine protive green podded sort with strong, vigorous vine, a little more spreading and in season a little later than the Red Valentine; the

EXTRA EARLY ROUND POD RED VALENTINE

Red Valentine; the pods are much longer, straighter, less fit es hy and rather flat but very handsome. A large crop can be depended on and the product makes a very attractive appearance on the market. Seed black, oblong, slightly flattened. Pkt.10c; Pt.23c; Qt.40c; 4 Qts.\$1,50; Bu. \$7,50

slightly flattened. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50 Extra Early Round Pod Red Valentine For snaps there is nothing superior to this variety among the green podded sorts and many prefer it to the wax varieties. Vine erect, with dark green leaves; pods medium length, curved, cylindrical, with crease in back, very fleshy, crisp and tender; seed long, of medium size and unsym-metrical in shape, pink marbled with red. Lack of symmetry in the seed of this variety is an indication of superior fleshiness and good quality in the pods. We know of no stock of Red Valentine which can be compared with that we offer in uniformly high quality of pod. We have carefully tested both in trials and in large flelds many different strains of Valentine offered under slightly varying names, each claiming to be a great and distinct improvement and have found none that compared with our stock which combines in the highest degree all the good qualities of the sort. Pkt. 10c; Pt. 15c; Qt. 35c; 4 Qts. 75c. Bu. \$4.50

Longfellow A very productive, early, green podded bean. Pods round, about six inches long, medium light green in color; tender, of excellent quality and quite stringless when young. One of the most attractive market sorts. Seed of medium size, cylindrical in shape, pink marbled with purplish red. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c. Bu. \$4.00

Stringless Green Pod A most valuable addition to our green podded sorts. The vine is vigorous, spreading, and very productive. The pods are larger than those of the Red Valentine but are quite as feshy, of equally high quality and remain crisp and tender longer. They mature a little later; seed yellowish brown. Pkt. 10c; Pt. 20c; Qt.30c; 4 Qts.\$1.00; Bu.\$6.00

Giant Stringless Green Pod An exceedingly productive and very handsome sort. The pods mature a few days later than those of Stringless Green Pod, are a little longer and the quality is very good. Leaves small and light green. Seed long, slender, light yellowish brown. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$5.50

GIANT STRINGLESS GREEN POD very long, flat, irregular in shape, bright green and of most excellent quality. Seed of medium size, vine prolific, foliage dark green, with leaves large and crumpled; pods vine prolific, foliage dark green, with leaves large and crumpled; pods vine prolific, foliage dark green, with leaves large and crumpled; pods vine prolific, foliage dark green, with leaves large and crumpled; pods variety which is giving splendid satisfaction. Pkt. 10c; Pt. 25c; 0t. 40c; 4 Qts. \$1.50; Bu. \$7.50; Pt. 25c; Pt. 25c;

If beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

GIANT STRINGLESS GREEN POD

## BEANS-DWARF, BUSH OR SNAP GREEN PODDED SORTS-Continued

Dwarf Horticultural Vine very productive, compact, upright, with large leaves. Pods medium length, cylindrical, curved with splashes of bright red on a yellowish ground. They become fit for use as green shelled beans very early and in this condition the beans are very large, easily shelled and are about equal to the Lima in quality. Seed large, oval, plump, flesh colored and nearly covered with splashes of bright red. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

Improved Goddard flat, usually curved, green when young, but as they mature are splashed and striped with retimed with retimed with return longer and much larger. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

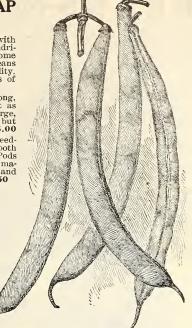

Refugee, or Thousand to One Vines large, spreading, exceedingly hardy, with small, smooth leaves; highly esteemed for late planting and for canning and pickling. Pods long, cylindrical, green becoming white, streaked with purple as they mature; of good quality as snaps. Seed long, light drab, thickly dotted and splashed with purple. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

The following four Bush or Snap sorts are also extensively planted as field beans.

Early Marrow Pea, or Dwarf White Navy A variety developed in western New York. Is a sure cropper and not only more prolific than the common white bean but also of better quality. Vine large, spreading, with small, thin leaves and occasional runners, ripening its crop early and all at once. Pods straight, short, small, but usually containing six beans; beans small, oval, white, handsome and of superior quality. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c. Bu. \$4.00

Vineless Marrow A splendid bean for field culture. Plant large, strong and vigorous, but compact and without runners, bearing its crop in the center and well up from the ground. The dry beans are very large, very white, cook quickly and are of exceptionally good quality. A wonderfully prolific and valuable sort. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.25

Large White Marrow, or Mountain large, slender, spreading, with short runners and small leaves; very prolific; pods broad, green, changing to yellow; seed large, ovoid, clear white, cooking very dry and mealy. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.25

REFUGEE, OR THOUSAND TO ONE

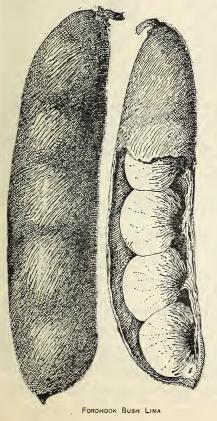

Royal Dwarf Kidney Plant upright, very large, branching, with large, dark green, coarse; seed large, white, kidney shaped, slightly flattened and of excellent quality, green or dry. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

## **DWARF LIMAS**

This comparatively new class of Limas cannot be recommended too highly. The beans can be grown and gathered much more easily than the pole Limas and are fully as good in quality. Every home garden should have at least one planting of them.

- Bush Lima, or Dwarf Sieva (HENDERSON'S) A dwarf form of the Small Lima, valuable on that account, and because of its extreme earliness. Vines are without runners, but continue to grow and set pods until stopped by frost. Leaves small and very dark green; borne in clusters and often above the foliage; pods short, flat and containing two to four beans which are of excellent quality either green shelled or dry. Seed small, flat and white. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50
- Wonder Bush Lima A fine new bean introduced by Dreer. Similar to Dwarf Large White Lima, but pods larger, borne more in the center of the vine and mature a little earlier. The vine also is less inclined to form an occasional runner and we think is more productive. Green beans, and the seeds like those of Dwarf Large White Lima. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu.\$8.00
- Dwarf Large White Lima A bush form of the true equally good quality. Plants uniformly dwarf, but enormously productive. Pods as large as those of the pole variety and contain from three to five very large, flat beans of the best quality. Seed of medium size, flat, white. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00
- Fordhook Bush Lima An improved dwarf Lima of the Kumerle type. The plant is vigorous and erect growing, bearing well above the ground. The pods are produced in large clusters, each containing three to five large beans of exceptionally fine quality. Much more productive than Kumerle and matures earlier. We consider this a decided acquisition to the dwarf Limas, possibly the best of the class, Pkt. 10c; Pt. 35c; Qt. 60c; 4 Qts. \$2.00; Bu.\$12.50
- Kumerle Bush Lima A dwarf form of the Challenger Lima, thick beans which have made the Challenger so popular. The plant, while fully as dwarf, is hardier and matures its crop earlier than the Dwarf Large White Lima. Many consider this sort the best of the Dwarf Limas. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

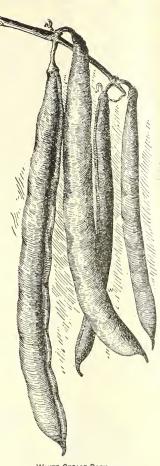

If beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

## **BEANS**-POLE, OR RUNNING

White Crease Back This variety is especially valuable for its ex-of its pods within a short time. Vines small to medium, but vigorous and in good soil wonderfully productive, bearing round, fleshy pods in clusters of from four to twelve. Pods medium length, silvery green, of the beat quality as snaps and stand shipping better than most sorts. The beans are too small to be of much value when shelled green, but are of very superior quality baked. Seed small, oval, white and very hard. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1,50; Bu. \$8.00

Kentucky Wonder This splen-did varlety, introduced by us in 1885, has since been offered as Seek-No-Further and was introduced in 1891 as a novelty under the name of Old Homestead. An early very prolific sort, with showy pods which are most ex-cellent for snaps. Vine vigo-rous, climbing well and very productive, bearing its pods in largeclusters; pods green; very long, often reaching nine or ten inches, nearly round and very crisp when young, becoming very in-regular and spongy as the beans ripen. Seed long, oval, dun colored. It is some-times catalogued as being the same as Southern Prothe same as Southern Pro-lific, but this is an error as the latter is two weeks later, has shorter pods and the seeds are smaller. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$8.50

WHITE CREASE BACK

Red Speckled Cut Short, or Corn Hill An old variety. the central and southern states for planting among orn and it will give a good crop without the use of poles. Vines medium sized, twining loosely with dark colored, smooth leaves; pods short, fleshy and of good quality. Seed nearly oblong, cut off diagonally at the ends, dull white, covered at one end and slightly over the whole surface with reddish brown dots. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

Dutch Case Knife Vines moderately vigorous, climbing well, but twining more loosely than some and so may be used for a corn hill bean. Leaves large, crumpled; pods very long, flat, irregular, green, but becoming creamy white as they mature. Seed broad, kidney shaped, flat, clear white and of excellent quality green or dry. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

Early Golden Cluster Wax beautiful sort. Vines large, strong growing, vigorous, hardy; leaves large, light green, crimped; pods six to eight inches long, borne in abundant clusters, each contain-ing from three to six pods varying in color from golden yellow to creamy white. Pods broad, thick and fleshy, deeply creased along the edge to which the beans are attached, of the very best quality and stay in con-dition for use a long time. Seed flattened, oval, dull white in color. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Golden Carmine Horticultural This new pole bean is strik-ingly handsome, especially as the golden yellow pods mature and take on brilliant splashes of bright carmine red. It is also early, very productive, and of excellent quality and as a wax podded snap, tender, brittle, stringless and finely flavored. Like other Horticultural beans, it is unsurpassed when shelled, either green or dry. Vine similar to Mammoth Podded Horti-cultural, leaf a little larger and foliage a bright yellowish green. The pods are six to eight inches long, straight and very broad. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

If beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

KENTUCKY WONDER

# BEANS-POLE, OR RUNNING-Continued

Mammoth Podded Horticultural Pole bods are striped and splashed with exceedingly brilliant crimson. The beans, when in condition for use, are of immense size, of the finest quality, and when fry are colored and marked in the same way as the pods. This variety has been sold under many names, such as Worcester, Hampden and Mugwump Pole, but a great deal of the stock offered has been impure, many plants being like London Horticultural. We have developed a stock which is pure as use to please all who plants being like London

London Horticultural, or vines moderately vigorous Speckled Cranberry leaves; pods short, broad, pale with bright red as they mature; beans large, orate, flesh colored, splashed and spotted with wine-red and of the highest quality, either green or dry. Many like this variety better than the Limas. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

- White Sickle Pole Similar to, but later maturing than beans are white, more slender and curved and the ods are a little more slender than those of that variety. We think this sort an improvement over the Kentucky Wonder in that it has the advantage of a white seed and so does not discolor in cooking. It is certainly a splendid variety and is grown with great success in the south, where many think it the best pole bean in cultivation. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00
- Lazy Wife One of the best of the later green podded pole clusters, are five to seven inches long, broad, thick, fleshy and entirely stringless. When young they have a rich, buttery flavor which is retained until they are nearly ripe. The dry beans are excellent for winter use. Seed white. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu.\$8.00

## POLE LIMAS

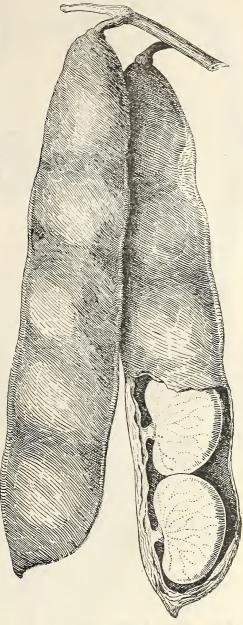

Seibert's Early Lima by better the development of this grand variety first introduced by us in 1995. It is the outcome of the labors of a skillful market gardener who selected for several years the largest green beans from the thinnest and most easily opened pods. In earliness, ease of shelling, size, beauty and quality of the green beans, this variety is far in advance of all other early Limas for either the garden or market. The vine is very productive and continues so from the very first to the last of the season; so that although the pods rarely contain more than four beans the total yield is enormous. The green shelled beans are of immense size, very tender and of finest quality. The beans shrink in drying so that the seed is about the size of the Large White Lima. Pkt, 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Small White Lima, short branches, so that they Carolina or Sieva are sometimes grown without poles; very early and productive, with small, smooth, dark green leaves; pods curved, short, flat; seed white, small and flat. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

Ideal Pole Lima The vine is unusually vigorous in growth and is very productive, bearing large clusters of broad pods each six to eight inches long, and containing four to six large beans of most excellent quality. While the variety matures a little later than Seibert's Early Lima, the pods are much larger and no Lima grown is more attractive in appearance. A splendid acquisition for market gardeners. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

King of the Garden Lima and productive. Pods very long, filled with four or five immense white beans of the finest quality. On account of its large pods it is a favorite with market gardeners. It will come into bearing sooner and will make larger pods if not more than two vines are left to grow on a pole. Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Large White Lima This bean is too late for the supplanted by Seibert's Early Lima, because the latter is earlier. Vine tall growing, vigorous, but slender; leaves medium sized, smooth, light green, pods borne in clusters, long, broad, very thin, dark green; seed large, ovoid, flat, greenish white. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu, \$7.00

IDEAL POLE LIMA

Challenger Lima The vines of this splendid sort are very stout, vigorous and proother Limas and contain from four to five beans which are large, thick, white and of the best quality. It is early and continues to produce large clusters of pods until cut off by frost. One of the most popular of the later varieties with the New York market gardeners. This is similar to, but a decided improvement on what is known as Dreer's Improved Lima. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

If beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

# BEET

The best results are obtained on a deep, rich, sandy loam. If wanted very early, sow such sorts as Crosby's Egyptian or Detroit Dark Red in hotbeds and transplant, cutting off the outer leaves. For general crop sow in freshly prepared soil as soon as the ground will permit, in rows eighteen inches apart covering about an inch deep and pressing the soil firmly over the seed. When the plants are well established thin out to four inches apart in the row. For winter use the turnip varieties may be sown in June so as to mature late in the season; the roots are stored in a cellar and covered with sand or sandy soil to prevent wilting; or they may be kept outdoors in pits such as are used for apples and potatoes. One or two ounces, or single packets of two or three sorts, will give a good supply for a large family.

CROSBY

EGYPTIA

Extra Early Egyptian Blood Turnip The best variety for forcing and excellent for first early cop out of doors, being very early, with small top. Leaf stem and veins dark red, leaf dark green, dotted with red, root very dark red, rounded on top but flat beneath, with very small tap root; flesh dark red, zoned with lighter shade; hard, crisp and tender when young. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

Crosby's Egyptian color which is very attractive not only in the beets as pulled, but after they have been cooked. They are also more spherical than the Extra Early Egyptian and we think of better quality. One of the best for early planting out of doors. It becomes fit for use sooner than any other variety but it is not as well suited as the Egyptian for forcing in hotbeds or for transplanting. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 80c.

Detroit Dark Red Turnip Long experience has shown this variety of our introduction to be for home use. It is also by far the best for canning, making a strikingly handsome product, much superior to that obtained from any other variety. Its small top, early maturing and the splendid shape and color of the cost deep red turnip beet, not only for market gardeners, but for home use. It is also by far the best for canning, making a strikingly handsome product, much superior to that obtained from any other variety. Its small top, early maturing and the splendid shape and color of the cost deep ther: leaf stem and veins dark red, blade green; root globular or ovoid and very smooth; color of skin dark blood red; flesh deep vermilion red, zoned with a darker shade, very crisp, tender and sweet and remaining so for a long time. We believe that the stock of this variety which we offer will produce a crop more uniform in shape, color and quality than any other beet seed obtainable. (See colored plate opposite) Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 25c; Lb. 80c.

- **Early Eclipse** Top of medium size. Root nearly globular, with a small tap and small collar. Flesh bright red, zoned with white, very sweet, crisp and tender, especially when young. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.
- Edmand's Early leaf stalks dark red; blade of leaf Blood Turnip bright green, with wavy edge; root ark red interior color purplish red, with little zoning; crisp. tender, sweet and an excellent keeper. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.
- Early Blood Turnip (Improved) An extra selected stock of Blood Turnip, having larger, coarser top and root than the Detroit Dark Red and requiring a considerably longer time to mature. Excellent for summer and autumn use. Pkt. 5c; 0z. 10c; 20z. 15c; 3 Lb, 20c; Lb. 70c.
- mature. Excellent for summer and autumn use. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 3 Lb. 20c: Lb. 70c. Bastian's Early Blood Turnip purplish pink; leaf bright green; root with medium sized tap, turnips haped, bright red. Flesh light purplish red. zoned with white; crisp, tender, very sweet and of good quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 20c; Lb. 65c.
- Dewing's Blood Turnip leaf green; root dark red, turnip shaped with a moderately large tap; flesh carmine-red, zoned with lighter shade; tender, sweet and a good keeper. Pkt. 5c; 0z. 10c; 2 0z. 15c; % Lb. 20c; Lb. 65c.

- Early Turnip Bassano Top large; leaf stems light red; leaf light with white; very sweet and tender when youg. An excellent sort to plant for use as greens. Oz. 10c; 2 Oz. 15c; 4 Lb. 20c; Lb. 65c.
- D. M. Ferry & Co's This is an entirely distinct that Sci and the set of the
- Long Dark Blood A standard late variety keeping well through the winter. It is of good size, long, smooth, growing even with the surface, with few or no side roots. Skin dark purple, almost black; flesh dark red, very tender and sweet. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 70c.
- Swiss Chard, or Sea Kale Beet although little known in America, is worthy of a place in every garden. The leaf and the leaf stems are the parts used and they are much superior to those of other beets to use as greens. Later in the season the broad, flat, beautiful, wax-like leaf stems are cooked as a salad or pickled. Pkt. 5c; 0z.10c; 20z. 15c; 4 Lb.20c; Lb.65c.

0111-11

DETROIT DARK RED TURNIP BEET

19

## D. M. FERRY & CO., DETROIT, MICH.

# UGAR BEE

Sugar Beets are desirable not only for the manufacture of sugar, but are in-valuable for stock feeding and table use. The best soil is a rich, friable sandy, or clayey loam. Rich, mucky soils will often give an immense yield of roots which, though excellent for feed are of little value for sugar making. Plant in drills two feet apart, twelve to twenty seeds to the foot. The seed should be well covered with one inch of soil pressed firmly over it. Cultivate frequently. When about three inches high thin six to ten inches apart.

## BEETS FOR SUGAR MAKING

Jaensch's Victrix Unquestionably the highest developed strain of beet. Roots of medium size and very uniform in type. Excep-been appointed sole agents for the sale of Jaensch's Victrix in America. Per Lb. 35c; postpaid. Lots of 5 lbs. to 25 lbs. by express, at purchaser's ex-pense, 25c, per lb. Original sealed sacks, weighing about 110 Lbs. each, \$17.50 per sack f. o. b. Detroit.

Vilmorin's Improved One of the richest sorts in cultivation and it will do better on new lands than any other, suffer less from an excess of nitrogen and will keep the best. Size medium; yielding from ten to sixteen tons per acre, Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 35c.

Klein Wanzleben bots per date, Tak. 5C, 202, 10C, 202, 1

## SUGAR BEETS FOR STOCK FEEDING

SUGAR BEETS FOR STOCK FEEDING
 Giant Feeding Sugar Beet, A strain of beets which, while giving near-or Half Sugar Mangel vested roots as a crop of Mangels, supplies a food of very much higher nutritive value. The roots are light bronze green, grow partly out of the ground and because of this and their shape the crop can be harvested and stored easily and at less expense than any other root crop. Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 35c.
 Royal Giant, or Half Sugar Rose for feeding. Somewhat egg shap-ed and growing half out of the ground it is very easily harvested. Quite similar to Giant Feeding Sugar Rose for feeding. Somewhat egg shap-ed and growing half out of the ground it is very easily harvested. Quite similar to Giant Feeding Sugar Rose Top whith below. Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 35c.
 French White Sugar Red Top with red at the top. Very hardy and productive, yielding about twenty tons to the acre. Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 35c.

French Yellow Sugar Grows to a large size: root half long, yellow and oz. 10c; 2 0z. 10c; 3 Lb. 15c; Lb. 40c.

## MANGEL WURZEI

Long Red A large, long variety grown for stock feeding. The root stands up well above the surface: color lightred; flesh white and rose colored. Pkt.5c; 0z.10c; 2 0z. 10c; ½ Lb.15c; Lb. 35c.

IMPROVED MAMMOTH LONG RED MANGEL WURZEL

D. M. Ferry & Co's Improved Straight and well formed, compar-Mammoth Long Red atively thicker and deeper colored than the common sort and with smaller top. Our stock will produce the largest and finest roots which can be grown and is vastly superior to many strains offered under other names, such as Norbitan Giant, Colossal, Monarch, etc. Pkt. 5c; 0z. 10c; 2 0z. 10c; Lb. 15c; Lb. 35c.

Yellow Leviathan the ground the shaped, growing over one-half out of comparatively small; neck small, short. Its fine flesh never becomes woody and its root grows so well out of the ground that the crop is very easily har-vested. This variety stands at the head of the list in yield of roots per acre. Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 35c.

Golden Tankard Top comparatively small, with yellow stems and mid-ribs; neck very small, root large, ovoid, but filled out at top and bottom approaching a cylindrical form. Flesh yel-low, zoned with white. Pkt. 5c; 0z. 10c; 2 0z. 10c; 2 Lb. 15c; Lb. 35c.

Red Globe A large, round, light red or pink variety of excellent Long Red. The roots often keep better than those of the long sorts, as they can be more easily handled without injury. Pkt. 5c; 0z. 10c; 2 0z. 10c; ½ Lb. 15c; Lb. 35c.

**BROCCOLI** The culture is the same in all essentials as for cauli-flower. Broccoli is grown most successfully where the season is long, cool and rather moist. One of the most valuable features is that it withstands greater extremes of temperature than cauliflower.

Early Large White French The best variety. Heads white, very for a long time. A hardy, vigorous, easily grown sort. Pkt. 5c; 0z. 40c; 2 0z. 75c; ½ Lb. \$1.25; Lb. \$4.00

BRUSSELS SPROUTS-Improved Half Dwarf

The plants grow two or three feet high and produce from the sides of the stalk numerous little sprouts which resemble very small cabbages one or two inches in diameter. The leaves should be broken down in the fall to give the little heads more room the grow; very hardy and giving compact, round sprouts of large size and good quality. Pkt, 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.50

GIANT FEEDING SUGAR BEET, OR HALF SUGAR MANGEL

# CABBAGE

## FIRST EARLY SORTS

**Early Jersey** The earliest and hardest heading of first early cab-bages. Most gardeners depend upon it for the bulk of their ex-tra early crop. Its exceeding hardiness not only to resist cold but other unfavorable con-ditions, insures the greatest likelihood of prof-itable and satisfactory results. Our stock is grown and selected with the greatest care; there is none better and there are few as good. Head conical, very compact, solid and of excellent quality. The thick, stout leaves and compact habit of the variety make it the best sort for very early setting. Pkt. 5c; 0z. 30c; 2 0z. 55c; 4 Lb.\$1.00; Lb.\$3.00

EARLY SPRING

<section-header><section-header><text><text><text><text><text><text><text><text><text><text>

EARLY JERSEY WAKEFIELD

Charleston, or Matrin in which the Large Wakefield plant is larger and a little later than Early Jersey Wakefield, the head being fully as solid but less pointed and consider-ably larger. Exceedingly hardy and on account of its earliness and size of head with market gardeners and shippers it is deservedly a very popu-lar sort to follow Jersey Wakefield. The seed we offer can be depended on to produce uniformly fine, mar-ketable heads. Pkt. 5c; 0z. 30c; 20z. 55c; 4Lb, \$1.00; Lb, \$3.00 A strain in

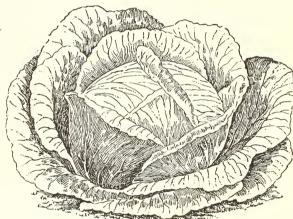

x 0z, 55c; ½ Lb. \$1.00; Lb. \$3.00
Early Spring headed variet.
A wonderfully compact plant with few outer leaves so that a great number of fine solid heads can be produced on an acre. Although it does not come to full maturity as early as Jersey Wakefield, it becomes solid enough for use about as early and is by far the best early sort for markets that demand a large, flat cabbage. The plant is vigorous, with short stem. The leaves are large, broad and of distinctive light green color. The head is oval and very large for the size of the plant, nearly equaling many of the later kinds. Pt. 52, 02.40c; ¿Lb. 75c; b. \$2.50

CABBAGE-SECOND EARLY, OR SUMMER SORTS

Henderson's An early, large heading cabbage; plants strong growing with large, Early Summer spreading outer leaves. Head fat or slightly conical and keeps longer without bursting than most of the early sorts. Valuable for both family and market. An improvement on the Newark Flat Dutch which it has superseded. Pkt. 5c; 0z. 20c; 2 0z. 35c; 4 Lb. 60c; Lb. \$2.00

4 Lb. 60c; Lb. \$2.00 Early Dwarf Continued experience con-firms our belief that this Flat Dutch is a most valuable second early sort. The plant is short stem-med, upright and having comparatively few and short leaves, the rows can be set close together. Head large, solid, crisp and tender, maturing with Early Summer. Every plant will form a hard head fit for market and will mature much earlier than the Late Flat Dutch or other sorts usually grown for mar-ket and shipping. Our carefully selected strain should not be confounded with the inferior, later stocks offered as Early Flat Dutch. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 4 Lb. 60c; Lb. \$2.00

All Head Early Our strain of All Head Early close adherence to the type in habit of growth and the shape and quality of the head. Plant more compact, leaf smoother and thicker and head larger and a little more round than the Early Summer. We consider this one of the best second early sorts on our list for both the market and home use. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.25

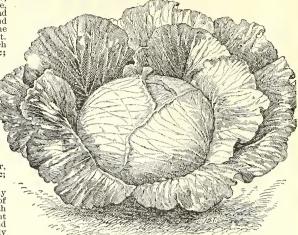

ALL HEAD EARLY

Early Drumhead Plant very hardy, compact with thick, dark green leaves covered with thick, bloom. Head flat, very solid and of good quality. Pkt. 5c; Oz. 20cz 2 Oz. 35c; 4 Lb. 60c; Lb. \$2.00

Fottler's Early In many sections, Drumhead, or in the east. Brunswick this is the most popular cabbage

Short Stem grown and it grown and it certainly is one of the very best second early sorts in cultivation, especially for the home garden. It keeps well both under the sun and during the winter. Head large, flat, compact, solid and of fine quality. We have taken pains to have our stock We have taken pains to have our stock free from the longer stemmed, coarse plants often seen in inferior stocks of this variety. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 4 Lb. 60c; Lb. \$2.00

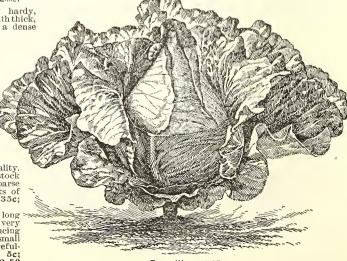

Succession A sure heading, long similar to All Seasons and producing well shaped heads having few small outer leaves. Our seed is from careful-ly grown selected stock. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50

HENDERSON'S EARLY SUMMER

**Early Winnigstadt** One of the best for general use, being very hardy and sure to head, Owing to its compact and upright habit of growth and pe-culiar texture of short thick leaf, the variety seems to suffer less from the cablage worm than most other sorts. Head regular, conical, very hard and keeps well both summer and winter. It is the hardiest, not only as regards frost, but will suffer less from excessive wet, drought, insects or disease than any other second early sort. Pkt. 5c; 0z. 15c; 2 0z. 35c; 4 Lb. 40c; Lb. \$1.50

ALD. 40c; LD. \$1.50 All Seasons One of the earliest of the second early sorts. Head very large, round, often nearly spherical but usually somewhat flattened; very solid and of the best quality, keeping as well as the winter sorts. Plant very vigorous and sure heading; leaves large, smooth with dense bloom. Remarkable for its ability to stand the hot sun and dry weather. Our trial has shown that heads which were fit for market by July 10<sup>th</sup> were still salable September 10th, the only change being increased size and density. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.25

EARLY WINNIGSTADT

## **CABBAGE**—LATE, OR AUTUMN AND WINTER SORTS

Surchead A compact growing, general crop cabbage, having medium sized to large thick heads and many outer leaves. We assure our customers that our stock is the best obtainable and will certainly produce uniformly large, fine heads. Pkt. 5c; 0z. 20c; 2 0z.35c; ½ Lb. 60c; Lb. \$2.00

Louisville Drumhead Strong and vigorous in growth, but not coarse. Plants short stemmed aud compact, with broad well rounded, large leaves, very full at base. Head firm, med-ium sized, slightly flattened, averaging quite deep. Pkt. 5c; 1'2, 20c; 2 0z. 35c; 4 Lb. 60c; Lb. \$2.00

Acme Flat Dutch An early and very desirable strain of Flat Dutch, in which the plant is very com-pact, few leaved and short stemmed. Head large, nearly round and very solid. Pkt, 5c; 0z, 20c; 2 0z, 35c; ½ Lb. 60c; Lb. \$2.00

Oz. 20c; 20z. 33c; 4 Lb. 60c; Lb. \$2.00 The Warren, or sirable for fall and Improved Stone Mason winter use, the stock we offer being much superior to that usually sold under this name. Plant medium sized, with only a moderate number of leaves; head medium size to large, flattened but very deep, very solid, crisp, tender and well flavored. Gives the greatest satisfaction both to the amateur and market gardener. Pkt. 5c; 0z. 20c; 20z. 35c; 4 Lb. 60c; Lb. \$2.00

D. M. Ferry & Co's great pains to develop and maintain Premium Late the good qualities which Flat Dutch have made this sort so popu-lar and we offer a strain re-markably uniform in size and type. A thou-sand playts can be demanded upon to produce We have taken

from nine hundred and fifty to one thousand large, oval, solid heads, of spiendid quality, which will keep for a long time in the best condition. Pkt. 5c; 0z. 20c; 2 0z. 35c; ½ Lb. 60c; Lb. \$2.00

Houseman One of the largest and generally consid-Houseman ered the best of the late market sorts. Late Flat Dutch The plant is very vigorous and hardy. The leaves are very large and broad; the stem of moderate height; the head very large and solid and keeps better than those of most kinds. Particularly desirable for those who wish to raise large quantities of cabbage for fall shipment. Pkt. 5c; 0z. 20c; 20z. 35c; 4 Lb. 60c; Lb. \$2.00

D. M. Ferry & Co's We recommend this sort for Premium Late Drumhead large, deep solid head. ty which in good, rich soil, will grow to a very large size and on poorer soils will give good sized heads which are very compact, solid and of excellent flavor. Pkt. 5c; 0z. 20c; 2 0z. 35c; 4 Lb. 60c; Lb. \$2.00

Marblehead Mammoth Drumhead The larbage known. Under good cultivation acres have been grown where the heads would average thirty pounds each. Plant very large, late in maturing and the seed should be planted earlier than that of most sorts **Pkt. 5c; Oz. 30c; 2 Oz. 35c, ½ Lb. 60c; Lb. \$2.00** 

HOLLANDER, OR DANISH BALL HEAD

Hollander, or Danish Ball Head Very hardy, very solid, of fine quality and as one of the very best keepers it is particularly desirable for distant markets or for late spring use. Plant vigorous, compact growing, with longer stem than most American sorts and exceedingly hardy in resisting cold and dry weather; leaves large, thick, bluish green covered with whitish bloom. Head medium sized, round, very solid and stands shipment better than any other late sort. We offer seed of our own growing which, judging from recent trials, will produce more uniformly typical heads than can be grown from the best stock obtainable elsewhere. Pkt. 5c; 0z. 30c; 2 0z. 55c; 3 Lb. \$1.00; Lb. \$3.00

Green Glazed south, as it is not affected by the heat as much as most sorts. The leaves are very smooth and glossy, and as a rule are not injured by worms and insects. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ½ Lb. 60c; Lb. \$2.00

Mammoth Rock Red ing red cabbage; much better than stock offered as Red Drumhead. Plant large, with numerous spreading leaves. Head large, round, very solid and of very attractive deep red color. Pkt. 5c; 0z. 25c; 2 0z. 40c; ½ Lb. 75c; Lb. \$2.50

## Early Dwarf Ulm Savoy One of the earliest and sweetest

arnest and sweetest of the Savoys. Head round, solid; leaves small, thick, fleshy, of fine deep green color and of excel-lent quality. Pkt.5c; 07.20c; 2 02.35c; ¼Lb.60c; Lb.\$2.00

## Improved Am-

erican Savoy The best of the main crop and late Savoys for home use or the market. Plants vig-orous densely orous, densely crumpled and very sure heading. The heads of this variety are larger, more solid and better than the sorts offered as Perfection, Green Globe or Drumhead Savoy. Pkt. 5c; Oz. 25c; 2 Oz. 40c; \$Lb. 75c; Lb. \$2.50

D. M. FERRY & CO'S PREMIUM LATE FLAT DUTCH

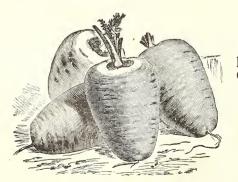

The carrot is one of the most wholesome and nutritious of our garden roots deserving to be more extensively used for culinary purposes and we urge our readers to give some of the early table sorts a trial. For feeding stock, especially horses and milch cows, the carrot cannot be surpassed and it should be more largely grown by farmers for this purpose. While a sandy loam made rich by manuring the previous year is the best soil for the carrot, any good land if thor-oughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the spring as the ground is fit to work, though good crops may be grown from sowings as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from one and one half to three pounds of seed to the acre. Cover one-half to one inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin four to six inches apart in the row.

EARLY SCARLET HORN

Half Long Scarlet Nantes, cylindrical, smooth, Stump Rooted bright orange; flesh orange, becom-ing yellow in center but with no dis-metrical and handsome of the medium sized sorts; excel-her for the month or the medium sized sorts; excellent for the market or home garden. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Chantenay Tops medium sized; necks small; roots rooted and smooth, color deep orange red; flesh very crisp and tender. Although a medium early sort the roots are suitable for use nearly as early as any. Undoubtedly is one of the best in quality for the market and private garden, while its great productiveness makes it very de-sirable as a field sort. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 2 Lb. 25c; Lb. 90c.

GUERANDE, OR OX HEART

D. M. Ferry & Co's Improved Short White shoulder but tapering regularly to the point; color light green at the crown, white below; flesh white, solid, crisp and of excellent quality. This variety is a real ac-quisition as a heavy yielding, easily harvested, white carrot and is the best of this class. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c.

Earliest Short Horn (French Forcing) One of the earliest varieties in cultivaearliest varieties in cultiva-tion and very desirable for forcing. Tops small, finely divided; roots nearly round and of reddish orange color. When fully matured about when fully matured about two inches in diameter, but should be used before fully grown while young and tender. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 4 Lb. 30c; 2 Oz. 20 Lb. \$1.00

Early Scarlet Horn Excellent for early planting out of doors. Tops small, out of doors. Tops small, coarsely divided; roots top shaped but tapering abrupt-ly to a small tap; skin or-ange red. Pkt. 5c; 0z. 10c; 2 0z. 15c; <sup>3</sup>/<sub>4</sub> Lb. 25c; Lb. 90c.

# Early Half Long The tops Scarlet Carentan are very

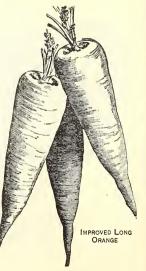

small, roots cylindrical with remark-ably small necks. Handsome deep or-ange color, with scarcely any core and of the best quality. The seed may be sown very thick and the variety is well adapted for forcing. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 25c; Lb. 90c.

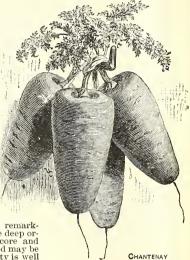

Guerande, or Ox Heart comparatively short but often reach a diameter of five inches, terminating abruptly in a small tap root. Flesh bright orange, fine grained and sweet. This variety is especially desirable for soil so hard and stiff that longer rooted sorts would not thrive in it. When young the equally good for stock. Pkt. 5c; 0z. 10c; 2 0z. 15c; 1 Lb. 25c; Lb. 90c.

**Danvers** Grown largely on account of its great pro-ductiveness and adaptability to all classes of soil. Tops of medium size, coarsely divided. The roots are smooth and handsome, deep orange and of medium length, tapering uniformly to a blunt point; flesh sweet, crisp, tender and of a deep orange color. Although the roots of this variety are

roots of this variety are short they produce as large a bulk as the longer field sorts and are more easily har-vested. Pkt. 5 c; 02. 10c; 2 02. 20c; 24 Lb. 30c; Lb.\$1.00

This is Improved Long a decid-Orange ed improvement ob-tained by years of careful selection of the best Careful selection of the best formed and deepest colored roots of the old Long Orange. The most popular of the older sorts for farm use on deep and mellow soil. Roots dis-tinctly larger at crown, short-or thicknessed emosther than er, thicker and smoother than those of Long Orange, but so uniform and true to type that the bulk of the crop will be greater. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 25c; Lb. 80c.

24

## CAULIFLOW

The Cauliflower, although one of the most delicious vegetables, is but little grown except by professional gardeners because of the erroneous notion that it is so difficult to grow that only skilled gardeners can produce it. Any one will be reasonably certain of success with this most desirable vegetable if he carefully follows the cultural directions given below.

reasonably certain of success with this most desirable vegetable if he carefully follows the cultural directions given below. For spring and early summer crop, sow in March or early in April in hotbed and transplant to cold frame when sufficiently large to handle. As soon as danger of hard freezing is over set in the open ground in rows two and one-half feet apart and eighteen inches apart in the row. The plants will endure a light frost. The soil for cauliflower should be like that for cabbage, but it is better if made richer than is ordinarily used for that crop. Plenty of good manure must be well incorporated with the soil and the latter be brought into the highest state of tilth. No application, however, can be more necessary or more useful than that of cultivator and hoe. For late crop, sow at same time as for late cab-bage and treat in the same manner. It should be borne in mind that cauliflower will not head up well in hot, dry weather and hence the sowings need to be so timed as to bring the heads to maturity either before the hot summer weather sets in or not until the cooler weather of the fall. If it receive at this time a liberal supply of water, the size and quality of the heads will be greatly improved. After the head begins to form, draw the leaves over and tie them together to pro-tect it from the sun and to keep it white. The heads should be cut for use while the "curd" is compact and hard, as they soon become much impaired in quality and appearance after they open and separate into branches. Of the enemies of the crop, none is more formidable than the cabbage root maggot. This seems to have a special liking for the caulidower. Probably the best and most surely effective protective measure is enveloping each plant with a tight fitting collar of tarred felt. Plant lice are anoth-

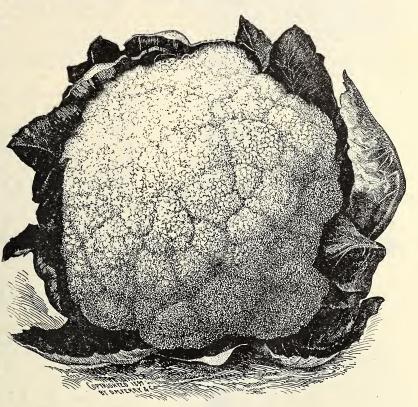

felt. Plant lice are another serious pest of this crop. Effective reme-dies are dusting with fine tobacco dust, or spraying with strong tobacco tea or kerosene emulsion.

Our cauliflower trials for several years includ-ed samples of seeds from some of the most skillful some of the most skillful American growers and while their stocks pro-duced hardy, vigorous plants the heads formed were uniformly more open in the curd and matured a little later than those grown from the best imported seed the best imported seed. All the cauliflower seed All the cauliflower seed we offer is produced by the most experienced growers in Europe, in such localities as are growers in Europe, in such localities as are best suited to its proper development and the greatest care is taken to save seed from perfectly developed plants only.

Early the earliest Snowball strain of the true short leaved snowball type of cauli-flower. A dmirably adapted for forcing or wintering over for early crop and the most popular sort for these purposes, also one of the best sorts for late summer and fall crop. The plants for face summer and fall crop. The plants are compact, with few narrow, upright leaves and are well suited for close planting. The

and are well suited for close planting. The heads are of medium size, solid, compact, round, very white and curd-like and are developed earli-er than those of any other sort. In our recent compar-ative trials of samples from the best known growers and prominent seedsmen in Europe and America our stocks of Early Snowball were unsurpassed by any in earliness. They also gave the highest percentage of well formed heads. We are in position to supply the most critical trade with seed which can be depended upon as the very best. (See further description on page 4 and colored plate page 5 in Supplement) Pkt. 25c; % Oz. 75c; Oz. \$2.50; 2 Oz. \$4.75; % Lb. \$9.00

Extra Early Dwarf Erfut A remarkably sure heading early Cauli-flower. It is of dwarf habit with short outside leaves and is similar in all respects to Early Snowball, and nearly as early. The heads when ready for market are of med-ium to large size, curd white, exceptionally deep and of finest quality. It will give excellent results either in the home garden or for market use and is superior to most seed sold at higher prices. Where extreme earliness is not the greatest consideration we recommend this strain after having proven it far superior to most stocks offered as Snowball. Pkt. 25c; ¥ Oz. 75c; Oz. \$2.25; ¥ Oz. \$4.25; ¥ Lb. \$8.00

#### EARLY SNOWBALL

EARLY SNOWBALL
Early Favorite This is very early, exceedingly hardy, easily grown and perhaps the best sort for the inexperienced grower, as it will head under conditions in which many sorts would fail. The plants are large and form large heads which, although inclined to be open, are crisp, tender and of fine quality. It keeps in condition for use a long time. Many years' experience has convinced us that it is one of the hardiest sorts. Pkt. 5c; 0z. \$1.00; 2 0z. \$1.50; ¼ Lb. \$2.50
Large Algiers A valuable late sort, sure to head, of excellent quality and popular with the leaves protecting the heads so that they will endure uninjured a frost that would ruin most other sorts. One of the very best of the late varieties. Pkt. 5c; 0z. \$1.25; ¼ Lb. \$2.00
Waitche's Automatic Circus. A distinct and valuable

Veitch's Autumn Giant A distinct and valuable stems and dark green leaves. The heads are very large, extremely white, firm and compact and being well pro-tected by foliage, remain a long time fit for use. The plants should be started and transplanted early in the season to insure their full development. Pkt. 5c; 0z.40c; 2 0z. 75c; % Lb. \$1.25

Sow the seed (which is slow to germinate) in shallow boxes indoors or in a finely prepared seed bed out of doors in straight rows so that the small plants may be kept free from weeds. See to it that the seed is not covered too deep and that the bed is kept moist, almost wet, until the seeds germinate, as plenty of moisture is essential to get a satisfactory growth. The seed will not germinate well if planted in a hotbed or where subjected to a temperature above 60° Fr. When the plants are one to two inches high, thin out and transplant so that they may stand three inches apart each way. When they are four inches high, cut off the tops, which will cause the plants to grow stocky.

each way. When they are four inches high, cut off the tops, which will cause the plants to grow stocky. The crop is usually made to succeed some earlier one, but in order to grow good celery the soil must be made as rich as possible, the essentials to success being very rich soil and plenty of water. If good plants are used, they may be set out as late as the middle of August, but the best results are usually obtained from setting about the middle of June or first of July. The most desirable time will depend upon local climate and is that which will bring the plants to maturity during cool, moist weather. In setting, prepare broad trenches about six inches deep and four to six feet apart, in which the plants should be set six inches apart, cutting off the outer leaves and pressing the soil firmly about the roots. When the plants are nearly full grown they should be "handled" which is done by gathering the leaves together while the earth is drawn about the plant to one-third its height, taking care that none of it falls between the leaves, as it would be likely to cause them to rust or rot. After a few days draw more earth about them and repeat the process every few days until only the tops of the leaves are visible. Or it may be blanched by pressing the leaves together with two wide boards held in place by stakes or by wire hooks at the top. This is the method commonly used by market gardeners, but celery so blanched is more likely to become pithy than that blanched with earth. Care should be taken that the plants are not disturbed while they are wet or the ground is damp; to do so increases the liability to injury from rust.

A part of the crop may be simply "handled" and then at the approach of severe freezing weather taken up and set out compactly in a dark cellar or an unused cold frame, where the temperature can be kept just above the freezing point and it will then gradually blanch so that it may be used throughout the winter. Should the plants begin to wilt, water the roots without wetting the stalks or leaves and they will revive again.

Celery is sometimes grown by what is termed the new process which consists in making a spot as rich as possible and there setting the plants six to eight inches apart each way. If the soil is very rich and there is an abundance of water, the plants will blanch each other and the product will be very white and handsome, but we think it is inferior in quality to that grown by the old method.

GOLDEN YELLOW SELF BLANCHING

Golden Yellow Self Blanching use. It is in condition as early in the fall as any and we have yet to find an extra early sort equal in quality and appearance to our stock of Golden Yellow Self Blanching. Critical gardeners generally depend upon our stock to produce their finest early celery. Plants of a yellowish green color, but as they mature the inner stems and leaves turn a beautiful golden yellow so that blanching is effected at a minimum expenditure of time and leaves, and fine nutty flavor of this variety have fully established it as the standard first early sort. Pkt. 5c; 0z. 50c; 20c. 85c; 4 Lb. \$1.50; Lb. \$5.00

- White Plume While we are fully aware that this variety is much in demand and has merit as an early market sort, being as early as any and very attractive when fit for use, we do not think that it compares favorably with the Golden Yellow Self Blanching either in flavor or solidity, or that it will remain in condition for use as long after it is earthed up. Leaves light yellowish green with tips almost white. As the plants mature, the inner stems and leaves turn white and require to be earthed up but a short time before they are in condition for use. An Improved White Plume with longer stems is being offered but careful comparison with our stock shows that it is not equal in quality nor so desirable as that we offer. Pkt. 5c; 0z. 30c; 2 0z. 55c; % Lb. §3.00
- **Columbia** An early maturing sort unsurpassed in height but very stocky and heavy. The plant is of medium height but very stocky and heavy. The stalks are thick, almost round, resembling in shape those of Giant Pascal; the color has in it more of the rich yellow thit of Golden Yellow Self Elanching which variety it resembles very much in appearance when trimmed and bunched for the market. The foliage is of a distinctly light shade of green with a tinge of yellow. In season it follows in close succession Golden Yellow Self Blanching. Its quality is certainly exceptionally fine, some connoisseurs considering it equal or even superior to either Golden Yellow Self Blanching or Giant Pascal. (See cut in Supplement, page4) Pkt. 5c; 0z. 60c; 2 0z. \$1.00; \$1.05; \$1.55; Lb. \$6.00
- **Dwarf White Solid** An erect, compact growing variety. Stalks moderately thick and distinctly ribbed, solid, crisp and of excellent quality. This variety is also sold as Large Ribbed Kalamazoo and Kalamazoo. (Crop failed)
- Seymour's White Solid A large sized, vigorous growing variety; stalks white, round, very crisp, perfectly solid and of superior flavor. Matures a little earlier than Giant Pascal. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.50
- Giant Pascal This is a green leaved variety developed from the Golden Yellow Self Blanching and we recommend it as being of the very best quality for fall and early winter use. It blanches to a beautiful yellowish white color; is very solid and crisp and of a fine nutty flavor. The stalk is very thick, the upper portion nearly round but broadening and flattening toward the base. With high culture this variety will give splendid satisfaction as a large growing sort for fall and winter use. In the south it is prized more than almost any other kind. Pkt. 5c; 0z. 25c; 20z. 40c; 4Lb, 75c; Lb, §2.50

# CELERY- Continued

- **Evans' Triumph** We consider this the best sorts. The variety produces a very strong and vigorous plant with large very white, crisp, tender and fine flavored stalks. It is late and requires the whole season to develop but will keep well for a long time and has proven to be a very popular late variety. When properly grown a dozen plants trimmed for market will weigh nearly twice as much as the same number of some smaller and earlier sorts. Pkt. 5c; 0z. 25c; 2 0z. 40c; 34 Lb. 75c; Lb. \$2.50
- French's Success Keeps the best of any celery compact and short in stem so that plants may be well earthed up for blanching while growing close together. Foliage dark green; heart large, solid and formed early; stalks white, thick, yet brittle, without stringiness and of good quality. It requires more time to mature than some sorts but remains firm, solid and in perfect condition until late in the spring. We recommend it as the best variety for the late market. Pkt. 5c; 0z. 30c; 2 0z. 55c; 4 Lb. \$1.00; Lb. \$3.00
- Soup, or Cutting Celery sown thick in rows and the tops are cut when three or four inches high for use as soup flavoring. The tops grow wery large and rapidly and if cut repeatedly a succession will be furnished throughout the season. Pkt. 5c; 0z. 15c; 20z. 25c; ½ Lb. 40c; Lb. \$1.25 CELERY SEED FOR EL WORKS

## **CELERIAC, or Turnip Rooted Celery**

Sow the seed at the same season and give the same treatment as common celery. Transplant the young plants to moist, rich soil, in rows two feet apart and six inches apart in the row. Give thorough culture. As the roots are the edible portion of this vegetable, it is not necessary to earth up or "handle" it. After the roots have attained a diameter of two inches or over, they are fit for use. To keep through winter pack in damp earth or sand and put in the cellar or leave out of doors, covering with earth and straw like beets and carrots.

Large Smooth Prague celery producing large, nearly routed form have comparatively few side roots. Pkt. 5c; 0z. 15c; 2 0z. 25c; ½ Lb. 40c; Lb. \$1.50

## **CHERVIL**

A hardy annual used for flavoring and garnishing dishes of meats and vegetables. The leaves are ready for use in six to ten weeks from sowing the seed. Sow in early spring in rich, well prepared soil and when plants are well established transplant to about one foot apart.

Curled Even more beautiful than parsley and greatly superior to the old, plain variety, being earlier, more handsome and having fully as fine fragrance and flavor. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 4 Lb. 30c; Lb.\$1.00

WHITE PLUME (See opposite page)

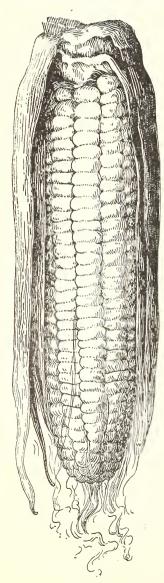

N 111

CHICORY—Large Rooted, or Coffee Our stock is the improved type, with very much larger, smoother, whiter and proportionately shorter roots than the seed as early in the spring as the ground can be prepared, in a rather light, moderately rich soil, in drills two to two and one-half feet apart for either garden or field culture. When the plants are sufficiently large, thin to six inches apart in the row. Cultivate well and in the fall dig the roots, slice them and dry in an apple evaporator or kiln constructed for the purpose. When the roots are grown in quantity for the manufacturers of "prepared" chicory, they are usually brought to the factory in the "green" state and there dried in kilns constructed specially for the purpose.

**CHIVES—Allium Schoenoprasum** An onion-like plant which by some is highly esteemed for use as a salad and the green stems afford a very pleasant onion flavor for soups. Also, the plant makes an excellent ornamental garden bed edging which may frequently be cut, a new growth of leaves appearing soon after each cutting. The seed may be sown in rows in place, or in boxes and transplanted. The plants are productive during two or three years and may then be taken up, divided and reset. (*Crop failed*)

**COLLARDS** A cabbage or kale-like plant grown throughout the south and known in different sections as "Cole," "Cole," "Colewort," or simply "Greens." It is extensively used in the south where it continues in growth and is usable throughout the entire winter.

Georgia, Southern, or Creole We offer the true white or green stemmed sort so extensively used in the south where it furnishes an abundance of food for the table or for stock. Forms a large loose open head, or a mass of leaves on a tall stem. Freezing does not injure but rather improves the quality. Sow thick in drills, in rich ground, transplanting when four inches high; or sow in drills where the plants are to remain and when well started thin to two or three feet apart in the row. In the south, sow from January to May and from August to October. Pkt. 5c; 0z. 10c; 3 0z. 20c; 4 Lb. 30c; Lb. \$1.00

CORN SWEET, OR TABLE VARIETIES

A rich, warm, alluvial soil is the best, but excellent sweet corn can be raised on any good, ordinary soil, if it is deeply and thoroughly worked before planting. In the north sweet corn should be planted as early as can be done with out risking great loss from frosts or from rotting of the seed in the soil. Give frequent and thorough but shallow cultivation until the tassels appear.

- Mammoth White Cory each generally bearing two large, finely shaped ears which become fit for use as early as those of any variety in cultivation. They are twelve rowed, very symmetrical and handsome, seldom with any opening between the rows at the base. The grain is large, broad, very white and of remarkably good quality for such an early sort. The size and beauty of this variety give it ready sale even when the market is overstocked. Pkt.10c; Pt.15c; Qt.25c; 4 Qts. 75c; Bu. 55.00
- White Cob Cory eight rowed with large somewhat coarse but very sweet and tender grain. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50
- Oakview Early Market See farms. Similar in general character to our Mammoth White Cory, but with decidedly longer ears which mature quite as early. It is of especial value to market gardeners, as in early corn the largest ears usually control the market. The plant is about four feet high; the ears large, twelve to fourteen rowed with white square grains. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00
- Crosby's Early A most excellent early variety of fine quality. Early square grains which are very white, sweet and tender. Plants about four feet in height. This is the sort so largely grown in Maine for canning and it is the use of this variety rather than any peculiarity of soil that has given Maine sweet corn its reputation for quality. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50
- Golden Bantam A very early sweet corn with golden yellow grain, wery tender and of excellent quality. The ears are eight rowed, six to seven inches long and of the medium size found most suitable for the table. The flavor is exceptionally rich and delicious. Our stock has been very carefully selected during several seasons and will be found decidedly superior to much that is offered. Height about four feet. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1,25; Bu. \$6,50
- **Early Minnesota** garden. Stalks about five and one-half feet high and bearing one or two ears well covered with husks; ears long, eight rowed; kernels very broad, sweet and tender, not shrinking much in drying. By careful selection we have developed a stock of this standard variety which is remarkably uniform and in which all the good qualities that have made this sort so popular are intensified. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$5.50
- Kendel's Early Giant Remarkably large in ear for a second early sort and very popular in some localities. Ears twelve rowed, grain rather broad and shallow, quality very good. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00
- Early Sweet, or Sugar feet high, productive, hardy and quite early. An old but excellent table sort. Our stock is distinct and true and not such a mixture of all sorts of early sweet or sugar corn as is often offered under this name. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00
- Perry's Hybrid This is a very popular eastern variety. Stalks about six feet high, bearing two large, twelve or fourteen rowed ears which often have a red or pink cob; grain medium sized, cooking very white and tender. Matures a little later than Minnesota. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

If corn is wanted by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

GOLDEN BANTAN

# CORN

## SWEET, OR TABLE VARIETIES-Continued

Black Mexican This corn, when in condition for the table, cooks remarkably white, but the ripe grain is black or bluish black. It is surpassed by none in tenderness and fine quality. For family use we consider it the most desirable second early sort. It does especially well for second early in the south. Stalk about six feet high. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

- Country Gentleman This variety has a small, white cob, densely covered with irregular rows of very long, slender, white grains which are of excellent quality. Stalks from six and one-half to seven feet high. By many it is regarded as the best of the late varieties. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00 Bu. \$6.00
- Ferry's Early Evergreen We have tested many samples of Evergreen corn that were claimed \* **Crry's Larly Lvergreen** Evergreen corn that were claimed to be earlier than Stowell's Evergreen and to be just as good, but we have never found any of them so valuable as the stock of this va-riety we offer. It has been proven both on our trial grounds and in the field to come into fit condition for use much earlier than Stowell's Evergreen and to remain in condition quite as long. The ears are large, with sixteen to twenty more or less irregular rows with very long grain which is of the very best quality. The plants average from six and one-half to seven feet high and in ear resemble those of Stowell's Evergreen, but differ in earliness and we think are more uniform. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00
- **Stowell's Evergreen** sugary, remaining a long time in condition suitable for boiling. Our stock has been carefully grown and selected to avoid the tendency to a shorter grain and deterioration in the evergreen character of this best known of all late sorts. Height about seven and one-half feet. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50
- Mammoth This is a rather late variety, but it produces the largest ears of any sort with which we are acquainted. It is of excellent quality, sweet, tender and delicious and its only fault is the immense size of the ear. Plant very large, averaging about eight feet high. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

## **FIELD VARIETIES**

- **Extra Early Adams** and without suckers. Ear short, very full, often nearly as thick as it is long, well covered with coarse husks; kernels white, smooth. An extremely hardy variety which can be grown closer together than most sorts. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 60c; Bu. \$3.50
- Early Adams, or Burlington An excellent early field va-iety and often used for table, particularly in the south. Ears about eight inches long, twelve or fourteen rowed; kernels white, rounded, somewhat deeper than broad and indented at the outer end which is whiter and less trans-parent than the inner. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 60c; Bu. \$3.50
- Early Red Blazed An early flint variety of medium height. Ears long, eight rowed, well filled. Grain flinty and of fine quality, bright yellow at base of ears, but red at the tips. It is also known as Smut Nose. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 40c; Bu. \$2.25
- Early Golden Dent, or Pride of the North Dent variety. Stalks small, with broad leaves. Ears short, twelve to sixteen rowed, well filled. Grain long, yellow, making an extra quality of meal. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 40c; Bu. \$2.25

Rice Pop Corn resemble rice; color white. No variety of popcorn is superior to this for parching. We supply lots of four quarts and less, shelled. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. of ears \$2.25

If corn is wanted by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

## CORN SALAD Fetticus, or Lamb's Lettuce

**CURIN SALAD Fetticus, or Lamb's Lettuce** This small salad is used during the winter and spring months as a substitute for lettuce and is also cooked and used like spinage. In warm weather the plants will mature in four to six weeks. During August and September sow the seed in shallow drills about one foot apart. If the soil is dry it should be firmly pressed over the seed in order to secure prompt germination. On the approach of severe cold weather, cover with straw or coarse litter. The plants will also do well if the seed is sown very early in the spring and like most salad plants, are greatly improved if sown on very rich soil; Indeed the ground can scarcely be made too rich for them. The seed we offer is extra cleaned, quite different from much that appears on the market. **Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c.** 

## D. M. FERRY & CO., DETROIT, MICH. CUCUMBER

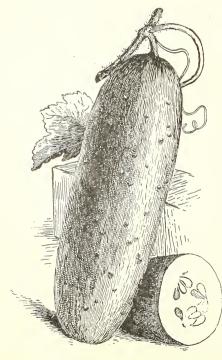

This is one of the vegetables that can be grown to perfection by any one who can control a few square yards of soil that is fully exposed to the sun. Every family should be supplied from its own garden, since the fruit is so much better when gathered fresh from the vines than it is in the more or less wilted condition in which it is found on the market.

the vines than it is in the more or less witten condition in which it is found on the market. In order to obtain the largest yield of cucumbers, the soil should be well enriched with well rotted manure, but an abundance of good fruit can be raised on any rich garden soil. Plant the seed not over an inch deep in hills four to six feet apart each way, dropping fifteen to twenty seeds in a hill. After the plants begin to crowd and danger from the striped beedle is pretty well over, thin to three plants to the hill. Give frequent but shallow cultivation until the plants make runners so long that this is impracticable. In field culture, plow furrows four feet apart and similar ones at right angles to the first. At each intersection drop a shove/flul or more of well rotted manure which should be well mixed with the soil, forming a broad, flat hill four to six inches above the surface. Many growers omit every fourth row, thus forming paths for the distribution of manure and gathering the fruit. In many sections, where earliness is very important, market gardeners start plants in boxes made like the ordinary berry box, but without the raised bottom. The boxes are set in hotbeds or cold frames, filled with rich, friable soil and the seed planted. When danger of frost is over, the plants are set in the open ground, the boxes being cut away, so that the roots are not disturbed at all.

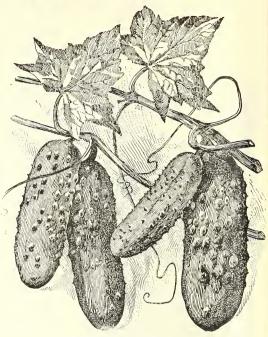

not disturbed at all. The plants are liable to attack from the striped cucumber beetles which are so numerous in some cases as to destroy them. These insects may be kept off by a frequent dusting with air slacked line, soot or sifted ashes diluted with fine road earth. Care should be taken not to use too much of any of the above materials, for if used too freely they will kill the vines. The best protection against injury is a vigorous and rapid growth of the young plants.

Pick the fruit before it begins to ripen, as the vines will cease setting fruit as soon as any seed begins to mature. In gathering for pickles, cut the stem instead of pulling the fruit off and be careful not to mar the fruit in any way, for if the pickles will not keep so well.

We pay particular attention to growing and selecting the various strains so as to keep them pure and true to name.

EARLY WHITE SPINE

PRESSING PERFECTED PICKLING

Early Cluster Vine vigorous, producing the bulk of the crop near the root and in clusters. Fruit short, with uniformly thick end, dark green, but paler at blossom end. A very productive sort. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.25

- **Early Short Green** both for table use and for pickling. Plants very vigorous and productive. Fruit straight, a little smaller at the ends, bright green, lighter at the blossom end. Comes into condition for use a little later than the Early Cluster and keeps green a long time. Our stock is very superior. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.25
- Pressing Perfected The small cucumbers of this pickling bottles, very handsome, showy pickles of the very best quality. For this purpose we recommend the variety more highly than any other sort. The vines are vigorous, setting their fruit early and are very productive. Pkt. 5c; 0z. 15c; 2 0z. 25c; 3 Lb. 40c; Lb. \$1.25
- Chicago, or Westerfield Very popular with market gardeners. Fruit medium Pickling length, pointed at each end with very large and prominent spines; color deep green. It is an extremely prolific variety and is one of the best for those who want crisp, coarsely spined pickles. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.25
- Boston Pickling A distinct and very productive variety extensively grown for pickles. The fruits are of medium size, very smooth, symmetrical and bright green. Pkt. 5c; 0z. 15c; 2 0z. 25c; ½ Lb. 40c; Lb. \$1.25
- Jersey Pickling slender, cylindrical pickle which is very crisp and tender. Pkt. 5c; 0z. 15c; 2 0z. 25c; ½ Lb. 40c; Lb. \$1.25
- Early White Spine One of the best sorts for table use. abundantly; fruit uniformly straight and handsome, dark green, with a few white spines; flesh tender and of excellent flavor. In this country this variety is used more, we presume, than any other for forcing under glass. Pkt. 5c; Oz. 15c; 2 Oz. 25c; & Lb. 40c; Lb. \$1.25
- Arlington is more pointed at each end. The young fruits are unusually crisp and lender and are of very dark green color so that the variety is considered by many to be the best for small pickles. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 2 Lb. 40c; Lb. \$1.25

30

## **CUCUMBER**-Continued

Extra Long, or Beautiful in shape and color and of the finest quali-Evergreen White Spine very white, crisp and tender flesh. An entirely new and distinct sort developthe best possible table cucumber. The vine is vigorous and productive and comes into full bearing earlier than the Bismarck. This variety is also an excellent sort for culture under glass. Pkt. 5c; 0z. 15c; 2 0z. 25c; <sup>3</sup>/<sub>4</sub> Lb. 40c; Lb. \$1.25

**Emerald** A rather late variety of very symmetrical shape and smooth skin, retaining its dark green color until nearly ripe. It is spineless and the fiesh is crisp, white and tender. Pkt. 5c; 0z. 10c; 2 0z. 20c; 4 Lb. 30c; Lb. \$1.00

Bismarck ed at each end, very uniform in shape and color; flesh crisp and tender; excellent either for pickles or slicing. The stock we offer is a great improvement over that usually sold either as Bismarck or Tailby Hybrid, being more uniform in shape and without the distinct neck which was a fault of the old stock. It can be depended upon to produce very symmetrical, handsome, dark green fruits which will hold their color better than those of any other kind. One of the best sorts for growing under glass. Pkt. 5c; 0z. 10c; 2 0z. 20c; ½ Lb. 30c; Lb. \$1.00

**Cumberland** A distinct variety, said to have originated from crossing the Parisian Pickling, and the Early White Spine; it certainly has the good qualities of each of these sorts. The fruits are large, symmetrical, dark green, covered with innumerable small white spines and are of prime quality for slicing. The vine is vigorous, wonderfully prolific and continues in bearing much longer than most sorts. Pkt. 5c; 0z. 10c; 20z. 20c; 4 Lb. 30c; Lb. \$1.00

Improved Vines very vigorous Long Green and productive, forming fruit fit for the table nearly as early as the shorter sorts; fruit

EXTRA LONG, OR EVERGREEN WHITE SPINE

about twelve inchesiong, fruit firm and crisp. Excellent for pickles; also the mature fruits are sometimes used for making sweet pickles. We offer a carefully selected strain uniformly long, of good form and with the large warts and spines well distributed over the surface instead of being clustered at one end as in inferior stocks. Pkt.5c; 0z. 15c; 20z. 25c; 2Lb. 40c; Lb. \$1.50

Small Gherkin prickly fruited sort quite distinct from all others and grown exclusively for pickles. It is the smallest of all the varieties and should always be picked when young and tender. The seed is slow to germinate, requiring usually from two to three weeks. Pkt. 5c; 0z. 20c; 20z. 35c; 2 Lb. 60c; Lb. \$1.75

# CRESS

The seed should be sown in drills about sixteen inches apart, on very rich ground and the plants well cultivated. It may be planted very early but repeated sowings are necessary to secure a succession. Keep off insects by dusting with Pyrethrum powder.

**Curled, or Pepper Grass** flavor of which its warm, pungent taste makes a most agreeable addition. Pkt.5c;0z.10c;20z.15c;4Lb.20c;Lb.50c.

Gray Seeded Early Winter A variety that does produces a large cluster of leaves quite similar to those of the Water Cress in appearance and quality. It is quite hardy and thrives best in the cool autumn months. Pkt. 5c; 0z. 10c; 2 0z. 20c; 24 Lb. 30c; Lb. \$1.00

**True Water** This is a distinct variety of cress with small, oval leaves and thrives best when its roots and stems are submerged in water. A fair growth may be obtained in soil which is kept wet. It is one of the most delicious of small salads and should be planted wherever a suitable place can be found. The seed should be sown and lightly covered in gravelly, mucky lands along the borders of small, rapid streams. The plants will need no subsequent culture, as under favorable conditions they increase very rapidly by self-sown seed and extension of the roots. When gathered for the market the should be cut, not broken off. In summer it is best to cut them closely, the oftener the better. Pkt. 5c; 0z. 35c; 2 0z. 60c; \$ Lb. \$1.00; Lb. \$3.50

## DANDELION

Sow early in the spring, in very warm, rich soil, in drills eighteen inches apart; thin the young plants to five inches in the row and cultivate well; they will be fit for cutting the next spring. When grown for the roots, sow in September and cultivate well during the fall and the following summer; the roots will be fit to dig in October.

Cultivated, or French Common as our wild dandelion, being greatly improved by careful selection. Pkt. 5c; 0z. 30c; 2 0z. 55c; 4 Lb. \$1.00; Lb. \$3.00 Improved Thick Leaved This is considered the best by

\$ Lb. \$1.50; Lb. \$4.50

## EGG PLANT

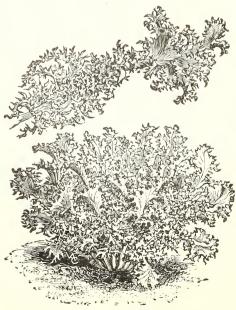

Egg Plant seed germinates slowly and should be started in moderately high temperature, for in this, as in all sub-tropical plants, it is of import-ance to secure a rapid and continuous growth from the first, the plants never recovering from a check received when young. When the plants have formed two rough leaves transplant to three or four inches apart. When the ground is warm and all danger not only from frosts but from cold nights is past, harden off the plants by gradual exposure to the sun and air and decreasing the supply of water, then carefully transplant to the open ground, setting the plants two and one-half feet apart. If needed, shade the young plants and protect them from the potato bug which otherwise often destroys them. Some seasons egg plants will fail to set fruit or will not begin bearing until too late to mature, no matter how faithfully they may have been cared for. This is especially likely to happen if the summer is cool and rather moist. We know of no certain remedy for it, although it is a good practice to pinch off the ends of the branches after the plants begin to bloom, so that not more than two or three fruits will set. It is desirable to shade the plants when young from very hot sum. when young from very hot sun.

**Early Long Purple** of fine quality. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.25

Black Pekin Nearly as early as the Early Long Purple and nearly as for market gardeners' use. Fruit nearly round; skin smooth, black and glossy; flesh white, fine grained and delicate. Pkt. 5c; 0z. 35c; 2 0z. 60c; 4 Lb. \$1.00; Lb. \$3.50

Black Beauty Fruit large, symmetrical in shape and uniformly of a rich dark purple color. Fruits mature a little earlier than our Improved Large Purple but are not quite as large. Pkt 5c; 0z. 50c; 2 0z. 85c; Lb. \$1.50; Lb. \$5.00

D. M. Ferry & Co's (SPINELESS) This variety is a general favorite both Improved Large Purple for market and private use. The large size and fine quality of its fruit and its extreme produc-tiveness make it the most profitable for market gardeners Plants large, spreading; foliage light green; fruit very large, oval; color a splendid dark purple. Plants usually ripen four to eight large fruits. **Pkt. 5c; 0z. 50c. 2 0z. 85c;** ½ Lb. \$1.50; Lb. \$5.00

LARGE GREEN CURLED ENDIVE

BLACK BEAUTY EGG PLANT

# ENDIVE

Endive may be grown at any season of the year but is nore generally used late in the fall. Sow the seed in June or July in drills fourteen to twenty inches apart and when well started thin the plants to one foot apart. When near-ly full grown tie the outer leaves together over the center in order to blanch the heart of the plant. By covering fresh plants every few days a succession may be kept up,

arge Green Curled A large, strong growing up, can be made to form finely blanched centers of good quality. Outer leaves well cut and bright, deep green. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1,50

- **Ever White Curled** A very beautiful sort in which the leaves are very light colored, even the outer ones being nearly white. The plant is moderately dense, with divided leaves which are a little coarser than those of the Large Green Curled. Pkt. 5c; 0z. 15c; 2 0z. 25c; 2 Lb. 40c; Lb. \$1.50 Ever White Curled
- Moss Curled Spring salads. Plants compact grow-ing, forming large, dense clusters of finely divided, green leaves which when properly blanched, are exceedingly crisp and tender. Pkt. 5c; 0z. 15c; 2 0z. 25c; 2 Lb. 40c; Lb. \$1.25
- This (Escarolle) Broad Leaved Batavian (Escarolle) This thick, plain or slightly wrinkled leaves forming a large head and is desirable for stews and soups. If the outer leaves are gathered and tied at the top, the inner ones will blanch and may be used for salad. Pkt. 5c; 0z. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25
- **GARLIC** A bulbous rooted plant of the onion but much esteemed by some for flavoring soups, stews etc. We frequently receive orders for garlic seed but we can supply bulbs only. Prepare the ground the same as for onions and plant the bulbs in drills eight inches apart and four inches apart in the rows, covering two inches deep. When the leaves turn yellow take up the bulbs, dry in the shade and lay them up in a dry loft as you would onions, BULBS, ½ Lb. 20c; Lb. 50c.
- HORSE RADISH Horse Radish rarely pro-duces seed but is grown from pieces of the roots. Mark off the rows two and one-half feet apart in rich, noist, well prepared ground and set the pieces of roots eighteen inches apart in the rows, the small end down and the top one to three inches below the surface. Cultivate thoroughly until the tops cover the ground, when their shade will keep down the weeds. SMALL ROOTS—3 for 10c; 25c, per dozen, postpaid. By freight or express at purchaser's expense, 75c, per 100

**CALE** Borecole, Kale and German Greens are general terms applied to certain cabbage-like plants which do not form heads, but are used in their open growth. Some of the varieties are the most tender and delicate of any of the cabbage tribe. They are hardy and are not KALE

most tender and deneate of any of the caboage tribe. They are hardy and are not injured by the frost. As far north as Cincinnati the seed may be sown in September and plants grown like spinage, or planted and grown like late cabbage until very late in the season. In the south kale will live and grow throughout the winter without protection. It is better not to cut or handle the plants when frozen, but if this is unavoidable, thaw them out in cold water. The young shoots which start up in the spring from the old stumps are very tender and make excellent greens.

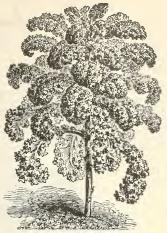

DWARF CURLED SCOTCH, OR GERMAN GREENS

Dwarf Curled Scotch, or German Greens cut and crimped so that the whole plant is low and com-pact with large, bright, deep green leaves curled, bunch of moss. It would be well worthy of cultivation simply for its beauty. One of the best sorts for use and when well grown and cooked is one of the most palatable of vegetables. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c;

Lb. 75c.

EARLY WHITE VIENNA

Siberan Dest known and most largely used varieties of kale It is sometimes called Sprouts or German Greens. The green leaves are very large, and comparatively plain leaves are very large, and comparatively plain in the center but coarse-ly cut and distinctly frilled on the edge. The plant is low but spread-ing and very hardy. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 20c; Lb 65c; Lb. 65c.

TALL GREEN CURLED SCOTCH

Tall Green Curled Scotch Very hardy and not injured by a moder-leaves, densely curled and cut, forming a beautiful plant. Stands the winters in the middle states without any pro-tection. Pkt.5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

German Dwarf Purple Like Dwarf Curled Scotch Pkt. 5c; 0z. 10c; 2 0z. 20c; 4 Lb. 30c; Lb. \$1.00

KOHL RABI The Kohl Rabi is a vegetable intermediate between the cabbage and turnip and somewhat resembles each in flavor. The edible part is a turnip shaped built formed by the enlargement of the stem. When used for the table this should be turning the enlargement of the stem. When used for the table this should be turning the enlargement of the stem. When used for the table this should be spossible, in drills, sixteen inches apart and when well established thin to six inches apart in the row. Plantings at intervals of ten days will give a succession until hot weather, when they fail to grow well; plantings may be made the latter part of July for fall use. fall use.

Early White Vienna (Extra for forcing) with distinctly small tops. Bulbs of medium size, white, handsome and of best quality. Pkt. 5c; 0z. 25c; 2 0z. 40c; 3 Lb. 75c; Lb. \$2.25

**Early Purple Vienna** Very early, with stems being tinged with purple. Bulb bright purple; desirable for forcing and early outdoor planting. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4Lb. 75c; Lb. \$2.25

Large Green Hardy, quite late ing stock. Bulbs large, weighing eight to ten pounds when fully grown, whitish green in color; leaves large and very numerous. Pkt. 5c; 0z. 10c; 2 0z 20c; ¾ Lb. 30c; Lb. \$1.00

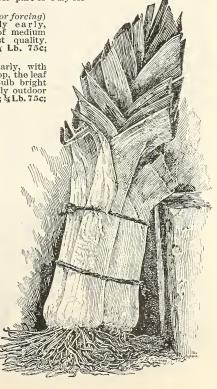

**EEEK** Belongs to the onion family. Sow the seed and care for the young plants as for onions, but they need more room in order to develop. When the young plant is about the size of a goose quill, transplant to a prepared bed in rows about three or three and one-half feet apart and four or five inches in the row. Set the roots deep and draw the earth to them when cultivating, so that they may be well blanched by the time they are fit for use. the time they are fit for use.

London Flag Pkt. 5c; 0z. 10c; 2 0z. 20c; 4 Lb. 30c; Lb. \$1.00

Large American Flag A variety which has become very popular with some market gar-deners on account of its being larger than the London Flag. Pkt. 5c; 0z. 15c; 2 0z. 25c; 3 Lb. 40c; Lb. \$1.25

Large Rouen leaf is very broad, covered with whitish bloom. Stands a long time in condition for use. Pkt. 3c; 0z. 15c; 20z. 25c; 4 Lb. 40c; Lb. \$1.25

Monstrous Carentan in diameter and becoming very white and tender. A hardy and desirable sort. Pkt. 5c; 0z. 15c; 2 0z. 25c; ½ Lb. 40c; Lb. \$1.25

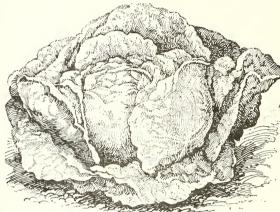

MONSTROUS CARENTAN LEEK

### D. M. FERRY & CO., DETROIT, MICH.

## LETTUCE

For early outdoor culture in the latitude of Cincinnati and southward the seed may be planted in the fall, pro-tecting the young plants from severe freezing either with frames or coarse litter which may be removed as soon as danger of severe freezing is over. Lettuce in ground out of doors will stand some freezing but is killed by prolonged frost or frequent freezing and thaving. North of Cincinnati an early crop may be secured by starting under glass from January to March and harden-ing off well before setting in ground, which should be done as soon as weather will permit. Lettuce to be at its best should be grown as rapidly as possible, hence the soil should be made as rich and friable as possible by liberal manuring and thorough preparation. For winter, sow under glass from November to February and thin out as necessary to prevent crowding. Keep a moderate heat and give all the light and air possible. For general crop, sow outdoors as early in the spring as the ground can be worked, in drills eighteen inches apart and thin the young plants to four inches apart in the row. As the plants begin to crowd thin them out and use as required. In this way a much longer succession of cuttings may be had from the same ground. Warieties marked a *cre porticularly adapted for culture under glass and for early spring use.* Those marked B are sometimes grown under glass, but are especially desirable for outdoor, summer culture. Jersey Winter, Big Boston, Brown Dutch, California Crean Butter and Deacon are very hardy and suited for winter outdoor culture in the south. CACREACE OR HEADINC VADETLES

### CABBAGE OR HEADING VARIETIES

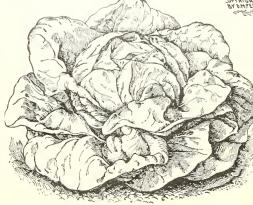

MAY KING

May King A. (Seed white) A large, light green, heading lettuce which is siving excellent satisfaction. Grown outdoors it is extremely early, maturing handsome heads of good size and and unsurpassed in quality. For forcing under glass it is most desirable. A remarkably good all around, first early variety. Pkt. 5c; 0z. 20c; 20z.35c; % Lb. 60c; Lb. \$1.75

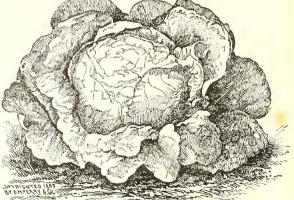

Boston Forcing compact, very early heading lettuce of excellent quality and especially desirable for forcing. Pkt. 5c; 0z. 15c;
 2 0z. 25c;
 4 Lb. 40c; Lb. \$1.50

2 02. 25c; 3 LD, 40c; LD, 51. 50 Early Tennis Ball of the best heading lettuces for general use, desirable for early planting outdoors. Plants medium sized, hav ing thick, bright green leaves, forming very solid heads, the inner leaves being blanched to a rich, creamy white, and crisp. tender and a rich, creamy white, and crisp, tender and buttery. Pkt. 5c; 0z. 15c; 20z. 25c; 4Lb. 40c; Lb. \$1.25

Salamander light green head of excellent quality. Leaves broad, thick, somewhat crumpled and closely overlapping so that the inner ones are very finely blached. Withstands hot weather remarkably well and is one of the most satisfactory heading lettuces for growing outdoors. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.25
 White Summer Cabbage Bright green, vigorous and forms a firm head of thick, tender leaves, inner ones blanched a beautiful cream yellow. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 4 Lb. 30c; Lb. \$1.00

LD. \$1.00 Hubbard's Market A. (Seed White) A green heading variety, forming a large, very com pact head similar in type to Salamander, a little larger, but later maturing. Pkt. 5c; 02. 15c; 2 02. 25c; ½ Lb. 40c; Lb. \$1.25 Mammoth Black B A strain of large, Beeded Butter lettuce, forming very large of thick, yellowish green leaves, the inner ones beautifully blanched, very crisp, tender and of fine flavor, Pkt. 5c; 02. 15c; 2 0z. 25c; ½ Lb. 40c; Lb. \$1.50

MAMMOTH BLACK SEEDED BUTTER

**Deacon** B. (Seed white) Heads of medium size, very time. The plant is very compact, with few outer leaves which are usually very smooth, thick and of light, grayish green color, The inner leaves blanch to a bright, rich yellow and are very well flavored, crisp and buttery. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.35 A. (Seed white) Popular for outdoor winter A. (Seed white) are outdoor winter a gray of the set of the s

Big Boston a. (Seed white) Popular for outdoor winter large heading. forcing sort. Plants large, very hardy and vigorous; leaves broad, comparatively smooth but, wavy at edge, thin, very hard and crisp; color bright light green; grown extensively in the south as a winter lettuce. Pkt. 5c; 0z. 20c; 20z. 35c; 4Lb. 60c; Lb. \$1.75
California Cream Butter, large, green very reor Royal Summer Cabbage liable heading sort, It deep, glossy green leaves, the outer ones slightly splashed with brown. It forms a very solid head of rich cream colored leaves, very thick, tender and of splendid quality. Pkt. 5c; 0z. 15c; 20z. 32c; 4Lb. 40c; Lb.\$1.25

## LETTUCE-CABBAGE OR HEADING-Continued

Jersey Winter A (Seed white) A light green, loose heading medium sized lettuce, very to mature its heads. Pkt. 5c; 0z. 15c; 2 0z. 25c; \$4 Lb. 40c; Lb. \$1.50

Brown Dutch B (Seed black) An old sort noted for its hardiness. Leaves large, thick, green tinged with brown. It always forms a large, solid head which is somewhat coarse looking, but the inner leaves are beautifully blanched, sweet, tender and well flavored. Desirable especially because of its hardiness and may be used in the south as a winter lettuce. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.25

CURIED OR LOOSE LEAVED VARIETIES

Grand Rapids A (Seed black) As a lettuce for greenhouse forcing, this variety undoubtedly stands at the head of the list, being of quick growth, little liable to rot and remaining in condition several days after being fit to cut. The plant is upright and forms a losse head or cluster of large, thin, bright green leaves decidedly crimped and blistered The leaves do not wilt quickly after cutting so that the variety will stand shipping long distances better than most sorts. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.50

Detroit Market cellent variety for grow-Gardener's Forcing ing under glass where it stands higher temperature and can be crowded to maturity Also well adapted for outfoor growing. The plant is more compact than the Grand Rapids, is lighter colored and less frilled at edge of leaves which are quite crisp and tender. Pkt.5c; 0z. 15c; 20z. 35c; % Lb.40c; Lb.\$1.50

Simpson's Early Curled An early, erect growing, clustering variety. Leaves light green, slightly frilled and much blistered, sweet, tender and well flavored. The sort is especially adapted for sowing thickly and cutting when the plants are very young. Pkt. 5c; 0z. 15c; 2 0z 25c; 2 Lb. 40c; Lb. \$1.25

Ferry's Early <sup>B</sup> (Seed white). This old standard variety is still the best of the large, thin leaved clustering sorts for the home garden, but is too tender to stand shipping or handling on the market. The leaves are very large, crimped, bright green tinged with brownish-red and are exceedingly tender and sweet. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.35

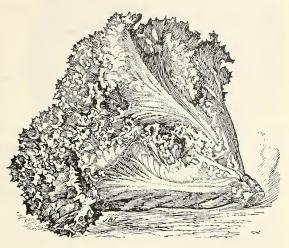

FERRY'S EARLY PRIZE HEAD

White Chavigne <sup>B</sup> (Seed white) A large, very full head of well rounded, rather dark green, slightly crumpled leaves, the inner ones well branched and forming a compact solid head. Slow in running to seed. Pkt. 5c; 0z. 15c; 2 0z. 25c; ½ Lb. 40c; Lb. \$1.50

Hanson the later summer lettuces. The plant is compact and forms a large, cabbage-like head and remains in condition longer than most heading sorts. Outer leaves bright green, broad, frilled at edge and with distinctive midrib; inner leaves white and curved at the base; very tender and sweet. Pkt. 5c; 0z. 15c; 20z. 25c; 4Lb. 40c; Lb. \$1,50

### CURLED OR LOOSE LEAVED VARIETIES

#### GRAND RAPIDS

Black Seeded Simpson A One of the best varieties for early sowing out of doors where a large, thin, exceedingly tender leaf is desired and for those markets which demand a large, loose clustering sort, light yellowish green. Leaves large, thin, slightly ruffled and blistered, even the large outer ones being quite tender. Uniformly attractive, of excellent quality and continues a long time in condition for use. Pkt. 5c; 0z. 15c; 2 0z. 25c; 3Lb. 40c; Lb. \$1.50

Denver Market (Seed white) A much frilled, bright green dium sized head, the inner leaves well blanched and finely crumpled. Desirable for growing under glass and a popular outdoor summer variety in the middle west. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.35

Tilton's White Star <sup>B</sup> (Seed white) An outdoor sort for market gardeners, as it grows rapidly to a large size, with broad thick leaves distinctly frilled at the edges. The variety forms a large, loose head, blanches well, is of very good quality and remains long in condition for use before running to seed. Pkt. 5c; 0z. 15c; 20z. 25c; % Lb. 40c; Lb. \$1.50

Cos Lettuce is distinct in having long, narrow, spoon-shaped leaves, folding into loose, sugar loaf shaped heads which blanch better by having the outer leaves drawn about them and tied. Exceedingly crisp, tender and of delicate flavor.

Early White Self-Folding (Seed white) yellowish white very crisp and tender; a selfblanching lettuce of superior flavor. Sold also as Trianon. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.50

Martynia PROBOSCIDEA A strong growing, hardy annual plant with numerous seed pods which, when young and tender are highly prized for pickling. Sow in rich, warm soil when danger of frost is over, in drills three feet apart and thin the plants out to two feet in the row. Pkt. 10c; 0z. 30c; 2 0z. 55c; ½ Lb. \$1.00; Lb. \$3.00 (See also page 79)

Plant the seed in hills six feet apart each way, dropping ten to twelve seeds in a hill. After the plants begin to crowd and the striped beetles are pretty well gone thin to four of the most vigorous plants in a hill. Give frequent but shallow cultivation, until the plants make runners so long that this is impracticable. Rich earth for the young plants is far better than manure, but if the latter must be used, see that it is well rotted and thoroughly mixed with the soil. If the plants grow very rank, more and finer fruit will be secured by allowing the main branch to continue growing but pinch off the end of each side branch after it has one fruit set. The quality of melons of all varieties is largely dependent upon conditions of growth and ripening. Unhealthy vines or unfavorable weather produces fruit of compara-

pendent upon conditions of growth and ripening. Unhealthy vines or unfavorable weather produces fruit of compara-tively poor flavor. The plants are liable to attack from the striped beetles which are so numerous in some cases as to destroy them. The beetles may be kept off by frequent dusting with air-slacked lime, soot or sifted ashes diluted with fine road earth. Care should be taken not to use too much of any of the above materials or the vines will be injured. Should even the diluted material prove injurious to the vine, use road earth only, as frequent dusting with this alone will often prove effective, especially if a wind is blowing.

### **GREEN FLESHED VARIETIES**

- **Extra Early Citron** A small, round melon, valuable earliness, hardiness and great productiveness. The skin is green, becoming yellowish at maturity. The flesh is light green, sweet and of good quality. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.25
- Jenny Lind Vine rather small but vigorous and pro-ductive. Fruit small, somewhat flattened, deeply ribbed; flesh green and exceedingly sweet. This variety ripens early and on account of its size is particu-larly good for hotel use. We know of no green fleshed melon maturing equally as early that is of more excellent quality. Pkt. 5c; 0z. 15c; 20z. 25c; ½ Lb. 40c; Lb. \$1.25
- We offer under this Extra Early Hackensack name distinct stock, very different and much superior to that often sold as Ex-tra Early Hackensack. The fruit is medium sized, nearly round, evenly and deeply ribbed and with very coarse netting. The flesh is green, a little coarse but very juicy, sweet and well flavored. Pkt. 5c; Oz. 15c; 2 Oz. 25c; Velb 400-1b \$ 50 \* Lb. 40c; Lb. \$1.50
- Netted Gem, or Rocky Ford This has become popular of small or basket melons and is shipped in large quantities from Colorado and Arizona. The fruit is oval, slightly ribbed, densely covered with fine netting. Flesh thick, green, very sweet and highly flavored. We offer an exceptionally fine stock of this early sort, the fruit being

very uniform in shape and quality and of the even size that is so desirable in a ship-ping melon. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.25

Fruit

Baltimore, medium sized, oval, or Acme slightly pointed at stem end, slightly ribbed, cover-ed when ripe with coarse netting. Flesh thick green, very finely flavored and sweet. A very reductive sume very productive, sure cropper and one of the most uniformly good, green fleshed melons on our list. Pkt. 5c; Oz. 15c; 2 Oz. 25c; %Lb. 40c; Lb.\$1.50

Cosmopolitan This variety was intro-duced by us in 1894 and combining, as it does, the firm, sweet flesh of the French Cantaloupe and the delicious flavor of the American Musk Melon, it is truly cos-mopolitan in character. It is the most beau-tiful of the green flesh ed melons. Fruit ed melons. Fruit slightly oval, nearly round, without ribs. Color light green but becoming covered at maturity with dense silver gray netting. The flesh is green, firm, sweet and uniformly high flavored. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1 Lb. 40c; Lb. \$1.50

- Champion Market Fruit large, round or slightly oval, with very shallow depres-sions and covered with dense uetting. Flesh green, of medium texture, very thick and sweet. The variety is an improvement on Montreal in earliness and productive-ness and will suit those who like a large, sweet, green fleshed sort. It can alrvays be depended upon for a good crop. Pkt. 5c; 0z. 15c; 20z. 25c; 4 Lb. 40c; Lb. \$1,50 Hackensack, or Turk's Cap the diameter much more than the length; ribs large and of irregular width, denselv covered with coarse netting; flesh green,
- width, densely covered with coarse netting: flesh green, thick, coarse but very sweet and finely flavored. Our stock is true to the "Turk's Cap" type and after careful com-parison with that of other growers we do not hesitate to pronounce if the best in the country. Pkt. 5c; 0z. 15c; 2 Oz. 25c; 3 Lb. 40c; Lb. \$1.50
- 2 02. 25c; 34 Lb. 40c; Lb. \$1.50
   Improved Large Green Nutmeg ous, hardy, productive; fruit very large, round, slightly flattened at both ends, ribbed, covered with coarse netting; flesh very thick and of the highest flavor. Pkt. 5c; 0z. 15c; 2 0z. 25c; 34 Lb. 40c; Lb. \$1.50
   Bay View ten to fifteen pounds, long, deeply ribbed and is covered with coarse netting, flesh green, thick and of fine flavor. By far the best of the large late maturing melons and so hardy that we especially recommend it to inexperienced cultivators. Pkt. 5c; 0z. 15c; 20. 25c; 32 Lb. 40c; Lb. \$1.50 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

NETTED GEM, OR ROCKY FORD

## MUSK MELON-Continued

### **ORANGE FLESHED VARIETIES**

Emerald Gem A splendid variety. Fruit globular or slightly flattened at the ends, only slightly netted and ribbed. Skin deep green while young, becoming slightly tinged with yellow as the fruit matures; flesh deep salmon-yellow, thick, ripening close to the rind and ex ceedingly high flavored. This variety has steadily grown in popular favor and in many large markets leads all other kinds on account of its sweetness and convenient size. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50 The Tar. This very productive melon is of

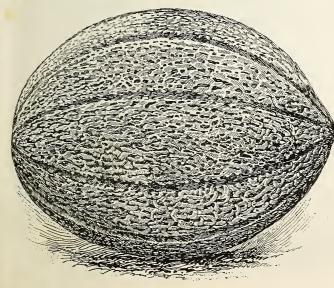

- Tip Top medium to large size, nearly round, slightly ribbed and fairly well covered with shallow netting. The flesh is deep yellow in color and of excellent quality. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.25
- Surprise oval, not deeply ribbed, covered with slight patches of netting; skin yellowish white; flesh deep salmon color; very rich and highly flavored, Pkt. 5c; 0z. 20c; 2 0z.35c; 4 Lb. 60c; Lb. §1.75

**Extra Early Osage** fruits a little smaller, more nearly round and the netting extends over more of the surface. These very desirable features, combined with the thick, deep salmon colored flesh and small seed cavity characteristic of the Osage, make this melon deserving of a place in every home and market garden. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50

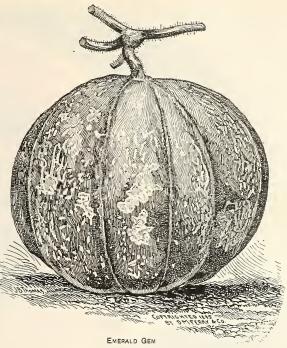

Petoskey, or Paul Rose A yellow of suitable size for a basket melon and of the finest quality. Fruit oval, about five inches in diameter and in general appearance much like the Netted Gem, but a little larger. Flesh orange colored, highly flavored, very thick, firm and sweet. Pkt. 5c; 0z. 20c; 2 0z. 35c; 4Lb. 60c; Lb. \$1.75

Lb. 60c; Lb. \$1.75
 Admiral Togo This is an orange fleshed Netted Gem This is an orange fleshed Netted Gem or Rocky Ford. We have developed in the Admiral Togo a small musk melon with the very thick, orange flesh and splendid quality of the Defender and possessing the characteristic netting, shape, size and shipping quality of Netted Gem or Rocky Ford. Combining all the good qualities of these two fine varieties we believe the Admiral Togo is an ideal table and basket melon.
 Pkt. 5c; Oz. 20c; 2 Oz. 35c; 4 Lb. 60c; Lb. \$2.00

Hordon A most promising novelty bred and grown by Hoodon Mr. Paul Rose, the melon specialist. The fruits are densely netted, the flesh very thick, rich orange in color and of very fine flavor. The ideal orange fleshed shipping melon (See cut and further description in Sup-plement, page 6) Pkt. 10c; 0z. 35c; 2 0z. 60c; 4 Lb. \$1.00; Lb. \$3.50

ADMIRAL TOGO

**Defender** This splendid variety was originated and in-troduced by us in 1901 and we have taken pride in maintaining our stocks in the highest state of theshed sorts and in some respects is far superior to any of this class. The fruit is medium sized, oval in shape, slightly ribbed, covered with gray netting. The flesh is firm, fine grained, rich, deep yellow, darker than that of the Osage and of higher flavor. The flesh extends to the vind and retains its color and quality quite to the outer shell which, though thin, is very hard and firm so that her an remove the edible portion with a spoon, leaving a prind no thicker than that of an orange. The vine is vigor-different with the melon introduced two years ago and sold largely as Bur-rell's Gem. Pkt. 5c; 02, 20c; 20c; 32c; 24 Lb, 60c; Lb, \$2.00

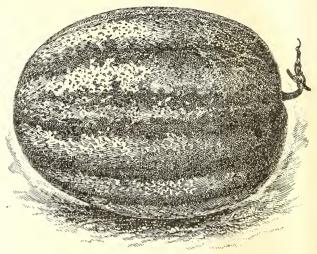

Osage, or Improved Fruit me-dium siz-Miller's Cream ed, oval, slightly ribbed; dark green in color, covered more or less with shal-low netting. The flesh is deep salmon color and very thick, there being but a slight cavity in the center of even the largest fruit. A favorite variety for the later markets, as there is always a con-siderable demand for it from the res-taurants and hotels where its excellent upulities are highly appreciated. We taurants and hotels where its excellent qualities are highly appreciated. We have taken a great deal of pains to de-velop the thick, deep, rich colored and finely flavored flesh of this sort, and careful comparison on our trial grounds prove it to be unequalled, even by "special selected seed" offered at very high prices. Pkt, 5c; 0z. 20c; 2 Oz. 35c; 4 Lb. 60c; Lb. \$2.00

McCotter's Pride This late va-riety is the re-sult of long continued skillful breeding and selection, with the purpose of se-curing a very large melon of spherical shape, with flesh of fine grain and high quality. The fruit is very large, nearly round, moderately ribbed, dark green in color, partially covered with gray netting; orange-red, very thick, sweet and of fine flavor. Pkt. 5c; 0z. 15c; 2 0z. 25c; % Lb. 40c; Lb. \$1.50 This late va-

### FERRY & CO., DETROIT, MICH. Μ WATE

To make certain of raising good Water Melons, it is essential that the plants have a good start and to this end it is important to prepare hills about eight feet apart, by thoroughly working into the soil an abundance of well rotted man-ure—hen manure, guano, or other forms rich in nitrogen, being most desirable. Over this highly manured soil put an inch or more of fresh earth and plant the seeds on this, covering them about an inch deep. It is important that the seed should not be planted before the ground becomes warm and dry, as the young plants are very sensitive to cold and wet. When the plants have formed the first pair of rough leaves, they should be thinned so as to leave two or three of the strongest and best to each hill. Frequent watering of the plants with liquid manure will hasten the growth, thus dimin-ibling the danger from insect pests. ishing the danger from insect pests.

- Harris' Earliest A splendid, large, extra early melon of exceptionally fine quality, Fruit slightly oval with irregularly mottled stripes of light and dark green. Flesh bright red. sweet and tender One of the most desirable for planting in the north. Pkt. 5c; 0z. 15c; 2 0z. 25c; 3 Lb. 40c; Lb. \$1.25
- Phinney's Early This variety is un-usually hardy and a sure cropper. Vines vigorous and produc-tive, fruiting quite early, fruit medium size, oblong, smooth. marbled with two shades of green; rind thin: flesh pink, tender and crisp. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.
- D. M. Ferry & Co's as Ice Cream Peerless gardens and for market gar-deners who deliver direct to consumers. Vine moderately vigorous, hardy, produc-tive; fruit medium sized, oval, bright green, finely veined or mottled; rind thin, flesh bright scarlet, solid, crisp, tender and very sweet. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 24 Lb. 25c; Lb. 75c.
- Long Light Icing Our stock of this sort is much better than that usually offered and superior to many strains offered as Early Monarch, etc. Repeated trials have demonstrated that we have very fine stocks of Icing melons, each variety being distinct and showing the type real included of heing a mere mixtupe of white seeded Our stock of this
- melons, each variety being distinct and showing the type well instead of being a mere mixture of white seeded sorts The melons of the Long Light Icing variety are uni-formly long and large, a little irregular in shape and the flesh deep rich red, and of splendid quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 25c; Lb. 80c. Round Light Icing very light green or white, veined and mottled with slightly darker green, Flesh bright, light red, very sweet and tender. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 25c; Lb. 75c.
- Dark Icing indistinctly veined and mottled with lighter shade. Flesh very rich, bright red. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.
- Unsur Monte Cristo, or Kleckley's Sweets passed for home use or near markets, Vine vigorous and produc-tive; fruit of medium size, oval; color dark green, often showing fine russetting; flesh very bright, rich red and exceedingly sweet. So crisp and tender that it will not stand shipping, the fruit bursting open if subjected to even a slight jar, or when the rind is penetrated with a knife. **Pkt. 5c; 0z. 10c; 2 0z. 20c; 4 Lb. 30c; Lb. \$1.00**
- Florida Favorite A splendid melon of largest size and excellent quality, fruit long. Iorida Favorite and excellent quality, fruit long, dark green, mottled and striped with lighter shade; rind thin but frm. flesh very bright, deep red, very sweet, tender and excellent. Pkt. 5c; 0z. 10c; 2 0z. 15c; tender and excellent. 4 Lb. 25c; Lb. 85c.

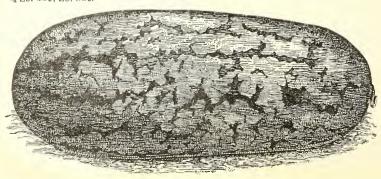

#### HARRIS' EARLIEST

Alabama Sweet where it is grown extensively for shipping. Rind firm, rather dark green, slightly striped; flesh bright red, seed white. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 85c.

- **Ferry's Iceberg** We introduced this 'splendid melon appearance it is similar to the well known Kolb's Gem, but is distinctly darker and the skin where the melon rests but is distinctly darker and the skill where the metod rests on the ground is rich yellow instead of white as in that va-riety, it has a very firm, hard rind and is as good a shipper as the Kolb's Gem but the fields is much deeper colored, extends nearer to the rind, is much more tender and sweet. The best dark colored shipping melon yet produced. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.
- Ki. 5c; 62, 10c; 2 02, 15c; 4 Lb. 20c; 1b. 10c. Kolb's Gem Vines of medium size but remarkably vigorous and healthy. Fruit of the larg-est size, round or slightly oval, marked with irregular mottled stripes of dark and light green. Rind exceed-ingly hard and firm, making it a good sort for shipping. Flesh bright red, solid, a little coarse, but sweet and tender. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

tender. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.
 Dixie growing and hardy, ripening its fruits earlier than most of the large sorts; fruit medium sized to large, about one-third longer than thick. Color of skin dark green, striped with a lighter shade; rind thin but tough; flesh bright searlet, ripens closely to the rind and is of the best quality. This variety is very highly esteemed, especially throughout the south. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

Chilian A new melon of splendid quality which is already very popu-lar on the Pacific coast lar on the Pacific coast and will doubtless take high rank elsewhere as soon as its desirable characteristics have become more generally known. Fruits nearly round known, Fruits hearly round or slightly oblong, skin rich deep green, mottled and striped with a still darker shade; flesh of decidedly bright vermilion red; rebright vermilion red; re-markably fine grained but firm and very sweet. (See colored plate opposite) Pkt.5c; 0z. 10c; 2 0z. 20c; ½ Lb. 30c; Lb. \$1.00

FLORIDA FAVORITE

## CHILIAN WATER MELON

DESCRIPTION ON OPPOSITE PAGE.

## WATER MELON-Continued

FERRY'S ICEBERG

Lb. 85c. One of the

- Gypsy, or Georgia One of the largest, Rattlesnake oldest and most popular sorts, par-ticularly in the south. Fruit oblong, of light green color, distinctly striped and blotched with a darker shade. The flesh is bright scarlet and very sweet. Pkt. 5c; 02. 10c; 2 02. 15c; ¼ Lb. 25c; Lb. 75c.
- Triumph A southern variety which has become very popular with shippers. The fruit is uniformly large, nearly round, dark green, some-times indistinctly striped with a lighter shade and has a thin and firm rind which makes it an excellent ship-per; flesh bright red and of good quality. The vine makes a strong and quarty. The vine makes a strong and visorous growth and can be depended upon under ordinary favorable cir-cumstances to set a large number of fruits. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 25c; Lb. 75c.
- Medium size, uniformly Citron Medium size, uniformly marbled with light green. Flesh white and solid; seeds red. The fruits are not used for eating in the raw state, but for preserves, pickles, etc. Pkt. 5c; 0z. 10c; 2 0z. 15c; <sup>1</sup>/<sub>4</sub> Lb. 25c; Lb. 85c.

**MUSHROOM** The Mushroom is an edible fungus of which there are numerous varieties. We handle the ordi-nary commercial variety of a creamy white color with loose gills which underneath are of pinkish-red, changing to liver color. The mushroom produces seed and there is developed a white, fibrous substance in broken threads, called spawn. which is developed and preserved in horse manure, pressed in the form of bricks. Mushrooms can be grown in cellars, in sheds, in hotbeds or sometimes in the open air, the great essential being a uni-form degree of temperature and moisture. Our space is too limited here to give the necessary cultural directions, but these are published in book or pamphlet form, and will be supplied postpaid at the prices listed inside the back cover. The booklet "Mushroom Culture," price 10c., will be sent free if requested, with an order for spawn of \$1.25 or over.

PURE CULTURE MUSHROOM Culture," price toe, win be sent free in reduested, with the pure Culture MUSHROOM SPAWN. By a newly discovered process of selection and grafting, the spawn is scientifically propagated so that large, vigorous and finely flavored mushrooms are reproduced. Earlier, more productive and a marked improvement on wild spawn, either French or English. Brick, (about 1¼ lbs.) postpaid 40c; 5 bricks, not prepaid, \$1,25

MUSTARD Mustard is not only used as a condiment but the green leaves are used as a salad or cut and boiled like spinage. Sow as early in the spring as the ground will permit, in drills about eighteen inches apart, covering one-half inch deep. For succession, sow every few weeks till autumn. Water freely. In the south the seed should be sown in autumn and the plants used early in the spring as a salad and for greens.

White English Leaves comparatively smooth and deeply cut; color medium branch as it approaches early maturity and soon bolts to seed. Pkt. 5c; Oz. 10c; 2 Oz. 10c; 4 Lb. 15c; Lb. 35c.

Southern Giant Curled Leaves light green, frilled and much crimped at edge. Highly esteemed in the south for its vig-orous growth and good quality. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 65c.

NASTURTIUM TALL MIXED GARDEN. Cultivated not only for orna-ment but its beautiful orange colored flowers serve as a garnish for dishes and the young leaves are excellent for salads. The green seed pods preserved in vinegar make a pickle greatly esteemed by many. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c. For other varieties of Negturity are great set of the set of Nasturtium see page 81.

OKRA, OR GUMBO Cultivated for its young seed pods which are used in soups or stewed and served like apart, putting six to eight seeds in a hill and after the plants are well started, cut out all but two. The dwarf sorts can be planted much closer in hills, two to three feet apart or in drills two feet apart, thinning the plants to about one foot apart in the row. Gather the pods when quite green and about an inch and one-half long.

A great improvement on the old White or the Green. The White Velvet A great improvement on the old white or the Green. The smooth pods which retain their tenderness until nearly full sized. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c.

Perkins' Mammoth Long Pod earlier than most sorts. The pods are long, slender, deep green and remain tender much longer than most sorts. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c.

Dwarf White thick and fleshy. The longest podded variety; the plants are two feet high and very productive. Mature pods long, greenish white, very Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 20c; Lb. 50c.

WHITE VELVET OKRA

ONION

The Onion not only contains considerable nutriment and has valuable medicinal properties, but is most useful in counteracting the bad effects of sedentary life. The disagreeable odor it imparts to the breath may be avoided in a great measure by thorough cooking, or by eating a few leaves of parsley. In onion culture, thorough preparation of the ground, careful sowing and the best of after culture, though essential for a full yield, will avail nothing unless seed of the best quality be used. Given the same care and conditions, the product from two lots of onion seed of the same variety but of different quality may be so unequal in the quantity of merchantable onions that it would be more profitable to use the good seed though it cost twenty times as much as the other. Our thorough equipment and long experience in growing onion seed of the very best quality, enables us to say without hesistation that our stock is fully equal to any and superior in quality to most that is offered. Although onions are often raised from sets and from division, by far the best and cheapest mode of production is from seed. The facility with which seed is sown and the superior bubbs it produces, recommend it for general use.

#### TO RAISE HO W ONIONS

HUW IU KAISL UNIONS THE SOIL. A crep of onions can be grown on any soil which will produce a full crop of corn, but on a stiff clay, very light sand or gravel, or on some muck or swamp lands, neither a large nor a very profitable crop can be grown. We prefer a rich loam with a slight mixture of clay. This is much better if it has been cultivated with hoed crops, kept clean from weeds and well manured for two years previous, because if a sufficient quantity of manure to raise an ordinary it here such as the step of the marker. Source of the marker was an and the step of the marker was a star on the star on the marker was a star on the star on the star on the marker was a star on the marker was a star on the star on the marker was a star on the star on the star on the star on the marker was a star on the st because if a sufficient quantity of manure to raise an ordinary soil to a proper degree of fertility is applied at once, it is likely to make the onions soft. The same result will follow if we sow on rank mucky ground or on that which is too wet.

MANURING. There is no crop in which a liberal use of manure is more essential than in this and it should be of the best quality, well fermented and shoveled over at least twice during the previous summer to kill weed seeds. If rank, fresh manure is used, it is liable to result in soft bulbs with many scallions. Of the commercial manures, any of the high grade, complete fertilizers are good for ordinary soils and even very rich soils are frequently greatly benefited by fine ground bone, and mucky ones by a liberal dressing of wood ashes.

PREPARATION. Remove all refuse of previous crops in time to complete the work before the ground freezes up and spread the composted manure evenly at the rate of about fifty cart loads to the acre. This should first be cultivated in and then the ground ploughed a moderate depth, taking a narrow furrow in order to thoroughly mix the manure with the soil. Carefully avoid tramping on the ground during the winter. Cultivate or thoroughly stir the soil with a deep working cultivator or harrow as early in the spring as it can be worked and then in the opposite direction with a light one, after which the entire surface should be made fine and level with a smoothing harrow or hand rakes. It is impossible to cultivate the crop econ-omically unless the rows are perfectly straight; to secure this, stretch a line along one side, fourteen feet from the edge and make a distinct mark along it; then having made a wooden marker, something like a giant rake with five teeth about a foot long and standing fourteen inches apart, make four more marks by carefully drawing it with the outside tooth in and the head at right angles to the perfectly It will not do to store onions in large piles or masses, parting

SOWING THE SEED. This should be done as soon as **SOWING THE SEED.** This should be done as soon as the ground can be gotten ready and can be done best by a hand seed drill This should be carefully adjusted to sow the desired quantity of seed about one-half inch deep. The quantity needed will vary with the soil, the seed used and the kind of onions desired. Thin seeding gives much larger onions than thick seeding. Four or five pounds per acre is the usual quantity needed to grow large onions. We use a drill with a roller attached, but if the drill has none, the ground should be well rolled with a light hand roller im mediately after the seed is planted. mediately after the seed is planted.

mediately after the seed is planted. **CULTIVATION.** Give the onions the first hoeing just skimming the ground between the rows, as soon as they can be seen in the row. Hoe again in a few days, this time close up to the plants after which weeding must be begun. This operation requires to be carefully and thoroughly done. The weeder must work on his knees astride the row, stirring the earth around the plants, in order to destroy any weeds that have just started. At this weeding or the next, accord-leaving from eight to twelve plants to the foot. In ten days or two weeks they will require another hoeing and weeding leaving from eight to twerve plants to the root. In the days or two weeks they will require another hoeing and weeding similar to the last and two weeks later give them still another hoeing and if necessary another weeding. If the work has been thoroughly done at the proper time, the crop will not require further care until ready to gather.

**GATHERING.** As soon as the tops die and fall, the bulbs should be gathered into windrows. If the weather is fine they will need no attention while curing, but if it is not they will need to be stirred by simply moving them slightly along the row. Cut off the tops when perfectly dry, about half an inch from the bulb and then after a few days of with the science for winter. bright weather the onions will be fit to store for winter.

It will not do to store onions in large piles or masses, particularly in warm weather, or if they are the least moist, but if perfectly dry when gathered and they are spread not to exceed two feet in depth, they can be kept in fine condition till spring. Any arrangement will answer that will keep them dry and at a uniform temperature of about 32° Fr, or they may be kept frozen, care being taken not to disturb them. They should be thawed gradually. Repeated freezing and thawing will spoil them.

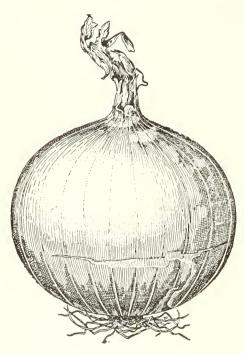

Large Red Wethersfield and red variety and a favorite onion in the east, where immense crops are grown for shipment. Bulb large, flattened, yet quite thick; skin deep purple-red; flesh purplish white, moderately fine grained and rather strong flavored. Very productive, the best keeper and one of the most popular for general cultivation. The variety does best on rich, moderately dry soil but on low muck land it is more apt to form large necks than the Dauvers. There is no better sort for poor and dry soils. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

LARGE RED WETHERSFIELD

#### D. M. FERRY & CO., DETROIT, MICH.

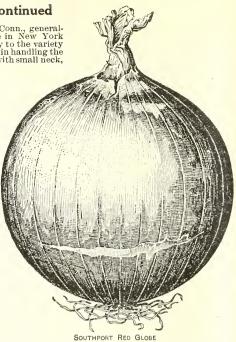

# **NION**-Continued Southport Red Globe The onions from Southport, Conn., generally command an extra price in New York grown and partly to the favorable soil and the extra care taken in handling the crop. The Southport Red Globe is of medium size, spherical, with small neck, very deep, rich red color and of superior quality. We offer a strain of exceptionally fine color and excellent quality; much superior to that usually sold. Pkt. 5c; 0z. 20; 2 0z. 35c; 3 Lb. 60c; Lb. \$1.75

- Large Yellow Dutch, Flat; flesh white, fine or Strasburg grained, mild and well flavored. Our market is distinctly superior in size of bulb, uniformity of shape and evenness of color. Pkt. 5c; 0z. 15c; 2 0z. 25c; 24 Lb. 40c; Lb. \$1.50
- Yellow Danvers A fine productive variety of me-dium size; skin coppery yellow; flesh creamy-white, comparatively mild and well flavored. The bulbs are rather flat with small necks and ripen down very evenly. This is still a standard, general crop, yellow onion where a strictly globe shaped bulb is not demanded. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.50

YELLOW GLOBE DANVERS

- Yellow Globe Danvers The Danvers Onion nearly flat and it has been thought by many that its small neck and splendid ripening habit could only be obtained in onions of that shape. We have by careful selection and breeding developed a strain which has to a remarkable degree the ripening habit and small neck of the original Danvers and yet is decidedly more globular in form, thus giving larger yields and handsomer bulbs without sacrificing any of the good qualities of the most popular of yellow onions. Pkt. 5c; 0z. 15c; 20z. 25c; & Lb. 40c; Lb. \$1.50
- Michigan Yellow Globe Finest shape, best color and yields largest corp of any yellow onion. The heariest yield of onions is always obtained from rich, black lands. On such soils it is found that a globe shaped onion with a somewhat flat-tened base gives the largest returns and to meet the de-mands of the professional onion growers located on such lands, we have developed this variety. The bulbs are large and uniformly spherical, with very small necks; the largest diameter below the center of the bulb; of a rich, orange-yellow color; enormous yielders and sphen-did keepers. No onion grower can afford to plant in-ferior seed when such as this can be procured. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 3 Lb. 60c; Lb. \$1.75

Southport Yellow Globe ter and quality as the Southport Red Globe, but the color is a rich yellow, Pkt. 5c; 0z. 20c; 2 0z. 35c; <sup>34</sup> Lb. 60c; Lb. \$1.75

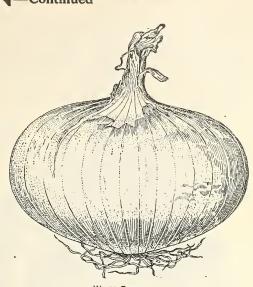

Mammoth Yellow Spanish, A very handsome or Prizetaker est size and nearly globular in form. Skin is yellowish brown; flesh white ed very early in hot beds it will produce a mammoth onion the first season. Pkt. 5c; 0z. 20c; Lb, \$2.00

MICHIGAN YELLOW GLOBE

## ONION-Continued

White Portugal, or American A medium of mild flavor and with beautiful, clear when young as a salad or bunching onion and for pickles; it is also a good keeper and fine for fall and early winter use. An excellent sort for gardeners who do not care to plant more than one variety. Pkt. 5c; 0z. 30c; 20z. 55c; 4 Lb. \$1.00; Lb. \$2.75

<sup>4</sup> Lb. \$1.00; Lb. \$2.75 White Globe Some and uniformly globe shaped bulbs. The flesh is firm, fine grained, of mild flavor and as a table variety its clear white color is exceptionally attractive. Sometimes called Southport White Globe. To produce the beautifully white onions so much sought in every market, one must first of all have good seed; second, grow them well on rich lands; third, exercise great care in harvesting and curing the crop. In Southport they "cord" up the onions in long rows, the bulbs on the inside and cover with boards, so that the bulbs in the open air to discolor them. We have by years of careful selection and breeding developed a strain which has no equal in uniformity and beauty of shape and color. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

WHITE PORTUGAL

### IMPORTED ONIONS

The flavor of the Italian varieties is mild and they are in every way well adapted to culinary purposes. The following varieties have been tested in this country and have given perfect satisfaction.

An extra early, very white skinned variety of especial value for pickling. If seed is sown out of doors in spring it will produce bulbs about an inch in diameter. If these bulbs are set out the following spring, or if plants are grown under glass in winter and set out in the spring, they will produce large onions. This variety is the one most generally used in this country for producing the small pickling bulbs. For this purpose growers usually plant the seed thickly in drills fifteen inches apart and use forty to fifty pounds to the acre. Pkt 5c; 0z. 20c; 2 0z. 35c; 3 Lb. 60c; Lb. \$1.75

Early Neapolitan Marzajola A very early, ned variety desirable for early use and for pickling. It can be sown in February or March and will mature a crop very early in the season. In the south the seed can be sown in autumn and large onions produced in March. Known also as Early May. Pkt. 5c; Oz. 15c; 2 Oz. 25c; % Lb. 40c; Lb. \$1.50

Giant White Italian Tripoli A large, beautiful, onion of mild and excellent flavor. Will produce a somewhat larger bulb from seed than our White Portugal, but to attain full size the seed should be started very early in a hotbed and the plants set out in rich soil. Pkt.5c; 0z.15c; 2 0z. 25c; ½ Lb. 40c; Lb. \$1.50

Mammoth Silver King A very large onion, re-Italian Tripoli, but is larger, slightly later and rather a better keeper, making it more desirable for the later fall market. The skin is silvery white; flesh pure white, very tender and mild flavored. Pkt. 5c; 0z. 15c; 20z. 25c; %1b. 40c; Lb. \$1.50

### ONION SETS

To raise onion sets from seed, use good ground prepared as for large onions and sow the seed very thick in broad drills, using forty to sixty pounds per acre. If the seed is sown thin, the bulbs will not only be too large for sets but will not be of the right shape and if sown thick on poor land they will be necky or bottle shaped. When onion seed is sown for sets, the seed may be planted somewhat later than for large bulbs, but fine crops are more likely to come from comparatively early sowing.

RED BOTTOM SETS. Treated precisely as top onions are, setting them out in the spring instead of sowing seed. Per Lb. 35c. postpaid: 100 Lbs. \$14,00

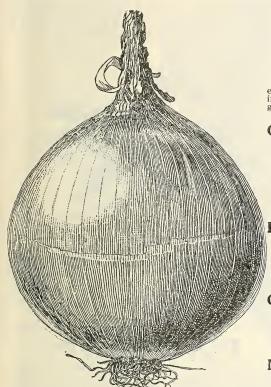

MAMMOTH YELLOW SPANISH OR PRIZETAKER

YELLOW BOTTOM SETS. Like the preceding except in color and used in the same manner. Per Lb. 30c. postpaid; 100 Lbs. \$12.00

WHITE BOTTOM SETS. These do not keep as well as the red or yellow, but produce beautiful white onions early in the season. Per Lb. 35c; postpaid; 100 Lbs. \$14.00

Prices by the 100 lbs, of all onion sets are subject to fluctuations of the market. The price per single pound will hold good throughout the season, or as long as our stock lasts.

The 100 pound prices of Onion Sets are by freight or express at purchaser's expense for transportation.

## PARSLEY

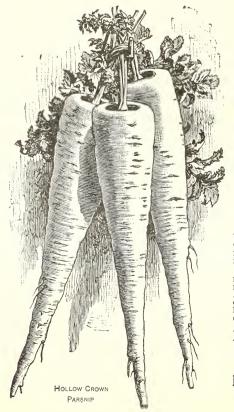

Very useful for flavoring soups and stews and for garnishing. The green leaves are used for flavoring or they may be dried crisp, rubbed to powder and kept in bottles until needed.

Publed to powder and kept in bottles until needed. Parsley succeeds the best on rich, mellow soil The seed is even slower than parsnip in germinating and should be sown as early as possible in the spring, in drills one to two feet apart and when the plants are well up thin to one foot in the row. When the plants are about three inches high cut off all the leaves; the plant will then start a new growth of leaves which will be brighter and better curled and later, if these turn dull or brown they can be cut in the same way; every cutting will result in improvement. The Moss Curled variety makes beautiful border plants.

PLAIN

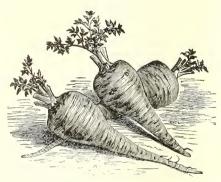

Plain Leaves flat, deeply cut but not curled; dark color as well as the hardiness of the plant and its superiority for flavoring. The curled sorts are more extensively used for garnishing. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 20c; Lb. 60c.

CHAMPION MOSS CURLED

Champion Moss Curled A handsome, compact growing variety with finely cut and densely curled leaves of a deep green color. Owing to its uniformly fine color and very attractive foliage, this is one of the most popularsorts. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

TURNIP ROOTED OR HAMBURG

Turnip Rooted, or Hamburg The root is the edible portion of this variety and resembles a small parsnip both in color and shape, Flesh white, a little dry and having a flavor similar to celeriac. The foliage is practically the same as that of Plain Parsley. Very hardy and should be cultivated like parsnip. Extensively grown and used for flavoring soups and stews, Pkt. 5c; 0z. 10c; 2 0z. 15c; <sup>3</sup>/<sub>4</sub> Lb. 20c; Lb. 65c.

## PARSNIP

The value of the Parsnip as a culinary vegetable is well known but is not generally appreciated at its full value for stock feeding. On favorable soil it yields an immense crop of roots which are more nutritious than carrots or turnips and particularly valuable for dairy stock.

Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow to germinate, it should be sown as early as possible in drills two and one-half feet apart, cover onehalf inch deep and press the soil firmly over the seed. Give frequent cultivation and thin the plants to three or four to the foot.

Long White Dutch, or Sugar Roots very long, white, most excellent flavor, Very hardy and will keep through winter without protection. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 50c.

Hollow Crown, or Guernsey With a smooth, clean skin. The variety is easily distinguished by the leaves growing from depression on the top or crown of the root. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 50c.

**PEAS** For early peak the soil should be light and warm, but for general core a moderately heavy soil is better. Fresh manure and very rich or wet mucky soil should be avoided, as they cause a rank growth of vine at the cost of the quality of the peak; such soil is often the cause of early variety on warm, quick soil, prepared the fall before. The general crop can be delayed until later, but we have met with better success from sowing all the varieties comparatively early, depending for succession upon selecting sorts that follow each other in maturity. The peak will give quicker returns if covered only one inch deep and where earliness is most important they may be treated in that way. Larger pods and more of them will be produced if the seed be planted in trenches three to six inches deep and covered with only one or two inches of soil; when the plants are five or six inches high fill the trench level with the surface; this will secure deep rooting, prevent mildew and prolong the bearing season. If the peak be covered to the full depth at first, or if water be allowed to stand in the trenches they will not germinate or grow well.

### EXTRA EARLY VARIETIES

Ferry's First and Best The earliest and of white, extra early peas in existence, maturing so well together that sometimes a single picking will secure the entire group Vince picking will secure the entire crop. Vines vigorous and hardy, two and one-half to three feet high, bear hardy, two and one-hail to three feet high, bear ing three to seven straight pods, each containing five to seven medium sized, smooth peas of fair quality. The seed is small sized, smooth, yellowish-white. The stock we offer is much superior to most on the market and has proven to be more even than the similar strains formerly sold as Extra Early, Rural New Yorker and Improved Early Daniel O'Rourke. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00 Bu. \$5.50

## Earliest of All, By care-

or Alaska lection and have developed stock of this smooth blue pea of un-equaled evenness in growth equated evenness in growth of vine and early maturity of pods which are filled with medium sized, bright green peas of good flavor. Seed small, smooth and bluish green in color. Matures all the grow at once and is conthe crop at once and is an invaluable variety for mar-ket gardeners and canners. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

An Thomas Laxton early wrinkled variety of great merit. Vine three to three and one-half feet high, sim-ilar to that of Gradus, but darker in color, hardier and more preductive Podelerge

darker in color, hardler and more productive. Pods large, long, with square ends, similar to but larger, longer, and darker than those of the Champion of England and as uniformly well filled. The green peas are very large, fine colored and un-surpassed in quality. We are certain that the earliness and productiveness of this pea needs only to be known to make it one of the most popular sorts for the market and home garden. popular sorts for the market and home garden, as in appearance and quality it is one of the very best varieties yet produced. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Pf. 25c; Qf. 35c; 4 Qfs. \$1.25; Bu. \$7.00 Gradus vine is similar in appearance to Telephone but only three to three and one-half feet high. The immense pods are as large as those of the Telephone, uniformly well shaped, handsome and more attractive than those of the first earlies The peas are very large, of splendid quality and beautiful color which they retain after cooking This variety is practically the same as that sold as Prosperity. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

American Wonder The earliest of the dwarf, branching, about nine inches high and covered with well filled pods containing five to eight large, exceed-ingly sweet, tender and well flavored peas. Seed medium ideal grannelly flattance uninkled and ned encome sized, generally flattened, wrinkled and pale green. We have taken great pains in growing our stock and know it to be much better than that usually offered. Pkt.10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

Nott's Excelsion The best early, dwarf pea. It com-bines the good qualities of the American Wonder and Premium Gem peas. The vines are larger and more productive than American Wonder and earlier than Premium Gem and average about twelve inches high. The peas, in sweetness and qual-ity are unsurpassed Seed wrinkled, green and some-what flattened. A most desirable sort for the market gar-dener and unsurpassed for the home garden. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

**Premium Gem** (Improved Little Gem) A very de-itely similar to but better than McLean's Little Gem. The vine is very productive and grows to a height of from fifteen to eighteen inches. The polds are of medium size and crowded with six to eight very large peas of fine quality. The seed is green, large, wrinkled, often flattened. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

Sutton's Excelsion A splendid, early, wrinkled pea maturing nearly as soon as Nott's Excelsior but more vigorous in vine and bearing pods which are decidedly larger and well filled with large peas of the finest quality. (See cut and further descrip-tion in Supplement, page 7) Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

GRADUS

## PEAS SECOND EARLY VARIETIES

McLean's A green, wrinkled variety about two and one half to three feet high IVICLEAN'S two and one half't othree feet high Advancer with broad, long pods which are abundantly produced and well filled to the ends. This peaks used very exten-sively by market gardeners because of its productiveness, the fine appear-ance of its pods and is popular with consumers on account of its quality. It is also largely used by canners. By careful selection we have de-veloped a strain showing marked improvements in vigor of plant, size of pod and productiveness. Pkt.10c; Pt. 25c; Qt. 40c; 4 Qts.\$1.50; Bu. \$8.00 Bu. \$8.00

- Vines stout. Yorkshire Hero about two and one-half feet high, bearing at and one-hair feet high, bearing at the top a number of broad pods fill-ed with large peas that remain a long time in condition for use and which never become as hard as most sorts. The peas are of fine quality and will be preferred to any other by these when like a riab memory and will be preferred to any other by those who like a rich, marrow-like pea. Seed large, wrinkled and flattened. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00 Wine' Every hearing. Vin e
- Bliss' Everbearing stout, about two and one half feet high, bearing at the top six to ten broad pods. If these are picked as they mature and the season and soil are favorable, the plant will throw out favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolong-ing the season. The peas are very large and wrinkled, cook very quick-ly, are tender, of superior flavor and preferred by unary to any other sort. Pkt. 10c: Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00 The Admiral about four feet bigh Pods usually horne in pairs

high. Pods usually borne in pairs, curved, bright green, crowded with six to nine peas of the very best quality and color. We know of no pea which remains palatable longer after it becomes large enough to use. Seed much wrinkled, of medium size, cream color. Owing to its great vigor, productiveness, fine color, quality and suitable size of the green peas, it is admirably adapted for canners' use. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

Duke of Albany Avery large, similar to Telephone in growth and season but darker in color of foliage season but darker in color of foliage and pods. Vine four and one-half to five feet high, vigorous and strong growing; pods very large, straight and thick, borne in great profusion and when in condition for picking, of a deep green color. There is an 'ncreasing demand for peas of this color and the productiveness of this variety makes it a very profitable

variety makes it a very profitable sort for market gardeners while its splendid quality should give it a place in every home garden. In many localities this variety is sold as an improved strain of Telephone, especially by market gardeners who find its darker color a distinct advantage is that the node working a mayles bab a distinct advantage in that the pols retain a marketable appearance longer after picking than do those of lighter colored sorts. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Telephone The Telephone has become the leading pea preciates fine appearance and high quality. Vines vigorous, growing about four feet high, with large, coarse, light colored leaves and producing an abundance of very large pods filled with immense peas which are tender, sweet and of excellent flavor. It comes into use soon after the Premium Gem and is one of the best sorts for either home or market. Notwithstanding the large amount of inferior and spurious stock which has been sold, no pea has attained greater popularity than this, thus showing that it has sterling merit. The stock we offer has been carefully selected and is very prolific. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50 If Peas are wanted by mail or express prepaid ad The Telephone has become the leading pea

If Peas are wanted by mail or express prevaid add 10 cents per pint. 15 cents per guart for charges.

¢: DUKE OF ALBANY

Telegraph, or Long Stronger growing and hardier vine with darker foliage and pods than the Telephone; peas very large and of dark green color; seed almost smooth. A splendid sort for the market garden; will give good returns even under conditions that would cause most varieties to fail. Pkt. 10c; Pt. 20c;

would cause most varieties to fail. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1,00; Bu. \$5,50 Alderman respects the very best early main crop variety of the valuable Telephone type. The vines grow nearly five feet high, are dark green, vigorous and ex-ceedingly productive. Pods very large, long, dark green, similar to Duke of Albany and about the same in season. The peas are of largest size and unsurpassed in quality. Market gardeners are demanding the large podded, dark colored sorts which retain their fine appearance even after shipping a long distance. The Alderman answers these requirements and furthermore is the most produc-tive variety of this class. We recommend it unreserved-ly. (See cut in Supplement, page 7) Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

## **PEAS**—LATER VARIETIES

**Daisy** similar to Improved Stratagem but a little earlier maturing and lighter in color of vine and pod. A vigorous growth is characteristic of this variety. Market gardeners, even when the season is not the most favorable can depend on it for a splendid yield of handsome pods filled with large peas of the finest quality. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7:50

Improved Stratagem lish varieties of peas have been so wanting in uniformity and evenness of type as to disgust American planters, but by constant effort we have developed a stock which comes are not not besite to propuge it one of the by constant error: we have developed a stock which comes true and we do not hesitate to pronounce it one of the best of the large podded sorts. The pods are of largest size and uniformly filled with very large, dark green peas of the finest quality. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Pride of the Market Vines of medium height, green leaves and bearing at the top, generally in pairs, a good crop of large, dark green pods well filled with large peas of good flavor. We have given this variety special attention and the stock we offer is so much superior to that commonly sold as to seem a different sort. We recom-mend it as one of the very best of the large podded varieties.

of the large podded varieties. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

Abilitication and a second second

Dwarf Champion ever known is proving a popular main crop sort for the market or home garden. The vine is only about three feet high, vigorous, hardy, and unusually productive. Pods fully four inches long, broad, quite straight, dep green in color, handsome and very well filled with large peas which are tender and unsurpassed in quality. The stock we offer is vastly superior in productiveness, size of pod and quality to much that is sold under this name. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50 This is a comparatively new

Horsford's Market Garden The vine is of medium height, giving the greatest number of pods of any on our list, Pods contain five to seven medium sized, sweet, dark green peas which retain well their color and sweetness after canning. (Very short crop; sold out)

Melting Sugar in this country but much used abroad in which the sweet, brittle and succulent pods have none of the tough, inner lining found in the ordinary va-rieties of garden peas; they are used in the same way as snap or string beans. The best of these edible podded sorts is the Melting Sugar of which we offer a very fine strain. The pods are very large, extremely tender, finely flavored and are borne in great abundance on vines four to five feet high. Pkt. 10c; Pt. 25c; Qt. 40c; 40ts.51.50;Bu.\$8.00

Very Champion of pro-**England** ductive and universally admitted to be one of the richest and best flavored peas. Height flavored peas. Height four to five feet; seed light green and much shriveled. Very inferior and mixed stocks of this sort are frequently of-fered but when the seed is as well grown and se-lected as that we offer we consider the variety equal in quality to any in cultivation and one of the best of its season, either for the amateur or mar-ket gardener. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

Vines Large White about Marrowfat five feet high and of strong growth. Pods large, cylindrical, rough, light colored and well filled; seed large, smooth, round and light yellow. The variety is excellent for summer use but is inferior in quali-ty to most of the newer sorts, although undoubt-edly one of the most productive of the garden varieties. Pkt. 10c; Pt. 15c; Qt. 20c; varieties. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 60c; Bu. \$3.00

Large Blackeye Marrowfat An exvariety, growing about five feet high; a very prolific bearer of large pods; one of the very best Marrowfat sorts. Pkt. 10c; Pt. 15c; Gt. 20c; 4 Qts. 60c; Bu. \$3.00

DWARF CHAMPION

FIELD PEAS Field Peas deserve more general attention for fodder than they now receive. In the north for dairy cows and for hogs, they are fully equal to corn, and about six weeks earlier. For cows, the crop should be cut and fed green. For hogs alone it can be used as pasturage. Field Peas can be sown either alone or with oats as early as the condition of the soil will permit. If the stubble from green winter rye or other crops cut in June be turned under and sown to mixed peas and oats, it will furnish a large amount of forage in August when grass pasture is usually short. As fertilizer, field peas should be plowed under when in blossom. They will grow on land that will not produce clover.

No. 1 White and Common White, write for quotations.

If Peas are wanted by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

ΡΕΡΡΕ

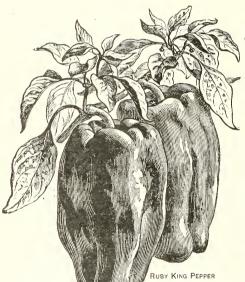

Peppers are used very extensively as a condiment. In Mexico-the hot varieties are eaten raw as we would eat radishes, but the greatest use is for seasoning other dishes. The large, thick fleshed, sweet varieties are eaten more extensively farther north and are served in various ways, green or ripe, with vinegar and salt, like tomato salad, or made into mangoes by cutting one side, removing seeds and filling with chow chow pickles. The culture of peppers is the same as for egg plant and the plants need quite as much heat to perfect them. Guano, hen dung, or any other bird manure hoed into the surface soil when the plants are about six inches high, will wonderfully increase the product and also improve the quality of the fruit,

Red Cherry A second early sort. Plant tall, bearing a pro-fusion of round, bright red fruit which is very mental, Pkt. 5c; 0z. 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.50

Red Chili Alatevariety, used in the manufacture of pepper inches long, one third to one half inch in diameter at the base, tapering to a sharp point and exceedingly pungent when ripe. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.50

Long Red Cayenne A well known variety having a about four inches long and when ripe, bright red in color. Extremely strong and pungent flesh. Pkt. 5c; 0z. 25c; 2 0z.40c; 1/2 Lb. 75c; Lb. \$2.50

4 Lb. 75c; Lb. \$2.50 Plants quite dwarf but very prolific. Fruit medium to large in size, of inverted bell shape, rich golden yellow color, with very thick, sweet, mildly flavored flesh. The earliest maturing large pepper. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50

LARGE BELL, OR BULL NOSE PEPPER

Red Squash, or shaped, more or less ribbed; skin Tomato Shaped smooth and glossy; fiesh mild, thick somewhat pungent; early, and very productive, Pkt. 5c; 0z. 25c; 2 0z. 40c; ½ Lb. 75c; Lb. \$2.25

Large Bell, or Bull Nose Variety, sometimes called Sweet Mountain, is a great improvement on the best stock ob-tainable only a few years ago. Plant vigorous, compact, very productive, ripening its crop uniformly and early. Fruit large, with thick, mild flesh, of excellent quality for use in salads and pickles; color bright red when ripe. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 2 Lb. 75c; Lb. \$2.50

Ruby King An improved American variety often four to six inches in length and quite symmetrical in shape. It is very bright colored and the flesh is sweet and mild flavored, Pkt. 5c; 02. 30c; 2 0z. 55c; 4 Lb. \$1.00; Lb. \$2.75

The earliest maturing of the very large Giant Crimson The earliest maturing of the very large in evenness of size and shape. (See cut and full description of this sterling novelty in Supplement, page 6) Pkt. 5c; 0z. 75c; 2 0z \$1.25; 4 Lb. \$2.25; Lb. \$7.00

Sweet Mountain, or Spanish Mammoth inches or more in length by two in diameter: very smooth and handsome, being when fully mature of a rich red color. Flesh very lick, sweet and mildly flavored. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4Lb. 75c; Lb. \$2.50

## PUMPKIN

Pumpkins are not so particular in regard t<sup>\*</sup> soil as melons or cucumbers, but are cultivated the same, though on a larger sca.e, They are raised between hills of corn or in fields by themselves, but more properly belong to the farm than the garden as they readily mix with and injure the quality of the finer squash. **Pie** We consider this a true pumpkin rather than a squash as it is sometimes ered with a fine gray netting. Flesh light yellow, very thick, sweet and finely flavcred. Pkt. 5c; 0z. 10c; 2 0z, 15c; ½ Lb. 25c; Lb. 75c. **Sugar, or New England Pie** quality. Skin deep orange, flesh rich, deep yellow, excellent boiled or for pies. Pkt. 5c; 0z. 10c; 2 0z, 15c; ½ Lb. 20c; Lb. 65c.

Large Yellow and others elongated or flattened. It is of deep rich yellow color, fine grain and excellent quality. Pkt. 5c; 02. 10c; 4 Lb. 15c; Lb. 40c. By freight or express, at purchaser's expense, \$20.00 per 100 lbs.

Sweet Cheese, or Kentucky Field Oz. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 50c. By freight or express at purchaser's expense, \$22,50 per 100 lbs.

SUC'R. OR NEW ENGLAND PIE PUMPKIN

## RADISH

For forcing sow in hotbeds or under glass in rich, sandy soil made perfectly level. Scatter evenly over the surface from fifty to one hundred seeds to the square foot and cover with one half inch of soil sifted on. Careful watering to keep soil moist, even, moderate temperature and good ventilation are required for rapid and best root development. If the bed is a good one the whole crop can be marketed in twenty-one to forty days after planting. For open ground culture sow on rich, sandy soil as soon in the spring as it is fit to work, in drills twelve to eighteen inches apart and thin out the plants to prevent crowding. A good dressing of nitrate of soda will greatly stimulate growth and insure tender, brittle roots. Successional sowings from one week to ten days apart will keep up a supply. After the hot weather of summer begins, it is better to sow the summer and winter varieties, as they do not become tough and stringy nor pithy so quickly as the early sorts. Radishes are subject to root maggots which make them useless for cultary proposes. We know of no certain remedy for this pest. We have found that the best preventive measures are to avoid the use of rank manure and not to sow on ground where radishes, turnips or cabbages were grown the year previous. We have been very careful to secure the very best seed possible and there is none sold under other names which is better than that of the varieties we offer.

Non Plus Ultra, or Early Deep An excellent extra early forcing radish. Scarlet Turnip, Forcing scarlet. Tops very small; thesh white, crisp and well flavored. One of the most handsome of the forcing sorts. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

2. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.
 Prussian Globe This is the smallest forcing This is the smallest forcing tinctly small; root round or slightly flattened, very deep red in color and of the best quality. Remains in condition for use the longest of any of the first early forcing sorts and is a favorite where a very small, deep red radish is desired. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.
 Early Scarlet Slightly olive shaped, a rich, Globe bright scarlet in color; flesh white and tender, fit to pull as early as Non Plus Ultra but much larger when matured. We specially recommend this to gardeners as a large, first early forcing radish. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

4 Lb. 25c; Lb. 90c.

Early Scarlet Turnip, deep scarlet with White Tipped, Forcing as Non Plus Ultra, has as small a top and may be plonted as closely. It is most attractive in one as Non Files Olfra, has as small a top and may be planted as closely. It is most attractive in ap-pearance and cannot fail to give satisfaction as a forcing radish; very popular as a market sort. Sold sometimes as Rosy Gem, Rapid Forcing, etc. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 25c; Lb. 80c.

Early Deep Scarlet, Olive This is an ex-shaped, Short Leaf ind sort, typical in its very small tops and early maturing roots which should be pulled inst as sort of the should be pulled.

its very small tops and early maturing roots which should be pulled just as soon as in condition. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 80c. An early, pure white radish, a little more flattened than Early Scarlet Turnip Rooted and but little if any later maturing. While generally used for early outdoor planting, its small top makes it suitable for forcing. Flesh white, semi-transparent, crisp and tender. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 35c; Lb. 35c; March BreakFAST

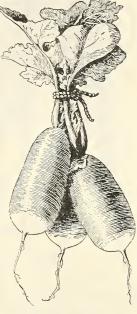

semi-transparent, crisp and tender. Pkt. 5c; 0z. 10c; 2 0z. 15c; ¼ Lb. 25c; Lb. 75c.
Early Scarlet Turnip Rooted top and of very quick growth, deserving general cultivation on account of its rich color and crisp, tender flesh. Very desirable for early outdoor planting, as well as forcing. Pkt. 5c; 0z. 10c; 2 0z. 15c; ¼ Lb. 20c; Lb. 70c.
Early Scarlet Turnip, Gavorite in many large markets for early planting outdoors. White Tipped It is but little later than Early Scarlet Turnip, White The ender due to the satisfaction where extreme earliness and small tops are not the chief considerations. Roots slightly flattend on the underside; color very deep scarlet with a distinct white the color of the bast quality. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 70c.

French Breakfast A quick growing, medium sized radish, rather oblong in shape; color a beautiful scarlet, except near the tip where it is pure white. A splendid variety for the table on account of its excellent quality and attractive color. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 25c; Lb. 75c.

CRIMSON GIANT TURNIP

Crimson A variety extraordi-Giant Turnip n ary in that

This is that while growing to an un-usually large size, it is always tender, crisp and of mild flavor. It re-mains in perfect condi-tion a remarkable long tion a remarkably long time and unlike other forcing varieties does not become pithy even when twice their size in dia-meter. Root is turnip shaped; color a beautiful crimson carmine; flesh crimson carmine; flesh firm. crisp and tender. While very desirable as a second early forcing variety, we specially re-commend it for outdoor planting. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 85c.

## RADISH-Continued

Half Long Deep Scarlet ing point; the flesh is very white, crisp and tender and half long with a somewhat taperbecome pithy till quite overgrown. PKt.5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 85c.

Long Brightest est and hand-Scarlet, White Tipped somest colored scarlet radishes known and a decided improvement in earliness and color over other varieties of this class. Roots mature in about twenty-five days from time of planting and continue in good condition until full grown when they are as large in diameter but a little shorter than Early Long Scarlet; has a small top and can be used for forcing. Pkt. 5c; 0z. 10c; 2 0z. 15c; % Lb. 25c; Lb. 75c.

**Early Long Scarlet**, is a standard **Short Top, Improved** and excellent sort either for private gardens or the market. The roots grow half out of the ground, are very uniform in shape, smooth, and very bright red in color and continue crisp and tender until fully matured, when they are about six inches long. This is the variety which is grown so extensively in Petite Cote, Ontario, where the finest radishes in America are grown. Pkt. 5c; 0z. 10c; 2 0z. 15c; % Lb. 25c; Lb. 75c.

Wood's Early Frame This is a good variety for forcing, being shorter and thicker than the old Long Scarlet Short Top, but is one of the very best sorts for first crop out of doors. Pkt. 3c; 0z. 10c; 2 0z. 15c; 4Lb. 25c; Lb. 75c.

Cincinnati Market Very similar to Early but deeper red in color and remains a little longer in condition for use. Pkt. 5c; 0z. 10c; 20z. 15c; 4Lb. 25c; Lb. 90c.

**Improved Chartier, or Shepherd** for sowing outdoors. Roots are in good condition for the very best ly and continue crisp until they reach a diameter of about an inch and a quarter, thus affording good roots for a long time. The roots are long, cylindrical and scarlet rose in color and gradually taper and shade into white at the tip. Pkt. 5c; 0z. 10c; 2 0z. 15c; 3 Lb. 25c; Lb. 75c.

Early Golden Yellow Oval Matures quickly, has a small top and neck and resists the summer heat better than the scarlet or white kinds. Root oval, very smooth and handsome; bright, light yellow in color and of excellent quality. Our stock is grown from selected roots and is very fine. Pkt. 5c; Oz. 10c; 2 Oz. 15c; <sup>3</sup> Lb. 25c; Lb. 80c.

**Licicle** A handsome, long, pure white radish. Roots somewhat shorter with smaller tops than Long White Vienna and maturing a little earlier. One of the most desirable of the white summer sorts. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 25c; Lb.80c.

Long White Vienna, or Lady Finger A very excellent variety with long, are crisp and tender. It matures shortly after Wood's Frame. Pkt. 5c; 0z. 10c; 2 0z. 15c; <sup>1</sup>/<sub>4</sub> Lb. 25c; Lb. 75c.

**Early White Giant Stuttgart** not becoming pithy until very late, so that those not used as a summer radish can be stored for winter use. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

White Strasburg Even when comparatively small this variety is in good condition for use and continues crisp and tender until matured when the voots are four to five inches long and about two inches in diameter. This is considered one of the best large, summer sorts. Pkt. 5c; 0z.10c; 20z.15c; 4Lb. 25c; Lb. 75c.

Golden Globe This variety is of quick growth, affording grisp and tender radishes; even in the hottest climate and is extensively grown in the south. Root uniformly globe shaped, with skin golden yellow in color. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4Lb. 20c; Lb. 70c.

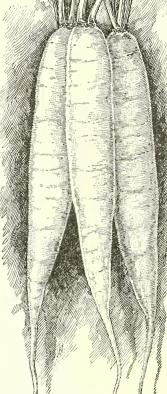

Large White Summer, Turnip Rooted One of the earliest of the summer varieties. Root round, smooth, very white and handsome; flesh crisp, tender and rather pungent in flavor. Pkt. 5c; 0z. 10c; 2 0z. 15c; 3 Lb. 25c; Lb. 75c.

EARLY LONG SCARLET, SHORT TOP, IMPROVED

EARLY WHITE GIANT STUTTGART

icicle

### RADISH-Continued WINTER VARIETIES

Scarlet China Roots cylindrical, or largest at the bottom, tapering abrupt-ly to a small tap. Skin very smooth and of a bright rose color; flesh firm, crisp and pungent. May be sown thicker than most other winter varieties. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 25c; Lb. 80c.

**Celestial** A comparatively new variety which is popular wherever known. so white as to attract attention, even among other white varieties. Flesh very tender and of excellent quality. PKt. 5c; 0z. 210c; 2 0z. 20c; 1/2 Lb. 30c; Lb. \$1.00

Large White Spanish ing about eight inches in length and nearly three inches in diameter. Skin white, flesh white, solid and pungent, though milder than the Black Spanish. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.

SCARLET CHINA WINTER

ROOUETTE

California Mammoth White China First introduced into this country by the Chinese in California. It is pure white, about one foot long and two or three inches through, tapering regularly to the tip. The fiesh is tender and crisp, keeping well through the winter. Pkt, 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. Soc.

Round Black Spanish Roots round, sometimes top Shaped, three or four inches in diameter; skin black, flesh white, very compact and highly flavored. An excellent sort for winter, as the roots keep a long time. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 25c; Lb. 75c.

Half Long Black Winter Grayish black skin and crisp, pungent but well flavored white flesh. Roots about six inches long and two to three inches thick. Pkt. 5c; 0z. 10c; 2 0z. 20c; <sup>3</sup>4 Lb. 30c; Lb. \$1.00

Long Black Spanish One of the latest hardiest of radishes, an excellent sort for winter use. Roots of medium size, oblong, black and flesh of firm texture. Pkt. 5c; 0z. 10c; 2 0z.15c; ½ Lb. 25c; Lb. 75c.

LONG BLACK SPANISH

### **RHUBARB**, or Pie Plant

Rhubarb, also known as Pie Plant, or Wine Plant, is grown for its leaf stalks which are stewed and also used for pies and tarts. Immense quantities are now annually sold in all of the large markets. No private garden should be without it.

sold in all of the large markets. No private garden should be without it. Rhubarb succeeds best in deep, somewhat retentive soil and the richer this is and the deeper it is stirred, the better. Sow in drills an inch deep and thin out the plants to six inches apart. In the fall transplant into very highly manured and deeply stirred soil, setting them four to six feet apart each way and give a dressing of coarse manure every spring. The stalks should not be plucked until the second year and the plant never allowed to exhaust itself by running to seed. Our seed is saved from selected plants of the Linnæus, Victoria, Giant and other improved sorts, but like the seeds of fruit trees, rhubarb seed cannot be relied upon to reproduce the same varieties. SEED\_Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.25 ROOTS—by express, not prepaid, 10c each, \$1.25 per dozen; by mail, prepaid, 15c each.

ROQUETTE seed in shallow drills one foot apart, in early spring and for succession every three or four weeks thereafter. Water freely. The young leaves will be ready for cutting in about six weeks from time of planting. Pkt. 5c; 0z. 10c; 2 0z. 20c; 4 Lb. 30c; Lb. \$1.00

## SALSIFY, or Vegetable Oyster

The roots are long, white and tapering; when cooked form a substitute for oysters, as the flavor is similar. Salsify succeeds best in a light, well enriched soil which should be stirred to a good depth. Coarse and fresh manure should be avoided, as it will surely cause the roots to grow uneven and ill-shaped. Sow early and quite deep, giving the general culture recommended for parsnip. The roots are perfectly hardy and many remain out all winter, but should be dug early in spring, as they de-teriorate rapidly after growth commences. Frost does not injure the roots but before the ground freezes a quantity for winter use may be stored in a pit or in a very cool cellar.

LARGE LEAVED FRENCH SORREL

Mammoth Sandwich Island This va-riety is large, strong growing and less liable to branch than the other sorts. It is invaluable for market gar-deners' use. Pkt. 5c; 0z. 15c; 2 0z. 25c; ¾Lb. 40c; Lb. \$1.25

**SORREL** The improved varieties of Sorrel when well grown and cooked like spinage make a very palatable dish. Sow in drills early in spring and thin the seedlings to six or eight inches apart in the row. One may commence cutting in about two months and the plants will con-tinue in full bearing from three to four years.

Large Leaved French having large, pale green leaves of fine quality. Pkt. 5c; 0z. 10c; 2 0z. 20c; % Lb. 30c; Lb. \$1.90

## SPINAGE

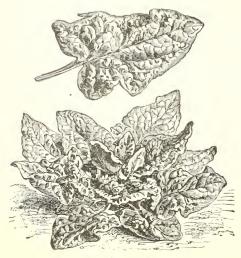

Should be planted in very rich ground, the richer the better. Sow in drills twelve to eighteen inches apart and thin to about six inches apart when the leaves are an inch wide. All should be cut before hot weather, while young and tender. For early spring use sow early in autumn and protect the plants with a light covering of leaves or straw, or plant as soon as the land can be worked in the spring. Under favorable conditions the leaves may be large enough for eating in eight weeks. South of Cincinnati spinage can be grown through the winter with very little, or no covering.

- Savoy Leaved The earliest variety and one of the best to plant in autumn for early spring use. Plant of upright growth, with thick, dark green leaves which are crumpled or blistered like those of Savoy cabbage. It is hardy and grows rapidly to a suitable size for use, running to seed quickly in warm weather. Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 40c.
- Round Summer Broad Leaved A desirable sort in the north for early spring sowing and popular with market gardeners. Leaves large, bright green and of good quality. Though not as hardy as the Prickly Winter, it stands exposure very well. Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 35c.
- Broad Flanders One of the most compact and vigorous growing varieties. The leaves are nearly round, uniformly deep green, thick and somewhat crimped in the center. A very desirable sort, similar to but maturing a little earlier than Victoria. Pkt. 5c; 0z. 10c; 2 0z. 10c; 4 Lb. 15c; Lb. 35c.

EARLY GIANT THICK LEAVED

- Early Giant Thick Leaved A strong growing and early maturing sort, with very large, thick leaves of fine, deep green color. One of the most desirable medium early spinages. Pkt. 5c; Oz. 10c; 2 Oz. 10c; ½ Lb. 15c; Lb. 40c.
- Improved Thick Leaved grows very rapidly, forming a cluster of very large, slightly wrinkled leaves of fine color and quality. Pkt. 3c; 0z. 10c; 20z. 10c; 4Lb. 15c; Lb. 35c.

LONG STANDING PRICKLY

SAVOY LEAVED

Victoria An excellent sort forming a very dark green leaf slightly curled in the center. It becomes fit for use nearly as early as any, remaining so much longer than most kinds and cannot fail to please, whether grown for the market or in the private garden. Pkt. 5c; Oz. 10c; 2 Oz. 10c; 4 Lb. 15c; Lb. 40c.

Long Standing An improved round seeded strain of excellent quality; after reaching maturity it remains in condition for use much longer than most sorts; leaves comparatively smooth and very dark, rich green. Very popular with market gardeners. Pkt. 5c; Oz. 10c; 2 Oz. 10c; 4 Lb. 15c; Lb. 35c.

VICTORIA

- Long Standing Prickly The plants mature a little sorts, but yield a large quantity of very thick and finely colored leaves. Has prickly seed. Pkt. 5c; 0z. 10c; 2 0z. 10c; & Lb. 15c; Lb. 40c.
- Prickly Winter A very hardy variety which will with stand severe weather with only a slight protection of leaves or straw. It is desirable for fall sowing which in this latitude is made about the first of September. The seed is prickly. Pkt. 3c; 0z. 10c; 2 0z. 10c; 4 Lb. 13c; Lb. 33c.
- New Zealand Entirely different from the true spinage in type and in that it thrives during hot weather and in any soll rich or poor. The tender shoots are of good quality and may be cut throughout the summer. Plant three or four seeds in hills two feet apart each way. Pkt. 5c; 0z. 10c; 2 0z. 20c; ½ Lb. 30c; Lb. \$1.00

## SQUASH

The squash is one of the most nutritious and valuable of all our garden vegetables. The summer varieties come to the table early in the season, while the winter sorts can be had in perfection from August until the summer varieties are again in condition. Few farmers appreciate the value of winter squash as food for stock. We think an acre of squash, acre of corn and we strongly urge our readers to try a "patch" for this purpose. Squash plants are very tender and sensitive to cold and so planting must be delayed until settled warm weather. The general methods of culture are the same as those given for cucumbers and melons, but squash is less particular as to soil. The summer varieties should be planted four to six feet apart each way and the winter sorts eight to ten. Three plants are sufficient for a hill. In gathering the winter sorts care should be taken not to bruise or break the stem from the squash, as the slightest injury will increase the liability to decay. Winter squashes should be stored in a moderately warm, dry place and the temperature kept as even as possible.

### SUMMER VARIETIES

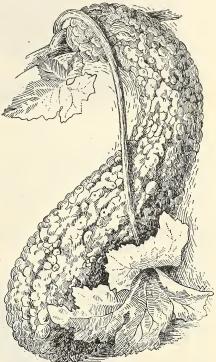

Mammoth White Bush Scallop Many seedsmen have bisted Mammoth White Bush Scallop Street Mammoth Bisted Mammoth Ister Mammoth Ister Mammoth In trade. The fruit is a beautiful, clear white, scalloped squash in trade. The fruit is a beautiful, clear waxy white, instead of the yellowish white so often seen in the old Early White Bush Scallop and is superior to that variety in size and beauty. The handsomest of the scalloped squashes. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 85c.

- Early White Bush Scallop A well known variety of dwarf habit and upright growth. Surface comparatively smooth; color creamy white. The variety matures fruits a little earlier than Mammoth White Bush Scallop. Pkt. 5c; 0z. 10c; 2 0z. 15c; 2 Lb. 25c; Lb. 80c.
- Long Island White Bush A variety that has become quite popular in the east Vine very productive; fruit rather small and often nearly spheri-cal, thick, with only a slight indication of a scallop, skin white; flesh tender and of good quality. Our stock of this is very uni-form. Pkt. 5c; 0z. 10c; 2 0z. 20c; & Lb. 30c; Lb. \$1.00
- Early Yellow Bush Scallop A very early, flat, scalloped variety of largest size; skin deep yellow; flesh pale yellow and well flavored. We have developed a strain of the old Yellow Bush Scallop which is fully as productive but uniformly larger and flatter than the old stock and has a very small seed cavity. Its superiority is so great that we would be justified by prevailing custom in renaming it, Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 85c.

White Summer Crookneck Introduced by us in 1895, the result of years of careful breeding and selection and it is now one of the most fixed and distinct of our summer squashes. The fruit is similar in size and shape to the Summer Crookneck, but of a beautiful ivory white color and unsurpassed in quality. We recommend this sort as the most beautiful and one of the very best of the summer varieties. Pkt. 5c; 0z. 10c; 2 0z. 15c; ¼ Lb. 25c; Lb. 85c.

MAMMOTH WHITE BUSH SCALLOP

MAMMOTH SUMMER CROOKNECK

Summer SUMMER CROOKNECK The old standard sort; very productive and matures the bulk of its crop a little earlier than the Mammoth Summer Crookneck. Fruits when fully grown are about one foot long, with crooked neck and surface uniform ly warty; color bright yellow; shell very hard when ripe. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 25c; Lb. 80c.

Mammoth Summer Vine Crookneck and stronger Summer Crookneck and producing fruit fully twice as large, deeper colored and with rough, warty sur-face. Its large size and attractive color make it a favorite with mar-ket gardeners. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 90c. Vine

**Italian** variety producing large Vegetable Marrow dark green at first but as they matture becoming marbled with yellow and lighter green in stripes. The young and tender fruits when sliced and fried in oil constitute a veget-able delicacy very popular, especi-ally in Naples. Pkt. 5c; 0z. 10c; 2 0z. 20c; 4 Lb. 30c; Lb. \$1.00

## **DUASH** AUTUMN AND WINTER

#### DELICIOUS

**Delicious** We are convinced that this squash is par-respect is now by many considered even better than the Hubbard, It is a very early winter variety of med-ium size; shell moderately hard but very thin; flesh thick, fine grained and bright yellow in color. Even when immature this squash is in condition for use and of finest flavor. Pkt. 5c; 0z. 10c; 2 0z. 20; ½ Lb. 30c; Lb. \$1.00 Lb. \$1.00

Hard Shelled Marrow or drying. Fruit very large, oval, of deep orange red color and though quite smooth, has as hard a shell as the Hubbard. Flesh very thick. rich orange red without a tinge of green even close to the shell and unequalled for making pies, having a flavor and quality similar to but much finer than that of the choicest pumpkin. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 2 Lb. 25c; Lb. 80c.

## TOBACCO

The seed should be sown as early as possible after danger of frost is over. Burn brush and rubbish in the spring on the ground intended for the seed bed; then dig and pulverize the earth and mix with the ashes, after which the seed may be sown and covered very lightly. When about six inches high, transplant into rows four or five feet apart each way. Cultivate thoroughly with plow and hoe.

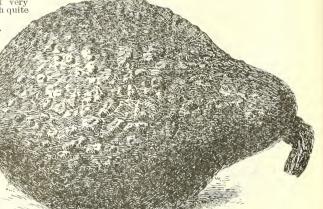

- STERLING. The brightest of the yellow type and being the earliest to ripen is surest in localities liable to early frosts. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ½ Lb. 60c; Lb, \$2.00
- LACKS. Broad leaf, tough, fine fibre. On gray soils cures bright and elastic; on dark soils rich and gummy. Known also as Jessup or Beat All. Good and reliable. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.50
- HESTER. Does better over a wider range of soils and lati-Lude than most yellow varieties and is a sure cropper. It has size, shape, texture and color and ripens early. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00
- SWEET ORONOCO. Used for first-class plug fillers and makes, when sun cured, the best natural chewing leaf. A favorite for the "Homespun" wherever known. Known also as Little Oronoco. Makes an Eastern filler unsur-passed. Pkt. 5c; Oz. 20c; 20z. 35c; ½ Lb. 60c; Lb. \$2.00
- BRADLEY BROAD LEAF. A popular variety for export, mauufacturing and eigars. Pkt. 5c; 0z. 20c; 2 0z. 35c; ½ Lb. 60c; Lb. \$2.00
- PERSIAN ROSE. Finer than the Muscatel and may be relied upon to make the finest cigar stock. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

Golden Hubbard Vine vigorous and wonder-fully productive. Fruits very uniform in size, weighing from six to eight pounds and in shape like the Hubbard, although in condition for use much earlier. They are wonderfully long keep-ers and can be held over in good con-dition for spring use. Shell warty, hard, strong and of a beautiful orange-red color, except for a bit of olive green on blossom end; flesh deep orange, dry, fine grained and exceptionally well flavored. Pkt. 5c; 02. 10c; 202. 15c; ½ Lb. 25c; Lb. 90c. ¼ Lb. 25c; Lb. 90c.

<sup>34</sup> LD. 25C; Lb. 90C. **Boston Marrow** A fall and winter size, oval form, skin thin; when ripe bright orange with a netting of light cream color; flesh rich salmon yellow, fine grained and of excellent flavor, but not as dry as the Hubbard. We have very fine stock of this sort. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 35c; Lb. 75c; **Barborn** A fall or early window with

Fordhock A fall or early winter va-riety of excellent flavor of medium size; slightly ridged: a creamy yellow outside; when cooked the flesh has a very pleasing flavor. Pkt.5c; 0z.10c; 2 0z.15c; 4 Lb. 25c; Lb. 85c.

Hubbard One of the best of the winter squashes; flesh bright orange-yellow, fine grained, very dry, sweet and richly flavored; keeps well through the winter, boils or bakes exceedingly dry and is esteemed by many to be as good baked as the sweet potato. Our stock is carefully selected in regard to quality of the flesh and color of the shell and is much superior to that sold as Chicago Warted or Warty Hubbard. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 85c.

WHITE BURLEY. This variety is especially valuable to manufacturers either for cut or plug tobacco. It is some-times used for wrappers. Pkt. 5c; 0z. 35c; 2 0z. 60c; 4 Lb. \$1.00; Lb. \$3.50

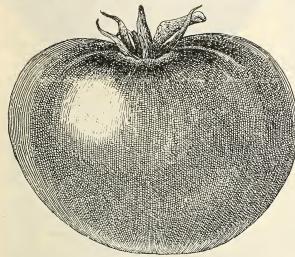

HUBBARD SQUASH

- BIG HAVANA. A hybrid Havana or Cuban seed leaf. A heavy cropper, of fine texture, delightful flavor and the earliest cigar variety to mature and ripen. Will make two crops from one planting in the south, while its earliness makes it most desirable for high latitudes. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50
- SUMATRA. A very vigorous variety of Spanish origin, producing eigar wrappers of the highest quality and especially popular with Florida growers. Pkt. 5c; Oz. 60c; 2 Oz. \$1.00; % Lb. \$1.75; Lb. \$6.00
- CONNECTICUT SEED LEAF. Best adapted to the climate of the middle and northern states, as it is more hardy and endures the cold better than the tender varieties grown south. In many of the northern states and in Canada, this sort is grown almost exclusively. Pkt. 5c; 0z. 20c; 2 0z. 35c; 4 Lb. 60c; Lb. \$2.00
- HAVANA. The leaf of this variety is very thin and fine textured. It possesses a very delicate flavor and is ex-tensively used for cigar wrappers. Pkt. 5c; 0z. 40c; 2 0z. 75c; \$\delta b.\$1.25; bb.\$4.00

MATO

Tomatoes do best on light, warm, not over rich soil and success depends largely upon securing a rapid, vigorous and unchecked growth during the early part of the season. Sow in hot beds from six to eight weeks before they can be set out of doors, which is when danger from frost is past; when the plants have four leaves transplant into shallow boxes or cold frames, setting them four or five inches apart; give plenty of air and endeavor to secure a vigorous but steady and healthy growth, so that at the time of setting in the open ground they will be strong and stocky. Even a slight check while the plants are small will materially diminish their productiveness. Set out of doors as soon as danger from frost is over, but before doing so harden off the plants by gradually exposing them to the night air and by the withdrawal of water until the wood becomes hard and the leaves thick and of a dark green color. Transplant carefully and cultivate well as long as the vines will permit. To insure best results in respect to early ringening as well as the amount and perfection of fruit, it is advisable to train

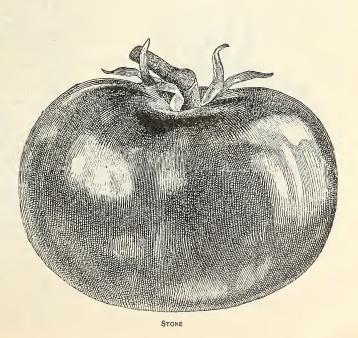

well as long as the vines will permit. To insure best results in respect to early ripening as well as the amount and perfection of fruit, it is advisable to train up and trim the vines, especially if the patch is rather small. When the plants have been properly started and are six to ten inches high they will begin to throw out branches. Select one of the largest and most vigorous of these and plnch off all others except this one and the main stem. Care must be exercised not to plnch off the fruiting branches which, as they appear, can be distinguished by the buds that are formed very early. In a short time these two remaining branches will become equally vigorous and as ordinary varieties will grow four to six feet high during the season, they should be securely tied at intervals of about ten inches to a long stake, preferably two inches square, which has been securely set in near the root of the vine. Fruit will set to almost any height desired if all side branches are kept trimmed off. By such a method of training and trimming the fruits are kept clear from the ground and with free access of sun-light they ripen much earlier; the vitality, otherwise exhausted in superfluous branches and leaves, is utilized in forming fruits of largest size, greatest perfection of shape and best quality. All our Tomato seeds are from seed stocks carefully selected and saved by ourselves. We challenge comparison of our stocks with any offered.

EARLIANA

- Earliana Sometime ago we were able to secure a strain consider-ably earlier and much superior to that usually sold as Spark's Earliana and we now offer carefully selected seed of this most valuable first early sort. Vine similar in growth, maturing bulk of crop as early as Atlantic Prize, but the fruit is larger, distinctly smoother, solid and of very good quality. Early, Sometime ago we were able solid and of very good quality. Early, smooth and of a large size it is a par-ticularly profitable tomato for market gardeners. Pkt. 5c; 0z.30c; 2 0z.55c; 4 Lb. \$1.00; Lb. \$3.00
- Chalk's Early Jewel sider this one of the very best early tomatoes yet introduced. Vine vigorous and very productive. Fruit deep scarlet red, smooth, of large size and excel-lent quality Pkt. 5c; Oz. 30c. 2 0z. 55c; % Lb. \$1.00; Lb. \$3.00
- Early Michigan Second early sorts: Its first fruits are very early and the vines continue for a long time to bear medium sized to large fruit, perfectly smooth, solid, but without a hard core. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.50
- D. M. Ferry & Co's A variety optimus by us and one of the best table tomatoes in quality. Vine medium sized, vigorous and pro ductive. Fruit medium sized, oval, very smooth and of bright crimson-scar-let color. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4Lb. 75c; Lb. \$2.50

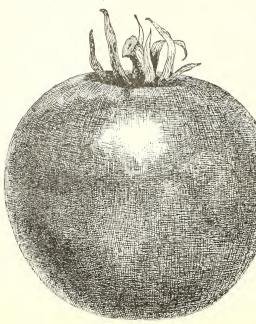

- Perfection A well known standard variety smooth handsome and fruits which are of the highest quality. Pkt. 5c; 0z. 25c; 2 0z. 40c; 24 Lb. 75c; Lb. \$2.50
- Matchless A very popular tomato in the and symmetrical, ripening well to stem. Flesh rich, bright red color and of fine quality, al-though possibly not quite as firm as Improve Trophy or Stone. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4Lb. 75c; Lb. \$2.50
- **Improved Trophy** has been produced a strain which compares fav-orably with any in smoothness and regularity of the fruit. Its large, strong growing, vigorous and exceptionally productive vine, large, very solid, smooth, finely flavored and beautiful, deep, rich red fruit will satisfy the most exacting growers of tomatoes. Pkt. 5c; 0z. 25c; 2 0z. 40c; ¼ Lb. 75c; Lb. \$2.50
- Stone fruited of the heaviest and most solid quality. Our stock is distinctly superior to most of that offered under this name, being larger, smoother, more uniform and better colored. Vines vigorous and productive. Fruit round, slightly flattened, very large and astonishingly heavy. The quality is unexcelled. Pkt. 5c; 0z. 25c; 20z. 40c; 4 Lb. 75c; Lb. \$2.50

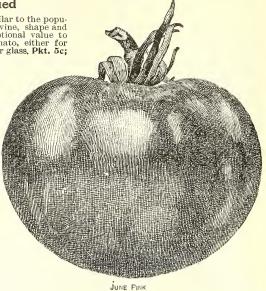

## TOMATO-Continued

June Pink An extra early purple fruited tomato similar to the popular scarlet fruited Earliana in growth of vine, shape and size of fruit and time of maturing. This is of exceptional value to market gardeners who want an early, purple fruited tomato, either for home market or to ship; also desirable for planting under glass. Pkt. 5c; 0z. 35c; 2 0z. 60c; 4 Lb. \$1.00; Lb. \$3.50

- **Early Detroit** The largest and best in shape of the early purple fruited tomatoes. A splendid novelty of exceptional value. (*See cut and full description in Supplement*, page 8) Pkt. 10c; Oz. 75c; 2 Oz. \$1.25; 3 Lb. \$2.25; Lb. \$8.00
- Vine large, hardy and productive, ripening bear abundantly until cut; off by frost. Fruit in clusters of four or five, invariably round, smooth and of good size, free from cracks and stands shipment well. Flesh solid and of excellent flavor. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50
- Essex Early Hybrid Similar to the Acme, fruit smooth and handsome: in quality is classed with the best. Pkt.5c; 0z.25c; 2 0z.40c; 4 Lb.75c; Lb.\$2.50
- Livingston's Globe A new, very large, purple fruited tomato of excellent quality. Fruits rather uneven in size but very smooth and mature earlier than most main crop sorts. The average tomato is very deep, almost globe shaped. Pkt. 5c; 0z. 30c; 2 0z. 55c; 4 Lb. \$1.00; Lb. \$3.00
- Magnus A variety of recent introduction, producing purple fruit of the largest size; much smoother than most of the large fruited sorts and matures earlier. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50
- A larger, smoother fruit than the original stock and one of the smoothest and best of the large, purple sorts. Vines large, vigorous and heavy bearers; fruit large, uniform in size, very smooth; color of skin purplish pink, flesh light pink and of excellent flavor. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.50
- Proderosa A purple fruited tomato of largest size. Ponderosa Vine vigorous and very productive. Fruit very solid, fairly smooth and considered of very good quality, especially by those who prefer a tomato quite free from acid. This variety is more suitable for home use than for the market. Pkt. 5c; Oz. 40c; 2 Oz. 75c; & Lb. \$1.25; Lb. \$4.00
- \* LD. \$1,25; LD. \$4.00 One of the best late purple fruited One of the best late purple fruited growing and vigorous and growers in some sections of the south claim that it is blight proof. It should be given more room than most. Fruit very large, round, smooth and firm. An excellent shipper. Pkt.5c; 0z. 25c; 2 0z. 40c; & Lb. 75c; Lb. \$2.50

LIVINGSTON'S GLOBE

**Dwarf Stone** Vine dwarf but vigorous and productive, While maturing with the later sorts the bright red fruit is of good color, exceedingly smooth, very solid and the largest of any of the dwarf varieties. Pkt. 5c; 0z. 30c; 2 0z. 55c; ½ Lb. \$1.00; Lb. \$3.00

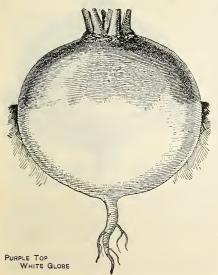

- Dwarf Champion A purple fruided variety forming a strong, erect, bushy plant two feet high. Often sold as Tree Tomato. Fruit smooth, medium sized, fairly solid and of good flavor. Desirable for forcing as it can be planted close to the glass and more closely on the bench than the tall growing kinds. Pkt. 5c; 0z. 30c; 2 0z. 55c; 4 Lb. \$1.00; Lb. \$2.75
- Honor Bright The best sort to grow for distant markets or a late crop. Fruits uniformly large, firm and of brilliant red color. There is no better variety for ripening off the vine while in transit or on the shelf after the frost has killed the vines. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50
- Golden Queen Fruit large and smooth; color a beautiful golden yellow, sometimes with a slight blush of red, as smooth and well shaped as the best of the red varieties and of superior flavor. Pkt. 5c; 0z. 25c; 2 0z. 40c; 3 Lb. 75c; Lb. \$2,50
- **Peach** Desirable for preserving, eating from the hand or for table decoration Fruit resembles a peach in shape and size and the color a light terra cotta red with a delicate bloom; flesh tender and of good flavor. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50
- WHITE APPLE. About one and one half inches in diameter, round, perfectly smooth, yellowish white color. Flesh very mildly flavored and delicate, Pkt. 5c; 0z. 25c; 2 0z. 40c ½ Lb. 75c; Lb. \$2.50
  - RED PEAR. Used for preserves and to make "tomato figs." Fruit bright red, distinctly pear shaped and of excellent flavor. Our stock is the true pear shaped and not the larger red plum tomato often sold under this name. Pkt. 5c; 0z. 25c; 2 0z. 40c; ½ Lb. 75c; Lb. \$2.50
  - YELLOW PEAR. Similar to the Red Pear, but of rich, clear yellow color and quite distinct from the variety sometimes sold under this name. Pkt. 5c; 0z. 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.50
  - YELLOW PLUM. Fruit plum shaped, of clear, deep yellow color; flesh yellow and finely flavored. Much esteemed for preserves, Pkt. 5c; 0z, 25c; 2 0z. 40c; 4 Lb. 75c; Lb. \$2.50
  - RED CHERRY. Fruit small, about five eighths of an inch in diameter, perfectly round and smooth. Fine for pickles and preserves. Pkt. 5c; 0z. 25c; 2 0z. 40c; ½ Lb. 75c; Lb. \$2.50
  - YELLOW CHERRY. This variety differs from Red Cherry in color only. Pkt. 5c; Oz. 25c; 2 Oz. 40c; % Lb. 75c; Lb. \$2.50
  - YELLOW HUSK, OR GROUND CHERRY. Used for preserves and eating from the hand. The seed we offer is that of the true Yellow Ground Cherry, not the purple fruited sort which is scarcely edible. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 4 Lb. 75c; Lb. \$2.50

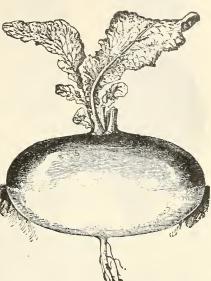

URNIE

The value of Turnips and Ruta Bagas for feeding stock in fall and winter is not fully appreciated, as they are much liked by all kinds of stock and serve to keep them in good condition. We earnestly recommend that farmers increase their sowings largely, for we are sure the crop will prove remunerative. This wholesome vegetable is very easily affected in its form and flavor by soil, climate, and mode of culture. There are a great many varieties, but our list comprises the best for the garden and farm. Sow in drills about two feet apart and half an inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly stirred. Thin early and keep free from weeds so that the young plants will not be checked in growth. Any overcrowding will result in rough and poorly flavored roots. It is important to get the spring and summer crop started very early so that the turnips may have time to grow to sufficient size before hot weather causes them to become tough and bitter.

Extra Early White Milan Variety remarkably early; top pact, so that rows can be planted close together. Roots clear white, very smooth, flat and symmetrical; flesh white, sweet and tender. Pkt. 5c; 0z. 10c; 2 0z. 13c; 4 Lb. 23c; Lb. 75c.

- Extra Early Purple Top Milan Similar to White Milan, flatter and purple-red on upper portion. All in all, the Milan turnips leave nothing more to be desired in the way of an extra early garden turnip. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 70c.
- White Egg variety with small top and rough leaves. The root grows half out of the ground. Flesh very sweet, firm and mild, Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c.
- Early White Flat Dutch, Strap Leaved An excellent ety and largely used in the southern states. Root medium sized, from four to five inches in diameter and about two inches thick; color white, very early, sweet and tender Pkt. 5c; 0z. 10c; 2 0z. 15c; ½Lb, 20c; Lb. 50c.
- **Early Purple Top, Strap Leaved** An early variety and a table use Leaves few, entire, upright in growth. Root of medium size. Color purple or dark red above ground, white below; flesh white below; flesh Pkt. 5c; Oz. 10c; 2 Oz. 15c; white, fine grained and tender. 4 Lb. 20c; Lb. 50c.
- Purple Top White Globe appearance. The flesh is white, of for table or stock. The variety is a good keeper and a fine market sort. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c.
- Cow Horn, or Long White Clear white, except a little shade of green at the top; long, slightly crooked and growing nearly half out of the ground. Delicate and well flavored, of very rapid growth and has obtained considerable favor as a market sort for fall and early winter use. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4Lb. 20c; Lb. 70c.
- Large White Norfolk Usually grown for feeding stock, but atthough a little coarse in texture it is of very good quality for the table. Roots large, spherical or slightly flattened and very white. It is allowed to stand out during the winter in the south where the tops are used for greens. Pkt. 5c; Oz. 10c; 2 Oz. 10c; ½ Lb. 15c; Lb. 45c.
- Pomeranean White Globe One of the most productive roots will frequently grow to twelve pounds in weight. It is globe shaped, skin white and smooth. Used for stock feeding; also ex-cellent for table use. Pkt. 5c; 0z. 10c; 20z. 10c; 4Lb. 15c; Lb. 45c.

EARLY PURPLE TOP, STRAP LEAVED

Sweet German Grows to a large size and use or for feeding stock. It should be sown a month earlier than the flat turnipg. The flesh is white, hard, firm and sweet, keeps nearly as well as the Ruta Baga Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 20c; Lb. 50c.

Seven Top used for greens, It is very hardy and will grow all winter, but does not produce a good root and is only recommended for the tops. Pkt. 5c; Oz. 10c; 2Oz. 15c; 4 Lb. 20c; Lb. 50c.

Southern Prize Similar to Seven Top, but the tops are more abundant while the roots are of considerable size, more symmetrical in shape and better in quality; also used for feeding. A favorite forage plant in the Virginias and Carolinas where it grows during winter without protection. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4Lb. 20c; Lb. 50c.

### YELLOW FLESHED VARIETIES

Large Amber Globe One of the best yellow fleshed varieties yellow, fine grained and sweet; color of skin yellow, top green. Grows to a large size, is hardy, keeps well and a good cropper. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 50c.

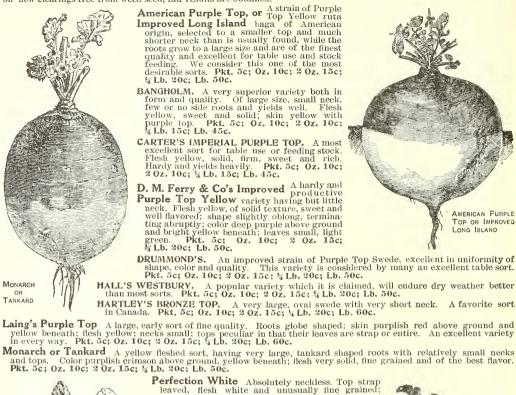

Yellow Stone pale yellow color. Flesh crisp, tender and of fine quality. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 60c.

Yellow Globe A round, smooth, medium sized, light yellow turnip, with crisp, firm flesh of fine quality: a very attractive and beautiful sort. Pkt. 5c; 0z. 10c; 2 0z. 15c; % Lb. 20c; Lb. 60c.

Orange Jelly, or fleshed turnips yet introduced. Not of large Robertson's Golden Ball size but firm, hard and of most is a fine table variety. Skin deeper yellow than most of this class. Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 50c.

Purple Top Yellow Aberdeen Roots medium sized, round; flesh pale yellow, tender and sugary; the variety is hardy and productive and the roots keep well. Approaches the Ruta Baga in hardiness and firmness of texture; of special value for feeding cattle. **Pkt.** 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 20c; Lb. 50c.

Sow from the middle of June to the middle of July in ground previously enriched with well rotted manure in drills about two and one half feet apart and thin the young plants eight to twelve inches apart in the row. When the roots are full grown and before hard freezing weather, pull them, cut off the tops and store in a root cellar or pit. Ruta Bagas are sometimes sown broadcast and left to take chances with the weeds but the crop is seldom a success, though occasionally on new clearings free from weed seed, fair results are obtained.

AMERICAN PURPLE TOP OR IMPROVED LONG ISLAND

RUMMOND'S. An improved strain of Purple Top Swede, excellent in uniformity of shape, color and quality. This variety is considered by many an excellent table sort. Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 20c; Lb. 50c.

Laing's Purple Top A large, early sort of fine quality. Roots globe shaped; skin purplish red above ground and yellow beneath; flesh yellow; necks small; tops peculiar in that their leaves are strap or entire. An excellent variety in every way. Pkt. 5c; 0z. 10c; 2 0z. 15c; 3 Lb. 20c; Lb. 60c.

**Perfection White** Absolutely neckless. Top strap leaved, flesh white and unusually fine grained; growth vigorous and with us even under adverse con-

growth vigorous and with us even under adverse con-ditions it has given a better yield than the yellow fleshed sorts. While valuable for stock feeding, the white flesh is so excellent in quality that it is particularly desirable for table use. Pkt. 5c; Oz. 10c; 2 Oz. 15c; <sup>1</sup>4 Lb. 20c; Lb. 60c. SKIRVING'S KING OF SWEDES. Though this sort reaches a large size the yellow flesh

this sort reaches a large size the yellow flesh is of most excellent quality. Pkt. 5c;

this sort reaches a large size the yellow fless is of most excellent quality. Pkt. 5c Oz. 10c; 2 Oz. 10c; 4 Lb. 15c; Lb. 45c. SUTTON'S CHAMPION. Roots large, spherical, purple on top, flesh yellow, tender and sweet; an excellent keeper and enor-mous yielder. Pkt. 5c; Oz. 10c; 2 Oz. 10c; 4 Lb. 15c; Lb. 45c.

Shepherd's Golden Globe A choice Eng-lish strain in which the tops of the large, round roots are bronze green; the flesh is deep orange color; very uniform and true. Pkt. 5c; and true. Pkt. 5c; 0z. 10c; 2 0z. 15c: 1/4 Lb. 20c; Lb. 50c.

Universal, or Canadian Gem Roots

Universal, or Canadian Gem Roots nearly round, purple above ground, yellow beneath; very small in top and neck; flesh yellow and of excellent dew resisting to a remarkable degree. (See cut in Supplement, page 8) Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 20c; Lb. 60c. WHITE SWEDE, OR SWEET RUSSIAN TURNIP. An excellent keeper and very desirable either for the table or for stock. It grows to a very large size; flesh white, solid, of firm texture, sweet and rich. Pkt. 5c; Oz. 10c; 2 Oz. 10c; 4 Lb. 15c; Lb. 45c.

YELLOW SWEDE. Shape oblong, dull reddish color above ground but yellow underneath; is hardier than the common turnip and will keep solid until spring. Pkt. 5c; Oz. 10c; 2 Oz. 10c; 3 Lb. 15c; Lb. 45c.

TANKARD

## M. FERRY & CO'S DESCRIPTIVE CATALOGUE. AROMATI

Most of the varieties thrive best on sandy soil and some are stronger and better flavored when grown on that which is rather poor. In all cases the soil should be carefully prepared and well cultivated, as the young plants are for the most part delicate and easily choked out by weeds. Sow as early as the ground can be made ready, in drills sixteen to eighteen inches apart, taking pains that the soil is fine and pressed firmly over the seed, or they may be planted as a second crop—the seeds sown in beds in April and the plants set out in June. Most of them should be cut when in bloom, wilted in the sun and thoroughly dried in the shade.

ANISE (*Pimpinella anisum*) An annual herb cultivated prin-cipally for its seeds which have a fragrant, agreeable smell and pleasant taste; used medicinally for various purposes. The leaves are sometimes used for garnishing and flavoring. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ Lb. 30c; Lb. \$1.00

BALM (Melissa officinalis) A perennial herb, easily propa-gated by division of the root or from seed. The leaves have a fra-grant odor similar to lemons and are used for making balm tea for use in fevers and a pleasant beverage called balm wine. Pkt. 5c; Oz. 25c; 2 Oz. 40c;  $\frac{1}{4}$ Lb. 75c; Lb. \$2.50

BASIL, SWEET (*locinum basilicum*) A hardy annual from the East Indies. The seeds and stems have a flavor somewhat similar to that of cloves and are used for flavoring soups and sauces. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1,25

BORAGE (Borago officinalis) A hardy annual used as a pot herb and for bee pasturage. The bruised leaves immersed in water give it an agreeable flavor. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 2 Lb. 30c; Lb. \$1.00

**CARAWAY** (*Carum carui*) Cultivated for its seed which is used in confectionery, cakes, etc. The leaves are sometimes used in soups. If sown early in August the plants will give a fair crop of seed the next season, but when sown in the spring will not generally seed until the next year. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 25c; Lb. 75c.

CARAWAY, for Flavoring. Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 50c.

BORAGE

**HOREHOUND** (*Marrubium vulgare*) A perennial herb with a strong, aromatic smell and a bitter, pungent taste. It is a tonic and enters largely into the composition of cough syrups and log-

and enters largely into the composition of cough syrups and loz-enges. Will thrive in any soil but is stronger if grown on light, poor land. Pkt. 5c; Oz. 20c; 20z. 35c; 4Lb. 60c; Lb. \$2.00 HYSSOP (Hyssopus officinalis) A hardy perennial with an aro-matic flavor and a warm, pungent taste. It is a stimulant and expectorant and is used in asthma and chronic catarrh. The flowering summits and leaves are the parts used. Pkt. 5c; Oz. 25c; 20z. 40c; 4Lb. 75c; Lb. \$2.50 LAVENDER (Lavendula spica) A hardy perennial, growing about two feet high. It is used for the distillation of lavender water or dried and used to perfume linen. It should be picked before it becomes dry and hard and dried quickly. The seed is of rather slow and uncertain germination. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 3 Lb. 40c; Lb. \$1.50 MARJORAM, SWEET (Origanum marjorana) A perennial

2 Oz. 25c;  $\frac{3}{4}$  Lb. 40c; Lb.  $\frac{15}{51.50}$ MARJORAM, SWEET (*Origanum marjorana*) A perennial plant but not hardy enough to endure the winter of the north. The young, tender tops are used green for flavoring, or they may be cut and dried for winter use. Pkt. 5c; Oz. 15c; 2 Oz. 25c;  $\frac{3}{4}$  Lb. 40c; Lb.  $\frac{51.25}{51.25}$ ROSEMARY (*Rosmarinus officinalis*) A hardy perénnial with fragrant, spicy odor and a warm, bitter taste. May be easily raised from seed but does not reach a size fit for use until the second season. The dried leaves deteriorate rapidly with age. Pkt. 5c; Oz. 35c; 2 Oz. 60c;  $\frac{1}{4}$  Lb.  $\frac{51.00}{51.00}$ ; Lb.  $\frac{53.50}{53.50}$ RUE (*Ruta graveolens*) A hardy perennial with a peculiar smell. The leaves are bitter and so acrid as to blister the skin. It is a stimulant and anti-spasmodic but must be used with great caution, as its use sometimes results in serious injury. It must not be suffered to run to seed, and does best on poor soil.

not be suffered to run to seed and does best on poor soil. Pkt. 5c; Oz. 20c; 2 Oz. 35c; % Lb. 60c; Lb. \$1.75

ANISE

CATNIP, or CAT-MINT (Nepeta cataria) A hardy perennial, well known as a valuable mild nervine for infants. Sow preferably in fall, or in early spring, in drills twenty inches apart. Pkt. 5c; Oz. 40c; 2 Oz. 75c; 4 Lb. \$1.25; Lb. \$4.00

**CORIANDER** (*Coriandrum sativum*) A hardy annual cultivated for its seed which has an agreeable taste and is used in confectionery and to disguise the taste of medicine. Gather on a dry day, bruising the stems and leaves as little as possible, for when injured they have a disagreeable odor which they impart to the seed. **Pkt. 5c; 0z. 10c; 2 0z. 15c; 4 Lb. 25c; Lb. 75c.** 

CORIANDER, for Flavoring. Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c. Lb. 50c.

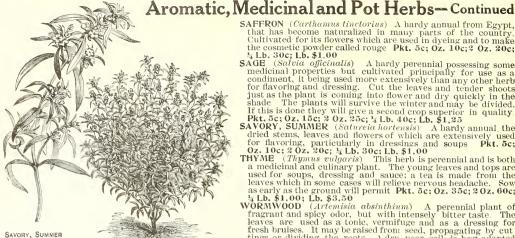

DILL (Anethum graveolens) An annual cultivated for its seed which has an aromatic odor and a warm, pungent taste. It is good for flatulence and colic in infants. It is sometimes added to pickled cucumbers to heighten the flavor. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 60c.

FENNEL, FLORENCE (Fœniculum dulce) An excellent bulblike vegetable which is formed above the ground at the base of the leaf stalk. Blanched and boiled it somewhat resembles in flavor celery, but is more delicate. Sow in spring and for succession. Pkt. 5c; 0z. 15c; 2 0z. 25c; 4 Lb. 40c; Lb. \$1.25

**FENNEL, SWEET** (Faniculum officinale) A hardy perennial. The leaves are largely used in soups, fish sauces, garnishes and salads. The seed is sometimes used in confectionery. **Pkt. 5c**;  $0z. 10c; 2 0z. 20c; {}_{4}Lb. 30c; Lb. {}_{1.00}$ 

MARJORAM, SWEET

- SAFFRON (Carthannus tinctorius) A hardy annual from Egypt, that has become naturalized in many parts of the country. Cultivated for its flowers which are used in dyeing and to make the cosmetic powder called rouge Pkt. 5c; 0z. 10c; 2 0z. 20c; 4 Lb. 30c; Lb. \$1.00
   SAGE (Salvia officinalis) A hardy perennial possessing some additional provided entry in the particular provided entry of the particular pr
- the cosmetic powder called rouge Pkt. 5c; 0z. 10c; 20z. 20c; <sup>1</sup>/<sub>4</sub> Lb. 30c; Lb. \$1.00
   SAGE (Salvia officinalis) A hardy perennial possessing some medicinal properties but cultivated principally for use as a condiment, it being used more extensively than any other herb for flavoring and dressing. Cut the leaves and tender shoots just as the plant is coming into flower and dry quickly in the shade. The plants will survive the winter and may be divided. If this is done they will give a second crop superior in quality. Pkt. 5c; 0z. 15c; 20z. 25c; '4 Lb. 40c; Lb. \$1.25
   SAVORY, SUMMER (Satureia hortensis): A hardy annual the dried stems, leaves and flowers of which are extensively used for flavoring, particularly in dressings and soups Pkt. 5c; Oz. 10c; 2.0z. 20c; '4 Lb. 30c; Lb. \$1.00
   THYME (Thymus vulgaris) This herb is perennial and is both a medicinal and culinary plant. The young leaves and tops are used for soups, dressing and sauce; a tea is made from the leaves which in some cases will relieve nervous headache. Sow as early as the ground will permit Pkt. 5c; 0z. 35c; 20z. 60c; '4 Lb. \$1.00; Lb. \$3.50
   WORMWOOD (Artemisia absinthium) A perennial plant of fragrant and spicy odor, but with intensely bitter taste. The leaves are used as a tonic, vermifuge and as a dressing for fresh bruises. It may be raised from seed, propagating by cut tings or dividing the roots. A dry, poor soil is best adapted to bring out the peculiar virtues of this plant. Pkt. 5c; 0z. 20c; 2 0z. 35c; '4 Lb. 60c; Lb. \$2.00

### SEEDS **CLOVER**

Prices of Clover subject to change.

- Prices of Clover sub (Medicago sativa) It is useless to sow this clover on land hav-ing a stiff clay or hard pan subsoil, as the roots naturally penetrate to a great depth and must do so if the plants live any time. Sow on rich moist loam or sandy soil having a deep, porous subsoil. Prepare the land thoroughly and sow seed at the rate of fifteen to twenty five pounds per acre with a broadcaster or grass seeder. Cover with a brush or light harrow. The young plants are quite tender and the land must be free of weeds until they become established <sup>1</sup>/<sub>4</sub> Lb. 15c; Lb. 35c; for larger lots inquire for prices.
- 4 Lb. 15c; Lb. 35c; for larger lots inquire for prices.
   Alsike, or Swedish (*Trifolium hybridum*) The most hardy of all clovers; perential On rich, moist soils it yields an enormous quantity of hay or pasturage, but its greatest value is for sowing with other clovers and grasses, as it forms a thick bottom and greatly increases the yield of hay; cattle prefer it to any other forage. The heads are globular, fragrant and much liked by bees which obtain a large amount of honey from them. Sow in spring or fall, at the rate of six pounds per acre, when used alone 34 Lb. 15c; Lb. 35c; for larger lots inquire for prices.

ALSIKE, OR SWEDISH CLOVER

WHITE DUTCH CLOVER

- **Crimson Trefoil, or Scarlet Italian** (Trifolium incarna-tum) An annual variety in common use in the south for feeding green and for hay, and also found very profitable on the sandy soils of New Jersey. The yield in fodder is im-mense and after cutting, it at once commences growing again, continuing until severe, cold, freezing weather. It grows about one foot high: the roots are nearly black; leaves long; blossoms long, pointed and of very deep red or carmine color Makes good hay. It is sown in August or September in the south but should not be planted in the north until spring Sow ten to fifteen pounds per acre. 3 Lb. 10c; Lb. 25c; for larger lots inquire for prices.
- Mammoth, or Large Red (Trifolium pratense) the size of the Common Red Clover, often making a stand when the other clovers fail. Sow about eight to twelve pounds per acre & Lb. 10c; Lb. 30c; for larger lots inquire for prices.
- Medium Red, or June (*Trifolium pratense*) This is by far the most impor tant of all the varieties for practical purposes. Sow in spring or fall and if no other most important of the second s or fall and if no other grasses are used, at the rate of eight to twelve pounds per acre; more is required on old, stiff soils than on new and lighter ones. **Lb. 10c; Lb. 30c;** for larger lots inquire for prices.
- White Dutch perennial variety valuable for pasturage and for lawns. It accommodates itself to a variety of soils, but prefers moist ground. Sow in spring at the rate of six pounds per acre, or when used with other grasses, half that amount.  $\leq$  Lb. 15c; Lb. 35c; for larger lots inquire for priore prices.

### D. M. FERRY & CO'S DESCRIPTIVE CATALOGUE.

GRASS SEEDS

Prices on Grass Seeds subject to change.

Awnless Brome Grass (Bromus inermis) A able for binding the soil of embankments and on account of its ability to resist both drought and cold. On light, dry soils it is used for both hay and pasturage, but is not recommended for locations where better grasses will succeed. Should be used at the rate of forty pounds per acre. Lb. 25c. postpaid; for larger lots inquire for prices.

**Creeping Bent Grass** for lawns that are to be used as croquet and tennis grounds, because it is benefited more than hurt by tramping and by its bright color adds to the beauty of the lawn. Lb. 43c, postpaid; for larger lots inquire for prices.

Hard Fescue (*Festuca duriuscula*) Similar to Sheep's Fescue, but not so dense and growing somewhat taller; this often will cover sandy soil under the shade of large trees where no other grass will grow; is a desirable addition to lawn grass. Sow thirty pounds per acre. Lb. 30c. postpaid; for larger lots inquire for prices.

Kentucky Blue Grass (*Poa pratensis*) Fancy ed June Grass, but the true June or Wire Grass is much inferior. Kentucky Blue Grass is the most nutritious, hardy and valuable of all northern grasses. In conjunction with White Clover it forms a splendid lawn; for this purpose use not less than fifty-four pounds of Blue Grass and six pounds of White Clover per acre. If sown by itself for meadow or pasturage about twenty-eight pounds per acre will be required. Lb. 25c. postpaid; for larger lots inquire for prices.

Meadow Fescue, or English Blue Grass (Festuca pratensis) A perennial grass from two to four feet high, with flat, broad leaves. This is one of the standard European grasses. It needs rich ground and succeeds well on prairie soil. This is an excellent pasture grass to take the place of the wild grasses, as it yields a large amount of early and late feed. Sow about twenty-five pounds per acre. Lb. 40c. postpaid; for larger lots inquire for prices.

quire for prices. Orchard Grass most valuable grasses on account of its quick growth and valuable aftermath It is ready for grazing in spring two weeks sooner than most grasses and when fed off is again ready for grazing in a week and will continue green when other grasses are withered by dry weather. It is palatable and nutritious and stock eat it greedily when green. It has a tendency to grow in tufts and does better if sown with clover and as it ripens at the same time as clover, the mixed hay is of the best quality. When sown alone, about twenty-eight pounds are required per acre: if sown with clover, half that quantity. It is perennial and it will last for years, but its habit of growth unfts it for lawns. Lb. 40c. postpaid; for larger lots inquire for prices.

KENTUCKY BLUE GRASS

WOOD MEADOW GRASS

Perennial Rye Grass (Loliem perenne) A very valuable variety for permanent pasture. Succeeds well on almost any soil, but is particularly adapted to moderately moist or irrigated lands. Sow thirty to forty pounds per acre in spring. Lb. 25c. postpaid; for larger lots inquire for prices.

Red Top (Agrostis vulgaris) In Pennsylvania and states farther south this is known as Herd's Grass, a name applied in New England and New York to Timothy. It is a good, permanent grass, standing our climate well, and makes good pasture when fed close. Is valuable for low, wet meadows, producing a large return in good hay. When sown alone, use about twenty-eight pounds of the chaff seed per acre. Sow in spring or fall.

Red Top Fancy (cleaned from chaff) Sow eight postpaid; for larger lots inquire for prices.

Red Top Unhulled Fancy (free from light chaff) larger lots inquire for prices.

- Rhode Island Bent Grass (Agrostis canina) A for lawns and pasturage. Much like Red Top, though smaller. Thrives on light, dry soils as well as on rich, moist ones. For lawn purposes, if used alone, it should be sown at the rate of about forty pounds per acre; for pasture, if used alone, twenty-four pounds per acre. Lb. 43c. postpaid; for larger lots inquire for prices.
- Sheep's Fescue (Festuca ovina) A small tufted, narrow, cylindrical leaves. It is of value in mixture for lawns on dry soils and in shady locations. Sow about thirty-five pounds per acre. Lb. 30c. postpaid; for larger lots inquire for prices.
- (Festuca elatior) A valuable perennial (Festuca elatior) A valuable perennial It is native to moist, heavy soil, where it probably does best, but it succeeds well on any good soil, wet or dry. If used alone sow forty pounds per acre. Lb. 50c. postpaid; for larger lots inquire for prices.
- **Tall Meadow Oat Grass** (Avena elatior) A used in the south and west. Its rocts penetrate deep and it thrives on any good soil. It yields a heavy crop and is valuable both for meadow and pasture. If used alone, sow thirty to forty pounds per acre. Lb. 40c. postpaid; for larger lots inquire for prices.
- **Timothy** the north. Thrives best on moist, loamy soils of medium tenacity. It should be cut just when the blossom falls. Sow early in the spring or fall, at the rate of twelve pounds per acre. if alone, but less if mixed with other grasses. Lb. 20c. postpaid; for larger lots inquire for prices.
- Wood Meadow Grass (Poa nemoralis) Grows from one and one-half to two feet high; has a perennial creeping root and an erect, slender, smooth stem. One of the best varieties to sow in shaded situations, such as orchards and parks, for either hay or pasturage. per acre. Lb. 70c. postpaid.

### **GRASS SEEDS** WN

Prices on Grass Seeds subject to change. The pound prices include postage; 100 pound prices are by freight or express, at purchaser's express. The essentials for a fine lawn are: First, a rich, well drained soil; second, careful preparation of the ground, making it as fine and smooth and mellow as possible; third, a wise selection of seeds; fourth, sowing at such a time as to give the young plants a chance to become well established before being subjected to very dry or cold weather or to the direct rays of the hot summer sun. However much care is bestowed on the soil and seed, no lawn will be beautiful without frequent mowing and rolling. Too much care cannot be bestowed upon the selection of grasses, as some varieties are the most luxuriant in spring, others in summer, others again in autumn and a combination of the proper sorts is required for a perfect, carpet-like lawn. It may be planted early in spring or fall and should be sown at the rate of sixty to one hundred pounds per acre; much more is required than for hay or pasturage. If sown in the spring, sow as early as possible, making the surface very fine and smooth, then raking it over and sowing the seed just before a rain which, if the surface has just been raked, will cover the seed sufficiently. If the expected rain does not come, cover by rolling with a light roller. For fall seeding sow before the autumn rains and early enough to enable the young grass to become well established before very cold weather, when a light dressing of manure should be given.

- **Extra Fine Mixed** (Central Park Mixture) We have given much thought and made many experiments to secure the best selection and think our Central Park Mixture is the best possible for permanent lawns. One pound of this mixture is sufficient to sow 600 square feet. Lb. 45c; 100 Lbs. \$30.00
- Fine Mixed Lawn Grass A thoroughly first-class mixture made of the best and cleanest grades of those varieties used and best adapted to general lawn purposes. Lb. 35c; 100 Lbs. \$20.00
- Shady Lawn Mixture A selection of fine grasses which thrive under the shade of trees or buildings where there is little sun. Lb. 60c.

Mixtures For Golf Links While there are on the ready prepared golf mixtures of more or less value, we have found that the best results are obtained by giving individual attention to each customer and making a special mixture to suit his needs. We have thus overcome the difficulties presented by the great dissimilarity of local conditions of various links and are willing to give you the benefit not only of our experience on some of the best greens in this country but of expert knowledge of grass seeds as well. Write us a description of your links, telling what the nature of the soil is, how drained, how much it has the sum, whether the winters are long or open and whether the summers are wet or dry and we will offer you two or more mixtures especially adapted to While there are on the will offer you two or more mixtures especially adapted to the various parts of your grounds.

#### MISCELLANEOUS FARM SEEDS

- Barley, Common adapted to wheat. It is sown in the spring and can be grown farther north than any other grain. Unless intended for seed it should be cut before fully ripe as it is then heavier, of better quality and less liable to shell. Use about two and one-half bushels per acre. 3 Lbs. postpaid 50c; for larger lots inquire for prices.
- Buckwheat, Common Buckwheat should be sown about June 20, broadcast, at the rate of about one-half bushel per acre; the average yield being from twenty-five to thirty bushels. It should be threshed as soon as dry, for if allowed to stand in mass it is apt to spoil. 3 Lbs. postpaid 50c; for larger lots inquire apt to spoil. for prices.
- Buckwheat, Japanese The plants are large and vigo rous, maturing seed early and resisting drought and blight remarkably well; the grain is much larger and has a thinner hull than the Common or the Silver Hull. We recommend this especially for well drained or sandy land and the dry climate of the western plains, 3 Lbs. postpaid 50c; for larger lots inquire for prices. The plants are large and
- Buckwheat, Silver Hull This improved variety is old sort. It is in bloom longer, matures sconer, and yields double the quantity per acre. The husk is thinner, the corn-ers less prominent and the grain of a beautiful light gray color. The flour is said to be better and more nutritious. 3 Lbs. postpaid 50c; for larger lots inquire for prices.
- First postpair 30c; for larger lots induce for pinces. FIAX to avoid frost and early enough to secure a good stand and enable the crop to ripen before the fall rains. A fair average quantity of seed to be sown on an acre is one-half bushel, when cultivated for seed; if for the fibre a larger quantity should be sown. Cut before quite ripe and if the weather be dry let it lie in the swath a few hours, when it should be raked and secured from the weather; thresh early in the fall and in dry weather. 3 Lbs. postpaid 50c; for larger lots inouire for prices lots inquire for prices.
- (Panicum germanicum) This is a species (Panicum germanicum) This is a species of annual millet growing less rank, with smaller stalks, often yielding two or three tons of hay per acre. It is very valuable and popular with those who are clearing timber lands. Sow and cultivate like millet. **3 Lbs. postpaid 50c;** for larger lots inquire for prices.

Millet, Common dry, light, rich soil, and grows two and one-half to four feet high with a fine bulk of stalks and leaves. It is early maturing and is excellent for forage. For hay, sow broadcast, about twenty five pounds per acre, from May 1st to August 1st. For grain, sow in drills, about twelve pounds per acre and not later than June 20th. 3 Lbs. postpaid 50c; for larger lots inquire for prices.

Millet, German or Golden An improved large ing three to five feet high; later maturing than Common Mil-let, and a heavy yielder. The heads, though numerous, are very large and compact. The seeds are contained in rough, bristly sheaths and are round, golden yellow and very attrac-tive in appearance. 3 Lbs. postpaid 55c; for larger lots inquire for prices.

### D. M. FERRY & CO'S DESCRIPTIVE CATALOGUE.

## MISCELLANEOUS FARM SEEDS-Continued

Prices of all articles quoted on this page subject to change.

RAPE, DWARF ESSEX

**Rape** DWARF ESSEX FOR SOWING. There is but one variety of Rape that has proven profitable to sow in America and that is the Dwarf Essex. Do not be deluded into buying inferior grades offered by unscrupulous dealers through exaggerated advertisements. Such seed is often more or less mixed with the annual variety which is not only worthless as forage, but once planted is likely to become a pernicious weed. There is no plant that will give as heavy a yield of forage at such a small cost as this and its general cultivation would add largely to the profits of American farms. Especially valuable for green manuring and pasture. When fed off by sheep, it will probably do more to restore and make profitable exhausted soils than any other plant. Biennial.

Ground should be prepared same as for turnips. Sowin June or July, with a turnip drill, in rows two and one-half feet apart, at the rate of two and one-half pounds of seed per acre. It may be sown broadcast, either with other fall forage crops or by itself, using from one to five pounds of seed per acre. Lb. 25c, postpaid. By freight or express, at purchaser's expense, 10 Lbs, \$1,25; 100 Lbs. \$7.00

Although this grain is often planted especially for paper makers, who prefer it to any other, its principal value is as a "catch" crop to sow where winter grain has failed. The straw is shorter and stiffer than the winter variety and is always easily secured, while the grain, although smaller, is of equal value. **3 Lbs. 50c**, postpaid. For larger quantities inquire for prices.

## Sugar Cane (Sorghum)

Albaugh Early The best early variety and the one which we especially recommend for the north where the season is short. It is practically as early as the old Early Amber and yields much more per acre either of syrup or seed. The plant is large, of strong, vigorous and erect habit and stands up much better than Early Amber. It may be planted as late as the 15th of June and will be in condition to harvest for syrup in September. Cane seed should not be planted before the weather is warm in the spring. Three to four pounds of seed are required per acre. Lb. 20c, postpaid; 100 Lbs. \$6.00, by freight or express, at purchaser's expense.

**Early Orange** An exceedingly valuable variety: very large, of strong and vigorous habit and does not fall down. It is early and often yields as much as 240 gallons of very beautifully colored and highly flavored syrup to the acre. We recommend it highly to all desiring a superior cane. Lb. 20c, postpaid; 100 Lbs. \$6.00, by freight or express, at purchaser's expense.

Imperial This new variety is particularly valuable for Imperial This new variety is particularly valuable for Early Orange or Albaugh Early but show a decided tendency to stool, or send up shoots. The cane is very leafy and comparatively slender and practically the entire plant is suitable for feed. Our seed is northern grown and should not be confused with the inferior western and south western grown cane. Lb. 20c, postpaid; 100 Lbs, \$6.00, by freight or express at purchaser's expense.

Sunflower LARGE RUSSIAN. This has large heads borne at top of a single unbranched stem with much more and larger seed than the common sorts. It is used extensively for feeding poultry. So was soon as ground is fit for planting corn, in rows five a part and ten inches apart in row. Cultivate same as corn. When the seed is ripe and hard, cut off the heads and pile loosely in a rail pen having a solid floor or in a corn crib. After curing so that theywill thresh easily, flail out or run through a threshing machine and clean with fanning mill. This variety will yield 1,000 pounds or more of seed per acre. Some species are planted largely in the flower garden for ornament. (*See Sunflower*, page 88) **Pkt. 5c; '4 Lb. 10c; 'Lb.20c;** postpaid; for larger quantities inquire for price.

Vetches or Tares SPRING (Vicia sativa) A perennial pea-like plant grown as an annual in the north. Desirable as a forage plant and valuable as a cover-crop for orchards. Culture same as field peas. Sow two bushels per acre. Lb. 25c, postpaid; for larger lots inquire for prices.

for larger lots inquire for prices. **Vetches** SAND, WINTER OR HAIRY (*Vicia villosa*) Network A very hardy forage plant growing well on soils so poor and sandy that they will produce but little clover. The plants, when mature, are about forty inches high and if cut for forage as soon as full grown and before setting seed, they will start up again and furnish even a larger crop than the first. Seed round, black and should be sown one and one-half bushels to the acre. Lb. 30c; for larger lots inquire for prices.

## A DESCRIPTIVE LIST OF **CHOICE FLOWER SEEDS**

OST flowering plants will live in almost any soil, but to give them a fair chance to develop, some care should be taken to make the ground suited to their needs. Many flowers are better if pro-duced on plants of vigorous growth, hence a portion of the garden should be prepared by deep digging, through pulverization and liberal enriching with large quantities of well rotted manure. Since some other varieties produce the largest and finest colored flowers when grown on rather light, poor soil, a portion of the garden should not be enriched.

Cultural directions are given on the packets, and we urge purchasers to study them carefully. While some seeds need special treatment, the following general rules will apply to all. Make the surface of the soil as fine, smooth and level as possible; do not plant when the ground is wet; cover each lot of seeds to a uniform depth, which should not be more than four or six times the diameter of the seed; press the soil firmly over the seed; plant in rows, so that the starting plants can be seen easily; thin out the young plants to prevent crowding and keep entirely free from weeds.

A beautiful hardy

Ageratum ters are very useful for bouquets and the plants are very attractive in the garden. The different varieties are from six inches to two feet high and are covered with bloom

- Imperial Dwarf White. Height eight inches. Pkt, 5c, Tom Thum Dwarf Blue. Desirable for edging; six inches high. Pkt, 5c, Mixed. Seeds of the above varieties mixed. Pkt, 5c, Lasseauxi. Rose colored; twenty inches high. Pkt, 5c.

- Conspicuum. Valuable for winter, white; two feet high......Pkt. 5c.
- Lasseauxi and Conspicuum should be started very early in the house to insure a good bloom.

Agrostemma Very useful for cutting for bouquets and pretty in masses in beds. Give plenty of sunlight.

- in masses in beds. Give plenty of sunlight. **Coronaria** (*Rose Campion*) Brilliant, deep crimson flowers, resembling the single pink. Blooms freely and for a long time. Soft silvery white foliaged plants about two feet high. Flowers in May or June, one of the earliest hardy perennials.........Pkt. 5c. **Cceli-Rosa** (*Rose of Heaven*) A hardy, free-flowering annual, single bright rose, with white center. Also known as Jove's flower; about eighteen inches high.......Pkt. 5c.

Agrostis Nebulosa (Ornamental Grass) An ornamental grass in which the small seeds are so gracefully poised in large open clusters as to have the effect of a cloud and when dried can be effectively used in bouquets of ever-lastings. Grows easily in any common garden soil. Hardy annual, about one and one-half feet high......Pkt. 5c.

The annual varieties can be grown Alyssum succession of bloom may be had.

succession of bloom may be had.
 Sweet (Maritimum) This very hardy annual comes into bloom early in the spring covering itself with innumerable clusters of small, pure white flowers; they have a peculiar, delicate fragrance and are useful in all kinds of small bouquets. Usually not over eight inches high but spreads over a considerable amount of ground......Pkt. 5c.
 Little Gem (Carpet of Snow) A beautiful white variety of Sweet Alyssum, especially adapted to edgings, borders and rock work. The plants grow about six inches high, produce hundreds of flowers and form a compact mass of of bloom fifteen to eighteen inches in diameter. Hardy annual.....Pkt. 5c.
 Golden (Saxatile) Flowers golden yellow; desirable for rock work; showy in masses. Hardy perennial; height one foot......Pkt. 5c.

Amaranthus also where foliage effects are desired. The leaves and stems are of different shades of red, blended with green; two to thread the birth

three feet high.

Henderi. Drooping foliage, richly colored in shades of red and green; tender annual.....Pkt. 10c.

ALYSSUM SWEET

Anemone Coronaria (Wind Flower) Among the earliest and brightest of spring flowers, several shades of color. Hardy perennial; six inches high......Pkt. 5c. high..... ANTIRRHINUM—(See Snapdragon) AQUILEGIA—(See Columbine)

Aristolochia Sipho (Dutchman's Pipe) A vigor-ous growing climber, with curiously shaped purple-brown flowers and very large, heart shaped leaves which have a tropical appearance; very effective for verandas. There is no better hardy climbing wine for shade or screen purposes. No insects or other troubles seem to mar its deep green foliage. Hardy per-ennial; grows from fifteen to thirty feet high.....pkt. 10c. The ornamental variations of screen

The ornamental varieties of aspar-Asparagus are highly valued for their finely cut foliage. Both the climb-ing and trailing sorts are exceptionally attractive. Sprengeri (*Emerald Feather*) A most graceful and beautiful house plant; valuable for hanging baskets. Sprays three to four feet long; light green. Soak seed in warm water before

AMARANTHUS TRICOLOR (JOSEPH'S COAT)

THE CHINA ASTER, in its many varieties, is not only one of the most profitable annuals for the professional florist but also one of the best for the home garden. The plants are of vigorous growth and hardy, even enduring a slight frost without serious injury. By planting the different strains and at different times one may have in the latitude of Detroit a constant succession of bloom from the last of July till the middle of October without the aid of a greenhouse or even a hotbed. Asters do best in moderately light soil, but will thrive in almost any used for a garden provided it is well enriched and made friable.

Well enriched and made Frable. The seed may be planted out of doors as soon as the ground is warm and dry and at intervals till the first of July. The more costly seed may be sown in boxes kept in the house or in a hotbed, but given plenty of air and light and the young plants set in the open ground as soon as the weather is favorable. Insects, such as the red spider, may be kept at bay by frequently spraying with clear water, or for insects that eat the foliage add one-fourth teaspoonful of Paris Green to ten gallons of water. Sprinkle with tobacco water or dust to keep off the plant louse. We offer choice seed that has been grown for us from the best types by the most skillful cultivators in America and Europe and which is more certain to give good results than most of that on the market.

Balloon Vine (Cardiospermum hali-cacabum) Remarkable 

**Balsam** Known as Lady Slipper and Touch-me-not. Balsams have been so much improved by cultivation is the exception now rather than the rule. The colors range from white to dark purple, and are either self colored or spotted and striped. Balsams are tender and should be started in boxes indoors or in the open ground when danger of frost is past. The plants prefer a rich, moist or even wet sandy loam, and must not suffer for moisture. Hardy annual; one to two feet blich

two feet high. 

Bartonia Aurea A fretty flowering plant of the gentian family and somewhat like a wild rose in appearance, producing a profusion of fine, bright metallic yellow blossoms, about two inches across and fragrant in the evening. Tender annual; one foot high.......Pkt. 5c.

**Begonia** Some of the newer forms of Begonias are among the most brilliantly beautiful of flowering plants. With care they can be grown from seed. Sow in February or March in pots on a smooth surface of fine soil without any covering of earth. Cover the pot with glass and keep in a warm but shaded place, taking great care not to wash out the very small seeds or young plants in watering. The plants will give an abundance of bloom the first year and at the end of the season they may be dried off by withholding water, the tubers kept in a dry place free from frost and planted the following spring, when they will bloom more freely than before. freely than before.

#### TUBEROUS ROOTED BEGONIAS

#### FIBROUS ROOTED BEGONIAS

Of the kinds offered under this head, Begonia Rex is grown for its very attractive ornamen-tal foliage, while the others are among the most desirable for flowering in the house, or

most desirable for flowering in the house, or in partly shaded locations outdoors. Vernon (Semperforens atropurpurea) Flowers brilliant, rich red, set off perfectly by the abun-dant, glossy green leaves, which are broadly margined with bronze and purple. Extremely hardy and floriferous; the best of the semperforens class. **Pkt. 15c. Semperflorens alba**. A very useful variety, well adapted for house or outdoor culture. Plants of compact dwarf habit, and under proper treatment almost continuous bloomers. Easily grown; flowers very attractive blush white......**Pkt. 15c. Semperflorens rosea**. Like Semperflorens alba, except flowers are rose colored.....**Pkt. 15c.** 

BELLIS—(See Daisy)

Brachycome (Swan River Daisy) A delicate, half hardy annual. Brachycome six inches high, effective for edgings, beds or rus-tic baskets. Produces freely daisy-like flowers about an inch in diam-eter and in shades from dark blue to nearly white. MIXED..Pkt. 5c.

eter and in shades from dark blue to nearly write. ALXED. IFKL. 9C. Briza Maxima (Ornamental Grass) Grows about one foot high and is valuable for winter bouquets and wreaths. The seed clusters are heart shaped and gracefully poised on such slender stems that they are almost constantly in mo-tion. The plant is known to many as Quaking Grass. Hardy annual......Pkt. 5c.

BEGONIA VERNON

Bignonia Radicans (Trumpet Vine) Showy, certainly one of the best hardy, decid-uous flowering climbers for covering verandas, arbors, trunks of trees, old walls, etc. Vines should be moderately pruned and well trained so as to afford a good circulation of air, thus insuring more and better bloom. Flowers brilliant searlet, trumpet shaped. Hardy perennial.....Pkt. 10c.

Browallia These handsome, profuse bloomers are used freely both for indoor and outdoor planting on account of the ease with which they may be grown and their usefulness for cut flowers. Usually started indoors but if sown out-doors the plants when small should be protected from the hot sun. Half hardy annual.

Roczli. About twelve inches high; produces large, white flowers, often tinted with blue.....Pkt. 15c. Elata. Height eighteen inches; blue and white flowers mixed .....Pkt. 5c.

Bryonopsis An ornamental climber of the gourd changes in color as the season advances, to bright scarlet striped with white. Tuberous rooted perennial but may be treated as a tender annual; about ten feet high....Pkt. 5c. BUTTERFLY FLOWER—(See Schizanthus)

Calandrinia Fine dwarf plants for growing in masses; well suited for edgings, rockeries, etc. Tender annual; twelve to fifteen inches high.

Grandiflora, magenta...Pkt. 5c. | Umbellata, crimson...Pkt. 5c.

Carnation (Dianthus Caryophyllus) "Carna-tion," "Pink," "Clove Pink,""Florists" Pink," are names applied by different pople to the same or to different people to the same or to different. The same of the varieties are very desirable for the professional floring some of the varieties are very desirable for the professional floring and make fine house plants for the amateur. Others do best in the open ground and are among the most desirable of garden plants.

#### Large Flowering Carnations Best Suited for Pot Culture

These are the sorts most grown by florists who are con-stantly striving to produce new varieties. While choice varieties are propagated by cutting planters may get some just as good from the seed we offer and a large proportion double and very beautiful.

- Double Perpetual Flowered Mixed. An exceedingly beauti-ful variety producing very double flowers of various shades and colors. Seed saved from choicest double flowers .Pkt. 25c.
- Fine Double Selves. Seeds from named varieties grown in
- Seed from fine named Fine Double Striped. striped .....Pkt. 15c. varieties.....
- Choicest White Ground. Seed from choice, large flower-ed, named varieties, with nearly white petals bordered or tinted with red or purple. Sure to give large and beautiful flowers.
- Extra Choice Double Mixed. Seed from an immense col-lection of choice French, German, Italian and English named sorts. Certain to produce a large proportion of double and finely formed and colored flowers in almost endless variety of shade and markings......Pkt. 15c.

#### Varieties of Carnations adapted to both Pot and Outdoor Culture

For outdoor culture a rich compost is indispensable to the production of fine carnations; there is scarcely any plant to which a congenial soil is of so much importance.

- Marguerite. The plants of this wonderfully fine strain may be made to bloom in four months. The flowers are large, double, very fragrant and appear in very attractive shades. One of the best "pinks" in cultivation......Pkt. 5c.

CELOSIA, TRIUMPH OF THE EXPOSITION

Choice Double Mixed. A mixture containing many of the 

CASTOR BEAN, ZANZIBARIENSIS

Sanguineus Castor Bean, Mixed.....

Triumph of the Exposition. Plant of pyramidal form, bearing many exceedingly graceful, feather-like spikes of intensely brilliant crimson color. Height about two feet....Pkt. 10c.

#### Dwarf and Tree Cockscomb Types

Giant Empress. The beautiful dwarf plant has dark red leaves and forms immense bright, crimson combs......Pit. 10c. Glasgow Prize (President Thiers) The whole plant seems to be formed into an immense comb, densely corrugated and of

a very brilliant, deep purplish red.....Pkt. 10c. Dwarf Rose. Large rose-colored combs..... " 10c. Dwarf Yellow. Large yellow combs...... " 10c. Dwarf Mixed. A mixture of best dwarf growing sorts. " 5c. **Calceolaria** A favorite and universally admired genus distinguished by its abundance of large flowers which are white or in various shades of yellow, splashed, spotted and blotched with orange, rose, or brown, two plants rarely having flowers marked exactly alike. Grown in pots in the conservatory or greenhouse. Herbaceous annuals or shrubby evergreen perennials.

Hybrida grandiflora. Flowers of immense size; seeds saved from finest speci-

 Hybrida granditlora.
 Flowers of immense size; seeds saved from mest specimens.

 Mens.
 Pkt. 25c.

 Hybrida tigrina.
 Flowers of the largest size, beautifully spotted; seeds saved from choicest collection.

 Finest Hybrids Mixed.
 Seeds saved only from the most perfect flowers, embracing many of recent introduction; all desirable.

Calliopsis, or Coreopsis Very showy border plants, producing in great profu-sion and for a long time flowers which are bright yellow and rich brown, either self colored or with these colors and red contrasted.

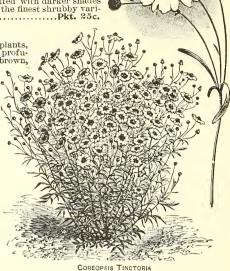

ettner self colored or with these colors and red contrasted. **Coreopsis tinctoria.** Although a native plant this is one of the most desirable of our garden flowers. It produces an abun-dance of brilliantly colored flowers, varying from clear yellow to deep rich brown, the two colors often being beautifully contrasted in the same blossom. They are borne on long, graceful stems and are very desirable for decorative pur-poses. Very hardy and profusely blooming annual; two to three feet high. FIXE MIXED.......Pkt. 5c. Lanceolatg grandifora. A very hardy paramicle blooming the

Lanceolata grandiflora. A very hardy perennial, blooming the first year and producing on very long stems a constant succes-sion of rich bright yellow flowers about three inches in diam-eter; exceedingly valuable for decorative purposes...Pkt.10c.

**Callirhoe** (*Poppy Mallow*) Very handsome border plants, red flowers. Hardy annual; about fifteen inches high. Choicest Mixed......Pkt. 5c.

**Camellia Japonica** House or greenhouse evergreen, from seeds though they germinate slowly. As varieties do not come true from seed , he may have the pleasure of getting something distinct and by great merit. Mixed Fine Double Varieties. CAMPANUM ac (See Constant) Pkt. 25c.

CAMPANULA-(See Canterbury Bell)

**Canary Bird Flower**<sup>(Tropæolum canariense)</sup> with small, curiously shaped, canary colored blossoms, Will bloom freely from July until killed by frost. Tender annual. Height about twenty feet ...... Pkt. 5c.

Candytuft (Iberis) Showy, branching plants about fifteen inches high. Considered indispens-able for cutting and very effective in beds, masses or rockeries. If sown in spring the plants will bloom from July to September or if in the fall will blossom from May to July. Hardy annual. ilac. Shading to light purple.....Pkt. 5c. White. "5c. Rocket (Giant Empress) Extra large white trusses; a great improvement in the size and quality of the flowering trusses over the common white va Pkt. 5c.

Canna Stately, ornamental plants, producing clusters of large flowers of the most intense, varied and brilliant colors. Very desirable for greenhouse or bedding out-doors. Plant the seeds in February, first soaking them for a day in hot water. In August the plants come into bloom and continue to flower very freely until cut down by frost. Tender perennial. Store roots in cellar in winter. Finest Large Flowering Mixed. Plants are about three feet high.......Pkt, 5c.

Canterbury Bell (*Campanula medium*) rich color and profuse bloom. Succeeds best in light, rich soil and in the fall should be transplanted or thinned to eighteen inches or two feet apart and given some protection in severe winter weather. Has large, bell shaped flowers which are strikingly effective, colors white, and various shades of violet, rose, lilac and blue. Height two to four feet. One of the wild forms of Campanula is the "Blue Bells of Scotland."

CARPET OF SNOW-(See Alyssum)

#### D. M. FERRY & CO'S DESCRIPTIVE CATALOGUE.

The Centaureas are an ex-Centaurea an ex-ceedingly interesting genus of plants, embracing annu-als, biennials and perennials ance. They are easily grown from seed.

#### Varieties Cultivated for their Foliage

andidissima. Ornamental plants of great beauty; foliage deeply cut, silvery white and densely covered with white hairs. Half hardy perennial......Pkt. 15c. Candidissima.

#### Varieties Cultivated for their Flowers

- Cyanus
- Double Mixed (Bachelor's Button) Produces larger, more globular flowers than the common variety.......Pkt. 5c.
- Odorata
- markable. Hardy annual.....Pkt. 5c.
- Imperialis Mixed. An excellent sweet scented variety. The flowers are finely laciniated and are about the size of a carnation. They have long stems and keep well after cutting. The colors range through white, rose, likac, purple and yel-low. Hardy annual; about eighteen inches high. Pkt. 10c.

#### CENTAUREA MARGUERITE

## Chrysanthemum

These common "summer Chrysanthemums" are showy and effective in the garden and desirable for cut flowers. Our list affords a fine range for cut flowers. Our list affords a fine range for selection. These annuals are not the winter flowering sorts sold by florists and propagated only by division of roots.

#### Early Blooming Garden Sorts

- Morning Star. Very handsome, large, single flowers, bright yellow with deeper center; ex-cellent for cutting and popular with florists for both spring and fall markets.....Pkt. 10c.
- Coronarium, double white. Plants usually about two feet high.....Pkt. 5c.
- Coronarium, double yellow, very attractive, rich golden yellow flowers abundantly pro-duced.....Pkt. 5c. Mixed. The choicest Carinatum and Corinarium varieties, both single and double.....Pkt. 5c.

#### Later and Taller Fall Blooming Sorts

Indicum, fl. pl., half hardy perennial; desirable as pot plant but sown more generally out-doors; very double, mixed colors....Pkt. 25c.

CHEIRANTHUS CHEIRI—(See Wallflower) CHEIRANTHUS MARITIMUS— (See Virginian Stock)

**Cinerarias** are easily grown from seed, require little heat, are free blooming and give brilliant flowers in a variety of colors. Greenhouse perennials which can be planted out in summer. They thrive best in a mixture of loam and peat. One to two feet high.

- Maritima candidissima (*Dusty Miller*) Cultivated for its handsome, silvery white foliage; very ornamental as decorative pot plant, or for bedding purposes...Pkt. 10c.
- Hybrida, choicest mixed. From best large flowering Pkt. 25c. sorts
- Hybrida, flore pleno, mixed. The flowers are perfectly and evenly double and in great variety of colors....Pkt. 25c.
- Hybrida, single dwarf white. This is perhaps the finest sort among Cinerarias. The plant is about one and one-half feet high and covered with large, beautiful, white flowers having purplish centers. An abundant bloomer in early spring and excellent for Easter decoration.....Pkt. 25c.
- Clarkia Beautiful, hardy annuals from California, with rose-colored, white and purple flowers, in delicate but very brilliant shades. The plants are about eighteen inches high and profuse bloomers. MIXED DOUBLE......Pkt. 5c.
- Clematis Well known and universally admired climbers, some of the varieties being re-markable for the size and beauty of their blossoms and others for their gracefulness. Fine for covering arbors, verandas, etc., as they cling readily to almost any object. Most of the kinds are hardy, herbaceous perennials, but some little protection in northern latitudes through winter is advised. The roots should be given plenty of water during dry weather to ensure free blooming, the plants being quickly injured if allowed to become very dry. dry.
- Virginiana
- **lammula.** A slender but vigorous climber, from ten to fifteen feet high, with clusters of small, white, fragrant Flammula.
- Mixed. Extra choice, large flowering varieties with beau-tiful clusters of purple and white flowers......Pkt. 10c.

**Cobaea Scandens** A fine rapid growing climber with handsome foliage and large bell-shaped flowers, green at first, but rapidly changing to a beautiful deep violet-blue. A well estab-lished plant will run about thirty feet in a season, cover-

COCKSCOMB-(See Celosia) COIX LACHRYMA-(See Job's Tears)

CINERARIA HYBRIDA

Probably the best known and most popu-lar of ornamental foliage plants. Leaves are of many shades of color and have a rich velvety appearance of extraordinary beauty. No lawn should be without these decorative plants. Tender perennial

Aquilegia) Every well regu-dated garden has a space devot-ed to hardy perennials and no portion of columbines. They are of the easiest culture and when once established will furnish for many years a mag-nificent display of the handsomest flowers each spring and summer. The beds should be kept clear of weeds and given each year a dressing of well rotted manure. Hardy herbaceous perennials; two to three feet high. Corrulea hybrida, double. A vigorous growing, very hand-some variety. Blue and white flowers.......Pkt. 10c. Californica hybrida. One of the handsomest of all colum-

Californica hybrida. One of the handsomest of all colum-bines, having orange, red and yellow flowers...Pkt. 10c.

A very effective autumn flowering plant. Quite hardy and rapid growing, forming bush-like plants five to eight feet high and covered with large, single dahlia-like flowers. Start in this latitude

in March and transplant to open ground about June 1.

Hybrida, Giant White. This variety produces a profusion of large, pure white flowers which being gracefully poised on long stems are useful for decorative purposes. Pkt. 5c. Hybrida, Giant Pink. Pkt. 5c.

Well known and universally admired **Cyclamen** flowers. Seed sown in spring, by autumn will produce a little bub which if potted will bloom the following spring. Tender perennial; one foot high.

Persicum, mixed. Of great beauty and many colors.Pkt. 15c. Persicum giganteum, mixed. Characterized by beautiful fol-iage and profuse bloom; each flower is from two to two and one-half inches long. Very choice......Pkt. 20c.

**Cypress Vine** (*Ipomœa quamoclit*) A most beauti-ful climber with delicate, dark green, scarlet or white blossoms which contrast most effectively with the graceful foliage. Tender annual; about fifteen feet high. Scarlet. A very deep, rich shade ...... Pkt. 5c. White. Clear paper-white..... " 5c. 

**Dahlia** The Dahlia has always been a favorite for autumn flowering. The flowers are so sym metrical and perfect and the range of colors so large and varied that they will always be popular where display is wanted. Both the single and double strains of this magnificent race of plants may be had in the greatest variety and beauty from seed If planted early and forced they can be made to flower the first season Tender herbaceous perennial. Finest Double Mixed. Will preduce brilliont double for the sumpling

Finest Single Mixed. Will produce brilliant flowers running through a wide range of colors......Pkt. 10c. For Dahlia Roots see Bulbs and Roots, page 93.

**Daisy** The Daisy has been so far improved by selection and careful cultivation that good seed will give are as large as any of the named sorts that are propagated by division of the roots and are sold at high prices The plants bloom well in the house and are splendid for early spring and summer flowering when planted in a slightly shaded situation

Fine for bedding with silver-leaved plants. Foli-age dark metallic bronze almost black. Half hardy annual; two feet high. two feet high

Pkt. 5c.

# PETUNIA

Petunias are unsurpassed for massing in beds. Their richness of color, duration of bloom and easy culture will always make them popular.

The modern improved varieties are very choice, having been wonderfully brought up from the same species that were grown thirty years ago.

The full, double petunias do not produce seeds. To procure double flowers one nust use the seeds saved from single flowers which have been carefully fertilized by hand with pollen from the double ones. The seed we offer is the result of careful hybridization and can be depended upon to give as large a proportion of double flowers as any.

In some strains the flowers are very large, measuring four or five inches across; in others, they are deeply fringed; still others have star-like markings radiating from the throat and extending nearly or quite to the outer margin of the blossom; again, others have full, double flowers. The colors range from white to deep red-purple and are variously striped and barred.

Plant in a warm, open, sunny place. Seeds may be sown directly in the open ground or the plants may be started in pots indoors for early results. The plants are tender and should not be trusted in the open until settled weather. Thin to eighteen inches apart. When well started they grow almost as easily as weeds. The plants begin to bloom when very small and continue until cut off by frost. Tender perennial, blooming the first year.

Petunias are easily grown under glass in winter. The best method is to sow seeds in late summer or early fall and grow stocky plants in pots, but old plants can be lifted on the approach of cold weather, cut back and taken inside for winter bloom.

Single Dwarf Compact. (*Inimitable Dwarf*) Bushy plants only about eight inches high, covered with small flowers, generally striped or blotched. In many the markings are as beautifully star shaped as in the strain offered as "Star" petunia....Pkt. 15c.

Countess of Ellesmere. Deep rose, white throat; very small	6.6	õc.

General Dodds. This is a strain of petunia producing large single flowers that are noticeable because of their exceedingly rich, dark purple color which is really one of the most striking among petunias. A vigorous and very persistent bloomer and there are few garden plants that will make so satis factory a display. Pkt. 10c.

#### D. M. FERRY & CO'S DESCRIPTIVE CATALOGUE.

Physalis Francheti (Lantern Plant) When well grown, plants are about one or more large, brilliant red-colored seed pods which in form and color are sug-gestive of a Japanese lantern. These contain bright cheery-like fruit which is occasionally used for making preserves. It grows readily to a fruiting size the first year from seed, in the warmer latitudes

SHIRLEY POPPY

Prinks (Dianthus) Hardy and half hardy biennials and perennials but nearly all blooming the first year from seed; of easy culture. Seeds may be sown in the open ground where horth, if plants are started in the house.

Crimson Belle. Rich, vivid crimson color; flower single and of extraordinary size and substance, evenly and finely lacini-

Poppy

85

SINGLE PINKS

(*Papaver*) Well known hardy annuals and perennials flowering in great pro-fusion throughout the summer. As early in spring as ground can be worked sow the seed where flowers are to bloom if planted too door the good will not

and cover lightly, since if planted too deep the seed will not germinate and the annual varieties do not bear transplanting. To insure a continuous bloom during a long season the flowers

should be cut regularly and no seed pods allowed to form, hirley. This magnificent strain of Poppy affords during a long season flowers of the most charmingly delicate shades of Shirley. Shirley. This magnificent strain of Poppy affords during a long season flowers of the most charmingly delicate shades of colors imaginable, ranging from a pure glistening white through the pinks, reds and scarlets to the deepest crimson, the darker shades frequently being margined with white. Some of the petals are of silky texture, others look like tissue paper, some are plain, some crimped and some wavy. The flowers are exceedingly graceful and airy and lend themselves readily to bouquets which should be cut before the blooms are fully expanded; they will then keep fresh in water for several days.
 Tulip Flowered. Produces bright scarlet flowers bone well above the foliage. The petals form a tulip-shaped cup and after a time black spots appear at the base of each petal. Hardy annual, one foot high.
 Pkt, 5c.
 Cardinal. This is a very large and very double poppy, each petal being so cut as to give the blosom the appearance of a large ball of brilliant cardinal colored silk. It is certainly one of the finest poppies in cultivation and a worthy companion to our Double. White Fringed Poppy from which it differs only in color.
 Carnation, double white.

Colore, white tringed topp the product of the product

There are few flowers in

Portulaca There are few flowers in cultivation that make such dazzing display of color from about the first of July until killed by frost in autumn. Sometimes they are started indoors but usually are sown directly where the plants are to stand. The seed requires a moderately high temperature for germination. The soil need not be rich, the plants doing better not be rich, the plants doing better in hot, rather dry ground. They should have a sunny situation. Tender annual; about nine inches high.

POOR MAN'S ORCHID-(See Schizanthus)

Produces **Evening** (*Enothera*) Produces which are fully expanded only towards and during evening. Blossoms yellow or white and very freely and constantly produced.

Lamarckiana. Superb spikes of large, bright yellow blossoms three to four inches across. Hardy peren-nial but blooms the first year; height four feet.Pkt. 5c.

PORTULACA

**Primula Japonica** (Japanese Primrose) Beauti-ful, large, variously colored flower standing in whorls, pyramidically arranged on short flower more freely, and seed should be sown every year. 

After sowing the seeds of Primula Japonica, let them re-main in a cool and moist place for four or five weeks, then place in a frame or house where there is bottom heat and they will grow freely.

**Primula Sinensis** (*Chinese Primrose*) This beau-fiful winter blooming pot plant is especially valuable in that its brightly colored and finely formed flowers and attractive foliage may be had in perfection from November until late in spring. The several varieties afford a wide range of splendid colors, the flowers being produced in clusters. According to location and fa-cilities, sow the seed in well drained shallow pans from April to the last of July, to insure flowering the following winter. Use finely sifted leaf mold, loam and sand in equal parts. Cover slightly and place the pans, when well watered, in a temperature of source for the set of th

ROSE CAMPION-(See Agrostemma Coronaria) ROSE OF HEAVEN-(See Agrostemma Cœli-Rosa)

Salpiglossis bedding or plants with richly colored, funnel shaped flowers which are purple, scarlet, crimson, yellow, buf, blue or almost black, beautifully marbled and penciled. The seed may be sown in-doors by the middle of March, or later, or may be sown outdoors in early spring; useful for cutting. Blooms from August to October, Half hardy annual; about two feet high.

Fine Mixed. Hybrid varieties. Pkt. 5c. Large Flowering Mixed-(See Supplement, Page 2)

**Salvia** If lowering Sage) Among the most oriliantly colored of garden flowers and extremely useful for bedding; also valuable for pot culture. Blooms are borne in long spikes well above the foliage and are of fiery red, crimson or blue; continuing in flower a long time. Start early in heat and transplant into light soil one to two feet apart. Tender perennials; but bloom the first season; height two to three feet. Stardenes Bodd also as "Splandone Benfine". Large brilli

- Splendens. Sold also as "Splendens Bonfire" Large, brilli-ant scarlet flowers are in these plants afforded a rich, dark green background of dense foliage. This variety is most generally used in parks and on extensive lawns, as in growth it is more vigorous than the more dwarf varie-ties .....Pkt. 10c. ties..

Patens. One of the finest blue flowers known.... " 15c.

ireball. Many strains of Salvia Splendens have been of-fered under different names with the claim that they are larger flowered or more floriferous than the old type. We have found none of them more distinctly valuable than this strain in which the plant is more uniformly dwarf, and comes into bloom earlier than most sorts and remains accord with building that the strain of the strain is a strain the st Fireball. 

SALVIA SPLENDENS

SAL PIGLOSSIS

Sanvitalia Procumbens, fl. pl. Very pretty, dwarf trailing plants which are wonder-fully floriferous. Double flowers of a brilliant, golden yellow, resembling a miniature double zinnia. Excellent for rock work, borders or edgings. Hardy annual; six inches bigb. inches high..... .. Pkt. 5c.

SCABIOSA—(See Mourning Bride) SCARLET FLAX-(See Linum)

**Snapdragon** (Antirrhinum) An old border plant with dark, glossy leaves and long spikes of curiously shaped, brilliantly colored flowers with finely marked throats. Snapdragons have been much improved of late years by careful selection and blossom the first season from seed sown in spring, especially if under frames and transplanted. If early bloom is desired sow the seed in August or September and cover the plants with a mulch on the approach of cold weather. These may be transplant-ed into pots and flowered in the house. Give them the same temperature and treatment as geraniums and car-nations. Tender perennial; one and a half to two feet high. high.

Majus album. Pure white, light yellow throat.....Pkt. 5c. Majus brilliant. Crimson, yellow and white throat. " 5c. Majus Delila. Brilliant crimson, white throat..... " 5c. 5c.

**Stock** (*Mathiola*) The Stocks, though not thriving so well in America as they do in England, are indispensable where a fine display of flowers is wanted and are particularly valued for edgings, bedding and pot culture. To such perfection has selection brought them that good seed will plants grow to an average height of one and one-half feet.

supplement, page 2)

plants grow to an average nergit of source summer variety comes Double German Ten Weeks. This favorite summer variety comes nergitation of the source of the into bloom quite early and is excellent for bedding out. The fine blooms are deliciously fragrant and very desirable for cutting. MIXED......Pkt. 5c.

Double German Ten Weeks, Pure White. Very useful for floral work and bouquets. Pkt. 10c. The seed we offer of Double Ten Weeks stocks is of a very super-ior quality and can be depended upon for excellent results.

#### Intermediate or Autumnal Stocks

The Intermediate Stocks, if sown at the same time as the Ten Weeks will succeed them in bloom, thus affording flowers contin-uously until late in the fall. If sown in pots late in the summer the plants will come into bloom the following spring.

Intermediate Scarlet.....

#### Brompton and Emperor Stocks

These Stocks come readily from seed and should have the same treatment as the Intermediate. They require a longer period of time to grow and cannot endure our winters unless protected.

Brompton, mixed. Bushy plants, blooming well in winter and producing a fine display of flowers; half hardy biennial....Pkt. 10c.
 Emperor, or Perpetual, mixed. The fine spikes of bloom are rich and attractive. Tender perennial.....Pkt. 10c.

SUNFLOWER. DOUBLE CHRYSANTHEMUM FLOWERED

**STOCK** 

Solanum Pseudo Capsicum Nanum. Orna-mental fruit bearing plants, use-ful for conservatory or drawing room decoration. The foliage is handsome and contrasts finely with the miniature, round, scarlet fruit with which the plant is covered. Tender perennial; about one and one holf forct high one-half feet high..... .....Pkt. 10c.

STIPA PENNATA-(See Feather Grass)

untlower

(Helianthus) These stately, old fashioned flowers

fashioned flowers with the newer as a background for lawns and in front of high fences. Valuable also as a screen to hide un-sightly places and sometimes used to mitigate the evil of adjacent swamp holes. Hardy annual. Sunflowers grow readily in almost any soil but do best on light, rich limestone or alluvial land well supplied with moisture and not shaded by trees or buildings.

Stella. The plant of this fine variety is well branched and bushy and attains a height of about three feet. The flowers are an unusually pure golden yellow with black discs and are borne on long stems well above the foliage. They come into bloom very early and are produced in abundance through-out the season. The graceful habit of growth, convenient size and splen-did lasting qualities make this a useful and favorite variety for cutting and in extensive decorative work. (See colored plate, page 65)........Pkt. 5c.

## D. M. FERRY & CO'S DESCRIPTIVE CATALOGUE.

SWEET PEAS

We had an extensive and very successful trial of Sweet Peas at our Oakview farms last summer. The results only confirmed our opinion that the varieties we list are the best in their respective classes, that our mixtures are well bal-anced and unsurpassed and that all, with proper soil and care, will give splendid satisfaction. We also had in trial many novelties offered under various names by seedsmen in this country and in England. Many of these proved to be inferior to our standard sorts and others were not yet sufficiently fixed in type to warrant our listing them at present. Our stocks are absolutely unsurpassed in selection, purity and vitality. Our prices are reasonable, being lower than those of many smaller firms, but were we to charge twice as much the quality of the stocks could not be improved. Early in spring make a trench about four inches deep in rich, mellow soil, so arranged that no water can stand in it and plant the seed in the bottom, covering no more than two inches. Sweet Peas, particularly the white seeded sorts are often a little difficult to start. If the soil is too dry they will remain a long time without germinating; if it is too wet and cold they will not sprout at all. In soits at all heavy, or composed largely of clay, put about one inch of stand in the bottom of the trench and sow the seed on this covering with more sand. Cover the row with a board to plants are about five inches high gradually fill up the trench and furnish some support for the vines to run upon. The blooms should be picked before they form pods or the plants will soon stop flowering. Extra Early Blanche Ferry, Earliest White and Mont Blanc with us have proven most desirable varieties for forcing

Extra Early Blanche Ferry, Earliest White and Mont Blanc with us have proven most desirable varieties for forcing and have given the best results when grown indoors.

#### WHITE

- BLANCHE BURPEE. A splendid pure white variety. While not so profuse a bloomer or as hardy a plant as the Emily Henderson the flowers are fine. Pkt. 5c; Oz. 10c; \$\frac{1}{2}\$ Lb. 20c; Lb. 60c.
- DOROTHY ECKFORD. Vine very robust and exceedingly floriferous. Flowers of extra large size, pure white, beautifully shell shaped; usually three on a stem. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 65c.
  EARLIEST WHITE. The earliest blooming white Sweet Pea. Similar in form to and selected from Extra Early Blanche Ferry. Its extreme earliness makes it most desirable for forcing. Pkt. 10c; 0z. 25c; ½ Lb. 75c; Lb. \$2, 25 Lb. \$2.25
- EMILY HENDERSON. A bold, well formed, clear white flower. Wings broad and well expanded. An early and wonderfully free and persistent bloomer. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 50c.
- JOSEPHINE WHITE. One of the earliest white sweet peas and especially desirable for forcing. Habit like Emily Henderson but earlier and produces flowers during a longer season. Very desirable for cutting. Pkt. 5c; Oz. 10c; 4 Lb. 20c; Lb. 55c.
- MONT BLANC. This variety originated in the extra Early Blanche Ferry and like that sort the vine is of dwarf, slender very graceful habit with narrow leaves. Flowers of good form and size and very clear white color. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 50c.
- NORA UNWIN. A pure white of the Countess Spencer type, very large, open form and wavy. One of the very choicest on our list. Pkt. 10c; 0z. 25c; ½ Lb. 75c.

#### LIGHT YELLOW

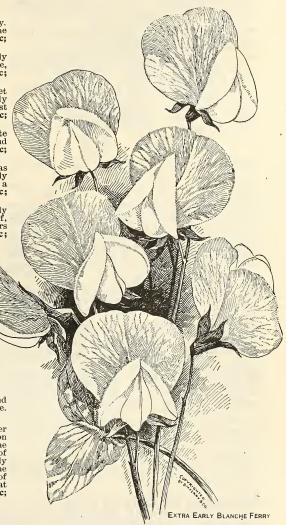

- HON. MRS. E. KENYON. The best of the deeper primrose shades; a beautiful, large, semi-hooded flower. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.
- UEEN VICTORIA. Light primrose of hooded form showing a pink tint in the bud; clear, soft primrose when matured. Pkt. 5c; Oz. 10c; 4 Lb. 20c; Lb. 60c. QUEEN VICTORIA.

#### **RED WITH WHITE WINGS**

- BLANCHE FERRY. Standard medium sized, fine form and bright pink color; wings large, rounded and nearly white. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 70c.
- **EXTRA EARLY BLANCHE FERRY.** This is the pioneer extra early sweet pea and bears much the same relation to the other sorts of this section that the original Blanche Ferry does to other American sorts, in that it is of vigorous and hardy though dwarf habit and a wonderfully free and accelerate bloomer. It will be found to be the free and persistent bloomer. It will be found to be the first to furnish flowers either in greenhouse or out of doors and it will continue to furnish them in great abundance longer than most varieties. Pkt. 5c; Oz. 10c; ½ Lb. 25c; Lb. 75c.

#### **ORANGE PINK**

- HELEN LEWIS. One of the best of the Countess Spencer type. Very large, open form, wavy edges; standard crimson orange, wings orange rose. Pkt. 10c; 0z. 20c; ½ Lb. 60c; Lb. \$2.00
- LADY MARY CURRIE. ADY MARY CURRIE. A large, well formed flower of brilliant orange pink color. Similar to Lady Penzance but rounder and of more brilliant color. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.
- MISS WILLMOTT. A fine semi-hooded type; standard orange pink: wings rose tinted with orange. large size; long stems; plant very vigorous. Oz. 10c; & Lb. 20c; Lb. 60c.

#### PINK AND RED STRIPES

- AMERICA. White, nearly covered with splashes, stripes and dots of exceedingly bright carmine. The most brilliant red striped sort. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 60c.
- AURORA. Very large and of fine form. The standard and wings are striped and flaked with delicate orange-salmon-pink over white. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 60c.
- MRS. JOSEPH CHAMBERLAIN. Very large and perfectly shaped flowers; white, striped with bright rose-carmine, Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 60c.

# SWEET PEAS-Continued

#### LIGHT PINK

- COQUETTE. Large, finely formed flower. Standard warm primrose, shaded purple: wi Oz. 10c; ¼ Lb. 20c; Lb. 60c. wings primrose. Pkt. 5c;
- DAINTY. White, edged with light pink. Hooded form; very long stems. Similar to but lighter than Eliza Eck-ford. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c. Hooded form;
- GLADYS UNWIN. Clear light bright pink with deeper shade at edge of standard; very large size, open form, with wavy edges. One of the best of the large Countess Spen-cer type. Pkt. 5c; Oz. 10c; ½ Lb. 30c; Lb. \$1.00
- KATHERINE TRACY. The color is a soft but brilliant pink in wings and standard. Plants vigorous and give a profusion of flowers which continue large and fine until the end of the season. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 60c.
- LOTTIE HUTCHINS. Standard and wings of light primrose with stripes of light pink. One of the best hooded shapes. Pkt. 5c: Oz. 10c: ½ Lb. 20c; Lb. 60c.
- LOVELY. Flowers very large, fine form. A delicate shell pink tinged with yellow, often four flowers on a stem. Pkt. 5c: 0z. 10c: 4 Lb. 20c: Lb. 60c.
- PRIMA DONNA. The stems bear three or four very large, perfect flowers of a brilliant yet soft shade of pink. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.
- SADIE BURPEE. (Black seeded) Standard round, very thick; delicate shell pink, wings a little lighter than standard. Similar to Mrs. Sankey but larger. Pkt. 5c; Oz. 10c; \u00e4 Lb. 20c; Lb. 65c.
- STELLA MORSE. Flowers of a peculiar warm salmon-pink. A combination yellow and pink which is distinct and very attractive. Pkt. 5c; Oz. 10c; <sup>1</sup>/<sub>4</sub> Lb. 20c; Lb. 60c.
- VENUS. A brilliant but delicate and soft shade of warm rose-pink and buff; wings similar to the standard. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 55c.

#### SHADES OF RED

- COCCINEA. Distinct in color, a bright cherry red and un-like any other we offer. Very pleasing and effective. Pkt. 5c; 0z. 10c; ½ Lb. 25c; Lb. 75c.
- FIREFLY. Very bright, intense crimson scarlet, of good size and form. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 65c.
- GEO. HERBERT. A bright rose-carmine of the Countess Spencer type; largest size, open form and wavy. One of the choicest on our list. Pkt. 10c; Oz. 20c; 4 Lb. 60c; Lb. \$2.00
- ER MAJESTY. The flowers are very large and both the standard and wings are beautifully curved and a delicate rose-pink color. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 65c. HER MAJESTY.
- JOHN INGMAN. Rose carmine, showing veins of deeper shade; large size, open form with wavy edges. Pkt. 5c; Oz. 10c; ½ Lb. 30c; Lb. \$1,00
   KING EDWARD VII. A new, bright crimson scarlet of largest size; open form well expanded, round standard. One of the very best. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 65c.
- LORD ROSEBERRY. Magenta rose, veined with a deeper shade: hooded form. Larger and brighter than Lord Ken-yon. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 65c.
- MRS. DUGDALE. A large, finely formed flower of a pe-culiar shade of primrose overlaid with crimson rose. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 65c.
- PRINCE OF WALES. Flowers very large and a peculiar brilliant red, distinct in shade from any other sweet pea. Very attractive. Pkt. 5c; Oz. 10c; ¼ Lb. 25c; Lb. 15c.
- QUEEN ALEXANDRA. A magnificent bright scarlet red, very large, semi-hooded. Unsurpassed in brilliancy of color. Pkt. 10c; Oz. 15c; % Lb. 40; Lb. \$1.50
- ROYAL ROSE. One of the largest, finest formed flowers. Standard deep rose pink; wings a lighter shade of same color. Pkt. 5c; 0z. 10c; 4 Lb. 20c; Lb. 60c.
- ALOPIAN. One of the most brilliant and richly colored sorts yet introduced. The flowers are of faultless form, large and a very rich, brilliant cardinal red. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 60c. SALOPIAN.

#### LAVENDER AND LIGHT BLUE

- COUNTESS OF RADNOR. Self colored in a very distinct and beautiful shade of lavender. Pkt. 5c; Oz. 10c; & Lb. 20c; Lb. 60c.
- DOROTHY TENNANT. Flowers warm violet or mauve, finely formed. Standard broad, hooded: wings large, rounded. Pkt. 5c; Oz. 10c; 4 Lb. 20c; Lb. 60c.
- FASCINATION. Standard lilac, wings blue tinged with lilac, the blossom finally turning to a bright blue. Large size, hooded form. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 60c.
- LADY GRISEL HAMILTON. A large flower similar in color to Countess of Radnor, but nearer blue. Pkt. 5c; Oz. 10c; <sup>1</sup>/<sub>4</sub> Lb. 20c; Lb. 60c.
- LOTTIE ECKFORD. Standard a peculiar and delicate shade of magenta blue; wings very large, long and shaded lavender, deepening to violet at edge. Pkt. 5c; 0z. 10c; lavender, deepening to violet at edge. 4 Lb. 20c; Lb. 60c.
- MAID OF HONOR. Medium sized flower, nearly white having a distinct edging of blue which gives it a peculiar and very attractive appearance. Pkt. 5c; Oz. 10c;
- having a distinct edging of blue which gives it a peculiar and very attractive appearance. Pkt. 5c; Oz. 10c; <sup>1</sup>/<sub>4</sub> Lb. 30c; Lb. 60c. MRS. GEORGE HIGGINSON, JR. A very clear delicate shade of lilac blue, self colored; medium size, semi-hooded form, usually three flowers on a stem. Pkt. 5c; Oz. 10c; <sup>1</sup>/<sub>4</sub> Lb. 20c; Lb. 60c.

#### PURPLE STRIPES

- RAY FRIAR. Very large, finely shaped flowers of deli-cate heliotrope color, tinged, marbled and dotted with darker shade. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 60c. GRAY FRIAR.
- SENATOR. Standard broad, very large, delicate lavender, nearly covered with stripes and splashes of purple maroon; wings medium sized, round, striped with a bluer shade than the standard. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 60c.

#### BLUE AND PURPLE

- CAPTAIN OF THE BLUES. Standard large, broad, bright purple blue; wings expanded, lighter and brighter blue than standard. Pkt. 5c; 0z. 10c; ½ Lb. 20c; Lb. 60c.
   COUNTESS OF CADOGAN. Stems very long, each bearing three or four flowers, a little darker than Navy Blue. Pkt. 5c; 0z. 10c; ½ Lb. 25c; Lb. 75c.
   DUKE OF WESTMINSTER. Standard purple, wings of purple shading to violet, large size, hooded form. Pkt. 5c; 0z. 10c; ½ Lb. 20c;
   ELOPA NOPTON. The best deem blue sweet page. Nodium
- FLORA NORTON. The best clear blue sweet pea. Medium size, open form, usually three flowers on a stem. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.
- AVY BLUE. A true blue, quite distinct. Oz. 10c; ½ Lb. 20c; Lb. 60c. NAVY Pkt. 5c;

#### CLARET AND MAROON

- BLACK KNIGHT. One of the darkest varieties. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 55c.
- BOREATTON. One of the darkest and richest colored. Standard large, rounded; rich, satin-like maroon. Wings similar in color to standard. One of the best dark varieties yet produced. Pkt. 5c; 0z. 10c; 4 Lb. 20c; Lb. 50c.
- DUKE OF CLARENCE. A fine flower with large standard and wings of uniform shade of dark claret. Pkt. 5c; Oz. 10c; ½ Lb. 20c; Lb. 50c.
- DUKE OF SUTHERLAND. Standard violet and purple, somewhat wavy. Wings violet and indigo. Large size, hooded form. Similar to Monarch but better. Pkt. 5c; Oz. 10c; \Lb. 20c; Lb. 65c.
- OTHELLO. A very dark maroon, practically self colored with almost black veining. Large size, hooded form. Pkt. 5c; Oz. 10c; ¼ Lb. 20c; Lb. 60c.
- SHAHZADA. This has a very rich dark maroon standard and deep violet wings. One of the finest dark sorts. Pkt. 5c; 0z, 10c; ½ Lb. 20c; Lb. 60c.
- STANLEY. A very beautiful sort. Standard large and flat; color a deep maroon and warmer than Boreatton. Pkt. 5c; 0z. 10c; ¼ Lb. 20c; Lb. 65c.

**Mixtures of Sweet Peas** Most people obtain more satisfaction from planting Sweet Peas in mixture than from growing named sorts, but to be successful it is necessary that the seed be of the best quality obtainable. Often what is offered as mixed seed is stock harvested from plants that have come up as volunteers on ground where Sweet Peas have been grown before, or a lot of seed which has been grown, saved or handlel so carelessly that it cannot be sold as any distinct variety. The use of such seeds will not give satisfactory results. However, where the seed is grown from the very best stock that can be produced, is mixed in most carefully studied proportions and then the seeds of desirable but shy seeding sorts are added, there is nothing superior for use in the home garden.

We assure our customers the Mixed Sweet Pea Seed which we offer is the result of as great care in **Choice Mixed** We assure our customers the anted sweet reased when we out is the different is a from any seed that can be bought. We invite comparison with any and all others, no matter under what name or at how high a price offered and are certain that a trial will demonstrate the superiority of our mixture. Pkt, 5c; 0z, 10c; 4 Lb, 20c; Lb, 50c.

Eckford's Hybrids Mixed This is made up of the best of Eckford's large flowering sorts carefully proportioned. As only Eckford's varieties are used in this mixture, some of beautiful colors. Pkt. 5c; 0z. 10c; 4 Lb. 20c; Lb. 55c.

Sweet William is unsurpassed. The plants produce a succession of nover clusters, thus affording splendid bloom for serveral weeks. The colors are ex-ceedingly varied, ranging from white through many shades of rose, lilac, red, carnine, crimson, marcon to nearly black, usually two shades to each plant. The seed can be planted in the spring in open ground and will blossom in the fall or the following spring; or it can be sown in August and will make fine blooming plants for the summer following. Hardy perennial; one and one-half feet high.

Black. Reddish, velvety black ..... Pkt. 5c. Fine Mixed, Will be found especially satisfactory Mixed Double. Many colors .....

SWAN RIVER DAISY—(See Brachycome) TAGETES—(See Marigold) TROPÆOLUM CANARIENSE—(See Canary Bird Flower) TROPÆOLUM LOBBIANUM—(See Nasturtium Trailing) TROPÆOLUM MINOR—(See Nasturtium Dwarf)

Torenia Fournieri A fine annual with frumpet shaped, sky-blue flowers, each having three spots of dark indigo blue and a yellow stain in the center. Extremely handsome when grown in pots or out of doors in a shaded location shaded location ... .....Pkt. 10c.

TOUCH-ME-NOT-(See Balsam)

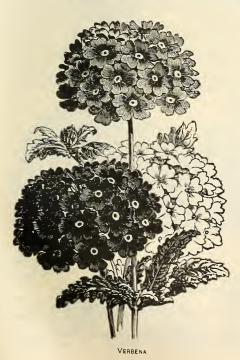

Valerian, Greek (*Polenonium cæruleum*) plant often called Jacob's Ladder from its pinnately cleft leaves. Flowers blue, nodding at the ends of up-right stalks. It blooms in June, is of easy cultivation and perfectly hardy and may be increased by dividing the roots. Sow early in spring, in open border and thin to one foot apart. Perennial; two feet high..Pkt. 5c.

91

SWEET WILLIAM

**Verbena** The Verbena has been wonderfully improved during the past fifty years in form and size of flower truss and thrives particularly well in American soil. For masses in beds on the lawn no plant excels it. In the varieties may be found every color from white through like and form June even until after the early, light frosts. Seed should be soaked in lukewarm water before planting and care taken that the soil be very rich. Verbenas can be grown from cuttings, but seedlings are more vigorous and produce more flowers, all being showy and often the clusters have a delicate fragrance. Half hardy perennial trailer which has gained much in popularity through treatment as an annual.

Hybrida White. Produces large, pure white flowers; very flori-ferous; fine for florists; comes true from seed......Pkt. 5c. 10c. 

 Hybrida Italian Striped.
 Beautiful.
 "Icc.

 Fine Mixed.
 Embraces all colors.
 "5c.

 Extra Choice Mixed.
 Includés all the best types and in a wide range of splendid colors.
 Pkt. 10c.

 Mammoth Mixed.
 Embraces a wide range of the most beautiful colors, the clusters being of largest size.
 Pkt. 10c.

 Hybrida Compacta Mixed.
 A distinct sort.
 The plant forms compact bunches about five inches high and eighteen inches across, covered throughout the season with large trusses of white, scarlet and violet flowers.
 Flowers well from seed sown in the spring.

Vinca A genus of ornamental, free flowering greenhouse perennials, blooming the first season; glossy, green foliage and handsome flowers. If sown early under glass and transplanted in a warm, sheltered situation will bloom frost. The plants require no trimming, are in continuous bloom from setting out until frost and are entirely free from the at-tacks of insects. These desirable features account for the very general use of Vincas in parks and private grounds for summer bedding and borders. About fifteen inches high. Dure White, Beautiful nure white circular flowers.....Pkt. 5c.

Rosea. Rose with crimson eye. The flowers are often two inches in diameter. A very desirable window plant.....Pkt. 5c. Sc. Mixed .....

Violet The violets commonly grown by florists are propa-seed are smaller and more delicately colored, but quite as fragrant as the named sorts. As a rule violets do well in any good, well enriched soil. The best results, however, are obtained in soil prepared from so d taken from a rather heavy, sandy loam that is well drained.

Single, Sweet Scented ......Pkt. 10c. VIOLA TRICOLOR—(See Pansy)

Viola Incolor-(see Parky) Virginian Stock (Cheiranthus maritimus) The plants are covered with a dense or edging. A continual succession of blossoms may be kept up the whole season by sowing at intervals through spring and summer. Hardy annual; about nine inches high. Red and White, mixed.....Pkt. 5c.

Wallflower are very conspicuous in beds and borders and are very useful in making bouquets. Sow the seed early in hotbeds and while the plants are small prick them out into pots and sink in the earth. On approach of cold weather remove the pots to the house and the plants will bloom all winter. Although a woody perennial it is best to remew the plants from seed, for they begin to fail after having bloomed one or two years. Tender perennial; one and one-half feet high. high.

Early Brown. Brownish-red, fragrant flowers; large, thick spikes; early. Tender biennial.......Pkt. 5c. Golden Tom Thumb. Free flowering, of dwarf and compact 

Whitlavia Grandiflora. A plant with delicate, hand-some foliage, producing a constant succes-sion of beautiful, violet-blue, bell shaped flowers about half an inch long and borne in drooping clusters. In heavy, wet soli it does not succeed well but in light sandy loam few flowers give more satisfaction. Sow the seed in open border early in spring. Hardy annual; one foot high...... Akt. 5c.

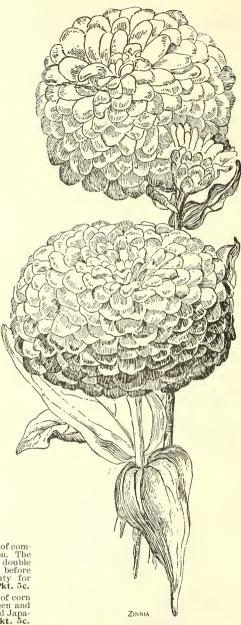

Wigandia Caracasana Very ornamental plants with immense, per-fectly shaped leaves, the veins and the stems being covered with crimson hair. It grows rapidly and should be formed into a bush. Its large leaves and clusters of lilac flowers which continue to open in succession for a long time give the plant a tropical aspect and make it valuable for garden and lawn decoration. Seeds if sown early in spring in hotbed will produce large plants by the middle of summer....Pkt. 10c.

Wistaria Chinensis One of the most beautiful and rapid growing of hardy climbers. Frequently blooms both in spring and fall. The flowers are pale blue, pea shaped and are borne in long, drooping clusters, often over a foot in length. Seeds should be sown in mellow loam early in the spring, or in greenhouse or hotbed in winter and when plants are one foot high trans-plant into situations where they are to remain....Pkt. 20c.

Xeranthemum (*Everlasting*) A free flowering plant of com-pact habit and of the easiest cultivation. The leaves are covered with a silvery down and the single or double flowers are pure white, deep purple or yellow. If gathered before fully opened and dried in the shade, will retain their beauty for years. Hardy annual; one foot high. MixED......Pkt. 5c.

Zinnia Very showy plants with large, double, imbricated flowers which, when fully expanded might easily be mistaken for dwarf dahlias. There is much satisfaction in a bed of Zinnias, for when nearly every other flower has been killed by frost this plant is still in full bloom. Few flowers are more easily grown or bloom more abundantly throughout the season and the wide range of color is not less remarkable than their unusual depth and richness. Sow the seed early in spring, in open ground and transplant to one and one-half feet apart in good, rich soil. Half hardy annual; about eighteen inches high.

## M. FERRY & CO'S DESCRIPTIVE CATALOGUE.

#### FOR SPRING **BULBS AND ROOTS** PLANTING

All bulbs and roots will be sent by mail or express, charges prepaid, when ordered at single or dozen rates. At the 100 rate they will be sent by express or freight, the purchaser paying the charges unless otherwise stated. Not less than six of any one variety supplied at dozen rates and not less than 25 at the 100 rate. Orders with money should be sent to us as early as possible and they will be filled in rotation. Bulbs subject to injury by frost will not be sent until such danger is over. Included in this class are some of our most showy garden flowers and their culture is very easy. In the spring, is over. Included in this class are some of our most showy garden flowers and their culture is very easy. In the spring, after danger from frost is over, plant in a rich, loamy soil, having a sunny position and flowers the same season are assured with certainty. with certainty.

Begonia Tuberous Rooted. The tubers which we offer are of the very best quality and with proper care will give a beautiful display early in the summer. For growing in pots or boxes in the house, plant in rich, sandy soil, give good drainage and water freely after the leaves start but do not let the soil become sour or soggy from over water-ing. If it is desired to have a bed outdoors, select a shady, moist situation making the bed rich with thoroughly rotted manure and leaf mold, if obtainable. Plant as soon as danger from frost is over. After the plants start into vigorous growth keep well watered.

**Caladium Esculentum** Known as Elephant's Ears. One of the finest tropical plants which can be grown in the open air in the north. It can be made to produce three to ten leaves three to four feet long and nearly as wide, on stalks four to six feet high. The soil best suited to Caladiums is a mixture of fibrous loam, leaf mold nearly all potted cover schear measure in constituents. soil best suited to Caladiums is a mixture of fibrous loam, leaf mold, peat and well rotted cow or sheep manure in equal parts, with a sprinkling of sand added. The tubers should be potted at first in as small pots as will conveniently accommodate them and shifted into larger pots as they require it. But little water must be given to the roots till active growth commences, when, humid atmosphere is necessary for their best development but they must be shaded from bright sullight. The bubbs we of-fer can be relied upon for satisfactory results.

DOZ EACH First Size Bulbs, nine inches and over in circumfer-35c. \$3.50 ence Second Size Bulbs, seven to nine inches in circumfer-3.00 1.50

Third Size Bulbs, under seven inches in circumference.15c.

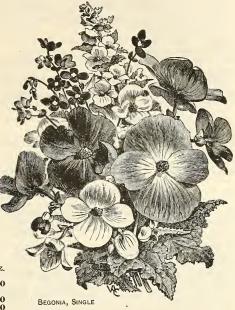

**Dahlia** The flowers are so symmetrical and perfect and the range of colors so large and varied, that they will always be popular where display is wanted. The roots are tender and easily injured by frost; they should be set out three feet apart, after all danger of frost is over and during winter placed in a cool very carefully selected; all possess qualities of highest excellence.

Apple Biossom. Shades of red, pink and white; very attractive. Each 15c; doz. \$1.50
Biack Prince. Very large, deep maroon; one of the choicest decorative dahlias. Each 15c; doz \$1.50

**Dielytra** (Bleeding Heart) Tuberous rooted plants that bloom in the spring; favorably known almost everywhere. They are a charming, hardy perennial plant with much cut foliage and flowers of interesting structure, The flowers are delicate pink, very graceful and produced continuously from May to July. They require only the ordinary culture of border plants. Roots planted in spring or autumn flower freely and should be divided every third year. Each 15c; doz. \$1.50 Dielvtra

### D. M. FERRY & CO., DETROIT, MICH.

# GLADIOLUS

No flower has gained more rapidly in public favor than the Gladiolus; this could not well be otherwise, for in addition to the great intrinsic merit of the flower, it is easy of cultivation and blooms the first season. Gladioli thrive in almost any good soil except a stiff elay, require full sunlight and are liable to injury only from rank manure. Plant the bulbs six to nine inches apart, the large ones four inches and the small ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of two weeks during the spring and early summer; in this way a succession of bloom may be had from mid summer until frost. In autumn, before freezing, they should be dug up and the tops allowed to dry down, after which the dry tops, earth and old bulbs can be removed. Store in a cool, dry place, secure from frost until spring.

#### CHOICE NAMED VARIETIES

These named varieties are selected with special reference to beauty of flower, range of color and habit of plant.

	EACH	DOZ.
Augusta. Pure white, with blue anthers,	6c	\$0.60

### MADEIRA VINE

Tuberous rooted climber with glossy green leaves and delightfully fragrant, white blossoms. Sometimes called Mignonette Vine. It is of rapid growth, and from a few tubers vines will be produced sufficient to cover one side of a cottage in a single season. The tubers are tender and must be protected from frost during winter. Each 5c; doz. 50c.

#### TRITOMA

Sometimes called Red Hot Poker. The handsome flowers Sometimes called Red Hot Poker. The handsome flowers are produced in large spikes of rich orange-red tinted flower tubes. Plant two feet apart. Tritomas are hardy south of Cincinnati when well covered in winter. In the north, dig up the plants in November, place in boxes with dry earth and store in a cellar. In spring place in a warm, sheltered, well drained spot, preferably with a background of shrub-bery. Each 15c; doz. \$1.50

Lilies have always been regarded as among the most beautiful of garden plants. Of queenly beauty, faultless purity and stately form, too much cannot be said in their praise and we are glad to notice their increasing endure the severity of our winters and many are among the most hardy of our garden flowers.

of our garden flowers. Bulbs should be planted as soon as the frost is out of the ground; the earlier the better. Select a well drained spot, dig the soil deep and make it fine, enriching it abundantly with well rotted cow manure, adding a liberal mixture of sand. Set the bulbs from three to five inches deep, according to size. During the winter it is advisable to cover the surface of the bed with a thin layer of manure which will afford a slight protec-tion to the bulbs and also materially enrich the soil. In spring the manure may be removed or dug in between the rows. Care should be taken that they have proper drainage, no water being allowed to stand around the roots. Once firmly established, they should not be disturbed oftener than once in five years. To produce extra fine specimens, plant bulbs in pots early in spring and grow them in the house or under glass.

Lilium Auratum The glorious, gold-banded lily of Japan and one immense, ivory-white flowers are thickly studded with yellow and crim-son spots, while in the center of each petal is a golden band, fading at its edges into the white. Such choice bulbs as we offer, if well cared for will give from five to ten magnificent flowers the first year and under good cultivation will, after becoming well established, give from ten to fifty. 20c. each; \$2.00 per doz.

#### Lilium Speciosum

Album Pure white flowers with a greenish band through the center of each petal. They are of great substance and very fragrant. One of the best for general culture. 25c. each; \$2.00 per doz.

LILIUM AURATUM

LILIUM TIGRINUM FLORE PLENC

Lilium Speciosum Rubrum No words can overstate the brilliant beauty of these fa-mous Japanese Lilies. The six broad, white or pink petals are thickly dotted with rose or crimson spots and the graceful form and brilliant color make them very effective and desirable. Especially thrifty and hardy. One of the best for garden culture. 20c. each; \$2.00 per doz.

Jacobean Lily (Amaryllis formosissima) Each of the five narrow petals of this flower is three to four inches long and a very intense, rich scarlet color of unequalled brilliancy, vividness and purity. The plants are readily grown and although the bulbs are not hardy they can be easily preserved during the winter in a dry cellar and planted in the open ground in the spring. They may be grown in winter like hyacinths. 10c. each; \$1.00 per doz.

Lilium Tigrinum Splendens (Improved Single Tiger Lily) Has very large flowers of ex-cellent form; color orange-salmon with dark spots. 12c. each; \$1.25 per doz.

Lilium Tigrinum Flore Pleno (Double Tiger Lily) This magnificent Illy is of stately habit, bearing clusters of very large, double flowers on tall, strong stems; color bright orange-red spotted with black. 12c. each; \$1.25 per doz.

very uniform and exceptionally neat lant. Comes readily into bloom for

Lilium Longiflorum A very unit plant. Com Memorial Day, being a little later forcing variety than Lilium Harrisii and preferred by some to that, since the flowers are of better substance. Extensively used by florists for cut flowers. When grown in the open ground it blooms in June or July. The pure white flowers resemble the well known Bermuda known Bermuda Easter Lily. 1 2 c. each; \$ 1.25 per doz.

**Tuberose** buttonhole bouquets, in large bouquets, or as single specified pots half full of well rotted cow manure and the remainder with good, rich, sandy soil. Plant the bulbs in this in April, water moderately and hasten growth by putting in a warm, light place. When weather has become warm plunge the pots in the earth out of doors. They will usually flower before cold weather; if they do not, the pots can be brought in and bulbs will bloom in the house.

TUBEROSE

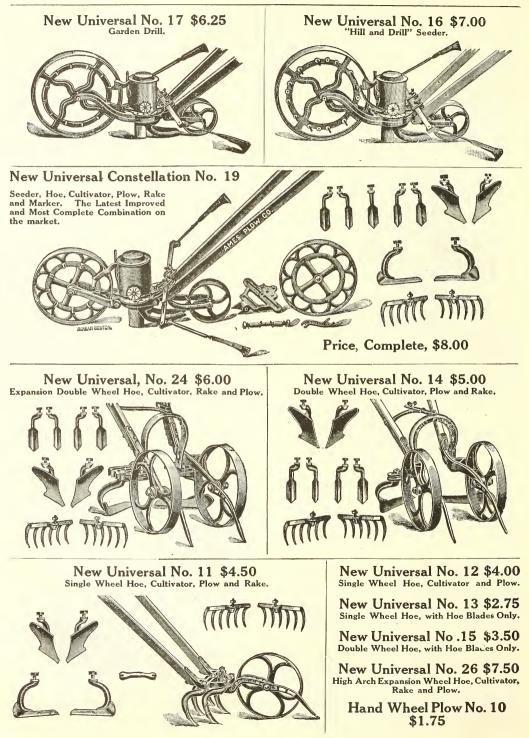

in the house.

Double Dwarf Pearl, extra large bulbs, 4c. each; 40c. per doz; \$2.00 per 100. We will supply second size bulbs 3 for 10 cents, 25 cent. per dozen, \$2.00 per 100. The 100 rates are by express at purchaser's expense.

About September First next we will issue our Annual Catalogue of CHOICE DUTCH BULBS AND SEEDS FOR FALL PLANTING. It will be sent free to all customers without ordering it, and to others who apply for it.

## BOOKS

BULBS AND TUBEROUS-ROOTED PLANTS, BY C. L. ALLEN. History, description, methods of propagation and complete directions for their successful culture in the garden, dwelling and greenhouse. Over 300 pages profusely illustrated. Price, \$1,50

DAIRYING FOR PROFIT, OR THE POOR MAN'S COW. A practical book by a practical woman, explaining every detail of the best management of a cow to secure the most and best milk and the care of the milk necessary to pro-duce the best cream and butter. Price, 50c.

auce the best cream and butter. Price, soc. FIRST BOOK OF FORESTRY, By FILIEER ROTH, Chief of the Division of Forestry, U. S. Dept. of the Interior. The need for forest protection in America is coming to be gener-ally realized, but the knowledge of the principles underlying forestry is by no means so general. This book has been pre-pared for this purpose and has been written with special reference to the needs of the library of the country home. Cloth, 291 pages, illustrated. Price, \$1.00

GRASSES AND HOW TO GROW THEM, BY PROF. THOS SHAW, A practical discussion of the economic grasses of the United States and Canada, viewed from the stand-point of the needs of the stockman and the farmer. Characteristics, adaptation to climate and soil, place in

rotation, sowing, pasturing and harvesting are treated fully. Price, \$1.50

HOW TO DESTROY INSECTS ON FLOWERS AND HOUSE PLANTS. Tells how to fertilize and stimulate plants and gives the experience of cultivators in keeping their plants healthy. Among others, there are topics on the follow-ing: Red Spider, Aphis, Green Fly, Worms in Pots, Rose Slugs, Rose Bugs, Snails, Caterpillars. It also tells how to destroy ants and all house bugs. **Price**, 25c.

MUSHROOMS, HOW TO GROW THEM. A practical treatise on Mushroom culture by William Falconer. It embodies the experiences of the author in this country and in Europe regarding the best methods of making this fascinating occupation a success. Fully illustrated. Price, \$1.00

MUSHROOM CULTURE. A little book, but full of easily understood directions which if followed would enable every one to grow his own supply. Price, 10c.

TOBACCO LEAF. Its Culture and Cure, Marketing and Manufacture. Every tobacco grower should have this book. We know of no work where the culture of any particular crop is so exhaustively treated and the essentials to success so well presented as in this. It is a model hand book. **Price**, **\$2**,00
