Report of Board

Report of the Board of Conciliation in the matter of the Dispute between Golden Manitou Mines, Ltd., and The United Mining and Smelting Workers (C.C.L., C.I.O.) Local 164.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

DEAR SIR:—This dispute arose over the terms of a contract to be concluded between the above-mentioned parties. After direct

negotiations and negotiations conducted under the guidance of Mr. Raoul Trepanier, regional conciliation officer of the Department of Labour, the two parties requested a Board of Conciliation under P.C. 1003, the Board consisting of: Professor B. S. Keirstead, Montreal, Chairman; Mr. Guy M. Desaulniers, Montreal, nominated by the Union; and Mr. John J. Robinette, K.C., Toronto, nominated by the Company.

Brief of the Union enumerated six points of dispute:

- (1) Wages and Bonus Adjustment
- (2) Incentive Bonus
- (3) Union Rights
- (4) Discrimination
- (5) Maintenance of Membership (Union Shop)
- (6) Check-off

Of these all but two, the question of the Union Shop and the voluntary, revocable check-off, were agreed upon by the two parties. The Board was therefore left to recommend on the clauses embodying provisions for a Union Shop and voluntary check-off. Two public sittings were held on January 11th and 12th, 1945, at Purvis Hall, McGill University, Montreal. Appearing before the Board for the Company were Mr. T. J. Agar, K.C., counsel, and Mr. Andrew Robertson, mine superintendent, and, for the Union, Messrs. J. Billoki and Bihie. Argument was heard from both sides and the attached briefs and exhibits were received.

The Board met for deliberation in Montreal, Feb. 3rd, 1945. After a full and objective discussion the Board had reluctantly to agree to present majority and minority Reports, because, though there was general agreement on the basic principles involved, there was disagreement on the application of these principles to the particular case under consideration. The majority of the Board wish to record their appreciation of the objective and fair attitude adopted by their colleague.

FINDINGS—UNION SHOP

We hold that a Union Shop, or some form of "union security" is generally desirable in collective contracts. We realize that the issue of a union shop raises a conflict of rights. On the one hand the Union Shop involves an undesirable element of compulsion on would-be independent, non-union workers. Also it restricts the liberty of the employer to retain in employment whom he will. These are serious matters. Against them we have to weigh the alternative right of workers to maintain their trades unions. At first sight it might appear that the right to organize and to maintain a trades union does not require

a Union Shop for its security. In a country of old-established Unionism, free from anti-union attitudes on the part of employers, this might well be so. Thus in Britain the need for the Union Shop can scarcely be said to exist. But in Canada there are two considerations that make the Union Shop necessary for special union maintenance. One of these is the hostility in some instances of employers. Since that does not arise in this case, where the Company has taken a commendably co-operative attitude to the Union, it does not require further discussion here. The other consideration is the general inexperience and lack of social education of the workers. If some men can enjoy the benefits established by the Union without paying dues and accepting Union responsibilities, it becomes difficult to maintain Union membership and, perhaps more important, union discipline. When Union discipline breaks down the life of the Union is threatened, and, moreover, the maintenance of good labour relations by the Company is difficult, if not impossible.

We have, therefore, a conflict of rights, and some principle for the resolution of this conflict must be found. In a very able discussion of such conflicts of rights Professor Byron R. Abernethy¹ shows that such conflicts are not peculiar to labour relations and that liberties are not absolute, but relative to the social matrix in which they subsist. He finds the resolutions of such conflicts in the public good. Applying that principle to the problem of the Union Shop we find that the maintenance of sound trades unions is in the interest of the general public, because trades unions have a stabilizing effect on the economy and tend to slow up the disequilibrating effects of too elastic labour supply schedules; we find strongly maintained Unions in the interest of the workers for obvious reasons; and we find the Union Shop, in the long run, to be in the interests of the employers, because full unionization is a condition of good shop co-operation, union discipline and sound labour relations.

We find, further, little value in the argument that Union Shop clauses ought not to be incorporated in first contracts. Indeed the need for the Union Shop clause and the justification of it are strongest when the Union is first formed. A long-established Union does not require such protection and it might well be argued that in such cases Union Shop clauses should be dropped.

¹ B. R. Abernethy: *Liberty Concepts in Labour Relations*, Washington, 1944.

We believe, however, that there are two conditions under which Union Shop clauses ought not to be written in first contracts. These are (1) where the record and history of the Union are such as to indicate lack of discipline, unreliability of officers, organizers or members, corruption, truculent hostility and other undesirable traits; (2) where jurisdictional disputes between rival Unions exist and it is not clear that a sufficient preponderance of the workers prefer one Union to another, and where the Union Shop would be used as a weapon in inter-union conflict.

There was no evidence that either of these conditions existed in the case under our consideration. Indeed, just as the evidence presented by the Union advocates was most complimentary to the Company, so was the evidence presented by the Company's spokesman most favourable to the Union. Since neither of these conditions exist we believe on general principles and in the interest of both the workers and the Company, that a Union Shop clause should be embodied in the contract. We hold this would please the workers, protect their Union, make for better discipline, better shop co-operation and hence better labour relations for the Company and so be to the interest of both parties. We do consequently recommend the inclusion in the contract of a Union Shop clause.

FINDINGS: CHECK-OFF

The arguments for a check-off are twofold: (a) in the absence of other "security" provisions, the check-off makes for Union security and Maintenance of Membership; (2) it is a matter of considerable convenience to Union officials.

In this case—and our argument is contingent on the acceptance of our recommendation for a Union Shop clause—the question of Union security does not arise, because the Union Shop will be a far more adequate protection to the Union than any voluntary check-off would be. There remains the matter of convenience. Against this must be put the reluctance of the Company to add to its book-keeping responsibilities and to incur the odium of reducing the "take-home" pay. Further the Union failed to satisfy us that there was any need for a check-off in this particular case. We consequently recommend that no check-off clause, even of the voluntary type, be included in the contract.

We observed with gratification the excellent relations obtaining between Golden Manitou Mines, Ltd., and their employees. We commend both parties on these relations and on the fair contract which they propose to

conclude. We congratulate them on the good spirit and ability with which both laid their case before us. We sincerely believe that the acceptance by both of the recommendations we have made will be in their joint interest and will make for the continuation of the happy and efficient labour-management relationship we have been glad to record.

February 5th, 1945.

(sgd.) B. S. KEIRSTEAD,
Chairman of the Board.
(sgd.) GUY M. DESAULNIERS

Minority Report

Re: Board of Conciliation in the Matter of the Dispute between Golden Manitou Mines Limited and the United Mining and Smelting Workers, Local 164.

I regret that I cannot agree with the conclusion of the majority of the Board in favour of union shop.

In my opinion, it is much too extreme a step to recommend the inclusion of a union shop clause in a first agreement, particularly where there has not been a complete investigation into the number of present members of the union in good standing. As the majority of the Board have stated, the effect of a union shop clause is to coerce a minority of the employees who are not members of the union and also to coerce the company in its employment practices. I cannot bring my mind to think that such coercion is necessary or desirable and it is completely repugnant to my conception of justice to the individuals and to the company.

Recently, as a member of a Board of Conciliation, I had occasion to consider the desirability of inserting a maintenance of membership clause in a first agreement in Steel Company of Canada v. United Steel Workers of America, Local 1005¹ and the unanimous view of the Board in that case was expressed as follows:

To ask in a first agreement that "good standing" in a union as yet untried in this plant, and one whose conditions of "good standing" are consequently an unknown factor to this company, be made a condition of employment does not commend itself to this Board, and it is accordingly recommended that the union withdraw its request for inclusion of this clause.

In my opinion that view is even more applicable to a union shop clause and I would therefore in the present case, recommend that the union withdraw its request for the inclusion of a union shop clause.

As to check-off, I agree with the conclusion of the majority of the Board that we should

¹ L.G., Jan., 1945, p. 55.

recommend against the inclusion of a check-off clause. In my opinion, the union here has not made out any case for check-off. It has adduced no evidence as to the present number of its paid-up members or as to the present number of its members in good standing, and, in fact, when requested by counsel for the company to supply this information to the Board, the union, through its representatives, objected to doing so. Moreover, the union did not adduce any satisfactory documentary evidence in the form of signed authorization cards or otherwise with a view to establishing that a substantial number of the employees desire check-off facilities. Nor did the union establish that it had any particular difficulty in collecting dues from its members; certainly it did not establish any such difficulties which could be attributed to the conduct of the company. Therefore, on the evidence, I would recommend against the insertion of a check-off clause. I might add in this connection that I agree with the view expressed by Professor Bora Laskin, the employees' nominee on the Board of Conciliation in *Lake Shore Mines Limited v. Kirkland Mine and Mill Workers' Union, Local 240*,² that the check-off should not be made the means of initiating union stability "saving perhaps cases where it appears that

an employer's unfair labour practices have prevented a union from establishing itself on solid footing". There has been no suggestion in the present case that the company has been guilty of unfair labour practices.

I cannot refrain from observing that, if consistency and uniformity of conditions in a particular industry constitute desirable objects, two prior Boards of Conciliation dealing with mining companies have reached the same conclusion as I have reached, namely that maintenance of membership or union shop and check-off should not form part of a first proposed collective labour agreement. (See the unanimous decision in *Lake Shore Mines Limited v. Kirkland Mine and Mill Workers' Union Local 240*² and the majority decision in *Noranda Mines Limited v. International Union Mine, Mill and Smelter Workers, Local 688*.³)

I should add, in conclusion, that if I have expressed my dissent from the views of the majority of the Board in vigorous terms it is not done without respect for the views entertained by the majority, which I know they reached after anxious and careful consideration of the matter.

(sgd.) JOHN J. ROBINETTE,
Employer's Nominee.

Report of Board in Dispute between the Steel Company of Canada, Limited, Ganoque, Ont., and Local 3208, United Steelworkers of America.

On February 24 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Steel Company of Canada, Limited, Ganoque, Ont., and Local 3208, United Steelworkers of America.

The Board was under the chairmanship of His Honour Judge J. P. Madden, Ottawa, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. John J. Robinette, Toronto, appointed on the nomination of the employer, and Mr. Henry L. Cartwright, Kingston, Ont., appointed on the nomination of the employees.

The text of the Board's report follows:—

Report of Board

Re Wartime Labour Relations Regulations, P.C. 1003, and re Dispute Between Steel Company of Canada Limited (Ganoque) and Local 3208 United Steel Workers of America.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you in this matter now begs leave to report.

The representatives of both the interested Company and the Union met with the Board at Ganoque, Ontario, the site of the plant in question, on February 7, 1945.

The Company was represented by G. A. Little, Superintendent of the Ganoque Works, R. E. Alden, Personnel Department, Steel Company of Canada, Limited, A. L. Lott, Manager of Industrial Relations, Steel Company of Canada Limited.

The Union was represented by Gordon Bishop, Recording Secretary of Local 3208, M. T. Montgomery, Field Representative of the International Union, and Don R. Montgomery, Field Representative of the International Union.

The cases for the Company and the Union were very ably presented by Mr. Lott and Mr. M. T. Montgomery, respectively.

The Union was certified by Ontario Labour Relations Board on May 2, 1944. The parties, almost immediately thereafter, commenced negotiations to bring to completion a collective agreement. Numerous meetings were

² L.G., Nov., 1944, p. 1357.

³ L.G., Feb., 1945, p. 163.

held over a period of some months, but it finally appeared there was no hope of compromise of the respective views of the Company management and the Union, regarding clauses having to do with maintenance of membership and check off. There were other unsettled matters hinging upon those two main ones, such as Union activity on Company premises, grievance procedure, arbitration and wages.

The Union filed an application with the Regional War Labour Board on September 2, 1944 for approval of wage increases, but no disposition has yet been made of same. Wages were not dealt with by us.

The Gananoque plant of this Company manufactures light forgings and various small steel parts for automobiles and agricultural implements.

For the Union, it was shown that on April 14, 1944 when there were 138 employees in this plant a vote was taken. Out of 133 who cast ballots 114 were in favour of the Union. Since then the number of employees has dropped to about 121. Of this latter number 99 paid Union dues within the last three months.

The Company submitted that the Board were not empowered to make recommendations respecting maintenance of membership and check off, or even to attempt to facilitate the making of an agreement between the parties thereon, as the expression "collective agreement" as defined by P.C. 1003, paragraph 2 (1) (d) did not include such matters. It is understood similar objections have previously been raised but that no decision has been given thereon. Accordingly, the recommendations made herein will necessarily be subject to any such decision by appropriate authority.

In view of the findings and recommendations set out below, it is not considered necessary to deal with the attitude of the Company towards maintenance of membership.

The employer Company gave three main reasons for opposing a check off clause:—

- (a) The Union should be able to collect membership dues without any assistance;
- (b) The additional bookkeeping involved would cause the Company unnecessary work and expense;

- (c) By thus assisting in the collection of dues, the Company would "contribute financial or other support" to the Union, contrary to P.C. 1003, paragraph 19 (1).

As the hearing proceeded, it became apparent that the parties were willing to follow the recommendations, recently made, of the Board of Conciliation, in the case at Hamilton involving Local 3250, in respect to all matters in dispute in the Gananoque case, exclusive of maintenance of membership and check off. The proceedings were thereby greatly facilitated as, for all practical purposes, only the two main items remained to be dealt with.

Although the great majority of the employees are already members of the Union, a maintenance of membership clause is not considered advisable. The Union has been the bargaining agent only a short time and there has been no previous agreement between the parties.

The Company, by assisting in the collection of dues under a check off clause, would not thereby infringe on the provisions of P.C. 1003, paragraph 19 (1). To hold otherwise would attribute to this Regulation a much narrower meaning than was obviously intended. The other objections of the Company to this clause did not appear to be sufficient to indicate that the inclusion of same in the agreement would, in any way, injuriously affect the good relationship now existing between employer and employees in this plant.

The Board therefore recommends:—

- (1) That the Union drop its demand for maintenance of membership;
- (2) That the agreement between the parties contain a clause providing for the check off by the Company of Union dues upon voluntary authorizations by the employees.

All of which is respectfully submitted.

Dated at Ottawa, the 15th day of February, A.D. 1945.

J. P. MADDEN,
Chairman.
H. L. CARTWRIGHT,
Member.
JOHN J. ROBINETTE,
Member.

Conciliation Work of the Industrial Relations Branch During February, 1945

Activities Under the Conciliation and Labour Act and Other Legislation

DURING the month of February, officers of the Industrial Relations Branch were called upon to handle 26 industrial disputes or controversial situations involving 18,747 workpeople employed in 34 different establishments. Of these 21 were new disputes

which originated during the month, while 5 were situations which had been untermi- nated as of January 31, and received further attention in February. They were dealt with under the provisions of the Conciliation and Labour Act, being distinct from and in addition to

Conciliation proceedings under the Wartime Labour Relations Regulations described on previous pages, and under Order in Council P.C. 4020.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:—

MINING AND SMELTING, ETC.	
Coal Mining	6
Metal Mining	1
MANUFACTURING	
Metal Products	12
Textiles, Clothing Products, Etc.	2
Wood Products, Miscellaneous	1
Shipbuilding	1
Rubber Products	1
TRANSPORTATION	
Water	1
Miscellaneous	1

Conciliation or mediation	7
Direct negotiations	4
Administrative action	2
Investigation only	1
Settlement Pending	12

Brief summaries of a few of the cases of chief interest are given below:—

Electrical Apparatus Workers, St. Catharines, Ont.—On February 2 the Department received a request from a representative of the United Electrical, Radio and Machine Workers of America for the appointment of an Industrial Disputes Inquiry Commission under the provisions of Order in Council, P.C. 4020, in connection with a charge that the Packard Electric Company, Limited, of St. Catharines, had discharged an employee with 17 years' service because of union membership and activity. A preliminary investigation by Mr. J. P. Nicol Sr., Industrial Relations Officer, Toronto, revealed that the employee was dismissed for a serious infraction of Company regulations after having received adequate warnings. The request of the Union was accordingly denied.

Coal Miners, Cape Breton, N.S.—Early in February the Department was informed of a decision taken in Convention by District No. 26, United Mine Workers of America, to take a strike vote throughout the membership of the District on recommendation of the District Executive. The chief employers involved were the Dominion Coal Co. Ltd., Old Sydney Collieries Ltd., Acadia Coal Co. Ltd. and the Cumberland Railway and Coal Co. The purpose of the vote was announced as being to ascertain whether the miners were willing to strike to "enforce" their demands for certain wage increases and additional holidays with pay. Earlier application had been made by the union to the National War Labour Board for its approval of the Union's demands, but the application had been rejected. On February 14 the Union asked the Industrial Relations Branch of the Department for information as to the procedure to be followed in the event that the vote resulted in favour of a strike. Its officers were advised by the Minister of Labour that the decision of the National War Labour Board was final and binding, that any strike against the Finding and Direction of the Board would be illegal, and that any action taken to incite a strike of such nature would also constitute an offence. He urged that the Union should cancel the strike vote and either present new evidence to the National War Labour Board in support of its demands or submit its case

to the Royal Commission on Coal. The Union contended in reply that provision for the taking of a strike vote was made under Order in Council, P.C. 7307. On February 19 the Minister of Labour informed the President of the District Executive of the Union that Order in Council, P.C. 7307 had been cancelled on September 1, 1944. He also announced through the press and radio his exchange of correspondence with the Union. However, the Union proceeded with the strike ballot and it was reported that a considerable majority of those who voted were in favour of strike action. Shortly afterwards the President of the District Executive of the Union announced his intention to seek an early interview with the Minister of Labour for a discussion of the situation.

Coal Miners, Glace Bay, N.S.—On February 6, 1945, about 150 men employed at No. 1B Colliery of the Dominion Coal Company Limited, Glace Bay, N.S., went on strike over the dismissal of a returned soldier who refused to work on the coal face in accordance with the terms of his engagement. The strike spread to other shifts and by the following day some 1,270 men were idle. An investigation was conducted by Mr. A. MacDonald, Industrial Relations Officer, Glace Bay, N.S., who was informed that the man in question claimed that a knee injury suffered during the present war made it impossible for him to continue working on the face. An agreement was reached that the Union would transfer one of its members regularly assigned to datal work to the coal face and that the returned man would be placed on datal work.

Railway Car Builders, Trenton, N.S.—Three unauthorized strikes were staged during February by Building Track and Steel Construction employees of the Eastern Car Company Limited, Trenton, N.S., in protest against existing wage rates and working conditions. On February 7 about 175 men, represented by Local No. 2131, United Steel Workers of America, walked off the job. Mr. A. MacDonald, Industrial Relations Officer, Glace Bay, N.S., investigated and secured an agreement the same day under which the men promised to resume work pending negotiations for a settlement of their complaint. However, due to the small number reporting for work on the 8th, the plant remained idle until February 9th. On the afternoon of February 26 about 200 men ceased work, reportedly for the same reasons as before. They resumed work on the morning of February 28, but the same number walked out again three hours later due to a misunderstanding between the plant superintendent and foremen as to the number of men to be assigned to the track crew. The

strike was officially declared off on March 1, but not enough men reported to enable operations to be resumed until the morning of March 2. As the *LABOUR GAZETTE* went to press, it was reported that arrangements had been made to have Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., fly to the locality to make a thorough investigation of the continued unrest.

Aircraft Workers, Winnipeg, Manitoba.—In mid-February, 1945, a complaint was received by the Department from Local No. 741, International Association of Machinists, that an employee of MacDonald Bros. Aircraft Ltd. of Winnipeg, Man., had been discharged following a conviction for a civil offence. It was claimed that the Company refused to reconsider the employee's dismissal or to deal with it under established grievance procedure. Upon receiving from the Union a formal application for the appointment of the Chairman of an Arbitration Committee under the provisions of the collective agreement between the parties, the Minister of Labour on February 24 appointed His Honour Judge W. J. Lindal, of Winnipeg, to act as the Independent Chairman of an Arbitration Committee. The case had not been finally settled at the end of the period under review.

Textile Workers, Cornwall, Ont.—About 80 employees in the Weaving Department of the Stormont Mill of Canadian Cottons Limited, Cornwall, Ont., went on strike on February 14, 1945, in protest against the choice made by the Company in transferring an employee from one department to another. The striking workers were members of the United Textile Workers of Canada, Local No. 2. Mr. R. Trepanier, Industrial Relations Officer, proceeded to Cornwall from Montreal and, after meeting the Union, undertook to arbitrate the case provided that the employees immediately called off their strike. Work was resumed on the morning of February 15, after which a decision was rendered in arbitration by Mr. Trepanier. The decision was in favour of the Company, as a result of which a small group of workers engaged in a sit-down strike. This was abandoned when the Company and the Union executive, in consultation with Mr. Trepanier, agreed upon disciplinary measures to be taken.

Clothing Products Workers, Toronto, Ont.—A request was made during February by the Minister of Labour for Ontario to the Federal Minister of Labour for the appointment of an Industrial Disputes Inquiry Commission under Order in Council, P.C. 4020, to investigate the dismissal of an employee of Ontario Boys' Wear Limited, of Toronto, allegedly on account of union membership and activity. The

request followed a preliminary investigation into a complaint on behalf of a local union of the Amalgamated Clothing Workers of America. A Commission was issued on February 22 to His Honour Judge Ian M. Macdonell of Toronto. The report of the Commissioner had not been received at the end of the month.

Wood Products Workers, Owen Sound, Ont.
—On February 22, 1945, the Minister of Labour received from the Minister of Labour for Ontario a request for the appointment of

an Industrial Disputes Inquiry Commission under the provisions of Order in Council P.C. 4020 to investigate a charge by the National Union of Woodworkers, Local No. 5 (C.C.L.), that an employee had been unjustly dismissed by the Keenan Woodenware Manufacturing Company of Owen Sound, Ont. Previously a preliminary investigation of the case had been made by Mr. H. Perkins, Industrial Relations Officer, Toronto. On February 27 the Minister of Labour appointed His Honour Judge W. G. Owens, of Walkerton, Ont., to conduct a formal investigation.

Report of Industrial Disputes Inquiry Commission in Dispute between Halifax Shipyards Limited, Halifax, N.S., and its Employees, Members of Local No. 1, Industrial Union of Marine and Shipbuilding Workers of Canada

Under the provisions of Section 8 of Order in Council P.C. 4020 the Minister of Labour is empowered to appoint an Industrial Disputes Inquiry Commission for the purpose of investigating any situation which, in his opinion, appears to be detrimental to the most effective utilization of labour in the war effort.

This Section was invoked on January 5, 1945, when the Minister of Labour appointed the Honourable Mr. Justice J. G. Gillanders, of the Supreme Court of Ontario, as an Industrial Disputes Inquiry Commission to investigate various aspects of a dispute between Halifax Shipyards Limited, Halifax, N.S., and its employees as represented by the Industrial Union of Marine and Shipbuilding Workers of Canada, Local No. 1, C.C.L.

The full report of the Commission is reproduced herewith.

Report of Commission

Under the authority of Order in Council 4020 and amendments thereto, the undersigned was, on January 5, 1945, appointed as an Industrial Disputes Inquiry Commission to investigate various matters relating to Halifax Shipyards Limited and its employees represented by Industrial Union of Marine and Shipbuilding Workers of Canada (Local No. 1) C.C.L.

After due notice, the inquiry opened in the County Council Chambers, in the Law Courts Building, Halifax, Nova Scotia, on Monday, January 29, 1945.

The union was represented by J. L. Cohen, K.C., as counsel; Donald MacDonald, M.L.A., district representative of the C.C.L.; Patrick Shea, district representative of the C.C.L.; Charles Murray, secretary-treasurer and business agent of Local No. 1; with other union representatives. The company was represented by F. D. Smith, K.C., as counsel; R. J. R.

Nelson, general manager; Daniel Scouler, general superintendent; John Paterson, superintendent of the Dartmouth Yard; and other company officials.

Mr. H. R. Pettigrew, Industrial Disputes Officer for the Maritime Provinces, was present and attended throughout the proceedings.

At the outset, in order to plan the inquiry and to avoid any surprise in respect of the various matters falling within the ambit of the Commission to be raised, counsel for the union stated and briefly summarized, for the information of the Commission and the company, the various matters and items intended to be presented for consideration. Following this, counsel for the company stated the company's position in respect thereto.

When this had been concluded, it appeared that the matters to be presented fell into two general groups.

1. A number of complaints in respect of which evidence would be called which, it was said, would indicate breaches of an agreement of August 25, 1944, which terminated a strike then in progress under which agreement the employees returned to work on the understanding *inter alia*, that the terms of employment would be those which prevailed at the time the cessation of work occurred, and that the company would take the men back into its employment without prejudice as rapidly as the usual difficulties of reopening the plant would permit. Various allegations were made which were said to indicate breaches of this agreement and show discrimination by the company against members of the applicant union. These items covered considerable range, including (a) The alleged refusal of the company to re-employ one, Alexander Munro, chief steward of the local union; (b) The alleged cancellation of non-recognition of two passes to the company yard in the hands of union

officials; (c) The institution of a new and allegedly more onerous procedure respecting employees absenting themselves on union business; (d) The alleged discontinuance of a courtesy, which it was said had become a practice, in furnishing periodical lists of employees to the union; (e) The alleged participation of the company in organizing or assisting in the organization of another and rival union among the employees; and other alleged acts and incidents which, it would be urged, indicated a policy of discrimination against union members.

The company denied any policy or acts of discrimination or any breach of the agreement under which the employees returned to work and, counsel stated, was prepared to tender evidence in support of this position.

2. The present status of the collective bargaining agreement which was or had been in effect between the parties. The union took the position and proposed to urge that the written collective bargaining agreement dated November 16, 1942, and which had been extended with revisions, for certain periods, was in full force and effect at the time of the strike in August, 1944, and still was in this plight at the present time. The company proposed to establish that this agreement had expired and terminated on March 16, 1944.

On considering the various matters indicated and the position of the parties with respect thereto, it seemed apparent (a) That a full investigation of past incidents concerned with alleged discrimination and breach of agreement, together with the acrimony and differences which such an inquiry frequently stimulates, might well be harmful and detrimental to the future relations of the parties concerned, and in the long view unprofitable, in finding some ground mutually satisfactory to both parties upon which they could hope to carry on their important work; (b) That it was of fundamental importance to have the status of the collective bargaining agreement between the parties set at rest, and that whatever the status might be of the disputed agreement, it would be highly desirable to arrive at a new or renewed agreement providing for the future and obviate the necessity of considering whether or not the old disputed agreement was effective.

These considerations were outlined to the parties and their counsel with the suggestion that time should be taken to explore with care the possibility of reaching an agreement which would govern their future relationships and avoid the necessity of reviewing past events which might adversely affect their future rela-

tionships. Both parties responded wholeheartedly to this suggestion in a spirit of sincerity and co-operation and were finally able to reach complete agreement.

A new written collective bargaining agreement, along the lines of the previous agreement between the parties—with some revision—was executed. The new agreement is between the company, on the one part, and Locals Nos. 1 and 13 of the union, on the other part, (Local No. 1 having been divided, since the previous agreement, into Locals Nos. 1 and 13, which two locals now represent the employees formerly represented by Local No. 1) and continues to November 1, 1946, subject to two months' notice prior to that date of any proposed alteration. A copy of this agreement, executed by all parties, is attached to this report.

All charges and allegations of discrimination of all kinds, and all alleged breaches of the agreement under which the employees returned to work, were completely withdrawn by the union. Alexander Munro, the employee who, it was alleged, had been refused re-employment after the strike of August, 1944, stated, through Mr. Cohen, counsel for the union, that if consideration of his case might in any way interfere with successful negotiations between the company and the union, he desired to ask, and did ask, that all allegations and complaints in respect thereof be completely withdrawn.

All allegations of discrimination and breach of agreement having been withdrawn, it was agreed that two passes, similar to those formerly issued by the company to union representatives, would be issued and recognized by the company.

The parties and their counsel are to be commended for their co-operation and success in reaching an agreement as indicated. It was apparent, during the negotiations, that both parties recognized a broad public duty to find common ground on which their important work could be carried on. They were ready to concede points which, under other conditions, might be thought important, and in arriving at a new agreement have rendered a service not only to themselves but in the national interest.

Dated at Toronto, this sixth day of February, 1945.

J. G. GILLANDERS,
Commissioner.

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-Ferrous Smelting and Quarrying: Metal

PREMIER, B.C.—SILBAK PREMIER MINES LIMITED AND INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 694.

Agreement to be in effect from October 16, 1944, to October 15, 1945, or so long as the union maintains a majority of the employees, whichever period is shorter, and until a new agreement is made. The company recognizes the union as the exclusive representative of all its employees. All eligible employees may join union and may agree to sign check-off for all dues, assessments and fines. No discrimination by the company against any employee because of his union activities, or by the union against any employee.

Hours: 8 per day, 48 hour week, for all workers; for underground workers, the 8 hour day is portal to portal. Overtime: time and one half for all work performed in excess of these hours and also for any work on four specified statutory holidays. Vacation of one week with pay to all eligible employees who have worked at least 300 shifts in any continuous 12 months' period. Provision is made for seniority rights and grievance procedure.

Manufacturing: Textiles, Clothing etc.

MONTREAL, P.Q.—PLEATING AND EMBROIDERY MANUFACTURERS' ASSOCIATION, INC., AND OTHER FIRMS, AND THE INTERNATIONAL LADIES GARMENT WORKERS' UNION, LOCAL 315 (EMBROIDERY, PLEATERS, STITCHERS AND BUTTON MAKERS).

Agreement to be in effect from August 1, 1944, to July 31, 1945. Employers agree to employ only union members in good standing, and to secure any additional help through the union, if available; any others employed during busy season to be considered temporary help and

retained only during the emergency period. The latter must register with the union after one week's employment.

Hours: 8 per day, 4 on Saturday, a 44 hour week, except during June and July when no work is permitted on Saturday. A 15 minute rest period without pay deduction to be granted to all employees during afternoon. Overtime is payable at time and one half and is limited to two hours on any one day and eight hours per week, none on Friday or Saturday. During busy season, however, if an emergency arises, four hours additional overtime may be worked on Saturday afternoon, subject to the prior consent of the union. All overtime after 7 p.m. is prohibited.

Wages: Piece work is prohibited. Bonnaz operators \$41.26 per week, pleaters and pattern makers \$24.49, crochet beaders \$16.70; stampers, special machine operators \$17.81; hand embroidery workers, floor help, pleaters' assistant and covered button and buckle makers, \$13.91. Bonnaz apprentice wage rates are \$8.90 during first six months, increased every six months to \$30.05 after three and one-half years, \$41.26 after four years, if competent. Vacation: one week with pay to all employees working in the industry for twelve months, to be paid by last employer. Health and sick benefits: as from August 1, 1944, each employer agrees to pay one per cent of the weekly payroll of his union employees into a fund to be devoted to payment of sick benefits to union members.

Division of work: in slack times available work to be divided as equally as possible among all employees. Apprenticeship regulations and grievance procedure are included in the agreement.

Manufacturing: Printing and Publishing

VANCOUVER, B.C.—THE NEWS-HERALD LTD., AND THE VANCOUVER NEWSPAPER GUILD, LOCAL 2.

Agreement to be in effect from November 1, 1944, to November 1, 1945, and year to year thereafter subject to 40 to 60 days' notice. The company recognizes the Guild as the sole collective bargaining agency for the employees covered by this agreement.

Hours: editorial department—no more than 8 per day, six days a week with one full day off every two weeks; circulation, advertising, business office, and building—8 per day, 4½ on Saturdays, not more than 44 hours per week. Overtime at the rate of time and one-half for all work in excess of above hours in the latter departments. In the editorial department the principle of time and one-half off in lieu of cash payments is agreed to for regular employees. The above also applies to work on statutory holidays. Vacations with pay to all employees are provided for on the following basis—em-

ployees with 6 months' service but less than one year, one week; those with more than one year's service, two weeks.

Wages: Editorial department—senior reporters \$155.12 to \$184.12; copy readers, rewriters, \$144.12 to \$179.12; intermediate reporters \$98.61 to \$144.12; junior reporters, \$77.85 to \$98.61; copy runners \$51.90 to \$65. Circulation department—senior clerk \$93.42 to \$106.40. Junior clerk \$70 to \$77.85, canvassers \$112.47 to \$155.77. Advertising department—senior salesmen \$164.12, plus commission, junior salesmen \$130 plus commission, classified salespeople \$75, plus commission, stenographer, \$83 to \$114.12, office boy or girl \$51.90 to \$67.47. Business office—senior clerk \$129.12, intermediate clerk \$114.12, junior clerk \$85 to \$106.40, P.B.X. operator—counter girl \$95; janitor \$100.12. Dismissal pay is provided for those with over two years' service equivalent to one week for each full year of service up to a maximum of 14 weeks' pay. Provision is made for settling of disputes.

Manufacturing: Miscellaneous Wood Products
 KELOWNA, B.C.—S. M. SIMPSON LTD. AND BRITISH COLUMBIA WOODWORKERS' UNION, LOCAL 4.

Agreement to be in effect from December 1, 1944, to December 1, 1945, and year to year thereafter subject to two months' notice. The company recognizes the union as bargaining agent for its Manhattan Beach employees, excepting truck drivers.

Hours of work shall not exceed those authorized by the provincial Department of Labour. Overtime shall be paid for at the rate authorized by the War Labour Board. Female workers to have a ten-minute rest period twice a day, subject to approval of Regional War Labour Board. Vacation: one week with pay annually for all employees with company for one year or more. Wages and classification of work to be those authorized by the War Labour Board. Female workers on any job formerly done by male workers to be paid at the same rate as the male worker, provided the female worker does the same amount of work on all jobs as efficiently, and without assistance. The company reserves the right, subject to approval of the Regional War Labour Board, to use its own discretion in payment of annual bonus. Provision is made for seniority rights and grievance procedure.

Manufacturing: Metal Products

MONTREAL, TORONTO AND LONDON.—GENERAL STEEL WARES LTD., AND UNITED STEELWORKERS OF AMERICA.

Agreement to be in effect from December 8, 1944, to December 31, 1945, and thereafter from year to year, subject to notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, January, 1944, p. 68, with minor changes.

Manufacturing: Shipbuilding

HALIFAX, N.S.—HALIFAX SHIPYARDS LIMITED AND THE INDUSTRIAL UNION OF MARINE AND SHIPBUILDING WORKERS OF CANADA, LOCALS 1 AND 13.

Agreement to be in effect from January 30, 1945, to November 1, 1946, and thereafter from year to year subject to notice. The company recognizes the union as the collec-

tive bargaining agency for the employees, and will not interfere with the right of its employees to become members of the union, or discriminate against employees because of union membership.

Check-off: "If it be determined that the provisions of the Trade Union Act of Nova Scotia relating to check-off for union dues apply to this company and the union establishes its legal position, the company agrees to conform with the relevant provisions of the legislation. The company, however, contends that such provisions of the statute have no application to this company and reserves all objections thereto."

Hours for day work: 8 per day, 4 on Saturdays, a 44-hour week. Hours for night work: 11 per night payable at time and one-eighth for 9 hours and overtime thereafter. The number of employees on night work is limited.

Overtime: time and one half; all work on Sundays and nine specified holidays, double time.

Wages shall be paid in accordance with the provisions of Wartime Wages Control Order, 1943, P.C. 9384 (LABOUR GAZETTE, Dec. 1943, pp. 1602-12) and in accordance with any Finding and Direction of the National War Labour Board. Such a Finding and Direction dated May 2, 1944, sets hourly wage rates among which are the following: hammersmith, heavy forger 95 cents per hour; blacksmith and anglesmith, plater, shipfitter, boilermaker, flanging press operator, flanger, riveter, chipper and caulker, sheet metal worker, shipwright, carpenter, wood caulker, ship rigger, machinist, electrician, pipe fitter, steamfitter and plumber 85 cents; lay-out man, layer-out (boiler shop) 90 cents to \$1; driller, holder-on 75 cents; bolter-up, reamer and countersinker 65 cents, rivet heater 70 cents; passer boys, under 18 years of age, 40 cents, 18 years of age or over 45 cents; acetylene burner, oxy-acetylene cutter 77½ cents; welder-acetylene, electric (arc) 65 to 85 cents; chipper (only) 75 cents, coppersmith 90 cents to \$1.05; loftsmen 85 cents to \$1.10; pattern maker 85 cents to \$1.05; crane operators 65 to 85 cents; slinger, hooker-on, crane chaser, follower or signalman 60 to 70 cents; painters 60 to 85 cents; oiler, greaser, machine cleaner 60 cents; helpers (after one year) 60 cents; labourers 50 cents.

"Dirty work" is payable at 10 cents per hour extra. Cost-of-living bonus shall be paid as provided in Wartime Wages Control Order, 1943, P.C. 9384.

Annual vacation with pay: "all employees covered by this agreement shall be entitled to such annual vacation with pay as may be authorized from time to time, by the National

War Labour Board." The following conditions were authorized by a Finding and Direction dated October 14, 1943: All employees who, on October 1, 1943, have been on the payroll a minimum of two months and who have been in regular attendance, will be entitled to the following holidays with pay; one day for two months' work, one and one half days for three months' work, increasing one half day for each additional month to 6 days for twelve months' work. In all subsequent years during the currency of this plan the employees of the company are entitled to 6 days' vacation with pay if they have worked the full twelve months period. There is a provision for the deduction of one half day for each of the twelve periods of the year that an employee has not the required 25 days' attendance.

Ability being equal, seniority to be the governing factor in lay-off, rehiring, promotion and demotion. The apprenticeship system is part of the agreement. Grievance committees to be formed for the settlement of disputes with the company. If they are unsuccessful the dispute will be referred to a joint adjustment board, whose chairman if not mutually agreed on will be selected by the Federal Minister of Labour, the decision of this board to be final and binding.

Transportation and Public Utilities: Water Transport

VANCOUVER, B.C.—UNION STEAMSHIPS LTD. AND SEAFARERS INTERNATIONAL UNION OF NORTH AMERICA, VANCOUVER BRANCH (BRITISH COLUMBIA SEAMEN'S UNION)

Agreement to be in effect from December 9, 1944, to December 8, 1945, and thereafter from

year to year subject to two months' notice. The company agrees to give preference in employment to union members and to secure their unlicensed ships' personnel with the exception of pursers, chief stewards, second stewards, and freight clerks through the offices of the union.

Authorized representatives of the union shall be allowed reasonable access to contact members of the Union on board the Company's vessels at any time, provided that in the Company's opinion, such contact will not interfere with the regular operation of sailing, loading or unloading.

Hours: All crew members shall receive 24 consecutive hours clear of the ship in every seven days. In engine room, on overnight vessels, 8 hours per 24 (i.e. 4 hours on and 8 hours off), on day vessels 12 hours per 24 (6 hours on and 6 hours off); for deck employees, quartermasters, winchmen and deckhands, 12 hour day on certain ships and 8 hours for quartermasters, and watchmen on others. In stewards, department and galleys—stewards 9 to 10 hours; galley help, mess boys and porters 9 hours; nightmen 10 hours, cooks 11 to 12 hours.

Wage rates: Winchmen and quartermasters, \$100 per month; watchmen, stevedores, daymen and deckhands (local) \$95; deckhands (northern) \$90; oilers \$105.75; firemen \$96.25 plus \$5 bonus from June to September (local); nightmen \$82.50 to \$87.50, stewards \$77.50 to \$85, messmen \$67.50, porters \$62.50, chief cook \$105 to \$130, second cook \$85 to \$95, third cook \$75 to \$95, all other cooks \$75. Stewards monthly bonus of \$7.50 May to September. In the event of any ship running shorthanded, wages that would otherwise be paid to the members who are absent shall be paid to the crew members in the particular department affected. Overtime is payable to some deck employees under certain conditions. Vacation: one week with pay to all employees after twelve months' consecutive service and two weeks with pay annually after two years' service. Seniority rights and grievance procedure are included in the agreement.

Collective Agreement Act, Quebec

IN QUEBEC, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is

administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of three new agreements and the amendment of nine others, all of which are noted below. The repeal of two agreements are also noted. A request for the amendment of the tannery industry agreement for the Province was gazetted January 20, and a request for the amendment of the paper box industry agreement (uncorrugated) for the Province was gazetted February 3. A request for a new agreement for retail shoe stores in Montreal was also published in the QUEBEC

OFFICIAL GAZETTE February 3. Barbers and hairdressers at Montreal requested an amendment February 3. Requests for the amendment of the building trades agreements at Sherbrooke and St. Johns and for the amendment of the dress industry agreement for the Province were gazetted February 10. Requests for new agreements for policemen at Sherbrooke and the uncorrugated paper box and paper bag industry in Quebec were published February 10. Requests for the amendment of the building trades agreements at Sherbrooke and Montreal were published February 17.

Manufacturing: Fur and Leather Products

TANNERY INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated January 11, and gazetted January 20, amends the other Orders in Council for this industry (L.G. Mar., 1940, p. 282; Feb., 1941, p. 183, Aug., p. 1008, Oct., p. 1313; Mar., 1942, p. 353, Sept., p. 1097, Dec., p. 1490; Apr., 1943, p. 489, Oct., p. 1381; Mar., 1944, p. 359, June, p. 753, Aug., p. 1005) by the addition of one more party.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL

An Order in Council, dated January 11, and gazetted January 20, amends the previous Orders in Council for this industry (L.G., May, 1944, p. 637; Feb., 1945, p. 182 and previous issues).

Vacation: One week with pay after one year's continuous service. No vacation pay for vacation not taken.

Manufacturing: Wood Products

SASH AND DOOR INDUSTRY, QUEBEC

An Order in Council, dated January 11, and gazetted January 20, makes obligatory the terms of an agreement between "L'Association des Constructeurs de Québec" and "Le Conseil des Métiers de la Construction des Syndicats nationaux catholiques de Québec", and "L'Union Canadienne des Ouvriers des Matériaux de Construction", local 3, sections 1 and 2. Agreement to be in effect from January 20, 1945, to January 19, 1946, and thereafter from year to year subject to 60 days' notice. Territorial jurisdiction comprises the cities of Quebec and Levis, and several neighbouring towns.

Hours: 9-hour day, 54-hour week. Overtime is payable at time and one-half; double time on Sundays and six specified holidays.

Hourly wage rates: bench joiner in the shop 67½ cents, machine joiners in the shop 62½ cents, junior journeyman joiner (one year) 55 cents, stationary enginemen (maximum of 72 hours per week) 53 cents, machinists 60 cents, common labourers 47½ cents, machine operators (first six months) 47½ cents, machine operators (after six months) 52½ cents, machine operators' helpers (under 18 years) 20 cents, machine operators (over 18 years) 35 cents, truck drivers 50 cents, carters (maximum of 60 hours) 45 cents, apprentice bench and machine joiners in the shop, and machinists' apprentices from 25 cents during first year to 40 cents in third year.

Manufacturing: Metal Products

GARAGE EMPLOYEES, SHERBROOKE

An Order in Council, dated January 31, and gazetted February 10, makes obligatory the terms of a new agreement between "La Section de l'Automobile de l'Association des Marchands détaillants du Canada Inc." and "L'Association des Employés de l'Auto Voiture des Cantons de l'Est, Inc.". Agreement to be in effect from February 10, 1945, to February 9, 1946. Territorial jurisdiction comprises the city of Sherbrooke and all municipalities within a radius of ten miles. The agreement governs professional employers, office clerks, salesmen, artisans and wage-earners in garages, gasoline stations and service stations.

Hours: 9 hour day, 5 on Saturday. Overtime is payable at time and one-half, double time on Sundays and six specified holidays.

Minimum wage rates: journeymen wheelwright, machinist, electrician, mechanic, joiner, glazier, painter, upholstery cleaner, dyer, vulcanizer, body man, blacksmith, upholstery maker and tester from 52 to 67 cents per hour; journeymen radiator repairers and welders 67 cents, apprentices 35 and 45 cents; greasers 45 and 50 cents; journeymen vulcanizers 67 cents, apprentices 35 and 45 cents; apprentice stock room clerks \$12 to \$20 per week, after four years; apprentices in all other categories from 20 cents to 40 cents per hour; foremen in all establishments \$35 per week; night service man 38 cents per hour (maximum of 84 hours per week); day service man 45 cents.

Provisions are made for apprenticeship regulations, uniforms and tools. No home work may be performed.

GARAGE EMPLOYEES, MONTREAL

An Order in Council, dated January 11, and gazetted January 20, amends the previous Orders in Council for this industry (L.G., August, 1941, p. 1013; April, 1942, p. 483, July, p. 857; July, 1943, p. 990; April, 1944, p. 495, July, p. 867) by providing for one week's vacation with pay after one year's continuous service.

ALUMINUM INDUSTRY, LA TUQUE

An Order in Council, dated January 11, and gazetted January 20, repeals all Orders in Council for this industry (L.G., April, 1944, p. 496).

Construction

BUILDING TRADES, ST. JEAN AND IBERVILLE

An Order in Council, dated January 11, and published January 20, amends the previous Orders in Council for this industry (L.G., Nov., 1938, p. 1299; Mar., 1940, p. 283, Mar. 1941, p. 334, Aug., p. 1011, Dec., p. 1490; Feb., 1943, p. 220, July, 1944, p. 867) by adding six firms as co-contracting parties.

BUILDING TRADES, CHICOUTIMI AND LAKE ST. JOHN DISTRICT

An Order in Council, dated January 18, and gazetted February 3, amends the previous Orders in Council for this industry (L.G., August, 1941, p. 1009, November, p. 1425, December, p. 1573; December, 1942, p. 1490; February, 1943, p. 219; November, 1944, p. 1368).

Zone I is enlarged to include La Malbaie, Cap-à-l'Aigle, Pointe-au-Pic, Clermont and the territory comprised within a radius of two miles. Baie Comeau is also included and the territory comprised within a radius of fifteen miles from its limits.

Minimum wage rates: Trades	Hourly Wages Zones

Labourers	0.60	0.55	0.50	0.45

Wage rates for maintenance men are from \$20.40 to \$26.40 for journeymen, and from \$16.40 to \$22.40 for labourers.

Service: Professional.

EMPLOYEES OF RELIGIOUS INSTITUTIONS, ETC., ST. HYACINTHE

An Order in Council, dated February 10, and gazetted February 17, makes obligatory the terms of a new agreement between "L'Association patronale des Institutions religieuses et des Fabriques paroissiales du Diocèse de Saint-Hyacinthe, Inc." and "Le Syndicat national catholique des Employés des Institutions religieuses de Saint-Hyacinthe, Inc." Agreement to be in effect from February 17, 1945, to December 1, 1945 and thereafter from year to year to 60 days' notice. The professional jurisdiction includes employees of the "Corporation Episcopale Catholique Romaine de Saint-Hyacinthe"; parochial institutions and church councils; educational establishments such as seminaries, colleges and convents; religious institutions, such as mother houses, scolasticats, etc.; charitable

institutions; private hospitals, homes and orphanages; sanitoriums, convalescent or rest homes, etc. Territorial jurisdiction comprises: zone I, the cities of St. Hyacinthe, Granby, Sorel, the towns of St. Joseph de Sorel and Iberville; zone II, the towns of Farnham, Marieville, Acton Vale, Cowansville, Waterloo, Bedford, Belœil, the villages of St. Pie, St. Césaire, La Providence, Warden; zone III, several other places noted therein.

Hours: for regular employees, chief-engineers, chief cooks, sextons or vergers, supervisors, no specified hours; orderlies, stationary engineers, firemen, motor vehicle drivers, and helpers, watchmen, 60-hour week; nurses on night duty 57-hour week and those on day duty 52-hour week; other employees 54-hour week.

Hours for supernumerary employees; 10-hour day for those paid by the day and 12-hour day for those paid by the week. Overtime is payable at time and one-half to certain specified employees.

Wages for regular male employees: sextons or vergers, zone I, from \$25 to \$27 per week; zone II, \$22 and \$25; zone III, from \$15 to \$20; stationary engineers (chief) zone I, \$34 to \$51; zone II, from \$32 to \$51; zone III, \$32 to \$51; certified engineers in zone I, 48 cents to 63 cents per hour; zone II, 45 to 60 cents per hour; zone III, 45 to 60 cents; fireman, 38 cents in zone I, 35 cents in zones II and III; cooks from \$22 to \$27 per week in zone I, \$19 to \$25 in zone II, \$17 to \$25 in zone III; bakers, \$23.50 in zone I, \$22 in zones II and III; orderlies from \$18.50 to \$24 in zones I, II and III; maintenance men from \$21.60 to \$29.70 in zone I, \$20 to \$26 in zone II, \$17 to \$20 in zone III.

Wages for female regular employees: nurses (graduate) from \$20 to \$23 in all zones after one year; supervisors from \$14 to \$18 after one year in all zones; teachers, office employees, skilled employees, cooks, from \$9 after first six months to \$14 after two years in zone I, \$8 to \$13 in zone II, \$7 to \$12 in zone III.

Wages for male supernumerary employees: charge hand \$4.50 per day in zone I, \$4 in zones II and III; firemen 50 cents per hour in zone I, 45 cents in zone II, 40 cents in zone III; chief butcher \$4.50 per day in zone I, \$4 in zones II and III; orderly \$4 in all zones.

Wages, for female supernumerary employees: nurses, \$4 per day in all zones; supervisors \$3 per day in all zones; seamstress \$2.50 per day.

Vacation: two weeks with pay after one year's service for nurses; one week for other employees. Special provisions are made for weekly and monthly holidays, lodging, board, uniforms, washing, dismissal and departure.

Service: Public Administration

MUNICIPAL EMPLOYEES, JOLIETTE.

An Order in Council, dated January 31, and gazetted February 10, repeals all Orders in Council pertaining to this agreement (L.G. June, 1944, p. 754, November, p. 1369).

Service: Business and Personal

BARBERS AND HAIRDRESSERS, QUEBEC

An Order in Council, dated January 31, and gazetted February 10, amends the previous Orders in Council for this industry, (L.G. Oct. 1944, p. 1247). The amendment does not affect the summary already given.

BARBERS AND HAIRDRESSERS, VALLEYFIELD

An Order in Council, dated January 11, and gazetted January 20, amends the previous Orders in Council for this industry, (L.G., Aug., 1943, p. 1131) by increasing the weekly wage rates for barbers at Valleyfield to \$16.95, plus 50 per cent of all receipts in excess of \$26 per week; hairdressers \$15 plus 50 per cent of all receipts in excess of \$25. A new scale of minimum prices is given.

The last Order in Council published June 30, did not affect the summary previously given.

BARBERS AND HAIRDRESSERS, MISSISSQUOI COUNTY

An Order in Council, dated January 11, and gazetted January 20, amends the previous Orders in Council for this industry (L.G., Nov. 1941, p. 1425).

Hours: at Farnham are reduced to 53 per week. Weekly wage rates for journeymen barber—hairdressers \$15 plus 50 per cent of all gross receipts exceeding \$22 earned by him in any one week.

A previous Order in Council published January 2, 1943, reduced the working hours at Farnham to 53½ hours and those at Cowansville and Sweetsburg to 60 hours.

Labour Law

Recent Regulations under Dominion and Provincial Legislation

RATES of compensation to certain classes of seamen for the loss of effects have been raised. The National Selective Service Mobilization Regulations have been amended to require medical examination, for Army purposes, of men released from the Navy or Air Force. Travelling expenses are to be paid in case of farm workers transferred to industries of high priority in war production. The number of members of the Wartime Labour Relations Board constituting a quorum has been reduced.

In the provincial field, Ontario has consolidated and revised slightly the regulations made under the Workmen's Compensation Act. Saskatchewan has defined the classes of persons eligible for health services under the Health Services Act. Regulations have been made under the Saskatchewan Trade Union Act, 1944.

Compensation to Seamen

An Order in Council (P.C. 127/1111) made February 21, 1945, and gazetted February 26, amends Order in Council 133/510 (L.G., 1944, p. 235) governing the payment of compensation to Canadian salt-water fishermen and personnel of the Canadian Merchant Navy for the loss of effects through enemy action.

Under the amending Order the following provisions are retrospective to November 10, 1939. War damage to effects will be assumed to have been suffered during service upon any vessel of Canadian registry or licence, or upon any certified non-Canadian ship, if the damage is suffered while a man is proceeding to serve on such a ship, while he is returning to his country after having served on such a ship, or while he is on leave from one in a port outside Canada.

The maximum compensation payable for war damage of certain ratings in Home Trade vessels has been raised to the amount payable to similar ratings in the Foreign Trade Service. The ratings affected are: carpenters and joiners; boatswain, donkeyman and similar pay deck or engine ratings; quarter-master; seamen, firemen, trimmers and similar pay ratings; licensed pilots and licensed apprentice

pilots; chief stewards in charge of departments; ratings in victualling department above the rank of bedroom steward or waiter; bedroom steward, waiter, and similar pay ratings; and ratings in the victualling department below the rank of bedroom steward or waiter.

Medical Examination for Released Naval and Air Force Personnel

An Order in Council (P.C. 944) of February 13, 1945, gazetted February 19, amends that part of the National Selective Service Mobilization Regulations (L.G., 1944, p. 451), governing medical examinations.

The amending Order stipulates that every member of the Canadian Naval or Air Forces on active service who is about to be released, must report at a military centre, when ordered by the appropriate Naval or Air Force authorities, to be medically examined to ascertain whether he is fit for military training as provided for in the National Resources Mobilization Act (Army) Regulations, 1943. Disobedience in complying with these orders constitutes disobedience of a lawful command under the Naval Discipline Act and the Air Force Act.

Travelling Expenses of Farm Workers Sent to Industrial Jobs

An Order in Council (P.C. 692) of February 1, 1945, concerns the transport of farm workers to jobs in high priority industries during seasons when they are not needed on farms.

The Order stipulates that the Minister of Labour, by authority granted by P.C. 3492 (L.G., 1944, p. 713) to enter into agreements with the Provinces for the effective organization and use of agricultural manpower and for the recruiting of workers suitable for farm work, may pay an amount not exceeding the necessary travelling expenses of any farm worker from the place where the latter was when requested to take employment, to the site of his future employment, or vice versa, or to a place equidistant from the employment.

These expenses are to be borne by the Dominion and paid from the funds appropriated for expenses in connection with general labour transference in war industries and agriculture. Advances may be paid in respect of transfers to high priority industries made before the date of this Order. Travelling expenses may be paid to a transport company or to the employer to whom the worker is referred for employment.

Wartime Labour Relations Regulations Amended

An Order in Council (P.C. 690) made February 1, 1945, amends the Wartime Labour Relations Regulations (L.G., 1944, p. 135), by reducing from six to five the number of members of the Wartime Labour Relations Board which constitutes a quorum. In the absence of the Chairman, the Vice-Chairman is to act as Chairman.

Provincial

Ontario Workmen's Compensation Act

An Order in Council of November 21, gazetted February 10, 1945, approves an Order under the above Act, made November 9, 1944. The Order in Council is in pursuance of the Regulations Act, 1944, which requires all regulations to be published in the *Ontario Gazette* within one month of filing with the Registrar of Regulations. The Order consolidates all previous regulations under the Workmen's Compensation Act.

Several slight changes are made in the list of industries excluded from Part I of the Act. The operation of passenger or freight elevators not mentioned in either Schedules 1 or 2, is added to Schedule 1 or the collective liability system. Where less than six workmen are usually employed in the manufacture of butter or the operation of creameries or dairies or in confectioneries or bakeries, the employers, up to December 31, 1944, were excluded from Schedule 1, but from January 1, 1945, employers in these industries are included in Schedule 1. Excluded from Schedule 1, where less than six workmen are employed, are scavenging, street cleaning and the removal of snow or ice. Where less than four are usually employed, the maintenance or operation of a waterworks system is excluded from Schedule 1. Regulations unchanged include those dealing with the general rule of interpretation, speculative building, farming, insolvency of employers, filing payroll returns, delay in payment of assessment, posting information regarding the Act, payment of compensation by employers, first-aid requirements, and the industrial diseases added to Schedule 3.

Added to the list of compensatable diseases is any respiratory disorder contracted through the use of non-offset sprays in the printing industry.

Quebec Minimum Wage Act

Renewal: Order 25 (L.G., 1939, p. 301), governing the packing and grading of waste materials, is renewed until March 1, 1946, by an Order made January 8, 1945, and gazetted February 3.

Saskatchewan Health Services Act

An Order in Council of January 30, 1945, gazetted February 15, defines the classes of persons who may be provided with health services to be paid by the Department of Public Health.

Any person receiving a pension under the Old Age and Blind Persons' Pensions Act may receive health services, as may the husband or wife of such a person and their dependent children and grandchildren under 16, but the husband of a blind pensioner is not entitled to health services until he is 70 years of age or more.

Recipients of old age pensions from other Provinces who have lived in Saskatchewan for at least 12 months immediately before the date of application are entitled to health services.

Mothers entitled to allowances under the Child Welfare Act, and all their dependent children under 16 are eligible to receive health services, as are children who are Wards of the Province or of a Children's Aid Society in the Province.

Saskatchewan Teachers' Superannuation Act

An Order in Council of January 15, 1945, gazetted January 31, contains regulations under the above Act governing teachers in vocational training schools.

Such teachers are entitled to the benefits of the Act but must contribute to the superannuation fund from February 1, 1945. Service by a teacher in a Vocational Training School or in work of the War Emergency Training Program in the province before February 1, 1945, may be counted as teaching service for purposes of the Act if the person pays contributions into the fund for the particular period.

Saskatchewan Trade Union Act, 1944

Regulations of the Saskatchewan Labour Relations Board were approved by Order in Council on January 30, 1945, gazetted February 15, and came into effect on the former date.

Any trade union, employer, or employers' association may apply to the Labour Relations Board for an order determining the unit of employees appropriate for collective bargaining or the trade union representing a majority of employees in an appropriate unit, or requiring an employer to bargain with a trade union. The application, when made by a trade union, must be accompanied by a certified copy of its constitution or charter and must contain the name and address of the applicant trade union, of its officers, of the employer or employers concerned as well as particulars concerning the employees the union claims to represent and the unit it considers appropriate for bargaining purposes. Information concerning any other labour organization claiming to represent a majority of the employees must also be given by the union. When application is made by an employer or employers' association, similar particulars must be submitted.

Any trade union, employer, or employers' association may apply to the Board for an order requiring any person to refrain from a violation of the Act or from engaging in an unfair labour practice; requiring an employer to reinstate an employee discharged contrary to the Act and to pay him the financial loss thereby incurred; requiring an employer to disestablish a company-dominated organization, or requiring two or more of these things to be done. The application must contain particulars regarding the applicant, and a statement of the facts constituting the alleged violation of the Act or unfair labour practice.

Any trade union, employer, employers' association or any other person directly concerned may apply to the Board for an order rescinding or amending any order or decision of the Board. All applications with reasons for applying must be made in writing. Four copies must be filed with the secretary and the original verified by statutory declaration. Proper forms for application may be obtained from the secretary, but any written application, providing it contains the required information, is valid.

Upon the filing of an application, the secretary must furnish all persons having an immediate interest in the matter with a copy of the application. Any person may reply, in writing, to the application, within 14 days. Such a reply, of which there must be four copies, one verified by affidavit, must contain particulars regarding the person replying, a concise statement of the material facts, and an admission, denial or explanation of each of

the statements made in the application. A person failing to reply to an application within 14 days is not entitled to notice of any further proceedings, but the Board may hear evidence from such a person. The secretary must send a copy of any reply to the applicant, fixing a time and place for the hearing of the application. The board may make necessary inquiries for the disposal of the application.

Where the board directs a vote to be taken by secret ballot, to determine what trade union represents a majority of the employees, the agent appointed by the Board to conduct the vote must determine the list of employees eligible to vote, the form of ballot, the time and place of voting, and the form of notice for the vote. He must act as returning officer and provide for scrutineers on behalf of the interested parties and give any directions necessary for the conduct of the vote. The agent must file a report of the voting with the secretary. Copies of this report must be forwarded to the employer or employers' association, and to any trade union concerned, with a notice fixing a time and place where the Board will consider the report. Any person having any objection to the report or the vote must file a statement of his objections with the secretary.

Any trade union, employer or employers' association may apply to the Board for permission to institute proceedings against any person alleged guilty of an unfair labour practice. The applicant must give his reasons for considering any other remedy provided or penalty imposed under the Act, to be insufficient. Upon the filing of such an application the secretary may request any additional information from the applicant, and a statement from the other interested party, or may request the parties to appear before the Board for a hearing of the application, or may instruct an agent of the Board to investigate the application.

Where a trade union and an employer have entered into an agreement to refer disputes to the Board for final decision, either party may refer to the Board any dispute covered by the agreement. This reference must be filed with the secretary together with a copy of the agreement, a statement of the material facts of the dispute and any efforts made to settle it. Additional information may be requested by the secretary, or he may require the parties to appear before the Board.

The Board may amend these Regulations subject to the approval of the Lieutenant-Governor in Council.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the upgrading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Veterans' Affairs;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the war appropriation.

From its inception up to January 31, 1945, the gross enrolment under Canadian Vocational Training has been as follows:—

Training for Industry.....	249,412
Army Tradesmen	47,056
Navy Tradesmen	8,893
R.C.A.F. Tradesmen	65,203
Rehabilitation (discharged persons from the forces).....	7,040
Students	7,486
	—————
Total	385,090
	—————

The following additions have been made to the administrative staff at the Head Office in Ottawa: Mr. W. J. Gough, former Technical Adviser to the Deputy Minister for Air, was appointed Procurement Officer, with responsibility for arranging for the transfer, for training purposes, of all Government owned items of equipment declared surplus; Brig. John E. Lyon, formerly of National Selective Service, was appointed Superintendent of Rehabilitation Training, with responsibility for the maintenance of liaison with National Selective Service and the three Armed Forces, in matters pertaining to the vocational retraining of veterans. Additional field representatives have been added to the staff in most provinces to take care of the increasing demand for training on the job.

The full-time pre-employment classes during January were composed for the most part of classes to train stenographers for the Civil Services, held in the Provinces of Nova Scotia, Ontario and Alberta; and in classes for training butter- and cheese-makers in Ontario, Quebec and the Prairie Provinces; and classes to train egg-graders in the Prairie Provinces.

There was a further increase in the enrolment of discharged members of the forces applying for veterans' training, particularly in the pre-matriculation classes. Additional buildings have been secured for rehabilitation training from the Army and Air Force, but adequate training facilities are still lacking in some areas. Comparatively little equipment has, as yet, been obtained from War Assets Corporation, but it is expected that the amount will increase from now on.

A further meeting of the Vocational Training Advisory Council was held in Ottawa from March 6 to March 8. This was followed by the customary conference of the Regional Directors. Further account of this meeting will be given in a subsequent issue of the *LABOUR GAZETTE*.

Pre-Matriculation Training for Veterans

Provision is made by Order in Council P.C. 9471, February 1, for amendment to Dominion-Provincial War Emergency Training Agreements, so that veterans may be given pre-matriculation training to fit them for gainful employment or for entrance to industry.

(1) Includes graduates from previous month's classes who were not reported placed until after January 1, 1945.

Activities of Unemployment Insurance Commission

Statistical Analysis of Claims and Benefit for January—Insurance Registrations—Revenue and Expenditure—Renewal of Insurance Books

CLAIMS for unemployment insurance benefit totalled 20,412 in Canada during January compared with 13,770 in December, 1944, and 11,751 in January last year. This is the largest number of claims recorded in any month since the scheme went into effect and although a seasonal increase in claims is expected during the winter months, this relatively large increase would seem to reflect greater layoffs than during the same month of last year.

During the last six working days of January 27,305 persons (20,046 males and 7,259 females) signed the live unemployment register as against 19,313 (14,344 males and 4,969 females) who signed in the last week of December and 12,439 (9,971 males and 2,468 females) during the last week of January, 1944. All those who are reporting unemployed days under the Act sign the live unemployment register once a week.

A total of 17,431 claims were adjudicated at Insurance Offices during January, of which 14,699 were considered entitled to benefit and 2,732 not entitled to benefit. Of those considered not entitled to benefit, the largest group (1,151) were so considered because of insufficient contributions; the next largest (968) because they had voluntarily left their employment without just cause.

One or more benefit cheques were paid to 15,575 persons, who received a total of \$546,569 for 281,193 unemployed days during January. This compares with 10,656 persons who were paid \$337,220 for 176,084 days in December, 1944, and 4,570 persons paid \$131,037 for 69,637 days during January last year.

The average duration of the unemployment compensated was, then 18.1 days in January, 16.5 days in December and 15.2 days in January, 1944. The average amount paid per beneficiary was \$35.09 in January, \$31.65 in December and \$28.67 in January, 1944. The average amount of benefit paid per compensated day of unemployment was \$1.94 in January, \$1.92 in December and \$1.88 in January of last year.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at January 31, 1945, 2,999,435 employees had paid contributions to the fund since April 1, 1944, an increase of 51,445 since December

31, 1944, and 793,679 since the commencement of the current fiscal year.

As at January 31, 1945, 144,106 employers were registered as having insurable employees, an increase of 1,716 from December 31, 1944.

Registrations as at January 31, 1945, by regions were as follows:—

TABLE 1—REGISTRATIONS AS AT JANUARY 31, 1945

Region	Employers Registered (Live File)	Insured Persons Registered
Maritimes	11,509	220,233
Quebec	40,028	904,187
Ontario	52,713	1,179,057
Prairie	25,942	426,209
Pacific	13,914	269,749
Total for Canada...	144,106	2,999,435

Unemployment Insurance Book Renewal

On March 31, all current unemployment insurance books for insured employees will expire and employers are required to turn in these books for new ones at the Commission's nearest Local Office.

Before turning in the current insurance book, it is necessary to fill in the employee's latest address, his date of birth (if under 16) and have the employee sign the book in the space indicated on the front cover. If the employee (male or female) has served in the Armed Forces since June 30, 1941, a questionnaire on the inside front cover should also be completed as the employee may be entitled to additional credits for such service under Order in Council P.C. 5210. It is not necessary to fill in this questionnaire if the questionnaire was completed last year, but it is suggested that if there is any doubt as to whether this questionnaire was formerly completed it should again be filled in.

The application for 1945-1946 insurance book on the second last page of the current book must also be filled in before it can be exchanged. This form must not be detached from the book.

Books in the employer's possession for employees who have left during the year or are no longer insurable, must be returned to the Commission's nearest Local Office, and should be clearly marked "Not for Renewal" across the front cover, and any employers who are in possession of blank insurance books for the current year must also return them to

the Commission on March 31, as all insurance books are the property of the Commission. When sending insurance books to Local Offices of the Commission, a covering letter should be enclosed so that officials will know from whom the books were sent. If a receipt is desired, the books should be listed and such lists will be signed, and returned to the employer.

Certain large employers, to whom the privilege has been extended to contribute under the bulk payment method, are required to turn in their contribution statements (UIC443), for the current year immediately after March 31, together with a form, UIC 409B, giving the same details as are shown on the application for 1945-1946 insurance book on the second last page of the insurance book. Bulk payers are also required to turn in all insurance books in their possession including any supply of blank books they may have, and supplies of new insurance books will be sent to them on application.

Failure on an employer's part to return all insurance books at the close of the year ending March 31, 1945, constitutes non-compliance

with the provisions of the Unemployment Insurance Act and Contribution Regulations thereto, and penalties are provided. Employers who do not renew their insurance books promptly at the close of the year ending March 31, 1945, will be subject to prosecution, and it is expected that book renewal this year will be completed for all employers early in April.

Benefit Payments Up in January

Unemployment insurance benefit payments during the month of January, 1945, amounted to \$545,604.35, as compared with \$336,564.86 in December, 1944, and \$178,138.04 in November, 1944. The amount of benefit paid in January was the second highest monthly total since the Unemployment Insurance Commission was established, being exceeded only in March, 1944, when benefit payments amounted to \$753,987.98.

The Fund was increased during January by \$6,552,048.65. After deducting the benefit payments, the net increase was \$6,006,444.30, bringing the grand total at the end of January to \$256,076,686.80 (Table 8).

Sample Data for Unemployment Insurance

THROUGH the co-operation of the Unemployment Insurance Commission and the Dominion Bureau of Statistics, statistical data of a five per cent random sample of persons covered by the Unemployment Insurance Act is maintained in the Bureau of Statistics. This project, initiated in July, 1942, is believed to be quite unique, in that it consolidates in one continuous survey the employment and unemployment history of approximately 150,000 persons chosen at random from those to whom insurance books are issued. Since the same persons are to be followed through year after year, the value of this cumulative record will increase rapidly as time goes by.

During the period when the Unemployment Insurance Act was being planned, those responsible for the financial provisions of the project were greatly hampered by lack of adequate data on the employment and unemployment experience of individuals in Canada who would come within its scope. Without full data all decisions respecting rates of contribution, rates of benefit, types of non-compensable days, etc., must be therefore, much more uncertain than they would otherwise have been.

The rate of contribution (premium) paid and benefit guaranteed for specified contingencies in other types of insurance (life, disability, sickness, pension funds, etc.), are determined by actuarial calculations based on data obtained from experience in operating such schemes and from other sources. Hence it would seem reasonable that appropriate data compiled from the operations of unemployment insurance would be useful in determining the many issues which must arise over the years in that field of insurance.

Unemployment Insurance in Canada is unique. The Act differs in several important respects from similar legislation in other countries. At the same time employment conditions in Canada differ from those found elsewhere. The experience gained in other countries is, therefore, limited in its usefulness when applied to the Canadian scene.

More than \$250,000,000 have been contributed to the Unemployment Insurance fund since July, 1941, by and on behalf of some 3,000,000 insured persons. This fund, as well as all future contributions to it, is held in trust for insured persons who may become unemployed and who can satisfy the conditions for receipt of benefit, i.e. the fund is committed to pay specified benefits whenever certain contingencies occur in the employment history of a person on whose behalf the required contributions have been made and who otherwise satisfies the benefit conditions. At all times, therefore, the fund is subject

to contingent liabilities which, it is believed, could be better determined if the contribution and benefit histories of each contributor could be assembled for a period of some 10, 12 or 15 years. The magnitude of such a task renders it impracticable, so a five per cent random sample, which is manageable, is to be used.

In addition to the contribution and benefit histories of each contributor, it would be well to know how the specific provisions of the Act (e.g. the nine "waiting days", etc.), are operating, since they render as non-compensable, days which would otherwise be compensated. There are also times when an insured person, on becoming unemployed, does not claim benefit, as well as cases of movement of persons into and out of insurable employment because of seasonal and other factors. So far as is practicable, therefore, the sample has been designed to obtain the full employment and unemployment history of the individuals included.

Employment conditions, rates of pay, etc., will change over time and it will undoubtedly be necessary to alter the rates of contribution, or of benefit, or both, to meet these new conditions. The fund may be threatened with depletion or may increase much faster than was expected, so it may be necessary to alter the rates and duration of benefit, or rates of contribution, or the provisions defining non-compensable days, or some combination of these factors. Any such changes can be made more intelligently on the basis of accurate and adequate data.

As new situations develop, it might be necessary, from time to time, to undertake special sample surveys in order to determine exactly what is occurring. To a very considerable extent, the existence of the five per cent sample makes such special surveys unnecessary. Information may be extracted from the sample covering any phase of the employment history of insured persons.

The sample material is obtained from five different sources in the Unemployment Insurance Commission organization. When all of this information is combined, a complete work history of each individual is obtained, classified according to the specific provisions of the Unemployment Insurance Act. Tabulations of these data can be applied specifically to the problem of evaluating the probable financial stability of the scheme and to make a better determination of the most useful adjustments to be made to meet a known contingency.

At the same time statistical by-products will be available, throwing light on many problems in the general field of employment and labour statistics.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the month of January give the following information concerning Employment and Unemployment across Canada.

The employment situation at the beginning of January, 1945, as reported by employers.—In conformity with the movement invariably indicated at the year-end holiday season in the period since 1920, industrial employment showed an exceedingly marked contraction at the beginning of January, according to the Dominion Bureau of Statistics. The crude index number of employment declined from 185·7 at the beginning of December to 180·4 at January 1, as compared with 185·7 at January 1, 1944 and 183·7 at January 1, 1943 (based on the 1926 average as 100).

The weekly per capita earnings fell from \$32.19 at December 1, 1944, to \$30.10 at the beginning of January. The average at January 1, 1944, was \$29.69 and at January 1, 1943 it was \$27.92.

The Bureau's reports come from firms employing fifteen or more employees representing practically all industries except agriculture, fishing, hunting, and highly specialized business operations. Reports for December came from 15,042 establishments in the eight leading industries. These, together with data from financial institutions, indicated that the number of persons in recorded employment was 1,900,880, as compared with 1,954,896 at the beginning of December, 1944.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit increased from 13,770 in December, 1944, to 20,412 in January, 1945, the highest for any one month since the Unemployment Insurance Commission was established.

Report on employment conditions, February, 1945.—Labour requirements in all Canadian industries except agriculture as reported by Employment and Selective Service Offices at February 22, 1945, totalled 95,001 persons. This was less by 7,601 than the number in de-

mand at February 24, 1944, but there was slight change in labour demand over the past month. Labour supply, as indicated by the number of applicants registered at employment offices who have not been referred to jobs, amounted to 59,903 at February 23, 1945. This was an increase of 18 per cent from January 19, 1945, and of 69 per cent from February 25, 1944, the corresponding reporting date last year.

Applications for Employment; Vacancies and Placements, January, 1945.—Reports received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the five-week period December 29, 1944, to February 1, 1945, showed a gain in the average number of placements recorded daily in comparison with the preceding four weeks, and a minor reduction when compared with the first five weeks of 1944. Under the first comparison, decreases in trade and construction were offset by gains in all other groups, the most noteworthy being in manufacturing and services. Compared with the period December 31, 1943, to February 3, 1944, except for advances in logging and public utilities, all groups revealed reductions, the most noteworthy being in manufacturing, construction, mining and services. Vacancies notified during the period under review numbered 224,962. There were 249,213 applications for employment and 151,490 placements were effected in regular and casual employment.

Unemployment in trade unions.—The percentage of unemployment among trade union members increased fractionally between October and January, though remaining less than one per cent. At the beginning of January the figure was 0·6 per cent, while at October 1, 1944, the last quarterly date, the figure had been 0·3. Compared with the preceding year, however, unemployment was somewhat less, the figure at the beginning of January, 1944, having been 0·8 per cent. At the beginning of 1939 unemployment had been 16·2 per cent.

The January, 1945, figure was based on returns received from 2,332 labour organiza-

tions, having a total membership of 409,338 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution at October 1, 1944, has been made by the Research and Statistics Branch of the Depart-

ment of Labour. At that date it is estimated that 4,318,000 persons, 14 years of age and over, were gainfully occupied of whom 3,293,000 were in non-agricultural industry, including 994,000 in war industry. In addition there were 777,000 persons in the Armed Forces.

The Employment Situation at the Beginning of January, 1945, as Reported by Employers

IN conformity with the movement invariably indicated at the year-end holiday season in the period since 1920, industrial employment showed an exceedingly marked contraction at the beginning of January, when the recession was on a scale greater than in any other winter since 1938, with the exception of 1940. The percentage loss in employment, however, was rather smaller than the average in the years prior to the outbreak of war. The 15,042 establishments furnishing information to the Dominion Bureau of Statistics reported a personnel of 1,834,450; as compared with their staff of 1,888,411 at December 1, there was a reduction of 53,961 employees, or 2.9 per cent. The crude index number of employment (1926=100), declined from 185.7 in the last survey, to 180.4 at the date under review, as compared with 185.7 at January 1, 1944, and 183.7 at January 1, 1943. Since the curtailment was less than normal in extent, the seasonally-adjusted index showed a gain, rising from 181.3 at December 1, to 187.4 at the beginning of January.

The latest reduction in employment was accompanied by a relatively larger shrinkage in the indicated salaries and wages. The very general observance of Boxing Day as a holiday following Christmas, together with the loss of working time due to increased absenteeism, and lessened overtime work, combined with the reductions associated with lowered employment, to produce an extremely marked effect upon the disbursements made on or about January 1, for services rendered in the week preceding. These aggregated \$55,207,831. As compared with \$60,794,016 reported at December 1, there was a contraction of 9.2 per cent, exceeding the decrease of 8.5 per cent indicated at January 1, 1944, when the year-end holidays had also been observed at the week-end. The per capita weekly earnings fell from \$32.19 in the last report, to \$30.10 at the beginning of January. The average at the same date of last year had been \$29.69, and that at January 1, 1943, \$27.92. In the 12 months' comparison, the latest index of employment showed a loss of 2.9 per cent,

accompanying that of 1.6 per cent in the payrolls.

Communications, retail trade, local transportation, railway construction and maintenance and logging afforded more employment at January 1 than at December 1, the improvement in trade was seasonal, while that in the other groups was contrary to the usual trend at the time of year. Manufacturing, mining, steam railway and water transportation, building and highway construction and maintenance and services, on the other hand, showed seasonal curtailment. The largest reductions were those of 38,889 in manufacturing, and 14,434 in construction as a whole. The loss of 3.4 per cent, in the former was somewhat smaller than the average percentage decline at January 1 in pre-war years, although it was greater than in any other year during the war. Only in tobacco factories was the trend upward at the date under review, when the most pronounced contractions were in iron and steel, food and textile plants.

Payrolls

The aggregate payroll of \$55,207,831, previously stated as having been disbursed at January 1 in weekly salaries and wages by the 15,042 reporting employers, was lower by 9.2 per cent, than the sums paid at the first of December. The decline was seasonal. The weekly per capita earnings fell from \$32.19 at December 1, to \$30.10 at the first of January, or by \$2.09; the loss of \$1.92 indicated at January 1, 1944, had lowered the average in the eight leading industries to \$29.69. In 1943, the average was \$27.92.

Including the data received from financial institutions, the latest survey shows that the number of persons in recorded employment was 1,900,880, as compared with 1,954,896 at the beginning of December. The amounts received in weekly payrolls by these persons were given as \$57,366,984 paid on or about January 1, and \$62,949,413 paid on or about December 1. The general per capita figure for the nine main industries, including finance,

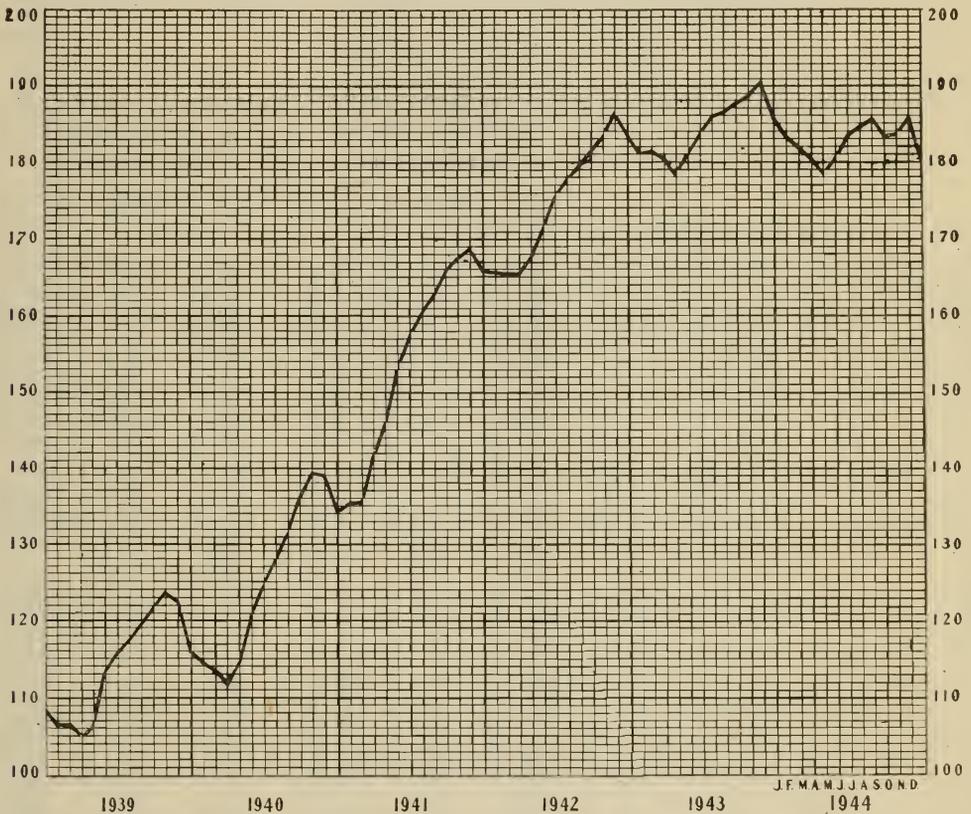

was \$30.18, as compared with \$32.20 at the beginning of December, and \$29.77 at January 1, 1944.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the 20 leading industrial cities, and gives comparisons as at December 1 and January 1, 1944, where these are available. Table I gives a monthly record for the eight

there has been an increase of 18.1 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the aggregate weekly earnings of these persons are higher by 38.1 per cent. Including finance, the gain in employment from June 1, 1941, to January 1, 1944, amounted to 17.9 per cent, and that in payrolls, to 37.6 per cent. The reasons previously given for the much greater rise in payrolls than in em-

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls from January, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table II shows that in the period for which data are available,

ployment may again be stated:—(1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work; (2) the payment of cost-of-living allowances to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944; (3) the progressive

up-grading of employees as they gain experience in their work; and (4) the granting of higher wage rates in numerous cases.

For evident reasons, the advances in employment and payrolls in manufacturing in the period of observation have exceeded those in the non-manufacturing industries, the index of employment in the former having risen by 26.6 per cent from June 1, 1941, to January 1, 1945, and that of payrolls, by 47.1 per cent.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind

that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages which likewise reflect variations in the extent to which casual labour is used, the degree of skill generally required of workers in different industries is obviously an exceedingly important factor.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions, February, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

WHILE the overall net labour demand¹ in Canadian industries showed little change during the five-week period from January 18 to February 22, firms are showing some concern regarding replacements for men on temporary permits to leave agriculture who will be returning to their farms during March. A sharp increase in the demand for workers in the next few weeks is expected, due not only to this change-over in employment, but with the prospect of an early spring, to the resumption of construction activity.

Labour requirements (exclusive of agricultural demand) at February 22, 1945, totalled 95,001. Although this was substantially the same as the demand for 95,250 workers at January 18, 1945, a month earlier, it was

considerably less than the shortage of 102,602 workers reported at February 24, 1944, the corresponding reporting date a year ago. The shortage of 65,765 male workers at February 22, 1945, represented 69 per cent of the total demand for labour at that date. Table I shows net labour demand, by main industry groups and by sex, as at February 22, 1945, with absolute and percentage changes in total demand from January 18.

The supply of labour, in terms of unREFERRED applicants² amounted to 59,903 (38,092 men and 21,811 women), at February 23. This was an increase of 18 per cent over the number of applicants unREFERRED at January 19. As may be seen in Table II demand for workers in most occupational categories was in excess of supply. The reverse was true, however, regarding clerical, sales and construction workers. In the case of clerical and sales workers all regions except Ontario reported an oversupply at February 23, and efforts are being made to direct applicants registered in surplus areas to jobs in this region. With reference to the construction occupations it is expected that there will be sufficient jobs during the spring and summer seasons for all qualified applicants not presently employed.

Net Labour Demand in A and B Priority Industries

The labour shortage reported by war and essential civilian industries as at February 22, 1945 (65,912) constituted 69 per cent of the overall requirements. Within this high priority industry group the demand for labour in logging (16,727) was a decrease of 5,636 from the January 18 total; the labour needs of mining and manufacturing, on the other hand, grew larger (from 29,113 to 31,667) and at February 22 comprised 48 per cent of the total labour requirements of high priority industry.

Logging

While 16,727 workers were still needed in logging at February 22, the peak of labour demand in this industry appears to have been passed. Most of the cutting has been completed in the Eastern and Prairie Regions and efforts are being made to speed up hauling operations before the spring break-up. These regions reported substantial decreases in

demand for labour, while in the Pacific Region, due to the reopening of the logging camps in some areas, labour requirements increased from 848 at January 18, to 1,056 at February 22. Sixty-four per cent of the total labour shortage in this industry was in pulpwood logging which still required 10,680 men; of these, 4,588 were needed in the Quebec Region.

Mining and Primary Smelting

The labour situation in mining, primary smelting and refining at February 22 was fairly satisfactory in all regions. The return of agricultural workers to the farms during March will, however, have a marked effect on these industries as many farmers have taken off-season employment in the mines, collieries and smelters. Total requirements at February 22 amounted to 4,656 workers, of which 1,251 were needed in coal mining, but although the shortage of workers in the coal mines was considerable, production has been kept up to schedule. The gold and base metal mines in some areas were still having difficulty in finding men with requisite physical stamina for

¹ Net Labour Demand is calculated by deducting unconfirmed referrals from unfilled vacancies. Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated. Unconfirmed Referrals are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

² Applicants who have not been referred to jobs as at the date indicated.

the jobs offered. In the iron and steel industry demand for workers rose slightly during the month in keeping with increased production in some of the war industries.

Manufacturing

Canada's high priority manufacturing industries were short of 18,411 men and 8,600 women at February 22, 1945. Demand for female labour showed slight change as compared with January 18, the date of the last report, but demand for males was larger by 2,934 or 19 per cent.

Textiles and Products.—As at February 22, demand for labour in the high priority textile industry (6,079) was substantially the same as at January 18, a month earlier. Male demand grew larger by 330 to total 1,928 at the February date, while demand for women in this industry (4,151) was smaller by 314. In Quebec's cotton textile mills labour requirements at January 22 totalled 502 as compared with 721 five weeks earlier, while an increased demand (from 453 to 659) was noted in the woollen and worsted textile mills of Ontario. In the manufacture of women's and misses' outerwear demand for female help in Quebec at February 22 stood at 314 as compared with 568 at January 18. A dearth of female sewing machine operators continues to present a major problem in the textile industry. Total demand for this type of tradeswomen at February 23 amounted to 4,008 while only 265 were registered as applicants.

Guns and Ammunition.—Net Labour demand in the guns and ammunition industry at February 22 stood at 2,536. This is an increase of 25 per cent over the demand reported at January 18, five weeks previous. There was some decline in the labour requirements of heavy ammunition (from 1,241 to 826). Demand for workers increased, however, in the small arms ammunition industry (from 308 to 712), and indications are that the orders placed late last year by the United States Government are beginning to have repercussions on the labour market.

Shipbuilding and Repairs.—The rising demand for workers in Canada's shipyards continued, with 2,113 needed at February 22 as compared with 1,900 one month previous. Some improvement was evident in the Maritimes where labour demand dropped from 795 to 551, and men are being supplied to Halifax shipyards immediately housing is available. In Quebec, requirements at February 22 (573) showed a rise of 216, and an increase of 214 was evident in the Pacific Region where 787 workers were needed at the latter date. Recent new contracts for transport ferries in Quebec

and Pacific shipyards have increased activity in this industry.

Construction

High priority construction reported a slight decrease in demand (from 2,346 at January 18, to 2,148 at February 22), with activity more or less restricted to the completion of contracts and maintenance jobs. As work on aerodromes, barracks and other war construction is curtailed, more emphasis will be placed on industrial and residential construction; increased activity in this field is expected this year as more materials are released for essential civilian purposes.

Transportation

Although the net labour demand for 3,796 workers in the high priority transportation industry was 15 per cent lower at February 22 than at January 18, the trend will probably be reversed within the next few weeks. Outfitting crews have already commenced work on a number of Great Lakes ships, while the Pacific Region reported some demand for marine engineers, mates and quartermasters as well as maintenance and overhaul crews for coastwise shipping. The manpower situation in regard to railway transportation is fairly satisfactory at this time, but with the coming of warmer weather additional maintenance and track gangs will be needed.

Trade, Finance and Service

Employment offices throughout Canada reported a shortage of 10,486 workers (4,345 males and 6,141 females) at February 22 in high priority trade, finance and service. One-third of this shortage was in public and professional service where 3,449 workers (1,456 males and 1,993 females) were required; this was a drop of 713 from January 18. In trade, finance, and service other than public and professional, demand rose from 6,284 at January 18, to 7,037 (2,889 males and 4,148 females) at February 22.

While the need for female workers in hotels and restaurants rose from 2,005 at January 18, to 2,257 at February 22, applicants were showing more willingness to accept this type of employment than domestic service where demand remained high. The shortage of female workers in hospitals rose from 719 at January 18 to 809 at February 22, due mainly to increased demand in the Prairie and Pacific Regions. Every effort is being made to divert applicants into this high priority service.

Wholesale and retail trade reported labour demands of 1,111 and 1,383 respectively at February 22. This was slightly higher than the need for 1,000 and 1,323 workers reported by these groups a month earlier.

Regional Analysis

The Regional Analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended February 22, 1945.

Maritime Region

Agriculture.—As yet, there is little activity, except for an increase in the number of orders placed with local offices for experienced livestock and dairy farmers. Plans are being formulated to assure the return of farmers in off-seasonal employment as soon as the spring work on the land opens up.

Logging.—In most parts of Nova Scotia, there has been just sufficient snowfall to benefit cutting and sleigh hauling, and the industry continues to absorb all the bushworkers available. Many small operators are experiencing difficulty in securing enough men; and one larger company at Sheet Harbour is still short 100 loggers. Owing to lack of manpower, production in the New Glasgow area has been reduced and the shortage in the Truro district is also serious, with clearance orders hard to fill.

Farther north, in New Brunswick, heavy snow has disrupted cutting operations, and the recent heavy thaw is threatening to alter manpower requirements considerably. Termination of cutting in the Campbellton area has resulted in the release of about 300 bushmen, of whom approximately one-half are returning to their own farms to cut fuelwood, while others are available for seasonal employment, and are being placed, whenever possible, on outside logging orders.

Coal Mining.—The collieries continue to operate steadily and with reasonably high production. Only fully certificated miners are now in demand.

Manufacturing.—Manpower needs have not altered materially during the past month, and lay-offs have been of a minor character, with only a small number of workers involved. The call for additional labour in the shipyards is receiving first consideration. Halifax's two large shipbuilding firms have orders for some 280 skilled workmen and 150 unskilled labourers in all, but the lack of housing accommodation makes it difficult to meet these requirements. New contracts awarded a Charlottetown shipyard recently have made it possible to retain the present staff of more than 100 men, and even to recall a small number of others laid off last December.

Heavy labour is still in some demand throughout the region and some difficulty has been encountered in finding men with the necessary physique to fill large orders from Trenton war plants. In one such establishment, where heavy structural steel work is being done, referments since November have totalled about 570, and the rate of labour turnover has been very high.

Mills and fertilizer plants, fish processing and textile factories throughout the Maritimes make continual demands on the labour force, and there is no immediate prospect of satisfying these requirements locally in areas where shortages exist.

Construction.—Activity is confined to remodelling and repair work, and a number of carpenters and construction labourers are currently unemployed. The military hospital building program is progressing smoothly, with no serious lack of building labour.

Transportation.—Heavy storms have hampered bus and railway traffic, with a resultant urgent call for a great number of snow shovellers. While the stevedoring companies on the Halifax waterfront could utilize additional labour, they are in no immediate need. The only development of note was a one-day strike of 300 employes of the National Harbour Board at Halifax, the strikers returning to work pending a settlement of the dispute.

Quebec Region

Agriculture.—Although there has been no call for farm labour as yet, the prevailing mild weather of the past few days has been a reminder that agricultural workers temporarily employed in other essential industry must soon be released to return to the land.

Logging.—Deep snow has hampered operations in many parts, and as a result of most unfavourable working conditions, a great many men have either been released from the camps, or left of their own volition. The majority of the small camps have ceased cutting and are now busy with the sleigh haul, the greatest demand being for men to undertake this work.

There has been no notable increase in the demand for bushworkers, except in the Chandler and LaTuque areas, where no suitable applicants are available. Three large operators in the vicinity of Chandler require another 350 loggers each, and contractors and sub-contractors in the La Tuque neighbourhood continue to call unavailingly for men to complete their season's cutting. The Quebec City office reports that a never-filled list of logging labour vacancies is attributable to a high labour

turnover, and woods operations at St. Joseph d'Alma and Dolbeau could still utilize 200 to 300 bushmen in each district.

Mining.—While no change in manpower supply is yet apparent and production is being maintained at the level of recent months, with the approach of spring mining labour needs will increase, and orders for workers to take the place of farmers leaving in March can only be filled through clearance. Another 200 experienced machine men and 500 qualified helpers could be absorbed by the mines in the Rouyn area, while diamond drilling firms in that locality, although well supplied with helpers, require additional runners.

Manufacturing.—While there has been no outstanding over-all development during the past several weeks, a marked improvement is noted in the employment situation of several industrial towns especially affected by the activities of the Aluminum Company of Canada. The Shawinigan Falls office reports a considerable diminution in local lay-offs, with a consequent levelling off in the number of unemployment insurance claims being filed. The Aluminum Company has advised of an appreciable increase in production in the immediate future (due to the recent American orders), and instead of laying off some hundreds of further employees, the plant is rehiring many previously released. The opening of a new potroom at the Chicoutimi plant has led to the employment of 100 potmen and a few labourers, and other potrooms are expected to open shortly.

In the Montreal area, lay-offs previously scheduled are proceeding according to plan in several of the larger war plants, but staff reductions throughout the province are not of any magnitude, and one proposed mass lay-off of 200 workers from a Quebec shipyard was recently countermanded.

The heavy shell-filling plants of the region are, without exception, satisfactorily supplied with labour, and the only calls for additional manpower from the iron and steel industry in general are for a few highly skilled workers, in addition to a considerable number of heavy duty labourers, who are not obtainable.

Textile plants, garment factories and kindred industries continue to present the most extensive manpower problem, and one unlikely to be satisfactorily solved for some time to come. Sewing machine operators, clothing and textile workers of all kinds are needed in the Montreal area, and factories at Cowansville, Drummondville, St. Jerome, Sherbrooke, Granby and Richmond share in the demand for similar labour.

Construction.—Although present activity is confined for the most part to local projects,

repair work and small jobs which are keeping tradesmen employed during the slack season, prospects for the coming season are bright, and a real building boom is anticipated. In the meantime, only in Montreal does the demand for skilled artisans far exceed the supply.

Transportation.—With weather conditions in most sections of the province restored to normal, the hundreds of snow shovellers employed in keeping traffic routes open have been gradually released.

Ontario Region

Agriculture.—A few farmers are already leaving their temporary winter employment, in order to make early preparations for the coming season, and this exodus will become widespread during the coming month. In the meantime, while occasional orders for farm workers have been placed with local offices, there are few such requirements as yet on file.

Logging.—Despite the fact that woods operations were seriously impeded by the deep snow of early February, recent reports on conditions in most parts of Ontario have been very encouraging and a substantial increase over last year's cut is anticipated, notably in the Kapuskasing area.

In some districts, a fair number of bushmen are still in demand. Two large companies in the vicinity of North Bay are short of teamsters and rollers, several operators at Sudbury require additional labour in order to complete their sleigh hauls, and at Sault Ste. Marie, experienced loggers are in great demand to get the cut out to the skidways and river banks for the spring drive. Another 100 cutters are needed for camps in the Kirkland Lake area, and operators around Timmins are handicapped by a shortage of bush men.

Mining.—No improvement is noted,—or anticipated—in the manpower situation throughout the mining fields, and all operations in the Timmins and Kirkland Lake areas report vacancies for both experienced miners and beginners, for lack of whom production has been greatly reduced.

Manufacturing.—The placing of many new contracts has been followed by a marked uptrend in production, with a consequent sharp increase in manpower requirements, which already far exceeded the available labour supply. An urgent need for skilled and heavy workers is noticeable throughout Ontario's manufacturing centres, with foundry production in particular seriously handicapped by the prevailing shortage of skilled tradesmen. The approaching expiry date of temporary

permits, held by farmers and farm workers in off-seasonal employment, makes the problem of adequate manpower supply still more disturbing, and many employers who will be affected are attempting to forestall anticipated shortages by placing orders now, although for the most part applicants available at this time fall short of heavy labour standards.

The agricultural plants of Brantford and Fergus, and the abrasive shops of Niagara Falls, are especially exigent in their call for heavy, unskilled labour, as well as for every type of skilled iron worker. Kingston, Toronto, New Toronto and St. Catharines share in the need, and the Barrie office alone has orders in clearance for 150 foundry labourers.

Plants busy on the Government's intensified munitions program have increased their orders for immediately needed staff. One Toronto factory has been supplied with approximately 800 women during the past month, and about 250 female workers will be brought to Wallaceburg from the Prairie and Pacific regions as soon as hostel accommodation is ready. In New Toronto, 200 husky factory and machine shop helpers are needed immediately, and 300 more will be required before the end of April. An order for 400 labourers for the D.I.L. plant at Nobel has been placed in clearance, and manpower requirements of the company's Oshawa factory have also increased markedly.

There has been only slight alleviation of the persistent shortage of labour in the textile plants and kindred industries. Food processing plants have also increased their manpower demands.

Lay-offs during the past month have been of a minor nature. In Toronto the De Havilland Company of Canada released about 380 workmen of various types, but this staff reduction worked to the advantage of the subsidiary firm in London, engaged on new aircraft contracts. More recently, 500 men were released from the Chrysler Corporation plant at Windsor, and there has also been a steady reduction of the Genelco staff in Peterborough, but practically all those affected by these lay-offs have been placed locally or through clearance orders.

Construction.—Activity is slight, and confined to a few areas. While a marked increase in labour demand is anticipated as the season advances, a number of skilled building tradesmen are at present drawing unemployment insurance benefits. Only from Toronto and New Toronto is any shortage of labour reported. The Pembroke office advises that during the past fortnight, 329 men have been placed on construction work in the district, with

further outstanding orders for 342 building tradesmen of all types.

Transportation.—The call for snow shovelers and maintenance labourers for the railways has, for the most part, been met locally in various parts of the province. Water transportation companies are already preparing for the opening of navigation, and initial manpower requirements are being filled without difficulty.

Prairie Region

Agriculture.—While there is little demand for immediate assistance, and few applicants are available for farm labour, occasional orders are being placed for spring.

Logging.—Although there is a persistent demand for bushworkers in many sections, operators generally agree that the labour supply has been more satisfactory than for some years past. It is expected that the cut will be materially increased, and special efforts are being made to keep loggers in the bush as late as possible.

The Fort William office, reporting a continuingly heavy demand for bushmen, states that a large number of placements have been made. In the Port Arthur area, 100 teamsters are needed immediately for the sleigh haul, and cutters are still being engaged, as also farther north at Fort Frances, where deep snow is impeding the loading and hauling operations. Logging camps in Manitoba are generally shorthanded, but special efforts have been made to meet their manpower requirements and a considerable number of Indians have been placed in the vicinity of The Pas. With the exception of Red Deer and Edmonton, which have orders in clearance, the Alberta offices report an adequate supply of logging labour.

Coal Mining.—As yet, there has been little indication of lessening production, and as always, certificated miners could be absorbed in most collieries. Blairmore, Edson and Drumheller are calling for qualified miners, but in these districts, as elsewhere, few surface or underground labourers are needed.

Base Metal Mining.—Manpower needs show no diminution, and the Winnipeg office reports that northern mine operators are becoming concerned at the prospect of further depletion of their already undermanned crews when farm workers leave in March.

Manufacturing.—Major development of the month has been the staff reductions in the packing plants, resulting from a shortage of hogs. Lay-offs of some magnitude are reported from every centre where packinghouses

are situated, and the companies concerned will only absorb permanent applicants to replace farm workers leaving at the end of March.

There have been no lay-offs from the Fort William Aircraft shops, but absenteeism has resulted in a fairly large number of separations; the company, working on a reduced production program, is dismissing persistent offenders. The Winnipeg office, while recording a continuing call for heavy labour, reports that general requirements have tapered off, and in Medicine Hat there is an over-supply of both male and female labour.

Construction.—The general slowing down continues throughout the region, with projects on hand nearing completion and no new ones to be started before spring. During the past two weeks, total vacancies for building tradesmen and labourers have equalled approximately one-half of the number of unpreferred applicants for the industry as a whole.

Transportation.—There is little general demand for labour, but track maintenance men are required at Fort Frances, Kenora, Dauphin, Edmonton, and at the Head of the Great Lakes.

Pacific Region

Agriculture.—A very moderate demand for dairy farm workers is reported, with a few additional applicants becoming available from time to time. In the interior, a number of tree pruners could be employed, but the need for such labour is not urgent.

Logging.—Heavy snow on the higher levels of the interior has forced a number of camps to suspend operations, with a consequent lay-off of experienced bushmen and Japanese labourers, the latter returning to housing centres. Most of the big operations in the Chilliwack district are idle, except for falling and bucking operations, and in the vicinity of Cranbrook, manpower needs are confined to experienced log cutters.

Good logging weather has raised production in the coastal forests to the highest January record since 1942, and at least until the farmers leave the camps at the end of March, the labour situation will remain more satisfactory than a year ago. Nevertheless, the Vancouver office reports a continued need for skilled bushworkers throughout the surrounding districts, and on the Island, while demands in the vicinity of Victoria are being met, Port Alberni and Nanaimo report a growing demand for unskilled labour.

Sawmills.—Orders for heavy labour and certain skilled craftsmen are difficult to fill in the New Westminster area. While there have been no recent shutdowns on account

of log shortage, several woodworking and planer mill plants remain closed because the type of order on hand for overseas shipment does not call for their finishing work. The Vancouver office reports many sawmill vacancies, and local pulp and paper operations are continually short of heavy labour. On Vancouver Island, however, there is a slight downward trend in the demand for sawmill workers, with an even smaller supply available.

Coal Mining.—The collieries are still short of skilled miners and underground labour, with few applicants coming in, but nowhere is the situation really acute.

Base Metal Mining.—Manpower demands are continually pressing and of some magnitude, especially those for the Kimberley operations, where some 275 men are needed immediately. Underground workers are also needed at Field and a number of experienced muckers could be absorbed in the Nelson area. There is no promise of improvement in the undermanned position of the gold mines, and many operations are producing only a fraction of their regular capacity tonnage.

Manufacturing.—Calls for shipyard workers are still the most pressing. A decided shortage of skilled artisans of all types persists in Vancouver, as well as a lesser demand for unskilled men and helpers, and there is a continual call for many journeymen and helpers for the two major Victoria shipyards. Applicants available are not suitable for the work, and response to orders in clearance has been disappointing.

There are continuing calls for moulders, machinists and other skilled tradesmen in the heavier industries of the Vancouver area, but only men with years of experience and a high degree of skill are acceptable. Female power machine operators are also needed, but unobtainable. Very few heavy labourers are coming in on the clearance orders for the Trail smelters, issued to the Pacific and Prairie regions.

Construction.—While there is little present activity, many new industrial construction contracts have been awarded and others are pending. A definite spring uptrend in building activity is foreseen, absorbing a considerable number of carpenters and labourers over and above those at present in demand.

Transportation.—Manpower requirements have been satisfactorily met, with the exception of a few orders for railway maintenance workers and crews for coastwise shipping. The North Inland Water Transportation companies have recently placed orders for maintenance and overhaul crews for vessels tied up for the winter, soon to resume operations.

Applications for Employment; Vacancies and Placements; January 1945

REPORTS received from Employment and Selective Service Offices of the Unemployment Insurance Commission during the five week period December 29, 1944, to February 1, 1945, showed a moderate gain in business transacted, when compared with the previous four weeks ending December 28, 1944, but a loss of somewhat smaller proportion in comparison with the five week period December 31, 1943, to February 3, 1944. This computation was based on the average number of placements recorded daily.

Under the first comparison, except for moderate declines in trade and construction, all industrial groups recorded increases, the gain in manufacturing being outstanding. When compared with the corresponding period a year ago, all changes were slight except a fairly substantial loss in manufacturing and a moderate decrease in construction. The only gain of note was in logging.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified, and of placements effected for each one hundred applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications took downward courses. The ratio of vacancies to each one hundred applications being 90.3 during the five week period December 29, 1944, to February 1, 1945, in contrast with 95.4 during the preceding four weeks and 101.5 during the five weeks December 31, 1943, to February 3, 1944. The ratio of placements to each one hundred applications was 60.8 as compared with 68.1 in the previous period and 65.3 in the five week period ending February 3, a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the period under review was 7,757 compared with 6,506 during the preceding four weeks and 8,597 in the five weeks December 31, 1943, to February 3, a year ago. The average number of applications for employment received daily by the offices during the five week period December 29, 1944, to February 1, 1945, was 8,594, in comparison with 6,823 in the previous four weeks, and 8,465 in the five weeks ending February 3, last year. The average number of placements made daily by the offices during the five weeks December 29, 1944, to February 1, 1945, was 5,224, of which 5,081 were in regular employment and 143 in work of

one week's duration or less, as compared with a total daily average of 4,649 during the previous four weeks. Placements in the five weeks ending February 3, 1944, averaged 5,527 daily, consisting of 6,336 in regular and 191 in casual employment. During the period under review the offices of the Commission referred 220,909 persons to vacancies and effected a total of 151,490 placements. Of these the placements in regular employment were 147,334 of which 98,318 were of males and 49,016 of females, while placements in casual work totalled 4,156. The number of vacancies reported by employers was 146,153 for males and 78,809 for females, a total of 224,962; and applications for work numbered 249,213, of which 163,897 were from males and 85,316 from females.

The following table gives the placements effected by employment offices each year, from January, 1935, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945 (5 weeks).....	147,334	4,156	151,490

Prince Edward Island and Nova Scotia

During the five weeks ending February 1, 1945, the daily average of positions offered through Employment and Selective Service Offices in Nova Scotia and Prince Edward Island was 258, compared with 241 in the previous period and 311 during the five weeks terminating February 3, last year. There was a daily average of 201 placements in comparison with 179 in the preceding four weeks and 236 during the period ending February 3, 1944. Moderate decreases in construction, manufacturing and mining were the only changes of importance in placements from the corresponding five weeks last year. Placements by industries included: manufacturing 2,345; services 1,165; public utilities operation 809; trade 713; construction 329; forestry and logging 255, and mining 126. Regular placements numbered 3,965 of men and 1,758 of women.

New Brunswick

Orders listed at Employment Offices in New Brunswick during the period under review, called for a daily average of 274 workers, compared with 349 in the four weeks ending December 28, and 209 during the period ending February 3, 1944. The average number of placements effected daily was 163, in contrast with 149 in the previous four weeks and 165 during the period terminating February 3, a year ago. The small decline in placements from the five weeks ending February 3, last year, was due to moderate losses in forestry and logging, and manufacturing. All other groups recorded improvements, the highest being in public utilities operation. Placements by industrial groups numbered: manufacturing 1,260; services 909; forestry and logging 855; public utilities operation 688; trade 494; construction 357 and mining 107. There were 3,448 men and 1,224 women placed in regular employment.

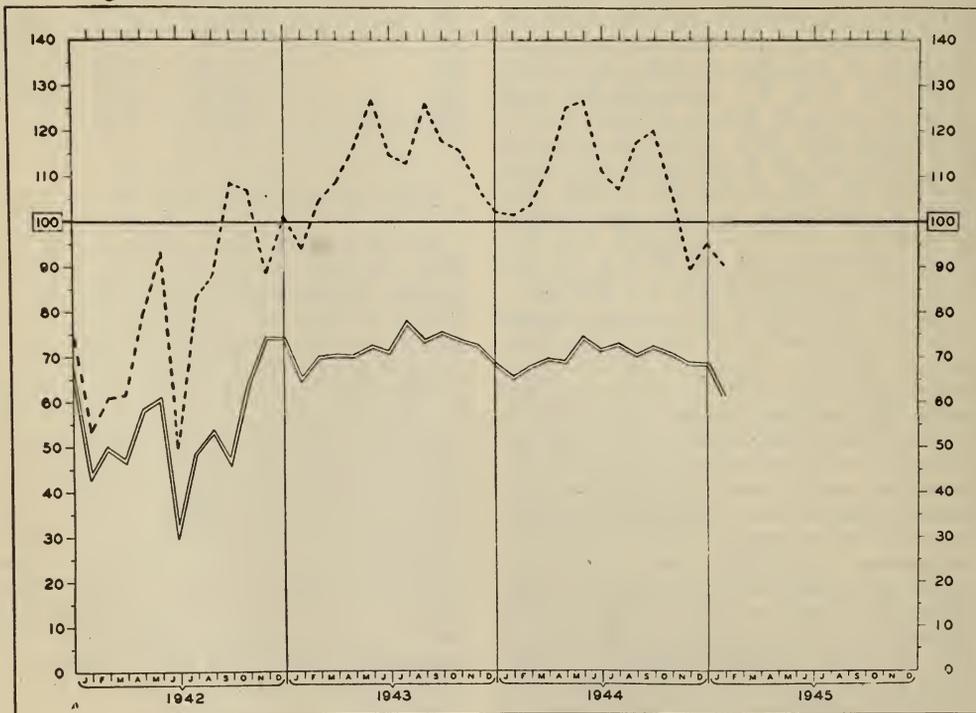

Quebec

There was an increase in the average number of positions available daily at Employment Offices in the province of Quebec during the

five weeks ending February 1, 1945, when compared with the preceding period, but a decrease in comparison with the five weeks terminating February 3, last year, the daily average being 2,302 during the period under review, 2,044 in the previous four weeks and 2,545 during the corresponding period of 1944. Placements decreased under both comparisons, the daily average being 1,392 during the five weeks under review, in contrast with 1,412 in the preceding period and 1,498 during the five weeks ending February 3, a year ago. The reduction in placements from the corresponding period last year was chiefly attributable to a substantial decrease in manufacturing augmented by a fairly large loss in construction and moderate declines in trade, services and public utilities operation. These decreases, however, were offset in part by a substantial gain in forestry and logging. Industrial divisions in which the majority of placements were effected were: manufacturing 15,421; forestry and logging 10,747; services 5,425; public utilities operation 3,098; trade 2,535; construction 1,930 and mining 730. Placements in regular employment numbered 29,436 of men and 10,720 of women.

VACANCIES NOTIFIED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications——— Vacancies- - - - - Placements=====

Ontario

Employment opportunities as indicated by orders received at Offices in Ontario during the period terminating February 1, 1945, showed a daily average of 3,180 workers, compared with 2,500 in the previous four weeks and 3,727 during the period ending February 3, a year ago. Placements recorded a daily average of 2,230 during the four weeks under review, in contrast with 1,808 in the preceding period and 2,262 during the period terminating February 3, last year. A substantial decrease in placements in manufacturing, supplemented by moderate losses in mining, construction and agriculture accounted for the decline from the corresponding five weeks of 1944. This reduction was somewhat modified by an appreciable gain in public utilities operation and moderate increases in trade, and forestry and logging. Industries in which most of the placements were effected were: manufacturing 30,680; services 11,498; trade 7,216; public utilities operation 5,170; forestry and logging 5,037; construction 2,617; finance and insurance 1,163 and mining 1,080. Regular placements numbered 39,711 of men and 23,606 of women.

Manitoba

Positions offered through Employment Offices in Manitoba during the five weeks ending February 1, 1945, averaged 322 daily in comparison with 301 in the preceding period, but remained unchanged when compared with the five weeks ending February 3, last year. There was a daily average of 231 placements compared with 219 during the period ending December 28, and 244 in the corresponding five weeks of 1944. When comparing placements by industrial groups with the period ending February 3, last year, none of the changes was large, the most significant being decreases in services and manufacturing, and a gain in trade. Placements by industries included: manufacturing 2,033; services 1,855; trade 1,404; public utilities operation 682; forestry and logging 251 and construction 187. There were 2,808 men and 2,787 women placed in regular employment.

Saskatchewan

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Saskatchewan during the period under review, was 172 as compared with 154 in the previous four weeks and 182 during the period ending February 3, 1944. The average number of placements registered daily was 128, in comparison with 119 in the preceding four weeks and 136 during the period terminating

February 3, a year ago. Placements by industrial groups showed small variation from the corresponding five weeks last year, the largest change being a moderate decrease in forestry and logging. Placements by industries included: services 1,469; trade 786; manufacturing 683; public utilities operation 333, and forestry and logging 160. Placements in regular employment numbered 1,797 of men and 1,565 of women.

Alberta

Orders listed at Employment Offices in Alberta during the five weeks ending February 1, called for a daily average of 331 workers, compared with 324 during the period ending December 28, and 340 in the five weeks terminating February 3, 1944. Placements were fewer under both comparisons, the daily average being 237 during the period under review, as compared with 253 in the preceding four weeks and 271 during the corresponding period last year. When comparing placements by industrial groups with the period ending February 3, a year ago, the most important changes were moderate losses in construction, manufacturing, services, mining and gains in forestry and logging, and public utilities operation. Industrial divisions in which the largest number of placements were effected were: services 2,018; manufacturing 1,278; trade 1,102; public utilities operation 792; forestry and logging 729; mining 389 and construction 348. Regular placements numbered 4,039 of men and 2,321 of women.

British Columbia

Opportunities for employment at Employment Offices in British Columbia during the period terminating February 1, 1945, numbered 919 daily in contrast with 594 in the previous four weeks and 960 during the corresponding period of 1944. Placements showed a daily average of 640, in comparison with 510 in the preceding period and 723 during the five weeks ending February 3, last year. A fairly large reduction in manufacturing together with smaller decreases in mining, services, construction and trade were responsible for the loss in placements when compared with the period ending February 3, a year ago. Moderate increases were noted in forestry and logging, and public utilities operation, while the changes in other groups were important. Industries in which employment was found for more than 500 workers included: services 5,437; manufacturing 4,990; forestry and logging 2,788; trade 1,899; public utilities operation 1,738 and construction 1,082. There were 13,114 men and 5,035 women placed in regular employment.

Strikes and Lockouts

Strikes and Lockouts in Canada During 1944

A MARKED decline in strike activity was recorded in 1944 as compared with the previous year. During 1944 there were 199 strikes and lockouts in which 75,290 workers were involved causing a time loss of 490,139 man-working days. During 1943, 402 strikes were recorded in which 218,404 workers were involved causing idleness of 1,041,198 days.

The improvement in the employer-employee relations as indicated by the decline in strike activity reflects the co-operation of both management and workers in the application of the Wartime Labour Relations Regulations. An article dealing with the activities of the Wartime Labour Relations Board appears on page 285.

The time lost through strikes in 1944 was about one-twentieth of one per cent of the total number of days worked by all non-agricultural wage earners during the year. Expressed in this way the loss in 1944 was about the same as in 1941 and 1942 and about one-half that of 1943. Both the number of strikes and the number of workers involved were smaller than in any of the three preceding years. About 25 workers in every 1,000 wage earners were involved in strikes during the year as compared with 72 in 1943, 39 in 1942, 33 in 1941, 27 in 1940 and 20 in 1939.

Eighty-seven of the strikes were of one day's duration or less. One hundred and sixty-five, or 83 per cent of the 199 strikes, were of less than 5 days' duration and caused only about one-seventh of the total time loss, while two strikes, one of motor vehicle factory workers at Windsor, Ont., and one of shipyard workers at Halifax, N.S., involved more than 16,000 workers and caused considerably more time loss than all the other strikes.

The expansion of employment since the outbreak of war has been much greater in manufacturing than in other industries. Strike activity has been greatest also in this group of industries in recent years. Three-fifths of the number of strikes, and four-fifths of the time lost in 1944 were in manufacturing. Strikes in mining numbered 49 but were of short duration and involved relatively fewer workers than in recent years. Strikes in coal mining caused less idle time than in any year since 1931 with the exception of 1938.

Questions involving changes in wages caused more strikes than were due to any other cause during the year but these resulted in relatively little time loss, about one-seventh of the total as compared with about one-third in 1943. Questions in connection with unionism caused only 34 strikes but resulted in 75 per cent of the total time loss, most of which was caused by the two strikes noted above at Windsor and Halifax. Only twelve strikes were for recognition of union and a very small proportion of the total of lost time resulted from these. Sixty-nine strikes were settled by conciliation and this was a factor also in the settlement of 33 additional strikes which were referred to arbitration and to War Labour Boards, etc.

Compilation of Statistics

Since its establishment toward the end of 1900 the Department of Labour has maintained a record of strikes and lockouts in Canada, publishing in the LABOUR GAZETTE each month a complete list of those in progress, so far as available, with particulars as to the nature and result of each strike. In each year a review of the previous year has been given, including statistical tables analysing the data, and since 1912 including a complete list of the disputes on record during the year. As the monthly statements in the LABOUR GAZETTE are necessarily of a preliminary nature the annual review constitutes the revised record for the year. A special report on "Strikes and Lockouts in Canada, 1901 to 1912", issued in 1913, contained a complete list of strikes and lockouts for that period with analytical tables. The annual reviews in the LABOUR GAZETTE have brought the lists of strikes and lockouts and analytical tables down to date each year.

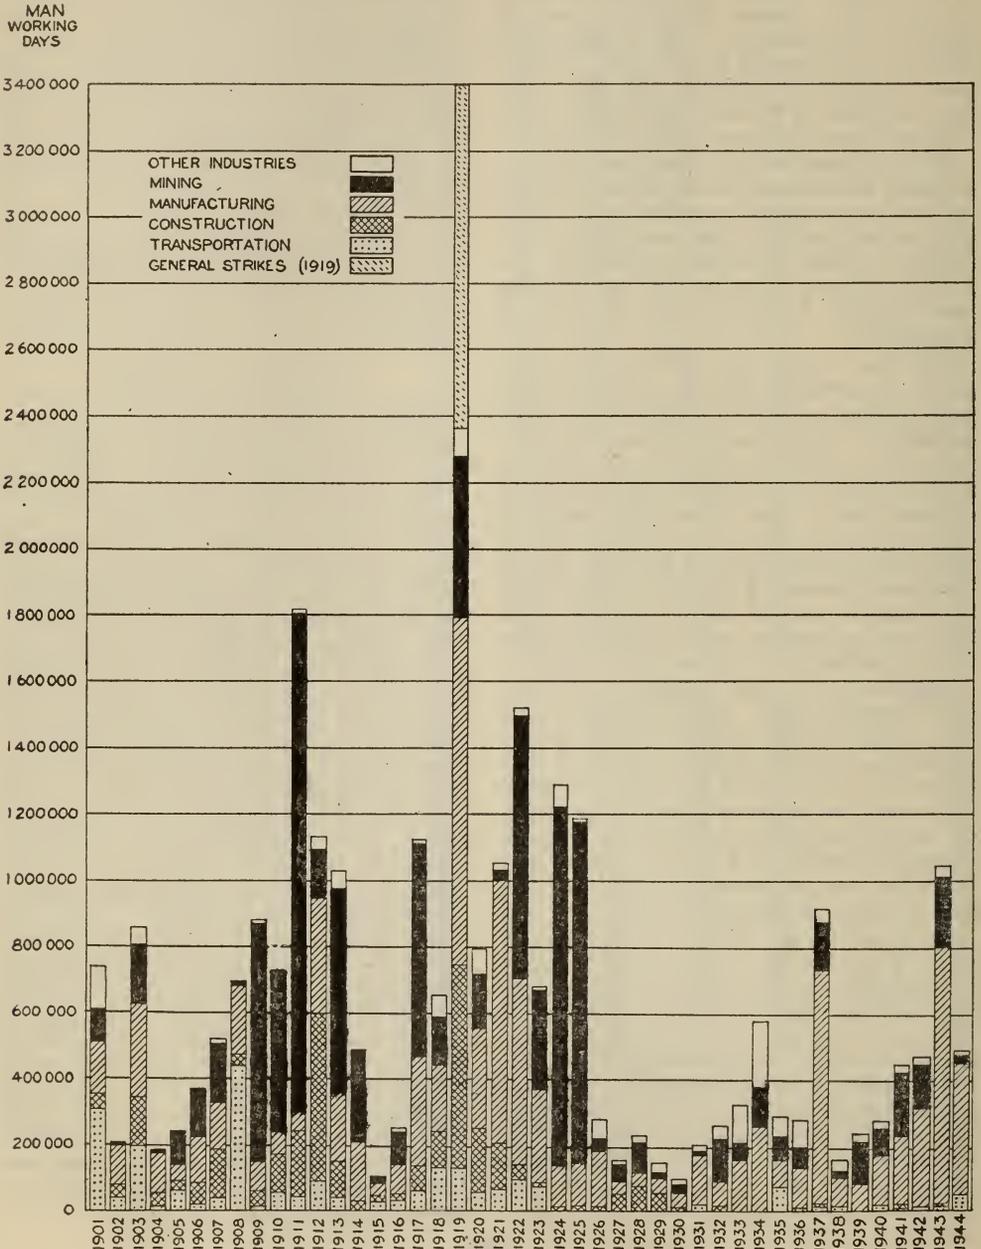

The annual review for 1930 appearing in the LABOUR GAZETTE, February, 1931, included summary tables back to 1901, the result of a revision of the record on the basis of the classification of industries adopted by the Dominion Bureau of Statistics and other government departments for official statistics. This classification had been used for strikes and lockouts since 1921, and it was advisable to have the record for earlier years on the same basis. Other revisions to secure uniformity throughout the whole period were also made.

The record of the Department includes lock-outs as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical tables, therefore, strikes and lockouts are recorded together.

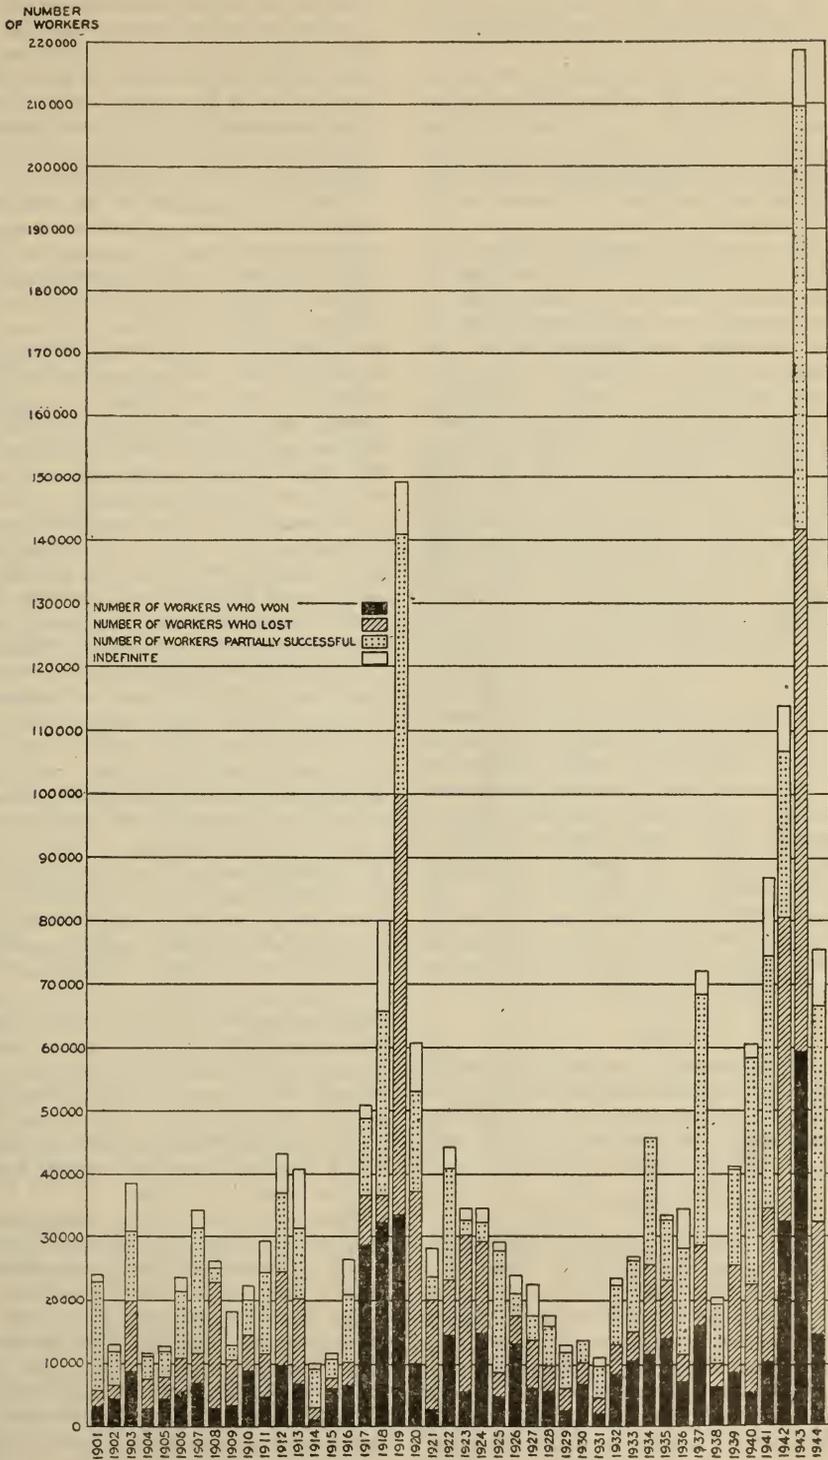

A strike or lockout included as such in the records of the Department, is a cessation of

work involving six or more employees and lasting one working day or more. Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused. A separate record of such strikes involving less than 10 days' time loss is maintained in the Depart-

LOSS IN MAN-WORKING DAYS THROUGH STRIKES AND LOCKOUTS BY GROUPS OF INDUSTRIES EACH YEAR 1901-1944

RESULTS OF STRIKES AND LOCKOUTS ACCORDING TO NUMBERS OF WORKERS INVOLVED EACH YEAR 1901-1944

ment. During 1944, there were 8 such strikes involving 388 workers and causing a time loss of 39 man days. In 1943, 25 were recorded involving 958 employees and causing a loss of 122 days.

In Tables I and X the number of employers involved is given. In strikes which involve large numbers of shops or factories, clothing, fur, furniture, etc., or building construction jobs, logging and fishing operations, etc., only the approximate number of employers is usually reported.

The figures in this report are inclusive of all strikes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. As to duration of strikes, numbers of employees concerned, etc., it is not always possible to secure exact information, but the estimate made in such cases is the result of painstaking methods in the collection of data, and it is believed that the statistics indicate the conditions with reasonable precision. The estimate of time loss is reached by multiplying the number of working days during which each strike lasted by the number of employees directly involved from time to time so far as known. The number of employees recorded for each strike is the number of those directly involved, that is on strike or locked out, and does not include those indirectly affected. The figures in the tables as to workers are therefore the number of those directly involved. In recent years, when the information was available, the numbers indirectly affected, if important, have been shown in footnotes to Table X, which is a detailed list of the strikes and lockouts during the year. The workers indirectly affected in each strike are those in the establishment who are unable to continue work because of the stoppage but not participating in the strike.

Charts

The accompanying charts show the results of strikes and lockouts according to the numbers of workers involved and the time loss in man-working days by groups of industries each year, for the period of 1901 to 1944.

Analysis of Statistics, 1944

Table I is a summary of the principal statistics for the period for which the record has been compiled, beginning in 1901. The table shows the number of strikes and lockouts beginning in each year, and the number in existence during the year, the difference in each case being the number carried over at the end of the previous calendar year. The approximate number of employers involved in all strikes as well as the number of workers

involved and the time loss, is given. In addition to these data, the number of strikes in existence during each year in coal mining and in industries other than coal mining is given, along with the number of workers involved and the time loss. A study of the latter figures reveals that a few strikes in coal mining in some years account for a large proportion of the workers involved and for a still larger proportion of the time loss resulting.

Table II, an analysis of the 1944 record by the number of workers involved, shows that, as is usually the case, the majority of the strikes involved a very small proportion of the total number of workers in all strikes and resulted in a still smaller proportion of the total number of days of lost time, while a small number of strikes involved comparatively large numbers of workers and caused a very large percentage of the total time loss. That is, 102 strikes, or 51.3 per cent of the total, involved less than 100 workers in each case, or a total of 5.7 per cent of the number of workers in all strikes. The time loss due to these 102 strikes was only 2.4 per cent of the total time loss. Nineteen strikes, or less than 10 per cent of the total number, involved more than 1,000 workers in each case. The total number of workers in these strikes was 45,859, or 60.9 per cent of the workers in all strikes, while the time loss was 86.6 per cent of the total.

Many of the strikes, being of short duration and involving relatively few workers, caused very little time loss. Thus Table III shows that 81 strikes, or 40.7 per cent of the total caused less than 100 days' time loss in each case. The number of workers involved in these strikes was 7.1 per cent of the workers in all strikes and caused less than one per cent of the total time loss. Eighty-five point four per cent of all strikes caused less than 1,000 days' loss in each case. These involved 36.9 per cent of the workers in all strikes and caused only 7.2 per cent of the idleness due to strikes. Five strikes, which resulted in a loss of more than 10,000 days in each case, caused 78.6 per cent of the time lost in all strikes. Two of these strikes caused a loss of more than 50,000 days in each case and involved a total of more than 16,000 workers, or 62.1 per cent of the total.

Table IV, an analysis by the period of duration, shows that four-fifths of the strikes, involving three-fifths of the workers in all strikes, were settled within five days, with the result that the time loss from these strikes, numbering 165, was only 14.1 per cent of the total number of man days lost. Eighteen strikes lasted between five and ten days but as these involved only a few workers the time loss was not important. Two strikes lasted between 15 and 20 days and caused nearly one-

half of the total time loss. One of these involving motor vehicle workers at Windsor, Ont., involved more than 13,000 workers and caused a time loss of 228,000 days.

As shown in Table V more strikes were recorded in Ontario than in any other province. Thirty-one point seven per cent of all strikes, 42.5 per cent of the workers involved and 53.3 per cent of the time loss occurred in this province. Quebec was in second place with a total of 45 strikes, 25 per cent of the total number of workers involved and 23 per cent of the time loss. Nova Scotia was a close third with 42 strikes and about one-fifth of the workers involved and about one-fifth of the total time loss. These three provinces accounted for 75.4 per cent of the strikes in Canada, 86.6 per cent of the workers involved and 96.8 per cent of the time loss. No strikes were recorded in Prince Edward Island. Nineteen strikes in Alberta caused 1.6 per cent of the total time loss, while in each of the other provinces, New Brunswick, Manitoba, Saskatchewan and British Columbia, the time loss was less than one per cent.

Table VI, an analysis by industries, shows that strike activity in the manufacturing group was much greater than in all other industries combined, with 120 strikes recorded, involving 70 per cent of the workers in all strikes and causing more than four-fifths of the total loss of time. By far the most important strike involved more than 13,000 workers in the manufacture of motor vehicles. This strike caused a loss of 228,000 man-working days or 47 per cent of the loss resulting from all strikes in Canada. Sixteen strikes in the shipbuilding industry caused a loss of about 82,000 days. Of this total, 76,500 days resulted from a strike of about 2,900 shipyard workers at Halifax and Dartmouth. A strike of men's clothing factory workers in Montreal caused a loss of 30,000 days.

Thirteen strikes in transportation and public utilities involved about 10 per cent of the workers involved in all strikes and caused slightly less than 10 per cent of the idleness due to strikes. Two strikes of street railway employees in Montreal caused a time loss of 44,000 days or about nine per cent of idleness due to all strikes.

Strikes in the mining industry involved fewer workers and caused less time loss than in any year since 1939. Forty-six of the 49 strikes in mining occurred in coal mining. These involved 11,180 miners and caused a loss of about 29,000 days, or only 5.8 per cent of the total time lost in all strikes. About one-half of the coal mining strikes occurred in Nova Scotia.

Statistics of strikes by causes and results are shown in Table VII. Demands for in-

creases in wages caused slightly more than one-quarter of the strikes during the year, about the same proportion as in 1943. Demands for increases in wages and other changes, including reduced hours, caused an additional 10 strikes. These 63 strikes involved 16,892 workers and caused a time loss of 66,602 days or 14 per cent of the total. The demands of the workers were obtained in 14 cases and compromise settlements were agreed upon in 19 others, while in 27 cases the workers' demands were not obtained. The remainder, three in number, were un-terminated or indefinite in result.

Recognition of union was the cause of only 12 strikes during the year. These resulted in a loss of slightly more than 3,000 days. In 1943 there were 45 strikes from this cause, resulting in a loss of 139,127 days.

Union questions caused a total of 34 strikes which involved more than 30,000 workers. The time loss was 358,000 days or about 70 per cent of the loss from all strikes. In this group two strikes alone caused more than 300,000 days' time loss. The workers were successful in 13 strikes under unionism, seven of which involved recognition of union. In 10 cases a compromise settlement was obtained, while in nine cases the workers were not successful.

Discharge or suspension of workers (other than in connection with union questions) caused 27 strikes, which resulted in a time loss of 28,832 days.

Table VIII, an analysis by industries and methods of settlement, shows that 119, or about 60 per cent of the strikes during the year, were settled by various government agencies, federal and provincial. The number of workers involved in these strikes was 58,095 or more than 75 per cent of the total. Of these 119 strikes, 69 were settled by conciliation, federal in 38 cases, and provincial in 31 cases. Thirty-three were referred to various War Labour Boards, Labour Courts, etc., 13 were settled by arbitration and four by reference under the Industrial Disputes Investigation Act. In the 50 cases referred to various boards for final settlement, work was resumed following federal conciliation in 16 cases, provincial conciliation in 17 cases and direct negotiations between the parties concerned in 13 cases. Conciliation was a factor in the settlement of 102 strikes during the year, of which 54 were federal and 48 provincial.

Of the remaining 80 strikes, settlement resulted from direct negotiations between the parties in 34 cases, 39 were settled by the return of workers, six by replacement of workers and one was un-terminated at the end of the year.

Table IX shows the number of strikes, the number of workers involved and the time loss in man days by months during the last 11 years. Strike activity is usually less during the first three or four months and the last three or four months of the year than during the intervening period. During September the number of strikes, the number of workers involved and the time loss were lower than in any other month in 1944. The time loss of 800 days was less than for any month since August, 1930. Twenty-six strikes were

recorded in January and again in August and 25 in May. More workers, 22,827, were involved in strikes in May than in any other month, while June was the month of greatest time loss, 126,386 days, with August and May only slightly lower, having 120,283 days and 115,994 days respectively.

Table X is the list of strikes and lockouts in existence during the year with details as to causes, results, dates of commencement and termination, etc.

TABLE I—STRIKES AND LOCKOUTS IN CANADA BY YEARS, 1901-1944

Year	Number beginning during the year	Strikes and Lockouts in existence during year									
		All Industries			Coal Mining			Industries other than Coal Mining			
		Number of strikes and lockouts	Number of employers	Number of workers involved	Time loss in man-working days	Number of strikes and lockouts	Number of workers involved	Time loss in man-working days	Number of strikes and lockouts	Number of workers involved	Time loss in man-working days

^a In this table figures for strikes and lockouts extending over the end of the year are counted more than once.

^b Two protest strikes in Nova Scotia involved workers in various industries. The figures in these two totals do not add up to number of strikes for the year, namely 402.

TABLE II.—STRIKES AND LOCKOUTS, 1944, BY NUMBER OF WORKERS INVOLVED

Number of workers involved	Strikes and lockouts		Workers involved		Time loss	
	Number	Per cent of total	Number	Per cent of total	Man-Working days	Per cent of total
Under 10.....	6	3.0	44	0.1	96	0.0
10 and under 50.....	63	31.7	1,845	2.5	6,406	1.3
50 and under 100.....	33	16.6	2,391	3.1	5,517	1.1
100 and under 500.....	66	33.2	16,727	22.2	41,467	8.5
500 and under 1,000.....	12	6.0	8,424	11.2	12,314	2.5
1,000 and over.....	19	9.5	45,859	60.9	424,339	86.6
Total.....	199	100.0	75,290	100.0	490,139	100.0

TABLE III.—STRIKES AND LOCKOUTS, 1944, BY TIME LOSS

Number of man-working days lost	Strikes and lockouts		Workers involved		Time loss	
	Number	Per cent of total	Number	Per cent of total	Man-working days	Per cent of total
Under 100.....	81	40.7	5,330	7.1	3,307	0.7
100 and under 500.....	65	32.6	13,425	17.8	15,457	3.2
500 and under 1,000.....	24	12.1	9,025	12.0	16,255	3.3
1,000 and under 10,000.....	24	12.1	22,898	30.4	69,620	14.2
10,000 and under 50,000.....	3	1.5	8,390	11.1	81,000	16.5

Business and personal (d).....	4	2.0	284	0.4	1,238	0.2
Total	199	100.0	75,290	100.0	490,139	100.0

(a) Non-ferrous smelting is included with Mining; Electric Light and Power does not include undertakings mainly public utilities; erection of all large bridges is under Bridge Construction; water service is under Public Administration.

(b) Shipbuilding was included prior to 1942 under Construction; very few strikes occurred in Shipbuilding between 1921 and 1941.

(c) No Air Transport group prior to 1943 as there were no strikes.

(d) Custom and Repair group is included in Business and Personal for the first time.

TABLE VII.—STRIKES AND LOCKOUTS, 1944, BY CAUSES AND RESULTS

Cause or object	In favour of workers		In favour of employers		Compromise or partially successful		Indefinite or Unterminated		Total	
	Strikes and lockouts	Time loss in man- working days	Strikes and lockouts	Time loss in man- working days	Strikes and lockouts	Time loss in man- working days	Strikes and lockouts	Time loss in man- working days	Strikes and lockouts	Time loss in man- working days

Total.....	57	14,742	88	15,528	48	28,366	6	8,578	199	48,316
										75,290
										490,139

(a) Including cost-of-living bonus.

(b) Including vacations with pay.

(c) Inter-union dispute caused one strike, involving 1,135 workers and caused a time loss of 600 man-working days.

(d) Inter-union dispute caused one strike, involving 1,800 workers and caused a time loss of 450 man-working days.

(f) Union jurisdiction refers to disputes between unions as to the character or class of work which their respective members should perform, not to disputes re bargaining agency.

(g) Other than in connection with union questions.

(h) Including suspension and refusal to reinstate.

Strikes and Lockouts in Canada and Other Countries, 1944

THE accompanying table gives available information as to strikes and lockouts in certain countries since 1919, as compared with Canada, showing the number of strikes and lockouts, the number of workers involved and the time loss in man-working days. The countries included this year are restricted to those for which additional information has been received since publication of the yearly strike article in the LABOUR GAZETTE for March, 1944, p. 354. Throughout the year the latest available figures for each country are given in a monthly article in the LABOUR GAZETTE. The last extensive review of strikes and lockouts in Canada and other countries, many of which are no longer reporting due to war conditions, was given in the LABOUR GAZETTE for March, 1940, p. 234.

In the different countries variations occur in the definition of strikes and lockouts and in the methods of compilation of statistics. In some countries figures as to strikes and lockouts are counted separately, but where possible, they have been included together in the table here given. In some cases the number of strikes and lockouts shown for the year is the number commencing during the year and in other cases it is the number in existence during the year, including those carried over from the previous year.

The figures as to the number of workers involved published by some countries show not only the number of workers directly involved but also the number of those indirectly affected, that is thrown out of work by strikes and lockouts to which they were not parties, but exact information on this point is not always given. In the table given herewith the column showing the number of workers involved includes figures for the numbers directly involved or the total number directly and indirectly involved according to the method adopted by the country concerned.

Footnotes to the table indicate the nature of the statistics with reference to the above points.

Many countries publish statistics dealing with trade disputes only once each year or even less frequently, the figures being issued in some cases after an interval of some length. Most countries revise their figures when additional facts are brought to light, even though such revisions may necessitate changes in statistics published a considerable time previously.

In most cases the statistics dealing with disputes in other countries published in the LABOUR GAZETTE are obtained from official publications of the countries concerned.

* Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a time loss of 10 days or more is caused. † Disputes involving less than 10 workers and those lasting less than one day are omitted except when time loss exceeds 100 days. ‡ Strikes lasting less than one day (or shift) and those involving less than six workers are omitted. (a) Disputes beginning in period. (c) Disputes in existence in period. (d) Strikes only. (e) Directly involved only. (f) Directly and indirectly involved. (g) It is not stated whether or not employees indirectly involved are included. (h) Preliminary figures.

Strikes and Lockouts in Canada During February, 1945

DURING the month of February there was a decline in strike activity in Canada as compared with the previous month and with February, 1944, decreases being recorded in the number of workers involved and in the time loss in man-working days. Preliminary figures show 17 strikes in existence during February, 1945, involving 4,988 workers and causing a time loss of 6,821 days, as compared with 16 strikes in January, with 5,435 workers involved and a time loss of 32,142 days. In February, 1944, there were 20 strikes, involving 8,782 workers, with a time loss of 39,888 days.

Preliminary figures for the first two months of this year show 32 strikes, involving 10,397 workers and causing a time loss of 38,963 man-working days, as compared with 44 strikes, with 16,877 workers involved and a

time loss of 63,546 days, for the same period last year.

One strike, involving 26 workers, was carried over from January and 16 commenced during February. Of these 17 strikes, two resulted in favour of the workers, six in favour of the employers, one was a compromise settlement and seven were indefinite in result, work being resumed pending final settlement. At the end of the month one strike of freight car factory workers at Trenton, N.S., was reported as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA, JANUARY-FEBRUARY, 1944-1945

Cumulative totals.....	44		16,877		63,546

*Preliminary.

†Strikes un-terminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1945*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establish-ments	Workers		
Strikes and Lockouts in Progress Prior to February, 1945				
MINING— Coal miners, Robb, Alta.	1	26	200	Commenced December 5, 1944; for adjustment of contract rates on development work; employment conditions no longer affected by February 10; conciliation, federal; indefinite, miners employed at other mines pending receipt of new equipment.
Strikes and Lockouts Commencing During February, 1945				
MINING— Base metal miners, Val d'Or, P.Q.	1	92	184	Commenced February 1; against dismissal of three shift bosses for alleged racial discrimination; terminated February 2; conciliation, provincial; in favour of employer, dismissals due to other causes.
Coal miners, Glace Bay N.S.	1	(a) 951	2,000	Commenced February 6; against dismissal of ex-serviceman for refusal to work at coal face due to alleged disability; terminated February 9; conciliation, federal; compromise, datal worker volunteered to exchange jobs with ex-serviceman.
Coal miners, Bellevue, Alta..	1	(b) 300	400	Commenced February 15; against change to a certain type of air-pick for use in "tight" places; terminated February 16; return of workers; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1945*—Continued

Strikes and Lockouts in Great Britain and other Countries

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month. The annual review giving a table summarizing the principal statistics as to strikes and lockouts in Great Britain and other countries appears elsewhere in this issue.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in December, 1944, was 133 and 20 were still in progress from the previous month, making a total of 153 during the month, in which 32,200 workers were involved and a time loss of 64,000 working days was caused.

Of these 133 work stoppages commencing during December, 11 arose out of demands for advances in wages, five out of proposed reductions in wages, 30 over other wage questions, four as to questions of working hours, 20 over questions respecting the employment of particular classes or persons, 55 on other questions respecting working arrangements, seven as to questions of trade union principle and one was in support of workers involved in another stoppage.

United States

Preliminary figures for January, 1945, show 240 strikes beginning in the month, in which 44,000 workers were involved. The time loss for all disputes in progress during the month was 228,000 working days. Corresponding figures for December, 1944, are 280 strikes, involving 85,000 workers, with a time loss of 380,000 working days.

Prices

Prices, Retail and Wholesale, in Canada, February 1945

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index remained unchanged at 118·6 between January 2 and February 1, 1945. Advances for foods, and homefurnishings and services were offset by declines in the fuel and light and clothing series. Strength in fresh vegetables and certain fruits and meats outweighed continued weakness in eggs to advance the food index 0·4 to 130·6 for February. Homefurnishings and services registered a gain of 0·1 to 118·4, reflecting scattered increases in furniture and floor covering prices. On the other hand, the fuel and light index dropped 1·7 points to 107·4 due to further rebates in electricity bills coupled with a rate reduction in Toronto. Lower prices for women's wear and piece goods outweighed a footwear advance to lower the clothing index 0·1 to 121·7, while index levels for the remaining two groups continued unchanged at 112·0 for rentals and 109·2 for miscellaneous items.

Bi-monthly cost-of-living indexes for eight regional cities, on the base August 1939=100, registered increases with one exception between December, 1944 and February, 1945. The Montreal index at 120·9 and Vancouver at 117·6 each recorded an advance of 0·7 points, due principally to higher prices for foods and fuel and lighting. Gains of 0·4 were noted for the Halifax and Edmonton series which rose to 118·8 and 116·0 respectively, reflecting advances in foods and miscellaneous items. Three cities, Saint John at 118·6, Winnipeg at 116·0 and Saskatoon at 119·4, recorded increases of 0·2 between December and February, also due to higher prices for foods and miscellaneous items. The Toronto cost-of-living index at 116·5 showed no change, higher food prices in that city being offset by a reduction in electricity rates in the fuel and lighting group.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

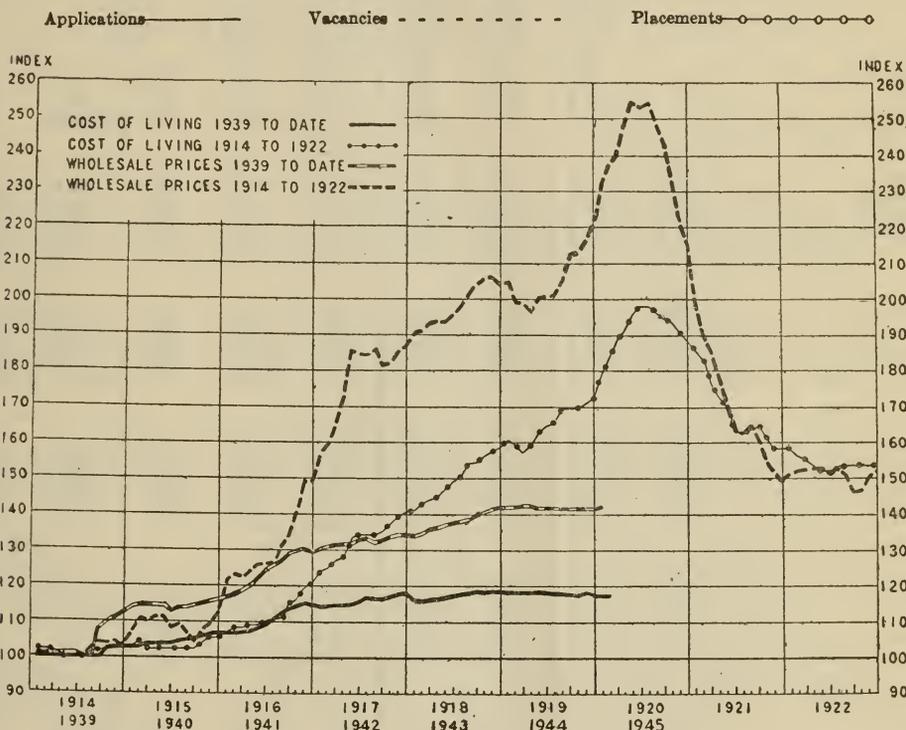

The index number of the cost of living was constructed on the basis of a survey of

\$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527,

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), 29403—11

became effective on December 1, 1941 (*L.G.*, 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time under the title *Activities of the Wartime Prices and Trade Board*.

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

(Continued from p. 415)

Wholesale Prices, January, 1945

The general index of wholesale prices recorded a gain of 0.3 to 102.8 between December, 1944 and January, 1945. Vegetable products moved up 0.7 to 95.7 following increases in potatoes, onions, rye and bananas. These outweighed decreases for hay and oranges. Animal products recorded an advance of 0.7 to 106.7 following higher quotations for livestock, fresh meats, fowl, furs, lard and butter which overbalanced continued weakness in eggs. Iron and steel products, the only other group to show a change, moved up 0.1 to 117.1 due to small increases in quota-

tions for steel sheets and plates. Index levels for other groups remained at 91.7 for fibres, textiles and textile products, 118.1 for wood, wood products and paper; 79.7 for non-ferrous metals; 102.7 for non-metallic minerals and 100.1 for chemicals and allied products.

Upturns for both field and animal products were reflected in a gain of 1.1 to 104.4 in the composite index of Canadian farm product prices between December, 1944, and January, 1945. Higher prices for potatoes, onions and rye overbalanced weakness in hay to advance the field products series 1.3 to 93.5, while in the animal products section a gain of 0.7 to 122.7 was due to higher livestock and fowl quotations. Eggs declined in January.

Price Movements in Canada and Other Countries

FOURTH-QUARTER changes in wholesale price indexes of most countries indicated little variation from levels reached in the first nine months of the year; advances during this earlier period were substantial in many instances. The Canadian wholesale index closed the year at 102.5 (1926=100), the same level as for December, 1943. This compared with a

1944 peak of 103.0 touched in March. During 1944 the Bureau of Labor Statistics wholesale index for the United States advanced to 104.7 (1926=100) for a gain of 1.5 points over December, 1943. Strength in this index was concentrated mainly in farm product prices. On the base 1930=100, the Board of Trade index of wholesale prices for the United King-

(a) First of month. (b) Middle of month. (c) Last week of month. (d) Quarterly. (e) New wartime price series on base December 1942=1000, computed quarterly beginning March, 1943. (f) Early averages are for period from July of preceding year to June of year specified. (g) July. (h) June. (i) Revised.

dom recorded an increase of 3·8 points to 167·2 between December, 1943 and December, 1944 influenced largely by higher prices for coal and cotton. The Switzerland wholesale price index showed a fractional decline in the second half of 1944, moving down from a level of 223·4 (July 1914=100) in June to 222·0 in November. Compared with December, 1943, however, a gain of 2·0 points was recorded. In Latin-American countries inflationary forces have tended to move prices sharply higher. The Argentine wholesale prices index had advanced to a level of 214·5 (1926=100) by November, 1944, as compared with 203·8 for December 1943. For Chile the composite wholesale index stood at a level of 872·8 (1913=100) in September, 1944, against 805·6 in December, 1943. Since the beginning of the war the level of both the Chile and Argentina indexes has more than doubled. Influenced by foods and other goods for consumption, the wholesale index for Mexico advanced from 200·8 (1929=100) in December, 1943 to 237·9 in December, 1944, though the rate of increase in the second half of the year was considerably slower than in the first half. The India (Calcutta index) recorded very little change through 1944, the latest available figure of 299 (July 1914=100) for November, comparing with a level of 301 for December, 1943. Wholesale indexes for Australia and New Zealand recorded relatively small changes in 1944, the composite figure for the former country advancing 0·9 points to 126·8 (1928-29=100) between December, 1943, and November, 1944, while that for the latter recorded a gain of 9 points to 1574 (1926-30=1000) in the same interval.

Fluctuations in cost-of-living indexes in 1944 generally followed the pattern set by wholesale price indexes. The Canadian cost-of-living index recorded a declining tendency in the second half of the year to close at 118·5

(1935-39=100) compared with 119·3 for December, 1943. Lower quotations for foods coupled with rebates in electricity bills in the fuel and lighting section were largely responsible for the decline. In the same interval the Bureau of Labor Statistics cost-of-living index for the United States registered a gain of 2·6 points to close at 127·0 (1935-39=100). Substantial increases in clothing and home-furnishings were responsible for this increase. The United Kingdom cost-of-living index of the Ministry of Labour (July, 1914=100) moved down 1 point to 201 between September and December, 1944, but recorded an increase of 2 points over December, 1943. Higher prices for fuel and light coupled with a small advance in clothing was responsible for the increase. There was no change recorded in living costs in Switzerland in the final quarter of 1944, the index remaining at 208 (June, 1914=100). This was 3 points above the December, 1943, level. Sub-group changes showed foods, clothing, fuel and light and rent all higher during the year. Among Latin-American countries the Argentine cost-of-living index recorded a gain of 1·4 points to 110·4 (1939=100) between December, 1943 and October, 1944, while a similar series for Chile advanced from 358·9. (March, 1928=100) to 419·9 by September, 1944. The cost-of-living index for Rio de Janeiro, Brazil (1912=100) continued to record sharp increases in 1944. It was 585 for November against 515 for December, 1943, while that for Lima, Peru, rose 22·8 points to 189·3 (1934-36=100) between December, 1943 and December, 1944. The Australian quarterly cost-of-living index for six capital cities closed the year at 1,270 (July, 1936-June, 1939=1000) compared with 1,273 in September and 1,266 in December, 1943. Food, groceries and clothing were mainly responsible for the advance.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at December 31, 1944

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-Provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

*Amended by Orders in Council P.C. 6287, August 10, 1943, and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

Industrial Accidents

Fatal Industrial Accidents in Canada, 1944

Analyzed According to Industries, Causes, Localities and Months

AN analysis of fatal industrial accidents in Canada during the calendar year 1944 by industries, causes, provinces and months is presented in the accompanying tables. The accidents recorded are those occurring to persons gainfully employed during the course of, or arising out of their employment; also included are fatalities from industrial diseases reported chiefly by provincial workmen's compensation boards. Quarterly reviews, each containing an analysis of accidents occurring during the period covered, appeared in the *LABOUR GAZETTE*, for May, August and November, 1944, and February, 1945.

The record is compiled from reports from the following governmental authorities,—The Board of Transport Commissioners of Canada; the Explosives Division of the Federal Department of Mines; the Workmen's Compensation Boards of Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia; the Ontario Chief Factory Inspector; and the British Columbia Department of Mines. In addition, reports were received also from the correspondents of the *LABOUR GAZETTE* resident in the principal industrial centres throughout Canada.

Industrial accidents reported in the press are also included in the record after inquiry has been made to avoid duplication. Most of the accidents in agriculture are recorded from press reports, and while it is not known to what extent the accidents in this industry are covered, it is believed that in this respect the record is fairly complete. To a great extent, however, the information obtained from press reports is used to supplement information received from official sources.

Table I gives an analysis of accidents by industries and causes, Table II by provinces, and Table III by months. The last two tables also include summary figures for 1943, which are a final revision of the figures published in the *LABOUR GAZETTE*, March, 1944, by the inclusion of accidents occurring in 1943 which were reported too late for incorporation into the annual statements. The accidents are included in the supplementary reports in the *LABOUR GAZETTE*, for May, August and Novem-

ber, 1944, and February, 1945. The figures for 1944, being still incomplete are accordingly to some extent not comparable with the completed figures for 1943.

In some industries, where considerable changes in figures from year to year appear, these may be attributed to changes in industrial conditions or to particular occurrences. For example in fishing and trapping there was a decrease in the number of fatalities from 49 in 1943 to 28 in 1944, which may be explained by the fact that during 1943 there was a serious disaster in this industry when 21 fishermen were drowned. Similarly, in the transportation group, the decrease in water transportation from 73 in 1943 to 36 in 1944 may be partly accounted for by the fact that there was a major disaster in this industry in 1943. There were decreases in fatalities in the mining group from 213 in 1943 to 153 in 1944, and in the construction group from 154 in 1943 to 99 in 1944, which may be largely due to reductions of employment in these industries.

There was no serious disaster resulting in the loss of a large number of lives during the period under review. Six grain elevator employees lost their lives when burned in an explosion and fire which wrecked an elevator, at Midland, Ontario, on July 8. The explosion was caused by spontaneous combustion while the men were sweeping up dust. Two men were killed instantly and the other four died on July 9.

When sprayed and burned following an explosion of a vat of molten galvanizing solution, six tube factory workers received fatal injuries, at Montreal, on July 21. One man was killed instantly, four died on July 23 and one on July 26.

When three fishing boats were swamped in a storm, off Richibucto, N.B., on June 13, four fishermen were drowned from one boat, four fishermen from another boat, and two fishermen from a third boat.

On November 16, near North Bend, B.C., a train was derailed when it struck a rock-slide, and an engineer, a fireman, a conductor and a trainman were killed. When a train struck an express truck in which they were

riding, at Chippawa, Ontario, on March 22, a motorman and two electricians were killed. A speeder jumped a track on a logging railway, while transporting workmen, near Kapuskasing, Ontario, and a roadmaster and two sectionmen were killed, on June 7. On May 15, a locomotive exploded near Cayuga, Ontario, killing an engineer, a fireman and a brakeman. Three trackmen lost their lives, near Rodney, Ontario, on May 19, when a train struck a jigger on which they were riding.

Three labourers engaged in building construction were electrocuted when a ladder on which they were standing touched a high voltage wire, at St. Redempteur, Quebec, on August 3. A riding rake carrying men to work plunged down a slope when the engine of the haulage rope failed and three coal miners lost their lives at Glace Bay, N.S., on December 18. When a train struck a truck, on December 22, three gas plant employees were killed, at Sherbrooke, Quebec. Three plasterers were killed when a train struck their auto, at Bourget, Ontario, on December 4. At Halifax, N.S., on November 4, three employees lost their lives at a fire in a hostel.

Fatalities by Causes

The classification of accidents according to causes shows that the largest number, 392, came under the category "moving trains, vehicles, etc." This includes all accidents due to cars or engines, including mine and quarry cars, and to automobiles and other power vehicles and horse drawn vehicles, as well as accidents caused by moving implements (both those impelled by power and those drawn by horses), by moving watercraft and by aircraft (civil aviation). The largest number of accidents in this category, 129, appears under the heading "automobiles and other power vehicles and implements", with 111 classified under the heading "being struck or run over by, or crushed by or between cars and engines," (62 of these being in steam railways); 39 were caused by animal drawn vehicles and implements; 36 were in connection with watercraft (16 of these being in water transportation); 25 were due to derailments and collisions (22 of which were in steam railways); 19 appear under aircraft; 18 were caused by mine and quarry cars; and 15 by persons falling from or in cars or engines.

Next in order were "falling objects," causing 170 fatalities, of which 51 were due to falling trees and limbs, 44 to mine and quarry cars, 38 to objects falling from elevations, loads, piles, 18 to breaking or loosening of straps, cables, etc., 7 to collapse of structure, and 12 to other falling objects.

"Falls of persons" caused 166 fatalities, of which 53 were from elevations, 42 into pits, shafts, harbours, rivers, etc., 14 from ladders 13 on sharp objects, 10 into holds of vessels, 10 from loads, etc., 9 due to collapse of support, 7 falls on the level, 5 down stairs and inclines, and 3 into tanks, vats, kilns, etc.

Fatalities numbering 140 were caused by "dangerous substances", classified as follows: 36 were due to hot and inflammable substances and flames, 35 to electric current, 24 to conflagrations, 19 to explosive substances, 16 to gas fumes, poison, etc., and 10 to steam escapes, boiler explosions, compressed air.

Hoisting apparatus caused 39 fatalities, 34 were caused by animals, 33 by striking against or being struck by objects, 30 by prime movers, 30 by handling of objects, 8 by working machines, and 6 by tools.

The category "other causes" includes 116 fatalities of which 90 were due to industrial disease, strain, etc., 12 to lightning, frost, storms, sunstroke, 5 to shooting and violence, 4 to cave-ins, land slides, ice jams, etc., 2 to drownings not elsewhere specified, 1 to infection, not elsewhere specified, and 2 concerning which no particulars were available.

Fatalities by Provinces

The classification of accidents according to provinces shows that the largest number, 445, occurred in Ontario. There were 231 in Quebec, 137 in British Columbia, 84 in Nova Scotia, 67 in Alberta, 50 in Saskatchewan, 46 in Manitoba, 44 in New Brunswick, 9 in Prince Edward Island, and 1 in Yukon and Northwest Territories. In Ontario the fatalities occurred by industries as follows: manufacturing, 128; transportation and public utilities, 100; mining, non-ferrous smelting and quarrying, 55; agriculture, 43; construction, 37; logging, 33; trade, 21; service, 20; central electric stations, 6; fishing and trapping, 2. In Quebec, the largest number, 72, was in manufacturing, with 56 in transportation and public utilities, 25 in construction, 21 in mining, non-ferrous smelting and quarrying, 15 in agriculture, 14 in logging, 13 in trade, 11 in service, and 4 in central electric stations. In British Columbia there were 60 fatalities in logging, 37 in mining, non-ferrous smelting and quarrying, 32 in manufacturing, 26 in transportation and public utilities, 11 in construction, 7 in agriculture, 5 in trade, 5 in service, 3 in fishing and trapping, 1 in central electric stations. In Nova Scotia and Alberta there were respectively 21 and 14 fatalities in mining, non-ferrous smelting and quarrying, and no other industry experienced as many fatalities in these provinces. Transportation and Public Utilities registered the largest number in

Manitoba and New Brunswick, there being respectively 13 and 12 in this industry. In Saskatchewan the largest number, 19, was in agriculture.

Fatalities by Industries

The total number of fatalities recorded for the year was 1,164, being classified under the various groups of industries as follows: manufacturing, 264 or 22.68 per cent of the total; transportation and public utilities, 252 or 21.65

per cent; mining, non-ferrous smelting and quarrying, 153 or 13.14 per cent; logging, 132 or 11.34 per cent; agriculture, 109 or 9.36 per cent; construction, 99 or 8.50 per cent; service, 59 or 5.07 per cent; trade, 50 or 4.30 per cent; fishing and trapping, 28 or 2.41 per cent; central electric stations, 17 or 1.46 per cent; finance, 1 or .09 per cent.

The fatalities by months indicate that the greatest number, 129, occurred in June, while the lowest total, 67, was recorded in April.

The table gives the total number of persons gainfully employed in most of the industries, the latest census figures available being given in each case. For agriculture, logging, construction, trade, finance, service, etc., the figures were those of the decennial census of 1941; for manufacturing and mining, from the annual census of industry for 1942; for fishing,

central electric stations, steam railways, street and electric railways, telegraphs and telephones, and express, from the annual census of industry for 1943.

While the latest figures available as to numbers employed are not in any instance those for the year under review, they are included, however, for general comparative purposes.

Fatal and Non-Fatal Accidents in Canada Reported by Provincial Workmen's Compensation Boards

The Labour Department's records of industrial accidents include only fatal accidents and fatalities arising out of employment; including those due to industrial diseases, etc. The only information of a comprehensive nature as to non-fatal accidents is from the Workmen's Compensation Boards in the various provinces, except that in manufacturing, mining, steam and electric railway operation, additional information is available from various governmental departments and commissions.

The annual reports of the several Workmen's Compensation Boards are reviewed from time to time in the *LABOUR GAZETTE*, information being given as to accidents, amounts paid in compensation, etc. The annual reports of the Provincial Workmen's Compensation Boards for 1943 were summarized in the following issues; New Brunswick and Saskatchewan, April, 1944, pages 543 to 544; Ontario and British Columbia, November, 1944, pages 1445 to 1446; and Nova Scotia, Manitoba, Alberta and Quebec, elsewhere in this issue on pages 437 to 440.

In none of the provinces does the Board have jurisdiction over accidents in all industries, so that the accidents recorded are those in certain industries only. Most of the Boards

deal with accidents in logging, mining, manufacturing, construction, transportation and public utilities, excluding agriculture, trapping, finance, domestic service, etc., but include to some extent, fishing, trade and government service.

The accompanying table summarizes the figures as to non-fatal accidents recorded by the several Workmen's Compensation Boards, for 1938, 1939, 1940, 1941, 1942, 1943 and also include some preliminary figures for 1944. It may be observed that the Department of Labour's figures show more fatal industrial accidents as occurring during each year than the total number of fatal accidents which was included by the Provincial Workmen's Compensation Boards for that year. This difference is largely accounted for by the fact that the Provincial Boards do not record accidents in all industries. In addition, however, the Boards' records only show accidents to employees, while the records of the Department of Labour register accidents to all persons occupied in industry, including employers and workmen carrying on their own business, of whom there are many, particularly in trucking, trade, etc., as well as in agriculture.

Workmen's Compensation in Nova Scotia, Quebec, Manitoba and Alberta

THE heavy demands for manpower in war-time industries have, of necessity, involved the employment in industry of many less experienced workers. Consequently, the ratio of industrial accidents has increased during the war years. However, there are indications that the peak has been passed, especially in eastern Canada. Accident incidence declined in Nova

Scotia and Quebec in 1943, as compared with that of 1942; while the increases in Manitoba and Alberta were relatively small, when compared with that of the first war years.

Brief summaries of the annual reports of the Workmen's Compensation Boards of Nova Scotia, Quebec, Manitoba and Alberta for the year 1943, follow.

Nova Scotia

The increased industrial activity in Nova Scotia during the early war years continued during 1943. There was, however, a decline in industrial accidents, the number being 13,666 as compared with 19,714 in 1942, according to the report of the Workmen's Compensation Board of Nova Scotia for 1943. These were classified as follows: fatal accidents 103, of which only four were non-compensable or disallowed; accidents causing permanent partial disability, 160; accidents causing total disability for seven days or over, 8,988; accidents where medical aid only was paid, 7,115; acci-

dents pending adjustment 1,269; accidents not compensable (other than fatal) 1,031. The number of widows being cared for by the Board at the end of 1943 was 772, an increase of 32 over the previous year. The number of other dependents and workmen wholly or partly disabled for life increased from 2,684 to 2,817.

During the year a total of \$1,718,025.93 was paid out in compensation to the injured and to dependents. The average rate to all employers for the 27 years since the Workmen's Compensation Act was enacted in its present form was 2.15 per hundred dollars of payroll. The rates

(a) Accidents requiring medical treatment but not causing disability for a sufficient period to qualify for this compensation. The period varies in the several provinces; figures not reported by some boards.

(b) Preliminary figures.

of administration expense to the compensation cost of accidents for all years was 7.07.

The pension fund, which is computed actuarially on a 3½ per cent interest basis, amounted to \$9,569,206.04 at December 31, 1943, as compared with \$8,120,737 a year earlier.

Assessment rates for the various groups in all classes of industries vary with changes in the experience of the industries in the several classes. The provisional assessments made during 1943 were as follows:

Mining	\$1,129,269.60
Lumbering and Woodworking ..	271,169.38
Iron and Steel	311,497.31
Manufacturing and Operating not otherwise specified	155,116.75
Building and Construction	401,119.02
Public Utilities	134,837.51
Transportation	558,710.52
Total	\$2,961,720.09

Quebec

According to the sixteenth annual report of the Quebec Workmen's Compensation Commission, the number of accidents reported in 1943, was 90,564. This was a decrease of 6,324 as compared with the total of 96,888 in 1942. It was, however, considerably above the annual average of 42,381 for the pre-war years, 1931-1939.

The assessments collected by the Commission reflected the high rate of employment in industry throughout the province. It was pointed out in the report that in spite of considerable reductions in certain groups at the end of 1942, provisional assessments in the amount of \$9,222,697 were collected, as compared with the final assessments on employers of \$10,403,998 in 1942. The total of the assessments paid from the inception of the Act on September 1, 1931, to the close of 1943, was \$67,515,011.

The report states that the amount paid out in compensation in 1943 (provisional figure) was \$4,600,397.37. This compared with a total of \$7,856,826.75 in 1942. The largest item on the 1943 expenditure list was for temporary incapacity, \$1,994,635.10. The other items were \$1,007,147.32 for medical aid, \$957,134.62 for permanent incapacity, and \$641,480.33 for fatalities.

The total assets of the Commission as at December 31, 1943, were shown to be valued at \$25,176,563. The book value of investments was \$23,079,198. The accident fund was further protected by reserves set aside to meet various contingencies as follows: reserve for disasters, \$275,483; reserve for possible depreciation of investments, \$781,334. In addition, there was a reserve for unsettled claims and other contingencies amounting to \$3,033,986. Administrative expenses during 1943, amounted to \$592,984.24.

Manitoba

A total of 16,387 accidents were reported to the Workmen's Compensation Board of Manitoba during 1943, the greatest number for any year on record, according to the report of the Board for the calendar year, 1943. Accidents in 1942 numbered 16,228, including 45 fatalities. Details of the accidents as reported by the various groups for the last two years are as follows:—

	1942	1943
Steam railways	1,888	2,391
Province of Manitoba	254	222
City of Winnipeg	346	356
General body of employers.....	12,673	12,124
Winnipeg Electric Co.....	192	237
Dominion Government	875	1,057
Total	16,228	16,387

The total payroll for all classes for 1942 was \$101,986,886.96. The largest group was that of the general body of employers with a total of \$62,182,066, while the Canadian National and

the Canadian Pacific railways had payrolls of \$11,280,737.92 and \$10,732,135.23 respectively.

During 1943, the actual cash disbursed by the Board (less investments) amounted to \$1,229,221.86 as compared with \$1,205,278.81 disbursed during 1942.

The report contains a detailed analysis of compensable accident claims for 1942. The accident claims were classified by causes as follows: Prime movers, 144; working machines. 461; hoisting apparatus, 102; dangerous substances, 346; stepping on or striking against objects, 761; falling objects, 813; handling objects, 1,398; tools, 457; runaways and animals, 64; moving trains, vehicles, etc., 195; falls of persons, 993; all other causes, 505.

In addition to the regular work of administering the Workmen's Compensation Act, the Board has been assigned the task of administering the Old Age and Blind Persons' Pension Act. In that connection, the Board dealt with more than 30,000 claims and paid out more than 36 million dollars, all in small amounts.

Alberta

The total number of accidents reported to the Workmen's Compensation Board of Alberta during the calendar year, 1943, was 19,700, an increase of five per cent over the 18,680 accidents reported in 1942. Fatal cases reported during the year numbered 78. Of these, 76 followed the accidents in from one day to 181 days, while the other two survived their accidents by 13 years and 20 years respectively.

The provisional financial statement of the Board showed that net assessment levies amounted to \$2,649,930.52. During the year 1943, the financial position of the Board improved to the extent of \$692,880.78. Increases were shown for the year of \$98,351.98 in the Accident Fund Reserve; \$122,718.58 in the Medical Aid Fund Reserve; \$145,907.79 in the Silicosis Reserve; \$124,610.20 in the Disaster Reserve; \$104,562.13 in the Contingency Reserve and \$96,730.10 in the Reserve Section required by the Act to provide for cases where a workman does not leave a widow (Section 33 (1) (n)).

Total compensation paid amounted to \$816,492.80; cost of medical services, including administrative and general expenses, \$403,028.37; provision for disasters during the year \$148,830.40, bringing the Reserve for Disasters, at the end of 1943, to \$470,089.20.

It was reported that the merit rating plan applicable to industries with higher assessment rates, set up four years earlier, had been favourably accepted by industry as an incentive to reduce accident costs by organization of safety work. Merit credits in the sum of \$114,925.25 were allowed in 1943 to employers on their 1942 and prior years' accident experience and a further \$177,022 was provided to take care of the estimated 1943 merits.

At December 31, 1943, the Board held \$9,557,942.95 (par value \$9,878,425.14) in various types of investments. It was pointed out that these did not represent surplus or excess funds, but in the main were being held in trust for the benefit of injured workmen and dependents of fatally injured workmen.

During 1943, the Board held numerous meetings with industrial organizations with a view to the organization and enforcement of accident prevention work in the various industries. It was indicated that various organizations worked in close co-operation with the Board's Safety Department. These were furnished each month with a record of their previous month's accident costs, for the purpose of fostering accident-prevention consciousness amongst both employers and employees.

Legislative Proposals to Quebec Government of Canadian and Catholic Confederation of Labour

A MEMORANDUM submitted by the Canadian and Catholic Confederation of Labour to the Government of the Province of Quebec on January 26 recommends changes in provincial labour legislation, mainly in the field of collective bargaining and labour relations.

Expressing the desire of the Confederation to collaborate with the Government to assure social peace in the province, the brief asks that the Minister of Labour make an official declaration as to the future of the Superior Council of Labour, which body, it is suggested, could be entrusted to prepare gradually a provincial labour code setting forth standards of social legislation, providing for obligatory status under the law for all workers' syndicates and unions, and for the institution of labour tribunals to build up a sound jurisprudence in the realm of social legislation. Such action, the brief states, would decide satisfactorily all disputes; even on such controversial questions as union security.

Professional Syndicates Act.—This law, it is suggested, should be amended so as to state that a collective agreement may deal with all matters relative to working conditions, and in particular such matters as wages, hours, apprenticeship, family allowances, the preference to be accorded to union members by an employer when hiring workers, etc.

Labour Relations Act.—While the Confederation approves the provincial Labour Relations Act as to its provisions for compulsory collective bargaining, conciliation procedure and arbitration, it urges that incorporated syndicates be not obliged to offer other proof than that of their legal existence in order to obtain certification from the Labour Relations Board or to set in motion the collective bargaining procedure under the Act; and also that they be not obliged to submit copies of their agreements to both the Department of Labour and the Board.

Public Services Employees Disputes Act.—Modification of the clause in this Act pro-

hibiting affiliation of government employees with outside organizations is suggested so as to permit affiliation with associations which enjoy status under provincial legislation. A three-man council, including employee representation, is suggested to act as an appeal board from arbitration awards rendered under the terms of the Act.

Quebec Trade Disputes Act.—Suggestions are made for the speeding-up of arbitration procedure under this Act.

A number of amendments are also proposed in the Collective Agreement Act and in the Workmen's Compensation Act.

Legislative action to provide holidays with pay for all workers is also urged. Vacations of one week after a year's service and of two weeks after five years' service are asked.

The Confederation is submitting separately a number of briefs on specific subjects such as apprenticeship and conditions in particular trades and industries.

Library of the Department of Labour

Select List of References on Industrial Relations

THIS is the third of a series of bibliographies on labour and related problems compiled by the Library for publication in the *LABOUR GAZETTE*. It consists of a select list of references on industrial relations which are available in the Library of the Department of Labour. Except for a few standard texts the list refers to material published since the war. Earlier lists in this series appeared in the January issue (p. 115) and the February issue (p. 242).

In the February issue on p. 244 the publication listed as *Professional Journal* should have been *Personnel Journal*.

Reconstruction in New Brunswick

THE report of the New Brunswick Committee on Reconstruction has recently been published. It states that the essential aims of post-war planning for the province are as follows:—

- (1) employment within the province, with reasonable returns for their labour, for all people who are willing and able to work;
- (2) improved educational facilities and enlarged educational opportunities; and
- (3) social and welfare services comparable to those enjoyed elsewhere in Canada.

These aims, the Report states, imply a better balance between the provincial economy and the national economy than exists at present. Pointing out that the per capita income of New Brunswick is one of the lowest in the country, the Committee blames geography, national policy and monopolistic competition from outside the province as basic contributing factors. As correctives, it urges federal action in "such vital matters as tariff, trade, and monetary policy and the freight rate structure", calls for the maintenance of the national income at a level comparable with the present scale, and advocates implementation of the Sirois Report recommendation for a national adjustment income grant from the federal to the provincial government to be spent on developmental projects and social, welfare and educational services.

Employment.—In the field of employment the Report recommends two programs, the first an emergency public works program to act as an employment cushion during the transition period from a war to a peace economy, and the second a long-term developmental program for permanent economic rehabilitation. The Committee does not predict that a post-war spending spree would have in New Brunswick a sufficiently beneficial effect on employment to counterbalance lay-offs from war industry and the demobilization of service men.

It stresses instead the necessity of having a positive public employment program ready to be thrown into operation immediately the need arises. As works projects suitable to be undertaken within the province by the federal government it lists harbour development, airports, and construction of a canal through the Isthmus of Chignecto; and as provincial projects, roads and bridges, railway crossings, roadside improvements, and provincial buildings are advocated. Almost every municipality, the Report adds, has indicated a need for public works projects of various kinds, in-

cluding water and sewage facilities, street and sidewalk projects, and public buildings, including schools, hospitals, administration and community buildings. Medium-term loans from the federal government to municipalities at a nominal rate of interest are considered appropriate in this connection, and it is further recommended that the province itself examine the need for schools and hospitals and the fiscal responsibility therefor.

As a major part of a long-term program the Committee stresses the need for further development of existing industry and the creation of new industry. It cites in strong terms the need of a new national government policy to counteract the trend of concentrating manufacturing in the central provinces—"a trend fostered by the monopolies and national government policy". The approach to the problem, the Report continues, appears to involve:—

- (a) compiling an inventory of New Brunswick's resources and analysing the existing methods of utilization;
- (b) compiling information regarding processing and utilization techniques in use and being developed outside the province; and
- (c) preparing a program making use of the best available information concerning the various fields of enterprise suited to New Brunswick's natural resources.

In the field of agriculture there is need for a comprehensive program of soil surveys and land classification. In forestry it will be necessary to have complete forest surveys, to develop plans for opening inaccessible forest lands, and to investigate fully the whole field of wood utilization. Similar projects should be implemented in the fields of mining and fishing.

This constitutes real economic planning. It is properly a function not of industry but of government. A program of this kind involves a heavy initial outlay of funds which could not be borne, for example, by farmers, lumbermen and fishermen. Moreover, its success or failure depends in large part upon government policy, and it cuts across both federal and provincial jurisdiction.

Supplementing the developmental program, there should be a comprehensive long-term plan for bringing up to the national average such services as education, health and social welfare. In the opinion of the Committee this can be accomplished only by a major revision of existing Dominion-Provincial-Municipal relations, involving the reallocation of fiscal and jurisdictional responsibility in various fields of government service.

Labour Standards.—Pointing to the desirability of basic uniformity in Canadian labour legislation, the Report suggests the formation of a permanent Dominion-Provincial Conference representing the labour departments of the Dominion and all Provincial Governments. This Conference could formulate and maintain

adequate revision of a program of national labour standards covering the following points:—

1. National labour code;
2. Apprenticeship training program;
3. Employee safety, health standards and welfare;
4. Basic minimum wages.

Dominion legislation would be enacted on these matters, with provincial autonomy preserved and the Dominion meeting a portion of the cost of administration where a province adopted conforming legislation.

Considering that "the general interest of the Canadian people would be furthered were

all labour to be organized into *bona fide* trade unions" the Committee recommends the post-war continuation of "compulsory bargaining provisions similar to those now contained in the Dominion Labour Code."

Creation of a Provincial Department of Labour is another recommendation of the Committee.¹ Minimum wages, workmen's compensation, and employer-employee relations would come under the scope of such a department.

The Reconstruction Committee was under the chairmanship of Dr. Norman A. M. MacKenzie. Its Report is dated June 23, 1944.

Labour and Industry in New Brunswick

DURING 1944, the province of New Brunswick set up a separate Department of Labour to take over the activities of the Labour Division of the Department of Health and Labour, which was abolished. The first Annual Report of the Department for the fiscal year ending October 31, 1944, was issued at the end of February.

The report sets forth the legislative jurisdictions of the new Department and then deals with the year's activities under the following specific headings: new labour legislation; labour relations; minimum wages and industrial standards; factory inspection, steam plant operation and boiler inspection; apprenticeship training and Dominion-Provincial labour matters. Special attention is drawn to the fact that another year had been added to the record of the years when no serious industrial disputes occurred to interrupt industrial production.

It is stated that the legislative jurisdiction of the Department is determined by the following Acts, the administration of which is either wholly or in part the responsibility of Labour Department officials: (1) The Forest Operations Commission Act; (2) The Labour and Industrial Relations Act; (3) The Industrial Standards Act; (4) The Factories Act; (5) The Steam Boiler and Pressure Vessel Act; (6) The Wartime Labour Relations Regulations (P.C. 1003); (7) The Apprenticeship Act.

On March 14, 1944, the Wartime Labour Relations Act was introduced in the provincial

legislature, to make valid Dominion Order in Council P.C. 1003, throughout the province. The New Brunswick Labour Relations Board was appointed early in May, 1944. During the succeeding six months twelve cases were dealt with in which unions and their duly-elected representatives were certified by the Board, and seven cases where applications for certification were dismissed or withdrawn.

During the year 690 factories were inspected and 202 reinspected. Recommendations designed to improve conditions were made where necessary and in most cases these were carried out. Close attention was given to co-operation with the New Brunswick Accident Prevention Association in the removal of accident hazards in industry and in a number of large plants where safety committees were not already organized, these were set up at the instance of the inspectors.

To conform with P.C. 8993 passed by the Dominion Government in January, 1944, an Apprenticeship Act was passed by the Legislature and became effective July 15, 1944. By the end of the fiscal year, the establishment of an "apprenticeship training program was well under way". It was anticipated that the purposes of the Act would play an important part in the rehabilitation of ex-members of the armed forces as well as in assisting workmen to improve their skills and in giving young people proper and adequate trade training.

¹ Since adopted. (See L.G., Dec., 1944, p. 1551, and see below.)

Labour and Industry in Manitoba

THE Annual Report of the Manitoba Department of Labour for the fiscal year ending April 30, 1944, reviews the administration of the several Acts coming within the purview of that Department.

Inspections.—During the fiscal year, 1943-1944, a total of 25,252 inspections were made and 8,136 orders were issued under the Acts administered by the Department. Of these orders, 7,942 were made under the Minimum Wage Act; 3,894 under the Elevator and Hoist Act; 2,618 under the Manitoba Factories Act; and 1,305 under parts I and II of the Fair Wage Act of 1916.

Accidents and Accident Prevention.—The total number of fatal accidents reported during the fiscal year was 368, classified as follows: traffic 44; industrial 33; home 116; general fatalities 175. Of the home accidents, 59 resulted from falls, 25 from asphyxiation and 12 from burns. Under the heading of general fatalities, 53 were due to aeroplane accidents and 43 to drowning.

The report points out that "the greatest single forward stride ever made in industrial welfare organization (in Manitoba) was the introduction and the efficient administration of plant safety committees." These committees have been set up in every major industry and also in many of the smaller establishments. Scores of safety talks, motion picture displays and safety classes were carried out by members of the staff of the Department of Labour. In addition, an "Evening Institute" in safety training was conducted at the University of Manitoba. Over fifty firms sent representatives to receive instruction at the Institute. There was a total of 177 registrations, with an 85 per cent attendance. Every co-operation was given by the Department to the Workmen's Compensation Board, the Industrial Hygiene Branch of the Department of Health and Public Welfare, the various city and municipal authorities and to the various organizations of employers and employees.

Building Trades.—During the fiscal year, approximately 800 residences were erected in

Winnipeg and considerable alteration and repair work was also carried out. A total of 457 inspections were made and 45 orders issued under the Building Trades Protection Act.

Fair Wages.—During the fiscal year, the Fair Wages Board held eight meetings and one Public Hearing in connection with revisions of the Fair Wage Schedule. Owing to the demand for skilled workers, violations were not so numerous as in previous years. In connection with wage claim adjustments, the amount of \$12,973.37 was collected and paid out to claimants. In all, 1,204 inspections were made and 204 orders issued.

The Minimum Wage Board held nine meetings, all in the early spring of 1944, and dealing with the seed-packing industry. There were no material changes in the minimum wage regulations during the fiscal year, but revisions were under consideration for the near future. Co-operation from both employers and employees in keeping the Department informed, kept the amount of necessary overtime industrial work throughout the province at a minimum. However, 299 permits to work overtime and 12 permits for legal holidays were issued. There were 3,126 inspections made under the Minimum Wage Act in Winnipeg and environs, resulting in the issuance of 278 orders relating to wages and 548 dealing with hours of work.

Fire Losses.—The number of building fires reported in Manitoba during the fiscal year was 1,673, an increase of 231 over the previous fiscal year. The insured property loss was \$1,228,641.17, which was more than double the losses sustained from this cause in 1942-1943. The per capita loss was increased from 89 cents to \$1.86, the highest per capita loss in Manitoba for any year since 1932.

During the fiscal year ending April 30, 1944, there were 176 official fire investigations throughout the province, of which 51 were conducted by the R.C.M.P. Twenty-six persons lost their lives by fire, nine of whom were men, five were women and twelve were children.

Notes of Current Interest

Employment service for executive and professional personnel

Executive and Professional Employment Offices are being opened, as part of the Dominion Employment Service, in the cities of Moncton, Montreal, Toronto, Winnipeg and Vancouver. These offices will deal with male and female applicants coming within the following categories:—

- (a) Males not covered by Unemployment Insurance by reason of their remuneration being in excess of the ceiling.
- (b) Females whose normal earnings are \$1,800 per annum and over.
- (c) Discharged members of the Armed Forces whose income before or during hostilities came within the categories of subparagraphs (a) and (b) above.
- (d) All persons with professional degrees from recognized institutions of learning, and all other graduates of recognized institutions of learning who have received a salary equivalent to the rate of \$1,800 per annum.
- (e) Persons having technical or professional training who have formerly earned \$1,800 or more per annum.

The Executive and Professional Employment Offices will also deal with employers interested in securing the services of such persons. They will not, however, deal with persons who are subject to the authority of the Wartime Bureau of Technical Personnel, except upon request of the Bureau. Normally technical persons will be referred to the Bureau.

Each office will, for the present, serve the entire Region within which it is located. Local employment and selective service offices in the immediate vicinity will refer applicants in the

classes covered and employers' orders and inquiries in regard to such applicants to the new office. Other local offices within the Region will continue to handle employers' orders and applicants in the usual manner but will advise interested parties of the existence of the new offices so that their facilities may be used if desired.

In commenting upon the new arrangement, the Minister of Labour, Hon. Humphrey Mitchell, said: "This is not to be a new Employment Service, but a division of the existing National Employment Service. Public placement work must be on a specialized basis, to a very large extent, in order to meet the needs of both employers and work seekers. As time goes on, we are carrying this principle of specialization into our Employment Service more and more. For example, in the larger offices we have already set up special registration units to deal with discharged members of the Armed Services. Also, in the larger offices we have specialized divisions to deal with the employment needs of women applicants."

The Minister also pointed out that efficient placement of technical and executive personnel is highly essential in modern industry. "Upon efficient management depend many other jobs, much other employment for our population. It is the hope of the Government that the Employment Service will be an appreciable factor in promptly and efficiently meeting the requirements of industry for executive and professional workers," the Minister explained, and added that the Unemployment Insurance Commission had followed the pattern of the British system, resulting from Lord Hankey's report, in the latest development of its Employment Service.

**Employment
and industrial
statistics**

The table below shows the latest statistics available reflecting industrial conditions in Canada.

There was continued important curtailment of employment in industrial activity at the beginning of February, in

conformity with the seasonal experience in six of the last seven years, according to figures published by the Dominion Bureau of Statistics. Previously, employment had usually shown partial recovery at February 1 from the year-end lay-offs. The general index was 178.9 at February 1, and 180.4 at Janu-

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended March 29, 1945.

(1) Base 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figures for four weeks ended March 24, 1945, and corresponding previous periods. (8) Maclean's Building Review.

ary 1, compared with 183.2 at February 1, 1944. Similarly, the seasonally-adjusted index fell from 187.4 at January 1 to 185.9 at the date under review.

The 15,074 firms reporting to the Bureau showed a total working force of 1,820,842 at the date under review which was 0.8 per cent lower than at the month preceding. The total weekly wages and salaries paid to these employees increased by 6.0 per cent to \$58,545,624 at February 1. The per capita earnings increased, due to the resumption of regular work schedules following the year-end holidays, from \$30.10 at January 1 to \$32.15 at February 1. At February 1, 1944, the average was \$31.76 and at that date in the previous year, \$29.96.

Improvement was indicated in manufacturing at the beginning of February; although the trend was favourable for durable goods, mainly in iron and steel plants, the increase was greater in the manufacture of non-durable goods, the largest being in textile mills. Among the non-manufacturing divisions, logging showed little change; considerably greater activity was reported in mining; curtailment, largely seasonal in character, was indicated in communications, transportation, construction and maintenance, services and trade.

Further decline was shown in the index of the physical volume of business to 216.7 in February from 228.8 in the first month of the year. The index was at 241.6 in February, 1944. Four of the five components recorded a decline in this comparison: mineral production, from 174.0 to 147.9; manufacturing from 270.0 to 274.3; electric power, from 151.6 to 150.1; the distribution of goods, from 193.7 to 167.7. The index of construction increased from 97.7 to 110.9.

Jobs for university undergraduates in science courses

About 4,000 temporary summer jobs will be available this year for university undergraduate students in science and engineering courses, it was announced recently by Arthur MacNamara, Director of National Selective Service.

Through the Wartime Bureau of Technical Personnel and Employment and Selective Service Offices, these positions will be available to students who are anxious to gain experience and aid in the war effort during the vacation period. The jobs have been located through a questionnaire sent to employers across Canada.

About 3,000 jobs have already been reported, and another 1,000 are expected by the end of the spring university term. Jobs will be listed at each university, where a faculty member will be designated to act as liaison officer with Selective Service. Local

Employment Offices will accept applications and arrange for work permits.

Labour Department Officials point out that engineering and science students can play an important part in helping solve the manpower shortage which is current in war plants and essential civilian industries throughout the country, and at the same time secure practical experience towards their profession.

Prisoners of war for Ontario Farms

Arrangements between the Dominion Labour Department, the Department of National Defence (Army), and the Province of Ontario

have been made to provide the services of a limited number of prisoners of war for farm work in southwestern Ontario, according to an announcement made recently by Hon. Humphrey Mitchell, Minister of Labour.

It is expected that the first of the camps will open about May 1, and the prisoners will be available for farm work in the several areas, throughout the early summer and harvest.

The summer internment camp to house 350 prisoners of war, will be reopened at Chatham, Ont., at May 1. This was also operated last year under similar arrangements.

At Glencoe, in Middlesex, and Centralia, in Huron, hostels to accommodate 100 men each, and at Langton and Windham Centre, in Norfolk County, hostels to accommodate 150 men each, have been approved. Consideration is also being given to hostels at Courtland, in Norfolk County, and at Dresden, in Kent County, as prospective sites.

The Department of National Defence will operate the different camps, and provide the necessary services, including the guard over the prisoners. The prisoners are paid 50 cents a day, under the terms of the Geneva Convention relating to the treatment of prisoners of war. The Dominion-Provincial Farm Labour Committee will determine the wage rate to be paid to the Government by farmers securing the services of the prisoners.

Fractional increase in cost of living

The Dominion Bureau of Statistics cost-of-living index advanced from 118.6 on February 1 to 118.7 on March 1, 1945. Increases in

the food group were mainly responsible for this change, although homefurnishings and services also gained fractionally. The fuel and lighting index recorded a minor decrease. The food index advanced from 130.6 to 131.0 as fresh vegetables and some meats moved higher. Food declines were few in number and small in amount; they included eggs, lemons, and

oranges. Increases in the hardware section produced a rise in homefurnishings and services from 118.4 to 118.5, while further reductions in electricity rates more than offset increases for coal and coke to reduce the fuel and lighting index from 107.4 to 107.3. Rentals continued at 112.0, clothing at 121.7, and miscellaneous items at 109.2.

Progress of production committees

More than 280,000 employees in Canadian industry are now members of labour-management production committees. The

number of committees on March 31, as reported by the Industrial Production Co-operation Board, was 315.

Conference of chief executive officers of the War Labour Boards

A 4-day conference of the chief executive officers of the Regional War Labour Boards, during which the various phases of administration and procedure under the Wage Control Order

were thoroughly discussed with officers of the National War Labour Board, was held recently at Ottawa.

The more prominent features of the discussion had to do with the application of wage control in industries where the wage system is complicated by a large number of job classifications and by ranges of wage rates rather than single rates for particular jobs; the effect of incentive wage rates and production bonuses on control; the relationship of welfare plans and vacations with pay on wages; and the review of decisions of the Regional War Labour Boards by the National Board, together with the procedure for appeal to the National Board.

Increase in benefits to ex-service personnel

During the month of February, 4,822 ex-service men and women of this war received benefits under the Post-Discharge Re-establishment Order, in a

total amount of \$270,500. These figures are the highest yet reported, being 942 in excess of the number receiving grants in January and \$67,780 more than the amount paid out during the first month of 1945.

The amount paid out to men taking vocational training was \$132,535, while \$56,066 went to veterans continuing their education. A further \$21,792 was paid to ex-service personnel awaiting returns from private enterprises.

Both vocational training and continuation of education showed an upward swing during February with 779 receiving grants while continuing education, an increase of 242 over the figures for January. The figure for voca-

tional training increased 635 with a total of 2,527 taking such training at the end of February. Other grants in effect at that time were 969 to those seeking suitable employment and 77 to those suffering from temporary illnesses.

During the month a total of 11,689 jobs was found for veterans of this war and 2,998 for men of the first Great War by National Selective Service co-operating with the Department of Veterans Affairs. By the end of February a total of 327,918 jobs had been found for veterans of both wars, 216,888 of these being for veterans of the present conflict.

Veterans' Insurance Act proclaimed

The Veterans' Insurance Act (L.G., Sept., 1944, p. 1173)

has now been proclaimed, and the Minister of Veterans Affairs, Hon. Ian Mackenzie,

has announced that his Department is completely organized and ready to take care of applications for insurance under the Act.

"Some delay in the proclamation of the Act was necessary in order to build an organization to handle the anticipated applications", the Minister said. "First, we had to secure trained staff and, next, the application forms and policies had to be drawn up. All these things have been done now."

The Minister explained that the purpose of the Act is not to provide cheap insurance, even though the rates are comparable to the lowest cost life insurance in Canada.

"Our principal objective in drafting this Act was to enable the veteran whose health is impaired to provide for his family the same insurance protection which a man who is physically fit can provide", he said. "We have done this by making it possible for a man to get War Veterans' Insurance without any medical examination, except in a very few cases. Many veterans who, normally, would not be acceptable to commercial insurance companies will be considered as excellent risks under the Veterans' Insurance Act."

Applications for the insurance, it was explained by Mr. Mackenzie, should be made directly to the Superintendent of Veterans' Insurance, at the Department of Veterans Affairs in Ottawa.

Any ex-service man or woman who has served in any branch of the Canadian forces in this war is eligible. In addition widows or widowers of veterans of this war may apply for insurance for themselves, if the veterans were not insured under the Act. Merchant Navy personnel in receipt of a war disability pension from the present war, may also obtain this insurance.

Several forms of non-participating, ordinary and limited payment life policies have been made available without medical examination or employment restrictions. Premiums may be paid monthly, quarterly, half-yearly, or annually, at the option of the purchaser, who will also be allowed the privilege of accepting the cash surrender value, or of converting to extended term insurance after premiums have been paid for two full years. In the event that the policyholder becomes totally disabled before he reaches the age of 60 years and he is not in receipt of full pension for the disability, no further premiums will be required.

Collective bargaining by foremen in U.S.A.

The U.S. National Labour Relations Board has decided that foremen's unions are appropriate for collective bargaining purposes and that management must recognize and bargain with them. The Board directed an election at the Packard Motor Car Company at Detroit to determine if 1,100 supervisory employees want to be represented by the Foremen's Association of America, an independent union.

The Foremen's Association claims to represent 32,000 foremen in the United States, most of them in the Detroit area. Strikes by foremen, such as occurred in Detroit last year, can be avoided, the majority opinion of the Board stated, if supervisory employees, like rank and file workers, can secure recognition "by resorting to the peaceful and orderly procedures of the Board."

The decision stated that the foreman to-day is in much the same working situation as other employees. "Whereas he was formerly an executive with considerable freedom of action, he is now an executor carrying out orders, plans and policies determined above. He is more managed than managing," the majority opinion declared.

A minority opinion by the Board asserted that any benefits resulting from recognition of foremen will be "outweighed by the dangers inherent in the co-mingling of management and employee functions and in the possible restrictive effect upon the freedom of rank and file employees."

Study of guaranteed annual wage in United States

As a result of a recommendation made by the National War Labour Board last November, (L.G., Dec., 1944, p. 1467) President Roosevelt has ordered the Advisory Board of the Office of War Mobilization and Reconversion to study the question of a guaranteed annual wage for American workers.

In accordance with the President's Order, a Sub-committee has been appointed by the chairman of the Advisory Board to bring together the studies already made of the guaranteed annual wage, and has commenced its hearings. The members of the sub-committee are Eric Johnston, President of the Chamber of Commerce of the United States; Philip Murray, President of the CIO; Albert Goss, master of the National Grange; and Mrs. Anna Rosenberg, Regional Director of the War Manpower Commission for New York.

A survey of the subject recently completed by the Bureau of Labour Statistics at Washington, indicated that "out of a total of 8,000,000 workers covered by collective bargaining contracts studied, only about 42,500 employees are covered by some fifty or sixty guaranteed annual wage plans." The major portion of this group is said to be in consumers' goods, service and distributive industries, where the agreements are with firms employing relatively small numbers of workers.

In recommending that the study be made, the Chairman of the War Labour Board said that a guaranteed annual wage is "one of the main aspirations of American workers," and that the "search for it is a part of the search for continuity of employment, which is perhaps the most vital economic and social objective of our times."

Labour and management sign charter of post-war principles

A "New Charter for Labour and Management" was signed recently by spokesmen for business and organized labour in the United States. The signers were Eric Johnston, president of the Chamber of Commerce of the United States; William Green, president of the American Federation of Labour; and Philip Murray, president of the Congress of Industrial Organizations.

Stating that the primary duty of both labour and management is to win complete victory in the war, the Charter expresses the belief that the end of the war will bring "the unfolding of a new era based upon a vastly expanding economy and unlimited opportunities for every American."

It enumerates the following guides and objectives for management and labour: Encouragement of productive efficiency and technological advancement, with a view to steadily improving standards of living; respect for the rights of private property and free choice of action; recognition of management's right to manage, free of unnecessary governmental interference or burdensome

restrictions; recognition of the right to organize and bargain collectively without hindrances; co-operation in building an economic system which will protect the individual against involuntary unemployment and the hazards of old age and physical impairments; increased foreign trade and reasonable assistance to other countries; establishment of an international security organization capable of preventing aggression and assuring lasting peace.

The charter also calls for the establishment of a national committee composed of representatives of business and labour organizations, which will seek to promote an understanding and sympathetic acceptance of this code of principles and will propose such national policies as will advance the best interests of our nation.

Decline in charges of unfair labour practices in U.S.A.

Trends in collective bargaining in the United States during the ninth year of operation of the National Labour Relations Board are dealt with in the Report of the Board for the fiscal year ending June 30, 1944.

The Board occupies a parallel position in the United States to that of the Wartime Labour Relations Board in Canada. Its two primary functions are to eliminate unfair labour practices and to determine questions of union representation.

When the Board was set up, in 1936, the great majority of cases had to do with charges of unfair labour practices. The ratio has now, however, been completely reversed. Fewer charges of unfair labour practices were filed during 1943-4 than in any of the seven preceding years, while union representation cases were the highest on record, accounting for 72 per cent of the cases filed. This trend, the Report states, is an indication of the current acceptance of the Act by employers.

During the year a total of 4,712 elections or pay-roll checks were conducted. Of these 1,500 were won by the AFL, 1,890 by the CIO, and 593 by unaffiliated unions; in the other elections no union was successful. The great majority of elections, 3,645, involved only one union. Affiliates of the AFL and CIO opposed one another in only 575 elections, of which the CIO won 286 and the AFL 244, while 36 resulted in a no-union vote.

The Board regretted a recent tendency to make collective bargaining elections the occasion for the exertion of pressure on employees, by both management and labour

organizations, by means of "propaganda campaigns, subtle threats and other devices," and re-asserted its intention of insuring that NLRB elections result in the "uncoerced and free choice of the employees."

A total of 2,687 unfair labour practice cases were closed during the year, 85 per cent of which were handled informally without resort to formal hearings and written findings.

A total of 2,972 workers were reinstated to remedy discriminatory discharges, while 350 in addition were reinstated after strikes caused by unfair labour practices. Back pay amounting to \$1,916,173 was paid to a total of 3,734 workers who had been the victims of discriminatory practices. Company-dominated unions were disestablished in 101 cases. Collective bargaining negotiations were ordered in 136 cases. The posting of notices was required in 736 cases.

Recommendations on wage policy in U.S.A.

In a recent report to President Roosevelt on wages and the cost of living, public members of the U.S.

National War Labour Board asserted that wages had increased more than prices during wartime, and recommended that no change be made for the present in the "Little Steel" formula which limits wage increases in the United States to 15 per cent above the level of January 1, 1941.

Although indicating that a different policy would be desirable in peacetime, the report declared: "The time has not yet come, in our judgment, when general wage increases can be freely resumed without danger of an inflation which would be disastrous to the war effort and to the economic security of all segments of our population."

Stating that "the best measuring rod to gauge what has happened in the wartime economy to hourly-wage standards is average straight-time hourly earnings, statistically adjusted to discount the movement of workers into the higher-paid war industries," the public members found that on this basis earnings for all manufacturing employees increased 36.7 per cent from January, 1941 to October, 1944. During the same period the cost of living had risen 29.4 per cent. "Real hourly wages" were thus slightly higher than in January, 1941.

The report also noted that gross weekly earnings, including overtime pay and other premiums, had increased by 76.3 per cent.

The report pointed out, however, that exceptions to the average existed. It particularly emphasized that "the situation of the lower-

income wage and salary workers, upon whom the increase in the cost of living has fallen with disproportionate severity, has remained unsatisfactory under the wartime economy." The status of millions of unorganized workers, the report continued, could be improved by legislative action, by increasing the minimum wage requirements of the Fair Labour Standards Act, and by action on the part of local governments.

Looking to the future, the report pointed out that when production could be transferred from the "wastage of total war" to peacetime goods, an increase in purchasing power would be necessary to insure civilian consumption high enough to absorb the "enormous capacity for production" demonstrated in war.

Industry members of the Board agreed with the public members' statement that the Little Steel formula should not be broken, but the AFL and CIO issued separate statements in disagreement.

**United Mine
Workers
present
demands to
U.S. operators**

Reports in the New York newspapers early in March revealed a nation-wide interest in the wage demands of the United Mine Workers in the bituminous field in the United States.

It was stated that in presenting the claims of the miners, John L. Lewis, President of the Union "avoided asking for a general wage increase that would violate the Little Steel formula." Instead he focussed attention on "fringe" increases, all of which, he stated were "in conformity with the government's (United States) anti-inflation policy."

The chief demand of the miners was reported to be for a royalty of ten cents a ton on all coal mined, to be used in setting up a union welfare fund "to provide for its members modern medical and surgical service, hospitalization insurance, rehabilitation and economic protection." President Lewis was reported to have proposed that the royalty "be deemed partial compensation in equity to the mine worker for the establishment and maintenance of his ready-to-serve status, so vital to the profit motive of the employer and so imperatively essential to public welfare."

Another major demand was for "a return to the seven-hour day, thirty-five hour week, including underground travel time and the present fifteen-minute daily lunch period, with time and one-half and rate and one-half for all overtime in excess of the regular hours."

Other financial demands of the union were stated to include: (1) differentials for second

and third shifts, (2) increases in vacation pay; (3) provision by the employer without charge of tools, goggles, caps, special shoes, rubber boots, explosives, etc. In addition, the union desired to have a clause inserted in the agreement providing for the cancellation of the contract by either party on twenty days' notice and improvement of sub-standard housing and sanitary conditions by joint action.

**Law against
discriminatory
employment
practices**

A law against discriminatory employment practices has recently been enacted in the State of New York.

Under the statute it will be an unlawful practice for an employer to refuse to hire, to discharge, or to discriminate against a person in pay, conditions or privileges of employment, because of his race, creed, colour or national origin. A labour organization is forbidden from using any of these discriminatory bases to exclude or expel a person from membership. An employer or an employment agency is prohibited from printing or circulating in any form statements that indicate discriminatory employment practices.

The law is to be administered by a commission against discrimination to consist of five members appointed by the Governor of the State. The commission is to investigate complaints of discrimination, hold hearings on complaints, create advisory agencies and conciliation councils as deemed necessary to effectuate its purpose and to foster co-operation among the various groups of the population, and issue publications and results of investigations to promote good will and help reduce discrimination.

Where complaints are found on investigation to be justified, a commissioner will try to eliminate the grievance by conference, conciliation and persuasion. If this procedure fails, a panel of three commissioners will try the case. Where the complaints are upheld, a cease and desist order shall follow, and employers may be required to hire, reinstate or upgrade the employees involved. In non-compliance cases, the commission or complainant may apply for a court ruling requiring obedience or punishment for contempt of court. It is also provided that a person or group which wilfully "resists, prevents, impedes or interferes with the commission . . . or wilfully violates its orders" may be punished by a year's imprisonment, a fine of \$500 or both.

Manpower

Statement of Minister of Labour on Farm Labour Program

REPLYING to questions in the House of Commons on the matter of farm labour, the Hon. Humphrey Mitchell on March 29 made the following statement:

"Instructions were sent to all selective service offices across Canada that farm workers on temporary permits in other essential industries during the winter months must return to agriculture on April 1 or at subsequent dates mutually agreed upon by the provinces and ourselves. We shall appeal to men in other industries to reciprocate by assisting whenever possible during peak seasons on the farm. Local selective service officers have been given authority to direct any male worker from sixteen to sixty-five years of age into specified agricultural employment. Steps will be taken to move farm workers from less to more productive farms. Officials of the Department of Labour have already discussed a draft farm labour agreement with five of the provincial departments of agriculture, and the remaining discussions will be held very shortly.

"We expect that the total commitments through these agreements for sharing expenditures on recruiting, transporting and placing farm labour within the provinces will exceed the total of last year, namely \$660,000. We plan again this year to arrange for the movement of workers between provinces to help meet urgent harvesting needs. The cost of this is borne by the Dominion Government. In addition we expect there will be a greater movement of farm workers within the provinces. One substantial incentive toward this end is a reduction in transportation charges, recently agreed to by the railways. This cost is shared by the Dominion and the provinces.

"Negotiations have already begun with farm labour officials in the United States for the movement of labour and harvesting outfits

across our common border. We are also considering in cooperation with the provinces the recruiting of farm workers in Newfoundland to help in the wartime provinces.

"We are now devising methods for a more complete check of men on farm postponements. This is being done to ensure that these men are making the type of contribution to farm production that we have a right to expect of them.

"We plan to expand the use of prisoners of war labour in agriculture. Several new projects are now under consideration. No stone will be left unturned in utilizing all other special sources of labour such as Indians, conscientious objectors and Canadian Japanese.

"Members have knowledge of the reinforcements required for overseas. In view of this we cannot depend on as much assistance during the coming summer from the three services as we have secured during the past two seasons. I have, however, discussed this matter with each of the ministers of national defence. In the case of the air force the provisions for spring leave have again been put into effect. In view of increased commitments we shall not be able to count on any substantial assistance from the navy. From the army we have the assurance that the representatives of the district officers commanding appearing before the mobilization boards will be instructed not to oppose the postponements of men who are employed in the production of dairy and live stock products. Farm leaves, including special spring and harvest leaves, will continue to be granted. They will naturally be limited by the fact that many men formerly available have been sent overseas. However, men who have returned from overseas on rotation leaves will be eligible this year to help on the farm."

Manpower Control Regulations Amended

Lay-off Procedure—Appeals to Courts of Referees—Compulsory Direction to Agriculture

A SERIES of amendments to National Selective Service Civilian Regulations was announced by the Minister of Labour, Hon. Humphrey Mitchell, on March 18 and became effective on March 20.

The amendments, (made by Order in Council P.C. 1415, March 6, 1945) have to do with lay-off procedure, direction to essential employment, payment of workers' transportation expenses, appeals to Courts of Referees, and other aspects of the manpower control system.

Temporary Lay-offs

Last November an attempt was made to deal with situations in which a brief temporary lay-off is necessary by relaxing the seven-days' notice principle. An employer was permitted to lay off a worker for one or more periods, not exceeding in the aggregate 14 days within a six-month period, without giving notice of separation (P.C. 8726, L.G., Dec., 1944, p. 1456).

This rule was later found to cause administrative difficulties, and it has now been revoked. In future, instead of an employer being allowed to dispense with notice in laying off employees to a maximum of 14 days during 6 months, the employer will be required to apply to a Selective Service Officer on each occasion for a reduction of the 7-day rule. Before giving his ruling, the Selective Service Officer will be required to consult with the union, if there is a collective labour agreement in force covering the employment. This shortening of the 7 days' notice will cover only temporary lay-offs, and not the final termination of employment.

The object of this amendment is to make sure that employees get seven days' notice or six days wages when their employment is being terminated, at the same time recognizing that short lay-offs are in some cases unavoidable.

In cases of a power shortage, causing a break in operations, an employer is now permitted to give notice immediately to his workers, without authorization from a Selective Service Officer. Employers already had this right in cases of weather conditions, fire, explosion or other calamity causing a work stoppage; and the rule has also applied in building construction work generally, to workers who have been employed less than a month, and to employees refusing to accept a transfer under established practice.

Job "Freeze"

Last November's Order (P.C. 8726) also established a procedure in the case of plants finishing their war contracts, whereby lay-off procedure might be hastened, and employees enabled to find new jobs without loss of time. Selective Service Officers were given authority to remove the priority classification of such plants having an "A" or "B" priority, in order that workers might cease to be "frozen" to their jobs. The principle of this procedure will continue in effect, but the practice will be altered to the extent that a Selective Service Officer now has authority only to remove the "freeze" on an establishment, but not to change the priority rating.

In cases of extensive lay-offs of this nature caused by termination of war contracts, Selec-

tive Service Officers will be on hand at the plant itself wherever this is possible to help place employees in other jobs. Where plant accommodation is not possible, a special office will if necessary be opened in the vicinity of the establishment.

Suspension for Misconduct

An employer is and has been permitted to discharge a worker immediately in cases of serious misconduct, with the employee having the right of appeal to a Selective Service Officer, except when the employee was a member of a union having a collective agreement with the employer providing for the review of a suspension. This section did not provide as to the status of a worker not a member of a union, but nevertheless entitled under the agreement to the same review privilege as union members. The new amendment to the Regulations provides that such a worker will have his case reviewed under the terms of the agreement instead of appealing to a Selective Service Officer.

Any person who is in employment contrary to the provisions of Selective Service, will now be regarded as "unemployed" for the purpose of the Regulations, and subject to direction to essential work.

The penalty for non-compliance with a direction issued by a Selective Service Officer to a man to accept work, has previously been that the man might be directed to an Alternative Service Work Camp. It is felt that this penalty, in most cases, is not appropriate and is so severe that it has actually deterred enforcement action rather than helped it. Accordingly, lesser penalties of fine or imprisonment are added as options to cover a case of refusal to accept a work direction issued by a Selective Service Officer.

Compulsory Direction to Agriculture

Selective Service Officers are now given authority to direct any male person, 16 to 65 years of age, whether employed or unemployed, to a job in agriculture. In view of farm labour shortages it is hoped that this arrangement will help in meeting the problem.

Officers had already had authority to direct males between 16 and 65 to jobs in fuel wood cutting, coal mining, fishing, and fish processing.

Transportation Allowances

In connection with labour transfers, the Minister of Labour is given authority to authorize the payment of workers' transportation and the removal expenses of workers' families, in such areas and during such periods as he may approve. The intention of this amendment is to provide the means to take a war worker from the place where he was

employed either to his former place of residence or to some other place where there is a possibility of his obtaining employment. It will only apply when the Minister specifies the areas and periods of time.

Appeals

Some important changes are made in the appeal procedure under the Regulations. At present appeals are made to the Courts of Referees, set up under the Unemployment Insurance Act. These Courts will continue to deal with appeals, but doubts have now been removed as to whether the Courts may hear certain types of cases. Broadly speaking any person feeling aggrieved may now lodge an appeal with his Court of Referees, and while formerly no second appeal was provided for, the arrangement now will be that a re-hearing of a case may be allowed, where, for example, additional facts are disclosed shortly after the Court reaches its first decision.

A few employers have failed to pay the sums they contracted to pay in regard to the employment of conscientious objectors. A new amendment provides for summary means of requiring payment through court action.

Commenting upon the new regulations the Minister of Labour, Hon. Humphrey Mitchell, said: "While there have been some amendments made to the Civilian Regulations since the last consolidation in January, 1943, certain operating difficulties have arisen which needed to be attended to. Moreover, employment conditions have changed and are changing, and situations will develop when the war in Europe terminates, which must be accommodated under Selective Service. It is felt that the present changes bring the Regulations up to date, and provide a more effective instrument for meeting conditions immediately following the termination of European hostilities."

Text of P.C. 1415

Whereas the Minister of Labour reports that it is necessary for the security, defence, peace, order and welfare of Canada and for the efficient prosecution of the war to amend the National Selective Service Civilian Regulations as hereinafter set out;

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under and by virtue of the War Measures Act and The National Resources Mobilization Act, 1940, is pleased to amend the National Selective Service Civilian Regulations, and they are hereby amended, effective the 20th day of March, 1945, as follows:—

1. Subsection one of section two hundred and two of the said Regulations is amended by deleting the word "or" after paragraph (a) thereof and inserting the word "or" and the following paragraph after paragraph (b) thereof:

"(c) in the case of a lay-off for a limited period, give the employee in such manner as the Selective Service Officer may approve such notice not exceeding seven days as the Selective Service Officer may fix in accordance with principles and direction set out in instructions given by the Director."

2. Subsection two of section two hundred and two of the said Regulations is amended by deleting the word "or" at the end of paragraph (c) thereof and inserting the following paragraph after the said paragraph (c):

"(cc) by reason of power shortage, his services cannot be utilized; or"

3. Subsections three, four and five of section two hundred and two of the said regulations are revoked and the following substituted therefor:

"(3) Where the employee is affected by a collective agreement, no period for a notice under paragraph (c) of subsection one of this section shall be fixed until the Selective Service Officer has consulted with the bargaining representatives of the employees who are parties to the agreement.

(4) If the employer does not take an employee back into employment after the expiration of the limited period for which he has been laid off by notice given under paragraph (c) of subsection one of this section and does not lay him off for another limited period by such a notice, he shall, upon the expiration of the limited period for which the employee was laid off, give the employee a notice of separation in prescribed form, in duplicate, and pay him in lieu of notice six days' wages or salary at the normal full-time rate at which he was being paid when he was last working in the employment."

4. Subsections five, six and seven of section two hundred and two A of the said regulations are revoked and the following substituted therefor:

"(5) Upon application by an employer whose establishment has been classified as a 'designated establishment' pursuant to these regulations, or upon his own motion, a Selective Service Officer may, in accordance with principles and directions set out in instructions given by the Director, by an order in writing, except the employer's establishment from the operation of this section.

(6) A Selective Service Officer may, at any time, revoke an order made under subsection five of this section whether or not the employer applies to have the order revoked.

(7) Where an establishment has been excepted from the operation of this section by an order under subsection five of this section and the order has not been revoked, the employer, or any of his employees, may, notwithstanding this section, give notice of separation under section two hundred and two without the permission of a Selective Service Officer.

(8) When an order has been made under subsection five of this section, the employer shall forthwith post three copies thereof in conspicuous places in the establishment where the employees affected are employed and where such an order has been revoked, he shall forthwith post three copies of a notice that the establishment has become a 'designated establishment' in conspicuous places in the establishment where the employees affected are employed.

(9) Notwithstanding any other provision in these regulations, no appeal may be brought from an order or decision made under subsection five or six of this section."

5. Subsections two and three of section two hundred and three of the said regulations are revoked and the following substituted therefor:

"(2) Where an employee is not entitled to have his suspension from duty reviewed under a collective labour agreement, he may, within seven days of being suspended for serious misconduct, exclusive of the day on which he was suspended, apply in writing to the Selective Service Officer to review the suspension and, if he does not make such an application, his employment shall be deemed to have terminated when he was suspended."

6. Subsection two of section two hundred and nine of the said regulations is revoked and the following substituted therefor:

"(2) An employee shall, for the purposes of this section, be deemed to be unemployed

- (a) on the termination of the period of seven days from the day his employer gives him a notice of separation or he gives his employer a notice of separation; or
- (b) on any day during which he is in employment contrary to these regulations."

7. Subsection five of section two hundred and ten of the said regulations is revoked.

8. Subsection one of section two hundred and ten B of the said regulations is revoked and the following substituted therefor:

"(1) A Selective Service Officer may, in accordance with principles and directions set out in instructions given by the Director, by order in writing, direct any male person who has attained his sixteenth birthday but has not attained his sixty-fifth birthday to accept and enter specified employment in

- (a) the cutting of fuel wood,
- (b) coal mining,
- (c) fishing,
- (d) fish processing, or
- (e) agriculture,

at the expiration of seven days from the day the order is made if the person is employed when the order is made or immediately if the person is not then employed."

9. Subsection three of section two hundred and ten D of the said regulations is revoked.

10. The said regulations are further amended by inserting the following section after section two hundred and twelve thereof:

212A. (1) Subject to subsection three of this section, where a Selective Service Officer deems it necessary or expedient for the assistance of a person whose employment has been terminated and who is unemployed, he may, in accordance with the principles and directions set out in instructions given by the Director, pay him either or both of the following, providing he is unable to pay them himself:

- (a) an amount not exceeding his necessary travelling expenses from the place where he was when his employment was terminated to a place where there is a reasonable prospect of securing employment or to his former place of residence; and

(b) an amount not exceeding the aggregate of the travelling expenses necessary for his dependents to travel to the new place of employment or the former place of residence as the case may be, and other expenses that, in the opinion of the Selective Service Officer, necessarily arise out of his change of residence.

(2) Payments under this section may be made to a transportation company in payment of transportation for the person who is unemployed or that person and his dependents, as the case may be.

(3) No payment may be made under this section except in such areas and during such periods as may be specified from time to time by orders made by the Minister".

11. Section two hundred and fourteen of the said regulations is revoked and the following substituted therefor:

"214. (1) Where a Selective Service Officer refuses to grant a permit or permission or cancels a permit, or makes an order, direction, ruling or finding under this part, a person affected thereby, or a representative of a trade union or similar organization to which a person affected thereby belongs, may appeal therefrom to a court of referees by a notice in writing containing a statement of the grounds of the appeal filed in the local office within seven days from the day the permit or permission was refused or the permit was cancelled or the order, direction, ruling or finding was made.

(2) Where a Selective Service Officer grants permission to an employer or employee to terminate employment or grants permission to an employer to lay off an employee, the employer or employee may appeal therefrom to a court of referees by a notice in writing containing a statement of the grounds of the appeal filed in the local office within forty-eight hours from the day he receives notice that permission to terminate the employment or to lay him off has been granted.

(3) If an appeal is filed pursuant to subsection two of this section, the employee shall remain in his employment and the employer shall retain the employee in his employment until the appeal has been decided.

(4) Where, on an application by an employer for permission to terminate the employment of an employee or to lay him off, a Selective Service Officer is satisfied that it has been made necessary to terminate the employment or to lay him off by reason of

- (i) a shortage of materials,
- (ii) a breakdown of machinery,
- (iii) the absence from work of another employee or group of employees,
- (iv) a power shortage,
- (v) the cancellation of a war contract, or
- (vi) such other circumstances as are set out in directions and instructions given by the Director.

and that the employer cannot use the employee's services in alternative employment, there shall be no appeal from the granting of such permission notwithstanding subsection two of this section.

(5) Where, on an appeal from a finding of a Selective Service Officer under section two hundred and three, the court of referees is of opinion that the employee was not guilty of serious misconduct but that there were good and sufficient grounds for terminating

his employment, it may make an order that the employer may, in lieu of reinstating the employee with full pay from the time the application for review was made as required by section two hundred and three, pay the employee six days' wages in lieu of reinstatement; and, where such an order has been made, the employer shall forthwith make such payment to the employee unless he forthwith reinstates the employee with full pay from the time the application for review was made.

(6) An application in writing for a hearing in connection with an appeal under this section may be filed in the local office

(a) by the appellant when filing the notice of appeal, or

(b) by any other person affected thereby within three days from the day the notice of appeal is filed;

and the chairman of the court of referees shall thereupon fix a time and place for the hearing, or, if no such application has been made, the chairman may nevertheless direct that there shall be a hearing and fix a time and place therefor; and the Selective Service Officer shall, in every case, notify the appellant and every other person who, in his opinion, is affected by the appeal of the time and place fixed for the hearing.

(7) A court of referees shall not decide an appeal until a reasonable opportunity has been given to every person who, in the opinion of the chairman, is affected thereby to make any representations that he desires the court to consider in making its decision; and in any case where no hearing is held every such person may make representations to the court of referees in writing.

(8) The members of the court of referees to which an appeal is referred shall be chosen in the same manner as in the case of an appeal to a court of referees under the Unemployment Insurance Act, 1940.

(9) No person shall be a member of a court of referees during the consideration of an appeal

(a) in which he is or may be directly interested,

(b) in which he is or has been a representative of the appellant or other interested person, or

(c) in which he has taken any part either as a witness or otherwise.

(10) An appeal may, with the consent of the appellant but not otherwise, be proceeded with in the absence of any member or members of the court other than the chairman.

(11) If the number of members of the court of referees is an even number, the chairman shall have a second or casting vote.

(12) The procedure on a hearing shall be determined by the chairman of the court of referees.

(13) The court of referees to which an appeal is referred shall consider and determine the appeal as soon as possible after receipt of the notice of appeal and its decision thereon shall be final and conclusive save as in this section otherwise provided.

(14) The court of referees may dismiss an appeal under this section or

(a) grant the permit or permission that the Selective Service Officer whose decision is appealed against should have granted;

(b) reinstate the permit cancelled by the Selective Service Officer; or

(c) rescind any order, direction, ruling, finding, permit or permission made or granted by the Selective Service Officer and make or grant the order, direction, ruling, finding, permit or permission, if any, that the Selective Service Officer whose decision is appealed against should have made;

and a permit or permission granted by it or an order, direction, ruling or finding made by it shall have the same effect as if granted or made by the Selective Service Officer whose decision is appealed against.

(15) The chairman of the court of referees, on new facts being brought to his knowledge, may within thirty days, or such longer period as the Minister may allow, from the day the original decision was made, direct that an appeal shall be reconsidered or reheard as the case may be.

(16) Any person who appears before a court of referees shall do so at his own expense.

(17) The Minister may publish a decision of the court of referees if and as he deems proper.

(18) For the purposes of remuneration, a court of referees functioning under this part shall be deemed to be functioning under The Unemployment Insurance Act, 1940."

12. Section six hundred and eight of the said regulations is amended by adding the following subsections thereto:

"(2) Where a person is convicted of contravening any provision of these regulations by failing to make a payment to His Majesty or to any other person, the Justice or Justices of the Peace, Magistrate, Judge or Court by whom he is so convicted shall, in addition to imposing the penalty provided by these regulations for such contravention, order him to pay to His Majesty or the other person the amount that he failed to pay unless the payment has been made before he is so convicted; and an order made under this subsection shall be enforced as an order made under Part XV of the Criminal Code.

(3) Where a person is convicted of contravening these regulations by failing to accept or enter employment to which he has been directed under Part II, by terminating the employment to which he has been so directed or by ceasing to perform his duties in the employment to which he has been so directed, the Justice or Justices of the Peace, Magistrate, Judge or Court before whom he is so convicted may, if counsel or other person acting for the Crown so requests, whether or not sentence is suspended and in addition to imposing the punishment provided for the offence if sentence is not suspended, direct that the man be taken either forthwith or upon the expiration of the term of imprisonment, if any, in police custody to a place specified by counsel or other person acting for the Crown and delivered to the person in charge thereof; and where such an order is made, for the purposes of all of Part IIA except section two hundred and fifty-two, the person so convicted shall be deemed to be a person to whom Part IIA applies and an order shall be deemed to have been served upon him pursuant to section two hundred and fifty-one."

Decisions of National War Labour Board

DURING the month of March, the National War Labour Board issued decisions in the following cases:—

Fairchild Aircraft Limited (Longueuil, P.Q.) and International Association of Machinists, Montreal Aircraft Lodge 712.

Aluminum Company of Canada, Limited and Le Syndicat National des Employes de l'Aluminium Inc. de Shawinigan Falls.

Aluminum Company of Canada, Limited and Le Syndicat National des Employes de l'Aluminium d'Arvida, Inc.

John Inglis Company, Limited (Toronto) and United Steelworkers of America, Local 2900.

Montreal Tramways Company and Canadian Brotherhood of Railway Employees and Other Transport Workers.

Boeing Aircraft of Canada Limited (Vancouver, B.C.) and International Association of Machinists, Local 756.

The James Brookes Woodworking Company, Limited (New Westminster, B.C.) and British Columbia Woodworkers' Union, Local No. 2.

E. S. Stephenson & Company, Limited (Saint John, N.B.) and Industrial Union of Marine and Shipbuilding Workers of Canada, Local No. 3.

Eddy Match Company Limited and Canadian Splint and Lumber Corporation Limited (Pembroke, Ontario) and United Brotherhood of Carpenters and Joiners of America, Locals 2823 and 3175.

Industrial Union of Marine and Shipbuilding Workers of Canada, Locals 1, 2 and 3 and the Canadian Congress of Labour, and Various Shipbuilding Companies in the Maritime Provinces.

Algoma Steel Corporation Limited and United Steelworkers of America, Local 2251.

Harry Mallory (Saint John, N.B.) and United Brotherhood of Carpenters and Joiners of America, Local 849.

Butterfly Hosiery Company Limited and l'Association du Bas façonne de Drummondville.

Dillons Chemical Company, Limited.

Levis Letourneau (Limoulou, Que.) and Clement Picard.

Toronto Transportation Commission and Canadian Electrical Trades Union, Branch No. 1.

Richardson Radio Company (Weston, Ont.) and Robert Bolton.

Defence Industries Limited (Ajax, Ontario) and United Electrical, Radio and Machine Workers of America, Local 521.

Ingersoll Machine and Tool Company, Limited (Ingersoll, Ontario) and United Steelworkers of America, Local 2918.

The Thorold Pulp Company Limited (Thorold, Ontario) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 84.

Brotherhood of Painters and Decorators of Sydney, N.S. and Various contractors.

Spruce Falls Power and Paper Company, Ltd. (Kapuskasing, Ont.) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 89.

Canadian Pacific Railway Company and Brotherhood of Railroad Trainmen (Dining Car Service Employees).

The Greater Vancouver Plastering and Lathing Association and The Operative Plasterers' and Cement Finishers' International Association, Local 779.

Re: Fairchild Aircraft Limited (Longueuil, P.Q.) and International Association of Machinists, Montreal Aircraft Lodge 712

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for the Province of Quebec, dated October 24, 1944, by which the Board authorized the Company to inaugurate an Incentive Production Bonus Plan for certain of the occupational classifications of employees engaged directly in the production of aircraft. Leave to appeal was granted on November 20, 1944.

By its authorization the Regional Board authorized the Company to inaugurate the proposed Incentive Production Bonus Plan substantially in agreement with one previously authorized by it for Canadian Vickers Limited; subject to the understanding "that the Company will submit to the Regional War Labour Board for Quebec, at the end of six months (March 31, 1945), report showing results actually secured from the operation of the Incen-

tive Productive Bonus Plan for the purpose of determining to what degree, if any, the Plan should be revised for subsequent operations."

The Plan was partially put into effect by the Company in October, 1944, and it appears that the production has increased (although other factors are also responsible for such increase), and that the employees affected have benefited by certain additional earnings.

The question of the introduction of an Incentive Production Bonus Plan was discussed by the Company and Union representatives in May, 1944. The Company put forward one Plan and the Union proposed another. Agreement could not be reached on several important matters and in the result the Company applied to the Regional Board for authorization of a Plan substantially similar to that in the Vickers' plant. The Union opposed the application, being in disagreement on many matters and before this Board urged that all matters should have been agreed upon by collective bargaining, that a contract embodying the Plan should have been signed and that then, only, the Plan should have been submitted to the Regional Board for approval.

Both parties admit that a serious production problem existed in 1943, and it seems to us that some form of Incentive Production Bonus Plan was desirable. While the Company and

the Union differ as to the form of the Plan, we are satisfied that without experience in the operation of such a Plan it would have been extremely difficult, if not impossible, to reach complete agreement on all the details of any such Plan, particularly in the aircraft industry where changes are constantly occurring.

We do not feel that it is necessary at this point to go into the details of either the Plan now in use by the Company or that proposed by the Union. By March 31, 1945, the Company, pursuant to the Finding and Direction of the Regional Board, will be required to submit a report of the results secured in the trial six months' period "for the purpose of determining to what degree, if any, the Plan should be revised for subsequent operations."

We believe that, as the Plan is now in effect and will shortly have to be reconsidered for final determination, the Order of the Regional Board should stand. It is desirable, we think, that with the experience gained, the parties should, by collective bargaining process, endeavour to reach an agreement as to the final Plan before presentation to the Regional Board for approval, but we leave that matter to the parties themselves.

For these reasons the appeal is dismissed and Finding and Direction will issue accordingly. February 23, 1945.

Re: Aluminum Company of Canada, Limited and Le Syndicat National des Employés de l'Aluminium Inc. de Shawinigan Falls

Reasons for Decision

This is an appeal by the Syndicate from a decision of the Quebec Regional War Labour Board under date of August 10, 1944, wherein the Regional Board denied an application for increases in wage rates by the employees engaged by this Company at its Shawinigan Falls Plant to rates paid at the Arvida Plant of the same Company. An application for review was filed by the Syndicate on September 1 and dismissed and leave to appeal was granted on October 31, 1944.

In effect the application of the Syndicate is made with the view to establishing uniformity of wage rates in all Plants of the Company in the Province of Quebec, and at the level of the highest paid Plant—that is, at Arvida.

In Case File A-40 (L.G., 1944, p. 161), the Board had under consideration an appeal by the Company from a decision of the Regional Board for Quebec which had granted increases at the La Tuque Plant of the Aluminum Company of Canada to the level of those paid at the Arvida Plant and this Board allowed the appeal. At the hearings of the case now before the Board considerable discussion took place as to the basis of that decision and on

the question of whether there should be a differential in rates between the Arvida and Shawinigan Plants.

It must be remembered, however, that since the La Tuque case was considered, the provisions of P.C. 5963 were replaced by the present governing Order, P.C. 9384, under which the Board is required to give effect to the purposes of the Order as laid down in Section 14 (b) thereof as follows:—

"to stabilize the wage structure in Canada established in this manner in order to maintain stability in prices and prevent increases in the general cost of living."

The Board, therefore, in exercising its present power, must give effect to the requirement of stabilization and not necessarily to comparison unless where a gross inequality or gross injustice is shown to exist. (Section 20 (a) of the Order.)

In our opinion the Syndicate did not establish that any gross inequality or gross injustice existed in the rates now being paid at the Shawinigan Plant and it is also clear that the Company is paying at that Plant rates at least as high as are paid in similar classifications in other industries in the Shawinigan Falls area. We believe that the concurrence in the appli-

cation of the Syndicate and the increasing of rates in all comparable units of an industry to the level of the highest paid unit would not be stabilization of the wage structure, but rather the reverse. In 1943 when wage increases were given at the Shawinigan Plant of the Aluminum Company of Canada, many other large industrial concerns in that area applied for and were granted increases based on the increases given at this Plant. It seems clear that were

the rates now to be further increased to bring them in line with those paid at the Arvida Plant, similar action would be very likely to follow.

For these reasons this Board agrees with the decision of the Regional War Labour Board of the Province of Quebec and the appeal will be dismissed.

Finding and Direction will issue accordingly.
February 27, 1945.

Re: Aluminum Company of Canada, Limited and Le Syndicat National des Employés de l'Aluminium d'Arvida, Inc.

Reasons for Decision

By leave of the Quebec Regional Board, the Company appeals from a decision of that Board dated July 4, 1944, whereby an increase in wage rates was ordered for certain classifications employed in the Alpaste Plant at its Arvida works.

This department of the appellant's operations producing an aluminum paste for use in paint was reconverted and practically rebuilt for war purposes and since March, 1944, it turns out an aluminum powder. A similar plant was at about the same time opened at Isle Maligne where rates were authorized by the Regional Board on the Company's application on May 9, 1944. The Syndicate takes the position, to which we think it is entitled, that it is not bound by the Isle Maligne rates for the powder plant because it was not a party either for or against the Company's application. The Company is willing to put the Isle Maligne rates into effect at Arvida, and this means an increase in some classifications although not to the extent requested by the syndicate. The parties agree on the rates for janitor, utility man and stenciller classifications, but are apart 5 cents for operators (class 1) and furnace firemen, 4 cents for the assistant-foreman, 3 cents in the minimum of the range for the foreman and 1 cent in the

maximum of the range for operators (class 2). The Syndicate also requested an automatic upgrading for operators from class 2 to class 1 after 3 months.

The Regional Board adopted the Syndicate's scale of rates, but did not grant the 3-month beginner classification for operators. The ground upon which the application was allowed was the hazardous nature of the work involved in this department.

The Company presented further evidence to this Board on the question of hazard and after giving full weight to it, we conclude that, notwithstanding the thorough safety regulations, there is a degree of hazard in the powder department which perhaps justified the Regional Board's decision. Although the decision is on a fairly narrow ground, we shall not upset it but we wish to make clear that the rates in the Alpaste plant are not to be used as a medium for obtaining increased rates in any other department of the Arvida works. We have the Syndicate's assertion that the work is not comparable.

The appeal will be dismissed as well as the Syndicate's cross-appeal on the matter of operator classifications. The typographical error in the Regional Board's finding and direction should be corrected: the maximum rate for stencillers is 73 cents and not 77.

February 27, 1945.

Re: John Inglis Company, Limited (Toronto) and United Steelworkers of America, Local 2900

Reasons for Decision

The Company appeals from a decision of the Regional War Labour Board for Ontario dated August 23, 1944, authorizing increases in wage rates for typists, timekeeping clerks and tool designers. Although, under its terms, the decision need not be implemented, the Company takes the position that, for the sake of good labour relations, the authorization is deemed by it to be a direction and it wishes this Board to deal with the appeal on that

basis. Leave to appeal was granted by the Regional Board.

The appeal is not pressed with regard to the increases awarded to the timekeeping clerks, and we are only concerned now with the typists and tool designers.

Since the hearing, we have had an investigation made of the nature of the work performed by the classifications involved in this appeal, and particularly of the rates paid to the tool designers as compared with

those engaged in jobbing shops and other manufacturing plants in the area. It is reported to us that the wage schedules of the appellant company, for both productive and non-productive occupational classifications including typists and other clerical workers as well as tool designers, were established in conformity with a system of job evaluation and that the wage rates compare favourably with those in effect in other war plants in the Toronto area.

By increasing the rates for typists, established differentials related to rates for the stenographer classification were disturbed. We find on the evidence supplemented by our own investigation that, considering the nature of the duties performed by typists, no "gross inequality or gross injustice" requiring rectification can be said to exist.

Re: Montreal Tramways Company and Canadian Brotherhood of Railway Employees and Other Transport Workers

Reasons for Decision

This is an appeal by the Company from a Finding and Direction of the Regional War Labour Board for the Province of Quebec dated December 5, 1944, made on the application of the Union. The Regional Board ordered and directed

"the Montreal Tramways Company

1st—To maintain article 10 of the July 24th, 1940, Agreement as actually in existence.

2nd—To maintain article 8 with the following addition: 'an employee pulling a car out without pulling same in on the same run and therefore not benefiting by article 10 should be entitled to a ten (10) minutes allowance as reporting time';

3rd—To pay overtime on the basis of time-and-one-half after eight hours and thirty minutes (8.30) in any day;

4th—To pay time-and-one-quarter for any work done on the seventh day and certain specified holidays.

The foregoing is effective as from the first payroll period starting on or after December 5th, 1944."

The Company made application to the Regional Board for leave to appeal, which was refused on January 31, 1945. The Company then applied to this Board for leave to appeal and also appealed, and both matters were presented to this Board at a hearing on February 15, 1945, and both were reserved.

We are of the opinion that this is a case in which leave to appeal should be granted, and it is, therefore, granted.

Counsel for the Company took a preliminary objection to the power of the Regional Board to deal with this matter on the ground that

With respect to the designers, having in mind the nature of tool designing work done in this particular plant and considering that in at least some jobbing shops a greater and more varied degree of skill is very often required, our finding is also that the condition required by section 20 (1) (a) of P.C. 9384 cannot be found in this case.

Having carefully considered the Union's submissions both to the Regional Board and to this Board, we must, in view of all the relevant information, come to the conclusion that the increases awarded by the Regional Board to typists and tool designers do not find justification in the governing Order in Council and the appeal must be allowed. However, tool designers who receive more than \$250 per month were entitled to the mandatory amount of cost of living bonus.

March 1, 1945.

the application did not come within the provisions of Section 20 (1) (c) of P.C. 9384, which is as follows:—

"20. (1) The National Board may

(c) authorize or direct an employer

(i) to alter a term of employment, which may have the effect of increasing, directly or indirectly, a single rate or the rates within a range established under this Order for an occupational classification of his employees;

in such manner or at such rate or range as in the opinion of the National Board is fair and reasonable and is consistent with and will give effect to the purposes of this Order, having regard to all the circumstances deemed by it, in its discretion, to be material".

A strict and literal interpretation of the wording of the Section and of Section 29 of the prior Order, P.C. 5963, might seem to indicate that the Board's powers thereunder were limited to altering terms of employment which might have the effect of increasing directly or indirectly a single rate or the rates within a range, and in this appeal we are not of course dealing with an application to increase the wage rates as such. However, the practice of this Board has been from its inception to deal with working conditions, such as overtime rates, premium rates for Sundays and holidays, holidays with pay, various types of allowances, etc. We are satisfied that in order to properly carry out the true intent and purpose of wage control, it was necessary for the Board to have jurisdiction over working conditions affecting directly or indirectly the compensation paid to employees. We are satisfied that the matters

involved in the appeal are within the jurisdiction of the Board.

Late in December, 1943, the Union approached the Company to negotiate amendments to the agreement which had been in effect since July, 1940. Negotiations were continued for some time, but no agreement was reached although each party seemed prepared to make certain concessions. The Union then applied to the Regional Board and after several hearings and further negotiations, it would appear that, generally speaking, the parties had agreed on most of the matters in dispute excepting the retention of Clause 10, specifically referred to later herein. The Union took the stand that while in its original proposed revisions Clause 10 would be omitted, it was on the basis that the other requests would be met; but as they had been reduced during negotiations, it would insist that Clause 10 be retained. The Company's attitude was that as Clause 10 was not included in the proposed revision, all its negotiations and tentative agreements were conditional on its elimination from the agreement. Much of the argument before the Regional Board and this Board had to do with the retention or cancellation of Clause 10.

One other matter in dispute was in regard to overtime. The Union insisted that it commence daily after assigned hours; and the Company, that if overtime were granted, it should be for all time worked in excess of 8½ hours in any one day. Upon failure of the parties to agree on the matters in dispute and to make a joint application as suggested by the Regional Board, the latter made its Finding and Direction as above quoted.

The Company-Appellant contends that the earnings of the operators concerned in this application are higher than in any comparable Tramway system in Canada, referring particularly to the Toronto Transportation Commission and the British Columbia Electric Railway Company. It is clear that the basic hourly rates in Montreal are lower than those in Toronto, but by reason of Clause 110 of the agreement, substantial annual supplements to the rates are now being paid, and when added to the basic rates, the earnings in the main are not lower than those in Toronto. The Montreal supplement, while now with greatly increased traffic of great benefit to the operators, is based on a formula which limits it to those earning not over \$2,500, and who have been continually on the Company's payroll during the full period of one year. For many years the employees got no benefit from this Clause, but following the outbreak of war and increased revenues, it appears to have steadily increased, but by its very nature it is variable in amount and in all likelihood with the ter-

mination of the war will be much smaller and may eventually be of no benefit whatever.

We are of the opinion that for the foregoing reasons the present earnings of these employees should not be a determining factor in reaching our conclusions in this appeal.

The Regional Board directed the retention of Clause 10, previously referred to. This Clause has been in effect for many years, and, while originally for the benefit of short-run operators, it is now of more general application. It provides an allowance of 30 minutes (in a few cases one hour) for crews, operators and chauffeurs on completed runs. In 1943 it cost about \$300,000. The Company estimated that the extra cost occasioned by the changes in terms of employment conditionally agreed to would somewhat exceed the cost occasioned by the terms of Clause 10. Much of the material presented to us had to do with the question as to whether or not the parties had agreed to the elimination of Clause 10; but it is clear to us that during the negotiations carried on by the parties, there was at no time a consensus ad idem, in the sense that any revisions were unqualifiedly agreed to. In any event, this Board sitting in appeal has now to consider only whether this decision appealed from was a proper one under the governing Order.

Bearing in mind that this Clause 10 has been in effect for many years; that it originally was an allowance of one hour, and during the depression was reduced to thirty minutes; that to eliminate it would deprive the operators on short runs of a supplementary time allowance instituted to give them a reasonable day's work; and that there is a somewhat comparable provision in effect in the Toronto Transportation Commission, the Board after the most careful consideration has reached the conclusion that it should not reverse the Regional Board in its direction to maintain Clause 10.

The changes made by the Regional Board in Clause 8 have the effect of varying the previous allowance for "pulling out" time, by increasing it to a straight ten minutes, and by limiting this "pulling out" allowance to those not benefiting under Clause 10. The Regional Board called this ten minutes allowance "reporting time," but has made it clear to us that all those who would benefit under the ten minutes allowance as "reporting time" would not be entitled to the previous allowances of two and five minutes provided for "pulling out" in Clause 8 of the agreement of July 24, 1940.

Under all the circumstances, we are of the opinion that as this amended allowance is to cover reporting time, including certain duties necessary to be performed before the com-

mencement of scheduled time, it is not an unfair burden on the Company. For purposes of clarification and to express the ascertained intention of the Regional Board, we would add to the second paragraph of its Finding and Direction the following words:

" . . . with the understanding, however, that any employee receiving the ten minutes reporting allowance under this Section of our Finding and Direction shall not receive in addition any allowance for pulling out under paragraphs 1 and 3 of Clause 8 of the Agreement of July 24, 1940."

If any doubt arises between the parties as to the meaning of Clause 8, as amended by the Regional Board, and as further herein amended, and on which the parties cannot agree, the matter may be brought before this Board. It would be advisable, however, for the parties to agree on the rewording of this Clause in keeping with this decision.

As to the overtime provisions contained in Clause 3 of the Finding and Direction, we are of the opinion that they are fair and reasonable. Under the agreement overtime was paid at the rate of time and one-half for hours in excess of sixty per week. While the decision provided for overtime on a daily basis after

eight and one-half hours, it must be remembered that the work is frequently spread over 12 to 14 hours per day.

Clause 4 of the Finding and Direction provides for time and one-quarter for any work done on the seventh day and certain specified holidays. The previous provision in Clause 19 of the agreement was for an advance of 5¢ on regular rates for Sundays and the same specified holidays. The provision of premium rates for work on the seventh day and legal holidays is quite common in industry. We think that the Regional Board was correct in this regard.

We find that on the whole the working conditions authorized and ordered by the Regional Board appear to be in line with the conditions prevailing in comparable local transit systems.

For the reasons above mentioned, we are of the opinion that the authorization and Directions of the Regional Board, as clarified by the addition to paragraph 2 thereof, and herein before referred to, were correct, and we, therefore dismiss the appeal.

Finding and Direction will issue accordingly.

2nd March, 1945.

Re: Boeing Aircraft of Canada Limited (Vancouver, B.C.) and International Association of Machinists, Local 756 (A-344)

Reasons for Decision

By leave granted below, the Union appeals from a decision of the Regional Board for British Columbia dated November 18, 1944, refusing permission to inaugurate the practice of paying at the overtime rate work performed after 44 hours per week. The Company had joined with the Union in making the application to the Regional Board.

The Regional Board found that the established work week in the basic period was 48 hours with time and one-half thereafter. The Union, however, refers to its agreement of August 28, 1940, since renewed, which provided as follows in sections 2 and 3:

"The hours of work shall consist of not more than 48 hours per week and shall revert to 44 hours per week when conditions warrant..." and "...overtime shall be paid at the rate of time and one-half."

We find on the evidence that from 1937 until 1940, the work week was 44 hours, but there is no evidence that time worked in excess of the half-day on Saturdays was paid at the overtime rate. Rather our information is that the overtime rate was paid only after a full day had been worked on Saturdays. That being the case, we do not think the Regional Board's finding as to what was the established work week for the purposes of this case can be successfully challenged.

The Regional Board, in arriving at its decision to leave matters as they were in the basic period, evidently had in mind all of the material circumstances and we are not able to say that it erred in exercising its discretion pursuant to the last sentence of section 20 (1) (c) of P.C. 9384. As a result, the appeal must be dismissed.

March 1, 1945.

Re: The James Brookes Woodworking Company, Limited (New Westminster, B.C.) and British Columbia Woodworkers' Union, Local No. 2

Reasons for Decision

An appeal by the Union from a decision of the British Columbia Regional Board dated November 9, 1944, refusing to direct the Company to pay for overtime at time and one-half after 44 hours in any one week.

The appeal is based upon an agreement dated October 20, 1944, and also upon what is said to be the prevailing practice in certain woodworking establishments in Vancouver.

The agreement provides as follows:

"Forty-four (44) hours shall constitute a full week's work; eight hours to constitute a

day. Time and one-half for overtime, with Sundays and Dominion Statutory Holidays, double time."

This clause is deficient, because it does not state whether the overtime rate is to be paid on the weekly basis in addition to the daily basis. In other words it is impossible to say whether the company agreed to pay at the overtime rate for work required to be performed on Saturday afternoons.

In any event, whether there was an agreement or not, the Regional Board had a

discretionary power and it exercised it against the application on the basis that its policy had been to refuse any extension of overtime pay to a 44-hour week, unless it were shown that the established practice of the particular employer, prior to wage control (November 15, 1941), was to pay such overtime. As it was not shown that the Company-respondent paid overtime rates after 44 hours in the relevant period, we are of opinion that there is no alternative but to dismiss the appeal.

March 2, 1945.

**Re: E. S. Stephenson & Company, Limited (Saint John, N.B.) and
Industrial Union of Marine and Shipbuilding Workers of Canada,
Local No. 3**

Reasons for Decision

This is an application by the Union for leave to appeal from a decision dated November 1, 1944, of the Regional War Labour Board for New Brunswick refusing in effect to increase the rate for machinists from 89 to 95 cents. The Regional Board refused leave to appeal. The Company's machine

shop is engaged on non-marine work and the rate requested by the Union is based upon shipyard rates. We find upon a careful examination of all the material filed that no perceivable error can be said to have been shown in the decision appealed from. As a consequence, the application must be dismissed.

March 5, 1945.

**Re: Eddy Match Company Limited and Canadian Splint and Lumber
Corporation Limited (Pembroke, Ontario) and United Brotherhood
of Carpenters and Joiners of America, Locals 2823 and 3175**

Reasons for Decision

This is an appeal by the companies from a decision of the Regional War Labour Board for Ontario dated October 3, 1944, directing a general 5-cent hourly increase in wage rates effective from August 1, 1944. Leave to appeal was granted by the Regional Board on November 21, 1944, upon an application made within the prescribed period of 30 days.

The appellants rely upon the decision of this Board dated June 26, 1944, (L.G., 1944, p. 839) when a decision granting a 5-cent increase was modified for the reason that it did not conform to the provisions of section 25 of P.C. 5963, which was the Order governing that decision.

It must be noted that the decision now under appeal was made under a different type of wage control formula. Whereas the prior Order contemplated that wage rates could be increased when found to be low upon comparison with rates generally prevailing for substantially similar classifications in the

locality or in a comparable locality, the present Order P.C. 9384, as amended, empowers the Board to increase rates "only if and to the extent that (it) finds that such (increase) is necessary to rectify a gross inequality or gross injustice" (Section 20 (1) (a)).

In the present matter the Regional Board made a positive finding that the rates required rectification on the basis of the present formula, because they were low rates. The average hourly earnings (including the 3 cents awarded last June, but exclusive of the present 5 cents) in the Eddy Company were as of September 18, 1944, 49 cents for men and 40 cents for women, while in the Canadian Splint & Lumber Corporation the averages were 42 cents for men and 34 cents for women. The Board has come to the conclusion that it is not in disagreement with the decision appealed from and the appeal must be dismissed (see decision in Continental Paper Products Limited, L.G., Jan., 1945, p. 30).

March 8, 1945.

**Re: Industrial Union of Marine and Shipbuilding Workers of Canada,
Locals 1, 2 and 3 and the Canadian Congress of Labour, and Various
Shipbuilding Companies in the Maritime Provinces**

Reasons for Decision

This is an application by the Unions concerned for

- (1) a modification of the Finding and Direction of this Board issued May 2, 1944, under P.C. 5963, with respect to retroactivity and a change in the zoning which would involve placing Foundation Maritime Limited at Pictou, N.S. in Zone 1, instead of Zone 2.
- (2) a revision of certain classifications in the said Finding and Direction.

When the hearing opened it was intimated to the parties present that the requests in (1) would be treated as applications to revise the Finding and Direction of May 2, 1944. In fact, it had previously been intimated to the representatives of the Union that an opportunity would be given to make representations for the revisions requested, but, as to Item 2, this involved new matters which would have to be dealt with pursuant to P.C. 9384.

As to retroactivity, the Union sought in the first place to have the retroactive payments extended to a greater number of employees than those indicated in the Finding and Direction, namely, to the following:

- (1) Those laid off because of changes in the Company's employment policy.
- (2) School students, employed during vacation period.
- (3) Those employees who enlisted in the Merchant Navy.
- (4) Those employees sent to another industry by National Selective Service.
- (5) Those employees forced to leave the industry on medical order, for health reasons.
- (6) Dependents of certain deceased employees.

In the second place, the Union sought the extension of retroactivity to those Companies engaged in ship repair work and all of whose employees received *no* retroactivity by reason of the Finding and Direction of May 2, 1944.

It developed in the argument before the Board that in January, 1944, a Finding and Direction was issued with respect to certain shipyards in the Provinces of Quebec and Ontario and which was made as the result of a survey and investigation of these shipyards undertaken by this Board at the request of, and with the full knowledge of, all parties concerned, and that pursuant to this investigation certain rates and classifications were established and the conditions of retroactivity determined. Subsequently, in consequence of assurances given to both employers and employees in the Maritime Shipyards, a similar Finding and Direction was issued on May 2, 1944, with respect to the classifica-

tions, rates of pay and retroactivity for employees in this industry in the Maritime Provinces. Interested parties were given copies of the Finding and Direction applicable to the Ontario and Quebec shipyards and asked to make representations with respect to any special features peculiar to the Maritime shipyards. No representations were received from either employer or employee indicating that either less or greater retroactivity should apply with respect to these shipyards. It would, therefore, seem that any change in the conditions as to retroactivity for the Maritime shipyards would not only occasion greater hardship and unfairness to the employers in the Maritimes, but at this late date would also result in dissatisfaction by the employees in the shipyards in Ontario and Quebec.

It should be pointed out also that in no case were any of the employees of the Maritime shipyards entitled to retroactivity to April 16, 1943, by reason of applications made on their behalf, but the retroactivity was granted solely in conformity with the conditions decided upon by the interested parties on the investigation and review of the shipbuilding and ship repair industry in Eastern Canada. It should be pointed out further that the extension of the provisions of retroactivity to the small shipbuilding repair yards would impose on the employers concerned an obligation of such a nature that they cannot now look to ship-owners or others to assist in meeting same. The Board will not revise its Finding and Direction of May 2, 1944, with respect to retroactivity.

As to the zoning matter, this Board, having regard to the overall action taken with respect to the shipyard industry in Ontario and Quebec, as well as the Maritime Provinces, is unable to change the Finding and Direction of May 2, 1944, in such a manner that the Foundation Maritime Limited at Pictou would be placed in Zone 1 instead of Zone 2. This Company was placed in Zone 2 after a careful study relative to the location of the yard, the nature of the work done, general wage conditions prevailing in the area and other relevant matters. No sufficient reason was presented to this Board to justify a change and there should be a Finding and Direction accordingly.

With regard to the matters involved in item 2 above, the parties were requested to discuss the same with the Board's technical advisers and a separate communication will be sent to them covering the same.

March 8, 1945.

Re: Algoma Steel Corporation Limited and United Steelworkers of America, Local 2251

Reasons for Decision

This is an appeal by the Union from the Finding and Direction of the Ontario Regional War Labour Board dated October 18, 1944. The application was made by the Union pursuant to Order in Council, P.C. 9384, and was for the restoration of differentials which it alleged had been disturbed by the Findings and Directions of the said Regional War Labour Board on March 30, 1944, and May 12, 1944.

Consideration of this application and appeal has been complicated and made unnecessarily difficult by reason of the fact that subsequent to January 26, 1943, the date of Order in Council P.C. 689, and prior to the final disposition by the National War Labour Board of the application submitted to it pursuant to said P.C. 689, the Regional War Labour Board had considered and made Findings and Directions with respect to other applications made on behalf of the same employees with respect to certain wage rates. In order to understand more clearly the appeal under consideration, it will be helpful to refer to, and to keep in mind, earlier applications and decisions pursuant to P.C. 689 with respect to wage questions affecting the employees of Algoma Steel Corporation Limited. On March 31, 1943, the basic rate for common labour was increased to 50c per hour, and the cost of living bonus for all employees of this Company was increased from 5c to 9c an hour. On September 9, 1943, former differentials were restored. However, the case for the maintenance men was not then completely disposed of. The Memorandum of Understanding which was annexed to and formed part of P.C. 689 provided:

"That arrangements be made for the making of a careful study having in view a reclassification and evaluation of jobs".

Notwithstanding the fact that this provision was discussed by the parties concerned at hearings by this Board, they did not make the reclassification and evaluation referred to. On February 17, 1944, by decision of this Board it was recommended that the parties agree to undertake a joint survey with respect to classifications and wage rates for the maintenance men, and, failing their agreement to undertake such survey, the Board would then name a referee. Subsequently, Mr. W. H. Ley was named the referee, and the investigation and survey was undertaken by him.

However, while, pursuant to P.C. 689, the whole question was under consideration by

the National Board, an application was made to the Regional War Labour Board for Ontario on the 21st day of October, 1943, for a further increase in the common labour rate, and for increases in the higher classifications. On the 30th day of March, 1944, the Regional War Labour Board for Ontario directed an increase of 5c per hour in the common labour rate, but denied any increase to other classifications. We find it difficult to understand why one or the other of the parties did not object to such proceedings before the Regional War Labour Board while consideration of, and investigation into, wage rates were being made by the National War Labour Board pursuant to P.C. 689, and had such matters been brought to the attention of the said Regional War Labour Board, the said Regional War Labour Board in the circumstances should not have granted any increase in any of the rates until after the investigations by the National War Labour Board had been completed. However, an increase was directed and the Company did *not* appeal. Subsequently, on the 3rd day of July, 1944, the application now under appeal was submitted to the said Regional War Labour Board by the Union.

This Board is unable to make any comment as to the merits of the application of the 21st day of October, 1943, and which resulted in an increase of 5c per hour in the common labour rate, but it does seem that such increase having been directed then provision for some increases in the higher classifications should now be made.

It should also be noted that the Union in its application of October 21, 1943, sought wage increases for the higher classifications in amounts lesser than the increase sought and directed for common labour. Also at the hearing of this appeal it was admitted on behalf of the Union that the increases sought for the other classifications could in fairness and justice be either substantially reduced or entirely eliminated insofar as certain high classifications were concerned.

For the purpose, therefore, of establishing proper wage increases for classifications higher than common labour, in order to give effect fairly to Section 21 of Order in Council P.C. 9384, which is as follows:

"21. Where the National Board authorizes or directs an employer to increase a single rate or the rates within a range for an occupational classification of his employees, the Board may authorize or direct the employer to increase single rates or rate within ranges for other occupational classifications of his employees, in order to maintain differentials in relation to the rates so increased, only if and to the extent that

the Board finds that the conditions prescribed by paragraphs (a) of section 20 of this Order to the powers of the Board to authorize or direct increases in such single rates or the rates within such ranges, exist, and only in smaller amounts where the rates are higher than the rates so increased",

this Board is of opinion that this appeal should be allowed to the extent that the occupational classifications which prior to the 30th day of March, 1944, were paid wage rates of 61c per hour or over receive increases in the then rate as follows:

Those in receipt of wage rates of—

- (a) 61c but less than 65c per hour, be increased by 4c per hour.
- (b) 65c but less than 67½c per hour, be increased by 3½c per hour.
- (c) 67½c but less than 70c per hour, be increased by 3c per hour.
- (d) 70c but less than 72½c per hour, be increased by 2½c per hour.
- (e) 72½c but less than 75c per hour, be increased by 2c per hour.
- (f) 75c but less than 77½c per hour, be increased by 1½c per hour.
- (g) 77½c but less than 80c per hour, be increased by 1c per hour.

- (h) 80c but less than 90c per hour, be increased by ½c per hour.
- (i) 90c per hour or more—no increase.

Less however with respect to (a) any increases directed by the Regional War Labour Board of Ontario in its order of May 12, 1944.

The appellants ask that increases directed be effective as from the 1st day of January, 1944, but it is impossible under the present appeal to make that direction by reason of the Union's own action in not appealing the Findings and Directions of the Regional War Labour Board dated March 30, 1944, and May 12, 1944. The effective date should in the circumstances be related solely to this particular application under appeal, and which, though dated June 12, 1944, was not filed by the Union with the Regional War Labour Board of Ontario till July 3, 1944. The increases herein before directed will, therefore, be effective as from the 3rd day of July, 1944.

Finding and Direction will issue accordingly.

March 9, 1945.

Re: Harry Mallory (Saint John, N.B.) and United Brotherhood of Carpenters and Joiners of America, Local 840

Reasons for Decision

This is an appeal by the Union concerning the effective date of a Finding and Direction of the Regional War Labour Board for New Brunswick dated August 23, 1944, directing the employer to increase wage rate of carpenters in his employ from ninety (90¢) cents per hour to ninety-five (95¢) cents per hour from July 26, 1944. The Union ask that the employer be directed to pay the increased wage rate from April 16, 1943, the date from which this Board directed an increase in wage rates for employees of St. John Dry Dock and Shipbuilding Company Limited.

The Union makes certain submissions regarding the employer's status, the question being whether he is a sub-contractor of the St. John Dry Dock and Shipbuilding Company or a foreman in their employ. So that we might be fully informed as to this relationship, we have caused an investigation of the matter to be made. We find that Mr. Mallory has been recognized as a jobbing contractor in the City of Saint John for upwards of thirty years; that for some time between the years 1940 and 1942, he was employed as "Joiner Foreman" the Dry Dock Company and when so employed, took with him into the service of the Company certain employees who had previously been in his employ in his jobbing business. When he left the employ of the Dry Dock Company, the workers whom he had brought with him into the service of the

Dry Dock Company were also released. A few months later, Harry Mallory contracted with the St. John Dry Dock and Shipbuilding Company to erect and install furniture and joiner work on ships under construction in the Company's shipyard, and since undertaking such contracts, his activities as a jobbing contractor have been confined almost exclusively to such work. We conclude, therefore, that Mr. Mallory must be considered as an independent employer.

When this Board issued its Finding and Direction of May 2, 1944, in respect of the shipbuilding and ship-repairing industry of the Maritime Provinces, it dealt with the representatives of employees and employers engaged in that industry as primary contractors and not with employers performing work under sub-contract. It would place upon such employers as the respondent an unfair financial burden if retroactivity were granted as asked for.

The application in this case was made to the Regional War Labour Board by the applicant Union under date of July 26, 1944, and the Finding and Direction of the Board required the employer to commence payment of the increased rate as of the date of application. The conditions being as stated, the Decision of the Regional War Labour Board as to the effective date of the wage increase in question is sustained and the appeal is dismissed.

March 8, 1945.

**Re: Butterfly Hosiery Company Limited and l'Association du Bas
façonné de Drummondville**

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for the Province of Quebec, dated October 28, 1944, and reaffirmed on November 28, 1944. Leave to appeal was granted by that Board on December 5, 1944.

The dispute arose over a work stoppage on October 2, 1944, as a result of the Company requiring the employees to clean the machines prior to putting the plant in operation. The employees refused to comply with the request and as a result no work was done on that day.

The Regional Board found, after investigation, that there was a reduction in the employees' earnings, caused partly by the

management and partly by the employees, and ordered the Company, within eight days, to pay fifty per cent of the wages or salaries the employees would have earned on that day had the plant been in operation.

We are of the opinion that there is nothing in the governing Order, P.C. 9384, which gives authority to the Board to determine responsibility for such work stoppage or to assess financial liability therefor. The Order appealed from should, therefore, be set aside and insofar as the Union's appeal for an allowance for the full day is concerned, that appeal will be dismissed.

Finding and direction will issue accordingly.

March 9, 1945.

Re: Dillons Chemical Company, Limited

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Ontario dated December 15, 1944, denying an application for authorization to inaugurate payment of voluntary bonuses to clerical staff in the Company's Toronto office. The Regional Board dismissed the application on the ground that it had no authority to permit an employer to inaugurate a voluntary bonus plan and, on a request for reconsideration, granted leave to appeal.

The Company in 1943, under P.C. 5963, sought and obtained from the Quebec Board permission to distribute to its Montreal employees voluntary bonuses, the total amount of which would not exceed that previously paid (presumably prior to November 15, 1941), to one particular employee. Then subsequently in 1944 and under P.C. 9384 the

Company applied to the Ontario Board for permission to pay the bonus to the Toronto employees.

In view of the provisions of section 26 of P.C. 9384, the decision appealed from is the only one the Ontario Board could make in this case. There is no power conferred upon this Board and the Regional Boards by the Wartime Wages Control Order, 1943, to authorize either the inauguration of a voluntary bonus plan or the extension of a plan for an occupational classification receiving it in the basic period to other classifications. (Reference to decision in Royal Securities Corporation case, L.G., 1944, p. 733.) Without prejudice to any application which may be made for permission to increase wage rates or to establish ranges of wage rates, the appeal is, therefore, dismissed.

March 14, 1945.

Re: Lévis Létourneau (Limoilou, Que.) and Clément Picard

Reasons for Decision

By leave of the Quebec Regional Board, the employer, Létourneau, appeals from a decision of that Board dated December 21, 1944. The appellant operates a very small machine shop and applied for authorization to reduce the wage rate of a machinist, Picard, from 75 cents to 55 cents. The written consent of the latter to the reduction is on file.

The Regional Board came to the conclusion that it did not have jurisdiction to authorize a reduction of wages in this case. Having in mind the provisions of Sections 16 and 20 of the Order in Council (P.C. 9384) as amended, we are of opinion that the decision of the said Regional Board was correct.

March 14, 1945.

Re: Toronto Transportation Commission and Canadian Electrical Trades Union, Branch No. 1

Reasons for Decision

This is an appeal by the employer from a decision of the Ontario Regional Board dated October 12, 1944, directing a wage increase amounting to 5 cents per hour to some seventy-five employees in the electrical department.

Apparently this wage increase was granted as a result of a comparison with the rates paid to similarly designated employees of the Bell Telephone Company and the Toronto Hydro Electric System. It seems to this Board, after careful consideration of the

Union's argument, that in determining whether a "gross inequality" existed, the Regional Board should have restricted its comparison to employees of comparable units in the same industry, namely the local transportation industry.

With this in mind, we have come to the conclusion that the increase ordered by the Regional Board cannot justify itself under the provisions of the Order in Council and as a consequence the appeal must be allowed.

March 15, 1945.

Re: Richardson Radio Company (Weston, Ontario) and Robert Bolton

Reasons for Decision

This is an appeal by the employee, Bolton, from a decision of the Regional Board for Ontario dated December 4, 1944, declining to approve a contract of employment entered into January 1, 1943, whereby the employee was to manage the business of the employer.

We are of opinion that the duties and responsibilities described in clause 1 of the

agreement are of an executive character. Upon that finding and the fact that the remuneration provided under the agreement exceeded \$250 per month, we conclude that the employee was above the rank of foreman and is governed by the provisions of the Wartime Salaries Order, P.C. 9298.

On this ground, the appeal is dismissed.

March 16, 1945.

Re: Defence Industries Limited (Ajax, Ontario) and United Electrical, Radio and Machine Workers of America, Local 521

Reasons for Decision

An appeal by the Union from a decision of the Regional War Labour Board for Ontario dated December 4, 1944, by which that Board refused to authorize the Company to extend to "day workers" payment of a half-hour lunch period as now established for "shift workers". Leave to bring this appeal, which is not opposed by the Company, was duly granted to the Union by the Regional Board.

The plant here involved is an important wartime industry which has been located at some distance from centres of urban residence.

This accounts for certain transportation difficulties which are complicated by the fact that "shift workers" go off duty at 4 p.m. while the "day workers" must work until 4.30 p.m. under existing conditions. The application sought to place all hourly-rated employees on the same basis.

Under the special circumstances prevailing at this plant, this Board has come to the conclusion that the appeal may be allowed and the application approved effective from the date hereof.

March 20, 1945.

Re: Ingersoll Machine and Tool Company, Limited (Ingersoll, Ontario) and United Steelworkers of America, Local 2918

Reasons for Decision

This is an appeal by the employer from a decision of the Ontario Regional Board dated November 17, 1944, requiring the establishment, effective from September 26, 1944, of a work week of 48 hours and payment at time and one-half for time worked in excess of the daily hours mentioned in the finding and direction. The Company had established over a long period a standard work week of 55 hours.

In directing the alteration of a working condition (overtime after 48 hours instead of 55 hours) which had been in existence in this plant and general in the town of Ingersoll, the Regional Board exercised the power conferred by section 20 (1) (c) (i) of the Order (P.C. 9384). We have come to the conclusion that, in the light of the concluding paragraph of the subsection, this Board is unable to say that the decision appealed from should be reversed. However, we believe that the con-

tention with respect to the retroactive feature should be given effect to and that the decision should become effective with the first pay period commencing on or after the date of

Regional Board's decision, namely November 17, 1944.

Finding and Direction accordingly.

March 21, 1945.

Re: The Thorold Pulp Company Limited (Thorold, Ontario) and International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 84.

Reasons for Decision

An appeal by the Union from the Regional Board for Ontario who by decision dated November 22, 1944 refused its application to extend the company's vacation with pay plan of one week by one day for each year of service beginning with the fifth year, so that employees with ten years' continuous employment would enjoy a two weeks' vacation. The Company opposed the application on the ground of financial inability and it contests this appeal for the same reason.

The extension requested has been generally adopted by employers in the pulp and paper industry in Ontario with the approval of the Regional Board for that province.

To dispose of this appeal, we need not examine the merit of the company's plea, because in any event we would not *direct* the employer to extend the present plan which appears to be in conformity with D.B. 17. Consequently, we dismiss the appeal.

March 22, 1945.

Re: Brotherhood of Painters and Decorators of Sydney, N.S., and Various Contractors.

Reasons for Decision

This is an appeal by the Brotherhood from a decision of the Regional Board for Nova Scotia dated September 18, 1944 refusing an application to increase the wage rate for journeymen painters and decorators employed in Sydney from 83 to 90 cents per hour.

The case for the appellant is ably presented on two grounds, namely: that the rate for painters should be brought up to the rates paid to other tradesmen, such as carpenters, electricians and plumbers; and that journeymen painters employed in the shipyards are paid the higher rate. The Regional Board found that the 83 cents rate in the Sydney

area was the highest rate being paid in the province for these journeymen in the construction trades and concluded that there was no "gross inequality" to be rectified. In effect, it reaffirmed a previous decision made in September, 1943 under the provisions of P.C. 5963. Evidently, the Regional Board is desirous of maintaining the differentials established in the province as between trades and areas. We do not think we can properly interfere with this decision which seems to us to have been arrived at after consideration of all pertinent facts.

The appeal must, therefore, be dismissed.

March 22, 1945.

Re: Spruce Falls Power and Paper Company, Ltd. (Kapuskasing, Ontario), and International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 89.

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for the Province of Ontario, dated October 28, 1944, refusing to direct increases in the hourly rates for railway firemen, brakemen and hostlers. Leave to appeal was granted on December 7, 1944.

Relatively few men are employed by the Company in its railway operations, which are incidental to its main operations. The present rate for firemen and brakemen is 80c per hour, and at Smooth Rock Falls and Iroquois Falls the rate is 84c per hour. For hostlers

the rate is 73c per hour and at the other two mills 74c per hour. The request of the Union is to bring the rates at Spruce Falls to these higher levels. The engineer and conductor in this Company have the same rates as at Iroquois Falls. The Company opposes the application mainly on the ground that it would affect the general wage structure throughout its entire operations, in that existing differentials would be disturbed.

It appears to us (and in this the Union agrees) that the railway department might be considered as quite a separate unit and that the classifications affected by this application

would not be similar or comparable to any classifications in the other departments of the Company.

The Regional Board found that on the evidence before it a gross inequality or gross injustice had not been established, but considering all the material presented to us, and for the reasons stated above, we are of the opinion that the Union has established its case.

We, therefore, allow the appeal and direct the Company to pay to the employees affected

by the application the rates applied for by the Union, effective from the date of the application to the Regional War Labour Board for Ontario.

We further direct that the increases herein granted shall not be the basis of any application for increases on the part of the employees in any other departments of the Company.

Finding and Direction will issue accordingly.

March 23, 1945.

Re: Canadian Pacific Railway Company and Brotherhood of Railroad Trainmen (Dining Car Service Employees).

Reasons for Decision

By Finding and Direction of March 8, 1944, in Case File N-1397 (L.G., 1944, p. 467), it was provided:

"The National War Labour Board hereby directs Canadian Pacific Railway Company, with effect from March 15, 1944, to inaugurate for the employees covered by the application, the practice of payment at the rate of time and one half, on the minute basis to the nearest fifteen minutes, for all work required to be performed on those assignments in which the time in transit exceeds twenty-four hours and an employee is not relieved from duty for at least nine hours between the serving of dinner and breakfast—such time between the actual time of release from duty and nine hours shall be considered as overtime, and for the purpose of calculating overtime rate the working month is to be considered one of two hundred and forty hours.

This decision is reviewable upon the application of either of the parties upon application on or after September 15, 1944."

By further Finding and Direction dated August 8, 1944 in case File 2N-250, it was provided:

"Two hundred and forty hours' service, or less, in assigned service, shall constitute a basic month's work. All time worked in excess of two hundred and forty hours will be paid for as overtime on the actual minute basis at pro rata rate.

"With the understanding that the above mentioned directive is not to apply concurrently with that issued by the National War Labour Board under date of March 8, 1944, for the same period of time worked by any employee."

Pursuant to the provision for review after the first six months in the Finding and Direction of March 8, 1944, the Company now requests that that Finding and Direction be set aside and that rule 5 (a) in the agreement negotiated between the parties, dated September 15, 1944, cover all overnight travel whether the run is more or less than twenty-four hours. The Union opposes the application and contends that rule 5 (a) refers only to overnight travel of less than twenty-four hours.

The rule is as follows:

"Rest or off-duty period as applied to long haul runs involving overnight travel shall be between the hours of 10 p.m. and 6 a.m., excepting the Third Cook's hours of rest shall be from 10 p.m. to 5 a.m., and any duties performed during rest periods shall be paid for at pro rata rates. This will be included in the monthly guarantee."

In effect, the Company wishes to eliminate special provisions for overtime pay in relation to those assignments in which the time in transit exceeds twenty-four hours on the ground that it introduces a new feature unknown in any other railway agreements; that it is discriminatory, difficult to control, and estimates that in the light of its experience since March 15, 1944, it would cost approximately One Hundred Thousand (\$100,000.00) Dollars extra per year.

The Union desires the retention of the clause on the ground that by its punitive provisions it would tend to provide the employees with an adequate and needed rest period and when such is not obtained would give them additional compensation in lieu thereof.

It is admitted by both parties that when the Union made the application which resulted in the Finding and Direction of March 8, 1944, it was understood that Article 5 (a) above referred to was to cover *all* long haul runs. The Union, however, states that at that time it was asking for a 208-hour basic month's work, and as a 240-hour basic month was awarded they felt that the special provisions for runs over 24 hours as temporarily granted on March 8, 1944, should be retained. It is common ground that when the agreement of September 16, 1944, was signed, the Company stated it would apply to have this Finding and Direction set aside, and that the Union intimated that it would oppose the application.

It is to be noted that all these employees are monthly rated, that all the runs are bid in on the usual seniority basis and that prior to March 8, 1944, there was no basic work month. The Reasons for Decision in Case File N-1397 make it quite clear that the Board was of

the opinion that, as a temporary measure, some provision should be made to compensate those employees who were deprived of a reasonable night rest period, and, therefore, directed a time and one-half rate for such lost rest time for a trial period of six months with leave to either party to apply thereafter.

Subsequently, and before the six months period had elapsed, a further application was made by the Union, and the Finding and Direction of August 8, 1944, established a work month of 240 hours service or less on assigned runs with payment for overtime at a pro rata basis.

An analysis of the long-haul overnight runs (of which there are 9) shows that in three cases the normal service runs per month are in excess of 240 hours, and it follows that the employees on these runs benefit by the establishment of the 240-hour month; that four are between 230 and 240 hours, in all of which cases a small amount of extra work would result in the payment of overtime; and in the remaining two cases the periods are 211 hours 25 minutes and 214 hours and 42 minutes per month, and in these last two cases the normal lay-over hours at home stations are 92 hours 40 minutes and 98 hours 45 minutes, respectively for an average of 4 and $3\frac{1}{2}$ trips per month. On the other seven runs the lay-over varies from 47 hours to 104 hours. The table also indicates that the normal hours per outbound trip are in excess of 24 hours in five cases, and in four cases on the home bound trip. It is to be noted also that reporting time, station detention time and late time are added to the scheduled time in computing the total monthly hours of service. In addition by the Decision in Case File

2N-512, the employees received an increase of \$12.48 per month effective on September 15, 1943.

The permanent retention of the special provisions contained in the Finding and Direction of March 8, 1944, is not in our view warranted. Increases in basic rates and a basic work month of 240 hours have been provided for since that date. In addition, it would incorporate into the System a provision not known in other Railroads, and a principle differing from that governing the service of passenger trainmen in the System, which principle is as follows:

"Any work incident to the service of an assignment in addition to that necessary to make up the minimum monthly guarantee shall be paid for."

Under normal conditions the employees have a reasonable night rest period, but due to the pressure of increased travelling in war time they have to work extra hours on many occasions. But in view of the improvements already mentioned, the comparatively long rest periods at home stations, and that the provision contained in Finding and Direction of March 8, 1944, is not found in any other Railroad and is not consistent with that applicable to the passenger trainmen, we are of the opinion that Article 5 (a) of the agreement of September 16, 1944, should be applicable to all long haul runs whether over or under 24 hours.

The application of the Company is, therefore, allowed and the Finding and Direction contained in Case File N-1397, dated March 8, 1944, will be set aside as and from April 1, 1945.

Finding and Direction will issue accordingly.

March 23, 1945.

**Re: The Greater Vancouver Plastering and Lathing Association and
The Operative Plasterers' and Cement Finishers' International
Association, Local 779.**

Reasons for Decision

This is an application by employer and employee associations for leave to appeal from a decision of the Regional Board for British Columbia dated December 21, 1944 by which that Board, on a joint request to authorize an increase in the rate for journeymen plasterers from \$1.06 $\frac{1}{2}$ to \$1.25, allowed an increase of $3\frac{1}{2}$ cents bringing the rate to \$1.10 per hour. Leave to appeal was refused by the Regional Board and we think that on the material presented below the application for leave was properly dealt with by the Regional Board. However, the solicitor for the appellants now introduces a new contention, namely that by virtue of an agreement

entered into on October 3, 1941 (prior to the first control order P.C. 8253) the wage rate of \$1.25 is "legally payable". So that this additional argument may be considered and as it involves a new question, we are of the opinion that leave should be granted.

Under the alleged agreement increases were to be granted progressively beginning on December 1, 1941 until the \$1.25 rate was reached on June 1, 1942. The Wartime Wages and Cost of Living Bonus Order (P.C. 8253) became effective on November 15, 1941 and it provided that no employer could increase wage rates without the permission of a war labour board. No applications were made either under that order or its successor P.C.

5963 (July 15, 1942) for approval to pay the said increases, nor were any increases in fact given by the employers.

Assuming that there was a binding agreement entered into on October 3, 1941, which is not altogether clear from the evidence, nothing having been done to implement it until the application to the Regional Board on December 1, 1944 (three years later), it would seem that there had been a waiver of its provisions and that the agreement should not be considered now as being a relevant factor in the case.

In any event, under the present order (P.C. 9384) the parties must establish a "gross injus-

tice or gross inequality". It is argued in that regard that the rate for plasterers should be allowed to go back to the 1932 level in line with most other trades in the construction industry in the area. The Regional Board felt that to permit an increase beyond what would be necessary to make up the maximum cost of living bonus (section 20 (1) (b)) would have an unstabilizing effect on the rate structure in that industry. We think that the Regional Board's decision should be sustained.

Finding and Direction will issue accordingly.

March 23, 1945.

Medical Care Organizations in United States

Between four and five million persons in the United States participated in prepayment medical care organizations in 1943, according to a report published by the U.S. Social Security Board. The estimate excludes plans designed solely to meet costs of hospitalization and plans providing cash benefits only. Industrial plans accounted for slightly less than a million and a half of the persons covered.

Data was furnished to the Board by 214 organizations, with the membership divided as follows:

	<i>Industrial Plans</i>	<i>All Plans</i>
No. of organizations...	113	214
No. of subscribers....	866,014	1,786,025
Dependents	318,261	1,170,761
Total	1,184,275	2,956,786
Total including those eligible on reduced- fee basis	1,425,325	3,320,408

In regard to industrial medical care plans, the report states that in a few cases the industry itself has established and financed the program and has required no contribution from employees, even when their dependents were included. "Much more frequently, employees, with or without employer co-operation, have set up their own prepayment medical care plans. These plans have usually been sponsored by Employee Mutual Benefit Associations, originally established to provide, among other benefits, financial assistance to employees and their families during severe illness or when death occurred."

Most plans impose one or more coverage restrictions, the report states, mainly as to age and income levels. Of the industrial plans, a large number require physical examinations on entrance and a few have age or income limitations; only 18 of the 113 organizations of this type are without any such membership restrictions, but each is limited, by definition, to coverage of a more or less homogeneous group of employees.

Prepayment organizations vary greatly in the combinations of services provided, and many different limitations are placed on the amount of care furnished. Some organizations limit the total money value of the services that may be received for a single illness or in a single year; some make a separate charge for the first care received in each illness, or for the first or all home calls; almost all limit the number of days of hospital care provided under the prepayment plan and many exclude care for particular classes of illness.

More than 65 per cent of the persons eligible for care under these 214 plans in 1943 were entitled to receive physicians' care in the office, home, and hospital for medical and surgical cases and hospitalization for other than excluded illnesses. Almost three-fourths of all eligible persons (73.5 per cent) were entitled to hospitalization as one of the services provided. A few organizations provided fairly comprehensive dental services.

The report summarizes each of the plans, including eleven Canadian plans.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for six days during the month of March. During the month the Board received fourteen applications, held twenty-one hearings, issued twenty certificates designating bargaining representatives, rejected an application for certification and gave decisions in four appeal cases.

Certificates Issued

(1) *International Association of Machinists, Lodge 1848, and Hudson Bay Mining and Smelting Company Limited, Flin Flon, Manitoba* (L.G. Oct., 1944, p. 1221). The Union and Messrs. Gordon Wilkinson, Daniel Forshaw and Arthur Leblanc were certified as bargaining representatives, for all the shift bosses, machinists, machinist helpers, machinist apprentices, floor machinists, floor machinist helpers, head gas mechanics, radial drill press operators, shop handyman, outside repairmen, hammermen, blacksmiths and their helpers,

special Turner apprentices and special fitter apprentices in the Machine Shop; steam fitters, pipe fitters and their helpers and plumbers in the Pipemen's and Plumbers' Department, including the pumpman at Cliff Lake; repairmen and drill steel temperers in the Drill Steel Shop; the foremen of the Bell Making Plant; repairmen, repair helpers and mechanics in the Concentrator Department; special repairmen, repairmen and repair helpers in the Zinc Leaching Department; head repairmen, repairmen and repair helpers in the Copper Smelter Department of the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Manitoba. Repair foremen in the Concentrator and Zinc Leaching Departments were excluded from the bargaining unit. Certification followed a public hearing and the conducting of a representation vote of the employees affected by an officer of the Board.

(2) *International Brotherhood of Electrical Workers, Local B-1405 and Hudson Bay Mining and Smelting Company Limited, Flin Flon, Manitoba*, (L.G. Oct. 1944, p. 1221). Following a public hearing and the conducting of a representation vote of the employees affected, by an officer of the Board, the Union and Messrs. H. C. Tracy, Peter McSheffrey and Howard Bayley were certified as bargaining representatives for all the electricians, electrician linemen, electrician helpers, hoistmen 1st, and battery attendants in the Mine Department; shovel operators, shovel oilers, and locomotive engineers in the Open Pit Department; mill cranemen in the Concentrator Department; cranemen in the Bedding Bins (Smelter) Department; cranemen, slag motormen in the Copper Smelter Department; Cottrell helpers, Cottrell foremen, Cottrell operators, shop cranemen in the Machine Shop; power-house swing engineers, engineers 1st, shift engineers 1st, compressor operators in the Turbines, Air and Heating Department; electricians, linemen, electrician helpers, winders, electric probationers, steel rail bond welders, electrical apprentices, electrical engineers, mine electrical foreman, line foreman, sub-station operators, electric shop jigger boss, plant electrician sub foreman, and chief maintenance foreman in the Zinc sub-station in the Electrical Department; and the coal plant operator, in the Coal Pulverizer, employed by the Hudson Bay Mining and Smelting Co. Limited.

(3) *International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America, Local 451, and Hudson Bay Mining and Smelting Company Limited, Flin Flon, Manitoba*, (L.G. Oct. 1944, p. 1221). The Union and Messrs. A. M. Milligan, S. Finley, W. Hinde and Wilfred C. Forsyth were certified as bargaining representatives for all the boilermakers, punch and shear operators, 1st boilermaker helpers, acetylene and electric welders, electric welders, boilermaker apprentices, electric welding apprentices, tinsmiths and tinsmith helpers in the Machine Shop; head rigger, riggers and coal plant operators in the Surface and Transportation Department; and the pumpman in the Open Pit Department of the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Manitoba. Certification followed a public hearing and the conducting, of a representation vote of the employees affected, by an officer of the Board.

(4) *United Brotherhood of Carpenters and Joiners of America, Local 1779, and Alberta Nitrogen Products Limited, Calgary, Alberta*, (L.G. Jan. 1945, p. 35). Following the taking of a representation vote of the employees

affected, by an officer of the Board, the Union and Messrs. R. E. Sells and David Poffenroth were certified as bargaining representatives for the Carpenters employed by the Alberta Nitrogen Products Limited, Calgary, Alberta.

(5) *Deepsea and Inlandboatmen's Union, Pacific Coast District, Canadian Seamen's Union and Stone Brothers, Port Alberni, B.C.*, (L.G. Feb. 1945, p. 154). The Union and Messrs. Harry Sipes and George Bogard were certified as bargaining representatives for the unlicensed crew personnel of vessels operated by Stone Brothers at Port Alberni, B.C. Certification followed an investigation of the application by an officer of the Board.

(6) *Calgary Power Employees Association and Calgary Power Company Limited, Calgary, Alberta*, (L.G. Jan. 1945, p. 36). Following a representation vote of Professional Engineers of the Company and an investigation of the application by an officer of the Board, the Association and Messrs. L. I. Johnston, Leonard Bullard, Stephen Phillips, Kenneth Miller and Donald C. MacIntosh were certified as bargaining representatives for the employees of the Calgary Power Company Limited, Calgary, Alberta. Excluded from the bargaining unit were district supervisors, plant superintendents, construction supervisors, safety and first aid supervisor, payroll clerks, purchasing agent, assistant purchasing agent and watchman.

(7) *Flin Flon Base Metal Workers' Federal Union No. 172 and Hudson Bay Mining and Smelting Company Limited, Flin Flon, Man.* (L.G. Oct. 1944, p. 1221). The Union and Messrs. Carl E. Berg, S. Crerar, W. Waugh, L. Chisholm, F. Blake, A. McMillan, R. M. Bennett, J. Neilson, J. R. Coles, W. Shomperlen, L. K. Howe and R. Kingsley were certified as bargaining representatives for underground and surface miners and labourers, various classifications of employees employed in non-craft occupations and certain classes of office and clerical employees in the following department: mine, open pit, crusher, concentrator, zinc roaster, tank house, zinc casting, cadmium plant, bedding bins, copper smelter, machine shop, drill steel shop, ball making plant, surface and transportation, coal pulverizer, warehouse and track scale, stewards, turbine air and heating and Flin Flon office clerical department. Certification followed a public hearing and the conducting of a representation vote of the employees affected by an officer of the Board.

(8) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company, B.C. Lakes and River Service* (L.G., Jan., 1945, p. 36). Following a repre-

sentation vote of the employees affected, conducted by an officer of the Board, the Union and Messrs. J. L. Pateman and A. Mose were certified as bargaining representatives for the employees of the B.C. Lakes and River Service, Canadian Pacific Railway Company, employed in maintenance and repair of vessels in shipyards at Nelson, Nakusp, and Okanagan Landing, B.C. The master builder and foreman were excluded from the bargaining unit.

(9) *The Hotel and Restaurant Employees International Alliance and Bartenders' International League of America, Local 724, and Canadian National Railways, Bessborough Hotel, Saskatoon, Saskatchewan* (L.G. Feb. 1945, p. 154). The Union and Messrs. F. Balcombe, M. Strobbe, A. Young, W. J. Smith, Miss E. A. Ell, and Miss O. Bowman were certified as bargaining representatives for the employees of the Bessborough Hotel, Canadian National Railways, Saskatoon, Saskatchewan. Excluded from the bargaining unit were certain employees who were considered to be employed in the hotel in a supervisory or confidential capacity. Certification followed a public hearing and an investigation of the application by an officer of the Board.

(10) *The Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 275, and the Vancouver Hotel Company, Limited, Vancouver, B.C.* (L.G. February, 1945, p. 154). Following a public hearing and an investigation of the application by an officer of the Board the Union and Messrs. E. Tarlier, S. C. Harrison, J. M. Egan, J. J. Vance, H. A. Allison and Mrs. F. E. Rice were certified as bargaining representatives for the employees of the Vancouver Hotel Company, Ltd., Vancouver, B.C. Certain employees who were considered by the Board to be employed in a supervisory or confidential capacity were excluded from the bargaining unit.

(11) *The Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 276, and the Canadian Pacific Railway Company, Empress Hotel, Victoria, B.C.* (L.G. Feb. 1945, p. 154). The Union and Miss May Foster and Messrs. A. E. Verronneau, Arthur Crewe and Hugh A. Allison were certified as bargaining representatives for the employees of the Empress Hotel of the Canadian Pacific Railway Company, Victoria, B.C. The Board excluded from the definition of the bargaining unit certain employees who were considered to be employed in a supervisory or confidential capacity. Certification followed a public hearing and an investigation of the application by an officer of the Board.

(12) *The Hotel and Restaurant Employees' International Alliance and Bartenders' Inter-*

national League of America, Local 662 and the Canadian National Railways, Nova Scotian Hotel, Halifax, N.S. (L.G. March, 1945, p. 290). Following a public hearing and an investigation of the application by an officer of the Board, the Union and Messrs. George Smith, A. R. Johnstone, Raymond Helpard, Roderick McRae, Stanley Metie and the Misses Thelma Cameron and Bertha Briand were certified as bargaining representatives for the employees of the Nova Scotian Hotel, Canadian National Railways, Halifax, N.S. Certain employees who were considered by the Board to be employed in a supervisory or confidential capacity were excluded from the bargaining unit.

(13) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 273, and the Palliser Hotel of the Canadian Pacific Railway Company, Calgary, Alta.* (L.G. March 1945, p. 290). The Union and Messrs. H. A. Chappell, Ray Clarke Noble, and James Lowell Gray were certified as bargaining representatives for the employees of the Palliser Hotel of the Canadian Pacific Railway Company, Calgary, Alberta. The Board excluded from the definition of the bargaining unit certain employees who were considered to be employed in a supervisory or confidential capacity. Certification followed a public hearing and an investigation of the application by an officer of the Board.

(14) *The Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 192, and the Canadian National Railways (Montreal Stockyards Company), Montreal, P.Q.* (L.G. March 1945, p. 290). Following an investigation of the application by an officer of the Board the Union and Messrs. A. R. Mosher, J. E. McGuire, S. H. Eighteen, W. J. Smith, John Yates and Maurice Lacroix were certified as bargaining representatives for the employees of the Canadian National Railways (Montreal Stockyards Company), Montreal, P.Q. Excluded from the bargaining unit were the superintendent, accountant, chief clerk and three foremen.

(15) *Rolling Mill Employees' Federal Union, Local 23180 (A.F. of L) and Dominion Bridge Company, Limited, (Calgary Rolling Mill Department), Calgary, Alberta.* (L.G. Jan. 1945, p. 36). Following an investigation of the application by an Officer of the Board, the Board certified the union and Messrs. Robert Scott, James Curr, Percy Howard and Herbert Dear as bargaining representatives for all roughers, stranners, catchers, finishers, edgers, hotbed men, billet boys, heaters, spell heaters, run-downs, stockers, cinder men, yard stockers, shear men, melters, furnace helpers, pitmen, ladlemen, cranemen, weighmen, un-

loaders, assistant rollers, pullover men, inspectors, mechanics' helpers, blacksmiths and blacksmiths' helpers, carpenters, storekeeper, machinist, bricklayer's helper, power room helpers, electrician, pipefitter helper, watchmen and all other labour in the plant not having the authority to hire or discharge. Excluded from the bargaining unit were shipping foremen, time-keeper, (O.H.), time-keeper's helper, laboratory assistants, yard office clerk and shipping clerk.

The Rolling Mill Employees' Federal Union, Local 23180 (A.F. of L.) were certified on November 23, 1944 (L.G. Dec. 1944, p. 1481) for certain of the classifications mentioned above but the union desired to include additional classifications in the bargaining unit and therefore submitted a new application. In certifying the bargaining representative, the Board directed that a revised certificate be issued, consolidating that issued under date of November 23, 1944.

(16) *Brotherhood of Sleeping Car Porters and Canadian Pacific Railway Company, Montreal, P.Q.* (L.G. March, 1945, p. 289). The Brotherhood and Messrs. A. Philip Randolph, Bennie Smith, S. R. Lewis, Victor I. Coward, V. I. Petgrave, A. R. Blanchette, P. T. Clay and W. J. McLaughlin, were certified as bargaining representatives for the sleeping car porters of the Canadian Pacific Railway Company employed on all types of sleeping cars, including:—"Tourist", "Grand", "Lake", "Compartment", "Cape", "Mount", "Fort", "Bay" cars and other types of sleeping cars with beds or berths, including parlour cars. Certification followed an investigation of the application by an Officer of the Board.

(17) *British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers' International Union of North America (A.F. of L.) and British Columbia Packers Limited, Vancouver, B.C.* (L.G. February, 1945, p. 154). Following the conducting of a representation vote by an Officer of the Board, in which the applicant union was supported by all the eligible employees, the Board certified the Union and Messrs. H. Murphy, J. Scotland, G. Markey, D. Joyce and M. Deeley as bargaining representatives for the unlicensed personnel in the deck, engine room, and steward's departments of the Motor Vessels "Teco" and "P.W." operated by British Columbia Packers Limited, Vancouver, B.C.

(18) *International Longshoremen's and Warehousemen's Union, Local No. 503 and Empire Stevedoring Company Limited, Vancouver, B.C.* (L.G. March, 1945, p. 290). The Union and Messrs. Ben Welch, Cal Cook,

Austin Smith, Roscoe Craycraft and Steve Glumaz were certified as bargaining representatives for the Longshoremen employed at Port Alberni, B.C. by the Empire Stevedoring Company Limited, Vancouver, B.C. Foremen were excluded from the bargaining unit. Certification followed an investigation of the application by an officer of the Board.

(19) *International Longshoremen's and Warehousemen's Union, Local No. 503 and Canadian Stevedoring Company Limited, Vancouver, B.C.* (L.G. March, 1945, p. 290). Following an investigation of the application by an officer of Board, the Board certified the Union and Messrs. Ben Welch, Cal Cook, Austin Smith, Roscoe Craycraft and Steve Glumaz as bargaining representatives for the Longshoremen employed by the Canadian Stevedoring Company Limited, Vancouver, B.C. Foremen were excluded from the bargaining unit.

(20) *Canadian Seamen's Union, Pacific Coast District and Straits Towing and Salvage Company Limited, Vancouver, B.C.* (L.G. March, 1945, p. 290). The Union and Messrs. J. M. Smith, G. Bogerd and H. Sipes were certified as bargaining representatives for the unlicensed crew members in the deck, engine room and steward's departments on vessels operated from Pacific Coast ports by the Straits Towing and Salvage Company Limited, Vancouver, B.C. Masters, mates and engineers were excluded from the bargaining unit.

Application for Certification Rejected

Northern Manitoba Mine Mill and Smelter Workers Union, Local 812 of the International Union of Mine, Mill and Smelter Workers and Hudson Bay Mining and Smelting Company Limited, (L.G. Sept. 1944, p. 1109). Following a public hearing the Board decided that the application for certification of bargaining representatives could not be entertained for the reason that it had not been shown that the applicant Union acted with the authority of the majority of the employees affected.

Applications for Certification under Investigation

(1) Brotherhood of Railroad Trainmen, on behalf of dining car employees of the Northern Alberta Railways, Edmonton, Alta.

(2) Canadian Seamen's Union, Pacific Coast District, on behalf of the unlicensed crew members in deck, engine room and steward's department of the vessels operating from

Pacific coast ports of the Vancouver Tug and Barge Company, Limited, Vancouver, B.C.

(3) The National Catholic Syndicate of Roberval Saguenay Railway Company Employees, on behalf of employees in station, track train, shop, repairs, maintenance, office, etc., of the Roberval Saguenay Railway Company, Arvida, P.Q.

(4) Seafarers' International Union of North America, on behalf of the unlicensed personnel in deck and engine room departments of the British Columbia Coast Steamship Service of the Canadian Pacific Railway Company, Vancouver, B.C.

(5) International Longshoremen's Association, Local 38-164, on behalf of all longshoremen, excluding foremen employed by the Empire Stevedoring Company, Limited, Vancouver, B.C., in the Chemainus District from Crofton, South, to Nanoose Bay, North, including Nanaimo and Lady Smith.

(6) The International Longshoremen's Association, Local 38-164, on behalf of all longshoremen, excluding foremen employed by the Canadian Stevedoring Company, Limited, Vancouver, B.C., in the Chemainus District from Crofton, South, to Nanoose Bay, North, including Nanaimo and Lady Smith.

(7) The Brotherhood of Maintenance of Way Employees, on behalf of the section crews of the Thousand Islands Railways, Gananoque, Ont., subsidiary of the Canadian National Railways, Montreal, P.Q.

(8) The Seafarers' International Union of North America (Vancouver Branch) Pacific District (A.F. of L.) on behalf of the unlicensed personnel of deck, engine room and steward's department, excluding masters, mates and engineers of the British Columbia Steamships Limited, Vancouver, B.C.

(9) The Brotherhood of Railway Carmen, Canadian National Railway System Federation, No. 11, on behalf of mechanics, mechanic's helpers, station and office cleaners in the Montreal Central Station of the Canadian National Railways, Montreal, P.Q.

(10) The International Brotherhood of Electrical Workers, Local 348 on behalf of linemen in the employ of the City of Medicine Hat, Alta.

(11) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station

Employees, on behalf of shovellers, labourers, experienced labourers, and all monthly rated employees engaged in the operation of the elevator of the Searle Grain Company Limited, Fort William, Ont.

(12) Commercial Telegraphers' Union, on behalf of all the radio officers employed on ships, operated by the Park Steamship Company, Limited, Montreal, P.Q., from the East Coast.

(13) Brotherhood of Painters, Decorators and Paperhangers of America, Local 583 on behalf of the painters employed by the Alberta Nitrogen Products, Calgary, Alberta.

(14) Brotherhood of Railroad Trainmen on behalf of locomotive engineers, firemen, hostlers, locomotive crane operators and firemen, yard masters, assistant yard masters, yard conductors and yard brakemen of the National Harbours Board (Railways) Quebec Division, Quebec, P.Q.

Decision of Board in Appeal Cases

The Board issued reasons for judgment in the following cases:

1. International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO), Locals 222, 195 and 199, appellants and General Motors of Canada, Limited, Oshawa and Windsor, Ontario and McKinnon Industries Limited, St. Catharines, Ontario, respondents.

2. International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO), Locals 195 and 127, respondents and the Canadian Bridge Company Limited, Plant No. 3, Windsor, Ontario and Gotfredson Limited, Windsor, Ont., and Chrysler Corporation of Canada Limited, Plant No. 4, Chatham, Ontario, appellants.

3. United Mine Workers of America, District 26, respondents and Sydney and Louisburg Railway Company, Sydney, N.S., appellants.

4. American Newspaper Guild (CIO) respondent, and the Star Publishing Company of Windsor, Limited, Windsor, Ontario, appellant.

The text of the Board's reasons for judgment in the various cases appears below.

Between: International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 222, Applicant Appellant, and General Motors of Canada, Limited, Oshawa, Respondent, and Between: International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 195, Applicant Appellant, and General Motors of Canada, Limited, Windsor, Respondent, and Between: International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 199, Applicant Appellant, and McKinnon Industries Limited, St. Catharines, Respondent

The Board consisted of all members except the Vice-Chairman.

Reasons for Judgment of the Chairman and Mr. Harmegnies

These are three appeals from the Ontario Labour Relations Board which involve the same issue and were argued together. The Ontario Board refused to intervene and refer the matter to the Minister pursuant to section 11 of the regulations. The union alleges that in December, 1944, it negotiated for the renewal of the collective agreement within the period of two months prior to the expiry date of the collective agreement in each case, pursuant to section 16 of the regulations, and contends that the Ontario Board should have intervened and referred the matter to the Minister.

The contracts differ from the contract in the Canadian Bridge Company's case in that they are primarily for the duration of the war. The Ontario Board gave no Reasons for Judgment but made it clear, during the course of the hearing, that in its view negotiations for renewal before the end of the war were premature. We agree with this finding. We would dismiss the appeal.

(Sgd.) G. B. O'CONNOR,
Chairman.

RENE HARMEGNIES.

Between: International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 195 Applicant Respondent and The Canadian Bridge Company Limited, Plant No. 3, Appellant and Between: International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 195 Applicant Respondent and Gottfredson Limited Appellant and Between: International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 127 Applicant Respondent and Chrysler Corporation of Canada, Limited, Plant No. 4, Chatham, Ontario Appellant

The Board consisted of all members except the Vice-Chairman.

Reasons for Judgment

These are three appeals from the Ontario Labour Relations Board which involve the

Reasons for Judgment of Messrs. Hills, Deschamps, Complin and Taylor

As parties to the majority decision in these cases we are of course in agreement with the Chairman in the result but we cannot agree with his reasons.

We are satisfied that the requirements of section 16 (1) of the amended regulations have not been met in these cases and, consequently, we are unable to find any acceptable reason which supports the view that the Ontario Board should have arrived at a different decision.

The appeals will be dismissed.

A. J. HILLS,
A. DESCHAMPS,
E. R. COMPLIN,
H. TAYLOR.

March 27, 1945.

same issue and were heard together. In each case, the Ontario Board intervened and referred the matter to the Minister, pursuant to section 11 of the regulations.

Clause 18 of the collective agreement of the Canadian Bridge Company Limited is as follows:

This agreement shall continue in full force and effect until the 30th day of September, 1944, and from year to year thereafter unless between the 1st of August and the 15th of August, 1944, or between the 1st of August and the 15th of August of any year thereafter either the Company notifies the committee or the committee notifies the Company of its desire to terminate the agreement and thereupon the agreement shall terminate as of the 30th day of September of the year in which the notice is given. Between 1st August and 15th August, 1943, or between 1st August and 15th August of any year thereafter the Company may notify the committee or the committee may notify the Company of its desire to amend the agreement in which event the notice shall set forth the nature of the amendments desired. If the parties are unable to agree upon the proposed amendments on or before the 30th day of September in any such year the proposed amendment shall not come into effect. Any amendments which may be agreed upon shall become a part of the agreement without modifying or changing any of the other terms of the agreement save as may be necessary to give full effect to the amendments.

The duration clause in the collective agreements with the other appellants is similar except as to dates. Counsel for the employers contended that the Ontario Board was wrong in intervening and referring the matter to the Minister because negotiations for the renewal of the collective agreement were unnecessary since, under the above provision, the agreement is automatically renewed unless terminated by either party. In its Reasons for Judgment in the first Motor Products case on September 2, 1944, this Board adopted the view of the Ontario Board "that an automatic renewal clause, such as that contained in the agreement under consideration, is inconsistent with the regulations and cannot operate as a bar to intervention of the Board pursuant to a request made by the union". This Board repeated the same statement in its judgment in the Motor Products case on January 30, 1945. Counsel for the employers contends that the said judgments are erroneous and interprets our judgment of January 30, 1945, as meaning that if either party seeks amendment of an agreement that action is equivalent to bringing about the expiry date of the agreement. We did not so hold.

The question at issue depends to a large extent upon the interpretation of the words "negotiations for the renewal of the agreement" in section 16 of the regulations. Renewal has at least two meanings. It may mean renewal on the same terms or renewal with amendment or variation. Clearly in regulation 16 it means renewal with amendment because there would probably be no necessity of negotiations for a renewal on the same terms and certainly there would be no need of a conciliation officer or of a concilia-

tion board's services which are made available for negotiations for the renewal by sub-section 2 of section 16.

But, then, it is contended that there can be no negotiations for the renewal of the agreement "within the period of two months prior to the expiry date" as provided by section 16 because there is no expiry date in the agreement. In the Canadian Bridge case the Ontario Board found that negotiations began on September 19, 1944, and continued on September 20, 22, 23 and 25, 1944. They held "Clause 18 of the agreement sets out in express terms an expiry date, namely September 30, 1944".

This Board has twice come to the same conclusion in its judgments in the Motor Products case where the duration clause was identical with the duration clauses in question here except as to dates. We are not overlooking the fact that the expiry date of September 30, 1944, in the Canadian Bridge case is not absolute but contingent on previous notice to terminate the agreement, but by the terms of the duration clause the parties themselves fixed September 30 as the expiry date of negotiations for amendment and renewal of agreement.

It would be unreasonable to say that while the parties fixed September 30 as the expiry date of their negotiations for renewal, this Board should not find that it is the expiry date for negotiations for renewal under section 16 of the regulations.

This Board concurs in the finding of the Ontario Board as to the expiry date. To hold that there was no expiry date and that the agreement must continue until terminated by notice without right to conciliation in negotiations for renewal would not be consistent with the avowed purpose of the Wartime Labour Relations Regulations, namely "That differences between employers and employees should be settled by peaceful means."

The appeals are dismissed.

Respondents.

March 27, 1945.

Between: United Mine Workers of America, District 26, Applicant Respondent, and Sydney and Louisburg Railway Company, Appellant

The Board consisted of all members except the Vice-Chairman, Messrs. Harmegnies, Complin and D'Aoust.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application for leave to appeal and an appeal from a decision of the Nova Scotia Labour Relations Board certifying the bargaining representatives elected by the United Mine Workers of America, District 26, for the section men of the Sydney and Louisburg Railway Company.

The appellant contends that the section men are not separately organized into a trade union pertaining to a craft within sub-section 4 of section 5 of the regulations.

Section 25 (1) of the regulations provides that the Board shall decide and its decision shall be final and conclusive upon the question as to whether "the unit of employees appropriate for collective bargaining is the employer unit, craft unit, plant unit or a subdivision thereof." Under this section, the Nova Scotia Board has decided that the unit

of employees appropriate for collective bargaining is the section men employed on the railway, that is a sub-division of the employer unit.

Sub-section (1) of section 8 of the regulations provides that "where the Board is satisfied that the bargaining representatives have been duly elected or appointed, it shall certify them as bargaining representatives. . . ." Once the Board is satisfied that the bargaining representatives have been duly elected or appointed and that the unit of employees concerned is one which is appropriate for collective bargaining, the Board must certify bargaining representatives without regard to the bargaining agency by which they have been elected or appointed.

Leave to appeal will be granted but the appeal is dismissed.

Chairman.

L. A. Forsyth, Esq., K.C., for Appellant;
J. L. Cohen, Esq., K.C., Adam Scott, Esq.,
for Applicant Respondent.

March 27, 1945.

Between: American Newspaper Guild (CIO), Applicant Respondent, and The Star Publishing Company of Windsor, Limited, Windsor, Ontario, Appellant

The Board consisted of all members except the Vice-Chairman and Mr. Harmegnies.

Reasons for Judgment

The Judgment of the Board was delivered by the Chairman.

This is an appeal by the employer from that portion of the direction of the Ontario Labour Relations Board establishing a bargaining unit which excludes truck drivers. The application of the union for certification excludes those employees "who are within the established jurisdiction of, or are members of *bona fide* active craft unions . . ." The Windsor Local of the International Brotherhood of Teamsters, Warehousemen, Chauffeurs and Helpers of America claims jurisdiction over truck drivers in the Windsor district but this Board expresses no opinion as to whether it is a craft union. At the hearing before the Ontario Board, truck drivers were not mentioned. Counsel for the employer assumed that they would not be excluded. Counsel for the union, at the request of the Ontario

Board, ascertained that the International Brotherhood of Teamsters, Warehousemen, Chauffeurs and Helpers of America claimed it had established jurisdiction over all truck drivers in the Windsor district and so advised the Ontario Board. The Ontario Board, apparently relying upon the above-mentioned exclusion in the application, did not include the truck drivers in the bargaining unit and no opportunity was given to the employer to make further representations.

Counsel for the union stated that he was also appearing for the Windsor Local of the International Brotherhood of Teamsters, Warehousemen, Chauffeurs and Helpers of America who had not previously intervened because the application, in their view, excluded truck drivers. He contended that the inclusion of truck drivers in the bargaining unit and the collective agreement to be negotiated might lead to a jurisdictional dispute; that the American Newspaper Guild had excluded from the application these employees and that the

Ontario Board was right in excluding them since a union should not be obliged to negotiate for employees for whom it did not wish to act.

This Board is of the opinion that in fixing the unit of employees appropriate for collective bargaining, it is not limited by the expressed wishes of either the union or the employer.

Leave to appeal will be granted. The appeal will be allowed and the truck drivers will be included in the bargaining unit.

(Sgd.) G. B. O'CONNOR,
Chairman.

G. P. Dickson, Esq., and J. B. Aylesworth, Esq., K.C., for Appellant; J. L. Cohen, Esq., K.C., for Applicant Respondent.

March 27, 1945.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiation for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdiction. A Conciliation Officer is then appointed to confer with the parties and endeavour to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During the past month reports were received from twelve Boards of Conciliation:—

Concerning Steel Company of Canada (Canada Works) Hamilton, Ont., and Local 3250, United Steelworkers of America.

Concerning Miramichi Lumber Company Limited, Minto, N.B., and Local 7409, United Mine Workers of America.

Concerning Granby Consolidated Mining and Smelting and Power Company Limited, Copper Mountain, B.C., and Local 649, Copper Mountain Miners' Union, International Union, Mine, Mill and Smelterworkers.

Concerning Fairchild Aircraft, Limited, Noorduyn Aviation Limited & Canadian Vickers, Limited, Montreal, and International Association of Machinists, Lodge 712.

Concerning Empire Brass Company Limited and Pumps & Softeners Limited, London, Ontario, and Local 2699, United Steelworkers of America.

Concerning Willard Storage Battery Company of Canada, Ltd., and United Electrical, Radio and Machine Workers of America, Local 512.

Concerning International Harvester Co., of Chatham, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, UAW-CIO.

Concerning Island Mountain Mines, Ltd., Wells, B.C., and Wells Miners' Union, Local No. 685, International Union of Mine, Mill and Smelter Workers.

Concerning Westminster Foundry Ltd., New Westminster, B.C., and Local 3254, United Steelworkers of America.

Concerning Cannery Machinery Limited, Simcoe, Ontario, and Local 257, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

Concerning Campbell's Soup Company Limited, New Toronto, Ont., and United Packinghouse Workers of America.

Concerning Andrews Wire Works of Canada, Limited, Watford, Ont., and Local No. 2, Federation of Industrial Workers Union.

Boards Fully Constituted

During March eight Boards of Conciliation were fully constituted:—

Thompson Brothers Machinery Company Limited, Liverpool, N.S.—The Board of Conciliation established to deal with a dispute between Thompson Brothers Machinery Company Limited, Liverpool, N.S., and Federated Council of Thompson Brothers Machinery Company Limited, was fully constituted on March 21, with the appointment of Honourable Mr. Justice J. H. A. L. Fairweather, Saint John, N.B., as Chairman of the Board who

was appointed by the Minister in the absence of a joint recommendation from the other two members of the Board. Mr. W. P. Potter, K.C., Lunenburg, N.S., and Mr. Clarence Webber, Brooklyn, Queen's County, N.S., were appointed on the nomination of the employer and employees respectively.

Moffats Limited, Weston, Ontario.—The Board of Conciliation established to deal with a dispute between Moffats Limited, Weston, Ontario and United Steelworkers of America, Local 3129, was fully constituted on March 12, with the appointment of Dr. R. MacGregor Dawson, Toronto, Ontario, as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. C. C. Calvin, Toronto, and Herbert Orloff, Toronto, were appointed on the nomination of the employer and employees respectively.

Kootenay Belle Gold Mines, Retallack, B.C.—The Board of Conciliation established to deal with a dispute between Kootenay Belle Gold Mines, Retallack, B.C., and Local 698, Retallack Mine & Mill Workers Union, was fully constituted on March 20, with the appointment of Brigadier Sherwood Lett, Vancouver, B.C., as Chairman of the Board, on the joint recommendation of the other two members of the Board. Mr. R. L. Norman, Vancouver, B.C., and Mr. B. A. Ward, Vancouver, B.C., were appointed on the nomination of the employer and employees respectively.

Ford Motor Company of Canada, Limited, Windsor, Ontario.—The Board of Conciliation established to deal with a dispute between Ford Motor Company of Canada, Limited, Windsor, Ontario and Local 240, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, was fully constituted on March 21, with the appointment of Dr. Cecil A. Wright, Toronto, as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. S. L. Springsteen, K.C., Toronto, and Mr. Bora Laskin, Toronto, were appointed on the nomination of the employer and employees respectively.

Federal Wire & Cable Company Limited, Guelph, Ontario.—The Board of Conciliation established to deal with a dispute between Federal Wire & Cable Company, Limited, Guelph, Ontario, and Local 3021, United Steelworkers of America, was fully constituted on March 22, with the appointment of His Honour Judge J. E. Lovering, Toronto, as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint

recommendation from the other two members of the Board. Mr. E. MacAulay Dillon, K.C., Toronto, and Mr. Herbert Orloff, Toronto, were appointed on the nomination of the employer and employees respectively.

Dominion Bridge Company, Burnaby, B.C.—The Board of Conciliation established to deal with a dispute between Dominion Bridge Company, Burnaby, B.C., and Local No. 1, Boilermakers and Iron Shipbuilders Union of Canada was fully constituted on March 21, with the appointment of Mr. J. Edwin Eades, Vancouver, B.C., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. A. Reg. Macdougall, Vancouver, B.C., and Mr. Lawrence Anderson, Vancouver, B.C., were appointed on the nomination of the employer and employees respectively.

Boeing Aircraft of Canada Limited, Vancouver, B.C.—The Board of Conciliation established to deal with a dispute between Boeing Aircraft of Canada Limited, Vancouver, B.C., and Aeronautical Mechanics Lodge 756, International Association of Machinists was fully constituted on March 20 with the appointment of Mr. Clarence Darling, Vancouver, B.C., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. W. A. Sutton, Vancouver, B.C., and Mr. Birt Showler, Vancouver, B.C., were appointed on the nomination of the employer and employees respectively.

Anaconda American Brass Limited, New Toronto, Ontario.—The Board of Conciliation established to deal with a dispute between Anaconda American Brass Limited, New Toronto, Ontario, and Local 811, International Union, Mine, Mill & Smelter Workers, New Toronto Brass & Copper Workers Union was fully constituted on March 12 with the appointment of Dr. Cecil A. Wright, Toronto, as Chairman of the Board, on joint recommendation of the other two members of the Board. Mr. N. P. Petersen, Toronto, and Mr. Lewis Duncan, Toronto, were appointed on the nomination of the employer and employees respectively.

Boards Established

During March seven Boards of Conciliation were established but not fully constituted.

Concerning Wm. Russell and Sons, Windsor, Ontario, and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America.

Concerning Midland Shipyards Limited, Midland, Ontario and Local Number 9, In-

dustrial Union of Marine & Shipbuilding Workers.

Concerning Massey-Harris Company Limited (Toronto Works) Toronto, Ontario. (Weston Works) Weston, Ontario and (Verity Street and Market Street Works) Brantford, Ontario and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

Concerning H. Krug Furniture Company Limited, Kitchener, Ontario, and Local No. 8, Canadian Aircraft Workers Association.

Concerning Imperial Optical Company, Toronto, Ontario, and Local 514, United Electrical, Radio and Machine Workers of America.

Concerning Dominion Button Company, Kitchener, Ontario, and National Union of Textile Workers.

Concerning Collingwood Shipyards, Collingwood, Ontario, and Local No. 4, Industrial Union of Marine and Shipbuilding Workers.

Agreements Facilitated by Conciliation Officers

In the following cases reports were received from Conciliation Officers indicating the successful conclusion of negotiations and the signing of an agreement:

Concerning Weatherhead Company of Canada Limited, St. Thomas, Ontario, and International Association of Machinists.—J. P. Nicol, Sr., Conciliation Officer.

Concerning Smith & Stone Company, Limited, Georgetown, Ontario, and Local 526, United Electrical, Radio and Machine Workers of America—H. Perkins, Conciliation Officer.

Concerning Lamaque Mining Company Limited, Bourlamaque, P.Q., and Local 654 Val d'Or Mine and Mill Workers Union.—R. Trepanier, Conciliation Officer.

Concerning Hepworth Furniture Company, Southampton, Ontario and Local 2690, United Brotherhood of Carpenters and Joiners of America.—F. J. Ainsborough, Conciliation Officer.

Concerning Guelph Stove Company, Guelph, Ontario and Local 212, International Moulders and Foundry Workers Union of North America.—H. Perkins, Conciliation Officer.

Concerning Gar Wood Industries of Canada Limited, Windsor, Ontario, and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO)—J. P. Nicol, Sr., Conciliation Officer.

Fitton and Parker Furniture Company, Southampton, Ontario, and Local 2690, United Brotherhood of Carpenters and Joiners of

America.—F. J. Ainsborough, Conciliation Officer.

Concerning twelve dairy companies, Toronto, Ontario: Blantyre Dairy Limited; Donland's Dairy Limited; Findlay Dairy Limited; Hall's Pure Milk Dairy Limited; Highland Dairy Limited; Hastings Dairy Limited; Rice's Dairy Limited; Ritchie's Dairy Limited; Scarborough Farm Dairy, Limited; Toronto Dairies, Limited; Valley View Dairy, Limited; Walnut Dairy, Limited; and Local 647, Milk Drivers & Dairy Employees' Union.—J. P. Nicol, Sr., Conciliation Officer.

Concerning three cartage companies, Moose Jaw, Sask.—Moose Jaw Cartage Company Limited; Jack's Jiffy Delivery; Union Transfer & Storage Company, Limited, and Canadian Brotherhood of Railway Employees & Other Transport Workers Division 187.—H. S. Johnstone, Conciliation Officer.

Concerning Canadian Ramapo Iron Works Limited, Niagara Falls, Ontario—and Local 179, International Chemical Workers Union.—J. P. Nicol, Sr., Conciliation Officer.

Concerning Canadian Industries Limited, Windsor, Ontario, and Local 195, International Union, United Automobile, Aircraft & Agricultural Implement Workers of America (UAW-CIO).—J. P. Nicol, Sr., Conciliation Officer.

Assignment of Conciliation Officers

Conciliation officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Concerning St. Clair Processing Company, Sarnia, Ontario, and United Gas, Coke & Chemical Workers (CIO).—J. P. Nicol, Sr., Conciliation Officer.

Concerning Guelph Stove Company, Guelph, Ontario and Local 3302, United Steelworkers of America.—H. Perkins, Conciliation Officer.

Concerning Grand Trunk Pacific Development Company Limited, Prince Rupert, B.C., and International Union of Operating Engineers, Local 510.—G. R. Currie, Conciliation Officer.

Concerning R.C.A. Victor Company Limited, Montreal, P.Q., and Local 1028-B, International Brotherhood of Electrical Workers.—L. Pepin, Conciliation Officer.

Concerning Dominion Tar and Chemical Company Limited, Montreal, P.Q., and Local 173, Dominion Tar & Chemical Company, Limited Employees Federal Union. (T. & L.C. of Canada).—L. Pepin, Conciliation Officer.

Concerning Dominion Engineering Works Limited, Longueuil, P.Q., and Local 1596, International Association of Machinists.—R. Trepanier, Conciliation Officer.

Concerning Dominion Bridge Company Limited and Riverside Iron Works Limited, Calgary, Alberta and Local 800, International Union, Mine, Mill and Smelterworkers.—F. E. Harrison, Conciliation Officer.

Concerning Chromium Mining & Smelting Corporation Limited, and Local 2451, United Steelworkers of America.—H. Perkins, Conciliation Officer.

Concerning Champion Spark Plug Company of Canada Limited, Windsor, Ontario and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).—J. P. Nicol, Sr., Conciliation Officer.

Concerning Belleville-Sargeant & Company, Belleville, Ontario and Local 426, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).—F. J. Ainsborough, Conciliation Officer.

Concerning Amalgamated Electric Corporation Limited, Toronto, Ontario and Local 514, United Electrical Radio and Mechanical Workers of America.—J. P. Nicol, Sr., Conciliation Officer.

Correction

In the January issue of the LABOUR GAZETTE the conciliation officer in the following two cases should have been listed as R. H. Hooper, instead of H. S. Johnstone: Northern Cartage & Contracting Company, Prince Albert, Sask.; Dominion Fire Brick and Clay Products Ltd., Moose Jaw, Sask.

Report of Board in Dispute Between the Steel Co. of Canada, Limited (Hamilton) and United Steelworkers of America, Local 3250

On March 16 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Steel Co. of Canada (Hamilton) Ont., and United Steelworkers of America, Local 3250.

The board was under the chairmanship of the Hon. Mr. Justice F. H. Barlow, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. J. A. McNevin, K.C., and Drummond Wren, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Re Wartime Labour Regulations, P.C. 1003, and Re Dispute Between Steel Company of Canada Limited (Canada Works), Hamilton, Ontario, and United Steel Workers of America, Local 3250.

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you pursuant to s. 13 (1) of P.C. 1003, begs to report as follows:

After a discussion between the members of the Board on the 21st December, 1944, an appointment was made to proceed with the matter on the 10th day of January, 1945, on which day the Board sat at the Court House, in the City of Hamilton, to hear the representations of the parties. At the public hearings the Company was represented by A. L. Lott, Manager of Industrial Relations, and J. C. Callaghan, Works Manager and G. R.

Munnoch, K.C., as counsel. The Union was represented by George Wright, President of Local 3250, Roy Aindow, Field Representative of the United Steel Workers, and F. Andrew Brewin, as counsel.

THE FACTS

The present dispute arises from a failure to agree on certain matters in the course of negotiating a first collective agreement at the Canada Works of the Company. The Union was certified as the collective bargaining agency of all employees of the Canada Works of the said Company, with the exception of office employees, officers, officials, persons connected in a supervisory or confidential capacity, and persons having authority to employ, discharge or discipline employees, by an order of Barlow, J., dated 25th day of May, 1944, under the provisions of the Ontario Collective Bargaining Act. By virtue of P.C. 2301 (1944) the officers of the Union are, therefore, the bargaining representatives under P.C. 1003. The eligible employees on whose behalf, as such representatives, the present agreement is being negotiated, are in the neighbourhood of 838. The certification was made following a vote directed by the Court in the course of proceedings for certification by the Union, in which the Canada Works Employees' Association appeared as intervener. The list of those eligible to vote contained 838 names. 714 ballots were cast. In a three-way vote, (a) for the present Local of the United Steel Workers, (b) for the Canada Works Employees' Association, (c) for neither, the results were 589 for the present Union, 95 for the

Canada Works Employees' Association, and 29 for neither.

It is clear, therefore, that the present Union has a mandate from an overwhelming majority of the employees to conclude a collective agreement. The Union first began to organize in the month of December, 1943. It received its charter in March, 1944. The total number of employees who have applied for membership is 514. The highest number of paid-up members in the Union at any time was in March, 1944, when 411 were paid up. At the present time there are 187 employees fully paid up members of the Union. Negotiations have been proceeding towards the settlement of an agreement between the Company and the Union. In connection with this agreement four matters have been referred to this Board, (1) that the wages in existence at the date of the signing of the agreement should remain in force during the lifetime of the agreement. The Company desired a clause to this effect but the Union would not agree; (2) that there be no Union activity in the plant. The Company desired a clause to this effect. The Union desired to limit this to "during working hours"; (3) maintenance of membership and check-off of dues. The Union desired a clause to this effect. The Company did not agree, but desired a sole bargaining agency clause; (4) the Company desired a clause providing that the agreement should not limit, or take away, the right of the individual employee to present grievances direct to the representatives of the Company. The Union did not agree with this.

WAGES

The question of wages, hours of work and vacations with pay constitutes one of the main matters with which the collective bargaining agreement should be concerned. At the present time, however, any agreement providing for a rise upward in existing wages is forbidden by the provisions of P.C. 9384, unless the same has been first approved by the proper War Labour Board. It appears further that while there was an increase in wages in 1943 there has been no general survey of wages made in recent years. The Company desires to include in the agreement a clause to the effect that "The Company agrees to pay and the Union agrees to accept, during the life of the agreement, the scale of wages now in effect, subject to any general order affecting the Company in respect to wages that may be made under due authority by the National War Labour Board, the Regional War Labour Board or the Government of Canada." Such a clause would compel the

bargaining agency to accept existing rates and prevent it, for the duration of the agreement, from making future applications to an appropriate Board. There is no material before this Board to enable us to decide whether existing wage rates in any particular classification are unjust or unequal. We cannot recommend the acceptance by the Union of such a clause.

RECOGNITION OF UNION ACTIVITY

The Company proposes that the following clause should be included in the agreement:

"The Union agrees that neither it, nor any of its officers or members, will intimidate or coerce employees into membership in the Union. It further agrees not to solicit membership, collect dues, hold meetings, or engage in any Union activities on the Company premises. Violation of the foregoing shall be just cause for discharge or other discipline by the Company."

The Union is willing to agree to a clause prohibiting Union activity during employees' working hours, but it objects to a clause preventing employees from discussing matters of interest to them while on their own time. It seems to us that it would be almost impossible to enforce restrictions on the discussions between employees as strict as those set out in this clause. Having in mind the fact that no objection is taken by either party to the first sentence regarding intimidation or coercion, which we believe should stand, and that both parties are agreed that no meeting of the Union should be held on Company premises, we recommend, in place of the remaining part of the clause, the following:

"No employee or Union official shall solicit members, collect dues or engage in any Union activity during his working hours, or on Company time, save as expressly provided by this agreement, nor shall any employee or Union official solicit members, collect dues or engage in any Union activity on Company premises in such manner, place or time as to interfere with other employees during the working hours of the latter, save as expressly provided by this agreement. Violation of the foregoing shall be just cause for discipline by the Company."

MAINTENANCE OF MEMBERSHIP

The Union asked for, and the Company refused, the inclusion of the following clause in the agreement:

"In order to secure the increased production which will result from harmony between employees and the Company and in the interests of increased co-operation between the Union and the management of the Company, which cannot exist without a stable and responsible Union, the parties hereto agree as follows: All employees who, fifteen days after the execution of this agreement are members of the Union in good standing and those employees who may

hereafter become members of the Union, shall, during the lifetime of this agreement, remain members of the Union in good standing."

The Company objects to this clause on the ground that it should not be put in a position of being compelled to discharge a man who voluntarily decides that he does not wish to continue to belong to the Union. When the Union has negotiated an agreement, and becomes somewhat stronger, by way of membership, than it is at the present time, it might be proper to include such a clause. At the present time, however, we do not think that membership in the Union should, in this way, be made a condition of employment, and we recommend that the Union withdraw its request for the inclusion of this clause.

CHECK-OFF

The Union requested that the Company agree to the following clause regarding check-off, and the Company refused:

"The Company shall, upon receipt of written authorization from each or any of the said employees, and until such authorization is withdrawn, deduct dues at the rate of 50c per bi-weekly pay period, excepting the 13th and 26th bi-weekly pay periods of the year, and shall remit same promptly to the financial secretary of the Union."

If this were granted, it would be solely as a convenience to the Union. On the other hand, it would place a burden upon the Company. True that a voluntary check-off is not unlike an ordinary assignment of wages, and it has been on other occasions recommended as a gesture of co-operation by the Company. In view of the fact that, at the present time, the Union has 187 members out of an employment roll of 838, and in view of the overwhelming vote in favour of the Union, and the fact that in March, 1944, the Union received applications and payment of initiation fee for 514 employees, we are of the opinion that the additional burden on the Company would be so slight that, as a gesture of good-will and co-operation, the Company should agree to the acceptance of a clause providing for a voluntary check-off.

GRIEVANCES

While the parties have agreed on their grievance procedure, the question of the right

of an individual employee to present grievances to the Company is in dispute. We adopt the argument of the Conciliation Board in the Hamilton Works case, which recommends the following clause:

"Nothing herein shall prevent an individual employee from presenting and discussing his grievance directly with the Company at any stage, but this shall be in addition to and not in substitution for the procedure for the adjustment of disputes in this agreement."

RECOMMENDATIONS

This Board accordingly recommends:

(1) That the Company withdraw its present clause forbidding Union activity on Company premises, and agree to a clause similar to that suggested, which would prevent Union activities on Company time, or in a manner which would interfere with employees on Company time.

(2) That the Union withdraw its request for inclusion of a maintenance of membership clause.

(3) That the Company agree to the inclusion of a voluntary check-off clause as follows:

"The Company shall, upon receipt of written authorization from each or any of the said employees, and until such authorization is withdrawn, deduct dues at the rate of 50c per bi-weekly pay period, excepting the 13th and 26th bi-weekly pay periods of the year, and shall remit same promptly to the financial secretary of the Union."

(4) That the grievance procedure be amended to provide for an individual employee's right to participate in the settlement of grievances, and that the following clause be adopted:

"Nothing herein shall prevent an individual employee from presenting and discussing his grievance directly with the Company at any stage, but this shall be in addition to and not in substitution for the procedure for the adjustment of disputes in this agreement."

All of which is respectfully submitted.

Dated at Toronto this 7th day of March, A.D. 1945.

Report of Board in Dispute between Miramichi Lumber Co., Limited, Minto, N.B., and Local 7409, United Mine Workers of America

On March 9 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Miramichi Lumber Co., Limited, Minto, N.B., and Local 7409, United Mine Workers of America. A

Minority report was submitted by Mr. Kenneth L. Golding.

The Board was under the chairmanship of the Honourable Mr. Justice J. H. A. L. Fairweather, Rothesay, N.B., appointed by the

Minister of Labour on the joint recommendation of the other two members of the Board, Messrs. Kenneth L. Golding, Fredericton, and E. A. Dinsmore, Minto, N.B., appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and re Miramichi Lumber Co., Ltd., Minto, N.B., and re Local Union No. 7409, United Mine Workers of America.

Honourable HUMPHREY MITCHELL,
Minister of Labour,
Department of Labour,
Ottawa, Canada.

SIR,—

The Board of Conciliation appointed by you in connection with the above matter begs to submit its report as follows:—

The Board held a sitting in the City of Fredericton, in the Province of New Brunswick, on March 6th, at which sitting representatives of the Union and of the Company attended and submitted full and complete briefs, setting out their submissions; and also presented their respective arguments relating to said matters.

The Union was represented by Mr. Thomas Ling, Vice-President, District No. 26, U.M.W. of A., Glace Bay, N.S., Mr. C. B. Wade, Research Director, District No. 26, U.M.W. of A., Glace Bay, N.S., and Mr. Frank Guss, Board Member, District No. 26, U.M.W. of A. The Company was represented by Mr. T. H. Robinson, Director of Industrial Relations, Canadian International Paper Company, Limited, Montreal, P.Q., Mr. A. H. Chisholm, Assistant Chief Engineer, Canadian International Paper Company, Limited, Montreal, P.Q., and Mr. A. D. Taylor, Manager, Miramichi Lumber Co., Ltd., Minto, N.B.

FACTS

The Miramichi Lumber Co., Ltd., is a subsidiary of the Canadian International Paper Company, Limited, and is engaged in coal mining at Minto, N.B., where the coal mining operations of the company are located. The number of employees covered by the proposed collective bargaining agreement is approximately one hundred and ten.

Local Union No. 7409, United Mine Workers of America, is affiliated with District No. 26, United Mine Workers of America and the Canadian Congress of Labour.

The parties affected by this dispute have not previously entered into a collective bargaining agreement.

During June, 1944, District No. 26, United Mine Workers of America (Local 7409) was certified as the collective bargaining agent for the employees of the Miramichi Lumber Co., Ltd., at Minto. During November, 1944, representatives of the company and Union prepared a contract on which agreement was reached on all points except the use of the check-off system, which is the sole matter in dispute. The proposed check-off clause reads as follows:

- (a) The company agrees to check-off all dues, fines and initiation fees from all members of the U.M.W. employed in and around the collieries. The company also agrees to check-off for assessments or levies for strictly U.M.W. of A. purposes. Authority to make such deductions shall be given to the company by the President and Secretary of District 26, U.M.W. of A., such authority to state the purpose for which the assessment or levy is to be made.
- (b) The maximum amount to be deducted for U.M.W. purposes in any one month shall not exceed five dollars (\$5.00).

The company, by its representatives, definitely opposed this check-off clause and offered, as an alternative, a union shop. The Union, however, insisted that they were entitled to a check-off and contended that of the one hundred and ten employees, some eighty-three per cent had already signed cards and that they expected one hundred per cent approval. Your Board used its best endeavours to effect a compromise between these opposing views but without result.

The matter in dispute, from the standpoint of the company, appears to your Board to be a matter of policy rather than of fact and involves the consideration of the effect of the check-off clause on interests outside the scene of the company's coal mining operations. With the Union, it was also a matter of policy in that the employees of all other mines in the district enjoy the check-off system.

Your Board recommend that a modified form of check-off be provided for in the agreement and that the following be substituted for the clause proposed by the Union.

- (a) The company agrees to check-off all dues, from all members of the U.M.W. of A. employed in and around the collieries who so authorize it in writing; such amount not to exceed fifty cents a week.

The written authorization shall be in the following form:

Miramichi Lumber Co., Ltd.,
Minto, N.B.

Gentlemen:—

I, _____, hereby authorize and direct the Miramichi Lumber Co., Ltd., to deduct weekly from any earnings accumulated to my credit fifty cents, this being the amount of my weekly dues to District No. 26, United Mine Workers of America, whose receipt therefor shall be considered as a discharge to the

Miramichi Lumber Co., Ltd., for the amounts deducted from my earnings. I reserve the right to cancel this authority at any time on ten days' written notice to the company.

Dated at Fredericton, N.B., this seventh day of March, 1945.

Respectfully submitted.

(Sgd.) J. H. A. L. FAIRWEATHER,
Chairman.

(Sgd.) E. A. DINSMORE,
Member.

Minority Report

Re: Wartime Labour Relations Regulations, P.C. 1003, and re Miramichi Lumber Co., Ltd., Minto, N.B., and re Local Union No. 7409, United Mine Workers of America.

Honourable HUMPHREY MITCHELL,
Minister of Labour,
Department of Labour,
Ottawa, Canada

SIR,—

I have read the report of my colleagues and cannot concur in their decision. The matter in dispute, the check-off, is apparently entirely one of policy. The Union claims that it never operates without a check-off. The Company for reasons fully outlined in its brief is opposed to check-off but has offered as an alternative a union shop. I consider that the adoption of a union shop should have been acceptable to the Union and in the long run would tend to improve management labour relations to a far greater extent than through any benefits that might be derived from the check-off.

Dated at Fredericton, N.B., this seventh day of March, 1945.

Respectfully submitted.

(Sgd.) KENNETH L. GOLDING,
Member.

Report of Board in Dispute Between the Granby Consolidated Mining, Smelting & Power Company, Limited and Copper Mountain Miners' Union Local No. 649, of the International Union of Mine, Mill and Smelter Workers

On March 23 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Granby Consolidated Mining & Smelting Co., Limited, and Copper Mountain Miners' Union Local No. 649, of the International Union of Mine, Mill and Smelter Workers.

The Board was under the chairmanship of Prof. J. N. Finlayson, Vancouver, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. A. D. Wilson, and William Stewart, both of Vancouver, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

In the matter of the "Wartime Labour Relations Regulations Act" Order in Council P.C. 1003 and in the matter of a dispute between the Granby Consolidated Mining, Smelting & Power Co. Ltd. and certain of its employees, members of the Copper Mountain Miners' Union Local No. 649, of the International Union of Mine, Mill and Smelter Workers.

TO THE HONOURABLE HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed pursuant to the said Wartime Labour Regulations

on the 16th day of October, 1944, respectfully reports as follows:

1. The life of the Board was extended by agreement for a sufficient period to enable representations to be made and this report prepared.

2. At the first meeting of the Board for hearing of evidence it was agreed between the parties that the only point in dispute was whether or not Section B, Article 1 of the proposed agreement should be consented to by the employer. This section reads as follows:

"All future regular employees together with all present regular employees, who are now or who may later become members of the Union, shall remain members in good standing during the life of this Agreement as one of their conditions of employment with the Company."

3. After representations were made on behalf of each party, the Board suggested that the parties should attempt to effect an agreement pursuant to Section 13 (2) of the said Regulations. The Board collaborated from time to time with the parties in their discussions and is now pleased to report that the parties arrived at a mutual understanding. The Union withdrew its request for the inclusion of the maintenance of union clause in Section B, Article 1 of the proposed Agreement and there was mutual consent to a change in Section A, Article 1. Otherwise the Agreement signed by the parties on the first day of March 1945, a copy of which is attached to this Report, is in the terms of

the one that expired on May 31, 1944, with some minor changes in Article 9, which were not the subject of dispute between the parties.

4. The Board expresses its appreciation to the representatives of both parties for the thorough and courteous manner in which they submitted their views, and its hope that the utmost harmony may attend the implementation of the Agreement.

Report of Board in Dispute between Fairchild Aircraft, Ltd., Noorduyn Aviation, Limited, Canadian Vickers, Limited, Montreal, P.Q., and Lodge 712, International Association of Machinists

On March 7 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Fairchild Aircraft, Limited; Noorduyn Aviation Ltd.; and Canadian Vickers, Limited, Montreal, P.Q. A Minority Report was submitted by Mr. D. A. Paterson.

The Board was under the chairmanship of the Honourable Mr. Justice L. Boulanger, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. D. A. Paterson and Drummond Wren, appointed on the nomination of the employer and employees concerned.

The text of the Board's report follows:—

Report of Board

Wartime Labour Relations Regulations P.C. 1003 and Fairchild Aircraft Limited, Noorduyn Aviation Ltd., and Canadian Vickers Limited, Montreal, P.Q., and Lodge 712, International Association of Machinists.

To the Honourable the Minister of Labour of Canada

SIR:—

The occasion for the appointment of this Board was the dispute which arose in connection with the renewal of the collective Labour Agreement between the parties expiring on June 30, 1944.

The first meeting of the Board took place on August 21, 1944, at Montreal, in Mr. Paterson's office, for which courteous hospitality the other members of the Board offer due thanks. On August 23, at the request of the Department of Labour and by mutual agreement, the Board adjourned *sine die*. The sittings of the Board were resumed on February 5, 1945.

The Employers were represented as follows: Canadian Vickers Limited (now Canadian Limited) by Messrs. W. Meacher and B. Pringle; Noorduyn Aviation Limited by Messrs. Norman H. Bell and C. H. Cheseley; Fairchild Aircraft Limited by Brig.-Gen. R. H. Bedell and Mr. John Porteous, K.C. The Employees' representatives were Messrs. Robert Haddow, Grand Lodge Representative Inter-

Dated at Vancouver, B.C., this 21st day of March A.D. 1945.

Sgd. JOHN N. FINLAYSON,
Chairman,
W. STEWART,
Member,
A. D. WILSON,
Member.

national Association of Machinists and Vice-Pres. Trades and Labour Council; Irving Burman, Chairman Negotiation Committee, Montreal Aircraft Lodge 712; Jean Pare, Business Agent of Lodge 712; Jack Chapman, Urbain Roussin and Archie Authier, members of Shop Committees or Officers of Lodge 712.

In the new Agreement proposed by the Employees to replace the Agreement expiring on June 30, 1944, there are a number of disputed sections concerning wages, hours and conditions of work, etc., which are of the exclusive jurisdiction of the Regional War Labour Board. This Board unanimously agreed that the disputed sections which it could deal with properly were the following:

MERIT RAISES: Clause 5 (b) of New Agreement (Draft 2).

BUSINESS AGENT: Clause 8 (c) of New Agreement.

SENIORITY: Clause 10 (c) of New Agreement.

UNION SECURITY: Clause 21 (b) of New Agreement.

RENEWAL: Clause 22 (b) of New Agreement.

The members of the Board have been unable to conciliate the parties and to come to any agreement among themselves in respect to those disputed clauses, save and with the exception of the Seniority Clause. Therefore, saving that exception, the present Report is the report of the majority of the Board composed of the Chairman, Judge Boulanger, and of Mr. Drummond Wren, the Employees' nominee.

MERIT RAISES

They are promotions made within the range of a given classification or category. There is an appreciable spread, which may go as high as 10 or 15 cents, between the minimum hourly rate and the maximum hourly rate of the same category. The Employees wish that complaints concerning those promotions could be investigated by the Grievance Committee, in accordance with Section 8 of the Agreement, which has always been denied by the Employers as not permissible in their inter-

pretation of Clause 5 (b) of the old Agreement reading as follows:

“(b) The Company may, at its discretion, pay any employee at a rate higher than his classification calls for.”

Therefore the clause proposed by the new Agreement on that point is as follows:

“The company may pay any employee at a rate higher than his/her classification calls for, and shall in any case pay employees within any given classification, according to merit, at a rate within the range provided by law under the Wage Control Order for that classification.”

The Employers object to the change mainly on the ground that they are the best judges of the merit of their employees, which nobody can deny, and that, if all grievances which may arise out of such a matter are made appealable to the Committee, the Committee will be swamped and a lot of valuable time will be lost in hearing grievance cases.

The majority of the Board feel that the labour members of the Grievance Committee must be given credit for some sense. We can not suppose that they will receive groundless and senseless complaints and that they will want to spend their time squabbling over nothing. Raises and promotions affect the salary and reputation of the workers. It is, therefore, important that they should feel that they can get complete justice and fair play in that regard; if they have that sentiment of security against injustice, they will be better and more loyal employees, which is the interest of the employers. If a man who has been refused a merit raise feels that he has been unjustly treated, he should have a recourse, just as in a case of a change of category. The majority of the Board think that it is only fair that it should be so. Consequently, the majority of the Board recommend the inclusion in the new Agreement of the clause proposed by the Employees on the subject of merit raises.

BUSINESS AGENT

By the amendment in the new Agreement of clause 8 (c) the Union wishes to secure the right to have its Business Agent called in at the hearing of a dispute at the option of the Grievance Committee alone. Formerly the calling in of the Union's Business Agent depended on the agreement of the Management and of the Committee. Here are the texts:

(OLD CONTRACT):—

“8. (c) Any disputes arising out of this Agreement, or otherwise, shall be dealt with by the Management of the Company and the Grievance Committee. When the Management and the Grievance Committee agree that it is desirable, the Business Agent shall be called in on such disputes.”

(NEW CONTRACT):—

“8. (c) Any disputes arising out of this Agreement, or otherwise, shall be dealt with by the Management of the Company and the Grievance Committee. At the request of the Grievance Committee, the Business Agent shall be called in on such disputes.”

The Employers object to the amendment principally because it would permit the Employees to introduce in their discussions with the Management a Business Agent who may not be *persona grata* with the Management. It has been said also that the Business Agent having access in all plants, he may retail tales, foment agitation and divulge secrets.

The majority of the Board think they can trust the Employees to elect as their Business Agent a sensible, reasonable and practical man who will be capable of getting along satisfactorily with the different Managements composed also of sensible, reasonable and practical men. The majority of the Board do not see any reason to refuse the Employees, at the hearings of the Grievance Committee, the assistance of a man experienced in the settlement of disputes and aware of the general policies and practises of the Union, when the Employers can be represented by their legally or technically trained officials. The presence of the Business Agent tends to even up the chances a little, which is only just, fair and reasonable in the opinion of the majority of the Board.

Therefore the amended clause 8 (c) as proposed in the draft Agreement is recommended by the majority of the Board.

SENIORITY

We are happy to be unanimous on this question and we recommend, therefore, the inclusion, in the new Agreement, as clause 10 (c), of the following clause drafted by Mr. Paterson:

“In cases of lay-off or lack of work, employees shall be selected for retention according to their seniority, competency and productive efficiency, i.e., if competency and productive efficiency are equal, length of continuous service with the employer shall be the deciding factor.”

UNION SECURITY

The majority of the Board feel that the time has come to provide for some measure of union security in collective labour agreements. Without reviewing all the arguments pro and con which now are so well known, we think that after an agreement has finally been made and signed, some period of stability must follow. Therefore, we recommend to include in the New Agreement, as clause 21(b), the following:—

“Employees of the Company, covered by this Agreement, who are at the date of this Agreement members of the Union in good standing according to the by-laws of the Union, or who

subsequently become such members, shall, as a condition of continued employment be required by the Company to maintain such membership for the duration of this Agreement.

All employees engaged by the Company after date of this Agreement shall within 30 days of their employment become members of the union, and shall, as a condition of continued employment, be required by the Company to maintain such membership according to the by-laws of the union for the duration of this agreement."

RENEWAL

Pending negotiations for the renewal of the contract the parties should not have to go back to the law of the jungle. It is reasonable that their relations should continue to be governed by the old contract until the new one comes into effect, save such retroactive provisions as may be necessary. Therefore, we recommend to include in the New Agreement, as clause 22(b), the following:

"In the event of written notice of termination amendment, change on renewal having been given by either party, as provided for in clause 22 (a), negotiations shall be carried on during the period of notice of termination, and beyond that time if necessary, with a view to arranging another agreement. During the period of such negotiations, and until the signing of a new agreement, this Agreement shall remain in full force and effect."

Respectfully submitted.

(Sgd.) OSCAR L. BOULANGER,
Chairman of Board.

(Sgd.) DRUMMOND WREN,
February 16, 1945. Member of Board.

Minority Report

Wartime Labour Relations Regulations P.C. 1003 and Fairchild Aircraft Limited, Noorduyn Aviation Corporation and Canadian Vickers Limited, Montreal, P.Q., and Lodge 712, International Association of Machinists.

Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

SIR,

I find myself unable to agree with certain of the Conclusions and Recommendations of my colleagues on the Board of Conciliation appointed herein.

As a consequence I am under the necessity of submitting this Minority Report.

As the Majority Report itself sets forth, the matter at issue between the disputants is the renewal of the Collective Agreement between them which expired on 30th June, 1944. More particularly the issue has resolved itself into consideration of the following five items which the Union would like to become conditions of the new Agreement, namely:

- | | |
|-------------------|-------------------|
| 1. Merit Raises | 4. Union Security |
| 2. Business Agent | 5. Renewal. |
| 3. Seniority | |

To elaborate:

MERIT RAISES

The practice of merit raises was initiated by the Company itself to reward the services of outstanding and conscientious workmen. The Company accordingly determined and awarded merit raises through its own officials but now the Union desires that it have a voice in the determination of merit raises through the Grievance Committee. The Company politely insists that it is the best judge of the ability and productive capacity of its own workpeople, and therefore, that merit raises should remain, as heretofore, the prerogative of management. The Majority Report itself, in point of fact, admits that the Company is the best judge. Therefore, as it is unthinkable that the Company, its own interest being at stake, should grant preferment to an employee not qualified for it, the existing practice of determining merit raises should, as a matter of sound business, remain undisturbed.

Moreover the Company feels that if merit raises were referred to the Grievance Committee, human nature being what it is, the Union, to further its own interests, would institute endless appeals to the Grievance Committee, thereby causing loss of much valuable time. The request, besides, is a challenge to the present system of Job evaluation and Employees' Rating which should not be lightly discarded.

BUSINESS AGENT

The Union requests that the new Agreement provide that the Business Agent be permitted to attend all sessions of the Grievance Committee. There are four Grievance Committees in the three Companies governed by the recent Agreement, but, with one Business Agent only, their meetings would require to be held at different times which would create a problem.

Under present practice most cases brought before the Grievance Committees are settled satisfactorily. Those not so adjusted are remitted to Arbitration and under the present (or recent) Agreement the Business Agent is privileged to be present at all Arbitration cases.

It is pointed out that the Business Agent might not invariably be *persona grata* with one or other of the Companies and his presence, under such circumstances, would probably be very awkward, to say the least. It is considered that no valid reason has been advanced to justify a departure from present practice which, on the whole, has operated well.

SENIORITY

This item has been adjusted to mutual satisfaction in terms appearing in the Majority Report.

UNION SECURITY

I agree with the signatories of the Majority Report that, at this stage of the controversy respecting the implications of the term Union Security, it is unnecessary to enter into a disquisition of the subject. That has already been done comprehensively from many quarters but unanimity has not yet been achieved, principally, the undersigned believes, because the approach to its solution from the Union point of view, is not the proper one.

The opinion of the undersigned is still substantially the one expressed in his Minority Report in the case of:

The United Shipyards Limited, and Its Employees, Members of Local No. 12, Boilermakers and Iron Shipbuilders' Union of Canada (C.C.L.)

to which full reference is hereby made (June, 1944). Nothing has happened in the interval to create or to justify any change of view, and the following reasons in his judgment remain fundamentally sound:

1. The Union does not control all the employees in the Plant.
2. Quebec Law contemplates the presence of minorities in industrial establishments.
3. The proposal would deny employment to other Canadians having different convictions as to civil rights.
4. The Employer should not be party to maintaining the membership of the Union.
5. The proposal does *not* promote harmony between Employer and employees. On the contrary the more divided authority within the Plant becomes, the more likely are disputes to arise.
6. The proposed condition is unethical as it would require the employer to act contrarily to the dictates of his conscience.
7. The proposed condition would be an obvious violation of the Article 19 (1) of P.C. 1003—the Labour Code.

RENEWAL

The Union wants the conditions of the expired Agreement to remain effective until such time as the new Agreement is signed, no matter how long the process of negotiating the Covenant may be.

The Company, on the other hand, feels that the life of the Agreement, like the existence of all things, should be definite. The Agreement should not be self-perpetuating for several excellent reasons. One such is that the proposed condition would conduce to long drawn out negotiations for renewal, to interminable discussion and to unnecessary delays on the part of the Union, because, at the worst, if the Union could not get a satisfactory new Agreement, it could hold fast indefinitely to the old Agreement, however unsatisfactory the latter might be from the Company's point of view.

Another such reason is that the Company feels that a hurtful condition in an Agreement should definitely cease at the agreed upon date of expiry. Under the proposed condition the hurtful provision might be perpetuated without end. I strongly incline to the logic of the Companies' point of view and I endorse it without hesitation.

I suggest that negotiations leading to a new Agreement commence two months before the stipulated date of expiry of the old Agreement and, if necessary, continue for two months thereafter when, in the event of no basis for a new contract, the Agreement shall finally terminate.

I have the honour to be, Sir,
Your obedient servant,

(Sgd.) D. A. PATERSON,

Member,

Board of Conciliation.

Montreal, P.Q.

8th March, 1945.

Report of Board in Dispute Between Empire Brass Manufacturing Co., Limited, and Pumps and Softeners, Limited, and Local 2699, United Steelworkers of America

On March 5 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Empire Brass Manufacturing Co., Limited, and Pumps and Softeners, Limited, and Local 2699, United Steelworkers of America.

The Board of Conciliation was under the chairmanship of His Honour Judge J. J. Coughlin, Sandwich, Ont., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Mr. Maurice Crabtree, K.C., of Toronto, appointed on the nomination of the employer, and Mr. Oliver Hodges of London, Ont., appointed on the nomination of the employees.

The text of the Board's report follows:—

Report of Board

In the matter of The Wartime Labour Relations Regulations P.C. 1003, and of a dispute between Empire Brass Manufacturing Company, Limited, and Pumps and Softeners, Limited, London, Ontario (Employers); and the United Steelworkers of America, Local 2699, London, Ontario (Employees).

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

Your Board of Conciliation appointed to consider the dispute between the above named

parties are pleased to report that during the sittings of the Board held at London in the week of February 25th a definite agreement on two of the three points at issue was reached and was embodied in a collective bargaining agreement concluded between the parties.

On account of the absence of the President of the Employer Companies it was mutually agreed that the remaining point at issue, namely the matter of check-off of union dues, should be deferred for direct negotiation between the parties until the week of May 21st on the understanding that in the event of an agreement thereon not being reached by

May 28th your Board would on the application of either party be reconvened to decide the question, the decision of the Board to be binding on both parties during the life of the contract.

Dated this 28th day of February, 1945.

(Sgd.) J. J. COUGHLIN,
Chairman.
(Sgd.) OLIVER HODGES,
Member.
(Sgd.) M. CRABTREE,
Member.

Report of Board in Dispute Between Willard Storage Battery Company of Canada, Ltd., and United Electrical, Radio and Machine Workers of America, Local 512

On February 28, the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Willard Storage Battery Company of Canada, Limited, and United Electrical, Radio and Machine Workers of America, Local 512.

The Board was under the chairmanship of the Honourable Mr. Justice W. D. Roach, Toronto, appointed on the joint recommendation of the other two members, Miss Idele Wilson and Mr. W. M. Gordon, also of Toronto, the nominees of the employees and employer respectively.

The text of the Board's report and of the minority report, follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003 and of a dispute between Willard Storage Battery Company of Canada, Limited, Toronto, Ontario (Employer); and United Electrical, Radio and Machine Workers of America, Local 512 (Employees).

The Honourable,
The Minister of Labour,
Ottawa, Ontario.

A Board of Conciliation having been established pursuant to the provisions of section 13 (1) of the Wartime Labour Relations Regulations P.C. 1003 as a result of the disputes between the parties herein, the undersigned chairman and member of the Board respectfully report as follows:—

The dispute between the parties arose during negotiations between them concerning the renewal of a collective bargaining agreement which had been entered into between them under date the 28th of September, 1943, and which terminated on September 27, 1944. A copy of that agreement is appended hereto.

That agreement did not contain any provision for what has come to be described under the general title of "Union Security". During the negotiations for its extension or renewal the Union insisted that it be amended to contain a provision for a "Union Shop". To this the Company objected. It would appear that the Union then modified its demand and for the sake of amity indicated that it would accept a provision for "Maintenance of Membership" with a system of irrevocable check-off in lieu of "Union Shop". This the Company also refused.

The particular "Maintenance of Membership" provision demanded by the Union was substantially as follows:

That all present employees now members of the Union shall as a condition of employment remain members of the Union in good standing for the duration of the agreement; that all future employees shall become members of the Union within a specified time and thereafter as a condition of their continued employment shall remain members in good standing for the duration of the agreement.

The attitude of both the Company and the Union on this question of Union Security during the proceedings before the Board was identical with their respective attitudes during their earlier negotiations.

Prior to the Board meeting with the parties, at the request of the Board, they each filed a Brief which was factual and argumentative.

The Board then met with the parties on January 30th and 31st and February 2nd. The employer was represented by Mr. H. G. Mills, General Manager, and Mr. C. M. Murray, Personnel Manager, and by Mr. J. C. Adams of the Central Ontario Industrial Relations Institute who appeared as counsel. The employees were represented by Mr. Ross Russell, Director of Organization for the Union, and by Mr. Philip Magee who is a

trustee and Past President of the local Union. At those meetings the written Briefs were supplemented by oral submissions.

The Union has not been certified as the Collective Bargaining representative of the employees but the Company nevertheless recognizes the Union as the Collective Bargaining representative of all its employees at its plant in the City of Toronto with the exception of foremen, supervisors, plant police, guards and laboratory and office staff. Presently there are about one hundred and sixty-seven employees who would be subject to a collective bargaining agreement. It is said that of these about ninety per cent are members of the Union. Prior to the war the number of such employees was normally about sixty-five men.

The Union organized the employees in the summer of 1943 and as a result of a supervised vote it was demonstrated that a strong majority of the employees favoured the Union as the Collective Bargaining representative of the employees. The Collective Bargaining Agreement dated September 28, 1943, followed.

It would appear that employer-employee relations at the Company's Toronto plant have always been good. We would congratulate the Union for the part it has played in maintaining those good relations despite the observation by the Company that they were good before the intervention of the Union.

There is undoubtedly a suspicion among at least some of the employees that the refusal of the Company to accede to the present request for "Union Security" reflects antagonism on the part of the Company toward the Union and the silent hope, if not the expressed wish, that it may become weak and disintegrate. The Company protests that any such conclusion is unwarranted and it has not been demonstrated that the Company is in fact harbouring such a desire. The Company takes the position that if its employees desire to join this particular or any other Union that is their business and that it will not interfere in any way by discrimination or otherwise. Despite these protests by the Company, that suspicion is not dissipated. Indeed in these very proceedings that suspicion has been heightened by the fact that the Company was represented by Counsel associated with the Central Ontario Industrial Relations Institute which is an Employer Association. Naive references were made during discussions before the Board to this "outside influence". It was freely admitted by the representatives of the employees that while their minimum demand to-day is "Maintenance of Membership" their ultimate

goal is the closed shop. It has been elsewhere said that "the same natural impulse which heads workers in the direction that frequently culminates in the quest for the closed shop is the motivation that sometimes brings employers together to oppose that concept." P.C. 1003 Section 4 (1) and (2) respectively recognizes the right of employees to be members of a trade Union or employees' organization and to employers a similar right to be members of an employers' organization. Membership in either of such organizations should not condemn either employee or employer. We subscribe to the opinion that they can both contribute much that is good in the field of employer-employee relations. The danger would exist in the possibility that either might attempt to use its strength to enforce arbitrary and unreasonable decisions. If ever that danger arises then it will be time for Government intervention. Meanwhile the immediate issue should be solved by a process of unemotional thinking.

The reasons advanced by the Union in support of its request for a Union Shop are not new. It will suffice to merely state them:

1. It will guarantee the perpetuation of the position which employees are entitled to enjoy in industry.
2. It will eliminate the possibility of friction among employees where some are and some are not members of the Union.
3. The relation between the Company and its employees has been good and the Union's record of co-operation and responsibility justifies the request.
4. It will permit the Union to devote its full time to the problems of employer-employee relations thereby doing a greater service to both employees and management.

The Company's objections may be stated under three headings:

1. That on principle it is undemocratic and introduces the factor of compulsion.
2. That because the Union has a membership of approximately ninety per cent of eligible employees it does not need any form of Union Security.
3. That "Union Security" is something outside a "collective agreement" as defined in Section 2 (d) of P.C. 1003 because it does not refer to "rates of pay, hours of work or other working conditions".

It is convenient that we at once express our opinion on objections numbers (2) and (3) before considering the arguments put forward by the Union and the remaining objection of the Company.

As to objection number (2) it seems to us that the Company having taken or at least assumed to take a position of passive indifference as to whether the employees or any of them join the Union it cannot consistently be heard to say that the Union does not need

"Union Security" as a guarantee of its continued existence. It is our opinion that in this particular instance the Union has such overwhelming support among the employees that, in point of fact it does not require "Union Security" to insure its continuance in this plant. We hasten to add, however, that if there were no other objections, lack of necessity would not constitute a valid objection to it.

As to objection number (3), if we were left to interpret Section 2 (d) of P.C. 1003 we would have much doubt as to whether "Union Security" is one of the subjects coming within "collective agreement" as there defined. However, we do not consider that it is open to us to say that it does not come within the meaning of that section. This Board is not in a position to determine its own jurisdiction. It has been determined for us by the Minister of Labour whose creature the Board is, and the very fact that this issue has been referred to us by him under Section 30 (4) of the Order in Council, amounts to a ruling by him that it is within our jurisdiction and is decisive of the point.

Turning now to the arguments of the Union in favour of "Union Security" whether it take the form of "Union Shop" or "Maintenance of Membership" either with or without check off:

Argument number (1):—

What the employees have in mind is not that this particular Union be perpetuated in the plant, but that principles and standards which are now recognized in their employer-employee relations be perpetuated. They are thinking not so much of the present as of the future. They made it perfectly plain that they are apprehensive lest after the war under changed economic conditions everything may go into a sort of tail-spin and those principles be discarded and those standards lowered; that in the stress of circumstances their organization may become less virile than it is to-day and perhaps disintegrate. Through organization and collective bargaining they have secured advantages which would not otherwise have been obtained. They want to insure their permanency. So long as the Union is active and strong they feel that they will be preserved.

As to Argument number (2):—

It was admitted that if there was any friction as between Union and non-Union employees it was infinitesimal.

As to Argument number (3):—

There is no question but that the Union's record for co-operation and responsibility has

been good and to the extent that such a record is a prerequisite to a provision in a Collective Bargaining Agreement providing for Union Security, that prerequisite has been satisfied.

As to Argument number (4):—

Merely to state the argument explains it and it need not be amplified.

That leaves for observation only objection number (1) of the Company. This, in substance, is to say that a Union Shop or Maintenance of Membership, unless it has saving provisions, is an infringement on the personal, economic, and social liberty of the employee. Much has been written and said on that phase of the issue. Of the "closed shop", which is not far removed from the Union Shop if indeed it is at all removed, Rev. Jerome L. Tonner, Ph.D., in his book entitled 'The Closed Shop', said, "It is one of the few major issues which has persistently defied adjustment. Other social and industrial problems large and small have come and gone finding solution in legislative, judicial, or popular sanction. And although unionism and collective bargaining became fundamental rights as a result of the passage of the National War Labour Relations Act in 1935, the closed shop has remained an unsolved problem." Truer words were never written. No good purpose would be served by quoting opinions of others on this subject. Our function, as we conceive it, is twofold. First, to attempt to assist the parties in reaching a voluntary agreement, and secondly, if the parties are unable to agree then to report the facts as they have been made to appear before us and to submit our recommendations.

We exerted our best efforts in an effort to conciliate the matters in issue between the parties and consummate an agreement. We regret that we were unable to find any basis upon which the parties would agree on the particular issues involved.

We therefore recommend that the collective bargaining agreement which the parties have been negotiating should contain a Maintenance of Membership provision and a provision for voluntary Check Off in substantially the form appended hereto. That particular Maintenance of Membership provision is premised on the Union at all times having a membership among the employees constituting a majority of the total employees eligible for membership. The provision in clause (b) which would permit a group of employees to resign from the Union is designed to meet the objection that a Maintenance of Membership provision without such a saving clause might result in the wishes of a substantial group of Union members with respect to

internal management or Union policy being thwarted or their being required to retain their membership even though they be opposed to such management or policy because to relinquish their membership would mean the loss of their employment with the company. In our opinion such a Maintenance of Membership provision exemplifies the application of majority rule without infringing upon what are said to be the natural rights of those who, for reasons best known to themselves, are unwilling or have thus far not been persuaded to join the Union. We suggest that these provisions taken together constitute the maximum of "Union Security" beyond which there would be the factor of compulsion of which the Company complains and within which it is not contained.

We desire to acknowledge the co-operation and assistance given the Board by the parties, all of which is appreciated.

All of which is respectfully submitted.

Dated at Toronto this 15th day of February, 1945.

Minority Report

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and of a dispute between Willard Storage Battery Company of Canada, Limited, Toronto, Ontario, (Employer), and United Electrical, Radio and Machine Workers of America, Local 512, (Employees)—

To The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed by you to "endeavour to effect an agreement between the parties on the matters on which they have not agreed" held meetings on January 23, 30, 31, and on February 2. At its first meeting the Board members discussed in the absence of the parties the matters on which agreement had not been reached, and it was determined to have each of the parties file a brief setting forth their respective positions. The briefs were filed and at the meeting on January 30, Ross Russell, Director of Organization for United Electrical, Radio and Machine Workers of America, District 5, represented the employees, and H. G. Mills, Assistant General Manager, and C. M. Murray, Personnel Manager, with J. C. Adams, K.C., as counsel, represented the employer. At the meeting on January 31, P. Magee, a trustee and past president of the local Union, was present with

Ross Russell to represent the employees, and at the meeting of February 2, in addition to Ross Russell and P. Magee, some ten other employees were present.

The facts of the matter were simple enough. An agreement had been reached and signed, dated September 28, 1943, between the Employers and the United Electrical, Radio and Machine Workers of America, Local 512, as sole collective bargaining agent, containing provisions with reference to rates of pay, hours of work and other working conditions, for example, provisions with respect to no strikes, stewards, grievance procedure, seniority, etc.—in other words, a "collective agreement" as mentioned in Sec. 2(d) of P.C. 1003.

Prior to the agreement being signed a vote had been taken and it was stated that 87 per cent of the employees indicated their desire to be so represented. With respect to the renewal of this agreement the collective bargaining agent presses for the inclusion of a clause providing for "union security." All the other clauses, some being additional to those in agreement of September, 1943, have been agreed upon by the parties. At the hearings it was emphasized by the parties that there was no friction in the plant, that relations were entirely harmonious and any grievances there had been, had been readily adjusted.

It was stated by Ross Russell when putting forth the argument for union shop that the membership in the union in the plant was now 90 per cent of the total eligible and that there were no defections from membership and that there was no difficulty in collecting the dues. This can be easily understood as the plant is not large, there being only some 167 employees subject to the collective bargaining agreement and in peace times only about 65 employees. The picture is not the same at all as it might be in a plant of several hundred or thousand employees. The collection of dues in such a plant might conceivably be a burden. While it appeared that the collective bargaining agent had not been certified as such, nevertheless, the employer recognized it as such and while its experience with the United Electrical, Radio and Machine Workers of America has only been for a year or more it raised no objection to entering another agreement with it. It appeared from the oral submissions that employer-employee relations at this plant had always been of the best—and it is not for a Board of Conciliation to attempt to fasten the credit for such a condition on either party concerned with the matter before the Board. The Union itself had been in the plant, at the most, for two years. One might be permitted to observe, however, in passing, that 8.8 years of service was the present

average term of service of the employees in the plant, and that this figure would undoubtedly have been lower if conditions had not been tolerably happy.

It was urged that Union Shop clauses be inserted in the new agreement largely for the following reasons:—

(1) it would perpetuate the Union in the plant;

(2) it would eliminate the possibility of friction in the plant between union and non-union employees;

(3) it gives the Union the control over, and disciplining of the members, said to be necessary to carry out its responsibility for enforcing the collective bargaining agreement;

(4) the good relationship with the management justified the request; and

(5) the Union would be able to devote more time to deeper or more fundamental problems of employer-employee relationship (whatever that means).

Against these contentions it was submitted that the inclusion of such clauses were not necessary, might conceivably cause some friction, were in their nature compulsory both on employees and employer and that in any event the matter of "union security" does not come within the meaning of the definition of "collective agreement" in Sec. 2 (d) of P.C. 1003.

In its attempt at conciliation the Board failed. The Chairman raised the question whether having failed "to conciliate," the Board was functus; but it seems clear its duty is to report "the result of its endeavours and its findings and recommendations to the Minister" under Sec. 13 (2) of P.C. 1003.

During the course of the hearing it was intimated by those representing the employees that while they would press for the Union Shop again, they would now accept a suitable maintenance of membership clause with check-off as a measure of union security. It is perhaps unnecessary to deal then with their contentions for Union Shop as such. One might be permitted to say, however, that in so far as perpetuating the union is concerned, the Union Shop is only one method, as is a maintenance of membership clause. Another, although not so automatic or impersonal, is by the good-will of the employees. It is not unlikely that the insertion of a clause providing for union shop or maintenance of membership would cause friction where little or none at present exists. As to the third argument, that such a clause gives the collective bargaining agent an effective control over the union members, the Employer seems content to rely upon the integrity of its employees in this regard, and in any event it has not been shown it has any remedy in action against the collective bargaining agent. As to (4), the

good relationship existed long before the local union or its parent organization. What is implied in (5) is not easy to conceive. It was stated at the hearing that the whole matter of union security was evolutionary—first recognition of the union in a collective bargaining agreement; then maintenance of membership and check-off; then union shop; then closed shop.

The facts do not, however, justify the recommending of a maintenance of membership clause. While arguing for the union shop, the rhetorical question was asked "Why not? We had 87 per cent when the vote was taken; we have 90 per cent now, and the balance are in the nature of transients." This seemed to be an argument in favour of union shop at the time, but it cannot by any stretch of the imagination be held to be an argument for maintenance of membership. Such a clause would seem to be absolutely unnecessary. There was no evidence of loss of membership, but on the contrary there was evidence of increase and no complaint was made of any difficulty in collection of dues. To protect the union there would seem to be no necessity for such a clause. There is no evidence of hostility in this plant by the employer, but on the contrary the best of relations have prevailed.

Then again, the inclusion of a maintenance of membership clause might carry the seeds of possible difficulties for union members. For example, in the event of a disagreement with the union, an employee—a union member—might be expelled from the union. The employer would be bound to discharge him, notwithstanding he was, we will say, an employee of many years' standing. Then again, the union policy or constitution might undergo a radical change and the employee member might find himself in disagreement with it. He can resign, but he will be discharged if he does. There are undoubtedly other examples, and the maintenance of membership clause that endeavoured to take care of all eventualities such as those mentioned, would be nothing but an empty thing. This is not to say, however, that in a proper case where the advantages would be greater than the disadvantages, maintenance of membership clause should not be inserted.

There is another feature of this matter that was emphasized by Mr. Russell and that was the desire of the collective bargaining agent to attain union shop or closed shop status or to move as far in that direction as possible now before the end of the war. The reason he gave was that when the war was over the position of the union would be better secured by this status. It brings up another question, how-

ever, that should be kept in mind. P.C. 1003 establishes a set of regulations under the authority of the War Measures Act. P.C. 1003 depends for its validity upon the existence of the war emergency. The Boards of Conciliation established under P.C. 1003, in my humble opinion, should be ever mindful of the fact that they are so established and, being so established, are dealing with rights ordinarily exercised by another jurisdiction, namely, the provinces.

The establishment of a closed shop or union shop in wartime in any plant would have to be considered with the greatest care and particularly in industries "essential to the prosecution of the war" as mentioned in P.C. 1003.

With respect to this question of union security, union shop or whatever form it takes, the parties before the Board seemed to differ on a matter of principle. I may be wrong, but I cannot see how things of that nature can be conciliated or reconciled. In any event it

is very doubtful if it was ever contemplated that a Board of Conciliation should have to deal with union security, because applying the usual rules of construction to the wording of Sec. 2 (d), "rates of pay, hours of work or other working conditions" one has to be an enthusiast to conclude that the perpetuation of a union was meant to be included.

The fact that the Minister of Labour referred the matter of union security to the Board does not, in my opinion, cure any defect there may be in the jurisdiction of the Board.

I recommend that the Union drop its claim for union shop, maintenance of membership and check-off and that the parties carry on until September 27, 1945, under the existing agreement.

All of which is respectfully submitted this 26th day of February, 1945.

Member.

Report of Board in Dispute Between the International Harvester Co., Chatham, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, UAW-CIO

On February 28 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between the International Harvester Company, Chatham, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, UAW-CIO.

The Board was under the chairmanship of the Honourable Mr. Justice W. D. Roach, of Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. John J. Robinette and Bora Laskin, also of Toronto, appointed by the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations and of a dispute between International Harvester Company of Canada, Limited, Chatham, Ontario, (Employer), and International Union United Automobile, Aircraft and Agricultural Implement Workers of America, U.A.W.-C.I.O., Local No. 127 (Employees)

To The Honourable,
The Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation established pursuant to the provisions of Section 13 (1) of the Wartime Labour Relations Regulations, P.C. 1003, as a result of the disputes between the parties herein, respectfully reports as follows:

The Union is the certified bargaining representative of the Company's employees at its plant in the City of Chatham, Ontario. This certification followed an election by the eligible employees on June 21, 1944, pursuant to a direction of the Ontario Labour Relations Board. On the date of the election there were 160 eligible employees, of whom 153 voted, 85 in favour of the Union, 67 against, and there was one spoiled ballot.

Since the date of that election the numerical strength of the Union in this plant has substantially increased, notwithstanding that there has not been any appreciable increase in the number of employees.

There has never been a collective bargaining agreement between the Company and its employees at this plant. From 1919 to the date of the certification of the Union there had been an Industrial Council composed of an equal number of employees and Management, the expressed purpose of which was "to establish their relations upon a definite and durable basis of mutual understanding and confidence."

During the period in which that Industrial Council functioned, and since the certification of the Union, employer-employee relations have been good.

In September, 1944, negotiations commenced with a view to the consummation of a collective bargaining agreement. In due course

agreement was reached between the parties on all the terms of the agreement, except "Maintenance of Membership" and "Dues Check-off."

Prior to the Board meeting with the parties, at the Board's request, the parties each filed a brief stating their respective positions and arguments in support thereof. The Company's brief dealt with the two issues which it understood to be in dispute. The Union, in its brief, enlarged its demand to include a provision for "Union Shop."

The Board first met with the parties at the City of Chatham on January 20. The parties were represented then and at a subsequent meeting as follows: For the Company, Mr. T. A. Rice, Vice-President in charge of manufacturing; Mr. D. E. Bothwell, Superintendent at the Chatham plant, and Mr. H. T. Dean, who is in charge of industrial relations. For the Union, Mr. Roy Brown, International Organizer; Mr. Stanley Green, Chairman of the Plant Committee, and Mr. Drummond Wren.

At that meeting the Company's representatives complained that the Union's brief, which had just been received, had taken them by surprise, inasmuch as it contained a demand for a "Union Shop," and that the Company, not having contemplated that demand, had not dealt with it in its brief. The Board felt, and the representatives of the Union agreed, that the Company's complaint was justified, and the discussion at that meeting was accordingly limited to "Maintenance of Membership" and "Dues Check-off."

The Board next met with the parties at the City of Hamilton on January 27, and in the meantime the Company filed a further brief with the Board.

"Union Shop," "Maintenance of Membership" and "Dues check-off" fall under the heading of Union Security, and the arguments advanced in favour of and against them are not new. They have been exhaustively set forth in the briefs filed, and which are being forwarded herewith. We consider that it is not necessary to enumerate them here.

It was impossible to reconcile the opposing views of the parties on the questions in issue. The Board unsuccessfully explored every possible basis upon which it was felt that the parties might agree, but none of our suggestions by way of compromise were acceptable to both parties.

We have subsequently given the matter our best consideration, and have concluded that, in the circumstances here existing, a provision for "Maintenance of Membership" and "Dues check-off", in the form set forth in the Appendix hereto, might reasonably be in-

cluded in the agreement which the parties have been negotiating, and we recommend the same.

In reaching the foregoing conclusions we have taken into consideration the following:—

First,—approximately ninety per cent of the number of eligible employees are members of the Union.

Second,—134 employees have signed cards stating that they are in favour of a maintenance of membership clause being written into the contract.

Third,—the record of the Union in this particular plant has been good.

Fourth,—the employer-employee relations have been, for many years, and are now good.

Fifth,—this particular maintenance of membership provision exemplifies the application of majority rule, without infringing on the rights of those who may desire to stay without, or retire from the Union.

Sixth,—there is no factor of compulsion in it.

Seventh,—it provides "Union Security" without the features which the Company urged were objectionable.

Eighth,—voluntary revocable check-off does not impose any unreasonable burden on the Company: it is an advantage to the employees who are Union members, and should be conducive to the more satisfactory operation of the "Maintenance of Membership" provision.

We desire to acknowledge the assistance and co-operation of the representatives of the parties, all of which is appreciated.

All of which is respectfully submitted.

Dated at Toronto this 23rd day of February, 1945.

(Sgd.) W. D. ROACH,
Chairman.

(Sgd.) BORA LASKIN,
Member

(Sgd.) JOHN J. ROBINETTE,
Member

Appendix

MAINTENANCE OF MEMBERSHIP

(a) Every present employee who is a member of the Union shall be given a period of fifteen days from the date upon which the agreement is posted, as hereinafter provided, within which to select in writing, to be filed with the Company and the Union Committee, either to remain a Union member, or to withdraw from the Union. If he elects to retain his membership in the Union, then the continuance of his membership during the life of the agreement shall be a condition precedent to his retaining his employment with the Company.

(b) Every employee, whether present or future, shall, once he becomes a member of the Union, retain his membership in the Union as a condition precedent to his continued employment with the Company, provided, however, that at any time any group of two or more

employees who are members of the Union, may resign from the Union without thereby prejudicing their employment with the Company, when such resignations would reduce the number of Union employees to fifty per cent, or less, of the total number of employees eligible for Union membership.

(c) The obligation of the Company to discharge an employee for failure to retain his membership in the Union, shall arise only if, in the opinion of the Company, such employee could be promptly replaced by an equally well trained and competent employee; such decision of the Company, if the Union so desires, to be subject to appeal to the National Selective Service authorities.

(d) If, at any time, the number of Company employees, members of the Union, should become fifty per cent, or less, of the total number of employees eligible for such membership, either by way of resignation within the fifteen-day period referred to in (a) above, or failure to become members of the Union, or resignations under (b) above, then the obligation of the

Company under this maintenance of membership provision shall forthwith terminate.

(e) These provisions shall be expressly subject to any regulations of the National Selective Service authorities that may, from time to time, be in force.

(f) In order to acquaint all employees with the terms and provisions of the maintenance of membership clauses in this contract, the Union shall post on the Company bulletin boards, not later than the day next following the date upon which the contract is signed, a notice containing all the maintenance of membership clauses and showing the date upon which the contract was signed. This notice shall remain posted on the bulletin boards during the life of the agreement.

CHECK-OFF

Upon presentation of proper authorization, signed by an employee, the Company agrees to deduct from the monthly earnings of such employee, the monthly dues of such employee to the Union, and to remit the same monthly to the local Union.

Report of Board in Dispute Between Island Mountain Mines, Limited, Wells, B.C., and Wells Miners' Union, Local 685, International Union of Mine, Mill and Smelter Workers

On February 19 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Island Mountain Mines, Limited, Wells, B.C., and certain of its mining and milling employees, members of Wells Miners' Union, Local No. 85, International Union of Mine, Mill and Smelter Workers.

The Board was under the chairmanship of Mr. A. R. MacDougall, Vancouver, appointed by the Minister of Labour in the absence of a joint recommendation of the other two members. Mr. R. H. Pooley of Victoria, and Mr. Malcolm MacLeod of Vancouver, were appointed on the recommendation of the Company and employees respectively.

The text of the Board's report follows:—

Report of Board

In the Matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between: Island Mountain Mines Co., Ltd., Wells, B.C., (Employer), and, Wells Miners' Union, Local 685, International Union, Mine, Mill and Smelter Workers, (Employees).

To: The Honourable, the Minister of Labour,
Parliament Buildings,
Ottawa, Ontario.

Sir:

We, Albert Reginald MacDougall, Chairman, Robert Henry Pooley, K.C., and Malcolm MacLeod, established as a Board of Conciliation by you in pursuance of the provisions of Section 13 (1) of the Wartime

Labour Relations Regulations P.C. 1003, to endeavour to effect an agreement herein, report herewith the results of our endeavours and our findings and recommendations as follows:

On the 12th of February, 1945, the Board met and considered the representations made to it by Mr. D. N. Hossie, K.C., on behalf of the employer, and Mr. Harvey Murphy on behalf of the employees, Wells Miners' Union, Local 685, International Union of Mine, Mill and Smelter Workers.

At the hearing, there was filed one exhibit only, namely, a suggested agreement between the employees of Island Mountain Mines Co., Ltd., represented by Local No. 685 of the International Union of Mine, Mill and Smelter Workers Affiliated with the Congress of Industrial Organizations and The Canadian Congress of Labour, (therein and hereinafter in this report referred to as 'the Union'), and Island Mountain Mines Co., Ltd., (N.P.L.), Wells, B.C., (therein and hereinafter in this report referred to as 'the Company').

This suggested agreement (hereinafter referred to as 'Exhibit 1'), was tendered by Mr. Hossie who, according to our understanding, stated that the Company was prepared to execute the same. Mr. Murphy, on behalf of the Union, advised the Board that all the terms of Exhibit 1 were acceptable to the Union, but that the Union wished two further clauses added to the agreement, and with these additions the agreement would be satisfactory to the Union. These two clauses are to be found in the suggested agreement attached to the Conciliation Officer's report,

copy of which was furnished to each member of the Board, and are Articles 2 and 15 respectively.

Article 2 reads as follows:

Sec. A. All employees, as defined in Article 1, Sec. B of the Island Mountain Mines Company Ltd., N.P.L. shall upon the completion of thirty (30) days' employment become members of the Union as a condition for their employment with the Company.

Article 15 reads as follows:

Sec. A. This agreement is made and entered into for the sole use of the International Union of Mine, Mill and Smelter Workers, Local 685, and of the employees of the Company represented herein by the Union, and the Party of the Second Part. All employees who work in and around the mine, mill, power plant and surface workings, who are eligible to become members of the International Union of Mine, Mill and Smelter Workers, Local No. 685, may join that organization and may agree to sign check-offs for all dues, assessments and fines, and the party of the Second Part agrees to forward deductions made to the Secretary-Treasurer of the International Union of Mine, Mill and Smelter Workers, Local No. 685, at Wells, B.C.

It will be noted that Article 2 provides for a Union Shop, and Article 15 for the so-called "check-off".

At the hearing, it was agreed that the Union would not insist on the inclusion of Article 15 on the understanding that the Company would act upon orders signed by each individual member of the Union and addressed to the Company and which would have the result desired by the Union as set forth in the said Article.

At a very early stage in the hearing, Mr. Murphy for the Union advised the Board that he was quite willing to substitute for the aforesaid Article 2 the following:

"All present employees who are now members of the Union, and all future regular employees who become members of the Union, shall as a condition of continued employment maintain that membership in good standing for the duration of this agreement."

The clause which Mr. Murphy agreed to substitute will readily be recognized as a maintenance of union membership provision.

Because of the view which we take of this whole matter, as will presently appear, we do not propose to do more than state some of the arguments which were stressed before us.

In addition to the usual arguments in favour of the principle of so-called "union security" clauses, Mr. Murphy pointed out that in practically all coal mines within the Province, some such clause (more often, a closed shop provision) is to be found in existing agreements between employers and workmen.

Although, as already stated, the question of check-off was settled by agreement, Mr. Murphy also directs the Board's attention to the fact that under Section 18 of the Coal Mines Regulations Act, R.S.B.C. 1936, Chapter 188, legislative sanction is, in effect, given to the system of check-off. Mr. Murphy argues that inasmuch as the provision for a closed shop, union shop or maintenance of membership, as the case may be, has proved very satisfactory in coal mining, not only is there no reason why the same should not be extended to hard-rock mining, but also what is good for coal mining is also good for hard-rock mining.

In addition to the usual arguments against the principle of so-called union security clauses, Mr. Hossie points out that there is in this province no precedent for closed shop, union shop or maintenance of membership clauses with regard to hard-rock mining and that, inasmuch as under Section 13 (2), a conciliation board is appointed to endeavour to effect an agreement and "collective agreement", as defined in P.C. 1003, is one containing provisions with reference to rates of pay, hours of work or other working conditions, the question of a union security clause does not properly come within any of these headings and the Board is therefore without jurisdiction to make any findings with regard thereto.

Counsel for the Company also mentioned the Reinstatement of Civilian Employment Act, Statutes of Canada, 1942, Chapter 31, Section 3, which makes it the duty of an employer of labour to reinstate a former employee after the termination of his service with the armed forces "under conditions not less favourable" than those which would have been applicable to each employee had he remained in the employment of that employer.

Both parties advanced various arguments pro and con the general principle of union security clauses, which, while interesting, relevant and ably presented, we do not propose to repeat. While Mr. Hossie was, we think, bound to admit that the maintenance of membership provision suggested by Mr. Murphy was preferable from the Company's point of view to either a closed shop or a union shop clause, he nevertheless vigorously opposed the same on the ground that all the arguments applicable to closed shop and union shop are also applicable to maintenance of membership and that the last-mentioned provision is merely the thin edge of the wedge leading towards a closed shop.

We think it well at this stage to define the duty of a board of conciliation under the War-time Labour Relations Regulations as set

forth in Section 13 (2) of P.C. 1003, by quoting this section, which is as follows:

"A Conciliation Board appointed under this section shall, upon its appointment, endeavour to effect an agreement between the parties on the matters on which they have not agreed and, in any event, shall report the result of its endeavours and its findings and recommendations to the Minister"

At the hearing, we endeavoured as best we could to find some common ground, whether by way of compromise or otherwise, on which the Company and the Union could agree and while Mr. Murphy showed considerable disposition to seek a compromise, he was unable to suggest anything acceptable to the Company. In this connection, Mr. MacLeod suggested to Counsel for the Company that a fair compromise might be reached by the Company's agreeing to a provision providing in effect for persons who are not members of the Union being laid off before the lay-off of any member of the Union when reductions in working force are being made, and that in hiring employees, members of the Union should be given preference. Such a provision is what is often referred to as the preferential union shop, but it was likewise opposed by the Company, which refused to recede one iota from its position that it would not entertain any proposition which would curtail its right to select its employees or which would give preference to one group of employees over another.

From the foregoing, it follows that the Board failed to effect an agreement. That being so, we do not see how the Board can do anything further except, in the words of the regulations, to report the result of its endeavours and its findings as we have already done in the foregoing part of this report. As far as recommendations are concerned, we do not propose to make any except to recommend that inasmuch as Exhibit 1 is acceptable to both parties as far as it goes, the same should be executed by the Company and the Union, and to say that the solution, if any, as to the inclusion or non-inclusion of the disputed clause must be left to the parties themselves. After having given the matter considerable thought, we do not conceive that it is any part of the duty of the Board to try to foist its opinions upon either party. Having regard to the unyielding attitude of the Company, we cannot see that any good purpose would be served if this Board were

to recommend the inclusion in the agreement of the maintenance of membership clause. In the first place, we do not think that our duty is to arbitrate, except in the sense of to conciliate; in the second place neither party need act upon the recommendation; and in the third place, we cannot see that good relations between the Company and the Union would be enhanced by any attempt on our part to make an agreement for them. It may be arguable that if the parties were anxious for a way out of the dilemma which confronts them and wished a recommendation which would be accepted graciously by both without loss of prestige to either, then some justification could possibly be found for a Board recommending the inclusion of the disputed clause. We can see absolutely no evidence, however, that this would be so in this case as the parties are poles apart on the general principle.

We can therefore only express our regret at the Board's inability to effect a conciliation and to hope that both sides will continue with mutual goodwill to endeavour to find common ground, and that, in the meantime, they will continue to agree to disagree on the one point at variance without affecting amicable relations which we are ready to believe have always existed at the Island Mountain mine.

We should say that we are accepting the statement of Mr. Murphy that the membership of the Union at the mine is in the neighbourhood of 95 per cent and that all the membership are anxious to have a union security clause incorporated in the agreement, facts which the Company should keep before it when carrying on future negotiations. Mr. Murphy was most anxious to prove these facts and suggested that the Board should hold sittings at Wells in order that the employees might be called before it. On our assurance, however, that we accepted his statement, he agreed that it would not be necessary for us to adjourn to that town.

All of which is respectfully submitted.

Report of Board in Dispute Westminster Steel Foundry Ltd.

On February 19 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between the Westminster Foundry, Limited, New Westminster, B.C., and Local 3254, United Steelworkers of America.

The Board was under the chairmanship of Mr. Edwin Eades of Vancouver, appointed in the absence of a joint recommendation from the other two members. Mr. R. L. Norman and Mr. C. Grant MacNeil, M.L.A., both of Vancouver, were appointed on behalf of the company and employees respectively.

The text of the Board's report follows:

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and Westminster Foundry Ltd., New Westminster, B.C. and Local 3254 United Steel Workers of America.

By order of the Minister of Labour of Canada, dated the 28th day of December, A.D. 1944, the above mentioned dispute was referred to a Board of Conciliation and by order of the Minister also dated the said date, Mr. J. Edwin Eades was appointed to the said Board, Mr. R. L. Norman and Mr. Grant MacNeil, M.L.A., having been appointed on the recommendation of the employers and employees respectively.

The Board met on Wednesday, January 10, at the Board Room, 212 Hall Building, 789 West Pender Street, Vancouver, B.C., with Mr. N. deW. Lyons, Deputy Registrar of the Provincial Department of Labour, in attendance.

The members of the Board were duly sworn.

Mr. J. Edwin Eades was agreed upon as Chairman.

The Order appointing the Board and appointing the members were duly filed as Exhibits "1" and "2" respectively.

The agreement in dispute between the parties and the report of William Fraser, Conciliation Officer, dated November 3, 1944, was filed as Exhibit "3".

The Board considered and adopted the rules of evidence and procedure to be followed.

It was agreed that the first hearing of the parties should take place in the Board Room on Thursday, the 18th day of January, at the hour of ten o'clock in the forenoon, and that the Chairman should notify the parties.

dated ... for the hearing. Letters dated ... January 11 respectively agreeing ... to January 25, 1945, from James Robertson, Representative of United Steel Workers of America and Mr. W. S. Owen, Counsel for the Westminster Foundry Limited respectively, were duly received by the Chairman.

The Board met on the 18th of January, 1945, at 10 a.m. and Mr. James Robertson appeared on behalf of Local 3254 United Steel Workers of America and Mr. Walter S. Owen on behalf of Westminster Foundry Limited. The Chairman sought to determine the matters in dispute and read the report of the Conciliation Officer and suggested that the parties agree that all matters covered by the agreement were agreed upon and that the only matter requiring further consideration was the question of the employer agreeing to the employees' request for a maintenance of membership clause.

Mr. Robertson took the position that the Union had suggested maintenance of membership purely for the purpose of arriving at a final agreement, but since the Company had not seen fit to agree to same after months of negotiation and the efforts of a Conciliation Officer that the Union now had decided to go back to Article I, Secs. 2 and 3 of the agreement which meant closed shop or union shop and check-off.

Mr. Owen took the position that the Company had granted substantial concessions in order to reach the stage of agreement that had been reached before the matter came before the Conciliation Board and that in view of the position taken by Mr. Robertson, the Company retracted all agreements which had been reached and would not now agree to any clauses in the agreement.

After a good deal of discussion Mr. Robertson agreed that present wages, hours of work, safety and health, vacations, production bonus and apprentices as set out in the agreement covered similar conditions to those presently in existence between the Company and its

st day of February it developed examination in chief of Mr. Mac- Assistant Manager of the Company, a witness by the Union, that an it could be reached in respect to 10, and that it might be possible to an agreement in respect of Article I, ions 2 and 3 and accordingly, after discus- and a short adjournment, each of the parties agreed to take into consideration the suggestions of the Board and to negotiate and perhaps be prepared to submit revised subsections which might meet with the approval of the other.

The Board thereupon adjourned until February 2nd.

The Board reconvened on February 2nd and Counsel for the Company produced revised Subsections 2 and 3. Revised Article 10 was quickly agreed upon. After discussion and amendment and further revision in respect of the said Subsections, Counsel for the Company was in agreement with the draft and Mr. Robertson agreed to submit same to a special meeting of the union.

The Board reconvened on Monday, February 5th and an agreement was reached, completed and executed by the parties and a copy of the same is attached hereto.¹

All of which this Board is pleased to respectfully report.

Dated at Vancouver, B.C., this 10th day of February, A.D. 1945.

(Signed) J. E. EADES,
Chairman of the Board.

(Signed) R. L. NORMAN,
Member.

(Signed) C. G. MACNEIL,
Member.

¹ Text of Article I, Secs. 2 and 3, and Article 10, as agreed upon, is as follows:—

Article I—Bargaining Agency and Recognition

Section 2 (a) The Company agrees to recognize a committee of the Union. The Company also agrees not to recognize, during the currency of this agreement, any other trade union or organization as the bargaining agency.

(b) The Company further agrees that all employees now members of the Union must remain members in good standing of the Union while employed by the Company until termination of this contract.

(c) The Company agrees to recommend to all employees that they join the Union.

Section 3. The Company agrees to co-operate with the Union to facilitate the collection of Union dues.

Article X—Facilities. The Company agrees to make every reasonable effort to install proper washroom facilities.

...rate
...section of
un...

Aft... and argument of the parties... that it might be possible for the parties to arrive at a satisfactory conclusion without further mediation. The suggestion was placed before the parties' representatives and a short adjournment was granted in order that the representatives should discuss the suggestions between themselves.

On reconvening both parties stated to the Board that it seemed possible that an agreement could be reached and both requested that the Board adjourn for at least a week during which time they would negotiate one with the other with a view to settlement.

Both parties requested that, if no agreement were reached and evidence was to be taken and submissions made, a stenographer should be obtained as the evidence and submissions would be of a lengthy and complicated nature.

The parties agreed to extension of the life of the Board to the 15th day of February, 1945.

The Board adjourned to Saturday, January 27, at the hour of 10 o'clock a.m.

The Board reconvened on the 27th of January and the parties through their said respective representatives stated that they had met and the matters in issue had been reduced to Article I, Sections 2 and 3 covering closed or union shop and check-off and Article 10 of the agreement, but upon these points they were definitely irreconcilable.

An official stenographer being present and Mr. Lyons in attendance and the parties and other representatives being ready to proceed the Board proceeded to hear the evidence of the witnesses called on behalf of the Union on the said 27th day of January and subsequently on the 29th day of January, the 31st day of January and the 1st day of February, the witnesses being examined in chief, cross-examined and re-examined.

Report of Board in Dispute Between Canners' Machinery, Ltd., Simcoe, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 257

On March 9 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Canners' Machinery, Ltd., Simcoe, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 257.

The Board was under the chairmanship of the Hon. Mr. Justice W. D. Roach, Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members; Mr. John W. Sheppard of Simcoe, and Mr. Bora Laskin of Toronto, appointed on the nomination of the company and employees respectively.

The text of the Board's report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Canners Machinery Limited, Simcoe, Ontario, Employer, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 257, Employees.

TO THE HONOURABLE THE MINISTER OF LABOUR

We, the undersigned, Chairman and Members of the Board of Conciliation appointed by you herein, submit our formal report as follows:—

Before meeting with the parties, at the request of the Board the parties each filed a brief and subsequently the Board met with the parties at Simcoe on January 26, and subsequently at Toronto on January 30, and February 2.

At all meetings with the parties, the parties were represented as follows: For the Com-

pany, Mr. J. B. Doyle, General Manager and Mr. W. S. Bryan, Accountant. For the Union, Mr. Robert Stacey, International Organizer and Mr. E. O. Leffler, an employee and Vice-President of the local Union.

The matters in dispute involved union security, seniority and hours of work.

The Company has only one plant, viz., at Simcoe, and its work is primarily that of repairing canning machinery for the canning industry. It is a subsidiary of Canadian Cannery Limited. The number of employees is small. It is said that presently there are twenty-two employees who would be covered by a collective bargaining agreement. The company is not presently engaged in any war work.

The Union had been certified as the collective bargaining representative of the employees by the Ontario Labour Court. For months the parties had been attempting to consummate the collective bargaining agreement but on the matters in issue before us they were unable to reconcile their opposing views. These views have been set forth in their respective briefs which are attached hereto.

The Board is very happy to report that it has been able to reconcile the differences between the parties and an agreement has in fact been executed by the parties, an original of which is attached.

All of which is respectfully submitted.

Dated this fifth day of March, A.D. 1945.

Report of Board in Dispute Between Campbell Soup Company, Limited, New Toronto, Ont., and United Packinghouse Workers of America

On March 27 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Campbell Soup Company, Ltd., New Toronto, Ont., and United Packinghouse Workers of America.

The board was under the chairmanship of His Honour Judge T. N. Barton of Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; the Honourable Senator G. Peter Campbell, Toronto, and Mr. Arthur Williams, Oshawa, appointed on behalf of the employer and employees respectively.

The text of the Board's report follows:

Report of Board

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and of a dispute between Campbell Soup Company Limited, New Toronto, Ontario (Employer), and United Packinghouse Workers of America (Employees).

TO:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Dear Sir:

The Board of Conciliation appointed by you pursuant to Section 13 of P.C. 1003, begs to

report the results of its endeavours and its findings and recommendations as follows:

The Board held sittings in Toronto on February 14, February 19, February 26, March 6, March 7, March 14, March 23 and March 26, at which representatives of the Company and the Union made written and oral submissions in support of their respective points of view and contentions. The Company was represented at a number of these meetings by Mr. G. M. Huycke, K.C., Counsel for the Company; Mr. D. M. Mounce, General Manager; and Mr. K. G. Platt, Assistant General Manager. The Union was represented by Mr. D. B. Archer, Field Representative of the Union; Mr. Stanley Glugosh, President of Local 158 of the Union; and Mr. John Bunn, Financial Secretary.

In the month of June, 1944, the Union asked the Ontario Labour Relations Board for certification as the bargaining representatives of a unit of employees of the Company composed of all the hourly rated employees of the Company except those who have the right to hire or fire or those engaged in a confidential capacity or as office workers. The Company replied, asking that no bargaining representatives be certified until the employees concerned had been determined and the wishes of such employees ascertained by a vote.

In the same month, the Company received a notice of intervention and copy of petition for certification filed on behalf of Campbell's Independent Workers Union. In the month of August the chief executive officer of the Ontario Labour Relations Board met with representatives of all parties—the Union, the Company, and the Independent Union—and a partial agreement was reached between the parties as to those entitled to vote. The only question remaining unsettled was whether or not the power plant employees should be included and this question was referred to the Ontario Labour Relations Board who subsequently directed that the power house employees should be included in the voting constituency. A list of employees entitled to vote was then prepared and agreed upon by all parties and September 11, 1944, fixed as the date for voting. The voters' list agreed between the parties contained the names of 159 employees out of a total of 346 hourly paid employees on the payroll (exclusive of office employees, foremen and salesmen), and on the vote being taken there were 137 ballots cast of which 129 ballots were counted, 96 of which were cast in favour of the Union and 33 in favour of the Independent Union.

On October 11, 1944, following the vote, the Ontario Labour Board certified Messrs. S. Glugosh, J. Bunn, A. Lesco, M. Holbrough, A. Scott, and D. B. Archer as bargaining repre-

sentatives on behalf of all employees within the Union. The Union subsequently filed a further petition for certification by the Board of bargaining representatives for a unit of employees, to which the Company replied and Campbell's Independent Workers' Union intervened. At a hearing before the Ontario Labour Relations Board held on the 22nd of November, 1944, the Board stated they would exclude from the bargaining unit certain specified classes and the Union stated upon the hearing that they did not wish to have included in the unit any employees who worked less than 24 hours each week. The Company thereupon gave notice to the Union that it was prepared in accordance with the direction of the Chairman of the Ontario Labour Relations Board to discuss the compromise suggested by the Chairman but at the date of this hearing no discussion had taken place and no further certification has been granted by the Ontario Labour Relations Board and no agreement has been reached between the parties respecting the inclusion of further employees.

The matter stands at the time of the hearing before this Board as indicated above at the time of the original certification by the Ontario Labour Relations Board whereby 96 of the 159 employees entitled to vote cast their ballots in favour of the Union.

The parties agreed that certification is only in respect of a small percentage of the employees of the Company although the Union indicates that it hopes to have a larger membership and be in a position at a later date to request certification as bargaining agents for a larger group of employees.

One of the principal difficulties confronting the Board as well as the Company and the Union, arises from the fact that the Company employs many part-time workers and many seasonal workers. The Company states that during the canning season they employ from 2,000 to 3,000 employees whereas at other seasons of the year their total employees, including part-time, would be less than 1,000.

In dealing with a dispute of this character where only a small number of employees have been certified, care must be taken to see that requests made by this group do not place extraordinary burdens and conditions on the Company which might place them at a disadvantage compared with their competitors in the industry. Having this in mind, the Board has made every attempt to compromise the dispute between the parties in the hope that each party will realize the difficulty of dealing with the settlement of a collective bargaining agreement where such a small percentage of the total employees of the plant is represented by the collective bargaining representatives as

certified. The parties were most co-operative in dealing with the matters in dispute between the Board and have made every effort to reach a settlement. During the first hearing each party submitted a draft agreement, all of which were carefully considered and discussed by the members of the Board, resulting in an agreement being reached between the parties with respect to all matters, except the following:

1. Union shop and check off:

The Union strongly urged the necessity of having either a Union shop or maintenance clause with check off in order that they might be able to control the discipline of their members now employed by the Company. The Company strenuously opposed both of these clauses on the ground that they had had no previous agreement or experience with this particular Union and stated that their confidence in the Union had been shaken by a cessation of work caused by the Union or its members during the course of negotiations and while an attempt was being made to settle the differences between them.

The Board settled a clause providing for a check off for the duration of the agreement from the Union members who were entitled to vote on the appointment of the Union as their collective bargaining agency in lieu of the Union shop clause and check off proposed by the Union. Both parties have compromised and agreed to the clause drafted by the Board.

2. Hours of work:

The Union urged that the hours of work should be limited to 48 per week, but indicated they were willing to work 50 hours or more providing they received overtime. As this question involves an increase in pay which is within the jurisdiction of the War Labour Board, this Board did not feel they should make any finding, but drafted a clause protecting the rights of both parties in an application now pending before the War Labour Board, which clause has now been agreed upon between the parties.

3. Seniority and grievances:

One or two questions have been raised by both parties with respect to the provisions

covering seniority and grievances which the Board have been able to settle in a manner satisfactory to both parties.

4. Management:

Several questions arose with respect to management and cessation of work clauses which the parties themselves could not agree upon and were willing to leave to the Board for settlement. The Board has settled these clauses and embodied them in a draft agreement which has now been approved by the parties.

5. Rest period:

The Union made very strong recommendations in favour of a 15 minute rest period midway during each work period of three hours or more without deduction of pay, stating that they had learned from experience that employers who had adopted this practice admitted the benefit to the Company and employees resulting from the increased efficiency of the employees. The Company pointed out that employees were now granted whatever time was required for their personal needs but stated it was impossible for them to conduct their operations so as to grant fifteen minute rest periods without seriously interfering with production. The Board does not feel it would be justified at this time in the light of the positive and definite statements made by the Company's representatives in settling the question of a rest period, although it has made recommendations by letter to both parties that the question be carefully studied and tests made in the hope some arrangement shall be found to satisfy the wishes of the employees.

A draft copy of the first collective bargaining agreement settled by the Board and recommended to the Company and the Union will be forwarded with this report.

All of which is respectfully submitted.

Dated at Toronto this 26th day of March, 1945.

(Sgd.) T. H. BARTON,
Chairman.

(Sgd.) ARTHUR WILLIAM,
Union Representative.

(Sgd.) G. P. CAMPBELL,
Company Representative.

Report of Board in Dispute Between Andrews Wire Works of Canada, Ltd., Watford, Ont., and the Federation of Industrial Workers' Union, Local No. 2

On March 17 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Andrews Wire Works of Canada, Ltd., Watford, Ont., and the Federation of Industrial Workers' Union, Local No. 2.

The Board was under the chairmanship of His Honour Judge J. J. Coughlin, Sandwich, Ont., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. George Edward Burnson, and Herbert Orllife,

both of Toronto, appointed on the nomination of the employer and employees respectively. The text of the Board's report follows:

Re: Andrews Wire Works of Canada Limited, Watford, Ontario, and The Federation of Industrial Workers' Union, Local No. 2.

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir:

Your Board of Conciliation appointed pursuant to P.C. Order No. 1003 presents its report as follows:

Hearings were held in the City of Toronto commencing March 12, 1945, at which the Company was represented by its President, Mr. Harold Newell and the Union by Messrs. Elroy Robson, Regional Director, and H. G. Rhodes, General Representative of the Canadian Congress of Labour, and Messrs. Clarence Moon and Roy Cayley, Committee Members of Local No. 2.

Much progress had been made by the parties in arriving at the details of a collective bargaining agreement leaving however, several important points on which differences of opinion prevailed.

It was finally agreed that it should be left to the Board to make a report recommending the insertion of specific provisions in the agreement in lieu of the paragraphs in the draft agreement submitted on which the parties were unable to agree.

We, therefore, recommend as follows:

RE GRIEVANCE PROCEDURE

That in lieu of paragraphs 11 to 17 inclusive in the draft agreement put in as Exhibit A at the hearing the following paragraphs 11 to 15 be substituted, namely:

11. Any employee having a grievance shall present it to his Grievance Chairman who shall take it up with his immediate superior.

12. If the grievance is not adjusted by the said superior and the Grievance Chairman, it shall be then put in writing by the Grievance Committee and presented to Management within 5 days from the day when the employee's superior rendered his decision and shall then be taken up by the Grievance Committee and Management at the next regular meeting between Management and the Grievance Committee.

13. Grievances which cannot be satisfactorily settled as herein provided shall be reviewed jointly by representation of the Management, the Grievance Committee and representatives of the Canadian Congress of Labour.

14. If the grievance cannot be settled between the representatives of the Canadian Congress of Labour and the Management, it shall then be taken to arbitration in the following manner:

- (a) The Union shall designate one person to act as arbitrator.
- (b) The Company shall designate one person to act as arbitrator.
- (c) The said two arbitrators shall mutually agree upon the selection of a third arbitrator who shall be impartial and who shall act as Chairman of the Board of Arbitration.

15. In the event that the arbitrator designated by the Union and the arbitrator designated by the Company are unable to agree upon the selection of a third arbitrator, within one week, then and in that event, either party may call upon the Minister of Labour for the Province of Ontario to designate the third arbitrator. The decision of the Board of Arbitration shall be final and binding upon both parties to the Agreement.

RE: SENIORITY

That in lieu of paragraphs 18 to 30 in the said draft agreement, the following paragraphs 18 to 30 be substituted, namely:

18. In all cases of lay-offs, rehiring, filling of vacancies and promotions, when the factors of knowledge, training, ability, skill and efficiency are relatively equal, seniority shall govern.

19. Seniority shall be plant-wide and shall be determined by the length of service from last date of entry into the Company's service.

20. Upon the completion of 60 days of continuous employment the employee's name shall be placed upon the seniority list. The seniority list shall be established as of the day the employee entered the service of the Company.

21. Employees shall be regarded as "Temporary Employees" for the first sixty (60) days of continuous employment. There shall be no responsibility for the re-employment of temporary employees if they are laid off or discharged during this period.

22. Should an employee be transferred or promoted from the scope of this agreement, and at a later date be returned to within the scope of this agreement, such employee shall have as a basis for seniority rating the date of last hiring with the Company.

23. One plant-wide seniority list shall be drafted and posted on the Bulletin Board. If no objection is made to this seniority list within 30 days from date of posting, this seniority list shall be certified to the Company by the Union as being correct, and shall thereafter be binding upon both parties to this agreement.

24. The seniority list as posted for the first 30 days shall be accepted by both parties as a basis for operations, subject to correction on or before the end of the 30-day period. Any corrections made during this 30-day period that will affect any lay-offs, rehiring, or promotions shall not carry retroactive pay adjustments. Should any employee be dismissed for cause and not thereafter reinstated by grievance procedure, and should he be rehired at a later date his seniority shall date from his last entry into the Company's service. This shall likewise apply where an employee voluntarily quits and is then rehired at a later date.

25. Employees on duty with His Majesty's Forces, or those who may be moved from their regular jobs to fill other jobs, by the National Selective Service Board, shall be considered as

on leave of absence, and shall retain their seniority rights and will continue to accumulate seniority provided such seniority rights are asserted within ninety (90) days after the date upon which they are discharged. Or in the event of such discharge occurring abroad, within ninety (90) days after the date on which they are disembarked in Canada.

26. The Company agrees to give consideration on matters of employment to unemployed members of the Local Union.

27. An employee ceases to have seniority and to be on any seniority list if:

- (a) he quits;
- (b) he is discharged for good and sufficient reason and such discharge be not reversed by grievance procedure;
- (c) the employee is absent without reasonable cause for 48 hours without advising the Company's employment department;
- (d) the employee fails to signify his intention to return to work within 48 hours after notification by mail so to do to his last address on record with the Company, and if temporarily employed does not return to work at the end of the legal seven days' notice required to the temporary employer;
- (e) non-employed by the Company for a period of nine months.

28. Sickness or disability resulting from an accident while engaged in the work of the Company shall not be sufficient cause for dismissal provided the Company shall be notified of such sickness or injury within forty-eight hours after the employee ceases to work and further, that such employee returns to work promptly upon his recovery. Upon recovery, an employee who has been sick or disabled shall return to his former position. In the event of such sickness or disability, an employee found incapable of performing his former duties shall, wherever possible, be transferred to work commensurate with his physical condition. This also applies to those returning from the Armed Forces. If, due to condition beyond the control of the Company, work is not available for an employee returning from incapacitation due to sickness or injury from an accident while engaged in the work of the Company, such employee shall be termed as "laid-off" as of the date of his "recovery" and his seniority from that date shall be governed by Sections (d) and (e) of Paragraph 27 should either become applicable to his case.

29. No employee shall have any preferred right to do any particular job assignment, and seniority shall apply only as heretofore outlined, and not to the assignment of jobs in the normal operation of the plant from day to day.

30. It is, however, distinctly understood and agreed that, notwithstanding anything in this agreement, the principle of seniority shall only be applied when it is consistent with the employee's diligent performance of his work and ability and experience to perform the duties required of him.

RE: WAGES, HOURS OF WORK AND OVERTIME

That in lieu of Paragraphs 31 to 35 in the said draft agreement, the following Paragraphs 31 to 34 be substituted, namely:

31. For all employees covered by this agreement the Company's regular work week shall

be 48 hours. The division of the 48 hour work week into hours per day shall be subject to mutual arrangement between Company and Committee.

32. In the event of the work week falling below 48 hours the Company shall determine how the hours shall be divided, but shall before such determination discuss the matter with the representatives of the Union in order to obtain their opinion of same.

33. Time and one-half is to be paid employees covered by this agreement for all time worked beyond 48 hours in any one calendar week or for any time worked in any one day beyond the regular assigned hours of work for that day, even though the employee in question has not completed his 48 hours of work during that particular calendar week, unless the employee in question has not completed his 48 hours of work in that particular calendar week due to his absence from work without the consent of Management, in which case overtime during any one particular day or days shall be paid for as straight time.

34. When in order to maintain production in any department it is necessary to work overtime, such employees as are required will work, provided, however, that the overtime work shall be evenly distributed among those normally performing the same kind of work, so far as is practicable.

RE: WAGES

That in lieu of Paragraph 39 in the said draft agreement the following Paragraph 39 be substituted, namely:

39. There is an application presently before the Regional War Labour Board for Ontario regarding wages and when the finding and direction of the said Board is issued such finding and direction shall be attached hereto as Schedule A and shall form part of this Agreement.

RE: UNION SHOP AND CHECK-OFF

This is the first collective bargaining agreement to be negotiated with the Company. The unionization of the employees of the Company is a matter of a quite recent date and the efficiency with which the local concerned can carry on its work of promoting harmony in employer-employee relations remains to be demonstrated.

The Board recommends that the Union withdraw its request for a Union Shop at the present juncture, without prejudice to its right to reopen the issue on the renegotiation of the new agreement at the expiration of the present one.

The Board recommends that the Company recognize the right of its employees to a voluntary check-off of Union dues.

All of which is respectfully submitted.

Toronto, March 14, 1945.

(Sgd.) J. J. COUGHLIN,
Chairman.
(Sgd.) HERBERT ORLIFFE,
Member.

Minority Report

I am in accord with the majority recommendations save with regard to the voluntary check-off.

I feel that in so far as the Union was not certified until September 20, 1944, and in so far as there was no Union organization in existence in the Company's plant until a very short time prior to that date, that it would be premature at this time to recommend a voluntary check-off.

In addition I am of the opinion that the voluntary check-off is clearly in conflict with Section 19 (1) of P.C. 1003. If the voluntary check-off is not to be forbidden by the Wartime Labour Relations Regulations, then they should be amended in that regard because, in my opinion, the voluntary check-off can now be granted only by ignoring the plain meaning of the above Section.

(Sgd.) G. E. BURNSON,

Member.

Conciliation Work of the Industrial Relations Branch During March, 1945

Activities Under the Conciliation and Labour Act and Other Legislation

During the month of March, officers of the Industrial Relations Branch were called upon to handle 24 industrial disputes or controversial situations involving 15,178 work-people employed in 31 different establishments. Of these 17 were new disputes which originated during the month, while 7 were situations which had been un-terminated as of February 28, and received further attention in March. They were dealt with under the provisions of the Conciliation and Labour Act, being distinct from and in addition to Conciliation proceedings under the Wartime Labour Relations Regulations described on previous pages, and under Order in Council P.C. 4020.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Following is a statistical analysis of the cases handled during the period under review:

Brief summaries of a few of the cases of chief interest are given below:—

Coal Miners, Drumheller and East Coulee, Alta.—Early in February the Minister of Labour received a joint request from the Drumheller Coal Operators' Association Limited and District No. 18, United Mine Workers of America, for the appointment of an Independent Chairman to deal with disputes affecting three mines in the area. The Minister appointed Mr. David H. Elton, K.C. of Lethbridge, Alta. to deal with all three cases. Hearings took place at Drumheller during February and the reports of the Independent Chairman were received in March. The first dispute involved the price to be paid for removing Cap Rock at Murray Collieries, Limited, East Coulee, Alta. No provision had been made in the wage agreement for the operation. The decision of the Chairman was that the operation did not constitute new work and that the present custom and price should be maintained. At the same time he expressed the opinion that the matter in dispute should receive special attention when the existing agreement comes up for revision and renewal.

The second dispute concerned the price which should be paid to miners of the Brilliant Coal Company Limited, Drumheller, Alta. for setting up timbers which are usually known as "needle sets". Having regard to matters of safety, the Chairman ruled that when an extra prop was needed in such timber sets, the price should be increased from 42½c. to 75c. The third matter referred to arbitration involved the wage rate fixed for an employee of the Atlas Coal Company, Limited, East Coulee, Alta., who was required to operate a small hoist for the conveyance of material from the mine entrance to the rock dump. The union contended that the employee should be paid the rate fixed for an Incline Engineer. The Chairman ruled that the Company should continue its present practice of paying the man the rate of a Tipple Dumper.

Bakery Workers, Toronto, Ont.—In the February issue of the LABOUR GAZETTE (p. 178) mention was made of the appointment of His Honour Judge W. T. Robb, of Orangeville, Ontario, as an Industrial Disputes Inquiry Commissioner to investigate charges that Brown's Bread Limited, of Toronto, had dismissed 14 of its employees because of membership in or activity on behalf of Local No.

264, Bakery and Confectionery Workers' International Union. Following a hearing in Toronto on February 15, the case was adjourned to permit certain material to be filed by the parties. The Commissioner's report which was received during March, was to the effect that none of the employees had been dismissed or discriminated against because of their union membership or activity.

Coal Miners, Cape Breton, N.S.—The March issue of the LABOUR GAZETTE (p. 342) contained a brief summary of events leading up to a ballot in which coal miners of the Maritime Provinces, members of District 26, United Mine Workers of America, voted to go on strike to secure certain wage increases and additional holidays with pay which had been denied them by the National War Labour Board. During March conversations took place between the Minister of Labour and District Officers of the Union. As a result, the Minister was able to announce on March 13 that arrangements had been made under which the Royal Commission which is presently investigating the coal mining industry in Canada would give the union an opportunity to make representations to the Commission in respect to certain matters at issue. The terms of reference of the Commission, of which Mr. Justice Carroll is Chairman, will include the consideration of holidays with pay and the question of the differential in wage rates paid to miners working on the coal face and to datal workers, together with the matter of overtime pay on certain mining shifts. Any recommendations which may be made by the Commission as a result of its inquiry for changes in existing terms of employment, will be referred to the National War Labour Board for approval. It is expected that the Carroll Commission will hear the representations of the parties immediately following the completion of hearings which have been scheduled in Western Canada.

Railway Car Builders, Trenton, N.S.—In the March issue of the LABOUR GAZETTE (p. 343) it was reported that the Department was dealing with a situation at the Eastern Car Company Limited, Trenton, N.S., which had caused several work stoppages by building track and steel construction employees. From March 6 to 8, Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., arranged a series of separate and joint conferences in Trenton with representatives of the management and the union. It was finally agreed that for the duration of the present contract for convertible gondolas for delivery to Russia, the existing standards of production would be continued.

Metal Workers, Montreal, P.Q.—On the afternoon of March 19, the Department was informed that a strike by some 186 employees was in progress at the plant of Keating Sons Limited, Montreal, P.Q. The immediate cause of the strike was the discharge of an employee, the company claiming that the dismissal was for cause, while the employees charged that the man had been discriminated against. There was an Employees' Association in the plant but on investigation by Mr. R. Trepanier, Industrial Relations Officer, Montreal, it developed that the United Steel Workers of America were organizing both in the plant of Keating Sons Limited, which manufactures marine hardware, and in Keating Forging and Foundry Limited. Mr. Trepanier was able to induce the employees of Keating Sons Limited to return to work the following morning, after which the Company complied with his recommendation that the dismissed employee be reinstated. It was then agreed that a consent vote should be conducted in the two plants under the supervision of Mr. Trepanier to determine whether the employees wished to have the United Steelworkers of America represent them for purposes of collective bargaining. The results of the balloting, when consolidated, showed that out of 277 eligible employees only 73 were in favour of union representation, while 178 were opposed.

Ship Repair Workers, Liverpool, N.S.—When Thompson Brothers Machinery, Limited, Liverpool, N.S., discharged an employee for refusal to work with non-union employees, some 350 other employees went on strike on March 9 demanding the reinstatement of the dismissed union member. From the day of the strike until March 13, Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was in continuous contact with the situation by telephone, endeavouring to secure a resumption of work through intervention with a spokesman of the company and representatives of the United Brotherhood of Carpenters and Joiners of America, the International Association of Machinists, and the Federated Trades Council of Liverpool. On March 12, three officers of the Royal Canadian Navy conferred with the management and addressed a mass meeting of the striking employees, but were unable to reach any settlement. Mr. Pettigrove arrived in Liverpool on March 14. By that time the employees had agreed unconditionally to return to work. Following a conference with some of the interested parties, and on request of the union representatives, Mr. Pettigrove asked the manager of the company to permit the dismissed employee to return to work on March 15, along with the employees who were on strike. This was refused, for the time being at least, on the ground that it would interfere with discipline.

Opening Meeting of Safety Committee

On page 122 of the January LABOUR GAZETTE reference was made to the establishment of safety committees in British Columbia.

The LABOUR GAZETTE has received a copy of the minutes of the opening meeting of one such committee, held in a lumber camp at Copper Canyon, Chemainus, B.C., on January 18.

The meeting discussed generally "the aims and ideas of safety first," and a number of suggestions were brought up for discussion. Among these were the following: that tool boxes or racks be placed in the "crummy" for the purpose of holding saws and axes; that the

employees refrain from crowding around the door of the "crummy" as it approaches, or from jumping off while the "crummy" is in motion. The meeting also talked about arrangements for the transportation of injured patients to the hospital; and it was considered that employees should learn as much as possible about first aid.

The camp foreman was chairman of the meeting. It was agreed that everyone in the company's employ should endeavour to carry out suggestions brought up at this and future meetings.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-Ferrous Smelting and Quarrying: Metal

NORANDA, P.Q.—NORANDA MINES LTD., AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 688.

Agreement, following report of conciliation board (L.G., Feb., p. 163), to be in effect from February 8, 1945, to February 7, 1946. The company recognizes the union as the sole collective bargaining agency for all employees at the Horne mine and plant. There shall be no discrimination by the company or the union or its members against any employee because of membership or non-membership in any lawful union or because of race, colour, religious creed or political belief. No person shall be required, as a condition of employment, to become or remain a member of any union or other organization.

Hours: the schedules of hours in effect for all hourly-rated employees at the date of execution of this agreement shall be maintained except if this should be impractical due to lack of work.

Overtime: to those who work 8 hours per day, time and one-half, after having worked 48 hours in any work week; to those who work 9 hours per day, time and one-half after having worked 54 hours in any work week. Double time for work on Christmas. Vacation of one week with pay in accordance with Finding and Direction of the National War Labour Board dated January 26, 1943, to all hourly-rated employees.

Wages: the company and the union agree that the scale of wages, bonuses, overtime rates and times and methods of payment in force shall be maintained during the life of this agreement. Provision is made for seniority rights and grievance procedure.

Manufacturing: Printing and Publishing

MONTREAL, P.Q.—PUBLISHERS OF AN ENGLISH DAILY NEWSPAPER AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 176.

Agreement to be in effect from November 1, 1944, to October 31, 1945. Only union members to be employed.

Hours: 8 per day, a 5-day week, 40 hours per week, for both day and night work. When necessary to work split shifts running from day into night hours or vice versa, shifts to be 7½ hours with pay at night rates. Overtime is payable at time and one-half for the first three hours and double time thereafter; double time for work on shifts beginning on Sundays or seven specified statutory holidays.

Wage rates: journeymen \$44.60 per week minimum for day work and \$48.40 for night work; the same minimum rates are also payable to machine operators, machinist-operators and machinists; foremen receive at least 15 per cent over regular rates. Vacation of one week with pay to all employees of the company for one year or more; those employed less than one year receive one day's paid vacation for each three months' employment.

Apprentices may be employed in the ratio of one to every eight journeymen regularly employed until eight apprentices have been employed, then the ratio shall be one to every 20 journeymen. No office will be permitted more than 10 apprentices. The minimum wage scale for apprentices shall be in proportion to the journeyman's scale for day or night work as follows: from 25 per cent during first 6 months to 75 per cent in twelfth 6 months. Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Metal Products

LACHINE, P.Q.—DOMINION ENGINEERING WORKS LTD. AND THE INTERNATIONAL ASSOCIATION OF MACHINISTS, LODGE 1660.

The agreement which was summarized in the *LABOUR GAZETTE*, June, 1943, p. 807 and May, 1944, p. 634, is extended to March 27, 1946, with the following addition; in the recalling of employees to work after a lay-off, it is provided that they shall be recalled in the reverse order to which they were laid off.

HAMILTON, ONT.—THE STEEL COMPANY OF CANADA, LTD. AND UNITED STEELWORKERS OF AMERICA, LOCAL 1005.

Agreement, following report of board of conciliation (L.G., Jan., p. 55), to be in effect from February 24, 1945, to February 23, 1946, and thereafter for a further period of one year unless sixty days' notice in writing is given by

either party. The company recognizes the union as the certified collective bargaining agency for all eligible employees at the Hamilton and Ontario works. The company and the union agree that there shall be no discrimination or intimidation of any employee in respect to union activity or membership. The company also agrees that no person shall be refused employment, coerced, restrained or influenced on account of membership or non-membership in any lawful labour organization.

Hours of work shall be those now in effect. Overtime at time and one-half for all work in excess of standard working day and week. Where it has been the practice a minimum call-in allowance of four hours pay will be continued as well as certain other allowances. Six specified statutory holidays and any other proclaimed by the Government and observed throughout Canada will be granted. Vacation of one week with pay to all employees of the company who have completed one year of service and two weeks with pay to those who have been continuously employed by the company for 25 years, less deductions of one day for each unjustifiable absence in excess of one day in any calendar month.

Wages are to continue on the same hourly and piece work scale at present in effect.

Provision is made for seniority rights and grievance procedure.

NEW TORONTO, ONT.—ANACONDA AMERICAN BRASS LTD. AND INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 811.

Agreement reached following a strike (L.G., March p. 412) to be in effect from February 26, 1945, to February 25, 1946, and thereafter from year to year subject to notice. The company agrees to recognize the union as the sole collective bargaining agency for all eligible employees of the company at the above plant. The company and the union will maintain a policy of non-discrimination toward all employees with respect to race, colour, creed, political affiliation, union membership, national origin or citizenship status.

Wages: employees on the second and third shifts (except those employees on the third shift who receive 8 hours' pay for 6½ hours' work) to receive 5 cents per hour extra. Provision is made for seniority rights and grievance procedure.

MONTMAGNY, P.Q.—A. BELANGER LTEE. AND LE SYNDICAT NATIONAL CATHOLIQUE DE LA FONDERIE DE MONTMAGNY, INC.

Agreement to be in effect from September 1, 1944, to August 31, 1945, and thereafter from year to year subject to one month's notice. New employees must join the syndicate within one month of starting to work. All workers must maintain their union membership as a condition of continued employment. The company also agrees to the check-off.

Hours: 10 hours per day, 6 day week, a 60 hour week. Overtime at time and one-half

after 55 hours. All work on Sundays and church holy days at time and one-half. Vacation of one week with pay granted all employees during summer. Labour Day is a holiday without pay.

Minimum hourly wage rates: foundry—moulders 50 to 57 cents, coremakers 39 to 43 cents, pullers-out 34 to 46 cents, cupola tenders 38 to 44 cents; other than foundry—pattern makers 49 to 61 cents, stove mounters 43 to 51 cents, enamel sprayers 42 to 50 cents, polishers 39 to 52 cents, sandblasters (after 3 months) 46 to 48 cents, mechanics 44 to 53 cents, sheet metal workers 38 to 47 cents, furnace men 35 to 45 cents, packers 37 to 49 cents, blacksmiths 44 to 58 cents, shippers 34 to 48 cents, firemen 34 to 44 cents, night watchman 31 to 35 cents, labourers 32 to 40 cents, apprentices 20 to 37 cents. Provision is made for grievance procedure.

Manufacturing: Shipbuilding

VICTORIA, B.C.—VICTORIA MACHINERY DEPOT AND THE BOILERMAKERS' AND IRON SHIPBUILDERS' UNION, LOCAL 2.

Supplementary agreement to be in effect from February 8, 1945, for the duration of the war and completion of contracts entered into during war. This is a supplement to the agreement previously in effect and summarized in the LABOUR GAZETTE, May, 1940, p. 493; April, 1942, p. 481; Feb., 1943, p. 218. This supplement provides for grievance procedure.

Construction: Building and Structures

MONTREAL, P.Q.—INSULATION CONTRACTORS ASSOCIATION AND MEMBERS OF THE HEAT AND FROST INSULATORS AND ASBESTOS WORKERS OF CANADA.

Agreement to be in effect from January 1, 1945, to January 1, 1946.

Hours: 8 per day in Montreal and district, 10 per day outside of city. Overtime at the rate of time and one-half after such hours, with double time for time worked between 12 midnight and 8 a.m., and for all work on Sundays and legal holidays. One-half hour travelling time outside of city where an extra car fare is required will be allowed, also transportation to and from work, cost of meals and room.

Wage rates: mechanics, \$1.02 per hour; improvers, 52 cents per hour first year, 67 cents second year, and 82 cents the third year; foremen, from \$1.07 to \$1.22 per hour depending upon the number of workers under them. Men working in fibreglass to receive 23 cents per hour extra and the shops to furnish masks and gloves.

The ratio of improvers may equal but not exceed a 2 to 3 ratio to mechanics in shop. No improver shall execute work unless in company with a mechanic. An improver year shall comprise 2,288 working hours.

Collective Agreement Act, Quebec

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the act include the extension of one new agreement and the amendment of five others, all of which are noted below. Requests for the amendment of the clockmaking industry at Montreal; for the amendment of the paint industry agreement for the province; and for the amendment of the fur industry agreement for Quebec were published in the *Quebec Official Gazette* March 3. Requests for the amendment of the corrugated paper box agreement for the province and the printing trades agreement at Montreal, and the building trades agreement at Joliette were published March 10. A request for the amendment of the uncorrugated paper box agreement for the province was gazetted March 17.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

WHOLESALE FUR INDUSTRY, MONTREAL

An Order in Council, dated March 10, and gazetted March 17, amends the previous Orders in Council for this industry (L.G., November, 1944, p. 1368) by adding one firm as a co-contracting party.

TANNERY INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated March 10, and gazetted March 17, amends the previous Orders in Council for this industry (L.G., March, 1945, p. 349 and other issues as therein mentioned) by the addition of one more party.

Manufacturing: Textiles and Clothing

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated March 10, and gazetted March 17, extends the term of the agreement (L.G., Oct., 1940, p. 1075, Nov., p. 1202; March 1942, p. 353; March, 1943, p. 340, June, p. 813; March, 1944, p. 359) to April 1, 1946.

Manufacturing: Metal Products

GARAGE AND SERVICE STATION EMPLOYEES, SHERBROOKE

A correction in the wording of the Order in Council (L.G., March, 1945, p. 349), was published in the *Quebec Official Gazette*, March 10, but does not affect the summary already given.

Construction

BUILDING TRADES, HULL

An Order in Council, dated March 10, and gazetted March 17, amends the previous Orders in Council for this industry (L.G., May, 1943, p. 639 and previous issues as therein mentioned) by providing for a new wage scale, as follows:

Trades	Hourly rates		
	I	II	III
Bricklayers	\$1.15	\$0.85	\$0.45
Masons	1.15	0.85	0.45
Carpenters, joiners and millrights	0.95	0.70	0.45
Screen (wood or metal), sash, window, steel partition erectors	0.95	0.70	0.45
Weatherstrippers	0.95	0.70	0.45
Plasterers	1.05	0.70	0.45
Stone cutters	0.95	0.80	0.45
Painters—			
decorators and glaziers	0.85	0.60	0.45
pneumatic machine ...	0.95	0.70	0.45
Labourers, common workers	0.55	0.40	0.30
Specialized workers	0.60	0.45	0.30
Asbestos layers	0.65	0.55	0.40
Electricians	0.75	0.60	0.45
Caulkers	0.50	0.40	0.30
Cement finishers	0.70	0.55	0.40
Freight elevator operators	0.75	0.60	0.45
Steam mixer operators....	0.70	0.55	0.40
Compressor operators	0.70	0.55	0.40
Gasoline mixer operators..	0.70	0.55	0.40
Firemen (construction) ...	0.70	0.55	0.40
Lathers (wood)	0.70	0.60	0.40
Lathers (metal)	0.80	0.65	0.45
Marble layers	0.85	0.70	0.45
Ornamental iron workers..	0.70	0.60	0.45
Roofers—			
(slate and tile).....	0.75	0.55	0.40
(composition)	0.75	0.45	0.35
Mastic floor layers.....	0.70	0.55	0.40
Mastic floor finishers....	0.55	0.45	0.35
Kettlemen	0.60	0.50	0.40
Tinsmith (erection)	1.00	0.55	0.40
Terazzo layers	0.65	0.55	0.40
Tile layers	0.75	0.60	0.45

Trades	Hourly rates		
	I	II	III
Terrazzo polishing machine operators (dry polishing)	\$0.60	\$0.50	\$0.40
Terrazzo polishing machine operators (wet polishing)	0.55	0.45	0.35
Drillers and breakers.....	0.65	0.55	0.40
Riggers	0.65	0.55	0.45
Concrete steel or rod reinforcing workers....	0.65	0.55	0.40

In structural steel, tank and plate work and steam generator—mechanics \$1 per hour, painters (structural iron) 85 cents, helpers in these trades 75 cents, installation of portable tanks and boilers not less than two tons, 70 cents.

Service: Professional

EMPLOYEES OF RELIGIOUS INSTITUTIONS, ST. HYACINTHE

An Order in Council, dated March 10, and gazetted March 17, changes the previous Order in Council for this industry (L.G., March, 1945, p. 350. This amendment does not affect the summary already given.

Service: Business and Personal

TRADE AND OFFICE EMPLOYEES, ARVIDA, JONQUIÈRE, KÉNOGAMI AND ST. JOSEPH D'ALMA

An Order in Council, dated March 10, and gazetted March 17, makes obligatory the terms of a new agreement between L'Association des Marchands détaillants de Jonquière et Kénogami, Inc. and Le Syndicat national catholique des Commis et Comptables de Jonquière, Inc., Le Syndicat national des Commis et Comptables de St. Joseph d'Alma, Le Syndicat interprofessionnel féminin de Jonquière, Le Syndicat national catholique des Commis et Comptables masculins et féminins de Kénogami, Inc., Le Syndicat national des Employés du Commerce d'Arvida, Inc., and L'Association des Marchands détaillants de Jonquière et Kénogami, Inc. Agreement to be in effect from March 17, 1945, to March 16, 1946, and thereafter from year to year until 30 days' notice. This decree applies

to any person, partnership, corporation, municipal and school corporation, financial, industrial, and commercial establishment, professional mens' offices, all notaries', lawyers', physicians', agencies' offices, etc., excluding insurance companies, banking concerns, and establishments under other collective agreement, railway employees and employees of the pulp and paper industry.

Hours: 48 per week in industrial establishments and in professional men's offices; 44-hour week in financial establishments; 51-hour week in commercial establishments; 60-hour week for employees in hotels, restaurants, cafes, gasoline stations and concerns exclusively engaged in the transport by truck. Overtime is payable at time and one-half starting from the second hour worked in any day or week over the regular hours. Holidays are to be kept and employees to be paid for them.

Wages in retail commercial establishments: superintendent \$50 per week; manager \$46; assistant manager \$30 (male), \$23 (female); accountants, bookkeepers, \$25; assistant accountants, assistant bookkeepers, stenographers, typists from \$8.50 during first year to \$16 during third year; cashiers \$15.50 and \$16, clerks from \$8.50 in first year to \$26 after 8 years for males and to \$16.50 for females; delivery men from \$10 to \$26; bicycle delivery \$8.50; commission agents from \$10.50 to \$21.

Wages in commercial establishments (other than retail): superintendent \$50; manager \$45; assistant manager \$36; accountants, bookkeepers \$26; assistant-accountant, cashier \$20; clerks from \$10.50 during first year to \$20 after four years for males and \$15.50 for females; delivery men \$25, helpers \$10.

Wages in financial institutions, industrial establishments, municipal or school corporations: manager, chief-accountant, etc. \$46; assistants \$38.50; accountant cashier \$36; book-keeper, collector, meter-reader \$31; clerk, stenographer, typist \$26; secretary-treasurer of rural municipalities \$21; junior clerk, stenographer, typist from \$10.50 to \$28 after five years for males, \$18.50 after three years for females. Wages of office employees in professional men's offices from \$8.50 to \$16 after three years for males, \$11.50 for females. Vacation: one week with pay after one year's service.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the upgrading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Navy, Army and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Veterans' Affairs;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to February 28, 1945, the gross enrolment under Canadian Vocational Training has been as follows:

Training for Industry.....	252,583
Army Tradesmen	47,398
Navy Tradesmen	8,897
R.C.A.F. Tradesmen	65,204
Rehabilitation (discharged persons from the forces).....	8,049
Students	7,585
Total	389,716

There has been a further decrease in enrolment for the classes for Army tradesmen and for Navy tradesmen, and also in the various types of training being done for war industries, either in pre-employment schools or plant schools. The demand for the streamlined courses in supervisory training, on the other hand, is increasing throughout the country, and during the month of February 2,747 foremen and supervisors attended one or more courses of this kind.

Enrolment of men and women discharged from the forces, for vocational rehabilitation training continued to show a substantial increase, with 3,210 shown as under training at the end of February. Several new training centres for rehabilitation work have been opened, including commercial schools in British Columbia, Saskatchewan and Ontario.

The plan of providing training on the job in industrial shops and establishments is working very satisfactorily, and up to the present, practically no complaints have been received, either from employers or trainees.

Discussions have taken place with Provincial Apprenticeship authorities to obtain credit for veterans with some trade experience, acquired either prior to enlistment or in the forces, and who wish to enter a trade designated under the Provincial Apprenticeship Act. The greatest of co-operation is being extended by the provincial authorities, and assurance is given that generous trade credits will be awarded.

Training for Post-War Employment

Conference of Vocational Training Advisory Council

THE Vocational Training Advisory Council provided under the Vocational Training Co-ordination Act, 1942 (L.G., 1942, p. 921), held its fifth meeting in the Senate Banking Committee Room, House of Commons, Ottawa, March 6 to 8, 1945. In the unavoidable temporary absence of Dr. G. F. McNally, Chairman of the Council, Dr. F. H. Sexton presided at the opening session.

Deputy Minister Addresses Council

Dr. A. MacNamara, Deputy Minister of Labour, in extending a welcome to the members of the Council pointed out that the Department of Labour has had a considerable degree of success in using Boards, whose functions were to advise the Government on various phases of the Department's activities. "This Council has proven its value in developing projects for men and women in the armed services and in industry," he stated. It was his opinion that Vocational Training would increase in importance, as the task of re-establishing so many ex-service men and women and war workers in other occupations in the post-war period will be a heavy one. Provision for the teaching of many new skills will be a responsibility of the Vocational Training Branch of the Department of Labour. The Branch is working in conjunction with the several provincial governments, to see that ex-service men and women have opportunities to acquire skills "by which they can support themselves in decency and good living."

Veterans' Credits in Industry and in Universities

Squadron Leader Glintz of the R.C.A.F. and Captain Harcourt of the Army appeared before the Council in connection with credits allowed by the Universities and in industrial occupations to the men in their respective armed services. The former stated that the Air Force was concerned about the evaluation of many of their technical trade courses in terms of requirements, either at the engineering level at universities, or on technical school matriculation and apprenticeship. Squadron Leader Glintz stated that the Ontario Department of Education had appointed representatives to investigate this matter and he desired to know if the other provinces would accept Ontario's evaluation of the Air Force courses. Captain Harcourt spoke on behalf of army personnel who had been trained in radar, and those in the Canadian Technical Training Corps.

Assurances were given by the Council that the points raised by the officers would be given sympathetic consideration. Members of the committee referred, however, to the difficulties in the way of making hard and fast general rules, as the granting of credits would have to be done on the basis of the individual's attainment. It was also pointed out that frequent changes in the syllabi of the technical courses in all Services added to the difficulties. In a subsequent discussion on the question of veterans' credits it was disclosed that the Deputy Minister of Labour was "strongly of the opinion that a uniform system of credits should be established." It was pointed out that the variations in academic and trade standards in the several provinces would make the establishment of a uniform standard very difficult. A committee of the Council was named to "advise the Deputy Minister of Labour concerning the best method of dealing with the situation and to co-operate with the Inter-Departmental Committee on Rehabilitation concerning credits for veterans."

Director's Report

The Director of Vocational Training, Mr. R. F. Thompson, in a progress report on the work of the Training Branch stated that:

(1) The Dominion-Provincial agreements on Youth Training and on War Emergency Training would normally expire on March 31, 1945, but that all of the provinces had expressed willingness to have both agreements renewed.

(2) In accordance with recommendations at a previous meeting of the Council, arrangements had been completed for the exemption from income taxes of training allowances made by the Department of Veterans Affairs.

(3) All the provinces had expressed a willingness to co-operate in the establishment of pre-matriculation classes under the several Departments of Education, for the benefit of veterans, and that such classes had been started in the Maritime provinces, Ontario and the Western provinces. There had been already a substantial enrolment in these classes in Ontario.

(4) The pre-employment classes for industry, except in a few instances, such as those for stenographers in the War Departments in Ottawa, and those for butter and cheese makers and egg graders in some of the provinces, had been discontinued.

(5) Approval had been given for the establishment of a total of 151 plant schools, 26 of which were still in operation at the end of January. Several of these were in the textile industry in Quebec, and those in the coal mining areas of Cape Breton were meeting with an increasingly favourable response from both the mine operators and the unions.

(6) The Supervisory Training program was expanding rapidly, and favourable results had been reported by many industries. Interest was being shown by many large companies, notably the Oil and the Railway companies. A beginning had been made in both eastern and western Canada in Job Safety Training. In some provinces it has been difficult to obtain qualified instructors.

(7) Training for the R.C.A.F. had been discontinued and was being carried on for the Navy and Army on a reduced scale.

(8) It was anticipated that Youth Training projects would expand, especially for rural young people. Up to the end of February, 1945, 7,585 students had been given assistance under the Student Aid Schedule of the joint Dominion-Provincial agreements. Special assistance to first year students in science and engineering had been discontinued.

(9) Apprenticeship agreements had been completed with all but two of the provinces, and hope was expressed that an agreement would soon be completed with at least one of these. Progress had varied in the several provinces under the agreements.

(10) The number enrolled for rehabilitation training, although comparatively small as yet, was increasing. Commercial training was perhaps unduly popular, and it was felt that counsellors might govern their technique accordingly, in order to avoid over-crowding in that field.

(11) "Training on the job has been going on very satisfactorily. Employers have shown the greatest degree of interest and co-operation." A revised edition of the Bulletin on Vocational Training for Ex-service Personnel had been issued, and some 4,000 of these had been distributed to educational and personnel selection officers in the armed services and the Department of Veterans Affairs and Labour.

(12) From the inception of the program to January 31, 1945, there had been a gross enrolment of 385,090 in the various types of projects sponsored by the Branch. "The total Dominion expenditure for this training up to December 31, 1944, had been approximately \$22,750,000.

The discussion following the presentation of the Director's report revealed among other

things, that (1) the Supervisor of Women's Training, when appointed, would be responsible for the training of all ex-service women, under the general supervision of the Director of Training; (2) the training of textile workers was to a large extent confined to power sewing, weaving, spinning and a few other specialized operations; (3) the need was recognized for a closer liaison between occupational counselling in the Armed Services and that given by the Department of Veterans Affairs, following discharge. (It was suggested that this might be done most effectively on the Regional level, by National Selective Service and Department of Veterans Affairs counsellors. Brigadier Lyon, who had recently been appointed to the staff of the C.V.T. Branch as Superintendent of Rehabilitation Training, would act as a liaison with National Selective Service and the Department of Veterans Affairs); (4) instruction in the trades should be given by competent teachers.

Training of Women

Mrs. E. D. Hardy, President of the National Council of Women, in a succinct report on the training of women, expressed the concern of the National Council that only a very small percentage of ex-service women were intending to take up domestic service after the war. She considered that there should be some way of bringing household workers under Government control through social security measures, in order to establish some standard of wages and hours. If that can be accomplished, she continued, the National Council "intends to make every effort to influence public opinion, so that the employer class will realize their responsibilities," as it was felt that employers had made this type of work undesirable to most women.

Mrs. Hardy pleaded the cause of war widows. In spite of the pensions they would receive, many will have to find employment, and training courses should be made available for them. She contended that this also applied to men in the services who, through no fault of their own, had not been given an opportunity to go overseas.

The Vocational Training Advisory Council formally went on record as "whole heartedly supporting the National Council of Women in bringing to the attention of employers of household employees . . . the necessity for improvement in the social and economic status of the occupation, and that the members of the Council through their personal affiliations with church, club, trade union, and educational groups, advocate active support of the above principles."

Mrs. Rex Eaton, Associate Director of Selective Service for Women, in speaking on employment opportunities for women, declared there was a growing concern among women as to their rights in employment. This was more notably the case with women who were beyond the normal age for getting married. She was of the opinion that many women in wartime industries would want to continue their work after the war. Further training would be necessary, as the demand would be only for trained workers, she declared.

Supervisory Training

Mr. J. H. Doige, Assistant Director of Vocational Training, stated that there was a continuing interest by Canadian industry in the training of foremen and supervisors. Judging by comments and reports received at the Regional offices, excellent results were obtained from the use of the "J" courses,* he said. Greater use could be made of these but for the shortage of instructors who possessed essential qualifications. This condition was particularly acute in Ontario and Quebec. Mr. Doige reported that the new "Job Safety Course" was being received with increasing favour as its practical application became more evident. He stated that "in British Columbia over 100 applications were received for this training before the first Institute was held to qualify Conference leaders to train industrial staffs." Industry in general is becoming increasingly aware of the benefits to be derived from organized training, from management down, in order to make the best use of the manpower, machinery and materials available, Mr. Doige stated.

Co-operation With Unions

The Director, Mr. R. F. Thompson, stated that the success of Vocational Training depended to a large extent on the co-operation given to it by employers and unions, particularly in the more highly organized trades. In view of this he urged that "extensive use should be made of joint trade Advisory Committees." The Director was of the opinion that some unions were apprehensive the training of veterans in their specific trades might result in over-crowding. It was desirable, therefore, that there should be reasonable prospects of employment before training was undertaken in any line. It was suggested that the problem be discussed frankly with particular groups of employers and officials of the unions concerned, without prejudice to the placement of veterans. Mr. Thompson

also reported certain difficulties in obtaining qualified instructors in the organized trades. Frequently the unions demanded that the instructors should be union men, while the veterans insisted on the appointment of veterans. Competent instructors must be expert tradesmen, preferably with teaching experience, he said.

Apprenticeship

The Director reported that progress, during the initial year of the apprenticeship agreement, had been slow owing to the necessity of establishing administrative machinery, apprenticeship boards and trade committees. "This stage has been pretty well completed in most provinces, particularly Manitoba and New Brunswick and development should be more rapid from now on," he said. Apprenticeship Acts had been passed recently in Alberta, Saskatchewan and New Brunswick and one would probably be passed in Quebec in the near future. He stated that satisfactory arrangements had been made with some provinces, and were being made in others, to grant credits to veterans. In discussing the matter of credits, the necessity was stressed of having "a uniform standard of attainment for each year of apprenticeship in each trade, which should set out clearly the skills and knowledges" required. It was indicated that this would be taken up at an informal conference on apprenticeship to be held in the autumn.

Regional Directors reported awakened interest in apprenticeship training and that satisfactory progress was being made, notably in the building trades.

Sub-committee on Apprenticeship:—Mr. E. R. Complin reported for the sub-committee, appointed at a previous meeting of the Council "to interest employers . . . in a bona fide system of apprenticeship" in trades and skills other than those specifically set out in schedules under provincial Apprenticeship Acts.

The sub-committee found that "employers are not at this time concerned about . . . the training and development of future staffs." Instead, employers felt that "the more important problem will be the re-assimilation of former employees returning from the Armed Forces. Mr. Complin pointed out that this does not apply to employers in the construction industry, "because of the organized approach already underway in that industry."

The sub-committee was of the opinion that such an appeal to employers, when made, should be issued by the Minister or Deputy Minister of Labour in the form of a letter to individual employers, accompanied by a comprehensive list of skills for which apprentice-

* "J" Courses include: "Job instruction", "Job relations", "Job methods" and "Job safety".

ship is advocated. Another letter should then be sent to employer organizations requesting them to set up active committees (which should include representatives of employees) to promote apprenticeship projects in their respective industries. In addition, Mr. Compilin stated, the active support of the unions should be secured.

Youth Training and Employment

Mr. F. G. Patten, of the Canadian Youth Commission outlined some of the main features of the report of the Commission's sub-committee on "Employment and Training of Canadian Youth."

It was pointed out in the report that Canadian employment and prosperity were largely dependent on world trade and also to a large extent on economic conditions in the United States. Another difficulty mentioned in the way of full employment arose from the constitutional allocation of rights and responsibilities between the Dominion and the Provinces. Mr. Patten enumerated two specific lessons that he considered had been learned during the war years: (1) A larger volume of government spending than what took place during the depression years would not have endangered Canadian economy; (2) the necessity for the control of foreign exchange and credit.

He asserted that "in the transition period there must be a recognition of the important part played by private enterprise" and that "this will probably need governmental assistance in some fields." At least some wartime controls must be continued, he stated, and the Employment Service will become increasingly important in placing workers in suitable jobs. He claimed further, that there will have to be a large reserve of public investment and a "need for maintaining a high level of spending." In the opinion of the sub-committee on employment of the C.Y.C. there will have to be "some regulation of capital investment, and the Government itself must be prepared to make expenditures in public utilities."

Mr. Patten reported that "the Canadian Youth Commission recommend a one-year period of national service for all youth, but not necessarily in the Armed Forces." The Commission was also of the opinion, he said, "that there must be an increase in Canada's export trade and at the same time a high level of domestic consumption must be maintained."

Department of Veterans Affairs

Mr. A. W. Crawford of the Department of Veterans Affairs in a brief but comprehensive

statement described the administrative set-up of that Department and the facilities it provided for the rehabilitation of ex-service personnel. He stated that a sub-committee of the District Boards would deal with training, and work closely with representatives of C.V.T. The number of Counsellors was being increased rapidly, and training courses lasting three weeks were being conducted for them. Mr. Crawford stressed the need for the closest co-operation between the three armed services and the Dominion and Provincial Departments concerned, in order to attain the success of the rehabilitation program. He said that the Department of Veterans Affairs was establishing centres in the larger cities to which discharged persons could go for assistance and advice. He drew attention to the function of the Re-establishment Credit as an alternate method of rehabilitation for those veterans who did not require training or assistance under the Veterans' Land Act, but preferred to undertake business projects on their own account.

Reports of Regional Directors

Brief reports were presented to the Council by the Regional Directors representing each of the nine provinces, in which they sketched the status of rehabilitation work and some of the problems and difficulties peculiar to their respective areas.

Equipment for Training

Mr. W. J. Gough, Procurement Officer, Canadian Vocational Training, told of the procedure that had been adopted in procuring equipment and tools for rehabilitation training. Steps had been taken to obtain needed material from surplus Dominion-owned stocks and from Government-owned wartime industries. Some would probably be secured on loan, subject to return immediately should it be needed. Typewriters and business machines were not then obtainable. However, in the opinion of some members of Council too many were applying for commercial training, and therefore, the need for such machines was not so urgent, as for tradesmen's tools, for example.

Attendance at Conference

Members of the Advisory Council who were present were: Dr. G. F. McNally, Deputy Minister of Education, Alberta (Chairman); Representatives of Employers, E. R. Compilin, Montreal, and C. B. C. Scott, Toronto; Representatives of Employees, D. S. Lyons, Montreal and A. Begin, Montreal; Representatives of Technical Education, Lt. Col. Fairey, Vic-

toria, F. S. Rutherford, Halifax, Dr. F. H. Sexton, Halifax; Representatives of Women, Mrs. E. D. Hardy, Ottawa, and Miss B. Oxner, Saskatoon; Representative of Agriculture, N. C. MacKay, Winnipeg; Representative of War Veterans, J. C. Herwig, Ottawa; Representative of Adult Education, J. Bruchesi, Quebec.

Among others present were: Dr. A. MacNamara, Deputy Minister of Labour, Ottawa; O. C. White, A. W. Crawford and Dr. Olive Russell, Department of Veterans Affairs; Mrs. Rex Eaton, National Selective Service; F.

Patten, Canadian Youth Commission; Lt.-Col. C. A. Choate, National Defence (Army); Capt. Harcourt, National Defence (Army); S/L Glintz, National Defence (Air); W. J. Gough, Canadian Vocational Training, R. F. Thompson, Director of Vocational Training and J. H. Doige, Assistant Director of Vocational Training.

The Vocational Training Advisory Council decided to hold its next meeting in October, at a date to be decided by the Director and the Chairman.

New Agreements With Provinces Under Vocational Training Co-ordination Act, 1942

Orders in Council Covering Post-War Vocational Training on Level Equivalent to that of Secondary Schools and also for Those Entering Gainful Employment

DURING the past month, the Minister of Labour, Hon. Humphrey Mitchell, announced the adoption of two Orders in Council dealing with Canadian Vocational Training. The first (P.C. 1648) gives authority under section four of the Vocational Training Co-ordination Act, 1942 (L.G. 1942, p. 921) to enter into an agreement with each of the provinces and to provide financial assistance for the development of vocational training on a level equivalent to that of secondary schools. Such agreements will be made applicable for a period of ten years commencing with the fiscal year ending March 31, 1946. This not only virtually extends the agreements which terminated at the first of the present fiscal year, but makes possible the expansion of existing vocational facilities throughout the country.

In many ways the Order parallels the Technical Education Act of 1919 and it is expected that it should be of material assistance in equalizing opportunities for vocational education throughout Canada. "Vocational", in the sense used in the Order in Council, includes not only the manufacturing, commercial and other secondary industries, but also the primary industries such as agriculture, forestry, mining and fishing. Provision is made for substantial annual cash contributions by the Dominion to the provinces entering into the agreements, in proportion to the number of young persons from 15 to 19 years of age in the respective provinces as determined by the census of 1941 and, as well, taking into consideration the provinces' ability to pay.

The second Order in Council (P.C. 1388) authorizes the Minister to enter into agreements with any province for a term not to exceed three years to provide training to fit for gainful employment such persons as are directed by the Unemployment Insurance Commission. This will include persons released from war industries and other occupations and shall not be restricted to persons in receipt of unemployment insurance benefit. Men and women discharged from the armed forces shall be given preference in regard to both the accommodation used and the hours of training. The major portion of the cost of the training under Order P.C. 1388 will be assumed by the Dominion.

The texts of the two Orders in Council follow:

Text of P.C. 1648

Whereas the Minister of Labour reports that, by reason of the war, it is advisable for the security, defence, peace, order and welfare of Canada, that the Minister of Labour be authorized, notwithstanding subsection two of section four of The Vocational Training Co-ordination Act, 1942, to enter into agreements with the various provinces under section four of the said Act to provide financial assistance for the development and carrying on after the present war of vocational training on a level equivalent to secondary school level under which the percentage of the cost of the vocational training project to be paid to the respective provinces exceeds the percentage of such costs contributed by the provinces;

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the authority of the War Measures Act, is pleased to authorize and doth hereby authorize the Minister of Labour, notwithstanding the provisions of sub-

section two of section four of The Vocational Training Co-ordination Act, 1942, to enter into an agreement under subsection one of section four of The Vocational Training Co-ordination Act, 1942, with each of the provinces providing for financial assistance for the development and carrying on after the present war of vocational training on a level equivalent to secondary school level, and containing

- (a) a provision by which the agreement will be made applicable in respect of a period of ten years commencing with the fiscal year ending March 31, 1946;
- (b) a provision for an annual grant to the province equal to an amount subscribed by the province for similar purposes but not exceeding an amount that is that proportion of \$1,915,000 which the number of people in the province of the ages of fifteen to nineteen years inclusive as shown in the last Dominion decennial census bears to the number of people in all nine provinces of the said ages as shown in the said census;
- (c) a provision for an annual grant to the province of \$10,000 in the case of each of the provinces except Prince Edward Island and of \$5,000 in the case of Prince Edward Island;
- (d) a provision under which the maximum grant payable under a provision described in paragraphs (b) and (c) in respect of any year is increased by the difference between the maximum amount payable in respect of the previous year for capital expenditures and the amount actually paid in respect of the previous year for capital expenditures;
- (e) a provision for a grant to the province for capital expenditures to be made by the province between the first of April, nineteen hundred and forty-five and the thirty-first of March, nineteen hundred and forty-eight for buildings, alterations or additions to buildings and equipment to provide additional vocational training facilities in the province equal to an amount subscribed by the province for similar purposes but not exceeding an amount that is that proportion of \$10,000,000 which the number of people in the province of the ages of fifteen to nineteen years inclusive as shown in the last Dominion decennial census bears to the number of people in all nine provinces of the said ages as shown in the said census (not less than one-half of the grant to be used for vocational training equipment);
- (f) a provision that the buildings and equipment towards the cost of which Canada makes a grant under a provision described by paragraph (e) shall be made available until the thirty-first of March, nineteen hundred and forty-eight for the re-habilitation and training of war veterans and civilian workers in war industries if so required by the Minister of Labour and that until such time such use of the said buildings and equipment shall have priority over other uses;
- (g) a provision adequately protecting provincial autonomy in vocational education and in the control of the administration of vocational schools;

- (h) a provision that the grants made by Canada under the agreement may be used in or in respect of publicly owned vocational schools (but not in schools operated or controlled by religious bodies or private corporations or individuals) for the payment of:
 - (i) the cost of erecting buildings (but not of the land on which they are erected) and additions or alterations to existing buildings used or to be used for vocational training;
 - (ii) salaries and travelling expenses of provincial administrative and supervisory vocational staff;
 - (iii) cost of vocational instruction and vocational guidance in schools;
 - (iv) salaries of vocational teachers but not salaries of caretakers or office or secretarial help;
 - (v) cost of light, heat and power but not taxes or insurance;
 - (vi) cost of machinery, equipment, hand tools, vocational supplies and materials;
 - (vii) bursaries for students attending vocational schools;
 - (viii) the cost of preparation of vocational correspondence courses;
 - (ix) the cost of training vocational school teachers; and
 - (x) the cost of maintenance and repair of plant and equipment used for vocational training purposes.
- (i) a provision that projects undertaken under the agreement may include classes in the day or evening occupying either a normal school day or part thereof and correspondence courses of grade nine standing or higher;
- (j) an agreement by the province to submit to the Minister of Labour a list of projects for which the grants are to be used with such further information as he may require;
- (k) a provision that all plans of new buildings shall be forwarded to the Minister of Labour certified by the appropriate provincial officer but shall not require his approval; and
- (l) a provision that the province will make reports in such form, containing such material and at such times of things done under the agreement as the Minister of Labour may from time to time require;

and such other provisions and agreements by the parties not inconsistent with the foregoing as the Minister of Labour considers advisable.

Text of P.C. 1388

Whereas by subsection one of section four of The Vocational Training Co-ordination Act, 1942, the Minister of Labour is authorized with the approval of the Governor in Council to enter into an agreement covering any period with any province to provide financial assistance for projects to provide vocational training to fit for gainful employment persons directed by the Unemployment Insurance Commission to attend a course of training pursuant to section twenty-eight of The Unemployment Insurance Act, 1940;

And whereas the Minister of Labour reports that it is considered necessary to make provision at this time for such vocational training so that the same may be available as required for workers released from war industries and other occupations, for the purpose aforesaid;

That provision for vocational training as aforesaid by agreement with the provinces has been recommended by the Vocational Training Advisory Council established under The Vocational Training Co-ordination Act 1942 and by the Unemployment Insurance Commission; and

That the provincial governments, by correspondence with the responsible Minister therein, have expressed willingness to co-operate with the Minister of Labour in carrying out such projects for vocational training subject to a reasonable division of the costs thereof between the Government of Canada and the Government of the province;

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour, and under the authority of subsection one of section four of The Vocational Training Co-ordination Act, 1942, is pleased to make and doth hereby make the following Order:

ORDER

1. In this Order, "vocational training" has the same meaning as in The Vocational Training Co-ordination Act, 1942.

2. The Minister of Labour is hereby authorized to enter into an agreement under subsection one of section four of The Vocational Training Co-ordination Act, 1942, with each of the provinces that will provide for financial assistance for vocational training to fit for gainful employment persons directed by the Unemployment Insurance Commission for such training including persons released from war industries and other occupations and that will contain the following provisions:—

- (a) That persons eligible for vocational training thereunder shall be men or women over sixteen years of age referred for such training by the Unemployment Insurance Commission but such referrals shall not be restricted to persons in receipt of unemployment insurance benefit;
- (b) That training may be given in industrial or commercial establishments, or in pre-employment training centres or vocational training schools either on a full time or part time basis and utilizing existing facilities so far as such are available;
- (c) That where use is made of facilities in schools conducted by a municipality, fair rentals for such accommodation may be paid but no rentals shall be paid for facilities in any school or training centre operated or controlled by either the Government of Canada (hereinafter referred to as "the Dominion") or the province;
- (d) That training shall be given for those occupations in which there are the best prospects for immediate employment;

- (e) That training given to apprentices in trades designated under a provincial Apprenticeship Act or its equivalent shall be given under the terms of the Dominion-Provincial Apprenticeship Agreement approved by the Governor in Council under the authority of Order in Council P.C. 8993 of January 21, 1944, and shall not be provided under the agreement;
- (f) That training in office and commercial work, as for example stenography and bookkeeping, will be restricted to refresher courses for persons previously employed in such occupations;
- (g) That training pursuant to the agreement shall be given without regard to the provincial or municipal residence of the trainee;
- (h) That where training under the agreement is given in a school or training centre used for the training of men or women discharged from the Armed Forces of Canada such discharged persons shall have the preference in regard to both the accommodation used and the hours of training;
- (i) That where training under the agreement is given in an industrial or commercial establishment, such training shall, with respect to employees in the establishment, be restricted to new employees requiring training for their employment and approved for training pursuant to paragraph (a) above but nothing in the foregoing shall preclude the training in the establishment of other persons approved for training pursuant to the said paragraph (a) above;
- (j) That the costs of training given under the agreement shall be allocated between the Dominion and the province as follows:
 - (i) The Dominion shall pay all costs of living allowances provided for trainees during the training period at such rates and including such items as are approved by the Governor in Council;
 - (ii) Expenditures for the purchase of capital equipment shall be shared equally between the Dominion and the province, and such equipment so purchased shall become the property of the province when no longer required for training under The Vocational Training Co-ordination Act, 1942, but in the meantime shall be the joint property of the Dominion and the province;
 - (iii) All other expenditures shall be divided on the basis of the Dominion paying sixty per cent thereof and the province paying forty per cent thereof;

and such other provisions and agreements by the parties not inconsistent with the foregoing as the Minister of Labour considers advisable.

3. The term of agreement entered into by the Minister of Labour with any province pursuant to this Order shall not exceed a term of three years from April 1, 1945.

Co-ordination of Vocational Guidance Work

Scope of Inquiry of Special Placements Division

ACTING on the recommendation of Mr. Arthur MacNamara, Deputy Minister of Labour, and with the concurrence of Mr. Allan Mitchell, Director of the Employment Service and Unemployment Insurance Branch, officials of the Unemployment Insurance Commission recently conducted an inquiry to ascertain the possibility of co-ordinating the vocational guidance plans of educational institutions and the Special Placements Division of the Employment Service Branch. During January and February of this year, the Provincial Departments of Education and the Universities were visited, and conferences held with various departmental heads, particularly those active in Vocational Guidance and Employment Psychology.

Purpose of the Inquiry

(a) *In the Schools:* The Special Placements Sections in the Employment and Selective Service offices provide special facilities for placing youths and others requiring selective placements. There has been a fine spirit of co-operation between the schools and the local offices. Conferences held with senior officials of the Departments of Education laid a basis for the maintenance and development of this co-operation in order to ensure the most effective placement of students and others in employment suited to their skills and attainments. Cumulative records compiled by the schools are of great value as an aid in this service. It is hoped that the schools will make available to officers of the Special Placements Sections such information from students' cumulative records as may be relevant to the occupational potentiality of individual students.

The schools require occupational data relating to trends, demands, requirements, and opportunities. They are anticipating that the Special Placements Division will be able to prepare these, and make them available as a

basis for direction to studies and training suited to the aptitudes, interests, ambition, and skills of the individual student.

(b) *In the Universities:* In addition to the topics discussed with the schools, the question of training courses for certain of the personnel in Special Placements Sections was presented to the Universities. As a result of these conferences, it is expected that Universities will organize special courses in Vocational Guidance, Job Analysis, Personnel Psychology, Aptitude Testing and Statistics of Measurement. These will be conducted as Extension Courses, and will be offered during evenings, for the convenience of officers in the Special Placements Sections. It is anticipated that these courses will also prove attractive to Vocational Guidance teachers and personnel men. The co-operation of the Universities is also assured in the highly expert work of test construction and validation. Aptitude and other objective tests may have to be prepared for and administered to some applicants for employment, who are referred to the Special Placements Sections because of one or more of a variety of problems involved in their placement.

Summary: It has long been recognized that the educational institutions and the Employment and Selective Service offices have reciprocal services to offer each other to ensure that when a student appears as an applicant for employment there will be adequate data available to permit effective appraisal of his skills, aptitudes, interests, and training. One result of the conferences with the Departments of Education and the Universities has been the recognition of the need and the value of this co-operation. There appears to be unanimity of opinion as to the desirability of the closest possible co-ordination of effort for the purpose of developing a unified plan of Educational and Vocational Guidance.

Activities of Unemployment Insurance Commission

Statistical Analysis of Claims and Benefit—National and Regional Employment Committees Hold Joint Meeting—Insurance Registrations—The Fund

A TOTAL of 14,990 claims for unemployment insurance benefit were received at local offices of the Unemployment Insurance Commission during February, compared with 20,412 in January and 12,284 during February, 1944.*

Insured persons who are reporting unemployed days sign the live unemployment register once a week. This includes those who have just registered a claim, who are putting in "waiting days" and who are drawing benefit. During the last six working days in February 29,692 persons (21,706 males and 7,986 females) signed the live unemployment register compared with 27,305 persons (20,046 males and 7,259 females) during the last week of January and 16,121 persons (13,327 males and 2,794 females) during the last six working days of February, 1944.

At insurance offices, 16,988 claims were considered during February and of these 13,834 were considered entitled to benefit and 3,154 not entitled to benefit. The chief reasons for non-entitlement were: voluntarily left employment without just cause (1,156 cases); insufficient contributions while in insurable employment (1,312 cases); and discharged for misconduct (309 cases).

Persons who drew one or more benefit payments numbered 23,062 in February compared with 15,575 in January and 9,056 during February, 1944. During February of this year these persons drew a total of \$22,490 for 422,873 compensated unemployed days, as against \$546,569 for 281,193 days in January and \$301,393 for 158,455 days in February, 1944. The average duration of the unemployment compensated was, then, 18.3 days in February, 18.1 days in January and 17.5 days in February of last year. The average amount of benefit paid per beneficiary was \$35.66 in February, \$35.09 in January and \$33.28 in February, 1944. The average amount paid per compensated day of unemployment was \$1.95 in February, \$1.94 in January and \$1.90 in February, 1944.

Record Benefit Payments

Benefit payments during the month of February, 1945, amounted to \$821,052.62, the highest monthly figure of benefit payments recorded to date. This figure represents an increase of 50.5 per cent over January, 1945,

*Material in this section is supplied by Unemployment Insurance Commission and Dominion Bureau of Statistics.

when benefit amounted to \$545,604.35 and an increase of 171.4 per cent over February, 1944 when the amount of benefit payments amounted to \$302,464.53.

The total revenue to the Fund during February amounted to \$5,634,401.14. After deducting the benefit payments made during the month, the net increase to the Fund was \$4,813,348.52.

Important Staff Changes

Effective April 1, 1945, there has been a re-assignment of executive personnel of the Employment Service and Unemployment Insurance Branch of the Department of Labour, under the direction of Mr. Allan M. Mitchell, Commissioner.

Mr. S. H. McLaren has been appointed Acting Assistant Director and Chief Executive Officer, in succession to Mr. H. F. Caloren, who resigned recently to accept a position with Research Enterprises, Limited, Toronto. Mr. R. G. Barclay, formerly Assistant Director, Insurance, was named Chief Insurance Officer and Mr. W. K. Rutherford, formerly Assistant Director, Employment, became Chief Employment Officer.

Mr. McLaren is a veteran of the First World War. He was made Chief Treasury Officer of the Unemployment Insurance Commission early in 1941 and in 1943 he became Assistant Director and subsequently Associate Director of the Mobilization Branch of the Department of Labour, which position he occupied until given his present appointment.

National and Regional Employment Committees Convene at Niagara Falls

A plan of procedure designed to promote closer and more efficient liaison between Local and Regional Employment Committees in Ontario resulted from a meeting of the National and Ontario Regional Employment Committees at Niagara Falls, Ontario, on February 28 and March 1. This meeting was the second occasion on which the National Employment Committee met in association with a Regional Committee. The first meeting of this kind took place at Regina, Sask., on December 1 and 2.

Chairman of Local Employment Committees in Ontario were invited to the Niagara Falls meeting, and an opportunity was given for the freest discussion of all problems with which

Committees were faced. As Regional Employment Committees are the clearing-house for recommendations from Local Committees, it was felt by the Ontario Regional Committee that it would be well to place on record the procedure which will be followed in future in respect to these recommendations. It was decided that Local Committees will meet, if possible, early in the month, that minutes of their meetings will be summarized, that the Regional Committee will meet monthly to review these minutes, and that action will be taken on recommendations as soon as possible. Local Committees will be advised of action taken.

The joint meeting was given information in respect to reinstatement in civil employment of men and women now in the Armed Forces; progress in the field of special placements, under the Special Placements Division of the Unemployment Insurance Commission; the growing interest in vocational guidance in Canada; and veterans' placement. Statistics furnished, based on pre-discharge interviews in the three services, Army, Navy, and Air Force, showed that employment is the paramount consideration in the minds of returned men and women.

The meeting was successful in every way. Results of these joint meetings have proven most satisfactory, and it is the intention to hold similar meetings in the other Regions.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at February 28, 1945, 3,042,699 employees had paid contributions to the fund since April 1, 1944, an increase of 43,264 since January 31, 1945, and 836,943 since the commencement of the current fiscal year.

As at February 28, 1945, 145,309 employers were registered as having insurable employees, an increase of 1,203 from January 31, 1945.

Registration as at February 28, 1945, by regions, follows:

Digest of Selected Decisions of Canadian Umpire under Unemployment Insurance Act

WITH the co-operation of the Unemployment Insurance Commission, the LABOUR GAZETTE with this issue inaugurates a new service in bringing to its readers throughout Canada a digest of selected cases of appeals heard by the Umpire under the provisions of the Unemployment Insurance Act (1940).

The reporting of appeal cases through these columns should prove to be of general interest not only for their precedent value for the determination of questions which may from time to time confront Insurance Officers and Courts of Referees but also because it provides a medium for presenting to employers and employees alike, brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

These selected decisions of the Canadian Umpire will be published in two series: the Canadian Umpire Decisions—Benefit Cases (these will be numbered CU-B), and Canadian Umpire Decisions—Coverage Cases (these will be numbered CU-C).

Benefit first became payable to unemployed persons insured under the Unemployment Insurance Act in February, 1942. Up to the end of February, 1945, a total of \$5,911,239.91 had been paid out in benefits on 142,000 initial and renewal claims allowed by Insurance Officers. During the same period 32,100 claims were disallowed and 4,029 references and appeals were made to Courts of Referees concerning questions arising under the Unemployment Insurance Act.

On November 10, 1941, regulations entitled "The Determination of Questions and Appeal Regulations" were made under the authority of the Unemployment Insurance Act. These regulations provide the procedure for the determination of questions by the Commission and the appeals to the Umpire from the Commission's decisions. In January, 1942, Regulations dealing with Benefit were made and provide among other things the procedure to be followed in respect to appeals to the Umpire from the decisions of the Courts of Referees in benefit cases.

For the guidance of employers and employees alike a brief summary of the law and the regulations pertaining to appeals and references appears below. It should be noted however, that this is only a summary and reference should be made to the Unemployment Insurance Act, to the Determination of

Questions and Appeal Regulations and to the Benefit Regulations proper when dealing with any specific question which may arise.

Summary of the Law and Regulations

I

Appeals to the Umpire from the Decisions of the Courts of Referees

When a claim for benefit is disallowed by an Insurance Officer, the claimant has a right of appeal (under Section 57 of the Unemployment Insurance Act) to a Court of Referees. This right must be exercised within twenty-one days or within such further time as the Commission may for special reason allow.

A Court of Referees consists of a Chairman appointed by the Governor in Council and one or more members chosen to represent employers with an equal number of members chosen to represent insured persons. The choice of such members is made, usually in rotation, from panels constituted by the Unemployment Insurance Commission and composed of residents of particular localities for which Courts of Referees have been established.

Provision is made by Section 58 of the Act for an appeal to the Umpire from any decision of a Court of Referees at the instance of an Insurance Officer in any case; at the instance of an association of employed persons of which the claimant is a member, in any case; or at the instance of the claimant in any case in which the decision of the Court of Referees is not unanimous. In any other case an appeal to the Umpire can only be made with the leave of the Chairman of the Court of Referees.

The Umpire is appointed by the Governor in Council from amongst the Judges of the Exchequer Court of Canada or of the Superior Courts of the provinces of Canada. The Umpire is the Honourable Mr. Justice Lucien Cannon of the Superior Court of the Province of Quebec.

If leave to appeal is not granted at the time that the decision of the Court of Referees is given, an application for such leave may be made by the claimant and any such application for leave shall be granted by the Chairman if it appears to him that there is a principle of importance involved or any other special circumstances.

The procedure respecting appeals to the Umpire from the decisions of the Court of Referees is set out in Sections 19, 20, 21 and

22 of the Benefit Regulations. The appeal must be in writing, must contain a statement of the grounds of appeal and must be filed at a Local Office of the Commission.

It is provided that any person or association having an immediate interest in the decision may, within ten days after a notice of appeal is filed, file with a Local Office for submission to the Umpire a statement of the observations and representations he desires the Umpire to consider in deciding the appeal.

Application may be made to the Umpire in writing for a hearing within ten days after the notice of appeal is filed and the Umpire may allow or refuse such application. When a hearing is directed a notice is sent giving the date, time and place of the hearing. Generally speaking, the procedure on the hearing is determined by the Umpire. His decision is given in writing and a copy is sent to the claimant or any other person or association having immediate interest in the decision. The decision may be published.

Under Section 64 of the Act an Insurance Officer, a Court of Referees or the Umpire, on new facts being brought to his or their knowledge, may rescind or amend a decision given on any particular claim for benefit.

Section 65 of the Act provides that where a claim for benefit is allowed by a Court of Referees, benefit shall be payable in accordance with the decision of the Court even though an appeal to the Umpire is pending, unless the appeal has been brought on the ground that the claimant ought to be disqualified from receiving benefit under the provisions of Section 43 (a), and the appeal is made within twenty-one days of the date of the decision of the Court. If any benefit is paid pending an appeal to the Umpire it cannot be recovered later from the claimant even though the decision of the Umpire is adverse to the claimant.

II

Determination of Questions by the Commission—Appeals from the Commission's Decision to the Umpire

In addition to the provisions respecting appeals concerning claims for benefit, machinery has also been set up in Section 46 of the Act for the determination by the Commission of questions arising with regard to coverage, rates of contribution and related matters. The Commission may, if it thinks fit, refer any such question to the Umpire for decision.

Section 47 of the Act provides that any person aggrieved by a decision of the Commission made under Section 46, may appeal from that decision to the Umpire.

The Determination of Questions and Appeal Regulations, which supplement the provisions of the Act, prescribe forms to be used when a person wishes to make application for the determination of a question by the Commission or an appeal to the Umpire from the decision of the Commission.

In order to obtain a decision of the Commission under Section 46, for example, an application in prescribed form must be filed with the Commission. An endorsed copy is sent by the Commission to every person having an immediate interest in the determination of the question. Any person to whom the Commission has sent a copy of the application may, before the date indicated, file with the Commission in prescribed form, a statement of particulars and representations which he desires the Commission to consider in making its decision. The Commission may conduct any further investigation it may deem necessary.

If the Commission decides that a hearing is necessary, a notice in writing of the date and place fixed for the hearing is sent to the applicant and to all persons interested. The procedure at such a hearing is determined by the Commission or, if the Commission has designated a persons or persons to hold such a hearing, the procedure may be determined by such person or persons.

The decision of the Commission is in writing and a copy is sent to the applicant and to all persons interested. The decision may be published.

An appeal to the Umpire from a decision of the Commission by a person aggrieved is made by notice in prescribed form or in substantially like form and must state the grounds of appeal. The notice must be filed with the Commission within twenty-one days from the date on which notice of the Commission's decision is sent out or within such other time as the Umpire may allow.

Endorsed copies are then sent to interested persons who are invited to file representations. Any person to whom the Commission has sent a copy of the Notice of Appeal may apply to the Umpire in writing for a hearing. The Umpire may grant or refuse such an application.

The procedure on the hearing of an appeal is determined by the Umpire. The decision of the Umpire is given in writing and copies are sent to interested persons. The decision may be published.

Under Section 49 of the Act the Commission may if it thinks fit, refer any question concerning coverage, rates of contribution or related matters to the Umpire for decision. When this is done all persons interested are

advised and may file representations. Application may be made by interested persons for a hearing and the matter is disposed of by the Umpire in the same manner as other types of appeal.

Section 66 (2) of the Act provides that if any question as to coverage of a claimant arises during the consideration of a claim by an Insurance Officer or by a Court of Referees, it shall be decided exclusively by the Commission under Section 46 of the Act, subject to an appeal to the Umpire as determined above.

Case No. CU-B.2

(March 13, 1943)

Where a voluntary arrangement provides for a stoppage of work for two weeks commencing on a fixed date, HELD: that days falling within such stoppage constitute days of recognized holidays within the meaning of Section 33 (c) of The Unemployment Insurance Act and the claimant would therefore not be deemed to be unemployed on these days.

The material facts of the case are as follows:

The claimant, a married woman, aged 35 years, was employed as a bunch maker by a firm of cigar manufacturers, from 1922 to the 25th of July, 1942.

On the 25th of July, there was a stoppage of work for a period of two weeks at the factory, which was customary at that time of year. This period was regarded as annual holidays without pay, and had been accepted as such during the past few years between the firm and its employees. Meetings of the employees were held in May in each year to determine during which period of the year summer holidays (without pay) should be taken. This procedure was followed in 1942 and employees had an opportunity of expressing their desires in this regard. It was agreed in May, 1942, that two weeks' holidays be taken, the firm exercising no compulsion in the matter, the choice being determined by its employees.

There was nothing in the evidence to show that this was a "layoff" in the ordinarily accepted meaning of the term, as the firm in question was anxious to maintain production at a maximum, in view of the demand for their products, which was beyond their ordinary capacity to fulfil. When the firm learned that application had been made for benefits under the Act, it immediately mailed postcards to its employees stating that production in the plant would be resumed on Wednesday, August 5, at 8:00 a.m., cutting the holiday period by three or four days.

The claimant alleged that she was not a party to this "holiday" or "layoff" on the

25th of July, 1942, and on July 27, 1942, registered an initial claim for insurance benefit.

The claim was disallowed by the Insurance Officer and the claimant appealed to a Court of Referees which heard the case on November 28.

The majority decision of the Court of Referees upheld the Insurance Officer's decision and disallowed the claim on the ground that the two weeks' "stoppage" was not a "layoff" in the customary sense but was an arrangement for customary holiday and agreed upon for several years past as between the firm and its employees.

From this decision the claimant appealed to the Umpire.

DECISION

The Umpire gave as his decision that the claim should be disallowed and gave as his reasons that:

The claimant could not be deemed to be unemployed during the period in question and it was quite evident that the two-week period was not a "stoppage" in the ordinary sense but was due to a custom of the firm in arranging for holidays for an agreed period at a time mutually agreeable.

The stoppage of work for two weeks commencing July 24 and 25 was a voluntary arrangement entered into by the management and its employees and therefore was a customary holiday within the meaning of Section 33 (c) of the Act, which reads as follows:

An insured person shall not be deemed to be unemployed—on any day which is recognized as a holiday for his grade or class or shift in the occupation or at the factory, workshop or other premises at which he is employed unless otherwise prescribed.

Case No. CU-B.23

(July 3, 1944)

Where a claimant had received a Booklet of Information in his pay envelope, HELD: the presumption is that he knew the correct procedure concerning an application for benefit and could not show good cause for delay in making application, especially in view of the fact that he thought work would be available at any day, this seeming to be the real reason why he did not apply for benefit any sooner.

The material facts of the case are as follows:

The claimant, a married man, aged 48 years, was employed as a coal miner by a railway and coal company from April, 1921, to March 25, 1944, when he was separated from his employment by reason of a fire.

The claimant filed his claim for benefit on June 14, requesting that it be antedated to

March 27, 1944, under the provisions of Section 30 of the Unemployment Insurance Act, 1940, and Section 7 of the Benefit Regulations. The reason for his delay in applying for benefit, given by the claimant upon filing his claim was that he did not know that he had to make an application for benefit.

The Insurance Officer refused the request for antedating on the grounds that the claimant did not show good cause for the delay in making the application.

The claimant appealed from this decision to a Court of Referees and was granted an oral hearing. The claimant stated before the Court of Referees that he thought he had to wait nine days before making his claim for benefit.

The Court of Referees unanimously upheld the decision of the Insurance Officer.

From this decision the union of which the claimant is a member appealed to the Umpire. The appeal was considered without an oral hearing.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons that:

It appears from the evidence that the claimant had received a booklet of information in his pay envelope and, therefore, there is no doubt that he knew the correct procedure concerning an application for benefit. The evidence also discloses that the claimant thought work would be available any day and this seems to be the real reason why he did not apply for benefit sooner.

Case No. CU-C.3

(July 24, 1942)

HELD: a stenographer or other employee in the office of a practising member of the legal profession is an insurable employee under the provisions of the Unemployment Insurance Act and, in order for a person to be employed in an insurable employment, it is not necessary that the employment be in some industrial organization.

On April 7, 1942, the Unemployment Insurance Commission gave the following decision:

"A" having requested a decision pursuant to the provisions of Section 46 of the Unemployment Insurance Act on the question whether Miss B. was during the period July 1, 1941, to January 29, 1942, employed in insurable employment, and the interested parties having been given an opportunity of making representations, and the representations submitted having been considered, the Unemployment Insurance Commission has decided that the said Miss B., during the said period, employed in employment specified in Part I of the First Schedule to the Unemployment Insurance Act, 1940, such employment not being specified as excepted

employment in Part II of that Schedule was, therefore, pursuant to the provisions of the said Act, insured against unemployment in the manner provided by the said Act.

On the 27th of April, 1942, the appellant, under Section 47 of the Act, appealed to the Umpire.

The facts of the case are as follows:

In July, of 1941, local inspectors of the Unemployment Insurance Commission requested the appellant to register as an employer and to arrange contributions in respect of the employment of Miss B. a stenographer in his office. "A" contended that the employment of his stenographer was not covered by the Unemployment Insurance Act.

Miss B. was engaged in 1915 under a general monthly hiring, her employment has been continuous and is on a part-time basis and personal services are required. She receives \$35 per month for services rendered as a stenographer and bookkeeper and the employer, or someone on his behalf, has the right to exercise control as to the method of performance of duties of the employee.

In support of the appeal the material already filed with the Commission has been submitted.

The appellant in substance submits that the employments specified in Part I of the First Schedule to the Act do not contemplate the inclusion of a stenographer or other employee in the office of a practising member of the legal profession and that to be employed in insurable employment the employee must be employed in some industrial organization.

The appellant does not contend that Miss B.'s employment is excepted under Part II of the First Schedule to the Act, but simply that it is not included in Part I of the First Schedule.

Section 13, Paragraph (1) determines what persons are insured under the provisions of the Act. It reads as follows:

Subject to the provisions of this Act, all persons who are employed in any of the employments specified in Part I of the First Schedule to this Act, not being employment specified as excepted employments in Part II of that Schedule shall be insured against unemployment in manner provided by this Act.

Paragraph (a) of Part I of the First Schedule of the Act reads as follows:

Employment in Canada under any contract of service or apprenticeship, written or oral, whether expressed or implied, or whether the employed person is paid by the employer or some other person, and whether under one or more employers, and whether paid by time or by the piece or partly by time and partly by the piece, or otherwise.

The terms used in this paragraph are most comprehensive and do not allow any distinction between employees as it is claimed by the appellant.

Under the circumstances it is ruled that the employment of Miss B. by the appellant, "A", is an employment specified in Part I of the First Schedule to the Act not being employment specified as an excepted employment in Part II of that Schedule, and that conse-

quently Miss B. was an insured person from the first day of July, 1941, to the date of the application for decision of the Commission and continues to be an insured person while employed under the same conditions by the appellant.

Appeal disallowed.

(Sgd.) LUCIEN CANNON,
Umpire.

Ottawa, July 24, 1942.

Priority on Coal to Those Ordering Before June 1

Under new coal regulations, effective April 1, householders in Ontario, Quebec and the Maritime Provinces will be given priority in the delivery of next winter's fuel if they place their order before June 1, the Minister of Munitions and Supply, Hon. C. D. Howe, announced recently.

The new regulations, issued by Coal Controller E. J. Brunning, will require every householder who buys high grade fuel to accept a proportion of substitute fuel with each delivery of anthracite. By the same token, it prohibits a dealer from delivering high-grade fuel without at the same time delivering substitute fuel.

The priority clause reads: "Coal dealers must, until September 30, 1945, give priority on deliveries of available supplies of fuel up to the maximum permitted by this order to consumers who place their purchase orders before June 1, 1945."

In the forthcoming coal year every consumer will be limited to the same amount of coal and/or coke he burned in the coal year

just ending. A coal year begins on April 1 and ends on March 31.

Munitions Minister Howe urged every Canadian householder to continue conserving coal and to place his order as early as possible. "The demand for coal, both for North American requirements and for the war areas and liberated countries, is greater than ever before in history," he said. "In particular, the demand, for household fuel, up about 40 per cent since the war began, now far outstrips the supply. Thus it will be absolutely necessary for every householder, who ordinarily burns hard coal, to use a goodly proportion of substitute fuels.

"Because of the snow, and because enough people did not order early, the delivery of coal in some communities has been a serious problem. It need not be a problem in any community if every householder co-operates with his coal dealer by placing his order at once and accepting his fuel whenever his dealer is able to deliver it."

Trade Union Membership in Bombay

According to the *East Indian Labour Gazette*, published in Bombay, there were five provincial federations of trade Unions, as distinguished from the All-India federations, in existence at the end of June, 1944.

In addition to these five federations, the All-India Postmen's and Lower Grade Staff Unions, the All-India Trade Union Congress and its provincial committee, the All-India Government Employees' Federation and the Bombay Provincial Committee of the Indian

Federations of Labour have their head offices in Bombay City.

The membership of unions having their head offices in Bombay City recorded a slight increase from 138,882 to 139,579, or of 0.50 per cent during the first six months of 1944. However, unions with headquarters in other centres of the province of Bombay showed increases in some instances of over 11 per cent, making a net increase in the province of about five per cent. The total trade Union membership for the province is given as 245,519 at the end of June, 1944.

Collective Agreements in the Pulp and Paper Industry in Canada, 1944

A file of collective agreements has been maintained in the Department of Labour for many years and summaries of important agreements have been published each month in the LABOUR GAZETTE. The Research and Statistics Branch has under-

taken to make a series of analytical studies of current agreements on file, by industry and by topic. The first, covering the Pulp and Paper Industry, is given in the following pages.*

Summary

There are 37,020 workers employed in the 106 pulp and paper mills in Canada. About 72 per cent of these are organized by the three principal unions in the industry. Certain classes of employees, chiefly the supervisory staff and some temporary employees, are excluded from the collective agreements negotiated. Nevertheless 80 per cent of the total number of employees in the industry are governed by agreements between the manufacturers and the unions.

There are no "closed shop" and comparatively few "union shop" agreements, but in 57 plants covering 76 per cent of the total number of workers under agreement there is some obligation on the workers to join and/or to maintain their union membership, the majority

requiring new employees to join the union and all members to maintain their membership. Preference to union members in hiring new employees is provided in agreements in 30 plants. Almost all agreements provide that in laying off employees, preference of continued employment will be given according to seniority, among employees of equal efficiency. Some consideration is also to be given to seniority in making promotions.

One week's vacation with pay annually is general throughout the industry. This is increased up to two weeks after long service in some plants.

All agreements provide machinery for the settlement of disputes and for arbitration when the grievance procedure fails.

Introduction

The Pulp and Paper Industry

This industry has a long history in the industrial life of Canada and the manufacture of pulp and paper has been consistently one of the most important industries in Canada over an extended period.

According to the Preliminary Report on the Pulp and Paper Industry in Canada, 1943, issued by the Dominion Bureau of Statistics, the pulp and paper industry in Canada in the year 1942 ranked first among Canadian manufacturing industries with respect to capital investment, second with respect to net value of production, third with respect to gross production, fourth with respect to wages and salaries paid, and sixth with respect to employment. In the above comparisons no allowance is made for the capital investment, the men employed, the wages paid, or the products of the operations in the woods, which form such an important part of the industry as a whole. Employees in pulp and paper mills make up the great proportion of the population of several towns in Canada and it has been estimated that, including its woods operations, the pulp and paper industry pro-

vides livelihood in full or in part for at least half a million persons in Canada.

The Table given below serves to indicate the size and importance of the pulp and paper industry.

THE PULP AND PAPER INDUSTRY IN CANADA¹ 1943²

Gross value of products	\$345,653,470
Total value of materials and supplies	\$143,956,462
Persons employed	37,020
Salaries and wages paid	\$71,199,422
Cost of fuel used.. ..	\$21,470,240
Net value of products ³	\$165,485,944
Capital employed	\$667,458,143
Power employed h.p.	1,966,533
Electricity purchased	\$14,740,824

¹Information taken from Preliminary Report on the Pulp and Paper Industry in Canada, 1943, issued by the Forestry Branch, Census of Industry, Dominion Bureau of Statistics.

²Subject to revision on further examination of individual reports.

³Gross value of products less the cost of materials and supplies, fuel and electricity. In the pulp and paper industry the cost of materials is made up of the sum of the values of pulpwood, chemicals and supplies used in pulp-making, and of the pulp, chemicals and supplies used in paper-making.

* A limited supply of reprints of this article is available on request from the Department of Labour.

The pulp and paper industry has been one of the chief factors in the development and the use of hydro-electric power. Prior to the present war, the industry was the largest single user of power in Canada. Proximity to extensive pulpwood areas and to sources of hydro-electric power has been a determinant factor in the location of many of the larger mills.

In production of wood pulp, Canada ranks second only to the United States. In production of newsprint paper, Canada stands first, having a mill capacity of over four and a quarter million tons a year which is equal to the combined mill capacity of the United States, Britain, Norway, Sweden and Finland.

Many products of the industry are used in the manufacture of munitions; others enter more indirectly into the war program. After sources of supplies in Norway, Sweden and Finland were no longer available to the United Nations, demands on the Canadian industry were heavily accentuated.

Canadian pulps are essential for nitrating into high explosives and for the manufacture of plastics, synthetic fibres, surgical dressings and hospital wadding. Shells, gun barrels, ordnance parts and small arms ammunition are cased or packaged largely by using paper-board, and modifications of paper board are used extensively as containers for food, medical supplies and blood plasma. Sea and land mines, shells, radio equipment and other weapons and instruments of war utilize certain paper products. Building board has assisted in speeding up the construction of barracks, hospitals and other buildings. The maintenance of a free press by newspapers in over forty countries has depended chiefly on the output of Canadian newsprint mills. Many other kinds of paper, such as book and writing paper for administrative use and for publications, wrapping paper, grease-proof papers and special grades have also been essential.

A booklet "Pulp and Paper Supply", prepared by the Canadian Pulp and Paper Association and the Newsprint Association of Canada for the Conference of the United Nations Relief and Rehabilitation Administration, held at Montreal, in September, 1944, shows that the production of pulpwood in Canada rose from an average of 623 millions of cubic feet during the years 1935-39 to an estimated average of 831 millions during the years 1940-44. Raw pulpwood deliveries from Canada to the United States, during the years of the war, have averaged about 25 per cent higher than in the five pre-war years.

Pulp, the first product which results from processing pulpwood, either by grinding or by chemical treatment, in its various grades, con-

stitutes the basic material for the manufacture of newsprint, other papers, wallboards and many other derivatives. Prior to the war, both Great Britain and the United States imported relatively much higher supplies of pulp from Norway, Sweden and Finland than they did from Canada. When the Scandinavian supply was no longer available, Canadian exports of wood pulp rose very rapidly. Analysis of Canadian exports of wood pulp, as published in the pamphlet "Pulp and Paper Supply", shows that in 1938 Canada exported to all countries 559,000 tons of wood pulp, of which amount 73,000 tons were exported to Britain and 454,000 tons to the United States. Total exports of wood pulp to all countries in 1943 are estimated at 1,581,000 tons, of which 273,000 tons were exported to Britain and 1,280,000 tons to the United States.

In the newsprint field, from the year 1940, Canada, assisted by two newsprint mills in Newfoundland, has been almost the only source from which the United Nations could import newsprint. During the period 1935-1939, Canadian newsprint production averaged 3,003,000 tons. The estimated average for the period 1940-1944 is 3,229,000 tons. It is estimated that during 1942-1943 exports of newsprint from Canada constituted 58 per cent of newsprint imports by Great Britain, 77 per cent by Australia, 86 per cent by British India and Ceylon, 80 per cent by New Zealand, and 83 per cent by South Africa. In North America, Canadian newsprint mills provided for all the wartime paper supplies for Canadian newspapers and between 70 and 75 per cent of the total supply for the United States which is the world's largest consumer of newsprint.

The study of collective agreements which follows is made from current agreements on file in the Department of Labour. It applies to mill operations in the pulp and paper industry only and does not apply to woods operations, to sawmills or to the manufacture of paper products.

Unions

There are three unions which operate exclusively in this industry. These, with the 1944 figures for the number of locals and number of members in Canada, are as follows:

International Brotherhood of Papermakers with 53 locals and 5,192 members, the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, with 63 locals and 15,500 members (both affiliated with the Trades and Labour Congress of Canada, and in the United States with the American Federation of Labour); and the National Federation of Pulp and Paper Employees affiliated with the Cana-

dian and Catholic Confederation of Labour, with 23 branches and 5,736 members. The total of organized workers in the mill operations of the industry, therefore, is approximately 26,500.

In plants having agreements with the American Federation of Labour Unions, the International Brotherhood of Paper Makers has jurisdiction over the skilled workers in the machine and beater rooms and some finishing processes, and the International Brotherhood of Pulp, Sulphite and Paper Mills Workers over all the other classes of work in paper mills and over all classes in pulp mills. There are exceptions to this in a small number of plants where additional A.F. of L. unions for carpenters, electrical workers, machinists, operating engineers, etc., retain their identity and sign separate agreements for their own trades only, or sign the plant agreement with the other unions. In the majority of plants, however, these trades belong to the International Brotherhood of Pulp, Sulphite and Paper Mill Workers. In plants manufacturing paper or pulp and paper, therefore, the company signs either a joint agreement with both of these unions or separate agreements with each of them. The National Unions of pulp and paper

workers are affiliated with the Canadian and Catholic Confederation of Labour and have agreements only in the province of Quebec. In addition to the above unions, one plant manufacturing paper boards and other products has an agreement with the United Gas, Coke and Chemical Workers of America, a C.I.O. affiliate.

Form of Agreements

Agreements in this industry to which the T.L.C. and A.F. of L. Unions are parties are made by each company directly with the International unions and countersigned by the local unions' officers. Agreements to which the National Catholic Unions are parties are signed both by the local union and the National Catholic Federation of Pulp and Paper Workers.

Most agreements consist of the formal agreement, the mill rules and a wage schedule. In some cases, most of the working conditions form part of the mill rules, while in others these same conditions are found in the body of the agreement itself. The complete agreements including the mill rules and wage schedules are dealt with in this study.

General Statistics

The following table shows the extent to which this industry was operating under agreement in 1944. It might be pointed out that the figures for employment in the industry include all employees of the mills, while the number under agreement excludes salaried employees and certain other classes of the technical workers and temporary workers.

Of the 73 plants under agreement, 58 are under agreements with the T.L.C. and A.F. of L. unions, four are partly with the T.L.C. and

A.F. of L. unions and partly with the National Catholic union, 10 are with the National Catholic union and one with the United Gas, Coke and Chemical Workers Union.

Of the 30,050 workers governed by the agreements, 23,448 are under agreements to which the T.L.C. and A.F. of L. unions are parties, 5,747 to which the National Catholic unions are parties. Some of the remainder are under agreement with the United Gas, Coke and Chemical Workers' Union.

Summary of Provisions of Agreements and Sample Clauses

All of the 73 agreements on file in the Department of Labour for the year 1944 have been analysed and a summary of the findings is given below together with sample clauses.

Duration and Renewal

The general practice in the industry is that agreements should be in effect from May 1 of one year to April 30 of the next year, and

thereafter from year to year subject to thirty days' notice given by either party prior to the expiry date in any year. In two agreements the required notice is sixty days and in one agreement ninety days. In some few cases the initial period is for slightly more or for less than one year in order to bring the expiry date to April 30. Instead of May 1 to April 30, the agreement year for a few agreements is January 1 to December 31, and June 1 to May 31. Only three agreements have no provision for the automatic renewal, and one agreement provides that the agreement in any case will remain in effect for the duration of the war unless national emergency or government regulations require its previous termination. One agreement provides for reference to arbitration, if negotiations for its renewal fail.

*This agreement shall be in effect from May 1, 1944, to and including April 30, 1945, and from year to year thereafter, subject to termination by either party on any April 30th on thirty (30) days written notice given prior to such April 30th.

Either party desiring any change in this agreement at the expiration of the same shall give to the other party thirty (30) days notice in writing, prior to such expiration, that a change is desired; otherwise, this agreement remains in force and effect for another year.

In about half of the agreements, the terms of the agreement are specifically stated to be subject to federal and provincial legislation.

Any provision of this agreement which may be or may become in conflict with present or future provisions of federal or provincial laws or Orders in Council becomes by that fact null and void.

Purpose

About 90 per cent of the agreements have a clause setting out their general purposes, identical with or similar to the following:

The general purpose of this agreement is, in the mutual interest of the employer and employee, to provide for the plant under methods which will further, to the fullest extent possible, the safety and physical welfare of the employees, economy of operation, quality and quantity of output, cleanliness of plant and protection of property. It is recognized by this agreement to be the duty of the Company and the employees to co-operate fully, individually and collectively, for the advancement of said conditions.

As a further clarification of the purpose, agreements for five plants set forth the responsibilities accepted by each party.

It is understood and agreed:

(1) That the members of the Union regard themselves as responsible for the success of the Company, and intend to co-operate in every way to bring about this success.

(2) That the Company to be successful should accomplish the following:

(a) Mutually fair and reasonable working hours; mutually fair working conditions; mutually fair wages.

That wages and working hours must leave provision for:

(b) Safe and sound financing, consistent with existing economic factors, to provide a proper balance between income and outgo of cash so as to enable the maintenance of funds for: Depreciation; Obsolescence; Renewals and replacement of plant and equipment; A fair return to the numerous investors on the money they have furnished to build the plant, thus making this enterprise possible; Sufficient cash working capital to maintain good standing with banks and suppliers of material and equipment.

Union Status

RECOGNITION AND APPLICATION

Agreements for 57 of the 73 plants contain clauses by which the Company recognizes the union or unions parties to the agreement as the bargaining agencies. Of these, the agreements for eight plants state that the unions are the bargaining agencies for their members, but in all other agreements with recognition clauses, the unions are recognized as the bargaining agencies for all the employees or for all employees who are eligible for membership.

The Company agrees to recognize..... as the sole collective bargaining agency for all employees of this Company on all matters pertaining to rates of pay, hours of work, and working conditions.

Practically all agreements exclude from their provisions a number of classes of employees, chiefly temporary employees, supervisory staff and salaried workers. In some cases technical and engineering staff are also excluded.

The present agreement shall apply only to the permanent employees of..... Temporary employees do not come under this agreement.

The following employees are considered as part of the management: Superintendents, Assistant Superintendents, Foremen above the rank of sub-foreman, Office Force, Engineering Department, Technical Control Department, Research Department, Storemen, Watchmen and First Aid Staff, and therefore do not come under this agreement.....

For the purposes of this agreement permanent employees are those men who are filling regular standard jobs but it is understood that they do not include casual labour or seasonal workers such as those required for wood handling, construction or temporary jobs.

UNION MEMBERSHIP

In agreements covering 57 plants and 23,000 workers (76 per cent of the total workers under agreement) there is some form of obli-

*The following extract and those used throughout this study are quotations from agreements on file in the Department of Labour for this industry. All such quotations are printed in the smaller size type.

gation on workers to join the union and/or to maintain their union membership. In nine of these plants the obligation is simply that of new employees or of all employees joining the union; in seven plants (including six in British Columbia) there is no compulsion about joining the union, but members who have joined or who later join are required to maintain their membership; in the remaining 41 plants, new (or in some cases all) employees must join the union and all union members must maintain their membership.

Of the 57 plants with some compulsion as to union membership, 50 plants, affecting 19,350 workers, have agreements providing that all new employees must join the union or one of the union parties to the agreement as soon as such employees become eligible or within a fixed time after being employed.

New employees, unless temporarily employed, on becoming eligible for membership in the union shall join within fifteen days.

In 48 plants, affecting 20,430 workers, there is a maintenance of membership clause.

Any employee who is now a member in good standing, or who becomes or is reinstated as a member of either signatory union shall as a condition of continued employment maintain such membership in good standing throughout the term of this agreement.

In 24 plants, affecting 7,000 workers (which are included above in those requiring new employees to join the union) there are provisions requiring or possibly requiring all present employees as well as the new employees to become and remain union members. There is doubt in some cases as to the exact meaning of these clauses in so far as they pertain to non-union employees already on the payroll. The clause quoted below, however, is one in which the "union shop" provision is clearly stated.

Permanent and seasonal employees, eligible for membership in the signatory union, shall as the condition of continued employment, join and maintain membership in good standing in the signatory union.

Nineteen per cent of the workers under agreement are covered by agreements in which the National Catholic unions represent the workers and none of these have any provision obliging any employees to join the union or those who have joined to maintain their membership.

JURISDICTION

Where two or more unions are parties to the same agreement it is usual to include a clause relieving the company of settling questions of jurisdiction.

No employee is to be required to become a member of more than one union. Questions of

jurisdiction shall conform to the regulations covering such matters as fixed by the American Federation of Labor and the Company will not be asked to act upon any matters of jurisdiction between organizations.

In a few plants the following qualification is added:

However, when the respective organizations are unable to agree on the union a man is required to join, then the Company will specify the union in which they will recognize him and shall consider him a member of that union until such time as the respective organizations agree.

CO-OPERATION OF COMPANY AS TO UNION MEMBERSHIP

In six plants the companies agree not to interfere with or in any way discourage employees from becoming union members. In one third of all the plants the Companies specifically undertake to co-operate with the union by assisting them in obtaining and retaining members.

The..... (Company) will co-operate with the local unions in every way the management of the Company considers proper and lawful to assist in obtaining and retaining members.

UNION ACTIVITIES

In various agreements, union activities are prohibited during working hours and in some cases on company premises. In one agreement this prohibition also extends to political activities.

It is understood and agreed that no union activities, except those in which management representatives take part, shall take place on Company property, or Company time.

NO COERCION BY UNION

In more than twenty plants the union undertakes to refrain from any intimidation or coercion against employees with a view to inducing them to join the union.

The Syndicate shall not have recourse to intimidation nor coercion to obtain members.

Several of these agreements restrict the union's right to impose unreasonable fees on new members or penalties as a condition of reinstatement.

No employee shall be subject to any penalty against his application for membership or reinstatement, except as may be provided for in the Constitution and By-Laws of the two International Brotherhoods.

RESPONSIBILITY OF UNION

In a small number of agreements the union definitely makes itself responsible for the conduct of its members.

It is generally recognized in signing this agreement, that the Company shall receive closer co-operation from the union members,

in the operation of its mill. The union will take the responsibility for its members on matters pertaining to production, complaints on products, poor workmanship, unsafe practices and accidents, dirt, slovenliness, unclean rooms and equipment, and will be prepared to discipline their members for any of these offences.

PREFERENCE TO UNION MEMBERS IN HIRING AND LAY-OFFS

There is a wide variety of clauses affecting the hiring of new employees, where this question is dealt with. On the one hand, in six plants the Company retains the exclusive right to engage workers of its own choosing; in six other plants the Company also retains this right but will give consideration to ability, local residence, family status, etc.; in five plants the exclusive right is retained but preference will be given to employees with previous service. In more than thirty plants, the Company will give preference to union members in hiring. (In two cases it is provided that if union members are not available, then applicants recommended by the union will be given preference).

When engaging men the management will give preference to union members if such are available and are capable of doing the work efficiently.

Preference of continued employment when personnel is being reduced by lay-offs is more commonly on the basis of seniority, but in about twelve plants this preference is also given to union members. (In one plant special consideration is to be given the key union officers who are not to be laid off as long as there is work in their departments which they are qualified and willing to perform.)

When laying off men, employees belonging to the union and in good standing with the local, shall be retained in preference to those not in good standing; among equally efficient employees, efficiency to be judged by the Department head, the older in point of service shall be given preference of employment.

CONSULTATION WITH UNION

In slightly more than half of the plants, the Companies bind themselves to consult the union representatives before making final decisions in certain cases such as lay-offs, demotions, promotions, transfers, etc. of permanent employees.

In any case of promotion, lay-off, or re-employment, the standing committee of the signatory union concerned shall be consulted by the management and be privileged to present recommendations which will be considered by the management prior to final action by the management. In cases where time does not permit such prior consultations, the management shall, whenever practical, take temporary action only

until the recommendations of the standing committee can be obtained. The decision of the management shall govern and be final.

BULLETIN BOARDS

Under eight agreements, bulletin boards are provided for the sole use of the union. However, the usual clause with reference to bulletin boards, which is found in 48 agreements, is identical or similar to the following:

Notices shall not be posted in the mill except on the official bulletin boards. In each case permission of the superintendent must be secured.

Seniority

Seniority provisions are part of the agreements for all plants except two. Very little detail is included in most agreements as to the application of the seniority principles, except that in some agreements, as mentioned above under "Union Status", union representatives are to be consulted in cases of lay-offs, promotions, etc., but the decisions of the company are final.

In agreements covering seven plants seniority is definitely stated to be on a departmental basis, in others the basis is not stated. In the following extract, however, provision is made for a combination of departmental and plant-wide seniority.

Seniority lists, based upon the date on which employees commence to work for the company shall be established for each department or occupational group of employees. Those employees who have more than three years' seniority will also be placed on a special plant-wide seniority list.

When an employee is transferred permanently from one group or department to another, his seniority shall also be transferred, but in cases of temporary transfers, or in the case of a transfer for less than ninety days, the employee shall retain his seniority in the original department from which he was transferred.

LAY-OFFS AND REHIRING

Agreements for all plants having seniority clauses stipulate that in the case of lay-offs, employees be laid off in the reverse order to the length of their service, provided that the employees so preferred are efficient.

When men are to be laid off, the oldest in point of service, when efficient, shall have preference of employment.

The general clause for seniority in lay-offs is qualified in eight plants by stating that such preference only applies to union members.

When laying off help, union men shall be retained in preference to those not members among equally efficient employees, the older in point of service being given preference of employment.

In twelve other plants (9 of them in Quebec), when a lay-off is to be extensive,

such as might create a social problem in the community, in addition to seniority, consideration is to be given employees with dependents, if efficient.

If it is necessary to materially curtail operations of the plant, thus creating a social problem in the community, the management will, in addition to the above, give particular consideration to the cases of employees with dependents, if capable and efficient, as against employees without dependents.

With regard to the rehiring of employees, less than a quarter of the agreements provide specifically for those laid off being given preference. Of these, three require that the employees rehired be capable and able to pass a physical examination. Only one agreement sets a limit (15 days) before which a recalled employee must report or lose his priority rights.

When men are being employed, those who have been laid off shall be given preference of re-employment if capable of doing the work.

PROMOTIONS

Seniority is also a determining factor in making promotions in the agreements for all but four plants, although usually of comparatively less importance in making promotions than it is in lay-offs. It is always provided that preference is by seniority, only if the efficiency of the employees preferred is at least equal to all others eligible.

In promotion the management will consider—first: merit, character and ability; second: extent and quality of education; third: physical fitness; fourth: length of service. It is understood that men who qualify in educational courses may receive a certain degree of preference..... However, all things being equal, length of service shall be a deciding factor.

POSTING OF NOTICES

In eight agreements, it is stipulated that vacancies be posted on the bulletin boards a few days before being filled, to allow for applications.

Notice of vacancies will be posted on bulletin boards at the time clocks, and the positions will not be filled until seven days thereafter.

WAR CONDITIONS

A number of agreements (10) have clauses guaranteeing to employees who have joined the armed forces that their jobs will be restored to them and their seniority rating maintained. Some of these clauses have been in the agreements since earlier in the war, and they refer only to those employed at the beginning of the war, while others refer to those employed at a date in 1942. These guarantees are in all cases covered by the Re-establishment in Civil Employment Act

(LABOUR GAZETTE, July 1942, p. 754), which together with regulations provides also for reinstatement of those civilians transferred under National Selective Service Regulations.

If any employee of this plant is forced by the National Selective Service Act to change his employment from this plant, the Company hereby agree to re-establish such employee to his old position with no loss of seniority at the termination of the above mentioned National Selective Service Act. All employees who have been drafted or volunteered in any branch of the armed forces of the United Nations shall be re-established on their respective jobs and maintain full seniority rights.

In four agreements it is stated that women workers taking over men's jobs will acquire no seniority in such jobs.

The status of employees hired, promoted or transferred to replace employees in the armed services is clearly set out in the following:

.....it is understood and agreed that every person hired, promoted or transferred as a result of employees joining the armed forces of the United Nations, understands that his employment, promotion or transfer is subject to termination, or adjustment when, in the opinion of the Company, it may be necessary in the process of providing restoration of employment for men returning from service with the armed forces of the United Nations.

Hours

OPERATION OF PLANTS

With a single exception (one paper mill operating on a 5 day week basis) the regular operation of all mills is a 6 day week, with a 24 hour shutdown on Sundays. This is usually 8 a.m. Sunday to 8 a.m. Monday, except in Quebec where it is midnight to midnight. In three paper mills and in eighteen pulp mills, however, when it becomes necessary, the mills may operate on Sundays. This Sunday operation is in some cases permitted only with mutual consent; in other cases Sunday operation may never exceed two Sundays in a month.

The regular operation of pulp and paper mills will be six days per week, with twenty-four (24) hours of shutdown on Sunday. When necessary pulp mills may be operated for a longer period.

Two main classifications of workers are employed: tour workers and day workers.

Tour workers are those engaged in occupations for which workmen are regularly required two (2) or more shifts per day.

Day employees are those engaged in occupations for which workmen are regularly required for one working period only per day.

TOUR WORKERS

Tour workers are employed for the most part on 8 hour shifts. Three shifts are

usually worked in the 24 hour period, each worker being on for 8 hours. In four agreements the length of shifts is left to the discretion of the management, in one other the length of shifts is to be as mutually agreed on, and in a few cases the mill rules regarding hours were not attached to the agreement, but it is definitely known that in mills employing approximately four-fifths of the total number of workers under agreement, all tour workers are on 8 hour shifts. In about half of the agreements it is provided that shifts rotate weekly. The usual shift hours are 8 a.m. to 4 p.m., 4 p.m. to midnight, midnight to 8 a.m. In a few cases the starting time is one hour earlier. In only one small mill is a rest period allowed, viz., one ten minute period or two five minute periods per shift, for smoking, only one member of a crew being allowed off at one time.

Tour workers: The regular daily hours for tour workers in departments on a three (3) tour basis are: 8 a.m. to 4 p.m., 4 p.m. to 12 midnight, midnight to 8 a.m.... Tours in all cases to rotate in regular sequence weekly.

DAY WORKERS

In mills employing 63 per cent of the total workers under agreement, the 8 hour day and 48 hour week is the rule for day workers, while in those employing a further 7 per cent the 48 hour week is stipulated with either a variation in the daily hours resulting in a shorter day on Saturday or with the daily hours unspecified. In five agreements, hours are normally limited to 50 per week; a 9 hour day is specified in seven agreements; in two agreements a 44 hour week is stipulated, while in one agreement day workers (except mechanics) have a 10 hour day.

Day workers: The regular hours for day employees are: 8 a.m. to 12 noon, 1 p.m. to 5 p.m.

About a quarter of the agreements specify penalties for day workers or any hourly employees punching in late. These vary from a deduction of 15 minutes pay for employees more than 3 minutes late to a 30 minute deduction for any lateness.

Employees on the hourly payrolls who punch their time cards more than 5 minutes late will be penalized by losing one half hour of pay. Each case, however, should be carefully investigated to take care of extenuating circumstances.

DAY OF REST

Although the operation of the mills is regularly suspended for 24 hours on Sundays, certain classes of employees are required to work in connection with necessary maintenance of the plant and repair of machinery and other

necessary repairs. Many (31) agreements limit the work that may be done on Sunday. Some agreements limit Sunday work in a general way, while others are more specific as to work on paper machines.

Only necessary work will be done on Sunday. No employee shall be required or permitted to work on paper machines between 8 a.m. Sunday and 8 a.m. Monday, except for washing screens, oiling dryer boxes, and repair work done by mechanics.....

These agreements provide that in addition to being paid time and one half for all Sunday work, such employees are to have one day off in the week.

When a man works Sunday, he shall be entitled to one day off during the week to be mutually arranged between the man and his department head.

Overtime

CONTINUING WORK AFTER COMPLETION OF REGULAR SHIFT

Tour Workers

Separate conditions as to overtime are given for tour and day workers. Tour workers are required to remain at their work until their mates on the job relieve them. They must, therefore, continue for a whole extra shift if not so relieved. This is a universal practice in paper mills covered by agreements, and is one of the few clauses which are worded in an almost identical manner in most of these agreements. Tour workers continuing after their shift for this reason would be paid at straight time rates.

When a tour begins each tour worker is required to be in his place. At the end of a shift no tour worker shall leave his place to wash up and dress until his mate has changed his clothes and reported to take on responsibility of the position. If a tour worker does not report for his regular shift, his mate shall notify the foreman. He shall then remain at his post until a substitute is secured, and if necessary he shall work an extra shift. It is the duty of a tour worker to report for his regular shift unless he has already arranged with his foreman for a leave of absence. If unavoidably prevented from reporting, he must give notice to his foreman, or at the office, at least two hours before his tour goes on duty.

In 42 agreements, when any two tour workers are required to work twelve hour shifts because of the absence of their mate due to illness, vacation or other reasons, this extra time also will be worked at straight time rates, with varying limitations. The time limit during which they will be so required to work varies from three days to three weeks, after which time and one half will be paid for the extra time worked.

After a tour worker has been absent from work because of sickness or any other cause, he must report to his foreman or superintendent at least four hours previous to the beginning of his tour that he intends to begin duty.

When a shift worker has to take time off due to sickness, vacation, or any other reason, the men working on the same job on the other two shifts will work long hours for a maximum of three weeks. A substitute worker, must, if possible, be found within three weeks' time. The union will, if necessary, co-operate with the Company to fill the vacancy. If it is not possible to procure a competent man, straight time will be paid until the vacancy can be filled. In this respect, it is understood that the Company does not favour twelve hour shifts and these will be minimized as much as possible.

In 14 of the above 42 agreements similar conditions apply to overtime caused by any vacancy of a tour worker position.

On vacancies after two weeks, due to employees quitting, time and one half shall be paid. If, however, the Company applies to the union for men and the union and the Company are not able to procure competent men, in such case straight time would be paid until the vacancy can be filled.

In several agreements it is clearly stated that such long hours at straight time must not be for company convenience.

In the event a tour worker is required to work overtime on tour work for Company convenience due to breakdowns, extra work or other circumstances created by the Company, time and one half will be paid.

In agreements for 40 plants, it is provided that when tour workers are required to work overtime either on work not regularly performed by tour workers, or any overtime except when they are working for their regular relief men, time and one half will be paid.

When a tour employee is asked to work time in excess of his regular shift on any job not regularly performed by tour employees, such additional hours will be paid for at the rate of time and one half.

Tour workers required to work overtime at other than working for their relief shall receive time and one half for such overtime work.

When tour workers are required to work an extra shift for any reason, the Company usually undertakes to send another employee for their meals, or in some cases, to make arrangements to provide these meals.

When an employee works one extra shift, arrangements shall be made by the Company to provide and pay for the meals.

Day Workers

The overtime rate for all day workers is time and one half. In 37 of the plants covered by agreement, this overtime rate is paid for all work over 8 hours in a day, in five plants it is payable after 9 hours' work, and in five plants for work over 10 hours a

day (or over 50 hours in a week in one case). In 10 other plants the overtime rate is payable for all work over the scheduled day; in two plants and in certain trades in two other plants the overtime rate is payable for work before as well as after the regular shift. In three plants the time and one half rate is payable for all work before 7 a.m. and after 5 p.m.; in three other plants for all work before 8 a.m. and after 5 p.m.; in two others for work before 7.30 a.m. and after 5.30 p.m.

Work done by day employees in excess of eight hours shall be paid for at the rate of time and one half.

CALL TO WORK OUTSIDE REGULAR HOURS

Tour Workers

In addition to recalls to work for putting on wires, tour workers recalled for emergency repair or other reasons are given special guarantees in a number of agreements. In twelve plants tour workers so recalled are to be paid time and one half for time worked and in six of these they are to be paid for at least four hours and in another for at least three hours. In nine agreements there is a guarantee of four hours' pay and in another a guarantee of three hours' pay. In five agreements there is a guarantee of four hours' pay and where this overtime exceeds four hours, time and one half is to be paid from the time the overtime period started. In one agreement there is a bonus of two hours' pay for the call to work unless such work extends into the regular shift.

No employee who, after punching out, is especially called and required to go on duty for repair or other work shall receive less than four hours' pay.

Day Workers

There is a variety of conditions governing a call to work of day workers outside of regular hours. Over half of the agreements provide for time and one half for such work, and the majority of these provide for a minimum of four hours' pay. Twelve agreements provide only for a minimum of four hours' pay for a call to work, and two others a minimum of 3 hours' pay. Five agreements specify two hours' pay (call time) plus regular rate for the time worked.

Mill day workers called in after their regular day's work and before the regular starting hour next day, without previous warning, for special purposes, shall be paid rate and a half and shall receive a minimum of four hours' regular wages.

Putting on Wires

Putting on wires on the paper machines is treated in a special way in the paper mill

agreements. Most of the regulations for this work affect tour work only. For those who begin work on the changing of a wire during their regular shift and continue work on this after their regular shift ends, in six agreements regular wage rates are payable plus one hour's pay; in one agreement time and one half is payable for time required after the shift ends. For those who begin the changing of a wire before their regular shift or continue this work after their regular shift ends, five agreements provide for time and one half for time in addition to the regular shift; in another agreement the regular rate is payable plus one hour's pay to cover overtime. For tour employees engaged in putting on wires at other than their regular shift, a minimum of six hours' pay is guaranteed in eight agreements.

In twenty agreements employees who are called in at a time other than their regular shift to put on wires are guaranteed a minimum of 6 hours' pay at the regular rate, in one agreement 5 hours' pay, in seven agreements 4 hours' pay, while in eight agreements time and one half is payable for such time worked with, in some cases, a minimum of 6 hours' pay.

Tour workers called to put on Fourdrinier wires at a time other than their regular tour and who are dismissed before their tour is scheduled to begin shall be paid for the time worked, plus two (2) hours but not less than a total of four (4) hours on any one wire.

Any tour worker called in to put on machine clothing after he has completed his regular shift and punched out shall be allowed two (2) hours call time at straight time, plus actual time worked.

If tour workers are called to put on a Fourdrinier wire before their shift is scheduled to begin and work through into their regular shift they shall be paid for the time worked, plus two (2) hours. If tour workers are asked to remain after their shift is scheduled to end, to put on a Fourdrinier wire they shall be paid for the time worked plus two (2) hours.

The above shall also apply to tour workers when working on machines other than their own.

In cases where more than one machine is involved, the above allowance shall be paid for each machine.

Tour workers asked to assist to put on a Fourdrinier wire on a machine other than their own during their regular shift, shall receive two (2) hours extra time but in no case shall more than two (2) hours extra time be allowed.

Pay for the allowance time provided above shall be figured on a straight time even though the actual time worked is paid for at the overtime rate.

WORK ON SUNDAYS AND HOLIDAYS

The conditions of the regular Sunday shutdown in all mills are mentioned above under "Hours". The number of holidays during

the year when there is a shutdown of the mills varies from three to seven. Where three holidays are specified, these are Christmas Day, Dominion Day and Labour Day; where four holidays are specified, New Year's Day is the additional one; where five or more holidays are mentioned there is a variety, the church holy days being observed in some of the Quebec plants. The shutdown period for Christmas and New Year's is usually 32 or 40 hours, for the other holidays 24 hours. The shutdown for the four holidays during the year is by far the most common practice and is provided for in the agreements for 47 plants; the total number of hours of shutdown for these four holidays combined varies from 96 to 144 hours.

The regular working schedule of operating departments does not include Sundays and holidays.

Sundays are defined as the twenty-four hour period between 8 a.m. Sunday and 8 a.m. Monday.

Holidays include:

Christmas Day—Christmas Day is defined as the forty hour period between 4 p.m. December 24 and 8 a.m. December 26.

Dominion Day—Dominion Day is defined as the thirty-two hour period between 12 midnight June 30 and 8 a.m. July 2.

Labour Day—Labour Day is defined as the twenty-four hour period between 8 a.m. Labour Day and 8 a.m. the following day.

New Year's Day—New Year's Day is defined as the twenty-four hour period between 8 a.m. January 1 and 8 a.m. January 2.

Payment for work during holiday shutdowns is in all cases at the rate of time and one half for both tour and day workers. In all but ten agreements time and one half is also definitely stated to be the rate for all work during the Sunday shutdown period.

Tour workers shall receive time and one half for all time worked during the regular shutdown period on Sundays and recognized mill holidays.

Day workers will be allowed time and one half for all time worked during the regular shutdown periods on Sundays and recognized mill holidays, and shall be entitled to and expected to take one day off during the week, to be arranged by the department head for each employee.

Men who are required to work on Sundays and who have arranged for another day of rest, if called in to work on that day are to be paid at the rate of time and one half, in thirteen of the plants under agreement. In some of these, this overtime rate is only payable if they are called to work on these days without a day's notice.

Day workers called in on their day off shall be paid time and one half and shall receive a minimum of four hours' time.

Vacations and Leaves of Absence

An annual vacation with pay of one week or more for employees who are eligible is general throughout the industry. In eight plants the plan is not part of the agreement, but was brought into effect by direction of a War Labour Board or other arrangement. In twelve plants, covering about 3,500 workers, the vacation is increased by one day after five years' service and an additional day for each additional year's service to a maximum of two weeks' vacation after ten years' service. In all other plants, however, the maximum is one week with pay.

There are considerable variations as to the qualifications required for eligibility for vacation. In two plants, 18 months' service is required for one week's vacation, in all others one year's service is required for eligibility. In some plants the one year need only be completed at the time vacation is taken, in others the year must have been completed by May 1 or June 1 of the year the vacation is taken, and in still others it must have been completed at the end of the previous calendar year. The total number of hours which must have been worked by an employee in the previous year to be eligible is stated in five agreements and varies from 1,500 to 2,000 hours.

Each year, permanently employed members of the union having 12 months or more of service in the employ of the Company shall be entitled to participate in the following vacation schedules; for 1 year's continuous service—1 week's vacation with pay; after 5 years' continuous service—1 week plus 1 day vacation with pay; after 6 years' continuous service—1 week plus 2 days' vacation with pay; after 7 years' continuous service—1 week plus 3 days vacation with pay; after 8 years' continuous service—1 week plus 4 days vacation with pay; after 9 years' continuous service—1 week plus 5 days vacation with pay; after 10 years' continuous service—2 weeks' vacation with pay.

Further conditions as to vacations which are found in a good proportion of the agreements are shown in the following extracts from different agreements.

Pay for the vacation period will be computed by using the base rate paid to the employee in his regular occupation. For the computation of vacation pay, the schedule of hours shall be as follows: 48 hours for 1 week vacation, 56 hours for 1 week plus 1 day vacation, 64 hours for 1 week plus 2 days' vacation, 72 hours for 1 week plus 3 days' vacation, 80 hours for 1 week plus 4 days' vacation, 88 hours for 1 week plus 5 days' vacation, 96 hours for 2 weeks' vacation.

It is understood that an employee while on vacation is not to work or receive remuneration from other employers.

Vacations which are due during the year commencing June 1, 1944, must be taken during that year and cannot be accumulated for future

years. Vacations are not transferable and an employee cannot take pay in lieu of a vacation.

Payment is to be made on the regular pay day prior to the employee's vacation period.

In agreements for 16 plants vacation time is reduced by absenteeism.

Sickness and causes of absence beyond the control of the employee will not affect the vacation period. In addition to sickness, mentioned above, there will be allowed six full days' absence during each year without affecting the vacation period, provided the employee notifies his foreman the previous day. Absenteeism in excess of these six days will mean a deduction from the vacation period of one-half day for each absent day.

The question of vacation rights of employees who resign or who are discharged is dealt with in agreements for 23 plants. Two agreements provide that when employment is terminated for any reason, an employee will be paid for his vacation credit up to May 1, preceding the date of its termination. In all of the other 21 plants, however, those discharged or resigning voluntarily lose their vacation credits, except in four plants where they are paid for to the end of the employee's last completed year of service.

If an employee, not having been dismissed for cause, leaves the service of the Company for reasons beyond his control, at a time when an unused period of vacation with pay stands to his credit, he shall be paid the amount due him in lieu of vacation calculated to the date of his leaving such service.

If an employee leaves the service of the Company of his own accord, or is dismissed for cause at a time when an unused period of vacation with pay stands to his credit, he shall be paid the amount due him in lieu of vacation calculated to the end of his last completed twelve (12) months of service.

In 37 agreements the question of determination of the time vacations are to be taken is covered. In 14 of these the Company reserves the right to schedule vacation times; in 8, the Company also reserves this right but agrees to endeavour to arrange a mutually satisfactory time; in 7, employees' requests as to the time of vacation are also to be considered; in 8 others, vacation schedules are arranged on the basis of seniority, subject to the approval of the management.

The Company shall have the final determination as to when each employee shall take such holiday but will co-operate in an endeavour to arrange a mutually satisfactory time. In case of any disagreement between employees regarding time of taking vacations, this shall be governed by seniority.

In seven agreements, some provision is made for employees obtaining leave of absence for personal reasons.

The Company may grant leave of absence in writing to any employee for legitimate personal

reasons, and any person who is absent with such written permission shall not be considered to be laid off, and his seniority shall continue to accumulate during his absence.

Wages

WAGE SCHEDULES

The agreements provide that minimum wage rates are to be maintained according to the wage schedules which are attached to them. These are detailed schedules giving rates for each occupation in the mills. In 13 of the agreements provision is made for the revision of these schedules during the term of the agreement. In two of these the question of wage rates may be opened by either party giving 30 days' notice when they will then be subject to collective bargaining. In five others, either party may request bargaining over wage rates, and if no agreement is reached either party may take steps as required by law for a revision. In the other six, either party may apply to the Regional War Labour Board for a revision of wage rates. (The minimum rate for the lowest paid (labourers) in the various agreements ranges from 35 cents to 63½ cents per hour.)

The wages now paid by the Company for all operations shall remain in force for the duration of the present agreement, except for increases authorized by organizations instituted by law, as hereinafter provided.

A schedule of the wages presently paid by the Company is annexed hereto to form part hereof and is signed by the parties for identification. It is understood, however, that during the present agreement the two parties may submit a joint petition in virtue of the Federal orders governing wages in wartime, or, if a joint petition is impossible each party may proceed individually before the organizations instituted under the authority of the War Measures Act, and having jurisdiction in the matter, and the wages determined by the Regional or National Boards shall be those which will prevail from the date fixed by the said Regional or National Boards.

RATES FOR NEW JOBS

When new jobs are created provision is made in 13 agreements for setting wage rates for them.

Rates of pay for new jobs will be determined by the Company and mutually agreed upon. When a new job involves a process, system or equipment of a type new to the mill or the department, a period of nine months will elapse before an attempt is made to settle by mutual discussion the permanent rate to apply to the job.

RATES FOR TRANSFERRED EMPLOYEES

In more than half of the agreements conditions are laid down for wage rates to be

paid to workers transferred to jobs having different wage rates from their own. In five agreements the employee is to continue to be paid at his old rate if transferred temporarily to a lower paid job, but in all cases (except for a short learning period for inexperienced workers) employees transferred to higher paid jobs are to receive the higher rate. In 26 agreements the employee transferred is to receive the rate for the job to which he is transferred whether higher or lower than his own rate.

Whenever an employee on the hourly payroll works for one shift or more in a temporary position which draws a higher rate of pay than his regular position, he shall receive the rate of pay for the position for the full number of hours worked thereon. This regulation only applies, however, when a man acts as a fully qualified substitute and not as a learner or apprentice.

Conversely, if it is necessary to demote, transfer or reduce an employee to a position drawing a lower rate of pay than that of his regular position for one full shift or more, he shall receive the lower rate of pay for the number of hours worked.

WOMEN'S WAGES

Due to the shortage of labour during the war, women have been employed at some work formerly done by men, and ten agreements provide for lower wage rates in cases where women workers do not fully replace men at the work.

When a woman completely takes over a job formerly held by a man and maintains the normal standards of such job, she shall receive the established job rate for that job. However, where it is necessary for another employee to assist the woman to learn the said job, the learner shall receive the base rate of 59 cents per hour for women during that period.

Apart from the above work by women in wartime, three agreements mention women's work particularly.

All clauses of this agreement apply to female help as well as male help.

Where it is necessary to modify a job presently held by a man, the rate for women for all such jobs shall be 59 cents per hour. A modified job shall mean a job with a substantial reduction in the normal standards of such job.

HANDICAPPED EMPLOYEES

Five agreements provide for lower rates for such employees.

When employees become aged or are not physically fit to do ordinary work, the Company may consider the advisability of placing them in light work. The number must be limited in the interest of efficiency, but as long as this is not impaired, sick employees must be helped as far as possible. The rates of pay for such employees may be set at the discretion of the Management, but in no case must they be lower than authorized by the Minimum Wage Commission.

DISMISSAL WAGE

Agreements for four plants have this provision. In one agreement this is payable after five years' service, and in the other three after ten years' service.

In the event of an employee, who has had ten years' continuous service or more with the Company, being discharged, he shall be entitled to receive fifty hours' pay.

Apprenticeship

No detailed apprenticeship plans are given in any of the agreements, except one. Agreements for 12 plants mention that an apprenticeship system is in effect. This system is stated by 7 of these to be in the mechanical trades. Under 6 other agreements the company may have a limited number of apprentices according to the plan established by the company. In 9 agreements it is stated that the company may institute an apprentice system, and in three agreements there is an undertaking to establish such a system, when possible, in order to train employees from the community. Questions regarding progress of apprentices are to be discussed by the Mutual Interest Board, according to the terms of five agreements.

The wages for apprentices in eleven plants are as follows: 35 per cent of journeyman's minimum rate during the first year, 45 per cent during second year, 65 per cent during third year, 85 per cent during fourth year.

The following clauses are quoted from the one agreement to which apprenticeship regulations are attached.

Terms of apprenticeship shall be five years.

Apprentices must be not less than 16 years and no more than 19 years of age when commencing apprenticeship.

Two hundred and eighty-five working days shall constitute one apprenticeship year. If more than 285 working days are worked in any year, the surplus cannot be carried forward to the following year.

In case of lost time during apprenticeship, said lost time must be made up at the end of apprenticeship term and before receiving journeyman's rate.

Apprentices must not do work other than at their own trade.

Number of apprentices to each trade shall be one to each six journeymen or fraction thereof.

Apprentices must attend night classes in their respective trades for the first two years of their apprenticeship, or suitable correspondence course.

Helpers shall not be eligible to become journeymen. (Helpers employed at the present time shall not be governed by this ruling.)

When an apprentice has completed his apprenticeship he shall immediately hold two years' seniority as a journeyman with the Company.

Apprentices must not work on shift work or on nights until two years of their apprenticeship have been completed.

Trades defined: All mechanical trades.

Safety, Health and Welfare

Safety and health measures form part of all mill rules on file in the Department of Labour for this industry. Practically all provide for the reporting of all accidents, most mention the giving of first aid treatment. The majority insist that safe clothing must be worn by employees and that safeguards may not be removed from machines except by order. Many agreements restrict the use of elevators; some give employees the right to refuse to do dangerous work.

Safety organizations for the prevention of accidents and improvement in safety and sanitation exist in at least 15 plants, and in 30 plants the employees or the union definitely undertakes to co-operate in promoting safety at the mill. In the majority of agreements it is stated that in case of fire, all employees must assist in fire fighting, if required. The majority of agreements cover individual responsibility for condition of the plant.

Nine agreements provide for the medical examination of prospective employees, 8 for the medical examination of men eligible for promotion, although in four of these this may be done with the employee's consent. Three agreements provide for the examination of men being rehired after layoffs, and 7 for the examination of men returning to work after being absent due to sickness.

There are health insurance plans at a number of plants which do not form part of the agreement, but in agreements for 6 plants these plans are mentioned. The services of a mill nurse are also noted in a few agreements.

Group life insurance plans are referred to in a few agreements, although here also there are plans at many other plants which are not mentioned in the agreements.

All employees must co-operate to the fullest extent possible in promoting the safety of the mills of the company.

Safe Clothing.—Employees must not wear clothing which can readily become entangled in machinery. Clothing not in use must be kept in lockers provided for this purpose.

Safeguards.—Safeguards must not be removed except by order of the Superintendent or Foremen of Department. If removed, they must be immediately replaced.

Elevators.—All employees are forbidden to use elevators for other than freight purposes. Elevators are to be used for freight purposes only, except as especially authorized.

Reporting of accidents.—All accidents must be reported at once by the injured employee when possible, and by the Superintendent of the Department in which the injured man is employed, to the Time Office or to the Secretary of Safety.

Stopping machinery.—In the interest of safety every new employee shall be instructed exactly how to stop machinery which he is required to work around regularly.

Shoes.—Shoes shall be worn in machine room.

First Aid.—All employees, when injured, must promptly avail themselves of the First Aid facilities provided at the Mill.

Dangerous work.—It is recognized that in the paper industry, there is a certain amount of hazardous or dangerous work. However, every precautionary safety measure must be taken to minimize the risk in such work. Employees are not to be expected to do dangerous work. If ordered to do dangerous work, employees may refuse without penalty on the grounds of danger.

Safety Organization.—A safety organization for the prevention of industrial accidents and improvements in mill safety and sanitation will be maintained. All employees will co-operate fully in making known and eliminating dangerous and unsanitary conditions and practices.

Visiting Mill.—Employees who wish to visit the mill during other than their regular shifts, or for the purpose of escorting friends through the plant, must first secure a pass from the time office, or other authorized parties.

Individual Responsibility.—Everything in and about the plant shall be kept clean and in good order, and each employee will be held responsible for the condition of the part of the plant under his control.

Fire Fighting.—In case of fire, all employees must assist in preventing destruction of the company's property. Fire apparatus must not be removed from its place, or used, except in case of fire.

Medical examination.—All new employees who are engaged for permanent jobs must have a physical examination. This examination will be arranged and paid for by the company.

Mill Nurse.—Upon request of a sick employee the services of the mill nurse are available to give advice in the home.

Sickness Insurance.—One dollar (\$1.00) per month will be deducted from each employee and paid to the Company's contract physician. This assures the employee of adequate medical attention and also provides hospitalization in case of sickness.

Group Insurance.—Every employee who has applied for and obtained a policy in the Group Insurance Plan shall maintain such policy in good standing while the plan is in force. Every new employee shall be required to participate in the plan within three months of the date of his employment.

Mutual Interest Boards, Joint Committees

In agreements for 24 plants, a mutual interest board or a joint committee is set up for management-employee discussion of matters of mutual interest, such as safety, health, athletics, apprenticeship, etc. The number of meetings varies from three to twelve in the year.

The Mutual Interest Board shall consist of an equal representation of Union men and Management.

It shall be provided that a meeting may be held on the second Monday of each of the following months: February, April, June, August, October. . . . At this meeting may be brought up complaints from customers or the mill control department, production, quality, safety and health, athletics and apprenticeship.

Employees' suggestions and recommendations are asked for and promised consideration in 13 agreements.

Recommendations and suggestions from employees tending to improve the operation, efficiency, safety or other conditions throughout the plant are welcomed by the management, and will receive every consideration.

Discipline, Suspension and Discharge

Causes for which employees may be discharged are listed in 56 agreements; in 9 of these the causes listed may lead to either discharge or suspension.

Causes for discharge or suspension may be: bringing intoxicants into the mill; neglect of duty; smoking upon the Company's premises except in the designated places; giving or taking of a bribe of any nature as an inducement to obtaining work or retaining a position; failure to report for duty without good cause; destruction or removal of Company property; dishonesty; reporting for duty under the influence of liquor; refusal or failure to comply with the Company's rules; disorderly conduct; disobedience; poor workmanship; deliberate sleeping on duty; insubordination; contagious and communicable diseases; indictment for a criminal offence.

Nothing in these rules shall be deemed to restrain or limit the Company's rights to discharge employees for just cause.

In 20 agreements, foremen or superintendents are given authority to suspend any employee for violation of rules, etc., but in all cases, the matter is referred to higher officials of the company for decision. In 10 of these agreements detailed conditions for the application of discipline are set out. In 16 agreements provision is made for records of discipline, being kept by the company, and in some cases these records are to be made available to the union, on request.

Discipline of Mill Employees and Record of Same.—There shall be three separate penalties applied where it is necessary to inflict discipline on any of the employees of the Company, consisting of:

1. Personal reprimands by the mill manager. To be applied in cases of minor offences, when the mill manager is satisfied by the offending employee the offence will not be repeated.

2. Suspension from work (without pay) for periods of from one to fifteen days, according to the gravity of the offence and the previous record of the employee concerned. To be applied in cases of a first serious offence or continued or repeated minor ones when, in the judgment of the mill manager, proper conduct and discipline on the part of such employee can be secured without resorting to the penalty of dismissal.

3. Extreme penalty or dismissal from service. To be applied in all cases of flagrant or wilful violations of the rules of the Company, or the law of the land where a thorough investigation proves the employee concerned to be guilty and the mill manager is convinced dismissal is the only method by which discipline can be maintained. It may also be necessary to inflict this penalty in the case of an employee who persists in continued and repeated minor violations of the Company's rules as shown by the discipline record of such employee.

Application of Discipline.—Each department superintendent and foreman shall have the authority to temporarily remove from service any workman under their supervision who violates the rules of the Company or the law of the land while such workman is on duty or on the Company's premises.

Whenever a department superintendent or foreman exercises such authority, he shall furnish the mill manager a report stating his reasons including such recommendations as he considers the circumstances warrant. He shall inform the employee concerned of the reasons for such suspension and explain to him his right to appeal to the mill manager.

The mill manager shall notify the employee concerned to present himself at the mill office at a stated time in order that the cause of his suspension may be investigated and properly disposed of so far as the discipline to be administered is concerned.

The mill manager shall decide on the discipline to be inflicted after he has made a full investigation of all the circumstances connected with each case. If through further investigation it is found that the employee was unjustly suspended or discharged, he shall be reinstated without loss of pay.

Record of Discipline.—Complete records of each case of discipline administered including suspensions and dismissals from the service shall be kept in a separate file at the mill copy will be sent to the secretary of the union of which employee is a member.

This record shall consist of:

Offence charged, department superintendent's or foreman's report of same, mill manager's notice to employee to report for disposition of each case, final disposition of the case. Where the employee concerned has previous records of discipline entered against him, dates of such records shall be included

If an employee considers he has been unjustly suspended or discharged, 30 agreements definitely state that such cases may be handled through the regular grievance procedure set up for all grievances, or, in some cases, through a slightly different procedure.

A claim from a permanent employee that he has been unjustly discharged from his employment shall be treated as a grievance if a written statement of such grievance is lodged with the plant superintendent within three days after the employee ceases to work for the Company.

Under 48 agreements, employees found to have been unjustly discharged (in 16 of these, discharged or suspended) are to be reinstated and paid for lost time. This payment is limited in 6 agreements to two weeks.

Strikes and Lockouts

All strikes and lockouts during the life of the agreement are prohibited, in agreements for 68 plants, while in three others strikes may only occur with the sanction of the head offices of the international unions. Agreements for 5 plants prohibit strikes taking place because of the termination of the agreement, and in 15 plants such stoppages may only occur with the approval of the international union.

It is agreed that there shall be no strikes, walkouts, lockouts, or other similar interruptions of work during the period of this agreement.

Should any differences arise over grievances, there shall be no suspension or stoppage of work until every effort has been exhausted to adjust them through the regular procedure set up in this agreement, and in no case without the approval of the International officer of the union.

Should stoppages nevertheless occur, either through disputes or any other reason, 19 agreements provide for workers essential to the protection of property continuing at work.

In the event of cessation of operations due to any cause whatever, it is specifically agreed that the Company's property will be protected by the continuance at work of the following employees: electrical system operators, boiler room operators, pump house operators, mechanics and electricians looking after fire protection equipment, storemen, watchmen, office and first aid staffs, all of whom shall be designated by the Company.

Adjustment of Disputes

Procedure for the settlement of grievances is part of every agreement in this industry, and in agreements for every plant covered the disputes are to be referred to arbitration if the grievance procedure fails.

In 12 agreements provision is made for the setting up of adjustment committees by the local unions, for the purpose of presenting grievances of employees to the management. Although omitted from other agreements, the existence of such committees is often implied. (The International Brotherhood of Pulp, Sulphite and Paper Mill Workers have an adjustment committee in each local under the terms of their constitution.) A standing joint grievance committee is not common, but is mentioned in seven agreements.

Any grievance is to be taken up either directly by the employee or employees concerned or by the union, with their immediate supervisor. If not satisfactorily settled it is referred to higher company officials and, in 55 agreements, to the International president of the union (or president of the federation in the case of National Catholic Unions). The number of steps through which a grievance is taken before arbitration is resorted to varies from two to five, but three steps are the most common and are shown in agreements for 33 plants.

In most agreements there are limits as to the time allowed for settlement in each step, at the end of which time if no settlement has been reached, the next step will be tried. From two to 15 days are allowed for each step, but most agreements have these limits only for one or for less than all of the steps. In 27 agreements, however, a time limit is set for each step.

A few agreements have more complicated clauses, distinguishing between machinery used for minor disputes and major disputes, etc., but the great majority follow the pattern outlined above.

Standing Committees shall be maintained in each mill in the following manner:

The International Brotherhood of Paper Makers shall select from the local membership a standing committee of three, which shall represent their union for the specific purpose stated in this Section;

The International Brotherhood of Pulp, Sulphite and Paper Mill Workers shall select from its local membership a standing committee of three, which shall represent their union for the specific purpose stated in this Section;

In order to be eligible for membership on any such committee, an employee must have been actually engaged in the plant for one (1) year next preceding his selection.

Should there be any dispute or complaint as to the interpretation of any of the clauses of this agreement or any grievance arising out of the operation of this agreement, in any department of the plant, such dispute, complaint or grievance shall be reported by the local committee of the Union concerned. The department head concerned shall endeavour to adjust the complaint immediately but failing the adjustment of the complaint within forty-eight (48) hours, the matter may then at the discretion of the local committee be referred to the resident manager or his designated representative, who shall meet the committee and the department head concerned. The local committee may be assisted in such meeting by any International Officer of the Union concerned. If the resident manager or his designated representative fails to adjust any complaint so referred to him in a satisfactory manner within five (5) days, the local Union has the right to refer same to the International President (or his representative) of the Union whose member is involved. The International President of the Union may either personally or through his representative refer the matter in dispute to the President of the Company or his designated representative, provided that neither representative in such reference shall have previously

acted upon the case in accordance with this section.

If the President of the Company, or his representatives, and the President of the Union, or his representatives, are unable to reach a satisfactory settlement of the complaint within ten (10) days either party shall have the right to require that the complaint be referred to an impartial Board of Arbitration.

Arbitration

When the grievance machinery fails to adjust any dispute satisfactorily, agreements for every plant have provision for arbitration. In 4 agreements, disputes are to be submitted to the federal Department of Labour, in eight others to provincial Departments of Labour. Under all the other agreements arbitration boards are to be formed. The employer selects one member, the union or unions one member and these two are to choose a third arbitrator as chairman. If the first two appointed are unable to agree upon the third member, methods of choosing the chairman are given in several agreements, most commonly a request to the federal or the provincial Minister of Labour to appoint one.

A time limit before which the arbitration board must render a decision is fixed in about half of the agreements, of which 28 agreements fix a limit of 15 days. In practically all agreements the decision of the arbitration board is stated to be final and binding on both parties.

. . . it shall be referred to arbitration, the Company selecting one man and the organization selecting one man, and the two to select a third party who will convene and render a decision within fifteen (15) days; said decision to be final and binding to all parties to the agreement. In case the two men selected cannot agree on a third man, the Minister of Labour in the Province of . . . shall be requested to select a third man in the case of a deadlock.

Ninety-fourth Session of Governing Body of International Labour Organization

AT its 94th Session, held in London, England, from January 25 to 31, the Governing Body of the International Labour Office dealt with questions of employment policy, international industrial committees, maritime standards, and matters affecting the future of the I.L.O.

It was decided that the next Session of the International Labour Conference would be held in Paris, in October, 1945, and an agenda was prepared.

Canada was represented at the Governing Body meeting by Mr. Paul Martin, K.C., M.P., Parliamentary Assistant to the Minister of Labour, government delegate (in place of Mr. Arthur MacNamara, Canada's official government representative), and Mr. Percy Bengough, President of the Trades and Labour Congress of Canada, workers delegate. Mr. Martin was accompanied by Messrs. Eric Stangroom of the Labour Department and A. A. Heaps, Unemployment Insurance Commission, as technical advisers.

Employment Policy

The Governing Body approved a report of its Employment Committee in which the Committee expressed satisfaction with the Bretton Woods proposals for an International Monetary Fund and an International Bank for Reconstruction and Development in regard to their purpose of improving international trade, and hence contributing to the productive resources of the member states and to the maintenance of high levels of employment.

The Committee also stated that it believed the problem of the employment of disabled workers to be a great urgency, and recommended that the International Labour Office should prepare a study on this subject and on the physical and industrial rehabilitation of, and supply of artificial limbs to, disabled workers and service personnel irrespective of the cause and nature of disablement.

The Office was also asked to prepare material containing statistical information on employment and unemployment and information on national and international measures, plans and studies to achieve and maintain a high level of employment.

Maintenance of high levels of employment during the period of industrial rehabilitation and reconversion was agreed upon by the Governing Body as an item for the agenda

of the next session of the International Labour Conference. A special report on the subject is being prepared by the Office.

International Industrial Committees

A full discussion took place on a proposal of the British Government that International Industrial Committees should be set up in the principal industries of international importance. The Governing Body decided to set up international industrial committees, which should be world-wide in their scope, in the following industries:—inland transport; coal mining; iron and steel; metal trades (other than iron and steel); textiles; building, public works and civil engineering; and petroleum.

By twenty-one votes to eight, the Governing Body agreed that the industrial committees should be tripartite in character but that this does not negate the right of each committee to appoint bipartite sub-committees or to arrange for parts of the meetings to be bipartite in character.

The names of the members of the Committees are to be communicated to the Office by the Governments of the countries which have been invited to participate. The employers' and workers' representatives are to be representative of the principal national organizations of employers and workers having a substantial membership engaged in the industry.

The Acting Director of the I.L.O. will convene the first meeting of each committee at an appropriate time. The agenda for each committee at the first meeting will consist of two items: the social problems of the industry during the period of transition from war to peace; and future international co-operation concerning social policy and its economic foundations in the industry. The future programs of the committees will be laid down by the committees themselves.

It was agreed that during the early stages of their development, the primary function of the industrial committees would be to facilitate the exchange of views between the parties concerned in regard to the problems of their respective industries; but that at a later stage the committees might take decisions which would be applied in a variety of ways. If such decisions recommended action by the International Labour Office, they

would be referred to the Governing Body, and in any case the Governing Body would be furnished with a report on each meeting.

It was agreed that Governments should enter into consultation immediately with employers' and workers' organizations in the industries for which committees were to be set up.

Constitutional Questions

A Special Committee on Constitutional Questions met under the chairmanship of Mr. Paul Martin, Canadian Government Delegate. The Governing Body passed a resolution affirming the desire of the I.L.O. for association with the world peace organization now being contemplated on terms which would permit the I.L.O. with its tripartite character, to make its best contribution to the general effort of the organization of international machinery for the better ordering of a peaceful and prosperous world while retaining for the International Labour Organization the authority essential for the discharge of its responsibilities under its Constitution and the Declaration of Philadelphia.

Report of Joint Maritime Commission

The report of the Joint Maritime Commission which met in London, January 8-12, was adopted by the Governing Body which thus decided that a Preparatory Technical Maritime Conference should be held in October, 1945, to consider, with a view to the formulation of international minimum standards, the following subjects: (a) wages; hours of work on board ship; manning; (b) leave; (c) accommodation on board ship; (d) food and catering; and (e) recognition of seafarers' organizations. The subjects of (f) social insurance; (g) continuous employment; and (h) entry, training and promotion would be dealt with if sufficient progress had been made in their preliminary consideration by special committees of the Joint Maritime Commission. The Governing Body further agreed to convene a maritime session of the Conference to meet early in 1946 to take final decisions on formal international agreements. The Governing Body also approved the suggestion that an international handbook containing technical details should be published by the I.L.O. on appropriate types of accommodation on board ship.

Italy and the I.L.O.

An application for readmission to the I.L.O. was received from Italy. The Governing Body decided to place the question on the agenda of its next session, with a view to preparing a report for the next session of the Conference. Meanwhile the Acting Director of the I.L.O. was authorized to appoint a representative in Rome to facilitate the supply of information to the Italian Government and to organizations of employers and workers.

Other Resolutions

A plan suggested by the Canadian Government Delegate, Mr. Martin to the effect that constituent states or provinces of a federal state be allowed representatives to accompany the official delegations to sessions of the Conference was favourably reported on and referred to the Standing Orders Committee.

A resolution by Mr. Percy Bengough, Canadian workers delegate, to permit a provincial government to ratify Conventions on behalf of that province only, was not acted upon, owing to lack of time at the meeting.

Next Meeting of Governing Body

The Governing Body accepted the invitation of the Canadian Government to hold its next session in Quebec at the beginning of June, 1945.

The Governing Body decided to set up a committee to advise the Office on standards of social policy in dependent territories and approved the names of members of various other committees.

Agenda of Next Session of Conference

The agenda of the next ordinary session of the International Labour Conference, to be held in Paris next autumn, will include the following items: the maintenance of high levels of employment during the period of industrial rehabilitation and reconversion; welfare of children and young workers; matters arising out of the work of the Constitutional Committee; and minimum standards of social policy in dependent territories.

World Trade Union Conference

Delegates from Allied and Neutral Countries Meet in London to Set Up World Federation

CONVENED by the British Trades Union Congress, representatives of 53 Trade Union organizations met for a World Trade Union Conference in the County Hall, London, England, February 6 to 17, 1945. These organizations included 23 national Trade Unions in the Allied nations; nine in British Mandated Territories and Crown Colonies, fifteen international bodies and six Trade Union organizations in neutral countries, the last named attending for the first week in the capacity of observers.

There were altogether 135 delegates and 30 observers, representing 40 national organizations; seventeen delegates and one observer representing fifteen international organizations and twelve delegates and nine observers representing eight neutral organizations—a total of 204 members of the Conference. In addition, the Acting Director of the I.L.O. attended as an observer.

Origin of Conference

The Congress originated in a resolution of the British Trades Union Annual Assembly at Southport, England, in 1943. The resolution urged the convoking of a World Conference or representatives of the organized workers of all countries, as soon as war conditions permitted. The object in view was "to consider the most pressing problems, both of policy and organization affecting the interests of working people and thereby to promote the widest possible unity, in aim and action, of the International Trade Union Movement."

Preparations were made to hold the Conference in London, in June, 1944, but that meeting had to be postponed because of war conditions at that time. At a meeting of the Anglo-Soviet Trade Union Committee in London in September, 1944, the proposal was again presented and action was taken thereon by the British Trades Union Assembly held at Blackpool a month later. It was there decided to call a World Conference early in 1945. Representatives of the B.T.U. Congress, the All-Central Council of Trade Unions of U.S.S.R. and the Congress of Industrial Organizations of the United States were appointed to form a Preparatory Committee.

Work of Preparatory Committee

The Preparatory Committee held its first meeting in London early in December, 1944,

and drew up a provisional agenda and recommendations for Standing Orders to regulate the proceedings of the World Conference. It also made arrangements to issue invitations to Trade Unions in specified countries to send delegates to London on February 6, 1945. The agenda submitted by the Committee covered five points which were subsequently adopted by the Conference: (1) the furtherance of the Allied war effort; (2) the attitude of the Trade Unions towards the anticipated Peace settlement; (3) basis for World Trade Union Federation; (4) immediate Trade Union demands for the post-war period; (5) problems of post-war reconstruction.

At its second meeting on February 5, the Preparatory Committee decided among other things, that the officers of the Conference should comprise three Presidents, one each from Great Britain, U.S.S.R. and the U.S.A., and three Vice Presidents, one each from France, China and the Latin American Countries. The number and functions of the several Conference Committees were also determined. Four official languages were to be used at the Conference, namely, English, Russian, French and Spanish. The British Trade Union Conference was appointed to undertake the secretarial duties of the Conference, under the supervision of Sir Walter Citrine.

There were seven Canadian delegates at the Conference: Messrs. J. A. Sullivan, and J. A. Whitebone of the Trades and Labour Congress of Canada; Messrs. C. Millard, J. McGuire and P. Conroy of the Canadian Congress of Labour, Mr. N. Morgan, alternate, and Mr. C. Jackson, observer.

Mr. George Isaacs, M.P., Chairman of the British Trades Union Congress, presided at the opening meeting. Mr. Isaacs, Mr. V. V. Kuznetsov (U.S.S.R.) and Mr. R. J. Thomas (U.S.A) were elected joint Presidents of the Conference.

Furtherance of the Allied War Effort

In a lengthy Declaration on "the Furtherance of the Allied War Effort" the Conference called upon the workers of the United Nations not to relax their efforts for a moment, and to dedicate themselves "to the single task of increasing production and....., the all-out mobilization which speedy victory requires." The Conference pledged itself "to fight for the protection of the rights of the men and women

in the Armed Services and to safeguard their interests as they return to civil life." It called for the full mobilization of workers in "the fight to establish and maintain wage levels consistent with adequate living standards; equal pay for equal work without discrimination because of nationality, race, or sex, or against minority groups; better housing and social insurance; the proper rationing of food supplies and the strict enforcement of all collective agreements and Government orders and decrees for the protection of workers."

With respect to the peoples of liberated countries, the Conference demanded the establishment of the freedoms of speech, press, assembly, religion, political association and the right to organize labour unions, and urged full support in the rehabilitation of these countries. The unity of the United Nations was recognized and every help was promised in maintaining that unity during the war and in the peace to follow.

Delegates from Russia, Great Britain, United States and China described in considerable detail the war efforts of their respective countries and pledged anew their continued efforts to foster Allied unity and to defeat completely the Nazi and Fascist doctrines and armed forces.

Canadian Delegates Address Conference

Mr. P. Conroy, of the Canadian Congress of Labour sketched briefly Canada's contribution to the war effort since September, 1939. He said in part:

"Canada is a small country in terms of population, but is by no means a small country in terms of contribution to the war effort. When the guns started to roar again in 1939, we found ourselves with no army beyond a small Militia, with literally no navy, with practically no weapons, totally unprepared."

"Nevertheless, we rolled up our sleeves and set ourselves to the task. In five years we have sent over 1,000,000 men out of a population of 11,000,000 into the different branches of our Services. In the matter of production of implements of war—no small problem with only 11,000,000 people—we stand to-day next in rank to the Soviet Union and Great Britain. All the things that have been done by the Canadian people have been done on a voluntary basis and the only criticism we have to find is that we have not done enough."

"Canada does not believe that it is completely fulfilling its obligations in making its physical contribution during the period of hostilities." He continued: "We believe that

the final summation of our war efforts will be measured in accordance with the preparations that we make for the return of the men and women now fighting for us in Europe. That is the feeling with which we have come to this Conference. We come here with only one thing in mind, and I say this advisedly after listening to a somewhat controversial discussion during the last two days, and that is, instead of pressures and power politics being the guiding factor after the war, realism and common sense, in the widest sense of the term, must in the final analysis determine the future of the world." Mr. Conroy appealed to the Conference "to avoid pressures and power politics and to bring to our deliberations the maximum degree of common sense to the end that when this Conference breaks up and the delegates leave for home our divisions will have been eliminated. we shall have the maximum of world-wide unity."

Declaration on Peace Settlement

The Conference deemed it essential that "responsible and qualified representatives of the Trade Union Movement shall be associated with the peace settlement in all its phases." It commended the Atlantic Charter, the agreement reached at the Yalta Conference and urged stern measures to demilitarize Germany and Japan and exact retribution for the atrocities and destruction for which those nations had been responsible. It insisted that, under International Trade Union supervision, a democratic Trade Union movement be set up in Germany as soon as possible, and that Trade Union Funds confiscated by the Nazis be recovered and returned to the Unions of those countries from which funds and property were extorted. It acclaimed the purposes of the proposed international conference at San Francisco and urged "the speedy establishment of the Dumbarton Oaks plan for the constitution of a general assembly of all peace-loving nations with equal rights," and "the setting up of a Security Council vested with power to maintain peace." It considered it to be of vital importance that "The Trade Union Movement shall be closely and continuously connected with the new World organization of free people."

Mr. J. McGuire, of the Canadian Congress of Labour, urged the Conference to proceed with caution in formulating its policy with respect to the peace settlement. He recommended that all the proposals advanced at the Conference "be crystallized by the Peace Settlement committee and that another Conference of this character be convened within

six months..... for the specific purpose of giving careful consideration to and formulating a definite plan in respect of (1) the terms of the peace settlement; (2) the representation of Labour on all peace delegations and councils; (3) the representation of Labour on all administrative bodies to be established under the terms of settlement ..."

Post War Reconstruction

The Committee charged with drafting the Declaration on Post-war Reconstruction set forth "the following charter of basic Trade Union and workers' rights..."

"(a) Work people shall be free to organize themselves in Trade Unions and to engage freely in all normal Trade Union activities, including that of collective bargaining.

"(b) Work people shall be free to establish co-operatives and any other mutual aid organizations.

"(c) There shall be freedom of speech, press, assembly, religion and political association.

"(d) Every form of political, economic or social discrimination based on race, creed, colour or sex shall be eliminated and in this sense equal pay for equal work shall be established. In cases where young people are doing adult work they shall receive the adult rate of pay.

"(e) There shall be equality of educational and vocational opportunities for all people.

"(f) There shall be suitable employment available at adequate rates of pay for all requiring work.

"(g) There shall be adequate protection in all the circumstances of life where this is required to guarantee social and economic security to every citizen."

The speedy and universal introduction of a maximum working week of forty hours, without loss of pay was advocated.

Governments of the United Nations were urged to strengthen and support UNRRA in its work of relief and rehabilitation.

Basis for World Trade Union Federation

Mr. Sydney Hillman, delegate from the Congress of Industrial Organizations, U.S.A., introduced the discussion on the Basis for a World Trade Union Federation.

After commending the program under review at the Conference, Mr. Hillman asserted that the setting up of a World Federation involved more than a program, it was "a question of organization. And the question of organization is decisive". "It can be at-

tained only as the result of determined and consistent struggle", he stated. He foresaw powerful and well organized forces of reaction opposing this people's program, not only in enemy countries, "but in our own nations as well", and declared that "the C.I.O. supports the project of a new, single, powerful international Labour body that shall include all the unions of free countries on a basis of equality, excluding none and relegating none to a secondary place". He suggested as prerequisites of such an organization: (1) it must be established at once; (2) all Labour organizations which are sincere opponents of Fascism and consistent defenders of the rights and interests of the working masses should unite in one body; (3) An effective international labour organization should be democratically constituted. It must admit all Trade Unions of free countries on the basis of equality and all controls must come from within itself; (4) it must be capable of acting quickly and decisively, with out hesitation or prolonged consultation; (5) it must be equipped with a correct program which will serve the needs and protect the interests of the workers it represents.

Sir Walter Citrine, speaking on behalf of the British T.U.C., warned against the setting up of "an International which imparts into its operations political principles or philosophies" lest it should "endanger its stability and effectiveness". "Neither creed, religion nor politics should be allowed to separate us in the new International", he asserted.

On behalf of the British T.U.C., Sir Walter presented the following proposals for the new World Trade Union Federation:

"(1) That a Provisional Committee, fully representative of the National centres and the International bodies represented at this Conference should be immediately established.

"(2) The Committee shall commence its work immediately on the conclusion of this Conference. Its functions shall be to co-ordinate the recommendations of the Conference and submit them to the constituent bodies for ratification.

"(3) The Provisional Committee shall act as the interim authority for the World Trade Union Conference.

"(4) It shall be empowered to make such collective representations to the Governments of the Great Powers, for example, U.S.A., U.S.S.R., Great Britain, France and China, as circumstances may necessitate.

"(5) It shall be the body to implement such of the Conference recommendations as are adopted by the constituent bodies.

"(6) It shall prepare a draft constitution for the proposed World Trade Union Federation.

"(7) It shall circulate this draft constitution for approval to the constituent bodies, giving opportunity to them to submit amendments if they so desire.

"(8) The Committee shall be empowered to appoint such sub-committees as it may deem necessary.

"(9) It shall be empowered to call a conference for consideration of any amendments and for the adoption of the final constitution.

"(10) It shall be empowered to convene an emergency Conference should, in the opinion of the Provisional Committee, world developments necessitate such a course".

Mr. K. Nordahl, a delegate from the International Federation of Trade Unions, speaking on behalf of the Norwegian Trade Union Association, stated that "in our opinion an International Trade Union organization had to have as its condition a united Trade Union organization in the different countries". In spite of the difficulties brought about by the German occupation of Norway he felt sure that the Norwegian workers were "vividly interested in international unity in the Trade Union Movement". He asserted that the Norwegian delegation was, therefore, "in favour of a world association which embraces both the I.F.T.U. and all other bona fide national Trade Unions".

Speaking to the question as the representative of the Canadian delegation, Mr. P. Conroy assured the Conference, not only on behalf of the Canadian Congress of Labour, "but also the other representatives coming from my country, that we are willing, representing the workers of our country, to cooperate with any reasonable solution which will bring about a factual solution to the question of world unity..."

"It is our contention", Mr. Conroy concluded, "that amalgamation which requires all viewpoints to be focussed on the central reason of greater world unity must be conditioned not only by a desire but by an application which will not only develop greater responsibility in the world at large but more essentially develop greater responsibility at home."

Mr. J. A. Sullivan, delegate of the Trades and Labour Congress of Canada, was the Canadian representative on the Conference Committee on a World Trade Union Federation.

Conference Sets Up World Trade Union Committee

The Conference decided that a World Trade Union Conference committee of 41 members from 30 countries should be immediately established to commence its work at once and to "act as the authority until the World Trade Union Conference in reconvened". The Committee shall, among other things:

(1) act as agent of the Conference "to ensure Trade Union representation at the coming peace conference, and at all preparatory commissions or conferences; (2) prepare a draft constitution for the World Trades Union Federation for submission to the constituent bodies for approval or amendment; (3) reconvene the World Conference not later than the end of 1945 for the consideration and adoption of the constitution and for other business; (4) issue invitations to attend the reconvened conference and to affiliate with the new organization such other bodies as is considered desirable." The headquarters for this Committee are in Paris, France.

Rt. Hon. C. R. Atlee, M.P.

Arrangements had been completed to have Prime Minister Churchill address the Conference, but he was prevented from doing so, as he was in Conference with Marshall Stalin and President Roosevelt at Yalta. In his stead, the Deputy Prime Minister, Rt. Hon. C. R. Atlee, brought the greetings of the Government of Great Britain and Northern Ireland. He concluded his address by saying: "I have no doubt this great Conference will be the first of many parliaments of Labour in the years to come and that in the future, as in the past, World Trade Unionism may be a mighty force for freedom, peace and social justice".

Continuing Committee Meets

The Continuing Committee convened in London immediately following the close of the World Conference and decided: (1) to reconvene the Conference in September, 1945, in Paris, France; (2) an administrative committee was appointed to meet early in April in Washington; and (3) a committee will be named to present the World Labour Conference program to the United Nations meeting in San Francisco. A small interim committee will maintain headquarters in Paris.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning Employment and Unemployment across Canada.

The employment situation at the beginning of February, 1945, as reported by employers.—There was a continued important curtailment in general industrial activity at the beginning of February, repeating the situation indicated at mid-winter in six of the last seven years, according to the Dominion Bureau of Statistics. The crude index number of employment declined from 180.4 at the beginning of January to 178.9 at the beginning of February, 1945. This was 2.3 per cent below the February 1, 1944, figure of 183.2 (based on the 1926 average as 100).

The weekly per capita earnings increased from \$30.10 at January 1, 1945, to \$32.15 February 1, 1945. The average at February 1, 1944, was \$31.76 and at February 1, 1943 \$29.96.

The Bureau's reports come from firms employing fifteen or more employees representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. Reports for January come from 15,074 establishments in the eight leading industries. The number of persons in recorded employment at February 1, 1945 was 1,820,842 as compared with 1,835,294 a month earlier.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit decreased from 20,412 in January 1945, to 14,990 in February. This was, however, an increase of 2,706 over February 1944.

Report on employment conditions, March, 1945.—The manpower requirements of Canadian industry rose steadily during the past month. At the same time there was a corresponding drop in the supply of workers available to meet this rising demand.

The labour demand in industries exclusive of agriculture, as reported by Employment and Selective Service Offices at March 22, 1945, totalled 104,004 persons. This was 9 per cent higher than the shortage of 95,001 workers reported one month earlier, although slightly less than labour requirements at the corresponding date one year ago.

Labour supply, as indicated by the number of applicants registered at employment offices but not yet referred to jobs, amounted to 54,481 at March 23, 1945. This was 9 per cent less than the number of applications recorded one month earlier, and little more than half the workers required at the reporting date, March 23.

Applications for employment; vacancies and placements, February, 1945.—Reports received during the four-week period February 2 to March 1, from the Employment and Selective Service Offices of the Unemployment Insurance Commission showed moderate declines in the average daily placements when compared with the preceding five weeks, December 29, 1944, to February 1, 1945, but a nominal decrease in comparison with the period February 4 to March 2, 1944. The most perceptible changes under the first comparison were losses in logging, services, public utilities and mining but increases were shown in construction, trade, manufacturing, finance and agriculture. Compared with the period ending March 2, 1944, advances were shown in services, trade, public utilities, finance and construction, and reductions revealed in all other industrial groups, the most noteworthy being in manufacturing. Vacancies notified during the period under review numbered 177,950. There were 174,369 applications for employment, and 119,386 placements were effected in regular and casual employment.

Unemployment in trade unions.—The percentage of unemployment among trade union members increased fractionally between October and January, though remaining less than one per cent. At the beginning of January the figure was 0.6 per cent, while at October 1, 1944, the last quarterly date, the figure had been 0.3. Compared with the preceding year, however, unemployment was somewhat less, the figure at the beginning of January, 1944, having been 0.8 per cent. At the beginning of 1939 unemployment had been 16.2 per cent.

The January, 1945, figure was based on returns received from 2,332 labour organizations having a total membership of 409,338 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribu-

tion at October 1, 1944, has been made by the Research and Statistics Branch of the Department of Labour. At that date it is estimated that 4,318,000 persons, 14 years of age and over.

were gainfully occupied of whom 3,293,000 were in non-agricultural industry, including 994,000 in war industry. In addition there were 777,000 persons in the Armed Forces.

The Employment Situation at the Beginning of February, 1945, as Reported by Employers

THERE was continued important curtailment in general industrial activity at the beginning of February, repeating the situation indicated at midwinter in six of the last seven years. Previously, employment had usually, though not invariably, shown partial recovery at February 1 from the year-end lay-offs. The 15,074 firms furnishing data to the Dominion Bureau of Statistics at the date under review reported a combined working force of 1,820,842, as compared with 1,835,294 at January 1. This decline of 11,452 persons, or 0.8 per cent, lowered the index number of employment (1926=100), from 180.4 at January 1, to 178.9 at the date under review, when it was 2.3 per cent below the February 1, 1944, figure of 183.2. Since the recession was contrary to the usual movement at February 1 in the experience of the period, 1929-37, used in calculating the factors of seasonal variation, the seasonally-adjusted index was also reduced, falling from 187.4 at January 1, to 185.9 at the date under review.

The resumption of operations on a more usual scale following the interruptions due to the year-end holidays brought about a substantial increase in the weekly payrolls reported at the beginning of February. These aggregated \$58,545,624, as compared with \$55,233,907 at January 1. The gain was six per cent. The per capita earnings, which had declined from \$32.19 at December 1 to \$30.10 at January 1, rose to \$32.15 at the latest date. The increase of \$2.05 in the weekly earnings at February 1 as compared with January 1 approximated that of \$2.07 indicated in the same comparison in 1944, which had then brought the February 1 average to \$31.76. In 1943, the mean at that date was \$29.96.

Improvement was indicated in manufacturing at the beginning of February, when the gain of 12,001 persons, or 1.1 per cent, was below the average at midwinter in the years since 1920, although it exceeded the advance at February 1, 1944. The increase over January 1 took place largely in the manufacture of non-durable goods, the largest being in textile factories. The trend was also favourable in the manufacture of durable goods, mainly in iron and steel plants. Among the non-manufacturing divisions, logging showed

little general change; considerably greater activity was reported in mining, while curtailment, largely seasonal in character, was indicated in communications, transportation, construction and maintenance, services and trade. The most pronounced losses were those of 5,342 persons in transportation, 10,458 in construction, and 12,642 in trade.

Payrolls

The salaries and wages distributed at February 1 by the co-operating employers totalled \$58,545,624, exceeding by \$3,311,717, or six per cent, the weekly payroll reported on or about January 1, when the disbursements had been affected by the observance of the year-end holidays. The per capita earnings advanced from \$30.10 at January 1, to \$32.15 at the first of February, as compared with \$31.76 at February 1, 1944, \$29.96 at February 1, 1943, and \$27.65 at February 1, 1942.

The latest survey shows that, including the statistics for financial institutions, the number of persons in recorded employment was 1,887,418, as compared with 1,901,724 at January 1. The sums distributed in weekly salaries and wages among these persons amounted, to \$60,731,173, while those employed at January 1 had received \$57,393,068. The per capita figure for the nine main industries, including finance, was \$32.18, as compared with \$30.18 at the beginning of January, and \$31.76 at February 1, 1944.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the larger cities, and gives comparisons as at January 1, 1945, and February 1, 1944. Table I gives a monthly record for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls monthly from 1941.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table II indicates that in the period for which data

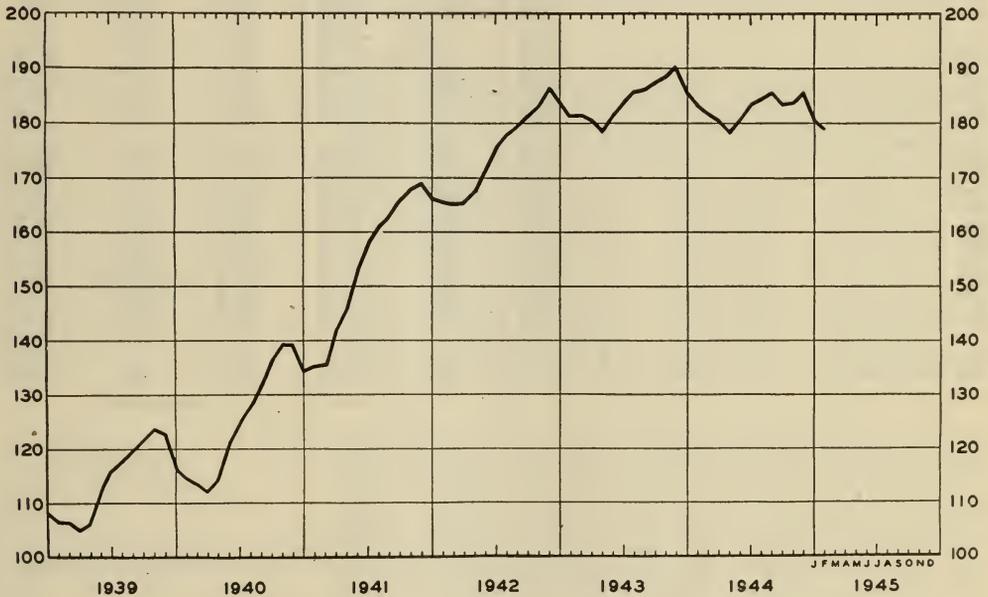

are available, there has been a general increase of 17.2 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the aggregate weekly salaries and wages of these persons have risen by 46.4 per cent. Including finance, the gain in employment from June 1, 1941, to February 1, 1945, amounted to 17 per cent, and that in payrolls, to 45.6 per cent. The explanation previously given for the much greater rise in the payrolls than in employment may again be stated: (1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work, (2)

manufacturing industries, the index of employment in factories having risen by 28 per cent from June 1, 1941, since when the index of payrolls has advanced by 62.6 per cent. The weekly earnings of the typical individual engaged in factory work have increased by 29.3 per cent, while the all-industries' average has gained by 27.3 per cent. The factors given above as influencing the all-industries' trends operate with greater force in the case of manufacturing.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution of such persons is an important factor, frequently

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

the payment of cost-of-living allowances to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their absorption into the basic wage-rates as from February 15, 1944, (3) the progressive upgrading of employees as they gain experience in their work, and (4) the payment of higher wage-rates in a number of cases.

Mainly as a result of wartime conditions, the expansion in employment and payrolls in manufacturing in the period of observation has been much greater than that in the non-

associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent of which casual labour is used. The degree of skill generally required of workers in the industry is obviously also an extremely important factor.

TABLE I—INDEX NUMBERS OF EMPLOYMENT AND PAYROLLS, BASED ON JUNE 1, 1941=100,
TOGETHER WITH PER CAPITA WEEKLY EARNINGS

(The latest figures are subject to revision)

Report on Employment Conditions, March, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE labour needs of Canadian industries rose sharply during the four-week period February 22 to March 22. With an unusually early spring prevailing throughout Canada, many farmers who were working on temporary permits during the off-season, have returned to the farm. Their return to agriculture, in many cases before their permits have expired, presents a particularly difficult problem as many of these able-bodied men have been working at heavy jobs in the mines, smelters and foundries, and suitable replacements for the husky type of worker are difficult to find. Some relief may be expected on the termination of logging and river driving, but this will not provide a solution to the problem since many of the men released will also be returning to agriculture.

The labour shortage in all industries, exclusive of agriculture, totalled 104,004 at March 22, 1945 and represented an increase of almost 10 per cent over the demand for 95,001 workers at February 22. When compared with the labour requirements of 108,001 at March 23, the corresponding reporting date

in 1944, the labour market would appear to be somewhat easier this year. Increased demand during the past month was apparent in all industries with the exception of logging, in which a substantial decline was reported. Male labour requirements of 71,128 at March 22, were 8 per cent higher than the demand a month earlier when 65,765 men were needed. Table I shows net labour demand¹ by main industry group and by sex, as at March 22, 1945, with absolute and percentage changes in total demand from February 22.

The number of applicants registered at Employment and Selective Service Offices throughout Canada who had not been referred to jobs at March 23 totalled 54,481. This was a reduction of 5,422 from the number recorded a month previously when there were 2,302 fewer male applicants and 3,120 fewer females. Thirty-six per cent of the unreferred applicants² at March 23 were unskilled workers; an additional 31 per cent were skilled and semiskilled, while other groups, including clerical, sales and service workers, made up the remainder. Table II shows labour demand and supply, by main occupational groups and by sex, as at March 23, 1945.

An increasing number of war veterans and handicapped persons are applying for jobs and their placement is being facilitated by the excellent co-operation of employers. Even though the demand from industry is mainly for men for heavy work, these persons are being satisfactorily placed in suitable light jobs or administrative positions.

Net Labour Demand in A and B Priority Industries

The release of farmers from other essential industries is reflected in the marked increase in demand for labour in the high priority war and essential civilian industries. At March 22, 1945, the need for 73,036 additional workers was 9 per cent in excess of the labour demand in high priority industries at February 22, one month earlier, and comprised 69 per cent of the labour requirements of all industries at March 22. Within this A and B priority industry group, the reported shortage of 11,158 workers in logging camps was 5,569 less than the number required at February 22; on the other hand, demand for workers in high priority mining and manufacturing industries increased from 31,667 to 38,222 and at March 22 constituted 52 per cent of the labour needs of all high priority industries.

Logging

The early spring break-up has forced contractors in many areas to curtail woods opera-

tions and much of the winter's cut will have to be left in the bush. In the Maritime Region, where heavy rains and snow have hampered operations, production in some areas will be below earlier expectations. In the Prairie Region, the past season has been generally much more satisfactory than in previous years and production has increased sharply in all areas. Hauling operations are still being carried on, although the spring thaws are interfering somewhat with the work. There was still a reported demand for 11,158 workers in this industry at March 22, but this

¹ *Net Labour Demand* is calculated by deducting unconfirmed referrals from unfilled vacancies. *Unfilled Vacancies* are the number of unfilled jobs on file in employment offices as at the date indicated. *Unconfirmed Referrals* are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

² Applicants who have not been referred to jobs as at the date indicated.

TABLE I.—NET LABOUR DEMAND BY INDUSTRY AND BY SEX, AS AT MARCH 22, 1945

Total.....	71,092	32,595	103,687	35,790	18,691	54,481

was a decrease of 5,569 from the shortage one month earlier. Substantial decreases in demand were reported in all regions except the Pacific where the need for workers was larger by 17 per cent, standing at 1,240 at March 22.

Mining and Primary Smelting

Many agricultural workers employed on a temporary basis in high priority mining, primary smelting and refining during the winter months have returned to their farms, aggravating considerably the already existing manpower shortage. The increase in labour requirements in this industry (from 4,656 to 5,854) during the four weeks prior to March 22 was shared by all regions. A shortage of 1,352 workers in coal mines, where experienced miners and underground workers are urgently needed, was causing some slow-down in production in a few areas. Demand for additional men in the gold and base metal mines also increased somewhat during this period. Considerable prospecting is being carried on in this field and several new developments are being opened up in the Prairie Region. In an attempt to increase the production of essential steel, which is in short supply at this time, a 25 per cent increase in the demand for workers in the iron and steel industries was reported during the month under review.

Manufacturing

Total demand for labour in A and B priority manufacturing industries at March 22 stood at 32,368, a rise of 5,357 or 20 per cent over the shortage reported at the same date in February. Almost the entire increase in demand was for male labour, female labour requirements remaining at about the same level during the month. The following high priority manufacturing industries reported significant increases in labour demand during the month.

Guns and Ammunition.—Demand for workers in the guns and ammunition industries continued the upward trend which has been evident since the beginning of the year; 3,322 persons were needed at March 22 as compared with 2,536 a month earlier. In the manufacture of heavy ammunition (bombs, shells, mines, etc.) in which the greatest increase in demand was evident, male labour requirements increased during the month from 608 to 1,206, while the 426 women workers needed at March 22 represented an excess of 208 over the number required at February 22. On the other hand, plants turning out small arms ammunition needed 287 fewer workers than at the February date, with Quebec plants accounting for nearly all of the decrease in labour requirements.

Secondary Metals.—During the four-week period ended March 22 there was a sharp rise in male labour demand in the secondary metals industries (from 2,292 to 3,221). The chief reason for this rise is that foundries and other metal processing establishments have been hard hit by the return of agricultural workers to the farms. During the four weeks ended March 22, demand for males in plants turning out iron and steel foundry products grew larger by 205 to total 751; in the processing of non-ferrous metals, demand for males almost doubled during the month to amount to 592 at March 22; at the same time, manufacturers of heating apparatus were asking for 412 men, 126 more than a month previously.

Food Processing.—Net labour demand in high priority food processing at March 22 showed a rise of 38 per cent over that reported a month earlier. In the Ontario Region, 415 persons (191 men and 224 women) were needed in the canning and preserving industry, more than double the February 22 labour requirements. All regions reported an increased demand for labour in meat processing establishments with the Canada-wide requirements in this industry totalling 773 at March 22 as compared with 532 a month earlier. Similar increases were noted in plants turning out dairy products and grain mill products.

Wood Products.—During the month under review there was a decided increase in the labour requirements of the high priority wood products industry, the 2,484 workers needed at March 22 representing a 30 per cent increase over demand at February 22. More than four-fifths of the rise in demand was due to an increase in the male labour requirements of sawmills and planing mills (from 1,358 to 1,769). In the Pacific Region alone, these basic lumber mills were short of 536 men at the March date as compared with 291 a month previously. The manpower problems of lumber mills in some areas are being alleviated somewhat by the employment of men released from logging operations on account of the early spring break-up.

Construction

Although there has been some increase in activity in the construction industry the peak in demand for construction workers will not be reached for several weeks. The shortage of workers for high priority war and essential civilian construction dropped from 2,148 at February 22, to 1,937 at March 22. This decrease, however, was offset by a considerable rise in labour requirements for low priority projects. The demand for workers to complete military hospitals throughout Canada

has, for the most part, been met satisfactorily; work on these projects is progressing favourably except in some local areas, particularly Toronto and Hamilton, where good construction labourers are difficult to obtain.

Transportation

With the coming of warmer weather and the opening of the highways and the inland waterways, the need for additional workers in high priority transportation has risen considerably during the past month. Twenty-nine per cent of the demand in this industry at March 22 was in water transportation, with increases in the Ontario and Prairie Regions raising net labour demand to 534 and 435 respectively. Little change was reported during the month in labour requirements for steam railways; the 1,825 workers still needed at March 22 accounted for 38 per cent of the total demand in essential transportation.

Trade, Finance and Service

All regions reported an increased demand for workers in high priority trade, finance and service groups at March 22, when the need for additional workers totalled 13,298 (5,171 males and 8,127 females); this was an increase of 2,812 during the month. Thirty-six per cent

of the shortage was in public and professional service where 4,773 workers (2,040 males and 2,693 females) were needed. This was higher by 1,284 than the demand at February 22. Trade, finance, and service other than public and professional also reported an increased shortage of workers during this period when demand rose from 7,037 at February 22 to 8,565 at March 22.

The shortage of female workers in hotels and restaurants, as well as in hospitals and laundries is becoming more acute. Although many placements were made during the past month, demand for female workers in hotels and restaurants rose from 2,257 to 2,911 during this period. The need for 951 female workers in hospitals as at March 22, constituted an 18 per cent increase over the February demand. The tight situation with regard to female workers for domestic service continues, with few applicants available for this type of work. In the Maritime Region, classes for household workers are under consideration and efforts are being made to organize training schools in the near future.

Labour requirements in wholesale and retail trade have shown a slight improvement. At March 22 there was a demand for workers in these groups of 1,067 and 1,287 respectively, compared with 1,111 and 1,383 one month earlier.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended March 22, 1945.

Maritime Region

Agriculture.—While there has been little activity as yet, a heavy demand for farm labour is anticipated. The Nova Scotia Department of Agriculture is sending a representative to Newfoundland to recruit about 300 workers for the Annapolis Valley, and the Moncton office is of the opinion that the new compulsory order for the direction of unemployed males between 16 and 65 years of age will facilitate the filling of orders for maple sugar making.

Farmers who have been engaged in other essential occupations during the winter are returning home in steadily mounting numbers. Through the medium of radio and newspaper, employers have been advised of the expiry dates for temporary permits: all seasonal workers of Prince Edward Island, the Annapolis Valley and the south shore of Nova Scotia,

the Saint John River area up to Grand Falls and the southern portion of New Brunswick (including Westmoreland County) are to return to the land on or before April 1—in all other areas, by April 15.

Logging.—Operations have reached a standstill until the beginning of the river drive, for which many additional bushworkers will be needed. Heavy rains last Fall and very deep snow in late January have reduced the season's production as a whole, forcing a large number of loggers to leave the woods much earlier than usual. These men are employing the interval before agricultural activity begins in the cutting of their own fuelwood.

Coal Mining.—In spite of a persistent shortage of experienced miners for the working face, the collieries are all operating steadily. A strike affecting 1,000 men brought production to a standstill in the Stellarton area for several days during the past month, and 300 miners were idle for a week owing to flood conditions in the Allan Shaft Colliery in the same district, but production in both mines is again in full swing.

Manufacturing.—No major change is apparent in the industry's manpower requirements.

The steel plants at Sydney and New Glasgow continue to operate steadily, with some demand for heavy labour, difficult to meet on account of the nature of the work. The shipyards still make the heaviest inroads on the provincial labour force, with extensive orders not only for unskilled workmen, but also for highly qualified artisans. All shipbuilding establishments in the Halifax area share in this need. The shell plant at Fredericton, which suspended operations some time ago, has re-opened and is calling for workers, while other plants in the neighbourhood require skilled tradesmen to replace employees on military postponement. In the Saint John area, there is an over-all demand for factory labour, women to work in textile mills and brush factories in particular. All other textile plants and kindred industries throughout the region share in this need.

Construction.—The only present activity is displayed by small independent contractors, who will be busy through the summer on general repairs and house building in congested areas.

Transportation.—With passenger and freight movements continuingly heavy, the manpower needs of the railways are mounting steadily. At Halifax the Reserve Labour Pool has placed orders for 100 labourers, to replace farm workers.

Quebec Region

Agriculture.—By agreement with the Provincial Department of Agriculture, the expiry date for all temporary permits has been set at March 31 for the Montreal district and the Eastern Townships, and April 21 for other parts of the region. Although farmers now leaving the logging camps are returning directly home, poor conditions prevailing for maple sugar making have lessened the immediate demand for agricultural helpers, making it possible for some men employed in manufacturing establishments to remain longer away from the land.

Logging.—Exceptionally warm weather has forced logging contractors to leave a substantial part of their winter cut in the bush. With chopping completed in most areas, the only operations of any magnitude continuing during the lull before the Spring drive are those along the North Shore, and to a lesser extent in the Mont Laurier area, where hauling on a small scale is still possible.

In the Chandler area, bushworkers leaving the woods for Easter are planning to return only for the Spring drive, for which 950 deferred vacancies are on file; canvassers' permits to recruit the required labour have been extended to March 31. North of the St.

Lawrence, many of the 3,500 loggers prematurely released from the camps have been placed elsewhere on clearance orders, others have returned to their farms or have been absorbed into the aluminum plants, and only a small number have filed unemployment insurance claims.

Mining.—Little general improvement is apparent in the labour situation of the Quebec mines. Shortage of qualified miners in the Rouyn area is forcing owners to the tedious six-month process of training men, and various new properties, planning diamond drilling operations, while well supplied with helpers, are short of runners. Gold mines in the district are uniformly short-staffed, as in the Val d'Or neighbourhood, where the loss of farmers in April will aggravate the current manpower shortage.

Manufacturing.—War plants continue to make the greatest demand on the labour force. As a result of new contracts placed by the Department of Munitions and Supply, the Quebec shipyards are preparing for a busy season, with skilled, semi-skilled and unskilled labour in great demand. As yet, the exodus of agricultural workers from the heavy shell-filling plants has been satisfactorily offset by referrals, thus making it possible to meet production schedules without difficulty. The stepping-up of production in the aluminum plants is taking care of the unemployment in most of the towns where these plants are situated, but the office at Shawinigan reports that approximately 1,300 people in that vicinity are drawing unemployment insurance benefits.

Although one large mill in the Hull area is asking for another 200 to 225 men for April 15, other Quebec paper operators are reducing their production programs. There is, however, little diminution of the manpower shortage in the province's textile mills and kindred industries, which are continuingly understaffed. The low priority tobacco factories and distilleries share in this dearth of labour, to which minor lay-offs throughout the region have afforded only slight relief.

Construction.—Renewed seasonal activity has led to a mounting demand for building tradesmen and general construction labour. The Montreal office reports an increased need for workmen of all kinds, Valleyfield anticipates a shortage of 300 tradesmen for projects in view, the erection of 50 to 75 houses will absorb all available men in the Hull area, and rebuilding in Knowlton, necessitated in consequence of the fire last Winter, will tax the local labour supply. About 200 skilled and semi-skilled workmen will also probably be needed for construction projects in the vicinity of St. Jerome.

Transportation.—While orders have not yet been placed for Spring track maintenance labour on the railways, the Levis office indicates that approximately 2,000 men will be required as soon as the thaw ends. Preparations for water navigation are well under way, and it is expected that some 700 to 800 men will find employment on the St. Lawrence River wharves.

Ontario Region

Agriculture.—Early in the month, a consultation between provincial agricultural authorities and the mobilization boards concerned, resulted in the region being divided into four zones, to expedite the cancellation of temporary permits issue to agriculturists with the minimum disruption of manufacturing schedules. Already seeding is in progress in Zone 1, while in at least one county of southwestern Ontario the seeding of coarse grains is almost completed. Should the unprecedented weather continue, it will be necessary to cancel temporary permits in other zones before the expiry date specified.

While the early thaw has released many bushworkers, and a large number of farmers engaged in other industries are returning to the land of their own accord, very few applicants for farm work are registering and a serious shortage of labour is considered inevitable. The most pressing immediate need is recorded in the more westerly sections of the province; in the fruit belt there is serious lack of helpers for earlier than usual spraying operations.

Logging.—The sudden, unseasonably mild weather, with the consequent disappearance of practically all snow, has terminated woods operations abruptly, forcing some operators to leave much of the Winter's cut in the bush. One large operator in the Kapuskasing area will have to place fire insurance for the Summer on approximately 100,000 cords of logs which cannot be brought out of the woods until next Winter, while about 50,000 cords of pulpwood and 200,000 feet of sawlogs in the Hearst district will probably be left behind. Similar conditions are reported by the Sudbury and Timmins offices, but in the North Bay area, although Spring cutting has been abandoned, all but two contractors were able to complete the season's haul.

Mining.—The mines of the region, long undermanned, will be faced with even greater shortages when the exodus of farmers gets under way. Sudbury's nickel operations will be seriously affected, as will the mines in the Timmins area, which are all continuing to operate on reduced tonnage schedules.

Manufacturing.—While employers are taking advantage of the respite afforded by the

short extension of off-season permits in some sections, local offices in every part of the province are confronted with the onerous task of finding replacements for farmers in war plants and other essential industries. Most seriously handicapped are the heavy industries, and reiterated demands from iron works, rubber factories, packing plants and tanneries have resulted in few applicants to fill steadily mounting vacancies for heavy labourers.

The large manufacturing centres are hardest hit by the expiry of agricultural permits. More than 400 farmers will have to be replaced in the vicinity of Welland, and another 400 in London factories; 200 heavy labourers are needed immediately for vital war work at New Toronto, while chemical and abrasive plants at Niagara Falls are importing outside labour whenever available. Kitchener rubber plants find the problem of replacing 158 farmers a very difficult one, and orders are in clearance for 200 women to help out in the emergency.

The urgency of the over-all manpower need is emphasized by the steadily increasing use of women workers to fill the breach in war plants, textile factories and other industries. Munitions plants in Wallaceburg, St. Catharines and Oshawa are greatly increasing their demands, while in the Toronto area alone, 500 sewing machine operators could be absorbed into the textile plants and kindred establishments. From all parts of the province comes a similar story of shortage of male and female labour alike.

Lay-offs during the past month have been of a minor nature. Some 100 semi-skilled workers released by the Ottawa Car and Aircraft Company have for the most part been transferred out on clearance orders, while 20 Pembroke mill workers were immediately placed elsewhere in the district. At Windsor, the temporary stoppage of supplies from strike-bound Detroit plants led to a 6-day lay-off of 485 employees of the Chrysler Corporation. About 268 of the men affected filed initial claims for unemployment insurance benefits.

Several strikes have also been reported during the month. A union dispute, resulting in the walkout of approximately 250 employees of a Carleton Place textile plant on March 19, remains unsettled, although no orders for staff replacements have been filed. Conditions in the Algoma Steel Corporation's plant at Sault Ste. Marie are back to normal, following a strike of 30 narrow gauge railway workers, which tied up a large part of various departments from March 16 to 21. A strike in a Toronto paint and varnish works recently displaced about 270 workers.

Construction.—With a noticeable upswing in the volume of building under way throughout Ontario, the scarcity of good labourers to meet the steadily increasing need is causing some concern. The Hamilton office reports a heavy demand for all types of construction workers, while in Toronto, where painters, roofers and structural steel workers are hard to obtain, the dearth of building labourers is proving a serious hindrance to the military hospital program.

Transportation.—The opening of navigation on the Great Lakes has brought heavy demands for engine crews and deckhands. With some 500 seamen expected to return for the season, additional requirements are being satisfactorily met. More difficulty is being encountered in filling the considerable number of orders for heavy gang labourers for the railways.

Prairie Region

Agriculture.—As the call for farm helpers becomes more imperative, workers on temporary permits in other industries are gradually returning to the land. While the only pressing demand is reported from the Brandon area, there is a general need for tractor drivers and men experienced in handling power machinery, in most of the offices serving grain growing and mixed farming areas, but particularly at Portage la Prairie and North Battleford. In the vicinity of Swift Current, a continuation of the present fine weather will advance the beginning of seeding operations to the first week in April, and in the Moose Jaw district, too, the early Spring is hastening the separation from other industries of farmers anxious to return home.

Logging.—Early thaws are interfering with operations in some sections. With ice roads in the vicinity of Port Arthur rapidly becoming impassable, contractors are making every effort to move the Winter's cut to river landings. While the extension of temporary permits will ensure the greater part of the necessary labour, orders for an additional 1,319 loggers are still unfilled. With mild weather terminating all but hauling operations in the Fort Frances area, the majority of the western farmers have left the bush and very few will remain beyond March 31. The departure of all trappers and many agriculturists from the camps in the vicinity of The Pas has necessitated an earlier than usual closing down of operations in that section also.

Coal Mining.—The replacement of agricultural workers is the major problem at this time. In addition to a continuing dearth of

certificated miners, orders for unskilled workers are mounting steadily. Domestic mines, planning to operate full time throughout the Summer and faced with increasing labour shortage at the end of March, are endeavouring to secure qualified miners from the bituminous fields, where collieries are closing down.

Base Metal Mining.—Little change in the labour situation is apparent. The agricultural exodus will result in serious manpower shortage in the Winnipeg, Flin Flon, Fort Frances and Kenora areas, where outstanding orders for practically all types of mine labour are already heavy. The Port Arthur office alone advises that 221 underground workers are needed throughout the district.

Manufacturing.—The problem of replacements for agricultural workers is assuming primary importance, with the mounting demand for heavy labour shared by packing plants, foundries and rolling mills in all sections. A new order for three coastal vessels, placed with the shipyards at Port Arthur, will result in an increasing need for both skilled and unskilled workmen, and the company has agreed to consider applicants with good electrical training, in lieu of 25 expert journeymen electricians who, although urgently required, are unobtainable. The over-all shortage of skilled and unskilled workers for the region's textile and woollen mills remains unalleviated.

Construction.—Renewed activity is gradually absorbing the surplus of skilled tradesmen and labourers. In smaller places, residential and repair work will call for building artisans, while in the larger centres, contractors are concerned over the prospect of securing large enough crews for projects under consideration.

Transportation.—While railways in the eastern section are not expected to make extensive labour demands until after the opening of navigation on the Great Lakes, farther west there is a persistent call for maintenance men of all sorts.

Pacific Region

Agriculture.—Except for a continuing slight demand for dairy workers, and for a few helpers for the berry growers of Vancouver Island, there is as yet little activity. However, it is anticipated that with the commencement of seeding operations in April, many workers will be required.

Logging.—The demand for skilled and unskilled labour continues unabated, with a concurrent decrease in the number of applicants available. The greatest immediate need is for fallers, buckers, chokermen and riggers. Camps

in the interior, still closed down owing to adverse snow conditions, are preparing to reopen, with a consequent renewed demand for bushmen of all kinds.

On Vancouver Island, where logging operations are in full swing, the impending departure of farmers is causing anxiety. Operators in the Prince George area will have to replace 216 farmers on April 1, and the Duncan office is calling for an additional 300, while at Courtenay, one company is endeavouring to hold its workers by means of a daily "crummie" running from Courtenay to Oyster Bay and return, a round trip of about 40 miles.

Coal Mining.—There has been no change in the labour situation, and only one colliery in the Fernie area reports any extensive shortage of manpower.

Base Metal Mining.—Labour needs are more pressing as the expiry date for agricultural permits approaches. At least 350 men, mostly underground workers, are needed at Kimberley, another 50 at Princeton, and mining and smelting companies throughout British Columbia are unanimous in their insistent call for additional manpower. From the White Horse office comes the report that one large gold corporation of Dawson City may be supplied with part of its order for 450 miners from the surplus staff of the Standard Oil of Alaska, which on March 10 began a lay-off effecting approximately 600 Canadians.

Manufacturing.—Increased activity is noted in the Vancouver aircraft plants, whose call for more than 100 workers will be answered without difficulty. Shipyards, both in Vancouver and Victoria, continue to make heavy demands on the provincial labour force—

demands unsatisfied by orders in clearance, and certain to be aggravated by the exodus of farmers.

The labour situation in sawmills, which was reasonably satisfactory for a time, has again deteriorated. Throughout the region, about 25 operating engineers of all types are needed, as well as hundreds of heavy labourers. In the New Westminster area, the imminent departure of approximately 120 Prairie and 150 local farmers is augmenting an already disturbing demand for heavy labour for sawmills and other factories; in the Victoria district, while the situation has eased somewhat, few surplus workers are available to fill urgent orders from outside, and in the vicinity of Prince George a definite shortage is anticipated in early April.

While there has been no improvement in the supply of heavy labour for the foundries, the extension of agricultural permits to April 15 has afforded temporary assistance to the smelter at Trail, which has orders in clearance in the Pacific and Prairie regions.

Construction.—Labour requirements are being satisfactorily met for the most part. While Victoria contractors are asking for plasterers and labourers, the Vancouver office reports sufficient applicants available to meet the rising demand for carpenters and building tradesmen, but less success in procuring structural iron workers and sheet metal men. The most pressing need in the Vancouver area is for suitable men to work on the Hell's Gate project.

Transportation.—Extra maintenance gangs and sectionmen are still in demand for the railways, but the general requirements of the B.C. Coast Services are being reasonably well met.

Applications for Employment; Vacancies and Placements; February, 1945

REPORTS received from Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period February 2 to March 1, 1945, showed moderate declines when compared with the previous five weeks, but a nominal decrease in comparison with the four weeks February 4 to March 2, 1944. This computation being based on the average number of placements recorded daily.

Under the first comparison construction, trade and manufacturing showed moderate increases with slight advances in finance and agriculture, but logging, services, public utilities and mining registered declines, the most substantial being in logging. When compared

with the corresponding period a year ago there were increases in services, trade, public utilities, finance and construction. All other industrial groups recorded losses, the only noteworthy decline being in manufacturing.

The accompanying chart shows the trend of employment since January 1942, as represented by the ratios of vacancies notified, and of placements effected for each one hundred applications for work. It will be seen from the graph that the curves of vacancies and placements in relation to applications took upward courses. The ratio of vacancies to each one hundred applications being 102.0 during the four-week period February 2 to March 1, 1945, in contrast with 90.3 during the preceding

five weeks and 103.7 during the period February 4 to March 2, 1944. The ratio of placements to each one hundred applications was 68.4 as compared with 60.8 in the previous period, and 67.6 in the corresponding period a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the period ending March 1, was 7,415 compared with 7,757 during the preceding five weeks and 7,645 during the corresponding period a year ago. The average number of applications for employment received daily by the offices during the period under review was 7,265, in comparison with 8,594 in the previous five weeks and 7,369 in the four weeks ending March 2, 1944. The average number of placements made daily by the offices of the Service during the period February 2 to March 1, was 4,974, of which 4,850 were in regular employment and 124 in work of one week's duration or less, as compared with a total daily average of 5,224 during the previous five weeks. Placements during the four weeks ending March 2, 1944, averaged 4,982 daily, consisting of 4,826 in regular and 156 in casual employment.

During the period under review the offices of the Commission referred 167,597 persons to vacancies and effected a total of 119,386 placements. Of these the placements in regular employment were 116,409, of which 72,726 were of males and 43,683 of females, while placements in casual work totalled 2,977. The number of vacancies reported by employers was 114,184 for males and 63,766 for females, a total of 177,950, and applications for work numbered 174,369 of which 111,796 were from males and 62,573 from females.

The following table gives the placements effected by employment offices each year from January 1935 to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945 (9 weeks).....	263,743	7,133	270,876

Prince Edward Island and Nova Scotia

Positions offered through Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the four weeks ending March 1, 1945, called for a daily aver-

age of 255 workers, in contrast with 258 in the preceding period and 280 during the four weeks ending March 2 last year. The average number of placements effected daily was 198 during the period under review, in comparison with 201 in the previous five weeks and 188 during the corresponding period of 1944. The increase in placements over the four weeks February 4 to March 2, last year, was small for the province as a whole under this comparison. The most significant changes were gains in trade, public utilities operation and services and a loss in manufacturing. Placements by industrial divisions included: manufacturing, 1,574; services, 987; trade, 825; public utilities operation, 769; construction, 275; forestry and logging, 131, and mining, 118. Regular placements numbered 2,987 of men and 1,675 of women.

New Brunswick

Employment opportunities as indicated by orders received at Offices in New Brunswick during the period under review showed a daily average of 215 workers, in comparison with 274 in the previous five weeks and 204 during the period ending March 2, 1944. There was a daily average of 153 placements compared with 163 during the preceding five weeks and 140 in the period terminating March 2 last year. Public utilities operation was the only industrial group in which there was an important placement gain over the corresponding four weeks of 1944, but this improvement was partly offset by a fairly substantial decrease in forestry and logging. Of the changes in all other groups, the gains exceeded the losses. Industrial divisions in which most of the placements were effected were: public utilities operation 1,017; manufacturing 868; services 592; trade 462; forestry and logging 317, and construction 312. There were 2,772 men and 889 women placed in regular employment.

Quebec

Orders listed at Employment Offices in the province of Quebec during the four weeks terminating March 1, called for a daily average of 2,376 workers, compared with 2,302 in the preceding period and 2,473 during the four weeks ending March 2 a year ago. Placements recorded a daily average of 1,433 during the period under review, in contrast with 1,390 in the previous five weeks and 1,553 during the corresponding period of 1944. The reduction in placements from the four weeks ending March 2 last year was mainly due to a fairly large loss in manufacturing, although declines much smaller in volume were registered in forestry and logging, public utilities operation, trade and construction. The only increases

reported were small gains in services, and finance and insurance. Placements by industries included: manufacturing 16,062; forestry and logging 6,269; services 4,791; trade 2,566; construction 1,998; public utilities operation 1,713 and mining 499. Regular placements numbered 22,085 of men and 12,146 of women.

Ontario

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Ontario during the period ending

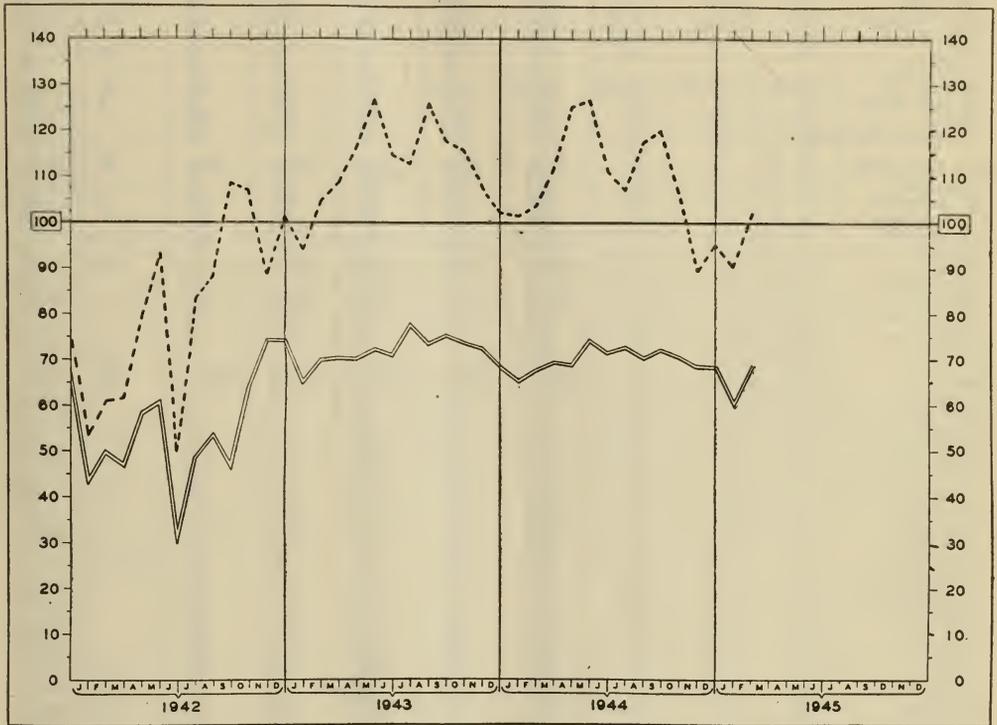

culture. Industrial divisions in which the largest number of placements were effected were: manufacturing 23,451; services 9,428; trade 5,938; public utilities operation 3,656; forestry and logging 2,838; construction 2,675; finance and insurance 953, and mining 686. Placements in regular employment numbered 29,028 of men and 19,888 of women.

Manitoba

There was a decrease in the average number of positions available daily at Employment

VACANCIES NOTIFIED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications——— Vacancies- - - - - Placements=====

March 1, 1945, was 3,024 as compared with 3,180 in the previous five weeks and 3,061 during the period terminating March 1 last year. The average number of placements registered daily was 2,075, in contrast with 2,230 in the preceding five weeks and 1,925 during the period ending March 2, 1944. Fairly large gains in services and construction together with smaller advances in trade, manufacturing, forestry and logging, public utilities operation, and finance and insurance were responsible for the increase in placements over the corresponding four weeks last year. Moderate decreases were noted in mining and agri-

Offices in Manitoba during the four weeks terminating March 1, there being 294 in comparison with 322 in the previous period and 311 during the four weeks ending March 2, 1944. Placements, likewise, decreased under both comparisons, the daily average being 210 during the period under review, as compared with 231 in the preceding five weeks and 225 during the period terminating March 2 last year. When comparing placements by industrial groups with the corresponding four weeks a year ago, a moderate decline in manufacturing and an increase in trade were the most important. Industries in which employ-

ment was found for more than 100 workers included: manufacturing 1,582; services 1,415; trade 1,061; public utilities operation 418; construction 219, and finance and insurance 112. Regular placements numbered 2,228 of men and 1,977 of women.

Saskatchewan

Opportunities for employment at Employment Offices in Saskatchewan during the period February 2 to March 1 numbered 159 daily compared with 172 in the preceding five weeks and 180 during the period ending March 2, last year. Placements showed a lower average during the four weeks under review, being 112 daily in contrast with 128 in the previous period and 122 during the four weeks terminating March 2 a year ago. The decrease in placements from the period ending March 2, 1944, was due to moderate declines in manufacturing, forestry and logging, and public utilities operation, as except for a slight loss in mining, all other groups showed improvement, the most significant being in trade. Placements by industrial divisions included: services 1,061; trade 827; manufacturing 322; public utilities operation 186 and construction 116. There were 1,117 men and 1,298 women placed in regular employment.

Alberta

Orders received at Employment Offices in Alberta during the four weeks under review, called for a daily average of 280 workers, in contrast with 331 during both the previous period and the four weeks ending March 2, 1944. Placements were fewer under both com-

parisons, the daily average being 202, as compared with 237 in the preceding five weeks and 226 during the period terminating March 2 a year ago. The only changes of importance in placements when compared with the four weeks ending March 2 last year were moderate losses in construction, services and manufacturing. Industrial divisions in which most of the placements were effected were: services 1,482; manufacturing 889; trade 847; public utilities operation 580; forestry and logging 350; mining 284 and construction 220. Placements in regular employment numbered 2,678 of men and 1,789 of women.

British Columbia

During the period ending March 1, 1945, the daily average of positions offered through Employment Offices in British Columbia was 810, in comparison with 919 in the preceding five weeks and 806 during the corresponding period of 1944. There was a daily average of 590 placements compared with 640 in the previous five weeks and 602 in the period terminating March 2 last year. Moderate declines in placements from the four weeks ending March 2, 1944, which took place in manufacturing, construction and mining, were partly offset by gains in all other groups, the largest being in services and public utilities operation. Industrial divisions in which the majority of placements were effected included: manufacturing 4,155; services 3,317; forestry and logging 2,218; trade 1,567; public utilities operation 1,368 and construction 1,007. Regular placements numbered 9,831 of men and 4,021 of women.

Strikes and Lockouts in Canada During March, 1945

STRIKE activity in Canada during March continued at about the same level as in the previous month. While the number of strikes increased by four, the number of workers involved and the time loss in man-working days showed little change. Preliminary figures show 21 strikes in existence during March, 1945, involving 4,670 workers and causing a time loss of 8,563 days, as compared with 17 strikes in February, with 4,988 workers involved and a time loss of 6,821 days. There were 14 strikes in February, 1944, involving 1,669 workers, with a time loss of 2,834 days.

Preliminary figures for the first three months of this year show 52 strikes, involving 15,037 workers and causing a time loss of 47,526 man-

working days, as compared with 55 strikes, with 18,489 workers involved and a time loss of 66,380 days, for the same period last year.

One strike, involving 30 workers, was carried over from February and 20 commenced during March. Of these 21 strikes, all of which were terminated during the month, three resulted in favour of the workers, eight in favour of the employers and 10 were indefinite in result, work being resumed pending final settlement.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA, JANUARY-MARCH, 1944-1945

* Preliminary.

† Strikes un-terminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1945*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to March, 1945				
MANUFACTURING— Metal Products— Freight car factory workers, Trenton, N.S.	1	(a) 30	30	Commenced February 26; against removal of two men from the steel erection gang; terminated March 1; conciliation, federal; in favour of employer.
Strikes and Lockouts Commencing During March, 1945				
MINING— Coal miners, Drumheller, Alta.	1	140	420	Commenced March 7; against suspension of driver for allowing horse to run loose in mine; terminated March 9; negotiations; in favour of workers.
Coal miners, Stellarton, N.S.	3	1,076	2,100	Commenced March 8; refusal of one miner to pay union dues; terminated March 10; conciliation, federal; in favour of workers, miner joined union.
Coal miners, Drumheller, Alta.	1	107	107	Commenced March 9; against deductions from pay of five drivers for quitting work before end of shift; terminated March 9; return of workers; in favour of employer.
Asbestos miners, Asbestos, P.Q.	1	(b) 18	12	Commenced March 21; for increased wages; terminated March 22; return of workers and replacement; in favour of employer.
Coal miners, Cumberland, B.C.	1	128	128	Commenced March 29; refusal to issue lamps to miners who habitually reported late for work; terminated March 29; return of workers; in favour of employer.
Coal miners, Springhill, N.S.	1	1,700	850	Commenced March 30; alleged discrimination in transfer of a miner to job of washhouse manager; terminated March 30; conciliation, federal, and return of workers pending settlement; indefinite.
MANUFACTURING— Textiles, Clothing, etc.— Textile factory workers, Carleton Place, Ont.	1	245	850	Commenced March 19; to compel two female workers to join union; terminated March 22; conciliation, provincial, and return of workers pending settlement; in favour of employer.
Miscellaneous Wood Products— Crate factory workers, Toronto, Ont.	1	19	40	Commenced March 8; for increased wages; terminated March 10; conciliation, provincial, and return of workers pending joint application to RWLB‡; indefinite.
Metal Products— Steel mill workers, crane- men, Sault Ste. Marie, Ont.	1	(c) 27	81	Commenced March 2; to maintain differential in wages over increased rates for common labourers; terminated March 4; return of workers pending decision of NWLB‡; indefinite.
Foundry workers, Selkirk, Man.	1	50	75	Commenced March 5; for dismissal of a worker alleged to be organizing for another union during working hours; terminated March 6; conciliation, provincial, and return of workers pending settlement; indefinite.
Foundry workers, Moncton, N.B.	1	72	400	Commenced March 7; because casting inspector was given special jobs to make odd castings; terminated March 13; conciliation, federal; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING MARCH, 1945*—*Concluded*

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the March, 1945, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter included a table summarizing the principle statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to war conditions. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in January, 1945, was 170 and three were still in progress from the previous month, making a total of 173 during the month, in which 31,900 workers were involved and a time loss of 104,000 working days was caused.

Of the 170 work stoppages commencing in January, 18 arose out of demands for advances in wages, 11 out of proposed reductions in wages, 33 over other wage questions, six on questions as to working hours, 20 on questions respecting the employment of particular classes or persons, 71 over questions respecting working arrangements, five over questions of trade union principle and six were in support of workers involved in other disputes.

British India

Preliminary figures for September, 1944, show 42 strikes, involving 46,524 workers and causing a time loss of 89,789 man-days.

United States

Preliminary figures for February, 1945, show 310 strikes beginning in the month, in which 109,000 workers were involved. The time loss for all strikes in progress during the month was 412,000 working days. Corresponding figures for January, 1945, are 240 strikes, involving 44,000 workers, with a time loss of 228,000 working days.

Lost Time in Industry

AN analysis of various causes of time loss in Canadian industry has been prepared by the United Steelworkers of America under the title *Lost Time in Industry*¹.

The report compares illness, accidents and strikes and lockouts as causes of lost time. Figures used as a basis for calculation were taken from the *LABOUR GAZETTE* and reports of provincial Workmen's Compensation Boards, in the case of strikes and lockouts and accidents; while in the case of illness, no exact statistics being available, an estimate was used of eleven days lost annually by the average female and eight days by males.

On this basis, the report gives the following totals for the four-year period 1940-1943:

Days lost, accidents.....	17,498,722
Days lost, illness.....	140,569,000
Total, accidents and illness....	158,067,722
Days lost, strikes and lockouts..	2,170,061

An average of 9.7 days per worker was lost each year for accidents and illness; while only .13 days per worker were lost as a result of strikes and lockouts.

Taking an average work year as 300 work days, and total employment in Canada as

averaging slightly over 4,000,000 a year, the report indicates that only .04 per cent of the total time that could possibly have been worked was lost as a result of strikes and lockouts in the four-year period. On the same basis, time loss caused by illness and accidents was 3.2 per cent of total possible working time, or eighty times greater.

The report suggests that much of the wastage resulting from illness and accidents could be eliminated. It recommends:

(1) avoidance of abnormally long working hours, which lead to fatigue and hence accidents;

(2) installation of safety devices wherever necessary;

(3) precautionary safety rules; safety committees, and regular safety discussions in every plant;

(4) medical care in every plant, in accordance with a national health plan;

(5) a national plan of social insurance, superseding present workmen's compensation systems;

(6) periodical medical examinations, to catch diseases in their early stages.

¹ *Lost Time in Industry*: United Steelworkers of America, 1207 Bay St., Toronto.

Labour and Industry in Saskatchewan

First Annual Report of Department of Labour

NOTABLE administrative changes were made in the application of labour legislation in Saskatchewan in 1944. In February, the Bureau of Labour and Industries, which was organized in 1920, was brought under the Department of Reconstruction, Labour and Public Welfare. Eight months later, at the special session of the Legislature in October, a new Department was created, the Department of Labour.

The first Annual Report of the Department covering the calendar year, 1944, draws attention to the amending legislation and sets forth serially, the Acts that the new Department will administer as follows: (a) The Annual Holiday Act, 1944; (b) The Apprenticeship Act, 1944; (c) The Building Trades Protection Act; (d) The Employment Agencies Act; (e) The Factories Act; (f) The Female Employment Act; (g) The Industrial Standards Act; (h) The Masters and Servants Act; (i) The Minimum Wage Act; (j) The One Day's Rest in Seven Act; (k) The Steam Boilers Act; (l) The Theatres and Cinematographs Act; (m) The Trade Schools Regulation Act; (n) The Trade Union Act, 1944; (o) The Weekly Half-holiday Act; (p) The Workmen's Wage Act; (q) such other Acts as may be designated by the Lieutenant Governor in Council.

Factories Act:—Factory employers in the province are required under the Act to report to a Labour Department inspector the names of all persons injured or killed by fire, accident or explosion in their plants. During 1944, there were 711 accidents reported, of which nine were fatal.

With respect to the employment of youths, girls or women, the Act restricts the working time to 48 hours in one week and stipulates that special permits in writing must be obtained by employers from an inspector of the Department, if overtime or night work is required of such workers. Under another provision of the Act an exemption may be issued permitting the employment of youths, girls and women for more than 48 hours, but not in excess of seventy-two and a half hours in the week. No employer may receive such an exemption for more than 36 days in any one year. During 1944, there were 34 special permits, 26 exemptions, and 78 part-time permits issued.

Minimum Wages:—Public meetings of employers and workers were held by the Minimum Wage Board late in the year with a view to the revision, extension, and consolidation of the Orders of the Board. The consolidated and new orders set forth in detail the maximum hours of work and the minimum rates of pay for regular, part-time, and overtime workers in industrial and servicing employment in cities and certain other specified communities in the province. Inspectors under the Minimum Wage Act made 1,815 special investigations during the year and wage sheet returns were completed by 2,682 employers covering 14,397 male and 10,681 female employees. This was a decrease of 450 firms, but an increase of 489 persons employed, as compared with the previous year. A total of 22,587 were employed full time and 2,491 on a part time basis. During the calendar year, 1944, arrears of wages to the amount of \$2,311.45 were collected from 97 firms and were apportioned among a total of 186 employees. Four charges were laid for infractions of the Minimum Wage Act and convictions obtained.

Trade Schools Regulation Act:—It is estimated that 1,575 students took instruction from the 30 Trade schools registered under the Act in 1944. The courses covered included, business and commercial subjects, acetylene and electric welding, auto mechanics, stationary engineering, wireless telegraphy and radio servicing, electrical technology, sewing and dressmaking, story writing, beauty culture, etc.

*Freedom of Union Association Act:**—Under the Act, trade unions in the province are required to file with the Minister, copies of their constitutions and by-laws, with amendments thereto, the number of their members and the names and addresses of their officers. In 1943, 127 associations having a membership of 9,584, complied with the regulations. The corresponding figures for 1942 were 109 associations with a membership of 11,049.

Strikes:—There was only one strike in Saskatchewan in 1944. The dispute, which involved 48 men and a loss of 24 man working days was referred to the Regional War Labour Board.

* Since repealed by the Trade Union Act, 1944.

Prices

Prices, Retail and Wholesale, in Canada, March, 1945

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

An advance of 0.1 to 118.7 (1935-39=100) was recorded by the Dominion Bureau of Statistics cost-of-living index between February 1 and March 1, 1945, marking a wartime increase of 17.8 p.c. Strength in foods which rose 0.4 to 131.0 in the same interval was mainly responsible for the increase and reflected firmer quotations for fresh vegetables and some meats. Small recessions were noted for eggs, lemons and oranges. Homefurnishings and services gained 0.1 to 118.5 due to an increase in the hardware section while the fuel and lighting series moved down 0.1 to 107.3 following further reductions in electricity costs. These more than offset scattered increases for coal and coke. Other groups continued unchanged rentals at 112.0, clothing at 121.7, and miscellaneous items at 109.2.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for

bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home-

† Commodities in the cost-of-living index excluding rents and services.

furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, homefurnishings, etc., with their weights, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the

period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Price Control in Canada*.

Wholesale Prices February, 1945

The Dominion Bureau of Statistics composite index of wholesale prices advanced 0.1 to 102.9 (1926=100) between January and February, 1945. Three of the eight principal groups were higher while five remained unchanged. Animal products recorded a gain of 0.2 to 106.9 reflecting firmer quotations for whitefish, calves, lambs and eggs, which outweighed price reductions for furs, steers and hogs. A gain of 0.1 to 95.8 in the vegetable products group was due to upturns in potatoes,

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

onions, hay, rye and coffee beans, while oranges and lemons were lower. Strength in steel plate in the rolling mill products section was responsible for an advance of 0.1 to 117.2 for iron and steel products. Index levels for other groups remained unchanged as follows: 91.7 for fibres, textiles and textile products; 118.3 for wood, wood products and paper; 79.7 for non-ferrous metals, 102.7 for non-

metallic minerals and 100.1 for chemicals and allied products.

Canadian farm products moved up 0.2 to 104.6 between January and February. Strength in field products was responsible, an increase of 0.3 to 93.8 in this group reflecting higher prices for potatoes, onions, hay and rye. Animal products were unchanged at 122.7, lower prices for steers and hogs offsetting upturns in eggs, calves and lambs.

Activities of the Wartime Prices and Trade Board During 1944

Success of Stabilization Program—Civilian Supply, Distribution, Rent Control

THE problems of the civilian economy in the sixth year of war and in the fourth year of overall price control are discussed in the recent Annual Report of the Wartime Prices and Trade Board.¹ This, the third of the Board's Reports to Parliament, covers the calendar year 1944 and deals with price control, civilian supply, problems of distribution, rentals and shelter, and related topics.

One of the most striking features of the Report is prosaically entitled "Appendix L". It consists of a series of charts, making a graphic summary of the record of the stabilization program in this war. The charts show how prices soared and collapsed during and after the last war and in earlier wars. They then show that war expenditures have been much greater in the present conflict and that these enormous outlays have greatly enlarged purchasing power so that inflationary pressures have been stronger than in the last war. Finally, they demonstrate that despite these pressures prices in this war have risen far less than in the last war and that the wartime rise of living costs in Canada (17.6 per cent) has been less than in most other countries (see chart on cover of this issue). For a full year the price level has been practically stabilized.

At the same time these charts point to the dangers that still lie ahead. It is clearly shown that the inflation which started in 1914 reached its peak in 1920, well after the end of the last war, and was then followed by a sharp deflation—more disruptive in many of its consequences than the inflation had been. This was true not only in Canada, but also in the United States, the United Kingdom and other countries. The appendix thus emphasizes the need for continued vigilance and determined support of stabilization measures, if the already difficult transition from war to peace is not to be disorganized by inflation with its inevitable aftermath of deflation.

Stabilization and Employment After the War

This point is also emphasized in the introductory chapter of the Report, which reviews the main developments in the civilian economy during 1944 and looks ahead to the prob-

lems of the reconversion period. The reader is reminded that "the favourable war news and the gradual contraction in war production last summer and fall focussed attention on reconversion and led to a natural but premature relaxation in the active public and business support which had sustained the stabilization program". This continued support is particularly important in view of the problem of maintaining employment after the war. "To keep up employment in the postwar, the volume of production and sales of civilian goods must be greatly enlarged. To assure a large and continuing volume of civilian production in turn means that prices must be kept at reasonable levels". "The Board will make every effort to finish its job—to help achieve what has never been achieved before and is in the interests of every group in the community—i.e. to get through the war and its immediate aftermath without a major inflation. To do so, the prime requirement is a continuance of the high degree of public support which the anti-inflation program has thus far received."

Pressure on Price Ceiling

Though the official cost of living index ceased rising during the year and was, in fact, a shade lower at the close of 1944 than at its beginning, rising costs continued to press against the price ceiling. Since the beginning of the war, rising costs in civilian industries have resulted from the diversion of materials, plant and manpower to war activities. This process is described in the first chapter. "Civilian activities are restricted and civilian industry inevitably takes second choice of the available manpower, materials and machinery. Less efficient workers are hired, inexperienced workers have to be trained, substitute materials have to be used, bottlenecks in supplies develop and deliveries become less reliable, and machinery has to be made to do. Labour turnover rises abnormally. Labour costs, therefore, tend to rise, even if wage rates do not increase, as, in fact, they have to a considerable degree. Working in the opposite direction are the high volume of production induced by war orders and by the ready civilian market, the rapid turnover of output and reduced selling expenses. These latter factors have generally made it feasible to maintain ceiling prices."

¹Report of the Wartime Prices and Trade Board, January 1, 1944 to December 31, 1944, Ottawa, King's Printer, pp. 76.

The report traces the changing pattern of these pressures during the past year. "War demands for manpower levelled off with the result that there was some abatement in the upward trend of labour costs. But at the same time the influences which had formerly worked to reduce costs were much less operative. The total output of the country was, for practical purposes, running at its peak, and the additional economies to be gained through increased volume and more rapid turnover were comparatively small or lacking..... a number of producers, looking towards reconversion, requested increased prices on the grounds that declining war contracts were tending to increase their costs".

In addition to rising costs, the continuing shortage of supplies and increasing spending by consumers provided further pressures on ceiling prices.

In the face of these pressures the Board held to its general policy of setting prices in line with the 1941 level. As mentioned above, the report emphasizes the importance, as well as the difficulty, of maintaining stable prices in the period of reconversion. The second chapter discusses the application of this policy and emphasizes two problems that have become increasingly important in 1944. The first is the problem of pricing goods that were not on the market in the "basic period" in 1941, and the second is the problem of maintaining the quality of goods in accordance with the price-quality relationship of 1941.

Pricing of New Goods

The pricing of "new goods" (as goods for which no maximum price is established as called in the Report) has become a major problem for three reasons: In the first place, "more than three years have elapsed since the basic period and during that time there have naturally been a variety of changes in design and technique." Secondly, there has been a large number of new entrants into business, and finally, a number of restrictions on the manufacture of various goods have been relaxed and the ban against a variety of imports from the United States (originally imposed to conserve foreign exchange) has been removed.

The procedure for fixing maximum prices for "new" goods is described in detail in the second chapter. The main point is that goods are appraised by experts "with the definite purpose of arriving at a price appropriate to the basic period price level for comparable or related goods. Where practicable, actual samples are inspected by an administrator or by a committee made up of experts in the field. Where samples cannot be obtained this

appraisal is based upon detailed descriptions or specifications. Current costs are not the basis for determining ceilings".

Quality Control

The maintenance of quality and serviceability in relation to price is a necessary part of a fully effective system of price ceiling control. The report points out that to a substantial degree this function is performed by the pricing procedure just described, which takes price-quality relationships into account in pricing new and modified goods. In addition a Standards Division was set up at the beginning of 1943 to work specifically on the problem of quality control. This division, with its staff of inspectors, has worked mainly in the apparel field and has conducted investigations at the factory level to see that manufacturers are maintaining the quality, with respect to materials and workmanship, of their products. Consumer complaints and information given by retailers often lead to investigation of an entire field, beginning with the manufacturing plants and extending through to selected distributors. To make this work possible the Prices Board has required that garments should be marked with the manufacturers' name, licence number, or registered trade mark and with the style number provided by the administrator pricing the article. This enables investigators to trace the article questioned at the retail level back to the manufacturer and his price authorization.

The chapter on price policy also outlines the Board's policy in dealing with applications for "relief" from the squeeze of rising costs under established ceilings. It discusses a number of other problems, such as the pricing of goods sold by the War Assets Corporation and the protection of domestic supplies in the face of higher prices in export markets.

Civilian Supplies

The main forces affecting civilian supplies in 1944 are outlined in the third chapter. War production as a whole ceased to expand, and there was a slight improvement in the volume of goods and services available for the civilian economy. The various abrupt changes in particular war programs had their repercussions in civilian production—an easing here and a tightening there. At the end of the year, new war programs halted the very modest expansion in the output of some civilian metal articles.

Labour shortages were the chief bottleneck in civilian production. "While the overall supply of labour available to the civilian

economy was somewhat greater than in the previous year, the movement of skilled labour to war plants and of strong male labour to the armed forces resulted in serious shortages of *suitable* labour in many civilian industries. Moreover, the frequency of unpredictable changes in military requirements placed an added strain on the machinery of manpower allocation and labour momentarily not engaged on war production could not always be allocated to the most urgently required civilian production as readily as might have been possible under more stable conditions."

The public's buying power is also emphasized as affecting the civilian supply picture; "Consumer spending increased as a result of increased purchasing power, of accumulating deferred needs, and of the widespread impression last summer and fall that the war was almost over. This increased consumer demand resulted in a further depletion of inventories of some goods and led to shortages."

Dealing with the various commodity groups the report indicates that food supplies were more plentiful than in 1943, because of the good weather and unusual production efforts. Various textile articles were in short supply owing to increased demand, decreasing labour efficiency and the difficulty of procuring adequate supplies from abroad. Building supplies, hardware and household appliances were produced in somewhat larger volume, but most of these articles, particularly building supplies, were still very scarce in relation to the greatly increased requirements.

Supplies Remain Limited

No general or widespread improvement in civilian supplies is to be expected in 1945, according to the Report, and in some important lines the position is likely to deteriorate. The effect of the new war contracts at the end of 1944 has already been mentioned, and there is the possibility that the output of civilian metal goods will be further restricted. Food requirements of our Allies remain at the extraordinary levels of 1944 and there will be additional relief needs. The production of meat will be considerably smaller than in 1944 and the output of other agricultural products is restricted by the shortage of manpower and is subject to the usual risks of weather. In the sphere of textiles "there is no immediate prospect of any widespread improvement in civilian supply: in some directions the outlook is for further restriction." No sudden improvement in these supplies should be expected with victory in Europe, since "requirements both for war and relief purposes will remain

large and European production will take time to recover."

Responsibility of Prices Board

Consumers will be particularly interested in the section of the Report discussing the Board's responsibility in the sphere of supply and distribution: "The Board's responsibility is limited to assuring sufficient supplies to provide for the *essential needs* of the civilian population. It is true that these essential needs cannot be expressed in exact amounts, because there are a variety of ways in which they can be met—e.g. people can do with less pork if there is sufficient beef and they can get along with fewer rayon stockings if cotton stockings are available—and because the amount of production required depends in part on the way in which it is distributed—e.g. if a strict rationing system is in force less production might be required than if the product concerned were freely distributed. But, though the borderline of the Board's responsibility cannot be clearly defined, it does not extend to seeing that people get exactly what they want or all they want. The Board has no mandate to plan all civilian production, or to devise schemes for apportioning supplies which are not genuinely needed." It follows from this that "it is not the Board's responsibility to say what shall *not* be produced, unless it is clear that the production of non-essentials is preventing the output of a sufficient supply of essentials. With the existing structure of controls over materials and labour this need seldom be the case."

The Board's work in the sphere of supply has, therefore, for the most part taken the form of positive actions to facilitate needed production, such as the allocation of materials, the procurement of materials from abroad, applications to National Selective Service for labour assistance and, in a number of cases, specific direction of production. These activities are described in detail in the chapter on "Supply" and in the various commodity chapters, particularly those on "Metal Consumer Goods" and "Textiles and Footwear". Of special interest is the system of "production directives" in the textiles industry and for children's shoes. "They consist of directives to individual manufacturers to produce a specific amount of the article concerned on the understanding that the necessary materials will be made available and that, if required, assistance in obtaining labour will be requested from National Selective Service. They are the most direct and effective way of assuring needed production." This system has been applied to such garments as knitted under-

wear of all kinds, children's fall and winter garments, socks and stockings, worsted suitings, and others. It will be extended further in 1945.

Rationing

Chapter four of the Report discusses the Board's controls in the field of distribution. The chapter summarizes the various changes in the food rations, resulting from the changing supply picture. The most important of these were the suspension of meat rationing on March 1, 1944, and of tea and coffee rationing on September 19. It is emphasized, however, that "rationing (of meat) was merely suspended and would be resumed as soon as it was needed to maintain the necessary flow of meat to cover urgent and essential overseas requirements." Reductions in the butter ration were necessitated by the increased requirements of fluid milk for domestic consumption and cheese for overseas. This section also includes an explanation of the reasons for the present form of the preserves ration.

In this chapter there is a discussion of the question of rayon hosiery, which was widely debated last fall, and the reasons why the Prices Board did not ration this article are set out. It was hoped that the shortage would only be temporary and "genuine discomfort was seldom involved, because of the continued availability of a moderate supply of other types of hosiery, even though these were frequently regarded as less desirable by consumers. Reluctance to ration hosiery further reflected the fact that equal sharing of hosiery supplies by the women of Canada would not result in fair distribution, since needs vary considerably as between town and country and between housewives and one type of worker and another."

The various commodity chapters (Foods, Farm Equipment, Textiles and Footwear, Pulp and Paper, etc.) are of interest, both for the information they contain on the different industries, and as illustrations of the problems of supply and pricing in particular concrete situations. The operation of the complex international machinery which allocates supplies between the Allies is illustrated in the chapter on Textiles, where Canada is chiefly a recipient, and in the chapter on Pulp and Paper, where Canada appears in the role of chief supplier. Some of the problems involved in fixing prices at the different levels of trade—e.g. grower, wholesaler, retailer—are discussed in the chapter on foods, while the problems arising from increasing raw material costs are illustrated in the section on Woodenware in the Lumber chapter. The section on

farm machinery in Chapter six provides an example of programming at the international level.

Emergency Shelter Regulations

The chapter on "Rentals and Shelter" is of special interest to those living in the larger cities, in which the housing problem has become increasingly acute. By the end of the year conditions in certain areas had developed to such a point that the government decided to give the Prices Board broad powers to co-ordinate "all activities relating to the transfer of population into such areas and to control the use of available shelter therein." These powers were to be applied only with the expressed approval of the municipality concerned. Early in 1945 Emergency Shelter Administrators were appointed for Ottawa, Toronto, Vancouver, Victoria, Hamilton, and Hull, but in Montreal the local authorities decided not to take part in the scheme. The report states that one of the principal duties of an administrator is "to co-ordinate the activities of all organizations at present concerned with the housing problem with a view to promoting the utilization of available dwelling space to the best advantage". The existing Housing Registries have been placed under the jurisdiction of the Emergency Shelter Administrators.

The increasing demand for dwelling space has also necessitated a tightening of the regulations protecting tenants against arbitrary eviction. To check illegal increases in room rentals the protection against eviction enjoyed by tenants of houses and apartments was extended to roomers other than boarders. The Prices Board also issued an order designed to prevent a number of abuses such as the practices of requiring prospective tenants to purchase the furniture at unreasonable prices, to pay special commissions or to pay several months' rent in advance.

Black Markets

Chapter 15 dealing with "Enforcement" describes the problem of dealing with black markets, which existed on a wider scale than in 1943. Particular attention was given to the trade in used motor vehicles at illegal prices, and to the illegal sales of rationed foods to industrial users and quota users. The difficulty of obtaining sufficient evidence on such transactions is very great and the Board's Enforcement Administration was handicapped by the shortage of staff. Nevertheless, with the co-operation of the R.C.M.P. and Provincial Police, a measure of success was

achieved. It is again stressed that "success or failure of wartime economic controls depends in large measure on the extent to which they are accepted by the public".

The chapter on "Board Organization" gives the reader an idea of why the Prices Board requires a staff of about 5,000 employees. The work of the Head Office in Ottawa and of the Administrations (dealing with different industries) is briefly outlined, and the work of the Board's Regional and Local Offices is described in some detail. The chapter ends with an indication that the loss of experienced

key personnel is a serious problem for the Board.

The last chapter describes the movements of retail and wholesale prices during the year and since the beginning of the war. These movements are illustrated by a number of interesting charts in the text, besides the charts in Appendix L, discussed above. Other appendices show the amounts of subsidy paid out, administrative expenses, index numbers of wholesale and retail prices and other information relating to the operations of the Board.

Wartime-Price Control in New Zealand

IT is pointed out in the New Zealand Official Year Book, 1944, that increased regulations of prices by governmental control has been a feature of New Zealand's economic policy during and since the First World War. Various modifications were made in control-of-prices legislation and regulations from time to time during the twenty years following 1919. The Year Book gives a brief summary of these developments before proceeding to trace the progress of such controls from 1939 to 1943.

Pursuant to a Proclamation of Emergency under the Public Safety Conservation Act, "regulations were made on September 1, 1939, with the object of stabilizing prices." These regulations provided that "prices of goods and services should not be raised above the prices ruling at September 1, 1939, except as might be specifically authorized by the Minister of Industries and Commerce." A clause in the regulations also prohibited the hoarding of goods. The regulations were superseded by the Control of Prices Emergency Regulations of December 29, 1939, which were designed to strengthen the administration of wartime prices control. The Price Investigation Tribunal was empowered "to investigate complaints with respect to prices charged for goods or services, to issue orders fixing the maximum or minimum wholesale or retail price at which any particular goods may be sold and to take any steps which, in its opinion, may be necessary to prevent profiteering or the exploitation of the public."

Exportable Surplus to Great Britain

Arrangements for the purchase, at agreed prices, of New Zealand's exportable surplus of meat, wool, dairy produce, scheelite, woolly sheepskins, tallow and linen flax fibre were made with the British government shortly after the outbreak of war. These prices are subject to review at specified periods on the request of either government. Economic Stabilization

Conferences held in the early war years made numerous recommendations with respect to price stabilization of a varied range of essential items of household consumption, including furniture, clothing, hardware, stationery, etc. Provision was also made for the stabilization of weekly rentals and of wage rates, etc.

Function of Arbitration Court

The Rates of Wages Emergency Regulations, issued in May, 1940, provided that the Arbitration Court from time to time, on the application of any industrial union or association of employers or workers might amend by general order the provisions of all awards and industrial agreements in force in so far as they determined rates of remuneration. No such amendment was to be made at less than six-monthly intervals. In making a general order the Court was required to take into consideration (a) the economic and financial conditions affecting trade and industry in New Zealand; (b) the cost of living; (c) any rise or fall in the cost of living since a previous order was made; (d) all other relevant considerations. With certain reservations respecting the payment of wages to young people and women, rates of payment in all awards were increased by five per cent in August, 1940, and by a further five per cent in April, 1942.

The principal new features of price control in 1943 are stated to be the fixation of maximum retail prices for many kinds of vegetables, apples, pears and certain other fruits; these maxima made full allowance for seasonal variations. It is pointed out that retail-price quotations, from which index numbers are regularly calculated, are collected each month in 25 centres, distributed over both islands of the Dominion and are representative of both coastal and inland districts and of both large and small centres. The commodities for which

monthly index numbers are compiled are food-stuffs, and fuel and lighting; foodstuffs being divided into groceries, dairy produce and meat. Statistics of house rents have been collected at six-monthly intervals ever since the inauguration of price statistics in 1914. Later, the inquiry was extended to cover clothing and miscellaneous items, figures for which are collected at quarterly intervals. The miscellaneous items include some 95 articles, such as household furnishings, ironmongery, brushware, crockery, reading matter, cleaning materials, tobacco, postage, transport and personal services.

Provision is made for the quarterly computation and gazetting of a special wartime price index on the base, December 15, 1942 (=1000).

The following table shows the annual average index numbers for retail prices of the three food groups combined, house-rents and fuel and light for the years 1932 to 1942 inclusive:

Year	DOMINION WEIGHTED AVERAGE		
	Food Groups	House Rents	Fuel and Light
1932	775	844	958
1933	732	766	890
1934	774	758	841
1935	835	774	865
1936	870	804	887
1937	956	828	924
1938	991	858	964
1939	1,052	887	991
1940	1,076	916	1,005
1941	1,104	945	1,012
1942	1,127	963	1,021

The quarterly wartime price index as gazetted by the Dominion Statistician is used as the basis for the fixation of wage rates.

On the base December 1942 = 1000, the wartime price index at March 15, 1943, was 1011; at June 15, 1943, 1000; at September 15, 1943, 996; at December 15, 1943, 1001; at March 15, 1944, 1005; and at June 15, 1944, 1001.

Factory Inspection in Great Britain in 1943

Plans for Communal Factory Buildings—Enforcement—Accidents—Health—Personnel Supervision

THE Chief Inspector of Factories in Great Britain in his annual report for 1943 describes the year as

a period of stabilization and detailed adjustment of our available man-power to meet the changes necessary for the requirements of the fighting forces and other wartime exigencies . . . in particular . . . a further transfer of women to the more dangerous munition industries, with a slight increase in the number of accidents to women.

The total number of accidents, however, shows a slight fall, in spite of the increased proportion of quite young and elderly workers in industry.

Two developments appear to the Chief Inspector likely to have important effects on working conditions after the war. First, many workers

have had experience of conditions in the newer factories and will not readily accept a return to the congested work-rooms and poor standards of amenities which have been common in many of the older industries.

Second, plans are being considered for the construction on bombed sites or elsewhere of "communal factory buildings":

The idea is to build blocks of well-designed rooms of convenient sizes with good facilities for heating, ventilation, lighting, cleaning, maintenance, etc., that can be let out to the smaller type of factory occupier who in the past has often been driven by economic necessity into old and dilapidated domestic property quite unsuitable for factory pur-

poses. In these blocks a communal canteen can be placed on the top floor (and why not a roof garden) and other amenities, such as sanitary and washing facilities, whether or not specifically allocated in groups for use by the workers in particular factories, can be up to modern standards. The occupiers also can have the advantages of modern layout, power, hoist and other labour-saving machinery and the like that make for economic production.

On both these matters discussions are proceeding between the Factory Department and employers and workers.

Enforcement

The Chief Inspector reports that "increased support is being received from the courts in spite of the reiterated defence that there is a war on". The average penalty on conviction has increased since 1938 by nearly three times, partly accounted for by the increased penalties allowed under the Factories Act, 1937. The following table shows the nature and result of the prosecutions for 1938 and 1941-43.

Accidents

As regards accidents, it is reported that for the first time since 1938 there has been a decrease in the total number, and the decrease in the number of fatal accidents begun last year has been maintained. A reduction in the number of accidents due to power-driven

¹Includes 240 charges withdrawn on conviction on an alternative charge.

machinery and to the falls of persons—both likely causes of serious injuries—“points to a real advance in accident prevention apart from other causes”.

Reasons for the decline in accidents are found in the more stabilized labour force with experience in factory work and in the tendency towards a shorter working week with the consequent reduction in the time during which persons are exposed to risk, lessened fatigue and less inclination to “chance it” an inclination common during the hours of overtime or towards the end of a long working day.

The Chief Inspector believes there are three stages in preventing accidents:

(1) Find out your facts—*where* do accidents happen? (To answer this requires proper statistics.) *How* do they happen? (this means careful investigation);

(2) make sure that processes and equipment are as safe as they possibly can be;

(3) educate the worker, and especially the newcomer, in proper methods. The value of the third stage depends completely on the adequacy of the other two.

Hours of Work

Hours of employment showed in 1943 a general reduction, “a settling down to round about a 50 to 52 hour week in the case of women and young persons between 16 and 18”. Of the number of factories granted permission to employ women and young persons over 16 for more than 48 hours in the week, 77 per cent were for 55 hours or less, as compared with 70 per cent in 1942,

and 30 per cent were for 52 hours or less. Young persons under 16 cannot be employed more than 48 hours.

Industrial Health

The expansion of medical supervision and nursing and welfare services in factories which followed the Factories (Medical and Welfare Services) Order, 1940 has furnished experienced medical, welfare and safety officers for day-to-day work in the factories, for serving on health and safety committees and giving courses of instruction on particular aspects of industrial health. But an acute scarcity persists of men and women with adequate professional and technical qualifications who are also proficient in the science and practical aspects of industrial health.

It can hardly be denied that the anticipation, assessment and prevention of an occupational risk to health, be it mainly of a medical, engineering, chemical or physical nature is an applied science which has not yet been accorded facilities for study and research commensurate with the national needs.

As a contribution to the general effort towards industrial welfare, the report urges that the technical schools, in drawing up their new plans under the Education Act, 1944, should “make provision for instilling in every student the elementary principles of industrial health and personal safety”.

New measures taken to make the factory inspectorate more effective in this field have been the appointment of advisory committees. An Industrial Health Advisory Committee to advise on technical and scientific questions was set up in April, 1943, when a Conference

on the subject was held. In addition to the Advisory Panel on Dermatitis in Industry which was formed in 1942, the Minister approved the creation of two similar panels to deal with Ophthalmological and Radiological matters, respectively, in relation to industrial health. There is also an Industrial Dust Hazard Panel. These panels have some members in common and are linked too, with the Medical Advisory Committee of the Ministry of Health, the Medical Research Council and the Industrial Health Research Board as well as with other important medical, scientific, and employers' and workers' organizations and academic bodies.

A special service noted in the report is the medical supervision in dock areas which is actively supported by the employers and unions. Services came into active operation in 1943 in the Manchester, Liverpool and Clydeside areas.

Personnel Management and Welfare Supervision

Under the 1940 Order referred to above, the Chief Inspector may direct employers to appoint officers to supervise the welfare of persons employed in the factory. The Ministry has preferred to deal with the matter on a voluntary basis rather than by compulsion and inspectors have been diligent in persuading employers of the necessity and urgency of such an arrangement. Of the 4,774 factories which employ more than 250 persons and which are within the scope of the Order, 3,995 employ officers who might be called Personnel Managers or Welfare Supervisors.

Certain factors making it difficult to ensure satisfactory arrangements for good working relations between management and labour have been the shortage of trained and experienced personnel officers and the failure of many firms to recognize the importance of the job.

There are still factories in which the responsibility for matters particularly affecting the employees is divided into a number of watertight compartments and in which the "Welfare" Section functions quite independently of those sections concerned with the engagement, placing and dismissal of labour, with the health and safety of the employees, with the carrying out of the Factories Act and with the running of the canteens. . . . In about half of the factories, the head of the personnel department has not normally direct access to the Directorate but has, presumably, to present his plans and make his recommendations through someone else, generally the works manager.

The Ministry, in co-operation with the universities and the Institute of Labour Management arranged early in the war for special training courses at four Universities. Two months' lectures, with a month's practical work between, were given to about 800 carefully selected persons who are now employed in industry. More recently, part-time courses were arranged for those already employed as personnel officers. These courses and the conferences of the Institute of Labour Management and the Industrial Welfare Society, which personnel officers were free to attend, have been of great assistance but it is considered that they cannot compensate

for the lack of training of pre-war standard and the years of experience that help to make a first-class personnel manager.

Social Security in South Africa

A PLAN of social security has been brought forward by a Committee appointed to investigate the subject by the Government of the Union of South Africa.¹

The Committee advocates a scheme that would provide benefits:—

(a) to individuals not gainfully occupied because they are too young, too old, temporarily disabled, permanently disabled, or for other causes not due to their own volition;

(b) to individuals gainfully occupied but unable to maintain themselves and their dependents at levels to be determined;

(c) in certain circumstances to needy mothers with young children, as it is undesirable that they be gainfully occupied;

(d) in respect of injury or disease sustained in employment; and

(e) to assist in meeting the costs of births and funerals.

Two separate schemes are proposed, the first applying to Europeans, Coloureds, Asiatics, and such Natives as are permanently urbanized or are farm workers, or are employed in the Reserves and care to join, the second scheme applying to other Natives.

Benefits under Scheme A are to include old age pensions, invalidity pensions, unemployment benefit, training benefits, recovery benefits (for lepers, tuberculotics, or "semi-fit" persons), sickness benefit, maternity benefits and grants, widows' allowances, funeral grants, family allowances (in respect of the third, fourth and fifth child under 16 years), dependents' allowances, and others. Fewer benefits are available under Scheme B for Natives in Reserves, who, according to the Committee's report, "have shelter and can eke out an existence so that they do not

¹ *Social Services, their Scope and Cost*: Government Printer. Union of South Africa.

need the elaborate cash benefits indispensable for a civilized community." These Natives are to be eligible for old age pensions, invalidity (including blind) pensions, maternity benefits, recovery benefits, and dependents' allowances.

The basic rates of pensions, benefits, allowances and grants payable under the scheme are to vary according to whether the beneficiary is European, Coloured or Asiatic, or Native, and also according to whether he is resident in a city, town or rural area. The adequacy of payments is to be reviewed every three years.

Contributors to Scheme A will pay from $2\frac{1}{2}$ to 4 per cent of their income. Male Natives under Scheme B will pay 5 shillings a year. Contributions are expected to realize about £12,000,000 a year, out of a total estimated cost for the social security plan of £33,000,000.

The report emphasizes the "magnitude of the effort which the nation will have to make" in order to pay for social security services, and stresses that "the extent to which social measures can be introduced is related to, and limited by, the nation's total earnings." On this point the report states that the Union's national income is low in comparison with many other countries.

The Committee therefore advocates that "while it is important to provide for persons in need of the benefits of the social security scheme, it is imperative that concurrently a direct attack should be made, by constructive measures, against the massive poverty in the Union which has its roots in the inadequate output and earnings of the bulk of the people gainfully occupied."

The White Paper points to the need for a major educational advance in order to combat this condition. It recommends raising

the school-leaving age for the country's European children to 17, and increasing the amount of free education received by non-European children to 10 years. Improved trade training is also suggested.

The Paper further advocates remedial action against malnutrition through a program of food subsidization, including free milk to mothers and subsidies on other farm products. Other recommendations include a health service for all, housing measures, institutional facilities for the handicapped, and amenities for healthy living and recreation.

The Paper points out, however, that the social security scheme and the various other social services will not in themselves eliminate poverty, but that "a simultaneous increase in the output and earnings of the low-income groups must be effected."

In order to raise the national income the Paper indicates that State policy should be directed towards lengthening the life of the gold industry, improving the progress and efficiency of industry generally, raising labour capacity through education and training and better living standards, assuring full employment "by following a suitable monetary policy and by planning public works," and other measures.

"Full implementation of the social program will not prove financially practicable until the average income level has been raised by approximately 50 per cent," the Paper states, but "this does not prelude an effective start being made." In introducing the scheme by degrees it is recommended that the Government "afford priority to those sections of the community whose need is greatest and in respect of those benefits which will most promote the well-being and productivity of the nation as a whole."

Library of the Department of Labour

Select List of References on Job Analysis and Labour Management Production Committees

THIS is the fourth of a series of bibliographies on labour and related problems compiled by the Library for publication in the *LABOUR GAZETTE*. It consists of a select list of references on job analysis and labour management production committees available in the Library of the Department of Labour. Except for a few standard texts the list refers to material published since the war. Earlier lists in this series appeared in the January issue (p. 115), the February issue (p. 242) and the March issue (p. 441).

Notes of Current Interest

Observance of V-E Day

The Canadian people, together with free peoples the world over, observed V-E Day on Tuesday, May 8, in general rejoicing coupled with thanksgiving. The observance was tempered with a re-dedication to the unfinished task in the continuing war against Japan and also to the re-building of a new world based on security.

Speaking from the World Security Conference at San Francisco, in session to lay the foundation for an enduring peace, the Rt. Hon. W. L. Mackenzie King, Prime Minister of Canada, declared in part:

"We shall now eagerly await the triumphant return of those who have fought the fight of freedom on the sea, on land and in the air, and who have survived the vicissitudes of war. What a welcome will be theirs! As long as they live, their welfare should be our first concern. Especially must we look to the well-being of the dependents of those who will never return. We must endeavour to see that no service and no sacrifice is allowed to go unremembered.

"Canada's great contribution to victory has been made possible by the unbroken partnership of her warriors and her workers. Supporting our armed forces, workers in every walk of life have done their part.

"In this hour of triumph over the evil forces of Nazi Germany, I should like all of you who have fulfilled the duties which it was yours to perform, all who by word, or prayer,

or deed, have striven in any form, to feel that you have helped to rid the world of a great scourge. For all time, it will be yours to claim a share in the triumph of right. In the degree to which you have been faithful, you, one and all, are entitled to be numbered among the benefactors of mankind."

Suspension of call-ups for armed services in Canada

Suspension of the call-up for compulsory military service and arrangements for the enrolment of volunteers for the Pacific war, were announced on May 7, by the Hon. Humphrey Mitchell, Minister of Labour, in a revision of Canada's manpower policy following the defeat of Germany.

The suspension was announced in a notice to all registrars across Canada as follows:

"The Minister of Labour, after conferring with the Minister of National Defence by telephone, announces that the following decisions have been made in respect to call-ups for the army.

"1. On and after this date call-ups for the army are suspended.

"2. Arrangements have been made that volunteers will be enrolled for the war in the Pacific and there will be an opportunity for any men who wish to do so to volunteer for this service.

"3. Any men ordered for medical examination who were due to report prior to May 7,

1945, must do so and be medically examined. However, those who are found fit for the army will not be called for military service for the present.

"4. Any men who have been called to report for military duty on May 7 or on a prior date, who have not reported and are consequently delinquent must do so, and if found medically fit will be enrolled in the army.

"5. Any men who have been called to report for military service on a date after May 7, 1945, will be given transportation and sent home and will not be enrolled for army service unless they volunteer for service in the Pacific."

**Political Action
Committee
formed by
Trades and
Labour Congress**

Following action taken at its 1944 convention, the Trades and Labour Congress of Canada announced on April 25 the formation of a National Political Action Committee. Under the signature of the Congress' president, Percy R. Bengough, the announcement of the objectives of the Committee are given as follows:

"Having in mind that governments change from time to time, the delegates attending the last Convention reiterated the previous policy of this Congress to keep organized labour out of partisan politics. It is the purpose of organized labour in Canada, as represented by The Trades and Labour Congress of Canada, to prevail upon governments, irrespective of the particular political party the government represents, to enact legislation tending for fuller, freer and happier lives for the workers and the people of Canada as a whole.

"One of the aims of the Political Action Committee will be to act in an advisory capacity with a view to having candidates elected who will support the aims and aspirations of organized labour, and to do everything possible to defeat candidates whose sympathies are lukewarm or hostile.

"There is nothing new in this procedure but there is this difference in that this Congress has not dealt with it in an organized way heretofore. However, these are critical times and the future can be bright or dim. A great deal depends upon the composition of the next Parliament of Canada. Many philosophies, schemes and promises will be advanced and made. Many will be seeking the franchise of labour very soon with promises for the future and with pasts not friendly to organized labour. It will be the duty of this Committee to submit to you from time to time information and advice as to how the support of the affiliated membership should be directed.

"In setting up such a Committee many angles had to be considered. First, such a non-partisan Committee could not include members with definite party leanings; another factor to be considered was that the Committee needs to be so comprised as to be able to contact each other without too much time loss in order that decisions may be made with dispatch.

"As previously stated, a tremendous lot depends upon the complexion of the next Parliament of Canada. Organized labour can advance or go a long way back. The Committee will undertake great and difficult responsibilities. We hope that you will fully appreciate the situation and co-operate to the fullest extent."

The personnel of the Committee is as follows: Ernest Ingles, London, Chairman; Andrew Cooper, Toronto; J. A. D'Acoust, Hull; Fred Molineux, Hamilton; A. Villeneuve, Montreal; Wm. A. Covert, Toronto. The Committee will act with the understanding that it may be augmented as other suitable members willing to act are decided upon.

**Certifications
under
Labour Code
during 1944-45**

During the fiscal year 1944-45, the National War-time Labour Relations Board dealt with a total of 243 applications for certification of bargaining representatives and 133 certificates were issued by the Board. A total of 28 applications were rejected by the Board and 31 were withdrawn by the applicants, while 23 were referred to Provincial Boards for consideration. Thirty-eight representation votes were taken on the order of the Board during the fiscal period.

Appeals and applications for leave to appeal to the number of 51 were dealt with by the National Board during the fiscal year; 14 appeals were granted, 28 denied, 4 appeals were withdrawn by appellants and application for leave to appeal was denied in 2 cases. At the end of the fiscal year, the Board's decision on 3 appeals was pending.

During the fiscal year the various Provincial Wartime Labour Relations Boards dealt with a total of 2,035 applications for certification and 1,334 certificates were issued by these Boards. Applications rejected numbered 110; withdrawn, 49; and 178 applications were under investigation at the close of the fiscal year, while the decision of the Boards was pending in 41 cases. A total of 107 representation votes had been ordered by the Provincial Boards during the fiscal year and 74 of these votes had been taken at the close of the period.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada. For the third successive month, there was curtailment of employment in Canada, according to figures published by the

Dominion Bureau of Statistics. The seasonal recession at March 1 to 178.2 from 178.9 at the previous month was of somewhat greater-than-average proportions according to the experience of the period, 1921-1944, although smaller than the loss at March 1, 1944 when the index was at 181.7. The seasonally-

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended April 26, 1945.

(1) Base 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figures for four weeks ended April 28, 1945, and corresponding previous periods. (8) Maclean's Building Review

corrected index was also lowered, falling from 185.9 at February 1, to 185.7 at March 1.

The 15,129 firms reporting to the Bureau showed a total working force of 1,813,991 at the date under review, which was 0.4 per cent less than for the month preceding. The weekly salaries and wages paid to these employees increased by 1.6 per cent to \$59,528,406. The per capita weekly earnings reached a new high at \$32.82, which is \$0.45 above the previous maximum established at April 1, 1944. The average was \$32.15 at February 1, 1945, \$32.27 at March 1, 1944 and \$27.92 at March 1, 1942.

The years 1944 and 1945 are the only years in which the trend in employment in manufacturing has been downward at March 1 as compared with the previous month. Logging, mining, transportation, construction and maintenance and trade showed curtailment also, mainly of a seasonal character. The largest losses were in retail trade and highway construction. Moderate increases were noted in communications and services.

The increase in the physical volume of business, to 225.2 in March from 216.7 in the previous month, was insufficient to counter-balance the decline of the preceding month. Each of the five main components recorded an increase in March; mineral production from 147.9 to 173.5; manufacturing from 270.0 to 271.1; construction from 110.9 to 172.3; electric power from 150.1 to 154.2 and the distribution of goods from 167.7 to 177.9.

Trades and Labour Congress appoints committee on education

A committee on education has been set up by the Executive Council of the Trades and Labour Congress, in accordance with a resolution adopted by the Congress at its annual convention last October (L.G., Nov., 1944. p. 1432).

A bulletin announcing the establishment of the committee declares that "of all the services for which the provincial and local authorities are responsible, the most important is that of aiding the growth and developing the powers of the rising generation by means of education. . . . No expenditure can possibly add more to the national wealth of Canada than that which is spent to develop the powers of our future citizens."

The bulletin calls for the organization of the several stages of education, primary, secondary and higher, as a single whole; provision to put university education within reach of all children according to their mental capacity regardless of their financial status; and the strengthening of school medical and dental services as part of an extended public health system.

The committee is under the chairmanship of C. J. Oates, Vancouver, and includes as members B. A. H. Magnuson, Port Arthur, I. Burman, Montreal, J. B. Graham, Winnipeg, and G. A. Smith, Halifax.

Shorter work week sought by Lithographers' Union

Indicative of a current trend in the post-war objectives of organized labour is the request for a shorter work week without reduction in pay now being made by locals of the Amalgamated Lithographers of America in Toronto, Hamilton, Ottawa, London and Montreal, from their employers, members of the Canadian Lithographers Association.

According to a memorandum received recently in the Department of Labour the union is asking for a new regular work week of 40 hours with a revision of pay rates so as to total the same amount as is at present being received for 44 hours' work. The union presents the following among the other arguments in favour of the proposed change:

- (1) The re-absorption of union members who are now on active service will be facilitated by a spreading out of available employment through a shorter working week;
- (2) Shorter hours and greater leisure will improve the quality of work done and the energy of those employed;
- (3) Workers should share in the benefits of new labour-saving machinery through a reduction of working hours.

Annual Convention of Industrial Accident Prevention Associations

Delegates from 133 towns and cities, chiefly in Ontario, gathered in Toronto early in April for the annual convention of the Industrial Accident Prevention Associations. The total number registered was 3,182. In addition, some 600 to 800 others attended a number of the sessions.

Such a large assemblage of leaders in Canadian industry, especially in wartime, for the sole purpose of improving technique in the prevention of industrial accidents, was regarded as an indication of an awareness of the need for finding improved means of preventing the losses due to accidents in industry. It was asserted at the convention that "the statement has been made repeatedly in the last eight or ten years that the hidden cost of industrial accidents is four times that of the actual payment for compensation. . . . Awards of the Workmen's Compensation Board for Ontario in 1944 totalled slightly over \$12,000,000." An estimated \$48,000,000 added to these awards suggests, therefore, that in

Ontario alone, the loss due to industrial accidents averaged approximately \$5,000,000 a month throughout the year.

Addresses were given by such experts in the field of accident prevention as Mr. W. Dean Keefer of Chicago, who stressed the constant need for adequate supervision and safety education, the careful selection of employees and the safeguarding of machinery.

Mr. Hugh Crombie of Montreal described the latest discoveries in the science of psychosomatics, a combination of psychiatry and medicine, in the treatment of disorders caused primarily by emotional disturbances and which "too frequently led to accidents." Mr. Crombie was of the opinion that a grievance committee or a works council, by permitting workers "to get things off their chests," would not only reduce accidents, but increase production.

Mr. William Morrison, chairman of the Workmen's Compensation Board of Ontario, suggested that protection would have to be given industrial workers 24 hours a day not only "for minor ailments and diseases, but for emergency operations and illnesses." It was not inferred, however, that industry should bear the full cost of such a service.

Mr. C. W. Lockard, President of the International Harvester Co. of Canada stated that his company had as its motto "doing it every day," thus emphasizing the need for constant vigilance in the prevention of accidents.

Dr. Karl S. Bernhardt of Toronto discussed in some detail the psychological approach to accident prevention. He said "It was well-known, but frequently forgotten, that inexperience on a job frequently led to accidents and that worry, emotional strain, tension from the war situation . . . wondering what would happen when the war was over, family troubles, fatigue, and loss of sleep were a few of the pre-occupations that contributed to "accident proneness." He emphasized the necessity for constant vigilance and study on the part of those responsible for accident prevention.

Other speakers included Hon. George Drew, Prime Minister of Ontario, Mr. Ralph Presgrave, Major G. M. Thomson, both of Toronto, Mr. A. L. Bennett, Galt, and Mr. Grant F. Shay, Chicago.

The officers elected for the coming year were: President, A. L. Bennett, Galt; First Vice-President, W. R. Manock, Fort Erie; Second Vice-President, James Preston, Stratford; Honorary Treasurer, C. H. Kercher, Toronto. R. B. Morley and J. L. Dodington of Toronto were re-elected General Manager and Assistant General Manager, respectively.

**Minimum wages
for farm
workers in
Great Britain**

Minimum wage rates for male agricultural workers over 21 years of age were raised in England and Wales, by orders effective on March 4, from 65s a week, the rate fixed in December 1943, to 70s a week. This rate applies as before, to a week of 48 or 50 hours in winter and 51 or 52 hours in summer according to the district. Special rates applying in certain districts to men engaged in caring for livestock and in other specialized work have also been raised by 5s. They now range from 74 to 89s a week according to the occupation and the district. Minimum differential overtime rates for adult males have been increased by 1d and in no district are now less than 1s 7d for ordinary week day overtime and 1s 11d for overtime on the weekly short day, on Sunday and on specified holidays.

The Agricultural Wages (Regulations) Act, 1924, gave to County Agricultural Wages Committees power to fix minimum rates "adequate to promote efficiency and to enable a man in an ordinary case to maintain himself and his family in accordance with such standard of comfort as may be reasonable in relation to the nature of his occupation". The county committees consist of representatives, in equal numbers, of employers and workers together with two impartial members appointed by the Minister of Agriculture and a chairman selected by the committee. The Central Wages Board, similarly constituted, had power to make the necessary legal orders putting into operation the rates fixed by the county committees. An amendment of 1940 requires the Central Wages Board, after consultation with the county committees, to fix a national minimum wage and stipulates that no rate fixed by a committee may be less than the national minimum. The committees were also required to take this national minimum for adult males into consideration when fixing minimum rates for women and juveniles. In 1942, under the Defence Regulations, the power of the county committees to fix minimum rates, and also their powers under the Holidays with Pay Act, 1938, were transferred to the Agricultural Wages Board for the duration of the war and so long "as the present system of nationally fixed agricultural prices and an assured market for agricultural produce is in operation". The central board however, is required to consult the county committees which retain their power to fix rates for handicapped workers and to determine the value of certain payments in kind. There is similar legislation for Scotland.

Paid-vacation clauses in union agreements in United States

Clauses providing for vacations with pay have become a standard feature of union agreements in most of the major industries in the United States, according to

a report prepared by the Industrial Relations Division of the United States Bureau of Labour statistics and published in the February issue of *Monthly Labour Review*.

The report indicates that vacations-with-pay clauses in union agreements increased in number very considerably during the war years. Only 25 per cent of all workers under union agreements benefited by such clauses in 1940. Early in 1943, the percentage had risen to 60 and by the end of 1944, roughly 85 per cent of all workers under union agreements in the United States had been granted vacations with pay. In manufacturing industries nearly 90 per cent, and in non-manufacturing industries nearly 75 per cent of workers under union agreements were covered by paid-vacation clauses. The smaller proportion in non-manufacturing was stated to be due to the fact that agreements for building trades workers, longshoremen, actors and musicians are almost entirely without paid-vacation clauses.

The report states further, that the most common type of vacation clause in 1943 was that which granted a maximum of one week's vacation with pay after one year of service. At the time the report was prepared, two weeks' paid vacation, after specified service requirements, was provided in agreements covering about 56 per cent of those employed under paid-vacation clauses, while 37 per cent were under agreements providing a maximum allowance of one week and two per cent were eligible for a maximum of three weeks' vacation.

It was pointed out that prior to 1944, only a small proportion of the workers in the clothing industry were employed under agreements providing paid vacations, but that recently negotiated agreements covering a large number of workers in both the men's and the women's clothing trades had included paid-vacation clauses. Other industries in which the paid-vacation principle had been extended in recent years were said to be, lumber, machinery, cotton textiles, shoes and other leather products, furniture and finished steel, and other metal industries. Coal miners were first granted vacations and vacation bonuses in 1941.

(In a recent statement, the Minister of Labour, Hon. Humphrey Mitchell, said that approximately 905,000 workers in Canada had been accorded vacations with pay.)

United States union penalizes members for slowdown

It was reported in the New York *Herald-Tribune* of April 7 that the United Electrical, Radio and Machine Workers (C.I.O.) recently expelled six mem-

bers from a local in Long Island City, New York, for causing a slowdown in a munitions plant in efforts to force a wage increase.

Eight others who participated in the slowdown were suspended from the union and fined \$325 each. Since the plant involved was under a closed shop agreement, all the men lost their jobs automatically.

Approval of agreement between U.S. soft coal operators and United Mine Workers

Reference was made in the April issue of the LABOUR GAZETTE (page 453) to wage demands of the United States soft coal miners. After six weeks of negotiation the soft coal operators of the United States and the United Mine Workers

of America signed an agreement in Washington on April 11. As official sanction was necessary, the agreement was at once submitted to the War Labour Board for approval. It was announced on April 24, that the W.L.B. had "unanimously approved the soft coal agreement . . . as consonant with the national wage stabilization policy." However, the decision of the Board was subject to the further approval of the Director of the Office of Economic Stabilization. Subsequently, it was reported that this approval had been granted.

The agreement, as confirmed, grants pay increases of about \$1.02 a day on the average to the unionized coal workers. It was claimed that "inasmuch as the settlement does not raise basic hourly rates as such, it does not directly contravene the Little Steel Formula." The agreement will be retroactive to April 1, 1945.

The increase obtained, results from "fringe" adjustments as follows: (1) portal-to-portal pay will be at regular rates, whereas previously travel time was paid for at two-thirds of the regular \$1 an hour rate, and the 15-minute lunch period, previously unpaid, will now be included in work time; (2) overtime will start after seven hours in any one day, rather than after 40 hours in any one week, so that a miner who cannot work a full six-day week may qualify for overtime pay; (3) vacation with pay is to be raised from \$50 to \$75 a year; (4) differentials of four and six cents are granted for the second and third shifts, respectively.

It was stated that coincident with this decision, the Director of Economic Stabiliza-

tion granted permission to producers to charge an average of 16 cents a ton more for bituminous coal to offset their enhanced payroll costs. Mines suffering hardship under the new prices are authorized to apply for individual price adjustments. The Office of Price Administration will decide the specific details of the retail prices "ceiling" revisions for soft coal.

Many women war workers in United States to return to household jobs

"Eighty-one per cent of the women who left household employment for war plant jobs want to return to domestic service after the war." This statement, published in the New York

Times on April 20, was based on "a nationwide survey" conducted by an educational bureau for home owner problems, among 24,000 domestics in 43 war plants in the United States.

It was stated that only six per cent of those asked whether they were planning to return to domestic service after the war answered, "undecided," while 13 per cent said, "no". However, it was indicated that "the scale of post-war salaries for household work will differ after the war." Four employment agencies were quoted as stating that the current wages for domestic help in New York are 75 cents an hour as compared with 35 cents an hour in pre-war days. "Monthly salaries have risen from \$60 to \$125 and up."

Plan of shipbuilding union in U.S. to stabilize post-war employment

Business Week, of April 14, describes a plan to cushion the effects of lay-offs among shipyard workers devised by the Industrial Union of Marine and Shipbuilding Workers of America. The program calls for the

"immediate adoption of a thirty-five-hour week with pay equalling present wages for forty-eight-hours and a guaranteed annual wage."

The guaranteed annual wage would be based on a rate of \$3,000 for fifty thirty-five-hour weeks and two weeks vacation pay for first-class mechanics, "with the \$3,000 standard wage considered flexible and subject to increases."

It was stated that the union's plan envisages an industry-wide employment fund established by the government and supervised jointly by labour and management, to which employers would be required to pay three per cent of payrolls for at least three years, until a fund of \$150 million had been accumulated. Contributions would cease at that point, but when an employer released workers he would again

pay three per cent into the fund, or reimburse it for payments made to the "furloughed" workers. The weekly payments of such workers would be the difference between State unemployment insurance compensation and their guaranteed wage. Workers laid off permanently would be paid the equivalent of eight per cent of their annual earnings for each year of their employment during the war up to a maximum of five years. "Thus, a mechanic paid \$3,000 a year who had been employed for five years would receive \$1,200."

The Union's objective in asking for a shortened work-week and guaranteed wage is said to be "co-related with plans for stabilized production, with allocation of work on a regional basis and workers shifting from yard to yard as necessary." It suggests further, "the creation of a special tripartite sub-committee of the Shipbuilding Stabilization Committee of the War Production Board to act on the guaranteed wage by midsummer."

United States War Production Board urges conservation of eyesight

A survey made recently by the War Production Board at Washington indicated "that industry as a whole fails to realize the extent to which production and safety depend upon better understanding of 'industrial vision'".

In a circular to American Industrial Managers the W.P.B. declared that among the disturbing key facts brought to light by investigation were the following: "(1) Sub-normal eyesight keeps 25 per cent to 40 per cent of war-workers below normal production. (2) Inadequate illumination and glare in many factories handicaps the entire working force. (3) Absenteeism, fatigue and accident rates are substantially increased by eye strain. (4) Protective goggles and other equipment are often, not supplied in sufficient numbers, not properly fitted, and not adequately maintained and used."

The Board asserted further, that the results of spot tests made in many industries "show that management can realize production gains as high as 25 per cent by constructively attacking the problem of eyestrain through the use of corrective glasses, proper lighting, proper eye equipment, and job re-assignment."

The W.P.B. points out that "this is a matter of great practical importance to the war effort as well as to post war production and urges industrialists to apply corrective measures with thoroughness and with despatch.

Reconstruction

Employment and Income

Minister of Reconstruction Issues White Paper on Post-War Planning

A WHITE Paper entitled *Employment and Income*¹ has been presented to Parliament by the Minister of Reconstruction, Hon. C. D. Howe. The Paper outlines plans for the post-war period in Canada with special reference to the initial period of reconstruction.

Pointing out that comprehensive provisions have already been made for the demobilization and re-establishment of members of the armed forces, the Paper states that these provisions will depend for their success on the availability of employment. "The central task of reconstruction, in the interest of the armed services and civilians alike, must be," the Paper declares:

to accomplish a smooth, orderly transition from the economic conditions of war to those of peace and to maintain a high and stable level of employment and income.

"The Government," the Paper continues, "adopts this as a primary object of policy. . . . The active co-operation of all governments and groups in the country will be essential to success."

Nature of the Employment Problem

No over-all shortage of jobs is anticipated in the period between the defeat of Germany and the defeat of Japan. During this period (designated in the Paper as "Stage 2" of the war) members of the armed forces and some of the workers in war industry will be released to civilian industry, whose requirements for labour and materials will still, however, exceed the amounts that can be made available, the Paper intimates.

Following the achievement of victory in the Pacific will come the task of completing the transition to a peace economy. The Paper indicates that total employment after the war will not be maintained at its present abnormally high level. The number of persons in employment or in the armed forces increased

from 3,692,000 in 1939 to 5,016,000² at June 1, 1944, but the Paper points out that many older persons and married women will voluntarily retire at the conclusion of hostilities, and that many others will want to further their education. Making allowance also for those who will remain in the armed forces and for the "highly seasonal character of some of our industries," the Paper estimates that the employment of 900,000 persons over the level of 1939 would "provide a high level of employment for the population of June, 1944," adding that as each year passes this figure will be increased by about 60,000 by the natural increase in the population.

Sources of Employment and Income

Turning to the Government's plans for meeting post-war job requirements, the Paper points out that all remunerative employment is provided by spending, the forms of which are classified as follows:

1. Export trade;
2. Private investment in plant, equipment, and other capital goods;
3. Consumption expenditures, i.e. spending by individuals on food, clothing and other living expenses, etc.
4. Government expenditures.

The Paper then proceeds to analyze each of these forms of spending, and to set forth the Government's plans for stimulating expenditure in each category so as to provide the requisite number of jobs.

It is made clear that the Government expects employment to be provided primarily by privately-owned business. On this point the Paper states:

The Government does not believe it to be either desirable or practicable to look to the expansion of government enterprise to provide, to any large degree, the additional employment required. It follows that a major and early task of reconstruction is to facilitate and encourage an expansion of private industry. . .

For a summary of the British White Paper, *Employment Policy*, see L.G., 1944, p. 942; and for a summary of the recommendations of the James Committee on Reconstruction see L.G., 1944, p. 150.

² of whom 1,839,000 were either in the armed services or in war jobs that would end when the war ends.

The Government will make every effort to create by all its policies favourable conditions within which the initiative, experience, and resourcefulness of private business can contribute to the expansion of business and employment.

Export Trade

The first of the four categories of spending, export trade "has been the greatest dynamic force influencing the level of national income and employment in Canada," the Paper asserts, while warning that in this form of expenditure the decision to spend is made outside the country.

For the immediate future, exports of war goods and of goods to relieve war-devastated countries will continue at a high level. As a post-war target the Government considers that an increase of about 15 per cent in the amount of goods exported before the war would be "practical and desirable". This would amount to a total of one and three-quarter billion dollars annually at current prices.

To achieve this objective the Government is looking to an expansion of total world trade, within which other countries as well as Canada can increase their exports.

International security and freedom from threat of war are considered to be essential pre-requisites of success in this program, and are the first objects of international collaboration.

As further steps towards the improvement of world trade and international prosperity, the Government has endorsed the plans reached at Bretton Woods last July for an International Monetary Fund and a United Nations Bank of Reconstruction and Development (L.G., Nov., 1944, p. 1323), and is "pressing actively" for a wide collaboration in the reciprocal reduction of trade barriers. Furthermore the Government is prepared to make loans to the United Kingdom and to Allies whose territories have been over-run by the enemy to enable them to finance their import requirements from this country.

Private Investment in Canada

Turning to the second source of employment—the investment of private capital in industrial and commercial buildings and equipment, goods in stock, power and transportation facilities, exploration and development of natural resources, and housing—the Paper points out that the decision to invest private funds in capital goods will depend on the business man's view of the prospective margin of profit to be made on the investment.

The Paper anticipates that business prospects will be favourable, pointing out that the demand for consumer goods will be high and

that "everything which the Government is doing, and plans to do, to enlarge external markets and increase and stabilize consumer income, will contribute to the prospective profitability of new investment."

Moreover the Paper points out that in terms of post-war needs, there is an abnormal amount of capital and maintenance expenditure to be made as soon as labour and materials are available. "In the period immediately following the European War, it will be necessary to reduce the barriers to such expenditures, facilitate those which are of the greatest urgency and safeguard them against an inflationary boom which would bring them to an abrupt and abortive conclusion."

Assistance in the speedy reconversion and expansion of industries will be given by the Department of Reconstruction with special attention to those localities which have depended most on war production and in which the post-war adjustment will be greatest. The wartime restrictive taxation policy will be replaced by a policy designed to encourage investment.

The facilities of the Industrial Development Bank will be of particular importance for small and new enterprises, "on the development of which much future employment will depend."

Housing

In regard to housing, the Government plans to encourage and use its wartime controls to assist in the production of material and equipment for a total program of not less than 50,000 units in the first full construction year following the end of the European war. This figure will fall short of what is desirable but it will probably be as high as labour and materials can be found for in that period...

This immediate period, when only a limited housing program is possible, should also be used to carry out the surveys which are basic to community planning, establish the plans, and agree on the methods for carrying out soundly conceived housing and slum clearance projects. Here the initiative must rest in large degree in the local communities, the Government standing ready to give technical assistance and to provide substantial grants for slum clearance and generous assistance in the financing of well-located and properly managed projects which provide good housing at low rentals. Research and experiment in the use of materials and in the reduction of costs must also be hastened in this period.

The Paper points out that in the field of housing, expenditures have been deficient over the past 15 years. This, coupled with the fact that war savings and post-war credits, the greater assurance of steady employment, family allowances and the facilities of the National Housing Act will enable many thousands to build their own homes, is ex-

pected to bring about a vast increase in investment in housing as soon as conditions permit.

Consumption Expenditures

In examining consumption expenditures as a means of providing employment, the Paper anticipates no shortage of purchasing power in the immediate future. It points out that the amount of goods and services at present being consumed by civilians is well above the level of 1939, and would be still higher were it not for shortages of materials and labour, the pressure of taxation, and the insistent need for saving for Victory Bonds.

During Stage 2 of the war "consumption expenditures may be expected to rise to the full degree to which goods and services can be made available", in fact, "the danger in this period as at present, is that consumption expenditures will tend to out-run our immediate capacity to put on the market the goods and services desired". This excess of purchasing power might, unless proper safeguards are maintained, result less in increased civilian employment than in sharply rising prices. Measures whose prime object is to encourage spending on the part of the general public will thus "not be appropriate to this period of the war."

However as an offset against dislocations affecting individuals, which might cause a fall in some incomes, the Paper lists the following safeguards that Parliament has provided:

(1) The Unemployment Insurance Act, benefits from which will protect wage-earners suffering temporary loss of work during the period of reconversion, and will thus to an important degree maintain consumption expenditures and maintain employment in the industries producing consumption goods and services.

(2) The Family Allowance Act, which "will augment the incomes of families in the lower-income groups and will provide the means for maintaining or increasing the consumption of these groups."

(3) The Agricultural and Fisheries Price Support Acts, which will be used to safeguard the primary producer against the penalties of sudden changes and dislocations in export trade, and will thus "to a degree underwrite consumption and other expenditures."

The many financial provisions for the re-establishment of veterans will also "add substantially" to expenditures on consumer goods, the Paper states.

Consumption expenditures are thus expected to continue strong until well after the war is ended, "if not neutralized by price inflation". Further social security measures are then

anticipated, including contributory old age pensions and health insurance. In addition to their great direct results in human security and welfare, such measures will have important supplementary effects in stabilizing and enlarging consumption expenditures and the employment which is derived from them.

The Government also proposes "by research, education, improvement of marketing methods and facilities, and by such other means as are necessary, to foster the improvement of Canadian standards of nutrition."

Government Expenditure

The final type of spending which gives rise to employment is classed as government expenditure. During the war government expenditures have played the dominant part in determining the level of employment and income in the country; but this role will be greatly reduced after the war, the Paper indicates, adding:

Viewed from one direction, the problem of the transition is to maintain the level of employment, while substituting private for a large part of public expenditures.

An important function that public spending may have in stabilizing employment is, however, considered in the Paper. This is the possibility of varying government expenditures so as to compensate for fluctuations in private investment and thus maintain employment during periods of low expenditure by business. In this connection the Paper asserts that

the deliberate use of public investment expenditures as a permanent instrument in employment policy has to be undertaken experimentally. There is, as yet, no working model even in other countries. It will be necessary to frame policy to fit the facts of the Canadian economy and administer it in accordance with our federal constitution.

The Paper points out that government expenditures are of three sorts:

1. Current expenditures for goods and services, whose amount has to be determined by the current need for government services and operations rather than varied according to the need for employment;

2. Transfer payments, such as pensions allowances and similar payments, which have their effect on employment as they re-appear as private expenditures;

3. Public capital or investment expenditures for buildings, equipment, roads, airfields and other durable developments and improvements.

The last, the Paper indicates, "are, to a degree, capable of being timed so as to contribute to employment as needed and supplement private expenditures and compensate for their fluctuations."

The Paper declares that:

It is the firm intention of the Government to institute a system of managing its capital expenditures so that they may contribute to the maximum to the improvement and stabilization of employment and income.

However it warns that the post-war employment problem is "not to be solved by huge expenditures on public works" and that "efforts to increase and stabilize employment and income must pervade all economic policies."

During Stage 2 of the war, the Government proposes, along with provincial and municipal governments, to carry out the projects of a normal sort for maintenance and expansion which have been deferred during the war years, although "other demands on our labour and materials will limit severely the amount of public investment expenditures."

During the same period the Dominion proposes to press ahead with the planning of its own deferred works and announces its intention of accumulating a "shelf" of employment-giving projects. The Paper points out however, that since in the inter-war years the public investment expenditures of provincial and municipal governments were far greater than those of the Dominion, it will be an essential part of Dominion policy to encourage advance planning on the part of these governments and to seek their co-operation on the timing of expenditures.

Co-operation will also be sought in regard to a policy of expenditures on natural resources. It is pointed out that the opportunity exists for public investment in this field which would "induce more private investment and not supplant it."

The Dominion "would not seek in any particular to limit the control of provinces over their own resources nor to divert any of the revenues to be derived from them." The Paper points, however, to the need of "a new definition of financial arrangements between Dominion and Provinces" which "cannot be undertaken in definite terms before the Dominion-Provincial Conference is held."

Placement and Training of Workers

Having outlined the Government's point of view in regard to the various types of expenditure that provide employment, the Paper points out that provision must also be made to ensure the fitting of workers to jobs.

A high overall demand for labour will not of itself assure jobs for all. The kinds of work offering and the places where unfilled jobs exist will change with the seasons of the year and with the development of new consumer demands, new industries, new processes and new materials. There must, therefore,

be a high degree of mobility of labour as between occupations, and between jobs and places.

The Paper states that the attainment of the required mobility and adaptability will "depend in large degree on the initiative and resourcefulness of the workers themselves."

Important experience in the placement and training of workers has been gained during the war, the Paper points out. Referring to the wartime function of the Employment Offices and Placement Service the Paper declares:

Under difficult and exacting circumstances, a large and increasingly efficient organization has been built up. The restrictive regulations in force during the war will disappear as soon as they no longer serve a useful purpose, but the placement services and the forward planning in the employment of the labour force will be expanded in scope and improved in quality on the basis of wartime experience and post-war requirements.

The employment offices will be key institutions in the period of demobilization.

After the war, their work will continue to be of essential importance in the carrying out of employment policies and in furnishing information on local and national employment.

The continuation of vocational training under Dominion-Provincial agreement will also be an important aspect of the post-war employment program.

To create a greater inducement for persons who become unemployed to take vocational training, the Government proposes to make payments to applicants for unemployment insurance benefit who undertake approved training at higher rates than the ordinary rates of benefit.

Wartime Controls

Asserting that "high post-war employment can be based only on high production," the Paper warns of the danger that an inflationary rise in prices might defeat the achievement of this objective.

The store of buying power which individuals and corporations have accumulated during the war can be of great assistance in sustaining production and employment during the transition from war to peace. On the other hand, it could also be dissipated in a needless inflation, which would defeat orderly reconversion, if such buying power were permitted to run wild at a time when civilian production was still restricted and shortages and bottlenecks persisted.

The Paper affirms the Government's intention of maintaining such controls as are necessary following the close of the war in Europe. As wartime scarcities of manpower, materials, productive capacity and transport disappear, wartime controls will be relaxed and discontinued. "It will be necessary, however,

to be sure that the underlying condition has disappeared permanently before all the machinery of control is abandoned."

Government Finance

Referring briefly to the role of government fiscal policy in a high employment program, the Paper points out that the maintenance of levels of employment and income greatly above those ruling before the war will call for government expenditures and revenues at higher than pre-war levels. Nevertheless it is anticipated that post-war taxation "at substantially lower levels than at present" will be possible.

Announcing the Government's intention to base fiscal policy "on economic as much as purely financial consideration," in line with experience gained during the war, the Paper states:

The Government will be prepared, in periods when unemployment threatens, to incur the deficits and increases in the national debt resulting from its employment and income policy, whether that policy in the circumstances is best applied through increased expenditures or reduced taxation. In periods of buoyant employment and income, budget plans will call for surpluses. The Government's policy will be to keep the national debt within manageable proportions, and maintain a proper balance in its budget over a period longer than a single year.

Beginning of Transition

In order to speed the resumption of civilian production following the termination of war contracts, the Department of Munitions and Supply has determined "rapid procedures to deal with any final re-negotiation of contracts and termination of war orders", the Paper states. Government-owned equipment or materials not required for civilian production will be cleared promptly from privately-owned plants, and will be disposed of "at fair prices and on fair terms in accordance with policy already enunciated", as will other Crown assets.

Special plans are being made for localities where wartime demands have necessitated

heavy concentration of war orders and an abnormal war population. In these places, cancellation of war contracts will fall more heavily than elsewhere, and the Government's plans include:

1) speedy re-establishment and development of civilian industry;

2) special attention to the field of housing and public works "even though it is not possible or desirable to proceed with similar works in other localities."

The Government intends to foster the expansion of scientific research in Dominion and other government laboratories, in the universities and within industry. The Paper declares that this "can contribute enormously to the future employment and income of the Canadian people."

The Paper makes the assertion that the Government's policy of maintaining a high and stable level of employment and income, to be successful, must be wholeheartedly accepted by all economic groups and organizations as a great national objective, transcending in importance all sectional and group interests.

Referring to the joint responsibilities of labour and management the Paper states:

A higher degree of productive efficiency is necessary to maintain the desired level of income and a correspondingly high standard of living. Efficiency and direction in production will have a very important bearing upon the employment level which can be maintained, and this in turn involves research and technical education. Business management will be called upon to apply wartime experience in attaining new levels of efficiency and to secure larger production and greater employment through passing on to the consumers and other purchasers in the form of lower prices the savings thus made. Labour, which will benefit most from high levels of employment, will make an essential contribution to the solution of the post-war problem by assisting management in making high labour earnings compatible with low costs through skilful, abundant and efficient production.

In conclusion the Paper declares: "Government, labour and management have been united together in the common objective of winning the war. The same united effort can win our post-war objectives."

Labour and the Department of Reconstruction

THE Minister of Reconstruction, Hon. C. D. Howe, on April 29 wrote to the major labour organizations in Canada requesting them to name representatives to a committee with which he proposes to meet regularly in order to obtain the "full co-operation and assistance of labour" in formulating the reconstruction policies of his Department.

The letter was sent to the principal officers of the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Canadian and Catholic Confederation of Labour, and the Dominion Joint Legislative Committee of the Railroad Brotherhoods.

The Minister, in outlining the steps being taken with a view to enlisting the co-operation

of labour in the work of reconstruction, stated that an officer of the Department, Mr. H. Carl Goldenberg, had been appointed Labour Adviser. "It is his function to keep in contact with labour organizations, to know their views, and accordingly to advise on reconstruction problems and policies as they affect labour," the Minister declared. "He is to assist me at meetings with representatives of labour organizations and in receiving and studying the submissions of these organizations to the Department. He also acts as liaison officer between the Department of Labour and the Department of Reconstruction since the policies of these two Departments are of mutual concern."

The Minister explained that preliminary meetings of the Committee would be for the purpose of formulating a procedure to enable the views of workers in the various industries to be presented on the problems which particularly concern them.

He stated that Regional Reconstruction Councils are being set up in all of the provinces of Canada, and that these will each include labour representatives. "It is the duty of these Regional Councils to keep currently advised on reconstruction problems within the region and to assist the Department therein. Through direct representation on the council labour will therefore be in a position to cooperate in the solution of reconstruction problems arising within the region", the Minister declared.

Referring to the Government's statement of post-war employment policy as set down in the White Paper on *Employment and Income*, the Minister emphasized the need for

labour-management co-operation if the desired results were to be achieved.

"It is apparent that unless there is close co-operation between labour and management in the reconstruction and post-war years we shall not be able to attain the high standard of living which is our goal," he said. "That co-operation must be achieved jointly by the two parties in industry, namely labour and management.

"In regard to labour-management co-operation we can benefit from our wartime industrial experience," he continued. "Labour has acquired in the war years a more positive role in industry through adoption of the principle of joint consultation on production problems through labour-management committees. The Industrial Production Co-operation Board has been functioning for more than two years in setting up such committees."

The Minister reiterated the Government's intention of continuing to encourage and promote the formation of joint production committees in the reconstruction and post-war period, as set forth recently in a statement issued jointly by himself and by the Minister of Labour (L.G., Dec., 1944, p. 1464).

"In furtherance of this policy," he declared, "it is proposed to encourage labour-management co-operation at whatever level mutually acceptable organization can be achieved. As we approach the initial period of reconstruction I ask industry to join with labour in setting up the most appropriate and most effective type of machinery for co-operation in order that we may, through our joint efforts, reach and maintain the high and stable level of employment and income which we have declared to be our goal."

Veterans and the Department of Labour

THE Minister of Labour, Hon. Humphrey Mitchell, recently described the activities of the Department of Labour in connection with war veterans in the following terms:

The Department of Labour is co-operating closely with other government departments in planning for the rehabilitation of war veterans.

An inter-departmental co-ordinating committee, under the chairmanship of the Deputy Minister of Labour, has been formed to co-ordinate the rehabilitation planning of all government departments. In addition, a special assistant to the Deputy Minister has been appointed to co-ordinate all matters pertaining to rehabilitation coming within the purview of the Department of Labour.

These activities include:

Reinstatement in civilian employment;

Finding new employment for those who do not desire reinstatement, or who have not previously been employed; and

Vocational training for those who wish to acquire a new skill before seeking employment.

Present figures would indicate that more than 80 per cent of those discharged will go through our hands. In the larger centres where the Department of Veterans Affairs will be establishing Rehabilitation Centres, our Employment Service will have a complete unit housed in the same building as representatives of other government departments.

In the smaller centres where the Department of Veterans Affairs is not establishing offices, we are appointing a special officer to look after the interest of veterans exclusively. This officer will advise them not only on

matters pertaining to employment and vocational training but also on matters which normally would not come within the purview of the Labour Department.

It is hoped also that the activities of the local citizens' rehabilitation committees will be centred in these offices so that a veteran may obtain at one centre the answers to any problems with which he may be confronted without the necessity of directing him from place to place as would otherwise be the case.

Our local officials are also co-operating closely with municipal and provincial bodies concerned with the rehabilitation of veterans to prevent overlapping and duplication of effort.

To meet the problem of re-establishment of war veterans it will probably be necessary for the Government to continue some of the exist-

ing wartime employment machinery and controls until the end of the war with Japan.

It will be necessary to have adequate data on employment opportunities and on applications for employment. It will be the policy of the Government to give priority to veterans in referrals to positions. They must be given the opportunity to return to the jobs they had before they joined the forces.

There must be very close contact between the employment service and the vocational training authorities so that training programs may be intelligently carried out.

The office and field force organization of the Department of Labour will be at the service of the Department of Reconstruction in providing complete data at all times pertaining to both national and local labour conditions.

Canada and the I.L.O.

THE Hon. Humphrey Mitchell, Minister of Labour, in a recent statement made reference to the relationship between Canada and the International Labour Organization.

"Canada", he declared, "has been a staunch supporter of the I.L.O. since its formation 26 years ago. A Canadian delegation was present at the first International Labour Conference held in Washington in 1919; and Canadian delegations representing the Government and employers' and workers' organizations have attended every Conference since.

"For several years we maintained a permanent office in Geneva, and when because of this war the I.L.O. was forced to move from Geneva we were glad indeed to furnish a temporary home in Montreal.

"The I.L.O. was set up to deal with vital problems following the First Great War. It accomplished much. Within a few months, we hope, it will be called upon to do an even greater post-war job.

"But this time the I.L.O. is better prepared to handle it. They have learned that the problems of peace—such as rehabilitation, steady employment, higher standards of living, social security—are problems which cannot be solved by one nation alone."

Referring to the 26th session of the International Labour Conference, held at Philadelphia last year, he said:

"It was a meeting of great importance. It re-affirmed, among other principles, that 'labour is not a commodity', that 'poverty anywhere constitutes a danger to prosperity everywhere', and that all international economic and financial policies and measures should be considered in the light of these great fundamental axioms."

He pointed out that Canada had been "very adequately represented" at the Conference as well as at the 94th session of the Governing Body held in London last January.

Manpower

Manpower Situation in Canada Reviewed by Minister of Labour

A REVIEW of the manpower situation in Canada was given in April by the Minister of Labour, Hon. Humphrey Mitchell.

In regard to continuance of employment controls the Minister declared:

"To meet the problem of re-establishment of war veterans it probably will be necessary for the government to continue some of the existing wartime employment machinery and controls until the end of the war with Japan."

Reviewing highlights of labour demand and supply, the Minister said that at the end of 1944 labour supply was easier than it had been for some time but still remained very tight.

"From April until September, 1944, the demands of war and essential industries progressively increased. Expanded munitions programs required more men of the heavy labour type, which in turn became more scarce as the necessity for additional men for the armed forces developed.

"At times the requirements of all industries could not be met. This, of course, is a situation which cannot always be avoided in a country like Canada where there is so much seasonal employment.

"Generally, all crops in Canada were very much greater than in the previous year, and consequently, more men were required to harvest, ship and store them.

"Steps were taken to utilize as far as possible all persons being released from seasonal employment. An appeal was made during the autumn, and as men became available they were referred to high priority manufacturing industries, and to lumbering and logging.

"The services of those ordinarily employed in lake navigation and in building construction projects were used to the full, and by the end of the year 30,000 of these workers were engaged in essential manufacturing industries, and 31,000 in lumbering and logging operations.

"During this whole period there were constant changes in production programs. The shipyards and the aircraft industry were releasing men while demands were increasing for shells, military tires and various other munitions.

"These constantly changing requirements called for new policies and procedures on the

part of the employment service, including the directing of men to employment, the screening of rejectees from the Army, the using of soldiers and prisoners of war and Japanese to a limited extent, and various other means of meeting definite labour shortages.

"While the day-to-day work was being undertaken in meeting the manpower requirements of the nation, plans were being put into effect to provide a service for men being discharged from the armed forces, and also for the placing of persons suffering from disabilities."

Labour Priorities

Referring to labour priorities he said that changes in the war production program had demanded close attention to the priority ratings of the firms involved.

"Other industries have had to be given preferred attention for several reasons. In this sixth year of the war the inventories of many essential civilian commodities have become seriously depleted and temporary priorities have been provided to prevent an acute shortage of sundry items, and to avoid the need of rationing.

"However, in spite of pressure to raise priorities, only 5½ per cent of all the industrial establishments in Canada have been given 'A' rating for male workers."

Speaking of the problem of providing labour to essential civilian industries, the Minister said that this "has sometimes been difficult, particularly in meat packing, ice harvesting, flour milling, and construction work, where the strong rugged type of labourer is needed. We have been greatly assisted during the winter by the use of farm workers, who were not at that time required on the farms.

"When the heavy seasonal demand for packinghouse workers began last September the total employment of the important plants in Canada amounted to nearly 16,000 employees.

"By the middle of December when they had reached their peak, National Selective Service had provided these packing houses with an additional 3,000 workers, bringing the total to almost 19,000 employees.

"During the year, the Department of Veterans Affairs had under way an extensive

program of hospital construction. This was given top labour priority, and every means taken to see that adequate labour was made available.

"Where tradesmen of special skills were not to be had in one part of the country for work on these hospitals, they were transported from other sections, the government providing transportation where necessary.

"Increased staffs were called for in certain industries that provide the construction materials needed. The brick and tile industry was one to which we had to give attention.

"So that there might be supplies of these materials on hand for work in the spring, those manufacturers operating throughout the winter months were given temporarily the highest labour priority, and special efforts were made to increase their staffs.

"Late last summer a shortage of ice was experienced at several points across the country. This seriously affected the movement of perishable foodstuffs.

"A survey undertaken by the Wartime Prices and Trade Board in the fall of 1944 indicated that 50 per cent more ice would be required this summer than was available last year. Early in the winter, therefore, plans were developed to provide the workers necessary for a maximum harvest of natural ice.

"With farm workers who have been employed in industry during the winter now returning to the farms, essential civilian industries such as brick yards, flour mills, tanneries, etc., will require special attention from National Selective Service in the provision of necessary replacements, and these matters are now being studied by our officials.

"In the provision of labour for essential civilian industries and services, very close co-operation is necessarily maintained between National Selective Service and the Wartime Prices and Trade Board.

"Officials are now giving attention to the task of laying the ground work of reconstruction projects, and the need for preliminary work on post-war developments.

Farm Labour Program

"One of the highlights of our year's work has been the Farm Labour Program. Once again close co-operation between the Federal and Provincial agencies has been a most important factor in helping to meet the heavy farm labour requirements.

"With the greatly increased need for food, especially in liberated countries, farmers were asked not only to maintain but, if possible, to increase their all-time record production."

Referring to negotiations for 1945 farm labour agreements the Minister said:

"I have great faith in this joint Dominion-Provincial arrangement. It is much more than a 'marriage of convenience'. It exemplifies, in action, what can be accomplished when provincial and federal departments pool their plans and resources in tackling a problem of mutual concern."

Outlining the various measures taken to meet the farm labour situation (L.G. Dec., 1944, p. 1460) he referred to a recent amendment to the Selective Service Regulations which provides that any male person between 16 and 65 years of age may be directed into agricultural employment. "Selective service officers acting with provincial agricultural officials will," he declared, "decide on who are suitable for direction to agriculture and where the need is greatest."

He added: "The United Nations may be confronted with millions of starving people in Europe before the end of this year, bringing in its train disorganization and chaos unless we on this continent take on much of the responsibility of helping to bridge this crisis."

Sources of Manpower

Continuing with his review of the manpower situation the Minister declared that about 25 per cent more farm workers on temporary permits were placed in saw-log and pulpwood operations this winter as compared with last year. "Reports show that from October 1944 to the end of the fifth week of 1945 inclusive, there were 85,000 placements in forestry from all sources as compared with 61,000 for the same period in 1943-44.

"Conscientious objectors have provided another seasonal supply of labour on much the same basis. They are employed on the farms during the summer months and transferred to woods operations in the winter.

"Canadian Japanese are also a source of labour supply. There are now about 2,000 of these in British Columbia and eastward to Ontario.

"Prisoners of war continue to be employed to a considerable extent in woods operations. Through the winter about 9,000 of these men were employed. We expect to use a greater number in the near future.

"The timber controller and the industrial associations have expressed satisfaction with the amount of labour which has been supplied to operators this past season.

"In the coal mining industry the employment situation started well in 1944 but deteriorated during the year. About 27,000 workers are now being employed, but at February 16 last there was a demand for over 1,000 miners, mainly to work at the coal face.

"There was no shortage of underground men for the auxiliary services and efforts were made to induce some of these men to transfer to the face.

"Soldiers with coal mining experience were given leave to work in the mines. There were approximately 1,000 in mines of the Maritime Provinces and 800 in the West. Most of these men were producers and formed a sizable percentage of the total producer strength of the industry.

"Our apprenticeship training plan for coal miners under the war emergency training program supplied approximately 100 workers this year and about 80 more will be available shortly.

"In base metal mining the labour requirements during the past year again were very heavy. Canada has supplied nearly all the nickel used by the Allies, a fair proportion of the copper, lead and zinc, and some precious metals and radio active ores.

"The greatest need was for underground miners, men of good physique and some skill. During the winter months over a thousand agricultural workers were made available to these mines and their assistance has been most valuable. . . .

"The importance of base metals has warranted the highest priority for labour to this industry. Every effort has been made to maintain the strength of this labour reserve.

"We have taken steps to create a labour reserve in all base metal mines producing over

85 per cent for war work. It will include all underground workers who will be classed as War Industry Reservists as provided for by P.C. 496 of January 25, 1945. (L.G., Feb., 1945, p. 136). This will help to ensure the retention of these workers in this essential industry."

The Minister referred also to the "splendid war effort" of women in Canada, and said that one of the greatest difficulties in the field of women's employment was maintaining hospital staffs.

Referring to longshoremen he said: "Under the direction of a Controller of Loading Operations, the loading of ships at Halifax has proceeded satisfactorily. The method of hiring longshoremen through a central despatching agency has been continued and the longshoremen's reserve pool also continues in operation.

"Longshoremen registered at the despatching agency and in the reserve pool receive a guaranteed minimum weekly wage. During the summer season, the deficiency payments made by the government for this purpose are high, but when shiploading picks up in the autumn and throughout the winter, the disbursements made by the government are greatly reduced.

"In January, 1945, the average number of man days employed was almost 50 per cent greater than in January, 1944.

"The net cost to the government for the guaranteed wage paid to longshoremen was \$6,300 in January 1945, as compared with \$75,000 in January, 1944."

Recent Manpower Orders

Consolidation of N.S.S. Regulations—Restrictions on Teachers Removed

THE National Selective Service Civilian Regulations have been revised and consolidated. Order in Council P.C. 246, January 19, 1943, which had undergone various amendments in the last two years, has been rescinded by a new Order, P.C. 2796, April 24, 1945, which sets forth the Regulations in their amended form. The new Order, P.C. 2796, makes no changes in the provisions of the Regulations, but effects a convenient consolidation of their provisions as amended.

The Selective Service restriction that members of the teaching profession could only leave that occupation under special permit, has been rescinded as from September next.

The Hon. Humphrey Mitchell, Minister of Labour explained recently that this is being done on recommendation of the National Selective Service Advisory Board, and after

consultation with the Governments of the provinces.

"Lifting of the restriction on teachers," the Labour Minister said, "is in line with the general policy of the Government to discontinue wartime restrictions just as soon as their purpose has disappeared. It is anticipated that by September next—the beginning of the new school year—the shortage of teachers will have eased materially, so that wartime regulation will no longer be necessary."

Control of employment of teachers was effected in June, 1943 (L.G., 1943, p. 903). The Order rescinding the restrictions (P.C. 3164, May 1, 1945), amends P.C. 2796 (April 24, 1945), by revoking paragraph (w) of section 2 and all of 207A of the National Selective Service Civilian Regulations.

Historical Summary of the National Selective Service Civilian Regulations

CANADA'S civilian National Selective Service dates from March 23, 1942, when Prime Minister Mackenzie King announced the passing of two orders in council designed "to effect the orderly and efficient employment of the men and women of Canada for the varied purposes of war." This marked the beginning of Canada's program to do for the civilian side of the war effort what the National Selective Service Mobilization Regulations were designed to do for the military war effort. The purpose and policy of this wartime mobilization of man and woman power was to direct the maximum productive effort of the country on all fronts—industry, labour, agriculture, as well as in the armed forces.

The general responsibility for the direction of civilian manpower (including women) was placed on the Minister of Labour, while provision was made for a director of National Selective Service to head up the organization responsible for carrying through the program. The principal purposes of the original two orders in council were to estimate civilian manpower requirements; restrict the entry of men into certain specified occupations; stabilize employment in agriculture; and co-relate military and civilian manpower problems.

Control of Employment

The first order in council, sometimes known as the "Restricted Occupations Order," restricted the entry of male persons between the ages of 17 and 45 into a specified list of occupations or industries, unless the male person had been rejected as physically unfit for military service or discharged from the armed forces. If the man had not been discharged or rejected he was prohibited from entering any of the restricted occupations unless and until he had first obtained a permit from a National Selective Service officer, the official through whom the Regulations were administered. These regulations did not apply to female workers.

Along with the Restricted Occupations Order a second set of regulations was made, designed to stabilize employment in agriculture. These were known as the "Stabilization of Employment in Agriculture Regulations." They provided that persons employed in agriculture at March 23, 1942, could not take employment outside of agriculture unless they had first obtained the permission of a National Selective Service officer. Such persons were per-

mitted to move freely from one agricultural job to another so long as they remained in agriculture.

To administer the two sets of Regulations arrangements were made by the Minister of Labour and the Director of National Selective Service to utilize the cross-country chain of offices and the organization set up to administer the Unemployment Insurance Act under the Unemployment Insurance Commission—which included employment and claims offices in all leading cities. Certain of the members of the staff of the Unemployment Insurance Commission were appointed National Selective Service officers and vested with authority to administer the Regulations.

Along with the Regulations already mentioned, a third order in council was made that dealt exclusively with technical personnel. It provided generally that such persons might not enter employment without permission, and on termination of their employment were to give notice in prescribed form. It further provided for a complete registration of all persons with technical training. The provisions of this order in council were administered by the Wartime Bureau of Technical Personnel, and although these regulations were later integrated with National Selective Service Civilian Regulations, this phase of the matter has continued throughout to be administered by this bureau separately and apart from the main Regulations administered by the employment service and unemployment insurance branch of the Department of Labour (that is, the organization of the Unemployment Insurance Commission).

To determine the extent of the manpower pool available for civilian employment, a compulsory registration of all unemployed men between the ages of 17 and 69 was undertaken in May, 1942. The terms of the registration required that all unemployed male persons renew their registration every two weeks during any period of unemployment. This registration provided a picture of the available manpower.

By a new order in council, which became effective on June 17, 1942, and was known as the "Control of Employment Regulations," the Restricted Occupations Order previously referred to was revoked, and a new set of Regulations provided in its place. These new Regulations (which did not in any way affect the Stabilization of Employment in Agriculture Regulations) extended very greatly the area of control over civilian manpower and employ-

ment. They provided that every person, male or female, regardless of age, required the permission of a Selective Service officer to seek or enter employment. The general procedure was for employees to obtain their employment and then make application for the necessary permit, at which time the National Selective Service officer, if he saw fit, could refuse the permit and induce the person to take some other employment.

The next forward step in the development of the civilian manpower regulations took place on September 1, 1942, when a revised order, known as the "National Selective Service Regulations," came into force. These Regulations revoked the Stabilization of Employment in Agriculture Regulations, as well as those made in June, 1942, and provided a combined and complete code dealing with all civilian employment with the exception of technical personnel.

The Regulations of September, 1942, again considerably extended and widened the area of control over all civilian employment. They made it necessary for workers to obtain permits *before* seeking or entering employment. They introduced a system of notices of separation for use when an employee was being laid off or dismissed or was terminating his employment. This provision required seven days' notice to be given by either employer or employee in a case of intended separation. Employers were required to report employment vacancies. Advertising for employment or for employees was prohibited except under the control of Selective Service. A labour priority schedule, consisting of four priority classifications, was introduced in order to indicate the relative essentiality of various occupations and industries in reference to the war effort. This provided the groundwork for the effort to move workers from lower to higher classes in the labour priority schedule, that is, to move workers into more essential work. Supplementary allowances were provided for, to assist in making the labour supply mobile. These allowances included transportation to employment and payments to assist workers separated from their families or to compensate where wage differentials interfered with transfers, and became payable on any project or in any case where specific authority for payment was given.

All these Regulations, which applied to both men and women, covered persons who had reached their 16th birthday. No important changes were made in the earlier provisions relating to the stabilization of employment in agriculture.

In October, 1942, it was considered advisable to stop the flow of manpower going to employment outside Canada. Regulations were accordingly made to prohibit persons over 16 years of age from leaving Canada with the intention of seeking or entering employment outside Canada, unless they had first obtained a labour exit permit from a Selective Service officer. Some exceptions were provided to take care of persons whose work required them, in the normal course, to remain outside of Canada on business, or those entering the employ of any government abroad. The Regulations, which have been rigidly administered, have stopped a source of loss of manpower to employment in other countries.

With the concurrence of the Unemployment Insurance Commission, by an order in council dated September 4, 1942, the organization of the commission was made part of the Department of Labour, under the title of the Employment Service and Unemployment Insurance Branch of the department. The change was made mainly for the purpose of administering Selective Service. At this time there also took place a great expansion of the personnel, and regional and local offices of the Branch, in order to deal more effectively with the increased work involved in administering the greatly extended Regulations.

The next change in the Regulations, and the last major change, was made in January, 1943, when all Regulations previously made that dealt with employment, including agricultural employment, technical personnel and labour exit permits, were consolidated into one set of Regulations which became known as "The National Selective Service Civilian Regulations". Minor changes were made, but substantially they remained the same as those introduced in September, 1942.

It may be noted in dealing with this consolidation of the Regulations in January, 1943, that the foundation was laid for a greater degree of compulsion in directing men to specified employment—a point to which more specific reference will be made later. Under the amended Regulations, persons 65 and over were not further covered.

Throughout the entire term of the civilian Selective Service Regulations, certain persons or groups of workers, while following certain specified callings, have been exempted from control. These have included employees of provincial governments; persons employed in agriculture, fishing, fish processing, hunting or trapping; ministers, priests or other clergymen; nurses while employed as such; domes-

tic servants while employed in a private home and school students working after school hours and on Saturdays and holidays. It will be noted, of course, that these persons, at such time as they might change the nature of their occupation or employment, would become subject in all respects to the Regulations.

In connection with the seven-day notice of separation introduced in September, 1942, as carried over into the consolidation of January, 1943, a number of exceptions were provided to take care of special cases. As an illustration it might be noted that in the case of persons employed in the building construction industry or persons working for less than one month, termination of employment could take place immediately, simply by giving a notice in prescribed form. From January, 1943, if the notice of separation provisions were contrary to any practice established by a collective labour agreement in force prior to September, 1942, the provisions of the collective labour agreement would prevail.

An amendment made in June, 1943, affecting school teachers, provided that they could not enter employment outside of school teaching (other than during vacation periods) without a permit from a Selective Service officer. Generally speaking, such permits are rarely granted. This was designed to do for schools what earlier provisions had done for agriculture, that is, to stabilize school teachers in their employment and to retain in school teaching those who, by training and experience, were fitted to render national service in that work.

Compulsory Employment

Reference has already been made to provisions that laid the foundation for compulsory directions to employment—a feature of the Regulations which has developed gradually from September, 1942, until the present date. Originally the only persons who could be compulsorily directed to employment by a National Selective Service officer were unemployed persons or persons not gainfully occupied. This provision has existed since September, 1942. The Regulations made in January, 1943, laid the foundation for the Compulsory Employment Transfer Orders—the first of which was made by the Minister of Labour in April, 1943. The procedure established was for the Minister to make an order that male persons within the age group callable for military service could not continue in any of the list of occupations or industries set forth in the Minister's order, unless they obtained a special permit from a National Selective Service officer. It was

further provided that on application for the necessary special permit or at any date thereafter, the Selective Service officer might direct the man to employment with a higher priority. From time to time further orders were made by the Minister that widened and extended the list of occupations and industries from which men might be directed to more essential employment. A change was made in the age group subject to the orders by abolishing the reference to the age classes subject to military service, so that thus, later, the compulsory employment transfer orders were made to apply to all men who had passed their 16th birthday and who had not passed their 41st birthday.

The next extension of the compulsory provisions of the Regulations came in May, 1943, when a special order was made to deal with the coal mining situation. This provided that men with certain specified periods of coal mining experience or certification *must* be directed to coal mining employment, unless they were found physically unfit, regardless of their occupation at that time. A further Regulation was made to provide for the compulsory direction to employment of any male person between 16 and 65 to fuelwood cutting, fishing, fish processing and coal mining. This provision, it will be noted, is very wide with respect to the group who may be directed. The latest compulsory feature of the Regulations deals with male persons examined and rejected as physically unfit for military service. These persons may be directed to any high priority employment by a Selective Service officer.

In order to ensure that hardship would not be suffered by persons compulsorily directed to employment, the Regulations provided a right to reinstatement in their original employment on the completion of the work to which these men were directed. This placed the directed civilian worker on the same footing as a man undergoing active military service, in respect to reinstatement in former employment, and for this purpose the provisions of the Reinstatement in Civil Employment Act, 1942, were made applicable. It may also be noted that this right of reinstatement was available to all persons compulsorily directed to employment under any of the additional compulsory features of the Regulations, which will be noted immediately.

In all compulsory directions to employment, special safeguards were set up to ensure that the new employment would be suitable to the health, experience, family and financial obligations of the male employee concerned. As already indicated a right of reinstatement was provided. As will be indicated later, a right

of appeal from such directions was provided. Special procedures were established in order to determine the worker's physical fitness for the proposed employment. All these and many other means were taken to minimize the hardships which might ordinarily be expected to result from these compulsory features of the Regulations.

It will be seen that there has been a gradual widening of the compulsory features of the Regulations from that limited to unemployed men, until it reached a large group of men employed in various occupations. It is noteworthy that these compulsory directions were resorted to only when the available supply of manpower for high priority industry, offering voluntarily, had been exhausted, and it had become necessary to take employed men from certain non-essential or low priority occupations and place them in employment of higher priority.

Amendments to the Civilian Regulations, effective from March 20, 1945, make the following modifications in the provisions as then in force:

- (a) The seven days' notice of separation requirement is to be subject to these qualifications—
 - (i) notice is to be waived where a break in operations is brought about by a power shortage;
 - (ii) Selective Service Officers may shorten the seven days if a temporary lay-off appears necessary through circumstances beyond the control of the employer;
 - (iii) instead of the employer having the right to make temporary lay-offs without notice to a maximum of 14 days in a six-month period, the employer will be required to apply to a Selective Service Officer on each occasion for a reduction of the seven-day rule. Before ruling the Selective Service Officer will be required to consult with the union where the employment is covered by a collective labour agreement.
- (iv) Where an employee is laid off for a temporary period, and is not to be taken back by the employer (that is, is later to be laid off permanently) the employer must pay him six days' wages or salary in lieu of notice.
- (b) In high priority industries, where male employees have been "frozen", local Selective Service Officers will have authority to remove the "freeze", but the employer's labour priority will remain unchanged by local action.
- (c) Every employee, whether a trade-union member or not, will be entitled to have his case reviewed under the terms of any collective labour agreement in force on the job: Previously, only union members were so dealt with, while non-members'

cases went before a Selective Service Officer.

- (d) Any person in employment contrary to the provisions of Selective Service, will now be regarded as "unemployed" for the purpose of the Regulations, and may be directed to essential work.
- (e) The penalty for non-compliance with a direction of a Selective Service Officer to a man to accept work, was previously that the man might be sent to an Alternative Service Work Camp. While direction to such a camp remains as a penalty, lesser penalties of fine or imprisonment are added as options in these cases.
- (f) Selective Service Officers are given authority to direct any male person, 16 to 65 years of age, whether already employed or unemployed, to a job in agriculture.
- (g) In connection with labour transfers, the Minister of Labour is given authority to authorize the payment of workers' transportation and the removal expenses of workers' families, in such areas and during such periods as he may approve.
- (h) As some employers have failed to fully pay in connection with the employment of conscientious objectors, summary means of requiring payment through court action were provided.

The announcement of these amendments to the Regulations stated that in part they were designed to overcome operating difficulties which had come to light, while in part also they were to make the Regulations more flexible in order to meet changing employment conditions, and conditions anticipated at the close of European hostilities.

Restrictions on Separation from Employment

All the provisions for getting men into employment were not totally effective without a companion provision to make it difficult or impossible for men to leave high priority employment. Consequently in September, 1943, an amendment was made to the Regulations to provide that men employed in "designated industries" coming within the two highest priority ratings could not terminate their employment or cease to perform their duties without first obtaining the permission of a National Selective Service officer. In ordinary practice such permission was refused unless special circumstances existed. This provision is sometimes known as the "freeze in employment" and, as indicated by the use of the word "freeze", was intended to slow down the turnover of labour in the most essential industries. These provisions do not apply to women employed in the "designated establishments," who may terminate their employment in the "designated establishments" by giving the customary seven days' notice of separation.

Agricultural Employment

Since the beginning of the war the agricultural population had been steadily draining away into the armed forces and into war industries which offered high remuneration. This was a serious matter in view of the urgency of keeping up the supply of foodstuffs. Approximately 400,000 men and 100,000 women had already left the farms before March 23, 1942, when Selective Service was established. As already mentioned, special provisions for stabilizing agriculture formed an important part of the original National Selective Service Regulations when introduced in March, 1942.

At the beginning of the war farm workers had been accorded the same treatment as any one else in regard to postponement for military training. In the spring of 1941 a degree of stabilization was achieved when mobilization boards were asked to grant postponements to farm workers if such postponements were considered necessary to maintain farm production. In the spring of 1942 an order in council was made that amended the National Selective Service Mobilization Regulations by including a provision which gave special consideration to the postponement of essential farm workers, although they might continue to enlist as volunteers where they chose to do so. These amendments also provided that postponements were to be given "until further notice," whereas definite time limits were placed on postponements given to workers in other occupations.

In June, 1942, when the Regulations made it illegal for any man or woman to take a job without the permit of a Selective Service officer, workers taking jobs in agriculture were exempted. Farmers were obliged to remain in agriculture, except under special conditions. For instance, leeway was allowed to accept essential non-farm employment in the off-season: in fact, positive encouragement in this regard has been given. Under the revision of January 19, 1943, farmers might then accept seasonal employment outside an urban municipality for not more than 60 days in any year, but only when such employment would not interfere with agricultural production. For employment of more than 60 days in a year, or if they wished to take employment in an urban municipality, a permit from a Selective Service officer become necessary for any worker from agriculture.

During the autumn of 1942 the first large-scale campaign to enlist farmers for off-season work in other essential industries was launched. Permission to allow men from farms to enter mining and logging employment was granted, but an expiry date ensured their return to agriculture in time for spring work: those abiding by the Regulations continued on postpone-

ment of military training, if already postponed. Even as early as 1941, joint action under agreement was taken by the federal government and some provinces to ensure the availability of workers for agriculture.

In the spring of 1943 farm labour agreements were entered into by the federal government with all the provinces. Supplementary to this federal-farm labour program, extensive plans were made by Selective Service to recruit and place help on the farms in each province, especially to endeavour to provide sources of labour not usually available for this industry. The Minister of Labour was authorized to use prisoners-of-war and conscientious objectors on the farms. Arrangements were made between the Department of Labour and the Department of National Defence to assign soldiers to temporary farm duty during the harvest, and members of the armed forces were given compassionate leave to return to their own or relatives' farms. Long distance movements of farmers and others for harvesting have been a regular feature of farm labour recruitment for harvesting since 1942. Thus men have been moved from Ontario and Quebec to the Prairies, from Saskatchewan to Ontario and women from the Prairies to British Columbia—with the moves made to dovetail harvesting in various areas.

As already noted, in April, 1943, the Minister of Labour announced the first Compulsory Employment (Transfer) Order. It was carefully provided that those with previous farming experience should be directed from other employment to work on farms, if at all suitable.

In order to control the movement of manpower from food production farms to tobacco farms in Ontario, an amendment to the Regulations was made on August 6, 1943, that provided that no male person between the ages of 16 and 65 might enter employment on a flue-cured tobacco farm between July 16 and October 15 in any year without a permit from a Selective Service officer. In 1944 the administration of this provision was greatly extended and strengthened by the establishment of additional Employment and Selective Service offices in the areas of Ontario affected.

Farm Workers for Other Industries

Reference has been made to the fact that in the autumn of 1942 a campaign was conducted to obtain men from the farms for the winter to engage in other essential industries. Similar campaigns have been staged in subsequent autumns. The number of men from the farms obtained each year has been estimated to run well over the 100,000 mark. However, areas where dairying and stock farm-

ing prevail have been omitted from the can-vas, and all precautions possibly have been taken to avoid removing men from winter agricultural employment where a decrease in farm production might be caused by their absence. Logging and pulpwood cutting have benefited heavily from the winter services of farmers, as have also coal and metal mining, heavy steel, meat packing, grain handling, food processing and other essential employments beset with labour shortages. Farm workers on postponement of military training have carried their postponement with them, so long as they observed Selective Service requirements in regard to permits, engaged at approved essential work and returned to agriculture as needed in the late winter or spring.

Meat Packing

In 1943, because of a shortage of feeds, some farmers found it necessary to slaughter many of their cattle to an extent that the meat packing houses became congested. The shortage of manpower, already serious, became acute during the late summer. In October the director of National Selective Service announced that the military call-up of men in the meat packing industry was postponed. The industry had lost 21½ per cent of its manpower to the armed forces up to that time, and the prospects were that during the period from October, 1943, to January, 1944, the processing turnover would reach an all-time high record. In May, 1944, the situation was again critical, and the question of meat packing once more came to the fore. Mobilization boards were asked not to call up packing house employees for military training, and the Department of National Defence agreed to give leave to men who could be spared from the army for this essential work.

Fisheries

As already mentioned, in July, 1943, in order to maintain a normal supply of fish, both fresh and canned, the Regulations were amended to authorize Selective Service officers to order men to work at fishing and fish processing.

Coal Mining

In May, 1943, a proclamation was issued that declared a national emergency to exist in regard to coal supply. Earlier efforts made by National Selective Service, both in regard to the recruiting of experienced coal mine workers and inexperienced labour, and in regard to the return from the armed forces of experienced coal mine workers, had not maintained working forces at the level required to produce the tonnage necessary for Canada at war.

Therefore, when the emergency proclamation was issued, new regulations were adopted to build up working staffs of the coal mines: These were additional to the previous authority to direct anyone who was at the moment out of work to the coal mining industry. The new regulations placed the onus on every employer other than coal miners regardless of his industry:

- (a) to notify his employees of the Regulations and to assist in discovering among his employees any who had previous experience as coal mine workers;
- (b) to report on any coal mine workers in his employ.

For this purpose a "coal mine worker" is described as anyone who, since January 1, 1935, has worked under provincial certificate or licence in or around a coal mine, or who since the same date has been employed for a total of at least 24 months in the production of coal (except at office work). Coal mine workers, working at other than coal mining, were required to disclose their previous experience to their present employers.

Selective Service officers were authorized to require former coal mine workers to report for interview and to accept work at a coal mine. Also, Selective Service officers might require any man in any employment subject to Mobilization Regulations but rejected for military training to accept employment at a coal mine. No coal mine operator may terminate the services of any coal mine worker without the permission of Selective Service, nor may any coal mine worker leave employment at a coal mine without similar permission. Present and future coal mine workers are guaranteed postponement of military training to a future date which has been renewed from time to time; and it was announced that no coal mine worker would be accepted for voluntary enlistment in the armed forces.

It was declared illegal for any employer (except a coal mine operator) to solicit for employment or hire any ex-coal mine worker. Regardless of any federal or provincial law, male persons at least 16 years old, and female persons at least 18 years old, were declared eligible for employment as surface coal mine workers. War emergency training classes were made available for training men for coal mining. Ex-coal miners returning to the industry were promised certain financial compensations, including a board allowance and a guarantee of minimum working time.

Metal Mining

On October 21, 1942, the Minister of Labour announced that special consideration would be given to requests for postponement of military

service for men engaged in base metal mines and in iron and steel foundries. Special efforts were made to retain men in these industries. In Ontario, as the labour shortage became more serious, men were transferred on a voluntary basis from gold mining, and women were recruited for work in nickel and steel plants. The employment of women required the authorization of orders in council under the War Measures Act, since the Ontario Mining Act does not permit women to be employed in or about mines except in a technical, clerical or domestic capacity. Regulations issued under these orders set forth the occupations at which women may be employed and their conditions of work, with steps being taken, in co-operation with the provincial government, to safeguard the welfare of any female employees of the mines.

Longshoremen and Seamen

In order to ensure the regular despatch of the heavy volume of war materials on their way overseas, two orders in council were made in July, 1943, with the purpose of stabilizing the employment of longshoremen in eastern Canadian ports. One order compelled the men to remain in their jobs, and the other established a mobile labour pool for use in emergencies. At the close of navigation on the Great Lakes in 1943 special arrangements were made to control the lay-off of navigation workers in order to make certain that they would be available to return to their work at the opening of navigation the next spring. Similar arrangements were made in 1944.

Recruitment of Women Workers

It will be observed that apart from women being required to observe standard Selective Service procedures in respect of permits to seek and accept employment and in regard to notice of separation, the employment of women has been conducted almost entirely on a voluntary basis. At the time that Selective Service regulations were first adopted in March, 1942, it was recognized that the main reservoir of human power then remaining was made up of woman power. In view of this fact a women's division, under a woman as an associate director of National Selective Service, was one of the first operating divisions of Selective Service to be established. Under the direction of the women's division, numerous voluntary campaigns have been conducted to recruit women for full-time and part-time employment in manufacturing, for hospitals and for a large number of other occupations. In two cases, however, women were required by regulation to register at the local Employment Offices.

In September, 1942, women from 20 to 24 were compulsorily registered, while in March, 1943, all graduate nurses were required to register similarly. All campaigns have been related to other simultaneous endeavours of National Selective Service, and their total effect has been to add very substantially to the numbers of women engaged in gainful occupation, more especially in high priority industries. The general result has been that from the beginning of the war the number of women gainfully occupied has shown an increase of about 400,000—to a total of more than 1,000,000. As an assistance to married women in war plants, Selective Service has aided the provinces of Ontario and Quebec in setting up facilities for the day care of children of working mothers.

Right of Appeal

From the beginning of the National Selective Service Civilian Regulations a right of appeal from any decision, order, direction or ruling made by National Selective Service officers has existed. Originally the appeal lay to the divisional mobilization board. It was recognized, however, that these boards were extremely busy in dealing with mobilization matters, so that in September, 1942, a change was made to have all appeals taken to the courts of referees established under the Unemployment Insurance Act. The number of appeals has gradually increased as more of the compulsory features of the Regulations have been invoked. This has resulted in an increase in the number of courts of referees. The March, 1945, amendments to the Civilian Regulations made changes in the appeal procedure. The amendments removed any existing doubt as to the jurisdiction of the Courts of Referees to hear any type of appeal arising under the Regulations. Also, previously no second appeal was provided for, but a rehearing of a case may now be allowed, where, for example, additional facts are disclosed shortly after the court has reached its first decision.

Co-ordination with the Mobilization Division

In administering the National Selective Service Civilian Regulations several measures have been taken to co-ordinate the work of civilian Selective Service and that of the military call-up. These measures have been chiefly to ensure that Employment and Selective Service offices, when issuing permits for employment, check the applicant's status with relation to the Mobilization Regulations. This has resulted in reports being made to the Mobilization authorities covering persons who had temporarily escaped their notice. J.

this same connection it is of interest to note that the military call-up, originally administered by the Department of National War Services, was transferred to the Department of Labour in December, 1942; the name of the Regulations under which the call-up operates was changed to the National Selective Service Mobilization Regulations. The Regulations, like the civilian, have been administered under the director of National Selective Service, since the date referred to, but by a separate field organization.

Lay-offs

Just as plans have been made to get men and women into essential war production and to retain them in such employment, likewise plans have been made for the reverse movement when their services are no longer required in the production of munitions of war. Procedures have been established to cover lay-offs to ensure that they will be conducted in an orderly fashion and to ensure further, with respect to men, that the first to be

released will be those who are eligible and physically fit for call under Mobilization Regulations.

Advisory Boards and Committees

Throughout the administration of the Regulations the Minister of Labour has had the assistance of a National Selective Service Advisory Board, and later of five regional boards (at Moncton, Montreal, Toronto, Winnipeg and Vancouver) set up in each region of the unemployment insurance administration. In addition the local, regional and national employment advisory committees, established under the Unemployment Insurance Act, have contributed much to the handling of labour supply problems. All of these advisory boards are made up of representative citizens representing labour, employers and the public generally, all of whom give of their time without remuneration and thus help to maintain a democratic spirit in Canada's total mobilization for National Selective Service.

Manpower and the Alcan Highway

The following is a digest based on an original report prepared by Mr. Bruce Ballah for "Manpower Review", an official publication of the United States Department of Labour.

IN 1942, in order to meet the threat of Japanese designs on Alaska, the Canadian government, in agreement with the government of the United States, commenced that undertaking now known as the Alcan Highway. The beginning of the road was at Dawson Creek, B.C., 500 miles from Edmonton, Alberta. The road had to be pushed through mountain and muskeg to Fairbanks, Alaska. The Canadian section of the highway was approximately 1,257 miles.

Fifty-two Canadian and American contractors were given the job, and almost overnight the little town of Dawson Creek mushroomed into a centre of vital importance. Thousands of freight cars carrying road construction outfits poured in from all parts of Canada and the United States.

Because of the heavy pressure of machinery and passengers, the Northern Alberta Railway was forced to extend its facilities. This aggravated the labour situation as it necessitated bringing in more machinery—and more men. The Public Road Administration (U.S.A.) recognizing the urgency of the work, transferred from the Civilian Conservation Corps, over 300 tractors equipped as scrapers and bulldozers, over 1,000 trucks, 125 air compressors, and 200 electric plants and 65 repair shops.

(Mr. Ballah arrived in Dawson Creek in the early summer of 1942, having been sent by the District office of the Unemployment Insurance Commission at Edmonton to establish an Employment Office. Within a few days he had opened a small office in one of the camp buildings. His furniture consisted of an improvised table with nail kegs for seats. This office was also for a time his bedroom.)

Diverse Labour Problems

Mr. Ballah's duties were manifold. One of the greatest problems was trying to satisfy all the contractors' demands for labour. In order to facilitate the distribution of workers in proportion to the demand, he had to take a trip over the highway route about twice a week. In this, he was accompanied by the chief engineer representing the contractors under the Management Contractor—the R. Melville Smith Company. These trips were arranged prior to each train arrival, which at that time was on Mondays and Thursdays. Each time upon returning to Dawson Creek, Mr. Ballah immediately wired the Edmonton office advising them of the labour requirements for the various contractors. In turn, the Edmonton office would wire him the exact number of workers coming into Dawson Creek. In order to get the men out to the projects as soon as possible, each contractor arranged to have a stake-body truck meet the train and convey them to their place of work.

Labour problems were numerous. One of the hardest to solve was the adjustment of men straight from home to a foreign environment. Often they became homesick, with the consequence that it took tact and diplomacy to get them to remain on the job. On the other hand, there was the more experienced type of worker used to "the Fresno days" who fitted right into the work. Then, of course, there were the young school lads, eager and full of vim, who considered it a grand adventure and imagined they could become experienced operators, cooks and truck drivers over night. These, however, did not constitute a very serious problem.

For the first few months Mr. Ballah did not have an assistant and quite often he worked twenty-four hours a day. Later, however, he secured the services of two female assistants—a clerk and a stenographer.

Selective Service Introduced

In September, 1942, Canada inaugurated National Selective Service with the consequence that heavier duties were imposed upon the Employment Offices. Up until this time, the Dawson Creek office was operating as a sub-office of Edmonton. In October, 1942, it was made an entirely separate office.

Gradually the highway began to take shape. As the work progressed, it was decided to put on an all-night shift. Crews began working from 12 to 18 hours a day. The highway had to be completed on schedule. This, naturally, meant that the small staff at the Employment Office had to double its efforts in order to obtain the required labour.

It was about this time that the United States Army placed an order for 125 skilled mechanics, machinists, welders, and other qualified workers. They were wanted immediately, but as skilled men were in heavy demand all over Canada, they were difficult to obtain. The army authorities granted the Employment Office three days, to secure the required workers. Head Office was requested by wire to establish a top priority for these types of tradesmen. This was granted, but it means taking skilled workers out of munitions plants, aircraft factories and other essential war industries.

This introduction of civilian workers led to a serious difficulty. Army men were working in the same shop doing the same sort of work as the highly paid civilian, only doing it at army rates of pay. Unfortunately, there was no way of solving this problem.

During the latter part of October, a male clerk was added to the staff of the Employment Office. This made it possible to do more effective employer-relations work. Keeping a

friendly relationship between employer and employee meant many extra hours of hard work, but it assisted greatly to "man the job and keep the man on the job".

October brought cold, wet weather with heavy rains. The earth turned to gumbo, and machines and trucks became stuck. This created another serious problem as the base camp could only accommodate about 100 men, and 400 had to be fed. To accomplish this, three sittings were arranged for each meal. To complicate matters, the entire cook-staff threatened to quit, but tactful action by the Employment Office corrected this difficulty.

With the coming of winter temperatures ranged from 60 to 70 degrees below zero. In order to keep the machines and trucks operating, fires had to be built under them to thaw out the ice.

Even inside, work was uncomfortable. Practically all that winter the office staff worked in their overcoats.

With the coming of spring, more and more workers, both male and female, poured into Dawson Creek, and with this increased activity came increased labour problems. Men who had served six months or more began to grow restless and wanted to go home. Some became discontented working with certain contractors, others failed to get along with their fellow-workers. The majority of these cases had nothing to do with an Employment Office, but the staff did its best to adjust such difficulties.

The contractors now had to disband their southern camps and move hundreds of miles north to "new section". This was quite a feat as there was only an old army tote-road upon which to travel. In addition, there were floods, flies and mosquitoes to add to the discomfort.

Dawson Creek at this time began taking on the appearance of a typical frontier town. Cafes, which had increased in number from three to twenty, were packed to capacity. Often the doors had to be locked to prevent overcrowding. Prices asked for meals became exorbitant.

Just about this time, heavy rains caused a very serious flood in the Muska River area. The water rose over forty feet, destroyed a 500-foot bridge, washed out the highway and sent machinery whirling down stream for many miles.

Spring gave way to summer, and the Employment Office staff of four had now handled over five thousand workers. During the month of August, workers were pouring in at an average of 200 a day. This meant that the staff had to work at full pressure. However, despite the long hours with no extra remuneration,

neration, the staff carried on without complaining. It was quite evident that they had the interest of the job at heart. By the end of that month the office had handled a total of over 12,000 workers.

Construction Work Curtailed

September saw a slackening of recruiting due to a change in policy of construction routes. This was attributed to the improved situation in the Aleutians. At this time, the Public Roads Administration issued instructions that all construction must be curtailed and preparations made to withdraw by November 15, 1943. This, unfortunately, had a bad effect on the workers as they immediately wished to quit. There was only one solution—and that was to “freeze” them on the job.

Naturally this was strongly opposed and many delegations of protesting workers came to the Employment Office. It was pointed out to them that the employers had been pretty generous, and now, when they were needed most, they just couldn't walk out and leave them. This process of reasoning succeeded in settling the difficulty.

By this time, the U.S. Engineers' Division was making arrangements to carry on the highway after the departure of the contractors. Workers wishing to remain could do so by notifying their camp superintendents.

The final move was the bringing out of the contractors' equipment. It looked like the return of 1942, with the highway clogged day and night with traffic. This was an excellent test for the highway. There were concentrated loads weighing up to sixty tons of floats.

In December, Mr. Ballah made a round trip of about 1,800 miles on the highway. All along the route camps were being vacated.

The problem of retaining the 1,200 workers for maintenance and administrative staff was one of great concern and called for many hours of work and planning by the staff of the Employment Office, as it meant there had to be a guarantee of the same working conditions as were in effect during the construction period. The guarantee was for two months, and in March, 1944, working hours and rates of pay were placed on a maintenance basis. As this meant a reduction in wages, it became quite a problem to hold the men. Only a comparatively small staff has been retained on the highway.

Mr. Ballah paid tribute to the splendid cooperation received from the United States government in the performance of this great task. This helped greatly in strengthening friendly relations between the American and Canadian workers.

Good Work Recognized

Thus concludes the record of a remarkable achievement. Mr. Ballah, in recognition of his outstanding service in this difficult employment duty, was awarded a scroll of honour by the government of the United States.

Mr. Ballah entered the public service with the Alberta government as a junior clerk in the Labour Department in 1926. In 1935, he was transferred to the provincial employment service as a junior interviewer. In 1941, when the federal government took over the employment service, Mr. Ballah continued in that position until he was transferred to Dawson Creek.

Legislative Proposals of Labour Organizations

DURING the month of April three major Canadian labour organizations submitted proposals for legislative action to the Dominion Government. Briefs dealing primarily with wartime legislation and with matters affecting post-war labour and employment conditions

were presented by the Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Canadian and Catholic Confederation of Labour. A summary of the proposals follows:

Trades and Labour Congress of Canada

A DEPUTATION from the Trades and Labour Congress of Canada had its annual interview with Dominion Cabinet Ministers on April 23, in the Railway Committee Room of the House of Commons at Ottawa. In the absence of Prime Minister King, who was in San Francisco as head of the Canadian delegation to the World Security Conference, Hon. J. L. Ilsley, Acting Prime Minister, presided at the meeting. Other members of the Cabinet present were: Hon. Humphrey Mitchell, Minister of Labour; Hon. C. D. Howe, Minister of Reconstruction; Hon. Lionel Chevrier, Minister of Transport; Hon. A. G. L. McNaughton, Minister of National Defence; and Hon. Ernest Bertrand, Minister of Fisheries.

The memorandum of labour proposals was read by Mr. Percy Bengough, President of the Trades and Labour Congress of Canada. At the outset, the memorandum quoted a resolution passed at the Annual Convention of the Congress in October, 1944, the purport of which was a restatement of the pledge that there would be no strikes for the duration of the war emergency and that the Congress would continue to co-operate fully in the production of war supplies.

Wartime Labour Relations Regulations

While admitting that at the time of its introduction, P.C. 1003 was accepted as good legislation, it was claimed in the memorandum that recent rulings under the Order had revealed certain weaknesses and shortcomings which should be corrected. Objections were expressed specifically to the regulation "that certification will not be granted unless 51 per cent of the total number of employees have voted for the union" instead of "51 per cent of the votes cast". It was claimed that the latter is the procedure followed in all democratic elections and it was not anticipated that the Board would exclude employees "from coming under the Act as the result of

a legal, but not practical interpretation of 'persons employed in a confidential capacity'".

In the second place, it was the "considered opinion" of the Congress that "the Board as presently constituted is comprised of too many members". It was claimed that, as a result, it is unwieldy in operation and, in many cases, too much time elapsed before decisions were rendered. "To a marked degree", it was asserted, "the intent of the Act has been defeated by the interpretations advanced by company lawyers and accepted by a majority of the Board".

"To offset this growing tendency", it was suggested in the memorandum that a return be made to "the procedure previously followed in the Industrial Disputes Investigation Act" which, it was asserted, kept the investigations on a more practical plane, instead of the involved legalities and "muddled up procedure that has now developed".

A further criticism was offered with respect to P.C. 1003 in that instead of acting as "a deterrent to the operation of company unions. . . the very opposite has been the result. To eliminate this iniquity, we request that the Act be amended in a manner that will definitely prohibit company unions". It was also requested that the Act be amended to require all employees of the employer, or association of employers, to be members of a specified organization of employees. Then too, it was held that provision should be made for amending existing agreements either by negotiations, or through officers of the Department of Labour or a Board of Conciliation, following the serving of notice to revise specified clauses, rather than to involved termination of the entire agreement. Other amendments urged were the inclusion of employees of naval dockyards and similar Government services in the Order 1003 and that "the union shall be recognized and certified as the bargaining agency instead of the present procedure of naming individuals".

Wartime Wages Control Order

The Congress recognized the need of controls during wartime and that these could not be applied without causing some dissatisfaction. However, it was held that much dissatisfaction could be avoided if the Regional Boards and the National War Labour Board would speed-up their procedure and avoid unnecessary delays in arriving at their decisions. It was held that "a particularly bad feature in regard to this legislation is that all appeals from decisions of the Regional War Labour Boards have to be heard in the City of Ottawa". This was considered unfair to employees who were often not in as favourable a position as employers to meet the expense involved in employing counsel or in coming long distances to appear before the National Board. Periodic sittings of the National Board in all the provinces were suggested as a corrective.

Other amendments suggested in the Wartime Wages Control Order were: (1) that all three members of the Board be required to constitute a quorum; (2) that all meetings of the National and Regional War Labour Boards be open to the public; (3) that where the decisions of the National or Regional War Labour Boards are not unanimous majority and minority reports must be submitted; (4) that Section 23 be modified to permit an employer, without a direction from the National Board to increase a wage rate to an employee to the minimum wage rate established by provincial minimum wage legislation if such minimum rate is not in excess of fifty cents an hour, instead of thirty-five cents an hour as stipulated in the original order.

National Selective Service

The memorandum favoured the abolition of National Selective Service at the conclusion of hostilities, its functions to be taken over by the Dominion Employment Service. It suggested, further, that an agency be established, on which labour would have equal representation with employers, for the purpose of directing the withdrawal of controls as conditions and circumstances warranted it.

National Housing Act

The Congress complimented the Government for its efforts to improve housing. It recommended, however, that (1) "the National Housing Act be removed from the control of private banks and mortgage corporations and all loans made direct through a Government agency such as the Bank of Canada"; (2) the Government assume a larger share in the cost

of slum clearance; and (3) provide an adequate building code to prevent "jerry building" and thus insure "the erection of decent and modern homes".

Health Insurance

The memorandum drew attention to the recommendations made by the T. and L.C. to the select committee of the House of Commons in May, 1943, with respect to a national health scheme and suggested "that the time is long overdue for legislation of this nature". In view of the unwillingness of the provinces to surrender control in health matters, the Congress, while preferring a uniform plan covering the whole Dominion, concurred in the Federal Government's program of "Dominion grants-in-aid to the province for Public Health Insurance Acts". However, it was urged that there was need for a closer tie-up between unemployment insurance benefit and sick benefit, and "that any scheme of health insurance should include cash benefits to take care of time lost on account of illness". It was further urged that the coverage should include medical, dental, hospital and nursing benefits etc., and be available to all citizens, men, women and children.

Post-War Rehabilitation

The findings of a standing committee of the Trades and Labour Congress on Post-war Rehabilitation and Reconstruction were submitted with the memorandum. In its assurances were asked that the provisions of the Atlantic Charter would be fulfilled. The necessity of poverty was deprecated as intolerable in a modern civilization, and it was asserted that wages must be maintained at the highest possible level if we are to maintain purchasing power and develop our home markets. It was recommended further, among other things, that "no employed person in Canada under present conditions shall receive less in wages than an aggregate sum of \$1,500 a year"; the establishment of "a maximum forty hour work week in all branches of industry with the ultimate adoption of the six hour work day and five day work week with no reduction in earnings and provision for a further reduction in hours, if necessary, *without loss of income* to overcome possible periods of unemployment. . ."; two weeks holidays with pay with means of transportation to health and natural recreation centres at a minimum of cost; the raising of the school leaving age to at least 16 years and provision for free continuation courses up to and including universities; a more equitable and liberal system of old age pensions to commence at age 60;

the setting up of a National Planning Commission upon which labour would be equally represented to undertake the preparation of a national plan for post-war employment; legislation dissolving industrial cartels and monopolies; increasing unemployment insurance benefits to two-thirds of the workers' wages, or the adoption of the principle of granting workers subsistence allowances during any layoff periods; the provision of long term loans to countries that have been devastated by war so as to enlarge our export market; obtaining guarantees from purchasers of wartime Crown plants that the plants and machinery shall be put into operation "without undue delay for full scale civilian production"; and wherever possible and workable, "Government-owned plants, such as the Sarnia Synthetic Rubber plant, should be controlled and operated under a joint labour-management committee".

Shipping

Mr. Bengough suggested that Canada "does not stand high" in the matter of implementing conventions of the I.L.O., admittedly because of the decentralization of authority under the Canadian constitution. However, he argued that as Maritime shipping was under Federal control, the War Services Gratuities Act should be amended so as to include merchant seamen.

The memorandum urged further, that the Canada Shipping Act be amended to incorporate conventions and recommendations of the I.L.O., as follows:

- (a) Draft convention of hours of work and manning of ships.
- (b) Draft convention on individual liability of the ship owner in the case of sickness, injury or death of seamen.
- (c) Draft convention on sickness insurance for seamen.
- (d) Draft convention on minimum professional capacity for Masters and Watch-keeping officers on merchant ships.
- (e) Draft convention on holidays with pay for seamen.
- (f) Draft convention on minimum age for admission to work at sea.
- (g) Draft recommendation applying the terms of the draft convention on hours and manning to ships not covered by the draft convention, e.g., coastal, and inland water ships.
- (h) Draft recommendations on seamen's welfare in Ports.

Other Suggestions

Other matters touched upon in the memorandum were: (1) A nation wide apprenticeship system under a tripartite supervision of

Government, Labour and Industry was advocated; (2) Free transportation of enlisted men at regular intervals and more generous clothing allowances upon demobilization were urged; (3) The Government was requested to enact legislation to bring firemen who volunteered for overseas service under the War Service Gratuities Act; (4) Larger appropriations were favoured as an encouragement to industrial research; (5) Extension of Government efforts to have labour-management committees established in all industries in which the majority of the organized employees express a desire for such joint co-operation; (6) It was held that it should be made Government policy in placing contracts or orders for work that preference at all times be given to those employers who have labour agreements with their employees, and those who employ union workers and observe union conditions; (7) While complimenting the Government for including labour representatives on certain Administrative Boards and Crown companies it was urged that the policy be expanded to include all such Boards or companies; (8) Revision of Canada's Immigration Act was asked for so as to admit a greater number of immigrants, so long as such a policy in no way adversely affects living standards or the welfare of Canada's present population; (9) An extension of the franchise was suggested for all citizens over 18 years of age; (10) The principle of equal pay for equal work was invoked for all employees; (11) Adequate pensions and earlier retirement for railway workers were advocated; (12) An amendment to the Income War Tax Act was requested, raising the exemption to \$2,400 a year for married persons and \$1,000 a year for single persons. Objection was taken to the taxation of public utilities where such utilities are publicly owned and controlled; (13) The Government was asked to consider the re-establishment of standard time during the winter months.

Mr. J. A. Sullivan

Mr. J. A. Sullivan, Secretary-Treasurer of the Trades and Labour Congress commented on points raised in the memorandum. He asserted that delays in decisions of the National War Labour Board were causing unrest throughout the country and declared that some of the decisions when rendered were unsatisfactory. He asked that the Government co-operate in correcting the "deficiencies" of P.C. 9384 without further delay, if serious repercussions were to be avoided.

Turning to the Labour Code, P.C. 1003, he objected to the procedure in the Marconi case where the Board declined to accept jurisdic-

tion "although 90 per cent of the workers were engaged in war production". (The text of this decision is given in full on page 669 of this issue.) He felt that co-operation on the part of the Government in effecting the necessary changes in these two orders would be of assistance to unions in their desire to promote industrial harmony.

Reply of Minister of Labour

In his reply to the delegation Honourable Humphrey Mitchell, Minister of Labour, pointed out that collective bargaining was normally carried out under the British North America Act and that P.C. 1003, was originally drawn up and presented to the provinces for suggestions. Some 170 such suggestions were received and so far as possible P.C. 1003 was drafted to conform with these. The Minister was of the opinion that the filing of briefs should usually be sufficient in appeal cases, without reference to legal talent. He said that he had been unsuccessful in arranging a Dominion-Provincial conference on labour problems during March as some of the provincial governments were busy with their sessional duties and others were preparing for appeals to the electors. He stated that the War Labour Boards had handled many thousands of cases and it was perhaps inevitable that some anomalies would occur.

He agreed "one hundred per cent" with the deputation in the matter of National Selective Service Regulations. "They were necessary in wartime, but the quicker we get back to the civilian code after the war the better", he said. Continuing, he asserted that there was never any intention that Family Allowances should be considered as a supplement for wages and that the present Government was the first to establish the principle of holidays with pay. This principle was becoming increasingly established and some 900,000 workers were now benefiting as a result. He thought that the Government had been reasonably successful in the establishment of labour-management committees. Notable progress in this regard had been made in the construction industry.

With respect to immigration Mr. Mitchell gave as his personal opinion that "we must fill up our empty spaces or we will lose them". He cited the example of the United States where a generous policy with respect to immigration in the past had proven a source of great strength in time of war in its mass production achievement.

In the matter of apprenticeship he pointed out that eight of the nine provinces have entered agreements with the Federal Government with a view to setting up substantially uniform legislation.

Concluding his comments, Mr. Mitchell complimented the Congress on its memorandum and promised that it would be given careful consideration. He asserted that the Government had set up machinery, which he felt would prevent inflation and economic breakdown such as occurred following the First World War, "providing the Government has the co-operation of all classes of our people".

Hon. C. D. Howe

Honourable C. D. Howe, Minister of Reconstruction, asserted that he was "struck with the deputation's common-sense approach to immigration". There was, he asserted, a shortage of unskilled labour in Canada which judicious immigration would help to correct. He referred to "the tremendous back log of work—I can't see any shortage for months to come", he declared. Cancellation of wartime contracts had not been in excess of 35 per cent, he continued and "by many devices set out in the Government's White Paper, we should carry over the reconstruction period and absorb the men returning from overseas". Mr. Howe concluded by saying that labour would have its share in solving reconstruction problems as they arose from month to month.

Hon. J. L. Ilesley

Honourable J. L. Ilesley, Acting Prime Minister and Chairman of the Conference, promised that the petitions of the deputation would be given the careful and respectful attention of the Ministers concerned. He stated that "for at least a year the Government had given close study to the problems of employment with the emphasis on high employment" as was evidenced by the White Paper which had been issued early in April. He declared that such employment at high wages implied a stable economy. However, he affirmed, "price control is not possible without a considerable degree of wage control", and these controls will be necessary to retain stability after the war. He enumerated three factors entering into the employment picture: (1) the degree of stability already established; (2) the fact that the war is ending in stages; (3) increase in productive capacity—"know how" in industry, improvement in management and in the skill of workers.

Mr. Bengough in his concluding remarks asserted that the workers appreciated the fact that the Government had been in control during an extremely difficult period and that, on the whole "its batting average has been high".

Canadian Congress of Labour

REQUESTS pertaining to post-war planning, the Labour Code and wage control were prominent in the memorandum of legislative proposals submitted to the Dominion Government by the Canadian Congress of Labour in the Railway Committee Room of the House of Commons on April 24. The delegation was headed by Mr. A. R. Mosher, President of the Congress, and included members of the Congress executive and representatives of various affiliated unions.

Receiving the delegation were the Hon. J. L. Ilsley, Acting Prime Minister; Hon. Humphrey Mitchell, Minister of Labour; Hon. Ernest Bertrand, Minister of Fisheries, Hon. Brooke Claxton, Minister of National Health and Welfare; Hon. A. G. L. McNaughton, Minister of National Defence; and Hon. Lionel Chevrier, Minister of Transport.

Mr. Mosher expressed his regret at the absence of the Prime Minister but wished for him wisdom and strength as leader of the Canadian delegation to the United Nations Conference at San Francisco.

The memorandum was read by Mr. Pat Conroy, Secretary of the Congress.

Foreign Policy

Opening with proposals on Canada's foreign policy, the brief urged the desirability of Canada playing a full part in promoting international co-operation for the establishment and maintenance of peace, and recommended that Canada join the Pan-American Union and enter into an agreement with the U.S.S.R. Hoping for the success of the San Francisco Conference, the Congress pointed out that Canada had become through its war effort the leader of the small nations, and "warmly commended the attitude and the opinions expressed by the Prime Minister" recently in the House of Commons as to Canada's responsibilities in this connection.

Post-War Planning

Referring to the White Paper on *Employment and Income* presented to Parliament recently by the Minister of Reconstruction, (see p. 616) the Congress expressed the view that although it represented a "certain measure of progress", the program outlined was "far from adequate to meet the situation which will arise after the war is won".

The Congress requested that the Government give careful consideration to the resolution on post-war planning adopted at its convention last October (L.G., Nov., 1944, p.

1426). This resolution asserts the "fundamental right of every Canadian worker" to a job at good wages, a decent home, adequate medical care, social security, and education; and asks for

(1) full representation of labour on all planning commissions;

(2) the establishment in all industries of industrial councils composed of representatives of labour, industry and Government to plan and administer the reconversion program;

(3) lay-off pay in war plants;

(4) planning for the re-absorption in peacetime employment of war workers and service men and women, with provision if necessary for a drastic reduction in hours of work, with no reduction in total earnings;

(5) release by the Government of materials for peacetime production as war conditions permit, and reconversion of plants no longer needed for war purposes;

(6) education, training, and guidance for returned men and women.

The resolution asks the Government, in carrying out the program, to "encourage and expand the principles of social ownership", retain whatever controls are necessary during the transition period, give preference to companies operating under union agreements when awarding contracts, and amend the B.N.A. Act where necessary to ensure the enactment of the proposals.

Veterans' Seniority

The brief made reference to seniority for ex-members of the armed forces in the following terms:

The Congress wishes the Government to know that it has adopted a policy with respect to seniority for veterans who return to their previous employment, as well as for those who will enter industry for the first time, the general principle being that service in the armed forces will be regarded as equivalent for seniority purposes to service in the plant or industry in which the veteran is or becomes employed.

In this connection, however, the Congress is strongly of the opinion that the displacement of civilian workers by veterans will not solve either the individual or the national problems involved, and that the solution must be found in the provision of full employment for every citizen who is able and willing to work.

The brief added that the Government "must recognize that its primary obligation in the post-war period is to ensure employment, no matter what obstacles may stand in the way".

Labour Code

The brief dealt in detail with the Wartime Labour Relations Regulations, P.C. 1003, setting forth the Congress proposals in the form of a series of specific amendments suggested for various sections of the Regulations.

The memorandum stated that the adoption of the Regulations in February, 1944, and the establishment of the National and Regional Labour Relations Boards, "represented a considerable forward step in labour relations in Canada", but that experience had brought out a number of defects.

The following were among the changes proposed:

(1) procedure for the certification of unions instead of individuals as bargaining agencies;

(2) provision that in a union representation vote, a majority of the employees participating in the vote shall be sufficient to constitute the decision, providing that a majority of the eligible employees actually participate;

(3) the outlawing of company unions;

(4) provision that the Board may order the inclusion in agreements of union security clauses such as maintenance of membership, union shop or closed shop;

(5) provision that an employer be required to institute the check-off of union dues upon request from a union representing the majority of the employees, and upon the written authorization of individual employees;

(6) hastening of the procedure under which Boards of Conciliation are established;

(7) provision that the grievance procedure required to be inserted in an agreement under the present terms of the Regulations be extended so as to cover all grievances and not merely those arising out of misinterpretation or violation of the agreement.

In support of its request that provision be made for union security, the Congress declared:

There has been an increasing recognition by employers and governments that, if labour unions are to perform their utmost service in the interests of the workers, the industry concerned, and the public, they must be afforded such measures of security and stability as will enable them to function effectively.

It is noted that, when a worker obtains employment in an organized industry, he accepts the wages and working conditions which have been established by agreement between the employer and the representatives of the employees. If such conditions include a requirement that employees eligible for membership in the union must become members of the union as a condition of employment, this requirement is in no way different from any other condition, and there is complete justification for its application to every

employee. The same principle applies equally to employment in an industrial undertaking which is operated by a Crown Company or other government body.

The Congress asserted its belief that on the whole the National Board had administered and interpreted the Regulations in a commendable manner. Certain decisions were considered unsatisfactory but this difficulty could be overcome if the proposed amendments to the Regulations were adopted.

It was suggested that the Order in Council as amended might form the basis of a permanent labour code, with provincial legislatures passing concurring legislation and the Government taking steps to have the B.N.A. Act amended if necessary.

Wage Control

The Congress strongly recommended that the Wage Control Order, P.C. 9384, be amended "so as to lessen the virtual prohibition against wage increases". It was felt that the Order should be changed so as to permit the raising of sub-standard wage-levels, and the approval of wage-increases "where it can be shown that, either on an absolute or a comparative basis, the present wage-levels are too low".

The interpretation and administration of the Order by the National War Labour Board were also criticized. Applications for wages increases were "almost invariably" dismissed; and in some decisions there had been not only an inadequate consideration of the facts presented, but also a failure to recognize both general and specific conditions affecting the desirability of granting wage increases. Accordingly the Congress requested that the personnel of the Board be changed.

The memorandum stated however that there was "no objection to the principle of wage control to the extent that is required to prevent inflation", and congratulated the Government on the success of its price control policy.

Other Recommendations

Other recommendations of the Congress included the following:

Greater representation of labour on government bodies, including the Wartime Prices and Trade Board, and crown companies and other bodies associated with the Department of Munitions and Supplies.

Continuation of labour-management production committees into the post-war period.

That the Federal Government, by agreement with the provinces, undertake a greater part in the field of education, and make available financial assistance towards the raising of standards.

That the Government ensure consideration

of I.L.O. conventions and recommendations by provincial governments, and report subsequent action to the I.L.O.

Inclusion in national health legislation of provision for cash benefits to maintain income during interruption of earning power on account of illness; emphasis on preventive work; construction of new medical schools, urban and rural hospitals, sanatoriums, and homes for incurables; and representation of the public on administration boards.

An immigration policy looking to the development of new sections of Canada but co-ordinated with an adequate employment policy.

Increase in old age pensions; decrease of eligible age to 60 for all workers and to 55 for workers in heavy industry; abolition of means test and payment of pensions as of right.

Approving family allowances, provided they do not take the place of adequate wage levels.

Approving the appointment of a Royal Commission on Coal, as a step towards the establishment of a National Fuel Council.

Regretting that the National Housing Act failed to implement the Curtis Report on Housing as regards the provisions of low-rent housing for wage-earners; urging that the Government take action in this respect through subsidies so as to provide decent housing for the lower third-income group.

Opposing the taxation of surpluses of co-operatives and urging that co-operatives be protected against discrimination and encouraged in every possible way.

Control of all forms of transport by the Board of Transport Commissioners of Canada;

Maintenance of shipbuilding and repairing facilities;

Government ownership and operation of the Merchant Marine;

Adoption of the Hare system of proportional representation in Federal and provincial elections, with a single transferable vote in multi-member constituencies;

Reduction of the voting age to 18;

Revision of the Unemployment Insurance Act to provide insurance for all workers, regardless of income; payment from the first day and for the full period of unemployment, and an increase of benefits sufficient to maintain standards of health and decency;

Government ownership and control of all radio broadcasting;

The establishment of port facilities at Sydney and a bridge or causeway at the Strait of Canso;

Enactment of legislation which would penalize racial discrimination.

Mr. Pat Conroy

Supplementing the brief, Mr. Pat Conroy, speaking on the proposed amendments to the Labour Code, stated that the Congress was fully aware that these must proceed along the customary channels of consultation with provincial governments, but stressed the urgency of action in the matter.

He regarded vacations with pay as a stabilizing factor for the post-war period, declaring that they were a "moral right in full time industry" and "an economic right in seasonal industries". He further observed that "the time had arrived for the recognition of a

balanced existence" both for the white-collar and overall workers as a benefit to industry as well as to the employee.

In reference to the Congress' request for the establishment of industrial councils, he stated that this was particularly urgent and that the job of placing hundreds of thousands of war workers could not be done by industry and labour alone and that the Government should institute action to effect a constructive solution to the problem. He declared: "It is no exaggeration to say that many thousands of workers are literally afraid of what will happen in the post-war world". He considered that it would give a big lift to morale "if it can be shown that the whole nation is working on this problem".

He complained of "delays in setting up of Boards of Conciliation and of the time taken in the rendering of decisions".

Reply of Minister of Labour

Replying to the representations, the Hon. Humphrey Mitchell, Minister of Labour, first complimented the delegation on the able manner in which the brief was drafted.

Regarding complaints of delays in conciliation procedure, he was of the opinion that there had been a considerable acceleration in this matter, and he deprecated "a growing tendency to negotiate agreements on a legal basis". "A trade union document", he declared, "is a human document, based on conciliation and should be understood by the humblest worker in the land".

Referring to the Labour Code, he emphasized that its establishment involved the securing of agreement by provincial governments on the basic principle of the right to organize. Admitting that in its experimental stage some of its provisions were not operating as well as they might, he regarded the measure "as a revolutionary step in labour relations". The Minister intimated that he has been endeavouring to arrange a conference with the provinces on the matter of the code and also on minimum wages but that the meeting had had to be postponed for various reasons.

Dealing with post-war employment, he considered that "that is a challenge not to be entirely laid on the door-step of the Government", but is also a matter upon which employers' and employees' organizations should work together. Continuing the Minister observed: "We have as good a plan on paper for the post-war period as any country. The employees and the employers and farmers, and the government, have excelled in the development of our industrial structure of to-day. Since the outbreak of war we have made more progress in social legislation than in any period of our history".

He cautioned against the dangers of inflation and pointed to the aftermath of the last war when inflation was rampant.

On family allowances, the Minister reiterated that these "were never intended as a substitute for wages in this country".

Discussing rehabilitation of the fighting services, he considered that Canada had the best program of any of the United Nations.

Mr. A. R. Mosher

Mr. A. R. Mosher was critical of the delays in regard to National War Labour Board decisions. "In some decisions", he declared "the Board showed it did not know what it was all about". He insisted some change should be made to remedy this condition.

He stated that the Labour Code at the time it was passed represented a long stride forward, but "that weaknesses had developed in administration". He considered that discontent had developed because "some provinces had not passed enabling legislation and yet interpreted the code in a narrow way". He urged an amendment making it clear that the code be applicable to all war industries.

Regarding union security, he stated: "We feel that a lead would be given to employers and employees if the Government adopted a broader policy in regard to crown companies. It would put labour relations on a friendlier basis".

Minister of Reconstruction

The Minister of Reconstruction, Hon. C. D. Howe, took the position that post-war problems "are not capable of solution by any one body", and added: "The Government has laid down a blue print predicated on Government and industry and labour working together to provide a high level of employment. I know of no country better able to carry out such plans. Our people have been taught new skills, business has increased its productivity, and we have maintained a price standard enabling Canada to compete with other countries".

Dealing with union security in crown plants, he stated that the Crown as an employer is in a different position from a private company. "If we believe that the Crown cannot treat its employees fairly we are taking a very dark view."

In regard to post-war planning he referred the Congress to the Government's White Paper. As factors influencing the situation, he pointed out that the transition to peace time production would not be abrupt. The Japanese war would continue and would require the production of Canadian war materials. The cutback, he estimated, would not be more than 35 per cent and could well be filled by production for civilian use. "There will be plenty of work to be done in this country and the world", concluded Mr. Howe.

Hon. J. L. Ilesley

Hon. J. L. Ilesley, Acting Prime Minister, and Minister of Finance, informed the delegation that no subject had occupied the attention of the Government to such a great extent as the maintenance of what is called "full" employment. He remarked that since there must of necessity be a movement from industry to industry, he preferred the use of the phrase "high" employment.

After indicating the purpose of controls in the economic structure, he asserted that "this economic stabilization made it possible for Canada to make a smooth transition to peace economy. We have tried to keep our economy so that we won't price ourselves out of foreign markets", he added, pointing out that Canada depends on foreign trade to a greater extent than the United States and most other countries.

He asked the delegation to be "charitable" toward delays in the implementation of policy, emphasizing the ordeal of the last six years and its effect on the problems of administration. He promised that the questions raised would receive consideration from the Ministers of the Departments concerned.

Canadian and Catholic Confederation of Labour

THE Canadian and Catholic Confederation of Labour made its annual presentation of legislative proposals to the Federal Government on April 18. Heading the executive of the Confederation were Mr. Alfred Charpentier, president, and Mr. Gerard Picard, secretary.

The delegation was received by the Hon. J. L. Ilesley, Acting Prime Minister, Hon. Humphrey Mitchell, Minister of Labour, Hon.

Louis S. St. Laurent, Minister of Justice, and Hon. A. G. L. McNaughton, Minister of National Defence.

The brief, which was read by Mr. Picard, opened with a reference to the "program of social security that democracies must realize after the war, if they want to assure to the working people the necessary minimum of welfare in an atmosphere of true liberty."

The Confederation was of the opinion that a Dominion-Provincial Conference should be convened to settle the matter of jurisdictions and to pave the way for concurrent legislation.

Wage Control

The brief asserted that the Wage Control Order, P.C. 9384, seemed to be "more and more restrictively interpreted," and that Boards were "laying the stress less upon the injustices and inequalities to be rectified than upon the stabilization of prices at their present level." It declared that the Order should be more flexible in application.

In regard to the Dominion-Provincial Minimum Wage Conference that had been planned by the Minister, the Confederation hoped that this would result in a rise "to reasonable levels" of the "very low wage rates," and expressed the opinion that "all wages lower than 60 cents per hour could be discussed without running into comparisons, but simply in consideration of the fact that this minimum is necessary to insure a minimum welfare to any unskilled adult worker." The brief added that the employer could "show evidence of his inability to pay, if that is so, and it would be the only proof admitted for any schedule in which basic wages would be less than 60 cents per hour for unskilled labour."

The brief complained of delays in the settling of cases appealed from the Regional to the National Boards.

It was asked that Boards should be authorized to approve vacation plans of one week with pay after one year's service and two weeks with pay after five years.

Labour Code

Dealing with the Labour Code (P.C. 1003) the brief stated that the CCCL was in favour of compulsory collective bargaining, but would not admit federal jurisdiction in the field of industrial relations except "within the limits allowed by the Constitution and for the war-time period only," although "later on concurrent legislation might be accepted."

Referring specifically to the Code, the brief urged:

(1) Compulsory registration of every labour union and employers' association prior to a request for certification;

(2) Certification of a union rather than of bargaining representatives;

(3) Recognition of an employee as a union member only if the membership card has been signed, dues paid for three months, and initiation fee if any paid;

(4) Prohibition of strikes in the public services "provided the Labour Code includes provisions relating to the different angles of

union security, and that a National Board is established to act as a Tribunal of Appeal of Arbitration Board findings";

(5) Similar provisions in private industry, whenever mutually agreed upon.

National Selective Service

The brief admitted the usefulness of National Selective Service in wartime, but made a number of suggestions for modification of the Regulations, including repeal of rules regarding designated establishments (though retaining the 7-days' notice principle), and greater restrictions on the employer in the matter of unjustified dismissals of employees.

Unemployment Insurance

The CCCL reiterated its desire for the repeal of P.C. 7994, September 4, 1942, so that unemployment insurance might be administered by a Commission representing the Government, employers and employees.

Appointment of a greater number of insurance officers was considered particularly urgent, including officers for Quebec City, the Saguenay region, Three Rivers, Sherbrooke and Rimouski.

In regard to insurance books, the CCCL recommended that:

(a) The commission should give a receipt stating the amount of stamps included in the former book, when it is giving a new book;

(b) The employer should have the book verified and signed by the employee before returning it to the commission.

It was suggested that since the Fund was in good standing the schedule of benefits should be raised 18 per cent, in proportion to the increase in the cost of living since the beginning of the war.

It was asked also that the coverage of the Act be extended, and that free legal assistance be granted employees in the case of appeals to courts of referees or to the Umpire.

Other Recommendations

The following were among the other proposals outlined in the brief:

That family allowances be not allowed to substitute for decent minimum wages; that there be no decreasing rates from the fifth child; and that the allowance be exempt from taxation.

That Ottawa and the Provinces work out by concurrent legislation a satisfactory system of health insurance.

That old age pensions be increased and the age of eligibility lowered.

That more bilingual officers be appointed to high positions in the Departments of Labour, Veterans Affairs, Reconstruction, and Social Welfare.

That the tax exemption for bachelors be raised to \$800, and for married persons to \$1,600; that no tax be deducted on the amount allowed for vacations with pay; and that reimbursements due to wage-earners be made within three months from the date of the income tax return.

Exemption of co-operatives from taxation.

Reduction in rentals of houses built by War-time Housing.

Opposing "any kind of immigration as long as there is unemployment in Canada."

Publication in the LABOUR GAZETTE of a family budget.

Reply of Minister of Labour

Replying to the delegation, the Hon. Humphrey Mitchell, Minister of Labour, declared that the Labour Code had more than measured up to expectations, judging by the greatly reduced strike record of the past year.

Dealing with the delegation's request that labour unions be required to secure legal incorporation before seeking certification under the Labour Code, the Minister pointed out that the consensus throughout the country is that labour organizations should not be required to be formally incorporated.

He regretted that the calling of a Dominion-Provincial Conference on minimum wages would have to be postponed until after the election.

In regard to the opening of district insurance offices under unemployment insurance in various Quebec centres as asked for in the union memorandum, the Minister promised

that a District Office of the Unemployment Insurance Commission would be opened at Quebec City as soon as possible, pointing out that the shortage of accommodation had been the major factor in delaying these facilities.

The Minister assured the delegation that family allowances "were never designed to interfere with the normal establishment of wage rates in this country." He regarded family allowances as "one of the most forward steps taken in this Dominion" and stated that there would be no delay in the commencement of payments in July.

Speaking on the Confederation's request for more "flexibility" in the application of the wage control order, the Minister cautioned against the dangers of inflation, particularly in the post-war period, with the attendant possibility of an inflationary movement such as permitted Hitler's ascendancy in Germany after the last war.

He congratulated the delegation on its able presentation and stated that the Government was glad to have the Confederation's views in detail.

Also addressing the delegation, Hon. Louis St. Laurent, Minister of Justice, emphasized the need for mutual confidence between Government and people. He declared that all races in Canada must work together for the advancement of the country. "Quebec is united to the other provinces and nothing shall impair the integrity of Canada", he added.

National War Labour Board

Wage Statistics

Accompanying this article are two tables, the first of which deals with wage trends in Canada and the second of which indicates the applications made to War Labour Boards for wage increases, vacations with pay, and other

matters. The first table reveals that total salaries and wages in Canada have increased from \$2.5 billion to \$4.8 billion since the outbreak of war, while rates of wages have also increased as shown by a rise in the index from 105.7 in 1939 to 139.5 in 1943.

WAGE TRENDS IN CANADA

Total Salaries and Wages, Index Numbers of Employment and Index Numbers of Wage Rates in Canada for the Period 1920-1944

	Salaries and Wages (1)	Index Numbers	
		Employment (1) 1926=100	Wage Rates (2) 1935-39=100
	\$		
1920.....	2,477,573,000		112.7
1929.....	2,803,573,000	119.0	104.5
1930.....	2,625,472,000	113.4	105.2
1931.....	2,290,236,000	102.5	101.7
1932.....	1,910,808,000	87.5	94.5
1933.....	1,740,539,000	83.4	89.6
1934.....	1,870,685,000	96.0	90.5
1935.....	2,016,186,000	99.4	93.1
1936.....	2,162,216,000	103.7	94.8
1937.....	2,432,219,000	114.1	101.8
1938.....	2,454,348,000	111.8	104.9

1943.....	4,654,000,000	184.1	139.5
1944.....	4,816,000,000	183.0 (3)	(not available)

(1) From Dominion Bureau of Statistics. The wage and salary figures do not include payments to the armed forces.

(2) From Department of Labour. The figures include cost-of-living bonus payments.

(3) Index for December, 1944 was 185.7.

NOTE.—The index numbers of wage rates apply to wage rates only, not salaries.

The changes shown by the index number of wage rates are not necessarily reflected in the total wages and salaries earned, as total earnings are affected also by the changes in the size of the working force (employment index) and by the shift from "short time" in depression years to "overtime" in boom years.

Decisions of National War Labour Board

DURING the month of April, the National War Labour Board issued decisions in the following cases:—

Aluminum Goods, Limited, Toronto, Ont., and Employees' Council of said Company.

Hector Lamontagne, Inc., Montreal, P.Q., and J. A. Dumais.

The Prudential Insurance Company of America, Calgary, Alta.

Canada Steamship Lines, Limited, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees.

The Butterfly Hosiery Company, Limited, and L'Association du Bas Façonné de Drummondville, Inc.

The Eastern Car Company, Limited, Trenton, N.S., and United Steelworkers of America, Local 1231.

Hilton Brothers, Limited, Winnipeg, Man. Socony-Vacuum Exploration Company.

Canadian National Railways and Canadian Brotherhood of Railway Employees and Other Transport Workers (Dining and Sleeping Car Employees).

Manitoba Steel Foundries, Limited, Selkirk, Man., and International Moulders and Foundry Workers' Union of North America, Local 402.

National Railway Munitions, Limited, and International Association of Machinists, Lodge No. 1768.

Sydney and Louisburg Railway Company, and International Association of Machinists, Local 684.

Canadian Oil Companies, Limited, and National Union of Petroleum Workers, Local No. 1.

C. Lloyd and Son, Wingham, Ont., and National Union of Woodworkers, Local No. 3.

B.C. Motor Transportation, Limited, Vancouver, B.C., and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 101.

International Malleable Iron Company, Limited, Guelph, Ont., and United Steelworkers of America, Local 3000.

Sandwich, Windsor and Amherstburg Railway Company, Windsor, Ont., and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 616.

General Motors of Canada, Limited, and U.A.W.-C.I.O.

Abrasive Company of Canada, Arvida, Limited, and the International Union of Abrasive Employees, AFL Local Union 23737.

Dominion Bridge Company, Limited, Toronto, Ont., and United Steelworkers of America, Local 2808.

Advance Lumber Company, Limited, Lethbridge, Alta.

Metropolitan Life Insurance Company.

Mueller Limited, Sarnia, Ont., and United Automobile Workers of America, Local 456.

The William Kennedy and Sons, Limited, Owen Sound, Ont., and United Steelworkers of America, Local 2469.

Re: Aluminum Goods, Limited, Toronto, Ont., and Employees' Council of said Company

Reasons for decision

By leave of the Regional War Labour Board for Ontario, an appeal is taken by the employees' council from a decision of that Board dated October 11, 1944, refusing an application for wage increases in several occupational classifications.

The Company opposes the appeal on the ground urged before the Board below, namely, that its rates compare very favourably with rates being paid in the area for similar classifications and that there was not in its present wage structure the inequality or injustice contemplated by section 20 of the Order, save

perhaps with respect to apprentices, polishers and spinners concerning whom it is prepared to make a request jointly with the Council for the purpose of obtaining certain adjustments. The Regional Board acceded to the company's submission.

After perusal of the material filed by the parties in this appeal, we conclude that there is no basis upon which a reversal of the decision appealed from can be justified. Consequently, we dismiss the appeal but without prejudice to the proposed joint application for the three classifications mentioned.

April 3, 1945

**Re: Hector Lamontagne, Inc., Montreal, P.Q., and
J. A. Dumais**

Reasons for decision

This is an appeal by the Company from a decision of the Quebec Regional Board dated September 1, 1944 whereby the Company was ordered to pay to the respondent the sum of \$1,567.43 and it was further declared that the Board's previous decision dated March 15, 1944 authorizing a reduction in an incentive rate had no retroactive effect. The facts are as follows:

Dumais was a travelling salesman in the employ of the company-appellant engaged in business as wholesale leather merchants. When wage control became effective on November 15, 1941 he was remunerated on the basis of a commission of 7 per cent of his sales, and all travelling expenses were paid by himself. Early in 1943 the company took their salesmen off the road and directed them to work in the company's establishment in Montreal. They were then remunerated on the basis of 75 per cent of the former rate of commission on the sales originating (we take it) in their former territories. Dumais resided in Quebec City and commuted every week to Montreal. On January 19, 1944, following an inspection or complaint, the Company wrote to the Regional Board advising them of the foregoing and on March 15, 1944 the Board authorized the 25 per cent reduction which had taken place. The following day Dumais left the employ of the appellant and later claimed the amount of the

expenses incurred by him since January 1943 while he was employed in the Montreal establishment for travelling and living when away from home. He also asserted that the authorization had no retroactive effect. On September 1, 1944 the Regional Board made the Order from which this appeal is taken.

This order in our opinion has no purpose under the Wartime Wages Control Order, 1943 (P.C. 9384). If the case comes within the terms of section 24 (a), then the change could be made without an order, and there is no jurisdiction to order payment of the travelling expenses. It must be noted also that the two matters dealt with in the Regional Board's order are inconsistent. Dumais could not, under the terms of his original employment, obtain at the same time his full rate of commission and payment of travelling expenses.

It may be that the respondent has a claim for the ordinary courts. We have on a previous occasion (Dominion Paper Box Company Limited case, L.G. 1945, p. 26) stated our view that war labour boards are not to be used as an agency to collect money claims. However, neither this decision nor the various decisions of the Regional Board should in any way be prejudicial to the position of either party in the event of litigation.

The appeal must be allowed.

April 3, 1945

**Re: The Prudential Insurance Company of America,
Calgary, Alta.**

Reasons for decision

An appeal from a decision of the Alberta Regional Board dated December 14, 1944 refusing to authorize after the fact certain periodic increases granted since November 15, 1941 to three office employees and declaring that the amount of such increases would be certified to the Minister of National Revenue pursuant to section 39 of P.C. 9384. Leave to appeal was granted by the Regional Board.

It is alleged by the Company that for many years prior to wage control its wage policy was uniform throughout all of Canada and

that it had standard ranges for each of the classifications concerned in this appeal, applicable in the same manner and amounts in all of its Canadian offices. It is quite clear from the evidence developed in the appeal that the increases granted to the Calgary employees were within the limits of the ranges established prior to wage control.

In the circumstances of this case, we are of opinion that the appeal should be allowed and the certificate to the Minister of National Revenue set aside.

April 3, 1945.

**Re: Canada Steamship Lines, Limited, and Brotherhood of Railway and
Steamship Clerks, Freight Handlers, Express and Station Employees**

Reasons for decision

This is an application by the Union for an increase of 6c per hour effective from September 15, 1943 for employees of the Company at Quebec, Montreal, Toronto, Hamilton,

Sarnia, Point Edward, Windsor, Port Arthur and Fort William.

The application is stated to be for the purpose of maintaining the wage relationship between these employees and the waterfront

freight handlers employed by the C.P.R. and C.N.R. at Montreal and West Saint John, N.B. The railway freight handlers having received an increase following the steam railway award in case file N-1300, the Union now contends that the "wage parity", said to have been established by a decision of this Board dated September 30, 1943, should be restored. In effect therefore, the application is designed to obtain the benefit of the 6c railway award and the same amount of retroactivity. The Company contested the application and then withdrew its opposition.

It must be remembered that the decision of September 30, 1943 did not establish parity between inland and waterfront freight handlers and that it was made under the comparative rule of section 25 of the previous order in council P.C. 5963, as was also the general rail-

way award. The purpose of the present order (P.C. 9384) is to stabilize the wage structure in Canada as it was established on February 15, 1944 by the incorporation of the cost-of-living bonus into the former basic wage rates. Our power to increase rates is limited to cases where it is shown that there exists a "gross injustice or gross inequality". In administering the current order, the Board is not bound by any findings of comparability which may have been made under the previous order.

The Board has come to the conclusion that it has not been demonstrated that the increase of 6 cents is necessary "to rectify a gross inequality or gross injustice" as required by section 20 (1) (a) of P.C. 9384 and that on the basis requested the application must be denied.

April 4, 1945.

Re: The Butterfly Hosiery Company, Limited, and L'Association du Bas Façonné de Drummondville, Inc.

Reasons for decision

This is an appeal by the Association from a decision of the Regional Board for Quebec dated June 9, 1944 denying an application for a substantial increase in both hourly and piece rates, a 5-cent night work premium, a standard 48-hour week and time and one-half for time worked thereafter, and a plant minimum of 25 cents per hour.

The Regional Board came to its decision following an investigation of rates, and presumably also of working conditions, in the full-fashioned hosiery industry in the Province of Quebec. The Company also argues that its apprentice rates and working conditions comply with the provisions of Ordinance No. 19 of the Quebec Minimum Wage Commission which sets out certain statutory minimum standards for this industry. We do not think that mere compliance with these standards is in itself a complete answer to a request made under the Order (P.C. 9384) for the rectification of a "gross injustice or gross inequality". But

after an examination of all the material filed both on this appeal and before the Regional Board, and of the arguments presented to us, we are of the opinion that the decision of the Regional Board was undoubtedly made upon a consideration of the effect of the application having regard to the industry as a whole and should not be disturbed.

However we come to the conclusion that this is a case where it is fair and reasonable to apply section 20 (1) (b) of the Order and the rates should be increased by an amount sufficient to make up the "appropriate maximum cost-of-living bonus" as defined in section 20 (3).

There having been since August, 1939 two 5 per cent increases in 1941 plus the mandatory bonus, it may be that the higher paid employees may receive very little under this direction while the lower paid employees will receive somewhat more.

Finding and Direction effective from January 1, 1945.

April 5, 1945.

Re: The Eastern Car Company, Limited, Trenton, N.S., and United Steelworkers of America, Local 1231

Reasons for decision

This is an application by the Union for leave to appeal from a decision of the Nova Scotia Board dated December 13, 1944 refusing an 8-cent increase in "the basic hourly rates of all piece work employees . . . who are members of Local 1231, U.S.W.A.". Leave was refused below for reasons dated February 7, 1945.

The application appears to have been provoked by the Company's action in obtaining an increase for riveters and buckers. Although it is said the Union had some knowledge of

the request, it was not given actual notice and an opportunity to make representations. Once a bargaining agency is established, it is unwise for an employer to proceed ex-parte in any matter affecting wage rates or working conditions. Such action can only lead to trouble. However, the matter of rates for the two classifications just mentioned appears to have been re-opened by the Regional Board, and we do not believe a case has been made out for the granting of leave to appeal.

The application is therefore denied.

April 9, 1945.

Re: Hilton Brothers, Limited, Winnipeg, Man.*Reasons for decision*

An appeal from a decision of the Manitoba Regional Board dated December 28, 1944 refusing permission to reduce the basis upon which salesmen were remunerated the basis being a combination of time rate and incentive or commission rate. The employees involved concur in the appeal and the purpose of the application was frankly stated to be to keep the earnings of salesmen in proper relationship to those of other employees.

The appellant submits that the proposed change will not reduce earnings below what they were in the year ending November 15, 1941. In this connection it must be noted that the Wages Control Order (section 16) does not stabilize earnings but the "rate" of remuneration, i.e. the basis of its calculation as

established on February 15, 1944. We must agree with the Regional Board that there is no provision in the present order, (P.C. 9384) as amended, giving this Board or the Regional Boards the power to authorize a reduction of wage rates. In the case of incentive rates, however, adjustments may be made by an employer either upward or downward, without authorization, when the change is strictly commensurate with the addition, removal or alteration of a work element, and the other conditions of section 24 (a) are satisfied. A rate calculated on the basis of a commission is an incentive rate, under the definition in section 13 (1) (e).

We must dismiss the appeal.

April 9, 1945.

Re: Socony-Vacuum Exploration Company*Reasons for decision*

This is both an application for leave to appeal and an appeal from a decision of the Regional War Labour Board for Alberta dated December 14, 1944, refusing permission to the Company to inaugurate annual vacation with pay plans on the basis proposed for certain monthly rated employees. Leave to appeal was refused by the Regional Board.

The Company at the present time has only nine employees who would be affected by the plan, including three Senior Geologists, whose wage rates range from \$4,200.00 to \$6,000.00 per annum, and who it is stated have received the approval of the Department of National Revenue under the provisions of The Wartime Salaries Order, two Junior Geologists employed at wage rates of \$2,700 per annum, and four office staff employees at salary ranges of from \$90.00 per month to \$125.00 per month.

At the hearing of the appeal it developed that the parent Company of the applicant, Socony-Vacuum Oil Company, Incorporated, carried on operations in Canada prior to November 15, 1941, before the applicant Company was incorporated, and that the parent Company's employees were allowed annual vacations with pay on the basis of its established holiday plan which provided:

Every employee who has had over six months but less than twelve months of continuous ser-

vice in one calendar year, shall be entitled to one week's vacation with pay, and for each year of continuous service every employee shall be entitled to two weeks' vacation with pay.

Moreover, it was represented to the Board that the monthly paid employees were not in receipt of overtime pay. It is a common practice in industry for monthly rated employees, who fill the requirements of their positions without overtime pay in addition to their monthly established rates, to be allowed two weeks' annual vacation with pay after the completion of one year's continuous service with an employer.

In all the circumstances, and under the conditions applicable in this case, in respect of monthly rated employees subject to Wartime Wages Control Order, 1943, P.C. 9384, the Board is of the opinion that it would be fair and reasonable, and not inconsistent with the principles of its Decision Bulletin, No. D.B. 17, (L.G., Dec. 1943, p. 1635), that the Company should be authorized to allow its monthly rated employees, who in their positions work overtime as required without overtime compensation in addition to their established monthly rates, two weeks' annual vacation with pay in succeeding years after one year's continuous service with the Company.

Finding and Direction will issue accordingly.

April 10, 1945.

Re: Canadian National Railways and Canadian Brotherhood of Railway Employees and Other Transport Workers (Dining and Sleeping Car Employees)

Reasons for decision

This is an application dated August 18, 1944, by the Union for a review of the Finding and Direction of this Board, dated August 3, 1944, by which it directed the establishment of 240 hours as the basic month's work, with provisions for overtime pay; and directed certain increases in the basic wage rates. The present application does not apply to that part of the Finding and Direction regarding increased rates of pay.

The Union requested that the basic month's work be placed at two hundred and eight hours instead of two hundred and forty hours and that overtime should be paid for on the basis of time and one-half instead of pro rata rates. In view of the recent decision of the Board on these points, and in the absence of any new evidence relating thereto, we doubt whether this is a case where the Board should exercise the powers conferred on it by Section 30 (1) of P.C. 9384. The Board has dealt with similar matters in case re (C.P.R. Company and Brotherhood of Railway Trainmen—Dining Car Employees, L.G., Aug. 1944, p. 964). The application on these two points will, therefore, be dismissed.

The other matter raised in the application is for the clarification of the following clause in Finding and Direction of August 3, 1944:

Two hundred and forty hours' service, or less, in assigned service, shall constitute a basic month's work. All time worked in excess of two hundred and forty hours will be paid for as overtime on the actual minute basis at pro rata rate.

The Company interprets this clause to mean that no employee shall be paid for overtime until he has worked two hundred and forty hours in any one month. The Union says that on an assigned run, where the operating service time is less than two hundred and forty hours, the employee should be paid for all additional hours at overtime rates and whether or not the total time of service in any month exceeds two hundred and forty hours. The Board intended the Clause to mean that in assigned service the two hundred and forty hours, or less, would be applied in an employees' own assignment.

The original application in this matter was made by the Union because of complaints as to the lack of uniformity in the length of the runs (for which the same payment was received) varying from 160 hours to 310 hours. It was felt that the establishment of a standard work month would be fairer and would

eliminate many of the complaints. The Union asked for a 208 hour month—26 days of 8 hours each—but this Board established it at 240 hours (which happens to be the average length of the assigned runs). It was the desire of the Union to eliminate all the former overtime rules, which were described as a "hodge podge", if it could secure a standard basic month, which of course it desired to have placed at 208 hours. The Company assented to the request for uniformity, but did not consent to the 208 hour month.

The Union now contends that those employees on assigned runs of less than 240 hours could be penalized by being required to work an additional number of hours to a total of 240 hours before being entitled to overtime; whereas previously they received additional compensation over and above their regular monthly salary for hours of service in excess of their regular assignments regardless of the monthly hours of such assignment. The Union claims that this interpretation of the Finding and Direction would constitute a decrease in wages contrary to the provisions of P.C. 9384 as amended.

It is possible that under certain conditions there might be an unusual case where an employee might lose a small part of the benefits he previously enjoyed under the former overtime rule, but there is no certainty that such will be the case. It is to be remembered that the application for uniformity was made by the Union representing all the employees (whether working more or less than 240 hours per month) and that similar—though fewer—cases of possible losses under certain conditions might result if the basic month's work had been fixed at 208 hours. Generally speaking the Order now under review provided for substantial benefits to the employees, and all those working longer hours than 240 per month immediately benefited. When it is considered that reporting time and terminal detention time are added to the scheduled hours, and also all hours in service due to late trains (no allowance having previously been made for train delays of 3 hours or less), it is clear that many of those on runs below 240 hours per month would also immediately benefit.

We are of the opinion that no employee in the classifications mentioned should be entitled to overtime until he has worked 240 hours in any one month; in assigned service the 240 hours, as already indicated, being applicable only to an employee's own assignment. A

very high degree of uniformity on a fair basis has been established, and an employee may in many cases work less than 240 hours in a month and yet receive his full month's pay. It is not unreasonable to expect him to complete the full month's work of 240 hours, (which others on longer runs are doing for the same remuneration) before he is entitled to over-time payment. If the contention of the employees were to prevail, there would be less uniformity, for, in that case, an employee on a run of 240 hours would get his full month's pay whereas another on a run of 210 hours but required to give an additional 30 hours' service would be paid for 270 hours.

In respect of the application for inauguration of annual vacation with pay plan for employees in occupational classifications covered by the application, in view of vacation plans which have become established generally in recent years for other classes of Railway Employees who did not previously enjoy the privilege, the Board is of the opinion in the circumstances it would be fair and reasonable and consistent with the intent of Wartime Wages Control Order, 1943, P.C. 9384, to authorize the Railways to inaugurate annual vacation with pay plan for their occupational classifications covered by the application generally in accordance with the provisions of the National War Labour Board's Decision Bulletin, D.B. 17, (L.G., December, 1943, p. 1635), as set forth hereunder:

(a) vacation with pay will be granted only after the employee has completed one year's continuous service, i.e., a minimum of, say, 300 days (calendar) of actual work, the vacation to be allowed for and during the following twelve months service.

- (b) a vacation with pay will not exceed the equivalent of one-half day for each 25 days (calendar) of actual work, due allowance to be made for authorized leaves of absence because of sickness or other justified causes; thus, an employee who has rendered regular service during one year or more at the effective day of the approval of a vacation plan will be entitled to six days (calendar) vacation with pay at some time during the succeeding twelve months.
- (c) vacation pay will not be allowed for vacations not taken; in such cases any unused vacation privileges will be allowed to accumulate until conditions permit them to be exercised.
- (d) (i) if an employee, not having been dismissed for cause, leaves the service of his employer for reasons beyond his control at a time when an unused period of vacation with pay stands to his credit, he will be paid the amount due him in lieu of vacation calculated to the date of his leaving such service.
- (ii) if an employee leaves the service of his employer of his own accord, or is dismissed for cause, at a time when an unused period of vacation with pay stands to his credit, he will be paid the amount due him in lieu of vacation calculated to the end of his last completed service year.

and, therefore, the Board will authorize the inauguration of annual vacation with pay plan for the Railways' occupational classifications covered by the application subject to negotiation between representatives of the parties for the inauguration of such vacation plan within the limitations stated.

Finding and Direction will issue in accordance with the above interpretation and decision.

April 11, 1945.

Re: Manitoba Steel Foundries Ltd., Selkirk, Man. and International Moulders and Foundry Workers' Union of North America, Local 402

Reasons for decision

This is an appeal by the Union from a decision of the Regional War Labour Board for the Province of Manitoba, dated December 20, 1944. Leave to appeal was granted January 3, 1945.

In September 1943 an application was made by the employees for wage increases, etc. By its decision of November 18, 1943, the Regional Board directed the Company to increase wage rates for certain male adults and to maintain the existing work week; and also dismissed the then application for vacation with pay.

On September 5, 1944, the Union again applied for increases in wage rates which, generally speaking, were for 12c per hour, with

special consideration for a number of employees. On December 20, 1944, the Regional Board made its Finding now under appeal and granted certain upward revisions in the wage rates. Between the dates of the two decisions above referred to, vacation with pay was granted and the cost-of-living bonus of \$3.50 per week was incorporated into the wage rates.

The application is based on the allegation of gross inequality and gross injustice. We have reached the conclusion that the appellant has not shown that such gross inequality or gross injustice exists. The Regional Board has given careful consideration to two applications by the

employees within a period of fifteen months and with knowledge of local conditions and comparable industries has made such changes in wage rates as it found necessary to correct any existing gross inequality or gross injustice.

We are of the opinion that its Finding should not be disturbed.

The appeal will, therefore, be dismissed and Finding and Direction will issue accordingly.

April 11, 1945.

Re: National Railway Munitions, Limited, and International Association of Machinists, Lodge No. 1768

Reasons for decision

In this application, submitted on behalf of the employees of National Railway Munitions, Limited, the Union seeks that the increases directed in the Railway award, so-called, (N-1300)¹ be applied to the wage rates of the said employees.

The employer is a Crown Company engaged in the manufacture of munitions. Its plant is located on property owned by the Canadian National Railway, and a group of the employees and officials of the said Railway form the nucleus of the personnel of this Company. The general wage structure of this Company is not comparable to the wage structure common to railway machine shops, but more nearly resembles that of certain munition enterprises, such as Dominion Engineering Company, Limited, Longueuil and Lachine plants, and other privately owned companies engaged in somewhat similar work.

The employees of the Canadian National Railways on loan to this Company receive rates payable to classifications higher than those received by them in their capacity as employees of the Railway. The Union urges that certain employees of the Canadian Pacific Railway engaged in somewhat similar work at the Angus shop of that Company have had the

Railway wage award applied to their wage rates. This Board is not satisfied that the same conditions apply to the employees affected by this application as supply to the Canadian Pacific Railway employees above referred to, but regardless of what conditions or considerations may have been thought justifiable in applying the said Railway award to this group of Canadian Pacific Railway employees, we are of opinion that any increase in the wage rates to the employees covered by this application must be founded on other grounds, and consideration must be given to the wage rates received by the employees of other Companies whose wage structure more nearly resembles the wage structure of National Railway Munitions, Limited.

Moreover, we are further of the opinion that the employers and employees having signed an agreement on the 1st day of November, 1944, specifying the wage rates then in effect and which had earlier received the approval of the National War Labour Board, this Board should not hear an application for changes in those rates made on November 13, 1944.

This application is, therefore, refused.

April 11, 1945

Re: Sydney and Louisburg Railway Company and International Association of Machinists, Local 684

Reasons for decision

This is an appeal jointly by the Company and the Union from a decision of the Regional War Labour Board for Nova Scotia dated January 8, 1945 refusing to authorize a 6 cents hourly increase for roundhouse and certain construction employees. The application was made to maintain parity with the rates paid by other railways to similar classifications pursuant to the award of this Board on July 31, 1944 (case file N-1300)¹.

The Sydney and Louisburg Railway is a steam railway operation and has had rates for

its employees brought up to the rates for similar classifications on the major railways by decision of the said Regional Board dated June 7, 1944. Further, certain of the classifications of this appellant were covered by the decision in the main railway award.

We are of opinion on the evidence submitted that the increase requested may be authorized under section 20 (1) (a) of P.C. 9384, effective from February 15, 1944, in order to maintain an established relationship with those other employees of this Company who benefit under N-1300.

April 12, 1945.

¹ L.G., Aug., 1944, p. 960.

Re: Canadian Oil Companies, Limited, and National Union of Petroleum Workers, Local No. 1

Reasons for decision

This is an appeal by the Company from the decision of the Regional War Labour Board for Ontario dated August 17, 1944, on an application by the Union for increases in wage rates to certain employees. The Company now agrees that certain of the wage rate increases sought were properly authorized by the said Regional War Labour Board, but it takes the position that the employees in the Power Plant Paint Shop and Drum Repair Department, Grease Plant, Oil Producing Property, Transportation and Carpenter Shop should not have been granted wage rate increases as authorized by the said Regional War Labour Board, because such increases would result in wage rates which would not have the proper relationship to the wage rates of other employees of the Company. This relationship, the Company states, can only be determined after a proper job evaluation. While this Board is of opinion that a comparison of the wage rates as paid by this Company with those wage rates paid by the Imperial Oil Company, Limited, in its plant at Sarnia, is not the proper one, nevertheless we point out that the burden was on the Company as appellant to satisfy this Board that the wage rate increases directed by the said Regional War Labour Board for the employees, above referred to, were not warranted under the terms of P.C. 9384. Moreover, the appellant did not discharge that burden. This Board in the cir-

cumstances will, therefore, not disturb the decision of the said Regional War Labour Board.

There is a cross appeal by the Union from those portions of the Finding and Direction which refused—

- (a) the night differential of 5c per hour.
- (b) a differential of 5c per hour for those power plant employes for the period of the year during which acid pitch was being used as fuel in the furnaces.

As to (a), having regard to the nature of the process requiring night shift work, and having regard to the fact that there has been, and is, a rotation of employees on the shifts worked, it does not seem that a night shift differential of 5c per hour would be justified in this case.

As to (b), viz., the differential sought for those power plant employees for the period of the year during which they were required to handle acid pitch, it developed in the evidence that this differential was paid for one season only, and then only because in that season the condition of the acid pitch was exceptionally poor and objectionable. It would seem, therefore, that no good reason has been submitted to the Board why this differential should enter permanently into the wage structure of the Company. The result, therefore, is that the appeal by the Company and the cross appeal by the Union are both dismissed.

April 13, 1945

Re: C. Lloyd and Son, Wingham, Ont., and National Union of Woodworkers, Local No. 3

Reasons for decision

The employer appeals from a decision of the Ontario Regional Board dated October 6, 1944, reaffirming a prior decision dated July 17, 1944, whereby an authorization issued on April 24, 1944, was changed into a direction to pay a certain schedule of ranges of wage rates from November 11, 1943, date of the original application.

The application, made under the provisions of P.C. 5963, was for

- (1) a 10 per cent increase in basic rates of pay;
- (2) time and one-half after 50 hours per week;
- (3) a full cost-of-living bonus;
- (4) vacation with pay—1 week after 1 year of service.

In dealing with this application, and following receipt of the Company's counter-submission, the Regional Board thought fit to have an investigator proceed to Wingham and report on the matters in dispute. Mr. Perkins made his report on or about March 6, 1944, in which he recommended the granting of items 2 and 4 above, the denial of item 3 and, in lieu of item 1, the adoption of a schedule of classifications and ranges of rates therefor. The schedule provided for fairly substantial increases for most of the employees, and the report drew attention to the fact that the rates proposed included the cost-of-living bonus of 2 cents per hour which was being paid prior to the date (February 15, 1944) when it was merged with basic rates under the provisions of P.C. 9384.

The Board adopted the main recommenda-

tions of the report and issued its authorization of April 24, 1944, which was implemented by the Company except in the matter of retroactivity. A protest was filed by the Union and the rates were then made mandatory from November 11, 1943, by the decisions now under appeal and the cost-of-living bonus added to them. The result is an increase of 2 cents above the rates proposed by the investigator.

We have examined all of the material on file and we have come to the conclusion that there was no basis upon which the rates proposed should have been increased by 2 cents.

We shall not change the effective date of the order, but we shall modify it to the extent necessary to give effect to the foregoing.

With respect to the classifications of factory labour, the schedule attached to the finding and direction of April 24, 1944, should be modified and instead of "general factory labour—Class A" and "Class B" there should be inserted "general factory labour" and "light factory labour".

Findings and Directions should issue accordingly.

April 13, 1945.

Re: B. C. Motor Transportation, Limited, Vancouver, B.C., and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 101

Reasons for decision

An application by the Union for leave to appeal from a decision dated December 15, 1944, of the Regional War Labour Board for British Columbia refusing (except as to the establishment of the new classification of "improver") a request to direct the employer to increase wage rates for garage employees and to alter working conditions. Leave to appeal was denied by the Regional Board for the following reasons delivered January 6, 1945:

- (1) The evidence submitted does not show that increased wage rates are necessary to rectify gross inequalities or gross injustices;
- (2) The employees covered by the application, have, since August, 1939, received

either as increased wages or payment of cost-of-living bonus, the appropriate or more than the appropriate maximum cost-of-living bonus; and

- (3) The presently established working conditions of the employees are fair and reasonable and it would not be consistent with the purposes of P.C. 9384, as amended, to alter them.

Upon examination of the file of the Regional Board and of all material in support of the application, we must come to the conclusion that the application was competently and carefully considered below and that there is no justification for further consideration of the application by this Board.

The application must be dismissed.

April 18, 1945.

Re: International Malleable Iron Company, Limited, Guelph, Ont., and United Steelworkers of America, Local 3000

Reasons for decision

(preliminary objection)

The Union files a preliminary objection to an appeal by the Company from a decision dated February 8, 1945 of the Ontario Board. The objection is that the appeal should be dismissed because of the agreement between the parties dated November 28, 1944, article 7 of which reads as follows:—

Present wage rates will remain in effect, subject to any change directed by the Regional War Labour Board, such change to remain in effect for the duration of the agreement.

The Union's submission is that this clause bars the appeal to the National Board, the parties having agreed to accept the Regional Board's decision for the duration of the contract. To support its contention, the Union refers to an oral decision of this Board in the case of Maritime Steel and Foundries, Limited (L.G., March 1945, p. 280), when it was said:

... that the application having been submitted to the Regional Board, with the

definite stipulation that the directions of that Regional Board would constitute the provisions as to wage rates, then this Board is not going to be the instrument to revise the agreement or the terms of the agreement on appeal.

The Maritime Steel case is different from this case in one or two aspects. First, the Nova Scotia Board had refused leave to appeal and the National Board was dealing with an application for leave, while in this case leave to appeal was granted by the Ontario Board. Secondly and more important, the provision agreed upon in the Maritime Steel case was the result of bargaining which had taken place after the Regional Board had made an interim order on wage rates and while the question of rates was still pending before it. Clause 14 of the agreement in that case read as follows:

An application for increased wages is at present in the hands of the Regional War Labour Board and the rates specified in its final decision shall be the wage rates in effect for the term of this Agreement.

This wording in the circumstances surrounding the signing of the agreement was in effect held to constitute a waiver by both parties of their right to appeal to the National Board.

In the present case, the circumstances are quite different. The application by the Union for increased wage rates was made after execution of the agreement, and the wording of the clause is not the same as in the Maritime Steel case. In order to hold that parties have contracted themselves out of their right to appeal, there must be no room for doubt as to their intention to do so. When the Com-

pany signed the agreement in this case, there was no pending application and no appeal contemplated or even possible, while in the Maritime Steel case the matter was alive and pending before the Regional Board, and the parties were awaiting a final decision from a Board who had already dealt with wages in an interim decision.

The present case is therefore distinguishable from the Maritime Steel case and the Union's preliminary objection must be dismissed.

The Union will have the usual time for filing its counter-submission to the Company's appeal.

April 18, 1945.

Re: Sandwich, Windsor and Amherstburg Railway Company, Windsor, Ont., and Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, Division 616

Reasons for decision

(Oral Decision)

Now, with reference to the hearing and review of the Regional War Labour Board's finding and direction with respect to the Sandwich, Windsor and Amherstburg Railway we have considered the representations made to us this morning and having regard to the additional information submitted to this Board with respect to comparability, and having regard to all other relevant factors which have

been brought to our attention, we are satisfied that the Regional War Labour Board for Ontario did not err in applying to this case the proper principles of the order.

This Board, therefore, on a review of the findings and directions of the said order on October 25, 1944, is of the opinion that the decision of the Regional Board should not be disturbed, and that its Finding and Direction should not be varied in any particular.

April 19, 1945.

Re: General Motors of Canada, Limited, and U.A.W.-C.I.O.

Reasons for decision

This is an appeal by the Union from decisions of the Regional War Labour Board of Ontario refusing to grant the increases sought for certain classifications of the day workers employed in the Oshawa plant of the General Motors of Canada, Limited, as set forth in the Union's application dated the 22nd day of May, 1944, and supplemented the 31st day of May, 1944.

The said decisions appealed from were given by the said Board on August 15, 1944, and October 18, 1944. It should be noted also that the National War Labour Board on the 6th day of July, 1944, dismissed an appeal by the Union from a decision of the Regional War Labour Board in which it had refused wage increases to two groups comprising six of the classifications of employees covered by the application in this case.

The appeal in this case was ready for hearing on the 19th day of December, 1944, but at the request of Counsel for the Union and concurred in by Counsel for the Company, the hearing was postponed to February 7, 1945. Counsel for both parties confined

their arguments to the question of whether or not the increases in wage rates sought were necessary to rectify a gross inequality or gross injustice.

Inasmuch as some of the arguments in this appeal were raised before this Board for the first time, it will be useful to discuss them separately, as was done by Counsel in their arguments to the Board.

We will first consider the argument raised by Counsel for the Union in his rebuttal as to the interpretation which should be placed on the phrase "gross inequality" and "gross injustice". He submitted to us that the phrase should be interpreted "a noticeable injustice or a noticeable inequality," by which he suggested that the injustice or inequality complained of must be worthy of notice.

This Board is unable to adopt this argument. No sufficient reason was advanced by him to indicate why such an interpretation should be given to the phrase as it appears in Section 20 (1) (a) of P.C. 9384. Certainly common usage and the dictionary meaning of the word "gross" do not justify such an interpretation, neither are we able to find anything in the

Order in Council itself to justify such a meaning for the word "gross". This Board's interpretation of the phrase is stated in the cases of the Canada Starch Company (L.G., Nov., 1944, p. 1477), and the Boot and Shoe Manufacturers of the Province of Quebec (L.G., Jan., 1945, p. 27). We see no reason why this Board in this case should depart from the interpretation given in the two cases referred to above.

Dealing next with the submissions and arguments based on the particular facts in this case, Counsel for the Union submitted several reasons why this Board should rectify the gross inequalities or gross injustices alleged to exist in this case. These reasons in the order in which they were presented to us are as follows:

(a) That there should be rectification of the gross injustice existing, because the wage rates paid to the employees covered by this application are ones "which on regular hours of work per week do not enable the workmen to secure by working regularly enough to maintain a standard of living or to pay the cost of a standard of living which should maintain health and self-respect." In developing his argument in support of this contention, Counsel for the Union relied on a report made by the Toronto Welfare Council. This report indicates the conclusions of the said Council with respect to the amount required for the maintenance of an average family. We wish to point out that the said report cannot be accepted by this Board as the proper guide in this case, because, in the first place, the conditions and factors present and considered in arriving at the conclusions made in that report were not shown to have existed or to have been applicable to any of the employees covered by the application under appeal. In the second place, even if this Board were to be guided in this case by the standard referred to in that report, it is pointed out that in this case the wage rates of all employees covered by the application range from 56c to \$1.07 per hour, and we have no evidence before us to indicate whether or not any of the employees covered by this application are in receipt of wages less than the minimum amount referred to in the said report. Moreover the said Regional War Labour Board caused an investigation to be made in the Oshawa plant with respect to the work and wages of these employees, and we are convinced that the said Regional War Labour Board fully satisfied itself as to whether or not any injustice existed by reason of the payment of any substandard wages to any of the employees covered by the application.

(b) That there should be rectification of the gross injustice existing by reason of the fact that the increased earnings of the employer had not resulted in increased wage rates for the employees. This argument was not developed at length. It was not shown to what extent, if any, the earnings of the Company had been increased. Counsel for the Union apparently being content to make the assertion, and then draw the inference that inasmuch as the plea of inability to pay had not been raised by the employer, therefore, the earnings of the Company justified an increase. In addition to indicating the fact that no submissions were made to the Board to enable it to test the merits of this argument, we wish to point out that in administering a Wage Control Order, enacted for the express purpose of wage stabilization, and the control of inflation, it is difficult to discover how, in the circumstances of this case, the relationship between the earnings of the employer and the wage rates of the employees is relevant.

The next two arguments presented to us can be conveniently discussed together. They were:

(c) "That a gross inequality, which may also be termed, an injustice, should be rectified, by reason of the fact that the relationship between the wage rates of the day workers and the earnings of the production workers has altered since 1941 to the disadvantage of the day workers."

(d) "That this gross inequality and this gross injustice were only partially taken care of in July, 1941, and that wage control having come into being on November 15, 1941, the differential between the two classes of workers had never been adequately provided for."

In order to understand more clearly these two arguments, it is necessary to keep in mind that in July, 1941, the index factor indicating the relationship between these two groups of workers stood at approximately 125. To-day it ranges from 140-150, and, during the argument, it was stated to be 145. The result has meant increased earnings for the production workers since July, 1941, and it is urged that the earnings of the day workers have not increased in a corresponding manner. The volume of wartime production has to some extent been responsible for the increase in this index factor, but it was represented to us that the reason most responsible for the increase was, that since July, 1941, the production workers have been engaged in the manufacture of vehicles restricted to certain types and designs. In brief, the models haven't changed as frequently as they did.

prior to that date. Apparently as late as November 4, 1943, the employers agreed that the increased earnings of the production workers had resulted in greater work for certain classifications of the day workers. The employers admitted that certain day workers had been "speeded up" so that the production of the plant could be greater, and that this "speeding up" resulted in unfairness to certain of the day workers, because they did not share proportionately in the increased earnings which the production workers thereby enjoyed. The Board, however, is satisfied that this situation has long since been corrected, because to off-set the increased demands on day workers made by the greater efficiency of the production workers, the employers increased the number of day workers in the operations of the Company. Therefore, the situation now is that the individual day worker does not perform more work than he did in July, 1941, he now does the same amount of work. There are now relatively more day workers employed in the Company's operations. It is significant that the information submitted by the employer in this regard was not questioned by Counsel for the Union. We think that both arguments (c) and (d) were fully and effectively answered by the Company in its explanation as to the relative increase in the number of day workers now employed. It should be observed also that this phase of the Company's request was fully investigated by the said Regional War Labour Board.

(e) That a gross inequality requires correction by reason of the fact that the wage rates paid to the day workers in the plant of the General Motors of Canada, Limited, at Oshawa, are less than the wage rates paid to similar classifications of employees in the plants of the Ford Motor Company of Canada, Limited, and the Chrysler Motor Company of Canada, Limited, at Windsor, Ontario.

Counsel for the Union in his opening argument urged emphatically and strenuously that by reason of the fact that the automotive industry in Canada was located mainly in Windsor, therefore, the wage rates paid in a smaller unit of that industry (in this case, the General Motors plant at Oshawa) should correspond to the wage rates paid to similar classifications in the Windsor area, particularly those in the Ford and Chrysler Motor Companies. When it was pointed out to him that a few days prior to the hearing of this application, the representative of the employees in another Company urged that the wage rates prevailing in the area where the industry itself was largely located, should be as high as those prevailing in a remote area where a

relatively small unit of the same industry was located, Counsel for the employees in this case in his rebuttal re-stated his argument as follows:

My friend has said that I made the suggestion that where the main body of the industry is located in a particular place, any other section of that industry should be brought up automatically to that level. I did say that was a desirable principle having in mind the health and welfare of Canada generally, but I am not arguing that in this case. I argue that the high level prevailing in the major market is certainly a strong factor to be taken into consideration when dealing with the wages in the lower one.

It is significant, however, that in this particular case the employees did not seek exactly the wage rates paid in the Chrysler and Ford Companies. In fact, they must have recognized that certain differentials should exist, although they did not furnish this Board with the reasons for such differentials. In this connection we think it useful to refer to the purposes of the Wage Control Order, P.C. 9384, stated in Section 14 of that Order:

14. It is the purpose of this Order

- (a) to provide for the establishment of wage rates incorporating therein cost-of-living bonuses payable in respect of the rise in the cost of living;
- (b) to stabilize the wage structure in Canada established in this manner in order to maintain stability in prices and prevent increases in the general cost of living; and
- (c) to provide machinery for an orderly rectification of any gross inequalities and injustices in wage rates so established, insofar as this is possible consistently with the paramount principle of the maintenance of stability in prices. and this Order shall be administered and enforced to give effect to these purposes.

This Board is unable to find in that Order any provision which justifies it in directing that the wage rates in any industry be brought up to the highest level of wage rates paid in that industry, whether or not the particular unit of the industry under consideration is a major or a minor unit in that industry. Notwithstanding the argument of Counsel for the Union, the Windsor area is well known as a high wage area. It was such prior to the advent of wage control, and we certainly do not subscribe to the doctrine that the purposes of the Order are to be, or can be achieved, by increasing the wage rates in a low wage area to those prevailing in a high wage rate area. As this Board has, on a number of occasions, stated, P.C. 9384 was not enacted for the purpose of equalization of wage rates. It is a stabilization Order.

Having regard, therefore, to the entire appeal; and after having given consideration to the several arguments advanced, this Board is of opinion that the said Regional War Labour Board not only made the correct find-

ing as to the facts, but also correctly applied to those facts the proper principles under P.C. 9384. The appeal, therefore, is dismissed.

April 21, 1945.

Re: Abrasive Company of Canada, Arvida, Limited and the International Union of Abrasive Employees, AFL Local Union 23737

Reasons for Decision

An application for leave to appeal and an appeal from a decision of the Quebec Regional War Labour Board dated November 21, 1944, which had directed holidays with pay as follows:

Six days' vacation with pay after one year's service and one additional day for each subsequent year up to a maximum of twelve days.

The Regional Board refused to grant leave to appeal for reasons dated December 22, 1944. It is apparent that the foregoing direction

is not in accord with D.B. 17 and with the general policy of the National Board which has been to refrain from directing more than one week's paid vacation.

The application for leave should be granted and we must also allow the appeal insofar as necessary to bring the direction in conformity with D.B. 17.

On the hearing of the appeal it developed that the Company was willing to grant two weeks' vacation with pay to employees having over seven years' service. This will be authorized.

April 24, 1945.

Re: Dominion Bridge Company Limited, Toronto, Ont., and United Steelworkers of America, Local 2808

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for Ontario dated February 19, 1945, refusing an application for payment to hourly-rated employees, in the Sorauen Avenue munitions plant, of a normal day's pay for time not worked on New Year's Day. The Company is willing to extend the practice of such payment which is already in effect in its structural steel plants.

We agree with the Regional Board and are of opinion that it properly exercised its discretion in refusing to approve a working condition which is not normal or generally accepted in industry. We have on a previous occasion (L.G., June, 1944, p. 731) dealt with the question of comparability of the Company's structural steel and munitions plants.

The appeal must be dismissed.

April 24, 1945.

Re: Advance Lumber Company, Ltd., Lethbridge, Alta.

Reasons for Decision

An appeal from a decision of the Regional Board for Alberta dated March 17, 1945, whereby certain wage increases were, pursuant to section 39 of P.C. 9384, certified to the Minister of National Revenue as having been made in contravention of the privileges of the Wage Control Orders.

The appellant's only argument in the brief on appeal is that the increases were covered by section 24 (i) (ii) of P.C. 5963 (now section 25 (b) of P.C. 9384) as having been made upon the promotion of employees from one occupational classification to another.

We must agree, on the basis of the information submitted by the Company, that it was impossible for the Regional Board to

conclude otherwise than it did. However, it should be noted that some of the data requested by the Regional Board may perhaps be unnecessary to decide the issue involved v.g., the annual turnover of each of the appellant's yards.

There is no evidence that the Board below did not discharge its duty to administer the Wages Control Order fairly and equitably in this case and we must dismiss the appeal. However, the appellant should have a further opportunity either to establish that the wage increases were made, or to have the same approved, within the provisions of the Wartime Wages Control Order.

April 24, 1945.

Re: Metropolitan Life Insurance Company

Reasons for Decision

This is an appeal from a decision of the Regional Board for Ontario dated January 22, 1945, refusing permission to increase the scale of "conservation commission" to agents by \$2.85 per week.

The primary purpose of the application is . . . to maintain the Company's long established practice of providing a uniform method of compensation to all of its Agents in the same category throughout the United States and Canada, and for the further purpose of removing the inequality which now exists between the Company's Agents in the United States and the Company's Agents in Canada.

Apart from the special provision for employees engaged in international railway service, contained in section 22 of the Wartime Wages Control Order (P.C. 9384), the policy of this Board in its administration of wage

control has been to refuse to recognize comparison with wage rates prevailing in the United States as a basis for increases in Canada. Our view has been expressed in the Steam Railways' case (L.G., Aug., 1944, p. 961) as follows:

The whole policy of control of wages and prices in this country is entirely distinct and unrelated to the economy of the United States.

To succeed in its application it was necessary for the appellant to show that the increase was "necessary to rectify a gross inequality or gross injustice" (section 20 (i) (a)) and for that purpose to establish comparisons within Canada.

We agree with the Regional Board's decision and the appeal must be dismissed.

April 24, 1945.

Re: Mueller Limited, Sarnia, Ont. and United Automobile Workers of America, Local 456

Reasons for Decision

This is an appeal by the Union from a decision of the Regional Board for Ontario dated December 9, 1944, concerning the rate of pay for work performed on Victoria Day and Civic Holiday, two holidays which are not mentioned in the Order in Council (P.C. 4671) recommending the statutory holidays to be observed by employers and employees during the present war.

Under an agreement dated November 10, 1941 (prior to wage control) between the Company and its employees, time and one half was paid for time worked on these two holidays in both 1942 and 1943. From the point of view of wage control, there was an established rule which the employer could not alter if the effect of the alteration was to decrease wage rates (section 23 (1) of P.C. 5963 and section 18 of P.C. 9384). The termination of the agreement on February 28, 1944, did not, in our opinion, affect the condition established, namely overtime pay on Victoria Day and Civic Holiday, because the condition was preserved by the Wartime Wages Control Order. Following such termination, the question arose as to whether P.C. 4671 above mentioned, as special legislation on the subject of statutory holidays in wartime, overrode the general wage control order. An application was made to the Regional Board who

first decided on June 29, 1944, that the increased rate had to be paid and then, by the finding and direction now under appeal, that overtime pay "should be confined to days proclaimed by competent authority as statutory holidays".

P.C. 4671 is a declaration of general policy issued as an exhortation to employers and employees. It does not mention Victoria Day and Civic Holiday as statutory holidays which "should be observed" in wartime, but neither does it contain any provision which may be said to affect, even by inference, the rate of pay to be paid for work performed on those two days under a working condition established prior to wage control and preserved by the sections of the orders above referred to. We are of opinion that P.C. 4671 is not in conflict with the Wages Control Order, nor that it is overriding in this case. If the employer and employees had mutually agreed upon an amendment to the established rule, then paragraph B of P.C. 4671 would perhaps have permitted a straight time rate on these two days notwithstanding the prohibition of P.C. 5963 and P.C. 9384, but we need not decide the point because there was no mutual consent of the parties. In our view the Regional Board's initial interpretation was correct, and we must allow the appeal from the decision of December 9, 1944.

April 24, 1945.

**Re: The William Kennedy and Sons, Limited, Owen Sound, Ont. and
United Steelworkers of America, Local 2469**

Reasons for Decision

An appeal by the Company and a cross-appeal by the Union from a decision of the Regional Board for Ontario dated December 11, 1944, following an application for a general increase of 10 cents per hour. The Regional Board did not grant a general increase, but directed a 1 cent increase in the maximum of the range for journeymen in the foundry maintenance department and for third and fourth class stationary engineers, a 6 cent increase for one blacksmith and a 10 cent increase in the minimum rate for apprentice pattern makers.

The decision is unsatisfactory to both parties. The main matter is the 10-cent general increase. An application for a like increase had been made by the Union under the provisions of P.C. 5963 and denied by decision dated December 18, 1943, confirmed by this Board on appeal by decision of July 6, 1944 (L.G., Aug., 1944, p. 950). Upon consideration of the evidence submitted on this appeal, we must come to the conclusion that it has not been shown that the Regional Board erred in principle in refusing to allow the application

under the present order. The evidence does not in our opinion discharge the burden which an appellant must carry when bringing an appeal from a Regional Board to this Board and as a consequence the cross-appeal must be dismissed.

With respect to the various increases which the Regional Board thought it was "fair and reasonable and within its competence under the Wartime Wages Control Order, P.C. 9384" to grant, we are of opinion that the employer succeeded in demonstrating that these increases could not be justified on any reasonable basis having regard to the Company's general wage structure nor has it been shown that they were necessary to rectify gross injustices or gross inequalities.

We are of opinion that no correct basis has been shown to exist for the selection of the classifications mentioned for increases in the Regional Board's decision, when it is borne in mind that the purpose of wage control under the present order is to stabilize wage rates. We must, therefore, allow the appeal and issue Findings and Directions accordingly.

April 24, 1945.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for five days during the month of April. During this period the Board received eight applications, held ten hearings, issued ten certificates designating bargaining representatives, rejected three applications, allowed the withdrawal of one application, ordered two representation votes and gave decisions in five appeal cases.

Certificates Issued

1. *Sentinel Steam Plant Workers' Union (C.C.L.) and East Kootenay Power Company Limited, Fernie, B.C.* (L.G. March 1945, p. 290). Following an investigation of the application by an officer of the Board, the Union and Messrs. O. H. Bowen, R. Wood and George E. Hines were certified as bargaining representatives for the employees of the East Kootenay Power Company Limited, Fernie,

B.C., engaged in its steam-turbine generating plant at Sentinel, Alberta. The superintendent and plant clerk were excluded from the bargaining unit.

2. *Brotherhood of Railroad Trainmen, Lodge 980 and Northern Alberta Railways Company, Edmonton, Alberta*, (L.G. April 1945, p. 478). The Union and Messrs. J. P. Morin and E. R. LeClair were certified as bargaining representatives for the dining car stewards, waiters and cooks employed by the Northern Alberta Railways Company. Certification followed an investigation of the application by an officer of the Board.

3. *International Longshoremen's Association, Local 38-164 and Empire Stevedoring Company Limited, Vancouver, B.C.* (L.G. March 1945, p. 290). Following an investigation of the application by an officer of the Board, the Union and Messrs. F. Louis, A. T. Thornett,

W. Gordon, M. Underwood and A. Guerrin were certified as bargaining representatives for the longshoremen employed by the Empire Stevedoring Company Limited in the Chemainus District, from Crofton South to Nanoose Bay North, including Nanaimo and Ladysmith, B.C. Foremen were excluded from the bargaining unit.

4. *International Longshoremen's Association, Local 38-164 and Canadian Stevedoring Company Limited, Vancouver, B.C.* (L.G. March 1945, p. 290). The Union and Messrs. F. Louis, A. T. Thornett, W. Gordon, M. Underwood and A. Guerrin were certified as bargaining representatives for the longshoremen in the Chemainus District, from Crofton South to Nanoose Bay, North, including Nanaimo and Ladysmith, B.C. Foremen were excluded from the bargaining unit. Certification followed an investigation of the application by an officer of the Board.

5. *International Brotherhood of Electrical Workers, Local 348 and the Corporation of the City of Medicine Hat, Alberta.* (L.G. April 1945, p. 479). Following an investigation of the application by an officer of the Board the Union and Messrs. A. Park, F. W. Keyte, W. Clark and F. Keeley were certified as bargaining representatives for the linemen and groundmen employed in the Electric Light Department of the Corporation of the City of Medicine Hat, Alberta. Employees in the Electric Power plant were excluded from the bargaining unit.

6. *The United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, Local No. 170 and Vancouver Hotel Company, Limited, Vancouver, B.C.* (L.G. Feb. 1945, p. 154). The Union and Messrs. J. Dillabough and A. Mathieson were certified as bargaining representatives for the Plumbers and Steamfitters employed by the Vancouver Hotel Company, Limited, Vancouver, B.C. Certification followed the hearing by the Board and an investigation of the application by an officer of the Board.

7. *Commercial Telegraphers' Union, Canadian Marconi System Division, No. 59 and Park Steamships Limited, Montreal, P.Q.* (L.G. April 1945, p. 479). Following a hearing by the Board and an investigation of the application by an officer of the Board the union and Messrs. J. N. A. Blouin, and Arthur Gosse were certified as bargaining representatives for the radio officers employed on Dry Cargo Vessels of the Park Steamships Limited, operating from the East Coast of Canada.

8. *Brotherhood of Maintenance-of-Way Employees and the Thousand Islands Railway Company, Gananoque, Ontario, subsidiary of*

the Canadian National Railways. (L.G. April 1945, p. 479). The union and Mr. J. J. O'Grady were certified as bargaining representatives for section crew employees, including foremen, employed by the Thousand Islands Railway Company, Gananoque, Ontario.

9. *Brotherhood of Painters, Decorators and Paperhangers of America, Local 583, and Alberta Nitrogen Products, Limited, Calgary, Alberta.* (L.G. April 1945, p. 479). Following an investigation of the application by an officer of the Board, the union and Mr. N. Buckley were certified as bargaining representatives for the painters employed by the Nitrogen Products, Limited, Calgary, Alberta.

10. *Canadian Air Line Pilots' Association and Trans-Canada Air Lines, Winnipeg, Manitoba.* (L.G. March 1945, p. 289). The union and Messrs. George Lothian, James D. Storie, Reuben E. Hadfield and David Lewis Behncke were certified as bargaining representatives for the pilots of the Trans-Canada Air Lines, Winnipeg, Manitoba. Check pilots, chief pilots and trans-Atlantic pilots were excluded from the bargaining unit. Certification followed a public hearing and an investigation of the application by an officer of the Board. Reasons for judgment appear at the conclusion of this article.

11. *Canadian Seamen's Union, and Canadian National (West Indies) Steamships, Limited, and Canadian Government Merchant Marine Limited, Montreal.* (L.G. Feb., 1945, p. 154.) The union and Messrs. J. A. Sullivan, D. Ferguson and C. E. Linton, were certified as bargaining representatives for the unlicensed personnel of the companies. Chief stewards and West Indian employees engaged at their own home ports under British Board of Trade Articles were excluded from the bargaining unit. Certification followed a public hearing and an investigation of the application by an officer of the Board. Reasons for judgment appear at the conclusion of this article.

Applications for Certification Rejected

1. *Railway Supervisors' Association and Canadian National Railways Western Region, (Motive Power, Car and Stores Department) Port Arthur, Ontario to Vancouver, B.C.* (L.G. Jan. 1945 p. 36)—Following a hearing on the application for certification the Board decided that the application should be rejected as the bargaining unit defined in the application was not considered appropriate for collective bargaining purposes.

2. *International Longshoremen's and Warehousemen's Union Local 501 and Vancouver Barge Transportation, Limited, Vancouver,*

B.C.—Following an investigation of the application by an officer of the Board, the Board rejected the application as the bargaining unit was not considered appropriate in that it excluded casual employees in classifications similar to those covered in the application.

3. *Western Canadian Greyhound Employees' Union and Western Canadian Greyhound Lines, Limited, Calgary.* (L.G., Jan., 1945, p. 36.) Following a hearing on the application for certification the Board dismissed the application without prejudice to the right of the union to make a new application and to name an appropriate bargaining unit. Reasons for judgment appear at the conclusion of this article.

Application for Certification Withdrawn

Canadian Seamen's Union, Pacific Coast District, and Vancouver Tug Boat Company, Limited, Vancouver, B.C. (L.G. April 1945, p. 478).—On the request of the district representative of the Canadian Seamen's Union, Pacific Coast District, the application for certification of bargaining representatives was withdrawn.

Representation Votes Ordered

1. *The Seafarers' International Union of North America, Vancouver Branch, Pacific District, and B.C. Steamships Limited, Vancouver, B.C.* (L.G. April 1945, p. 479).—The eligible voters are the unlicensed personnel in deck, engine room and stewards' departments on S.S. "Island Prince" and S.S. "Alaskan Prince" of the B.C. Steamships Limited, Vancouver, B.C.

2. *Canadian Seamen's Union and Canada Cement Transport Limited, Montreal, P.Q.*—The eligible voters are the unlicensed personnel of the crews of the steamer "Bulkarrier" and the motor ship "Cementkarrier" covering wheelmen, watchmen, lookouts or patrolmen, deck hands, cooks, porters, firemen, oilers and operators.

Arbitration Committee Established

On March 7, 1945, application was made to the Wartime Labour Relations Board (National) by the Ford Motor Company of Canada Limited, Windsor, Ontario, for an interpretation of Sections 6 and 14 of the agreement between the Company and the Union Local 200, International Union, United Automobile, Aircraft, and Agricultural Implementation Workers of America, Local 200, (UAW-CIO) concerning the termination date thereof.

The hearing on the application of the Company was held by the Board on March 29 and

it was decided that a Committee of the Board comprising the chairman and Messrs. E. R. Complin and A. R. Mosher sit as an Arbitration Committee to hear the parties and decide the issue.

The report of the Committee will appear in next month's issue of the *LABOUR GAZETTE*.

Applications for Certification Under Investigation

1. International Longshoremen's and Warehousemen's Union, Local 501, on behalf of employees employed in the handling of miscellaneous general cargo from deck shed to barge or scow and vice versa, including longshoremen stowing or discharging cargo on barge or scow, dock truckers and pilers, jitney drivers, lift jitney, checkers and maintenance men for equipment of Vancouver Barge Transportation, Limited, Vancouver, B.C.

2. Canadian Seamen's Union, on behalf of the unlicensed personnel of the crews of the Steamer "Bulkarrier" and the Motor ship "Cementkarrier" covering wheelmen, watchmen, lookouts or patrolmen, deck hands, cooks, porters, firemen, oilers, and operators of the Canada Cement Company Limited, Montreal, P.Q.

3. Halifax Harbour Staff Association (Civil Service Federation of Canada) on behalf of the staff employees embracing the departments of port manager, harbour master, engineering, cold storage, grain elevator, wharfage, chief of police and branch of the treasury department associated with the National Harbours Board, Halifax, N.S.

4. Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees on behalf of the employees of the grain elevator of the Collingwood Terminals Limited, Collingwood, Ontario.

5. The Oshawa Railway and Thousand Islands Railway Clerical Association on behalf of certain clerical employees employed by the Oshawa Railway Company, Oshawa, Ontario.

6. The Oshawa Railway and Thousand Islands Railway Clerical Association on behalf of the office and shed staffs of the Thousand Islands Railway, Gananoque, Ontario.

7. Canadian Seamen's Union, Pacific Coast District, on behalf of the unlicensed crew members of the deck, engine room and stewards departments of vessels operated by the Kingcome Navigation Company, Vancouver, B.C.

8. International Longshoremen's Association, Local 163, on behalf of coastwise longshoremen employed by Border Line Transportation Company and ten other various shipping companies and represented by the Shipping Federation of British Columbia, Vancouver, B.C.

Decisions of Board in Appeal Cases

The Board issued Reasons for Judgment in the following appeal cases:

(1) Shop Committee of Foster-Wheeler Employees, appellants, and Foster-Wheeler Limited, St. Catharines, Ontario, respondents.

(2) United Electrical, Radio and Machine Workers of America, Local 528, appellants, and Canadian Marconi Company, Limited, Montreal, P.Q., respondents.

(3) Retail Clerks' International Protective Association, Local 832, appellants, and Shop-Easy Stores, Winnipeg, Manitoba, respondents.

(4) Sunshine Workers' Union, appellants, and Sunshine Waterloo Company, Limited, Waterloo, Ontario, respondents.

(5) International Association of Machinists, Lodge 712, respondents, and Noorduyn Aviation Limited, Montreal, P.Q., appellants.

The text of the Board's reasons for judgment in the various cases appears below.

Between: Canadian Air Line Pilots' Association, Applicant; and Trans-Canada Air Lines, Respondent.

The Board consisted of the Chairman and all other members except the Vice-Chairman.

Reasons for Judgment

This is an application for certification of bargaining representatives elected by the Association for the employees of Trans-Canada Air Lines. The employer does not oppose certification but asks for the exclusion of Chief pilots, Check pilots and Trans-Atlantic pilots.

The Board finds that it has no jurisdiction to include the Trans-Atlantic pilots. This service is operated under Order in Council P.C. 5742 and an agreement between the Crown and Trans-Canada Air Lines. Section 1 of the Order in Council is as follows:

(1) The Corporation shall, as the Agent of His Majesty, operate and maintain the said service under the control and direction of the Minister of Munitions and Supply (including the Deputy Minister of Transport).

Section 2 (1) (g) of the Regulations, P.C. 1003, defines employers as follows:

2. (1) (g) "Employer" means a person employing more than one employee and includes:

- (i) the National Harbours Board and
- (ii) any other body incorporated to act as an agent of His Majesty in right of Canada except any such body whose employees are entitled to a cost-of-living bonus under the order made by the Governor in Council on the twenty-sixth day of August, nineteen hundred and forty-one, for the payment of a cost-of-living bonus to employees of the Government of Canada (P.C. 6702), as amended; but does not include His Majesty or any person or corporation acting for or on behalf of or as an agent of His Majesty except as hereinbefore expressly provided;"

The Trans-Canada Air Lines was not incorporated to act as an agent of His Majesty in right of Canada. The stock of the Company

is held by the Canadian National Railways. In connection with its Trans-Atlantic service, however, Trans-Canada Air Lines is an agent of His Majesty in the right of Canada so that Trans-Canada Air Lines is not an employer within the meaning of the Regulations as to the Trans-Atlantic pilots.

In the opinion of the Board, Check pilots and Chief pilots should be excluded from the bargaining unit.

The exclusion of Check pilots, Chief pilots and Trans-Atlantic pilots from the bargaining unit does not mean that the persons now employed in these classifications by Trans-Canada Air Lines will be deprived of the benefit of any collective agreement which may be negotiated. They are still primarily pilots employed by Trans-Canada Air Lines and if and when they change their status as Check pilots, Chief pilots, or Trans-Atlantic pilots, they will revert to the position of pilot with their full seniority in the service of the Trans-Canada Air Lines. There is no good reason why a provision to this effect should not be included in the collective agreement.

There is nothing in the Regulations which prevents Mr. David Lewis Behncke from being appointed as a bargaining representative of the Association.

The bargaining representatives will be certified but the Check pilots, Chief pilots and Trans-Atlantic pilots will be excluded from the bargaining unit.

(Sgd.) G. B. O'CONNOR,
Chairman.

Capt. R. E. Hadfield, Capt. G. B. Lothian, for Applicant; F. W. Edge, Esq., J. H. Tudhope, Esq., for Respondent.

April 10, 1945.

Between: Canadian Seamen's Union, Applicant, and Canadian National (West Indies) Steamships, Limited, and Canadian Government Merchant Marine Limited, Montreal, Respondents.

The Board consisted of the Chairman and all other members except the Vice-Chairman.

Reasons for Judgment

This is an application by the union for certification of bargaining representatives elected or appointed by it for the employees of the respondents. The employers do not oppose certification but ask for the exclusion of two classes of employees—namely the chief stewards and West Indian employees who are engaged at their home ports in the West Indies under British Board of Trade Articles. They are not permitted to enter Canada without immigration permits and must be returned to their home ports.

The chief stewards should be excluded from the bargaining unit.

The Parliament of Canada, in the Canada Shipping Act, has legislated with respect to foreign-going ships registered in Canada and the Canada Shipping Act contains elaborate provisions governing the employment of seamen on these ships.

Section 163 of the Canada Shipping Act provides that the master of every British ship, other than home trade ships, inland water ships and minor waters ships of less than fifty register tons, shall enter into an agreement in accordance with the Act with every seaman whom he engages in Canada and carries as one of his crew.

Section 164 of the Act provides that when agreements with seamen in respect of ships registered in Canada are first opened in any part of His Majesty's dominions outside Canada their form and contents shall be those prescribed by the law of that part of such

dominions and if opened elsewhere than within His Majesty's dominions shall be those prescribed by the law of Canada.

The agreements with West Indian seamen are first opened in West Indian ports. The form and contents of the agreements are those prescribed by the law of the West Indian ports—viz: the Regulations of the British Board of Trade. To certify bargaining representatives to make a collective agreement for West Indian seamen under the Wartime Labour Relations Regulations, P.C. 1003, would invite conflict with the provisions of the Canada Shipping Act.

The bargaining representatives will be certified but the chief stewards and West Indian employees who are engaged at their own home ports under British Board of Trade Articles will be excluded.

(Sgd.) E. R. COMPLIN,
(Sgd.) H. TAYLOR

We agree to certification but dissent as to exclusion of West Indian employees.

(Sgd.) A. R. MOSHER
(Sgd.) WM. L. BEST
(Sgd.) J. A. D'ACOST

D. Ferguson, Esq., J. A. Sullivan, Esq., for Applicant; F. W. Edge, Esq., R. B. Teakle, Esq., Wm. Adie, Esq., W. H. Rice, Esq., W. D. Gray, Esq. for Respondents.

April 12, 1945.

Between: Western Canadian Greyhound Employees' Union, Applicant, and Western Canadian Greyhound Lines, Limited, Respondent.

The Board consisted of the Chairman and all other members except the Vice-Chairman.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application by the union for certification of bargaining representatives appointed or elected by it. The correct name of the applicant is Local 1374 of the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America. The applicant seems unable to distinguish between the bargaining unit which it claims to be

appropriate and the union. Thus, the bargaining unit claimed to be appropriate is described in the application as "Western Canadian Greyhound Employees' Union consisting of employees employed as operators. . . ." This description was amended on January 15th and again on January 21st, 1945, but only as to the kind of employees sought to be represented. Finally, on February 23rd, 1945, the applicant made it clear to the Chief Executive Officer of the Board that it was only concerned about the employees in Winnipeg, Regina, Saskatoon, and Calgary and did not wish to include in the bargaining unit the

employees at Banff, Brandon, Dauphin, Drumheller, Edmonton, Fernie, Lethbridge, MacLeod, Nelson, Nipawin, Portage la Prairie and Prince Albert.

There are 332 employees on the employer's payroll of which 98 are motor coach operators. The applicant desires to include 182 employees of the above-mentioned points of which 58 are motor coach operators.

The employer contends that the proposed bargaining unit is not appropriate since it includes employees in each classification stationed at only four of its several centres of operation. The Board agrees with the employer's contention in this respect. To appoint bargaining representatives at four operating centres out of sixteen and to make no provision for the same classification of

employees at twelve intervening places would permit the employees at the intervening points to elect or appoint bargaining representatives who would be entitled to negotiate for separate collective agreements and this could easily lead to much confusion and dissatisfaction.

The application is dismissed without prejudice to the right of the union to make a new application and to name an appropriate bargaining unit.

(Sgd.) G. B. O'CONNOR,
Chairman.

L. O'Connell, Esq., J. A. Sullivan, Esq., for Applicant; J. Manley Edwards, Esq., M.P., L. Frizzell, Esq., for Respondent.

April 10th, 1945.

Between: The Shop Committee of Foster Wheeler Employees, Petitioner Appellant, and Foster Wheeler, Limited, and United Steelworkers of America (Local 2223), Respondents.

The Board consisted of the Chairman and all other members except the Vice-Chairman.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application for leave to appeal and an appeal by the Shop Committee of Foster Wheeler employees from that portion of an Order of the Ontario Board directing a vote which provides that "voters will be offered a choice as between the petitioner and the intervener". The Shop Committee is the petitioner and the United Steelworkers of America, Local 2223, is the intervener.

It is unnecessary to consider the issues dealt with by the Ontario Board or raised in the Notice of Appeal because it appears that the application was made by the Shop Committee of Foster Wheeler employees as a local union chartered by the Amalgamated Unions of Canada and the Shop Committee is no longer a union within the regulations, section 2 (1) (n) of which is as follows:

"2. (1) (n) "trade union" means a provincial national or international employees' organization, or a local branch chartered by, and in good standing with, such an organization".

At the time of the application, the Shop Committee was chartered by the Amalgamated Unions of Canada but subsequently it found difficulty in paying dues to the Amalgamated Unions and severed its connection with and

is no longer in good standing with that organization. If the bargaining representatives had been elected by a majority vote of the employees affected, pursuant to section 5 (1) of the Regulations, the Board could permit the Shop Committee to amend the application and to ask for certification of the bargaining representatives as an Employees' Association. Even if this were done, the application must be rejected as none of the three elections of bargaining representatives was by a majority vote of the employees. Bargaining representatives were elected in departments and none of them was ever elected by a majority vote of all the employees. For example, at one election one bargaining representative was elected by the four employees in the pattern shop, two by the thirty-nine employees in the foundry, two by the fifty-nine employees in the machine shop, and three by the one hundred and seventeen employees in the boiler shop.

Leave to appeal is granted but the appeal and the petition are dismissed.

(Sgd.) G. B. O'CONNOR,
Chairman.

H. A. Rose, Esq., K.C. for Petitioner Appellant; J. L. G. Keogh, Esq., for Foster Wheeler, Limited; F. A. Brewin, Esq., for United Steelworkers of America, (Local 2223).

April 10th, 1945.

**Between: United Electrical, Radio and Machine Workers of America,
Local 528, Applicant Appellant, and Canadian Marconi Company Ltd.,
Montreal, and Canadian Marconi Employees' Council, Respondents.**

The Board consisted of the Chairman and all other members except the Vice-Chairman.

Reasons for Judgment

This is an appeal by the union from a judgment of the Quebec Labour Relations Board which held that the Quebec Board had no jurisdiction to certify bargaining representatives elected or appointed by the union because the work or undertaking did not fall within those enumerated in Schedule A of the Regulations, P.C. 1003. The Company manufactures radio equipment and from 80 to 90 per cent of its production is used for war purposes but it is not exclusively engaged in the production of naval, military, or air stores.

Under the Board's decision in the Dominion Oilcloth and Linoleum case (D.L.S. 7-509) this Board interpreted the words "engaged in the production of naval, military, or air stores" as confined to works, undertakings, or businesses which exclusively produce naval, military, or air stores.

Counsel for the appellant points out, however, that the employer has admitted in court proceedings that it falls within the Industrial Disputes Investigation Act as extended by Order-in-Council P.C. 3495 and contends that the interpretation clauses of P.C. 3495 are very similar to the provisions of Schedule A. The definition of "supplies" in P.C. 3495 is exceedingly flexible and includes "articles and equipment which in the opinion of the Minister of Labour would be essential for the needs of the Government or for the community in war".

Counsel for the appellant also contends that the employer is engaged in manufacturing or assembling aircraft parts within section 2 of Schedule A or in the production of implements of war within section 12 of Schedule A. The employer manufactures radios which are used in aircraft. Radios are generally used in warfare for communication or propaganda. As is stated in the Dominion Oilcloth and Linoleum case, this Board is not prepared to find that the Dominion has by the Regulations, P.C. 1003, encroached upon the usual provincial field except where it has done so by clear words. If it had been intended to include the business of manufacturing radios in Schedule A, it would have been a simple matter to do so. A radio is not an essential part of an aircraft. An aircraft will fly without a radio or a gun or a bomb. It is true that radios are used for aircraft and for warfare but many other common things, which are not included in Schedule

A, are used in warfare, even such insignificant things as pigeons or mice.

It is suggested that a limited number of employees are engaged in radio transmission. If so, a new application to certify bargaining representatives elected or appointed by these employees may be made.

The appeal is dismissed.

(Sgd.) G. B. O'CONNOR,
Chairman.

(Sgd.) A. DESCHAMPS
(Sgd.) H. TAYLOR
(Sgd.) E. R. COMPLIN
(Sgd.) R. HARMEGNIES

Reasons for Dissenting Judgment

After careful consideration, the undersigned members of the Board who join in these dissenting Reasons for Judgment have reached the conclusion that the public interest will be seriously damaged and that the meaning, intent and purpose of P.C. 1003 will be violated and destroyed, if effect is given to the decision reached in this case by a majority of this Board, consisting of the Chairman and the other members who have subscribed to that judgment. We, therefore, not only record our dissent but our reasons for the same.

In our view, the practical and net effect of that judgment is to nullify P.C. 1003 completely as to the Province of Quebec, and to invite other provinces to repeal, or to refuse to enact, enabling legislation extending the provisions of P.C. 1003 to such provinces.

The main purpose and objective of P.C. 1003, namely, the standardization and clarification of the principles and policies to be followed in the Dominion of Canada with respect to collective bargaining, would thus be destroyed. Having regard to this, we view the decision, and its possible consequences, with such alarm that we feel that we should state at the outset, and not in any mood of petulance or threat, that unless effective action is taken at once to reverse or correct the view expressed in the majority decision of this Board, so that P.C. 1003 and the Labour Relations Board (National) will be able to serve the purposes for which the Order in Council was passed and the Board was appointed, we will, each of us, find it necessary to report the situation completely to the respective organization which nominated or suggested or approved of our appointment.

The facts of this case, and the principles which apply, are relatively clear, and even simple.

The Canadian Marconi Company Ltd., Montreal, carries on the business of manufacturing wireless equipment and parts for aircraft in the city of Montreal. It was admitted, both before the Quebec Labour Relations Board and before this Board, that about 90 per cent of the Company's production is so engaged and this is further confirmed in a letter dated November 15, 1944, from Mr. Justice Boivin, Chairman of the Quebec Board, and unchallenged either by the Company or the Employees' Council. It was further admitted that, at least as of the 27th October, 1943,

"the industry in which the defendant company is engaged has been continuously and still is, since the beginning of the war, an industry described in P.C. 3495 as amended by P.C. 1708" . . .

Counsel for the Company contended that this admission could have no effect, or should not have any effect, on our proceedings and that the admission was only given, and could only have effect, in relation to criminal proceedings which are now proceeding in the Courts of Quebec as a result of action taken by the Minister of Labour under P.C. 4020 on the ground of alleged dismissal by the Company of an employee, or employees, for Union membership or activity and refusal by the Company to reinstate such employee, or employees, after so being ordered by the Minister of Labour pursuant to P.C. 4020.

It would appear to us to be immaterial whether the Company's contention as to the binding character of the admission of 27th of October, 1943, is or is not upheld in the proceedings before us, because, while Counsel for the Company contended that the admission was not binding upon us, or as to the hearing before our Board, there was no suggestion from him, even the slightest, that the facts as they prevail today are in any way different from the facts as they prevailed at the time the Company, through its Counsel, made the admission above quoted. Certainly neither Counsel for the Company nor for the Employees' Council raised any objection either to the accuracy of the statements concerning the production of the Company for war purposes or the accuracy of the statement contained in the letter of the Chairman of the Quebec Board,

"that 90% of the production of the Company is for war purposes";

nor was any issue raised as to the accuracy of the report of the inspector of the Quebec Board, upon which Mr. Justice Boivin appears to have made the above statement, which inspector's report, Mr. Justice Boivin states,

"is to the effect that about 90% of the production is for war purposes, the balance being for civilian needs".

Upon the basis of this report the Quebec Board on the sole and single ground that less than 100% of the Company's production was for war purposes, refused to consider the appellant's application to be certified as the bargaining agency of the specified unit of the employees of the Company.

In our view this judgment of the Quebec Board is unsound. It repudiates and ridicules the basic objectives and purposes for the achievement of which P.C. 1003 was enacted and this Board appointed.

The application of P.C. 1003, in provinces which, like Quebec, have not adopted enabling legislations to extend the application of P.C. 1003, is to be found in Section 3 of the Regulations, supplemented by Schedule "A". As to this case, the employees, if they are covered, are those as set out in Section 3 (1) (b), who

"are employed upon or in connection with a work, undertaking or business that is essential to the efficient prosecution of the war".

One must also read Section 3(2) with the above, that for the purposes of Section 3(1)(b)

"the employees employed in a work, undertaking or business described in Schedule "A" to these Regulations, and no others, shall be deemed to be employed in connection with a work, undertaking or business that is essential to the efficient prosecution of the war".

It is quite obvious that the term "and no others" in Subsection (2) above quoted, relates to the immediately preceding words "work, undertaking or business described in Schedule "A" to these Regulations". Otherwise, and if the reasoning of the majority decision of this Board and the decision of the Quebec Board are allowed to stand, any employer in Quebec, or in any other province which has not enacted enabling legislation extending the application of P.C. 1003, could completely shield himself and his business against the application of P.C. 1003, and render that Order in Council quite powerless and without any effect, merely by engaging even one employee, or by diverting the production of only one employee, to civilian needs as contrasted with war purposes.

Indeed, it would not be necessary for an employer, in carrying out such a plan of destroying the effectiveness of P.C. 1003, to engage any specific employee, or divert the production of any specific employee, regularly for civilian needs instead of war purposes. An employee could be so engaged, or his or her production could be so diverted to civilian needs, instead of war purposes, and could be altered as between production, for war purposes or civilian needs, from day to day or even from hour to hour. If the reasoning of the majority decision of the Board or the decision of the Quebec Board is accepted, such an

employer would still be in the secure position of being able to assert that less than 100% of his production was for war purposes, and that he and his business were therefore immune from the application of P.C. 1003.

Any interpretation of P.C. 1003 which purports to give legal validity to such a proposition or situation, demonstrates, in itself, the complete fallacy and error of, and the ridiculous results which result from, any such interpretation.

Counsel for the Employees' Council based much of his argument on the judgment of this Board in the case in which Plastic and Linoleum Workers Local 677 were applicants and the Dominion Oilcloth and Linoleum Co. Ltd. and Barry and Staines Linoleum (Canada) Ltd. were respondents. It is quite clear that the case so relied upon does not in any way furnish any support for the majority decision in this case that the Canadian Marconi Co. Ltd., Montreal, is not within the jurisdiction of P.C. 1003.

In the Dominion Oilcloth case, as the judgment of the Board shows, the question of the Board's jurisdiction depended upon the interpretation which should be given to Section 12 of Schedule "A", and particularly to the last words in that Section, which words are underlined in the Board's judgment, namely,

"naval, military or air stores".

There was no suggestion in the Dominion Oilcloth case that the production of either of the Companies was designed, or that its use was intended or was to be diverted for war purposes. The Dominion Oilcloth Company produced linoleum and oilcloth, whether such production was to be used for war purposes or for civilian needs, and while the Company also did work on "army duck" for war purposes, the Board's Reasons for Judgment indicate that this work only constituted 17.5% of the company's total output for the previous five months, and that in any event the contract for such work was to expire in June, 1944.

As to the other Company which was a party to that case, namely, the Barry & Staines Linoleum (Canada) Ltd., the Reasons for Judgment similarly disclose that the Company manufactured linoleum products, irrespective of their intended use or diversion, and that while it also made "camouflage nets", that production only constituted 12.4% of the company's output in 1943, and only 12.9% of the company's output in 1944, up to the time of the judgment referred to.

The Board's judgment in that case, and if any other interpretation is applied to it the judgment should be reviewed and revised, rested entirely upon the general character of the term "naval, military or air stores", which

as the Reasons for Judgment pointed out, might well cover even butter and eggs. Because of that general character of those particular words, namely, "naval, military or air stores", and also because of the unsubstantial portion of the company's undertaking or production which was related to war purposes as contrasted with civilian needs, the National Board upheld the Quebec Board's ruling in that case that it did not have jurisdiction to deal with the application for certification.

The facts, and likewise the principles, to say nothing of the relevant sections of the Regulations, which are involved in this Canadian Marconi case, differ entirely from the Dominion Oilcloth case. Apart from the fact that indisputably 90% of the production of the Marconi Company is for war purposes and not for civilian needs, we were informed and the assertion was not contradicted, that the products manufactured by the Canadian Marconi Company, to say nothing of its work in connection with wireless equipment, are manufactured in a particular style, and according to definite standards and specifications, to enable them to be fitted into aircraft. This brings the Company most clearly within Section 2 of Schedule "A" of P.C. 1003, which covers "a work, undertaking, or business engaged in manufacturing or assembling aircraft parts".

The Quebec Board and the majority decision in this case of the National Board attempt to read Section 2 of the Schedule as if the word "solely" appeared after the word "engaged". As we have shown, it is obvious that it is neither practicable, nor in conformity with the purposes of the Regulations, to attempt to read any such term gratuitously into the Schedule or the Regulations.

The Quebec Board and those who have associated themselves with the majority decision in this case of this Board, as well as Counsel for the Company, and the Employees' Council, attempt to give P.C. 1003 a restricted and a restrictive application, as if it referred only to certain and described specific articles and solely to such articles. It is obvious that P.C. 1003, and that all wartime Regulations dealing with labour matters, including P.C. 3495 which extended the scope of the Industrial Disputes Investigation Act, or P.C. 2685 which sets out the principles that should prevail between employers and employees in respect to collective bargaining, consistently emphasize not the character, nor even the type, of the goods or articles produced, but the relationship to the efficient prosecution of the war or the work, undertaking or business which produces such goods and articles.

This is borne out by the very opening recital of P.C. 1003 in which it is recited that:

"Whereas it is deemed to be in the public interest, especially during the war period and more particularly in *industries essential to the prosecution of the war*, that employers and employees collaborate for the advancement of the enterprises in which they are engaged;"

The above-quoted recital makes it clear that the Regulations which constitute P.C. 1003 are intended to deal with and what the nation is concerned with:

"industries essential to the prosecution of the War" and that it is these industries which are covered by Section 3(2) of P.C. 1003 and by the Schedule. How can it be argued or even suggested that a work, undertaking or industry, 90% of whose production is used for war purposes, is anything else but an industry that is "essential to the prosecution of the war".

As a matter of fact, the Quebec Board itself has shown a strange inconsistency with respect to its jurisdiction. We were advised, and it was not questioned or contradicted, that the Quebec Board has ruled that it possesses jurisdiction in respect to the R.C.A. Victor Company of Montreal, a company which is engaged in exactly the same sort of production as the Canadian Marconi Co. Ltd., Montreal, 98% of whose production is for war purposes and not for civilian needs. It cannot be argued surely that a firm of whose production 98% is for war purposes is "exclusively engaged" in production for war purposes but that a firm of whose production, 90% is for war purposes is not so engaged. It would be interesting to examine any reasoning upon which such a contention would be put forward.

The main argument in support of the contention of the Respondents was made by Counsel representing the Employees' Council, but while Mr. Forsyth, Counsel for the Company, stated that "as far as the company is concerned we have not taken any sides in that struggle and we do not propose to take any"—referring to the contest between the applicant Union and the Employee's Council—Mr. Forsyth made it quite clear that as to any question of the application of P.C. 1003 he occupied the same ground and position as the respondent Employees' Council and that any suggestion that P.C. 1003 applied to the Canadian Marconi Co. Ltd., constituted "a contravention to provincial jurisdiction".

The public opinion, policy, and interests of Canada have equally recognized and proceeded upon the basis that the responsibility of ensuring effective prosecution of the war, and of guarding Canada's interests during the war, imposes extra authority and responsibility

upon the Dominion Government. The contentions of Counsel for the Company and for the Employees Council, and the decisions of the Quebec Board and of a majority of this Board, deal with the question of Dominion jurisdiction, and with the relationship between P.C. 1003 and undertakings which are related to the effective prosecution of the war, as if no war was being carried on in which Canada was engaged or as if the effective prosecution of the war was not the major and governing interest of our activities, Dominion or Provincial, legal or otherwise.

If the Canadian Marconi Co. Ltd., Montreal, is not a war industry within the meaning of P.C. 1003, there is hardly an industry in Canada which could be stated to be a war industry. We decline to accept any view so destructive of P.C. 1003 and the aims and purposes to which the Order-in-Council is related. If the Quebec Wartime Labour Relations Board is not willing to accept jurisdiction over "industries essential to the prosecution of the war", it is our view, and we so recommend, that the Dominion should revoke any delegation of powers to the Quebec Board with respect to P.C. 1003, and that jurisdiction be vested in the National Board to deal with proceedings initiated under P.C. 1003 either in that province, or in any other province which declines to accept to carry out conscientiously the obligations of and fulfil the objectives of P.C. 1003.

It is far more important in our opinion that it should be made quite clear that P.C. 1003 is being applied evenly and equitably throughout Canada, thereby advancing the interests and war aims of the country, than to yield to or adopt some artificial fiction that in the Province of Quebec, or in any other province like-minded, P.C. 1003 covers "industries essential to the prosecution of the war", when, as to such province, no such application is in fact in operation. We refuse to be a party, in any sense or in any manner, to a situation which would not only make P.C. 1003 useless and discredit and nullify its purpose and intent, but perhaps even promote industrial instability throughout the country.

It is for these reasons, and because we feel that when we accepted appointment upon this Board we were expected to discharge an obligation to the country at large, that we reiterate, sincerely but emphatically, as we indicated at the outset of these Reasons, that, unless effective action is promptly taken to correct the situation created by the decision of the Quebec Board and the majority decision of this Board, we will each be obliged to report the whole matter fully to those who suggested, nominated or approved our

appointment upon this Board. We feel it necessary likewise, and at once, to call the attention of the Minister of Labour and the Prime Minister himself to this situation and the unfortunate implications and equally unfortunate possible consequences and results which may be projected or projected by the decision against which we so vigorously dissent.

(Sgd.) A. R. MOSHER.

(Sgd.) WM. L. BEST.

(Sgd.) J. A. D'Aoust.

My dissent from the majority decision is on the grounds that the company by admission

of Counsel and by its own advertising and radio broadcasts is almost exclusively employed on war work, and is therefore within the Quebec Board's jurisdiction pursuant to Section 3 (1) (b) of the Regulations.

April 10th, 1945.

**Between: Retail Clerks International Protective Association, Local 832.
Applicant Appellant, and Canadian Distributors' Union, Shop-Easy
Employees and Shop-Easy Stores Ltd., Winnipeg, Respondents.**

The Board consisted of the Chairman and all other members except the Vice-Chairman.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an appeal by the Retail Clerks International Protective Association, Local 832, from that portion of the decision of the Manitoba Labour Relations Board directing a vote which provides that the name of the Canadian Distributors' Union shall be included in the ballot. The appeal is taken on the ground that the administration of the Canadian Distributors' Union, in common with all the unions affiliated with the Canadian Federation of Labour, is dominated by employers.

The material in support of the application consists of affidavits filed with the Manitoba Board. The deponents were unwilling to appear for cross examination or to have their names disclosed except to the Board. The Manitoba Board very properly hesitated to act on evidence of this kind and found that no basis had been laid for refusing to include the name of the Canadian Distributors' Union in the ballot. This Board agrees with the Manitoba Board that the affidavits tendered were not proper evidence.

The Manitoba Board summoned the parties before it and the record shows the following appearance: "For Canadian Federation of Labour and Canadian Distributors' Union, Mr. Allan Meikle". Under date of March 19th, 1945, Miss May Farrell, the secretary of the Shop-Easy Employees' Local of the Canadian Distributors' Union, advised the Board that this Local had no connection with the Canadian Federation of Labour or any other

Labour body and under date of March 24th, 1945, Mr. W. T. Burford, the secretary-treasurer of the Canadian Federation of Labour, advised the Board that the said Local was not and never had been either affiliated with or chartered by the Canadian Federation of Labour and the Federation had not received from it any application or other communication. On the letterhead of the Canadian Federation of Labour appears the name "President, Allan Meikle" and one naturally wonders why the President of the Canadian Federation of Labour appeared for the Federation on the application if the Federation had no connection with the Local and had not received any application or communication from it. However, this unusual circumstance affords no sufficient reason for excluding the name of the Canadian Distributors' Union from the ballot. The investigating officer of the Manitoba Board, after an inspection of records, found that of 42 employees affected 24 were regular members of the Retail Clerks International Protective Association, Local 832.

The Canadian Distributors' Union claimed that out of 36 employees affected by their application, 19 had designated or selected collective bargaining representatives. The Manitoba Board fixed the bargaining unit as including the office clerks. This is in accordance with the decision of the National Board in the Western Grocers, Prince Albert, case (D.L.S. 7-508) in which other Locals of the same unions were interested. The number of employees affected is, therefore, 42 and it has not been established that a majority of them were members of the Canadian Distributors' Union Shop-Easy Employees Local.

In the Wright-Hargreaves and Sylvanite case (D.L.S. 7-542, at page 7-544, which judg-

ment was rendered after the judgment of the Manitoba Board in this case) this Board stated a number of proposed rules including the following:

"(4) If the Board finds that the majority of the employees affected who belong to the applicant union is not substantial or that an important section of the alleged majority consists of employees who are not regular members but who have signed requests for the applicant union to elect or appoint bargaining representatives on their behalf, the Board will in most cases, on the application of the employer, direct a vote.

(5) The Board will not include in the ballot the name of any intervening or competing union unless the Board is also *prima facie* satisfied that a majority of the employees affected are members of the competing or intervening union. This will rarely happen and it can only happen if some of the employees affected belong to or sign authorizations for more than one union so that they may be deemed to be members of two or more unions."

The statement in rule 4 that "the Board will in most cases, on the application of the employer, direct a vote" was not intended as exclusive—that is the Board may direct a vote on the application of any interested union or Employees' Association.

Rule 5 was intended to make it easier for a union or an Employees' Association to obtain certification of its bargaining representatives.

In the Packard and Philco case (D.L.S. 7-527) a majority of the members of this Board found "In the view of the Board the regulations provide that a union or an Employees' Organization must secure the support of a majority of the employees affected, namely, those entitled to vote in order to obtain cer-

tification." The Board adopted rule 5 in the Wright-Hargreaves and Sylvanite case in order to make it easier for a union or Employees' Association to obtain certification of its bargaining representatives because this Board felt that it was more difficult for a union or Employees Association to secure a majority of all the employees affected if more than one name was put on the ballot. There was, of course, the procedure of the "run-off" vote adopted by the Ontario Board in the Wright-Hargreaves case (D.L.S. 7-1156) but the National Board does not feel that a "run-off" vote is consistent with the regulations.

The proposed rules stated by this Board in the Wright-Hargreaves and Sylvanite case are intended to assist in obtaining certification. It is apparent, however, that many employees—especially those familiar with the practice of the Ontario Labour Court—misconstrue rule number 5 and would prefer that the names of two or more unions appear on the ballot even if this makes it more difficult to secure certification.

The Board directs that the name of the Canadian Distributors' Union shall be excluded from the ballot.

The appeal is allowed.

(Sgd.) G. B. O'CONNOR,
Chairman.

Easy Stores Limited.

April 10th, 1945.

Between: Sunshine Workers' Union, Appellant Intervener and Sunshine Waterloo Company Ltd., Waterloo, Ont., Respondent and Local 392, United Steelworkers of America, Petitioners Respondent and International Association of Machinists, Intervener Respondent.

The Board consisted of the Chairman and all other members of the Board except the Vice-Chairman and Mr. Harmegnies.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an appeal by the Sunshine Workers' Union from a judgment of the Ontario Board directing a vote. The chief ground of appeal is that the Sunshine Workers' Union was certified by the Ontario Labour Court on February 8, 1944, and subsection 3 of section 13 of the Ontario Collective Bargaining Act provided that no certificate granted by the Labour Court could be revoked within one year from its date except on the ground of fraud affect-

ing the granting thereof. The Ontario Act was repealed on April 6, 1944, except as to proceedings then pending but it was provided that the officers of a trade union certified under the Act should be deemed to have been certified as bargaining representatives under the Wartime Labour Relations Regulations (Order in Council P.C. 2301 of March 30, 1944, L.G., April, 1944, p. 478).

The Ontario Board did not accept this contention pointing out that the only limit on applications for certification is section nine of the Wartime Labour Relations Regulations under which new bargaining representatives may not be elected until the expiry of ten months of a collective agreement.

A collective agreement was executed by the employer and the Sunshine Workers' Union in

June, 1942, to remain in force during the war but more than ten months of this period has expired.

This Board agrees with the decision of the Ontario Board on this issue and rejects the appeal taken on this ground.

Exception is also taken by the Sunshine Workers' Union to the division of the employees into two constituencies, one of craftsmen and the other for remaining employees. In the opinion of this Board, the International Association of Machinists, a craft union which intervened, was entitled to have the vote taken in this way.

Exception was also taken by the Appellant Union to the segregation of the votes of employees temporarily employed on a Selective Service agricultural permit.

Between: International Association of Machinists, Lodge 712, Applicant Respondent, and Noorduyn Aviation Limited, Appellant

The Board consisted of the Chairman and all other members of the Board except the Vice-Chairman and Mr. Harmegnies.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

The Association filed with the Quebec War-time Labour Relations Board, under date of March 1, 1945, charges *inter alia* that the Company had violated the provisions of the War-time Labour Relations Regulations in having failed to comply with the provisions of a collective agreement entered into between the said parties under date of April 13, 1943, governing lay-offs of employees, and in having failed to comply with the decision of a Board of Arbitration established under the said agreement.

The Quebec Board held a hearing to inquire into the said charges at which both parties were represented. The chief point at issue at the hearing and in the consideration of these charges was the question of whether the said agreement of April 13, 1943, terminated on June 30, 1944, when the notice of termination given by the Association expired, or whether the agreement continues in effect while negotiations for a new agreement are in progress between the parties. The Quebec Board decided that the agreement continued in effect during negotiations for a new agreement.

On appeal, the Company took exception to the jurisdiction of the Quebec Board.

By section 45 of the Regulations, no prosecution may be instituted for contravention of the Regulations without the consent of the

This Board has never attempted to exclude temporary employees as such from the bargaining unit, and accordingly is of the opinion that the temporary employees should be included in the bargaining unit.

The appeal is dismissed but the Ontario Board will count the votes of the temporary employees referred to, and they will be included in the bargaining unit.

(Sgd.) G. B. O'CONNOR,
Chairman.

J. K. Sims, Esq., for Appellant Intervener;
H. J. Padget, Esq., C. Kidd, Esq., for

for Intervener Respondent.

April 24, 1945.

Board. The hearing held by the Board in this instance was primarily for the purpose of dealing with the charges of contravention of the Regulations made by the Association against the Company as a condition precedent to the issue of such consent and for this purpose, the Board being vested with the powers of a Commissioner under the Inquiries Act undoubtedly has the authority to proceed with the hearing and render a decision thereon.

The Company further objected to the decision of the Quebec Board and its findings that the collective agreement continued in effect during the period of negotiations for a new agreement. The Quebec Board based its findings on the words in sub-paragraph (b) of the clause relating to renewal and termination as follows:

(b) In the event of written notice of termination having been given by either party, as provided for in clause 21 (a), negotiations shall be carried on during the period of notice of termination with a view to arranging another agreement. During the period of such negotiations this agreement shall remain in full force and effect.

The Quebec Board distinguishes between the words "negotiations shall be carried on during the period of notice of termination" and the words "during the period of such negotiations" and found that the first part of the clause requires the parties to begin negotiations and the latter does not limit the period of negotiation but provides that during this indefinite period the agreement "shall remain in full force and effect".

The relevant clause of the agreement is ambiguous but this Board agrees with the finding and decision of the Quebec Board in this matter and holds that the collective agreement

of April 13, 1943, did not terminate on June 30, 1944, but remains in effect during the period of negotiations for a new agreement. It therefore follows that the Company was bound by the seniority clause of the agreement during that time and that the Arbitration Board had the authority to function pursuant to the agreement.

While the Board has concurred in the findings and decision of the Quebec Board on the above matters, it is of the opinion that the Quebec Board went beyond its authority in ordering the Company to recognize and apply the agreement of April 13, 1943, and give effect to the Arbitration Committee decision on the seniority clause.

The Wartime Labour Relations Regulations do not authorize a Board to grant specific performance of a collective agreement. Section 10 (5) provides that every party to a collective agreement shall do everything he is,

by the collective agreement, required to do and a breach of this section is an offence under the Regulations. Section 45 of the Regulations provides there shall be no prosecution for any offence under the Regulations except by, or with the consent of, the Board. The jurisdiction of the Board is therefore confined to instituting or consenting to prosecutions for an offence under the Regulations.

The Order of the Quebec Board will be varied by striking out the provision for specific performance of the collective agreement and, subject to this, the appeal will be dismissed.

(Sgd.) G. B. O'CONNOR,
Chairman.

N. H. Bell, Esq., C. H. Chesley, Esq., A. I. Smith, Esq., for Appellant; I. Burman, Esq., R. Haddow, Esq., for Applicant Respondent.

April 25th, 1945.

Conciliation Proceedings Under The Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiation for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdiction. A Conciliation Officer is then appointed to confer with the parties and endeavour to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During April reports were received from twelve Boards of Conciliation:—

Concerning The Joseph Stokes Rubber Company Limited, Welland, Ontario, and United Electrical, Radio and Machine Workers of America, Local 523.

Concerning Seiberling Rubber Company of Canada Limited, Toronto, Ontario, and United Rubber Workers of America, Local 118.

Concerning Peacock Brothers Limited, Ville LaSalle, Quebec, and International Association of Machinists, Lodge 631.

Concerning National Electric Mfg. Company, Toronto, Ontario, and United Electrical Radio and Machine Workers of America, Local 512.

Concerning Moffats Limited, Weston, Ontario, and United Steelworkers of America, Local 3129.

Concerning Dairy Pool Co-operative Marketing Association, Prince Albert, and Local 241, United Packinghouse Workers of America.

Concerning Canadian Car and Foundry Company, Limited Brantford, and United Automobile, Aircraft and Agricultural Implement Workers of America, U.A.W.-C.I.O., Local 397.

Concerning Macassa Mines, Kirkland Lake, and Local 240, Kirkland Lake Mine and Mill Workers' Union.

Concerning Anaconda American Brass Limited, New Toronto, Ontario, and New Toronto Brass and Copper Workers' Union, Local 811.

Concerning Corbin Lock Company of Canada, Belleville, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.), Local 426.

Concerning Cariboo Gold Quartz Mining Company Limited, and International Union Mine, Mill and Smelter Workers, Local 685.

Concerning Bush and Miller Company, Elburne, B.C., and International Woodworkers of America, Local 1-217.

Boards Fully Constituted

During April nine Boards of Conciliation were fully constituted:—

Wm. Russell and Sons, Windsor, Ontario.—The Board of Conciliation established to deal with a dispute between Wm. Russell and Sons, Windsor, Ontario, and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America was fully constituted on April 6, with the appointment of Mr. McGill Allen, Windsor, Ont., as Chairman of the Board, on the joint recommendation of the other two members of the Board. Mr. Wm. Murray, Windsor, Ont., and Mr. John T. Breeze, Windsor, Ont. were appointed on the nomination of the employer and employees respectively.

Midland Shipyards Limited, Midland, Ontario.—The Board of Conciliation established to deal with a dispute between Midland Shipyards Limited, Midland, Ontario, and Industrial Union of Marine and Shipbuilding Workers, Local 9, was fully constituted on April 5, with the appointment of Mr. Justice F. H. Barlow, Toronto, Ont., as Chairman of the Board on the joint recommendation of the other two members of the Board. Mr. Frank Wilkinson, Toronto, Ont., and Mr. Bora Laskin, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

H. Krug Furniture Company Limited, Kitchener, Ont.—The Board of Conciliation established to deal with a dispute between H. Krug Furniture Company Limited, Kitchener, Ont., and Local 8, Canadian Aircraft Workers' Association, was fully constituted on April 30, with the appointment of Mr. Justice W. D. Roach, Toronto, Ont., as Chairman of the Board, on the joint recommendation of the other two members of the Board. Mr. A. W. Boos, Kitchener, Ont., and Mr. Bora Laskin, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

Keystone Shingles and Lumber Company Limited, New Westminster, B.C.—The Board of Conciliation established to deal with a dispute between Keystone Shingles and Lumber Company Limited, New Westminster, B.C., and Local 1357, International Woodworkers of America, was fully constituted on April 10, with the appointment of Mr. Henry L. Edmonds, K.C., New Westminster, B.C. as Chairman of the Board, on the joint recommendation of the other two members of the Board. Mr. G. H. Darrell, Vancouver, B.C., and Mr. Hugh Clark, New Westminster, B.C., were appointed on the nomination of the employer and employees respectively.

Imperial Optical Company, Toronto, Ontario.—The Board of Conciliation established to deal with a dispute between Imperial Optical Company, Toronto, Ont., and Local 514, United Electrical Radio, and Machine Workers of America, was fully constituted on April 23, with the appointment of Dr. Alexander Brady, Toronto, Ont., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. E. MacAulay Dillon, Toronto, and Mr. Irving Himel, Toronto, were appointed on the nomination of the employer and employees respectively.

Fraser Valley Fibre Flax Co-operative Association, White Rock, B.C.—The Board of Conciliation established to deal with a dispute between Fraser Valley Fibre Flax Co-operative Association, White Rock, B.C. and Fibre Flax Workers' Union, Local 1, was fully constituted on April 10, with the appointment of Mr. F. M. Clement, Vancouver, B.C., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. D. M. Thompson, New Westminster, B.C., and Mr. John Turner, Vancouver, B.C. were appointed on the nomination of the employer and employees respectively.

Dominion Button Manufacturers Limited, Kitchener, Ont.—The Board of Conciliation established to deal with a dispute between Dominion Button Manufacturers Limited, Kitchener, Ont., and the National Union of Textile Workers, was fully constituted on April 17, with the appointment of His Honour Judge Ian Macdonell, Toronto, as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. A. W. Boos, Kitchener, Ont., and Mr. Lawrence Sefton, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

Bralorne Mines Limited, Bralorne, B.C.—The Board of Conciliation established to deal with a dispute between Bralorne Mines Limited, Bralorne, B.C., and Bralorne Miners' Union, Local 271, was fully constituted on April 3, with the appointment of Mr. J. A. Grimmett, Vancouver, B.C., as Chairman of the Board, on the joint recommendation of the other two members of the Board. Mr. Edward Campbell, Trail, B.C., and Mr. Malcolm MacLeod, Vancouver, B.C., were appointed on the nomination of the employer and employees respectively.

Massey-Harris Company Limited, (Toronto Works) Toronto, Ont., (Weston Works) Wes-

ton, Ont., (Verity St. and Market St. Works) Brantford, Ont.—The Board of Conciliation established to deal with a dispute between Massey-Harris Company Limited (Toronto Works), Toronto, Ont., (Weston Works), Weston, Ont., and (Verity St. and Market St. Works) Brantford, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, was fully constituted on April 16, with the appointment of Hon. Mr. Justice W. D. Roach, Toronto, Ont., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. J. J. Robinette, Toronto, and Mr. Bora Laskin, Toronto, were appointed on the nomination of the employer and employees respectively.

Boards Established

During April four Boards of Conciliation were established but not fully constituted.

Concerning R.C.A. Victor Company Limited, Montreal, Quebec, and International Brotherhood of Electrical Workers Local 1028-B.

Concerning Dominion Tar and Chemical Company Limited, Montreal, Quebec, and Employees' Federal Union, Local 173 (T. and L.C. of Canada).

Concerning Dominion Engineering Works Limited, Longueuil, Quebec, and Local 1596, International Association of Machinists.

Concerning Champion Spark Plug Company of Canada Limited, Windsor, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195.

Agreements Facilitated by Conciliation Officers

In the following cases reports were received from Conciliation Officers indicating the successful conclusion of negotiations and the signing of an agreement:

Concerning Dominion Bridge Company Limited and Riverside Iron Works Limited, Calgary, Alberta, and International Union, Mine, Mill, and Smelter Workers, Local 800.—F. E. Harrison, Conciliation Officer.

Concerning Amalgamated Electric Corp., Ltd., Toronto, Ont., and Local 514, United Electrical Radio and Machine Workers of America.—J. P. Nicol, Conciliation Officer.

Assignment of Conciliation Officers

Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Concerning York Knitting Mills Limited (Knitting Division) Toronto, Ont., and National Union of Textile Workers, Local 4,—F. J. Ainsborough, Conciliation Officer.

Concerning Greater Winnipeg Sanitary District, Winnipeg, Man., and Greater Winnipeg Sanitary District Employees' Unit, One Big Union,—Thomas Williams, Conciliation Officer.

Concerning School District of West Kildonan, No. 8, West Kildonan, Man., and West Kildonan Civic and School Board Employees' Unit, One Big Union,—H. S. Johnstone, Conciliation Officer.

Concerning Municipality of West Kildonan, West Kildonan, Man., and West Kildonan Civic and School Board Employees' Unit, One Big Union,—H. S. Johnstone, Conciliation Officer.

Concerning International Nickel Company of Canada, Sudbury and Port Colborne, and Locals 598 and 637, International Union of Mine, Mill and Smelterworkers,—F. J. Ainsborough, Conciliation Officer.

Concerning Firestone Tire and Rubber Company of Canada Limited, Hamilton, Ont., and Local 113, United Rubber Workers of America,—F. J. Ainsborough, Conciliation Officer.

Concerning Cockshutt Plow Company Limited, Brantford, Ont., and Local 458, United Automobile, Aircraft and Agricultural Implement Workers of America,—J. P. Nicol, Conciliation Officer.

Concerning Canadian Durex Abrasives Limited, Brantford, Ont., and Local 397, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America,—J. P. Nicol, Conciliation Officer.

Concerning Canadian Automotive Trim, Limited, Windsor, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.), Local 195,—J. P. Nicol, Conciliation Officer.

Concerning Canada Bread Company Limited, Toronto, Ont., and Amalgamated Bakers and Confectioners of Toronto,—F. J. Ainsborough, Conciliation Officer.

Concerning Bendix-Eclipse of Canada, Limited, Windsor, Ont., and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America,—J. P. Nicol, Conciliation Officer.

Concerning Bell Thread Company, Hamilton, Ont., and Canadian Thread Makers' Union,—H. Perkins, Conciliation Officer.

Report of Board in Dispute between Joseph Stokes Rubber Company, Ltd., Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America

On April 13 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between the Joseph Stokes Rubber Company, Ltd., Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America.

The Board was under the chairmanship of Dr. Alexander Brady of Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members; Mr. Murton A. Seymour, K.C., of St. Catharines, Ont., and the Rev. Dr. Harvey G. Forster, Welland, Ont., appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003 and Joseph Stokes Rubber Co., Welland, Ontario, and the Electrical Radio and Machine Workers of America, Local 523.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir:

The Board of Conciliation appointed by you has investigated the dispute between the parties mentioned above, has endeavoured to effect conciliation, and begs now to submit its report.

The Board first met and heard evidence from the parties on December 21, 1944, in Welland. Those present at this meeting were Mr. L. R. Leaver, Vice-President of the Company, Mr. R. B. Law, K.C., counsel for the company, Mr. C. R. Sullivan, business representative for the Union, and Mr. T. Bowman, president of the Union. The cause of the dispute was a series of thirty-four proposed changes in the renewal of an agreement put forward by the Company in order mainly to make the agreement conform with the Labour Relations Policy of the Thermoid Company of Trenton, New Jersey, which in the course of the year had purchased a controlling interest in the Stokes Rubber Company. The points of disagreement between the union and the company ranged widely over many matters of detail. After discussion of these points the Board recommended that both parties should renew negotiations, reduce to the minimum the extent of disagreement,

and then submit to the Board at a later hearing the matters on which they still could not agree. This procedure was followed in good faith by both parties and agreement was reached on many details. On March 2 the Board met the parties once more, and heard argument on the remaining points in dispute. These points and the recommendations of the Board pertaining to them may now be summarized:

(i) There was disagreement as to the content of Article three, section 1, (c) in the New Argument proposed by the Company. This section deals with the transfer of an employee from one department to another in the event of a protracted layoff, and refers to the transfer of the employee "to the job performed in any other department which he or she is capable of performing *in the opinion of the management*, and which is held by the employee next below him in seniority." The Union objects to the inclusion of the phrase "in the opinion of the management" as likely to exclude any grievance procedure when an employee feels that he or she has been unfairly discriminated against by, say, a foreman but the Union admits that management ordinarily must have the final decision in the matter of transfers. The Board unanimously recommends that in order to meet the point raised by the Union there should be added to the final sentences of article three, section 1, (c) the clause "provided that in the event of any dispute the clauses, *a, b, c, d*, only of the grievance procedure shall apply". The Board believes that the addition of such a clause to (c) dealing with protracted layoffs, will guarantee that an aggrieved employee will have a proper opportunity to submit his grievance to top management.

(ii) The second remaining matter of disagreement centred on the objection of the Union to the proposed omission in the agreement of what had formerly been paragraph *n* in Article three, which had read: "Union Executives shall receive top seniority rating on a plant-wide seniority list, provided they can qualify to perform operations on jobs available. These cases to be mutually agreed upon between the Company and the Union." The Board recommends that paragraph *n* be not re-inserted.

(iii) The third cause of disagreement pertained to the composition of the Safety Committee provided for in Article six, section 11, (2) of the proposed agreement which states: "There shall be a Safety Committee

composed of two representatives from the management staff and two representatives from the employees, appointed by the management". The Union objects to this sentence which deprives it of the right exercised in the former agreement to appoint two members to the committee.

The Board unanimously recommends that in place of the proposed sentence there be inserted the sentence: "There shall be a safety committee to which the Union shall have the right to appoint *two* representatives". The Board fully agrees with the contention of the company that management is ultimately responsible for safety provisions. The suggested sentence above is intended to protect the responsibility of management, which may appoint to the safety committee any other number of employees or members of the management staff which it deems wise. But at the same time representation on the committee of two union members is provided, and this provision is intended as a reasonable inducement to the Union to collaborate fully with the Company in all safety provisions.

(iv) The fourth cause of dispute pertains to the request of the company to introduce in Article one, section 3 (a) a sentence to the maintenance-of-membership clause stating: "A notice to this effect as per copy attached is to be placed on all company bulletin boards and remain there for the 15 day period". The company would like the inclusion of this sentence in order to obtain the agreement of the Union in posting a notice that would inform employees of their freedom to leave the Union within a fifteen day period after signing an agreement. The Union is unwilling to agree to the posting of the notice after the signing of the agreement, since such an act might appear to encourage employees to leave the Union after an agreement was signed.

The Board unanimously recommends that, in view of the disagreement between the parties on the matter, the disputed sentence be omitted from the agreement.

(v) The fifth cause of dispute pertains to the collection charge of five cents per month per employee deducted from union dues by the company when, in keeping with the voluntary checkoff clause, it collects such union dues from the wages of employees. The provision for this five cents charge is in the

existing agreement between the company and the Union.

The Board is not unanimous in its recommendation on this matter. Mr. Seymour recommends that the charge be continued as a legitimate payment for the service of collecting the dues. Dr. Forster and the Chairman recommend that the company discontinue the charge in order to bring the check-off provisions into harmony with those which ordinarily prevail in collective agreements in this country.

Mr. Seymour raised, during the hearing, the question of the jurisdiction of the Board, in view of the definition of a "collective agreement" in clause 2 (1) (d) of P.C. 1003, to deal with any matters that were purely a question of union security. Mr. Seymour took the position that any matters having to do with union security only, such as check-off, maintenance of membership, etc., were not matters of "rates of pay, hours of work or other working conditions". In view of the conciliatory attitude, before this Board, of the Company and the Union and the fact that several matters of purely union security had been agreed upon between the Company and the Union, Mr. Seymour did not press this view when joining in the unanimous recommendation contained in (ii) and in making his minority recommendation in (v).

Among the list of disagreements between the Company and Union submitted to the Board on December 21 there was disagreement as to the appointment of the chairman of a Board of Arbitration under the grievance procedure. Since then, however, the parties have agreed that for the life term of the agreement they will ask the members of the present Board of Conciliation to act as an Arbitration Board, if any such Board becomes necessary under the grievance procedure. The members of the present Conciliation Board express their readiness to so act.

In conclusion the Board would like to pay its tribute to the sincerity and good spirit revealed in the negotiations by both parties. All of which is respectfully submitted.

Dated at Toronto this Sixth day of April, 1945.

(Sgd.) ALEXANDER BRADY,
(Sgd.) HARVEY G. FORSTER,
(Sgd.) M. A. SEYMOUR.

Report of Board in Dispute between Seiberling Rubber Co., Limited, and Local 118, United Rubber Workers of America

On April 17 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Seiberling Rubber Company, Ltd., and Local 118, United Rubber Workers of America. A minority

report was submitted by Mr. James McLennan.

The Board was under the chairmanship of His Honour Judge J. Parker, appointed by the Minister on the joint recommendation of the

other two members; Messrs. James L. McLennan of Toronto and Arthur Williams of Oshawa, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations P.C. 1003 and re Seiberling Rubber Company of Canada, Ltd., of Toronto and Local 118, United Rubber Workers of America.*

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

Sir:

Following some preliminary meetings of the Board a formal Board meeting was held on February 22nd at which the employer and employees made oral and written submissions concerning the matters on which they were unable to agree in the previous bargaining negotiations.

The employees were represented by Earl Crisp, Cal Kerr, Harry Danielson, District Representative Joseph MacKenzie, and Representative William England; while Mr. M. L. Brown and Mr. E. P. Tilley appeared for the Company.

From the nature of the submissions made it was very obvious to all members of the Board that there was the wildest disagreement between the parties on almost every clause proposed to form the basis of a contract. Recognizing this fact the Board laid such plans as it considered expedient to bring about some degree of co-operation between the parties. The results which followed this policy are most satisfactory inasmuch as we are now able to report complete agreement between the Company and the Union on all matters except the question of some form of Union security.

Attached to this report is a document containing all matters on which the parties have mutually agreed and this is in substance an entire Union contract requiring only the signatures of both parties to effect its ratification. After such agreement had been reached the Board found that there were only three outstanding matters between the parties. These were: 1. the aforementioned Union Security; 2. "Rule 41", a clause designed to prevent absenteeism; and 3. payment to Stewards and Bargaining Committee for time lost in negotiations.

In the light of the improved relationship as shown by both parties during the sittings of

the Board it is hoped that Item 3 will not be allowed to remain a matter of serious contention to the point of endangering the progress made because it is the opinion of the Board that this Item is not one of paramount importance.

Both parties signify their readiness to allow Item 2 to be handled by the Board and this matter has been resolved by the substitution for Rule 41 of the following:

"Where matters of unjustifiable absenteeism are involved the following procedure will be adopted.

- (a) The Company will notify the Bargaining Committee through the Union President of any such matter. Upon receipt of such information the Bargaining Committee will take requisite action.
- (b) A recurrence of the absenteeism involving the same individual shall be discussed by the Bargaining Committee and the Company for the purpose of deciding on a penalty by way of loss of seniority."

Thus is left only Item 1. The Union in its submission requested that both check-off and Union Shop should be conceded. The Company, in reply objected to both requests.

In effect the principle of the check-off is simply a form of assignment made by an employee of a portion of his pay. Most companies already recognize such assignments and are, consequently, making a variety of deductions from the wages of employees to the benefit of many very worthy projects. When an employee assigns a portion of his pay to his trade union it should be accepted by the employer with the same readiness as such assignments are accepted for other kinds of organizations.

To this point of view the company's representative on the Board, Mr. McLennan, dissents and will accordingly, be submitting a minority report regarding it.

The other two representatives on the Board, however, jointly recommend that the company should agree to the check-off for the duration of the aforementioned enclosed agreement.

Except for this single item the Board is in unanimous agreement on all other matters which came before it.

This being the case we, as a majority of the Board, are very hopeful that such a widely accepted factor as the check-off will not be resisted by the company so as to impede the complete consummation of an agreement between the parties.

During the whole of the proceedings before the Board and during private sessions between the parties, a great spirit of give and take has

been manifested and the Board wishes to sincerely congratulate both company and union for their great tolerance and patience. The progress made was only possible because of it. We trust that the single item now separating the parties will be dealt with in the same good spirit so that their future relationship may be harmonious and productive of great good to all concerned.

All of which is respectfully submitted.

Dated at Toronto, the 14th day of April, 1945.

(Sgd.) J. PARKER,
Chairman.

(Sgd.) ARTHUR WILLIAMS,
Employees' Representative.

Minority Report

Re: *Wartime Labour Relations Regulations P.C. 1003 and re Seiberling Rubber Company of Canada, Ltd., of Toronto and Local 118, United Rubber Workers of America.*

To:
The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

Sir:

Having had an opportunity of perusing the joint report of the other members of the Board, it is with satisfaction that I concur with them in the statement that a very real spirit of co-operation was evident on the part of both parties concerned in the negotiation of the agreement which is attached to the majority report.

The point upon which I find myself in disagreement with the other members of the Board is their recommendation that the company should agree to the check-off for the duration of the agreement. On the facts of the particular case and as a matter of general principle I cannot agree with such a recommendation.

The facts are that the company is a small one and has a compact plant in one place in West Toronto. The number of employees is approximately two hundred and fifty, and it was stated by one of the union representatives that of this number ninety per cent are members of the union. It was also stated that the amount of unpaid union dues was so small as to be negligible.

All the evidence points to the conclusion that the union within the particular plant is well organized and strongly supported by the employees at the present time without any assistance in the way of check-off from the employer.

The union took the position that since agreements in two other plants in the same industry, had clauses establishing the check-off, this was a sound reason for the inclusion of the check-off in the present agreement. The other plants referred to were infinitely larger in size and the number of employees engaged were many times the number of those employed with the company in this matter. In those cases there might well be some force to an argument that inconvenience in collecting dues might justify the check-off where the company was prepared to act as dues collector for the union. In the present instance no suggestion was made by the union of inconvenience in collecting dues and in fact one of the terms of the agreement between the parties herein is that the union may collect dues in a luncheon room recently erected by the company for its employees.

Two other companies in the same industry were mentioned before the Board which were of comparative size and disposition of plant to the company here concerned, and it appeared that there were no clauses establishing the check-off in agreements which these companies had negotiated with the same international union.

In the light of these facts it is impossible for me to report that the check-off can be justified on the grounds of a general practice or of convenience to either party to the agreement.

There is as well an important matter of principle involved in the check-off. The check-off is of itself of no benefit to the company, or to the employees as to working conditions, hours of work or rates of pay. The collection of union dues is purely a matter of union management involving a relationship between the members of the local union and the international union with which the company can have no direct concern.

The union ought to be able to stand on its own merits without insisting that the employer assume the burdens of a task which may be unpleasant for the union, the present collector, but which according to the evidence before the Board, has presented no difficulty to the union.

It was stated before the Board that the purpose of the check-off was for the express purpose of restricting the freedom of withdrawal by a few disgruntled members. One of the main factors in the strength and ability to serve of any organization is the potential right of individual members to withdraw or threaten to withdraw their support if the policies of the management do not truly represent the views and wishes of the members.

In the union's field, at least so far as this particular industry is concerned, there is no alternative choice as in the political field, and it is therefore of the utmost importance that there should be no infringement upon or obstruction of the exercise of a complete freedom of withdrawal where there is no freedom of choice.

I would therefore recommend that the union should abandon its demand for the check-off and carry on under the terms of the agreement that already has been reached between the parties.

All of which is respectfully submitted.

Dated at Toronto this 17th day of April, 1945.

(Sgt.) J. McLENNAN.

Proposed Agreement

This Agreement made and entered into this day, of 1945 between Seiberling Rubber Company of Canada Limited hereinafter referred to as "The Company" and the United Rubber Workers of America, Local Union 118, hereinafter referred to as "The Union".

ARTICLE I *Purpose*

It is the mutual desire of the above-named parties to promote co-operation and harmony and to provide an amicable method of settling any differences or grievances that might arise between the Company and Union.

ARTICLE II *Recognition*

2.01. The Company recognizes the Union as the sole collective bargaining agency for all hourly-rated and piece-work employees in production and maintenance departments below the rank of foreman at its plant at 99 Paton Road with the following exceptions:

- Guards and watchmen
- Engineers and firemen in the Boiler Room
- Laboratory assistants
- Hourly-rated time clerks, factory office clerks
- Hourly-rated supervisors
- Part time workers

2.02. The Company agrees to meet with and bargain with representatives of the Union on matters pertaining to rates of pay, hours of work, and working conditions, through the grievance procedure, outlined in Article III of this Agreement.

2.03. It is agreed that throughout this Agreement wherever the pronoun "He" appears, it shall be construed as meaning any employee male or female.

2.04. That there shall be no discrimination, interference, restraint, coercion by or on behalf of the Company regarding any em-

ployee covered by this Agreement because of membership or non-membership in the Union.

2.05. That the Union, its members or its agents, shall not intimidate or coerce employees into membership.

2.06. The Union agrees that it will not engage in Union activities during working hours or hold meetings at any time on the premises of the Company without permission in writing, but this shall not prohibit the Stewards or officers of the Union from distributing receipts for Union dues during lunch or rest periods.

ARTICLE III *Grievance Procedure*

3.01. The parties hereto shall meet through their authorized representatives respectively to discuss and adjust any dispute and/or grievance which may arise between the parties. Every effort shall be exerted mutually to adjust any and all grievances which may arise.

3.02. The Bargaining Committee, consisting of 4 members, all of whom shall be regular employees of the Company being 21 years of age or over and all of whom shall have had at least one year of continuous service with the Company, shall be elected by the employees of the Company who are members of Union and the Company shall be kept informed by the Union of the personnel of that Committee.

3.03. The Company agrees to recognize eight (8) Stewards elected or appointed by the Union, all of whom shall be regular employees of the company in the division which he represents, each of whom shall be 21 years of age or over, have had at least one year of continuous service with the Company immediately prior to the date of election or appointment and at least 6 months' service in the division which he represents immediately prior to such election or appointment.

3.04. When a Steward or any member of the bargaining committee wishes to leave his place of work on union business, he shall apply to his foreman or supervisor for permission to do so. Any employee desiring to see a shift steward with regard to union business must secure permission from the foreman or supervisor in charge to either go to the steward or have the latter go to him.

3.05. An employee having a complaint may discuss his complaint either by himself or through his Steward with his immediate Supervisor (or Foreman). In the case of any department which from time to time is not subject to direct supervision a complaint shall be put in writing and filed with the person in charge of the plant. If said employee is unable to reach a satisfactory settlement and desires to have his grievance presented by the Union, the following procedure shall be applicable progressively:

Step 1: The employee shall put his grievance in writing and present it to his Steward who will present it to the Supervisor or Foreman. The Foreman shall reply in writing within 2 working days. It is understood that the aggrieved employee is ready to appear before the Management with his Steward at any stage of the negotiation, if requested by either party.

Step 2: If the Steward and Foreman have been unable to reach a satisfactory settlement, the Steward shall review the grievance and answer already received and add thereto any new evidence in support of grievance and along with the aggrieved employee present it to the Personnel Manager who shall reply in writing within 2 working days.

Step 3: If the parties involved have been unable to arrive at a satisfactory settlement, the grievance may then be referred to the Bargaining Committee who, if they wish, may have it placed on the agenda of the next meeting. This meeting will be between the Bargaining Committee, Plant Superintendent, Personnel Manager, and not more than two additional Company representatives for negotiation of the grievance.

Step 4: Should these negotiations not result in a settlement of the grievance, it shall be discussed further between the Bargaining Committee together with a Representative of the International Union and Representatives of the Company.

Step 5: Should the above procedure fail to bring about an agreement between the parties with respect to any misinterpretation or violation of this agreement either party may within but not more than 15 days after completion of the final step notify in writing the other of its desire to have the matter referred to a Board of Arbitration. Each party shall thereupon within 48 hours appoint some person to be an arbitrator and shall forthwith notify the other party of such appointment. The two appointees shall thereupon confer with a view to selecting a third member of the Board, who shall be chairman. If the appointees have not agreed upon a third member of the Board within 5 days they shall request the Minister of Labour of the Dominion of Canada to nominate a member of the judiciary of the Province of Ontario to be such chairman. Each party shall pay the costs and expenses of its appointee. The costs and expenses of the Chairman shall be borne equally by the parties. The decision of a majority of such Board shall be final and binding on the parties.

3.06. If an employee is discharged, suspended, or laid off out of turn, and feels that he has

been unjustly dealt with, he shall within three working days concurrently notify in writing both the Bargaining Committee and the Company. The matter in question shall then constitute a grievance and shall be dealt with according to paragraph 3 of this Article. If, subsequently, it is mutually agreed that the employee was unjustly dismissed, suspended, or laid off, he shall be reinstated in his former position and shall be compensated at his regular rate of pay for time lost. Every effort shall be made to settle grievances within 30 days but in any event the employee shall not receive pay for more than 60 days.

3.07. There shall be no lock-out, strike, slow-down or stoppage of work unless and until all the methods for disposing of the grievance as outlined in paragraph 3 of this Article, have been applied.

ARTICLE IV

Hours of Work and Overtime Rates of Pay

4.01. (a) The hours of work shall conform to general notice No. dated March 27, which shall be posted in the plant. This shall be in effect only for the period during which the Ontario Government 48-hour law stands suspended. Within 30 days after such suspension is lifted the Company and the Union shall meet and arrange shift hours to conform to the law.

(b) Females in the various departments will work from 8 a.m. to 5 p.m. Sixty minutes will be allowed for lunch.

(c) All of the above on a six day basis when the production schedule requires such operations. When departments are on two or three shifts, these shifts will rotate at the end of each week, except where the nature of the operation makes it impossible.

(d) Male employees are expected to take a half hour for lunch on each shift. Due to the nature of the work, certain employees may not be able to take their lunch period at the same time each day. However they are expected to have a half hour for lunch and in computing hours of work this lunch period will not be included.

4.02. All hours worked in excess of the standard work week shall be paid at the rate of time and one-half, provided the employee completes his standard work week as scheduled. In cases where the work week is reduced because of stock shortage, breakdown, holidays, or shut down, directed by the Company, overtime will be allowed according to the shift hours per day.

4.03. Whenever an employee is held for legitimate extra work, or is brought in on his day off, or on a Sunday, or on a holiday, he shall not be required to take time off to bring his hours down to the normal working week.

4.04. All overtime shall be distributed as equally and impartially as possible among the employees of the department in which overtime work becomes necessary, provided such employees are qualified to perform the work. Employees are expected to take their rightful share of this distribution.

4.05. On Sundays and the following holidays, employees required to work will be paid at the rate of time and one-half for hours worked:

New Year's Day,
 Good Friday,
 Dominion Day,
 Civic Holiday (if generally observed in Toronto),
 Labour Day,
 Thanksgiving Day,
 Christmas.

4.06. Any employee who reports or has reported for work but is unable to do his accustomed work for some reason such as a breakdown, failure of supply, etc., will be paid a minimum of one-half shift at his hiring or base rate without performing any work. If other work is available he shall have the option of accepting same at the prevailing rate for such work.

4.07. Any employee called to the plant to take care of an emergency will be paid for a minimum of three hours or for the number of hours actually worked whichever is the greater, at his prevailing rate.

ARTICLE V

Wages

5.01. Should there be, during the duration of this agreement, any dissatisfaction by either of the parties hereto on any question of job classification or wage rates, then the parties will undertake to strive earnestly to arrive, within one month, at agreement upon these matters and, if necessary, to make joint application to the Regional War Labour Board for approval of such adjustments as may be agreed upon. Should the parties fail, within one month, to arrive at agreement, either party is free to make its representations to the Regional War Labour Board. It is understood that any agreement reached upon the questions of job classification and wage rates shall become part of this agreement.

5.02. The hiring or base rate for male employees on piece-work operations shall be a minimum of 60c per hour, for female employees a minimum of 40c per hour, for youths a minimum of 45c per hour, and male employees on day work 50c per hour.

5.03. When an employee is placed on experimental work authorized in writing by the Development Department or on temporary

work for the Company's convenience, when there is work available on his regular job, he will be paid his average hourly earnings not exceeding the approved hourly earnings.

5.04. When it is necessary to change the piece-work rates, the Company will post the new rates in the rate book. If the department steward or employees affected so request the new rates will not become effective for two working days after posting. After two working days the new rates will become effective. If a rate becomes a grievance and is changed as a result of negotiations, the increased or decreased new rate will be effective from the date of the filing of the grievance. However, in no case will this be retroactive for more than forty-five days.

5.05. On piece-work operations, employees will be paid as a minimum their base rate as indicated in paragraph 2. If due to delays, stock conditions or other causes beyond the control of the employee, his earnings fall below normal, the Company shall pay an additional sum to bring his earnings for the period up to 90% of his average earnings but not in excess of 90% of the approved earnings. Provided always that the employee has exercised a satisfactory effort in the circumstances.

5.06. Should equipment be broken down so that an employee is not able to work and at the Company's request he waits on the premises without working, he will be paid his base rate. If other work and be paid at the prevailing rate on the job so accepted during the period while his machine is out of operation.

5.07. Other temporary transfers due to lack of work for an employee at his normal occupation, will be paid at the base rate or the prevailing rate on the job offered to and accepted by him, whichever is the higher.

5.08. When an employee is requested to work on a piece-work operation for which no work standard has been determined providing such work does not extend beyond a period of 30 days the payment for such work shall be 90% of his previous earnings but not in excess of 90% of the approved earnings. If such work extends beyond 30 days he shall thereafter be paid his previous earnings but not in excess of the approved earnings.

5.09. Employees injured in the factory who are treated in the First Aid Department shall be paid their average hourly earnings, for the time spent in First Aid Department in excess of 15 minutes.

ARTICLE VI

Seniority

6.01. Seniority shall begin as of the date of the first entry into the service of the Company. Voluntary resignation or discharge for cause

terminate all Seniority rights. Voluntary resignation shall include clock card pulls. Discharge for cause shall include all such items as drunkenness, defective work, absence without leave, violation of rules, etc.

6.02. Employees shall receive seniority privileges after they have been employed by the Company six consecutive months. After qualifying, seniority shall be credited from the date of first entry.

6.03. All employees shall have the right to examine their service records at any time during normal office hours.

6.04. To qualify for a job, an employee must be able, after the usual breaking-in period, to do the work required without lowering the then existing standard of the job. As in hiring it is the function of the Management to determine qualifications.

6.05. When an employee wishes to consider a transfer to another job within the department or plant, he shall make a written application to his Foreman and the Personnel Manager. In the event of a vacancy, the qualified employee with the most seniority on the list of applicants shall be given the first opportunity. When an employee is transferred at his own request, payment shall be made at the prevailing hiring in rate for the job in question.

6.06. Whenever it becomes necessary to lay off employees, order of lay-offs shall be determined by Company service as applied to the job except that if an employee has previous satisfactory experience of not less than six months on another job and can still qualify, he may return to this job and displace an employee with less Company service. If an operation is discontinued, new machinery installed, present equipment modernized, or a Department is shut down, causing the elimination of the job, the employees involved may be transferred to vacancies for which they can qualify, or, if there are no vacancies, they may displace employees with least seniority in the Plant on work for which they can qualify within a reasonable learning period, and shall be paid at the prevailing hiring in rate for the job in question.

6.07. In order to benefit by the seniority provisions of this Agreement, laid off employees must notify the Personnel Department of any change of address and keep their address up to date at all times. Changes in address made by employees will be acknowledged in writing by the Company.

6.08. When employees are laid off, they shall be recalled in the reverse order of lay-off whenever their jobs are opened or whenever vacancies occur for which they are qualified.

6.09. Any employee notified of recall must inform the Company of his intention to return to work within 3 working days after notice by registered mail has been sent by the Company. If the employee desires to return to work, he must do so within five days after notice has been received by the employee. However, should the employee fail to report within five days but does report within thirty days with a reasonable excuse for his failure to report earlier, his seniority records shall be kept intact and he shall be notified of the next vacancy. This however, is limited to the second notification.

6.10. Any member of the Union elected or selected for an office or as a delegate for specific Union activities with the URWA, necessitating leave of absence shall apply for and receive, provided it does not unduly affect the operations of the plant, a leave of absence without pay, for a period not exceeding the term of this Agreement. During this leave of absence, the employee will retain seniority rights in respect to job placement and on return will be reinstated to all Company privileges and to the same or an equivalent job at the prevailing rate of pay for that job.

6.11. Leave of absence, re-employment and seniority of any employee serving in the Armed Forces or Merchant Marine (sea-going) of Canada, shall be governed by the provisions of the Re-instatement in Civil Employment Act, 1942, as amended.

6.12. Female employees must apply for and be granted leave of absence after four months of pregnancy based on medical certification. Within a four-month period after childbirth, she shall report to the Personnel Department with a Doctor's Certificate stating date of birth and declaring her physical fitness for work. She shall be given the first vacancy on the same job, or a job for which she is qualified. If she accepts a job other than the one she left, she shall be permitted to return to her original job at the first vacancy. If reinstated, she shall qualify under the seniority rules of this Agreement.

6.13. Seniority rights of employees laid off with less than five years' service will be retained for a period of two years; employees laid off with five or more years of service for a period of five years.

6.14. When an employee transfers from one job to another job, his Company service shall be considered job service after six months on the job. Whenever a transfer occurs, the employee shall accept the prevailing wage scale of the job to which he is transferred.

6.15. Employees who return from supervisory to non-supervisory employment may return to the jobs held at the time of promotion, but may not displace employees having more seniority.

6.16. An employee who shall have been laid off for lack of work and accepts work in another War Industry, shall not lose his seniority if such employee shall by Government order or regulation be unable to accept employment when called back to work by the Company. He shall retain his seniority and shall be offered the next available opening for which he is qualified.

Seniority Interpretations

6.17. All jobs are to be considered on the basis of crew or job service. All advancements in a crew or on a job are to be made in a strict and orderly manner according to job progression provided they qualify.

6.18. An employee transferring from another Department or from another job in the same Department will take the lowest job according to job progression even though he may hold plant service over other employees on the job. He will not hold job rights for a period of six months. If a lay-off on the job should occur within that time and his previous job should be available he would be required to return to that job or seek another Department in which his Plant service and qualifications would entitle him to another position according to the Agreement on seniority.

6.19. After the qualifying period of six (6) months should schedule changes necessitate reduction of force the employee would move downward in the reverse order of job progression until he had reached the lowest or starting position. If his previous job is not available he would hold on Company service and other men with less Company service would be laid off before him.

6.20. An employee working 18 months continuously on the same operation or crew shall have his Plant service considered as job service for job progression. He may not move ahead of employees having more job service until he has worked on the same job, for one year providing he is qualified, plus qualifying period of six months.

6.21. An employee shall be able to return to his original Department any time a vacancy occurs with full seniority providing he has worked five (5) years in that original Department and providing he can still qualify for the job.

6.22. In case a job is eliminated and the employees involved are transferred to other

vacancies for which they are qualified in accordance with seniority they may immediately take the next job in the order of job progression providing there are employees with less than six months' Company service on the lowest or starting job.

ARTICLE VII

Vacations with Pay

The Company's vacation plan, as outlined in attached Factory General Notice No.—— dated——March, 1945, shall remain in effect during the term of this agreement.

ARTICLE VIII

During the life of this Agreement, the Company subject to cancellation by the insurance company, agrees to continue in effect the present program with reference to sickness, hospitalization and group insurance with the understanding that should the insurance company increase the rates on this insurance, a pro rata adjustment will be made in charges made to each employee.

ARTICLE IX

9.01. The Union agrees that the Company has the exclusive right and power to manage the Plant, direct the working forces and to hire, promote, transfer, demote, lay off, suspend or discharge employees, provided, however, that the Company agrees that any exercise of these rights and powers in conflict with any of the provisions of this Agreement shall be subject to the provisions of the grievance procedure.

9.02. Employees to be laid off for an indefinite period will be given one week's notice, if at all possible, before lay-off becomes effective. Employees desiring to leave the employ of the Company shall give one week's notice if at all possible.

9.03. In any Department where the work requires continuous operation, the Company will, when mutually agreed, provide adequate relief when and where necessary.

9.04. No bills, bulletins, newspapers, hand-bills, or other documents shall be posted or distributed anywhere within the fenced area enclosing the plant of the Company by the Union of any employees of the Company. The Company at the request of the Union will have from time to time posted on a bulletin board designated by the Company notices of the Union that have been approved by the Personnel Department, and the Company will provide a container in the employees' entrance in which Union literature approved by the personnel Department may be placed

for distribution as the employees leave the plant.

9.05. No employee of the Company in an official, administrative, or supervisory capacity shall take part in any work being done by members of the Union while time studies are in progress, the object of which is to establish piece-work rates.

9.06. Supervision shall not enhance the earning standard of any operation by performing any portion of the labour thereof.

9.07. It is not intended that this will prohibit part time supervisory and direct labour operations where circumstances make it necessary to keep supervisors fully employed.

9.08. It is agreed that regardless of age or sex equal pay for equal results shall prevail.

TERMINATION

This Agreement constitutes the entire agreement between the Company and the Union. No change may be made herein without the consent of both parties. This Agreement shall remain in force and effect until

No later than negotiations for revision or extension of this Agreement shall begin. If satisfactory conclusions are not reached by , this Agreement shall continue in full force and effect until cancelled by either party on thirty days' notice to the other party.

IN WITNESS WHEREOF the parties hereto have hereunto set their corporate seals attested by the hands of their proper officers the day and year first above written.

Report of Board in Dispute between Peacock Bros., Ltd., Ville LaSalle, P.Q., and International Association of Machinists, Lodge 631

On April 5 the Minister of Labour received the reports of the Board of Conciliation which dealt with a dispute between Peacock Bros., Ltd., Ville LaSalle, P.Q., and International Association of Machinists, Lodge 631. A minority report was submitted by Mr. Alex Gould.

The Board was under the chairmanship of the Hon. Mr. Justice Wilfrid Lazure of Montreal, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. T. R. Ker and Alex Gould, both of Montreal, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

In the matter of a dispute between Local Lodge 631, International Association of Machinists, (Employees), and Peacock Brothers Limited (Employer).

The matters submitted to the Board were a proposed Amendment by the Union to Clause 9 (b) of the existing Contract relative to the automatic dismissal of an employee, if he did not qualify after six months as a Class B-1 worker, and the Union's proposal to have a union shop clause added to the contract.

The Company took the position and submitted that as there was a subsisting contract between the Union and the Company, which did not terminate until the 4th of September, 1945, it was binding on both parties and

could only be changed or amended by mutual consent, and that, therefore, the Board was without jurisdiction and the appointment of a Board of Conciliation prior to the 4th of September, 1945, premature.

The Company, however, declared that, although it proposed to abide by its contract until its termination, and expected the Union to do likewise, nevertheless, without prejudice to that stand, it was prepared to discuss the two matters before the Board with a view of seeing whether some mutual agreement could be arrived at.

Proposal and counter-proposals were submitted by the parties, but the Board found itself unable to conciliate, as the proposals submitted by the respective parties could not be mutually agreed upon.

The Majority of the Board, therefore, finds itself faced with a Contract binding the Union and the Employer by its terms until the 4th of September, 1945, unless changed by mutual consent.

The changes, as originally proposed by the Union, and those later suggested by the parties and the Members of the Board, have not met with approval of both parties to the Contract, and, therefore, the essential element of mutual consent to change the Contract before its termination is lacking.

In the absence of such mutual consent, the Majority of the Board considers that the Company is within its rights in taking the ground that the Union should respect the terms and conditions of the contract which is in force and that no changes and amendments should be made to the contract unless the same meet with the consent and approval of both parties.

Under the circumstances, therefore, the Majority of the Board considers that they have no recommendation to make other than that both parties abide by the existing Contract until it shall have been terminated according to its provisions in that regard.

Montreal, April 4, 1945.

(Sgd.) WILFRID LAZURE,
Chairman

(Sgd.) T. R. KER,
Member of the Board

Minority Report

In the matters in dispute between Peacock Brothers Limited, Ville LaSalle, and Lodge 631 of the International Association of Machinists.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Department of Labour,
Ottawa, Ont.

Dear Sir:

As a member of the conciliation board established to deal with the matters in dispute between Peacock Brothers Limited, Ville LaSalle, and Lodge 631 of the International Association of Machinists, I desire to submit the following minority report:

Unable to reach a unanimous decision in respect to the issues in dispute it is understood that the chairman, the Honourable Justice Wilfrid Lazure, and the company representative, Mr. T. R. Ker, will submit a report in substantiation of the opinion of Mr. F. T. Merrill, which in effect, is that the board is without legal status and therefore, lacks the authority to effect an adjustment of the dispute between the Company and the Union. In support of his opinion, Mr. Merrill emphasizes the illegality of the belated notice of the union to the company and which expressed the wish of the union to enter into negotiations for the purpose of amending the present agreement. In refutation I solicit your consideration of the following quotations and opinions which are based on legal advice received by myself.

In the first instance permit me to state that to the best of my knowledge, the purpose of P.C. 1003 is to facilitate harmony and establish co-operation between employers and employees as a prerequisite for the advancement of industry. This principle is clearly stated in the preamble to the act which itself embodies provisions to prevent impeding the

intent of the order, and such a provision I submit is Clause 47, which reads as follows:—

No proceedings under these regulations shall be deemed invalid by reason of any defect of form or any technical irregularity.

It was the intention of the union to notify the Company of its desire to open negotiations in accordance with clause 19 of the agreement. Due to an oversight this was not done and the allotted period expired before the notice was delivered. Needless to state that the violation was not committed intentionally and should be considered as an irregularity within the meaning of the above clause.

It is evident that the purpose of clause 47 is to offset the difficulties that might arise in the process of the working of the act, should a sectarian or rigidly mechanical approach be applied. In keeping with the spirit of the act, it is required in accordance with the above clause, to exercise a reasonable and necessary elasticity of attitude without which conciliation is unthinkable.

I cannot but feel that the mistake of the union should be characterized as a technical irregularity and that the report which sustains the claim of Mr. Merrill is not in accordance with the intent of the act nor in keeping with the more specific requirements of clause 47 of P.C. 1003.

Secondly, permit me to call to your attention the fact that the company, of its own volition, entered into negotiations with the union. By doing so the company forfeited its right, on the basis of clause 19 of the agreement, to prevent the completion of the process, to effect an adjustment of the pending differences between the company and the union by declaring the conciliation board illegal.

It is apparent that the company coalesced with the union of its own free will and with the best of intentions when it entered into these negotiations and having done so established a condition which supersedes the claim it now makes. These negotiations were entered into by mutual consent and the more far-reaching responsibilities of such an act presuppose that amity and good will shall be maintained to effect their completion.

Thirdly, this conciliation board was established in accordance with Clause 13 of P.C. 1003. Here it was a case of a conciliation officer having done his best but failed to reconcile the differences in dispute, recommending that a conciliation board be set up and of the minister having forthwith done so. In compliance with Section 30 of P.C. 1003 the company, as well as the Union recommended its member to this board.

Throughout the whole of these proceedings the company had willingly acquiesced. It was

not until the board had convened to deal with the points in dispute that the company saw fit to submit its protest. This belated protest by the company is definitely in contradiction to its representatives' attitude throughout the previous deliberations between the company and the union and should, I submit, be considered and declared to be a breach of good faith and a violation of the intent of P.C. 1003. It is obvious that the procedure followed in establishing this board was in accordance with the requirements of the order and that the legality of the board should be maintained.

It is understood that P.C. 1003 supersedes the "Industrial Disputes Investigation Act". Since however P.C. 1003 is the embodiment and furtherance of the best content of these codes which it supersedes, may I submit, as a matter of guidance, paragraph 2 of Article 7, which states as follows:

The decision of the Minister as to the granting or refusal of a board shall be final and when a board is granted by the Minister, it shall be conclusively deemed to be authorized by and to be in accordance with the provisions of this Act, and no order shall be made or process or proceeding had or taken in any court to question the granting or refusal of a board, or to review, prohibit or restrain the establishment of such board or the proceedings thereof.

It is difficult to accept the idea that the stability of a board under P.C. 1003 is less impregnable than that of a board which was established in accordance with the requirements of the above-mentioned act. I am assured that such is not the case and consequently feel that the legal status of the conciliation board in question will be vindicated.

Doubtful of the fate of this board, I wish to accept this opportunity to state some opinions of its proceedings since I consider the circumstances under which this board carried on somewhat unique.

Early in these proceedings, Mr. Merrill, on behalf of the company pronounced the board to be without legal status and further declared his refusal to enter into a consideration of the merits of the main proposal of the union, which called for including a maintenance-of-membership clause in the agreement. It was evident that Mr. Merrill had no intention to conciliate the issues in dispute and precipitated a situation which precluded all likelihood of an objective consideration of the matters with which the board had to deal.

Faced with the alternative of having the board declared illegal, the representatives of the union accepted a proposed modification of their proposal for permission to intercede on behalf of these employees who had completed their probation period of six months. The

purpose of the original proposal was to prevent the indiscriminatory laying off of anyone who had completed this period of time.

This initial success was mainly due to the very commendable way in which the chairman conducted the proceedings. It was apparent, however, that the agreement reached had little meaning unless some semblance of security for the union could be attained. The resistance of Mr. Merrill to entertaining such an idea was only partially overcome when he agreed to submit to his client a proposal submitted by Mr. Haddow and formulated by Mr. Ker. This proposal, in so far as it pertained to union security, stated in effect, that employees of the company, now members of the union, together with those who become members, shall be required to retain their membership during the period of their employment with the company.

An analysis of the counter proposals would have shown that they contained but little semblance to the original proposals of the union. Nevertheless, the company refused to concede them. Its further recommendation required that the members of the union in the employ of the company be given thirty days after the date of signing the agreement to decide whether or not they desired to retain their membership. On the basis of such a proposal it would be difficult to establish that the company is possessed of the sense of responsibility required by the parties to an agreement. In effect this proposal is an invitation to the men who are a party to the agreement to repudiate their responsibility for the agreement. It is not the obvious however, which alone prompts the union to repudiate the counter proposal of the company but rather the underlying and more far reaching dangerous opposition of the company to organized labour. Here it is evident that the company representatives have not kept abreast of the trend of these times.

Conciliation Boards, set up in accordance with the requirements of P.C. 1003 are boards which meet the needs of these times. This presupposes that those who constitute them, together with those who appear before them, approach the issues in dispute in a conciliatory and objective manner. Should these people entertain preconceived ideas which do not coincide with the needs of industry and the requirements of the war effort the tendency will be to defeat the purpose of the board.

The board in this case failed to reach an amicable adjustment of the issues in dispute. This is by no means a reflection on the chairman or on the company's representative on the board. The chairman proved to be an ideal person for this post while Mr. Ker

earnestly sought to reach an accord. I cannot but feel, however, that it is mainly due to the unwillingness of Mr. Merrill to enter into an unbiased consideration of the proposals of the union, that was mainly responsible for the outcome. Here it was a case of Mr. Haddow and Mr. Pelletier being confronted with the likelihood of the legality of the board being contested and of the stated intention of the company to repudiate any decision of the board should it be unfavourable to the company. The limits of hope for the union spokesmen were narrow indeed. As a consequence the substitute proposal of Mr. Haddow bore little semblance to the union's original proposal for a maintenance-of-membership clause. The outcome implies an almost complete negation of the necessary sense of responsibility without which no conciliation board under P.C. 1003 can be helpful. The mistaken premise which leads to such a state of affairs is of far reaching significance, since because of the limitations of P.C. 1003, boards will be effective or non-effective, depending on the point of view of those who participate in their proceedings. Were it evident to those who come before a board in the same manner as they do before a court, that they are rendering a disservice to their clients as well as to our people as a whole, the likelihood is that they would mend their ways. This presupposes that we become acquainted with the fundamental different conditions which have come into being as a result of the war, and since these are of an opposite nature to those that prevailed prior to the outbreak of the war, it becomes necessary that we as employers and men should adopt an opposite attitude towards each other.

A perspective of unprecedented development confronts us. This development, however, takes place at a time and under conditions which preclude an antagonism of interests. Separate class and special group interests cannot be served apart from our common interests. It is essential under these conditions that we get rid of the very remnants of past antipathies, since to suppose that workers can advance at the expense of the employer or employers at the expense of the workers is

definitely not in keeping with this perspective of development. It is necessary, however, that maladjustments in our economy be corrected and subnormal conditions of life be superseded by a status in keeping with these new conditions. In this connection President Roosevelt has stated as follows :

It is our duty now to begin to lay the plans for a lasting peace and the establishing of an American standard of living higher than ever before known.

It is evident that a reshuffling of our ideas is in order. That co-operation and conciliation between workers and employers must supersede methods of conflict in the settlement of their differences. Those who think and act otherwise carry on in conformity with conditions which have become obsolete and when legal technicalities are resorted to in order to thwart the process of conciliation, this is possible only because of the momentary gap which exists between our legal terminology and the new economic conditions. Under these conditions, co-operation is essential to attain maximum output. It is a mistake to suppose that maximum production has been attained when the limits of technological improvements have been reached. To-day we are more familiar with the elements which enter into the attainment of maximum productivity since we have come to learn that co-operation has released potential factors which supersede in importance technical changes as a means of increasing output.

When the union petitioned the company for a maintenance-of-membership clause, it sought to establish this fundamental requisite for the kind of co-operation that would best serve the interests of the plant and the war effort, since without the necessary measure of union security, the co-operation essential to maximum output could not be attained. It is indeed regrettable that the merits of this proposal were not considered, but we sincerely hope that the legal validity of the Board shall be maintained and that it will complete the task for which it was established.

Respectfully submitted.

(Sgd.) ALEX GOULD.

Report of Board in Dispute between National Electric Manufacturing Co. and the United Electrical, Radio and Machine Workers of America, Local 512

On April 3 the Minister of Labour received the report of the Board of Conciliation which was established to deal with a dispute between the National Electric Manufacturing Company, and the United Electrical, Radio and Machine Workers of America, Local 512. A minority

report was submitted by Mr. B. H. L. Symmes.

The personnel of the Board was as follows: His Honour Judge W. T. Robb, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board: Messrs. B. H. L.

Symmes and Mr. John Eldon, both of Toronto, appointed on behalf of the employer and employees respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

In the matter of The Wartime Labour Relations Regulations, P.C. 1003 and of a dispute between National Electric Manufacturing Company, Toronto, Ontario, Employer, and United Electrical, Radio and Machine Workers of America, Local 512, Toronto, 1, Ontario, Employees.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed by you to investigate a dispute between the above parties submits its report. The Company (employer) was represented by its solicitor, Mr. E. M. Dillon, K.C. Mr. A. Pritzker, manager of the company, also was present and gave evidence. Indeed he was the only witness called by either party. Mr. P. Pawliuk, Field Organizer of the above Union appeared on behalf of the employees.

By an agreement dated December 17, 1943 (see Exhibit 2) National Electric Manufacturing Company, therein called the Company, agreed with the employees represented by Local 516 of the United Electrical, Radio and Machine Workers of America, therein called the party of the second part, as is in said agreement more particularly set forth. Prior to the expiration of this agreement the parties met in an endeavour to agree upon changes in a proposed new agreement. The parties were found to be in agreement on all items set out in a letter from Mr. Pawliuk to the Company, dated October 17, 1944 (See Exhibit 1) save those hereinafter enumerated:

ARTICLE 2

Section (3) All employees who are eligible to join the union shall do so thirty (30) days after the re-signing of this agreement.

Section (4) As a condition of employment all eligible employees of the Company shall remain members of the union in good standing during the life of this agreement.

Section (5) The Company shall deduct from the first pay of each month the monthly union dues from each eligible employee and shall turn over such monies to the Financial Secretary of the Local Union by the 15th of each month. The money shall be accompanied by a list showing the names of the employees whose dues have been deducted.

On January 9, 1945, the Company submitted an application to the Regional War Labour Board for Ontario dealing with suggested

changes in Exhibit 1, other than those set out in Article 2 hereinbefore set out.

At the hearing before the Board, Mr. Pawliuk presented a written brief, a copy of which is filed with this report. It was agreed by all parties that 40 of the 42 employees of the Company are members of the Union. It was alleged by Mr. A. Pritzker, manager of the Company and admitted by Mr. Pawliuk for the Union, that in September, 1944, there was a work stoppage wherein eight of the company employees (all working in the basement portion of the plant) stopped work for a period of about two hours. It was admitted by both interested parties that the "ring leader" in this stoppage was Stan Bojko. The latter was a union member as well as a union steward. Pawliuk recommended that Bojko be dismissed. The management did not accept this suggestion but retained Bojko in its employment.

The Board rejects the first two demands of the Union herein set out which are as follows:

All employees who are eligible to join the union shall do so thirty (30) days after the re-signing of this agreement.

As a condition of employment all eligible employees of the company shall remain members of the union in good standing during the life of this agreement.

The Board recommends in a new agreement to replace Exhibit 1 a clause known as the voluntary check-off, in the terms following:

For and during the term of this agreement the Company shall deduct from the first pay of each month from each union employee who directs the company in writing so to do, the monthly union dues and shall turn over such monies to the Financial Secretary of the local union by the 15th day of each month. The money shall be accompanied by a list showing the names of the employees whose dues have been deducted.

The acceptance by the Company of a check-off should go some distance in breaking down a barrier that now seems to exist between the parties.

It is to be noted that the party of the second part in any new agreement between the parties shall be described as "The United Electrical, Radio and Machine Workers of America and Local 512" representing the employees of National Electric Manufacturing Company.

All of which is respectfully submitted.

Dated this 22nd day of March, A.D. 1945.

(Sgd.) W. T. ROBB,
Chairman

(Sgd.) JOHN ELDON,
Employees' Nominee.

.....
Employer's Nominee.

Minority Report

In the matter of The Wartime Labour Relations Regulations, P.C. 1003 and of a dispute between National Electric Manufacturing Company, Toronto, Ontario, Employer; and United Electrical, Radio and Machine Workers of America, Local 512, Toronto 1, Ontario, Employees.

In this case collective bargaining under the established terms of an agreement has been in effect for somewhat over a year and an amendment of the agreement is sought. The Union and the Employer apparently resolved some of the matters in question as the only point at issue before the Board of Conciliation was as to the so-called "Union Security." Early in the proceedings this narrowed down as the Union did not seriously contend for anything beyond a "check-off" voluntary in form if not in effect.

The administration of the Union in this small plant has been poor and there has been more labour trouble since the collective bargaining agreement was entered into than should be the case even in these unsettled times. On the undisputed evidence labour unrest has even had as a leader a Union steward. It may be that the disposition of the employer is such that in dealing with him a modest use of diplomacy would have paid good dividends to the Union, but poor administration on its part is beyond doubt. In this case the Union must be judged on its record in this plant. It has not demonstrated it should be given more power. The contrary is the fact.

In the agreement in question the Union is designated the agent of the employees, not the principle, and it seems best it should remain so.

Having regard to the trend among trade unions, it is no longer disputable that there are three interests to every collective bargaining agreement, viz., the interest of the employee, the interest of the employer and the interest of the union.

In this case no sound reason has been given that the check-off would benefit anyone but the Union.

It would put the employer in the odious position of dues collector and policeman of the employees for the Union. It might popularize him with the Union—it certainly would make him less popular with the employees, rendering the association between management and the working forces more strained.

It would impose coercion upon the employee. Such coercion is in varying degrees dependent upon whether the check-off be voluntary, compulsory, revocable or irrevocable, and in this case the suggested check-off throughout the term of the agreement amounts, for practical purposes, to it being irrevocable.

The law to date, and for good reason, has not given unions rights overriding the rights of the employees they are supposed to represent—the right to join or not to join, or to resign membership in a union without being deprived of their employment.

I think I am on common ground with all members of the Board in concluding that neither the employer nor the individual employees, in the majority at least, want the check-off, though the other party member of the Board might not unreservedly concur in this. No one employee has come forward to recommend it. It is only the Union which presses for this safeguarding and implementing of its treasury.

I feel it would be essentially against the best interests of the employees if the check-off were granted the Union.

It is a matter of real regret to the writer that he cannot concur in the proposed report of the Chairman of the Board.

Dated at Toronto, this 23rd day of March, 1945.

(Sgd.) B. H. L. SYMMES,
Member, Board Conciliation.

Report of Board in Dispute between Moffats, Limited, Weston, Ont., and Local 3129, United Steelworkers of America

On April 12 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Moffats, Limited, Weston, Ont., and Local 3129, United Steelworkers of America. A minority report was submitted by Mr. C. Calvin.

The Board was under the chairmanship of Dr. Robert MacGregor Dawson, of Toronto,

appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. C. C. Calvin, K.C., and Herbert Orlicke, B.A., both of Toronto, appointed on the nomination of the employer and employees, respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and of a dispute between Moffats Limited, Weston, Ontario (Employer) and Local 3129, United Steelworkers of America, Toronto, Ontario, (Employees).

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Dear Sir:

The Board of Conciliation appointed by you in this matter now submits its report. Two sittings were held. At the first sitting the Union was represented by Mr. W. Sefton accompanied by Mr. W. F. C. Kidd and Mr. M. Miller, an officer of Local 3129. Mr. James L. Ross of Toronto acted as counsel for the company which was represented by Messrs. J. Babcock, J. D. Heard and J. Wright. At the second sitting Mr. Miller was not present and Mr. John Mitchell, International representative represented the union as well as Mr. Sefton and Mr. Kidd.

Four matters were found to be in dispute, two relating to seniority and two relating to union security. All members of the Board are pleased to be able to report to you that the two matters relating to seniority have been settled and the Board feels that it was instrumental in bringing about such settlement. Both parties have agreed that the following amendments be made to Article IX with respect to seniority in the tentative agreement between the parties.

The following clause shall be inserted in said Article IX:

In case of a lay-off the Company shall have the right, regardless of the seniority provisions, to retain employees not exceeding twenty in number who have special training, education, ability, skill or efficiency relating to radio, refrigeration, ranges, heaters and other products which the Company proposes to manufacture, assemble, produce or process and the Company shall within three months from the execution of this agreement prepare a list of such persons and make same available to the Union. It is understood that this list may be changed by the Company from time to time upon the Company notifying the Union of such change or changes.

The following clause is to be inserted in Article IX as an addition to the sixth paragraph on page 5 ending with the figure 1944:

Any person formerly in His Majesty's Forces as defined in said Acts who, within six months from the date of his or her honourable discharge from such forces or within six months from the date of completion of any subsequent rehabilitation training shall obtain employment with the Company for the first time, shall on

completion of his or her probationary period of employment be granted seniority dating back to the date of his or her acceptance into such forces.

Sub-section (5) of said Article IX appearing at the bottom of page 4 is amended by striking out the word "six" and inserting in lieu thereof the word "three".

The two other matters in dispute, namely those relating to union security, were the union's demand for maintenance of membership and check-off. With respect to the demand for maintenance of membership, all the members of the Board are in agreement but with respect to the demand of the union for the check-off the employer's representative is submitting a minority report. The collective bargaining agreement in process of being negotiated in this case will be, if and when completed, the first agreement between the company and the union. There had been proceedings commencing in October, 1943 before the Ontario Labour Court wherein the Union applied for certification and an employees' council was intervener. The Court refused to certify either but in so doing stated that the dismissal was without prejudice to any further application that might be made after October 31, 1944. Meantime, Order in Council P.C. 1003 became effective and the union by petition dated June 7, 1944, applied to the Ontario Labour Relations Board for certification. The Board directed a vote which was held on August 23, 1944 with 58 per cent of the eligible voters voting in favour of the union and the union was then certified on September 13, 1944. Many meetings were held between the company and the union and a tentative agreement is in draft form which both parties are ready to execute except for the union's demand in respect to the two matters presently under consideration. Each party submits that it has negotiated in good faith and made every reasonable effort to conclude a collective agreement but it is evident that a strong feeling of distrust has existed for some time and that the labour relations between union and company have not been harmonious.

MAINTENANCE OF MEMBERSHIP:

The Union asked for and the company refused the inclusion of the following clause in the agreement:

It is agreed that all employees now members of the United Steelworkers of America Local 3129 or those who may become members shall remain members in good standing for the life of this agreement.

The vote above mentioned did not indicate a large majority of eligible employees in favour of the union and at the hearing the union has declined to inform the Board as to how many of the employees are members in good standing of the union. This clause

would affect the rights not only of present members of the union who might wish to withdraw their membership but also affect employees who might in the future become members of the union and while not as extreme as the provisions of the union shop or closed shop clause, is nevertheless frequently considered a rigid provision for a first agreement. The Board is not unmindful of the fact that maintenance-of-membership clauses have in recent months become more common than they were some time ago in first agreements. Nevertheless, in the circumstances of this case the Board does not feel that the inclusion of this clause would be wise and the Board accordingly recommends that the union withdraw its request for its inclusion.

CHECK-OFF

The union also requested the company to agree to the following clause regarding check-off:

The company agrees to deduct from the earnings of each employee \$1.00 per month for union dues upon receipt of a signed authorization from the employee so to do and to transmit by cheque regularly each month to the Financial Secretary of the union the full amount of dues so collected.

The representative of the company on the Board urged that in this present case the demand for the check-off ought also to be dropped. While an attempt was made during the proceedings to have the company agree to a less drastic form of check-off where, for instance, the authorization might be made revocable at any time, the employer representative on the Board does not concur in the view hereinafter expressed by the other two members of the Board. The Chairman and the union representative on the Board feel that the voluntary revocable check-off would not greatly embarrass the company's bookkeeping arrangements when seven other deductions from wages are already being made. If the company could have seen its way clear to have granted this minor concession in the matter of union security it would, the majority of the Board thinks, have been a splendid gesture on the part of the company and might have been the first real step toward more harmonious relationships. It is with regret on the part of the majority of the Board that the company could not see its way clear to grant a clause of this nature. In respect to the check-off, therefore, the majority of the Board recommends that the union modify its demand in this respect to make it plain that the authorization to be signed by the employee is a voluntary one and that it may be revoked in writing on thirty days' notice and also recommends that the union's request in this connection, if so modified, be accepted by the company.

RECOMMENDATIONS:

The Board accordingly recommends:

(1) that the union withdraw its request for the inclusion of the maintenance-of-membership clause and

(2) that the union modify its request for the check-off clause as mentioned above and that the company agree to it in such modified form.

In conclusion we wish to express our appreciation of the assistance given by the representatives of both parties. In our opinion, the opposing points of view were very ably and thoroughly presented and argued.

All of which is respectfully submitted.

Dated at Toronto this 10th day of April, 1945.

Minority Report

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and of a dispute between Moffats Limited, Weston, Ontario (Employer) and Local 3129, United Steelworkers of America, Toronto, Ontario (Employees).

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Dear Sir:

As I am unable to agree, in one respect, with the findings and recommendations of the majority of this Board I submit a separate report.

As the issues relating to seniority were settled and as I concur in the recommendation of my colleagues on the question of maintenance of membership, I shall confine my remarks to the demand of the union for the check-off.

CHECK-OFF

There is no history at all of harmonious relations between the union and the company. The early history of the organizing activities of the union in the year 1943 were perhaps, to put it mildly, not conducted on a very high plane and several of the pamphlets issued in the year 1943 for which the union to-day frankly assumes full responsibility contained much matter defamatory to several officers of the company and the reaction of the officers thereto has been the natural one. The union for its part alleges (although without submitting evidence) that the men have been for some time dissatisfied with the company's attitude in various aspects of its labour relations. There was, however, absolutely no evidence of any discrimination submitted. In

my opinion, no good can be accomplished by reciting in detail this early history. The company in effect now says: "Why should we concede any point, no matter how minor, which assists a union that up until now has been engaged in a campaign of vilification of the company"—and the union in effect says that if it were only given a reasonable measure of security it would then be in a position to discipline its few recalcitrant members, thereby promoting harmonious relations and assisting not only the union but the company itself. I think however that until the union has had vastly more experience in this plant the Board should not ask the employer to co-operate with the union in maintaining its strength and membership.

We were furnished with all the well-known general arguments for and against the check-off and these arguments have been repeatedly and fully set forth in reports of Conciliation Boards and I do not think anything constructive or useful will be attained by my repeating all these arguments and the usual answers to them.

The company and the Board are entirely in the dark as to what is involved in the granting of any form of check-off. Out of nearly

1,000 employees I am unable to tell whether a check-off will mean the alteration of the calculating machines and the bookkeeping systems for one person or 500. This much is obvious. It is a clause avowedly for the benefit of the union and equally avowedly one that will cause some measure, I am unable to tell how great, of inconvenience and perhaps financial burden on the company. So far as I know there may be groups, even more numerous than the present union members willing to sign some other kind of authorization who would like to have the company grant them the same privilege for some purpose. The thought that the voluntary, revocable check-off would be a gesture of co-operation on the part of the company, when its implications are unknown and when there is no history of harmonious relations, does not appeal to me. I therefore recommend that the union withdraw its request for the inclusion of any kind of check-off clause.

I regret that we were unable to reach a unanimous decision in all matters.

Dated at Toronto this 10th day of April, 1945.

Report of Board in Dispute between Dairy Pool Co-operative Marketing Association, Prince Albert, and Local 241, United Packinghouse Workers of America

On March 15 the Minister of Labour received the report of the Board of Conciliation which was established to deal with a dispute between the Dairy Pool Co-operative Marketing Association, Prince Albert, Sask., and Local 241, United Packinghouse Workers of America. A supplementary report was received on April 2.

The personnel of the Board was as follows: Mr. A. M. McIntyre, K.C., Saskatoon, Sask., Chairman, appointed on the nomination of the other two members; Mr. George H. Carr, Prince Albert, Sask., appointed on behalf of the employer; and Mr. A. C. Ellison, K.C., Regina, Sask., appointed on behalf of the employees concerned.

The text of the Board's report and of the supplementary report follows:

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and Dairy Pool Co-operative Marketing Association Limited Employer, and the Bargaining Representatives of the Employees of the Said Employer, United Packinghouse Workers of America, Employees.

On the 7th day of March, 1945, the Board of Conciliation established by the Minister of

Labour on the 6th day of January, 1945, met in Chambers at the Court House, in the City of Prince Albert at 10.00 a.m.

Present: Mr. G. H. Carr, Mr. A. C. Ellison and Mr. A. M. McIntyre, being all the members of the Board. Mr. C. S. Davis, K.C., Mr. C. T. Gooding, Mr. K. Anderson, represented the Employer.

Mr. N. R. Riches, Mr. G. B. Bassett, represented the Employees.

Mr. Kinch attended the afternoon session as one of the employees' representatives.

The session was called to order at 10.00 o'clock and Mr. Davis on behalf of the employer submitted that owing to the proclamation of Chapter 69 of Saskatchewan Statutes of 1944 second session which repealed Chapter 95 of 1944 first session, this Board lacked jurisdiction to deal with the matters. It was suggested that this was not the proper place to deal with such an objection and that the meeting proceed on the assumption that all the preliminaries were in order and that the Board had power to act.

The representatives of the Company were very insistent that they would negotiate only with regard to employees who were actually members of the Local No. 241 and stated that employees in the Prince Albert plant.

Representatives of the Employees were equally firm that having been certified as bargaining agents, it was their duty to represent all of the employees in the class mentioned in the certification.

The Board endeavoured to get the parties to discuss an Agreement reserving to Mr. Davis his right to make any objection to jurisdiction and the matter adjourned until 3.00 o'clock in the afternoon to permit the representatives of the employers to confer.

The meeting reconvened at 3.00 p.m. when Mr. Davis, on behalf of the employers, stated definitely as follows:

1. The Company will not negotiate concerning any Agreement which is applicable to more than the four employees whom it states are the only members of the Union now employed by the Company at Prince Albert.

Mr. Davis further asked permission to submit his reasons in writing and it was agreed that he may do so.

2. Mr. Davis raised a second objection; that having regard to the fact that Chapter 95 of the 1944 Statutes of Saskatchewan first session has been repealed by the proclamation of Chapter 69, Statutes of Saskatchewan, 1944 second session on January 23, 1945, this Board lacks jurisdiction.

3. That the certification of Bargaining Agents names the Bargaining Representative and one Wesley Scott is so named. The Company will not negotiate an Agreement so long as Wesley Scott remains certified representative, because he is working for a competitor of the employer.

Memo: Mr. Scott did not appear before the Conciliation Board and Mr. Riches stated on behalf of the employees, it was not his intention to have him appear.

Mr. N. R. Riches for Employees stated as follows:

1. That the Bargaining agents and the Union consider legislation as now drafted governs the parties to this dispute and the Union is prepared to live up to the regulations and submit a draft Agreement for discussion.

2. Mr. Riches stated that the Bargaining Agents were willing to negotiate as far as Local 241 is concerned on behalf of all the employees set out and described in the certification. The Bargaining Agents are not willing to consider any Agreement affecting only a portion of such employees.

The Members of the Board made every effort to have the employer and employees negotiate an Agreement. It was evident that these several representatives had not been on

good terms prior to this meeting. The representative of the employers was very definite that no Agreement would be considered which affected more than four members of Local 241. The representatives of the employees were equally firm that they would not consider any Agreement which did not include all employees mentioned in the certification. After the fullest possible opportunity had been given to the parties to alter their uncompromising stand, no agreement could be made and the Board must report that it was unable to effect any Agreement between the parties.

Dated at the City of Prince Albert, in the Province of Saskatchewan, this 7th day of March, A.D. 1945.

Supplementary Report

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Dairy Pool Co-operative Association, Prince Albert, Saskatchewan, Employer, and Local 241 United Packing-house Workers of America, Employees.

In the opinion of the Board the issue in question was, whether or not the Agreement should cover all employees named in the certification or only the four men whom the employers' representative claimed were the only members of Local 241.

Other issues were raised, such as jurisdiction, etc., but these were put on one side and an effort made by this Board to resolve the primary issue as stated above. Unfortunately the Board was unsuccessful in its efforts.

Your Board recommends that the employer be required to negotiate an Agreement in accordance with the provisions of P.C. 1003. Such Agreement shall govern all production workers and outside staff covered by the certification, and the Agreement shall have as its effective date for all purposes, September 15, 1944.

Dated at the City of Saskatoon, in the Province of Saskatchewan, this 28th day of March, A.D. 1945.

Report of Board in Dispute between the Canadian Car & Foundry Co., Limited, Brantford, Ont., and United Automobile, Aircraft & Agricultural Implement Workers of America, Local 397

On April 2 the Minister of Labour received the reports of the Board of Conciliation established to deal with a dispute between the Canadian Car & Foundry Company, Limited, Brantford, Ont., and the United Automobile, Aircraft and Agricultural Implement Workers of America, Local 397. A minority report was submitted by Mr. D. A. Paterson.

The personnel of the Board was as follows: Dr. Cecil A. Wright, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board; Messrs. D. A. Paterson and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

Re: Wartime Labour Regulations, P.C. 1003 and re a Dispute between Canadian Car and Foundry Company, Limited, Brantford, Ontario, and United Automobile, Aircraft and Agricultural Implement Workers of America, UAW-CIO, Local 397.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you pursuant to s. 13 of P.C. 1003 begs to report as follows:

The Board sat in Brantford, Ontario, on Saturday, February 17, to hear the written and oral submissions of the parties. At the hearing the Company was represented by A. Ashton, Works Manager, Brantford, and G. Walsh, Director of Personnel, Montreal. The Union was represented by Seth Bejian, Chairman of the Union Plant Committee and Robert Stacey, International Representative UAW-CIO.

The present dispute arose in the course of negotiating a renewal of a collective agreement which was first made in July, 1943. The first agreement was made following a vote taken pursuant to a report of a Board under the Industrial Disputes Investigation Act when the present Union obtained about 70 per cent of the eligible votes. At the present time, of some 340 eligible employees at this plant, the Union claims about 60 per cent as paid-up members in good standing. The Company employs in all some 28,600 persons in twelve plants operated by it (of which six major and three minor plants are in Montreal, the others,

in addition to the one in Brantford, being in Fort William and Amherst). The Company has collective agreements in these various plants, the oldest dating from 1934 in Montreal, and in Fort William, employing about 6,800, from 1939. None of the existing agreements contain any provision for union security or check-off and, according to the Company, it has never been asked for either until the Union made its demand in the present instance in the Brantford plant.

The parties have reached agreement on all matters arising in the negotiation of the renewal of the 1943 agreement save the request of the Union for inclusion of the following clause in the new agreement:

1. In order to promote harmonious relations between the Company and the Union it shall be a continuous condition of employment that all present employees who have attained seniority must become members of the Union within thirty (30) days of the signing of this Agreement, and shall remain members in good standing thereafter.

2. New employees must join the Union within thirty (30) days from the date of hiring and must remain in good standing thereafter.

This request the Company refused on the ground that its policy was one in favour of the open shop and that it felt that the maintenance of union membership was "the Union's business" and should not be the concern of the Company. The sole question before the Board was the question of this "union shop" clause.

At the hearing the Board indicated that whatever might be the merits or demerits of a "union shop" as a matter of general principle, the present Union had neither sufficient length of experience in this plant, nor such overwhelming support as would warrant a recommendation that all existing employees, both Union and non-Union, and all future employees should, as a condition of employment, join and remain members of the Union. No doubt every Union looks forward to the time when all employees in a given plant shall support and be members of the agency which acts in the interest and for the benefit of such employees. Such a goal is not only understandable from the point of view of Union employees, but we believe that a Union which has demonstrated to an employer over a period of time its ability to attract and hold the vast majority of employees and to act constructively on their behalf with management should eventually be entitled to look forward to co-operation of management to that end. Such co-operation would seem to be in the mutual

interests of both employer and employees. It is perhaps sufficient to say that it is the unanimous opinion of this Board that the conditions under which a Union might reasonably expect such co-operation have not been established in the present case. The Board accordingly recommends that the Union withdraw its request for the "Union Shop" clause as put forward.

Under these circumstances it is possible to say that the Union having failed to convince the Board of the reasonableness of the request put before it there is no necessity for a Board to award any milder form of security in the form of a "consolation prize". Such a view, however, would ignore the fact that in direct negotiations between the parties preceding the establishment of the present Board, the Union had been prepared to discuss some lesser form of union security, but in view of the Company's firm position that it was opposed to any form of union security, the Union placed before the Board its original request for a Union Shop. There can be little doubt that a union which has the duty of acting for the duration of the agreement as a certified bargaining agency is entitled to an opportunity to carry out the duties which are imposed upon it by law, in as favourable circumstances as a spirit of compromise will permit. One can appreciate that a responsible union must frequently take a position which, in light of long term policy will not meet with favour of individual employees and individual members of the Local. Thus, one can envisage employees of a plant making demands for wage increases which a responsible union might feel called upon to oppose under the abnormal conditions of war. Such an attitude on the part of the Union should be encouraged by the Company, but if it were to result in a decrease in membership of the Union, many employers would say that the Union was losing support and was, on that account, disentitled to any form of security by the co-operation of the employer.

On the other hand an irresponsible union, which sought to increase membership by pandering to exorbitant demands of the employees would certainly be rebuffed, and properly so, by an employer, even though membership in the union might be increased by such methods of the union. Under these circumstances one must have considerable sympathy for a claim on the part of the Union to be secure for the duration of an agreement and to have some control over the members of the Union so that it can enter on a constructive policy of co-operation in the interests of both employer and employee.

To state, as the Company in the present case does, that it is the Union's business to obtain

and maintain its own security, even if partly correct, cannot be entirely true, once it is granted that the Union for the duration of the Agreement is a real party to the maintenance of industrial relations in the plant in which it is certified as bargaining agent. We can appreciate that a company may not be willing at an early stage in its experience with a given union to make membership in the union a condition of employment. Even if the principle of membership in a union as a condition of employment at any stage of bargaining experience were sound—a question on which we express no opinion—it may not be in the interest of either the Union or the Company in a particular case, for a Union to force this issue in the early stages of bargaining experience. For this reason, therefore, we do not believe that in this instance the Union should insist on a maintenance-of-membership clause at this stage of the bargaining relations, particularly if some other method of achieving somewhat similar results might be adopted which is less open to objection as a matter of "principle" by the Company.

Granted that the Union should have an opportunity of demonstrating either its suitability or unsuitability as bargaining agent under circumstances as favourable as possible, we cannot see how a Company can, in principle, object to recognizing and honouring voluntary authorizations of individual employees to deduct Union dues and which authorization is stated by the employee to be irrevocable for the duration of the agreement. Agreement by the Company to honour such authorizations will not only serve to remove any possible suspicion that the Company is willing to go no further than the law demands with regard to collective bargaining (and which is frequently interpreted as meaning that a company is anxious that the union should have its path of progress made as difficult as possible) but such agreement on the part of the Company should also serve to inculcate in the individual employees who are employed on the terms of the collective agreement, a sense of responsibility in choosing their union, and should give such employees a sufficient monetary stake in the Union that they will more readily accept union discipline.

We are not unaware of the fact that even such a modified form of union security, relieving as it does a union from making active and continuous contacts with its membership during the duration of the agreement, may possibly have the result of reducing the union's efficiency and reduce its chances of continuation as bargaining agency at the end of the agreement. This is a matter, it would appear to us, for serious consideration by both the Union and the individual employees who give

the authorization, and it would not seem to lie in the Company's mouth to question the choice of either. Certainly, in the past, unions have had to take what they believed to be "the hard way" in both gaining and maintaining Union recognition. Granted compulsory collective bargaining, we believe that a Union is at least entitled to have an opportunity of proving to both management and employees alike, the advantages which it claims inhere in Union security so far as is compatible with a spirit of reasonable compromise. This we believe can best be done with the least sacrifice to the interests and principles of both parties in the present case by the adoption of a clause in the new collective agreement along the following lines:

Upon presentation of an authorization signed by an employee to deduct \$. a month from his wages and to transmit such amount to Local 397 of the Union, which authorization may be stated to be for the duration of the Agreement, the Company undertakes to honour such an authorization according to its terms and to transmit by cheque the total amount so deducted to the financial secretary of Local 397 before the 10th of the month in which it is deducted.

Such a clause would free the Company from inquiry into the terms of Union membership and would not require the Company to discharge employees for failure to keep up membership. It would, however, satisfactorily serve to give the Union by the voluntary act of individual employees some guarantee of financial security which would assist it in conducting collective bargaining relations with the Company for the duration of the Agreement.

We accordingly recommend that such a clause as outlined above be adopted in the Agreement under discussion.

All of which is respectfully submitted.

Dated at Toronto, this 23rd day of March, 1945.

Minority Report

Re: War Time Labour Regulations P.C. 1003 and re a Dispute between Canadian Car & Foundry Company Limited, Brantford, Ontario, and United Automobile Aircraft and Agricultural Implement Workers of America U.A.W. C.I.O., Local 397.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir:
I am in agreement with much of the contents of the Majority Report herein, signed

by my colleagues, Dr. Cecil A. Wright and Mr. B. Laskin. While not a signatory thereof, I endorse in full the viewpoint of the members of the Board as a whole on the demand for "Union Shop" and the reasons as set forth on page two why the Union should vacate its demand for that condition.

The following excerpt from page two of the Report is significant:

At the hearing the Board indicated that whatever might be the merits or demerits of a "union shop" as a matter of general principle, the present Union had neither sufficient length of experience in this plant, nor such overwhelming support as would warrant a recommendation that all existing employees, both Union and non-Union, and all future employees should, as a condition of employment, join and remain members of the Union. No doubt every Union looks forward to the time when all employees in a given plant shall support and be members of the agency which acts in the interest and for the benefit of such employees. Such a goal is not only understandable from the point of view of Union employees, but we believe that a Union which has demonstrated to an employer over a period of time its ability to attract and hold the vast majority of employees and to act constructively on their behalf with management should eventually be entitled to look forward to co-operation of management to that end. Such co-operation would seem to be in the mutual interests of both employer and employees. It is perhaps sufficient to say that it is the unanimous opinion of this Board that the conditions under which a Union might reasonably expect such co-operation have not been established in the present case. The Board accordingly recommends that the Union withdraw its request for the "Union Shop" clause as put forward."

Concisely but completely, the foregoing extract explains why the Union's demand for a closed shop must fail and cannot be recommended.

The quotation also epitomises, in the opinion of the undersigned, why the recommendation for a voluntary "check-off" should fail. In short, the Union during its incumbency as Bargaining Agent has failed to advance its cause within the Plant, it has failed to maintain its membership and it has been unable to induce other workers to enter its fold. It has lost the confidence, if not the support, of many who were its members in the month of June 1943 when, as a result of the ballot then taken, it was established as the bargaining agent for the Brantford Plant Employees, displacing the Moulders' Union of the American Federation of Labour.

What are the facts?

In the months of April, May and June 1943, the undersigned sat as a member of a Board of Conciliation appointed to consider a dispute in the Brantford Plant of the Canadian Car & Foundry Co. Ltd., which made a unanimous

award in favour of the present Union as Bargaining agent following upon a vote under Government auspices resulting as follows:

For the present Union	246
Against	83
Spoiled ballots	3

The undersigned recalls hearing statements then made as to the impotency of the previous bargaining agent—its ineffectual efforts to produce positive results favourable to the employees. In fact it was claimed that that was the chief reason for the endeavour of the present union to upset the bargaining agent of that time. Nothing had been accomplished for the employees by the old regime, and nothing could be accomplished until a change of authority were affected, i.e. until the present Union became bargaining agent.

To the Board, the Union has stated that at the present time it has 200 memberships out of a total number of employees of 340-58 per cent or so.

In June, 1943, when the present Union was confirmed as the new bargaining agency it obtained the support of 74 per cent of the employees. Within eighteen months of securing control, the present Union's authority over the work-people in the Plant has diminished 16 per cent. Despite that obvious fact, the Union in opening negotiations for a new Agreement reaches out for a Union Shop—a condition usually demanded where the strength of the Union is strongly preponderant and growing, instead of, as in the present case, waning to the point where bargaining authority may soon pass out of its hands.

With all respect to the statement in the Majority Report to the contrary, the Company politely insists that no "lesser" type of Union Security was advanced by the Union for consideration and adoption. No substitute security was discussed and therefore none was refused.

The Union Shop provision under the foregoing circumstances being rejected by the Board, how, logically, under the same set of circumstances, can the provision known as voluntary check-off be justified? True it is but voluntary. No one is to be coerced and being voluntary it does not clash in any way with the provisions of the Labour Code governing unfair practices.

But nevertheless, when the voluntary check-off becomes a recommendation of the majority of the Board and therefore presumably an award favourable to the Union, the assumption arises that, in some way, though unexpressed, the concession has been earned.

I fail, however, to understand how such a conclusion can be reached.

CONCLUSION

Under all the circumstances I am of the opinion that the application by the Union should not have been submitted, is premature, and should be withdrawn, as suggested by the undersigned during the hearings before the Board.

I have the honour to be, Sir,
Your obedient servant,

(Sgd.) D. A. PATERSON,
Member.

Montreal, P.Q., 28th March, 1945.

Report of Board in Dispute Between Macassa Mines, Kirkland Lake, Ont., and Local 240, Kirkland Lake Mine and Mill Workers Union

On March 31, the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Macassa Mines, Kirkland Lake, Ont., and Local 240, Kirkland Lake Mine and Mill Workers Union.

The Board was under the chairmanship of Dr. Alexander Brady, Chairman, appointed by the Minister of Labour on a joint recommendation from the other two members, Messrs. Gilbert E. Jackson and George Harris, both of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations, P.C. 1003, and re Macassa Mines Limited, Kirkland Lake, Ontario, and Local 240, Kirkland Lake Mine and Mill Workers Union.*

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation established to deal with the above dispute begs to submit its report.

On August 15, 1944, a vote was held among the employees of the Macassa Mines Limited to determine what organization would represent them as a bargaining agency, with the following result:

Number eligible to vote.....	157
Number of ballots cast.....	140
Number of votes for the Mine, Mill and Smelter Workers Union, Local 240	84
Number of votes cast for Independent Canadian Mine Workers Union	52
Blank or spoiled ballots.....	4

As a consequence of this vote Local 240 was certified by the Ontario Labour Relations Board on September 13, 1944, and negotiations took place between it and the Company in October and November which resulted in the signing of a partial agreement. Matters on which there was still disagreement were:

(a) claim by the Union for a maintenance-of-membership provision;

(b) claim for a voluntary revocable check-off;

(c) time and one-half for time worked over eight hours in any one day;

(d) double time for all statutory holidays.

The matters which came before the present Board are only (a) and (b) above; the matters included under (c) and (d) come within the jurisdiction of the National War Labour Board.

A public hearing was held on February 20, 1945, and both parties presented evidence and argument on the matters in dispute. The Company was represented by Mr. R. A. Bryce, president, Mr. Arthur Slaght, K.C., M.P., counsel, and Messrs. L. Beaman, J. A. Howes, and A. Harris. The Union was represented by Mr. W. Simpson, international representative in Kirkland Lake.

THE ARGUMENT ON LEGALITY

The argument was presented to the Board by Mr. Arthur Slaght, counsel for the Company, that apart from the merits or demerits of the claims made by the Union, these claims cannot properly, under the terms of P.C. 1003, be referred to the Board because they do not relate to "working conditions" as contemplated in subsection (1) (d) of section 2 of P.C. 1003. In brief, Mr. Slaght contended, maintenance-of-membership and check-off are not "working conditions", and hence the Company is not obligated to negotiate concerning them. Furthermore, he argued that both maintenance-of-membership and check-off would constitute for the Union "financial and other support", which under section 19 (1) of P.C. 1003 is prohibited.

The members of the Board are not lawyers, and feel diffident about pronouncing upon legal points, yet have no alternative but to accept or reject the legal argument of Mr. Slaght. They note that this issue of legality has appeared before other and previous Boards, and desire to point out that a Board composed entirely of lawyers which dealt with a dispute between Fittings Limited, Oshawa, and United Steelworkers of America (LABOUR GAZETTE, November, 1944, pp. 1351 and 1353) was agreed that the prohibition in section 19

(1) did not extend to a voluntary check-off, since each individual employee himself, not the Union, determines whether he wishes the Company to oblige him concerning the payment of his Union dues. Doubtless the decision of the employee and the action of the Company confer a benefit upon the Union, but it is a benefit different from one conferred upon a Union by an employer's own initiative. It was this latter type of benefit which P.C. 1003 had in view. To the present Board this argument appears convincing.

The argument of the Company that it was not called upon to negotiate on maintenance-of-membership and check-off clauses because they did not strictly relate to "other working conditions" as contemplated in subsection (1) (d) of section 2, in P.C. 1003 was also considered by the Board. It is evident that by its presentation the Company is endeavouring to attach a fixed and rigid meaning to the phrase, "other working conditions", but this Board is of the opinion that the phrase, as commonly used in industrial relations, is without a rigid meaning. It refers to the conditions under which employees will work and employers will give work, and these in modern industry are changing conditions. This matter has been fully dealt with in a recent report of the Board of Conciliation, which examined a dispute between the Upper Canada Mines Limited and the International Union of Mine, Mill and Smelter Workers. The Majority Report of the Board in this case interpreted "working conditions" to mean "any term on which an employee wishes to work, or on which an employer wishes an employee to work". It contended forcibly that "working conditions" cannot be narrower than the content of the employer-employee relationship itself, and with that contention the present Board is in agreement. It believes that maintenance-of-membership provisions and check-off come as properly under "other working conditions" as a grievance procedure or seniority rights. Hence it considers that it is entitled to make recommendations concerning them.

But before making such recommendations it would suggest that the terms of P.C. 1003 in the matter of section 19 (1), might properly be clarified by the government through amendment. The Board, however, has no authority to make recommendations concerning the amendment of P.C. 1003, and it passes on this suggestion as an obiter dictum.

RECOMMENDATIONS ON THE POINTS IN DISPUTE

In considering the request for the inclusion of clauses in the agreement providing for maintenance-of-membership and check-off, the

Board recognized the variety of pertinent circumstances which are present: the parties have signed a first agreement and hence are not yet fully accustomed to each other; the Union is not powerful in the mine but by all the signs is capable of maintaining its position; labour in the industry is not at present abundant, and in the post-war period there is likely to be some inflow of fresh workers; there are many men in the military forces who will return to the employment of the Company. The most important circumstance is that the Union and the Company are just at the beginning of a contractual relationship. They have negotiated in good faith an agreement, except for the few disputed clauses. As far as the Board can judge the relations of Company and Union are friendly, and with a spirit of give and take on both sides these friendly relations should continue.

Thus far the Board is unanimous. In respect of its recommendations, however, the Board is not unanimous.

RECOMMENDATIONS OF THE MAJORITY

The majority members of the Board consider that the Union should withdraw its request for a maintenance of membership clause, and that on the other hand the Company should concede the privilege of a voluntary check-off. A maintenance of membership clause is frankly a step in the direction of a Union shop, with some of the implications of a Union shop, and the majority members of the Board (without arguing the matter in this report), are of the opinion that in the present agreement the Union should not request this step.

On the other hand it is in their view reasonable that the Company should concede the voluntary check-off; that is, recognize a voluntary authorization from employees to have their Union dues deducted monthly from their wages. Collection of Union dues in a mine is often a troublesome procedure for Union officials and for the employees, and a check-off will be of considerable help to both. Admittedly it will involve some expense and inconvenience to the Company, but its concession will unmistakably demonstrate the Company's desire to come at least half way in an endeavour to meet the requests of the employees who are members of the Union. That demonstration should contribute to the strengthening of future good relations between the Company and the Union.

RECOMMENDATIONS OF THE MINORITY

The code of war-time labour regulations, of which P.C. 1003 forms a part, will in due course disappear; and on the necessity for

its ultimate disappearance there is substantial agreement among employees and employers. But the legitimate interest of Society in the decisions arrived at by collective bargaining—that endures and cannot be disregarded safely.

No better instance of this need be sought than the present dispute; as may be seen by the following account of the negotiations preceding appointment of this Board; an account upon which (at least, as to the facts in the case) both parties to the dispute are agreed.

In the present instance, the Trade Union concerned began by submitting to the Employer a clause known as the Union Shop.

If accepted, this clause would in effect have compelled employees of the Company *either* to become Union members *or* to give up their means of livelihood.

When the Employer refused this request, an alternative clause was put forward by the Union known as Maintenance of Membership.

This would respect the freedom of employees not already members of the Union to remain outside it; but, if accepted, would in effect have compelled employees of the Company who had already become Union members to remain Union members for the duration of the Agreement; or alternatively, to give up their means of livelihood.

When the Employer refused this request, another alternative clause was put forward by the Union which is known as the Compulsory Check-off.

This would in effect also have compelled employees of the Mine who had become members of the Union to remain members of the Union for the duration of the Agreement; and would have made the Employer a party to the compulsion.

When the Company refused this request also, the Union submitted yet another alternative proposal, known as the Voluntary Revocable Check-off.

It is quite obvious that if the Employer were to agree to this the Union would benefit both materially and morally.

The Union would be saved the trouble and expense of collecting dues from individual employees; the Company would be performing on behalf of the Union a function which (human nature being what it is) will always be more or less unpopular.

If the Company could feel assured that by consenting to this proposal it would be securing itself against a renewal of pressure upon it to concede demands for Maintenance of Membership or for the Compulsory Check-off (which it rejects in principle), it might be well advised so to consent. But the Company has no such assurance.

This account is given at length for two specific reasons:

(a) Because in the brief presented to this Board by Local 240, Kirkland Lake Mine and Mill Workers' Union, it is contended that Maintenance of Membership is necessary;

(b) Because in the brief presented to this Board by the Macassa Mines Limited, the Board was requested specifically to make careful examination of two questions:

- (i) Would the Maintenance of Membership take away freedom and rights of the employees?
- (ii) Would it be against the interest of the general public in Canada?

Just as the Board was unable to legitimately disregard the Company's plea that certain claims of the Union cannot, under the terms of P.C.1003, properly be referred to the Board (and the Board therefore considered, and unanimously rejected, Mr. Slaght's argument in favour of this plea); so now the Board cannot properly sidestep a claim which is still maintained by one of the two parties to this dispute; and which is central to the submission of the other party.

With reference to these two questions, this Minority Report makes the following observations:

(i) Maintenance of Membership and the Compulsory Check-off (whatever may be their practical advantage from the standpoint of Union strategists concerned with entrenching themselves against attack from an employer—or from another union) involve a choice, on the part of all Union workers brought within the scope of a Maintenance of Membership Agreement, or made subject to Compulsory Check-off, which in practice becomes irrevoc-

able; unless, that is, an adequate and effective "escape clause" is included in such an agreement—none such has been proposed in the present instance.

(ii) The question, whether it is justifiable in a society desiring to remain free, to force upon any group of citizens such an irrevocable choice?—may be debated for a long time to come, before a single answer emerges to satisfy the Canadian conscience.

This Minority Report therefore recommends that Union and Employer should be satisfied with the partial Agreement, of which a copy has been submitted to this Board; and should administer it in a spirit of co-operation, meanwhile leaving in abeyance the disputed issue.

For it should be made clear that, in the present instance, it is the Union which is requesting a concession from the Employer, which the Employer is free to make or not to make; and it is for the Union to convince the Employer, on the basis of a favourable experience with the partial Agreement already negotiated between them, that the making of this further concession will inure to the benefit of both parties.

All of which is respectfully submitted.

Dated at Toronto, this 29th day of March, 1945.

Report of Board in Dispute between Anaconda American Brass & Copper Co., Ltd., New Toronto, Ont., and Local 811, New Toronto Brass & Copper Workers' Union, International Union of Mine, Mill and Smelter Workers

On April 19 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Anaconda American Brass & Copper Co., Ltd., New Toronto, Ont., and Local 811, New Toronto Brass & Copper Workers' Union, International Union of Mine, Mill & Smelter Workers. A minority report was submitted by Mr. N. P. Petersen.

The Board was under the chairmanship of Dr. Cecil A. Wright, Toronto, appointed on the joint recommendation of the other two members of the Board; Messrs. N. P. Petersen and Lewis Duncan, both of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Anaconda American Brass and Copper Company, Limited, New Toronto, Ontario, and Local 811, New Toronto Brass and Copper Workers' Union, International Union of Mine, Mill and Smelter Workers.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Conciliation Board appointed by you to deal with the above dispute begs to report as follows:

On March 26th, 1945, a meeting was held to hear the written and oral submissions of the parties, at which meeting the Union was represented by B. T. Doherty, International Representative, and J. Stewart, Vice-President of the Local, while the Company was represented by U. M. Evans, Superintendent, L. R. Richardson, Labour Supervisor and G. R. Munnoch, K.C., Counsel.

The first collective agreement made at this plant was one dated November 26th, 1943 between the Company and the Industrial Union of Copper and Brass Workers Local No. 1, C.C.L. In August 1944 the present Union took over jurisdiction from the former C.C.L. Union at the request of the members of the Union, and in October of that year the Company agreed to recognize the new Union and to observe the agreement of November 26, 1943 as if it had been made between the present Union and the Company. On November 24th, 1944 the present Union opened negotiations for a new agreement. These negotiations proceeded until January 8, 1945, at which time the Union appealed to the Ontario Labour Relations Board on the ground that the parties were deadlocked. On January 16th, 1945, the Board indicated that the parties should negotiate for another two weeks; meetings were held throughout January and on January 26th practically all the matters in dispute between the parties, with the exception of the request of the Union for a Union Shop clause and an involuntary and irrevocable check-off clause, were agreed upon between the parties. On Monday, February 19th, following a Union meeting the previous day, a strike took place at the plant of a day's duration, the reason given for the strike being that the employees objected to what they called the dilatory tactics of the Company in failing to put into operation the terms on which they had agreed as a partial agreement at least, and the refusal of the Company to embody the Union Shop clause and Check-off provisions. Work was resumed at the plant shortly after five o'clock on February 19th on the understanding that an agreement would be signed and an agreement was signed on February 26th between the Company and the Union. While Article 11 of the Agreement as signed provides that the provisions therein "shall constitute the entire agreement between the parties", before this Board the Company did not take the position that the Agreement was intended to be final and determinative, and there was apparently an oral understanding, at least, that other matters not agreed upon would be referred to a Conciliation Board under the proceedings set in motion by the Union in January of this year.

The following matters were placed before the Board as questions on which the parties were unable to agree:

The Union requested the inclusion of a Union Shop clause by which all employees both present and future should become and remain members in good standing with the Union as a condition of employment by the Company, and secondly, an involuntary, irrevocable check-off of Union dues by the Company.

The Company requested the inclusion of a no-strike clause, and secondly, a clause by which the Union would agree to stop the publication of what it alleged was false and misleading material in the local Union bulletins, etc.

The Union claimed that some 90% of the employees in this plant, of whom eligible employees number about 1,200, were members in good standing of the Union. They produced before the Board what they claimed to be some 924 signed authorizations from individual employees (a specimen copy of which is hereto attached) by which the employees undertook to remain members in good standing of Local 811 for the duration of the collective agreement and by which the individual employees authorized the Company to deduct monthly Union dues and to remit the same to the Secretary-Treasurer of the Local. These authorizations were placed at the disposal of the Company and, while the Company did not admit their validity, there was no serious dispute as to their authenticity, save that the Union admitted that amongst the 924 authorizations filed were included some from employees in a Crown Company (Can. Strip Mill Ltd.) which was a separate entity having a separate agreement and which employed some 250 eligible employees. There is little doubt, however, that the present Union commands an overwhelming support of the employees in the present Company and that the majority of such employees did sign the individual authorizations placed before the Board.

The Company resisted the Union's claim chiefly on the ground of irresponsibility of the Union, and it placed great reliance on the fact that the stoppage of work on February 19th, being illegal, was an indication of the Union's irresponsibility. It is true that Mr. Doherty stated that the Union did not authorize or call the strike and that it was unknown to him until after it had commenced, but it is also significant that he admitted quite candidly that the Union took no disciplinary action against any of those members participating.

We do not believe that in the present state of collective bargaining between the parties the

request for full union shop and involuntary and irrevocable check-off should be pressed by the Union. We cannot ignore, however, the large number of signed authorizations of the employees, nor can we, when seeking some method by which industrial peace may be preserved for the future, ignore the fact that the Company's refusal to accede to any form of Union security was considered sufficiently important to rouse the feelings of the employees in this plant to the extent of producing a stoppage of work.

After much consideration the Board felt that there might be a possibility of getting the parties together and concluding an agreement on the points in dispute if the Union's request for a form of Union security were coupled with some tangible evidence of its desire to furnish the Company with a corresponding benefit. The Board felt that if the request for some form of Union security was, under the circumstances disclosed here, accompanied by a willingness to accept such security conditioned upon the non-participation by Union members in strikes or stoppages of work for the duration of the agreement, there might be hope of an agreement being reached. Accordingly on April 12th, the parties met once more with the Board. At that time the Company indicated its willingness to give a voluntary revocable check-off conditioned upon, and to be forfeited in case of a strike participated in by Union members. On the other hand, the Union indicated its willingness to accept a maintenance-of-membership clause plus check-off, without any forfeiture, provision, in lieu of its original request. The Company refused to consider maintenance of membership even subject to forfeiture in case of strike, although the Union representative, Mr. Doherty, indicated that he would, albeit reluctantly, recommend the acceptance of such provision to the employees. Under these circumstances the parties were unable to reach an agreement.

We understand that our colleague, who is writing a separate report, is willing to recommend the acceptance by both parties of a clause providing for check-off of Union dues by the Company conditioned upon non-participation in strikes or stoppage of work by Union members. To this extent the Board's report is unanimous, but, differing from our colleague, we are of opinion that under the circumstances disclosed here, and in the interest of future industrial peace in this plant, the Company should be willing to concede a maintenance-of-membership clause likewise conditioned.

To demand a forfeiture provision for a check-off clause alone, which, as a gesture of

co-operation, has been conceded by many companies, and recommended by many unanimous Boards, is not, in our opinion, sufficient to meet the situation in the present case. We can see no reason why the Company should not, in the circumstances, recognize the willingness of their employees to support the Union of their choice for the duration of the agreement, particularly if such recognition by the Company is conditioned upon the absence of strikes or stoppages of work. We believe, further, that under the circumstances here, the Union might reasonably concede such a forfeiture clause to the Company.

With this in mind and in place of the two requests by the Union, and the request of the Company for a no strike clause, we suggest that there should be included in the present agreement, which was executed on February 26, and as part thereof, a clause somewhat as follows:

(a) It shall be a condition of employment of all employees who are now or who may hereafter become members of the Union that they maintain their membership in the Union in good standing for the duration of this agreement.

(b) The Company agrees to deduct from the pay of every employee who authorizes the Company in writing so to do, the sum of \$1.00 each month as Union dues and to remit such money monthly to the Union together with a memorandum in writing showing the names and addresses of the persons with respect to whose pay the said deductions shall have been made.

(c) If during the lifetime of this Agreement an illegal strike, sit-down or stoppage of work occurs, in which 50 per cent or more of the members of the Union shall have participated or in which 50 per cent or more of those participating in such strike are members of the Union, the Company may, within one week after the beginning of such strike, give notice in writing to the Union terminating its obligations under clauses (a) and (b) of this Article by reason of such participation, and unless the Union, within one week after receipt of such notice, disputes the fact that the strike, sit-down or stoppage was illegal in which 50 per cent or more of its members participated in such strike, sit-down or stoppage of work, or that 50 per cent or more of those participating were members of the Union, the Company, within one week after receipt of its notice by the Union, shall be relieved of all obligation under clauses (a) and (b) of this Article. In the event that the Union disputes the fact that the said strike, sit-down, or stoppage of work was illegal or that 50 per cent or more of its members participated in such strike, sit-down or stoppage of work, or that 50 per cent or more of those participating were members of the Union, then the question or questions disputed shall be determined by an arbitrator chosen by mutual agreement between the Company and the Union, or, in the event of their failure to agree, by an arbitrator appointed by the Minister of Labour for

Ontario. After the Union disputes any allegation of the Company made hereunder, and until the decision of the arbitrator is received by both parties, the obligations of the parties under this Article shall continue in effect, but the decision of the arbitrator shall be final and binding on both parties and if the arbitrator finds in favour of the Company's contention, then the obligations of the Company under this Article shall forthwith cease on receipt of the arbitrator's decision. The cost and expenses incident to such arbitration shall be borne equally by the Company and the Union.

Before this Board nothing was placed in evidence which would warrant the inclusion of the Company's proposed clause with regard to the publication of offensive Union propaganda and the Board therefore recommends that the Company's request for this clause be withdrawn.

In the result, therefore, as a means of settling the two requests of the Union and the counter request of the Company for a no-strike clause, this Board recommends the inclusion of the clause regarding maintenance-of-membership and voluntary check-off of dues, conditioned on non-participation in strikes, etc., by the Union, as outlined above.

All of which is respectfully submitted.

Dated at Toronto, this 16th day of April, 1945.

(Sgd.) CECIL A. WRIGHT,
Chairman

In view of the strong organization of the Union and the large number of authorizations which had been signed by Union members it is my opinion that this Board would have been justified in recommending that the Company should grant the requests of the Union for a Union Shop and an involuntary and irrevocable check-off. However, as a matter of compromise, I subscribe to the recommendations numbered (a), (b) and (c) in the report of the Chairman.

One further matter should be mentioned. The Agreement of the 26th February, 1945, makes elaborate provision for grievance procedure. Four stages are provided for. The Agreement then appears to provide for arbitration. But the arbitration clause is in the following terms:

In case a matter is not settled after following the above Grievance Procedure, it may be submitted, *by mutual consent*, for Arbitration to the American Arbitration Association, Canada Division, under the Rules of Procedure as contained in the Voluntary Labour Arbitration Tribunal of the American Arbitration Association.

The underlined words, which the Company insisted on, contrary to the wishes of the Union, gives the Company the right to refuse

to arbitrate any unsettled grievance. It is unfortunate that the Company has taken this attitude. Industrial peace is promoted by the rapid settlement of grievances, carried to arbitration if necessary. It is not promoted by the setting up of illusory grievance procedure.

April 16, 1945.

Minority Report

Re: Wartime Labour Relations Regulations, P.C. 1003, and Anaconda American Brass and Copper Company, Limited, New Toronto, Ontario and Local 811, New Toronto Brass and Copper Workers Union, International Union of Mine, Mill and Smelter Workers.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Dear Sir:

The Conciliation Board appointed to deal with the above reference has completed its work and as I am unable to concur with my colleagues, I herewith submit a separate report.

A meeting was held on March 26th, 1945, at which the union was represented by B. T. Doherty, International Representative, and J. Stewart, Vice-President of the Local. The company was represented by G. R. Munnoch, K.C.

B. T. Doherty outlined to the Board collective bargaining which had taken place, with meetings held at reasonable intervals, culminating in a union meeting, Sunday, February 18, 1945, at which a report was made of progress to date. In outlining this progress to the Conciliation Board, Mr. Doherty stated that all articles of the agreement had been completed and accepted by both sides as of February 14, 1945, excepting one question in connection with article 8, sub-section 4, which deals with job classifications.

Despite this progress, a sit-down strike took place at the plant of Anaconda American Brass and Copper Company, Limited, on February 19, 1945, being of one day duration, for which the men received no strike pay from the union.

The Conciliation Board was furnished with copies of completed and signed agreement between the company and the union dated February 26, 1945, which contains, among other terms, the following Article No. 11.

ARTICLE II

Amendment

The foregoing provisions shall constitute the entire agreement between the Parties for the term hereof unless amended in writing by the Parties and signed by Officials authorized so to do.

The union submitted to the board that despite its acceptance of the agreement which it signed, it had two further demands on which it asked conciliation. These two demands had been dealt with by a Conciliator, appointed following appeal to the Ontario Labour Relations Boards, on January 16, 1945. The union at that time requested:

- (1) Maintenance of Membership.
- (2) Dues check-off.

When appearing before the present board the union had changed its two conditions as follows:

- (1) Union Shop.
- (2) Dues check-off,

whereupon the Company placed before the board two conditions:

- (1) No-strike clause.
- (2) Stoppage of unfair and untrue statements against the Company in local union publications or in unsigned bulletins.

In view of a completed agreement, properly signed, having been designated by the union representative as a good working agreement, and having regard to the following:

- (1) The Union is not well-known in the locality, the present agreement being its first contract with the Company.
- (2) Irresponsibility of the union, its officials, or its members, as demonstrated by the union or union members action—stopping work, illegally, on February 19, 1945

the board would be justified in disallowing consideration of the union's conditions and I feel equally disposed to ignore the company's request for further conditions.

After lengthy deliberations by the Board, it was decided to attempt further conciliation, and on April 12, 1945, the Board met again with B. T. Doherty and two employees of the Company representing the union, and U. M. Evans and L. R. Richardson representing the Company.

At this meeting the Company agreed to give the union further consideration by offering a supplementary agreement dealing with voluntary dues check-off and dropped its request for no-strike clause and the other requirement regarding union bulletins by having the check-off agreement include a restriction with respect to work stoppage which was considered satisfactory in lieu of the no-strike clause.

The union representative and the two employees rejected the Company's offer and stated to the Board that it was not their intention to submit the offer to the union membership generally at a regular meeting.

Having regard to the circumstances as listed, I am not willing to recommend further powers for the union, and outline hereunder certain pertinent facts.

- (1) A work stoppage took place during discussions which led up to the contract which is now accepted and signed.
- (2) This contract was completed with the exception of one sub-section which was later completed without the aid of a conciliation officer.
- (3) The union and its officials are not well-known to the Company and are without previous history in the community.
- (4) The union officials, by refusal to refer the Company's latest proposal to the membership, have shown a desire to have complete domination of the situation and have demonstrated the union demands on the Company are not a settled policy understood or desired by the majority of union members, as indicated by changing the request for maintenance of membership to a union shop request. The union has further demonstrated that it desires to control the situation in an arbitrary manner and contrary to the best interests of the community and injurious to the war effort of the employees by distributing bulletins, announcing a strike vote would be taken on April 15, before either parties had received knowledge or information about the recommendation of the Conciliation Board dealing with the case. (Bulletin Attached).

The Company has agreed to do the following in the interest of the union:

- (1) Accept as bargaining agency the present union without requesting it to become certified.
- (2) The Company signed a contract on February 26, 1945, containing Article 11, previously referred to.
- (3) Despite provisions in Article 11, the Company had co-operated with conciliation procedure and made further valuable offers of co-operation.
- (4) The Company appeared before the Board and made a further offer to enter into a supplementary agreement providing for voluntary dues check-off, based on signed authorizations properly witnessed, and being revocable by the employee, providing as a condition that if during the life of the agreement, a sit-down, slow-down, work stoppage, or strike takes place that the Company forthwith stops collection of union dues, if it can be demonstrated fifty per cent (50%) or more of the employees taking part in such demonstration are members of the union or have at any time during the life of the agreement instructed the Company to withhold union due payments from their wages.

As the union representative declared they could obtain dues check-off authorization cards for more than ninety per cent (90 per

cent) of employees, there is no reason to reject the Company's offer of voluntary dues check-off.

Further than that, I take the position that maintenance-of-membership or mandatory union shop arrangement is not a matter which should be dealt with in a general contract.

Matters of belief, such as religion, political adherence, and other questions of personal likes and dislikes are not matters which can be conciliated.

Recommending that the Company be asked to do something in which it does not believe, would be contrary to the Company's right to exercise its own judgment.

If the union is correct in stating it is less than satisfied on account of its check-off

authorization being revocable, it would indicate the union is demanding a type of interference with rights of freedom and action on the part of Anaconda employees, which would be against the interest of society.

It is therefore recommended to the union and to the Company that they carry on further discussions with a view to having the union accept the Company's further offer of dues check-off.

The above is respectfully submitted.

Dated at Toronto, this 17th day of April, 1945.

(Sgd.) N. P. PETERSEN,
Member.

Report of Board in Dispute between Corbin Lock Co. of Canada, Belleville, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.) Local 426

On April 10 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Corbin Lock Co. of Canada, Belleville, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 426. A minority report was submitted by Mr. Gale.

The Board was under the chairmanship of Dr. Cecil A. Wright, Toronto, appointed on the joint recommendation of the other two members; Messrs. G. A. Gale and Bora Laskin, both of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, as amended, and in the matter of a dispute between Corbin Lock Company of Canada, Limited, Belleville, Ontario and Local 426, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO)

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour of Canada,
Ottawa, Ontario.

The Board of Conciliation appointed by you in this matter begs to report as follows:

Hearings were held in the City of Belleville, at which the Company was represented by L. E. McLean, General Manager; K. N. Gerow, Works Manager; and C. A. Payne.

K.C., Counsel; and the Union by John Eldon, Fred Brooks and Drummond Wren, all International Representatives. Written and oral submissions were made by each of the parties touching on the three matters in dispute, viz:

- (1) The demand of the Union for and the refusal of the Company to agree to the inclusion of a "union shop" clause in the collective agreement which they have been negotiating.
- (2) A similar demand and refusal respecting a "check-off" clause; and
- (3) The demand of the Company for and the refusal of the Union to agree to the terms of a clause allowing the Company to replace a certain percentage of female employees, without regard to their plant-wide seniority, by male employees.

The dispute on the foregoing items arose during the negotiation of a first collective agreement between the parties. The Union initiated organizing activities among the employees of the Company early in 1944, and applied to the Ontario Labour Court for certification in May of that year. It was certified by that Court as the bargaining agent of the Company's hourly-rated employees on September 13, 1944, following a representation vote between it and the Corbin Lock Employees' Guild, in which the Union obtained about 71 per cent of the votes of the eligible voters. The Company employs about 200 persons who are affected by its collective bargaining relations with the Union and of these the Union claims 80 per cent as paid up members in good standing.

FEMALE SENIORITY

The Company's employment rolls have not been swollen by wartime expansion since its normal complement of workers is about 190, but there has been a decided shift in the relative numbers of male and female employees. As of 1940, the Company had 18 female employees on its payroll; today, the number is 117. The Company desires to restore its pre-war proportion between male and female employees, and it has suggested the inclusion of the following clause in the collective agreement being negotiated with the Union.

Seniority shall not be affected by race, sex, religious affiliation, nationality or dependents of the employee; save that the Company may replace female employees by male employees in positions or occupational classifications now filled by female employees at any time on or after the first day of June, 1945, by giving the Union thirty (30) days' written notice of its intention, so that the number of female employees shall not be reduced by more than thirty (30) per centum of the female employees employed by the Company on the first day of June, 1945.

The Union opposes this clause, principally on the ground that it would enable the Company to lay off female employees without regard to plant-wide seniority. While the parties have agreed that seniority should be on a departmental basis, the Union contends that this was a concession on its part and that in connection with the exceptional provision, above quoted, which the Company seeks to introduce into the collective agreement, lay-offs should be in accordance with plant-wide seniority. On the other hand, the Company's position is that such a limitation might prevent it from making lay-offs in departments in which it particularly wished to replace female by male help, viz: the pressroom and machine shop. Female workers in these departments, as well as those employed as clerks, are doing work which, the Company claims, was generally done by men because of the physical labour involved in some of the operations. The Union readily agreed to co-operate with the Company in taking women off heavy work but it wanted to protect their seniority on a plant-wide basis. At the hearing the parties agreed that the "replacement" clause should not become operative until the cessation of hostilities with Germany but they were unable otherwise to resolve the dispute on this matter.

The Board has carefully considered the respective positions of the parties on the issue and it unanimously recommends the inclusion of the following clause in that respect:

Seniority shall not be affected by race, sex, religious affiliation, nationality or dependents of an employee; save that after the termina-

tion of hostilities with Germany, the Company may, upon giving to the Union thirty days' notice of its intention to do so, replace female employees by male employees in positions or occupational classifications now filled by female employees, provided that the number of female employees employed by the Company as of the date of termination of hostilities with Germany shall not, under the provisions of this section, be reduced by more than thirty per cent.

Following the giving of the said notice and until the 30 per cent replacement of female by male employees has been completed, any female employees in the press room and machine shop or employed as clerks who are laid off or discharged for any reason other than replacement of female by male employees as contemplated by this section shall be included in the computation of such 30 per cent.

In making replacements under this section, which may involve the discharge of female employees in any department who have seniority over female employees in other departments who are not being discharged hereunder, the Company will endeavour, after consultation with the Union, to give effect to such seniority by employing the replaced female employees in such other departments, provided that, in the opinion of the Company, they have the skill and efficiency to do the work of the female employees in such other departments or can, in the opinion of the Company, acquire such skill and efficiency within a period which the Company deems to be reasonable.

UNION SHOP AND CHECK-OFF

The clause requested by the Union and refused by the Company relating to the "union shop" and "check-off" was as follows:

- (1) It is a continuing condition of employment with the Company that employees covered by this Agreement, both present employees and new employees shall be and remain good standing members of the Union. Persons losing their membership in the Union shall not be retained in the employ of the Company.
- (2) Present employees who are not now members of the Union must become members within 30 days from the date hereof.
- (3) New employees must become members of the Union within 30 days of the date of hiring and remain in good standing thereafter.
- (4) The Company will deduct from the pay of each employee covered by this Agreement, all Union initiation fees, dues and assessments.
- (5) All such deduction shall be made during the first pay period of each calendar month provided that:
 - (a) deductions of initiation fees for present employees who are not now members of the Union shall be made within 30 days from the date hereof.
 - (b) deductions of initiation fees of new employees who are not members of the Union shall be made out of the first pay received by such employees.
- (6) Assessments must be first approved by the Union before deduction shall be made therefor. The Union will give the Company notice of its approval of assessments.

- (7) All sums deducted shall be remitted to the Financial Secretary of the Union not later than the 25th day of the calendar month in which such deductions are made.
- (8) The Company and the Union shall work out a mutually satisfactory arrangement by which the Company will furnish the Secretary-Treasurer of the Union monthly, a record of those for whom deductions have been made, together with the amount of such deductions.

At the hearing, the representative for the Union stated that he felt a union, once certified, should be entitled to a union shop provision in order properly to carry out its functions. With this view, as a general proposition, we must express our dissent. While union shops may be the goal of trade unionism, we believe that to say a union shop clause should automatically be included in a collective agreement in every case upon certification of a union's officers as bargaining representatives is to adopt a position so extreme and devoid of support either in legislation, practice (or even in reports of Conciliation Boards), that it scarcely merits discussion. That there may be cases where, in a first agreement, a union with some 70-80 per cent membership might conceivably be entitled to a union shop is a possibility. It is perhaps sufficient to say that the present case discloses no circumstances that would warrant this Board even considering it seriously. The Board accordingly is unanimous in recommending that the Union withdraw its request for the Union Shop clause as presented.

The practice of unions asking for the ultimate of a "union shop" in circumstances where an employer has scarcely had an opportunity of knowing the union at all is not one which commends itself to this Board. Unions which complain of employers adopting "aggravating" or "inflammatory" tactics might well remember that this can work two ways. Further, demands for "union shop" as a matter of course may well result in causing a meritorious claim for such provision to be ignored. It may likewise result, if too rigorously insisted on, in a denial of any form of company co-operation with the union in the latter's not unreasonable request to be given an opportunity under as favourable circumstances as possible to perform their function as a recognized party to the maintenance of good employer-employee relations.

We do not say that the present Union has offended in this respect, since at the hearing when the Board indicated that it would not recommend a union shop clause the Union did not press the point and, in light of the fact that the Company had indicated in earlier negotiations its opposition to any form

of so-called "union security" it is perhaps not surprising that the original request—in which the Union honestly believes—should be left in opposition to the Company's outright refusal to countenance other proposals—a refusal dictated by an equally honest belief on its part.

It is attractive to say that in the present case the Union has not demonstrated an actual need for any form of union security and, the burden of proof being upon it, no recommendation is necessary. The Union, however, bases its claim of "need" on the nature of and the implications arising from compulsory collective bargaining. The Company denies these implications. On issues of this nature where the question is not who is right and who is wrong, but rather what can be done to achieve the greatest amount of co-operation between parties to an agreement in performing their respective functions under that agreement, with the least sacrifice of the view of either as to "right" or "wrong", the idea of proving necessity or "need" as a fact seems to us inapplicable. To deny all validity to what the Union claims is a real necessity to perform its obligations is to admit, in effect, the rightness of the Company's view that no such necessity or implications arise. We are not prepared to say that a union is "wrong" in asking for any form of union security, nor are we prepared to admit the "rightness" of its request for complete security by a "union shop" clause. At the same time we are not willing to admit the "rightness" of the Company's position in denying any claim for security and yet demanding proof of leadership, nor will we say that a company is "wrong" in refusing to add union membership, under the circumstances here, as a condition of employment.

Real claims are honestly made on both sides. It seems to us that we should approach the question from the following points of view. Can the granting of some form of union security injure the Company in its collective bargaining relations? Can the granting of some form of union security assist a Union in its bargaining relations? If there is a possibility of benefit without a corresponding possibility of harm, we believe that it is the function of a Conciliation Board to effect a compromise without being put in the position of deciding as a matter of principle for or against the differing ideological views of the parties.

We agree that employers who, by legislative decree, have been forced to accept the principle of compulsory collective bargaining cannot, and should not, be expected to take at one gulp, if ever, the trade union philosophy

concerning "union shop", whether it may or may not be the ultimate result of collective bargaining or whether it may or may not be helpful to a union in its bargaining relations and of little or no harm to an employer. We believe, however, that if an employer looks to a certified bargaining agency for co-operation in maintaining good employer-employee relations—as he is entitled to, and should do—he ought to be willing to make such concessions as a spirit of compromise will permit towards those matters which a union feels will enable it the better to assume and execute that responsibility. In other words, granted even the likelihood of benefit to one side which may promote rather than impede or leave static good industrial relations why should a Board not recommend something that may promote the co-operation which any contract or agreement implies between the parties, even if it be not sure that it will have that effect, if the Board is convinced that it cannot, at any rate, injure relations, and if it is honestly asked for as a means of promoting those relations?

Collective bargaining assumes that the bargaining agency shall act on behalf of the collectivity of employees who choose it to represent them. The extent to which a company is willing to co-operate with a union (chosen as bargaining agency) in dealing with the collective group will mark the success or failure of collective bargaining. That a union should, by the attractiveness of its policies, be able to control the group and to satisfy the employer, is a doctrine with which in theory we agree. It ignores the fact, however, that there are many individuals who cannot see their own immediate demands in terms of long range benefit to the group of employees, and to the employer from that group—and it is with and from the latter that the employees must eventually benefit. Such a view also ignores the fact that the individual employee usually feels—whether rightly or wrongly—that his own immediate interests are in opposition to those of his employer. The function of a bargaining agency is not only to merge the individual interests of employees in order to adjust an unequal bargaining position between employer and employee. It should also seek to achieve a basis of co-operation with the employer without which the interests of both employees and employer will suffer. To do so it must assume leadership. Leadership involves some power to compel obedience which, in turn, involves some type of sanction. In countries like England sanctions were worked out slowly and painfully and frequently, by physical force. This country has now adopted a method of compulsory collective bargaining

in an effort to avoid part, at least, of that painful process. To that end it has introduced the union as a real party in interest in the promotion and preservation of industrial relations in every plant in which it is certified. Whether such legislative policy be right or wrong it is only proper that it be given a fair trial. The Union in this case asks for some measure of company co-operation whereby it can carry out the leadership expected of it and obtain and maintain the support of employees on which its leadership depends.

As we have stated we do not agree that the Union should have that full support that a union shop clause would undoubtedly give it. We do not believe that a company at this stage of bargaining proceedings can be expected to surrender its honestly held views so completely. Nor will we in this instance go so far as to recommend that the company make it a condition of employment that existing and future union-employees remain members in good standing for the duration of the agreement, even though we can see a benefit to the Union without corresponding loss to the Company in such a "maintenance" provision. We feel, however, that considering the possibility of benefit to the Union without harm in fact or to principle of the Company we can recommend that the present agreement contain a clause somewhat similar to the following:

Upon presentation of an authorization signed by an employee to deduct \$..... a month from his wages and to transmit such amount to Local 426 of the Union, which authorization may be stated to be for the duration of the Agreement, the Company undertakes to honour such an authorization according to its terms and to transmit by cheque the total amount so deducted to the financial secretary of Local 426 before the 10th of the month following that in which it is deducted.

The effect of such a clause may be purely psychological—but none the less real. If accepted by the Company it would be a gesture by which the latter agrees to co-operate with the Union and Union employees in maintaining some form of security that will enable the Union to demonstrate—or disprove—its ability to provide constructive leadership. At the same time, it does not force the Company to accept the principle of employing only Union members. It does, however, eliminate any possible suspicion that the Company insists on treating the Union at arms length and as though it were an interloper—even if a tolerated one—in the plant. Such a clause would undoubtedly confer on the Union a benefit, and one which it considers important to the stabilizing of industrial relations. We can see no injury or loss to the Company—

save the small matter of additional expense which we do not believe to have been seriously urged by the latter—unless it be injuriously to the Company to have the Union financially secure for the duration of the agreement. As the Union must operate for a year there can be no objection to its security as such. That it may, through security, become less interested in the welfare of the employee might be a serious objection, but one which we believe to be the concern of the employees themselves rather than the employer.

RECOMMENDATIONS

We accordingly recommend that the present agreement contain:

- (1) A clause similar to that outlined above with respect to female lay-offs and seniority;
- (2) A "check-off" clause similar to that outlined above.

All of which is respectfully submitted.

Dated at Toronto, this 3rd day of April 1945.

Minority Report

In the matter of The Wartime Labour Relations, P.C. 1003, as amended, and in the matter of a dispute between Corbin Lock Company of Canada Limited, Belleville, Ontario, and Local 426, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).

The Honourable HUMPHREY MITCHELL,
Minister of Labour of Canada,
Ottawa, Ontario.

I have had the advantage of seeing the draft Report which presents the views of the other two members of the Board. It indicates that we are unanimously of the opinion that the Union's bid for a "union shop" should be rejected, and that the clause relating to "female seniority" should be revised as therein set out. There is nothing I can usefully add to the reasoning and conclusions of that Report upon those two subjects. Unfortunately, however, and notwithstanding the respect I have for my colleagues, I am unable to concur in the views which they express on the Union's request for a "check-off" provision.

The facts and circumstances leading up to the present position of the matter are fully and accurately described in the Majority Report and I do not propose to repeat them.

At the outset I should say that I am impressed with the idea that this Board, and

in fact all Boards appointed to conciliate under Order in Council P.C. 1003, should approach the problems with which they are confronted in a practical state of mind, and that being so, should endeavour to find a real solution for the particular matters in controversy rather than discuss conflicting ideologies.

The real problem is whether the Company should be compelled to grant to the Union a clause which would have the effect of installing a system of voluntary irrevocable check-off of Union dues. The other members of the Board, while rejecting more extravagant claims of the Union, have come to the conclusion that the agreement being negotiated should contain such a clause. I do not think that any "check-off" clause should be a part of the first agreement between these parties. At some future date when circumstances have changed and when the parties have had an opportunity of knowing and understanding each other, such a clause might be desirable as an instrument for the promotion and continuation of normal harmonious labour relations. In my opinion, that day has not yet been reached.

It seems to me that unless extraordinary circumstances prevail in any particular case, a Company which has so recently been initiated to the mysteries and rigours of collective bargaining should not be expected to accept the usual clauses pertaining to union security, so popular with the unions, until and unless it is clearly demonstrated that there is a real existing or future need for such security. I stress the word "future" for surely the union would be justified in seeking the inclusion of such a clause if prevailing circumstances indicated that the need would develop during the currency of the agreement. But I am equally convinced that the Union should have cast upon it the duty of showing to the Company and ultimately to the Board that such a need will reasonably arise.

However convenient it might be for the Union at the present time, a system of check-off is not necessary to it in any proper sense of the word for the relations between the Union on the one side and its members or the Company on the other are entirely satisfactory. Do the possible future benefits of the system outweigh the real and honest opposition put forward on behalf of the Company? After having considered all of the circumstances of the case and after full and frank discussions with my colleagues, I have come to the conclusion that that question must be answered in the negative.

The only real support for the future utility of the clause is a matter of pure speculation. The Union says that the time may come when

it will be compelled to take a position contrary to the wishes of its employee members but for their benefit, and that it must have the security of a "check-off" clause to be able to do so. I am not prepared to forecast such a situation, and on the contrary, it could be suggested that perhaps a Union with such security might be tempted to take a position to its own advantage but to the detriment of its members. I am not for a moment saying that this Union would adopt such a view, but am merely pointing out that it is dangerous to accept hypothetical and speculative reasons to support clauses such as the one under discussion. Again, without criticizing this Union, I should add that it might be suspected that they have asked for "union shop" and "check-off" clauses in this case simply because it is fashionable to do so today; it wants to be in style whether or not the garments fit.

In contrast with the vague possibility suggested by the Union, we find the active opposition of the Company supported by the following substantial grounds:

- (a) the clause would be interpreted by the employees as an indication that the Company is supporting the Union; whereas the Company has not yet sufficient experience with or confidence in the Union to be placed in that position.
- (b) The Union will become moribund if it is not required to have some personal contact with its members.
- (c) The Union would thereby be asking the Company to perform one of the odious tasks of union administration and the Company does not know why it should be asked to relieve the Union of that unpopular project.
- (d) The Company, at the present time, is not sufficiently staffed to undertake the additional work that a "check-off" involves.

While some of those reasons may be said to be psychological, they are none the less real.

I am not at all sure that the "benefit-harm" theory advanced by my colleagues is basically sound, or rather, is capable of providing an accurate gauge in matters of this kind. If it is, why would it not sanction a "union shop" clause in this case, notwithstanding the unanimous rejection of such a clause by all members of the Board? The answer that the Company should not be expected to absorb too much collective bargaining treatment at this stage of its association with the Union would be equally applicable to the suggestion that the test would permit the imposition of a "check-off" clause.

In any event, I am satisfied that even the "harm-benefit" test exonerates the Company from agreeing to a "check-off" clause for clearly the probable harm to it exceeds the probable benefit to this Union.

Having reached the conclusion that a "check-off" clause is inadvisable in the circumstances of this case, it will be unnecessary for me to discuss the Company's contention that such a clause is forbidden by the provisions of Sec. 19 (1) of P.C. 1003, on the ground that under such a clause the Company would be rendering improper support to the Union. It seems to me that the objection is not without substance and that it will deserve and require decisive consideration on some future occasion.

By reason of the foregoing I recommend that,

- (a) The collective bargaining agreement being negotiated contain a clause with respect to female seniority similar to that outlined in the Majority Report; and
- (b) The Union withdraw its demand for "union shop" and "check-off" clauses.

All of which is respectfully submitted.

Dated at Toronto, this 5th day of April, 1945.

(Sgd.) GEO. A. GALE

Report of Board in Dispute between Cariboo Gold Quartz Mining Co., Ltd., and its mining and milling employees of Wells Miners' Union, Local No. 685, International Union, United Mine, Mill & Smelter Workers, Wells, B.C.

On April 9 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Cariboo Gold Quartz Mining Co., Ltd., and its mining and milling employees of Wells Miners' Union, Local No. 685, International Union, United Mine, Mill & Smelter Workers, Wells, B.C.

The Board was under the chairmanship of

Mr. J. N. Finlayson of Vancouver, appointed by the Minister in the absence of a joint recommendation from the other two members, Messrs. R. L. Norman and Malcolm MacLeod, both of Vancouver, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations Act, Order in Council P.C. 1003, and in the matter of a dispute between the Cariboo Gold Quartz Mining Company Limited and certain of its employees, members of Wells Miners' Union Local No. 685, International Union, United Mine, Mill and Smelter Workers.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

The Board of Conciliation appointed pursuant to the said Wartime Labour Regulations on the 18th day of January, 1945, respectfully reports as follows:

1. The life of the Board was extended by agreement for a sufficient period to enable representations to be made and this report prepared.

2. At the first meeting of the Board for hearing of evidence, it was agreed between the parties that the chief matters in dispute were (a) the maintenance-of-membership clause and (b) the check-off clause, contained in the proposed agreement.

Report of Board in Dispute between Bush and Miller Co., Eburne, B.C., and Local 1-217, International Woodworkers of America

On April 5 the Minister of Labour received the unanimous report of the Board of Conciliation which dealt with a dispute between Bush and Miller Co., Eburne, B.C., and Local 1-217, International Woodworkers of America.

The Board was under the chairmanship of Mr. A. R. MacDougall of Vancouver, appointed by the Minister in the absence of a joint recommendation from the other two members; Col. G. H. Kirkpatrick, Vancouver, appointed by the Minister in the absence of a nomination from the employer, and Mr. G. S. Culhane, also of Vancouver, appointed on the nomination of the employees.

The text of the Board's report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Bush and Miller, Eburne, B.C., Employer, and the Bargaining Representatives of the Employees of the said Employer, Local No. 1-217, International Woodworkers of America, Employees.

To the Hon. the MINISTER OF LABOUR,
Parliament Buildings,
Ottawa, Ontario.

Sir:

We, Albert Reginald MacDougall, Chairman, Guy H. Kirkpatrick and G. S. Culhane,

3. After representations were made on behalf of each party, the Board suggested that the parties should attempt to effect an agreement pursuant to Section 13 (2) of the said Regulations. The Board collaborated from time to time with the parties in their discussions and is now pleased to report that the parties arrived at a mutual understanding. The Union withdrew its request for the inclusion of maintenance-of-membership and check-off clauses in the proposed agreement. A copy of the revised agreement signed by the parties antedated on the 3rd day of July, 1944, is attached to this Report.

4. The Board expresses its appreciation to the representatives of both parties for the thorough and courteous manner in which they submitted their views and its hope that the utmost harmony may attend the implementation of the agreement.

Dated at Vancouver this 29th day of March A.D. 1945.

(Sgd.) JOHN FINLAYSON,
Chairman.

(Sgd.) MALCOLM MACLEOD,
Member.

(Sgd.) R. L. NORMAN,
Member.

established as a Board of Conciliation by you in pursuance of provisions of Section 13 (1) of the Wartime Labour Relations Regulations, P.C. 1003, to endeavour to effect an agreement herein, report herewith the result of our endeavours and our findings and recommendations as follows:

The firm of Bush and Miller carries on the business of a shingle mill. Mr. Bush died a short time ago, leaving Mr. G. W. Miller in charge of operations. The latter is, according to the Board's information, about 76 years of age and according to the information which he gave the Board, has been greatly upset by the loss of his partner as a friend and business associate and also by the uncertainty as to the basis on which the mill is to continue. The Board did not feel that this basis was any particular concern of it and accepted the proposition that the employer was the firm of Bush and Miller of which the latter has full managerial capacity.

As already indicated, Mr. Miller is of rather advanced age and one who apparently finds it difficult to attune himself to the modern trend in employer-employee relations. It has been suggested that the unyielding and uncompromising attitude with which from the outset he confronted the Board may not be so naive as might, at first blush, appear. How-

ever that may be, he seems to be entirely lacking in an appreciation of existing labour legislation and regulations and assumes the attitude that having had always the best interests of his employees at heart as evidenced by relatively high wages, advances on account of salary and generally good working conditions, his is a beneficent paternalism which should never be called into question by any union or governmental authority. The consequence was that the Board had considerable difficulty in persuading Mr. Miller to meet with representatives of the bargaining agency "with a view to the completion of a collective agreement" in the words of Section 10 (1) of the regulations.

After two visits of the Board to the shingle mill of Bush and Miller, it finally elicited a promise from Mr. Miller to meet the aforesaid representatives, who were Mr. Harold Pritchett, President of the International Woodworkers of America District No. 1, and Mr. Floyd Hamilton, Special Representative of I.W.A.

According to the evidence of these gentlemen, which we accept, the 1944 Standard Form of Agreement, International Woodworkers of America—C.I.O. District No. 1, was discussed and agreed to by Mr. Miller with the following exceptions:

Article I—Bargaining Agency

The Company recognizes the Union as the sole collective bargaining agency of the employees of the Company in..... where a majority of them have selected the Union as their bargaining agency and are so certified by the Provincial Department of Labour of the Province of British Columbia, and will continue to recognize the Union as such bargaining agency subject to the provisions of the "Industrial Conciliation and Arbitration Act" of the Province of British Columbia.

Article V, Section 4

Any employee called for work and finding no work available due to reasons beyond his or her control shall be entitled to two (2) hours at the usual rate. This shall apply unless the Company gives sufficient notice cancelling the said call.

Article IX, which deals with vacations.

This standard form of agreement for 1944 is enclosed herewith and marked Exhibit "A".

The representatives of the bargaining agency advised Mr. Miller that a new standard form of agreement was being negotiated with the employers and sent a copy of the same to him for his consideration.

It should be said at this juncture, that in addition to the two journeys which the Board made to the Bush and Miller Shingle Mill at Eburne (at some considerable distance from the centre of Vancouver) the Board waited

upon Mr. Pritchett, and the Chairman had telephone conversations with both Mr. Miller and Mr. Pritchett in an unsuccessful attempt at conciliation—the only result being as already intimated, the arranging of a meeting between Miller and the bargaining representatives.

After this meeting, the Board endeavoured to bring both sides before it but were constantly met with some excuse on the part of Miller for his inability to attend a meeting. Eventually, a sitting was peremptorily fixed for the 26th ultimo and in addition to two or three telephone calls to Miller, a subpoena to attend was served upon him. To the process server, he announced that he did not intend to be present because of a "stroke" necessitating under doctor's instructions, care of his health. In the opinion of the Board, the various excuses advanced by Miller (on which the Board more than once arranged adjournments) were not valid.

On the 26th ultimo, the Board met in the absence of Miller and heard the representations made on behalf of the employees by Mr. Nigel Morgan, International Board Member of the International Woodworkers of America District No. 1, Mr. Floyd Hamilton, and Mrs. Gladys Schunaman, Financial Secretary Local 1-217 of I.W.A.

The Board accepts the fact that the new Standard Form of Agreement (a copy of which is enclosed herewith and marked Exhibit "B") in which the party of the second part is a local of the International Woodworkers of America (C.I.O.), has been or is in the process of being signed by the overwhelming majority of employers in the wood-working industry of British Columbia, including shingle mills. The 1944 agreement (Exhibit "A") subscribed to by the overwhelming majority of employers has so far as we can judge, been productive, on the whole, of good employer-employee relations and the Board has been unable to note in the new form of agreement any objectionable additions to or omissions from it.

Article I of the 1944 agreement, to which Mr. Miller took objection, was only declaratory of the law prior to the promulgation of P.C. 1003 and as no valid objection could be taken to it, the same must be deemed to be true with regard to Article I of the new agreement (Exhibit "B").

Section 4 of Article V of the 1944 agreement to which the employer objects is perpetuated in Section 4 of Article IX of the new agreement and is in the opinion of the Board an eminently fair provision provided that it meets with the approval of the Regional War Labour Board.

Article IX of the 1944 agreement having to do with vacations reappears in Article VIII of the new agreement in form somewhat more advantageous to the employees.

With regard to vacations with pay, because of the non-appearance of the employer before the Board, no evidence was submitted as to the ability or inability of the employer to meet this provision. The Board recognizes that such a provision would, in any event, require the approval of the Regional War Labour Board.

The Board makes reference to Article III (a) of Exhibit "B" with respect to wages. The bargaining representatives agree that the wages paid by Bush & Miller are satisfactory and that the present scale should appear as Supplement No. 1 to the said Article. In this connection, in the event that the existing scale has not been approved by the Regional War Labour Board, it would appear that an application would have to be made for this purpose.

In the result, the Board recommends that the provisions of Section 4 of Article IX of Exhibit "B" and the provisions of Article VIII of Exhibit "B" should be submitted to the Regional War Labour Board and that after a ruling has been obtained from that body its findings, whatever they may be, should be incorporated in the new agreement (Exhibit "B") and, subject only to this and to the foregoing remarks with regard to the scale of wages, the said agreement should be executed by the employer.

All of which is respectfully submitted.

(Sgd.) A. REG. MACDOUGALL,
Chairman
(Sgd.) GUY H. KIRKPATRICK,
Member
(Sgd.) G. S. CULHANE,
Member.

Vancouver, B.C., April 3, 1945.

National Joint Council in Public Service

A PERMANENT constitution has been established for the National Joint Council of the Public Service of Canada. The Council, which includes representatives of ten employees' organizations in the Civil Service and representatives of the official side, was set up last year by Order in Council (L.G., 1944, p. 791).

The purpose of the Council, as set forth in the constitution, is to

secure a greater measure of co-operation between the State, in its capacity as employer, and the general body of civil servants in matters affecting the Civil Service, with a view to increased efficiency and improved morale in the public service combined with the well-being of those employed; to provide machinery for dealing with grievances; and generally to bring together the experience and different points of view of representatives of the administrative, technical, clerical and manipulative branches of the Civil Service.

The chairman is a member of the official side and the vice-chairman is chosen by the employee side. Minutes are kept by a secretary who is not a member of the Council.

The constitution provides that decisions of the Council "shall be arrived at by agreement between the two sides". They must be signed by both the chairman and vice-chairman and reported to the authority deemed appropriate (the Governor-General in Council, the Treasury Board or the Civil Service Commission).

Duties of the Council are to make recommendations on the following matters:

- (i) The best means of securing to the staff a greater share in and responsibility for the determination and observance of the conditions under which their duties are carried out.
- (ii) The general principles governing conditions of employment in the public service of Canada including among other conditions recruitment, training, hours of work, promotion, discipline, tenure, regular and overtime remuneration, health, welfare and seniority. Individual cases involving compensation, promotion, disciplinary action or other matters, shall not be dealt with by the National Joint Council.
- (iii) The best means for using the ideas and experience of the staff of the public service.
- (iv) The encouragement of the further education of the civil servants and their training in higher administration and organization, and in advanced professional technique.
- (v) The improvement of office procedure and organization and the provision of opportunities for the full consideration of suggestions by the staff on this subject.
- (vi) Proposed legislation in so far as it may have a bearing upon the position of civil servants in relation to their employment.
- (vii) The advisability of providing for the establishment of various departmental and regional joint councils; and
- (viii) The organization and procedure of such departmental and regional joint councils as may be deemed necessary and their relationship to the National Joint Council.
- (ix) Other appeal machinery deemed necessary.
- (x) Any other matters related to the purpose of the National Joint Council.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-Ferrous Smelting and Quarrying, Metal

COPPER MOUNTAIN, B.C.—THE GRANBY CONSOLIDATED MINING, SMELTING AND POWER COMPANY, LIMITED AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS LOCAL 649.

Agreement to be in effect from March 1, 1945, to February 28, 1946, the parties to meet before the expiration date to discuss its renewal; the obligation of the company to do this is conditional on the majority of the employees being members of the union at that time. This agreement is similar to the one previously in effect (*L.G.*, July, 1943, p. 986), with an additional clause providing for time and one half the regular rate of pay for all work done on any of the six Dominion statutory holidays subject to approval of the National War Labour Board.

Manufacturing: Miscellaneous Wood Products

CHESLEY, ONTARIO—THE CHESLEY MANUFACTURING COMPANY AND NATIONAL UNION OF FURNITURE WORKERS LOCAL 8.

Agreement to be in effect from February 9, 1945, to February 9, 1946. Either party may on ten days' notice require the other party to enter into negotiations for the renewal of the agreement within a period of two months prior to the expiry date. The company recognizes the union as the sole collective bargaining agency for all employees. All employees who are now members, or who may hereafter become members of the union, agree to continue their membership in the union in good standing as a condition of employment during the term of the agreement.

Hours of work to be as specified in the Furniture Code under Industrial Standards Act. All other hours worked shall be classified as

overtime to be paid for at the rate of time and one half. Wages: insofar as the provisions of the schedule under the Industrial Standards Act for the Hard Furniture Industry (*L.G.*, Aug., 1944, p. 1008) applies to this company, the provisions of such schedule shall be considered as forming part of the agreement.

Provision is made for seniority rights and for the settling of disputes.

VANCOUVER, B.C.—SEVERAL WOODWORKING COMPANIES AND THE BRITISH COLUMBIA WOODWORKERS' UNION, LOCAL 2.

Agreement to be in effect from February 1, 1945, to February 1, 1946. The companies agree to recognize the union as the bargaining agency for all employees in accordance with the Wartime Labour Relations Regulations, P.C. 1003.

Hours: 8 per day, 44 per week. Overtime at the rate of time and one half and double time for work on Sundays and six specified statutory holidays and any other Dominion statutory holiday. Vacation of one week with pay after one year's service with the company.

Wage rates: saw filer-millwright, 97 cents per hour; benchmen, machinemen, 72 to 92 cents; stickermen, shapemen, lay out man, metal worker, 92 cents; door breakout man, 82 cents; sanderman, glazier, door clamp man, sash man, 77 cents; door patcher, 67 cents; glue men, 72 to 82 cents; helpers, 57 to 67 cents; and truck drivers 62½ to 67½ cents.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Metal Products

TORONTO, ONTARIO—ROGERS ELECTRONIC TUBES LIMITED AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 512.

Agreement to be in effect from July 20, 1944, to July 19, 1945, and thereafter from year to year subject to notice. The company recognizes the union as the sole and exclusive bargaining agency for all hourly-rated employees. Both the company and the union mutually agree that any eligible employee of the company may become a member of the union or refrain from becoming a member of the union. The company agrees that there will be no discrimination, interference, restraint or coercion because of union membership. The union likewise agrees that there will be no intimidation, interference, restraint or coercion against non-union workers and no union activity upon company property during working hours.

Hours of work: two shifts per day are worked; the first on a 6 day week basis, the second on a 5 day week basis, both shifts working a 44 hour week. Overtime at time and one half for all work in excess of the regular shifts and for work on seven specified statutory holi-

days. Vacation plan in effect to continue during life of agreement.

Wage rates for males: toolmakers \$1 to \$1.15 per hour, glass men 65 cents to \$1.10, machinists 70 cents to \$1; maintenance—electrician, carpenter, plumber, tinsmith 80 to 90 cents; fitter 80 to 90 cents; storekeeper, set-up men 60 to 80 cents, production worker 60 to 75 cents, packer 60 to 70 cents, unskilled help 50 cents at start, 60 cents after 12 weeks. Wage rates for females: start 40 cents per hour, after 12 weeks 46 to 70 cents according to job classification. Night shift receives 3 cents per hour above these rates for night work.

Provision is made for seniority rights and grievance procedure.

CALGARY, ALTA.—DOMINION BRIDGE COMPANY LTD. AND RIVERSIDE IRON WORKS LTD. AND THE INTERNATIONAL UNION OF MINE, MILL AND SMELTER WORKERS, LOCAL 800.

Agreement to be in effect from March 27, 1945, to March 26, 1946, and thereafter subject to two months notice. The companies recognize the union as the bargaining representatives for all eligible workers except moulders and core-makers, as long as the union retains its right to elect or appoint bargaining representatives for the employees. The companies also agree not to discriminate against employees because of union membership. The union agrees there shall be no discrimination by it or any of its members against any employee not a union member and also not to engage in union activity on the company's time.

Hours: 8 per day Monday to Friday, 4 on Saturday, a 44 hour week. Overtime at time and one half for the first four hours in excess of the regular shifts and double time thereafter and for work on Sundays and six specified statutory holidays. Vacation of one week with pay to all employees with a year's continuous service.

Wage rates: existing rates to continue under present Dominion Government Regulations.

Provision is made for seniority rights, ratio of apprentices and grievance procedure.

VICTORIA, B.C.—VICTORIA MACHINERY DEPOT COMPANY, LTD. AND THE INTERNATIONAL MOULDERS AND FOUNDRY WORKERS' UNION, LOCAL 144.

Agreement to be in effect from November 18, 1944, for the duration of the war. This agreement is similar to the one previously in effect and summarized in the *LABOUR GAZETTE*, April, 1943, p. 489, except that the agreement is now with the above union instead of Local 2 of the Moulders and Foundry Workers' Union.

Construction: Buildings and Structures

OTTAWA, ONTARIO—OTTAWA MASTER PLUMBERS' ASSOCIATION AND THE UNITED ASSOCIATION OF PLUMBERS AND STEAMFITTERS, LOCAL 71.

Agreement to be in effect from May 1, 1945, to April 30, 1946, and thereafter from year to year subject to 60 days notice. The members of the association agree that only members of the union will be employed, if available.

Hours: 8 per day, Monday through Friday, a 40 hour week. No one to be employed longer without the sanction of the Industrial Standards Board. Overtime is at the rate of time and one half until 12 midnight, from then to starting time at double time rate as well as for work on Sundays and eight specified statutory holidays. However in finishing up a repair

job on regular working days, if to finish will not take more than one hour, it will be done at the regular rate of wages.

Wage rates for journeymen plumbers and steamfitters: \$1.12 per hour; and the minimum rate for improvers will be two-thirds of the minimum rate of wages applicable to journeymen.

If it becomes necessary to work night work only or shift work on any job, same shall commence at the close of the regular working day and shall be paid for at the rate of eight hours' time for seven hours' work. No workman shall be allowed to work more than one shift in any day under this rule. Men working out of Ottawa shall have their fare and board paid; time travelling to and from work shall be paid at the rate of single time only up to 9 p.m. One junior mechanic only to be allowed on any job to each branch of the trade except where there are more than five journeymen plumbers or five journeymen steamfitters employed, when the following ratios will be allowed: two to six men, three to eleven men and four to sixteen men.

All apprentices shall be employed in accordance with Ontario Apprenticeship Act. Provision is made for grievance procedure.

Trade

TORONTO, ONTARIO—TWELVE DAIRY COMPANIES AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, WAREHOUSEMEN AND HELPERS OF AMERICA, LOCAL 647 (MILK-DRIVERS' AND DAIRY EMPLOYEES' UNION).

Agreement to be in effect from February 28, 1945, to February 28, 1946, and thereafter subject to 70 days' notice. All workers employed in or about a milk distributing plant or pasteurizing plant of the above firms are covered in this agreement. The employers agree to hire only unemployed members of the union in good standing, if competent and available. Any others must as a condition of employment join the union within 30 days and remain in good standing. The employers agree to discharge within seven days any employee expelled or suspended by the union, also to deduct all regular monthly union dues, when so authorized and if agreed to by all union members, and forward same to the union secretary.

Hours: six days to constitute a working week for all employees; for plant employees an 8 hour day and 48 hour week. No employee to work on his regular off day except in an emergency when he shall be paid at time and one half rate. Vacation of two weeks with pay to all employees after one year's service; employees are eligible for vacation after a six months period at the rate of one half day for each month worked.

Wage rates: inspector \$42 per week; route men \$32 per week plus commission; pasteurizer (certificate), receiver and grader, testing room, senior utility, and mechanics, \$35; storage room, bottle filler, bottle washer, checker and shipper, \$32; junior utility \$33; all others, \$28; temporary plant help 60 cents per hour. Allowance to be made daily, upon proper evidence being furnished, for all goods broken, stolen, spilled or soured. The companies also agree to assume the responsibility for the extension of all credits to the customers so that salesmen will not be held responsible for, nor be expected to pay for, bad debts or uncollectable accounts.

Collective Agreement Act, Quebec

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the extension of one new agreement, the repeal of one old agreement and the amendment of eight others, all of which are noted below. Requests for the amendment of the long-shoremens agreement (ocean navigation) for Quebec; for bakers, retail stores and hotels at Magog; and for the printing trades agreement at Montreal were published in the *Quebec Official Gazette*, March 24. A request for a new agreement for firefighters at Sherbrooke was gazetted March 24. Requests for the amendment of the bakers' and salesmen's agreement at Three Rivers, and for the amendment of the barbers' and hairdressers' agreement at St. Hyacinthe were gazetted March 31. A request for a new agreement for the passenger car and bus manufacturing plants of the Canadian Car and Foundry Company, Montreal, was gazetted April 7. A request for amendment of the agreement for retail food stores at Quebec was published April 7. Requests for the amendment of the retail food stores' agreement at Quebec, and for the barbers' and hairdressers' agreement at Quebec were published April 14. A request for a new agreement for retail merchants at Sherbrooke was gazetted April 14.

Manufacturing: Textiles and Clothing

DRESS MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated March 24, and gazetted March 31 amends the previous Orders in Council for this industry. (L.G., Oct., 1940, p. 1075, Nov., p. 1202; March 1942, p. 353; March, 1943, p. 340, June, p. 813; March, 1944, p. 359; April, 1945, p. 517) by providing that no home work shall be performed by anyone already employed in a manufacturing establishment or shop. Home work may be performed only with a special certificate obtained from the Provincial Government. All homeworkers shall be paid at a rate 10% higher than the daily, hourly or piece work rates paid in shops in the industry for similar operations. For homework thread and transportation, charges must be paid by the employer and all work must be delivered and collected by the employer or his agent.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated March 24, and gazetted March 31, extends the term of the agreement (L.G., February, 1945, p. 182; May, 1944, p. 637, Aug., p. 1007, Nov., p. 1368 and previous issues) to June 30, 1945.

Manufacturing: Metal Products

ALUMINUM INDUSTRY, ARVIDA.

An Order in Council, dated March 24, and gazetted March 31, repeals all Orders in Council for this industry, (L.G., Nov., 1937, p. 1272; July, 1939, p. 728, Oct., p. 1065; Jan. 1944, p. 70).

CLOCKMAKING INDUSTRY, MONTREAL.

An Order in Council dated April 6, and gazetted April 14, amends the previous Orders in Council for this industry (L.G., Nov. 1943, p. 1530; Aug., 1944, p. 1007, Dec., p. 1515). This amendment does not affect the summary already given.

Construction

BUILDING TRADES, SHERBROOKE.

An Order in Council, dated March 24, and gazetted March 31, amends the previous Orders in Council for this industry (L.G., Oct., 1942, p. 1209; Feb., 1943, p. 220, Aug., p. 1131; Nov., 1944, p. 1368) by the addition of the following wage schedule:

Trades	Hourly rates Zones			
	I	II	III	IV
Operators — stationary or portable electric machines and electric cranes and mixers...	\$0.60	\$0.55	\$0.50	\$0.45
Marble and terrazo lay- ers	0.60	0.55	0.50	0.45
Elevator operators	0.75	0.70	0.70	0.65
Blacksmiths	0.70	0.65	0.65	0.60
Firemen (mechanical shovels)	0.65	0.60	0.55	0.50
Water carriers	0.35	0.35	0.35	0.30
		per week		
Mechanical shovel oper- ators (48 hours)	45.00	45.00	40.00	40.00

All operations performed on the site of any structure involving the erection of structural steel, tanks, plate work, portable boilers to be remunerated at not less than \$1 in place of the former 87 cents per hour. The wage rate for installation of portable tanks and boilers under 2 tons is raised to 70 cents. Rates for installation of stokers in furnaces with a horizontal heating surface of twenty feet and less are increased to 80 cents per hour and 60 cents for their helpers with a 55 hour week. Other hourly wage rates: painters (structural iron) 85 cents; structural iron workers (all categories), boiler-makers, erectors and steam generator mechanics \$1; boilermakers' erectors' and steam generator mechanics' helpers 75 cents.

BUILDING TRADES, ST. JOHNS AND IBERVILLE.

An Order in Council, dated March 24, and gazetted March 31, amends the previous Orders in Council for this industry (L.G., Nov., 1938, p. 1299; Mar., 1940, p. 283; Mar., 1941, p. 334, Aug., p. 1011, Dec., p. 1490; Feb., 1943, p. 220; July, 1944, p. 867; Mar., 1945, p. 349).

Hourly wage rates: bricklayers, plasterers, masons, including cutters on the field, marble setters 78 cents; carpenters-joiners, erectors of screens (wood or metal), sashes, windows, steel partitions, joiners, concrete forms (shop or job), wood floor makers 70 cents; electricians, plumbers, steamfitters, and pipe mechanics, sheet metal workers and tile setters 73 cents; weather-strippers, enginemen (hoist), enginemen (steam mixer), lathers (wood or metal), junior journeymen plumbers, steamfitters and pipe mechanics, journeymen roofers (asbestos, slate, tile and composition), terrazzo layers 63 cents; enginemen (gasoline mixer), hod carriers, common workers, helpers for roofers, cement finishers 48 cents; compressor operators, terrazzo polishers (dry polishing) 58 cents; painters, sprayers, decorators, glaziers, paper hangers, floor varnishers 66 cents; maintenance men on oil burners, gasoline pumps 68 cents; apprentices for painter's, sprayer's, glazier's decorator's and paper hanger's trades from 30 to 50 cents after four years; apprentices for bricklayer's, mason's and plasterer's trades shall be determined according to a percentage of minimum rates of skilled workers, from 30 to 75 per cent after four years; painters (structural iron) 85 cents; boilermakers, erectors and steam generator mechanics, structural iron workers \$1; helpers 75 cents. For structural steel workers, and men installing portable boilers and tanks the rate is raised from 87 cents to \$1; for installing of portable tanks under two tons the rate is raised from 58 to 70 cents; for installation of stokers in furnaces with a horizontal heating surface of 20 feet the rates are changed from 70 and 47 cents, to 80 and 60 cents.

BUILDING TRADES, MONTREAL.

An Order in Council dated March 24, and gazetted March 31, extends the term of the agreement (L.G., March, 1944, p. 359, July, p. 868, Nov., p. 1369, Dec., p. 1515; Jan., 1945, p. 71) to June 30, 1945.

Another Order in Council, dated March 31, and gazetted April 7, increases the basic rate of wages by 1 cent per hour or by 35 cents per week, as the case may be, except for common labourers.

Service: Public Administration

POLICEMEN, SHEBROOKE.

An Order in Council, dated March 24, and gazetted April 7, makes obligatory the terms of a new agreement, between the City of Sherbrooke and L'Association des Policiers de Sherbrooke. Agreement to be in effect from April 7, 1945 to January 1, 1946 and thereafter from year to year until 60 days' notice.

Hours: constables work on the two shift system, the day shift from 7 a.m. to 6 p.m., and the night shift 6 p.m. to 7 a.m. with one day rest per week; secretaries from 8 to 5 during week days, 4 hours on Saturdays; photographers 8 to 6 p.m.; telephone operators 8 hours per day; private detectives available at any hour of the day or night. Overtime for constables and photographers is payable at 60 cents per hour.

Wages: captains from \$36 to \$40 per week after 5 years; sergeants from \$33 to \$35 after five years; constables from \$26 to \$31 after five years; painters \$34; secretary of station \$40; assistant-secretary \$31; sergeant-detective \$34; corporal-detective \$33; detective \$32; photographer \$26; fingerprint expert \$33; telephone operators \$26 and \$27. Vacation: twelve days with pay every year for secretaries; one week for telephone operators after one year's service. Provisions are made for uniforms and equipment and sick leave for constables.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, MONTREAL.

An Order in Council, dated April 6, and gazetted April 14, amends the previous Orders in Council for this industry (L.G., Oct., 1941, p. 1315, Dec., p. 1573; July, 1942, p. 857; Nov., 1943, p. 1530; May, 1944, p. 637).

Hours on Saturday and eves of holidays are reduced by one hour.

Wages: journeymen barber-hairdressers \$19 per week plus 50 per cent of receipts in excess of \$27.50; occasional journeymen barber-hairdressers 35 cents per hour plus 10 per cent of receipts of his work to \$27 per week. When receipts exceed \$27 he is paid regular journeymen rates. Scale of minimum prices is changed. Apprenticeship regulations are changed. Vacation: one week with pay after one year's service.

Canadian Vocational Training

DURING the past month three new features of training have been added to the responsibility of the Department. These are:

1. Training of social welfare aids. The Department of National Defence requested the Department of Labour, through Canadian Vocational Training, to assist in carrying on and financing special courses to train social welfare aids whose services would be used by private agencies making inquiries and investigations for war departments of the Dominion Government.

Consequently, three to four months' courses will be given in recognized schools of social work at Halifax, Quebec, Montreal (2), Toronto, Winnipeg and Vancouver. The course will consist of a combination of class-room and field work under proper supervision. Trainees are selected at each centre by a committee made up of representatives of the school, private Social Service Agencies and Dominion Government. It is possible that credit for attendance at these courses might be given by the schools to those who subsequently wish to enter regular diploma courses at the school.

2. Order in Council P.C. 1388 (L.G., April, 1945, p. 527) authorizes agreements with the provinces, through Canadian Vocational Training, to provide vocational training for persons referred by the Employment Service of the Unemployment Insurance Commission. This is for any person over 16 years of age who may require either full-time or part-time training to maintain employment as a result of discontinuance or conversion of war industries to peace time requirements. It will not, in any way, interfere with the rehabilitation training program now in operation. If facilities should be limited here and there, the ex-service people will have priority. Under the Unemployment Insurance Commission Act, provision is made for the withholding of benefits if the applicant refuses to undergo a course of training to which he or she is directed by the Commission where such training is an evident need leading to employment. This plan potentially covers all war workers whether or not receiving insurance benefit, because, in some cases, it may well develop that the training period will exceed the applicant's Unemployment Insurance benefits.

3. Order in Council P.C. 1648 (L.G., April, 1945, p. 526), provides for agreements with the governments of the provinces under which a

total sum up to two million dollars per year for a ten-year period may be paid to the provinces to assist in operating plans for vocational training at high-school level. An additional sum up to ten million dollars is also provided to assist the provinces in capital expenditures to equip vocational school facilities and to provide additional facilities for training purposes, provided this sum is spent during the next three years.

In all plans full recognition is given to the fact that education, vocational or academic, is definitely within provincial jurisdiction and that jurisdiction will be fully respected. Dominion assistance is provided to assist the provinces in carrying out their obligations.

Both these Orders in Council relate to the permanent provision, through the provinces, of the additional facilities Canada will require in the post-war period. They should permit a broadening of the types of courses to be provided, leading to employment, and should very definitely assist in the transition from war to peace.

Enrolment

From its inception up to March 31, 1945, the gross enrolment under Canadian Vocational Training has been as follows:

Training for Industry.....	258,635
Army Tradesmen.....	47,804
Navy Tradesmen.....	8,932
R.C.A.F. Tradesmen.....	65,204
Rehabilitation (discharged persons from the Forces).....	9,032
Students	7,649

Total 397,256

Supervisory Training

Ever widening interest in the Department's Supervisory Training Program prompts a brief restatement of the fact that assistance is available to all war and essential civilian industries in helping to train their supervisory staffs in those qualities that lead to a better utilization of the manpower, materials or equipment available.

One of the first essentials in building organization efficiency is to improve the training of supervisors. Trained supervisors who understand their responsibilities and possess skill necessary to the job of supervision are needed to-day as never before.

Job Instruction Training

Instruction of employees in their duties is a normal part of the supervisor's daily work. The time necessary for employees to learn new jobs and to get accustomed to new situations can be greatly shortened by the supervisor who has skill in the art of instructing. Job Instruction Training covers two principal phases of instruction:

1. Preliminary instruction for instructor—analysing the job to determine what it is that the worker is expected to learn, what skills he must master, what he must learn first, and how soon the instruction can be completed.

2. The actual instruction of the employee—making the learner receptive to presented instruction, trying out his performance, checking his understanding and ability, and following up to check results after he has worked at the new job.

Job Methods Training

Every supervisor should have the ability to examine present methods in his department and work out better ones. Part of his management job is to help simplify operations, help eliminate red tape, and get out more work with the available manpower, materials, and equipment, without "driving" his staff. Job Methods Training was developed to meet the needs of supervisors for a simple, practical method of improving jobs, to give them a plan they can apply to their daily work. Its integration of man power, materials, and machines is common to all jobs and the pro-

gram has been found readily adaptable to particular conditions.

Job Methods does not make methods engineers, nor does it intend to do so. But it does put into the supervisor's hands plan which will enable him to examine operations, and to work out improvements logically and effectively.

Job Methods Training can be synchronized with employees suggestions systems and with planning and procedure units. It will help stimulate a flow of suggestions, ideas, and new and better ways of doing jobs.

Job Relations Training

Employees are "people" and they respond as people to the judgment of the supervisor. Therefore, each supervisor should develop skill in dealing with people—learn to treat them as individuals. This skill is vital to good supervision, for every act and decision of the supervisor has a bearing on the attitude and morale of employees.

Job Relations Training covers two phases of this "human element" problem. The first covers the general principles of dealing with all employees—the foundation of good relations. The second phase deals with the conducting and handling of individual reactions, emotions, backgrounds, attitudes and abilities. With this training supervisors can develop, on the job, their own ability in dealing with the human factors involved in supervision.

(1) Trainees in Part-Time Classes consist largely of employed persons who are being given training at the request of employers in war production, who wish to up-grade their employees.

(2) Includes those graduates who, though actually placed prior to March 31, 1945 were not so reported until after March 1, 1945.

(1) Includes graduates from previous month's classes who were not reported placed until after March 1, 1945.

Royal Commission on Services' Trades

Establishment of a Royal Commission to investigate and report on possible arrangements with the provinces, employers and trade unions to make full use of trade training received by men and women while in the Armed Forces, was announced on April 16 by Hon. Humphrey Mitchell, Minister of Labour.

Colonel Wilfrid Bovey, Chairman, Committee on Education, Canadian Legion, B.E.S.L., Montreal, will act as Chairman of the Commission. Other persons asked to become members are D. S. Lyons, General Vice-President, International Association of Machinists, Montreal; F. S. Rutherford, Director of Vocational Education, Toronto; J. C. G. Herwig, General Secretary, Canadian Legion, Ottawa; F. S. Smelts, Regional Director of National Selective Service, Vancouver; and Hector Dupuis, Regional Director of National Selective Service, Montreal.

The Order in Council appointing the Commission, passed on the recommendation of the Minister of Labour with the concurrence of Hon. Ian A. Mackenzie, Minister of Veterans Affairs, sets forth the responsibilities as follows:

to examine into the problems involved and appropriate measures which may be taken to enable members of the Armed Forces to obtain appropriate credit in re-entering civilian occupations upon discharge, for trades, technical or other educational training or experience gained while in the Armed Forces and to report to the Minister of Labour thereon together with their recommendations as to what measures are advisable and appropriate

in co-operation with the provinces, employers, or trade and labour organizations or otherwise to this end.

The Commission has been given the usual powers and authority of a Royal Commission under the Enquiries Act.

Commenting upon the Commission, the Minister of Labour said: "Due to the highly specialized duties of the Armed Services in this mechanized war, a great deal of trade and vocational training has been acquired by the men and women in the Forces. It would be a definite loss to Canada and to Canadian industry, and in many cases a tragedy to the individual, if upon re-entering industry proper account were not taken of this vocational training while with the Armed Forces. However, a large job of co-relation is necessary to tie in the Services' training with civilian industry and occupation. Standards have to be established to show the correspondence of the one with the other. Industry has to be acquainted with what the discharges have really learned. Trade union practices must be considered.

"The Government believes", Mr. Mitchell said, "that the Commission now established faces a task which is a very important part of re-establishment and rehabilitation."

The Minister also indicated that the co-operation of provincial authorities will be sought, especially in connection with credits for training in the Armed Services toward any trades or occupations which require a provincial licence on the part of the worker.

Vocational Training for Foremen

In an address given recently before the Woodlands Section of the Canadian Pulp and Paper Association, Mr. J. H. Doige, Assistant Director of Vocational Training, stated that there is a growing demand from industrialists for the setting up of training classes in industrial management and foremanship.

"During the past two and a half or three years some 70,000 foremen and supervisors have been helped, and, consequently, their employers, by the training program sponsored through Canadian Vocational Training," Mr. Doige said.

He continued: "We realize that university men, or technical college graduates, have not a monopoly of brains, vision, ideas and ability, and the incentive must not be removed for men who show they possess qualities of leadership and judgment, even though circumstances may have withheld fundamental educational qualifications. It is unlikely that promotion to places of responsibility will ever be confined to the graduate, but it is increasingly evident that the opportunities of promo-

tions for the unqualified man are growing considerably fewer.

"The qualities which go even further than technical ability are a willingness to co-operate, personality and ready adaptability. Failure to appreciate such attributes means the failure of many other very able technically qualified men and this particularly applies to university graduates. The potential power for progress in their possession of a suitable education in fundamentals is often obstructed by their being insensible to the problems of human relationship. I venture to say that the main contributing factor to this seems to be a lack of discipline in university life, and this might include personal discipline. The major troubles experienced with graduates on the job are those relative to lack of observation of discipline, with an underlying degree of thoughtlessness, and are very seldom due to lack of technical knowledge. In contrast to this, the technical trainee, or trade apprentice, faces adversity early in his training and soon acquires balance in association with older men and becomes plant wise and very useful."

Choosing Jobs for Juveniles in Industry

Advisory Standards of U.S. Department of Labour

ADVISORY standards, prepared by the Children's Bureau of the U.S. Department of Labor, for the protection of young workers during the war have recently been issued for the pulp and paper, textile and railroad industries. Foundries are covered in a leaflet published in March. These standards, which serve as a guide to employers in placing 16- and 17-year-olds in war jobs, indicate what jobs are suitable and those which are too hazardous for young workers. Leaflet No. 1 of the series outlining the purpose of the standards and leaflets Nos. 2 to 8, setting out standards for shipbuilding, lead-using industries, industries using carbon disulphide and chlorinated solvents for welding, metal-working machines and the aircraft industry, were summarized in an earlier issue of the *LABOUR GAZETTE* (Jan. 1944, p. 22).

Pulp and Paper

Recommended standards issued in October, 1944, relate to the manufacture of pulp, paper and paper board where formerly only adults were employed.

Exposure to severe hazards may be prevented by prohibiting employment inside, on, or around tanks, vats, pits, boilers and cisterns, in excavations of too great depth, in the machine shop and millwright department, about the log pond and on pole or line work, around open gears, sprockets, chains, belts, pulleys, etc., unguarded mechanically operated knives, saws, splitters and wood-preparing machinery, excessive pressure mechanism, unguarded cutting and trimming edges and nips of any kind.

Work involving repairs or maintenance of electrical apparatus, construction of and work on stagings, mechanical unloading of coal, cleaning or oiling machinery while in motion, handling poisonous gases and corrosive substances, and work in connection with cooking processes for waste paper, chips or rags, is also considered too hazardous for the safe employment of teen-aged workers. No minor should be permitted to operate elevators, stitching, cutting or punching machines, spray guns, abrasive wheels, parchmentizing machines or power-driven cranes, hoists, lifts or electric trucks.

Jobs considered relatively safe for young workers are those in the wood-storage yard, wood-room, ground-wood mill, chemical pulp-

mill, waste paper recovery department, beater, machine and finishing rooms, storage and shipping division and in the laboratory.

Textile Industries

Standards for the textile industries were issued in December, 1944. While work in these industries is not generally considered hazardous, some in mills which perform one or more of the processes involved in the converting of cotton or wool into yarns or fabrics and rayon yarns into fabrics, are too dangerous for 16- and 17-year-old workers.

In a table appended to the leaflet jobs listed as too hazardous for young workers are all operations connected with napping, wet finishing, printing and folding, all work in the opening, picker and carding rooms, and the handling of bales, oil drums, buggies, barrels and heavy cases or operating elevators, baling equipment or mechanical lifting devices in the receiving and stock rooms. All work, such as shearing and brushing operations in which a guillotine cutter is used and the installing and repairing of machinery, oiling or cleaning of machinery in motion, is equally hazardous.

Operating or assisting in the operation of cleaning and baling equipment and work in connection with carbonizing and drying should be forbidden. No minor may be safely employed in work which requires loading and unloading in the operation of drawing-in and tying-in or heavy lifting in the mending and cloth-baling departments.

Safe jobs include light work in the receiving and stock rooms, laboratory and inspection work in the dyeing and finishing plants and all work in connection with the operations of drawing, roving, knitting, sewing, boarding, sweeping, scrubbing and running. Work not requiring heavy lifting or strenuous physical exertion may be done by juveniles in mending operations and in the storage and shipping departments.

In the combing and spinning departments, work which young workers may perform safely is confined to bringing in and removing laps and cans, doffing in spinning-mule operations and all work in other spinning operations.

Railroad Industry

Standards issued in December, 1944, for the railroad industry where "traditionally only adults have been employed" recommend the

restriction of the employment of 16- and 17-year-old workers to certain types of work not involving too much responsibility and therefore less hazardous. Employers are also reminded of child-labour laws which, in 21 States set a minimum age of 16 or 18 for employment in certain hazardous railroad occupations.

Where young workers on railroads are obliged to live in work camps, the Children's Bureau recommends that properly supervised living quarters be provided separate from the living quarters of the older employees and that their leisure-time activities be directed by camp counsellors.

All work concerned with the actual operation of trains, such as firemen, trainmen and yardmen is too hazardous for young workers, since it involves not only the danger of injury to themselves but the safety of others.

Juveniles of 16 and 17 may be employed with relative safety in stenographic and clerical jobs, in general work as messengers janitors and cleaners, telegraph and telephone switchboard operators, stablemen and ticket collectors on ferries, or maintenance of ways as carpenter helpers, painters and painter helpers (except on bridges and scaffolds), extra gang men, labourers, (except track and roadway), gardeners and farmers, section men (except in railroad yards or where traffic is heavy) and in the maintenance of equipment and stores.

They may also be safely employed as assistants in baggage and parcel rooms, station attendants, waiters, camp cooks, kitchen helpers, callers, loaders, scalers, sealers and perishable freight inspectors, train attendants and hand truckers.

The employment of girls of 16 and 17 on railroads should be limited to office work, stock clerks and messenger service.

Foundries

Standards for foundries were issued in March, 1945. As castings and forgings are used in products representing more than 50 per cent of the United States entire war output, boys of 16 and 17 have had to be employed. Their physical immaturity, and lack of experience and judgment has created a serious safety problem.

Some foundry work is dangerous to any worker while other types are dangerous merely to young workers. Control of hazards involves the elimination of dust and fumes, guarding of machinery, good housekeeping, and the use of personal safety equipment. Unless hazards, including those arising from dust and fumes, can be controlled, minors of 16 and 17 should not be employed in any foundry work. Even when there are adequate controls, minors should be employed only in the least hazardous jobs such as mixing sand by hand, light machine and bench work, painting, sorting and weighing light castings, bench and hand patternmaking or as attendants, clerks, timekeepers, etc. When heavy lifting occurs in jobs considered relatively safe, extreme care should be taken to see that young people are not permitted to do too strenuous work.

Unsuitable or too hazardous jobs include machine milling, mulling and cutting, operating moulding machines, floor and pit moulding on large work, floor coremaking on heavy cores and tending core ovens, furnace charging or repairing, pouring metal operations, operating power-driven equipment, bricklaying, conveyer operating, and the work of an electrician.

Activities of Unemployment Insurance Commission

Analysis of Statistics—Insurance Registrations—Benefit for Persons Undertaking Training—The Fund

A total of 13,307 claims for Unemployment Insurance benefit was registered in local offices of the Unemployment Insurance Commission throughout Canada in March. This compares with 14,990 claims in February, 1945 and 10,667 in March, 1944.*

During the last six working days of March 27,110 persons (19,727 males and 7,383 females) signed the live unemployment register in the offices of the Unemployment Insurance Commission. The number who signed the live unemployment register during the last six working days of February was 29,692 (21,706 males and 7,986 females) and in the last week of March, 1944, it was 16,406 (13,671 males and 2,735 females). Those who sign the live unemployment register each week are claimants in that week and previous claimants who are reporting days of unemployment during the week.

Claims adjudicated at insurance offices during March totalled 15,188, of which 12,457 were considered entitled to benefit and 2,731 considered not entitled to benefit.

The chief reasons assigned for non-entitlement to benefit were "voluntarily left employment without just cause" (1,046 cases), "insufficient contributions while in insurable employment" (1,025 cases) and "discharged for misconduct" (334 cases).

During March, as indicated by Table 5, 32,153 persons who received one or more benefit payments were paid a total of \$1,523,429 for 783,399 compensated days of unemployment. This may be compared with 23,062 persons who were paid \$822,490 for 422,873 days in February and 16,679 persons paid \$755,966 for 388,544 days in March, 1944. In order to maintain continuity and comparability between the monthly periods covered by these reports, arrangements have been made to obtain, in future years, the data for the periods February 21 to March 20 and March 21 to March 31.

The average duration of the unemployment compensated in the period covered by the March figures was 24.4 days compared with 18.3 days in February and 23.3 days in March, 1944. The average amount paid per beneficiary was \$47.38 in March as against \$35.66 in

February and \$45.32 in March last year and the average amount of benefit paid per compensated day of unemployment was \$1.94 in March, \$1.95 in February and \$1.95 in March, 1944.

Higher Payments to Unemployed Persons Undertaking Training

Under the Unemployment Insurance Act, an insured person claiming benefit may be directed by the Commission to take a course of training. A policy intended to provide a greater inducement for individuals to take such training is outlined in the White Paper, *Employment and Income*, recently issued by the Minister of Reconstruction, Hon. C. D. Howe. The Paper states that the Government proposes to provide for payments during such approved training at higher rates than those paid as unemployment insurance benefits.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at March 31, 1945, 3,090,792 employees were issued with Insurance books and had made contributions to the fund at one time or another, since April 1, 1944, an increase of 48,093 since February 28, 1945.

As at March 31, 1945, 146,783 employers were registered as having insurable employees, an increase of 1,474 from February 28, 1945.

Registrations as at March 31, 1945, by regions follows:

TABLE 1—REGISTRATIONS AS AT MARCH 31, 1945

Region	Employers Registered (Live File)	Insured Persons Registered
Maritimes	11,691	229,422
Quebec	41,279	940,862
Ontario	52,743	1,206,188

Total for Canada..	146,783	3,090,792

Unemployment Insurance Fund as at March 31, 1945

In March benefit payments for the month passed the million dollar mark for the first time since the Unemployment Insurance Act

* Material in this section is supplied by Unemployment Insurance Commission and Dominion Bureau of Statistics.

came into effect. The new high figure was \$1,226,536.48, representing an increase of 49.4 per cent over the previous high of \$821,052.62 which was established in February. The new high figure for benefit payments in March showed an increase of 62.7 per cent over the amount of benefit payments made in the corresponding month of 1944.

The combined employer-employee contributions for March amounting to \$5,818,040.05 were 10.9 per cent above the average for the

previous eleven months due to the fact that employers were required to turn in the insurance books of their employees for renewal at the end of the month and all contributions had to be brought up to date. However, the employer-employee contributions for March this year were 5.8 per cent below the same figure for March last year.

After deducting benefit payments the net increase to the fund during March was \$6,205,377.83.

* With reference to the March totals it should be borne in mind that, for months other than March it is the practice in the Treasury offices to close the books at the 20th of each month in order to achieve a monthly balance in Ottawa by the end of the month. In these months, the monthly figures on number of beneficiaries, number of days paid and amount of benefit paid actually apply, therefore, to a period extending from the 21st of one month to the 20th of the following month. However, as March 31st, is the end of the fiscal year, the period covered in Table 5 of the present report is from February 21st to March 31st, so as to obtain total payments during the fiscal year.

Digest of Selected Decisions of Canadian Umpire Under Unemployment Insurance Act

THE Unemployment Insurance Commission submits the following digest of selected decisions of appeals heard by the Canadian Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are a continuation of the series commenced in the April issue of the *LABOUR GAZETTE*, page 534. They are selected on the basis of their possible precedent value for the determination of questions which may from time to time confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike, brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

As announced in the April issue, the selected decisions will be published in two series: (1) Benefit cases will be numbered, CU-B and (2) Coverage cases will be designated, CU-C.

Case No CU-B 19

(November 29, 1944)

Where a claimant can reasonably expect the opportunity of obtaining a promotion or an increase in pay in her employment, HELD: That the claimant is not justified in leaving her employment voluntarily, as a desire for an increase in remuneration and for a promotion is not alone sufficient to establish just cause for leaving one's employment.

The material facts of the case are as follows:--

The claimant, a single woman, aged 25 years, was employed as a typist by a trust company, from December, 1941 to August 7, 1944, when she resigned, giving as her reason for separation that she had worked for this firm for over two years and was receiving \$60.00 a month and could not get a raise.

On reviewing the claim for benefit the Insurance Officer disallowed the claim and disqualified the claimant for a period of six weeks from August 8 to September 18, 1944, in accordance with paragraph (c) of Section 43 of the Act, because she had voluntarily left her employment without just cause.

The claimant appealed to the Court of Referees from the decision of the Insurance Officer and stated that she could not continue to work in that position knowing that there was no future either in promotion or in increase in pay and she felt justified in leaving to seek a better opening elsewhere. The claimant was given an oral hearing by the

Court of Referees which allowed her claim. The Court of Referees was of the opinion that there was no future either in promotion or in increase in pay and that she was justified in quitting with a view to obtaining other employment.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees. This appeal was considered without an oral hearing, no application having been made therefor.

DECISION

The Umpire's decision was that the claim should be disallowed and the disqualification remain in force and gave as his reasons that:

The facts show that the claimant commenced with the trust company at \$40.00 a month. Some time later, she was raised to \$50.00 a month and a year later was raised to \$60.00 a month, which she was receiving at the time of her resignation. It was also disclosed that other typists with the same employer were earning a higher rate of remuneration.

The evidence as to the increases in remuneration already received by the claimant and the fact that she was apparently not at the top of the range of wage rates for her classification would not support the conclusion that she had no future either in promotion or increase in pay. In any event, a desire for increase in remuneration and desire for promotion are not alone sufficient to establish just cause. The claimant must also show that some attempt had been made to find other employment and that there was reasonable prospect of obtaining that other employment. That is not shown in this case.

Case No. CU-B 24

(January 18, 1945)

Where a young married woman, without children and without any special domestic responsibilities, holds herself available only for a five-hour "Victory" shift, a very unusual period of employment no longer in existence in her district, and refuses an offer of full-time employment, which is suitable in her case, HELD: That the claimant had so limited her sphere of availability as to render herself, for all practical purposes, not available for work and was not justified in refusing the offer of full-time suitable employment.

The material facts of the case are as follows:

The claimant, a married woman, without children, aged 26 years, filed an Initial Claim for Benefit on January 26, 1944. She worked

in the assembly line in a munitions plant from November 11, 1940 to January 12, 1944. She was hired and worked as a full time employee until she married, and then from July 19, 1943 she worked on what is known as the "Victory Shift", involving only five hours' work daily. Her Initial Claim for benefit was allowed, since she was laid off because of a shortage of work.

On June 14, 1944, after she had been continuously unemployed since filing her claim and had drawn 110 days' benefit, she was offered work with the same employer, not on the "Victory Shift" but on a regular daytime shift involving a nine-hour working day. The claimant refused to accept this work and her reason for refusal is set out in the following statement:

"My husband is on shift work and it is necessary for me to be at home to get his meals. It would be quite impossible for me to take full time work because of this but I am available for victory shift work only. I worked at this place for about 3 years and was on full time till I married, July, 1943. After that I worked on a victory shift until laid off January, 1944. The job offered me at my old employer's was full time on straight days and I understand there are no openings for victory shift workers at present."

The Insurance Officer held that the claimant had refused an offer of suitable employment without good cause and disqualified her from receipt of benefit for a period of six weeks from the date of her refusal.

From this Decision the claimant appealed to a Court of Referees and in support of her appeal submitted the following further statement:

"That I do not feel that the employment offered me was suitable."

Further particulars of the work offered the Claimant appear in the following letter sent by the Manager of the Local Office:

"The claimant was referred to a job on June 14th, which was steady work from 7 A.M. to 5 P.M. She would have had one hour off at noon. She lives approximately 15 minutes walk from the plant. As the job offered her is at the same place as she had worked approximately 3 years, we did not feel that the matter of distance from the job would enter into the matter."

The Court of Referees gave the claimant an oral hearing. The Court unanimously found that "in refusing work other than the five hour victory shift or similar work, the claimant did not thereby render herself not available for work, and that the work offered to her was unsuitable and such as she was justified in refusing".

The Insurance Officer appealed the Decision of the Court of Referees to the Umpire.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons that:

The claimant takes the position that the work offered was unsuitable on account of her domestic responsibilities.

Work on a five-hour shift, which is the only work she is willing to accept, has not been, since she left her employment, available for women workers and there is no prospect of finding such work in that city.

In refusing any work except on a five-hour shift, which is a very unusual period of employment, the claimant had so limited her sphere of availability as to render herself, for all practical purposes, not available for work.

Moreover, the work which was offered is suitable and the claimant, under the circumstances, was not justified in refusing it.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment and unemployment across Canada.

The employment situation at the beginning of March, 1945, as reported by employers.—Employment in the Dominion showed a further contraction at March 1, in a seasonal movement which was of somewhat greater-than-average proportions, according to the Dominion Bureau of Statistics.

The index number of employment declined from 178·9 at the beginning of February to 178·2 at March 1, as compared with 181·7 at March 1, 1944.

Average weekly per capita earnings reached a new high of \$32.82 at March 1, 1945, as compared with \$32.15 at the beginning of February. The average at March 1, 1944 was \$32.27.

The Bureau's reports come from firms employing fifteen or more employees representing practically all industries except agriculture, fishing, hunting, and highly specialized business operations. Reports at March 1 came from 15,129 establishments in the eight leading industries. These, together with data from financial institutions, indicated that the number of persons in recorded employment was 1,813,991, as compared with 1,821,965 at the beginning of December, 1944.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit declined somewhat during March, the number being 13,307 as compared with 14,990 in February. There was, however, an increase of 2,640 as compared with March, 1944.

Report on employment conditions, April, 1945.—There was a sharp rise in the manpower requirements of Canadian industry during the past month. On the other hand, the supply of workers available decreased considerably. The labour demand in industries exclusive of agriculture, as reported by Employment and Selective Service Offices at April 19, 1945, totalled 147,185. This was an

increase of 42 per cent over labour requirements one month earlier. Labour supply, as indicated by the number of applicants registered at employment offices but not yet referred to jobs, amounted to 47,227 at April 20, 1945, which was less than one-third the number of workers required at that date.

Applications for employment: vacancies, and placements, March, 1945.—Reports received from the Employment and Selective Service Offices during the four-week period March 2 to March 29, 1945, showed slight decreases in the average daily placements, both when compared with those of the four weeks ending March 1, 1945, and the period March 3 to March 30, 1944. Under the first comparison, except for fairly substantial declines in manufacturing and forestry and logging and moderate increases in trade, construction and services, all changes were slight. In the second instance the decrease in manufacturing was most perceptible as the declines in logging; and increases in trade, construction, services and public utilities were moderate. Vacancies during the four-week period numbered 197,221. There were 169,305 applications for employment and 116,653 placements were effected in regular and casual employment.

Unemployment in trade unions.—The percentage of unemployment among trade union members increased fractionally during the quarter ending March 31, though remaining less than one per cent. At the beginning of January the figure was 0·6 per cent while at March 31, 1945, it was 0·7 per cent.

The March, 1945, figure was based on returns from 2,337 local labour organizations, having a total membership of 421,779 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution made by the Research and Statistics Branch of the Department of Labour indicates that at October 1, 1944, 4,318,000 persons 14 years of age and over, were gainfully occupied, of whom 3,293,000 were in non-agricultural industry, including 994,000 in war industry. In addition there were 777,000 persons in the Armed Forces.

The Employment Situation at the Beginning of March, 1945, as Reported by Employers

EMPLOYMENT in the Dominion as a whole showed a further contraction at March 1, in a seasonal movement which was of somewhat greater-than-average proportions according to the experience of the period, 1921-1944; the loss, however, was smaller than that at March 1 of last winter. The 15,129 establishments co-operating in the Dominion Bureau of Statistics' latest survey of employment and payrolls reported a combined working force of 1,813,991 men and women. As compared with 1,821,965 at February 1, there was a reduction of 7,974 persons or 0.4 per cent. On the other hand, the weekly salaries and wages paid at the date under review showed an advance, standing at \$59,528,406, as compared with the aggregate of \$58,581,035 disbursed by the same firms at the beginning of February.

The moderate recession in industrial activity lowered the index of employment, on the 1926 base, from 178.9 at February 1, to 178.2 at the date under review, as compared with 181.7 at March 1 of last year. Since the falling-off was rather above normal for the beginning of March in earlier years, the seasonally-corrected figure was also lowered, falling from 185.9 at February 1, to 185.7 at March 1.

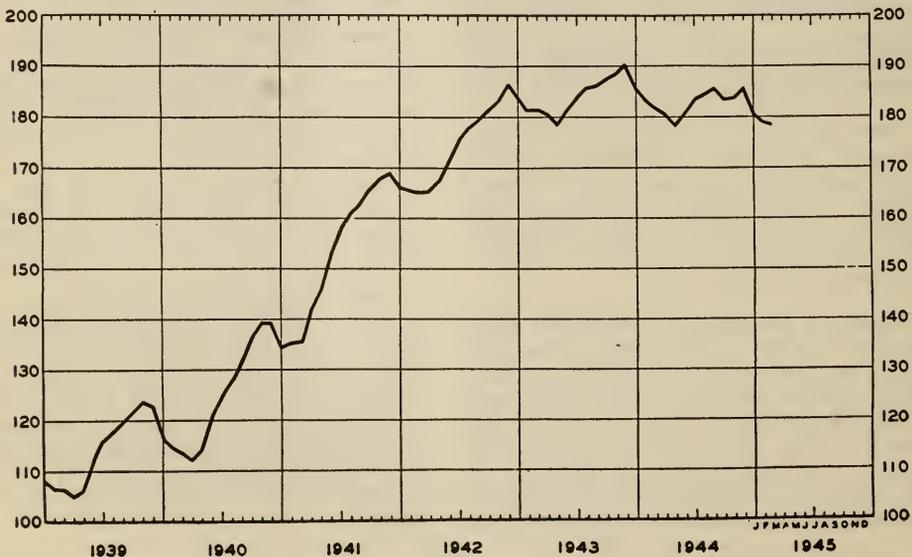

There was a contra-seasonal recession in employment in manufacturing at the date under review, repeating the experience at the beginning of March in 1944; these are the only two years in the record in which the trend at March 1 has been downward. The loss was not on a large scale, some 3,300 persons have been laid off since February 1. Of these, nearly 2,700 were released by animal food factories, in which employment was seasonally inactive; however, the contraction was greater than usual. Among the non-manufacturing classes, logging, mining, transportation, construction and maintenance and trade reported curtailment, also mainly of a seasonal character. The largest losses were in retail trade and highway construction, in which they approximated 3,500 and 2,300 workers, respectively. The former decrease was about normal in extent, while that in construction as a whole was not equal to the average reduction in preceding years. In communications and services, moderate increases in employment were noted at the date under review.

Payrolls

As already stated, the weekly payrolls reported at March 1 by the firms furnishing

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

statistics aggregated \$59,528,406, as compared with \$58,581,035 distributed on or about February 1. The gain amounted to \$947,371, or 1.6 per cent. The average earnings of the typical individual in recorded employment reached a new high, standing at \$32.82, as compared with \$32.15 at February 1. The previous maximum was the mean of \$32.37 at April 1, 1944. At March 1, 1944, the figure had been \$32.27; that at March 1, 1943, was \$30.72, while in 1942 the per capita at March 1 was \$27.92.

The latest survey shows that, when the statistics for financial institutions are included, the total number of persons in recorded employment was 1,880,646, as compared with 1,888,574 at February 1. The salaries and wages paid in weekly payrolls to these employees were given as \$61,718,771, as compared with \$60,767,946 disbursed at February 1. The per capita earnings in the nine main indus-

tries, including finance, were also \$32.82, as compared with \$32.18 at the beginning of February, and \$32.26 at March 1, 1944.

Table II summarizes the latest statistics of employment and payrolls for the main industrial groups, the provinces and economic areas, and the leading industrial cities, and gives comparisons as at February 1, 1945, and March 1, 1944, when available. Table I gives a monthly record for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period since 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926 = 100, to June 1, 1941, as 100. Table I indicates that during the period of observation, there has

TABLE I—INDEX NUMBERS OF EMPLOYMENT AND PAYROLLS. BASED ON JUNE 1, 1941=100, TOGETHER WITH PER CAPITA WEEKLY EARNINGS

¹This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

been a general increase of 16.7 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the aggregate weekly earnings of these workers have risen by 48.8 per cent; including finance, the gain in employment from June 1, 1941, to March 1, 1945, amounted to 16.5 per cent, and that in payrolls, to 47.9 per cent. The explanation previously given for the greater rise in the salaries and wages than in employment may again be stated: (1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their absorption into the basic wage rates as from February 15, 1944, (3) the progressive up-grading of employees as they gain experience in their work, and (4) the payment of higher wage-rates in a number of cases.

Chiefly as a result of wartime demand for manufactured commodities, the growth in employment and payrolls in factories in the period of observation has been greater than

that in the non-manufacturing industries. The index of employment in manufacturing has risen by 27.6 per cent from June 1, 1941, and that of payrolls has advanced by 64.7 per cent; these increases considerably exceed those given in the preceding paragraph for the eight and the nine leading industries. The factors given above as influencing the all-industries' trends operate with greater force in the case of manufacturing.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime will also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used. The degree of skill generally required of workers in the industry is obviously also an extremely important factor.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions, April, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

MANPOWER requirements in Canadian industry have increased considerably during the past month, thus maintaining the trend which has been sharply upward since the winter seasonal low point in demand was reached at the end of February. Thousands of agricultural workers who had taken off-season employment in other essential industries are now returning to the farms and this is reflected in the increasing demand for workers in these industries. There was a net labour demand¹ for 147,185 workers (106,391 men and 40,794 women) at April 19 in industries exclusive of agriculture. Labour requirements at this date were 42 per cent higher than at March 22, one month earlier, and 13 per cent higher than at April 20, the corres-

¹ *Net Labour Demand* is calculated by deducting unconfirmed referrals from unfilled vacancies. *Unfilled Vacancies* are the number of unfilled jobs on file in employment offices as at the date indicated. *Unconfirmed Referrals* are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

ponding reporting date in 1944 when there was a shortage of 130,858 workers. The sharp rise in demand during the past month can be largely attributed to the necessity of finding replacements for the agricultural workers released from other essential industries, and to the increased seasonal activities in construction, transportation and other industries. Male demand showed a rise of almost 50 per cent during the past month, as requirements, especially in heavy industry, became more urgent. The need for women workers increased by 24 per cent during this same period. This marked increase in labour demand was apparent in all industries. Table I shows net labour demand by main industry group and by sex, as at April 19, with absolute and percentage change in total demand during the past month.

To offset the rising demand there were 47,227 unrefereed applicants² reported by Local Employment and Selective Service Offices throughout Canada at April 20. This was fewer by 7,254 than the number of applicants awaiting referral at March 22. The supply of workers available at April 20 was distributed as follows: 28 per cent in the skilled and semi-skilled group, 38 per cent in the unskilled group, and the remaining 34 per cent in other groups, including clerical, sales, and service workers. Table II shows labour demand and supply by main occupational groups and by sex, as at April 20, 1945.

² Applicants who have not been referred to jobs as at the date indicated.

Net Labour Demand in A and B Priority Industries

Labour requirements in high priority industry showed a marked increase during the month, which can be largely attributed to the release of many farmers from war and other essential industries. At April 19, the need for 84,948 workers in high priority industries (exclusive of logging and agriculture) was 42 per cent higher than the demand reported at March 22, four weeks earlier. Furthermore, the manpower needs of these industries accounted for 58 per cent of the total labour requirements at the April date. High priority mining and manufacturing, which comprised almost 60 per cent of the total labour requirements in A and B priority industries, reported an increase in demand from 38,222 at March 22 to 50,428 at April 19.

Mining and Primary Smelting

Increased activity and the need to replace off-season agricultural workers in high priority mining, primary smelting and refining industries is reflected in the marked rise in the demand for workers in this group. Some relief may be expected upon the termination of river-driving, as many of these husky workers can be placed in the hard pressed mining industry. Labour requirements of 7,318 in high priority mining, primary smelting and refining represented a rise of 1,464 or 25 per cent over the demand for workers at March 22. More than 70 per cent of this increase was in the Ontario Region, where demand rose from 2,332 at March 22 to 3,365

at April 19. This was largely due to the sharp rise in demand for workers in the nickel industry where 1,586 workers were needed at April 19 as compared with 958 at March 22. The manpower situation in the base metal industries gives cause for some concern, as these metals will play an important part in production schedules outlined for the Pacific war and Canada is in a strategic position to make a substantial contribution in this field. Every effort is being made to meet the additional labour requirements but the difficulties are increased by the high physical standards required of applicants and the heavy rate of labour turnover in base metal mining. The release of the many agricultural workers who have been engaged in these industries during the winter months has further complicated an already difficult situation. The iron and steel industries were in need of 1,706 workers at April 19; this was 24 per cent higher than the reported shortage of 1,374 at March 22. The shortage of workers in the coal mines at April 19, totalled 1,419; this was slightly higher than the demand for 1,352 four weeks earlier. The Prairie Region reported some easing of the situation although there was an urgent need for unskilled workers. The Maritime and Pacific Regions both reported increased demands for labour, especially underground workers. Increased activity is reported in the gold mining industry, where, due to shortages of both labour and equipment, production has been sharply curtailed during the war years.

Manufacturing

High priority manufacturing reported a sharp increase in demand for workers during the four weeks prior to April 19. Heavy industries, in particular, are feeling the effect of the release of off-season agricultural workers as suitable replacements of the sturdy type of worker are very scarce at this time. At April 19, there was a demand for 43,110 workers in A and B priority manufacturing industries; this was 33 per cent higher than the demand for 32,368 workers reported at March 22. Substantial increases in both male and female requirements were recorded in all regions during the month. The most significant increases in labour demand were reported in the following high priority industries.

Aircraft and Parts—Demand for workers in this essential industry, while substantially lower at April 19, 1945, than at the corresponding reporting date in 1944, rose sharply during the four-week period under review, from 1,197 at March 22 to 2,081 at April 19. This was entirely due to the increased demand for male workers, as the release of

the many farmers employed during the winter months has added to the manpower problems in this industry. Two-thirds of the overall demand for workers in this industry at April 19 was in the Quebec Region where requirements rose from 545 to 1,378 during the month. Although production of trainer types of aircraft will soon be discontinued, some of the manufacturing capacity released by the termination of the British Commonwealth Air Training Plan is now being used to fill substantial contracts for aircraft components for the United States Government.

Textiles and Products—Labour requirements in the high priority textile industry continued to increase, and at April 19 the demand for 7,070 workers (2,249 male and 4,821 female) was larger by almost one-fifth than the number required at March 22. Seventy-two per cent of this increase was due to a rise in demand for female workers from 4,010 to 4,821. As the textile industry is mainly concentrated in Quebec and Ontario, these two regions accounted for 96 per cent of the total demand, with labour requirements of 2,960 and 3,809 respectively at April 19. The greater proportion of the labour shortage was reported in the main primary textile industries; the cotton, woollen and worsted, and knitting mills in Quebec and Ontario accounted for almost 60 per cent of the total labour requirements of the textile industry. In the manufacture of both men's and boys' clothing and women's and misses' outerwear, labour requirements rose considerably during the month to stand at 1,079 and 678 respectively at April 19. Female sewing machine operators continued to be in short supply; there was an overall demand for 3,911 while there were only 198 applicants in all Canada registered as sewing machine operators.

Chemicals and Non-Metallics—A sharp increase in the need for workers in this highly essential industry was reported at April 19 when 3,499 workers were required as compared with 2,470 at March 22, four weeks earlier. All regions recorded substantial increases, particularly Ontario where requirements rose from 1,422 to 1,921 during this period. One-third of Ontario's labour requirements at April 19 was in the industrial chemicals industry where demand rose slightly during the month. In the manufacture of stone, clay and glass products, including construction materials, there was a marked increase in demand during the four-week period under review, from 373 to 684.

Food Processing—The normal seasonal activity in food processing plants combined with the urgent need to replace off-season

agricultural workers who have been returning to their farms was reflected in the increased demand in these high priority industries. During the four-week period ended April 19, labour requirements rose from 3,006 to 4,557. Eighty-four per cent of this increase was due to the sharp rise in male requirements, particularly in the Quebec and Ontario Regions. Demand for labour in the meat processing industry almost doubled during the four weeks, increasing from 773 at March 22 to 1,440 at April 19. This industry alone accounted for 43 per cent of the total increase in demand in high priority food processing. A similar rise in demand was reported in plants manufacturing bakery products while the need for workers in grain mill, dairy, and canning and preserving industries was maintained at a high level.

Construction

Labour requirements in high priority construction continued to rise sharply as more favourable weather allowed contractors to commence work on new projects. The demand for 4,108 workers at April 19 was more than double the requirements four weeks earlier, with the greatest increase in the Quebec Region where the need for workers rose from 249 to 1,082 during this period. All regions reported an acute shortage of specialized construction workers such as carpenters, bricklayers and plasterers and this has delayed work on some projects.

Transportation

A sharp increase in the demand for workers in high priority transportation at April 19 was recorded during the month. The labour requirements in this essential industry rose from 4,776 at March 22, to 10,466 at April 19. Eighty-one per cent of this increase was due to the sharp rise in the labour requirements for steam railways (from 1,825 to 6,452) where there was an urgent need for track maintenance gangs. The most marked increase was in the Prairie Region where demand rose from 648 at March 22 to 2,873 at April 19.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended April 22, 1945.

Maritime Region

Agriculture—Cold, wet weather following an unusually early Spring has retarded farm operations, easing the heavy demand for workers. Nevertheless, immediate manpower

Trade, Finance and Service

Overall labour requirements in trade, finance and service groups at April 19 were greater by 4,674 or 35 per cent than one month previous when 13,298 persons were needed. Demand for public and professional service workers rose from 4,733 at March 22 to 5,660 at April 19, largely due to a greater need for male workers. On the other hand, it was an increased demand for female workers which brought the total requirements in trade, finance, and service other than public and professional to 7,934 as compared with 4,187 a month earlier. Demand in wholesale and retail trade which last month had showed some indication of slackening, rose sharply in the four-week period under review. There was an increase of 60 per cent in the labour requirements of wholesale trade which stood at 1,705 at April 19, while the demand in retail trade (1,698) was 32 per cent higher than at March 22. The serious labour shortage in hospitals showed no sign of improvement and at April 19 requirements totalled 1,672 (625 males and 1,047 females). A very sharp rise was evident in the demand for hotel and restaurant workers, the April 19 total (4,848) being 57 per cent higher than that of March 22. A rising demand for female workers accounted for most of this increase; in many regions the loss of farm women who are returning to their homes at this season has aggravated an already acute labour situation.

Logging (All Priorities)

After the early spring decline, labour requirements in Canada's logging industry again showed a marked increase as the need for river-drivers became urgent. During the four-week period ended April 19, demand in this industry rose from 11,164 to 15,857. Forty-nine per cent of the demand was concentrated in the Quebec Region, where there was a shortage of 7,734 workers at April 19 as compared with 3,180 at March 22.

requirements exceed the available supply, especially in the vicinity of Kentville, Truro and New Glasgow in Nova Scotia, Moncton and Woodstock in New Brunswick, and Charlottetown and Summerside on Prince Edward Island.

In the Annapolis Valley, where pruning and fertilizing are in full swing, the transfer of men from other industries on a more or less voluntary basis has met with some success, but in the vicinity of Moncton compulsory directions have been issued to fill all existing farm vacancies.

Fishing—Many men are returning from logging camps and war industries to prepare boats and gear. In districts where the season has already opened there is a fair demand for crew, and off-shore fishermen in the small boats off Liverpool are netting \$40 to \$85 for their daily catch.

Logging—Operations are practically finished, except for fuelwood cutting, for which labour is very scarce. While the securing of 3,000 bushmen to take part in the spring drive is taxing the region's resources, and additional manpower could still be utilized advantageously, water conditions are reported to be quite satisfactory; it is expected that all long lumber and pulpwood will reach the booms, ensuring the most successful year on record.

Sawmills—Although there is no prospect of meeting anticipated manpower requirements in full, the employment of agriculture workers between planting and haying operations will facilitate cutting operations greatly.

Coal Mining—Operations in the collieries continue on a fairly satisfactory basis. Several hundred experienced miners could be absorbed throughout the region, thus ensuring the employment of many additional labourers, but such certificated men are absolutely unobtainable.

Manufacturing—Maritime shipyards continue to make the heaviest demand on the labour force. However, the release of workers from the Pictou Shipyards has relieved the shortage of skilled and unskilled workmen in the Halifax yards to some extent; every type of skilled tradesman is included among the men coming in and the opening of a new block of staff houses on the Dartmouth side of the harbour has provided accommodation for approximately 530 men, greatly relieving the overstrained housing situation.

A gradual lay-off of barge-building personnel has begun in the Bridgewater yards, but work on a contract for tugs will keep other employees busy until Fall. Repair work is continuing in the Digby shipbuilding establishment, while farther north at Fredericton, preparations for new barge construction are going forward. Good progress is being made in filling the orders of the Trenton steel plant but the Sydney factory is operating far short of heavy labour requirements increased since the opening of navigation.

Throughout the region, there is a continued call for labour reinforcements for textile plants, as well as for the seasonal peak activities of fish processing and fertilizing factories.

Construction—Although there is as yet no marked upswing, a number of projects are under way. The Halifax office reports orders for about 40 carpenters and 77 labourers to

work on urgent building contracts, and Fredericton is trying to find 30 artisans for construction soon to be started.

Transportation—Heavy railway traffic continues, with 175 orders for C.N.R. workmen placed in the Sackville area alone. The letting of a contract for discharging ballast from ships returned from overseas has absorbed all available labour in the Digby area. Although the longshore situation is well in hand in Maritime harbours, added import cargoes are rendering the handling of freight increasingly difficult.

Quebec Region

Agriculture—Unseasonably cool weather has delayed plans for early seeding, and heavy rains will retard farm work in many sections until mid-May. Not only has there been no evidence of manpower shortage as yet, but the delay in agricultural activities has made it possible in some sections for many farmers to prolong their seasonal work in the bush and in other essential industries.

Logging—The recent heavy rains should prove advantageous to the river drivers, hampered by the unseasonable warmth of early April. To ensure logs being brought out, special efforts are being made to meet labour demands in all parts of Quebec; on the whole, the manpower situation is reasonably satisfactory, most companies being well supplied with drivers. A few hundred additional men are needed in the vicinity of Chicoutimi, where about 1,500 bushworkers are already employed, while in the Campbell's Bay area farm workers are being recruited to fill the need of more than 500 bushmen. The offices at Port Alfred, LaTuque and Roberval are still endeavouring to meet local labour requirements for the drive, while south of the St. Lawrence, about 400 of the 900 drivers required in the Rimouski district may be transferred from pulpwood cutting, on which 2,200 men are still busy.

Mining—The conclusion of the Spring drive will undoubtedly relieve the manpower shortage, greatly aggravated at this season by the withdrawal of farmers. Base metal mines in the Rouyn area are very short of miners, while both in this vicinity and around Val d'Or the gold mines are all calling for qualified men; field prospecting and preliminary development crews are much easier to procure than men for the more exacting underground operations.

Manufacturing—Labour requirements for the province's munitions program present the most complex problem, with some plants recruiting additional workers while others are reducing staff. In Montreal, where the lay-off at the Fairchild Aircraft Company's plant has been completed, mass releases are in progress from

the Verdun and Villeray factories of Defence Industries Limited. Approximately 250 women have been let out of the Quebec arsenals; those affected are being interviewed and offered work in Montreal munitions plants. More workers are urgently required for the D.I.L.'s heavy shell production at Ste. Therese, as well as an additional 1,000 people, principally men, for the company's Cherrier plant; special recruiting drives are under way to meet these pressing demands.

Quebec aluminum plants are making the anticipated heavy demand on the provincial labour force. About 1,000 men have been taken on at Arvida since the beginning of March, and another 1,000 will probably be added during the coming months to take care of the re-opening of three additional pot-rooms, as well as the normal Summer turnover; most of this labour is available locally. An order for another 150 potmen for Shawinigan Falls has been almost filled, but an additional 100 workers are needed for the re-opening of the Beauharnois plant.

Foundries throughout Quebec are continuing short of the proper type of heavy labour, especially in the Montreal area, where it has been found advisable to suspend further recruiting for outside points. There is no noticeable improvement in the labour situation of textile mills and kindred industries, where a critical shortage of both male and female workers, skilled and unskilled alike, still prevails. In the vicinity of Valleyfield alone, cotton, silk and woollen mills could absorb at least another 400 men and women.

Construction—The number of building permits issued throughout the region has exceeded all expectations, with a resultant shortage of construction tradesmen foreseen. Bricklayers, plasterers, electricians, plumbers and several other types of skilled artisans are not procurable, and general labour is also at a premium. The current boom in private and public building is serving to absorb many unemployed in some areas.

Transportation—While track maintenance work is not yet fully under way in the province, heavy orders for the railways are for the most part being filled locally, and in some cases by men who have been drawing unemployment insurance benefits. The manpower requirements of river and coastwise vessels, now in operation, are being filled gradually.

Ontario Region

Agriculture—The unfavourable weather prevailing in other parts of the Dominion has also affected Ontario farm work adversely, with the result that manpower requirements, while only postponed, have been materially reduced for the time being. The worst labour

shortage of the war years prevails through the Ottawa Valley, where experienced dairy workers in particular are greatly needed. In the St. Catharines area, too, the situation is reported to be more serious than in any previous season, but while farm helpers are in demand in other sections, the dearth of suitable applicants is not immediately disturbing.

Logging—Operations in most sections have reached the final stage of river driving, with many bushmen in demand for this work, now in full swing. However, in some parts of the province preparations for Spring and Summer cutting are being made. Many pulpcutters and drivers are still needed in the Timmins area, as well as a large number of cutters for operations on timber limits west of Hearst. In general, the available supply of bushworkers promises to be adequate for the reduced operations of the coming season.

Sawmills—Ontario mills, reopening to handle the Summer cut, are in great need of manpower. The North Bay office reports a steadily increasing demand, Timmins and Walkerton still required many additional workers, and in the Sudbury area approximately 1,000 men will be needed when the logs come down from the bush.

Mining—The loss of farmers and farm workers is handicapping the already undermanned mines. The Sudbury office alone reports that base metal workings in the vicinity are now short 1,300 men, a number which will be materially increased at the end of the current month. Mines in the Timmins area, too, are still forced to run on reduced tonnage schedules.

Manufacturing—Steadily mounting requirements, with the emphasis on heavy labour, are harassing employers and local offices alike. With physically fit men unobtainable to fill upwards of 1,000 vacancies created by departing farm workers, the manpower shortage in some sections is considered greater than at any time since the beginning of the war. The Kingston office reports a shortage of 600 factory workers over the past fortnight, Niagara Falls sets its requirements at 500, London's unfilled vacancies are still over the 1,300 mark, and other industrial centres (notably Toronto, Hamilton and Brantford) are correspondingly short of essential workers.

Counterbalancing these critical labour shortages to some extent, have been lay-offs occurring in various parts of the province. Of approximately 450 men and 160 women released from the Canadian Bridge and Engineering works at Ojibway, practically all the men were quickly absorbed in other industries in the Windsor area; as it is more difficult to place the women locally, every

effort is being made to persuade them to accept employment elsewhere. In New Toronto, where 300 male factory labourers are still required by one large war plant, a strike of the Goodyear Tire and Rubber Company's employees has left 1,700 men and 800 girls without work since the middle of April.

Emergency rating has been granted for the orders at shell-manufacturing plants in Hamilton, and one rubber plant in the Kitchener area is bringing in 200 men from Newfoundland to relieve the existing shortage of labour for war production. The D.I.L. plant at Nobel is calling for an additional 200 male workers, and about 160 women have been brought in from outside points to meet the demands of a Wallaceburg shell factory.

Thousands of vacancies, especially for women, exist throughout Ontario textile plants, with only a negligible number of applicants to offset the shortage; the close of the academic year at high schools and universities is expected to bring some relief.

Construction—As the season advances, heavy building programs are expanding throughout the region (for business and private home construction alike). The consequently increasing demands for bricklayers, plasterers and painters, as well as for heavy labour, cannot be adequately met. Toronto alone reports not only a serious shortage of building labour for essential jobs, but orders in excess of 500 for workers on non-essential projects as well.

Transportation—The railways, too, are making more extensive demands on the labour force, especially for track maintenance gangs and freight handlers. The Great Lakes shipping companies are in better manpower position; local offices report that practically all sailors have rejoined their ships.

Prairie Region

Agriculture—Although the prevailing adverse weather conditions have hampered operations in most sections, farmers temporarily employed in other essential industries are returning home for the seeding; the demand for agricultural labour is steadily increasing, the most insistent call being for tractor operators. In the vicinity of Regina, Moose Jaw, Lethbridge and Edmonton, employers' orders far exceed applicants, and a brisk demand is also reported by local offices at Winnipeg, Brandon, Portage la Prairie and Saskatoon.

Logging—The general downward trend in the demand for bushworkers continues. With cutting and hauling operations practically all closed down, intensive preparations are under way for the river drives, which are presently delayed by persistently inclement weather. No serious shortage of manpower is foreseen.

Coal Mining—The loss of off-season workers has resulted in serious labour shortage in some areas, with consequent loss of tonnage. However, in other districts a number of collieries are operating on short time; in the vicinity of Estevan a considerable number of men have been released to prairie farms, railways and packing plants, or to the British Columbia mines. Although half of the Drumheller mines will remain on a four-day week until the end of April, the call for experienced miners is still fairly high, with men for haulage needed immediately. Similar working schedules and similar labour shortages exist in the Blairmore area, where the manpower situation is being relieved by the transfer of labour from mines running part-time to others on full production.

Base Metal Mining—Bad weather, extending the in-between flying season, has prevented contact with the mines in the northern Kenora section. However, in all other parts of the region there is a persistent demand for every type of mining labour, and the Port Arthur office reports that 200 physically fit men could readily be absorbed as underground workers in the producing gold mines of the district.

Manufacturing—Outstanding development during the past month was the mass lay-off of approximately 560 aircraft workers from the Fort William plant of Canadian Car and Foundry Limited. About 75 per cent of the men affected were from outside points, and have returned home, while the majority of the married women have registered for factory work, although advised that there is little such employment locally. Unemployment insurance claims have been numerous.

The exodus of agricultural workers has greatly aggravated the already existing shortage of heavy labour, with no replacements in sight to fill essential jobs in the region's packing plants, flour mills and similar industries. The needle trades are also suffering from lack of staff; skilled men and women are at a premium, with very little interest in apprenticeship displayed.

Construction—The upward trend continues, with increasing demands for skilled and unskilled building tradesmen straining the reserve of qualified applicants in many localities. While a considerable number of construction tradesmen are engaged on low-priority building at present, their direction to "A" priority projects will hardly meet the needs of that category. The heaviest call at this time is for expert carpenters.

Transportation—Practically all divisional and key points on the railways are calling for track maintenance labour, and difficulty is foreseen in filling more than one-third of an anti-

anticipated demand for 3,000 gang workers. However, as seeding advances in some areas it is hoped that farmers free until harvest time may be recruited.

Pacific Region

Agriculture.—In British Columbia, as elsewhere, farm work has been delayed by late Spring. While dairy farmers are still suffering from the lack of experienced assistants, calls for orchard workers have been reduced to a minimum, with the gradual release of agricultural workers from off-seasonal employment satisfying immediate needs for general farm labour.

Logging.—Although deep snow has delayed the re-opening of many camps in the interior, on Vancouver Island the annual shutdown is being prolonged by lack of labour rather than adverse conditions. The loss of farm workers has accentuated the shortage of manpower, and in an effort to ease the critical situation developing annually at this season, orders for 300 able-bodied bushworkers for British Columbia logging camps have been placed in clearance in the Quebec region.

Sawmills.—Although the log inventory in the coast area is satisfactorily high, the worst towing conditions in many years have necessitated the temporary shutdown of mills in the Vancouver and New Westminster areas; it is hoped, however, that all operations will be back in full production by May 1, when a great lack of sawmill workers is anticipated.

Coal Mining.—Faced with a continuing shortage of every type of underground labour, all employers are quite willing to accept inexperienced applicants for training as replacements for numerous older men retiring on medical grounds. Release of miners from the Armed Forces is being sought, in order to check the serious decrease in production during recent months.

Base Metal Mining.—The four major operations of the province have met with no success in supplementing their undermanned crews of muckers, miners and timbermen; small operators are proportionately handicapped. More than 1,000 hard rock miners, physically fit underground labourers, or men suitable for training could be absorbed throughout the region. The gold mines, even more severely handicapped owing to low labour priority, are producing only a fraction of the ore available if manpower were procurable.

Manufacturing.—The exodus of agricultural workers has resulted in a sharp upward turn in unfilled male vacancies. The shortage of heavy labour, for foundries and similar establishments, together with that of skilled artisans for the shipyards of Vancouver, Victoria and Prince Rupert, becomes steadily greater, with little or no response to clearance orders. The Vancouver office records high requirements for skilled aircraft workers, similarly unobtainable. Some relief for undermanned industries will be forthcoming with the impending release of students.

Construction.—Manpower demands mount steadily, with increased activity in the military hospital program under way in the Vancouver area, and minor shortages of cement finishers and labourers for the Naval Supply Depot in North Vancouver. Skilled woodworkers and machine men in cabinet-making and the higher carpenter skills are also in request.

Transportation.—The call for extra maintenance labour for the railways has also accelerated; while Japanese labour is being utilized as far as possible, it has been found necessary to place orders in clearance for the greater number of workers required. Referrals to the Deep Sea Manning Pool are continually heavy with 328 applicants referred and accepted for deep sea duty during the past fortnight.

Applications for Employment; Vacancies and Placements; March, 1945

REPORTS of the Employment and Selective offices for the four weeks March 2 to March 29, 1945, showed slight decreases in the average daily placements both when compared with the previous four weeks February 2 to March 1, 1945, and with the period March 3 to March 30, 1944. Advances in placements over the preceding four weeks in trade, construction, services and agriculture were offset by declines in manufacturing, forestry and logging and public utilities while mining, finance and insurance, and fishing,

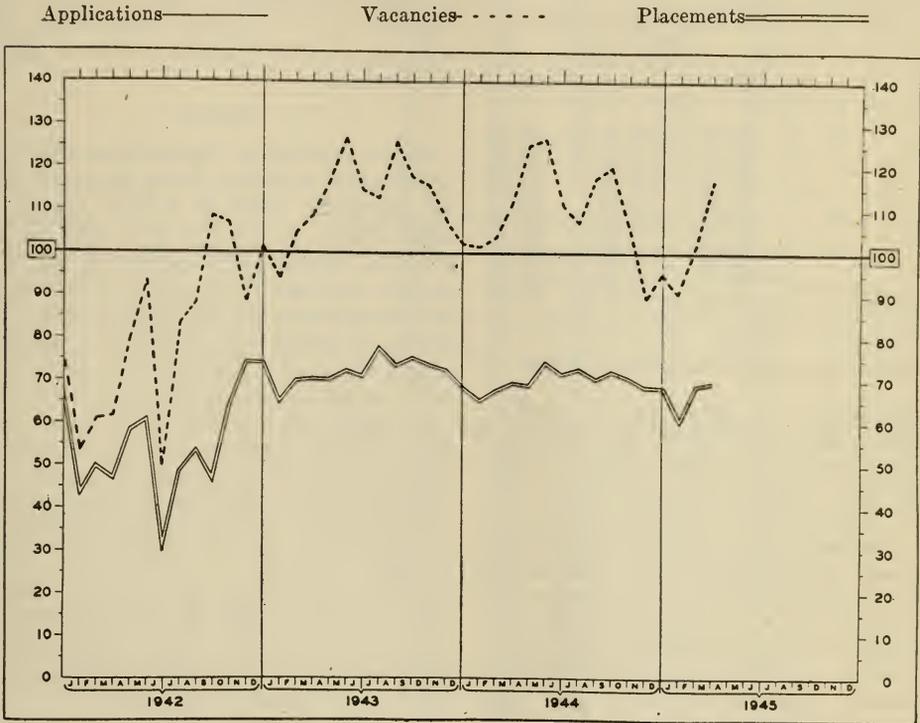

hunting and trapping remained about the same. When compared with the four weeks ending March 30, 1944, moderate increases were noted in trade, construction, services and finance and insurance but losses were registered in manufacturing, logging, public utilities, mining and agriculture, the change in manufacturing being most pronounced.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applica-

tions for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed upward courses. The ratio of vacancies to each 100 applications being 116.4 during the four-week period ending March 29, 1945, in contrast with 102.0 during the previous four weeks and 111.8 during the four weeks ending March 30, 1944.

tions for employment received daily by the offices during the period under review was 7,054 in comparison with 7,265 during the previous period and with 7,186 during the four weeks March 3 to March 30, 1944. The average number of placements made daily by the offices during the four weeks ending March 29, 1945, was 4,860 of which 4,720 were in regular employment and 140 in work of one week's duration or less as compared with a

VACANCIES NOTIFIED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

The ratio of placements to each 100 applications during the period under review was 69.0 compared with 68.4 for the preceding four weeks and 69.3 during the four weeks March 3 to March 30, a year ago.

The average number of vacancies reported daily by employers to the Employment and Selective Service offices throughout Canada during the four-week period March 2 to March 29, 1945, was 8,218 as compared with 7,415 during the preceding four weeks and with 8,036 during the four-week period ending March 30, last year. The average number of applica-

total daily average of 4,974 during the preceding four weeks. Placements during the four weeks ending March 30, 1944, averaged 4,980 daily consisting of 4,830 in regular and 150 in casual employment.

During the period March 2 to March 29, 1945, the offices referred 163,899 persons to vacancies and effected a total of 116,653 placements. Of these, the placements in regular employment were 113,285 of which 70,921 were of males and 42,364 of females, while placements in casual work totalled 3,368. The number of vacancies reported by employers

was 128,166 for males and 69,055 for females, a total of 197,221, while applications for work numbered 169,305, of which 110,272 were from males and 59,033 from females. Reports for the four weeks February 2 to March 1, 1945, showed 177,950 positions available; 174,369 applications made and 119,386 placements effected, while from March 3 to March 30, last year, there were recorded 192,875 vacancies, 172,461 applications for work and 119,518 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year from January 1935, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026
1944	1,693,119	46,798	1,739,917
1945 (13 weeks)	377,028	10,501	387,529

Nova Scotia and Prince Edward Island

Opportunities for employment as reported by Employment and Selective Service offices in Nova Scotia and Prince Edward Island during the four week period March 2 to March 29, 1945, showed a daily average of 252 in comparison with 255 in the preceding four weeks and 282 during the period ending March 30, 1944. The average number of placements effected daily was 176 during the period under review, compared with 198 in the previous four weeks and 204 during the four weeks ending March 30 a year ago. When comparing placements by industrial groups with the period terminating March 30 last year, the most significant changes were moderate losses in manufacturing and public utilities operation and a gain in services. Placements by industries included: manufacturing 1,416; services 1,062; trade 718; public utilities operation 501, and construction 306. There were 2,521 men and 1,616 women placed in regular employment.

New Brunswick

Positions offered through Employment offices in New Brunswick during the period

under review, averaged 202 daily compared with 215 in the previous four weeks and 229 during the period ending March 30 last year. There was a daily average of 146 placements compared with 153 in the four weeks terminating March 1, and 152 during the period ending March 30 a year ago. Placements by industrial groups showed small variations from the four weeks March 3 to March 30, 1944, the most important changes being a loss in forestry and logging, and a gain in public utilities operation. Placements by industrial divisions included: manufacturing 959; public utilities operation 741; services 668; trade 627; construction 257, and logging 159. There were 2,333 men and 1,137 women placed in regular employment.

Quebec

Orders received at Employment Offices in the province of Quebec during the period ending March 29, called for a daily average of 2,405 workers in contrast with 2,376 in the preceding period and 2,322 during the same period a year ago. Placements decreased under both comparisons, the daily average being 1,406 during the period under review, in comparison with 1,433 in the previous four weeks, and 1,487 during the corresponding period a year ago. Fairly large declines in manufacturing, public utilities operation, forestry and logging, together with moderate losses in services and agriculture, were responsible for the reductions in placements. Of the changes in all other groups, the largest was a moderate increase in trade. Industries in which employment was found for more than 500 workers included: manufacturing 15,978; logging 4,996; services 4,721; trade 3,179; construction 2,420; public utilities operation 1,344, and mining 614. There were 22,203 men and 11,330 women placed in regular employment.

Ontario

There was an increase in the average number of positions available daily at Employment Offices in the province of Ontario during the period ending March 29, when compared with both the previous four weeks and with the corresponding period of 1944; there being 3,556 vacancies notified during the four weeks under review, in comparison with 3,024 in the preceding four weeks and 3,366 during the period ending March 30, 1944. The average number

of placements registered daily was 1,984 during the four weeks under review, in contrast with 2,075 in the previous period and 1,912 during the corresponding four weeks last year. Substantial increases in construction and services together with gains of more moderate proportions in trade and finance and insurance, accounted for the increase in placements over the period terminating March 30, 1944. These improvements were offset in part by a substantial decline in manufacturing, and moderate losses in mining and agriculture. Industrial divisions in which the majority of placements were effected were: manufacturing 20,782; services, 9,649; trade 6,080; public utilities operation 4,156; construction 3,269; logging 1,759; finance and insurance 1,001, and mining 638. Placements in regular employment numbered 28,032 of men and 18,635 of women.

Manitoba

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Manitoba during the four weeks terminating March 29, was 387 in comparison with 294 in the previous period and 397 during the corresponding period a year ago. Placements showed an increase when compared with the preceding period, but a decrease in contrast with the four weeks ending March 30, 1944. The daily average was 242 during the period under review, 210 in the four weeks ending March 1, and 255 during the four weeks March 3 to March 30, 1944. Placements by industrial groups showed small variations from the four weeks March 3 to March 30, 1944, the most important changes being a moderate loss in manufacturing and public utilities operation, and gains in services and construction. Placements by industrial groups included: trade 1,770; services 1,728; manufacturing 1,271; public utilities operation 441, and construction 307. Placements in regular employment numbered 2,278 of men and 2,526 of women.

Saskatchewan

Employment opportunities as indicated by orders received at Offices in Saskatchewan during the period under review showed a daily average of 206 compared with 159 in the preceding period and 197 during the four weeks ending March 30 last year. The average number of placements effected daily was 117 during the period ending March 29 in contrast with 112 in the previous four weeks and 127 during the period ending March 30, 1944. When comparing placements by industrial divisions with

the corresponding period of last year, the only change of importance was a moderate decrease in manufacturing. Placements by industrial groups included: services 1,077; trade 778; manufacturing 420; public utilities operation 226; agriculture 127, and construction 114. There were 1,350 men and 1,133 women placed in regular employment.

Alberta

During the four weeks ending March 29, 1945, the daily average of positions offered through Employment Offices in Alberta was 337, compared with 280 in the previous period and 408 in the corresponding period a year ago. The average number of placements registered daily was 216 during the period under review, compared with 202 in the preceding period and 242 during the four weeks ending March 30 a year ago. Reduced placements in construction and manufacturing accounted for the decrease in placements from the four weeks terminating March 30 last year. A moderate increase in mining and slight gains in trade, public utilities operation and agriculture were the only advances registered. Placements by industrial groups included: services 1,674; trade 1,050; manufacturing 739; public utilities operation 608; construction 364; mining 315, and agriculture 217. Regular placements numbered 2,783 of men and 1,955 of women.

British Columbia

There was an increase in the average number of positions available daily at Employment Offices in the province of British Columbia during the four weeks ending March 29, there being 873 in comparison with 810 in the preceding period and 836 during the four weeks terminating March 30 a year ago. Placements decreased under both comparisons, the daily average being 574 during the period under review, in contrast with 590 in the previous four weeks and 600 during the period ending March 30, 1944. Moderate declines in construction, mining, services, trade, manufacturing and logging were responsible for the decline in placements from the four weeks ending March 30 a year ago. Improvement of a moderate proportion was noted in public utilities operation, while changes in all other groups were small. Placements by industrial divisions included: manufacturing 3,867; services 3,208; logging 2,060; trade 1,566; public utilities operation 1,449, and construction 1,138. Placements in regular employment numbered 9,421 of men and 4,032 of women.

*Quarterly Report of Employment and Selective Service Offices,
December 29, 1944, to March 29, 1945*

BUSINESS transacted by the Employment and Selective Service Offices of Canada during the first quarter in 1945, showed a small decrease when compared with the first quarter of 1944. Gains in vacancies in construction, services, finance and insurance, public utilities and fishing, hunting and trapping were offset by losses in manufacturing, forestry and logging, agriculture and mining. The reductions in placements registered in manufacturing, mining, public utilities, construction and agriculture exceeded advances in trade, services, forestry and logging, finance and insurance and fishing, hunting and trapping. All provinces except New Brunswick reported fewer vacancies notified and only the Provinces of Ontario and New Brunswick made more placements.

The accompanying table gives the vacancies, and placements of the Employment and Selective Service Offices by industrial groups in the various provinces during the period December 29, 1944, to March 29, 1945.

From the chart appearing elsewhere in this issue, which accompanies the article on the work of the Employment and Selective Service Offices for the four-week period March 2 to March 29, it will be noted that the curves of vacancies and placements in relation to applications showed downward trends during January but upward courses in February and March.

During the period December 29, 1944, to March 29, 1945, there were ratios of 101.2 vacancies and 65.3 placements for each 100 applications for employment as compared with 105.2 vacancies and 67.1 placements during the first quarter of 1944.

The average number of positions offered daily during the first quarter in 1944, was 7,793, of applications registered 7,700, and of placements effected 5,033, in contrast with a daily average of 8,125 vacancies, 7,724 applications and 5,186 placements in regular and casual employment during the first quarter of 1944.

During the period under review the offices reported that they had referred 532,405 persons to positions and effected a total of 387,529 placements, of which 377,028 were in regular employment and 10,501 in casual work. Of the placements in regular employment 241,965 were of males and 135,063 of females, while casual work was found for 3,835 males and 6,666 females.

During the first quarter of 1944, there were 399,362 placements, of which 386,501 were in regular employment and 12,861 in casual work. Applications for employment during the thirteen weeks ending March 29, 1945, were received from 385,965 males and 206,922 females, a total of 592,887, in contrast with a registration of 594,805 during the first quarter of 1944. Employers notified the offices of 600,133 vacancies of which 388,503 were for males and 211,630 for females, as compared with 625,670 opportunities for work during the first thirteen weeks of 1944.

Elsewhere in this issue will be found a report in detail of transactions of the Employment and Selective Service Offices for the four-week period March 2 to March 29, 1945.

Unemployment in Trade Unions at the Close of the Quarter Ending March 31, 1945

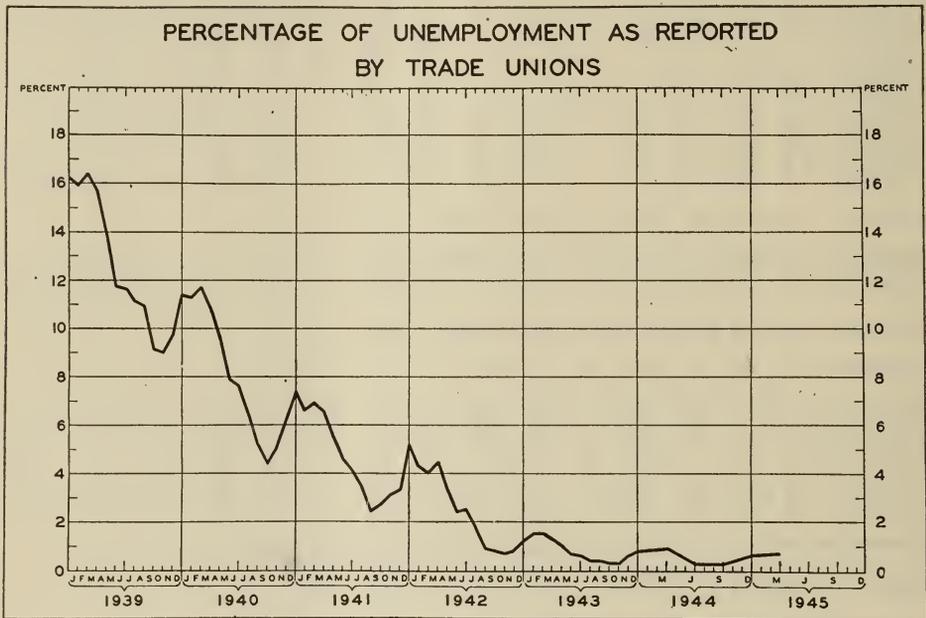

THE percentage of unemployment among members of labour organizations increased slightly to 0.7 at the end of the March quarter from the percentage of 0.6 at December 31, 1944.

Unemployment in the following report has reference to involuntary idleness due to economic causes. Persons who are without work on account of sickness, a strike or a lockout, or who are engaged in work outside their own trades are not considered as unemployed. As returns from unions making reports vary from quarter to quarter, with consequent variations in the membership, upon which the percentage

15.7. The percentage of unemployment at the date under review is the lowest recorded for any March since the inception of the record in 1915. The increase in the percentage of unemployment at March, although slight, conforms with the usual seasonal experience in previous years.

It may be noted that the unemployment indicated at the present time, and for several of the preceding monthly or quarterly periods, has been due principally to temporary lay-offs.

Seasonal contraction in logging, fishing and steam railway operations accounted for the

of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

For the close of the quarter ended March 31, returns from 2,337 local labour organizations were tabulated, showing a total membership of 421,779 persons of whom 2,998 or 0.7 per cent, were without work. In comparison 2,332 locals reported at the end of December, 1944, a membership of 409,338, of whom 2,473 or 0.6 per cent were unemployed; at the end of March, 1944, the unemployed were 0.9 per cent of the total reported membership and at the end of March, 1939, the percentage was

greater part of the increase in unemployment among trade union members at March 1. Building and construction trades showed marked seasonal improvement, while employment opportunities in mining was slightly less favourable than in the previous quarter.

The percentages of unemployment in each province in shown in Table 1. In comparison with the previous quarter, employment conditions improved slightly in New Brunswick to less than one-twentieth of one per cent and in British Columbia to one-half of one per cent; the percentage in each of the other provinces increased fractionally. Each prov-

ince, except Quebec which advanced to 1.2, held below the one per cent level. In comparison with March of the previous year, improved conditions were indicated for New Brunswick, Ontario, Alberta and British Columbia; slightly lower employment levels prevailed in Nova Scotia, Quebec, and Saskatchewan while in Manitoba the percentage of unemployed remained unchanged.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. At the end of March, the percentages ranged from 0.1 reported in Saint John and Regina to 0.9 in Winnipeg. The percentage for Edmonton was 0.8, for Montreal 0.6, for Halifax 0.4, and for Toronto and Vancouver 0.2. In comparison with the conditions at the end of the previous quarter, a slight employment recession was recorded in Halifax, Saint John and Montreal; the percentage of unemployed trade unionists in Edmonton decreased from 1.2 to 0.8 and in Vancouver from 0.6 to 0.2 while conditions in the other cities remained unchanged at a high level. As compared with March, 1944, conditions improved in each city for which tabulations were made. The greatest improvements occurred in Edmonton and in Halifax where the percentages decreased from 2.6 to 0.8 and from 1.2 to 0.4, respectively.

Returns were tabulated for 846 local unions in the manufacturing industries, having a combined membership of 218,124 of whom 933, or a percentage of 0.4 were listed as unemployed. In comparison, the same percentage of 213,361 members were unemployed at the end of the previous quarter and 0.3 per cent of 262,482 members reported at the end of March, 1944. Among union members in the pulp and paper, electric power production and non-ferrous metals industries, the employment situation was more favourable than at the end of December, while among woodworkers, textile and clothing workers, employees in the ferrous metals, mineral products and miscellaneous manufacturing industries, conditions were somewhat less favourable. Of the 5,697 members reported in the aluminium industry, 11 or a percentage of 0.2 were reported unemployed at the date under review, compared with 7.5 per cent of the 4,395 members at the end of the previous quarter. As compared to March, 1944, there was less unemployment among trade union members in the printing

and publishing trade and the manufacture of animal products and non-ferrous metals, while there were small increases in unemployment among pulp and paper mill, wood, clothing and textile workers. A somewhat large increase was noted in the miscellaneous manufactures group.

Reports were received from 872 local unions in the transportation industries. The total membership covered in these reports was 92,663 persons of whom 542, or a percentage of 0.6 were without work on the reporting date. In comparison, 0.5 per cent of 88,406 members were reported without work at the end of December, 1944 and 0.4 per cent of

87,020 members, at the end of March, 1944. Unemployment among navigation workers decreased to 0·8 per cent from 2·7 at the end of December and 1·0 at the end of March in the previous year. There was a slight employment increase in the steam railway group to 0·7 per cent from 0·5 at the previous quarter and 0·4 at March, 1944; similarly, the local and highway transportation group increased to 0·2 per cent from 0·1 in the previous quarter.

There were 75 unions of miners reporting a membership of 31,339 persons, of whom 175, or 0·6 per cent, were unemployed at the end of March, compared with 0·5 per cent of 29,209 members unemployed at the quarter preceding and 0·7 per cent of 25,974 members at the end of March in the previous year. Unemployment among coal miners was 0·3 per cent at the end of March of both this year and last, compared with the full employment at the end of 1944. While there was no unemployment among metallic miners for the quarter under review, 3·4 per cent of the 3,719 non-metallic miners reported to the Department were without work.

The 202 local unions in the building and construction trades reporting to the Department at the end of March showed that 588, or 1·9 per cent of the total membership of 31,193 were unemployed. In comparison 2·8 per cent were unemployed at December and 6·5 at March, 1944. As compared to the previous quarter, bridge and structural iron workers, electrical workers and lathers remained fully employed while for steam shovel operators and dredgemen, bricklayers, masons and plasterers, granite and stone cutters, plumbers and steamfitters, there were considerable increases in the percentage unemployed;

there were fewer unemployed members among carpenters and joiners, painters, decorators and paperhangers, and hod carriers and miscellaneous building workers.

The 0·3 per cent unemployment in public and personal service compares favourably with the 0·4 per cent at the previous quarter and at March 31 of the previous year. The percentage unemployed in retail and wholesale trade increased from 1·3 at the end of December to 2·1; all members were reported employed at the end of March, 1944.

Twelve union members, or 0·1 per cent of the total membership of 8,957 were reported as out of work in the communications groups. At the same date in the previous year, 1·1 per cent were unemployed and 0·5 per cent at the last quarter.

Two hundred, or 71·4 per cent of 280 fishermen were reported unemployed by one union. This sample is too small to be considered representative of the general conditions in the industry.

At the quarter under review, 6·1 per cent of the 6,587 lumber workers and loggers were unemployed, while in the previous quarter, 11 of the reported members were employed and in March, 1944, 0·8 per cent were unemployed.

The accompanying chart illustrates the trend of unemployment from January, 1939, to date. Table I shows by provinces the average percentage of union members who were unemployed each year from 1933 to 1943, inclusive, and also the percentage of those without work for March of each year since 1932, for each month of 1943 and for each quarter of 1944. Table II indicates the percentage of unemployment in the various groups of industries since 1932.

Strikes and Lockouts

Strikes and Lockouts in Canada During April, 1945

THERE was a decrease in the number of strikes in Canada during April as compared with the previous month, the number of workers involved was about the same but the time loss in man-working days showed a substantial increase. As compared with April, 1944, there was a slight decline in the number of strikes recorded and a decided decrease in both the number of workers involved and the time loss. Preliminary figures show nine strikes in existence during April, involving 4,363 workers and causing a time loss of 25,169 days, as compared with 21 strikes in March, with 4,670 workers involved and a time loss of 8,563 days. In April, 1944, there were 12 strikes involving 14,384 workers with a time loss of 115,994 days.

Preliminary figures for the first four months of this year show 61 strikes, involving 19,400 workers with a time loss of 72,695 man-working days, as compared with 67 strikes, with 32,873

workers involved and a time loss of 182,374 days, for the same period last year.

During the month under review a strike of tire factory workers at New Toronto, Ont., was responsible for about four-fifths of the total loss. In April, 1944, the time loss was due almost entirely to a strike of motor vehicle factory workers at Windsor, Ont.

Of the nine strikes recorded for April, 1945, all of which were terminated during the month, one resulted in favour of the workers, two in favour of the employers, two were compromise settlements and four were indefinite in result, work being resumed pending final settlement.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated

STRIKES AND LOCKOUTS IN CANADA, JANUARY-APRIL, 1944-1945

Cumulative totals.....	67	32,873	182,374

* Preliminary.

† Strikes un-terminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strike is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING APRIL, 1945*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing During April, 1945				
MINING—				
Coal miners, Lethbridge, Alta.	1	280	560	Commenced April 11; against discharge of three miners for loading dirty coal; terminated April 12; negotiations; compromise; miners reinstated after one week's suspension.
Coal miners, Drumheller, Alta.	1	91	91	Commenced April 20; for payment of unemployment insurance benefits to miners who allegedly refused certain work; terminated April 20; return of workers pending reference to the Unemployment Insurance Commission; indefinite.
Coal miners, Glace Bay, N.S.	1	878	1,800	Commenced April 24; for new local contract for four haulage enginemmen and trip riders; terminated April 26; return of workers; in favour of employer.
MANUFACTURING—				
Rubber and Its Products— Tire factory workers, New Toronto, Ont.	1	2,500	(c)20,300	Commenced April 5; canteen privileges for certain workers; terminated April 24; conciliation, federal and provincial, and return of workers pending settlement; indefinite.
Metal Products— Foundry workers, Sackville, N.B.	1	185	1,400	Commenced April 3; refusal to pay moulder for broken mould and casting; terminated April 12; conciliation, federal; compromise
Rolling mill workers, labourers, Montreal, P.Q.	1	(a) 14	14	Commenced April 16; for increased tonnage bonus; terminated April 16; conciliation, federal; in favour of employer.
Motor vehicle factory workers, Brantford, Ont.	1	308	700	Commenced April 18; against dismissal of two foremen for alleged misconduct; terminated April 23; return of workers pending reference to NSS‡; indefinite.
Steel mill workers, labourers, Trenton, N.S.	1	(b) 30	150	Commenced April 19; against deductions from pay of two workers for alleged failure to work a full shift; terminated April 24; conciliation, federal; in favour of workers.
TRANSPORTATION—				
Other Local and Highway-Bus drivers, Vancouver and district, B.C.	1	77	154	Commenced April 24; protesting failure of RWLB‡ to make wage increase retroactive to July 1, 1944; terminated April 25; return of workers pending further reference to RWLB; indefinite.

* Preliminary data based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

‡ RWLB—Regional War Labour Board. NSS—National Selective Service.

(a) 120 indirectly affected; (b) 28 indirectly affected.

(c) Time loss covers several work stoppages, involving various numbers of workers, between April 5 and 24.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1945, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter included a table summarizing the principle statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to war conditions. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in February, 1945, was 144 and 14 were still in progress from the previous month, making a total of 158 during the month, in which 26,800 workers were involved and a time loss of 60,000 working days was caused.

Of the 144 work stoppages commencing in February, 18 arose out of demands for advances in wages, seven out of proposed reductions in wages, 44 over other wage questions, seven out of questions as to working hours, 19 on questions respecting the employ-

ment of particular classes or persons, 43 over other questions respecting working arrangements, four over questions of trade union principles and two were in support of workers involved in other disputes.

British India

Figures for the year 1943 have now been published and show 716 strikes, involving 525,088 workers, with a time loss of 2,342,287 days. Preliminary figures for November, 1944, show 49 strikes, involving 34,904 workers, with a time loss of 66,663 days, as compared with 53 strikes in October, 1944, with 38,612 workers involved and a time loss of 75,043 days.

New Zealand

Figures for the twelve months ended December, 1944, show 149 strikes, involving 29,766 workers, with a time loss of 52,602 man-working days.

United States

Preliminary figures for March, 1945, show 400 strikes beginning in the month, in which 210,000 workers were involved. The time loss for all strikes in progress during the month was 860,000 working days. Corresponding figures for February, 1945, are 310 strikes, involving 109,000 workers, with a time loss of 412,000 working days.

Labour Law

Recent Regulations under Dominion and Provincial Legislation

RECENT Dominion regulations include an amending order to ensure in case of damages to seamen's effects, or personal injury or death, that treatment of Canadian seamen on non-Canadian ships is on the same basis as that accorded seamen from the United Kingdom. The problem is to be investigated of appraising the technical training or experience gained by the Armed Forces with a view to their employment in civil life. Benefits conferred by the Government Employees' Compensation Act have been extended to employees suffering accidents anywhere outside Canada; a further order clarifies the provision for compensation in case of accidents to employees of Government-owned companies and to persons serving the Government without remuneration.

In the Provincial field, Alberta has issued a new Female Minimum Wage Order applying

to all females within the scope of the Act with certain exceptions. In British Columbia a revised Order has been issued establishing a minimum wage for women in telephone and telegraph work, and diseases due to exposure during employment to X-rays in an industrial or hospital laboratory have been made compensatable. Rules have been set out for certain apprenticeship trades in Manitoba. The Manitoba minimum wage regulations have been revised and consolidated; sheetmetal workers have been brought under the Apprenticeship Act. A higher rate has been established for the cost-of-living bonus for Saskatchewan Government employees, while a further order provides for an increase in their rate of remuneration (exclusive of the cost-of-living bonus). New regulations have been made under the Saskatchewan Old Age and Blind Persons' Pension Act.

Dominion

Compensation to Merchant Seamen

An Order in Council (P.C. 26/1647) made March 9, 1945, and gazetted March 19, amends P.C. 87/5204 of July 16, 1941, which authorized the Secretary of State for External Affairs to negotiate with the non Canadian Governments involved to ensure that those governments give to Canadian seamen on their ships, or to the Canadian Government on behalf of such seamen, the same compensation for war damage, disability or death due to enemy action, or for detention in foreign countries, as they give to their own nationals. As a result of these negotiations, reciprocal agreements were concluded to this effect with the United Kingdom, Belgium, Greece, the Netherlands, Norway, Poland, Sweden, the United States and Yugoslavia.

Subsequently, agreements were made by the United Kingdom with Belgium, Greece, the Netherlands, Norway, Poland and Yugoslavia, stipulating that in the case of pensions for death or a residual disability of 20 per cent or more awarded to a British seaman or seaman of any other nationality supplied by a manning organization under the control of the British Ministry of War Transport, which death or injury is attributable to detention,

enemy action or war causes, and also in the case of detention allowances, the foreign Government concerned agrees to transfer a fixed capital sum to the British Ministry of Pensions, the Ministry undertaking all pension liability. In the case of loss of effects, industrial injury, or shipwreck, the seaman secures treatment not less favourable than he would receive on a British ship.

In view of this more favourable treatment of seamen from the United Kingdom, the new Canadian Order in Council authorizes the Secretary of State for External Affairs to negotiate with the Governments of Belgium, Greece, the Netherlands, Norway, Poland and Yugoslavia an amendment of their reciprocal agreements with Canada so that these Governments will treat Canadian seamen under the provisions of their agreements with the United Kingdom. The Secretary of State is empowered to make the necessary arrangements with the United Kingdom to put this modification into effect.

Commission to Examine Trade Experience Gained by the Armed Forces

A Commission was appointed by an Order in Council (P.C. 2486) of April 10, 1945.

gazetted April 23, to examine the problems involved and to recommend appropriate measures to ensure that discharged members of the Forces are given proper credit for the technical or trade training and experience they have had while in the Armed Services when they resume civil life.

The Commission, consisting of Col. Wilfrid Bovey (Chairman), D. S. Lyons, F. S. Rutherford, J. C. G. Herwig, F. W. Smelts and Hector Dupuis, is to report to the Minister of Labour. Recommendations may be made for measures to be taken in co-operation with the provinces, employers or trade and labour organizations. Each member of the Commission is given the authority of a Commissioner under the Inquiries Act. The Commission may employ necessary staff.

Pilotage By-laws

Orders of March 19, 1945, gazetted March 31, rescind sections of the Quebec, the St. Lawrence-Kingston-Ottawa and the Montreal Pilotage Districts By-laws and maintain in force a surcharge of 25 per cent during the 1945 season on all dues except moving, detention and minimum charges. This provision is subject to review by the pilotage authority if the circumstances require.

New By-laws (11A) for the pilotage districts of Quebec and Montreal on February 26, 1945, gazetted March 31 give special preference to men from the Armed Forces or Merchant Marine. If a man has served in the Navy, Army (Active), Air Force or Merchant Marine during the present war and applies for an apprentice pilot's licence he must be retained on the list of applicants after reaching the age limit of 25 years despite his not having a Mate's Home-Trade Certificate.

Workmen's Compensation for Government Employees Outside Canada and for Persons Employed by Government-Owned Companies

An Order in Council (P.C. 1996) of March 23, 1945, gazetted April 2, extends the benefits conferred by the Government Employees' Compensation Act to employees suffering accidents outside Canada.

The Order stipulates that from November 1, 1944, in the case of any person (other than a person engaged locally in any place outside Canada) to whom the provisions of the Government Employees' Compensation Act would apply in relation to accidents occurring in Canada, who suffers injury or death from an accident occurring outside Canada, the accident is to be deemed, for the purposes of the Act, to have occurred in that Canadian

province in which the person was last resident. Compensation is payable from the War Appropriation.

The Order repeals Order in Council P.C. 142/4015 of June 5, 1941, which extended the application of the Government Employees' Compensation Act to employees of the Department of Munitions and Supply and of certain Government-owned companies while working or receiving training in the United States.

The Order does not apply in respect of any accident governed by Order in Council, P.C. 1004, (L.G. 1943, p. 390), which provides for compensation for accidents to Dominion Government employees in Newfoundland or travelling between Canada and Newfoundland, or to an accident governed by Order in Council, P.C. 37/1038, which extends the Act to persons employed by the Inspection Board of the United Kingdom and Canada or to any person to whom the Act was extended by an agreement between the Governments of Canada and the United Kingdom of October 8, 1940 (P.C. 1266).

Another Order in Council (P.C. 1997) of March 23, gazetted April 2, makes it clear that compensation in case of accident under the Government Employees' Compensation Act is payable to employees of wholly Government-owned companies and to persons serving without remuneration.

Every person, except a person engaged locally in any place outside Canada, who is employed by any Government-owned company or corporation which has been incorporated through the Department of Munitions and Supply or which is administered by the Wartime Prices and Trade Board or by the Department of Reconstruction is to be deemed to be an employee, or a Government employee, for the purposes of the Government Employees' Compensation Act, of Order in Council P.C. 1004 of Feb. 8, 1943, providing Compensation for Dominion employees in Newfoundland, and of Order in Council P.C. 3650 of May 4, 1943 which extends the Act to employees of the Canadian Government in the Yukon and Northwest Territories. Such a person as the case may be, is also deemed to be or have been engaged as a civilian employee of the Canadian Government or in the public service of Canada within the meaning of the Civilian Government Employees (War) Compensation Order (L.G. 1944, p. 1553) or of Order in Council P.C. 44/8848 of November 22, 1944, providing for compensation in case of injury as a result of airplane flights.

A person receiving no direct salary from the Government for his services but otherwise an employee within the Act or Order in Council P.C. 1004, is to be deemed to be an employee

under the Act or Order in Council. Where a claim for injury or death is made on behalf of such a person, rating shall be made according to the salary that would be paid a permanent civil servant for performing similar work. This rating must be first made by the Deputy Minister of the department concerned but may

be varied by the Minister of Transport subject to an appeal to the Treasury Board.

Compensation payable under this Order is subject to deduction of any compensation from any other source on account of the same accident, provided the person has not contributed to the compensation.

Provincial

Alberta Female Minimum Wage Act

Order No. 16 was gazetted and came into effect on February 28, 1945. It rescinds Order 15 (L.G. 1944, p. 1410).

The Order applies to all female employees in any class of employment governed by the Female Minimum Wage Act, with the following exceptions: employees exempted by an order of the Board of Industrial Relations; employees in any industry working under a schedule under the Industrial Standards Act or under the Department of Trade and Industry Act; apprentices in any business, trade or occupation, if such apprenticeship has the approval of the Board of Industrial Relations; and employees, except office workers, in hospitals and nursing homes.

"Week" is defined as the full-time hours in effect on October 1, 1944, or shorter hours established as a standard work-week by the employer or by an order of the Board of Industrial Relations.

The minimum weekly wage for experienced female employees under this Order is \$15. Inexperienced employees must receive a minimum of \$10 per week for the first month, \$12 for the second, \$14 for the third month, and \$15 thereafter. No deductions may be made for time not worked on any one statutory holiday in any one week when the employer's establishment is not open for business. Part-time employees must receive at least 35 cents per hour, provided that no employee may receive less than \$1.40 when a day consists of four consecutive hours or less, a meal-period of not more than one hour being considered as part of this period. Piece-workers must be paid a wage proportionate to the above rates, provided that the period of adjustment must not exceed one month. Overtime must be paid for at the rate of time and one-half.

The Order regulates the deductions which may be made from wages for board, lodging, uniforms, or breakages. Where meals or lodging are furnished in lieu of wages, deductions by the employer may not exceed \$2.50 for 18 meals in a full work-week of six days; \$3 for 21 meals in a week of seven days; \$1.50 for lodging for seven days; or 15 cents for single meals. No deductions may be made

for meals not taken. When a uniform is required to be worn, it must be furnished, repaired and laundered free of cost to the employee. No deductions may be made by an employer for accidental breakages.

The number of inexperienced employees may not exceed 25 per cent of the total number of workers, except where this total is less than four, when one inexperienced worker may be employed.

Alberta Hours of Work Act

An Order made March 21, 1945, and gazetted April 14, extends from April 1 to October 31, 1945, the provisions of Order 32 (L.G. 1944, p. 1410) exempting elevator repair crews of the United Grain Growers Limited, the Alberta Wheat Pool, and the Northwest Line Elevators' Association from the provisions of the Hours of Work Act.

Alberta Trade Schools Regulation Act

An Order in Council of February 13, 1945, gazetted February 28, adds two new sections to the Regulations issued under this Act (L.G. 1941, p. 959). One section provides that the number of students enrolled in any trade school may not exceed the number of students certified to by the certificates of the Medical Health Officer and the Fire Chief of the locality. A new sub-section stipulates that there must be a full-time instructor for each 20 pupils enrolled in a school giving instruction in barbering or beauty culture.

British Columbia Female Minimum Wage Act

Order 79 of March 13, 1945, gazetted March 15, establishes a minimum wage for women in telephone and telegraph occupations. The Order comes into effect April 16, 1945, and rescinds an Order of March 4, 1919, which was put in force April 5, 1920. (L.G. 1920, p. 587.)

The new Order changes the minimum wage for experienced workers from \$15 a week to \$2.30 per day. The learning period is reduced from 9 months to 6 months and three weeks. Inexperienced workers must now be paid at least \$1.50 per day for the first three weeks, \$2.10 for the next month, \$2.30 for the subse-

quent two months and \$2.50 for the next three months. Part-time workers are to be paid proportionate rates, but every employee required to report must be paid for at least three hours.

No change has been made in the provisions concerning hours of work. No employee may be required to work more than eight hours a day or 48 hours per week except (1) where she lives on the premises and has made an agreement with the employer, which has been approved by the Board, to answer emergency calls between 10 p.m. and 8 a.m. or (2) during an emergency period when the maximum hours may be extended to 56 in a week, and time worked in excess of 48 is paid for at a rate of time and a half. Where the employer and a trade-union or employees' organization have an agreement providing for other hours of work and overtime rates, the Board, on a joint application from the parties may exempt them from the sections of the Order concerning hours.

Hours of employees working on split shifts must be confined to the 12-hour period immediately following the commencement of work. Every worker must be given a rest period of 24 consecutive hours in each week. Employers must pay, at least semi-monthly, all salaries and wages earned by employees up to a date not more than eight days before the date of payment.

British Columbia Workmen's Compensation Act

An Order in Council made March 26, 1945, and gazetted March 29, amends the Schedule of Industrial Diseases which are compensated under this Act to add cutaneous, circulatory, or blood-cell lesions or physiological endocrine change contracted in any X-ray laboratory operated in an industry or in a hospital under the Act. Dermatitis contracted in "any operation in manufacturing or wholesaling involving direct contact with cheese, sugar, or cereals" is substituted for dermatitis contracted in "any operation in manufacturing or wholesaling involving direct contact with any mite on cheese, sugar, or cereals".

Manitoba Apprenticeship Act

A proclamation of February 28, 1945, gazetted March 10, approves the trade of metal workers (sheet) within the Apprenticeship Act, 1944.

An Order in Council of March 20, 1945, gazetted March 25, and in effect on April 16, 1945, sets out rules for apprenticeship in the following trades, the length of the apprenticeship period, including the three months pro-

bationary period, being indicated in brackets after the name of the trade;

- Automobile repair mechanics and Internal Combustion Engine Mechanics (5)
- Brick-laying, Masonry, Marble-working and Tile-setting (4)
- Carpentry and Woodworking (factory) (4)
- Electrical and Electric Motor winding repair trades (4)
- Painting and Decorating (3½)
- Plastering and Lathing trades (4)
- Plumbing and Steam-fitting trades (5).

In each trade apprentices must have completed Grade IX or its equivalent. The Apprenticeship Board may reduce the period of apprenticeship where an apprentice has had previous experience in the trade or has a certificate from a technical school. Certain requirements are laid down concerning attendance at technical school:

Each automobile repair apprentice must attend full-time classes in a technical school for at least six weeks in each year of the first four years of apprenticeship.

In bricklaying, electrical work, plastering and plumbing full-time classes must be attended for two months during the winter season for the first two years. Part-time classes must be attended for not less than 140 hours during each year thereafter.

Carpenters' apprentices must attend classes full-time for two months during each of the first two years, provided that an apprentice in the carpentry trade may attend these classes between December and March, and an apprentice in wood-working may attend between February and April. Part-time classes must be attended for not less than 140 hours during each subsequent year.

Painters' apprentices must attend full-time classes for two months during the winter for the first two years, part-time for not less than 140 hours during the third year, and for not less than 70 hours during the last six months.

The ratio of apprentices to journeymen varies according to the trade and the number of journeymen employed.

An employer in the automobile repair trade who employs a qualified journeyman in the trade or who is himself the holder of a certificate of qualification may employ one apprentice. If three more mechanics are employed another apprentice may be hired; for each five additional mechanics there may be one apprentice.

A qualified brick-layer or mason or an employer who employs from one to five journeymen brick-layers may employ one apprentice. For each additional 10 journeymen one additional apprentice may be engaged.

An employer in the marble working and tile-setting trade employing a journeyman or who is himself a journeyman may employ one apprentice; for each additional four journeymen employed, one additional apprentice may be engaged.

In carpentry and woodworking and in painting and decorating one apprentice may be employed by an employer who is himself a journeyman and for each additional five journeymen employed one additional apprentice may be engaged.

In electrical work, a qualified employer may employ one apprentice; one additional apprentice may be engaged for each additional five journeymen; the ratio in existing collective agreements in force at the time these rules come into effect is to be regarded as an exception to this rule.

A qualified plasterer may employ one apprentice and may employ an additional apprentice with the approval of the director on the recommendation of the trade advisory committee after the first apprentice has entered his third year.

A plumber may employ one apprentice.

"Apprentice", for the purposes of this section does not include an apprentice temporarily employed by arrangement with the Director of Apprenticeship to learn a branch of the trade not carried on by the employer to whom he is apprenticed.

Educational classes must include courses in subjects pertaining to the industry as indicated:

In automobile repair work, motor rebuilding (1 month), fuel system (4 months); electric system (4 months); tune-up work (4 months); clutch transmission and differential (6 months); brakes (6 months); alignment, frame and steering gear (6 months); school training (6 months); miscellaneous including care and use of tools and equipment (1 month).

In electrical work, signal wiring, lighting, fixture work, joining of wires, rope work, proper use and care of tools, appliance repair, related metal work, theory, laboratory testing, trade technology, electrical training; operation, maintenance and repairs; vocational civics and English. These must be based upon "National Apprenticeship Standards for the Electrical Construction Industry, Bulletin No. 50, section 5, Content of Training", as amended by the Apprenticeship Board.

In the plastering trade plain interior plastering, plain exterior cement work, ornamental interior plastering, ornamental exterior cement work, cement gun work, with relative mathematical training, science trade terms, care and use of tools and materials, safety and first aid.

The basic training in the plumbing trade must include work processes set out in the rules and accident prevention. In steam-fitting apprentices must attend classes in accident prevention and the following: reading and working from blueprints, sketches, specifications and charts, finding exact dimensions, figuring angles, computing pressures, the properties of gases, chemicals, air, water and other elements under pressure.

During apprenticeship, the employer must give the apprentice constructive and practical training in all branches necessary to develop a practical and skilled journeyman. The apprentice must perform other duties commonly related to apprenticeship in the trade. Periodic inspection of the progress of each apprentice must be arranged by the Director of Apprenticeship. Employers must submit an annual report to the trade advisory committee concerning the progress of each apprentice. Certificates will be based on the employers recommendation and written and oral Technical School examinations. In the automobile re-

pair trade certificates may be issued to persons engaged in the trade at the time it was approved under the Act; any persons engaged in it for seven years may be given a certificate without examination, but examinations are required of any person in the trade for over five but less than seven years. Certificates in this trade are valid for one year and the fee is \$1.00.

The wage-rates fixed for apprentices are based on a percentage of the journeyman's prevailing rate:

In automobile repair work, the apprentice's rate for the first year must be at least 30 per cent of the mechanic's rate; for the second 40 per cent, for the third 50 per cent, for the fourth 60 per cent, and for the fifth year 70 per cent;

In bricklaying, the rate must be 40 per cent of the journeyman's prevailing rate for the first 12 months, 50 per cent for the second, 60 per cent for the third, and 70 per cent for the fourth;

Carpenters' apprentices must be paid not less than 35 per cent of the journeyman's maximum prevailing rate in the district for the first 6 months, 40 per cent for the second, 45 per cent for the third, 50 per cent for the fourth, 55 per cent for the fifth, 60 per cent for the sixth, 65 per cent for the seventh, and 75 per cent for the eighth;

In wood-working apprentices' rates are 35 per cent of the journeyman's rate for the first 6 months, 40 per cent for the second, 45 per cent for the third, 50 per cent for the fourth, 55 per cent for the fifth, 60 per cent for the sixth, 65 per cent for the seventh, and 70 per cent for the eighth;

In electrical work, the rate is 25 per cent for the first six months, 30 per cent for the second six months, 35 per cent for the third month, 40 per cent for the fourth, 45 per cent for the fifth, 50 per cent for the sixth, 55 per cent for the seventh, 65 per cent for the eighth, 75 per cent for the ninth and 85 per cent for the tenth six months' period;

In painting, the apprentice must be paid 30 per cent of the journeyman's rate for the first six months, 35 per cent for the second, 40 per cent for the third, 45 per cent for the fourth, 55 per cent for the fifth, 65 per cent for the sixth, and 75 per cent for the seventh;

Plasterers' apprentices are to receive 30 per cent for the first 12 months, 35 per cent for the second, 45 per cent for the third, and 60 per cent for the fourth;

Plumbers' apprentices must be paid 25 per cent of the journeyman's rate for the first six months, 30 per cent for the second, 35 per cent for the third, 40 per cent for the fourth, 45 per cent for the fifth, 50 per cent for the sixth, 57½ per cent for the seventh, 65 per cent for the eighth, 72½ per cent for the ninth, and 80 per cent for the tenth six months.

In the automobile repair trade the maximum hours may not exceed 48 in any week with a minimum wage in any event of not less than \$10 for a 48-hour week during the first year, the rate to be increased by \$2.00 in each successive year. Overtime must be paid for at corresponding rates. In other trades the work-day and work-week must be the same

as it is for journeymen, provided that males under 17 and females may not work more than 48 hours in a week.

Manitoba Minimum Wage Act

New regulations under this Act were approved by Order in Council on February 20, 1945, and came into force on March 24, 1945, rescinding all previous Orders. They apply to female workers within the scope of the Act and in some cases to male workers.

The new regulations are in five divisions: Manufacturing and General; Retail and Wholesale Establishments and Offices; Hotels, Restaurants, etc.; Places of Amusement; Male Employees not covered by Other Orders. The old regulations, in so far as they applied to women, were, for the most part, made in 1919 and 1920 and have been amended and revised from time to time. The Act was amended in 1934 to make it applicable to male workers. From the first, the Act has given the Minimum Wage Board power to limit hours of labour and to regulate conditions of work.

Provisions Applying Generally

Certain provisions are found in all five parts of the regulations; others are common to two or more parts.

In no undertaking within the regulations may a child under 15 be employed except with a permit from the Minister of Labour.

The minimum rates apply to a 48-hour week, and all time worked in excess of 9 hours in a day or 48 in a week must be paid at the minimum rate plus 5 cents an hour. No person may be required to work overtime for more than 120 hours in a year nor for more than 3 hours in a day or 6 in a week. Similarly, where workers are employed for less than 24 hours a week, the hourly rate must be at least the regular minimum increased by 5 cents. Workers required to report must be paid for at least three hours; formerly, the minimum time in this case was two hours. Permits authorizing modification of, or exemption from, any provision of the regulations may be issued by the Minister where emergency conditions exist.

Former requirements re-enacted in all divisions of these regulations stipulate that an employee's wages must be paid in full in cash once a week and within three days of their being earned unless a permit for a different pay period is obtained from the Minister, that no reduction may be made in the minimum rate by reason of any statutory holiday and that except on permit from the Minister no employee may be required to work on a holiday. A new provision requires

that, where a permit has been granted, the minimum rate must be increased by 5 cents an hour and, in addition, a full day's holiday with pay at the regular rate must be granted to the employee during the year.

Different minimum rates are established, as before, for urban and rural areas, but there is no longer a distinction made on the ground of age except in Division V applying to male employees.

Manufacturing and General

Division I of the regulations (Manufacturing and General) applies, as did Order No. I of April 26, 1936, (L.G. 1936, p. 610), which it replaces, to employment in Manitoba in occupations in which articles are manufactured, altered, dyed, washed, cleaned, repaired, printed, packed and adapted for sale and delivery, including sale and delivery of such articles. In addition, it applies to assembling of articles and to occupations which are not specifically included in any other Order or Regulation. Unlike the 1936 Order, Division I applies to female workers only.

Wage rates for city and urban districts, i.e., the Greater Winnipeg Water District, Flin Flon, Brandon and Portage la Prairie, are based on a 48-hour week and are as follows:

For experienced employees or those in an occupation which does not require skill or training, \$14.40 a week or 30 cents an hour;

For inexperienced employees in an occupation requiring skill or training, \$9.60 a week or 20 cents an hour for the first two months, \$11.52 a week or 24 cents an hour for the second two months, \$12.96 or 27 cents an hour for the third two months and the full minimum wage for inexperienced workers thereafter.

The new rates represent an increase over the former minimum rates of \$2.40 a week for experienced workers, an increase of 60 cents a week in the starting rate and a reduction in the learning period from 12 to 6 months. For workers under 18 the old Order established lower rates; the age distinction is no longer made.

Rural rates of wages under the new Regulations are \$12.48 a week or 26 cents an hour for experienced workers and those in occupations not requiring skill or training, and for inexperienced employees on skilled work \$7.68 a week or 16 cents an hour for the first two months, \$9.60 or 20 cents an hour for the second two months, and \$11.04 or 23 cents an hour for the third two months.

Rural rates under the former Order were \$2 per week less than the city rates for the same class of work.

The number of inexperienced employees may not exceed 25 per cent of the total, except with the permission of the Minister of Labour.

Wages set by an apprenticeship agreement are to supersede those fixed by the Order where the employer has undertaken to have the apprentice taught a skilled trade or calling over a period of not less than one or more than two years, provided that a copy of the agreement is approved by the Minister of Labour.

As regards working conditions, a new rule requires every worker to be allowed, without deduction of pay, a ten-minute rest period in every four hours of work. As formerly, one hour must be allowed for lunch. Sections of the former Order which are embodied in the new one, without material change, require clean premises, fresh drinking water and individual towels and cups, proper lighting, 400 cubic feet of air-space per employee, adequate ventilation, proper washing facilities and sanitary conveniences, maintenance of a comfortable temperature, guarding of machinery, provision for first aid, precautions against industrial diseases, suitable provision for employees to rest and take their meals, posting of regulations and keeping of records.

Retail and Wholesale Establishments and Offices

Division II of the Regulations governs female employees in retail and wholesale establishments and offices throughout the Province.

Minimum rates for experienced and inexperienced workers in all districts are identical with those in Division I. In addition, there is a schedule of rates for delivery and messenger girls, who are to be paid at the following rates:

In city and urban districts, \$9.60 per week or 20 cents per hour for the first two months, \$11.04 or 23 cents for the second two months and \$12.00 or 25 cents thereafter.

Rural rates for messengers are \$7.68 a week or 16 cents an hour for the first two months, \$8.64 or 18 cents for the next two months and \$9.69 or 20 cents thereafter. In all cases a messenger providing a bicycle is to be paid 50 cents a week extra.

The new minimum wage represents an increase of \$2.40 a week for experienced workers over those paid under the former Order covering department stores and mail order houses in cities and a slight increase in learners' rates with a shortening of the learning period which was formerly one year. For office workers there is an increase of \$1.90 a week for experienced workers, with a re-arrangement of the learning period.

A rest period of at least ten minutes must be allowed in each four-hour work-period without reduction of pay. Formerly a fifteen-minute rest-period in every three hours was

required to be given in retail and wholesale establishments. The percentage of part-time employees may not exceed 25 per cent of the total staff, except on Saturdays and during the two weeks preceding Easter and from November 15 to December 24, when not more than 40 per cent may be employed. Where the employer requires a special uniform to be worn he must provide it and have it laundered, repaired and replaced without cost to the employee. This provision was formerly included only in the Order relating to hotels and restaurants.

Hotels Restaurants, etc.

Division III of the new Regulations applies to female employees and bell-boys in hotels, restaurants, clubs, victualling houses and refreshment stands. City and urban minimum wage rates are \$10 a week for bell-boys and \$14.40 a week or 30 cents an hour for experienced employees other than bell-boys. Inexperienced workers, other than bell-boys, may be paid \$12 a week or 25 cents an hour for the first three months, after which they are to receive the full minimum rate. Rural rates are \$8 a week for bell-boys and \$12.48 a week or 26 cents an hour for experienced employees other than bell-boys. Inexperienced workers, other than bell-boys, may be paid \$9.60 a week or 20 cents an hour for the first three months of employment after which they are to receive the full minimum wage. Any employee required to work on a statutory holiday must be given a full day's holiday within the same year at the regular rate of wages.

Working hours must be arranged so that no work period for female employees will end between 1 a.m. and 6 a.m. and half an hour must be allowed for each meal exclusive of regular working hours. One day or two half-days off duty must be allowed each week. If a uniform or special type of dress is required it must be furnished and laundered without cost to the employee. Where the employer furnishes board and lodging he may deduct not more than \$2.50 a week for room rent and \$4.50 a week for board or 25 cents a meal.

The former Order relating to these establishments provided that in the greater Winnipeg Water District, Brandon, Portage la Prairie, Dauphin, Neepawa, Souris, Carberry and Virdin and in the municipal district of Flin Flon, at any time, and in summer resorts during the period June-September, bell-boys should receive \$10 a week and experienced employees other than bell-boys, \$13. Inexperienced workers other than bell-boys received \$11 per week for the first month and

\$12 for the second month of employment. No work-period for female employees was allowed to end between 1 a.m. and 6 a.m. In other parts of the Province \$2 per week less than the above rates constituted the minimum wage and the maximum work-week was 52 hours. No overtime was allowed in the greater Winnipeg Water District except on permit.

The former Order required one day off duty each week, forbade employment of persons under 16, and made similar provisions to those in the new Order relating to time of paying wages, keeping of records, deduction for board and lodging, provision and laundering of uniforms, and posting of Orders. It also required that after four weeks' employment three days' notice of dismissal must be given by the employer and the same period of notice by an employee leaving employment, except in case of flagrant insubordination on the part of the employee or flagrantly unjust treatment by the employer. Provisions relating to temperature of premises, ventilation, etc., were similar to those in the new Regulations.

Places of Amusement

Division IV of the new Regulations covers employment of females in places of amusement, as defined in the Amusements Act, and of pin-setters in bowling alleys. The minimum wage for female employees in places of amusement in urban districts is \$14.40 a week or 30 cents an hour and in rural districts \$12.48 per week or 26 cents per hour, based on a 48-hour week in both cases.

Provisions limiting overtime and requiring special payment for it and those relating to special uniforms, weekly payment of wages, keeping of records, posting of orders and granting of permits of exemption, are the same as under the other Divisions.

A new rule for places of amusement stipulates that where the employer requires a special uniform he must provide it and have it laundered.

Minimum rates for male and female pin-setters in bowling alleys are 3 cents per line setting up five pins and 4 cents per line setting up ten pins, with a minimum payment of \$10 per week of 48 hours.

The former Order dealing with places of amusement, which applied only to female workers in Winnipeg, St. Boniface, St. James and Brandon, fixed a minimum wage of \$12 per week for ticket-sellers and ushers, except for those working less than 40 hours per week whose minimum was 30 cents an hour. For cleaners the minimum wage was 35 cents an hour. Maximum hours were 9 per day and

48 per week and, except for cleaners, no work was permitted between 11 p.m. and 9 a.m. or on Sunday. Overtime was allowed only in emergencies, on permit from the Bureau of Labour, and was limited to 3 hours a day, 6 hours a week and 36 days a year, with extra payment at the regular rate. Minors under 18 years of age might not be employed.

Male Employees

Division V of the new Order applies to male workers in all occupations except farming, market gardening and those covered by special Orders. Boys under 15 may not be employed, except under a permit from the Minister, and it is forbidden to employ or permit a male worker over 15 to be employed at a less wage than that fixed by the Order except under a regulation of the Minimum Wage Board.

Rates for employees less than 18 years of age are 20 cents, 24 cents and 27 cents an hour for three periods of two months each, respectively, and 30 cents an hour thereafter. Inexperienced workers over 18 in an occupation which requires skill or training are to receive 25 cents, 28 cents and 32 cents an hour for three respective periods of one month each and 35 cents an hour thereafter. Where no skill or training is required, the minimum rate for workers over 18 is 35 cents an hour. The minimum for delivery and messenger boys is 20 cents an hour for the first two months, 23 cents for the second two months and 25 cents thereafter with an additional 50 cents a week where the employee provides a bicycle. Time worked in excess of 48 hours in a week is to be deemed overtime, except where it is otherwise provided by a collective agreement.

Quebec Minimum Wage Act

The following Ordinances have been renewed until January 1, 1947, by Orders made February 15, 1945, and gazetted March 17: Order 4 concerning commercial and industrial establishments; Order 5 governing the silk textile industry; Order 15 regarding the packing and grading of waste paper; and Order 10 governing the pasteurization, manufacture and/or distribution of dairy products.

Ordinance 39 governing forest operations was amended by an Order of March 24, 1945, gazetted March 31, to stipulate that the Order shall not apply to workers handling wood in mill storage ponds supplying a mill or serving as a loading place for the wood on to railroad cars or other transport vehicles, provided that these ponds are not more than two miles from

the mill or loading place. Workers in a "forest colony" or employed by a farmer or settler on a wood lot which forms part of a farm and those working in a township forest reserve for a "non-professional" employer are also exempt from the Order.

Saskatchewan Old Age and Blind Persons' Pensions Act

An Order in Council (496/45) of April 6, 1945, gazetted April 16 and effective March 30, 1945, rescinds regulations under this Act made in 1928, 1936, 1937 and 1943 and sets forth new regulations governing the payment of pensions.

The Social Welfare Board must meet at least monthly or as often as necessary to consider applications for pensions or for increases and decreases. The Board must determine the pension that may be paid to each applicant and advise the Minister regarding the carrying into effect of the Act and regulations. The Director of Old Age Pensions must keep necessary books and records, inquire into all applications for pensions and advise the Board concerning them. Each applicant must complete the necessary forms and produce any proof of his claim that the Director may demand. No pension may be paid, altered or withdrawn without the approval of the Board.

Payment of any pension or of any expense incurred in administration will be made by the Provincial Treasurer upon a requisition in writing signed by an authorized person. Pension payments are made by cheque issued at the end of each month. When a pension begins on a day other than the first day of the month, the first payment is to be a proportionate amount. Each cheque must be endorsed by the payee in the presence of a witness who must sign a declaration, except where a trustee is appointed in which case the cheque is made out directly to the trustee.

Each pensioner when required by the Director must furnish a statutory declaration or a witnessed certificate stating that he is the person to whom the pension is payable. The Director may obtain from any Saskatchewan Government department any available information which he may deem necessary in the administration of the Act or of the Dominion Old Age Pensions Act.

Saskatchewan Government Employees Cost-of-Living Bonus and Higher Minimum

An Order in Council (205/45) of February 6, 1945, gazetted February 28, rescinds the present cost-of-living bonus paid to Government employees from February 1, 1945, and establishes a higher rate.

Where an employee is a married man, a widow, widower or married woman with dependent children under 18 and receives a salary of less than \$2,400 a year, he or she is entitled to a bonus of \$20 per month, provided the combined salary and bonus do not exceed \$2,400 a year.

Single employees and those not included in the above will receive \$12.50 per month where the salary is less than \$2,100 a year and the combined salary and bonus do not exceed this amount. Part-time employees will receive a proportionate amount.

Where both husband and wife are employed in the Government service, the total bonus to both must not exceed \$25 per month.

An Order (O. C. 206/45) of February, 6, 1945, gazetted February 28, provides for increased rates of remuneration (exclusive of the cost-of-living bonus) for all Government employees. From February 1, 1945, the schedules of salary rates of \$960 or less per year are to be increased by \$30 per year. Part-time employees will receive a proportionate rate of increase.

Prices

Prices, Retail and Wholesale, in Canada, April, 1945

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index remained unchanged on April 2, 1945, at 118.7. There was a reduction in the fuel and light group from 107.3 in March to 106.7 for April, and an increase in clothing from 121.7 to 121.8, but these changes were insufficient to alter the general index. The decline in fuel and light reflected further decreases in electricity rates mainly in Ontario and the Maritime area. The April 2 domestic electricity rate index of 86.7 is substantially below pre-war levels. Scattered price changes in foods were all of minor character, and left the food group unchanged at 131.0. Other group indexes were also the same as for March, rentals at 112.0, home-furnishings and services at 118.5, and miscellaneous items at 109.2.

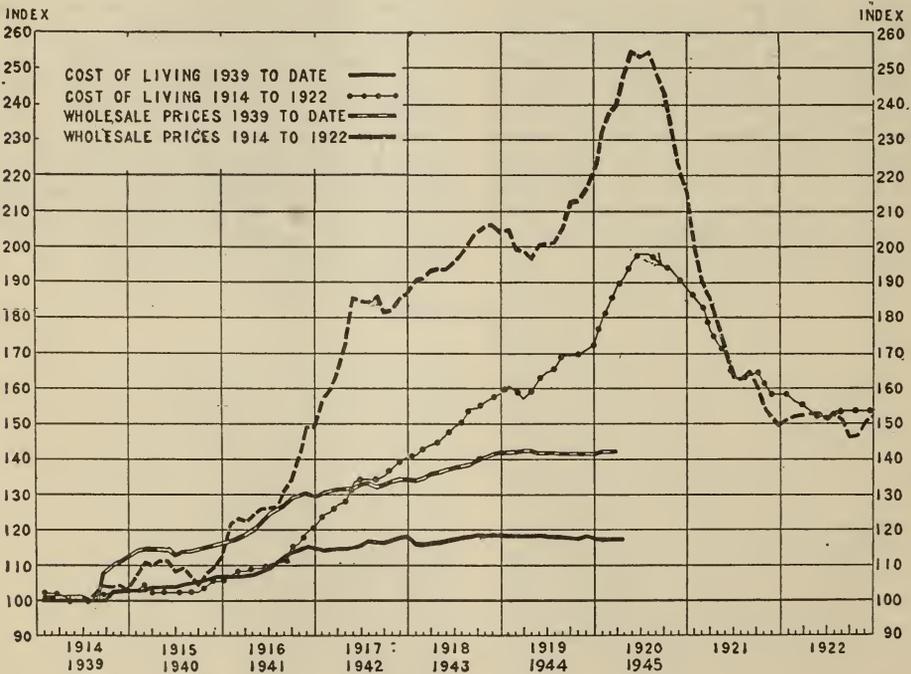

With the exception of the decline of 2.0 points in the electricity rates index, April changes were all of a minor nature. The electricity decrease represented a combination of outright rate reductions and rebates, the latter being spread over the year following their announcement. Small balancing price variations in the food section included scattered increases for meats and vegetables and declines for eggs.

On the base August 1939=100, bi-monthly cost-of-living indexes for eight regional cities moved higher between February 1 and April 2, 1945, with one exception of Halifax. A decline of 0.1 to 118.7 at this latter centre reflected a sharp drop in the fuel and lighting section index due to lower domestic electricity rates. At other points higher food prices were

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1945

BASE: PRICES IN JULY, 1914 and in AUGUST, 1939=100

* Based on the 1926 average as 100 per cent.

primarily responsible for increases in living costs. Toronto, up 0.3 at 116.8, recorded the sharpest advance, while the following April indexes indicated advances of 0.2; Saint John at 118.8; Winnipeg at 116.2; Saskatoon at 119.6; Edmonton at 116.2, and Vancouver at 117.8. Montreal at 121.0 was 0.1 higher.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices was not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the

percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent); \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.20; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title *Activities of the Wartime Prices and Trade Board*.

Wholesale Prices, March, 1945

The Dominion Bureau of Statistics composite monthly index of wholesale prices recorded a further gain of 0.1 to 103.0 between February and March. Upturns occurred in three of the eight major groups with the other five remaining unchanged. Vegetable products moved 0.2 points higher to 96.0 reflecting firmer quotations for potatoes, rye, hay,

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

(c) Corn Syrup changed from a 3½ pound jar to a 2 pound tin.

oranges and raw leaf tobacco which outweighed declines in lemons and onions. In the animal products group increases for steers, hogs, lambs and eggs more than counterbalanced weakness in furs, calves and butter, to move the index up 0.1 to 107.0, while a gain of 0.4 to 103.1 in the non-metallic minerals group was due to a higher price for imported American bituminous coal. March index levels for the remaining groups were: fibres, textiles and textile products 91.7; wood, wood products and paper 118.3; iron and its

products 117.2; non-ferrous metals 79.7, and chemicals and allied products 100.1.

Higher price levels for both field and animal products were responsible for a gain of 0.5 to 105.1 in the composite index of Canadian farm products between February and March. Strength in prices of potatoes, hay and raw leaf tobacco outweighed a decrease in onions to advance field products 0.2 to 94.0, while a firmer tone for livestock and eggs was sufficient to move the animal products section up 0.9 to 123.6.

Price Movements in Canada and Other Countries

THERE was little net change in world wholesale price indexes in the first quarter of 1945 though the general trend continued upward. Between December 1944 and March 1945 the composite index of Canadian wholesale prices rose 0.5 points to 103.0 (1926=100). Increases were confined mainly to primary products, notably vegetables, livestock, raw furs and coal. The Bureau of Labor Statistics

wholesale index for the United States rose 0.5 points to 105.2 (1926=100) between December and February, influenced by higher quotations for farm products. Prices for home furnishings registered moderate increases during this period also. United Kingdom wholesale prices were steady as indicated by the Board of Trade index which remained unchanged between December and February at

(a) First of month. (b) Middle of month. (c) Last week of month. (d) Quarterly. (e) New wartime price series on base December 1942 = 1000, computed quarterly beginning March, 1943. (f) Yearly averages are for period from July of preceding year to June of year specified. (g) July. (h) June. (i) Revised.

167.2 (1930=100). Indexes for Latin-American countries continued to advance. The Argentine wholesale series on the base 1926=100 touched 217.0 in February 1945 compared with 215.7 in December, while a similar series for Chile reached a new peak of 879.7 in December 1944. In the Far East, the Indian index (Calcutta series) weakened slightly to 299 in January as compared with 301 in December. Cereals were lower while tea and raw cotton prices were higher. Australian wholesale prices moved slightly higher at the beginning of 1945, the composite index closing up 2 points at 1402 (July 1936-June 1939=1000) while the official series for New Zealand moved down 7 points to 1570 (1926-30=1000).

Movements in living cost indexes closely paralleled wholesale price changes in the opening quarter of 1945. Higher food prices were mainly responsible for a gain of 0.2 to 118.7 (1935-39=100) in the Canadian cost-of-

living index between December and March, while living costs in the United States moved down 0.2 to 126.8 (1935-39=100) between December and February, due mainly to a reduction in foods. On the base July, 1914=100, the United Kingdom cost-of-living series moved up 1 point to 202 between December and January where it remained until March. Australian living costs declined in the first quarter of 1945; an index for six capital cities eased 4 points to 1266 (June 1939=1000) in March, with lower clothing prices responsible for the reduction. In South America, the Peruvian cost-of-living index reached 193.2 (1913=100) in January or 3.9 points over December and reflected higher price levels for foods and miscellaneous items. An index of living costs for 9 towns in South Africa recorded a gain of 4 points to 1315 (1938=1000) in the opening month of 1945.

Industrial Hygiene in Ontario

One-third of the employees in manufacturing industries in Ontario were receiving physical examination by the spring of 1943, according to the nineteenth annual report of the Ontario Department of Health. The report also indicates that at that time there were 53 full-time and 162 part-time physicians and 479 graduate nurses employed on a retainer basis for the supervision of health. These are in addition to the number of "contract" physicians responsible for the treatment of illness of employees in unorganized territory in such industries as mining, pulp and paper manufacturing and lumbering. It is pointed out that "all such appointments have been made on a purely voluntary basis by employers who realize the importance of general health and have acted accordingly."

The Division of Industrial Hygiene of the Department of Health supplied whatever advice and assistance it could to extend such services to plants that were not provided with them. Difficulties arising from war conditions, which have appropriated many physicians for the Armed Services, have retarded progress temporarily. However, assistance was given in the detection and control of special health hazards by the physicians, chemists and engineers of the Division. These services were not intended primarily for the treatment of disease, but were mainly for purposes of prevention. It is asserted that "employees respond to health service in the factory, if it is of a high standard and convenient."

An industrial nurse-consulting service was added to the Division during the year, which

kept in close touch with nurses in industry, so that they might be informed of the procedures which had been most effective in industry elsewhere.

The Division conducted numerous laboratory tests in connection with occupational diseases, such as lead poisoning, silicosis, skin eruptions and disabilities caused by exposure to noxious vapours and gases. To combat tuberculosis 48,127 workers received X-ray examinations. Of these, 591 cases were disclosed; 128 were probably active, 134 were doubtful and 329 were apparently old cases. Some 53 of these cases were undergoing treatment in sanatoria and others were under observation. The X-ray examinations also disclosed 559 abnormalities of the heart and great blood vessels.

The provincial chemical laboratory analysed during 1943, about 800 samples of materials from 25 types of industry, covering 187 companies and involving 92 visits to factories for observation or collection of air samples relative to a variety of health hazards.

Sanitary inspection of factory cafeterias served to emphasize the need for close attention, if food poisoning was to be avoided, especially in many small factories where maintenance of food facilities require improvement. This was notably the case in the matter of cleanliness of dishes and cooking utensils.

Owing to wartime conditions, some difficulty was encountered in obtaining a sufficient number of inspectors for sanitary supervision in unorganized communities in Northern Ontario.

Old Age and Blind Pensioners in Canada

Financial and Statistical Summary as at March 31, 1945

IN the accompanying tables, which have been prepared by the Department of Finance, information is given concerning the Old Age Pensions Act and the amendment to that Act for the payment of pensions to blind persons.

Old Age Pensions

The Act provides for the establishment of a Dominion-Provincial pensions system to be effective in such provinces as might enact and give effect to special legislation for this purpose. All the provinces are now participating.

Under the Old Age Pensions Act a pension is payable to any British subject of 70 years and over who is not in receipt of an income of as much as \$425* a year and who has resided in Canada for the 20 years, and in the province in which the application is made for the five years immediately preceding the date of the proposed commencement of pension. The Act also provides that an applicant must not have assigned or transferred property for the purpose of qualifying for a pension. Indians, as defined by the Indian Act, are not eligible to receive old age pensions.

The maximum amount of pension payable under the Act is \$300* yearly. In cases where pensioners have a private income the amount of their old age pension is subject to reduction by the amount that their private income exceeds \$125* a year.

Under the provisions of the Act as it was first passed, the Department of Labour of Canada (then the administering Department) paid quarterly to each province one-half of the net sum paid by the provincial pension authority during the preceding three months. At the 1931 session of the Dominion Parliament, however, the Act was amended, the amount of the Dominion contribution being increased from fifty to seventy-five per cent of the net sum.

In order to avoid duplication of departmental activities and to secure centralization of responsibility in carrying out the provisions of the Act, which involves accounting control and supervision, the administration of the Old Age Pensions Act was by Order in Council dated March 1, 1935, transferred to the Department of Finance from April 1, 1935.

Pensions for the Blind

An amendment to the Old Age Pensions Act, assented to on March 31, 1937 (L.G., May, 1937, p. 503) provides for the payment of pensions to blind persons who have attained the age of 40 years and have fulfilled other conditions set forth in the Act. Such persons must be so incapacitated by blindness as to be unable to perform any work for which eyesight is essential, and must not be in receipt of a pension or allowance in respect of blindness under the Pension Act or the War Veterans' Allowance Act.

The maximum pension payable to a blind person, whether married or unmarried, is \$300* per annum. If, however, a blind person marries another blind person after March 31, 1937, the maximum pension is reduced to \$150*. If a pensioner is unmarried the maximum pension is reduced by the amount of his income from earnings or other sources in excess of \$200* a year. If a pensioner is married to a person not receiving a pension in respect of blindness, his income is deemed to be the total income of himself and his spouse (including any old age pension payable to the spouse) less the sum of \$225*, and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$400*. If a pensioner is married to a person receiving a pension in respect of blindness, his income is deemed to be one-half the total income of himself and his spouse (excluding the pension in respect of blindness payable to his spouse) and the maximum pension is reduced by the amount by which his income, so calculated, exceeds \$200*.

Under agreements negotiated between the Dominion and the Provinces, the Dominion contributes 75 per cent of the cost of pensions to blind persons, the provinces assuming the remainder of the cost of such pensions.

The accompanying tabular statistics indicate the extent of operations under this amendment to the Old Age Pensions Act.

*Amended by Orders in Council P.C. 6367, August 10, 1943, and P.C. 3377, May 29, 1944, passed under the authority of the War Measures Act.

Fatal Industrial Accidents in Canada During the First Quarter of 1945

DURING the first quarter of 1945 there were 283 fatal industrial accidents, including deaths from industrial diseases reported by workmen's compensation boards, etc. This compares with 227 fatal accidents during the first quarter of 1944. Of the 283 fatalities during the period under review, 89 occurred in January, 100 in February and 94 in March. Fatal accidents during each year are recorded by quarterly periods in the issues of the *LABOUR GAZETTE* for May, August and November of that year, and in February of the following year.

The supplementary list of accidents not reported in time for inclusion in the reports covering the periods in which they occurred contain 41 fatalities for 1944.

In this series of reports it is customary to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the *LABOUR GAZETTE* and newspaper reports.

Classified by groups of industries the fatalities occurring during the first quarter of 1945 were as follows: agriculture, 18; logging, 31; mining, non-ferrous smelting and quarrying, 59; manufacturing, 59; construction, 22; central electric stations, 1; transportation and public utilities, 64; trade, 10; service, 19.

Of the mining accidents, 40 were in "metalliferous mining," 16 in "coal mining," two in "non-metallic mineral mining and quarrying, n.e.s." and one in "structural materials."

Of the accidents in manufacturing, four were in "vegetable foods, drink and tobacco," five in "textiles and clothing," six in "saw and planing mill products," two in "wood products," five in "pulp paper and paper products," 19 in "iron, steel and products," two in "non-ferrous metal products," four in "non-metallic mineral products," eight in "chemical and allied products," and four in "shipbuilding."

In construction there were 10 fatalities in "buildings and structures," two in "highway and bridge," and 10 in "miscellaneous."

In transportation and public utilities, there were 32 fatalities in "steam railways," 16 in "water transportation," seven in "air trans-

FATAL INDUSTRIAL ACCIDENTS IN CANADA DURING THE FIRST QUARTER OF 1945, BY
GROUPS OF INDUSTRIES AND CAUSES

portation," and nine in "local and highway transportation."

In trade there were five fatalities in "wholesale," and five in "retail."

Of the fatalities in service, 14 were in "public administration," one in "recreational," three in "personal, domestic and business," and one in "professional."

There was one disaster during the period under review which occurred in a mine, near Timmins, Ontario, on February 2, when a double deck mine cage plunged 1,500 feet to the bottom of a shaft, killing 16 miners who were in the cage when a hoist cable broke. The coroner's jury in its verdict attached no blame to anyone, but made recommendations for greater safety in mine hoisting operations.

A serious accident occurred on March 16, when a gasboat capsized in the treacherous waters of Seymour Narrows, B.C., and nine men employed by a dredging company were drowned. The men were attempting to string cables across from Maud Island to the main land, which were to support a drill barge while holes were being drilled and explosives placed, in an effort to remove Ripple Rock, which has been the cause of dangerous whirlpools in the Narrows.

When an explosion wrecked a freighter which was being loaded with explosives, at Vancouver, on March 6, eight men including six longshoremen and two crew members lost their lives and several others were injured in the fire following terrific explosions which rocked surrounding buildings, and broke many windows.

Other accidents involving the loss of two or more lives were as follows:

When a brick wall crashed down on a truck they were loading while demolishing a building, four labourers were killed, at Chicoutimi, Quebec, on March 24.

On March 8, two textiles chemicals plant workers were killed in an explosion that demolished the factory, in Hamilton, Ontario.

When an engine left the rails and went over an embankment, an engineer and a fireman were killed, at Brantford, Ontario, on February 1.

In aircraft ferrying, a pilot and a radio officer were killed in a plane crash, at Amherst, N.S., on February 4, and on February 6, a pilot, a co-pilot and a radio officer lost their lives in a plane crash en route from Dorval, Quebec, to Bermuda.

While engaged in snow removal, two labourers were asphyxiated by carbon monoxide gas in the cab of a tractor, at Sherbrooke, Quebec, on January 17. Two firemen lost their lives when crushed under a collapsing wall during a fire, at Winnipeg, Manitoba, on March 24.

Supplementary List of Accidents

A supplementary list of accidents occurring in 1944 has been compiled which contains 41 fatalities, of which five were in logging, six in fishing and trapping, four in mining, non-ferrous smelting and quarrying, seven in manufacturing, one in construction, 13 in transportation and public utilities, three in trade, and two in service. One of these accidents occurred in February, one in May, one in July, one in August, three in September, one in October, six in November and 27 in December.

Workmen's Compensation in Nova Scotia and Manitoba

THE Annual Reports for the year 1944 of the Workmen's Compensation Boards of Nova Scotia, New Brunswick and Manitoba

have recently been issued. A brief summary of each of these Reports appears below.

Nova Scotia

Rising industrial activity during the early years of the war was paralleled by a steady increase in the number of industrial accidents in Nova Scotia. This was indicated in the report of the Workmen's Compensation Board for that province for the calendar year 1944. There were, however, 1,048 fewer such accidents in 1943 as compared with 1942, but in 1944 the number had increased by 361 over 1943. The total number of accidents for each

of the past four years (1940-1944) was as follows: 1940, 14,699; 1941, 16,819; 1942, 19,714; 1943, 18,666; 1944, 19,027.

Industrial accidents during 1944 were classified as follows:

Fatal accidents, dependency established and compensation commenced.....	48
Fatal accidents, burial expenses paid, no dependents	10

Fatal accidents reported, pending adjustment	3
Accidents causing permanent partial disability	157
Accidents causing total disability for seven days or over	8,732
Accidents where medical aid only was paid	7,299
Accidents pending adjustment, no payments	1,813
Accidents not compensable (other than fatal)	965
Total	19,027

The seven classes of industries from which assessments were derived, together with the amounts contributed by each in 1944 were as follows:

Mining	\$1,384,496.20
Lumbering and woodworking....	340,662.37
Iron and Steel.....	330,208.43
Manufacturing and operating not otherwise specified	185,527.03
Building and construction.....	211,632.91
Public utilities	130,845.86
Transportation	543,981.12
Total	\$3,127,353.92

The report points out that as industry must pay the total cost of compensation for industrial accidents, there was a tangible incentive to prevent such accidents in every way possible. The total of all payrolls on which assessments were levied in 1944 exceeded \$120,680,000 and represented the activities of nearly 3,000 employers.

Assessment rates for the various groups in all classes of industries vary as the accumulated experience for each of the seven industrial classes assessed, changes. The average assessment rate for 1944 was \$2.53 and for 1943, \$2.43 per \$100 of payroll.

Penalties, interest and estimated adjustments increased the total income to \$3,357,512.50.

The total expenditure, actual and estimated for 1944 amounted to \$3,354,727.74 under the following headings: Compensation paid other than pensions, \$514,442.45; transferred to reserves for pension awards, \$337,559.76; paid for medical aid, \$114,946.90; administration, \$128,242.31; safety association, \$12,253.21; compensation estimated outstanding \$2,190,478.11; estimated to complete medical aid claims, \$56,805.

Manitoba

A total of 16,229 accidents were reported during 1944 to the Manitoba Workmen's Compensation Board, according to its report covering the operations of the Board during the last calendar year. Accidents in 1943 numbered 16,387 including 48 fatalities. Details of the accidents as reported by the various groups for the last two years are as follows:

Group	1943	1944
Steam railways	2,391	2,410
Province of Manitoba.....	222	208
City of Winnipeg.....	356	383
General body of employers....	12,124	11,539
Winnipeg Electric Co.	237	237
Dominion Government	1,057	1,452
Total	16,387	16,229

The report also shows, that on December 31, 1944, the Board had on its books as in receipt of pension 557 dependents of workmen killed

in industry during the period March 1, 1917 to December 31, 1944.

The total actual payroll for all classes for 1943 was \$113,314,436.02. The largest group was that of the general body of employers with a total of \$68,874,780, while the Canadian Pacific and the Canadian National railways had payrolls of \$11,988,789.97 and \$14,186,442.77 respectively.

During 1944, the actual cash disbursed by the Board (less investments) amounted to \$1,304,374.09, as compared with \$1,229,221.86 disbursed during 1943.

The report also contains a detailed analysis of compensable accident claims for 1943. The accident claims were classified by causes as follows: Prime movers, 177; working machines, 514; hoisting apparatus, 117; dangerous substances, 365; stepping on or striking against objects, 754; falling objects, 815; handling objects, 1,618; tools, 421; runaways and animals, 81; moving trains and vehicles, 202; falls of persons, 1,094; all other causes, 503.

[NUMBER 6

Notes of Current Interest

War production continues until defeat of Japan

On May 9, Hon. C. D. Howe, Minister of Munitions and Supply, issued a statement dealing with Canada's plans for war production during the war against Japan.

"Now that victory in Europe has been officially declared, Canadian war plants must concentrate their effort toward the quick defeat of Japan," he stated.

The Minister emphasized that Canadian war production will continue at a high level. He said that plans developed in readiness for V-E Day, or entry into Stage 2 of the war, will go into effect immediately. He appealed to all war plant personnel to stay on the job and see the war through to a definite and victorious conclusion.

Anticipating the collapse of Germany, which now has become a reality, readjustments in various programs already have been made, with the result that the general change-over will not have so marked an effect on the Canadian economy as otherwise would have been the case.

"In short," said Mr. Howe, "the entry into Stage 2 of the war and the gradual conversion from war to peacetime production, having been planned for in advance, will be effected with a minimum of disturbance."

Briefly, Canada's war production picture for the immediate future, based on present information supplied by the United Kingdom and the United States, is as follows:

Aircraft: Production will continue indefinitely with emphasis on most recent models of combat aircraft and with reduction of trainer plane output.

Shipbuilding: Continued high rate of deliveries well into 1946. The ship repairs program, already substantial, may increase.

Gun and small arms ammunition: Progressive cutback, possibly by as much as 50 per cent of the present rate by the end of the year.

Chemicals and explosives: Cutback in explosives in line with ammunition demands. Chemical production for agricultural and other industrial needs will continue at high rate.

Armoured vehicles: Production will decline sharply.

Automotive vehicles: Partial conversion from military to civilian requirements will keep factories fully engaged.

Railway equipment: Production will continue at an even higher rate to supply domestic and foreign demands.

Instruments and signals devices: Cutback already in effect. Present production rate will not change materially.

Defence construction: Program virtually completed.

Miscellaneous military stores: Not much change with demands continuing heavy.

Raw and semi-processed materials: War and civilian demands will continue to be heavy.

"Production of civilian necessities, so long deferred by the war, together with production for export to the liberated countries, will absorb manpower released by a lessening of war production, and this summer the labour demand will still be heavy," Mr. Howe stated.

The Minister paid tribute to the plans already laid by most of Canada's industries for this period, in many of which the reconversion will mean simply the moving of workers from one machine to another.

Employment and industrial statistics

The table on page 793 shows the latest statistics available reflecting industrial conditions in Canada.

In conformity with the trend in twenty of the previous twenty-four years of the record, industrial employment throughout Canada showed curtailment at the beginning of April, according to figures published by the Dominion Bureau of Statistics. This is the fourth successive month in which the index has receded. The general decline approximated that reported at April 1; 1944. Comparative index figures to the 176.9 for April 1 are 178.2 for March 1, 180.5 on April 1, 1944 and 104.9 for April 1, 1939. The seasonally-adjusted index showed an upward movement, advancing from 185.7 at March 1 to 187.4 at the date under review.

The 15,189 firms reporting to the Bureau showed a total working force of 1,803,015 at the date under review, which was a reduction of 0.7 per cent from the month preceding. The weekly salaries and wages paid to these employees decreased by 3.2 per cent to \$57,694,461, due to loss of working time during the Easter holidays as well as from reductions in personnel. Per capita weekly earnings declined to \$32.00 at April 1 from \$32.81 at the previous month and \$32.37 at April 1 of last year.

Most of the employment recession took place in manufacturing and logging. The contraction in manufacturing as a whole was contra-seasonal, although it repeats that indicated a year earlier; there was a moderate decline in the production of both durable and non-durable manufactured goods. The largest losses were in iron and steel and animal foods. On the other hand, greater activity was noted in lumber and non-ferrous metal products and in communications, transportation, services and trade. The greatest expansion, seasonal in character, was in transportation and trade.

The physical volume of business increased to 232.2 in April from 225.2 in March. While manufacturing remained unchanged at 271.1 and construction declined from 172.3 to 162.9, mineral production increased from 173.5 to

183.2, electric power from 154.2 to 165.5 and the index for the distribution of goods from 177.9 to 190.7.

Logging and lumbering brought under Unemployment Insurance

Two Orders in Council of May 17 gave the Unemployment Insurance Commission authority to include employees of the lumbering and logging industries under the Unemployment Insurance Act. This action followed extended inquiries across Canada into the conditions in these industries with respect to unemployment insurance, by the Unemployment Insurance Advisory Committee. Details of the new orders and the manner of their application will be found elsewhere in this issue in the section, *Activities of Unemployment Insurance Commission*.

To commence manufacture of automobiles for civilians

Canadian automobile manufacturers have been given permits to make a total of 10,000 passenger cars this year, according to an announcement made by Hon.

C. D. Howe, Minister of Munitions and Supply, on June 1.

The cars will all be allocated to essential users, such as doctors, nurses, police, fire-fighters, taxi operators, and others whose services are necessary, by the Motor Vehicle Control. Mr. Howe stated that manufacture is likely to begin during the last quarter of this year, manufacturing permits having been mailed to General Motors of Canada Limited, Chrysler Corporation of Canada Limited, and Ford Motor Company of Canada Limited.

The Minister said the three companies will be free to make any models they wish, but the cars must be in the low-price field. "In all likelihood the companies will find it expedient to concentrate on making sedans and coaches," he said.

With some manufacturers' changes in body lines, the new cars will be 1946 models. They will embody some of the improvements in engineering design developed during the war. Sufficient nickel and chrome will be available to make possible a bright finish on bumpers, trim, and other parts, and thus the cars will be even better looking than their predecessors. The price of the new cars will be determined by the Wartime Prices and Trade Board.

"The manufacturers are permitted to get their car production under way as soon as they like", said Mr. Howe. "However, they will not be allowed to shelve the production of war and essential civilian trucks. Present schedules call for an output in 1945 of 130,000 military trucks, plus trucks for UNRRA and liberated countries, and for essential civilian

needs. In addition, large numbers of trailers are on order, principally for use against the Japanese.

"Despite military commitments, it is expected that production of passenger cars in Canada will commence at about the same time as production in the United States."

The Minister promised that details of how the cars will be allocated will be made public as soon as these are ready. "Meanwhile, all we can say is that essential users, such as doctors, nurses, police, firefighters, taxi operators, and others whose services are necessary, will continue to be given preference," he said.

Commission continues study of coal industry Members of the Royal Commission on Coal recently returned to Ottawa from the United States after completing a visit to the coal fields of West Virginia, Virginia, Kentucky and Alabama. While in the United States, the Commission party also visited Cincinnati, Pittsburgh and Washington, where they reviewed river transportation facilities, research laboratories and other matters of vital interest to the Commission's inquiry. This visit to the United States was made at the completion of the sittings of the Commission in Western Canada which ended on April 26 at Winnipeg.

Up to the present, the Commission has held public sittings in two of the Maritime Provinces and in the four Western Provinces. In January and February, evidence was taken in Sydney, Halifax, Kentville, New Glasgow and Amherst in the Province of Nova Scotia and in Fredericton, New Brunswick. From March 26 to April 26, hearings were held in Vancouver, B.C., Calgary and Edmonton, Alberta, Regina, Saskatchewan, and Winnipeg, Manitoba. Extensive visits were made to the coal mining areas coincident with the sittings of the Commission in the coal producing provinces.

Generally speaking, the Commission has confined its evidence to date to production questions. To complete this evidence on the production of coal in Canada, further sittings are to be held in Sydney, Nova Scotia. At that time, the Dominion Steel & Coal Company will present further detailed information requested by the Commission at the conclusion of its January sittings in Sydney. The United Mine Workers of America, District 26, are also expected to present a brief, and the Nova Scotia Provincial Government will be presenting a supplementary brief to the submission presented by the Provincial Department of Mines in Halifax in February last.

In the course of the study of the distribution of coal in Canada, the Provinces of Quebec,

Ontario and Prince Edward Island will be visited. It is thought likely that sittings will be confined to Quebec, Montreal, Toronto, Hamilton, Ottawa and Charlottetown.

To date, some one hundred and sixty-eight exhibits are on the files of the Commission. Of these documents, sixty-one are submissions to the Commission, the other exhibits consisting of supporting data, maps, studies of special problems, etc. Thirty-two of the submissions have been made by coal operators or their associations; fifteen by coal dealers or their associations; five by provincial governments; eight by municipal bodies; six by trade unions; six by boards of trade, and eleven by other community organizations.

At the present time, the staff of the Commission is engaged in the study of material already presented to the Commission and in preparing for further sittings.

A number of special studies are being carried out on behalf of the Commission. For these studies, the services of various specialists have been retained. Dr. L. E. Young, Mining Engineer Consultant of Pittsburgh, U.S.A., is advising the Commission on mining engineering questions. Mr. J. R. Donald, of J. T. Donald and Company, Limited, Montreal, has been retained to study for the Commission problems relating to chemical engineering, carbonization, direct and indirect hydrogenation, etc. Mr. K. J. Morrison, of Harvey, Morrison & Company, Accountants, Calgary, will report on the financial structure and problems of the industry. Mr. Rand H. Matheson, Transportation Manager of the Maritime Transportation Commission, is studying transportation aspects of the coal industry.

Survey of opportunities for training of women Through the Women's Divisions of the National Employment Service, a survey is being made in leading centres of occupations and industries into which women may be trained for post-war employment. The survey was decided upon after a recommendation by the departmental Committee on Post-War Training, headed by L. E. Westman and Mrs. Rex Eaton, Associate Directors of National Selective Service (L.G., March, 1945, p. 265).

It relates mainly to those industries and occupations in the different localities which offer a large measure of continuous employment during the transition and post-war periods. The results are expected to indicate the number of women who will be offering for employment who are already trained and qualified, the probable annual demand for new workers, and the workers who could be most appropriately trained for the jobs.

For the present the emphasis will be upon employment training, although later apprenticeship and training on the job will be given consideration.

The survey relates to household employment, as well as to hotels and restaurants, commerce and industry.

It is hoped that the survey will be completed in the field not later than July 1.

Conciliation proceedings under labour code The Wartime Labour Relations Regulations provide conciliation procedure for the settlement of disputes where negotiations for an agreement following certification of bargaining representatives or negotiations for the renewal of an existing agreement have been unsuccessfully continued for thirty days.

The fact that this procedure was invoked in only 82 cases during 1944, the first year of operation of the Regulations, although over 1,100 certifications were granted, indicates that in a very high proportion of cases agreements were reached by the parties concerned without undue difficulty. Only one strike occurred in the 82 cases.

Conciliation procedure is as follows: An application for intervention under the Regulations is made either to the Wartime Labour Relations Board (National) or to one of the provincial boards within its respective jurisdiction. Where the board concerned is satisfied that the application is in accordance with the requirements of the Regulations, it is referred to the Minister of Labour who thereupon instructs a Conciliation Officer to confer with the parties and attempt to effect an agreement. After investigation the case the Conciliation Officer must report to the Minister indicating the facts of the case and advising whether in his view an agreement might be facilitated by the appointment of a Conciliation Board.

Where the Conciliation Officer is unable to effect a settlement, the Minister may appoint a 3 man Conciliation Board. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters on which they have not agreed, and to report the result of its endeavours and its findings and recommendations to the Minister. The recommendations of such boards are not binding on the parties.

Of the 82 cases dealt with during 1944, 37 were considered closed by the end of the year. In 13 of these, settlements were effected by conciliation officers. Fifteen cases were under investigation by conciliation officers at December 31.

Fifty-four Boards of Conciliation were established, of which twenty-four completed their proceedings by the end of the year. Settlements were effected by five of these. Of the nineteen cases where board reports were made, the Department was advised that agreements have since been signed in thirteen cases. Six cases remain unsettled.

Proposals for changes in labour code The Minister of Labour, Honourable Humphrey Mitchell, on May 29 issued the following statement dealing with proposals for changes in the labour code:

"Representations seeking the amendment of the Wartime Labour Relations Regulations, P.C. 1003, have been made to the Government directly and through the Department of Labour. The representations have come from provincial authorities, central labour organizations, employers' organizations and, in several cases, individuals.

"In April, amendments were suggested by the Trades and Labour Congress of Canada and the Canadian Congress of Labour (L.G., May, 1945, pp. 636, 641), and strong recommendations have been received since that time to have the proposals implemented.

"On receipt of the various proposals for amendments, I took the position that all those who participated in drafting the Regulations as they now stand should be allowed to consider the revisions suggested before any amendments were submitted to the Dominion Government for approval. Accordingly, I instructed my officers in the Department to invite the reaction of the various provincial authorities, the central labour organizations and employers' organizations.

"The replies received to date indicate that the various provincial administrations and employers' organizations desire time in which to study the proposals made by the central labour bodies. In addition, there is some considerable difference of opinion reflected in the replies received and suggestions have been made that before serious consideration is given the proposed amendments, a conference be called in order to allow all parties to present their views."

Change in vice-chairmanship of Labour Relations Board Mr. Justice J. N. Francoeur recently submitted his resignation as Vice-Chairman of the Wartime Labour Relations Board (National).

On May 8 Mr. A. H. Brown of the Department of Labour was appointed as Vice-Chairman of the Board to fill the vacancy created by Mr. Justice Francoeur's resignation.

Appointment of labour representatives to Reconstruction Committee Labour organizations have named their representatives to the Labour Committee appointed to co-operate with H. Carl Goldenberg, Labour Adviser of the Department of Reconstruction.

(Reference to the establishment of this committee was made on page 620 of the May issue of the **LABOUR GAZETTE**.)

The Committee will proceed to draft plans and procedures for regular meetings between the Minister of Reconstruction and representatives of organized labour, with a view to the co-operation and assistance of labour in formulating and implementing the policies of the new Department.

The members of the Committee, appointed on the recommendation of the respective organizations, are: John W. Bruce, Chairman of the Committee on Reconstruction and Rehabilitation, Trades and Labour Congress of Canada; Pat Conroy, Secretary-Treasurer, Canadian Congress of Labour; Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour; and A. J. Kelly, Chairman, Dominion Joint Legislative Committee of the Railroad Transportation Brotherhoods.

Royal Commission on Veterans' Qualifications Reference was made in the May issue of the **LABOUR GAZETTE** (p. 726) to the appointment of a Royal Commission on Veterans' Qualifications which has been assigned the task of studying the credit that may be given members of the Armed Forces on their discharge for "trades, technical or other educational training or experience gained while in the Armed Forces."

The Commission held a two-day meeting in Ottawa on May 11 and 12. In opening the meeting Col. Wilfrid Bovey of Montreal, Commission chairman, stressed the importance of the Commission and asked the co-operation of Provincial Governments, trade unions, and other groups with a responsibility or interest in detailed arrangements for the return of members of the Armed Services to civilian life, and more especially to civilian jobs.

After indicating the great variety of educational and occupational courses given to members of the Armed Services, both as part of military training and for cultural improvement (as in the case of the Canadian Legion Educational Services and special courses operated by the Armed Services themselves) the chairman suggested that the Commission should make arrangements so that each person discharged from the Armed Services would be

provided with a certificate showing his educational and occupational improvement as a result of the training which has followed enlistment.

Colonel Bovey laid emphasis upon the part of the Provincial Governments in relation to the work of the Commission, particularly in regard to recognition of educational courses. In this connection he said: "It will then be our duty to visit each Provincial Government since these alone are responsible for the granting of educational certificates and to make such arrangements with them as will result in ex-service personnel being in possession of suitable documents."

The chairman announced that the three Defence Departments have already undertaken the preparation of reports covering all types of instruction given within the Forces, and that one highly qualified officer from each Service has been assigned to the Commission as a technical adviser.

Stressing the "appalling importance" of the task facing the Commission, the chairman expressed confidence that its task will be accomplished expeditiously and satisfactorily, with the co-operation of the Provinces, trade unions, employers and Federal Departments which may be in a position to assist.

Mr. Arthur MacNamara, Deputy Minister of Labour, addressing the Commission, said that the Department of Labour views the field to be covered in the enquiry as of vital importance in satisfactorily re-establishing members of the Armed Services in civilian employment.

The Commission decided to recommend that advantage be taken at once of the new facilities provided in the Province of Quebec under recent legislation to assist apprenticeship, and to provide for the re-training of handicapped personnel.

Headquarters of the Commission are to be at Montreal.

In addition to the chairman, the other five members of the Commission were at the meeting—D. S. Lyons, Vice-President of the International Association of Machinists, Montreal; Stuart R. Ross, of the Windsor Vocational School staff; J. C. G. Herwig, Canadian Legion, Ottawa; F. W. Smelts, Regional Director of Selective Service, Vancouver; and Hector Dupuis, Regional Director of Selective Service, Montreal.

Commander A. E. Fortington of Ottawa has been appointed Secretary to the Commission.

The Commission plans to hold meetings in the various provincial capital cities during June, July and August.

Committee on university training for veterans

As a result of an ever-increasing demand by veterans for the university training provided under the Post-Discharge Re-establishment Order, a committee of citizens experienced in educational affairs has been appointed to advise the Minister of Veterans Affairs on matters relating to university training.

The committee is under the chairmanship of Mr. W. S. Woods, Deputy Minister of Veterans Affairs. The other members are:

Mr. S. N. F. Chant, Director General of Rehabilitation, Department of Veterans Affairs; Rev. Dr. Philippe Cornellier, Rector, Ottawa University; Mgr. Cyrille Gagnon, Rector, Laval University; Dr. Milton F. Gregg, President, University of New Brunswick; Dr. Cyril F. James, Principal, McGill University; Mr. H. W. Jamieson, Superintendent of Educational Training, Department of Veterans Affairs; Dr. Norman A. M. MacKenzie, President, University of British Columbia; Dr. W. A. Mackintosh, Director General of Economic Research, Department of Reconstruction; Mgr. J. L. Olivier Maurault, Rector, University of Montreal; Dr. John E. Robbins, Department of Trade and Commerce; Dr. Sidney Smith, President-elect, University of Toronto; Dr. James S. Thomson, President, University of Saskatchewan; Dr. H. M. Tory, President of Carleton College, Ottawa; Dr. R. C. Wallace, Principal, Queen's University.

Report on Labour Legislation in Canada, 1943

The Annual Report on Labour Legislation in Canada, 1943, recently issued by the Department of Labour, contains the text or a summary of all labour laws enacted in 1943 by the Parliament of Canada and the provincial legislatures. All Orders in Council of labour interest are also summarized or noted. The Report is the fifth supplement to Labour Legislation in Canada as existing on December 31, 1937, and has a cumulative index covering the contents of the basic volume and the annual supplements.

The principal measures passed during the year are reviewed in an Introduction under such headings as: Trade Unions and Collective Bargaining; Factories and Shops; Wages and Hours of Labour; Workmen's Compensation; Safety and Health; Vocational Education; Unemployment Insurance and Employment Offices; Wartime Labour Conditions and Post-war Reconstruction.

The main volume of the series may be obtained from the Department of Labour for one dollar and the supplements for twenty-five cents each.

Appointment of inter-departmental committee on housing

An inter-departmental housing committee has been established to deal with problems of planning and co-ordination relating to the activities of various departments in the field of housing. In particular the committee will work to further Government policy of providing essential housing and accommodation for war workers, members of the Armed Forces and their dependents, and veterans, and of procuring labour, materials and equipment for the construction of housing in the post-war period. The Deputy Minister of Finance is chairman of the committee, one of whose members is the Deputy Minister of Labour.

Government-labour committee set up in B.C.

A joint government-labour committee has been appointed in British Columbia to study labour's proposals for legislative action. The proposals, presented to the Government by the B.C. Federation of Labour, include the following:

Inauguration of a compulsory check-off system; outlawing of company unions; revision of the Apprenticeship Act; training for discharged service men; citizenship rights; voting and franchise for native Indians; education cost reforms; health insurance; free hospitalization for maternity patients; abolition of poll tax and lowering of voting age to 18 years; social security; and Workmen's Compensation Act changes.

Membership on the committee includes nine union leaders representing the principal labour organizations in the province, and representatives of the Provincial Government headed by the Minister of Labour, Hon. George S. Pearson.

Training building apprentices in Great Britain

The Building Apprenticeship and Training Council, consisting of representatives of industrial and professional building interests and of Government departments, was recently appointed by the Minister of Works to inquire into conditions and advise on matters concerning the education and training of apprentices in the building industry, and to encourage the development of craft apprenticeship schemes on a national basis. A summary of the report of the Council appeared in the Times Educational Supplement of April 28.

The Council found that the annual intake of students for training in the industry rose from 300 in 1942 to 6,000 in 1944. Pupils in training numbered 63,976, of whom 51,892 had no written agreement. The Council recommended that certain elementary safeguards should be required for each apprenticeship agreement:

an agreement in writing; an obligation on the part of the employer to teach the apprentice his craft; both employer and apprentice to be answerable to the Area Joint Apprenticeship Committee for fulfilling the terms of the agreement; and attendance, with pay, at a technical course by an apprentice under 18 years of age for one day a week or its equivalent.

The Government has accepted a plan which may soon be in operation, the Council states, whereby apprentices will erect buildings under the guidance of craftsmen. The building of new, and the rebuilding of damaged, houses is considered particularly suitable for such training. On this work, the proportion of apprentices to instructors should be six or more to one and training should confer the full status of apprentice upon such boys under approved training conditions, while transfer of an apprentice to an employer should be provided for as soon as suitable work is available. The Ministry of Works would pay any abnormal costs in applying this scheme. Maintenance grants would be made to boys living away from home.

In the industry generally, the proportion of apprentices to skilled craftsmen would have to be increased temporarily, the report points out, although in normal times the proportion would not exceed 1:4. The Council recommended that the building industry discourage the entry of premium apprentices, and asked that financial assistance be provided by the State to enable suitable boys to pass from lower schools to senior full-time courses in technical schools, colleges and universities.

The shortage of suitable teachers and instructors, the Council considers, presents the major difficulty. The Ministry of Labour and National Service recently facilitated the transfer of persons of 25 or over on registration, and possessing adequate qualifications, to full-time posts on staffs of building schools. Plans are under way for establishing full-time training courses for those already employed as teachers whose experience has been limited by war conditions and for those recruited from applicants in the services. There are also plans for a modified intensive course for youths who left training to join up.

Collective bargaining and union status in United States

An analysis by the Bureau of Labour Statistics at Washington, published in the April issue of the *Monthly Labour Review* disclosed that some 14½

million workers in the United States were employed under collective bargaining contracts in January, 1945. These workers included approximately 47 per cent of all workers employed in industries and occupa-

tions in which unions are actively engaged in obtaining written agreements with employers. During the year 1944 there was an increase in agreement coverage of over half a million workers, which was equivalent to a 4.5 per cent rise in the proportion of employed workers covered by agreements.

The results of the analysis indicated that more than 8¼ million of all production wage earners in manufacturing industries in the United States were employed under the terms of union agreements at the beginning of 1945, or an increase of about 8 per cent during 1944. The largest increases were in the tobacco and chemical industries and, to a less extent, in the canned and preserved foods industry. Agreements were negotiated for the first time with several large aircraft and petroleum-refining companies, as well as with a number of meat-packing, shoe, leather tanning, and rubber companies.

In non-manufacturing industries, rather more than 5½ million workers were employed under the terms of union agreements at the beginning of 1945, representing an increase during the year of 6 per cent in the proportion of employees working under agreement. It was stated that over 95 per cent of the coal-mining, maritime and longshoring and railway employees, including clerical and supervisory personnel, and over 90 per cent of the employees in the iron-mining and telegraph industries were employed under union agreements. However, less than 25 per cent of the employees in service occupations and slightly less than 20 per cent of the clerical and professional employees were under union contract.

In the latter classification a major portion of the clerical and professional workers in transportation, communications and public utilities industries and practically all actors and musicians were employed under collective-bargaining agreements. However in manufacturing, financial and business service establishments, and in wholesale and retail trade, only about 13 per cent of the clerical and professional employees were under agreement.

Dealing with union security clauses in collective agreements, the report noted that the proportion of workers under maintenance-of-membership clauses increased during 1944, while the proportion under closed-shop and union-shop provisions remained about the same.

By January, 1945, approximately 3¼ million workers, or 27 per cent of all persons employed under union agreements were employed under maintenance-of-membership clauses. About 4 million, or 28 per cent of all workers under agreement were employed under closed-shop

provisions and about 2½ million, or 18 per cent, under union-shop agreements. Only two per cent of all workers under agreement were covered by union preferential clauses, whereas 25 per cent were under agreements which provided recognition only.

Almost 6 million workers, or more than 40 per cent of all employees under agreement were covered by check-off provisions in January, 1945. About half were covered by clauses providing for the automatic check-off of all members' dues and the other half by clauses which provide for check-off only for those employees who file individual written authorizations with the employer.

Governing Body of ILO meets in Quebec

The 95th session of the Governing Body of the International Labour Office was scheduled to begin on June 21 at Quebec City.

The session was preceded by meetings of a number of Governing Body committees including the Finance Committee, the Committee on Constitutional Questions, and the Employment Committee.

Among the matters on the agenda was the question of the ILO's relationship to the general international organization whose charter has been under consideration at San Francisco.

The Employment Committee, whose function is to examine and consider international economic policies and measures from the point of view of employment, and to make recommendations on employment policy, will submit a report.

The last previous session of the Governing Body was held in January, in London, England (L.G., April, 1945, p. 555).

The Canadian Government representative on the Governing Body is Mr. Arthur Mac-Namara. At the time of going to press the complete Canadian delegation had not been announced.

Mr. Percy Bengough, President of the Trades and Labour Congress of Canada, attended the session as workers' delegate.

Constitution for World Federation of Trade Unions

One of the duties assigned to the administrative committee appointed at the World Trade Union Conference held in London, England, in February (L.G.

April, 1945, p. 557) was to draft a tentative constitution for a World Federation of Trade Unions. The committee, representing some 60,000,000 workers in 35 countries, completed this task after ten days of deliberation at Oak-

land, California, early in May. The charter will be submitted to the constituent organizations throughout the world in time for formal presentation for approval or amendment at the re-convened conference in Paris in September.

As outlined in the *New York Times* of May 6, the purpose of the new world trade union federation will be "to improve the living and working conditions of the people of all lands and to unite them in the pursuit of objectives sought by all freedom-loving peoples." The draft constitution calls for a federation, "sovereign authority" of the new body, that would meet every two years; a general council, elected by the federation, to represent all the affiliated organizations, and to meet annually; an executive committee of seventeen members; and a bureau of management.

It is stated that the tentative constitution provides for an "escalator" method of voting, so that organizations with huge memberships, such as Soviet Russia, (roughly 27,000,000 members) would have relatively fewer votes at meetings of the general council and congress. It provides for one vote per 50,000 members for organizations with a membership up to five million. Larger organizations with up to ten million members would have a vote for each additional 100,000. Those with ten million to fifteen million would receive one vote for each additional 200,000 members and those with a membership exceeding fifteen million would have one vote for each additional group of 400,000 members.

As a general rule it is proposed to confine affiliation with the federation to a single national trade union for each country. "In exceptional cases, however, more than one national trade union centre or individual national trade union organization may be granted the right of affiliation."

Correction: Legislative Proposals of Trades and Labour Congress of Canada

On page 636 of the May issue of the *LABOUR GAZETTE*, in the course of an article on the legislative proposals to the Canadian Government of Trades and Labour Congress of Canada, appeared the sentence: "It was also requested that the Act be amended to require all employees to be members of a specified organization of employees." This should have read: "It was also requested that the Act be amended to allow collective agreements whereby all employees may be required to be members of a specified organization of employees."

Application in Canada of Draft Conventions and Recommendations of the International Labour Conference

THE Minister of Justice, Hon. Louis St. Laurent, has issued a memorandum on the subject matter of the draft conventions and recommendations adopted at the 25th and 26th sessions of the International Labour Conference in which he reports on the jurisdiction of the Dominion and Provincial governments as to the legislation that would be required to implement the various proposals.

Seven of the recommendations were adopted at the 26th session of the Conference held in Philadelphia April 20 - May 12, 1944 (L.G., June, 1944, p. 714). These deal with matters of social security and post-war employment. The other ten recommendations and four draft conventions were adopted at the 25th session held at Geneva prior to the outbreak of war in 1939. These latter relate to vocational training, apprenticeship, road transport workers, and migratory and indigenous workers.

According to the memorandum of the Minister of Justice none of the draft conventions and only three of the recommendations fall within the exclusive jurisdiction of the Dominion Parliament. The remainder may be given effect to by Parliament alone only in the Yukon and Northwest Territories; in other parts of the country they either are within exclusive provincial jurisdiction or are a matter for Dominion-provincial co-operation.

The three recommendations coming solely within Dominion jurisdiction are among those adopted at Philadelphia last year and are as follows:

Recommendation No. 68 concerning income security and medical care for persons discharged from the Armed Forces or war employment;

Recommendation No. 70 concerning standards of social policy in dependent territories;

Recommendation No. 72 concerning the employment service.

Of the other ILO proposals adopted at Philadelphia, two important and lengthy social security recommendations outlined an all-inclusive social insurance scheme and for a program of medical care. The compulsory insurance features of these recommendations (Nos. 67 and 69) are declared by the Minister of Justice to fall within Dominion jurisdiction in relation only to unemployment insurance. Otherwise they may be given effect to by the

provincial legislatures alone or in co-operation with Parliament. The sections relating to social assistance or to public medical care services may be given effect to either by Parliament or by the provinces.

The detailed recommendation on employment organization in the transition from war to peace (No. 71) which deals with demobilization, industrial reconversion, use of the employment service, vocational training, mobility of labour, special problems of juveniles, women and disabled persons, and other matters, can be given effect to by the Dominion in relation to the demobilization of the Armed Forces and operation of the employment service of Canada; otherwise by the provinces alone or in co-operation with Parliament. Recommendation No. 73 on the national planning of public works falls partly within Dominion and partly within provincial jurisdiction.

The recommendations and conventions adopted in 1939 dealt for the most part with matters partly under Dominion and partly under provincial jurisdiction.

The Minister pointed out that many of the subject matters with which the draft conventions and recommendations are concerned have already been dealt with by the Dominion owing to the war emergency. However for the purposes of the enactment of legislation or other action of a permanent character it is necessary that they be dealt with by the appropriate legislative body.

Canada's Record in Meeting ILO Proposals

Canada has been represented at all twenty-six of the sessions of the International Labour Conference since 1919. In regard to the 67 draft conventions and 73 recommendations adopted in this length of time, Canada, like other member states of the ILO, has been under the obligation of bringing them before the authority or authorities within whose competence the matters lie for the enactment of legislation or other action.

All these proposals, therefore, have been submitted to the Law Officers of the Crown in Canada with a view to determining whether they fall within Dominion or provincial jurisdiction. These which have been found to be in the latter category have been brought officially by the Secretary of State to the attention of the provincial authorities, but none of

them has been applied by all the provinces to date, although examination of provincial laws has shown that the requirements of some are met in whole or in part by existing legislation.

Six conventions have been given legislative effect by the Dominion Parliament and have been ratified by Canada. They all relate to seamen, and are in force through enactment in the Canada Shipping Act, 1934.

The Minister of Labour has been granted authority (under Order in Council P.C. 1550, March 20, 1944) to give notice in the House of Commons of a resolution approving two other conventions, one relating to the protection against accidents of workers employed in loading or unloading ships, the other concerning statistics of wages and hours. As yet, however, no further action towards ratification has been taken in regard to these two conventions.

In regard to three other conventions measures were enacted by Parliament in 1935 to give them effect. These conventions related to limitation of hours of work in industry, weekly rest in industry, and the creation of minimum wage-fixing machinery. However these measures remain inoperative since the Judicial Committee of the Privy Council in London subsequently rendered judgment that all three were *ultra vires* of the Parliament of Canada.

The memorandum of the Minister of Justice dealing with the competence of Parliament and of the provincial legislatures as to the conventions and recommendations adopted in 1939 and 1944 forms the basis of an Order in Council (P.C. 3671, May 24, 1945) the text of which appears below.

Text of P.C. 3671

Certified to be a true copy of a Minute of a Meeting of the Committee of the Privy Council, approved by His Excellency the Governor General on the 24th May, 1945.

The Committee of the Privy Council have had before them a memorandum of the Minister of Justice stating that in a report, dated 11th February, 1939, of the then Minister of Justice (approved by Order in Council P.C. 507, March 7, 1939) upon the Draft Conventions and Recommendations adopted by the International Labour Conference at its nineteenth, twentieth, twenty-first, twenty-second, twenty-third and twenty-fourth sessions, the Minister advised that the obligation of Canada under the Treaties of Peace in relation to the said Draft Conventions and Recommendations is to bring them before the authority or authorities in Canada within whose competence the enactment of legislation or other action in each case lies.

The Minister observes that at the twenty-fifth session of the International Labour Conference (8-28 June, 1939) the following Recommendations and Draft Conventions were adopted:—

Recommendation (No. 57) concerning vocational training.

Draft Convention (No. 64) concerning the regulation of written contracts of employment of indigenous workers.

Recommendation (No. 58) concerning the maximum length of written contracts of employment of indigenous workers.

Draft Convention (No. 65) concerning penal sanctions for breaches of contracts of employment by indigenous workers.

Recommendation (No. 59) concerning labour inspectorates for indigenous workers.

Recommendation (No. 60) concerning apprenticeship.

Draft Convention (No. 66) concerning the recruitment, placing and conditions of labour of migrants for employment.

Recommendation (No. 61) concerning the recruitment, placing and conditions of labour of migrants for employment.

Recommendation (No. 62) concerning co-operation between States relating to the recruitment, placing and conditions of labour of migrants for employment.

Draft Convention (No. 67) concerning the regulation of hours of work and rest periods in road transport.

Recommendation (No. 63) concerning individual control books in road transport.

Recommendation (No. 64) concerning the regulation of night work in road transport.

Recommendation (No. 65) concerning the methods of regulating hours of work in road transport.

Recommendation (No. 66) concerning rest periods of professional drivers of private vehicles.

That at the twenty-sixth session of the International Labour Conference (20 April-12 May, 1944) the following Recommendations were adopted:—

Recommendation (No. 67) concerning income security.

Recommendation (No. 68) concerning income security and medical care for persons discharged from the armed forces and assimilated services and from war employment.

Recommendation (No. 69) concerning medical care.

Recommendation (No. 70) concerning minimum standards of social policy in dependent territories.

Recommendation (No. 71) concerning employment organization in the transition from war to peace.

Recommendation (No. 72) concerning the employment service.

Recommendation (No. 73) concerning the national planning of public works.

The Minister observes that the said Draft Conventions and Recommendations contemplate the enactment of legislation or other action of a permanent character in relation to the subject matters with which they are concerned and that although many of these subject matters have necessarily been dealt with by or pursuant to the authority of Parliament for the purposes of the emergency arising out of the state of war now existing, it is desirable that the said Draft Conventions and Recommendations be considered and dealt with for the purposes of the enactment of legislation or other action of a permanent character as if no emergency existed.

The Minister therefore advises, with reference to the above mentioned Draft Conventions and Recommendations insofar as legislation or

other action of a permanent character is required, as follows:—

1. Recommendation No. 57 concerning vocational training may be given effect to by Parliament alone only in the Yukon and Northwest Territories insofar as it relates to education and only in undertakings over which Parliament has exclusive legislative authority insofar as it relates to training during employment; and otherwise it may be given effect to by the provincial legislatures alone or in co-operation with Parliament.

2. Draft Conventions Nos. 64 and 65 and Recommendations Nos. 58 and 59 concerning employment of indigenous workers may be given effect to by Parliament alone only in the Yukon and Northwest Territories and in particular undertakings over which Parliament has exclusive legislative authority and insofar as they relate to criminal law or the employment service of Canada; and otherwise they may be given effect to by the provincial legislatures.

3. Recommendation No. 60 concerning apprenticeship may be given effect to by Parliament alone only in the Yukon and Northwest Territories and in particular undertakings over which Parliament has exclusive legislative authority; and otherwise it may be given effect to by the provincial legislatures.

4. Draft Convention No. 66 and Recommendations Nos. 61 and 62 concerning the recruitment, placing and conditions of labour of immigrants insofar as they relate to placing and conditions of labour may be given effect to by Parliament alone only in the Yukon and Northwest Territories, in the employment service of Canada, and in particular undertakings over which Parliament has exclusive legislative authority; insofar as they relate to the carrying out of conventions or to immigration they may be given effect to by Parliament alone or in co-operation with the provincial legislatures and otherwise they may be given effect to by the provincial legislatures.

5. Draft Convention No. 67 and Recommendations Nos. 63, 64, 65 and 66 concerning road transport may be given effect to by Parliament alone only in the Yukon and Northwest Territories and in particular undertakings over which Parliament has exclusive legislative authority; and otherwise they may be given effect to by the provincial legislatures.

6. Recommendations Nos. 67 and 69 concerning income security and medical care insofar as they relate to compulsory social insurance, may be given effect to by Parliament alone only in the Yukon and Northwest Territories and in relation to Unemployment In-

surance and otherwise they may be given effect to by the provincial legislatures alone or in co-operation with Parliament; insofar as they relate to social assistance or medical care through public medical care services they may be given effect to either by Parliament or by the provincial legislatures.

7. Recommendation No. 68 concerning income security and medical care for persons discharged from the armed forces or war employment may be given effect to by Parliament alone insofar as it relates to mustering out grants and the maintenance of the status of members of the armed forces for Unemployment Insurance; insofar as it relates to the maintenance of the status of persons under compulsory contributory pension and sickness insurance schemes it has no application as there are no such schemes in operation in Canada.

8. Recommendation No. 70 concerning standards of social policy in dependent territories can be given effect to by Parliament alone.

9. Recommendation No. 71 concerning employment organization in the transition from war to peace may be given effect to by Parliament alone in the Yukon and Northwest Territories and in particular undertakings over which Parliament has exclusive legislative authority and in relation to the demobilization of the armed forces and operation of the employment service of Canada; and otherwise may be given effect to by the provincial legislatures alone or in co-operation with Parliament.

10. Recommendation No. 72 concerning the employment service may be given effect to by Parliament alone.

11. Recommendation No. 73 concerning the national planning of public works falls partly within the legislative authority of Parliament and partly within the legislative authority of the provincial legislatures.

The Committee concur in the foregoing and advise that a copy hereof, together with authenticated copies of the Draft Conventions and Recommendations, be transmitted to the Lieutenant Governors of the respective provinces for the consideration of their respective governments, with a view to the enactment of legislation, or such other action, upon the parts of the subject matter of the several Draft Conventions and Recommendations within the provincial sphere of jurisdiction as each government may be advised to take.

All of which is respectfully submitted for Your Excellency's approval.

Manpower

Relaxation of Certain Manpower Controls

Easing of Regulations Relating to Transfer Orders, Employment of Women, Military Call-up, and Labour Exit Permits

WITH the achievement of victory in Europe Canada has been able to relax certain of its manpower controls. Maintenance of other controls has been retained, as National Selective Service continues its program for the maintenance of an adequate supply of labour for war and essential civilian industry.

Easing of restrictions has occurred in regard to the following phases of the manpower program:—

- Military call-up;
- Compulsory transfer of workers;
- Employment of women.

Military Call-up

As mentioned in the May issue of the *LABOUR GAZETTE*, (p. 609), Hon. Humphrey Mitchell, Minister of Labour, on May 7 announced the suspension of the call-up for military service. He stated that enrolment for the war in the Pacific would continue, on a voluntary basis.

Extension of Postponements.—At the end of the month the Minister announced a policy in regard to men on occupational postponement under the military call-up. Letters have been sent to all men on deferment, informing them that while their postponements are extended until further notice by reason of their employment, they are not free to change their jobs. Therefore it is not necessary for either a man on postponement or an employer to request from the Registrar a renewal of postponement of military training.

Particular stress was laid by the Minister on the necessity for farm workers remaining at their jobs. The letter is as follows:—

This is to inform you that your present postponement of Military Training is extended until further notice. Your postponement therefore remains in effect.

If you are engaged in agriculture, you must not leave that very essential work to work outside of agriculture unless you first obtain a permit to do so from a National Selective Service Officer.

If you are employed in an essential or war industry other than agriculture, you must not change your employment without first obtaining a permit from a National Selective Service Officer.

University Students.—At a meeting of the University Advisory Board held at Ottawa this week, the status of university students under selective service regulations was reviewed and some immediate relaxation of controls found to be possible.

In view of the fact that call-up for military service under the mobilization regulations has been suspended, the practice of reporting to mobilization boards students who fail any course or come in the lower half of certain courses, has been discontinued. A further recommendation of the Board has been accepted to the effect that clauses in the mobilization regulations prohibiting change of course of studies or post-graduate studies, except under certain conditions, be suspended.

Men Leaving Canada.—The necessity that men of military age secure the permission of a Mobilization Board Chairman before leaving Canada has been dropped—but labour exit permits are still necessary for most persons proposing to leave Canada with the intention of seeking or accepting employment elsewhere.

Previously, any person leaving Canada for 30 days or more had to surrender his National Registration Certificate: only those leaving for 6 months or longer will now be required to do this.

Compulsory Transfer Orders

On May 17 the Minister issued an Order discontinuing compulsory transfers of workers under the seven Compulsory Employment Transfer Orders (L.G., 1943, pp. 449, 566, 1211, 1613.)

The seven orders, issued between May 4, 1943, and November 15 of the same year, named a lengthy list of less essential industries and occupations, and provided that all male workers from 16 to 38 years of age engaged in any of these employments would become liable for transfer to more essential employment. To April 15 this year, over 100,000 men were registered as initially coming under these orders, and 18,488 had actually been required to change jobs. Undoubtedly, in addition, a large number of those in the less essential industries who had not moved into

war jobs prior to the first of the compulsory orders, did so after the series of orders started to become effective.

Men already moved under the seven compulsory orders are not affected by the change now being made: they will be required to continue in their jobs, as will also men directed to employment at a time when they were out of jobs or men directed to the coal mining industry. Moreover, the authority of Selective Service to direct men to farm work, which became effective last March, and the authority to direct men who are unemployed to essential jobs, will remain in force and will be utilized by Selective Service as circumstances may require.

Commenting on the cancellation of transfers the Minister stated: "The Compulsory Employment Transfer Orders served a very useful purpose at a time when Canada's total war effort required the help of every last man we could find. The fact that fairly few of the men who were required to transfer exercised their right of appeal against the direction of Selective Service, indicates that the administration of these orders was well accepted. However lifting of these orders now seems safe and is in line with the Government's policy of removing wartime restrictions once they have served their purpose."

Employment of Women

Relaxation of National Selective Service Regulations as they apply to women was announced by the Minister on May 16.

Like men, women have been required since 1942 to obtain a permit from a National Selective Service Office before approaching employers about jobs; and similarly employers have been required to have permission from Selective Service before discussing an engagement with applicants.

This rule has been relaxed as it applies to women, so that a woman may now locate a position and accept it on her own initiative without applying to Selective Service for permission provided she reports the facts to Selective Service within three days of being hired by an employer. Alternatively she may report at an Employment Office when separated from a position, and obtain a permit to seek a new job anywhere she wishes provided she reports when she has started in a new position. Seven days' notice of separation will still be necessary where women are leaving employment.

The change has the effect of converting the present permit system into a plan which will require:

- (a) that separations of women from payrolls must be reported by employers and women too; and
- (b) that when a new position is located and a new engagement made the fact shall be reported.

The objective is to continue to have in the Offices of the Employment Service complete information and particulars of vacant positions available in Canada, and also details regarding applicants (including women) available to fill them. Experience has proven that the best way to attain that objective is to have both separations from employment and placements reported.

Selective Service control over advertising for women applicants will also be lifted for the present, but employers wishing to secure male workers through advertising will still require Selective Service authority to advertise.

Women who are unemployed for seven days will still be required to maintain registration at the Employment Office while out of work.

The final result is that the Local Office continues to receive all of the information necessary to enable it to provide an efficient employment service. To do this the Local Office must have a complete picture of supply and demand. Information as to supply will be obtained by registration of unemployed persons and by receipt at the Local Office of Separation Notices. Information as to demand will come out of the continuing requirement that employers notify the Local Office of vacancies, and information as to vacancies filled will be obtained out of the requirement that the Local Office be notified of all engagements of personnel.

The Minister made it clear that there is no change being made at present in regard to the regulations covering men. Male applicants for employment will still require Selective Service permits before they may legally look for jobs.

He stated: "With the termination of hostilities in Europe, the Government is desirous of relaxing any wartime control which is not further required. Although there still are labour shortages, it is felt that as an experiment the relaxation of Selective Service control over women seeking employment may now be tried out on an experimental basis. If the relaxation in so far as women are concerned does not adversely affect the general situation—and there is no reason to believe that it will—then consideration will be given to making permanent the change in the permit system covering women. We consulted the National Selective Service Advisory Board—which represents trade unions, employers, agriculture, veterans and others—and the Board favoured trying out this change in our permit system."

Farm Labour Program, 1945

POINTING out that the need of heavy food production in Canada is greater than ever this year, and that the required labour for the agricultural industries can be provided only through special efforts, the Minister of Labour, Hon. Humphrey Mitchell, recently announced a renewal of the Dominion-Provincial farm labour agreements for the year 1945, and expressed the hope that this year they will result in a broadening of the measures to provide the farmers with workers when their services are most needed.

The Minister summarized the steps to be taken by the Labour Department, and under the Dominion-Provincial agreements, in an effort to provide the needed workers to the farming community. These steps are as follows:

Selective Service has exerted pressure to have farm workers on temporary permit for winter work in other essential industries return to the farms where they are most needed, and most of these men are now back on the land. Other industries are being urged to repay the winter help of farm workers by aiding agriculture with manpower wherever possible this summer.

Agricultural Labour Survey Committees have been established recently in each Mobilization Division, to co-ordinate activities in recruiting workers and to encourage the most advantageous employment of men on farm leave from the Forces.

The Defence Departments have agreed to co-operate to the fullest possible extent. This will be a source of a considerable number of farm workers when most needed.

High school and university students are being urged to work once again on farms during vacation. Provinces have been asked to release students earlier than the end of the term where possible. This practice will be followed in several areas.

Part-time workers from cities and towns, particularly for fruit and vegetable farms, for haying and grain harvesting, will be urged to respond in greater numbers.

An intensified publicity campaign will be directed to all who can make their services available for any farm work.

Steps are being taken, through the co-operation of the Provinces, to curtail road work wherever possible so that the workers will be available for the farms.

Prisoners of war will be used more extensively this season, at points where their services are acceptable.

Conscientious objectors and Canadian Japanese are being, and will be, employed extensively in agriculture.

Indians will again be urged to take farm jobs off their reserves, especially in the West.

A greater use of machinery to help meet farm labour shortages, is expected, as machines are more readily available. Besides, farmers are being encouraged to pool their machinery with neighbours.

With the help of the railways, low cost transportation, assisted by the Governments, will be available to move farmers from area to area, and Province to Province, as permitted by the variations of harvest dates. Long distance movements are expected to include women from Prairie farms for fruit farms in British Columbia; men from the Prairies for haying in Ontario; and after the Eastern harvest, men from Quebec and Ontario for harvesting in the Prairie Provinces.

Arrangements have been made for an exchange of harvesting equipment and crews between the mid-western States and the Prairie Provinces. Skilled tobacco workers from the Southern States will move into Canada for harvesting, while potato workers will again work in the States.

Dominion-Provincial Western Farm Labour Conference

A Dominion-Provincial Western Farm Labour Conference, called by the Federal Department of Labour, met at Edmonton on May 17 and 18, 1945. Its purpose was to provide an opportunity for Provincial and Federal officials to review the current farm labour situation and consider methods for meeting requirements during the summer and fall months.

Among those attending were the Provincial Directors of Farm Labour and the Regional

Employment Advisers, Primary Industries, for Manitoba, Saskatchewan, Alberta and British Columbia; as well as a number of representatives from the Provincial Departments of Agriculture, the Prisoner-of-War Labour Project Branch, Employment and Selective Service and Alternative Service Branches of the Federal Department of Labour.

Labour supply was reported to be generally scarce, but no acute shortages appeared for seeding. It was considered that harvesting

needs would, of necessity, have to be met from outside sources. Much of the help that might become available from lay-offs would be absorbed by the large outstanding orders for packing plants, woods operations and railway track maintenance.

Attention was given to the work of the newly developed Labour Survey Committees, which have been established in each Mobilization Division, to check on farming activities of men on postponement and farm leave. Those in attendance advised that there should be considerable publicity to impress upon men on postponement that they had to remain in agriculture. The application of Selective Service Civilian Regulations was considered essential in view of the fact that the men were no longer subject to call from the Mobilization Boards.

A suggestion was made that District Officers Commanding should furnish the names of all men applying for leave to the Agricultural Labour Survey Committees so that there could be more assurance of men being sent to the farms where they are most needed. It was the unanimous opinion of those present that soldiers detailed to Farm Duty should be paid on a similar basis to that in effect during 1943-44, rather than giving the men their regular pay and allowances as at present.

Reports were given on the extent of the assistance being provided by special groups, such as Conscientious Objectors, Indians, Canadian Japanese and others. Conscientious Objectors have been advised that their status has not changed since the end of the war in Europe. Approximately 70% of the 10,700 postponed Conscientious Objectors are working in agriculture. Arrangements in regard to the Indians and Canadian Japanese will be the same as last year.

Prisoner of War Help

Additional emphasis is being placed on prisoner-of-war help for farmers. At the conference it was reported some 355 were working on individual farms near Brooks and Strathmore, Alberta. Another 50 or 60 could be readily placed. In the Lethbridge area, hostels have been established for around 100 prisoners. Farmers there pay \$2.25 a day for an 8-hour day for these men. Arrangements for their employment in the Winnipeg area were reviewed, and plans considered for again using them for harvesting in Saskatchewan.

In keeping with suggestions made in other parts of Canada, particular stress was laid on the need for organizing assistance from students and towns-people. In addition to the use of newsclips, it was felt that national

posters and advertising would prove very satisfactory in appealing to this class of help for agriculture. A letter to industrial associations urging their members to assist on farms, and pointing out the opportunity for reciprocating the help given by farmers during the winter, would serve, it was thought, a useful purpose.

It was emphasized, however, that appropriate and well-timed local appeals are the most effective publicity for drawing urban workers to assist on farms.

The direction of workers to agriculture was reviewed, and it was pointed out that enforcement of the Regulations had assumed greater importance since the suspension of call-ups. In order to encourage more workers to move voluntarily to the more productive farms, a few cases will be enforced in each province.

Details of a plan to move some 300 women workers from Saskatchewan and Alberta to British Columbia for farm work, particularly fruit picking, were developed. These workers will go to British Columbia late in June and early in July and return at the close of the season.

Considerable attention was given to the need for obtaining a larger number of Prairie farmers to help with haying and early harvesting in Ontario. Prairie officials were greatly interested in the movement and stated they would make every effort to increase the number of workers who could be spared.

In order to make a direct appeal to as many as possible, it is planned to send to each farmer an application card for transportation east. This will be similar to the card used last year in Quebec and Ontario to recruit farmers for harvesting in the Prairies. The card will also enable greater control to be exercised over the movement. The going dates suggested are June 15th to July 6th and return August 10th to 31st, for Manitoba, and August 15th to 31st for Saskatchewan and Alberta. It was suggested 300 might be obtained from Alberta; 1,000 from Saskatchewan; and 200 from Manitoba.

Particulars regarding the movement of Prairie combine units to the United States were reviewed. This year Canadian operators, with their equipment and crews, may cross the border as early as June 1, instead of July 1 as last year. They will return in time for Canadian harvesting and, at the same time, United States harvesting units may enter Canada.

The use of Provincial transportation warrants for the movement of workers to farms within each province was discussed. A special transportation rate of 2.5c per mile

is being arranged with the railways for such movements.

As far as the future is concerned, it was thought that farmers in other industries would be returning to agriculture as opportunities elsewhere became fewer. At present the wage differential deters many experienced men from returning to the farms. It was suggested that the difference could be off-set by revisions in farm prices and that this would be preferable to subsidizing wages. Farm labour needs are, to a considerable extent, being met by mechanization. Part of the shortages which

now exist could, in some degree, be overcome by "on job" training of farm workers, and through the direction of men from less to more essential farms. It was recommended that assistance for the training of farm workers be obtained through an extension of the farm labour agreements.

It was the opinion of the conference that the joint farm labour program already developed might be utilized in the future by Federal and Provincial Agencies to assist in dealing with employment needs of agriculture and other closely associated industries.

Rehabilitation

Placement of Veterans in Peacetime Employment

Release of Key Personnel—Procedure of Employment Service

A STATEMENT issued on June 1 by the Prime Minister of Canada, Rt. Hon. W. L. Mackenzie King, deals with the placement in peacetime employment of ex-service personnel and outlines the plan for the release of key workers.

The statement is as follows:

The placement in peacetime employment of service personnel being demobilized following the end of the war in Europe has now begun. The government anticipates important problems relating to the relocation of manpower during the next eighteen months as large numbers of long-service men are repatriated from overseas. Government measures already adopted include adequate machinery for handling the problem of re-employment.

The reorganization of Canadian war production for the war against Japan is being carried out in close co-operation with the other United Nations, particularly the United Kingdom and the United States. Canada has continuing commitments in the field of production for the war against Japan; for a considerable period these will be a heavy claim on Canadian labour. The Department of Labour is continuing to direct its efforts to the placement in permanent employment of returning service personnel and a considerable number have already been placed.

Comprehensive plans for the orderly release of service men and women as this becomes possible have been worked out by the three forces. With a certain limited number of exceptions, the "first in first out" principle will govern, but a primary objective will be to obtain the return to civil life as rapidly as possible of all men and women whose services are no longer required by the Armed Forces.

Veterans' Employment Rights

Certain rights and privileges have been guaranteed by government to all who have served in the forces; similar rights and privileges have been extended to the merchant marine and the corps of volunteer fire fighters. These measures include the right of re-instatement in the job held on joining the service and the retention of seniority standing.

For the purpose of determining eligibility for pensions and other benefits provided by his pre-enlistment occupation, the period of service will count as though the service man had been continuously in his civil employment. In this way, so far as possible, the service man's civilian standing is protected.

Once reinstated in his peacetime job, the ex-service man may not be dismissed without good cause, and if the dismissal occurs within six months after his reinstatement the onus is on the employer to prove that he was justified in his action. The purpose is to ensure that the ex-service man has an adequate opportunity to readjust himself to civilian working conditions.

Ex-service men are under no compulsion to return to their former jobs if they do not wish to do so; nor are they subject, in the ordinary sense, to the workings of the National Selective Service. The ex-service man with overseas service may return to his former job immediately after notifying the employment office, or, if he wishes, he may obtain an open permit to seek employment anywhere. He will be under no compulsion to take any particular job.

Veterans receiving pensions for war disabilities and discharged personnel with overseas service or service on the high seas will be first in line for civil service positions. Widows of men who have died as a result of war service will receive similar preference.

Machinery for Employment Placement

By the time he is discharged the service man will have had ample opportunity of becoming familiar with the arrangements made for his re-employment. Personnel counsellors appointed by the Services and representatives of the Departments of Veterans Affairs and Labour discuss the service man's future with him even before he is discharged, and during his period of demobilization counselling is constantly available to aid him in deciding what type of training or employment would best suit his particular needs.

But the principal machinery is the National Employment Service provided for under the

Unemployment Insurance Act of 1940, which is being administered by the Department of Labour. Although the Employment Service played a large part in handling the manpower problems of wartime origin, actually it is a permanent public service which will aid both employers and employees during the transition period and in peacetime.

In the larger employment offices armed forces registration units have been established. The responsibility of these units is to ensure that discharged persons receive special attention until they have secured permanent employment. In the remainder of the 290 employment offices across the country the staff have received special training and instruction in order to offer the ex-service man and woman the most helpful service possible.

In the larger municipal centres in Canada the Department of Veterans Affairs has established rehabilitation centres, where veterans may secure assistance and guidance in the post-discharge period. At these centres the Department of Labour will have representatives to act as counsellors on employment problems.

Local citizens committees, sponsored by the Department of Veterans Affairs, are already functioning in about 500 communities. They will also lend a hand in assisting the returned veterans to secure employment. These committees include in their membership representatives of municipal councils, churches, women's organizations, the Canadian legion and other veterans' groups, employers, labour unions, service clubs and fraternal organizations. They will interest themselves in every phase of rehabilitation. These committees will co-operate with employment offices of the Department of Labour in locating employment opportunities and encouraging the employment of ex-service personnel—particularly the disabled and others who require special assistance in finding suitable employment.

Release of Key Personnel

The large scale reallocation of manpower which the Department anticipates will take place within the next eighteen months will be closely related to the reconversion of industry from war to peacetime production. This change over will require alterations in plant and machinery and a large volume of new construction—a program which it is expected will make a heavy demand on the country's labour resources and which will ultimately provide new employment for many. The planning and inauguration of the reconversion program cannot effectively be carried out without certain key personnel. This situation obtains in both public and private

business projects. In order that projects which will provide employment opportunities for men to be demobilized will not be delayed, machinery has been set up to effect the release from the armed forces of key personnel when urgently required. The criterion will be their essentiality for the launching of projects of importance in the period of reconstruction and for the effective prosecution of the war. The plan adopted is designed to assure, as far as possible, the upholding of the right of men and women with long service to priority of demobilization, and to limit exceptions to this general rule to cases where earlier release would be in the national interest and for the benefit of service personnel as a whole by providing more jobs.

Under the Department of Labour and Industrial Selection and Release Board, including representatives from the Defence Departments and the Departments of Labour, Reconstruction, Munitions and Supply, has been established at Ottawa with branch headquarters in each of the following cities: Vancouver, Edmonton, Regina, Winnipeg, London, Toronto, Kingston, Montreal, Quebec, Saint John and Halifax. At each of these points an Industrial Selection and Release Committee consisting of representatives of the Defence Departments and the Departments of Labour and Reconstruction, has been set up.

An employer requiring the services of a key worker will make application to his local committee, who will consider the case and review with the management of the business concerned the increase in employment or production, the assistance in reconversion or in plant expansion which would result from the return of the man applied for. The committee's recommendation will be passed to the Board at Ottawa who will forward the application to the Services with the Board's decision. Subject to the exigencies of the service, the defence departments will rely entirely on the Board's advice in granting release of the personnel ahead of their normal priority. Such release will be subject to the concurrence of the service men and women concerned.

The release of such personnel may be made either by actual discharge, or, at the option of the defence departments, by granting leave subject to recall. In general, discharge will not be granted where this would violate seriously the "first in first out" principle. Discharges or releases subject to recall under those provisions are expected to be very limited in number.

Arrangements have been made to release from the Armed Forces, as soon as possible, men formerly on university staffs so that they may return to their civilian positions. This

will relieve the pressing shortage of educators in the universities, and will assist in preparing for the reception of the large number of men and women now in the services who will wish to continue their education upon discharge.

Training for Civil Employment

Modern mechanized warfare has demanded technical skill of a very high order. A large proportion of the men and women being discharged from the Services are skilled in one trade or another. The effect on the future of industry in Canada of new skills and knowledge acquired in the Services is likely to be far reaching. In order that the service man may obtain the fullest benefit from the skills and knowledge acquired during the war, some scale for measuring his ability and relating it to recognized civilian standards in the various trades and vocations concerned is necessary. For this purpose a Royal Commission on Veterans' Qualifications was set up on May 11th, at the recommendation of the Minister of Labour, and is now sitting. The Commission will enlist the aid of the provincial governments, trade unions and other interested groups.

It is recognized that for many ex-service men some further training will be necessary to fit them for peacetime occupations. Wide opportunity is provided under the legislation administered by the Department of Veterans Affairs. The vocational training facilities created during the war for the training of war workers and tradesmen in the armed forces is being utilized for this purpose, as well as other

training institutions. It is expected that a large number of veterans will be trained on the job with their income supplemented by the Department of Veterans Affairs.

With three years of experience behind it, the vocational training plan is capable of handling the large numbers of ex-service men and women who it is expected will be undertaking vocational training. The Department of Labour is also organizing pre-matriculation studies, and the Canadian universities are making plans to welcome veterans whose courses of study are approved and paid for by the Department of Veterans Affairs. Men and women waiting return from the European zone will be given an opportunity to pursue their training and studies there and to continue them in Canada before and after their discharge.

Disabled Veterans

In the placement of permanently disabled veterans the employment offices of the Labour Department will work closely with the casualty rehabilitation section of the Department of Veterans Affairs. The policy of the Labour Department when considering the question of placing disabled men in industry is that the employer should accept a man for his abilities rather than reject him because of his disabilities. Methods in use in the United Kingdom and other parts of the Commonwealth and the United States are kept under constant study and the facilities established are intended to provide a rehabilitation service equal to any other in the world for the 25,000 Canadians who have suffered some disability in this war.

Discharge of Men From Armed Forces

THE timing of discharge of men from the Armed Forces is based primarily on length and type of service in order to give the advantage to those in longest. This is the "first-in-first-out" principle.

However since the early release of some men with special skill or experience will contribute to the maintenance of maximum production, and hence the prompt employment of other men as discharged, a procedure has been arranged for the early release of key personnel.

Employers in industry may make application for the speedy release of any man in the Forces, where the employer can prove that:—

1. The man has a special skill or experience needed in his plant or business;
2. The employment of the man will aid effective further prosecution of the war;

reconversion of industry; or prompt employment of men and women discharged from the Forces.

Any application by an employer must be made to a District Committee.

Applications approved by this Committee will be submitted to the Industrial Selection and Release Board at Ottawa.

The Board and Committees will have representatives of the Departments of Labour, National Defence, Munitions and Supply and Reconstruction, as well as of the National Employment Service.

After thorough investigation by the Committee and the Board, cases recommended upon favourably will be submitted to the Armed Forces for action—subject to the man agreeing and the Forces not requiring his services further.

The procedure applies to men regardless of where now posted—whether overseas or in Canada.

Provision was made for the establishment of the Industrial Selection and Release Board in Ottawa, and of the district committees under Order in Council P.C. 3683 of May 24.

According to the Order the Board may:—

- (a) review recommendations of the Committees respecting the discharge or release of any man or men in the Armed Forces, and may accept or reject in whole or in part recommendations of the Committees;
- (b) make recommendation to any of the Armed Forces respecting the discharge or release of any Member thereof, if in the opinion of the Board, such discharge or release is in the national interest, which recommendation shall be implemented by the Armed Forces consistent with the exigencies of the Service concerned, and subject to the concurrence of the man concerning whom recommendation is made;
- (c) make recommendations to the Armed Forces respecting discharge or release of

men having certain occupations whose employment in civilian life would contribute to the expeditious and effective reconversion of industry from wartime to peacetime production with the maintenance of maximum employment;

- (d) make surveys or direct that surveys be made in respect to any of the above matters.

A Committee may:—

- (a) conduct a survey of all or any employees in any business, plant, or establishment in Canada employing one or more persons;
- (b) require any employer to appear before it and to give such information as may be required by the Committee;
- (c) make recommendations for the consideration of the Board respecting the discharge or release of any member of the Armed Forces, if, in the opinion of the Committee, such discharge or release would contribute to the expeditious and effective reconversion of industry from wartime to peacetime production or the maintenance of maximum employment.

The Board and Committees shall be responsible to the Minister of Labour.

Vocational Guidance for Disabled Veterans in New South Wales

A REPORT prepared by the Guidance Research Office of Sydney Technical College and published by the Government of New South Wales, traces the development of "Vocational Guidance of the Disabled Soldier" in that State.

The project had a modest beginning early in 1942 when a Red Cross rehabilitation officer enlisted the assistance of the Technical College in "advising disabled soldiers who could not return to their old occupations and who had no clear plans for their own occupational rehabilitation." Shortly after an advisory committee was set up at the request of the manpower authorities under the chairmanship of the Superintendent of Technical Education and consisting of representatives of the Repatriation Commission, Red Cross Rehabilitation and the Technical Education Branch. Later, the committee was extended to include the Services and the Manpower authority.

Principles Agreed Upon

Two important principles were agreed upon by the Committee at its early meetings: first, that the training of disabled veterans should not be delayed until they were discharged and thus became the responsibility of the Repatriation Commission; and secondly, that as a matter of routine, all men in doubt about their occupational plans should be seen by the Vocational Guidance Officer.

Approximately two-thirds of the cases handled were precluded by their disabilities from returning to the occupations in which they had been engaged prior to enlistment. It was discovered, too, that a large minority of

the men physically capable of returning to their former work did not wish to do so. It was estimated that 30 per cent of the soldiers from New South Wales did not wish to return to their former jobs after the war. This was considered to be a significant factor when the time came to deal with able-bodied men, large numbers of whom were then seeking correspondence courses in occupations not related to their previous experience.

This "fresh start approach" to vocational rehabilitation by ex-service men was stated to create a number of problems. The major one was the reluctance of the discharged soldier to make use of his previous experience. It was felt that men who were physically unable to return to their former employment should enter a field as nearly as possible related to their former occupation. It was asserted that after the first World War "failures occurred in large proportions among men who tried to make a complete break with their occupational past."

The report indicated, in the second place, that discharged men revealed "limitations of knowledge of occupations little understanding of their own assets and liabilities in talent and interest and an optimism that other occupations could be entered after a few months' training." It was considered necessary, therefore, for the counsellors to be on guard against the placement of former servicemen in unsuitable occupations. "The approach," it was asserted, "must be a clinical and personal one that is ready to go beyond the immediate vocational problems, to deeper, more intimate and more subtle personal issues."

Reconstruction and Social Security

Reconstruction in Great Britain

OF interest in respect to reconstruction planning in Great Britain are two Bills which have recently been debated in the

House of Commons, relating to family allowances, and the distribution of industry. A White Paper on *Housing* has also been issued.

Family Allowances

Designed to implement the proposals laid down in the White Paper, *Social Insurance* (L.G., Nov., 1944, p. 1313), the British Government has introduced a Bill providing for family allowances.

Under the terms of the Bill no allowance is paid for the first child, but 5 shillings a week is paid for each subsequent child. In addition to his own children (and in general, step-children and legally adopted children), a person may include in his family a child, or children, whom he maintains.

For the purpose of the Bill a child is defined as (a) one who is under the upper limit of the compulsory school age or (b) one over that age, who is undergoing full-time instruction in school, or is an apprentice, until the 31st of July following his 16th birthday.

It is provided in the Bill that reciprocal arrangements may be made with other countries which are part of His Majesty's dominions, where similar schemes are in force.

The number of families expected to benefit

from the legislation is about 2,500,000 in respect of 4,400,000 children.

The anticipated cost of family allowances is £57,000,000 for the first full year of operation of the scheme.

Allowances will be treated as taxable income for income tax purposes and the taxpayer will continue to receive the exemption of £50 per child which the income tax law at present provides.

During the debate on the Bill, the Minister of National Insurance, Sir William Jowitt, stated that in addition to cash allowances the Government was planning to provide allowances in kind. He said that when the scheme for meals and milk is fully developed it will cost £60,000,000 per annum, which is more than the estimated cost of cash allowances. Allowances in kind will be available to all children, including the eldest, and will of course not be subject to income tax.

The allowances are declared in the Bill (as amended in its passage through the House) to belong to the mother, but are receivable either by the father or mother.

Distribution of Industry

With the intention of avoiding unemployment "pockets" after the war, the British Government has introduced a Distribution of Industry Bill.

The purpose of this Bill is to enable the United Kingdom Government to secure the proper distribution of industry over the country as a whole by stimulating the industrial and social development of areas in which there is a special danger of unemployment and by controlling further industrial development in other areas where such control appears to be desirable for economic, social or strategic reasons.

The importance of such a measure as part of a full-employment program was stressed in the British White Paper on *Employment Policy* (L.G., Aug., 1944, p. 945), which pointed out that during the between-wars period unemployment had been persistent in certain areas

which were largely dependent on depressed industries such as coal and cotton. "The suffering in these areas, the Paper stated "was enhanced by their lack of a proper industrial balance." To protect these special areas (now termed "development areas") the Paper proposed that new enterprises be established on them and announced the Government's intention of influencing the choice of location of industrialists contemplating the building of new factories.

This section of the White Paper is now intended to be implemented under the terms of the Distribution of Industry Bill.

The Bill will enable the Board of Trade to assist areas which have been designated as development areas by direct and indirect means. It can acquire land in the areas to be used for industrial development, it can prepare sites and can itself build factories.

It can make loans to non-profit-making trading or industrial estate companies for the provision of industrial premises in development areas. Special grants or loans may be made toward the cost of improving services on which development of industry depends where they are inadequate for the needs of the area. The Board may acquire derelict land in development areas and carry out work on it with a view to bringing it into use or improving the amenities of the neighbourhood.

Control Over Industrial Building

In order to influence the location of new industries by private enterprise, the Bill

provides that the Board of Trade must be notified of all proposals to erect industrial buildings with an aggregate floor space exceeding 3,000 square feet and forming part of a new industrial unit.

The Bill originally contained a clause empowering the Board to prohibit new industrial building in areas where this would be "seriously detrimental to the proper distribution of industry." This clause, however was deleted during the course of the Bill's passage through the House of Commons.

A survey has been undertaken by the Board of Trade to discover the industrial prospects and needs of cities, towns and areas in the United Kingdom.

Housing

A White Paper on *Housing* was issued by the Government of Great Britain in March, 1945.

Illustrating how progress in housing had been cut short by the war, the Paper states that in the years 1934-39 a campaign for slum clearance had been in full swing, that by 1939 the proportion of people still living in unfit or overcrowded houses had been reduced to 6 per cent, and that over 30 per cent were living in new houses built since 1919. During this period the output of houses averaged 300,000 a year, and the number of men employed in the building trades was 1,000,000. Between 1939 and 1945, however, the working force shrank to 337,000, and only 200,000 houses were produced. Meanwhile 200,000 houses were entirely destroyed by enemy action, 250,000 were made uninhabitable, and well over a million houses were damaged although still occupied "in varying stages of repair."

The Paper estimates that in order to supply a separate dwelling for every family which desires to have one some three-quarters of a million new dwellings will be needed. To remove unfit houses will require the construction of an additional half-million; while normal replacements will necessitate further construction year by year.

The Government proposes to treat the first two years after victory in Europe as a period of national emergency in housing. Repair of war-damaged houses will continue to receive the highest priority. The labour force will be increased by normal and special releases from the Forces and by training programs; although many of the new workers will still be required for building for war purposes until after victory in the Pacific.

The program includes the construction of both permanent and temporary housing. In

regard to the former, the Paper indicates that 300,000 permanent houses built or building constitutes a maximum target for the end of the second year after the end of the war in Europe. "Pre-fabrication and other non-traditional forms of construction, which make a smaller call on building labour than the traditional methods, will be used to the fullest practicable extent . . . during the emergency period while building labour is scarce."

For the provision of temporary houses, the Government is authorized to spend up to £150,000,000 under the provisions of the Housing (Temporary Accommodation) Act of 1944. Though considered costly because of their short lives, it is expected that temporary houses will bridge some of the gap between housing needs and the number of permanent dwellings that can immediately be built. Such materials as wood, concrete and asbestos cement will be used. Assistance will be given by the U.S. Government which is sending 30,000 pre-fabricated houses on lend-lease terms for erection in areas of war damage.

Arrangements are planned to avoid delay in the production of the various materials and fittings required for the housing program, with action being facilitated by the standardization, so far as possible, of essential parts.

To check a rise in building costs (such as occurred after the last war as a result of demands exceeding the capacity of the building industry) the Government is controlling the volume of contracts and the price of materials. Subsidies will be provided where necessary, for building both by local authorities and by private enterprise. Legislation to this effect is being prepared, the Paper indicates.

Dealing with the organization of the program, the Paper states that local housing authorities are responsible for determining,

with the approval of the Government, the number and type of houses they will build in their areas. "They prepare the sites, erect permanent houses or arrange for their erection under contract, select tenants, fix rents and

undertake the management of their housing estates." These activities will be assessed by the Central Government, which will determine standards, and formulate the housing program as a whole.

Proposals for Social Insurance Program in United States

A BILL to establish a national social insurance system was introduced in the United States Congress on May 24. The proposed legislation would take the form of an amendment to the Social Security Act of 1935, and would provide:—

1. A national health insurance program;
2. Unemployment and temporary disability insurance benefits up to \$30 a week on a uniform national basis;
3. Retirement, survivors, and total disability insurance with more liberal benefits than under the existing law.
4. Extension of coverage to include an additional 15,000,000 persons.

In addition to these insurance provisions, the bill would also provide for the following social legislation:—

1. Federal grants to States for the expansion of public health services, maternal and child health and welfare services, and the construction and expansion of hospitals, health centres, and related facilities;
2. A comprehensive public assistance program, consisting of Federal grants to States for assistance to all needy persons such as the aged, blind, and dependent children; and
3. Continued Federal operation of a national system of public employment offices.

Under the terms of the bill, the social insurance benefits would be financed by contributions at a rate of 8 per cent on earnings up to \$3,600 a year, of which 4 per cent would be paid by employers and 4 per cent by employees. Federal grants to States would be financed out of general revenue.

The existing United States Social Security Acts, which became law ten years ago at the instigation of the late President Roosevelt (L.G., Feb., 1935, p. 100), established a Federal system of old age and survivors insurance, and afforded Federal aid to State unemployment insurance plans and other State social assistance measures. Unemployment compensation plans were subsequently developed by various States, but the benefit provisions have not been uniform. In most States the maximum payment at present is between \$15 and \$20 a week. The new bill, which is sponsored by Senators Wagner and Murray and by Representative Dingell, would modify the original Act by putting unemployment compensation payments entirely on a Federal instead of State basis. Coverage would be broadened and benefits raised. Persons temporarily disabled through illness or injury would be eligible for identical benefits.

The old age insurance provisions of the Act would, under the terms of the bill, be continued in an extended form and with higher rates up to a maximum of \$120 a month.

In its section on health insurance the bill would make provision for prepaid medical care to meet the needs of both rural and urban populations. Benefits would include the services of a family doctor, specialist attention where necessary, and hospitalization, but would not at the outset include dental or nursing services. Freedom of choice of doctor and patient would be safeguarded.

The bill has been transmitted to committees of both the Senate and the House of Representatives for consideration. It has been endorsed by both the American Federation of Labour and the Congress of Industrial Organizations.

*Maritime Trade Union Course**

Institute of Public Affairs of Dalhousie University Holds Second Annual Convention

THE second annual convention of the Maritime Labour Institute was held at Dalhousie University from May 7 to 10. The Labour Institute is sponsored jointly by Maritime Provinces units of the Canadian Congress of Labour, the Trades and Labour Congress and Dalhousie University. Both congresses are represented on the Institute's Council in equal numbers, while Professor Richter of the Dalhousie Institute of Public Affairs functions as Chairman and Director, and Mr. G. A. McAllister is Secretary. The Institute is financed by Maritime unions, the government of Nova Scotia also contributing towards its upkeep.

The convention took the form of a course on matters of interest to trade union officials. Papers were presented by leaders in the Canadian and American Labour Movements, representatives of the Federal government and of the International Labour Office. Sixty delegates from New Brunswick and Nova Scotia were in attendance, representing miners and steelworkers, longshoremen and seamen, carpenters, railway employees and many other unions.

Hon. J. A. MacQuarrie, Attorney General of Nova Scotia, welcomed the conference delegates on behalf of the Provincial government. The best wishes of the Federal Labour Department were extended by Mr. Bernard Wilson, Secretary of the National Labour Relations Board.

Mr. Wilson presented to the convention a paper prepared by Mr. Arthur MacNamara, Deputy Minister of Labour and Director of National Selective Service. Mr. MacNamara's paper contained an interesting review of the wartime labour and price control policies of the Dominion Government, and certain observations as to the post-war plans of the government, particularly in the labour field. Referring to the role of National Selective Service in the post-war period, he stated that there is a general feeling that the compulsory features of the regulations will disappear rapidly now that the European war is over. "There are two reasons for this," he continued, "First of all, the same need for war material and hence for compulsory direction of workers to war industries will not exist. The second reason is that in a democracy like ours, while citizens will submit themselves willingly to government direc-

tion and compulsion in wartime, they hate like anything to be pushed around at any other time."

The Deputy Minister stated that the consensus of opinion among leaders of business and labour is in favour of the continuation of the labour-management committee principle in the post-war period.

Prof. B. Higgins, of the International Labour Office spoke on "Jobs in the Post-War." Prof. Higgins expressed his belief that full employment is an entirely feasible objective in the post-war period. His concept of "full employment" makes allowance for a small measure of transitional unemployment; fractional unemployment is inevitable in a dynamic economy. The speaker insisted that any really full employment program must provide for adequate wage rates and hours of work.

In Prof. Higgins' opinion, the basic problem after the war will be the maintenance of a sufficient over-all demand for goods and services to insure the total employment of our labour force. To this end every effort must be made to see to it that the Canadian government's prediction of a post-war export trade of one and three-quarter billion dollars is realized. Private investment must be stimulated by a reduction of certain types of business taxation. It will probably be necessary for the government to carry out a large scale public investment program. Finally, in so far as consumer demand is concerned, the government's social security plans ought to do much to promote an adequate volume of spending on consumption goods.

An interesting paper on "Post-War Housing" was read by Mr. D. P. Reay of Halifax. Mr. Reay stressed the need for increased efficiency in the building industry. While construction can be stimulated by the provision of money at low interest rates and by direct subsidization by the State, employment of far more efficient techniques is the only real answer to the problem, he stated. Pre-cutting and pre-fabrication point the way to decreased costs in the future. Through the use of such methods complete integration of the building

*The above report was prepared by Dr. L. Richter, Secretary-Treasurer of the Maritime Institute of Public Affairs. A portion of it has been published in *Public Affairs*, a journal issued by Dalhousie University.

industry is now a distinct possibility, the speaker concluded.

Mr. Nelson H. Cruickshank, Director of the American Federation of Labour Social Insurance Activities in the United States addressed the convention on "Labour's Social Security Goals." "An adequate social security program must be an integral part of our economy," he said. The aim of such a system would be to underwrite the inevitable risks with which working people are confronted.

Social measures covering illness and off the job accidents are altogether inadequate in both Canada and the United States, Mr. Cruickshank asserted. Voluntary hospitalization plans are all to the good, but do not provide a sufficient substitute for an all-inclusive Health Insurance Act.

Mr. Bert Hough of Ambridge, Penn., Director of District No. 20, United Steel Workers of America, gave an interesting talk on the development of labour relations in the United States over the last decade. This discussion formed a background for a critical appraisal of the operations of joint labour-management production committees during the war.

A provocative paper entitled "Human Aspects of Industrial Relations" was presented by Major-General G. B. Chisholm, C.B.E., M.D., Deputy Minister of Health. The human factor is basic in industrial relations, Dr. Chisholm said. Unless management and labour give full attention to the human element, all efforts to insure satisfactory labour relations will fail.

Modern mass production techniques have created special problems of a psychological nature in industry. With the passing of the handicrafts it is necessary to provide for the satisfaction of the emotional needs of workers by planned activities outside their regular occupations. The necessity for careful job selection and personnel management cannot be over-stressed, he concluded.

"Let the People Know" was the topic of an interesting address by Mr. David Petegorsky of the Wartime Information Board. He urged the labour movement to make full use of the vastly improved techniques of communication and education to bring to union workers the kind of information they require both as trade unionists and as citizens.

Mr. J. C. McGuire, National Secretary-Treasurer, Canadian Brotherhood of Railway Employees, spoke on "Negotiating a Collective Agreement". He said that collective bargaining is a step towards a real partnership of management and labour. The success achieved by labour-management production committees rests on a solid foundation of mutual respect

and tolerance. In the speaker's opinion, production committees are here to stay.

Through the collective bargaining process many a worker has learned of the problems that face management, and has developed new respect for "the other side", Mr. McGuire stated. Each party, employer and employee, has become familiar with the interests of the other, and has found that there are many matters of mutual concern about which much can be done through co-operative action.

Whole communities prosper or decline according to the effectiveness of labour's efforts in collective bargaining. This process is not a selfish effort on the part of the workers to better their lot at the expense of the rest of the community, the speaker emphasized.

He concluded by saying, "the most disarming force in contractual negotiations is perfect frankness and honesty of purpose. When these are coupled with gentlemanly conduct and strict adherence to sound principles, the negotiations will be raised to a higher plane than would otherwise be the case, and will invariably command a more favourable attitude on the part of management".

Mr. Bernard Wilson, Secretary of the National Labour Relations Board, addressed the convention on "The Functions of the National Labour Relations Board". The purpose of the Board is to obtain the collaboration of employers and employees for the advancement of the enterprises in which they are engaged, particularly war industries. Under the Order in Council constituting the Board, employers and employees are urged to discuss freely matters of mutual interest and to settle disputes by peaceful means. Mr. Wilson said that freedom to organize for the conduct of negotiations is assured and procedure established to facilitate such negotiations.

Concluding the successful session of the Institute the Chairman, Prof. L. Richter, referred to the deep interest which organized labour has taken in its educational perfection. The Chairman also gave a brief report on the past activities of the Institute and the plans for the future. The library services, of which wide use is being made by the unions, will be extended and collections of books placed in union offices throughout the province. Regional conferences will be held in various industrial centres and speakers provided by the Institute sent to the local group. The Institute's monthly bulletin, *Labour and Learning*, which appears in an edition of one thousand, will be enlarged and its contents in the next few months devoted to specific post-war problems. The first piece of research on Maritime labour problems will soon be published, dealing with the recent history of labour unions in the Maritimes.

Decisions of National War Labour Board

DURING the month of May, the National War Labour Board issued decisions in the following cases:—

S. F. Bowser Company, Limited (Toronto, Ont.), and United Steelworkers of America, Local 2901.

Federal Association of Taxicab Owners, Inc., and International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local 488.

Winnipeg Electric Company.

Montreal Tramways Company and Canadian Brotherhood of Railway Employees and Other Transport Workers.

American Dairy Lunch Company, Limited, and Hotel and Restaurant Employees' Union, Local 269.

Hurst Engineering and Construction Company, Limited, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Winnipeg, Man.

Dominion Steel and Coal Corporation, Limited, and United Steelworkers of America, Local 1064.

Algoma Steel Corporation, Limited, and United Steelworkers of America, Local 2251.

Woodland Dairy Limited (Edmonton, Alta.).

Algoma Steel Corporation, Limited and International Association of Machinists, Lodge 485.

Electric Auto-Lite, Limited (Sarnia, Ont.), and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 456.

Canadian Bank Note Company, Limited, and Ottawa Plate Printers' Union, Local No. 6.

Gair Company of Canada, Limited, and International Brotherhood of Paper Makers.

Temiscouata Railway Company, and Canadian Brotherhood of Railway Employees and Other Transport Workers.

Standard Woodware Manufacturing Company, and Le Syndicat Catholique National du bois ouvre de Lyster, Inc.

Mastercraft Machine Products, Limited.

Liquid Carbonic Canadian Corporation, Limited (Toronto, Ont.)

Re: S. F. Bowser Company, Limited, (Toronto) and United Steelworkers of America, Local 2901

Reasons for Decision

This is an appeal jointly by the Company and the Union from a decision of the Ontario Regional Board dated January 11, 1945, declining to authorize an increase in the hourly rate for lathe and milling machine operators from 99 cents and \$1.04 respectively to \$1.10.

We have examined all the information filed on this appeal and before the Regional Board, and we must conclude that there is no basis upon which the decision appealed from can be disturbed.

The appeal must be dismissed.

May 2, 1945.

Re: Federal Association of Taxicab Owners, Inc., and International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local 488

Reasons for Decision

By leave of the Regional Board for Ontario, the Association, on behalf of its Toronto members, appeals from a finding and direction of that Board dated February 27, 1945, directing the establishment of "a standard work week of 48 hours divided into six days of 8 hours per diem for taxicab drivers and to pay such drivers at the rate of \$20.95 for such standard work week".

It must be noted that the establishment of a 48-hour work week was a matter previously dealt with by the Industry and Labour Board for Ontario under the provisions of the (Ontario) Hours of Work and Vacations with Pay Act, 1944. What the Regional Board had to consider under the Wages Control Order (P.C. 9384) was the matter of remuneration. Whatever may have been the terms in which the application of the Union was couched, the

question for determination was whether section 23 of the collective agreement, reading as follows,

Regularly employed full-time drivers are to be hired and paid at the rate of Twenty Dollars (\$20) per week for a week of sixty-three (63) hours or proportionately to the hours worked by such drivers during such week. Hours of work shall be as follows:

Sixty-three hours per week divided into six days of ten and one-half (10½) consecutive hours per day, from which forty-five (45) minutes shall be allowed for eating at or near the half shift.

was to be altered so as to provide the weekly rate of \$20.95 (cost-of-living bonus included) for a week of 48 hours. The Union argued that as weekly workers they should receive the same rate for the reduced hours.

Re: Winnipeg Electric Company

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Manitoba dated February 28, 1945 refusing permission to establish a new classification of "salesman" with a combined time rate and commission or incentive rate therefor.

The Company employs a salesman in its Appliance Merchandising Department, whose duties were to solicit purchasers at their homes. It now wishes to establish a classification of "Floor Salesman, Class A", with an altered basis of remuneration to correspond to the changes in the nature of the work and duties brought about by wartime conditions.

The clause quoted indicates clearly that, although payment was made at a weekly rate, the number of hours worked was a material factor in its determination. In our opinion, the application could be viewed only as a request for an increase in wage rates and had to be considered in regard to section 20 (1) (a) of the Order in Council.

We have from the Regional Board a report stating that it found as a fact that there was a gross inequality and a gross injustice to be rectified and, in effect, that its decision was made for the purpose of making such rectification.

We have come to the conclusion that the decision should not be disturbed and that the appeal should be dismissed.

May 2, 1945.

Re: Montreal Tramways Company and Canadian Brotherhood of Railway Employees and Other Transport Workers

Reasons for Decision

This is an application by the Company for leave to appeal and an appeal from the Finding and Direction of the Regional War Labour Board for the Province of Quebec dated January 3, 1945. The employees involved in the application appealed from are certain employees in the Cashier's Department, the Maintenance Group in the Rolling Stock Department in the Youville Shops and in the car barns, certain employees in Track Division, Track Service Division, Building and Structure Division of the Construction Department, certain employees in the Autobus Mechanical Department, Power Department, the Electrical Maintenance Group, the Mechanical Division and the Overhead Lines.

The Quebec Regional War Labour Board refused the Company leave to appeal, but in the special circumstances of this case, and, having regard also to the important and far-

reaching effects on the Company's whole wage structure which would result from the Finding and Direction appealed from, because of the elimination of ranges of wage rates, and the substitution, therefor, of single rates, this Board grants the application of the Company for leave to appeal. In this connection it is important to note also that the representative of the Union indicated to the Board that the Union was not opposing the Company's application for leave to appeal.

We are of opinion that this is such a case and that the new combined time and commission rate should be approved from the date of application.

This appeal should, therefore, be allowed.

May 2, 1945

The submissions and evidence presented to this Board disclose that after many years experience the Company had established an elaborate wage structure comprising many classifications and a complicated system of ranges of wage rates. It should be pointed out also that this wage structure, with its many classifications and ranges of wage rates, had for a considerable period prior to wage control been reviewed and determined after

collective bargaining by the Company with its employees.

Voluminous exhibits and charts were presented to the Board on the hearing of this appeal indicating the various classifications in existence prior to the launching of this application, and indicating as well the Company's proposal and the compromise offer from the Union, and indicating finally the schedule of wage rates directed by the said Regional War Labour Board.

This Board is of opinion that the Company's wage rate structure requires simplification and modification. It is apparent that the said Regional War Labour Board devoted careful study to the number of classifications involved, and this Board will not disturb its decision in so far as it reduced the number of said classifications. In determining, however, whether it is proper in the circumstances to substitute single wage rates for ranges of wage rates, we think greater consideration must be given to the conditions which now exist as a result of the practice and procedure which have prevailed over a period of many years, and out of which the existing ranges of wage rates have developed. The evidence submitted to us also disclosed that for many years it had been the practice of the Company to promote the unskilled employees to higher classifications. This method of permitting employees to qualify for higher classifications developed a wage structure somewhat different from that which is based on well recognized "apprenticeship practice". This Board thinks that it would be neither fair to the Company nor fair to the employees in the circumstances of this case to direct a change so drastic as that proposed by the Regional War Labour Board.

We think, however, that there is reason for the objection that both in the wage structure existing prior to the launching of this application and in that suggested in the compromise

proposal made by the Company, there is opportunity for the discrimination which the Union fears. The ranges of wage rates for each classification should, therefore, in the opinion of this Board be so designed that employees, if they acquire the necessary skill and experience, may, within reasonable time progress to the top of the ranges. If such a provision is made it will also remove the Union's complaint that the ranges of wage rates heretofore in effect resulted in wage rates for the individual rather than wage rates for the particular classification. For the classifications specified in the Finding and Direction of the said Regional War Labour Board, the Company should adopt the schedule of ranges of wage rates annexed to this Reasons for Decision. This schedule when adopted will provide an orderly method by which the employee may arrive at the top of the range of his classification.

This Board realizes that this schedule of ranges of wage rates based on an analysis of the information contained in the submissions, evidence and exhibits presented to both Regional and National War Labour Boards may, with respect to a certain number of classifications, require revision or amendment. In order to assist us in determining the revisions or amendments, if any, that may be desirable, we think that the parties should have an opportunity to submit their recommendations as to such revisions or amendments after having obtained experience in the actual operation of the schedule during a period of two months. The Board, therefore, declares that either, or both, of the parties to this appeal may appear before it on the 10th day of July, 1945, to submit, for the consideration of the Board, reasons why the revisions and amendments above referred to may be necessary.

Finding and Direction will issue accordingly

May 2, 1945

Re: American Dairy Lunch Company, Limited and Hotel and Restaurant Employees' Union, Local 269

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for the Province of Alberta, dated December 9, 1944, directing the Company to pay certain increased wage rates and providing for a premium of \$1.00 per week for night and split shift work.

Leave to appeal was granted January 16, 1945. The appellant was not represented at the hearing before us.

In its original brief filed on this appeal the Company asked to have the Finding and Direction of the Regional Board set aside in

full. But by supplementary statement the Company applied for the establishment of ranges in each classification with the rates set by the Regional Board as the top of each range; and agreed to pay the present employees the rates set by the Regional Board.

We are of the opinion that the decision of the Regional Board should not be disturbed. The appellant has not satisfied us that the Regional Board erred in its appreciation of the facts or the application thereto of the provisions of the governing Order, P.C. 9384.

The appeal, therefore, will be dismissed and Finding and Direction will issue accordingly.

May 3, 1945

Re: Hurst Engineering and Construction Company, Limited, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Winnipeg, Man.

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for the Province of Manitoba, dated February 15, 1945, by which the Board dismissed the Union's application for payment of a 6 cents per hour wage increase to hourly rated employees effective from September 15, 1943. Leave to appeal was granted February 15, 1945.

The application was made under the provisions of P.C. 9384 and it was alleged that a gross injustice and a gross inequality existed. The Union, in asking for a 6 cents per hour increase, relied upon the Finding and Direction of this Board in the railway case—Case File N-1300. The Regional Board in dismissing the application expressed the opinion that the decision above referred to did not form adequate ground for granting the application—that decision being based on the provisions of the former Order, P.C. 5963

Between 55 and 60 employees are affected by the application, although the number varies seasonally. The work consists of heating and icing cars, cleaning cattle cars, packing and storing ice and miscellaneous duties of that type.

The Company was incorporated in 1911. It constructed sewers, pavements, roads, bridges, etc. In 1925 it entered into a contract with the Canadian Pacific Railway to do the type of work above mentioned (the railway Com-

pany having previously carried on this work with its own employees) and for the last five years the Company's activities, due to the war, have been confined to this contract with the railway Company. Three of the employees now with the Company were originally with the C.P.R. prior to the original contract in 1925. The others have been taken on since that date and substantial numbers of them come from farming areas and are employed only at special rush seasons.

The first agreement with the Brotherhood and the Company was entered into in July 1942. In that year the employees were granted a cost-of-living bonus of 5 cents per hour and later, on June 30, 1943, a further increase in wage rates of 8 cents per hour was made. In June, 1944, one week's vacation with pay was granted. Certain additions to wage rates have also been made due to the rise in the cost of living.

We are of the opinion that the decision of the Regional Board is correct and should not be disturbed. We are satisfied that the employees concerned in this application are not railway employees who are affected by the decision of this Board in the railway Case File N-1300. It has not been established to our satisfaction that the Regional Board erred in any way in its appreciation of the evidence submitted.

The appeal will, therefore, be dismissed and Finding and Direction will issue accordingly.

May 3, 1945

Re: Dominion Steel and Coal Corporation, Limited and United Steelworkers of America, Local 1064

Reasons for Decision

On April 6, 1945, this Board heard an application made by the Union on the 22nd of August, 1944, pursuant to Order in Council, P.C. 689, for increases in wage rates and re-classification of the maintenance staff. In the Memorandum of Understanding, incorporated into P.C. 689, there is this clause:

That the management and the maintenance men enter into negotiations and that an application be made to the National War Labour Board for such increased wage rates or range of wage rates with respect to such maintenance men as pipe fitters, steamfitters, millwrights, electricians and carpenters as will bring their wage rates on a level with prevailing wage rates paid to maintenance men in such classifications.

A similar application dated January 19, 1944, and made on behalf of the maintenance group

of Algoma Steel Corporation, Limited, was heard by the National War Labour Board on February 3, 1944, and following a decision made by the Board on February 17, 1944, a factual study of the wage rates and classifications of the group of maintenance employees was made by Mr. W. H. Ley as referee. Subsequently, pursuant to verbal and written communications between the Union and Dominion Steel and Coal Corporation, Limited, Mr. Ley made a similar factual study respecting similar classifications in the group of maintenance employees of the Company at Sydney, Nova Scotia. The application for the adoption of Mr. Ley's report was heard at the same time as the application dated August 22, 1944.

Notwithstanding the fact that Counsel for the Company on the hearing before us on April 6, 1945, advanced with great force argu-

ments for an interpretation of the clause above quoted, which would differ from the interpretation given to this clause by this Board on the hearing of a similar application made on behalf of the employees of Algoma Steel Corporation, Limited, this Board is satisfied that the proper interpretation was given to this clause and other relevant clauses in its hearing of the case relating to the Algoma Steel Corporation, Limited. We, therefore, adopt the reasons for decision in that case, dated February 17, 1944, and May 3, 1945, as appropriate to the application now under consideration. We have nothing to add to those decisions excepting to make the following observations with respect to certain of the objections made by Counsel for the Company for the adoption of Mr. Ley's report.

First, he argues that the Company is unable to pay the increases in wage rates which will result if Mr. Ley's schedule is adopted. In considering an application made pursuant to Order in Council, P.C. 689, we do not think the argument of inability to pay can prevail.

Second, he strenuously objected to the adoption of the said report because it will not only disturb the relationship between the maintenance group and operational group, but will also provide a change in the wage structure of the maintenance group itself, which will be found entirely too drastic. In so far as he fears the disturbance in relationship in wage rates between the maintenance and operational groups, we do not feel that he has added anything to objections made for similar reasons by Counsel for Algoma Steel Corporation, Limited, and we think it appropriate at this point to refer to the reasons for decision dated May 3, 1945, in the case of Algoma Steel Corporation, Limited, and in which it is stated as follows:

On March 13, 1945, when application was made by the Union for the adoption of the schedule of wage rates recommended by Mr. Ley, subject to the exceptions hereinafter referred to, the Company objected that the adoption of such a schedule would interfere with the Company's wage structure, and complained that it was never contemplated that there should be reclassifications and evaluation of jobs in the maintenance group apart from the reclassification and evaluation of jobs among all groups of the Company's employees as contemplated by Sub-Section 3 of Section 1 of the Memorandum of Understanding.

With respect to this objection, it should be observed, first, that the study made by

Mr. Ley is not part of that reclassification and evaluation of jobs referred to in Sub-Section 3, Section 1, of the said Memorandum of Understanding. In the second place, Sub-Section 1 of said Section 1 of the Memorandum of Understanding clearly indicates that an application would be made to the National War Labour Board for such increased wage rates or ranges of wage rates with respect to such maintenance men as will bring their wage rates "on a level with prevailing wage rates paid to maintenance men in such classifications." It follows, therefore, that this Board must in obedience to Order in Council, P.C. 689, direct such increases in wage rates to the maintenance men as are necessary to give effect to the purposes of that Order. We may add that the Company did not convince us that the schedule of wage rates hereinafter adopted would seriously or materially affect its general wage structure.

In so far as Counsel for the Company complains that the Ley report will effect drastic changes in the wage structure of the Company, we point out that Mr. Ley in his report indicates that he found in the maintenance group of the Dominion Steel and Coal Corporation, Limited, an extremely complicated wage structure consisting of classifications, grades and wage rates. Counsel for the Company did not convince this Board that the said wage structure did not require simplification, and we are not prepared to adopt his argument that this complicated and faulty wage structure should be continued simply because it has been a long time in existence.

Attached hereto is the schedule of wage rates and ranges of wage rates as prepared by Mr. Ley. This Board approves it as the schedule of wage rates and ranges of wage rates to be applied to the maintenance employees of the Company, subject, however, to this proviso that inasmuch as Counsel for both Union and the Company took exception in representations before this Board to the classifications of certain jobs as established by the referee, the Board, therefore, is of opinion that if after three months' experience the parties agree that any of these classifications and rates require amendment and revision, the Board will then hear representations from them as to such amendments and revisions.

The effective date will be the date of application, namely, the 22nd day of August, 1944.

Finding and Direction will issue accordingly.

May 3, 1945

Re: Algoma Steel Corporation, Limited, and United Steelworkers of America, Local 2251

Reasons for Decision

On February 3, 1944, this Board heard an application made by the Union on January 19, 1944, pursuant to Order in Council, P.C. 689, for increases in wage rates and reclassification of the maintenance staff. In the Memorandum of Understanding, incorporated into P.C. 689, there is this clause:

That the management and the maintenance men enter into negotiations and that an application be made to the National War Labour Board for such increased wage rates or range of wage rates with respect to such maintenance men as pipe fitters, steamfitters, millwrights, electricians and carpenters as will bring their wage rates on a level with prevailing wage rates paid to maintenance men in such classifications.

In the decision of this Board dated March 31, 1943, it is stated that the clause above quoted is a matter in the first instance within the administrative purview of the Minister of Labour. However, negotiations between the parties having not resulted in a joint application to this Board for increased wage rates and ranges of wage rates for the maintenance group, this application was submitted by the Union.

Dealing with this application in its Reasons for Decision dated February 17, 1944, this Board after referring to item 3 of the Memorandum of Understanding which is as follows,

That arrangements be made for the making of a careful study having in view a reclassification and an evaluation of jobs,

made the following recommendation:

As far as we have been able to learn nothing has been done by the parties pursuant to this proviso. In our opinion the case as presented by the Union contemplates that reclassification and job evaluation is precisely what is required with respect to the maintenance staff in order to deal properly with this case.

Accordingly, we recommend to the parties that by agreement they undertake such a survey and if they can agree jointly present the results to this Board for approval. If they cannot agree to even undertake such a joint survey and notify us to that effect within a reasonable time we shall appoint a competent referee to make a factual study and report to the Board when we shall dispose of the case.

The parties did not agree to undertake the above survey, and accordingly Mr. W. H. Ley was appointed a referee to make the "factual study" above referred to. Mr. Ley made the study and copies of his report to this Board dated January 19, 1945, were delivered to the parties to this application.

On March 13, 1945, the Union applied to this Board for a direction that the schedule attached to his report, subject to certain

amendments, be adopted as the schedule of wage rates and ranges of wage rates for the maintenance men in the employ of the Company.

Before discussing Mr. Ley's report, and the suggested amendments, we think it should be noted that this Board on the first hearing of this application on February 3, 1944, indicated that the definition of the group of maintenance men referred to in the Memorandum of Understanding as "such maintenance men as pipefitters, steamfitters, millwrights, electricians and carpenters," was *illustrative* and not *exclusive*. We are satisfied that such meaning must be given to the Memorandum of Understanding when the clause is read as a whole, and read together with the recommendations of the Barlow Commission.

This Board is also of opinion that the phrase "bring their wage rates on a level with prevailing wage rates paid to maintenance men in such classifications," should be given the wide general meaning which the words indicate, rather than the restricted meaning urged by Counsel for the Company to the effect that it meant prevailing wage rates paid to maintenance men in the construction industry.

We think it most unfortunate that the parties did not make and develop the applications pursuant to P.C. 689, covering all the matters referred to in that Order in Council, promptly after the Order in Council was passed on the 26th day of January, 1943. We think it equally unfortunate that both of the Companies to whom P.C. 689 was directed were not made parties to the application now under consideration. Important matters of interpretation and policy have already been determined by this Board as a result of this application, and they have been determined without the Dominion Steel and Coal Corporation, Limited, or its Counsel, having been afforded an opportunity to make to the Board their representations on matters of great concern to that Company. We, therefore, when considering this application further as a result of the hearing on March 13, 1945, delayed decision until a similar application, both with respect to the maintenance group and Mr. Ley's report, had been heard on behalf of the Dominion Steel and Coal Corporation, Limited. This application was heard on April 6, 1945, and we may say that on that hearing no argument was developed by Counsel for the Dominion Steel and Coal Corporation, Limited, or submissions made on behalf of that Company, which warrants us to change in any way our interpretation as to the Memorandum of Understanding, or to alter our

decision as to the policy which this Board should adopt as a result of this application.

On March 13, 1945, when application was made by the Union for the adoption of the schedule of wage rates recommended by Mr. Ley, subject to the exceptions hereinafter referred to, the Company objected that the adoption of such a schedule would interfere with the Company's wage structure, and complained that it was never contemplated that there should be reclassifications and evaluation of jobs in the maintenance group apart from the reclassification and evaluation of jobs among all groups of the Company's employees as contemplated by Sub-section 3 of Section 1 of the Memorandum of Understanding.

With respect to this objection, it should be observed, first, that the study made by Mr. Ley is not part of that reclassification and evaluation of jobs referred to in Sub-Section 3, Section 1, of the said Memorandum of Understanding. In the second place, Sub-Section 1 of said Section 1 of the Memorandum of Understanding clearly indicates that an application would be made to the National War Labour Board for such increased wage rates or ranges of wage rates with respect to such maintenance men as will bring their wage rates "on a level with prevailing wage rates paid to maintenance men in such classifications." It follows, therefore, that this Board must in obedience to Order in Council, P.C. 689, direct such increases in wage rates to the maintenance men as are necessary to give effect to the purposes of that Order. We may add that the Company did not convince us that the schedule of wage rates hereinafter adopted would seriously or materially affect its general wage structure.

Re: Woodland Dairy Limited (Edmonton, Alta)

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Alberta dated February 28, 1945, refusing authorization to increase wage rates for seven senior employees.

This is the kind of case in which it is difficult for this Board to interfere with the conclusion of a Regional Board who are

Re: Algoma Steel Corporation, Limited, and International Association of Machinists, Lodge 485

Reasons for Decision

This is an appeal by the Union from a decision of the Ontario Regional Board dated April 21, 1944, denying an application for an increase of 10 cents per hour to machinists and engine fitters employed by the Corporation at Sault Ste. Marie.

Counsel for the Union took exception to some forty-nine of the classifications specified by Mr. Ley. As a result of conferences by the representatives of the Company and of the Union with Mr. Ley in Ottawa, following the hearing on March 13, 1945, and further conferences at Algoma on the 15th, 16th and 17th days of March, 1945, agreement was reached between the Companies and the Union with respect to all those classifications to which the Union had taken exception. It was also agreed that the classifications of helpers indicated by Mr. Ley in his report should be eliminated from the maintenance group and should be treated as operational employees. Mr. Ley's schedule of wage rates and ranges of wage rates as amended is attached hereto, and this Board approves it as the schedule of wage rates and ranges of wage rates to apply to the maintenance employees of the Company.

In determining the effective date, it must be borne in mind that, as already indicated, the application on behalf of the maintenance group for Algoma Steel Corporation, Limited, should, in the circumstances of this case, have been directed to the Dominion Steel and Coal Corporation, Limited, at the same time. This was not done, and the similar application with respect to Dominion Steel and Coal Corporation, Limited, was not made until the 22nd day of August, 1944. The effective date will, therefore, be the date of application made on behalf of the maintenance group of the Dominion Steel and Coal Corporation, Limited, namely, the 22nd day of August, 1944.

Finding and Direction will issue accordingly.

May 3, 1945.

acquainted with local conditions and the rates generally prevailing for similar jobs in comparable businesses. Although the rates requested do not appear to be high for positions carrying the titles used, we do not think that we can with good reason alter the Regional Board's decision.

May 9, 1945

These employees are engaged in maintenance work and belong to the group of employees whose rates were dealt with in a report made by Mr. Ley and adopted in our decision of May 3, 1945, made on the application of Local 2251 of the United Steelworkers of America pursuant to P.C. 689. This appeal

was heard on September 13, 1944, and our decision was postponed pending the completion of the investigation and hearing in the case of the other maintenance employees.

The rate now being paid to machinists and engine fitters is 92½ cents. The rate adopted by this Board for journeymen in the other maintenance classifications is 90 cents. The Union, however, argued that the rate for machinists and engine fitters should be established by comparison with the rate being paid in other industries. We do not think that this argument can prevail against the necessity

of keeping all employees in the maintenance group in line with the rates recently adopted. On that basis there would seem to be no alternative but to dismiss the appeal. However, it may be that certain of the employees involved in this appeal may qualify for the highly skilled category provided in the Ley report. If such is the case, the parties should endeavour to agree and present their joint recommendations to this Board for approval of any increases in the present rate.

May 10, 1945

Re: Electric Auto-Lite, Limited (Sarnia, Ont.), and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 456

Reasons for Decision

An appeal by the Union from a decision of the Ontario Regional Board dated January 20, 1945.

On June 29, 1944, the Regional Board approved, on joint application, a change from a Bedeaux form of incentive pay to a piece work system for a trial period of three months. After this period, the Regional Board received from the parties reports on the results of the conversion, had an investigation made by its own representative and came to the conclusion

that the Bedeaux system, with full premium, should be reverted to. The Finding and Direction appealed from also contain certain other provisions related to this change.

The Regional Board appears to have given this case careful attention and no sufficient reason was advanced by the Union which, in our opinion, could justify our altering the decision of January 20, 1945.

The appeal must be dismissed.

May 16, 1945

Re: Canadian Bank Note Company, Limited, and Ottawa Plate Printers' Union, Local No. 6

Reasons for Decision

This is an appeal from a decision of the Ontario Regional Board dated January 17, 1945, refusing to allow a joint application for an increase in rates for steel-plate printers from \$1.55 to \$1.70 per hour. Overtime is being paid at time and one-half after 40 hours in the week.

The purpose of the application is admitted to be the maintenance of a pre-existing differential between the rate paid by the parent company in the United States and the rate

paid in Canada. On a weekly basis, the differential was \$8.00, but is now \$13.55 following an increase granted in the U.S. plant.

The Regional Board came to the conclusion that no "gross inequality or gross injustice" had been shown to exist in the current rates paid in Canada. In view of our past decisions asserting the irrelevance of United States rates as a basis of comparison under our Wartime Wages Control Order, we are of the opinion that the decision appealed from must be confirmed.

May 17, 1945

Re: Gair Company of Canada, Limited, and International Brotherhood of Paper Makers

Reasons for Decision

(Oral Decision)

In view of practice in effect in this Company prior to November 15, 1941, namely, that of payment of wages in lieu of granting holidays with pay in those instances in which the holi-

days could not be taken, this Board is of opinion that for the year 1945—and we wish it to be clear—that it is for 1945 only, it will approve, but not *direct*, the scheme which has been proposed for those employees who have had more than five years service with the Company.

May 16, 1945

Re: Temiscouata Railway Company, and Canadian Brotherhood of Railway Employees and Other Transport Workers

Reasons for Decision

This is an application by the Brotherhood made on behalf of the employees of the railway not employed in the running trades for

an increase of 6 cents per hour over the present rates of pay, retroactive to September 15, 1943, and for two weeks vacation with pay.

By the decision in Case File N-1300 the railways affected thereby were directed to increase their rates by 6 cents per hour. That decision applied to the running trades of this railway company but not to the classifications covered by this application, which is based on an alleged gross inequality and gross injustice.

There is no dispute as to the existence of a gross inequality or gross injustice and it is well established. The Company, however, opposes the application for the increase on the ground of its inability to pay. Section 20 (2) of the governing Order, P.C. 9384, sets out the duty of the Board in matters of this sort and is as follows:

In considering any application to authorize or direct an increase in wage rates under this section, the National Board shall take into account the probable effect of such increase in wage rates on the cost of living and on the cost of production or operation of the business or industry in which the increased rates are to be paid, and shall require any employer who alleges that the proposed increase in wage rates will be beyond his ability to pay without increasing the price of his products or services rendered by him, to present evidence in writing demonstrating the basis of such statements and setting out the amount of the increase in the price of his products or services for authorization of which it will be necessary for him to apply if the proposed increase in wage rates is made. No decision of the National Board under this section shall be construed as

imposing an obligation on or implying a commitment on the part of any other agency of government.

The evidence in our opinion amply demonstrates the inability of the company to pay increased rates. The Brotherhood did not attempt to refute the statements of the company in this regard but urged that the company should seek relief by applying to the proper authority for permission to increase its rates or, alternatively, to apply for a subsidy, which, if granted, might enable the company to pay the proposed increased rates and still remain in business.

We are of the opinion that, while a gross inequality or gross injustice has been established, there is also proof of the most positive character that the company is financially unable to pay the increased rates and that it is not the function of the Board to make directions which the company is unable to carry out without the benefit of governmental assistance—the securing of which would be quite uncertain.

For the reasons above stated, the application for a wage increase will have to be denied.

With respect to the request for vacations with pay, we are of the opinion that a plan for one week under the terms and conditions of D.B. 17 should be authorized.

Finding and Direction will issue accordingly.

May 24, 1945

Re: Standard Woodenware Manufacturing Company, and Le Syndicat Catholique National du bois ouvre de Lyster, Inc.

Reasons for Decision

This is an appeal by the employer from a decision of the Regional War Labour Board for Quebec dated December 19, 1944, granting a general 3-cent hourly increase to production employees. The union cross-appeals with respect to the effective date of the decision.

The employer manufactures small woodenware. Its industry is not comparable to the furniture industry whose rates are not properly comparable. The Regional Board, acting it would seem on the basis of some of this Board's decisions in low-wage industries, came to the conclusion that an increase was necessary to correct a "gross injustice" within the terms of section 20 (1) (a) of P.C. 9384.

It is evident that in an industry of this kind wage rates are quite definitely limited by the economic value of the output and there is a point beyond which an increase in rates threatens the existence of employment. The company submitted its financial state-

ments for the past four years and has argued its inability to pay the increase.

The Regional Board appears to have given some consideration to the employer's financial position and also it seems to have anticipated an improvement in the plant's productivity as a result of the wage increase.

Although this is a case which seems to us to come very close to the line, this Board has arrived at the conclusion that the Regional Board's decision should not be reversed.

The Regional Board having ordered payment of the increased rates effective from the date of its decision (December 19, 1944), the union cross-appealed requested that payment be from the date of its application (September 9, 1944). On this matter, the Regional Board quite properly exercised its discretion under section 30 (2) having in mind the question of ability to pay.

In the result, both the appeal and cross-appeal are dismissed.

May 23, 1945

Re: Mastercraft Machine Products, Limited**Reasons for Decision**

This is an ex-parte appeal by the Company from a decision of the Regional War Labour Board for the Province of Ontario, dated September 6, 1944, leave to appeal having been granted by that Board on November 9, 1944.

In September, 1942, the Garson Manufacturing Company commenced operations in the plant now owned by the appellant, but as far as can be ascertained no application was at any time made by it to establish classifications or wage rates. On November 15, 1943, the appellant Company took over the assets and the employees of the Garson Manufacturing Company, and generally speaking, continued paying the same rates as were paid by the Garson Manufacturing Company on that date.

On March 30, 1944, the Company applied to the Regional Board for approval of certain rates and on May 11, 1944, the Board established certain rates and ranges. From this decision there was no appeal, although certain of the rates so established were lower than the Company had been paying. By a further Finding dated June 3, 1944, the Board established rates for draftsmen and authorized the continuance of payment of a night shift premium of 7½ per cent—but in no case to exceed 5 cents per hour. From this decision there was no appeal.

On July 28, 1944, the Company applied for adjustments in certain classifications and on September 6, 1944, the Board authorized the establishment of the occupational classification of Chief Accountant and established a maximum rate therefor. It further authorized a reduction in the work week from 57½ hours to 48 hours and the payment of overtime at the rate of time and one-half. The Board, however, declined to authorize any changes in the current maximum wage rates paid to the following:

Toolmakers
Foreman and Chief Inspector

Lathe Operators (M)
Shapers
Planers
Maintenance Men

The appeal regarding the Shapers and Planers having been abandoned, the appeal now before us has to do only with the remainder of the above-named classifications.

The Company has about fifty employees and specializes in tooling and fine instruments. In effect it desires to establish for most of these classifications the highest rates paid to similar classifications in the Toronto area. An analysis of the rates paid to Toolmakers, Lathe Operators and Maintenance Men in that area indicates clearly that the decision of the Regional Board was well founded; and while in some instances higher rates exist, the rates authorized for this Company are in all cases well above the weighted average and we see no reason for acceding to the request of the appellant that its rates be placed at the highest rate being paid in Toronto.

We are satisfied that the appellant has not established the existence of any gross inequality or gross injustice in regard to these three classifications and the appeal in regard thereto will be dismissed.

The Regional Board established a rate for Day Foreman of \$1.12 per hour. We are of the opinion that, due to the nature of this classification, the rate should be at least equal to that of the Toolmakers and we direct the establishment of a range of rates of \$1.20 to \$1.30 per hour.

The Regional Board established a rate for Chief Inspector of \$1.12 per hour. We are of the opinion that for this type of work a somewhat higher rate should be approved and we therefore direct the establishment of a range of rates of \$1.12 to \$1.20 per hour.

Finding and Direction will issue accordingly.

May 22, 1945

Re: Liquid Carbonic Canadian Corporation, Limited (Toronto, Ont.)**Reasons for Decision**

An appeal from a decision of the Ontario Regional Board dated March 22, 1945 refusing an application to alter the basis of remuneration of two employees installing and servicing refrigeration and cooling equipment from an annual to an hourly rate. The change is agreed to by the men concerned and the proposal is frankly stated to be for the purpose of remunerating overtime work at a premium rate and permission is sought

to pay time and one-half after 12 hours in any day or 60 hours in any week.

We cannot agree that there is good ground to refuse this application and we are unable to subscribe to the reasons given by the Regional Board. The purpose of the request appears to be reasonable and justifiable and the application should have been authorized.

The appeal is allowed.

May 23, 1945.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the

Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Amendment of Wartime Labour Relations Board (National) Regulations

THE Wartime Labour Relations Board (National) has announced a further amendment of its Board Regulations of June 7, (L.G. June 1944, pp. 737-739) as amended on July 19 (L.G. August 1944, p. 969) as amended on December 9, 1944 (pp. 1478-1479).

The amendment makes provision for the election or appointment of a substitute for a bargaining representative who is no longer available so to act whether by reason of death, resignation, illness or otherwise.

The amendment was approved by the Minister of Labour on May 25.

Sub-section (7) which is to be added to Section 3 of the Regulations, is as follows:

(7) (i) Where any person elected or appointed as a bargaining representative under the Regulations is no longer available so to act whether by reason of death, resignation, illness or otherwise;

(a) If such person has been elected or appointed, as a bargaining representative

by a trade union pursuant to subsection (2) of Section 5 of the Regulations the trade union may elect or appoint a bargaining representative as a substitute for him;

(b) If the provisions of subsection (2) of Section 5 of the Regulations do not apply, a bargaining representative may be elected in substitution for him in the same manner as provided by the Regulations for the election of bargaining representatives in the first instance.

(ii) Where the Board is satisfied that a bargaining representative has been duly elected or appointed pursuant to paragraph (i) hereof it may, on application made to it on behalf of such bargaining representative, certify him accordingly.

(iii) The Chairman of the Board and, in his absence, the Vice-Chairman thereof, is hereby constituted an executive committee of the Board to exercise the powers of the Board to receive, deal with and dispose of applications for certification of a bargaining representative elected or appointed in the circumstances and for the purposes set out in paragraphs (i) and (ii) hereof.

Applications for Certification under the Wartime Labour Relations Regulations

The Wartime Labour Relations Board (National) met for three days during the month of May. During the month the Board received eight applications, held five hearings, issued eight certifications designating bargaining representatives, rejected two applications for certification and gave decisions in three appeal cases.

Certificates Issued

(1) *Canadian Navigators Federation (T. and L.C.) and Clarke Steamship Company Limited, Montreal, P.Q.* (L.G. February 1945, p. 154). Following a public hearing and an investigation of the application by an officer of the Board, the union and Messrs. Cyrica Gauthier and Jos. E. Ouellette were certified as bargaining representatives for the second and third officers employed by the Clarke Steamship Company Limited on its vessels S.S. "Gaspesia", and M.V. "North Gaspe" and S.S. "Sable Island".

(2) *Seafarers' International Union of North America, (Vancouver Branch) Pacific District (A.F. of L.) and British Columbia Steamships Limited, Vancouver, B.C.* (L.G. April 1945, p. 479). The union and Messrs. H. Murphy, J. Scotland and E. Markey were certified as bargaining representatives for the unlicensed personnel of the British Columbia Steamships Limited on its vessels the S.S. "Island Prince" and S.S. "Alaskan Prince". Certification followed the taking of a representation vote of the employees affected by an officer of the Board.

(3) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Lodge 650 and Searle Grain Company Limited, Winnipeg, Manitoba.* (L.G. April 1945, p. 479). Following a public hearing and an investigation of the application by an officer of the Board, the union and Messrs. J. L. Pateman, C. Hardick, and F. Ryder were certified as bargaining representatives for the shovellers, labourers, experienced labourers and all monthly-rated employees engaged in the operation of the Company's elevators at Fort William, Ontario. The analyst, electrician, assistant electrician, master mechanic, assistant millwright, weighman, assistant weighman, shippers and sampler, cleaner foreman and three watchmen sworn in as policemen were excluded from the bargaining unit. Reasons for judgment will be found at the end of this article.

(4) *Brotherhood of Railroad Trainmen and National Harbours Board, Quebec, P.Q.* (L.G.

April 1945, p. 479). Following an investigation of the application by an officer of the Board the union and Messrs. Edger Dery, Phil Bouchard and Paul Henry Boutin were certified as bargaining representatives for the locomotive engineers, firemen, hostlers, assistant yard masters, yard conductors, yard brakemen, employed by the National Harbours Board, Quebec, P.Q.

(5) *Canadian Seamen's Union and Canada Cement Transport Limited, Montreal, P.Q.* (L.G. May 1945, p. 665). The union and Messrs. J. A. Sullivan, D. Ferguson and C. E. Lenton were certified as bargaining representatives for the unlicensed personnel of the employees of the Canada Cement Transport Limited, Montreal, P.Q., employed on its vessels the S.S. "Bulkarrier" and M.V. "Cement Karrier". Certification followed the taking of a representation vote of the employees affected and an investigation of the application by an officer of the Board.

(6) *Halifax Harbour Staff Association (Civil Service Federation of Canada) and National Harbours Board, Halifax, N.S.* (L.G. May 1945, p. 665). Following an investigation of the application by an officer of the Board the union and Messrs. L. B. Feetham, A. Ross, L. S. Cook, T. J. Holland, D. Moriarty, A. Hawkins and W. Browne and Miss Isa H. Innes, Miss Marion Rhinehardt and Miss Alice Purcell were certified as bargaining representatives for the staff employees of the National Harbours Board, Halifax, N.S. The employees of the Branch of the Government Treasury Department associated with the National Harbours Board, the port secretary, chief engineer, assistant engineer, electrical superintendent, cold storage superintendent, cold storage assistant superintendent, grain elevator superintendent, grain elevator general foreman, wharfage supervisor, timekeeper paymaster and equipment agents, acting harbour manager and/or harbour master, police supervisor, police officers and constable, purchasing agent, cold storage mechanical superintendent, port manager's stenographer and supervisor of floating equipment were excluded from the bargaining unit.

(7) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (A.F. of L. and T. & L.C.) and Collingwood Terminals Limited, Collingwood, Ontario.* (L.G. May 1945, p. 665). The union and Messrs. F. H. Hall and H. F. Mead were certified as bargaining representatives for the employees of the Collingwood Terminals Lim-

ited. The superintendent, accountant, stenographer and foremen were excluded from the bargaining unit. Certification followed an investigation of the application by an officer of the Board.

(8) *The Oshawa Railway and Thousand Islands Railway Clerical Association and Thousand Islands Railway Company, Gananoque, Ontario.* (L.G. May 1945, p. 665). Following an investigation of the application by an officer of the Board, the union and Messrs. Nelson Whinfield, and Thomas Driscoll were certified as bargaining representatives for the chief clerk, clerk, cashier, stenographer, ticket clerk and telegraph operator, express clerk, and freight shed man.

Applications for Certification Rejected

(1) *Brotherhood of Railroad Trainmen and Esquimalt and Nanaimo Railway, Victoria, B.C.* (L.G. March 1945, P. 290). Following a public hearing the Board decided that the application for certification of bargaining representatives could not be entertained. Reasons for judgment in this case will be found at the end of this article.

(2) *Canadian National Railways System Federation No. 11 and Canadian National Railways (Montreal Central Station) Montreal, P.Q.* (L.G. April 1945, p. 479). Following a public hearing the Board decided that the application for certification could not be entertained. Reasons for judgment in this case will be found at the end of this article.

Representation Votes Ordered

(1) *The Brotherhood of Railroad Trainmen and the New York Central Railroad Company Canada Division (Michigan Central Railroad) St. Thomas, Ont.* (L.G. March 1945, p. 290). The eligible voters are the road train conductors employed by the New York Central Railroad Company on its Canada Division (Michigan Central Railroad) St. Thomas, Ontario.

(2) *The Brotherhood of Railroad Trainmen and Wabash Railroad Company, Buffalo Division (Lines east of Detroit) St. Thomas, Ontario.* (L.G. March 1945, p. 290). The eligible voters are the road train conductors employed by the Wabash Railroad Company on its Buffalo Division (Lines east of Detroit) St. Thomas, Ontario.

(3) *The Brotherhood of Railroad Trainmen and the Pere Marquette Railway Company (Canada Division) St. Thomas, Ontario.* (L.G. March 1945, p. 290). The eligible voters are the road train conductors employed by the Pere Marquette Railway on its Canada Division, St. Thomas, Ontario.

Reasons for judgment in the above three cases will be found at the end of this article.

(4) *Seafarers' International Union of North America and Canadian Pacific Railway Company (B.C. Coast Steamship Service) Vancouver, B.C.,* (L.G. April 1945, p. 479). The eligible voters are the unlicensed personnel in deck, engine room stewards departments on vessels operated by the British Columbia Coast Steamship Service of the Canadian Pacific Railway, Vancouver, B.C. Mr. G. R. Currie, Industrial Relations Officer, Vancouver, has been appointed Returning Officer by the Board to conduct this vote.

(5) *Canadian Seamen's Union, Pacific Coast District and Kingcome Navigation Company, Vancouver, B.C.,* (L.G. May 1945, p. 665). The eligible voters are the unlicensed personnel in deck, engine room, and stewards departments on vessels operated from the Pacific Coast for the Kingcome Navigation Company, Vancouver, B.C. Mr. G. R. Currie, Industrial Relations Officer, Vancouver, has been appointed by the Board to conduct this vote.

Applications for Certification under Investigation

(1) Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of employees in the stores and mechanical departments, of the Northern Alberta Railways Company, Edmonton, Alberta.

(2) Brotherhood of Maintenance-of-Way Employees on behalf of rough carpenters employed as grain door repairmen at the lakehead terminals of the Canadian National Railways, Western Lines, Winnipeg, Manitoba.

(3) Canadian Seamen's Union on behalf of the unlicensed personnel employed on vessels operated by Marine Industries Limited, Sorel, P.Q.

(4) International Longshoremen's and Warehousemen's Union Local 502, on behalf of longshoremen employed in the port of New Westminster, by the Empire Stevedoring Company Limited, New Westminster, B.C.

(5) International Longshoremen's and Warehousemen's Union, Local 502, on behalf of longshoremen employed in the port of New Westminster, by Consolidated Mining and Smelting Company of Canada Limited, Vancouver, B.C.

(6) International Longshoremen's and Warehousemen's Union, Local 502, on behalf of longshoremen employed in the port of New Westminster, by Victoria and Vancouver Stevedoring Company Limited, Vancouver, B.C.

(7) International Longshoremen's and Warehousemen's Union, Local 502, on behalf of longshoremen employed in the port of New Westminster, by the Canadian Stevedoring Company Limited, Vancouver, B.C.

(8) Canadian Radio Officers' Association, Pacific District, Local 4 (A.C.A.-C.I.O.) on behalf of Radio Officers employed on dry cargo vessels operated from Pacific Coast ports by Park Steamship Company Limited, Vancouver, B.C.

Decisions of Board in Appeal Cases

The Board issued reasons for judgment in the following cases:

(1) Building Service Employees International Union, Local 204, (A.F. of L.) respondent

Between: Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees, Lodge 650, Applicant, and Searle Grain Co., Ltd., Fort William, Ont., Respondent.

The Board consisted of the Chairman and Messrs. Best, Complin, Deschamps, Hills and Mosher.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application by the Brotherhood for certification of bargaining representatives appointed or elected by it for the employees of Searle Grain Co., Ltd., at Fort William.

The application was opposed by Mr. N. L. Leach, the President, and Mr. L. C. Irwin, the Superintendent of the Searle Grain Co., Ltd. Mr. Leach read an argument urging the Board to reject the application on the ground that the Brotherhood had refused to charter a Local, the membership of which would be confined to employees of the Searle Grain Co., Ltd., and which would enter into a collective agreement with that Company, although officers of the Brotherhood had—during the course of negotiations extending over the last seven years—on more than one occasion verbally agreed to the settlement of the difficulty by the chartering of such a Local. It appears that the Brotherhood has already chartered a similar Local which has a collective agreement with the Saskatchewan Wheat Pool. Mr. Leach feels that the position of his Company as a competitor of the Saskatchewan Wheat Pool will be at a considerable disadvantage if it is compelled to deal with a Local composed of employees of a number of Grain Companies such as the applicant. In support of his contention, he produced a copy of a letter written by one M. Cleary, to the editor of the *Times Journal* in which Mr. Cleary states that the

ent and Toronto General Hospital, Toronto, Ontario.

(2) International Association of Machinists, appellant and Canadian Ingersoll-Rand Company, Limited, Sherbrooke, P.Q., respondent.

(3) United Steelworkers of America, Local 3493, appellant and John East Iron Works, Limited, Saskatoon, Sask., respondent.

(4) National Paper Employees' Association Petitioner Appellant, and National Paper Goods Limited, Respondent, and International Printing Pressmen and Assistants' Union, Local 176 and International Typographical Union, Local 129 and International Brotherhood of Bookbinders, Local 114, Interveners Respondents.

The texts of the Board's reasons for judgment in the various cases appear below.

members of Lodge 1142, which is composed of employees of the Manitoba Pool Elevators, are working more than eight hours a day receiving time and a half for time worked after eight hours.

The Brotherhood refuses to charter a new Local as requested by Mr. Leach and ask for certification of bargaining representatives appointed or elected by the applicant Local.

Mr. Leach contends that the employees do not require union representation because they enjoy the advantages of steady work, Sunday as a day of rest, pay during forced lay-off, promotion within the staff, favourable working hours, the protection of a twenty-hour watchman service; suffer no deduction for sickness or absence through illness; have group life insurance, retirement allowance, medical benefits, "Happy Birthday" allowance, Christmas holidays, holidays with pay, better than prevailing wages and cost-of-living bonus. Mr. Leach recited the differences between Lodge 650 and the Company, beginning in 1938 when the Company took a secret ballot vote of its employees and were satisfied that they did not desire any change in the existing relationship with the Company.

In 1942 Mr. J. P. Nicol held an inquiry as an Industrial Disputes Inquiry Commissioner and it is said suggested a chartering of a Local confined to employees of the Company. The Company agreed to this suggestion and a letter from Mr. Pateman, described as General Chairman of the Brotherhood, is produced in which he states that he has left instructions with Mr. Cleary to institute the separate lodge with as little delay as possible. Sub-

sequently Mr. Pateman informed him that the employees objected to limiting the membership to employees of the Company. Apparently Mission Lodge was chartered but subsequently surrendered its charter.

The Board is unable to reject the application on the grounds raised by the Company. Section 5 of the Regulations provides that the employees of any employer may elect bargaining representatives and that if the majority of the employees affected are members of one Union that Trade Union may elect or appoint its officer or other persons as bargaining representatives on behalf of all the employees affected.

Section 8 of the Regulations provides that when the Board is satisfied that the bargaining representatives have been duly elected or appointed it shall certify them as bargaining representatives and shall specify the unit of employees on whose behalf the representatives so certified are authorized to act.

Mr. Leach does not suggest that the bargaining representatives have not been duly elected or appointed or that the unit of employees suggested by the applicant is not appropriate. When he was asked whether his Company desired the Board to direct a vote of the employees, he did not state that the Com-

pany desired such a vote. The report of the investigating officer of the Board shows that 40 employees are members of the applicant Local out of 63 employees affected. The applicant Union has agreed to the exclusion of all the classifications to which the Company objected except the assistant foreman and three watchmen. The Company admits that the assistant foreman has no authority to employ, discharge, suspend, discipline, grant time off, promote, demote, or transfer other employees but contends that in the absence of the foreman he does make confidential reports on the ability or conduct of employees under his jurisdiction. The Board has in other cases included some employees of comparable responsibility to assistant foremen. The three watchmen in question, sworn as policemen and carrying firearms, will be excluded from the bargaining unit.

The bargaining representatives will be certified.

(Sgd.) G. B. O'CONNOR,
Chairman.

F. H. Hall, Esq., J. H. Pateman, Esq., for Applicant; N. F. Leach, Esq., L. C. Irwin, Esq., for Respondent.

Dated at Ottawa, May 22, 1945.

Between: Brotherhood of Railroad Trainmen, Applicant, and Esquimalt and Nanaimo Railway, Victoria, B.C., Respondent, and Order of Railway Conductors, Intervener.

The Board consisted of the Chairman and Messrs. Best, Complin, Deschamps, Hills and Mosher.

Reasons for Judgment

This is an application by the Brotherhood of Railroad Trainmen for certification of bargaining representatives appointed by it for the road train conductors of the Esquimalt and Nanaimo Railway. The application is opposed by the Order of Railway Conductors who contend that the Esquimalt and Nanaimo Railway is not an employer and that the road train conductors affected by the application are employed by the Canadian Pacific Railway Company with which the Order of Railway Conductors has a collective agreement.

The Brotherhood points out that the road train conductors employed on the railway line chartered by the Esquimalt and Nanaimo Railway Company were not permitted to cast their ballots in the recent vote directed by the Board on the application of the Brotherhood for certification of bargaining representatives appointed by it for all road train conductors employed upon the Canadian Pacific Railway and the Canadian National Railways.

The chief issue is whether the Esquimalt and Nanaimo Railway Company employs and whether the road train conductors affected are employed by the Esquimalt and Nanaimo Railway Company.

The Esquimalt and Nanaimo Railway Company was incorporated by Special Act and authorized to construct a railway on Vancouver Island. The Canadian Pacific Railway Company purchased all the shares in the Esquimalt and Nanaimo Railway Company and leased and operates the Esquimalt and Nanaimo Railway. All revenues of the Esquimalt and Nanaimo Railway are received by the Canadian Pacific Railway Company. The names of the road conductors employed on the Esquimalt and Nanaimo Railway line appear on the regular payrolls and the conductors are paid by the cheques of the Canadian Pacific Railway. It is clear, then, that the Esquimalt and Nanaimo Railway Company has no employees.

The other issue is whether the Board should treat the application as an application for certification of bargaining representatives appointed by the Brotherhood for the employees

of the Esquimalt and Nanaimo Railway line, now known as the Island Division of the British Columbia district, of the Canadian Pacific Railways Western Lines. On February 26, 1938, an arrangement was made by the Order of Railway Conductors with the Canadian Pacific Railway Company, and confirmed by letter, that the Esquimalt and Nanaimo Railway conductors form a part of the Western Lines General Committee. The letter records the fact that the Esquimalt and Nanaimo conductors had had representation at a tri-annual meeting at Winnipeg. The collective agreement covering road conductors on Western Lines of the Canadian Pacific Railway Company was extended by special arrangement—most recently on February 27, 1943—to cover the road conductors on the Island Division aforesaid. In support of its application for certification of bargaining representatives for the road train conductors of the Canadian Pacific Railway Company, the Brotherhood circulated and produced to the Board's investigating officer authorization forms signed by certain road conductors on the Island Division. The Order of Railway Conductors contends that no objection was voiced by it to the inclusion of the road conductors employed on the Island in the voters' list for the said election. It appears that in preparing the seniority list the Canadian Pacific Railway Company omitted to include the names of the conductors on the Island Division. The Board is satisfied that this omission was entirely due to an oversight which occurred under the following circumstances.

In his letter to the Canadian Pacific Railway Company of April 6, 1944, the Chief Executive Officer of the National Board asked for "a copy of your company's conductors' seniority list (regular and spare conductors) as at April 5". The fact that no list for the Island Division was supplied can only be accounted for by the fact that the Esquimalt and Nanaimo Railway had at one time been operated separately and that as the lists were termed "seniority lists" the limited seniority applicable to the Island Division may have led those concerned with furnishing the lists to omit or overlook the Vancouver Island list. That this was a serious omission must be admitted but in the view of the Board it would not justify the establishment of the Island Division as a separate bargaining unit at this time.

The application is accordingly dismissed.

May 22, 1945.

Reasons for Dissenting Opinion

In dissenting from the views expressed in the majority judgment, the undersigned respectfully submit the following reasons why we cannot consistently support a position that denies to the applicant his moral and legal right under the provisions of P.C. 1003.

The application of the Brotherhood of Railroad Trainmen for certification covering road train conductors on the Esquimalt and Nanaimo Railway is a direct result of those employees on that property being excluded from the vote ordered by this Board in connection with the former application covering a similar class of employees on the Canadian Pacific Railways. The exclusion of the conductors on the E. and N. Railway from the former vote, as shown by the evidence submitted at the hearing, seems to be the responsibility of this Board.

The original application of the Brotherhood of Railroad Trainmen covering conductors of the Canadian Pacific Railway and the Canadian National Railways was considered by the Board, July 5, 1944, when it was decided that a vote be taken between the two organizations to determine the wishes of the employees; that the Chief Executive Officer with two members of the Board would consult with the parties to negotiate the voters' list, and report at the next sittings. A report of that Committee was considered at a sitting of the Board, July 18, when it was decided that a vote would be taken in accordance with the general basis of agreement by the parties. Evidently the report of that Committee is conspicuous by the absence of any reference whatever to a discussion as to the inclusion of the E. and N. Railway conductors in that vote.

The Minute of that meeting (Item 9), as corrected by Item 2 of the Minutes of July 19, reads:—

"Renewed consideration of the report of the Committee *re* the vote to be arranged in connection with the application of the Brotherhood of Railroad Trainmen. The motion was approved that the vote be taken of the Western and Eastern Lines Canadian Pacific Railway Company separately and for the Canadian National Railways Western Region separately from the Atlantic and Central Lines which will be combined. The Chairman stated that at the proper time he may decide to vote that the bargaining unit shall be system-wide on each railway. It was also decided that the vote would be taken

by mail, with the details of voting procedure to be decided later."

The above-quoted Minute clearly indicates that the Board directed the vote in connection with the former application to be taken on a jurisdictional basis governed by the scope of existing agreements, notwithstanding the fact that the application was made for certification on a system basis, for each railway. Quite obviously, therefore, the Board assumed responsibility for directing the vote to be taken and counted separately on the respective seniority territory covered by agreements then in effect.

Items 3 and 4, Minutes of July 19, record the consideration given to the details of voting procedure when the Board decided that the ballot would be mailed to each person eligible to vote with a return envelope addressed to the Chief Executive Officer of the Board without identification marks of any kind; that in the case of emergency or part-time conductors that their eligibility to vote would be determined by trips where the records of the company indicated that the persons in question showed a preponderance of time worked as brakemen and conductors when separately checked on both a mileage and trip basis; that employees attending reserve army camps would be allowed to vote; and that the Chief Executive Officer of the Board was authorized to take the vote. No reference whatever is made in these records as to the inclusion of employees of the E. and N. Railway in the vote.

At the hearing, April 10, 1945, on the application of the B. of R.T. for certification covering road train conductors on the Esquimalt and Nanaimo Railway, Mr. Hendrick, on behalf of the applicant stated in part (Page 2 Proceedings):—

"By direction of members of the Brotherhood of Railroad Trainmen and others employed as road train conductors either regularly or with a preponderance of service in that capacity, this application seeking certification for that union as the bargaining representative for that class of employees was filed with your Board.

Personally signed authorizations have been received from these employees. These with membership records have been submitted for examination to the appropriate officers of your Board.

This, we believe, to be the only legitimate means whereby an authoritative choice and certification can be determined and obtained."

Although some of the evidence taken at the hearing is rather conflicting, as to the date of ownership and operation of the property involved in this application, certain pertinent facts seemed to be clearly revealed, namely: The agreement covering wages and working conditions for conductors on the E. and N. Railway is separate and distinct from the agreements for the same class of employees on the Canadian Pacific West Lines; that the

seniority rights of conductors on the E. and N. Railway are confined to that property and, therefore, do not extend to the C.P.R. West Lines; that all other train and engine service employees on the E. and N. Railway have separate agreements from that of the C.P.R. West Lines and that their seniority rights are also limited to the E. and N. Railway.

Another important fact, although not revealed by the evidence at the hearing, is that while free annual transportation is issued to all senior employees on the C.P.R. both Eastern and West Lines, this privilege is not accorded the employees on the Esquimalt and Nanaimo Railway. In other words, if transportation is required by employees of the E. and N. Railway over the Canadian Pacific Lines, they must apply for a trip pass, as may be necessary. Support of this fact is found in the recent representations made by the B. of R.T. to the C.P.R. management to accord their members on the E. and N. Railway similar pass privileges to those enjoyed by employees on the C.P.R. A further fact is shown in the Canadian Pacific Railway System Time-Table Folder where the Esquimalt and Nanaimo Railway is clearly indicated (*See* Table 164 P. 47). This is similar to the information to the public shown in Table 9, P. 8 with respect to the Dominion Atlantic Railway, where separate agreements are in effect.

Referring to Page 13 of the Proceedings of Hearing, when discussing the status of the Esquimalt and Nanaimo Railway:—

"The CHAIRMAN: Does the Canadian Pacific lease it?"

"Mr. BRYDONE-JACK: We own it. We bought it, I would say back in the early 1900's."

At Page 14 of the Proceedings, after Mr. Brydone-Jack's reference to having the annual report of the company with him the following question was asked:—

"Mr. TAYLOR: Is it shown as a subsidiary company?"

"Mr. BRYDONE-JACK: It is shown under the leased railway companies"

Then followed questions as to whether there was a separate agreement for the employees on the Esquimalt and Nanaimo Railway as there exists on the Western and Eastern Lines of the Canadian Pacific; also a reference to the letter read by Mr. Ives dated February, 1932, from Mr. J. M. Cameron, agreeing to apply certain rules and conditions governing conductors on the Canadian Pacific Western Lines as a basis for computing the time by which the Esquimalt and Nanaimo Railway will pay their conductors.

At Page 15:—

"Mr. BRYDONE-JACK: There was a joint agreement."

"Mr. HENDRICK: No, a separate agreement."

"Mr. BRYDONE-JACK: To the best of my knowledge the conductors agreement, at least since 1932 when that agreement was made that Mr. Ives read out, they have been regarded as coming under it. As to the earlier details, I could not answer that specifically."

"Mr. DESCHAMPS: You mean since 1932 they have been under the Western Lines agreement?"

"Mr. BRYDONE-JACK: Not that agreement, but the agreement that Mr. Ives read out."

"Mr. MOSHER: That just simply says that they are applying that agreement. It does not say that it is in the agreement, but that they will apply it."

"Mr. BRYDONE-JACK: Applying that agreement."

"Mr. MOSHER: It is just the same as the Canadian National Railways saying that they will apply the Canadian Pacific agreement, or the same as you said at Toronto for many years, that you would apply the Canadian National Railways agreement to the terminal employees. What I want to know is if it is written into the Western Lines agreement?"

"Mr. BRYDONE-JACK: No, they are not specifically included in the Western Lines agreement."

A further reference to the E. and N. Railway agreement, Page 16:—

"Mr. MOSHER: Here is what I am trying to get at, if I may be pardoned for butting in again. Mr. Ives quoted an agreement which was signed by Mr. Cameron, the Manager of the Esquimalt and Nanaimo Railway, and by Mr. Hedley, General Chairman of the Order of Railway Conductors. It is not an agreement with the Canadian Pacific Railway; it is a separate agreement made with this Railway to apply certain conditions and certain rules and changes. Is that right, or has there been anything since that one?"

"Mr. BRYDONE-JACK: At that time the Esquimalt and Nanaimo Railway was not a part of the British Columbia District. I think I am right in saying that it was separately operated."

Continuing on Page 17:—

"Mr. MOSHER: I would like to get this clear and I am addressing all my remarks to this point, as to whether there has been anything since that agreement of Feb. 27, 1932, between the conductors and the Canadian Pacific Railway with respect to the Esquimalt and Nanaimo Railway?"

"The CHAIRMAN: I think, Mr. Mosher, you can be quite sure that if there had been anything subsequent to that Mr. Ives would have produced it. I think the situation is quite clear. The Esquimalt and Nanaimo Railway is chartered. It has no employees. As I understand it, it is leased and operated by the Canadian Pacific Railway Company. There is no agreement with the conductors, as I understand it, for the particular employees on the Esquimalt and Nanaimo Railway."

"Mr. HENDRICK: Yes, there is. We will show that."

Page 18 records a request by Mr. Brydone-Jack for permission to wire his people for a copy of the agreement in respect of these classes on Vancouver Island. To this Mr. Hendrick replied: "We have the agreement right here."

At Page 19:—

"Mr. HENDRICK: Mr. Chairman and gentlemen, we have noted the objections offered by the Order of Railway Conductors and feel some further explanation to be warranted.

In respect to the opposing argument that the Esquimalt and Nanaimo is an integral part of the Canadian Pacific Railway Western Lines, we submit that when a similar application was made respecting Canadian Pacific Lines West it was decided by your officers and agreed that this property being covered by a separate agreement they should be excluded from the vote taken on the Canadian Pacific West.

In respect to the relationship of the respective agreements governing the Esquimalt and Nanaimo Railway and the Canadian Pacific Western Lines, it is an established fact, evidenced by agreements in effect a copy of which is supplied for your information, that a separate agreement governs services of Esquimalt and Nanaimo employees. The fact that such agreement provides that certain portions of the Canadian Pacific West agreement applies to Esquimalt and Nanaimo employees does not alter the fact that separate agreements obtain.

At this point I am going to leave with the Board an agreement made March 1, 1917, between the Esquimalt and Nanaimo Railway and the Brotherhood of Railroad Trainmen, and in that agreement you will find conductors, baggagemen, and brakemen. They are all included. Following scheduled negotiations in 1916 the General Chairman went out to the Esquimalt and Nanaimo Railway and made that agreement, and he approved it. Similarly in 1920 the McAdoo award, as you have had it mentioned here, was under discussion and rates were being applied after those discussions. The Esquimalt and Nanaimo Railway was represented on the General Committee by a local chairman from that property. After those negotiations with the Canadian Pacific Lines West General Committee, the General Chairman again went out to the Esquimalt and Nanaimo Railway and made this agreement which was effective May 1, 1920. I should like to quote from that agreement:

It is agreed that the rules and conditions governing trainmen on Valley territory of the British Columbia Division of the Canadian Pacific Main Lines effective May 1, 1920, will be used as a basis for computing the time by which the Esquimalt and Nanaimo Railway will pay their trainmen as per rates set out above.

There are all kinds of rules in this Esquimalt and Nanaimo agreement which still obtain today, regardless of any evidence to the contrary produced before this Board.

It is a separate agreement. It is true that the general agreement applies in part, but there are exceptions as you will note in this schedule which applied to the Esquimalt and Nanaimo only. Therefore, there is a separate agreement in effect on that property. The letter from the General Manager of that property in 1932 to the Canadian Order of Railway Conductors states:

It is agreed that the rules and conditions governing conductors on the Canadian Pacific Railway Lines West, made effective March 1, 1931, will be used as a basis for computing the time by which the Esquimalt and Nanaimo Railway will pay their conductors and also govern the conditions of service.

There is no agreement there, only in so far as pay is concerned. The conditions of the Esquimalt and Nanaimo agreement are still in effect and are so recognized by the Order of Railway Conductors and the Brotherhood of Railroad Trainmen. There is no question about that.

Owing to the partial application of Canadian Pacific West agreement to the Esquimalt and Nanaimo it is obvious that the employees so covered should have representation on Canadian Pacific West Committee for the purpose of negotiating portions of agreement applicable to their services.

That does not mean that because one railroad has a representative on a committee that that railroad is covered by the same agreement. We have many general committees which represent different railroads under various contracts. There is nothing in that.

This does not in any way detract from their authority and responsibility respecting portions of the Esquimalt and Nanaimo agreement applicable only to Esquimalt and Nanaimo employees' service.

Under such circumstances, having in mind that the recognition of separate schedule agreements and functions as bargaining representative, precluded the inclusion of these men in the vote on Canadian Pacific West, we make this application.

We now appeal to your Board for opportunity for authoritative expression by these men as to their choice of bargaining representative, and to implement same by certification.

Going back to the submission of the conductors, we must not lose sight of this fact, that these men on the Esquimalt and Nanaimo Railway, under the Esquimalt and Nanaimo agreement exercise seniority only on the Esquimalt and Nanaimo Railway. They do not exercise seniority on the Canadian Pacific Lines outside of the Island. It is the Esquimalt and Nanaimo Railway proper where they exercise their full seniority. They say, "No objection was voiced by the representatives of the Order of Railway Conductors with respect to the voting of the conductors on Vancouver Island during the recent representation election." Certainly we took authorizations, but when your investigating officer discussed the matter we said that it was a separate agreement and therefore they should not be included in the Canadian Pacific Lines West.

So far as the number of employees is concerned we may be a little out on that, but the Board can very well see who is entitled to vote and who is not entitled to vote. Then they say:

We are in possession of information which leads us to believe that authorization forms were circulated by representatives of the Brotherhood of Railroad Trainmen among the men employed on that portion of the Canadian Pacific Railway Western Lines identified as the Esquimalt and Nanaimo.

That is right. When the vote was being taken it was decided by your investigating officer that a separate agreement was in effect on the Esquimalt and Nanaimo Railway. That is right and proper, and it is still in effect regardless of the letter from the General Manager which states that the Canadian Pacific Railway Lines West will be used as a basis for computing pay. That is all, but the conditions of service still obtain. For instance, you will find this:

Any change in present mileage for passenger trainmen from the maximum laid down in this Schedule will be arranged in conference with Superintendent and Committee.

You will notice that the maximum is 3,800 miles per month. That does not apply on the Western Lines, where the maximum is 4,200 miles per month. You will notice also:

Article 2, Clause (a) will not apply where crews are required to unload shipment from through cars over which the Esquimalt and Nanaimo Railway have no control.

And also:

It is understood that any Rules or Conditions contained in the British Columbia Division Schedule that may be found unworkable will be adjusted in consultation with your committee.

Article 3. Log trains will be operated under work train conditions. The log train crew on the Lake Cowichan Sub-Division may be required to run the Duncan-Lake Cowichan mixed train as part of their day's work in log train service.

My point is that the Canadian Pacific Lines West schedule applies in part, but these conditions here apply particularly to the Esquimalt and Nanaimo Railway, and are in effect by agreement with that railway, copies of which agreement I have left with you.

Bottom of Page 24:

MR. BEST: Mr. Brydone-Jack, do you agree with Mr. Hendrick that the men on the Island have no seniority rights on the mainland?

MR. BRYDONE-JACK: As far as I know their seniority district is confined to the Island.

From the foregoing and other available evidence is revealed the following pertinent facts which constitute the chief reasons for this dissenting opinion:

1. That it is clearly established there are separate agreements in effect covering employees on the Esquimalt and Nanaimo Railway from those in effect on the Canadian Pacific Railway West Lines.
2. That the seniority rights of employees on the Esquimalt and Nanaimo Railway are confined entirely to that property and, therefore, under existing agreements, cannot be exercised on West Lines of the Canadian Pacific Railway.
3. That the annual free pass privileges given to senior employees on the Canadian Pacific Railway West Lines are not enjoyed by employees of the Esquimalt and Nanaimo Railway and, in fact, have been refused.
4. That at the suggestion of the officers assigned by the Board to supervise the vote of conductors on the Canadian Pacific Railway, the conductors on the Esquimalt and Nanaimo Railway were excluded from that vote, although evidence of authorization on their behalf was produced with that of similar evidence covering conductors on West Lines of the Canadian Pacific Railway.

5. That the vote on the former application for certification was directed by the Board to be taken on a jurisdictional basis as defined by existing agreements, notwithstanding the terms of that application contemplated a system-wide vote.

6. That the Time-Table Folder issued by the Canadian Pacific Railway (Lessor of the E. and N. Railway) clearly shows the Esquimalt and Nanaimo Railway in Table 164 covering train time schedules on that property.

Having regard to all the relevant facts, amply supported by available evidence, we respectfully submit:

That the decision of the Board at its meeting of May 9, in denying a vote and certification, imposes a gross injustice on the applicant.

(Sgd.) W. L. BEST.

(Sgd.) A. R. MOSHER.

May 22, 1945.

Between: Canadian National Railway System Federation No. 11, (Railway Employees Department, A.F. of L.), Applicant, and Canadian National Railways, Respondent, and Brotherhood of Maintenance-of-Way Employees of the Canadian National Eastern Lines System Federation, A.F. of L. and T. and L.C., Intervener

The Board consisted of the Chairman and Messrs. Best, Complin, Deschamps, Hills and Mosher.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application by the Canadian National Railway System Federation No. 11 for certification of bargaining representatives for 18 carpenters, painters, plumbers, pipe-fitters and helpers, employed at the New Central Station, Montreal. These employees formerly worked at the Bonaventure Station. The applicant is a Federation of eight Railway Labour Organizations and claims to have been negotiating a collective agreement with the Canadian National Railways for employees in the Canadian National Railway Montreal office building numbering some 143 persons.

The intervener opposes the application on the ground that the Central Station, like the Bonaventure Station, is erected on the right of way of the Canadian National Railways and as such the employees in question are included in Wage Agreement No. 9 between Canadian National Railways and the Brotherhood. They contend that the proper bargaining unit is all Maintenance-of-Way employees of the Eastern Division of the Canadian National Railways. On the other hand, the Federation contend that the proper bargaining unit is the 18 persons in question who are members of the Federation and who desire to be represented by it. The Canadian National Railways put Mr. W. E. Shepley, Superintendent of Buildings, C.N.R. Montreal, in charge of all Canadian National Railway buildings in Montreal including the Central Station and it is claimed by the Federation that by reason of this the 18 employees are no longer working in the Bridge and Building Department of the

Canadian National Railways and are therefore not included in the said Wage Agreement No.

9. They also contend that these employees were not, until February, 1945, shown on the seniority list of the Bridge and Building Department of the Canadian National Railways and were not until then paid at the rate specified in the said Wage Agreement No. 9.

Both the Federation and the Brotherhood belong to the A.F. of L., and they state that they have no desire to poach on each other's preserves but wish the Board to settle the question for them. It appears that the first difference arose in the spring of 1944 when the Federation and the Brotherhood were contending as to which of them should represent the employees in the Canadian National Railway Montreal buildings, including the Central Station. On April 26, 1944, the Director of Labour Relations of the Canadian National Railways had a conference with the President of the Federation when an agreement was arranged which was confirmed by a letter from the President of the Federation to the Director of Labour Relations dated April 29, 1944, which is in part as follows:

This whole question was given very careful consideration at a meeting of our Executive in Montreal, April 28 resulting in the following decisions:

1. Withdraw our claims to represent employees in the New Central Station who are now specifically covered by the Maintenance of Way and Clerks and other Classes of C.N.R. Employees' Wage Agreements.

2. Proceed with the necessary action to represent and negotiate a Wage Agreement to cover all classes of C.N.R. Employees employed in the New Central Station and all other C.N.R. Office buildings in Montreal, excluding those referred to in item No. 1.

In June, 1944, by mutual agreement, a vote was taken under the supervision of a conciliation officer of the Department of Labour for

Canada to ascertain whether the employees affected desired to be represented by the Federation or the Brotherhood. The Federation secured a substantial majority of the votes cast and it is said that the 18 employees in question voted. On July 6, 1944, the Director of Labour Relations wrote to the Brotherhood a letter in which he states his understanding of the arrangement with the Federation is as follows:

Pursuant to the understanding reached during our recent conference, employees at the New Central Station, Montreal, in the following classifications will be covered by the working conditions and rates of pay of Wage Agreement No. 9:

Carpenters
Painters and their Helpers.
Plumbers and their Helpers
Pipefitters and their Helpers (except Leading Hand Pipefitter and one other Pipefitter qualified for work on high pressure lines.)

It is also understood that the names of employees in these classifications will be placed on the appropriate Maintenance-of-Way seniority list and accorded seniority status in the same manner as other Maintenance-of-Way employees in the same classifications in Montreal Terminals.

The names of these employees appear in the Railway's seniority list for the Bridge and Building Department dated January 1, 1945. The Brotherhood explains that the delay in the issue of the seniority list and in the payment of the Building and Bridge rates was due to the necessary negotiation with the Railway

Company's officials and their natural desire to make sure that the seniority list was exactly correct.

It is clear that if the employees in question had continued to work at the Bonaventure Station they would have come within the terms of the Wage Agreement No. 9 and within the jurisdiction of the Brotherhood. It is doubtful whether the decision of the Canadian National Railways to put all employees in Canadian National Railway buildings including the Central Station in Montreal under the Superintendent of Buildings could without the consent of the Brotherhood vary the terms of Wage Agreement No. 9 so as to take the employees in question out of the jurisdiction of the Brotherhood. In any event, it is the Board's view that the letter of the Director of Labour Relations of the Canadian National Railways dated July 6, 1944, to the Brotherhood clearly brings the employees in question within Wage Agreement No. 9 and within the jurisdiction of the Brotherhood.

The application is dismissed.

Between: Brotherhood of Railroad Trainmen, Applicant, and New York Central Railroad Company, Canada Division (Michigan Central Railroad), Respondent, and Order of Railway Conductors, Intervener, and Brotherhood of Railroad Trainmen, Applicant, and Wabash Railroad Company, Lines East of Detroit (Buffalo Division), Respondent, and Order of Railway Conductors, Intervener, and Brotherhood of Railroad Trainmen, Applicant, and Pere Marquette Railroad Company (Canadian Division), Respondent, and Order of Railway Conductors, Intervener

The Board consisted of the Chairman and Messrs. Best, Complin, Deschamps, Harmegnies, Hills, Mosher and Taylor.

Reasons for Judgment

These are three applications by the Brotherhood of Railroad Trainmen for certification of bargaining representatives appointed by the Brotherhood for road train conductors residing in Canada of each of the Railways. The National Joint Board of Mediation (U.S.A.) in taking a vote of the road train conductors of the New York Central System, ruled that conductors resident in Canada were not entitled to vote. The same Board has

held that it has no jurisdiction to consider grievances of road train conductors resident in Canada. In the vote directed by the National Joint Board of Mediation, the Order of Railway Conductors secured a substantial majority but the applicant contends that as road train conductors resident in Canada were not permitted to vote, they are entitled to elect bargaining representatives under the Wartime Labour Relations Regulations, P.C. 1003. Counsel for the New York Central Railroad Company (Michigan Central Railway) opposes the application for certification of bargaining representatives for the road train conductors of its Railway on the ground that it now has a collective agreement with the Order of Rail-

way Conductors for all its road train conductors, including those resident in Canada, and that it would lead to confusion if this Railway by reason of the granting of certification by this Board had to negotiate a separate agreement with the Brotherhood of Railroad Trainmen for its Canada Division only. Counsel for the New York Central Railroad (Michigan Central Railway) pointed out that all the employees of the Railway resident in Canada have secured certain advantages due to their association with the majority body of employees resident in the United States and, in particular, have been brought under the United States Railroad Retirement Act, have secured the approval of the National War Labour Board (Canada) to increased wage rates, in the special circumstances that they have "for many years been governed by what might be termed system agreements without distinction as between those working on lines in the United States of America or lines in Canada", and were "to all intents and purposes United States employees engaged in what is essentially a United States operation."

It is also contended that the proper bargaining unit is the road train conductors of the whole New York Central Railroad System and that, as this Board cannot certify bargaining representatives for this whole unit, it should reject the application.

Section 5 of the Regulations provides that the employees of any employer may elect bargaining representatives and that if a majority of the employees affected are members of one trade union the trade union may elect or appoint its officers or other persons as bargaining representatives.

Section 8 of the Regulations provides that where the Board is satisfied that the bargaining representatives have been duly elected or appointed it shall certify them as bargaining representatives.

The Board feels that it cannot deny the right of the road train conductors resident in Canada to certification of bargaining representatives. The Chief Executive Officer of the Board will, therefore, arrange to take a vote of the employees so as to ascertain whether a majority of the employees affected are members of the Brotherhood.

A question arises as to the form of ballot. In the Wright-Hargreaves case (D.L.S. 7-542)¹ the Board "set down shortly the procedure

which it is proposed should be followed in dealing with applications by unions subject, of course, to any necessary modifications from time to time." Item number (5) of this procedure is as follows:

(5) The Board will not include in the ballot the name of any intervening or competing union unless the Board is also *prima facie* satisfied that a majority of the employees affected are members of the competing or intervening union. This will rarely happen and it can only happen if some of the employees affected belong to or sign authorizations for more than one union so that they may be deemed to be members of two or more unions.

It appears that this part of the procedure is too rigid and should be modified in this case. Here the Order of Railway Conductors has had collective agreements with the railroad companies for many years and contends that it should not be displaced as the bargaining agency for the road train conductors resident in Canada unless they are given an opportunity to mark their ballots in favour of bargaining representatives to be appointed by the Order of Railway Conductors.

The Brotherhood of Railroad Trainmen has indicated that any form of ballot settled by the Board will be satisfactory to it. The ballot will give the road train conductors a choice between the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

¹ L.G., March, 1945, p. 290.

**Between: Building Service Employees' International Union, Local 204,
(A.F. of L.), Petitioner Respondent, and Toronto General Hospital,
Toronto, Appellant**

The Board consisted of the Chairman, Messrs. Complin, Best, Deschamps, Harnegnies, Hills and Mosher.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application by the Toronto General Hospital for leave to appeal and an appeal from the decision of the Ontario Board certifying bargaining representatives appointed or elected by the Union. The certification followed a vote directed by the Ontario Board, the result of which was as follows:

Eligible voters	570
Number of votes cast.....	348
For the Union	304
Against the Union	41
Spoiled, segregated, blank ballots....	3

The chief ground of the appeal is that there was unfair and improper electioneering. The Ontario Board's notice of election contains the following statement: "Voters are entitled to vote without interference, restraint or coercion. No electioneering will be permitted." The report of the Chief Executive Officer of the Ontario Board on the result of the election contains the following statement:

"One person namely John Barron employed as an orderly by the respondent entered the hospital on the morning of the vote and devoted the day to making the rounds of the hospital exhorting employees to vote in favour of the petitioner. The respondent by letter dated February 15, 1945, has filed with the Board an objection to this person's conduct and stated that it improperly influenced the vote. This letter is attached to my report."

There is nothing in the transcript or in the Ontario Board's file to show that the Hospital tendered any evidence or asked for a hearing at which evidence of this kind could be tendered. Apparently the view of the minority of the Ontario Board was that the Ontario Board, having received the complaint, should of its own motion have directed a further hearing. On the other hand, the majority of the Ontario Board were apparently satisfied, by an examination of records and by the vote of 304 in favour of the petitioner to 41 opposed, that the Union had acted with the authority of the majority of the employees affected, as prescribed by sub-section (2) of section 5 of the Regulations, and that a further hearing or vote would serve no useful purpose.

It was contended by counsel for the Hospital that a member who joined in the decision of the majority had approached the Hospital to obtain a collective agreement for the Union before the application for certification. As no issue of credibility arises, this Board is in as good a position as the Ontario Board was to decide whether there should have been a further hearing before certification. This Board does not find it necessary, therefore, to express an opinion as to whether the member in question should have taken part in the decision.

At least two meetings of the employees were held. The Director of Personnel of the Hospital addressed one meeting and pointed out that the employees were associated with professional people and professional workers did not find it necessary to organize unions, that it made no difference to him how the employees voted, but that they should remember they were voting for an American Union and not a Canadian organization. In *re* National Paper Goods Limited (March 13, 1945) this Board held that the Manager, in addressing the employees, was not seeking to compel them to vote against the Union.

John Barron was a member of the Union but he was not an officer or agent of the Union. His position is comparable to that of a member of a political party who is not an agent of the candidate. The Court will not set aside a controverted election unless the petitioner proves that an agent of the candidate committed a corrupt or illegal act which might have affected the result of the election. It must be shown that the alleged agent took part in the organization of the campaign for the successful candidate. In considering whether the act in question affected the result of the election, the Court has regard to the majority of votes cast for the successful candidate and if that majority is sufficient, the Court will not necessarily set aside the election even if a corrupt or illegal act of an agent of the candidate is established. If the Ontario Board had directed a hearing of the charge of unfair practices and had found that the charge was proven, it could have directed a new vote.

It is important to keep in mind the very limited purpose of the application for certification—namely to settle the question as to whether the Union is entitled to represent a majority of the employees affected in the negotiation of the collective agreement. In view of the majority obtained by the petitioner in the election, this Board is not satis-

fied that a second vote would serve any useful purpose.

The appellant will have leave to appeal but the appeal is dismissed.

I concur in the result:

A. J. HILLS.

*Reasons for Judgment of
Messrs. E. R. Complin and A. Deschamps*

This is an application for leave to appeal from a decision of the Ontario Labour Relations Board dated March 6, 1945, in which the respondent union was certified.

It was convenient to hear argument concerning leave to appeal and the appeal itself at the same time.

The main grounds of appeal in this case are:

1. The counsel for the appellant contended that an unfair practice had been committed by a representative of the union during the taking of the vote in that such representative declined to carry out his regular work duties on that day and instead devoted his full time to soliciting support for the union and consequently he improperly influenced the vote.
2. During the taking of the vote a representative of the hospital communicated with the Chief Executive Officer of the Ontario Board, objecting to the conduct of the person referred to above. On the advice of the Chief Executive Officer of the Ontario Board, a formal notice of complaint was filed with the Chief Executive Officer on the day of the vote. Counsel for the appellant contends that a further opportunity should have been granted to present evidence regarding this alleged unfair practice, particularly when the members of the Ontario Board were divided regarding a further hearing, the deciding vote having been cast by a Board member who had a direct interest in this particular case.

In addition to the above, the counsel for the appellant contended that hospitals, associa-

tions and institutions not operated for gain should not be subject to the Wartime Labour Relations Regulations any more than they are subject to the Wage Control Regulations and certain other regulatory controls. Having regard to the nature and character of the part that hospitals play in the life of the community, the sources from which income is derived, and the fact that this particular hospital at least is not operated for profit, we are impressed with counsel's argument contending for similar exclusion from the Wartime Labour Relations Regulations. However, we can find no precise language in the Regulations providing for such exclusion and we are bound to hold that the hospital in question is subject to the Regulations.

Dealing next with the conduct of the representative of the union on the day of the vote, we are of the opinion that whether or not the person involved acted with specific instructions from the union, he did in fact act unwisely. The evidence presented to this Board does not support the view that had the person complained of not acted as he did, the result of the vote would have been altered except possibly in ratio.

The Regulations do not preclude a member of a board from participating in a case involving a decision in which he has an indirect or direct interest. The composition of the Labour Relations Boards is such that a great many cases must necessarily find Board members participating in decisions in which they have an indirect interest. We find no reason to object to this procedure. The situation is somewhat different, however, in a case in which a Board member has a direct interest in the decision. It is true that legally such a Board member cannot be barred from participating in such a case but, from an ethical point of view it occurs to us that such participation may be unwise in that it exposes the Board and the Board members, to criticism, whether justified or not.

In view of all the foregoing, leave to appeal is granted but the appeal is dismissed.

(Sgd.) E. R. COMPLIN,
A. DESCHAMPS.

J. S. D. Tory, Esq., K.C., A. L. Fleming, Esq., K.C., for Appellant; W. E. Smedberg, Esq., for Petitioner Respondent.

May 22, 1945.

**Between: International Association of Machinists (A.F. of L.), Appellant,
and Canadian Ingersoll-Rand Company, Limited, Sherbrooke,
Respondent**

The Board consisted of the Chairman and Messrs. Best, Complin, Deschamps, Hills and Mosher.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an appeal from a decision of the Quebec Wartime Labour Relations Board which refused an application for certification of bargaining representatives for the employees of the Canadian Ingersoll-Rand Company, Limited, on the ground that the employees were not employed in connection with a work, undertaking, or business, within the terms of Schedule A of the Wartime Labour Relations Regulations, P.C. 1003. The Company is, and has always been, engaged in the manufacture of commercial products, namely double-acting air compressors, single-acting compressors, hoists, pumps, process equipment, rock drills and pneumatic tools. Its 1944 production was divided approximately as follows:

Special War Products: namely marine engine components, gun mountings, track shoes, oil van motors, tele-motors, time tanks, shock absorbers and locomotive crank axles.....	13.4%
Standard Lines supplied for use by the Armed Forces.....	6.0%
Standard Lines supplied to the Government of Canada to be shipped overseas for rehabilitation.....	55.6%
Standard products sold for civilian use.	25.0%

It is clear that the Company is not exclusively engaged in the production of naval, military or air stores. In the Dominion Oilcloth and Linoleum Company case (D.L.S. 7-509) the Board said (D.L.S. 7-510) that the words in Schedule A, Section 12, "engaged in the production of naval, military or air stores" were confined to works, undertakings, or businesses which exclusively produced naval, military or air stores. But in this case it is said that the Company is producing machinery or arms within Section 12 of Schedule A and track shoes for tanks within Section 3 of Schedule A. In the Dominion Oilcloth and

Linoleum Company case (*supra*) the Board said in part:

Under the War Measures Act in the emergency of war the Dominion has by the Wartime Labour Relations Regulations invaded what is normally the sphere of Provincial Legislatures.

The question here is to what extent the Dominion has encroached upon the usual Provincial field.

In the absence of clear words indicating an intention to bring in a large field of provincial industry we cannot hold that the words in question include a work, undertaking or business partly engaged in the production of anything which may become naval, military or air stores.

If "engaged in the production of naval, military or air stores" has the wider meaning then many of the Sections of Schedule A are redundant and unnecessary. Thus Section 2 includes the production of "aircraft parts"; Section 4 "automobile or truck parts"; Section 7 "synthetic rubber"; Section 8 "chemicals for war purposes", and Section 11 "ship-building accessories"—all these things may become naval, military or air stores.

Moreover subsection (4) of Section 3 of the Regulations contemplates the possibility that a provincial legislature may apply the Regulations to employees whose relations with their employers are ordinarily within the jurisdiction of a provincial legislature. If the Regulations already apply to employees in a work, undertaking or business partly engaged in producing anything which in a "total" war may be naval, military or air stores there would be few remaining employees to whom the provincial legislature could apply the Regulations.

In our view the words "engaged in the production of naval, military or air stores" are confined to works, undertakings or businesses which exclusively produce naval, military or air stores.

We therefore hold that the Board has no jurisdiction to entertain the application.

In view of the foregoing, the appeal is dismissed.

(Sgd.) G. B. O'CONNOR,
Chairman.

A. G. Smith, Esq., for Appellant; H. G. Lafleur, Esq., G. M. Young, Esq., for Respondent.

May 22, 1945.

**Between: United Steelworkers of America, Local 3493, Appellant, and
John East Iron Works Limited, Saskatoon, Respondent**

The Board consisted of the Chairman, Messrs. Best, Complin, Deschamps, Harnegnies, Hills, Mosher and Taylor.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an appeal from a decision of the Saskatchewan Labour Relations Board refusing to reconsider its certification of bargaining representatives for the employees of John East Iron Works Limited of Saskatoon. The appeal is unusual because it is in effect an appeal by the Union from a certificate granted by the

Saskatchewan Board on the application of the Union. The certificate is dated February 7, 1945, and there was no application for leave to appeal within sixty days thereafter as required by National Board Regulation number 7. In fact, on April 26, 1945, the Saskatchewan Board referred the matter to the Minister of Labour for Canada so that he might instruct a conciliation officer pursuant to section 12 of the Wartime Labour Relations Regulations, P.C. 1003. In the meantime, on April 16, 1945, the Union applied to the Saskatchewan Board to reconsider the application for certification and to set aside the certificate. On April 18, 1945, the Saskatchewan Board refused the application and on April 26 the Saskatchewan Board granted leave to appeal to the National Board from the decision of the Saskatchewan Board on April 18, 1945, dismissing the application to set aside the certificate.

The appointment of a conciliation officer has been deferred pending the appeal.

This Board has invariably refused applications to reconsider its previous decisions and is of the opinion that such an application should only be granted under very special circumstances. There are no such circumstances in this case. It would appear that if the time for appealing from a certification can be extended by applying for reconsideration and then appealing from the refusal to reconsider, then there is no time limit for appeals and no end of proceedings. In view of these considerations, the Board declines to entertain the appeal and it is dismissed.

(Sgd.) G. B. O'CONNOR,
Chairman.

Mr. Cleve Kidd for Appellant.

**Between: National Paper Employees' Association, Petitioner Appellant,
and National Paper Goods Limited, Respondent, and International
Printing Pressmen and Assistants' Union, Local 176; International
Typographical Union, Local 129 and International Brotherhood of
Bookbinders, Local 114, Interveners Respondents**

The Board consisted of the Chairman, Mr. Justice G. B. O'Connor, and members, Messrs. Best, Deschamps, Hills, Mosher and Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal from a decision of the Ontario Labour Relations Board directing a further vote of the employees of the respondent company. The result of the vote ordered by the Board and held on the 15th day of August, 1944, was as follows:

National Paper Employees' Association—54
Interveners—43.

As 101 employees were eligible to vote, the National Paper Employees' Association secured a majority of the employees affected and, in the ordinary course, would be entitled to certification of bargaining representatives.

The Unions opposed certification on two grounds, viz:

(1) The Unions contended that Mr. Turnbull, Manager of the National Paper Goods Limited, participated in the formation or administration of the Association but failed to establish this charge.

(2) The Unions contended that an address made by Mr. Turnbull was an attempt to compel the employees to abstain from voting for the Unions.

The Unions distributed among the employees a number of circulars emphasizing chiefly

the rate of wages paid by the respondent company as contrasted with the wages paid by other employers to members of the union.

Mr. Turnbull addressed a meeting pursuant to a written request signed by 54 employees to give him an opportunity to answer the charges made against the management of the respondent company. The relevant portions of Mr. Turnbull's speech are as follows:

The next five years are most unpredictable. I believe there will be many ups and downs in them, both good times and bad times but certainly tough times, from the management end of this business. Post-war planning might be possible if we knew what political party will be at Ottawa and at Toronto, and what their trade policy will be. Such policies can make all the difference in the world to us.

Now, if and when we need orders and you need work, you are not going to look to Mr. King at Ottawa, or Queen's Park, Toronto, nor to Mr. Greene of the A.F. of L., nor to Mr. Hampson at the Times Job Print whose union's head offices are in Tennessee, nor to Mr. Histed at the Spectator or his superiors in Indianapolis, nor to Mr. Brillinger at Davis Lisson nor his superiors in Washington, D.C., nor to any other union or employees association officers. You know they can't make work for you. You are going to look to Glenn Turnbull and his assistants or their successors, and expect them to provide it *somehow*.

. . . I have not changed my first ideas on collective bargaining, but I do feel that those who are to be associated with us should be responsible parties, interested not only in their own position with the company but in the general interest of all employees and successful operation of the company itself.

. . . It boils down to whether you wish to handle your own affairs without outside interference, or whether you wish to be represented by international unions. It will be settled Tuesday morning August 15 by a vote of all employees. It is essential that you vote one way or the other. If you prefer to have an international union to represent you whose agents are outsiders and are responsible to their leaders in distant places you should vote accordingly. If on the other hand you are opposed to this type of representation and prefer your own elected fellow employees to represent you, you should vote for the National Paper Employees' Association. One or other will be granted certification as your bargaining representatives as the result of this vote and those who do not vote are not fulfilling their obligations to themselves or to their fellow employees.

I hope to complete my allotted span as manager of this Company as in the past and in the same atmosphere that has always existed here, namely in friendliness, sincerity, good fellowship, a co-operative spirit of give and take, and with confidence in your and my integrity. Nothing I have said should be taken by any of you as meaning that your vote, whichever way you cast it, will affect the attitude of management towards you. You are all free Canadian citizens and entitled to exercise freely the rights given to you by P.C. 1003. All you have to do is decide for yourself and then vote in accordance with your own decision. It is entirely in your hands and having been given these rights you should not fail to exercise them.

There seems to be little more that I can say. There are other things I might have mentioned, but you read the papers and listen to the radio the same as I do. You are intelligent and sometimes it is possible to read between the lines. I might also have made you some wild promises, but there is too much of that already, and any promises made by me or anyone assisting me, must be ones that can be fulfilled. I will only make you one promise, that is, to do the best I can under the circumstances and conditions that face us from time to time. I can keep that promise. . .

Good luck to you. I leave it in your hands. Thank you.

The material words of section 19 (2) of the Wartime Labour Relations Regulations are:—

- "19. (2) No employer . . . shall
(c) seek by intimidation, by dismissal or threat of dismissal, by any other kind of threat, by the imposition of a pecuniary or other penalty, or by any other means whatsoever, to compel an employee to abstain from becoming or continuing to be a member or officer or representative of a trade union or an employees' organization, or from exercising his lawful rights;"

It would be fair to say that Mr. Turnbull was seeking to persuade the employees to vote against the respondent unions. The sole question at issue is whether he was seeking to compel the employees to vote against the respondent unions. The issue is not free from doubt. Three members of the Ontario Board found

that while Mr. Turnbull's "speech was indiscreet and unwise . . . we cannot, however, agree that it was objectionable to the extent that it would prevent any employee from voting the way he wished on a secret ballot." On the other hand, four members of the Board directed a new vote on the ground that Mr. Turnbull's address "contained a veiled threat that the employees might incur his displeasure with consequences which it was not necessary to point out to intelligent people, a hint which might well move the average employee, as the history of labour relations has frequently shown."

The majority of the members of the Ontario Board did not find Mr. Turnbull's address was a violation of section 19 (2) (c) of the Regulations, but they thought it created "in the mind of a responsible employee the impression that the employer is bringing pressure to bear upon him to cause him to abstain from exercising his lawful rights."

This Board has come to the conclusion that Mr. Turnbull's words, taken as a whole, cannot be interpreted in this way and that he was not seeking to compel the employees to vote against the unions.

No evidence was presented to the Ontario Board to establish that the bargaining representatives were elected by a majority vote of the employees affected in conformity with section 5 (1) of the regulations. On March 25, 1944, prior to the application for certification, a vote was taken in the plant, conducted by the association, for the election of bargaining representatives. The question asked at that vote was "Are you in favour of the National Paper Employees' Association and its executive committee as your bargaining representatives?" There were 56 employees who voted; 37 of them voted in favour of the Association and 19 voted against the Association. This cannot be accepted as a compliance with section 5 (1).

Leave to appeal is granted but, as the bargaining representatives were not elected by a majority vote of the employees affected, some 101 in number, the petition for certification will be dismissed.

(Sgd.) G. B. O'CONNOR,
Chairman
A. DESCHAMPS,
H. TAYLOR.

While concurring in the result I wish to be recorded as dissenting from the statement that the issue as to whether Mr. Turnbull was seeking to *compel* the employees to vote against the respondent unions "is not free from doubt."

Mr. Turnbull or other officer may express a preference for or against a union or unions

without violation of the Regulations and while some conclude that Mr. Turnbull was seeking to persuade the employees to vote against the respondent unions such conclusion is at variance with Mr. Turnbull's statement with reference to the rights given to employees by P.C. 1003 when he states "you are entitled to exercise them freely and without restraint."

Mr. Turnbull made it "abundantly clear" that employees were entitled to vote strictly in accordance with their own wishes and desires and that the position with the Company and the management would "remain exactly the same and unchanged" whichever way the employees should vote.

The quotations and references to Mr. Turnbull's address to the employees are I consider relevant to the point at issue and I take this means of placing them on record.

(sgd.) A. J. HILLS.

We dissent from the above judgment in so far as it holds that Mr. Turnbull was not seeking to compel the employees to vote against the Unions. We agree with the ground taken by the majority of the Ontario Board, namely that Mr. Turnbull's speech contained a veiled threat that the employees might incur his displeasure with consequences, which it was not necessary to point out to intelligent people, a hint which might well move the average employee as the history of labour relations has frequently shown.

March 13, 1945.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiation for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdiction. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During May reports were received from six Boards of Conciliation:—

Concerning Keystone Shingles and Lumber Company Limited, New Westminster, B.C., and International Woodworkers of America, Local 1-357.

Concerning William Russell and Sons, Windsor, Ontario, and Brotherhood of Painters,

Decorators and Paperhangers of America, Local 1494.

Concerning De Havilland Aircraft Company of Canada Limited, Toronto, Ontario, and United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 112.

Concerning Canadian Westinghouse Company Limited, Hamilton, Ontario, and United Electrical Radio and Machine Workers of America, Local 504.

Concerning Thompson Bros. Machinery Company Limited, Liverpool, N.S. and Federated Council of Thompson Bros. Machinery Company, Limited.

Concerning Fraser Valley Fibre Flax Co-operative Association, White Rock, B.C. and Fibre Flax Workers Union, Local No. 1.

Concerning Dominion Bridge Company, Limited, Burnaby, B.C., and Boilermakers and Iron Shipbuilders' Union of Canada, Local No. 1.

Concerning Eight Glass Companies, Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America.

Boards Fully Constituted

During May six Boards of Conciliation were fully constituted.

R.C.A. Victor Company Limited, Montreal, Quebec.—The Board of Conciliation established to deal with a dispute between R.C.A. Victor Company Limited, Montreal, Quebec,

and International Brotherhood of Electrical Workers, Local 1028, was fully constituted on May 2, with the appointment of Mr. Justice A. Savard, Montreal, Que., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. D. A. Paterson, Montreal, and Mr. Robert Haddow, Montreal, were appointed on the nomination of the employer and employees respectively.

Dominion Tar and Chemical Company Limited, Montreal, Que.—The Board of Conciliation established to deal with a dispute between Dominion Tar and Chemical Company Limited, Montreal, Que., and Dominion Tar and Chemical Company Limited, Employees Federal Union, Local 173 (T. and L.C. of Canada) was fully constituted on May 15, with the appointment of Mr. Justice A. Savard, Quebec, P.Q. as chairman of the Board on the joint recommendation of the other two members of the Board. Mr. D. A. Paterson, Montreal, P.Q. and Mr. Louis-Rene Beaudoin, Montreal, P.Q. were appointed on the nomination of the employer and employees respectively.

Champion Spark Plug Company of Canada Limited, Windsor, Ont.—The Board of Conciliation established to deal with a dispute between Champion Spark Plug Company of Canada Limited, Windsor, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 195, was fully constituted on May 10, with the appointment of Mr. Justice W. D. Roach, Toronto, Ont. as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. Gordon L. Fraser, K.C., Windsor, Ont., and Mr. Bora Laskin, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

Canadian Liquid Air Company Limited, Vancouver, B.C.—The Board of Conciliation established to deal with a dispute between Canadian Liquid Air Company Limited, Vancouver, B.C., and Boilermakers and Iron Shipbuilders of Canada, Local No. 1, was fully constituted on May 16, with the appointment of Mr. J. E. Eades, Vancouver, B.C., as Chairman of the Board on the joint recommendation of the other two members of the Board. Mr. R. L. Norman, Vancouver and Laurene Anderson, Vancouver, were appointed on the nomination of the employer and employees respectively.

Aluminum Company of Canada Limited, Arvida, P.Q.—The Board of Conciliation estab-

lished to deal with a dispute between Aluminum Company of Canada Limited, Arvida, P.Q. and Syndicat National des Employés d'Aluminium, was fully constituted on May 30, with the appointment of Honourable Mr. Justice C. G. MacKinnon, Montreal, Que. as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. Walter A. Merrill, Montreal, and Mr. Theodore Lesperance, Montreal, were appointed on the nomination of the employer and employees respectively.

Dominion Engineering Works Limited, Longueuil, P.Q.—The Board of Conciliation established to deal with a dispute between Dominion Engineering Works Limited, Longueuil, P.Q. and Local 1596, International Association of Machinists, was fully constituted on May 22, with the appointment of Mr. Justice Alfred Savard, Montreal, Que., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. G. C. Heward, Montreal and Mr. A. Gauld, Montreal, were appointed on the nomination of the employer and employees respectively.

Boards Established

During May nine Boards of Conciliation were established but not fully constituted.

Concerning Chrysler Corporation of Canada Limited, Chatham, Ont., and Local 127, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO).

Concerning Canadian Rogers Sheet Metal and Roofing Limited, Winnipeg, Man., and Local 3238, United Steelworkers of America.

Concerning Canadian Automotive Trim, Limited, Windsor, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO), Local 195.

Concerning Gotfredson Limited, Windsor, Ont., and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO).

Concerning Bendix-Eclipse of Canada Limited and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

Concerning Cockshutt Plow Company Limited, Brantford, Ont., and Local 458, United Automobile, Aircraft and Agricultural Implement Workers of America.

Concerning Belleville-Sargeant and Company, Belleville, Ont., and Local 426, International Union, United Automobile, Aircraft

and Agricultural Implement Workers of America, (UAW-CIO).

Concerning Guelph Stove Company, Guelph, Ont., and Local 3305, United Steelworkers of America.

Concerning Aluminum Company of Canada, Limited, Shawinigan Falls, Quebec, and Syndicat National des Employés de l'Aluminium, Inc.

Agreements Facilitated by Conciliation Officers

In the following cases reports were received from Conciliation Officers indicating the successful conclusion of negotiations and the signing of an agreement:

Concerning Windsor Bedding Company Limited, Windsor, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.—J. P. Nicol, Conciliation Officer.

Concerning International Nickel Company of Canada Limited, Sudbury and Port Colborne and Locals 598 and 637 International Union of Mine, Mill and Smelter Workers.—F. J. Ainsborough, Conciliation Officer.

Concerning Chromium Mining and Smelting Corporation Limited and Local 2451, United Steelworkers of America.—H. Perkins, Conciliation Officer.

Assignment of Conciliation Officers

Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Concerning Truscon Steel Corporation of Canada Limited, Windsor, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 195.—J. P. Nicol, Conciliation Officer.

Concerning Canada Foils Limited, Toronto, Ontario, and Metal Foil Workers' Union No. 23624 and Paper Box and Specialty Workers Union No. 466.—F. J. Ainsborough, Conciliation Officer.

Concerning Century Coal Company, Midland, Ont., and National Union of Coal Dock Workers Local No. 1.—F. J. Ainsborough, Conciliation Officer.

Concerning Powell-Rouyn Gold Mines Limited, Rouyn, Que. and Rouyn Mine, Mill and Smelter Workers Union, Local 688.—R. Trepazier, Conciliation Officer.

Concerning Medcalf Shoe Company, St. Thomas, Ont. and Boot and Shoe Workers

Union, Local 531—Wm. Dunn, Conciliation Officer.

Concerning A. R. Kaufman, Kitchener, Ont., and United Rubber Workers of America—Wm. Dunn, Conciliation Officer.

Concerning Libby McNeill and Libby, Chatham, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America—Wm. Dunn, Conciliation Officer.

Concerning Marshall Wells Company Limited, Winnipeg, Man., and Wholesale Warehouse Employees Union, Local No. 4, C.C.L.—Thomas William, Conciliation Officer.

Concerning Holeproof Hosiery Company of Canada Limited, London, Ont., and United Textile Workers of Canada, Local 22—Wm. Dunn, Conciliation Officer.

Concerning Prince Rupert Dry Dock and Shipyards, Prince Rupert, B.C., and Boilermakers and Iron Shipbuilders Union of Canada, Local No. 4 and National Union of Machinists, Fitters, Blacksmiths, Moulders and Helpers, Local No. 1—G. R. Currie, Conciliation Officer.

Concerning Windsor Tool and Die Limited, Windsor, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 195—J. P. Nicol, Conciliation Officer.

Concerning Port Arthur Shipbuilding Company, Port Arthur, Ont., and Industrial Union of Marine and Shipbuilding Workers, Local 11—H. S. Johnstone, Conciliation Officer.

Concerning John Inglis Company Limited (Ordnance Division) Toronto, Ont., and Local 2900 United Steelworkers of America—F. J. Ainsborough, Conciliation Officer.

Concerning Hoyt Transport Limited, Truro, N.S. and Canadian Brotherhood of Railway Employees and Other Transport Workers, Local 195—H. R. Pettigrove, Conciliation Officer.

Concerning Frost and Wood Company Limited, Plant No 1, Smiths Falls, Ont., and United Steelworkers of America, Local 3140—F. J. Ainsborough, Conciliation Officer.

Concerning Canadian Car and Foundry Company Limited, (Aircraft Division) Fort William, Ontario, and International Association of Machinists, Aircraft Lodge 719—H. S. Johnstone, Conciliation Officer.

Concerning Canadian Industrial Minerals Limited, Walton, N.S. and General Workers Union of Walton—H. R. Pettigrove, Conciliation Officer.

Report of Board in Dispute between Keystone Shingles and Lumber Co., Limited, New Westminster, B.C., and International Woodworkers of America, Local 1-357

On May 18 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between Keystone Shingle and Lumber Co., Limited, New Westminster, B.C., and International Woodworkers of America, Local 1-357.

The personnel of the Board was as follows: Mr. Henry L. Edmonds, K.C., Chairman, appointed on the joint recommendation of the other two members; Messrs. G. H. Dorrell and Hugh Clark, appointed on the nomination of the employer and employees respectively.

The Board's report was signed by the Chairman and Mr. Clark and was approved by telegram by Col. Dorrell.

The text of the Board's report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and in the matter of a dispute between Keystone Shingles and Lumber Ltd., New Westminster, B.C. (employer), and certain of its employees in the company's plant at Duncan street, represented by the International Woodworkers of America, Local 1-357, New Westminster, B.C. (employees).

The Board had their first meeting on April 16, when all members were present, as was also Mr. N. DeW Lyons, Registrar, from the Department of Labour, Victoria. The Board was organized, and decided to meet again at the Court House in the City of New Westminster, on April 23, at 1.30 o'clock in the afternoon. Following the said meeting, the Chairman notified Keystone Shingles and Lumber Ltd., by prepaid registered letter with return receipt, and also Mr. Percy Smith of the International Woodworkers of America, Local No. 1-357 of the time and place arranged for the public meeting.

The Chairman wired Ottawa for an extension of two weeks from the 24th of April, and also for authority to engage the services of a stenographer, both of which requests were granted.

At the meeting on April 23, all members of the Board were present, as were also Mr. N. DeW Lyons, Registrar, Mr. Percy Smith, representing the employees, but Mr. G. W. Beach, Manager of the Keystone Shingles and Lumber Ltd. did not appear, and it was reported to the Chairman that he was confined to his home through illness. However, his son, Mr. Russell Beach, appeared, but stated that he was there only to listen and

that he was not empowered to take any part in the proceedings. There was a long discussion to and fro, but no headway was made at that particular meeting, and it was finally adjourned to April 25 in order, if possible, for Mr. G. W. Beach to appear.

On April 25, all members of the Board were present, also Mr. Lyons and Mr. Smith, and Mr. R. R. Maitland, representing Stuart Research Service Ltd., who stated he was holding a listening brief only. There was no appearance on behalf of the Keystone Shingles and Lumber Ltd., but the Chairman produced and filed a letter he had received from the Keystone Shingles and Lumber Ltd., signed by Russell Beach, stating that Mr. G. W. Beach was still definitely confined to his bed, and unable to attend. After discussion the hearing was further adjourned to May 2.

On May 2 there were present, H. L. Edmonds, K.C., Chairman, Hugh Clark, Member of the Board, Mr. Lyons, Registrar, and Mr. G. W. Beach attended personally. The third member of the Board, Col. G. H. Dorrell, was not present, and the Chairman informed the meeting that Col. Dorrell had met with an accident, having fractured his hip, and was confined to hospital. This situation was explained to the meeting, and particularly to Mr. Beach, who was given the option of adjourning in the absence of Col. Dorrell, or proceeding, and he consented to proceed. There was a very long discussion over the matter, and a form of agreement was presented and submitted to Mr. Beach. At the suggestion of the Chairman, Mr. Beach took a copy of the agreement and went through it. The meeting was adjourned for a period to give Mr. Beach ample time to consider it. On the resumption of the hearing, Mr. Beach again gave his views in the matter, and agreed to certain paragraphs, as follows: (These appear in the enclosed proposed Agreement as the preamble, Articles 1 and 3, Sections 4 and 5 of Article 7, and all of Articles 11, 12 and 13.) Further discussion took place and it was finally agreed between Mr. Beach and Mr. Smith, at the suggestion of the Chairman, to meet and again endeavour to come to an agreement. They agreed to meet on Friday, May 4, and the Board then adjourned the hearing until the afternoon of May 7. However, before adjourning, both parties to the matter agreed to a further continuance of two weeks from May 8.

A further meeting was held on the afternoon of May 7, when the Chairman and Mr.

Clark attended, but Col. Dorrell was of course unable to come. Mr. Lyons and Mr. Smith were also present. There was no appearance on behalf of the Keystone Shingles and Lumber Ltd. However, before the meeting, the Chairman received two letters from the Keystone Shingles and Lumber Ltd., dated May 4 and May 5 respectively, which he filed with the Registrar as Exhibits 11 and 12. These letters indicated that it was impossible for the parties to get together. Mr. Smith then reported on his meeting with Mr. Beach on Friday, May 4, and made the definite statement that no mutual agreement could possibly be arrived at. The matter was further discussed, and the two members of the Board agreed to meet at a further date in order to prepare their report in the matter.

The Chairman and Mr. Clark met again to-day and have agreed to recommend the enclosed agreement identified with the initials of the Chairman and Mr. Clark, as being just, fair and proper. This enclosed agreement is to all intents and purposes identical with the draft agreement submitted to the Board and submitted to Mr. Beach, except for the elimination of Article 9, which appeared in the draft agreement but does not appear in the enclosed agreement. Therefore the numbering of the Articles from 9 on is not the same as in the draft agreement hereinbefore mentioned. This Article 9 consisting of five sections deals with hours of work, etc., and is all covered by Acts of the British Columbia Legislature and regulations thereunder. It did not in any way conflict with such statutes and regulations. However, inasmuch as Mr. Beach strenuously objected to it, we have decided to eliminate it.

It is our understanding as to Article III Section (a) that the Supplement No. 1 is

only approved and attached at the time the Agreement is entered into.

As to the various hearings, the services of Mr. Vincent D. Webb, Official Stenographer for the Courts here, reported the proceedings on April 23, May 2 and May 7, but as Mr. Webb was not available for the hearing on April 25, Mrs. Doris Winton, Police Court Reporter in this City acted as stenographer, and also typed the first draft of this report.

We are enclosing herewith the following:—

- (a) Stenographer's transcripts of the various meetings including the organization meeting held on April 16.
- (b) Exhibits 2 to 12, both inclusive. (We are not returning Exhibit 1 which is the appointment of the Conciliation Board dated the 10th day of April, 1945 and signed by the Honourable the Minister of Labour.)
- (c) Any forms sent to the Chairman and not required.

The Oaths of Office of each of the three members of the Board are not enclosed, but you will see from the minutes of the organization meeting held on the 16th of April that the oaths were subscribed and sworn before Mr. Lyons, who is a Notary Public for the Province of British Columbia.

Dated at the City of New Westminster, B.C., this 10th day of May, A.D. 1945.

(Sgd.) HENRY L. EDMONDS,

Chairman.

(Sgd.) HUGH CLARK,

Member.

Attached to the report was a copy of the draft agreement recommended by the Board.

Report of Board in Dispute between William Russell and Sons, Windsor, Ont., and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America

On May 21 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between William Russell & Sons, Windsor, Ont., and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America.

The personnel of the Board was as follows: Mr. McGill Allen, Chairman, appointed on the joint recommendation of the other two members; Messrs. William Murray and John T. Breeze, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:

Report of Board

Re: *Wartime Labour Relations Regulations P.C. 1003* and re *William Russell & Sons, Windsor, Ontario, and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America.*

The Board of Conciliation appointed to deal with the differences which had arisen between the above parties held a meeting this evening in a room at the headquarters of the Windsor Trades and Labour Council.

We had been given the names and addresses of the Russell employees, eleven in all and

subpoenas were mailed by Registered Post on Monday morning the 7th of May. However the holiday occurring on the 8th when there was no mail delivery prevented all the men receiving their notices in time to be present.

Six employees appeared and were questioned individually. Only two admitted being still members of the union. The other four had paid one month's dues and dropped out. On further questioning, it was brought out that the actions of the shop steward and remarks he had made to some of the men were the source of the men dropping out of the union. The shop steward who was accused of being the source of all the trouble has left the firm and the new shop steward, Arch McDermid, stated that he was satisfied that all the men would now return to the union and this seemed to be concurred in by the four men present who had dropped out.

An explanation by Mr. Fred Molineux, General Organizer of the Brotherhood of Painters and Decorators Union, who was present gave an explanation of the closed shop order which had not been thoroughly under-

stood by Mr. Russell and when this explanation was later made to Mr. Russell by the Chairman (as he was not present) he seemed satisfied that everything was going to work out satisfactorily.

Therefore your Conciliation Board are of the opinion that the differences between the employees and the union have been settled satisfactorily and therefore the differences between Local 1494, Brotherhood of Painters and Decorators and Wm. Russell and Sons has also been settled and we see no reason why any change should be made in the certification of Local 1494 as the bargaining agency for the employees of Wm. Russell and Sons.

Dated at Windsor, Ontario, this ninth day of May, 1945.

(Sgd.) J. T. BREEZE,
Member of Conciliation Board,
(Sgd.) WM. MURRAY,
Member of Conciliation Board,
(Sgd.) L. MCGILL ALLAN,
Chairman.

Report of Board in Dispute between the De Havilland Aircraft of Canada, Limited, Toronto and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 112

On May 16 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the De Havilland Aircraft of Canada, Limited, Toronto, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO), Local 112.

The personnel of the Board was as follows: Mr. Leonard W. Brockington, K.C., Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board; Messrs. Norman L. Mathews and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and in the matter of a dispute between De Havilland Aircraft of Canada, Limited (Employer) and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO), Local 112, (Employees)

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The undersigned, being the members of the Board of Conciliation established on the 26th day of January, 1945, have the honour to report as follows:—

It is our desire to express our sincere appreciation of the assistance we have received from the spokesmen for both sides who gave their evidence with complete frankness and advanced their arguments with a fairness that has, we believe, characterized the relations between the Company and the Union, and their attitude toward each other, during their association in the enterprise under examination.

The first Agreement between the Employer and the Employees was signed on June 7, 1943, and expired on June 7, 1944. Since that time, the parties have met in an endeavour to negotiate a new Agreement. That endeavour has failed and the parties have carried on without a formal contract. The provisions of P.C. 1003 of the Wartime Labour Relations Regulations and the services of the Board have been invoked in an effort to remedy the situation.

The Board has not thought it necessary to deal with all the clauses of the old contract as many of them do not appear to have been the subject of disagreement. The discussions

which we have held with the parties have resolved themselves into four headings:

1. The establishment of a Union Shop;
2. Check off;
3. Canteen Privileges;
4. Seniority Clause.

On these four questions, the findings of the Board, which are hereby respectfully submitted, are unanimous.

1. UNION SHOP

The term "Union Shop" was and is intended to mean that any non-Union employee may accept employment with the Employer, but within one month from the date of such acceptance, he must become a member of the Union, provided that he belongs to an occupational group named by the contract.

The evidence concerning the number of employees who are at present in good standing as members of the Union is not as clear as we should have wished. It is, however, admitted that the majority is not very substantial. The Union representatives strongly urged that the membership in the Union would have been higher if the Union had not adopted placatory methods at critical times. This the Company denied. On the main point, the Company's delegates contended that no matter how large a percentage of the Company's employees were members of the Union, a Union shop was neither justified, nor desirable. The Union argued that no matter how restricted was the Union membership amongst the Company's employees, the principle of a Union Shop should now be established.

The Board has not agreed with either contention but is unanimously of the opinion that the application for a Union Shop is at least premature and should not in this case be granted. The Chairman, and the nominee of Labour on the Board, however, agree that after further contractual experience and if and when a very substantial majority of the Company's employees become members of the Union in good standing, the application of the principle of the Union Shop to the De Havilland plant deserves and should receive further consideration.

2. CHECK OFF

It is fair to record that the Company has not opposed some form of voluntary and revocable check off. The Board believes, however, that the Company's proposals were not adequate to meet the circumstances of this case. We are of the opinion that the Company should facilitate in every reasonable way, the Union's dealings with its members, realizing,

as the Company must also do, that its own relationship with the Union is likely to be continuous. We are, therefore, of the opinion that a check off should be allowed in the following terms and so recommend. We make this condition; that the terms of the following recommendations, if they are made effective, be clearly communicated to Union members and by implication or otherwise accepted by them in accordance with the usual Union practice.

A. Any member of the Union who wishes the Company to deduct his Union dues from his wages and pay them to the Union on his behalf, may on any week day from Monday to Friday, inclusive, during regular office hours, authorize the Paymaster of the Company, in writing, on forms to be supplied by the Paymaster, or Department Foreman, or his appointee, to make such deductions.

B. This authorization shall be expressed to continue in force until termination of any contract, but not longer than twelve months; provided that the said authorization shall be expressed to expire:

- (i) Upon termination of employment, or
- (ii) Upon promotion or transfer into an occupational group not covered by the terms of any existing agreement, or

(iii) In the event of resignation or expulsion from the Union, upon the approval in writing of the Union.

Otherwise, such authorization shall be irrevocable.

C. Such authorization or direction shall be executed by the Union member in triplicate, one copy of which shall be forwarded to the Union.

D. On the first pay day of each month the Paymaster shall make deductions from the wages of Union members in accordance with the authorization then in his hands and shall forward such deductions to the Union within one week thereafter with a list of the Union members from whose wages Union dues have been deducted on the said first pay day of each month. Such monthly statement of deductions shall be accompanied by a list of all Union members whose authorization to deduct Union dues from their wages is no longer effective because:

- (i) They have left the employ of the company;
- (ii) They have been promoted or transferred to an occupational group not covered by the terms of this Agreement;
- (iii) They are entitled to no wages on the first pay day of the month, or
- (iv) Having ceased to be members of the Union, by way of resignation or expulsion, they have withdrawn their authorization with the written consent of the Union.

3. CANTEEN PRIVILEGES

The Board recommends that the practice with reference to canteens and canteen privileges remain as it is at present.

4. SENIORITY

On the question of seniority, the Board is concerned only with a dispute revolving around Clause 27 of the existing agreement, reading as follows:

Promotions or transfers to higher-paid jobs or to better jobs with equal pay, and to supervisory positions and/or demotions to lower-paid jobs or to lesser jobs with equal pay, shall be based primarily on skill, ability, experience and aptitude, and such factors being equal, they shall be based on group seniority.

The principal points of dispute in this respect relate to the inclusion of the words "and to supervisory positions" and to the inclusion of "seniority" as an equal factor with skill, ability, experience, and aptitude in the determination of promotions or transfers, and demotions. The Company urged that the words "and to supervisory positions" be deleted and that the existing Clause 27 otherwise remain unchanged. The Union contended that the words "and to supervisory positions" be re-

tained and that "seniority" should be listed along with skill, ability, experience and aptitude as factors of equal weight in the determination of promotions or transfers, and of demotions.

The Board is unanimously of the opinion that Clause 27 aforesaid be amended to read as follows:

Promotions or transfers to higher-paid jobs or to better jobs with equal pay, other than to supervisory positions not covered by this agreement, and/or demotions to lower-paid jobs or to lesser jobs with equal pay, shall be based on skill, ability, experience, aptitude, and seniority.

The Company shall, whenever possible, notify the Union of all intended promotions or demotions.

Respectfully submitted,

(Sgd.) NORMAN L. MATHEWS,
(Sgd.) BORA LASKIN,
(Sgd.) L. W. BROCKINGTON.

May 7, 1945.

Report of Board in Dispute between the Canadian Westinghouse Co., Ltd., Hamilton, Ont., and Local 504, United Electrical, Radio and Machine Workers of America

On May 15 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the Canadian Westinghouse Co., Limited, Hamilton, Ont., and Local 504, United Electrical, Radio and Machine Workers of America.

The personnel of the Board was as follows: Dr. Cecil A. Wright, Chairman, appointed on the joint recommendation of the other two members; Messrs. John J. Robinette and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:

Report of Board

Re: Wartime Labour Relations, P.C. 1003, and Canadian Westinghouse Company, Limited, Hamilton, Ontario, and Local 504, United Electrical, Radio and Machine Workers of America.

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario

SIR:—

The Board of Conciliation appointed by you pursuant to the provisions of P.C. 1003 begs to report as follows:

The first meeting of the Board with the parties was held at the Court House in Hamilton on March 24th. At this and subsequent meetings the Company was represented by

B. B. Hodge, personnel manager, C. H. Mitchell, vice-president and manager, and R. R. Evans, K.C., as counsel. The Union was represented by C. S. Jackson, president of Canadian District, Harry Hunter, Hamilton representative, Charles Smyth, Hamilton representative and organizer and Miss Letty Pierce, representative of Local 504.

By order of the Ontario Labour Court of June 16, 1944, United Electrical, Radio and Machine Workers of America was certified as the collective bargaining agency in the two main Hamilton plants of the Company. Negotiations have been proceeding since August between the parties and at various stages of the proceedings before this Board six draft agreements were referred to and some five of them were filed with the Board as exhibits. At one time, the Union has purported to accept provisions which the Company had submitted in a draft through its personnel manager, but on the Union's purported acceptance being referred to management and the legal department of the Company negotiations broke down and some 13 or 14 points of difference were placed before the Board. The extent of the disagreement between the parties can be seen from the fact that no agreement could be reached as to who should be parties to the agreement, and differences ranged from the opening clause to the final clause of termination. After a full day's hearing on March 24 and after a dis-

cussion of many of the points in issue, the Board recommended that the parties resume negotiations and report to the Board at the end of two weeks the results of such negotiations. Negotiations were resumed between the parties and some points were successfully negotiated between them. On being notified by the parties of their inability to conclude an agreement a further meeting was held in Hamilton on April 21 when attempts were again made to iron out points of difference and to reach some agreement after consideration of the various drafts put before the Board. At this meeting both parties were requested to consider and report on certain suggestions made by the Board. The Board received these suggestions and considered them at several meetings held in the City of Toronto. It seemed apparent to the members of the Board that the simplest procedure to adopt would be to recommend a complete form of agreement which the parties might sign rather than to discuss the various points at issue which had been fully gone into at the public hearings. Accordingly, after numerous meetings in Toronto the Board was unanimous in deciding to recommend the execution of the agreement which is attached hereto and which is made part of this report.

While the clauses themselves and the form of the agreement should indicate sufficiently to the parties the proposed solutions of their difficulties, a word or two may help to explain some of the changes which the Board is recommending.

The parties were unable to agree whether the International Union should be made a party to the agreement, as the Company contended, or whether the Local should be the party bargaining with the Company as the Union contended. This difference of opinion rose from the fact that by Order of the Ontario Labour Court the International Union had been certified and certain bargaining representatives, who were officers of the Local, had been named in that order. On this basis the Company insisted that the International was the only party that could legally enter into an agreement with the Company.

At the hearings before this Board, discussions were had as to the effect of P.C. 2301 in translating the order of the Ontario Labour Court into effective operation under P.C. 1003. As a result of these discussions the Board is unanimously of opinion that the officers of the International of whom one, namely Mr. Jackson, appeared before the Board, could effectively make the agreement through the Local of the International if they chose. The Board therefore recommends that the present agree-

ment be made with the International acting through its Local and suggests that the agreement can be executed on behalf of the International by Mr. Jackson and that the executive of Local 504 can be nominated by the officers of the International to sign on the behalf of the Local. This would seem to accord with the practical necessity of the case and would not offend, as we understand them, the provisions of P.C. 1003.

The only other matter to which express reference need be made is the clause regarding wages, hours of work, etc. As these are matters which are not within the jurisdiction of a Conciliation Board we recommend that the present agreement be signed leaving particular clauses regarding these subject matters to be included after the lapse of a three-week period in which the Union may take what steps it sees fit for revision or alteration of different items by an appropriate War Labour Board. The clause in the agreement (together with the note attached to such clause) is, we believe, self explanatory.

With regard to grievance procedure, some members of this Board felt that there should be final and binding arbitration on all grievances. Certainly, prior to the "violation and interpretation" clause in P.C. 1003, such procedure was becoming more or less widespread in connection with collective agreements. Some members of this Board felt that it was taking a backward step to limit the arbitration of any grievance. The present clauses have, therefore, been worked out by the Board with a view to obtaining a unanimous report and with a view to obtaining an agreement which may be acceptable to both parties. Perhaps, as the collective bargaining experience between the two parties develops, the Union may look forward to a broadening of the arbitration procedure in connection with grievances.

We wish to express our appreciation for the co-operation and assistance which we have received from all parties who appeared before the Board.

All of which is respectfully submitted.

Dated at Toronto the 10th day of May, 1945.

Attached to the report was a draft Agreement which was unanimously recommended by the Board.

**Report of Board in Dispute between Thompson Bros. Machinery Co., Ltd.,
Liverpool, N.S., and Federated Council of Thompson Bros.
Machinery Co. Ltd.**

On May 14 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between Thompson Bros. Machinery Co., Ltd., Liverpool, N.S. and Federated Council of Thompson Bros. Machinery Co., Ltd.

The personnel of the Board was as follows: Hon. Mr. Justice J. H. A. L. Fairweather, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board; Messrs. W. P. Potter, K.C., and Clarence Webber, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows.

Report of Board

In the matter of Wartime Labour Relations Regulations P.C. 1003, and of a dispute between Thompson Bros. Machinery Co. Ltd., Liverpool, N.S. (employer), and Federated Trades Council of Thompson Bros. Machinery Co. Ltd. (employees)

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Department of Labour,
Ottawa.

SIR:

The Board appointed by you to endeavour to effect a conciliation of the above dispute commenced its sittings at Liverpool, N.S. on April 10th and continued its open sessions for four days.

Throughout the hearing Thompson Bros. Machinery Co. Ltd. (hereinafter referred to as 'the Company') was represented by Mr. J. Ross Byrne, as counsel, Mr. H. Earl Thompson, assistant general manager, and Mr. A. M. Holland, employment manager, — all of Liverpool, N.S., while the Federated Trades Council (hereinafter referred to as 'the Union') was represented by John W. Bruce, general organizer of United Association of Plumbers and Steamfitters of United States and Canada, of Toronto, Ontario, Sam Findlay, vice-president of International Brotherhood of Boiler Makers, Iron Shipbuilders and Helpers of America, of Toronto, Ontario, George E. Murphy, general organizer of the International Association of Machinists, of Montreal, P.Q., James H. Dwyer, general organizer of United Brotherhood of Carpenters and Joiners of America of Halifax, N.S., and the following local representatives: Bert Slater, president of Local 1573 of International Association of

Machinists, Simon Dorey, president of Local 226 of United Association of Plumbers and Steamfitters of United States and Canada, Albert Belliveau, president of Local 879 of International Brotherhood of Electrical Workers, Arthur Whynot, president of Local 1465 of International Brotherhood of Painters and Decorators, Gerald Hemeon, president of Local 392 of United Brotherhood of Carpenters and Joiners of America, and Malcolm MacDonald, president of Local 370 of International Brotherhood of Boiler Makers, Iron Shipbuilders and Helpers of America,—all of Liverpool, N.S.

Prior to 1939 the Company operated a small machine shop and foundry at Liverpool with a total payroll of thirty-nine employees. Subsequent to the outbreak of war, the company become engaged in ship-repair work in a small way, and in the year 1942 entered into an emergency repair agreement with the Ship Repair Division of the Department of Munitions and Supply. As a result of this agreement and of increased ship-repair work, the number of employees increased until at the present time there are some six hundred and seventy-nine men on the payroll.

Of these 679, one hundred and thirty-five are, by reason of their occupation or age, ineligible for membership in any of the six unions represented by the Federated Trades Council, leaving a balance of 544 eligible for membership of which number five hundred and twenty-seven are Union and seventeen non-Union. It was represented to your Board that some of these 17 non-Union employees had, during the course of the hearing, applied for Union membership, so for all practical purposes the work of the Company is carried on in a Union shop as far as the six unions are concerned.

In the year 1941 the company entered into a collective bargaining agreement with Local 392—United Brotherhood of Carpenters and Joiners of America. Later other craft unions were organized among the employees of the plant, and in the year 1942 separate agreements were negotiated with six craft unions affiliated with the Trades and Labour Congress of Canada and the American Federation of Labour. Upon the expiration of these later agreements, the company entered into a master agreement with the following craft unions: Local No. 226—United Association of Journeymen, Plumbers and Steamfitters of United States and Canada, Local No. 1573—International Association of Machinists, Local

No. 392—United Brotherhood of Carpenters and Joiners of America, Local No. 370—International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America, Local No. 879—International Brotherhood of Electrical Workers, and Local No. 1465—Brotherhood of Painters, Decorators and Paper Hangers of America.

This said master agreement contains the following clause:—

2. DURATION OF AGREEMENT:—

This Agreement shall be effective for a period of (1) one year, dating from the twelfth day of August, A.D., 1943 to the twelfth day of August, A.D., 1944 or until the expiration of the emergency repair Agreement, whichever shall come first, subject to change by thirty (30) days notice in writing, prior to August 12th, A.D., 1944, such notice to be given by either party to this Agreement.

Under the heading "Working Conditions"—Clause 8—the said agreement contained the following statement as subsection (n):—

In order to insure the carrying out of the purposes of this agreement it is agreed and understood that any present employee of the Company may become a member of one of the Unions signatory to this agreement and that in no circumstances shall any present employee of the Company be induced by anything other than lawful means to become a member of any Union that may be a signatory to this Agreement. But it is also expressly understood and agreed that the Company shall advise and require as a condition of employment regarding all future employees who may not be presently on the pay roll of the said Company, except those employed in a temporary capacity, that after a period of probation of thirty (30) days they shall be required, if they are to be kept on the pay roll of the said Company, to join the Union which covers the classification of work which they are performing and the Company will co-operate in assisting the Unions signatory to this Agreement in maintaining such Union membership.

Your Board interpreted this clause to mean that all non-Union employees are at liberty to become Union men or not as they wish, but that all new employees must, after a period of thirty days' probation, become members of their respective Unions or be struck off the company's payroll.

Each party gave notice to the other as provided by Clause 2 quoted above.

On August 10, 1944 the said six craft Unions submitted an application for investigation and certification of bargaining representatives to the Wartime Labour Relations Board for Nova Scotia pursuant to Section 6 of the Wartime Labour Relations Regulations, Order in Council P.C. 1003. These organizations and their duly chosen bargaining representatives were certified as bargaining agents by the said Board as of September 8, 1944. These

certified bargaining agents later submitted a draft collective bargaining agreement to the representatives of the Company in substitution for the master agreement dated 12th August 1943.

Negotiations relating to this proposed agreement were carried on for some three months, the Unions being represented by the Federated Trades Council. No agreement having been reached, on December 12 the parties appeared before the Wartime Labour Relations Board for Nova Scotia. At this conference the proposed new agreement was considered and, with the exception of subsections (1) and (1-a) of Clause 7, agreed to in principle except as to some minor details. On January 13, 1945, the Vice-Chairman and Chief Executive Officer of the Nova Scotia Wartime Labour Relations Board advised the Honourable the Minister of Labour for Canada that the Federated Trades Council, representing the employees of the Company, requested that conciliation proceedings be instituted under the provisions of Section 12 of Order in Council P.C. 1003. In compliance with said request, Mr. H. R. Pettigrove, industrial relations officer, was instructed to endeavour to effect conciliation, and on February 5, 6 and 7 he arranged a series of separate and joint conferences at Liverpool with the representatives of the interested parties. Details of Mr. Pettigrove's efforts to effect conciliation are contained in his report dated February 12, 1945, in which report he made the recommendation that a Board of Conciliation be appointed with a view to facilitating settlement. This Board was authorized on February 14 under the hand and seal of the Honourable the Minister of Labour; Mr. W. P. Potter, K.C. was duly appointed as employer's nominee, and Mr. Clarence Webber as nominee of the employees. These nominees were unable to agree as to a chairman, and as a result Mr. Justice J. H. A. L. Fairweather was, on March 12, appointed to the office by the Honourable the Minister of Labour.

At the sittings recently held at Liverpool every effort was made by your Board to effect conciliation. Briefs were filed by representatives of the parties, and every opportunity was given for detailed expression of divergent views. Satisfactory explanations were given as to various points of difference, the proceedings were conducted in an harmonious spirit, and although no acceptable middle-ground could be found, your Board felt that the time spent was by no means wasted.

The representatives of the employees argued very strongly for the inclusion in the proposed agreement of subsections (1) and

(1-a) of Clause 7—in other words a Union Shop. These subsections read as follows:—

(1) In order to insure the carrying out of the purpose of this agreement, it is agreed and understood that all present employees shall become members of the Union which has jurisdiction over the classification of work in which they are employed within ten (10) days, and shall maintain such membership in their respective unions.

(1-a) In order to insure the carrying out of this agreement, it is agreed and understood that all new employees that may be hired by the Company shall become members of the Union which has jurisdiction over the classification of work in which they are employed within thirty (30) days from the date of their employment, and shall maintain such membership in their respective unions.

The representatives of the Company, with equal strength, argued that subsections (1) and (1-a) be struck out and that an Open Shop be instituted.

The Union Shop clause, in the opinion of your Board, raises a question of principle which we feel will always remain a bone of contention between employers and employees until dealt with by competent legislative authority. On this question of principle the views of your Board are at variance. Feeling, as we do, that our efforts in this case should be directed to effecting a conciliation rather than to the discussion of abstract principles we are agreed that no good object would be served by giving expression to these divergent views in this report. We are, however, unanimously of opinion that some form of maintenance-of-membership clause to be embodied in the proposed agreement would, if tried for a year, go a long way towards solving the differences existing between the parties. With that end in view, your Board submitted a maintenance-of-membership clause containing an escape clause which would permit Union members to withdraw from membership within a limited time of the date of the agreement, or otherwise be obliged to continue as Union members throughout the year. This suggestion was not acceptable to either party, but the representatives did agree to consider the question and to submit counter-proposals. In pursuance of this undertaking the company's representatives submitted the following:—

It being mutually understood that the Company or the Unions have no intentions of retreating from their respective positions regarding their differences *re* union shop and maintenance-of-membership clauses, but considering the emergency conditions due to the war, both parties of this agreement are willing without prejudice to the rights of either in so far as the post-war period is concerned, do mutually agree that as an emergency measure and pending clarification by legislation of the position of both parties in order to insure the carrying out of the

purpose of this agreement, that all present and future employees may or may not become members of the Union which has jurisdiction over the classification of work in which they are employed, and any present or future employee who may be a member of any such union, or who may become a member of such union shall be free to resign from such union concerned on fifteen (15) days notice in writing of his intention so to do.

The representatives of the employees also made a submission as follows:—

The Company agrees to recognize the right of its employees to become members of the organization governing the classification in which he is employed, and will not coerce or intimidate in any way any employees who desire to exercise this right.

Any employee now a member of any of the organizations—parties to this agreement—shall as a condition of employment be required to maintain their good standing membership. And the Company agrees to co-operate with the respective organizations in the enforcement of these conditions.

In the interests of harmony and to prevent misunderstanding the Company agree in the employment of additional new employees they shall be advised of the existing agreement, and it is their desire that they should become members of their respective unions.

Neither of these suggestions proved acceptable to the opposing interests, and it is quite clear from a perusal of the wording of the submissions that neither represents any real departure from the original stand taken regarding a Union or an Open Shop. The representatives of the company argued that in view of the expected near approach of the end of the war in Europe that the future status of the company was very uncertain, and that the company therefore could not consent to a Union Shop clause. It was further argued that the Union Shop clause as proposed was unnecessary, undemocratic, and detrimental to the efficient operation of the plant; that it contains the element of compulsion in that all present employees must, under its terms, become union members within ten days and all new employees within thirty days and must maintain such membership on pain of dismissal. On the other hand the Union representatives argued that a Union Shop would create a greater degree of harmony in the plant, would make for improved efficiency and out-put, and would eliminate causes of friction and discontent, and further that the Unions were entitled to the security of a Union Shop, and that it was unfair and unjust for non-Union employees to obtain the advantages of a Union without contribution to its support.

At the conclusion of the argument, your Board examined the proposed new agreement clause by clause, the major portion of which was approved by representatives of both

parties. Hereto annexed—Exhibit “A”—is a copy of the said agreement with notations regarding those clauses which still require confirmation.

Your Board are of the opinion that a new agreement should be concluded between the parties to this dispute with the least possible delay, and that a form of maintenance-of-membership clause should be substituted for the Union Shop clause suggested by the Union—a clause similar to that recommended by the Hon. Mr. Justice S. E. Richards in the Meat Packing Industry Dispute printed in the December, 1944 LABOUR GAZETTE at p. 1485—which would, we feel, give satisfaction for at least the period of one year, at the end of which time the future operations of the plant would, we believe, have become clarified.

Your Board recommends that the following maintenance-of-membership provisions be included in the said proposed new agreement:—

(a) The Company agrees that, subject to compliance with the procedure hereinafter set out, it shall be a condition of employment that any employee who at the date of this agreement was a member in good standing of any of the Unions included in the parties of the second part, or who becomes a member after that date, shall maintain such membership during the term of this agreement.

(b) Any employee to whom clause (a) of this article applies may resign from membership in any of the said Unions within fifteen days immediately following the posting of the form of notice hereinafter set out in subsection (iv) of section (c).

(c) The procedure whereby clause (a) of this article becomes effective in respect to the employees affected by it shall be as follows:

(i) The said Unions shall at the signing of this agreement furnish the Company with lists of those employees who are members of the said Unions in good standing, such lists to be certified by an authorized officer of each of said Unions as being in accord with the signed and accepted applications of the individuals named in said lists.

(ii) The Company shall forthwith cause such lists or extracts from them to be posted upon a notice board or boards conveniently accessible to all employees named upon the lists or portions of them so posted.

(iii) Concurrently with the posting of said lists the Company shall post upon the Board or Boards upon which they have been posted, a notice in the form set out in the next following clause of this article and may deliver to any employee named on such lists a copy of such notice, such delivery to be made to the employee openly and upon the premises of the Company's plant.

(iv) Form of notice:

To all Employees:—

The collective agreement now in force between this Company and Local No. 226 of United Association of Journeymen Plumbers and Steamfitters of United States and Canada, Local No. 1573 of International Association of Machinists, Local No. 392 of United Brotherhood of Carpenters and Joiners of America, Local No. 370 of The International Brotherhood of Boilermakers, Iron Ship Builders, Welders and Helpers of America, Local No. 879 of The International Brotherhood of Electrical Workers, and Local No. 1465 of The Brotherhood of Painters, Decorators and Paperhangers of America, contains the following provisions (quote (a) and (b) above).

Lists of those employees who are members in good standing of the above named Unions have been furnished to the Company and are now posted upon the notice board or boards upon which notices of interest to employees are usually placed.

By arrangement with the Unions the provisions of the collective agreement above quoted will apply to all employees whose names appear in the lists of members of the above named Unions unless the Company receives notice from any employee within 15 days from the date of this notice that such employee has resigned his membership in any of said Unions, in which event the provisions above quoted shall not apply to such employee.

(d) No employee shall be subjected to any penalties against his application for membership or for reinstatement as a member in any of the above-named Unions, except as may be provided in the Constitution and by-laws of the Unions; and no coercion or intimidation of any kind shall be practised to compel or influence an employee to join any of said Unions nor shall any discrimination of any kind whatever be practised or permitted with respect to employees who are or who will become members of said Unions.

(e) If any employee asserts that he has been unfairly deprived of good standing in any of said Unions such assertion shall constitute a grievance and shall be dealt with according to the grievance procedure established by this agreement.

Dated at Liverpool, Nova Scotia, May 10, 1945.

Respectfully submitted,

(Sgd.) J. H. A. L. FAIRWEATHER,

Chairman.

(Sgd.) W. P. POTTER,

Member.

Attached to the report as Schedule “A” was a copy of the proposed new Agreement.

Report of Board in Dispute between Fraser Valley Fibre Flax Co-operative Association, White Rock, B.C., and Fibre Flax Workers Union, Local No. 1

On May 21 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between Fraser Valley Fibre Flax Co-operative Assn., White Rock, B.C., and Fibre Flax Workers' Union, Local No. 1.

The personnel of the Board was as follows: Mr. F. M. Clement, Chairman, appointed by the Minister in the absence of a joint recommendation from the other members of the Board; Messrs. D. M. Thompson and John Turner, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and Fraser Valley Fibre Flax Co-operative Assn., White Rock, B.C., and the Fibre Flax Workers' Union, Local No. 1.

HON. MR. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

DEAR SIR:

We wish to report that the opposing parties met with the Members of the Board on different occasions and after some discussions negotiated and signed an Agreement, a copy of which is enclosed. All negotiations were conducted in a spirit of friendliness and goodwill.

While recommending and supporting the enclosed Agreement, the Board has not been unmindful of certain all-important factors with regard to the industry. Some of these factors are as follows:

1. This is a new industry based on the production of fibre flax on the farms of the Fraser Valley. It is only now in its third year.
2. The farmer-producers, the labourers, the management, while not inexperienced in many fields of endeavour, are nevertheless new and relatively inexperienced in this industry.

3. A certain knowledge and expertness are required among many of the workers and others. These in many cases, due to the newness of the industry, have been somewhat lacking in both management and labour.
4. Some difficulties have been experienced in selling the various products at reasonable prices, and these prices have not in all instances satisfied the farmer-producer.
5. The acreage produced is about as follows:

1943.....	960 acres
1944.....	620 acres
1945.....	about 400 acres
6. The plant had a shut-down for a month last Fall because of a shortage of funds, but received some government assistance and may receive additional assistance on some purchases.

After listening to the general discussion and taking the above factors and others into consideration we cannot too strongly emphasize one simple point, which is that if this industry is to survive and become firmly established, the closest possible co-operation must be maintained between the management and the Union. The situation is somewhat precarious, but if all co-operate including the farmer-producers and take a long-time point of view, it is reasonable to expect that an industry of importance to both farmer and labour can be eventually established. Increased acreage and full co-operation between management and labour are absolutely essential if this industry is to survive.

Respectfully submitted,

D. W. THOMPSON,
Member.

JOHN TURNER,
Member.

F. M. CLEMENT,
Chairman.

Attached to the report was a copy of the Agreement which was signed between the parties concerned.

Report of Board in Dispute between the Dominion Bridge Company, Ltd., Burnaby, B.C., and Boilermakers and Iron Shipbuilders' Union of Canada, Local No. 1

On May 31 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between the Dominion Bridge Company, Ltd., Burnaby,

B.C., and Boilermakers and Iron Shipbuilders' Union of Canada, Local No. 1.

The personnel of the Board was as follows: Mr. J. Edwin Eades, Chairman, ap-

pointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. A. Reginald MacDougall and Lawrence Anderson, appointed on the nomination of the employer and employees, respectively.

The text of the Board's report and of the minority report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations and in the matter of Dominion Bridge Company Limited and its fabrication plant employees, represented by the Boilermakers and Iron Shipbuilders Union of Canada, Local No. 1.

To the Honourable the MINISTER OF LABOUR,
Ottawa, Ontario.

Following the recommendation of R. G. Clements, a conciliation officer, in accordance with the provisions of P.C. 1003, a Board of Conciliation was duly constituted by Order of the Honourable the Minister of Labour dated the 20th of March, 1945, and by Order of the Honourable the Minister of Labour dated the said date Mr. A. Reginald MacDougall and Mr. Lawrence Anderson were appointed members of the Board on the recommendation of the employer and employees respectively, and having failed to recommend a third person the Honourable the Minister of Labour by the said Order appointed Mr. J. E. Eades.

At a preliminary meeting of the Board held at the Board Room on the 4th day of April, 1945, in the Hall Building, 789 West Pender Street, with Mr. B. H. E. Goult, Registrar of the British Columbia Department of Labour, in attendance, the members were duly sworn, Mr. Eades was agreed upon as chairman, the procedure to be followed was adopted and the time and place of the first sittings for the hearing of evidence by or submissions of the parties was decided.

The Board met on the 12th day of April, 1945, at the Court House, Vancouver, B.C., and Mr. W. L. White, President of Boilermakers and Iron Shipbuilders Union of Canada, Local No. 1, and Mr. C. W. Caron, Secretary-Treasurer of the said Union, being the bargaining agents for the employees, duly certified as such on the 10th day of August, 1944, appeared on behalf of the employees and Mr. A. S. Gentles, General Manager of Dominion Bridge Company Limited, appeared on behalf of the Company. The bargaining representatives, as appeared by the notice of certification, represented the majority of the

employees employed in the fabrication plant of the Dominion Bridge Company Limited and did not represent the machinists, electricians, steam operators, electric crane operators and staff employees and those employed in a confidential capacity or having authority to employ or discharge employees. The conciliation officer's report was read and discussed and the parties expressed themselves as still unable to agree in respect of all the sections in the proposed agreement referred to by the conciliation officer.

The specific clauses of the proposed agreement in dispute were then and in subsequent sittings discussed clause by clause. Those sections of the agreement dealing with hours of work, safety committee, seniority, grievance procedure, arbitration and labour management production committee were considered, though not in that order. All these matters were finally resolved through a marked spirit of conciliation displayed by both parties. In particular the sections in dispute were dealt with as follows:—

ARTICLE 2

Section 2.—By the deletion of Sec. 4 of this Article and an addition to Sec. 2 setting out the hours of work the parties agreed that the needs of both could be met. The agreed section is as follows:—

Sec. 2.—Eight hours shall constitute one day's work and forty-four hours shall constitute one week's work on the first shift between the hours of 8 a.m. and 5 p.m.; seven and one-half hours shall constitute one day's work and thirty-seven and one-half hours shall constitute one week's work on the second shift between the hours of 4.30 p.m. and 1 a.m.; seven hours shall constitute one day's work and thirty-five hours shall constitute one week's work on the third shift between the hours of 12.30 a.m. and 8.30 a.m. Any variations in such standard hours due to transportation or otherwise shall be mutually agreed upon.

ARTICLE 3

Section 4.—The Company felt that the present safety committee consisting of the foreman, heads of department, first aid man and plant superintendent, which had power not only to make recommendations but to carry the recommendations into effect, had operated with great satisfaction and marked favourable results. The employees felt that equal representation of the men would be desirable and advanced arguments in support and it was agreed that representation be given as long as the committee be not so large that it was unwieldy. Directions of the Workmen's Compensation Board of December 6, 1944, in respect of accident prevention committees was

filed. The Company withdrew its objections and Sec. 4 of this Article was agreed to. The clause as agreed to is as follows:—

A safety committee shall be maintained composed of four representatives of all the employees in the plant and four representatives of management. The number of representatives to be appointed by the Union shall be not less than two and shall be such larger number as may from time to time be agreed upon.

ARTICLE 5

Section 1.—The principle of seniority commensurate with merit and ability was not in dispute between the parties, but the employees submitted that they should be consulted on the question of what constituted merit and ability, whereas the employer felt that this decision was the prerogative of management. After the submission of suggested clauses by each party the following was agreed upon:—

Lay-offs, promotions and demotions are to be based on ability to perform the particular job, but when all other things are equal the employee having the greatest seniority will receive the preference. This clause does not necessarily refer to promotion to supervisory positions.

When lay-offs are contemplated, the company will submit to the Union a list of the names of those to be laid off and the reasons for doing so.

ARTICLE 8

Grievance procedure was discussed at length, difficulties arising between the parties in the settlement of both individual grievances and on the question of arbitration. Various clauses were submitted by the parties, finally resulting in agreement on the following article:—

ARTICLE 8

Section 1. During the life of this agreement there shall be no stoppage of work, slow-down or strikes fostered, countenanced or endorsed by the Union, nor shall there be any lock-outs by the Company until the grievance procedure outlined herein has been complied with.

Individual grievances shall be adjusted and finally settled as follows:—

First. If any employee has a grievance, he shall notify his foreman and shop steward who will endeavour to adjust the matter. Failing a satisfactory settlement, the grievance shall be put in writing on a form supplied by the Company and signed by the aggrieved.

Second. This report shall be submitted by the Steward, accompanied by one other Steward of the same shift to the shop superintendent who will render a decision within three working days.

Third. If the answer is not considered satisfactory, the matter will be referred to the management and the appointed Union representatives for a decision.

Section 2. All differences concerning the interpretation or violation of this agreement shall be adjusted between said bargaining representatives and the Management of the Company, and failing such adjustment, as provided in the immediately following paragraph.

ARTICLE 9

It was agreed that:—

- (a) The employer's objection be withdrawn to Sec. 2.
- (b) The employees agreed to the deletion of Sec. 3.
- (c) That Section 4 be amended by inserting the words "one-half" before the word "expenses".

ARTICLE 10

Mr. Gentles stated that the Company was not opposed to the principle of a labour-management production committee and agreed with some of the arguments advanced as to its value but, while fully alive to the advantages, felt that there might be disadvantages and that this matter should be discussed when it was seen how the agreement worked out in practice. The employees agreed to the deletion of this article.

With respect to Article 1, Sections 2 and 3, dealing with Union Shop and Check-off, Mr. White, on behalf of the employees, submitted a brief and the employees replied to the arguments raised by the Company and both replied to questions raised by the Chairman and members of the Board and to certain specific arguments of the other.

The arguments by the Union in respect of Union Shop and Check-off clauses in the proposed agreement reduced to brief form were:—

1. The Union has the record of holding closed shop agreements which have resulted in benefit to all concerned.

2. Refusal to accord Union security implies opposition to Union growth and stability and opposition to the declared desire of the majority of the employees.

3. All employees benefit from the work of the Union and all employees should share responsibility for the Union.

4. Where all are Union members all can expect and will receive equal treatment without fear and without favour.

5. The Union shop benefits the employer through

- (a) Better morale and discipline of employees.
- (b) Additional and superior supply of labour.
- (c) Uniformity in competitive industries.

6. Union shop benefits the Union through
- (a) The principle of majority rule with equal responsibility in the interests of the whole.
 - (b) Increased harmony and security among the members.
 - (c) Union security enables the Union and its officers to devote its full time to the promotion of harmonious labour management relations and to matters of general benefit to the community and the members of the Union.

7. The Union has established a splendid record of achievement to the general welfare of the community during the war and particularly in the following:—

- (a) In the sale of Victory Loans through the shop stewards' results far exceeded any other method of handling.
- (b) Huge funds were raised by the Union for war purposes.
- (c) Labour-management production committees have functioned for maximum production and this Union was the spearhead of the 7-day continuous production plan.
- (d) The no-strike pledge has meant continuous production.

8. The Union has plans for the future which will be of great benefit to the general welfare and to properly carry these plans into effect Union security is essential.

The arguments advanced by the Company were in the main briefly as follows:—

1. Open shop agreements have been made with other local steel working shops but the Union has refused at all times to consider other than a closed shop agreement with this Company.

2. Every employee should have liberty of choice in his Union affiliations without compulsion from the Company.

3. The inclusion of a Union shop clause is in direct contravention of existing governmental labour policy as set forth in P.C. 1003.

4. The Company should not be required to dispense with the services of a valued employee because he neglects, refuses or is unable to pay his Union dues or wishes to withdraw from the Union or because of some real or fancied grievance the Union has decided to expel him.

5. The Company owes legal and moral responsibility to its employees now serving in the Armed Forces and these men have the right on their return to either join a Union of their choice or not to join any Union.

6. No closed shop agreements exist in Canadian shops that fabricate steel.

7. Certification of the bargaining agents was not by election but by petition and no evidence has been adduced that the average employee is interested in closed shop, union shop or check-off.

8. Closed shop conditions should come as in Britain by a development of open shop agreements and then the Unions should come under strict government control.

9. The Union or closed shop has not contributed to harmony in local industries.

10. Closed shop does not increase plant efficiency and every step tending to limit the plant efficiency will have an adverse effect in post-war competition.

11. The Union's argument that the will of the majority should rule implies under their proposal that the rights of the minority should be eliminated.

In reply Mr. Caron and Mr. White dealt with the Company's submissions generally and certain specific arguments might be mentioned. In dealing with the first point raised by the Company the bargaining representatives stated that the agreements in question were made in 1942 and were prior to P.C. 1003 and that they had no knowledge of the negotiations at that time but did have knowledge that the employees by a large majority desired a Union shop. In reply to argument numbered 5 they stated that the Union was fully alive to the needs of returned members of the Armed Forces and had made special provisions for and given special privileges to them but the returned man would not expect to find working conditions as they were when he left the shop. A Union shop was a working condition. In regard to argument numbered 7 they submitted that 75 per cent of the employees covered by the agreement were at the time of certification in favour of a Union shop.

With regard to check-off the Company submitted that the proposed clause would place it in an unsound and invidious position. If there are such advantages as the Union claims then the members should readily volunteer their dues. An employee has the right to dispose of his own money and imposing such a condition of employment on him was unfair to him and to the Company. Such security of funds would also have a tendency on the part of the Union to impair its activities and usefulness towards its members. Some Unions have affiliated with a national political party and the effect might well be to force an employee to support a political party against his political convictions.

To the arguments against check-off the Union replied in general terms and with respect to the latter argument stated that while in this Union a political action committee was set up there was no affiliation with any political party.

The Company further proposed that a clause filed as Exhibit 14 and reading as follows:—

The Union agrees that there shall be no solicitation of any employees for Union Membership or payment of dues in working hours on the Company's premises.

be included in the agreement. It was submitted that although Sec. 20 (2) of P.C. 1003 made the main part of the clause mandatory yet this Section did not cover dues and in any case the order might be cancelled or changed during the term of this agreement. The Union did not object to the effect of the clause

but felt that it was unnecessary and opposed its inclusion.

Each of the members of the Board regrets that it is not possible to file a report with the consensus of all. One of the members takes the position that the parties have agreed through conciliation proceedings on all matters save Article 1, Sec. 2 and 3 and that the Board should so report and recommend that the agreement be signed in respect of those matters agreed upon and that the parties should further bargain with respect to the matters in dispute and that it is not a function of a conciliation board and, in fact, may adversely affect the bargaining for the Board to recommend clauses to which both or one of the parties are strenuously opposed.

The Chairman and the other member of the Board admit that a conciliation board has not the functions of an arbitration board and has no power to enforce any recommendations it may make but, nevertheless, through its close contact with the parties established through many sittings and through the careful consideration of the submissions made by the parties and through its questioning of the parties and the answers thereto the Board is in a position to make a useful contribution to the bargaining between the parties. Furthermore, by virtue of P.C. 1003, Sec. 13 (2) "A Conciliation Board shall...endeavour to effect an agreement between the parties on the matters on which they have not agreed and, in any event *shall report* the result of its endeavours and its findings and *recommendations*". (The words underlined are underlined by the Board).

The Union has requested a full measure of security. It asked for a Union shop. This is a first agreement between the employees and the Company; there is a splendid spirit of co-operation manifested on both sides but the effectiveness and usefulness of the Union in this plant still remains to be demonstrated, bearing in mind that the Union does not represent the crafts referred to in the opening paragraphs of this report. The Union submits that it is essential that it should have some measure of security in order to fully show its effectiveness and usefulness and with this contention the majority of the Board agree.

The Board has carefully examined the arguments of the Company and carefully considered the position taken by the Company and the Union with respect to the Union shop, and a majority of the Board are of the opinion that the existing situation should be met by a maintenance-of-membership clause to the effect that "all employees of the Company who are or become members of the union, shall maintain membership in good standing as a

condition of continued employment". This provision could become effective fifteen (15) days from the date of the execution of the agreement. The majority of the Board recommend that the agreement should contain such a clause and suggest that it be Article 1, Section 2.

The Board has also carefully considered the arguments for and against check-off and the majority find no valid argument against a voluntary cancellable check-off restricted to monthly dues and recommend that the agreement should contain such a clause to be included as Article 1, Section 3.

A majority of the Board sees no valid reason why the Article referred to above which the Company requested should be included in the agreement should not be so included and recommends that same be Article 1, Section 4.

The Board is further of the opinion that the clauses which have been agreed upon will result in material benefit to both parties and if the parties do not accept the recommendations as to maintenance of membership, check-off and the additional clause suggested above then the Board recommends that the agreement which has been redrafted and is now Exhibit "A" hereto be executed by the parties.

Minority report of Mr. A. Reginald MacDougall is attached hereto.

All of which is respectfully submitted this 28th day of May A.D. 1945.

Minority Report

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and of a dispute between: Dominion Bridge Co., Ltd., Burnaby, B.C., (Employer) and Local No. 1 Boilermakers' and Iron Shipbuilders' Union of Canada (Employees).

To: The Hon. the MINISTER OF LABOUR,
Parliament Buildings,
Ottawa, Ontario.

Sir:

I regret that inasmuch as my two colleagues on the one hand, and myself on the other, are unable to agree as to recommendations having to do with the employees' request for a "union shop" and "check-off" and the employer's opposition thereto, it becomes necessary for me to submit a minority report.

With regard to the other matters in dispute between the parties, all of which have been settled, I endorse the report of the majority

of the Board and cannot usefully add anything to it.

Consistent with what is, in my view, the prime function of a Board of Conciliation established in pursuant of the provisions of Section 13 (1) of the Wartime Labour Relations Regulations, P.C. 1003, the Board endeavoured to effect an agreement on all matters in dispute and succeeded in doing so with the exception of the two questions of "union shop" and "check-off". Because the parties refuse either to agree or to agree to compromise on these questions, I fail to see how the inclusion of any recommendations of the Board can achieve any satisfactory result.

On the contrary, in my opinion, the full success of collective bargaining is dependent on an agreement freely arrived at by the parties themselves after a process of give and take and not as a result of a Conciliation Board superimposing its own opinions on the parties. I, for one, in the absence of agreement between the disputants, do not feel competent to rule as to whether or not a "union shop" or "check-off", or any other form of union security provision should be inserted in a collective agreement between the Dominion Bridge Company Limited and certain of its employees having regard to the interests of employers, workmen and the general public which last-mentioned, as is so often forgotten, also has an interest in labour disputes.

I do, however, feel very strongly that it is not for this Board to attempt to coerce (in the sense that recommendations of a board, while not binding, are of some weight) both or either of the parties. To endeavour to do so, after unsuccessful efforts at conciliation, would, as I see it, not enhance the prospects of future settlement of those matters on which the parties have not agreed, but may tend to hinder such prospects.

Report of Board in Dispute between Eight Glass Companies, Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America

On April 30 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between eight Glass Companies, Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America. A minority report was submitted by Mr. John Munro.

The personnel of the Board was as follows: Hon. Mr. Justice W. D. Roach, Chairman, appointed on the nomination of the other two

It seems to me that the parties should take the realistic view and frankly admit that there are certain matters on which they can agree, others on which they can compromise and others on which they cannot agree. On these last-mentioned, they should agree to disagree, at the same time continuing to bargain collectively with the hope that one will adopt the view contended for by the other or that agreement at some time can be reached by compromise. (In this view, I find myself in agreement with the observations contained in a very useful study of the closed shop, being Bulletin No. 9 issued by the Department of Industrial Relations, Queen's University.)

In the meantime, I can see no reason why good employer-employee relations should not persist. In this particular case, it undoubtedly exists now and the good-will exemplified by the attitude of both parties before the Board, resulting in a very real measure of compromise on all matters in dispute except the "union shop" and "check-off", augurs well, I think, for collective bargaining in the future. As already intimated, I do not think that any expression of opinion from this Board as to the merits or demerits of the principle of "union shop" and "check-off" or of union security clauses generally will assist in that bargaining.

I, therefore, recommend that the agreement, exhibit "A" to the majority report, without the inclusion of any provision either as to union security or "check-off" be executed forthwith by both parties thereto.

All of which is respectfully submitted.

(Sgd.) A. REG. MACDOUGALL

Vancouver, B.C.
May 25, 1945.

Attached to the report was a copy of the draft agreement recommended by the Board.

members; Messrs. Norman L. Mathews and John Munro, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between eight Glass Companies, Toronto, Ontario: Excelsior Plate Glass

Company, Pilkington Brothers (Canada) Limited; Canadian Plate and Window Glass Limited; Consolidated Plate Glass Company; Robert McCausland Company; Queen City Glass Company Limited; Advance Glass and Mirror Company Limited, and Hobbs Glass Company (Employer) and Glass Workers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America (Employees).

To The Honourable The MINISTER OF LABOUR,
Ottawa, Ontario.

The undersigned, Chairman and members of the Board of Conciliation established in this matter pursuant to the provisions of s. 13(1) of the Wartime Labour Relations Regulations, P.C. 1003, respectfully report as follows:

For some time prior to the establishment of this board, the eight glass companies, as a group, were negotiating with the union for the purpose of consummating a collective bargaining agreement between each of the companies and the union. The union has been certified as the collective bargaining representative of each of the companies, and while the negotiations were carried on between the union and the companies as a group, it was the intention that a separate collective bargaining agreement should be entered into between each of the companies and the union.

Your board has been informed by the parties that in the course of those negotiations the parties were apparently able to agree on all the provisions of the proposed collective bargaining agreement excepting only the clause respecting union security.

The union asked that the collective bargaining agreement should contain a clause providing for a union shop. The employers were unwilling to accede to that request, and that is the one feature of the proposed collective bargaining agreement that came before this board for discussion.

Prior to the board meeting with any of the parties, it requested each of them to file a brief with the board. This was done. The board then met with the parties at the city of Toronto on April 13, 14 and 26. At those meetings the companies as a group were represented by Mr. W. D. Matthews, and each of the companies was represented as follows: Excelsior Plate Glass Company by H. E. Gallagher; Pilkington Brothers by A. Alban, Manager of the Toronto Branch; Canadian Plate and Window Glass Limited by William H. Bartlett, General Manager; Consolidated Plate Glass Company by E. G. Hayes, Manager; Robert McCausland Com-

pany by J. G. Ramsden, Manager; Queen City Glass Company Limited by G. C. Bristow, Manager; and Hobbs Glass Company by F. G. Hannen, Manager. The union was represented by Fred Molineux, International Organizer, William Davey, who is an employee of Hobbs Glass Company and also President of the local union; William Briffett who is an employee of Robert McCausland Company and also Secretary of the local union.

The companies are glass jobbers, that is to say, they do not manufacture glass but process it for installations in buildings and store and household fittings.

The companies supplied the board with a statement showing the total number of employees on the pay-roll of each of the companies, the number of such employees who would be affected by a collective bargaining agreement, the approximate period of their employment to date, with their respective employers, and the classification of those employees. All this is set out in Schedule "A" hereto attached.

It would appear that normally among the employees of these companies, there has not been any substantial labour turnover, and that apart from perhaps isolated instances there has not been any appreciable friction between the employees of any of these companies and their respective employer.

For the union it was stated that since negotiations for a collective bargaining agreement were commenced, the union has not entered into any active campaign among the employees in solicitation of any of them to join the union.

The union is an affiliate of the American Federation of Labour and the Canadian membership is affiliated with the Trades and Labour Congress of Canada. The local union obtained its charter from the parent body under the date May 5, 1944.

The union supplied your board with a statement showing the approximate number of employees which it estimated were on the pay-roll of each of the companies and who would be affected by a collective bargaining agreement and the number of such employees as were presently members of the union, and the number who were non-members, and the number of non-members who had granted authorization to the union prior to the certification of the union to represent such employees for collective bargaining purposes. All that information is set out in Schedule "B" hereto attached. From that schedule it would appear that out of a total of 156 employees who would be affected by a collective bargaining agreement, 123 are presently members of the union, and Mr. Molineux and the

officers of the union who appeared before the board gave it as their opinion that once a collective bargaining agreement would be consummated the number of union members among the total of those employees would be substantially increased.

An analysis of that schedule shows that in the case of each of the companies, except Excelsior Plate Glass Company, a majority of the employees of each of those companies who would be affected by the collective bargaining agreement, are presently members of the union. In the case of Excelsior Plate Glass Company the union has only a minority of such employees. In view of the fact that the union has already been certified as a collective bargaining agent of the employees of each of the eight companies, the existence of a minority in the case of Excelsior Plate Glass Company has not been regarded by the board as an obstacle in submitting a report equally applicable to each of the eight companies with respect to the one matter in issue before the board.

There has not, heretofore, been a collective bargaining agreement between any of the companies and its employees.

It is not without some importance that during the negotiations between the union and the companies as a group, the union sought the approval by each of the companies to an increase in wages, and that subject was canvassed by the union and the representatives of the companies together and with the conciliation officer of your department. There is no dispute as to this, that during the negotiations respecting an increase in wages, the union intimated that if its demand for an increase in wages would be agreed to by the companies, the union would modify its demand for a union shop and accept in lieu of a union shop clause, a maintenance-of-membership clause, the exact terms of which were not defined.

On the occasions when your board met with the parties, there was completely frank and open discussion and this board desires to record its appreciation, firstly, of the attitude of the parties and secondly, of the considerable assistance which the parties, through their representatives, gave to the board. At the first meeting of the board with the parties, it became apparent that each of the companies was unalterably opposed to a union shop, for reasons which this board does not think it necessary to enumerate. They were the reasons generally advanced by those opposed to the policy of union shops. The union, on the other hand, was equally insistent that the collective bargaining agreement should provide for a union shop. At that

stage in the proceedings before the board, the board had not up to that time, been advised that in earlier negotiations the union had intimated that it would be willing to substitute for a union shop clause, a maintenance-of-membership clause in the event that the companies would approve of an application by the union to the Regional War Labour Board for an increase in wages. The reasons advanced to the board for a union shop in the opinion of the board, need not here be enumerated. They too, were the reasons generally advanced for such type of union security.

In view of the conflict between the parties on the subject of union shop, the board, with a view to conciliation, suggested by way of alternative that the collective bargaining agreement should contain a maintenance-of-membership clause, substantially in the form set out in Schedule "C" hereto attached.

The matter was discussed at the first and second meetings of the board, with the parties, and at the conclusion of that second meeting, the parties indicated their desire to give further consideration to the board's suggestion, the union to discuss it with the employees, the representatives of the companies to discuss it with their directors. Time for such consideration was given, and at the meeting of the board with the parties on April 26, the board asked for the reaction of the parties to the board's suggestion. Each of the eight companies, excepting Hobbs Glass Company, indicated its willingness that the collective bargaining agreement should contain the maintenance-of-membership clause which the board had suggested. Hobbs Glass Company registered its disapproval of that particular maintenance-of-membership clause and/or any maintenance-of-membership clause. The union rejected the board's suggestion and after considerable discussion it became obvious that the board was unable to find any common ground upon which the parties could agree on the subject of union security.

At this last meeting with the parties, the union modified its demand for a union shop in its most complete sense, and intimated that any of the present employees of the company who might fail to join the union might still retain their employment with the company and that all present employees who are members must, as a condition of their employment, retain that membership, and that all new employees must, after a probationary period, become members of the union as a condition of their continued employment.

In view of the circumstances disclosed in this case, viz., that there has not heretofore

been any appreciable friction between any of the companies and its employees, and that there has not heretofore been any collective bargaining agreement between any of the companies and the union, and that normally there is no substantial turn-over in the employees of any of the companies, and the justifiable anticipation that once a collective bargaining agreement is consummated, with few exceptions all the employees of all the companies will become members of the union, the board recommends that the union should withdraw its demand for a union shop clause, and that the union and the companies accept, in lieu thereof, a maintenance-of-membership clause substantially in the form set out in Schedule "C".

The controversy between each of the companies and its employees on the subject of wages was discussed by the parties with the board. It appeared that each of the companies would be willing to grant some increase in wage rates, but not as large an increase as the union requested. The board is of the opinion that the subject of wages is not within the scope of this board's jurisdiction and accordingly this board makes no recommendation.

All of which is respectfully submitted.

Dated this 28th day of April, 1945.

(Sgd.) W. D. ROACH,
Chairman.
(Sgd.) GEO. A. GALE,
Member.

Minority Report

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and of a dispute between the Eight Glass Companies and Glass Workers Local Union No. 1487 Brotherhood of Painters, Decorators and Paperhangers of America.

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

With the preliminary statement of facts as set out in the majority report in regard to the attitude of the various parties to the application for the maintenance-of-membership clause in the proposed agreement I agree.

The Board found that on the one hand the employers as a group were unalterably opposed to any form of maintenance-of-membership clause, and on the other hand the employees as represented by their officers were adamant in their demand that a maintenance clause should be included.

The employers based their principal objections on the possibility of what might hap-

pen, such as a personal disagreement with the union on some personal matter, the union policy or constitution might undergo a radical change and the member might find himself in complete disagreement with its new policy. The union might decide to align itself with some political party and make political contributions to the funds of a party to which his political views were diametrically opposed. Other objections were that the union might call a strike—even though an illegal one, and as a result of any of these possibilities the member might withdraw or be expelled and as a consequence lose his employment. The representatives of the employers stressed the fact that to agree to a maintenance-of-membership clause would infringe on the personal liberty and civil rights of their employees. However in a war torn world with the citizens civil rights changing from day to day I must conclude they were stressing the possibilities and not the actualities of what might take place.

The employees' demand on the other hand asked that all employees shall be members of the union in good standing, and that any new employees shall agree to become members within fourteen days after a trial period of twenty-one days should they remain in service. This was later modified to allow all old employees who elected to refrain from joining the union to still remain in service. This clause the employers refused even to consider and at this point the Chairman suggested the clause which is now part of the majority report of the Board. After some discussion both parties agreed to consider this clause and report their reactions at the next meeting of the Board.

At the subsequent meeting of the Board seven of the eight glass companies through their representatives agreed to accept the clause as suggested by the Chairman but the employees' representatives considered it unsatisfactory and filed with the Board copies of the constitution of the International Union which showed that the various possibilities of any infringement on a member's rights were provided against as far as possible to do so. Their objection to the clause was that it contained so many exit clauses that in its practical application it would amount to nothing more than the open shop which policy is in existence at present moment.

In my opinion there is no good reason why members of a union which is negotiating an agreement should not be forced to carry out the obligation they assumed as union members in asking for bargaining rights.

If collective bargaining implies the right of democratic self government it would seem only just from the view point of the employer to insist that such a right carry with it a corresponding obligation to continue to support and participate in the decisions of the union in order to emphasize individual responsibility in the election of a bargaining agency, and to insure full participation in the decisions of union by all the employees in the plant.

The union has by its assumption of the responsibility of bargaining for the rights of all employees, therefore it is my considered opinion that it would be to the employer's advantage as well as the employees that all should be compelled to become members of the union, thus sharing the responsibilities and having the opportunity of having a voice in any decision that may be reached in regard to conditions in the plant.

The union signified its willingness to accept any new members without increase in initiation fees or dues during the first year of the agreement, and to give returned members of the Armed Forces free membership and free choice of becoming members of the union or not as they desire; this also to apply to members of the Mercantile Marine, thereby showing their willingness to co-operate to the fullest extent during the readjustment period.

For the above reasons I cannot concur in recommending the maintenance clause as submitted by the majority members of the Board, and maintain that the amended clause dealing with maintenance of membership as submitted by Local 1487 is both fair and reasonable and should be embodied in the agreement.

All of which is respectfully submitted.

Dated this 28th day of April, 1945.

(Sgd.) JOHN MUNRO.

Schedule "C"—Maintenance of Membership

3. (a) Every present employee who is a member of the union shall be given a period of fifteen days from the date upon which the agreement is posted as hereinafter provided, within which to elect in writing to be filed with the company, and the union committee, either to remain a union member, or to withdraw from the union. If he elects to retain his membership in the union then the continuance of his membership during the life of the agreement, but not including any possible automatic renewal

thereof shall be a condition precedent to his retaining his employment with the company.

(b) Every employee, whether present or future, shall once he becomes a member of the union retain his membership in the union during the life of the agreement but not including any possible automatic renewal thereof, as a condition precedent to his continued employment with the company, provided however that at any time any group of two or more employees who are members of the union may resign from the union without thereby prejudicing their employment with the company, when such resignations would reduce the number of union employees to fifty per cent or less of the total number of employees eligible for union membership.

(c) The obligation of the company to discharge an employee for failure to retain his membership in the union, shall arise only if in the opinion of the company, such employee could be promptly replaced by an equally competent employee: The availability of such equally competent employee, at the option of the union to be decided by National Selective Service authorities.

(d) If at any time the number of company employees, members of the union, should become fifty per cent or less of the total number of employees eligible for such membership, either by way of resignation within the fifteen-day period referred to in (a) above, or failure to become members of the union, or resignations under (b) above, then the obligation of the company under this maintenance-of-membership provision shall forthwith terminate.

(e) These provisions shall be expressly subject to any regulations of the National Selective Service authorities that may from time to time be in force.

(f) In order to acquaint all employees with the terms and provisions of the maintenance-of-membership clauses in this contract, the union shall post on the company bulletin boards not later than the day next following the date upon which the contract is signed, a notice containing all the maintenance-of-membership clauses and showing the date upon which the contract was signed. This notice shall remain posted on the bulletin boards during the life of the agreement.

(g) A list of the members of the union shall be supplied by the union to the company forthwith after the execution of this agreement and such lists shall be revised so as to be brought up to date from time to time, but, in any event, and if requested by the company, at least quarterly.

Attached to the Board's report as Schedule "A" was a statement showing the total number of employees on the payroll of each of the companies, the number of such employees who had been affected by a collective bargaining agreement, the approximate period of their employment, their respective employers, and the classification of those employees.

Conciliation Work of the Industrial Relations Branch During April and May, 1945

Activities Under the Conciliation and Labour Act and Other Legislation

OFFICERS of the Industrial Relations Branch dealt with 32 industrial disputes during the months of April and May, involving 18,846 workpeople employed in 40 separate establishments. During April, 14 new disputes developed which required attention and in May, 10 new disputes originated. The other 8 situations which were handled were ones which arose earlier and which were pending at the beginning of the period under review. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, and Glace Bay. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North-western Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations Branch and staff are situated in Ottawa.

Following is a statistical analysis of the cases dealt with during the period under review:

Settlement pending	9

Brief summaries of a few of the cases of chief interest are given below:—

Motor Vehicle Factory Workers, Windsor, Ont.—The June, 1944, issue of the *LABOUR GAZETTE* contained an account of the settlement reached by the Wartime Labour Relations Board (National) in connection with a strike by some 14,000 employees of the Ford Motor Company of Canada, Ltd., members of Local 200 of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America. As a result of the intervention of the Board at that time, which was on the request of the Minister of Labour for Canada, an interim agreement was accepted by both the Company and the Union which provided that, if any difference of opinion arose as to the interpretation or application of the agreement, it should be submitted to arbitration under the direction of the Board. On March 7, 1945, the Company made an application to the Wartime Labour Relations Board (National) for interpretation as to the

termination* date of the interim agreement. Following a hearing of the parties on March 29th, the Board directed that the request of the Company should be submitted to an Arbitration Committee of three persons. The Committee, which was composed of Mr. Justice G. B. O'Connor, Mr. A. R. Mosher and Mr. E. R. Complin, heard the case on April 5th.

The decision of the Committee was that those clauses of the agreement dealing with the determination of interim representation and grievance procedure and union operating practices generally should terminate when the parties have negotiated a new collective agreement, or in the event of their being unable to agree, at the expiration of 14 days after a Board of Conciliation makes its report to the Minister of Labour, whichever shall happen first. The Committee decided further, with respect to the clauses of the agreement dealing with the "individual rights" of the employees, that they were "preserved" and should continue until they are terminated after April 28, 1945, on two months' notice by either party in accordance with the provisions of the War-time Labour Relations Regulations, P.C. 1003.

Wood Products Workers, Owen Sound, Ontario.—Reference was made in the March issue of the LABOUR GAZETTE (Page 344) of the appointment of Judge W. G. Owens as an Industrial Disputes Inquiry Commissioner to investigate a charge by a representative of the Canadian Congress of Labour that the Keenan Woodenware Manufacturing Co., Ltd., Owen Sound, Ont., had dismissed an employee because of union activity. The report of the Commissioner stated that the charge had not been sustained by the evidence and should be dismissed.

Aircraft Workers, Winnipeg, Man.—In an earlier issue of the LABOUR GAZETTE (March, 1945, Page 343) it was reported that the Minister of Labour had appointed His Honour Judge W. J. Lindal, of Winnipeg, as chairman of a three-man Arbitration Committee to deal with the alleged unjust dismissal of an employee by MacDonald Bros. Aircraft Ltd., Winnipeg, Man. The unanimous report of the Arbitration Committee was that the Company had just cause for dismissing the employee in question. No action was taken by the Department to implement certain supplementary recommendations of the Committee with regard to Unemployment Insurance, for the reason that only a Court of Referees would be competent to deal with the questions involved.

Clothing Products Workers, Toronto, Ont.—The report of the Industrial Disputes Inquiry Commissioner, Judge Ian M. Macdonell, of Toronto, who was appointed to investigate

charges that an employee had been dismissed by Ontario Boys' Wear, Ltd., of Toronto (LABOUR GAZETTE, March 1945, page 343) was that on the evidence the Company had fully established that it had dismissed the employee in question for adequate cause and that there had been no discrimination on account of union activity.

Metal Miners, Bousquet, P.Q.—In the latter part of March the Department received a request from the International Union of Mine, Mill and Smelter Workers of America for the appointment of an Industrial Disputes Inquiry Commissioner to investigate charges that certain employees of Mic-Mac Mines, Ltd., of Bousquet, P.Q., had been dismissed or discriminated against because of union membership or activity. Following a preliminary investigation by Mr. L. Pepin, Industrial Relations Officer, Montreal, P.Q., the Minister of Labour on April 28th appointed Judge Honore Achim, of Hull, P.Q., to conduct a formal investigation. When the inquiry was called during May, the cases were dismissed by default when the interested persons failed to appear before the Commissioner.

Rubber Factory Workers, New Toronto, Ont.—On April 9, 1945, about 53 female employees of the Goodyear Tire and Rubber Company of Canada, Ltd., New Toronto, Ont., commenced a sit-down strike when an order was issued denying workers in the tube room the use of a cafeteria canteen during the afternoon shift. The Company had previously followed the practice of extending canteen privileges to all its production workers during the morning shift. Three floors of the plant were served by stationary canteens or moveable wagons which remained closed throughout the second shift. The workers on the fourth floor used a canteen connected with the cafeteria which was opened during the afternoon for the benefit of the office staff. Over a period of time, production workers on the fourth floor came to use the canteen in the afternoon as well as the morning, and claimed this privilege as a right since they had to pass the cafeteria in order to reach their rest rooms. It was claimed that workers on the other three floors had also begun to use the cafeteria canteen during the afternoon shift. When the sit-down strike occurred over the Company's attempts to "regularize" the situation by limiting the use of the canteen to office workers during the afternoon, the local union executive of the United Rubber Workers of America advised the employees to resume work and permit the union to take the matter up with the Company through grievance procedure. Joint meetings were held between the management and the union but when, on April

16, these failed to secure the privileges desired by the employees, some 2,117 ceased work in protest. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was immediately assigned to the case. After numerous meetings with the parties, he was able to secure a resumption of work on April 25th, following a vote of the employees in mass meeting, and to have the dispute submitted to arbitration. Agreement was reached upon the appointment of Dr. Cecil A. Wright, of Osgoode Hall, Toronto, as arbitrator. Dr. Wright's decision, in brief, was that the Company should either close all canteens during the afternoon shift, or should extend such privileges to all employees, production and office workers alike.

Metal Products Workers, Toronto, Ont.—During March the Federal Minister of Labour received a request from the Minister of Labour of Ontario for the appointment of an Industrial Disputes Inquiry Commissioner under the provisions of Order in Council P.C. 4020 to investigate charges that the D. R. Clarke Engine Co., Ltd., of Toronto, had dismissed or discriminated against seven of its employees for the reason that they were members of or working on behalf of the United Steelworkers of America. A preliminary investigation had been conducted on behalf of the Ontario Department of Labour by Mr. H. Perkins, Industrial Relations Officer, Toronto. Judge J. E. Lovering, of Toronto, was appointed to investigate the case. His report, which was received during May, indicated that there was no foundation for the charges of the union and that they should be dismissed.

Coal Miners, Nova Scotia and New Brunswick—In the March and April issues of the LABOUR GAZETTE reference was made to the strike vote passed by the membership of District No. 26, United Mine Workers of America, and other developments in connection with the miners' demands for increases in wages. In the LABOUR GAZETTE for April it was announced that the personnel of the Royal Commission on Coal which is presently investiga-

ting the coal mining industry in Canada would give the Union an opportunity to make representations to it in respect of certain matters at issue. Later, members of the Royal Commission on Coal having made engagements in the United States Coal fields, this arrangement was changed by the appointment of an Industrial Disputes Inquiry Commission under the provisions of Order in Council P.C. 4020. The Honourable Mr. Justice W. F. Carroll, of Halifax, N.S., Chairman of the Royal Commission, was retained as Chairman and Mr. T. E. Vaughan, of Halifax, N.S., and Mr. Freeman Jenkins, of Glace Bay, N.S., were appointed as members to represent the operators and mine workers respectively.

The report of the Commission, which was made public on May 31, 1945, recommended the extension of vacations with pay from one to two weeks (with a new plan for computing holiday pay which included a provision that any employee taking part in and directly responsible for an illegal or unauthorized strike or stoppage of work would have deducted from his holiday pay in the following year one-twelfth of his possible maximum holiday payment for each day's participation). It further recommended that contract producers mining or handling coal on a production basis be granted a 10 per cent increase in their present rates and that the dotal workers and all contract workers not covered by the 10 per cent increase be granted an increase of 2½ per cent on their present rates for 8 hours' work.

The Commission recognized that none of the 17 companies involved had the ability to pay the cost of the concessions recommended, and that they would require either an increase in the price of coal to consumers or the payment of a money grant by the Federal Government. Nevertheless, it found that there was a real present necessity for the increases, having in mind the national interest, the absolute necessity for a continuous and sustained supply of coal and the circumstances under which it became necessary to appoint the Commission.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Rubber Products

KITCHENER, ONT.—DOMINION RUBBER COMPANY LTD. (MERCHANTS RUBBER FACTORY) AND THE UNITED RUBBER WORKERS OF AMERICA, LOCAL 67.

Agreement to be in effect from September 13, 1944, to September 12, 1945, and thereafter from year to year subject to 60 days' notice. The company recognizes the union as the sole collective bargaining agency for all hourly paid employees and agrees to deal with the accredited representatives of the union on all matters pertaining to hours of work, rates of pay and working conditions. Both the company and the union agree that there will be no discrimination, coercion or intimidation. The company agrees to deduct the union dues of any members who so authorize.

Hours of work: 9 per day Monday through Friday, 5 on Saturday, a 50-hour week. Exceptions to above include vulcanizer men, 10 hours per day Monday through Friday, 5 on Saturday, a 55-hour week; cement men, 10½ hours per day Monday through Friday, 7½ hours Saturday, a 60-hour week. If continuous production becomes necessary then shifts of 8 hours per day will be worked, six days per week. Overtime at time and one-half will be paid for all work in excess of normal hours and for work on Sundays and six specified statutory holidays and two other days if the latter are observed as holidays in Kitchener.

Vacation of one week with pay will be granted employees with one to ten years' seniority and two weeks to employees with 10 years' or more seniority.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Fur and Leather Products

ACTON, ONT.—BEARDMORE AND COMPANY LTD. AND THE NATIONAL UNION OF SHOE AND LEATHER WORKERS, LOCAL 26.

Agreement to be in effect from February 21, 1945, to June 15, 1946, and thereafter from year to year subject to 50 days' notice. The company recognizes the union as the sole collective bargaining agency for all employees. Check-off for union dues to the extent so authorized will be deducted from union members' pay by the company and turned over to the union.

Vacation of one week with pay to all workers employed steadily by the company for one year.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Textiles and Clothing

TORONTO, ONT.—JOSEPH SIMPSON SONS LTD. AND THE UNITED TEXTILE WORKERS OF CANADA, LOCAL 12.

Agreement to be in effect from November 14, 1944, to November 13, 1945, and thereafter from year to year subject to 30 days' notice. The company agrees to accept the union as sole collective bargaining agency for all employees. Any employee who is now in good standing in the union, or should become or be reinstated as a member, will maintain such membership during the life of the agreement. All new employees must join the union. The company recommends that all employees join the union. There shall be no discrimination either by the company or union members against employees because of union activity or non-membership in the union. Union activities are not to be pursued on company property during working hours.

Hours of work: for males a 48-hour week; for females a 44-hour week. Overtime at time and one-half for work in excess of the above hours. Sundays and eight specified holidays shall be considered as legal holidays during the term of the agreement, except that for the duration of the war holidays will be those recognized in Toronto. When Christmas and New Year's Day fall on a week day the mill shall cease its operations at 12 o'clock noon on the previous day. Rest periods of 10 minutes morning and afternoon will be granted. A vacation of one week with pay shall be granted to all eligible employees according to company and government regulations (Ontario Regional War Labour Board order of March 1, 1943). If a night shift should be started, employees working this shift shall be paid a rate of wages 10 per cent higher than the day shift rate.

Provision is made for seniority rights and the settling of grievances.

Manufacturing: Metal Products

GUELPH, ONT.—THE GUELPH STOVE COMPANY LTD. AND THE INTERNATIONAL MOULDERS AND FOUNDRY WORKERS' UNION, LOCAL 212.

Agreement to be in effect from February 1, 1945, to January 31, 1946, and thereafter from year to year subject to notice. The company recognizes the union as the sole bargaining agency for all eligible employees. There shall be no union activity on company premises except that necessary in connection with the handling of grievances.

Hours: for moulders, 8 per day, 40 per week; for coremakers, 9 per day, 45 per week; for polishers and labourers, 9 per day, 50 per week. Any day labourer required to work at night shall be paid a premium of 10 cents per hour over the day rate.

Wage rates: moulders 93½ cents per hour, coremakers 85 cents, cupola melters 63 to 75 cents, brass melters 63 to 70 cents, polishers 65 cents, labourers 60 cents. Apprentices: moulders 60 cents first year, 65 cents second year, and piece rates third and fourth years; coremakers 55 cents first year to 85 cents in fourth year. Boys under 18 years of age employed as labourers in corerom 45 cents per hour. Vacation: one week with pay to all employees with over twelve months' continuous service with the company, those with six months' continuous service and up to twelve months are entitled to a *pro rata* vacation. One apprentice for every eight journeymen and one for the shop. Apprenticeship will be four years.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Shipbuilding

SAINT JOHN, N.B.—ST. JOHN DRY DOCK AND SHIPBUILDING COMPANY LTD. AND THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL B 502.

Agreement to be in effect from March 1, 1945, to March 1, 1946, and thereafter from year to year subject to 30 days' notice.

Hours: 8 per day Monday through Friday, 4 on Saturday. If shifts are worked 8 hours shall constitute a shift, including 30 minutes allowed for lunch. Time and one-eighth shall be paid to men working on the second and third shifts. Overtime: time and one-half for any work performed outside regular working hours up to midnight, double time thereafter. When it becomes necessary to employ a regular night shift, other than on a 3 shift arrangement, they shall be paid at the rate of time and one-eighth for eight hours, and at time and one-half for the next six hours Monday through Friday, straight time on Saturdays for the first four hours, time and one-half for the next four hours, and double time thereafter. Double time shall also be paid for work on Sundays, legal holidays and after twelve noon on the eves of Christmas and New Year's.

Wage rates shall conform with the rates and conditions set out in the National War Labour Board's award of May 2, 1944, and any amendments or substitute awards which may be subsequently made. For work in engine-room tanks, bilges, crank cases and other dirty or oily places of work, when it is not possible to properly clean such places before the work starts, a "dirty

work" bonus of from 5 to 40 cents per hour, as conditions may warrant, shall be agreed upon with the plant superintendent before the work commences. Vacation: one week with pay to all employees with one year's service or more.

Provision is made for seniority rights, an apprenticeship plan and grievance procedure.

Transportation: Water

HALIFAX, N.S.—THE NATIONAL HARBOURS BOARD AND THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS.

Agreement to be in effect from March 1, 1945, to February 28, 1946, and thereafter subject to two months' notice.

Hours of work: 8 hours per day Monday through Friday, 4 on Saturday, a 44-hour week. Overtime at time and one-half for work in excess of the regular hours. Double time for work on Sundays and six specified statutory holidays.

Wage rates effective July 1, 1944: General operation and maintenance:—floating crane operator, electrician, pipefitter and welder, 95 cents per hour; blacksmith and carpenter, 91 cents; painters, 71 to 86 cents; riggers and timbermen, 76 cents; firemen, motor boat operator, rodmán, truck drivers and utility men, 66 cents; labourers, 60 cents; grain elevator:—millwright and electrician, 95 cents; weighmen, car dumper and marine leg operator, 76 cents; helpers, 71 and 72 cents; shovellers, 71 cents; feed tenders, towermen, signal men, window men, dock spout men, winchmen, hooks and cable men, preparing car and grain doors, tunnels and pit men, brakemen, annex men and oilers, 66 cents; cold storage terminal:—maintainer general, 85 cents; checker and issuer, temperature man, 71 cents; cold storage workers, 66 cents; labourers, 60 cents. A vacation with pay of one-half day for each 25 days' cumulative service during the preceding year to a maximum of 6 days shall be granted to employees, who at the beginning of the calendar year, have completed 300 days cumulative service during the preceding two years.

Provision is made for seniority rights and grievance procedure.

SAINT JOHN, N.B.—THE NATIONAL HARBOURS BOARD AND THE NATIONAL HARBOURS BOARD EMPLOYEES' FEDERAL UNION, LOCAL 24.

Agreement to be in effect from April 1, 1945, to March 31, 1946, and thereafter subject to two months' notice.

Hours of work, overtime and vacation are the same as in the agreement for Halifax as summarized above.

Wage rates effective July 1, 1944: maintenance and operation:—carpenters and electricians 81 cents per hour, steamfitter 80 cents, painters 76 cents, riggers 70 cents, stationary firemen, motor boat operators, sounding crew, and timbermen 65 cents, waterman and utility man 60 cents, sweepers and labourers 55 cents; floating crane:—operators 90 cents, signal men 70 cents, deckhands and firemen 65 cents; locomotive crane:—operator \$1.28, firemen 70 cents, and coal tenders 65 cents.

Provision is made for seniority rights and grievance procedure.

Trade

SASKATOON, SASK.—SASKATCHEWAN CO-OPERATIVE CREAMERY ASSOCIATION LTD. AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, WAREHOUSEMEN AND HELPERS OF AMERICA, LOCAL 139 (MILK SALESMEN AND BARNMEN).

Agreement to be in effect from September 1, 1944, to August 31, 1945, and thereafter from year to year subject to 30 days' notice. The employer recognizes the union as the exclusive collective bargaining agency for all employees. Only members of the union to be employed or those willing to become members within thirty days after being hired.

Hours of work: 6 days to constitute a week's work for all milk salesmen. Overtime at time and one-half, based on 26 working days per month, to be paid for work on a driver's off day, to be worked in cases of emergency only. Four statutory holidays and six days sick leave with pay shall be allowed milk salesmen during the year. Any sick leave not taken shall be paid for at the rate of 50 per cent of the regular rate at the end of the year. Vacation: one week with pay to all salesmen employed on or before the first of June in any year and two weeks with pay during succeeding years.

Wage scale: milk salesmen, first full year \$120.64 per month, second full year's service and thereafter \$125.64 per month, relief milk salesmen \$141.64 per month, salesmen employed temporarily for holiday relief purposes \$109.94 per month, barnmen \$132.64 per month, assistant

barnmen \$107.64 to \$112.96 per month, plus certain commissions for salesmen and \$6.66 per month to cover bottle loss, breakage, etc., as salesmen are held responsible for everything taken out at retail prices and bottles at 5 cents each.

Provision is made for seniority rights and grievance procedure.

SASKATOON, SASK.—SASKATCHEWAN CO-OPERATIVE CREAMERY ASSOCIATION LTD. AND THE INTERNATIONAL BROTHERHOOD OF TEAMSTERS, CHAUFFEURS, WAREHOUSEMEN AND HELPERS OF AMERICA, LOCAL 139 (PLANT EMPLOYEES).

This agreement is similar to the above agreement for the milk salesmen and barnmen with the following exceptions.

Hours of work: for employees in milk plant—9 hours per day April to September inclusive, 8 hours per day during other six months; cold storage and butter plant—9 hours per day; engineers—10 hours per day; six day week for all. Overtime at regular rates for first hour in excess of regular hours and time and one-half thereafter, based on a 26 day month.

Wage rates: head buttermaker, head ice cream maker, engineers, shipper, Waltham truck driver, mechanic, country cream pick-up drivers, warehousemen, and temporary employees as per range approved by the Regional War Labour Board. All other permanent employees \$119.64 per month during first full year, \$124.64 per month during second full year, and \$129.64 per month thereafter.

Collective Agreement Act, Quebec

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement, the amendment of eight others and the correction of two Orders in Council which were previously

published. Requests for the amendment of the agreements for retail fur industry at Montreal, men's and boys' hat and cap industry for the province, and for barbers at Sherbrooke were published April 21. A request for a new agreement for municipal employees at Kenogami was published April 21. Requests for the amendment of the agreements for the work glove and fine glove industries for the province, for building trades at Three Rivers and for the wholesale food trade industry at Quebec were gazetted April 28. Requests for the amendment of the printing trades agreement at Montreal and the agreement for barbers and hairdressers at Three Rivers were gazetted May 5. Requests for the amendment of the printing trades agreement at Quebec, and barbers and hairdressers at Hull were published in the *Quebec Official Gazette* May 12.

Orders in Council were also published approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Vegetable Foods

BAKERS AND SALESMEN, THREE RIVERS.

An Order in Council, dated May 4, and gazetted May 12, amends the previous Orders in Council for this industry (L.G., March, 1938,

p. 334; March, 1940, p. 281; November, 1942, p. 1348).

Weekly wage rates: journeymen bakers from \$22.70 to \$29.70, apprentices from \$11.70 during first year to \$17.70 during third year, salesmen \$17 and 20 per cent on retail sales and 8 per cent on wholesale sales.

Manufacturing: Fur and Leather Products

FUR INDUSTRY, QUEBEC.

An Order in Council, dated April 12, and gazetted April 21, amends the previous Orders in Council for this industry (L.G., Nov., 1940, p. 1201; Sept., 1938, p. 1042; Oct., 1939, p. 1065; Dec., 1941, p. 1572; May, 1942, p. 630; Sept., 1943, p. 1253; May, 1944, p. 637).

Hours: 8-hour day, 4 on Saturdays, a 44-hour week, clerks of the shop and the hide pressing department 48-hour week, patternmakers 44-hour week from February 1 to July 31, 48-hour week the rest of the year. Overtime for patternmakers payable only during 48-hour week period.

Vacation: one week with pay after one year's continuous service.

Three apprentices for the first two journeymen, and one more apprentice for each additional two journeymen.

Manufacturing: Pulp, Paper and Paper Products

CORRUGATED PAPER BOX INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated April 27, and gazetted May 5, amends the previous Orders in Council for this industry (L.G., April, 1942, p. 483 Sept., p. 1097; Jan., 1943, p. 88, April, p. 490, Nov., p. 1529; Feb., 1944, p. 198, Sept., p. 1141).

Minimum hourly wage rates for male employees after 6 months' employment: corrugated machine operator, third class stationary engineman 57 cents; assistant corrugated machine operator, printing machine operator 52 cents; slitting operator, box slotting machine operator; box and sheet slitting machine operator, die press machine operator, head roll handler, silicate or starch operator, shipper, mechanic (assistant machinist), cutter, band saw operator 47 cents; corrugated machine helper, assistant printing machine operator, flap cutting machine operator, bar scorer machine operator, taping machine operator, partition slotting machine operator, roll handler, baling operator, head tier, assistant shipper, truck driver 42 cents; corrugated machine tailer, folder and feeder on printing machine, box slotting machine, box and sheet slitting machine, partition slotting machine, tailer and feeder, taping machine tailer, baling helper, tier, janitor, truck washer 37 cents; corner cutter, knife, punch, slotter up and down machine operator, folder, general employee, silicate or starch machine helper, helper in shipping department, watchman 34 cents; machinist, millwright 67 cents; stationary enginemen from 51½ cents to 68 cents; firemen 40½ cents. (For the first six months of employment, the rates are in most cases from one to 10 cents lower than the above rates.) The minimum average wage for male employees is 42 cents per hour.

Minimum hourly wage rates for female employees: bar scorer machine operator, taping machine operator, tailer, stitching machine operator, partition slotting machine tailer and

feeder, cutter, folder, tailer and feeder of corner cutter, knife, punch, slotter up and down machine 29 cents; partition slotting machine operator, corner cutter, knife, punch, slotter up and down machine operator 36 cents, general employee 23 cents. The minimum average wage for female employees is 29 cents per hour. Vacation: one week with pay after one year's service.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated April 27, and gazetted May 5, amends the previous Orders in Council for this industry (L.G., May, 1944, p. 637, Feb., 1945, p. 182, Mar., p. 349 and previous issues). This amendment does not affect the summary already given.

Manufacturing: Metal Products

ALUMINUM COMPANY OF CANADA, ARVIDA.

A correction of the Order in Council which repealed the agreement (L.G., May, 1945, p. 720) was published in the *Quebec Official Gazette* May 5. This correction does not affect the summary given.

ORNAMENTAL IRON AND BRONZE INDUSTRY, MONTREAL.

An Order in Council, dated April 27, and gazetted May 5, extends the term of the agreement (L.G., Nov., 1941, p. 1424; June, 1942, p. 738, Nov., p. 1348; Jan., 1944, p. 70, Mar., p. 359, April, p. 496) to May 30, 1945.

Construction: Buildings and Structures

BUILDING TRADES, JOLIETTE.

An Order in Council, dated April 27, and gazetted May 5, amends the previous Orders in Council for this industry (L.G., May, 1940, p. 498; March, 1941, p. 334; June, 1942, p. 738, September, p. 1097; February, 1943, p. 220; July, 1944, p. 867).

Hours: 48 per week, 8-hour day, except from May to September a 9-hour day, 3 on Saturday. Hours for common labourers 9-hour day, 54-hour week, with a 10-hour day and 4 on Saturday during summer months. Double time for work on Sundays and eight specified holidays. For out-of-town work, travelling expenses and board shall be paid by employer.

Transportation: Water

LONGSHOREMEN (OCEAN) QUEBEC.

An Order in Council, dated April 27, and gazetted May 5, amends the previous Order in Council for this industry (L.G., October, 1942, p. 1211) by allowing for double time on certain specified holidays, except that on such holidays, the rate for working meal hours is the same as that for working meal hours on Sunday.

Trade

RETAIL STORES, ETC., MAGOG.

An Order in Council, dated May 4, and gazetted May 12, amends the previous Orders in Council for this industry (L.G., Nov., 1940, p. 1203; Mar., 1941, p. 335; Aug., 1942, p. 978; Aug., 1943, p. 1131; Feb., 1944, p. 199, June, p. 754).

The amendment does not affect the summary already given.

Service: Public Administration

FIREFIGHTERS, SHERBROOKE.

An Order in Council, dated April 27, and gazetted May 5, makes obligatory the terms of an agreement, between the City of Sherbrooke and L'Association indépendante des pompiers de Sherbrooke. Agreement to be in effect from May 5, 1945 to January 1, 1946 and thereafter from year to year until 60 days' notice.

Hours: firefighters day shift, 7 a.m. to 6 p.m., night shift, 6 p.m. to 7 a.m., captains shall be on duty 24 hours a day. One day of rest per week for all. Overtime for firefighters shall be paid at the rate of 60 cents per hour. Weekly wage rates: captains from \$36 in first year to \$40 in fifth year; lieutenants from \$34 in first year to \$36 in fifth year; sergeants from \$33 in first year to \$35 in fifth year; chief mechanic

\$33; fireman-electrician \$32; prevention inspector \$32.50; director's secretary \$30; firefighters from \$26 in first year to \$31 in fifth year.

Vacation: one week with pay every year. Uniforms are provided. Sick leave of 7 days per year cumulative from year to year is granted. In case of accident at work, the days of absence so required shall not affect this sick leave.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, MONTREAL.

A correction of the Order in Council (L.G., May, 1945, p. 721) was published in the *Quebec Official Gazette* April 21. This correction changes wage rates to \$19 plus 50 per cent of receipts in excess of \$27 per week in place of \$27.50 per week.

British Wages Councils Act, 1945

THE Wages Councils Bill introduced in the British House of Commons by the Honourable Ernest Bevin received Royal Assent on March 28. A summary of the bill was given in the *LABOUR GAZETTE* for February (p. 129).

A few amendments were made in the Bill by Parliament. The most important change relates to Part III which continues in effect, with slight modifications, during the period of transition from war to peace, the wartime provisions of Part III of the Conditions of Employment and National Arbitration Order, 1940. The original Bill stipulated that these provisions should remain in effect for a period of five years after the Defence Regulations, under which authority they had been made, had ceased to have effect. The Bill as amended stipulates that these provisions are to remain in force for the transitional period but not beyond December 31, 1950, unless Parliament otherwise determines.

The effect of Part III of the Wages Councils Act is to provide, in Mr. Bevin's words, "a complete national fair wages clause in order to maintain stability." Made binding, on all employers and workers in an industry, are terms and conditions of employment not less

favourable than those established in the trade or industry in the district by virtue of agreements between employers' organizations and trade unions representative of substantial proportions of employers and workers engaged in the trade or industry in that district. Until the end of 1950, employers in an industry in which there is no form of statutory wage regulation must observe the terms of any collective agreement voluntarily entered into before the end of 1950 by a substantial proportion of the industry.

Wages Councils are to replace the Trade Boards established for purposes of minimum wage regulation under the Trade Boards Act, 1909 and 1918. In an industry where adequate machinery does not exist for the regulation of wages or where remuneration of the workers is unsatisfactory, a Wages Council may be set up, after inquiry, on application of the parties or on the initiative of the Minister. A Council may recommend the minimum "remuneration" to be paid including a guaranteed weekly wage and holidays with pay beyond one week. The Trade Boards could fix only minimum hourly rates and piece rates and could require an annual holiday of only six working days.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the upgrading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Navy, Army and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Veterans Affairs;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Programme free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to April 30, 1945, the gross enrolment under Canadian Vocational Training has been as follows:

Training for Industry.....	262,784
Army Tradesmen	48,305
Navy Tradesmen	9,019
R.C.A.F. Tradesmen	65,208
Rehabilitation (Discharged persons from the Forces).....	10,136
Students	7,649
Total	403,101

While trades training for the Armed Forces is at a minimum currently and in fact has stopped for the Airforce, the rehabilitation training of persons discharged from the forces continues to grow, which shows the desire of returned personnel to become better qualified

to take their place in the business world of the post-war period. Training facilities will be provided as required to meet this growing need.

Likewise, in industry, management and supervisory staffs are concerned with their efficiency in the post-war period, with the result that our supervisory training program continues to grow in favour. It is not so much the giving of short intensified courses provided by the department, but the introduction of organized training programs to meet specific needs, and the continuing use of the principles taught in the intensified course that produces the result.

Agreements on Vocational Training Extended

Under Order in Council P.C. 7193, dated August 14, 1942, the Minister of Labour was authorized to enter into agreements with the several provinces to provide financial assistance for vocational training projects covering a three-year period ending March 31, 1945. The provinces having expressed a desire for a renewal of the agreements for a further period, the Federal Government by Order in Council P.C. 3165, dated May 1, 1945, authorized an extension for the fiscal year ending March 31, 1946. The Department of Labour has appropriated the sum of \$500,000 for Youth Training to be allotted among the provinces as follows: Prince Edward Island, \$12,000; Nova Scotia \$25,000; New Brunswick, \$35,000; Quebec, \$135,000; Ontario, \$75,000; Manitoba, \$15,000; Saskatchewan, \$35,000; Alberta, \$65,000; British Columbia, \$60,000; Unallotted, \$43,000.

Equipment for Vocational Training

A minute of Privy Council, P.C. 3211, dated May 3, 1945, authorized the Minister of Labour "to purchase from the War Assets Corporation, or any other person, such machinery, machine tools and equipment as may be required for the vocational training of discharged members of the armed forces... at such prices and on such terms as may be agreed to by the parties." Permission was also granted to acquire, by purchase or otherwise, from the War Assets Corporation, or any Department of the Government of Canada, buildings necessary for vocational training at such prices and on such terms as may be mutually agreed upon. Further, the Minister of Labour was empowered to make

arrangements with one or more of the Ministers of National Defence, or of any other Department, for the "training of discharged members of the armed forces in the shops or training

centres operated by such department," and for the reimbursement to such departments for such training at rates and conditions to be agreed upon mutually.

(1) Includes graduates from previous months classes who were not reported placed until after April 1, 1945.

Activities of Unemployment Insurance Commission

Statistical Analysis of Claims and Benefit—Coverage of Employees in Lumbering and Logging—Unemployment Insurance Fund—Selected Decisions of Canadian Umpire

DURING April, 8,430 claims for Unemployment Insurance benefit were registered in Canada compared with 13,307 in March and 6,463 in April, 1944.*

Persons signing the live unemployment register during the last six working days of April numbered 19,197 (12,886 males and 6,311 females) as against 27,110 (19,727 males and 7,383 females) who signed during the last week in March and 12,053 persons (9,517 males and 2,536 females) who signed during the last six working days in April, 1944. All persons reporting unemployed days for any purpose under the Act are required to sign the live unemployment register at least once a week.

A total of 10,587 claims was adjudicated at Insurance offices during April, of which 8,408 were considered entitled to benefit and 2,179 not entitled to benefit. Chief reasons for non-entitlement to benefit included "voluntarily left employment without just cause" (863 cases), "insufficient contributions while in insurable employment" (767 cases) and "discharged for misconduct" (316 cases).

In all, 22,995 persons received one or more benefit payments during April, having been paid a total of \$591,265 for 304,102 compensated unemployed days.

During March (i.e. February 20 to March 31) 32,153 persons were paid \$1,523,429 for 783,399 compensated unemployed days while in April last year 13,264 persons received \$357,206 for 180,730 compensated days of unemployment.

The average duration of the unemployment compensated was, then, 13.2 days in April, 24.4 days in March and 13.6 days in April, 1944. The average amount paid per beneficiary was \$25.71 in April, \$47.38 in March and \$26.93 in April, 1944. The average amount paid per compensated day of unemployment was \$1.94 in April, \$1.94 in March and \$1.98 in April, 1944.

Standing of Fund

Total employer-employee contributions during April amounted to \$4,897,674.70 as compared with \$4,881,724.45 in the same month last year.

*Material in this section is supplied by the Unemployment Insurance Commission and the Dominion Bureau of Statistics.

Benefit payments in April this year amounted to \$706,141.15 as compared with \$357,152.72 in the corresponding month last year. This figure is almost double that of last year.

After deducting benefit payments the net increase to the Fund during April was \$5,446,318.49.

Overpayment and Underpayment of Contributions

Regulations with respect to the overpayment or underpayment of unemployment insurance contributions included in Order in Council 6952, September 3, 1943, were modified by Order in Council 2103, April 13, 1945. The new Order provides that any such overpayment or underpayment, not exceeding \$5.00, made by an employer may be adjusted by "any Unemployment Insurance auditor and any person authorized in that behalf by special or general directions of the Commission." In the case of such overpayments refunds may be made in cash, and any such underpayments may be accepted on behalf of the Receiver General of Canada.

Every Unemployment Insurance Auditor and every person authorized by the Commission is required to render to an authorized Treasury Officer an accounting of such receipts or disbursements, as the case may be, "at such times and in such manner as the Treasury Officer may direct."

Under Order in Council P.C. 6952, these duties were restricted to "an Inspector of Insurance Revenue."

Table 1 Omitted

Registration of employers and insured employees which is tabulated each month in the LABOUR GAZETTE as "Table 1" under the section on the Activities of the Unemployment Insurance Commission, has been omitted in this issue. This tabular information is subjected to an annual adjustment in April, following the renewal of insurance books at the close of the fiscal year. The adjustment is based upon reports covering insurance book renewals. The reports from local offices are far from complete as this issue goes to press. It is expected that the revisions will be concluded in time for inclusion in the July issue of the LABOUR GAZETTE.

TABLE 2—NUMBER OF PERSONS FILING CLAIMS FOR UNEMPLOYMENT INSURANCE BENEFIT IN LOCAL OFFICES FEBRUARY, 1942 TO APRIL, 1945

Extension of Unemployment Insurance Coverage to Employment in Lumbering and Logging

Employment in lumbering and logging has been made insurable employment under the Unemployment Insurance Act as a result of a recent Order in Council (P.C. 3590). Contributions under the Act will become payable in various areas on dates to be announced by the Unemployment Insurance Commission.

The Order was recommended by both the Unemployment Insurance Advisory Committee (which represents the Government, trade unions and employers' organizations) and the Unemployment Insurance Commission itself, following representations for inclusion, and an extended inquiry across Canada into the conditions of the industry, in relation to unemployment insurance, and the effects if the industry were brought under.

Order P.C. 3589 gives the Unemployment Insurance Commission authority, with the approval of the Governor in Council, to designate areas within which contributions from employees of the logging and lumbering industries may be made payable, and also gives the Commission authority to accommodate the provisions of the Act to the seasonal and other varying conditions met within the industry from district to district. The Commission will fix the dates at which unemployment insurance contributions will first be payable in the different areas decided upon.

Order in Council P.C. 3589, dated May 17, 1945, amended the Act by adding sub-sections 3 and 4 to section 86 to facilitate the application of the Act to the special conditions in the logging and lumbering industry. The new sub-sections are quoted later in this article.

Lumbering and Logging Originally Excepted

Coverage under the Unemployment Insurance Act, 1940, included all types of employment except those which were listed specifically in Part II of the First Schedule.

Section 86 of the Act as amended (7 George VI, Chap. 31, 1943) made provision for including excepted employment following investigation by the Unemployment Insurance Advisory Committee, as follows:

"(1) Whenever the Governor in Council, after consultation with the Commission, considers it expedient to do so, he may direct the Committee (Advisory Committee) to investigate and report upon:

- (a) the provision of unemployment insurance for the employments excepted from the operation of Part II of this Act, (which deals with insured persons), or for any of them, either by extending thereto the

provisions of that Part, with such modifications, if any, as may be found necessary, or by special or by supplementary schemes;

- (b) the adjustment of the rates of contribution and benefit of insured persons having regard to the wages or salaries of such persons.

"(2) On the recommendation of the Committee and the commission, the Governor in Council may extend the provisions of Part II of this Act to any of the employments specified as excepted employments in Part II of the First schedule to this Act with such modifications, if any, as may be found necessary, or by special or by supplementary schemes."

Text of Amendment

Section 86 of the Amended Act has now been further amended by Order in Council P.C. 3589, dated May 17, 1945, by the addition of the following subsections 3 and 4:

"(3) Where the provisions of Part II of this Act are extended to employment in lumbering and logging by the Governor in Council under this section,

- (a) no contribution shall be payable or paid in respect of employment in lumbering and logging in any area until a day to be prescribed by the Commission for that area for the purposes of this paragraph;
- (b) no contribution shall be payable or paid in respect of employment in lumbering and logging in any area after a day prescribed by the Commission for that area for the purposes of this paragraph; and for the purposes of this paragraph, 'area' includes the part of an area for which a day has been prescribed under paragraph (a) of this subsection;
- (c) notice of a day prescribed under this subsection shall be published in the *Canada Gazette*; and
- (d) the Commission may, notwithstanding section 42 of this Act make regulations that, either generally or with reference to any area: (i) vary the provisions of Part II of this Act in relation to employment in lumbering and logging, (ii) vary the provisions of, or revoke, a special or supplementary scheme for employment in lumbering and logging created by the Governor in Council under this section, or (iii) create a scheme to supplement, or to be substituted for, Part II of this Act in relation to employment in lumbering and logging.

(4) The Commission may, in respect of any area, from time to time as it is deemed advisable prescribe days for the purposes of paragraph (a) or (b) of subsection 3 of this section".

In addition to the amendment to Section 86 of the Act Order in Council P.C. 3590, dated May 17, 1945, has been passed under authority of subsection (2) of section 86, extending the provisions of Part II of the Act of employment in lumbering and logging.

The effect is that employment in lumbering and logging is now insured employment. How-

ever, by reason of the provisions of paragraph (a) of subsection (3) of section 86, contributions do not become payable in any area until a day to be prescribed by the Commission for that particular area. Further, the Commission may make such seasonal or other regulations as may be considered necessary for the particular conditions in the industry and such regulations may vary from area to area.

To sum up: (1) Persons employed in lumbering who are contributing under the provisions of the Act now, remain insured; (2) Contributions are not yet payable for all persons employed in the lumbering and logging industry; (3) Information as to the area and date prescribed for the commencement of contributions will be announced later, probably commencing in a portion or all of British Columbia.

Digest of Selected Decisions of Canadian Umpire Under Unemployment Insurance Act

THE Unemployment Insurance Commission submits the following digest of selected decisions of appeals heard by the Canadian Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April issue of the *LABOUR GAZETTE*, page 534, and continued in the May issue, page 733. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike, brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

As announced in the April and May issues, the selected decisions are being published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

Case No. CU-B31 (March 2, 1945)

A claimant was notified of allegedly suitable employment by a bulletin board notice, giving no indication of the nature of the work, the types of skills required or the number of men required for each particular type of work. HELD: That the claimant was not properly notified of a suitable employment and that the notification was so vague and unreasonable in respect of numbers that claimant did have good cause for failure to apply.

The material facts of the case are as follows:

The claimant, a married man aged 39 years, was employed as a miner by a coal company. In May of 1944 the company decided that it would be necessary to close down Nos. 1 and 4 mines to effect required repairs. On or about May 10, 1944, notice in the form quoted herein was posted in a number of places about the mining property:

"Notice to the employees: No. 1 Mine and No. 4 Mine will be shut down from 11:00 p.m. Friday, May 19, 1944, to Sunday, May 28, 1944. No. 2 Mine will operate as usual during this period, from May 19 to May 28. This action is taken because it is necessary to overhaul the Turbo Compressor, which has been operating for four years without any opportunity for overhaul. The Standby Compressors cannot provide adequate pressure except for No. 2 Mine where no cutting is done".

On or about May 15th the Company posted another notice reading as follows:—

"Men from No. 1 and No. 4 Mine who wish to work during the idle period, apply to the Manager of No. 2 Mine".

The claimant filed an application for benefit on May 23 but May 20 can be regarded as the effective date of the application for the purpose of disposing of the application and the appeal. The Insurance Officer disqualified the claimant under Section 43 (b) (i) which provides that "an insured person shall be disqualified for receiving benefit—

"if on a claim for benefit it is proved by an officer of the Commission that the claimant—

"after a situation in any employment which is suitable in his case has been notified to him by an employment office or other recognized agency, or by or on behalf of an employer as vacant or about to become vacant, has without good cause refused or failed to apply for such situation, or refused to accept such situation when offered to him."

The claimant appealed to the Court of Referees which, after an oral hearing rendered a decision which was not unanimous, disallowing the appeal on the same grounds as those given by the Insurance Officer and, alternatively, on the basis that the claimant had failed to satisfy the Third Statutory Condition; that is, that he did not show that he was unable to obtain suitable employment.

The claimant, assisted by his Union, appealed from the decision of the Court of Referees to the Umpire.

DECISION

The Umpire's decision was that the claim should be allowed and gave as his reasons that:

The claimant and presumably many of the nine hundred other miners laid off as a result of the temporary closure of No's 1 and 4 mines did in fact see the notice quoted and the question to be decided turns on the application of Section 43 (b) (i) of the Act to the circumstances existing in this case. Varying degrees of emphasis have been placed throughout the proceedings in this case on a variety of reasons why the claimant did not apply for employment pursuant to the notice posted by the Company but in the notice of appeal and in the oral representations the principal ground of appeal rests on the alleged failure on the part of the Company to conduct the proposed transfers from one mine to another in accordance with the terms of a collective agreement and established custom and practice.

Referring first to the so-called custom and practice, the spokesman for the claimant cited a number of instances where transfers from one mine to another had been arranged after negotiations. It has not been established that any such custom as had been suggested exists. On the contrary, the fact seems to be that, on occasion negotiations have been entered into to avert a threatened strike. Negotiations entered into after the application of such pressure can hardly support the argument that it had become an established custom and practice and on the record it cannot be established that any such custom existed.

Then turning to the argument based on the suggestion that the Company had failed to act in accordance with the provisions of a collective agreement between the Company and the Union, several clauses in the agreement were brought to my attention, including Clauses 6, 17 and 26. Clause 17 really has no bearing on the facts in this case but the provisions of Clauses 6 and 26 are of interest. They read as follows:—

"No. 6. Hiring, Discharging, and Time to be Paid For:

"(a) Management:

"The Management of the mine and the direction of the working force is vested exclusively in the operator and the U.M.W. of A. shall not abridge this right in accordance with the terms of this Agreement.

"No. 26. Section of Mines Shut Down Indefinitely:

"It is agreed wherein any section of a mine is shut down for an indefinite period, that the opportunity of a division of the work will be given to each and every man thrown out of employment. However, it is understood the question must be taken up with the management and an understanding reached as to the method that may be put into effect."

Clause 6 seems to be quite clear but it was argued that this clause must be read subject to Clause 26. Even if that were so (which is very doubtful), has Clause 26 any application in the circumstances here? That Clause relates to a very definite set of circumstances, namely, the shutdown of a section of a mine for an indefinite period. That is simply not the case here. This was not a shutdown for an indefinite period of a section of a mine. On the contrary, it was a shutdown of an entire mine and for a definite period although the shutdown did in fact exceed by a few days the period originally estimated. The arguments on behalf of the claimant with reference to the collective agreement therefore fail.

Among the representations made to me on behalf of the claimant (and the arguments had not been raised at any earlier point in the proceedings), was an argument based on Section 32 of the Unemployment Insurance Act. It was argued that under Section 32 the claimant was entitled to refuse the employment in question because by acceptance he would lose the right, within the words of Section 32 "to continue to be a member and to observe the lawful rules of...any association, organization or union of workers". It has not been proved that the claimant would have jeopardized his status as a member of the union by acceptance of employment and it was not shown that any such rule existed. As a matter of fact the evidence was quite clear that other members of the union who had entered the employment in question, did not jeopardize their union status in any way and, accordingly, Section 32 of the Act has no direct bearing on the question.

As a partial summary I do not find in favour of the claimant on the arguments based on custom, on the collective agreement, and on Section 32 of the Act but that does not dispose of the question whether the claimant was properly disqualified under Section 43 (b) (i) of the Act. It is necessary to look a little closer at the facts to determine whether the claimant without good cause failed to apply for a situation in employment suitable in his case and notified to him. Was the claimant in fact notified of a suitable vacancy and, if so, was his failure to apply without good cause?

There were approximately nine hundred men involved in the lay-off and the evidence seems to be perfectly clear that there was alternative employment available for only some two hundred men and the notification of these two hundred vacancies was simply to the effect that,

"Men from No's. 1 and 4 mines who wish to work during the idle period apply to the Manager of No. 2 Mine."

Can that notice be regarded as a notification of suitable vacancies? And even if it were, is it reasonable to notify some nine hundred men in such general terms of the possibility that perhaps one out of four or five of them would obtain some form of employment if he applied to the Manager of No. 2 mine? The notice gave no indication of the nature of the work, the types of skills required or the number of men required for each particular type of work. As a matter of fact it is clear that if two hundred men had reported it was the intention to use a considerable number of them on the clean-up work or some form of work other than mining. Then, too, it is shown that the nature of the mining operations in No. 2 Mine is somewhat different to that in No's. 1 and 4.

Under the circumstances I find that there was no notification to the claimant of a situation of employment suitable to him within the meaning of subparagraph (i) of paragraph (b) of Section 43 of the Act, or, alternatively, that the notification was so vague and unreasonable in respect of numbers that the claimant did have good cause for failure to apply.

The handling of this temporary lay-off by the Local Office left a good deal to be desired and much of the difficulty arising out of the lay-off could have been averted by prompt, vigorous action on the part of the Local Office.

The appeal of the claimant, therefore, is allowed and the disqualification imposed by the Insurance Officer is, accordingly, removed.

Case No. CU-C4 (December 15, 1942)

An employee received a salary of \$100.00 monthly, plus monthly commissions and his earnings for the past two years were under \$2,000.00 per year. HELD: That under the circumstances his earnings for the year, at his rate of remuneration, could not be estimated with any reasonable degree of certainty and he should consequently be included among the classes of persons employed in insurable employment.

DECISION

The applicant is a representative in the picture of _____ for X Schools Limited of the City of _____, Province of _____.

During the year 1941, X Schools Limited registered the applicant as an employee in accordance with the provisions of the Unemployment Insurance Act and Regulations. The applicant contended that he was not liable to pay contributions under the Act. Extended correspondence ensued culminating in an ap-

plication by the applicant dated July 23, 1942, for a formal decision of the Commission pursuant to the provisions of Section 46 of the Act.

At a meeting of the Commission held on October 2, 1942, it was decided that the question of the insurability of the applicant should be referred to the Umpire in accordance with Section 49 of the Act. Upon receiving the notification of reference to the Umpire, the applicant requested that his case be given an oral hearing.

This request was granted and the hearing took place in Ottawa on Wednesday, December 9, 1942, the applicant appearing personally.

While the notice of reference is made on the question whether the applicant was an insured person during the period from July 1, 1941, to July 23, 1942, it is not now contended that the applicant was an "insured person" from March 31, 1942 to July 23, 1942, and the applicant has been offered a refund of contributions made by him during this period.

The essential facts of the case are as follows: Mr. A. was engaged by X Schools Limited in 1920, as a salesman or representative for that organization in the city of _____. His territory was later extended to cover the province of _____. Mr. A's duties as shown on his application for a decision of the Commission "include the keeping of accounts with all students enrolled through this office, handling of correspondence with students, collection of students' accounts, organizing of supplementary lecture courses, preparation and supervision of newspaper advertising, in the Province". Mr. A. receives a salary of \$100 per month plus commissions (paid monthly) on tuition fees paid by students enrolled in the province. The applicant maintained that he was not an insured person under the Unemployment Insurance Act, 1940, as his earnings for the year 1941 would probably exceed \$2,000.

Section 13 of the Act provides: "Subject to the provisions of this Act, all persons who are employed in any of the employments specified in Part 1 of the First Schedule to this Act, not being employment specified as excepted employments in Part 11 of that Schedule shall be insured against unemployment in manner provided by this Act". The question in its simplest form is: "Is the employment of Mr. A. specified in Part 1 of the First Schedule and not specified in Part 11?" It is clear that the employment of the applicant is defined by Part 1 of the First Schedule to the Act. The applicant has not claimed that he is not employed under a contract of service but in effect claims that though he is employed under a contract of service he is employed in an excepted employment according to Item (n)

of Part II of the First Schedule which provides that an employee is employed in excepted employment where there is "employment at a rate of remuneration exceeding in value \$2,000* a year, or where employment involves part-time service only at a rate of remuneration which, in the opinion of the Commission, is equivalent to a rate of remuneration exceeding \$2,000 a year for full time service".

Section 2 (2)** of the Regulations dealing with Contributions made in pursuance of Section 14 of the Act, provides that "every employee employed in an employment described in Part I of the First Schedule to The Act, and by item (n) of Part II of that schedule but not by any other item in the said Part II shall be included among the classes of persons employed in insurable employment if under the circumstances of his employment—

- (a) at his rate of remuneration his actual earnings for a year may reasonably be expected to be \$2,000 or less, or
- (b) his actual earnings for a year at his rate of remuneration cannot be estimated with any reasonable degree of certainty, and if—
 - (i) having been employed in the same employment at the same rate of remuneration his actual earnings for the immediately preceding year did not exceed \$2,000, or
 - (ii) if he was not so employed, the earnings in the immediately preceding year of persons employed at the same rate of remuneration in the same employment by his employer or at the same rate of remuneration in similar employment by other employers did not ordinarily exceed \$2,000."

In the present case, the employer, X Schools Limited, estimated the earnings of the ap-

* Item (n) has been amended in 1943; among other amendments the sum of \$2,000.00 has been raised to \$2,400.00.

** Sec. 2 (2) of the Regulations dealing with contributions has been replaced in substance by Sec. 3 (2) of the Unemployment Insurance Contribution Regulations.

plicant for the year 1941, as under \$2,000. Under date of September 16, 1941, a letter from the employer to the Commission reads, in part, as follows: "We _____ would point out that in 1939 his (Mr. A's) earnings were \$1,953.23 and in 1940 \$1,621.44 and to the end of August 1941, \$1,085.65. We do not see how he can expect to reach the \$2,000 mark for 1941. We therefore, believe he should come under the Unemployment Insurance". This statement was repeated in the employer's letter to the Commission under date of September 4, 1942. A further letter to the Commission dated January 14, 1942, from the employer states: "We further find that for the period January to December 1941, he earned \$2,025.73, which we did not expect he would do, as in previous years his earnings were below the \$2,000 figure, 1939 being \$1,953.23 and 1940 being \$1,621.44". (These figures are also noted in various letters from the applicant to the Commission). When it is recalled that the applicant was in receipt of a salary of \$100 per month plus commission, it is understandable why the employer would not undertake to pre-determine the rate of the employee's earnings as in excess of \$2,000.

Under the circumstances it appears that the applicant's earnings for the year 1941 at his rate of remuneration could not be estimated with any reasonable degree of certainty and that as the applicant was employed in the same employment at the same rate of remuneration and his actual earnings for the preceding year (1940) did not exceed \$2,000, he should be included among the classes of persons employed in insurable employment.

It is therefore ruled that the employment of the applicant, Mr. A. by the X Schools Limited is employment specified under Part I of the First Schedule to the Act not being employment specified as excepted employment in Part II of the Schedule, and that consequently Mr. A. was an insured person from the first day of July 1941 to the 31st day of March 1942.

(Sgd.) LUCIEN CANNON,
Umpire

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment and unemployment across Canada.

The employment situation at the beginning of April, 1945, as reported by employers.—Industrial employment throughout Canada showed curtailment at the beginning of April, in conformity with the trend in 20 of the previous 24 years of the record, according to the Dominion Bureau of Statistics.

The index number declined from 178.2 at March 1, to 176.9 at the beginning of April, as compared with 180.5 at April 1, 1944.

The Bureau's reports come from firms employing fifteen or more employees representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. Reports at April 1 came from 15,189 establishments whose employees numbered 1,803,015 at April 1, as compared with 1,816,022 at the beginning of March. This was a reduction of 13,007 persons, or 0.7 per cent. Of the latest aggregate, 1,340,181 were men and boys, and 462,834 were women and girls. The latter constituted 257 per thousand of both sexes, as compared with 261 per thousand at October 1, 1944 and also at April 1, 1944.

Average weekly per capita earnings fell from \$32.81 at the beginning of March to \$32 at April 1. The average at April 1, 1944, was \$32.37.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit declined during April, the number being 8,430 as compared with 13,307 in March and 6,463 in April, 1944.

Report on employment conditions, May, 1945.—Manpower requirements in Canadian industries, which reached a peak early in May, have declined sharply since V-E Day. The labour demand in industries exclusive of agriculture, as reported by Employment and Selective Service Offices at May 24, totalled 146,787, which was substantially the same as that reported five weeks earlier. The supply of available workers, as indicated by the

number of applicants registered at employment offices but not yet referred to specific jobs, amounted to 39,916 at May 25, which was a reduction of over 7,000 from the number reported five weeks earlier.

Applications for Employment; Vacancies and Placements, April, 1945.—Reports received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the five-week period March 30 to May 3, 1945, showed a fairly substantial gain the daily average of placements in employment when compared with the previous four weeks March 2 to March 29, and a slight increase in comparison with the four weeks March 31 to April 27, 1944. With the exception of a decline in trade, all industrial groups showed gains in placements under the first comparison, the most pronounced being in public utilities, services, manufacturing and construction. All industrial divisions apart from manufacturing, public utilities and agriculture recorded increases over the four weeks ending April 27, last year, the largest being in forestry and logging. During the five weeks under review there were 291,722 vacancies reported, 228,035 applications for employment and 161,993 placements effected in regular and casual employment.

Unemployment in trade unions.—The percentage of unemployment among trade union members increased fractionally during the quarter ending March 31, though remaining less than one per cent. At the beginning of January the figure was 0.6 per cent while at March 31, 1945, it was 0.7 per cent.

The March, 1945, figure was based on returns from 2,337 local labour organizations, having a total membership of 421,779 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution made by the Research and Statistics Branch of the Department of Labour indicates that at October 1, 1944, 4,318,000 persons 14 years of age and over, were gainfully occupied, of whom 3,293,000 were in non-agricultural industry, including 994,000 in war industry. In addition there were 777,000 persons in the Armed Forces.

The Employment Situation at the Beginning of April, 1945, as Reported by Employers

IN conformity with the trend in 20 of the previous 24 years of the record, industrial employment throughout Canada showed curtailment at the beginning of April. The general decline approximated that reported at April 1 in 1944, but was nevertheless rather below-average in extent according to the experience of pre-war years. Most of the recession took place in manufacturing and logging, from which some 7,100 and 12,700 persons, respectively, were released by the co-operating firms. The contraction in manufacturing as a whole was contra-seasonal, although it repeats that indicated a year earlier; there was a moderate falling-off in the production of both durable and non-durable manufactured goods at the date under review, when the largest losses were in iron and steel and animal foods. On the other hand, heightened activity was noted in lumber and non-ferrous metal products and in communications, transportation, services and trade, the greatest expansion being that of a seasonal character in transportation and trade.

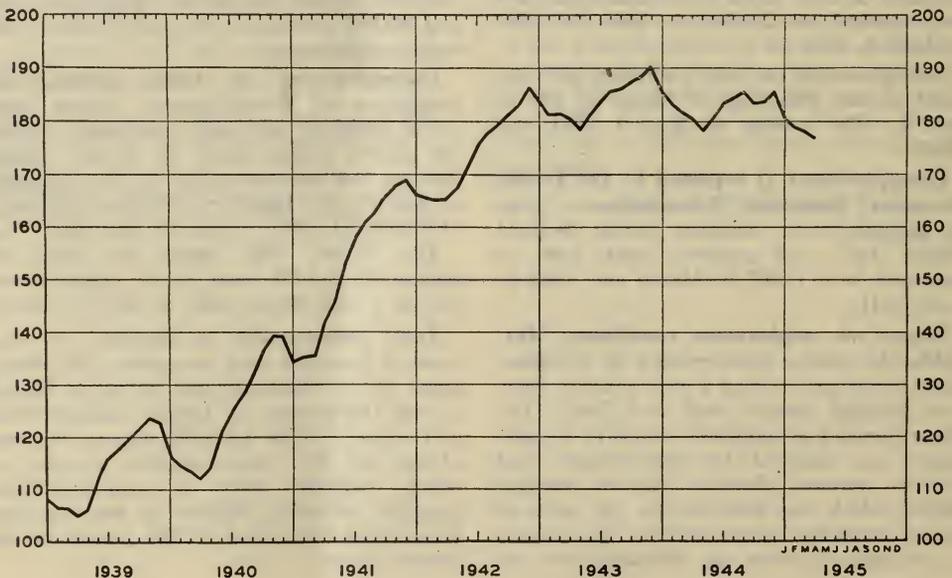

Data were tabulated by the Dominion Bureau of Statistics from 15,189 firms, whose employees numbered 1,803,015 at April 1;

compared with 1,816,022 at the beginning of March, this was a reduction of 13,007 persons, or 0.7 per cent. Of the latest aggregate, 1,340,181 were men and boys, and 462,834 were women and girls, the latter constituting 257 per thousand of both sexes. This proportion was somewhat lower than that of 261 per thousand indicated at October 1, 1944, and also at April 1 of last year.

The shrinkage in employment at the date under review lowered the crude index (based on the 1926 average as 100) from 178.2 in the preceding report, to 176.9 at April 1, as compared with 180.5 at the beginning of April in 1944. Since then, there has been a loss of two per cent in employment, accompanied by that of three per cent in the aggregate weekly payrolls; the observance of the Easter holidays in the period under review had an effect upon the latest figures. As already stated, the percentage decrease in employment between March 1 and April 1 was rather less-than-average according to the experience of past years, so that the seasonally-adjusted index showed an upward movement, advancing from 185.7 at the former date, to 187.4 at the date under review.

EMPLOYMENT' IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Payrolls

The weekly payrolls reported at April 1 by the firms furnishing statistics in the eight leading industries aggregated \$57,694,461, as compared with \$59,580,035 distributed on or about March 1. The decrease, which amounted to 3.2 per cent, resulted from loss of working time during the Easter holidays, as well as from reductions in the personnel. The weekly average earnings of the typical individual in recorded employment fell from \$32.81 in the last return, to \$32 at the date under review, as compared with \$32.37 at April 1, 1944, and \$31.14 at April 1, 1943. It may be added that in the last two years, Easter did not fall within the pay period for which the earnings were reported at April 1.

Including the figures for financial institutions, the most recent survey shows that the total number of persons reported in the nine leading industrial groups was 1,869,690, as com-

pared with 1,882,677 at the beginning of March. The weekly payrolls of these workers totalled \$59,933,101, as compared with \$61,770,400 in the preceding report. The per capita earnings in the nine main industries, including finance, were \$32.06, as compared with \$32.81 at the beginning of March, and \$32.37 at April 1, 1944. In the months since then, the number in recorded employment in the nine leading industries has declined by 1.9 per cent, while there has been a loss of 2.6 per cent in the indicated salaries and wages.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the leading industrial cities, and gives comparisons as at March 1, 1945, and April 1, 1944. Table I gives a monthly record for the eight leading industries as a whole, and for manufacturing, showing the move-

TABLE I—INDEX NUMBERS OF EMPLOYMENT AND PAYROLLS. BASED ON JUNE 1, 1941=100, TOGETHER WITH PER CAPITA WEEKLY EARNINGS

(The latest figures are subject to revision)

ments of employment and payrolls in the period since 1941.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have

been converted from their original base, 1926 = 100, to June 1, 1941, as 100. Table I indicates that in the period for which data are available, the number of persons employed by firms in the eight leading industrial groups has shown an increase of 15.8 per cent, while the aggregate weekly earnings of these workers

TABLE II—EMPLOYMENT AND EARNINGS

Number of Persons Employed at April 1, 1945, by the Co-operating Establishments and Aggregate and Per Capita Weekly Earnings of such Employees, together with Index Numbers of Employment and Payrolls as at April 1, 1945, and March 1, 1945, with Comparative Figures for April 1, 1944, where Available, based on June 1, 1941 as 100 p.c.

(The latest figures are subject to revision)

¹This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

are higher by 44.1 per cent. Including finance, the gain in employment from June 1, 1941, to April 1, 1945, amounted to 15.6 per cent, and that in payrolls, to 43.5 per cent. The explanation previously given for the much greater rise in the reported salaries and wages than in employment during the period of observation may again be stated:—(1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work; (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944; (3) the progressive upgrading of employees as they gain experience in their work and (4) the payment of higher wage-rates in a great many cases.

The effect of wartime demand for manufactured commodities is seen in the pronounced growth in employment and payrolls in factories, which in the period since the institution of the payroll statistics has greatly exceeded the gain in the non-manufacturing

industries. Despite more recent curtailment in manufacturing, the index of employment therein has risen by 42 per cent from June 1, 1941, and that of payrolls by 58.7 per cent, proportions which are decidedly higher than those given above for the eight and the nine leading industries as a whole. The factors already stated as influencing the general trends have had an even more noteworthy effect in the case of manufacturing.

With regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of paramount importance.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions, May, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE trend of labour demand in Canadian industry, which turned sharply upward at the beginning of March, continued to rise until early in May. Then, immediately following V-E Day, May 8, labour requirements, particularly for male workers, dropped off sharply from the peak shortage of 155,009 workers reported at May 10, and at May 24, totalled 146,787 (102,927 men and 43,860 women). This indicates some slight improvement in the manpower situation in that labour requirements as at May 24 were 24,340 less than at the corresponding date a year ago, although substantially the same as at April 19, five weeks earlier. During this five-week period, male demand decreased by 3,464 while female requirements rose by a similar number. On the whole, labour demand in the manufacturing industries has eased somewhat during the past month; this slackening may be largely attributed to lay-offs from war plants, which, together with the release of Armed Service personnel, is making more and more

workers available for other hard-pressed industries. While the demand for workers has remained substantially unchanged in the mining and transportation industries, increased seasonal activities have augmented the labour requirements in the construction industry and in the trade, finance and service group. Table I shows Net Labour Demand¹ by main industry group and by sex, as at May 24, with absolute and percentage change in total demand during the past five weeks.

Meanwhile the supply of workers available to meet the immediate labour requirements of Canadian industry has continued to decline. Local Employment and Selective Service Offices reported only 39,916 Unreferred Applicants² at May 25; this was fewer by 7,311 than the number of applicants awaiting referral at April 19. The depletion of supply was almost entirely due to a reduction in the number of male applicants during the period. Some indication of the disparity between supply and demand in certain regions is given by the fact that 81 per cent of the demand for women workers was centred in Ontario and Quebec, while these regions reported only 54 per cent of the total supply. Those occupational groups in which there was a surplus supply in Western Canada were the very groups for which there was a great demand in Ontario and Quebec. Table II shows labour demand and supply by main occupational groups and by sex, as at May 25, 1945.

Net Labour Demand in A & B Priority Industries

The labour demand in high priority industries has followed much the same trend as the overall industry demand during the past month. In comparison with the 96,329 workers needed at April 19, labour requirements in high priority industries increased to 97,275 at May 10. Following that date labour demand fell off slightly to stand at 91,941 at May 24, at which date manpower needs in these essential industries comprised 63 per cent of the total labour requirements.

Logging

Although demand in the high priority logging industry (8,523) is still high, there has been some improvement in the labour situation in all regions except the Pacific. The need for river drivers has been fairly well satisfied but there is still an urgent demand for such skilled types of labour as buckers, fallers, riggers and chokermen. Students have provided only slight relief for this industry and practically

all areas report a shortage of skilled workers who are physically fit to undertake the heavy work required of them.

Mining and Primary Smelting

Although there has been some slackening in manpower requirements in the high priority mining, primary smelting and refining industries, many mines are still faced with serious labour shortages. Underground labourers are scarce and certificated miners are in great demand. Of the 6,729 workers required at May 24, almost 40 per cent was in Ontario.

¹ Net Labour Demand is calculated by deducting unconfirmed referrals from unfilled vacancies. Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated. Unconfirmed Referrals are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

² Applicants who have not been referred to specific jobs as at the date indicated.

TABLE I.—NET LABOUR DEMAND BY INDUSTRY AND BY SEX, AS AT MAY 24, 1945

In this region some farmers have returned to the mines following seeding and will remain until haying begins about the middle of June. In some areas the situation has been relieved by university students who have accepted work in the mines for the summer months. As yet the return of ex-miners from the Armed Services has not resulted in any noticeable change in the labour situation and workers released from war employment are not expected to afford much relief to his industry until the possibilities of obtaining work in manufacturing industries have been exhausted.

Manufacturing

Labour demand in high priority manufacturing industries remained fairly constant from mid-April until V-E Day. However, with the end of the war in Europe, manpower requirements fell off considerably during the next two weeks totalling 39,472 at May 24 as compared with 43,590 at May 10. Four-fifths of the decline was in the demand for male workers. The labour requirements of industries engaged exclusively in war production tend to be lower as a result of cancellations or partial cutbacks in war contracts. Nevertheless, Canada is playing an important role in the Pacific war and while there has been a substantial reduction in demand for labour in the manufacture of guns and ammunition, mechanical transport and armoured fighting vehicles, the labour requirements of the aircraft and shipbuilding industries continue at a high level.

Aircraft and Parts.—During the five weeks prior to May 24, labour demand in the aircraft industry increased by 511 to total 2,592 at that date. Although production of the trainer type of aircraft has been discontinued, demand in this industry will probably be maintained at a high level, as production of aircraft, especially recent models of the combat type for the Pacific war, is expected to continue indefinitely.

Shipbuilding and Repairs.—The completion of orders on hand and additional contracts for ships necessary to carry on the war in the Pacific, together with an extensive repair program is expected to keep employment at a high level well into 1946. Demand in this industry has been rising steadily since the beginning of the year and at May 24 stood at 3,376. While there is an urgent need for both skilled and unskilled workers, some relief may be expected from student labour during the summer months.

Textiles and Products.—The textile industries are faced with an extremely critical manpower situation. At May 24, immediate manpower requirements of the high priority textile industry totalled 7,246 (2,270 men and 4,976 women).

The labour problems of this industry have not been alleviated to any extent by cutbacks in military requirements as domestic needs and Canada's commitments to the United Nations and to UNRRA will necessitate maximum production for some time. In view of the seriousness of the situation, the industry has recently been placed under a six-months' directive of the Wartime Prices and Trade Board with a view to restoring production to the 1941 level or better. Measures are being taken to divert additional manpower to the understaffed textile mills and clothing factories and many establishments are being given a high priority rating in order that they may procure essential labour immediately. In recruiting labour, especially workers formerly employed in war plants, emphasis is being placed on the permanency of the work and the opportunity to acquire a new trade. Training classes, already organized in some mills, are to be extended to smaller plants through government assistance in supplying qualified instructors. Although these measures will afford some relief, no large-scale movement of new or experienced workers into this industry is anticipated in the immediate future.

Secondary Metals.—Labour demand in the secondary metal industries, although somewhat less than at April 19, remained high, totalling 3,954 at May 24. The return of agricultural workers to the farms has left a great many foundries and steel plants understaffed. While an acute shortage of heavy labour in this industry is reported in some areas, many establishments are counting on further assistance from the farmers when seeding is completed.

Construction

With the opening of the building season, there is considerably increased activity in the high priority construction industry. Labour requirements at May 24 totalled 5,418 compared with 4,108 five weeks earlier. All regions reported increases in demand, the greatest being in Ontario and Quebec. In most areas all competent tradesmen have been absorbed and there is a persistent demand for skilled construction labourers such as carpenters, painters and bricklayers which is difficult to satisfy as applicants are scarce.

Transportation

Demand for workers in high priority transportation remains at a high level, 10,424 persons being required at May 24. Two-thirds of this labour shortage was reported by steam railway companies which are in urgent need of extra gang labourers and maintenance men at this season of the year. Demand is largely for the heavy type of labourer and few suitable applicants are available.

Trade, Finance and Service

The tight labour situation in the high priority trade, finance and service group persists. Lay-offs from war plants will make more workers available for this type of work, but it is only to be expected that they will be reluctant to accept employment in these industries before exploring the possibilities elsewhere. At May 24 there were 19,294 persons (7,514 men and 11,780 women)

required as compared with 17,792 at April 19. Up to the present time hospitals, hotels, restaurants and summer resorts have experienced great difficulty in finding enough help to carry on. The serious labour shortage in hospitals continues with an urgent need for kitchen workers and ward assistants. Hotels and restaurants are understaffed and there are very few applicants registering for this type of work. All regions report a shortage of skilled mechanics and repairmen.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended May 22, 1945.

Maritime Region

Agriculture.—Unseasonably cold weather has not only proved a serious setback to farm operations but also resulted in a decrease in the demand for helpers. While several local offices report outstanding orders for whom no applicants are available, the only urgent demand comes from the vicinity of Truro, where a special effort is being made to meet requirements by referrals to the more productive farms.

Logging.—Favourable water conditions have contributed to the success of the river drive. In contrast to conditions a year ago, when much of the cut had to be left in the bush, all the trees felled during the past season have reached the booms. In New Brunswick, the camps are re-opening for Summer operations; the majority of the many bushworkers required will be procured from the farms after the seeding is completed.

Coal Mining.—Production remains at normal level. Although more certificated miners could be easily placed, the need for additional manpower is not pressing.

Manufacturing.—The cessation of European hostilities, with the consequent cancellation of shell contracts, has resulted in a mass staff reduction at the Trenton Steel Works, presently releasing about 750 employees, of whom only 70 are women. A number of those affected are going to Halifax shipyards and Toronto rubber plants, while those not thus placed are filing unemployment insurance claims. The Foundation Maritime of New Glasgow is also laying off men, preparatory to a complete shutdown. Nearly all of the 100 men released from the Industrial Shipping Company's plant at Mahone Bay during the past two months have returned to their homes

in Newfoundland, Quebec or Ontario; a further 100, who sought separation in order to return to farming or fishing, have not been replaced.

While Halifax shipyards can still use additional riveting crews, their general labour requirements are less urgent than earlier. In spite of the efforts of local offices, great difficulty has been experienced in meeting the manpower demands of the fertilizer plants for their short seasonal rush. It has also been impossible to reduce the labour shortages of the textile mills and kindred industries to any appreciable extent; all are handicapped by the lack of skilled and unskilled workers alike.

Construction.—The labour situation throughout the region is reasonably satisfactory. While there is a steady demand for workmen on small building jobs, no great difficulty has been encountered in filling these requirements.

Transportation.—The heavy demand for extra gangs for the railways persists, with few men of the necessary physique available. While there is no great need of additional longshoremen on the Halifax water front, the Reserve Labour Pool requires 200 freight handlers for immediate employment. The unloading of troop transports is handled by the Army Port Battalion.

Quebec Region

Agriculture.—Reports from all but such northerly areas as Lake St. John and Abitibi are causing much concern as to the success of this season's crops. In some sections re-seeding will be necessary, and fruit trees in some vicinities have also suffered great damage. While there is no immediate call for farm labour, a special study is being made with a view to forestalling the possible lack of adequate assistance during the haying and other harvest periods.

Logging.—The weather conditions which have so seriously handicapped the farmer, have benefited logging operators, who are

making good progress with the river drive. Although more drivers could be used to advantage, on the whole, orders are being satisfactorily filled. A few companies are preparing for Summer cutting, for which the majority of bushmen will be procured locally.

Mining.—The anticipated boom for a large number of prospects and junior mining ventures has made it increasingly difficult for local offices to provide suitable manpower for production operations. While skilled miners are almost unobtainable, special efforts are being made to fill, at least partially, the base metal workings' urgent need for mine beginners. The labour supply for the gold mines remains far below requirements.

Manufacturing.—Lay-offs of some magnitude are occurring in many parts of the province. Progressive staff reductions in several Montreal plants are proceeding according to schedule, with all worthwhile employees promptly absorbed by other essential industries; as yet, the large number of men released has not lessened to any marked degree the grave shortage of heavy labour. In Quebec City some 250 persons have been released from the arsenals. Some hundreds of men and women have also been laid off from several of the large D.I.L. plants; a great many of those affected are being referred to the understaffed rubber plants and other industries in the Montreal area.

The recent change in the aluminum production schedule has materially affected the manpower situation in the various plants of the Aluminum Company of Canada. The closing of potrooms at Chicoutimi and Beauharnois is necessitating the progressive release of many men; however, staff reductions appear to be almost at an end for the time being, and the company has even taken on another 100 labourers at Shawinigan Falls.

The rubber footwear industry, the tobacco factories, the textile plants and kindred industries throughout the province still suffer from persistent labour shortage.

Construction.—Although the season is just opening up, the shortage of building materials and specialized building tradesmen is already hampering the industry. The number of skilled artisans and general labourers required in all parts of the region far exceeds the available supply of men for construction jobs.

Transportation.—As yet the railways have not suffered to any extent from lack of manpower. It is reported that a number of extra gangs have not been ordered out, possibly owing to weather conditions.

Ontario Region

Agriculture.—Slightly warmer weather is being welcomed by farmers whose crops have been injured, and in some cases destroyed, by constant cold and heavy rains. Such low-lying sections as Belleville, Fergus, Guelph and Niagara Falls have suffered most. While adverse weather conditions have resulted in a lessened labour demand, very few applicants are available to fill quite substantial orders throughout the province.

Logging.—Although river driving up the Ottawa Valley has been hampered by a shortage of suitable labour, on the whole woods operations are progressing favourably. The Kapuskasing office advises that, with the drive almost over in that area, the majority of the bushworkers have gone into the pulpwood camps. At Sault Ste. Marie, too, loggers are in good demand for the Summer cutting.

Sawmills.—While the smaller mills are benefiting by delayed agricultural activity, larger establishments are still short of their labour requirements. Most of the mills in the Sudbury area have been reduced to a day shift only, and at least another 200 men are needed at once for barker and mill operations at Temiskaming. Local millyard and track labourers employed by the pulpwood company at Kapuskasing have been supplemented by the transfer-in of 40 men from the Quebec region.

Mining.—No improvement is apparent in the manpower situation of the seriously understaffed mines of the Timmins and Sault Ste. Marie areas. The Belleville office reports that the various fluorspar workings in the vicinity of Madoc have re-opened for the season; the fairly heavy demand for unskilled labour is being met by workers from the sub-marginal farms, as well as a considerable number of labourers available in the district.

Manufacturing.—The greatest and most immediate need, that of heavy labour, is being ameliorated somewhat by the prolonged employment of agricultural workers.

The Hamilton office reports that of 1,400 men and 600 women released from various local plants during the past fortnight, a large percentage have been transferred to other employment. The Fleet Aircraft Company of Fort Erie is in process of releasing 600 employees, men and women in equal numbers. One department of the D.I.L. plant at Nobel has been closed down, resulting in the discharge of about 50 men. Two large factories at New Toronto have cancelled extensive orders for workers, and at Windsor, also, a number of plants are curtailing their activities.

The Ford and Chrysler companies have reduced their working schedule to a five-day week, and other smaller firms are requesting the same privilege.

Counterbalancing the slowdown in war production in some centres, large plants in other cities are making undiminished manpower demands. Unfilled vacancies in the London area remain approximately 1,300, and plans are afoot for enlisting the assistance of local students at the close of the school year. The Toronto office reports a persistently heavy demand for all types of workers, with few suitable applicants available. One Kingston firm has brought in 100 labourers from the Quebec region to relieve the serious shortage of husky workmen; in St. Thomas, a similar dearth has been alleviated to some extent by part-time assistance from members of the Army and the Air Force, but the abrasive and chemical plants at Niagara Falls are still definitely undermanned.

The seasonal labour requirements of packing plants, flour mills and food processing establishments present an added problem at this time. There has been no change for the better in the understaffed textile and clothing factories and kindred industries, where few applicants are available to alleviate the critical labour shortage.

Construction.—In spite of unfavourable weather conditions, construction activity is increasing, especially in commercial and domestic building. A steady demand persists for carpenters, bricklayers, painters and other skilled artisans, as well as good general labourers.

Transportation.—Procuring extra gang and section crews for both railways becomes increasingly difficult. Although most local offices concerned advise that the available supply of manpower for water transportation is satisfactory, a noticeable turnover in Great Lake crews is reported from Sault Ste. Marie, where placements fall considerably short of requirements.

Prairie Region

Agriculture.—While seeding is well under way in all parts of the region, farm operations in most sections are still hampered by rain. Although there is an unanswered call for experienced tractor men in the farm districts surrounding North Battleford, Winnipeg and Lethbridge, the general demand for agricultural labour has decreased markedly. However, the request for domestics is continuingly brisk, with few available applicants.

Logging.—The river drive is proceeding apace in the Fort Frances and Lakehead

areas. Labour requirements for this work have been satisfactorily met, but there is still a call for pulpwood cutters and loggers for the Summer months.

Coal Mining.—The collieries are continually handicapped by the lack of certificated miners, as well as unskilled labour. The Blairmore office has orders on file for 100 underground workers, as well as clearance orders for another 150 required in the Michel and Fernie areas.

Base Metal Mining.—Increasing activity is responsible for mounting manpower requirements. Very few men of the type suitable to the work are obtainable. In the Flin Flon area, however, the call for underground and plant workers is gradually being met by the employment of university students.

Manufacturing.—The most outstanding need is for husky labourers for the packing plants, flour mills and foundries; the supply is far from adequate and little relief is foreseen until seeding is completed.

As an aftermath of V-E Day, lay-offs are taking place in several war plants. Cancellation of contracts has resulted in a staff reduction at the plant of Regina Industries Limited. Approximately 100 workmen are being released from the Port Arthur shipyards, but the aircraft division of the plant will continue to employ the majority of those on the present staff for some time to come.

Construction.—Increased activity is resulting in materially larger orders for building labour. The general shortage of both skilled and unskilled workmen is becoming steadily more serious as the season advances.

Transportation.—To an insistent demand for extra railway maintenance workers is added the problem of procuring men to handle a record volume of Canadian grain at the Lakehead elevators. The employment of soldiers is expected to relieve the situation somewhat, but many more husky labourers are required.

Prairie Region

Agriculture.—Although efforts to secure experienced dairy help have met with little success, the general farm labour supply is considered reasonably adequate.

Logging.—Operations in all parts of British Columbia are hampered by the shortage of skilled woodsmen of all types, as well as physically fit unskilled labourers. In the northern interior, the return of agricultural workers to the land is largely responsible for an existing shortage of approximately 350 woodsmen.

Sawmills.—As the season advances, manpower requirements mount steadily. Approximately 110 men are needed in the Cranbrook area, Kamloops and Fernie mills are continuingly shortstaffed, and operators in the remoter parts of the Vernon district are having great difficulty in securing enough skilled and unskilled workers. In the vicinity of Prince George there are 250 vacancies, while farther north, the Prince Rupert office reports a serious shortage of skilled workmen.

At New Westminster the call for heavy sawmill labour has been partially met by the employment of Lascar seamen, residing in camps in the vicinity between voyages. It is feared that a freshet in the Fraser River, making log towage impossible, may force a temporary shutdown of the local mills.

Mining.—While both experienced men and underground labourers are still scarce in the collieries, the manpower situation in the base metal mines is still more discouraging. One large company is calling for an additional 200 underground workers; while some relief is anticipated through the employment of students, as yet the number of these reporting has been smaller than usual.

Manufacturing.—The general manpower shortage includes machinists, fitters, elec-

tricians, sewing machine workers, moulders and a great dearth of heavy labour. The shipyards, which make the greatest demands, are still undermanned; in Vancouver, their most insistent call is for semi-skilled and unskilled workers, who must be physically fit. In Victoria the demand for all types is being relieved to some extent by an extensive lay-off from the Victoria Machinery Depot. The Vancouver office anticipates success in filling a recent order for 400 aircraft workers. The shortage of heavy labour in New Westminster plants has been alleviated by the Lascar seamen, a number of whom have also been sent to Vancouver.

Construction.—The heavy demand for all classes of building tradesmen persists. While applicants are scarce, no critical lack of workers is apparent and precautions have been taken to ensure that workers are not diverted to low priority jobs.

Transportation.—The call for extra gang and section labourers for the railways remains unsatisfied. The requirements of water transportation are also very high; while no applicants are now available, there is possibility of relief from the student group for the Summer months.

Applications for Employment; Vacancies and Placements; April, 1945

THE volume of business transacted by the Employment and Selective Service Offices of the Unemployment Insurance Commission during the five-week period March 30 to May 3, 1945, as indicated by the average daily placements effected, showed an appreciable gain when compared with the preceding four weeks, March 2 to March 29, 1945, and a slight increase in comparison with the four weeks March 31 to April 27, 1944. All industrial divisions, excepting trade, showed gains in the daily average of placements effected in comparison with the previous four weeks, the most pronounced being in public utilities, services, manufacturing and construction. When comparison is made with the four weeks ending April 27, last year, all industrial groups apart from manufacturing, agriculture and public utilities showed increases, the gain in forestry and logging being most noteworthy.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment Offi-

ces throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed upward trends. The ratio of vacancies to each 100 applications was 127.9 during the five weeks ending May 3, in contrast with 116.4 during the preceding four weeks and 125.4 during the four weeks March 31 to April 27, 1944. The ratio of placements to each 100 applications during the period under review was 71.0 compared with 69.0 during the previous period ending March 29, and 68.9 during the four weeks March 31 to April 27, last year.

The average number of vacancies reported daily by employers to Employment and Selective Service Offices throughout Canada during the period under review was 10,059 in comparison with 8,218 in the preceding four weeks and 9,810 during the four weeks ending April 27, a year ago. The average number of applications for employment received daily during the five weeks March 30, to May 3, was 7,863 compared with 7,054 during the previous period and 7,822 during the four-week period

March '31 to April 27, 1944. The average number of placements made daily by the offices for the five weeks ending May 3, was 5,586 of which 5,414 were in regular employment and 172 in work of one week's duration or less, in comparison with a daily average of 4,860 during the previous four weeks. Placements during the four weeks March 31 to April 27, 1944, average 5,436, consisting of 5,275 in regular employment and 161 in casual work.

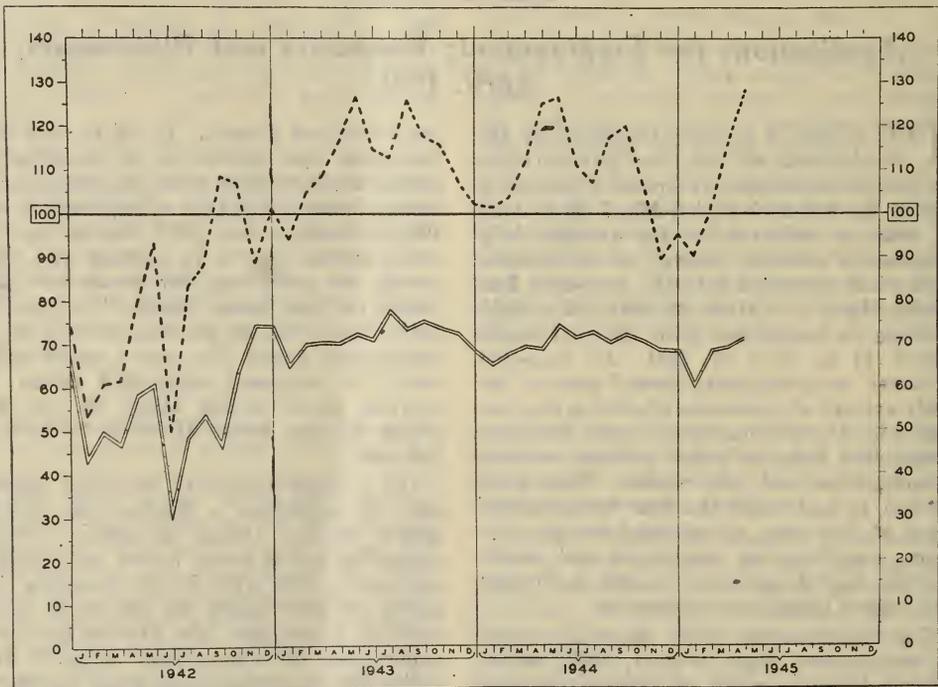

During the period March 30 to May 3, 1945, the offices referred 221,153 persons to employment and effected a total of 161,993 placements. Of these, the placements in regular employment numbered 156,997, of which 105,598 were of males and 51,399 of females, while placements in casual work totalled 4,996. The number of vacancies reported by employers was 200,776 for males and 90,946 for females, a total of 291,722, while applications for work numbered 228,035, of which 153,170 were from males and 74,865 from females. Reports for

the four weeks ending March 29, 1945, showed 197,221 positions offered, 169,305 applications for employment and 116,653 placements effected, while in the four-week period March 31 to April 27, 1944, there were reported 225,624 vacancies, 179,911 applications and 125,026 placements in regular and casual employment. The following table gives the placements effected by the offices each year from January, 1935, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1935.....	226,345	127,457	353,802

Nova-Scotia and Prince Edward Island

Opportunities for employment as reported by Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the five-week period March 30 to May 3, 1945, showed a daily average of 340 in comparison with 252 in the period ending March 29, and 308 during the four weeks March 31 to April 27, 1944. The average number of placements effected daily was 218 during the period under review, compared with 176 in the previous four weeks and 222 during the period ending April 27 a year ago. The decline in the daily average of placements from the period terminating April 27 last year, was not large in these two provinces as a whole under this comparison. Moderate gains were shown in services and trade but were offset by losses in manufacturing and construction. Placements by industrial groups included: manufacturing 2,305; services 1,481; trade 961; public utilities operation 776; construction 455 and mining 166. There were 4,086 men and 2,117 women placed in regular employment.

New Brunswick

Positions offered through Employment Offices in New Brunswick during the period under review, showed increases in the daily average when compared with both the previous four weeks and with the period ending April 27, 1944; there being 312 vacancies notified during the period ending May 3, in comparison with 202 in the preceding four weeks and 219 during the period terminating April 27 last year. There was a daily average of 161 placements compared with 146 in the four weeks ending March 29 and 149 during the period ending April 27 a year ago. Except for a moderate decrease in forestry and logging and a nominal decline in services, all groups showed increases in the daily average of placements over the period ending April 27, 1944, the most significant being in public utilities operation and construction. Placements by industrial divisions included: manufacturing 1,503; services 951; public utilities operation 702; trade 602; construction 520; logging 165 and mining 132. There were 3,204 men and 1,386 women placed in regular employment.

Quebec

There was an increase in the average number of positions available daily at Employment Offices in the province of Quebec during the period ending May 3, when compared with both the previous four weeks and with the period ending April 27 last year; there being 3,389 vacancies notified during the five weeks under review, in comparison with 2,405 in the preced-

ing period and 2,881 during the four weeks ending April 27, 1944. Placements likewise increased under both comparisons, the daily average being 1,670 during the period ending May 3, in contrast with 1,406 in the previous four weeks and 1,462 during the period March 31 to April 27, last year. A very substantial gain in forestry and logging, and a fairly large increase in manufacturing together with gains of moderate proportions in services, construction and trade accounted for the increase in the daily average of placements over the period terminating April 27, 1944. These improvements were offset in part by fairly large declines in public utilities operation and agriculture. Industries in which employment was found for more than 500 workers included: manufacturing 20,390; forestry and logging 3,677; services 6,978; construction 4,458; trade 3,867; public utilities operation 2,676 and mining 835. Placements in regular employment numbered 35,283 of men and 12,712 of women.

Ontario

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Ontario, during the five weeks terminating May 3, was 3,845 in comparison with 3,556 in the previous period and 4,089 during the four weeks ending April 27 a year ago. Placements showed an increase when compared with the preceding period but a decrease in contrast with the four weeks ending April 27, 1944. The daily average was 2,176 during the period under review, 1,934 in the four weeks ending March 29, and 2,209 during the period March 31 to April 27, 1944. The reduction in the daily average of placements from the period ending April 27 last year, was mainly due to a substantial decrease in manufacturing followed by losses of more moderate proportions in forestry and logging, public utilities operation and agriculture. These were offset in part by fairly large increases in construction and services and a moderate gain in finance and insurance. Industrial divisions in which the majority of placements were effected were: manufacturing 25,533; services 12,861; public utilities operation 8,045; trade 7,142; construction 4,942; forestry and logging 1,637; finance and insurance 1,228 and mining 1,112. Placements in regular employment numbered 39,764 of men and 22,398 of women.

Manitoba

Orders received at Employment Offices in Manitoba during the five weeks under review, called for a daily average of 448, compared with 387 in the preceding period and 450 during the four weeks ending April 27, 1944.

The average number of placements reported daily was 270 in contrast with 242 during the period ending March 29, and 275 during the four weeks ending April 27 a year ago. When comparing placements by industrial groups with the period ending April 27 last year, none of the changes were large. Moderate declines in manufacturing and services, and increases in public utilities operation and construction were the most important. Placements by industrial groups included services 2,294; manufacturing 2,021; trade 1,453; public utilities operation 1,101; construction 536; agriculture 167; and finance and insurance 138. There were 3,709 men and 2,784 women placed in regular employment.

Saskatchewan

During the five weeks ending May 3, 1945, the daily average of positions offered through Employment Offices in Saskatchewan was 270, compared with 206 in the previous period and 301 during the period March 31 to April 27, 1944. The average number of placements registered daily was 159 during the period under review, in contrast with 117 in the previous four weeks and 163 during the period ending April 27, last year. When comparing placements by industrial divisions with the four weeks March 31 to April 27, last year, the only change of importance was moderate decreases in public utilities operation and manufacturing. Placements by industrial groups included: services 1,591; trade 931; manufacturing 833; public utilities operation 457; agriculture 439 and construction 267. Placements in regular employment numbered 2,505 of men and 1,817 of women.

Alberta

Employment opportunities are indicated by orders received at Offices in Alberta, during

the period under review, showed a daily average of 444 in contrast with 337 in the preceding period and 520 in the four weeks terminating April 27 a year ago. The average number of placements effected daily was 284 during the period ending May 3, in contrast with 216 in the previous four weeks and 303 during the period ending April 27, 1944. Reduced placements in construction and manufacturing accounted for the decrease from the four weeks ending April 27 last year. Of the changes in all other groups, moderate increases in agriculture, mining and public utilities operation were the most significant. Placements by industrial groups included: services, 2,490; trade 1,439; manufacturing 1,329; public utilities operation 1,032; construction 748; agriculture 551 and mining 483. There were 4,786 men and 2,726 women placed in regular employment.

British Columbia

Orders listed at Employment Offices in the province of British Columbia during the period under review, was 1,012 in comparison with 873 in the previous four weeks and 1,042 in the period ending April 27, a year ago. There was a daily average of 646 placements compared with 574 in the four weeks terminating March 29, and 648 during the period ending April 27, 1944. The increase in the daily average of placements over the period ending April 27, last year, was due to moderate gains in public utilities operation and services. This advancement was largely offset by decreases in construction, manufacturing, and forestry and logging. Industrial divisions in which the majority of placements were effected were: manufacturing 5,079; services 4,601; forestry and logging 2,373; public utilities operation 2,249; trade 2,151; construction 1,515 and mining 322. Placements in regular employment numbered 12,261 of men and 5,459 of women.

Annual Review of Employment in Canada, 1944

IN its annual review of employment in Canada, 1944, the Dominion Bureau of Statistics reported that the year was characterized by a greater degree of stability in industrial employment as a whole than any other year since 1920, the year employment statistics were first recorded. It is pointed out that this situation was an obvious development in view of the stage reached in the progress of the war, the production for military needs and the heavy drains made on the manpower of the Dominion since the outbreak of hostilities.

The report stated that "pre-war experience shows that in general, the trend from the beginning of January to the end of the year is favourable, there normally being a gain of over six per cent in this comparison, while in the period 1939-1943, the seasonally buoyant movements were inflated by wartime demands on industry." In 1944, the indexes of employment at January 1 and December 1 coincided and were the highest figures in the twelve months.

There were six general increases and an equal number of decreases during 1944, when

the variation between the low and the high index numbers was 7.5 points. In 1943, the range was 12.3 points and in 1942 it was 21.4 points. The normal variation, according to the experience of the years, 1929-1937, used in calculating seasonal adjustment, amounts to nearly eleven points. In the first quarter of 1944, industrial employment was at a higher level than in the same months of any previous year; in subsequent months, this superior position was lost, however.

At December 1, 1944, the index was lower by 2.5 per cent than at the same date in 1943, and slightly below that at the beginning of 1942. The annual index for 1944 at 183.0 per cent of the 1926 average was very little lower than the 1943 mean of 184.1 and was otherwise the highest in the record of 25 years. Increasingly acute shortages of labour during 1944 were reflected in the employment of important numbers of female workers, many of whom were engaged on a part-time basis.

TABLE I.—SUMMARY OF THE STATISTICS OF EMPLOYMENT AND PAYROLLS REPORTED MONTHLY BY THE CO-OPERATING ESTABLISHMENTS DURING 1943 AND 1944

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries, as listed in Tables 4 and 5, with the exception of electric light and power.

The growth of the number of women in recorded employment in 1944, however, was not so pronounced as in earlier war years. "A tremendous expansion in industrial activity" took place in the Dominion in the months following the fall of France in 1940. In 1942, there was a perceptible slackening in the rate of expansion, succeeding by a more pronounced slowing in 1943, while the movement in 1944 became slightly retrogressive. However, it is pointed out that in spite of this falling-off, employment continued at an exceptionally high level.

In compiling the annual review for 1944 the Dominion Bureau of Statistics tabulated a total of 175,700 returns in employment in the eight leading industries, namely, manufacturing, logging, mining, transportation, communications, construction, services and trade. The average number of reports received monthly was 14,641; the staffs of the co-operating employers in the eight leading industries averaged 1,850,851, ranging from 1,796,340 at May 1 to 1,887,752 at the beginning of December. In 1943, the 13,756 establishments furnishing data had reported a monthly average of 1,848,534, varying from a minimum of 1,788,820 at the first of May, to a maximum of 1,916,588 at December 1. Increased coverage of industry, as a result of the growth in the number of employers reporting, accounts for the apparently higher number in recorded employment in 1944. This factor was included in the computation of the index. Standing at 183.0, this was 0.6 per cent below the 1943 mean, but was 5.4 per cent higher than that of 173.7 in 1942 and exceeded the 1939 annual index by 60.7 per cent. The pre-war high figure was that of 119.0 in 1929.

Payrolls

Although there was in 1944 a minor decline from 1943 in the general index of employment, a moderate increase in the same comparison was shown in the reported payrolls. In the eight leading industries the amounts distributed in one week in each month averaged \$58,917,047, indicating the disbursement of \$3,063,686,000 during the year by the larger employers in the eight leading industries. The sums reported represented an average earned income of \$31.84 per week for the typical individual in recorded employment, as compared with \$30.78 in 1943, \$28.56 in 1942 and \$26.17 in the seven months of 1941 for which statistics were available.

In addition to the returns from the eight leading industries, information was furnished by 800 financial institutions and branches with staffs averaging 65,329 per month. The weekly payrolls of these persons were stated as \$2,116,334, a mean of \$32.35 per employee during 1944, as compared with \$31.19 in 1943 and \$30.20 in 1942.

By including these figures with those of the eight leading industries, the total labour force of whose employment there is current record was 1,916,180. The gross weekly payrolls in the nine industrial divisions in 1944 averaged \$61,033,381, or an annual payroll of approximately \$3,173,735,800, disbursed in salaries and wages by the co-operating establishments. The average per employee in the nine groups in 1944 was \$31.85, as compared with \$30.79 in 1943 and \$28.61 in 1942. The latest annual index of aggregate payrolls exceeded that of 1943 by over two per cent. The average earnings of the typical individual in recorded

TABLE II.—ANNUAL AVERAGE INDEX NUMBERS OF EMPLOYMENT IN CANADA AS A WHOLE, IN THE EIGHT LEADING CITIES TAKEN AS A UNIT, AND ELSEWHERE IN THE DOMINION, 1929-1944

(1926=100)

Year	Canada	Eight Leading Cities	Elsewhere
1929	119.0	119.3	118.9
1930	113.4	114.2	112.9
1931	102.5	104.3	101.1
1932	87.5	90.2	85.3
1933	83.4	83.0	83.7
1934	96.0	88.2	102.1
1935	99.4	93.1	104.5
1936	103.7	97.7	108.4
1937	114.1	105.8	120.8
1938	111.8	105.7	116.7
1939	113.9	107.8	118.8
1940	124.2	118.9	128.1
1941	152.3	149.0	155.0
1942	173.7	177.7	170.7
1943	184.1	196.0	175.2
1944	183.0	195.9	173.3

employment were 3·4 per cent higher than in 1943 and 11·3 per cent above the 1942 mean.

The factors contributing to the substantially greater rise in the index of aggregate payrolls than in that of employees were stated to be as follows: (1) The concentration of workers in the heavy manufacturing industries, where rates of pay were above the average and, in addition, there was a considerable amount of overtime work; (2) the payment of cost-of-living bonuses to the majority of the workers; (3) the progressive up-grading of employees as they gained experience; and (4) the payment of higher wage-rates in a large number of cases. The report suggests that with the changing situation in the European war, these factors may become of diminishing importance, the peak of payrolls probably having been reached in 1944, as the high point in employment was recorded in 1943.

Employment in Provinces

Geographically, employment in 1944 declined in Nova Scotia, Quebec, Ontario and British Columbia, while in the other provinces activity reached new high levels. In all the provinces except British Columbia, the reported salaries and wages, on the whole, were at the maximum in the record, which goes back only to the spring of 1941.

Employment in Eight Leading Cities

As in former years the Bureau of Statistics segregated the data obtained from the eight Canadian cities having a population in excess of 100,000. Taken as unit, employment in these cities showed relatively little change from 1943, there being a reduction of 0·1 per cent in the composite index—195·9 as compared with 196·0 in 1943. With the exception of Winnipeg, however, there was a decided slackening in the latter months of 1944. On the whole, activity was reduced in Quebec City, Ottawa, Hamilton, Windsor and Vancouver, while in Montreal, Toronto and Winnipeg, the annual indexes in 1944 reached new peaks. The index of payrolls in the eight cities as a whole in 1944 was 160·9, or 2·6 per cent higher than the 1943 figure of 156·8. Only in Hamilton, Windsor and Vancouver were the disbursements in 1944 lower than in the preceding twelve months. In all eight cities, the general average earnings per person in recorded employment reached new high levels. The index of employment in manufacturing in the eight leading cities taken as a unit averaged 238·9 in 1944, when the figure was 6·4 per cent above that for the Dominion. As compared with 1943, there was a decline

of 1·3 per cent in manufacturing in the cities and of 0·8 per cent in Canada as a whole. Activity in construction, on the other hand, declined to a much smaller extent in the larger centres during 1944, than was the case in the other areas, while service and trade showed more pronounced expansion. Nearly 54 per cent of the persons in recorded employment in manufacturing in the Dominion in 1944, were reported by firms in the eight leading cities; this ratio was practically the same as in 1943.

Sex Distribution of Persons in Recorded Employment at October 1, 1944

Of the total of 1,928,111 persons reported as on the staffs of the firms reporting in the nine leading industrial groups at October 1, 1944, 1,406,132 were men or boys and 521,979 were women or girls. The latter number constituted 271 per thousand workers of both sexes, a ratio which was higher than the October 1, 1943 proportion of 262. In the twelve months ending October 1, 1944, it was estimated that there had been an increase of 1·2 per cent in the number of female workers. While the number of male employees had fallen by 3·3 per cent. It is probable that many of the women added to the working force were part-time workers.

The report draws attention to the upward trend in average earnings in 1944, despite the indicated decline in the number of male wage-earners. The weekly per capita earnings reported in the various industries and areas between October 1, of 1943 and 1944 showed widespread gains, resulting in certain cases from higher wage rates, but more generally, from the up-grading of workers, both male and female, as they acquired experience. The movement of workers from low-pay to high-pay industries was a factor of lesser importance in 1944 than in earlier phases of the industrial war effort. It is pointed out that, as in 1943, there was a tendency for the smallest gains in the weekly averages to appear in the industries and areas where the proportions of women workers showed unusually large increases. "The length of service of the female recruits to industry, would obviously be one of many factors contributing to this result, as would the fact that absenteeism is frequently more pronounced among women, particularly among those with home responsibilities."

Of the 521,979 women in recorded employment in the nine leading industrial divisions at October 1, 1944, 332,180 or 63·6 per cent belonged in manufacturing, including electric light and power. The proportion at October 1,

1943 was 66 per cent and at October 1, 1942 it was 66.6 per cent.

Attention is drawn in the report to the highly important increases in the numbers and proportions of female workers in the various manufacturing industries between 1939 and October 1, 1944. "Extremely marked expansion was indicated in the aircraft industry, where the ratio rose from 30 per thousand of both sexes in 1939 to 291 in the latter part of 1944, while the number of females employed therein increased by many thousand-fold." In shipbuilding, the advance was from 14 per thousand in 1939 to 68 at October 1, 1944. "At that date (October 1, 1944) as in 1939, the tobacco and textile industries reported the highest proportions of female workers indicated in 1944; the growth in the proportion of

women in the last two industries during the war, however, was not so great as in many other lines." The iron and steel division, which had accounted for five per cent of the total women employed in manufacturing according to the annual census in 1939, reported no less than 21.6 per cent of the total included in the survey for October 1, 1944. The majority at the latter date belonged in the firearm and aircraft industries.

"It is interesting to note," the report states, "that the number of females in factories in the eight leading cities at October 1, 1944 made up almost three-fifths of the Dominion total of females in the manufacturing group as reported by firms having 15 or more employees."

Quebec Association for Prevention of Industrial Accidents Inc.

IT is asserted in the Annual Report of the Quebec Association for the Prevention of Industrial Accidents for the year 1943 that "never in the history of industry has there been a period when Executive participation in the work of accident prevention received such a challenge". However, it is stated that in 1943, there were many definite indications that industrial management throughout the province was showing increasing interest in safety measures and a willingness to co-operate in an active safety program. The following figures are given in the report as indicating accident trends for the years 1939 to 1943, inclusive:

Year	Compensable Claims	Medical Claims
1939	9,413	15,598
1940	11,574	22,594
1941	16,075	32,865
1942	20,070	39,213
1943	19,931	35,630

During 1943, fourteen regional safety conferences were held in strategic industrial centres throughout the province. These conferences were well attended by both employers and

workers in the several districts. "A very conservative estimate of attendance... would be: Employers' luncheons or dinners, 2,500 and Workers' safety rallies, 11,000." Representatives of the Workmen's Compensation Commission assisted materially in making the conferences successful.

In addition to the conferences, numerous meetings of plant safety committees and supervisory personnel were held. Sound-films in both English and French were used for graphic presentation of methods of preventing industrial accidents. Inter-plant safety competitions were conducted during the year and trophies were awarded in some sixteen different industrial categories, while nearly a thousand certificates were for outstanding achievements in safety promotion.

In the course of the year the Association's safety officers made a total of 14,612 visits. In connection with these visits, 8,985 of the more serious accidents were investigated and 14,633 recommendations made to eliminate accident causes. In most instances, these recommendations were carried out by management.

Strikes and Lockouts

Strikes and Lockouts in Canada During May, 1945

THERE was little strike activity in Canada during the month. There were nine strikes recorded in May as compared with nine the previous month and 25 in May, 1944. The number of workers involved showed a decrease and the time loss in man-working days declined sharply both as compared with the previous month and with May, 1944. Preliminary figures show nine strikes in existence during May, 1945, involving 3,035 workers and causing a time loss of 6,340 days, as compared with nine strikes in April, 1945, with 4,363 workers involved and a time loss of 25,169 days. In May, 1944, there were 25 strikes, involving 22,827 workers, with a time loss of 126,386 days.

Preliminary figures for the first four months of this year show 70 strikes, involving 22,435

workers, with a time loss of 79,035 man-working days, as compared with 91 strikes, with 42,354 workers involved and a time loss of 308,760 days, for the same period last year.

Of the nine strikes recorded for May, 1945, all of which were terminated during the month, one resulted in favour of the workers, one in favour of the employer, one was a compromise settlement, one was partially successful and five were indefinite in result, work being resumed pending final settlement.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

* Preliminary.

† Strikes un-terminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strike is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING MAY, 1945*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing During May, 1945				
MINING—				
Coal miners,* Minto, N.B.	2	126	170	Commenced May 1; misunderstanding <i>re</i> extension of agreement; terminated May 2; conciliation, federal, and reference to Provincial NLRB‡; indefinite.
Coal miners, Florence, N.S.	1	650	1,300	Commenced May 3; for payment for loaders on datal basis for one shift following mechanical breakdown; terminated May 4; negotiations and return of workers pending settlement; indefinite.
Coal miners, New Waterford, N.S.	1	740	1,700	Commenced May 2; for payment for loaders for coal left on long wall; terminated May 5; return of workers; in favour of employer.
MANUFACTURING—

<i>Metal Products—</i> Freight car factory workers, Trenton, N.S.	1	671	2,000	Commenced May 3; for production bonus for gang leaders; terminated May 9; conciliation, federal, and reference to RWLB; indefinite.
Metal factory workers, Welland, Ont.	1	173	200	Commenced May 9; against reduction from eight to seven men on furnace crews when power reduced; terminated May 10; negotiations; compromise, one furnace shut down and crew absorbed on other furnaces.
Freight car factory workers, Trenton, N.S.	1	175	130	Commenced May 26; against suspension of a worker for absenteeism; terminated May 26; negotiations; in favour of workers.
Metal factory workers, Lachine, P.Q.	1	220	85	Commenced May 30; for union recognition; terminated May 30; return of workers pending further negotiations; indefinite.
SERVICE—				
<i>Business & Personal—</i> Window cleaners, Montreal, P.Q.	15	125	600	Commenced May 1; for increased wages; terminated May 4; return of workers pending reference to RWLB; partially successful.

*Preliminary data based where possible on direct reports from parties involved, in some cases incomplete subject to revision for the annual review.

†In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

‡NLRB—National Labour Relations Board; RWLB—Regional War Labour Board.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1945, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter includes a table summarizing the principle statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to war conditions. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in March, 1945, was 165 and 29 were still in progress from the previous month, making a total of 194 during the month, in which 73,600 workers were involved and a time loss of 398,000 working days was caused.

Of the 165 work stoppages commencing in March, 25 arose out of demands for advances in wages, three over proposed reductions in wages, 43 on other wage questions, four over

questions as to working hours, 26 over questions respecting the employment of particular classes or persons, 55 on other questions respecting working arrangements, six as to questions of trade union principle, and three were in support of workers involved in other disputes.

Australia

Figures for the second quarter of 1944 show 235 strikes, involving 56,497 workers, with a time loss of 133,401 working days. For the third quarter of 1944 the figures are 256 strikes, involving 73,904 workers, with a time loss of 185,508 working days.

British India

Preliminary figures for December, 1944, show 49 strikes, involving 48,666 workers, with a time loss of 104,748 working days.

United States

Preliminary figures for April, 1945, show 450 strikes and lockouts beginning in the month, in which 285,000 workers were involved. The time loss for all strikes in progress during the month was 1,330,000 working days. Corresponding figures for March, 1945, are 400 strikes, involving 210,000 workers, with a time loss of 860,000 working days.

Labour Law

Recent Regulations Under Dominion and Provincial Legislation

THE Merchant Seamen Special Bonus Order provides for certain seamen to receive a bonus of 10 per cent of their total earnings at the end of the war. Temporary certificates may be issued to masters to take charge of certain cargo ships within specified limits. Annual increases have been restored to Government employees whose annual salaries are \$3,000 or more. New pilotage by-laws have been made for certain districts.

In Alberta two weeks' annual holiday with pay has been provided for coal miners. In British Columbia new regulations apply to

passenger elevators and to women factory workers. The annual summer Orders have been made for women employees in British Columbia resort hotels in unorganized districts, and for workers in the fruit and vegetable industry. In Saskatchewan the allowance payable to mothers has been raised and a \$3 supplemental allowance provided for old age and blind pensioners. Saskatchewan has restored the annual three weeks' holiday with pay in the Public Service. In this province, too, new regulations for the use of pressure vessels have been made.

Dominion

Merchant Seamen Special Bonus Order

An Order in Council (P.C. 3227) of May 3, 1945, gazetted May 14, provides for a seaman, who has served at least six months on ship since September 10, 1939, to receive at the end of the war a bonus of 10 per cent on his total earnings, if he enrolls in the Merchant Seamen Reserve prior to August 31, 1945, or if he signs (or has signed) an agreement to serve for the duration of the war. A seaman with six months ship service who is medically unfit to enrol in the Merchant Seamen Reserve or in a manning pool is also eligible for the bonus.

A seaman with such service who subsequently becomes a member of the Armed Forces of Canada is to receive the bonus on discharge. In case of the death of a seaman the bonus is to be paid to his legal representatives.

The bonus is not payable for the period during which a seaman is eligible to receive a bonus under the Merchant Seamen War Service Bonus Order (L.G. 1944, p. 674). Seamen permanently employed by an owner or charterer of a ship, including radio operators employed by the Canadian Marconi Company, are entitled to the bonus if they agree in writing with the Director of Merchant Seamen before August 31, 1945, to continue serving at sea if required with the same employer, until the end of the war. A seaman residing in Canada on September 30, 1939, who later served on a United Kingdom ship and who

became liable for service for the duration on such a ship because of joining a United Kingdom Merchant Navy Reserve Pool, will be assumed to have enrolled in the Merchant Seaman Reserve prior to August 31, 1945, and will be eligible under this Order, except that "total earnings" in such case means wages, not including overtime, together with War Risk bonus earned on a ship in dangerous waters for as long as he is required to serve in the Pool, but does not include wages or War Risk bonus earned during a voyage after which he receives a discharge endorsed "D.R."

No bonus is payable to a seaman discharged from a manning pool for misconduct unless the Director, in knowledge of the facts, decides in his favour. Any eligible seaman may make application to the Director submitting certificates of discharge covering his full period of sea service since September 10, 1939, a statement of wages received on discharge, and any further information required by the Director. A seaman eligible to receive a bonus is assumed to have been in service as defined in the Veterans' Insurance Act, and is entitled to all benefits provided by the Act as if he were a veteran.

A seaman eligible for bonus is entitled to receive from the Director his railway fare from the port of official discharge in Canada to his residence in Canada, provided that a seaman discharged for medical reasons may receive his fare at the time of discharge. The Minister may make a grant to seamen eligible

for bonus to assist them in undertaking courses to increase their skill and knowledge for advancement in the Merchant Navy. All provisions of the Post-Discharge Re-establishment Order respecting vocational and technical training benefits are applicable *mutatis mutandis* to such grants.

Payment is monthly in arrears not exceeding his average monthly wages together with War Risk bonus earned on a ship during service between September 10, 1939, and April 1, 1944. The Order is administered by the Minister of Transport who may make necessary rules and orders to put this Order into effect.

Temporary Masters' Certificates for Certain Cargo Ships

A regulation of May 8, 1945, gazetted May 21 (P.C. 3244), provides for a temporary certificate as Master to be issued, upon payment of five dollars, to an applicant who is a British subject and who has passed the prescribed examination, to take charge of a cargo ship of between 40 and 150 tons gross tonnage engaged in home-trade inland or minor waters voyages within specified limits, if the Minister of Transport is satisfied that a duly certificated Master cannot be obtained. Such a certificate, valid for any period up to one year, but subject to suspension or cancellation for cause by the Minister, must describe the ship for which the certificate is issued, and specify the limits of the voyages which may be taken.

Veteran's Child Granted Allowance During Schooling up to 19 Years of Age

An Order in Council (P.C. 2971) of April 24, 1945, under the War Measures Act, adds to the definition of "child" for the purpose of the payment of a pension or allowance under the War Veterans' Allowance Act, 1930, and the Veterans' Dual Service Pension Order (L.G. 1944, p. 1405), a boy between 16 and 19 and a girl between 17 and 19, who is making satisfactory progress in school.

Salary Increases Restored to Certain Government Employees

Annual increases in salaries to civil servants and similar increases to employees not subject to the Civil Service Act are to be resumed to permanent employees of the Dominion Government whose annual salaries are \$3,000 or more. An Order in Council (26/2969) of April 25, 1945, revokes P.C. 9/628 of January 26, 1942, which prohibited statutory increases to employees receiving \$3,000 a year or over.

Pilotage By-laws in Certain Districts

An Order of May 1, 1945, gazetted May 19, rescinds by-law 53, (L.G. 1942, p. 690) governing the Pilotage District of New Westminster and establishes a new one.

The new by-law raises from seven to ten per cent of the gross revenue of the district the amount set aside each year for pensions. Pension payments depend on length of service subject to the provision that a licensed pilot is not entitled to any pension if he is retired under 50 years of age, or because of physical or mental disability occurring during temporary absence for other employment, or if his death occurs during such absence; but he or his estate may receive a refund without interest of a sum determined by the pilotage authority. It is also provided that a licensed pilot, retired at 50 or over, is entitled to a pension for life of two-thirds of what he would have received at retirement because of age or incapacity. At death not more than one-half the amount he was receiving is payable to his widow during widowhood.

The new by-law raises from \$50 to \$60 the amount payable to a pilot for each year of service, providing he does not receive more than \$1,200 in a year. His widow is entitled, during widowhood, to receive a monthly payment of not more than one-half the sum that would have been payable to her husband on retirement. Upon her death the pension may be divided equally among the pilot's surviving children up to the age of 18 years. The provision that no child may receive more than \$300 in any year has been dropped. Various changes in wording have been made to clarify the meaning.

New by-laws of May 12, 1945, gazetted May 18, effective April 1, 1945, give to any pilot in the four districts mentioned below, who fails to pass the annual examinations for eyesight, colour vision, form vision and hearing, a right to appeal for another examination at his own expense. The decision of the pilotage authorities is then final. The following by-laws are rescinded: by-law 18 (L.G. 1940, p. 808) for the Sydney, Nova Scotia pilotage district; by-law 24 of April 28, 1930, for the Halifax district; by-law 16 (L.G. 1943, p. 1566) for Bras d'Or Lakes; and by-law 24 of December 12, 1934, for the Saint John, New Brunswick district.

Other Orders: The following Orders have been summarized elsewhere in this issue: P.C. 3206 governing the appointment of an advisory committee on university training for

veterans; P.C. 3589 amending the Unemployment Insurance Act, 1940; P.C. 3671 regarding conventions and recommendations of the

International Labour Conference; and P.C. 3683 governing the Industrial Selection and Release Board and Committee.

Provincial

Alberta Hours of Work Act

Order 33 of March 29, 1945, and effective April 30, limits the hours of labour of all workers above ground about a coal mine to eight in a day and 48 in a 6-day week.

Alberta Labour Welfare Act

Order 1 under this Act, providing for holidays with pay for all employees in the coal mining industry, was made March 29, 1945, gazetted and effective April 30.

The Order stipulates that every employee must be given two weeks' holiday with pay at the basic daily wage-rate provided he has, between April 1 and September 1, in any year been in the employment of one employer for at least 12 consecutive months, and provided in addition, that he has not been absent from work for more than 90 days, including Sundays, public holidays, and vacation during this 12-month period, except due to reasons beyond his control.

Alberta Male Minimum Wage Act

An Order (No. 25) of March 29, 1945, gazetted and effective April 30, fixes for all workers above ground on or about any place where there is any natural bed of coal or where the land is being prepared for mining, a minimum rate of time and one-half for work in excess of eight hours in any one day, and 48 in any week of six days.

British Columbia Factories Act

Passenger Elevators.—Regulations governing passenger elevators in any buildings were approved by Order in Council of May 11, and gazetted May 17.

Each elevator must have automatic stops on the up-going side of the belt above the upper landing, so that, when the stops are thrown, the lift cannot be started again except from above the landing, and in addition, the belt may not travel more than two feet in either direction.

A hand-operated stopping device must be provided so that the lift may be stopped at any point by pulling the lever in the direction of belt travel.

A factor of safety of not less than six must be used for all materials in the construction

of lifts and the carrying load must not exceed 150 pounds per step. Other safety precautions include shear plates at an angle of not less than 60° and funnel-shaped at points of up-travel at which there is a projection within three feet, in any direction, in or in front of plate or belt; standard railings and toe-boards around all floor openings placed so as to allow a landing space of not less than two feet; non-slip floors inside the rail; operation instructions at each landing; warning signs and hand-holds. The minimum diameter of any floor-opening must be 30 inches. There must be 14 inches between the edge of the step and the floor opening measured at right angles to the plane of the belt and a four-foot clearance between the head pulley and the roof. An emergency platform provided with a permanent ladder or stairs to the top landing must be installed three feet below the highest point of belt travel when the latter is more than five feet above the landing. The maximum speed of the lift must not exceed 80 feet per minute. No passenger may be carried during freight transit, nor may the lift carry other than hand tools.

Women Workers.—Regulations governing female factory employees were also approved on May 11, and gazetted May 17.

On the written direction of the factory inspector, seats with back-rests and dressing-rooms with individual lockers must be provided for female workers. Women must not lift more than 35 pounds or do any overhead lifting or stacking. Those working near hazardous power-driven machinery must wear a cap, slacks, a coverall, or other approved substitutes. If the inspector so directs in writing, jewellery, open-toed shoes, and high heels may not be worn during working hours.

British Columbia Female Minimum Wage Act

The annual summer Order (52 p.) for the hotel and catering industry was made May 17, 1945, gazetted May 25.

Between June 18 and September 8, 1945, employees in resort hotels in unorganized districts may not work more than 10 hours in a day, nor more than 56 in a week. For work in excess of 48 hours time and a half must be paid. A 24-hour rest period must be given in each week. Under exceptional circumstan-

ces, employers and employees may apply to the Board for different arrangements. The provisions of Order 52b (LABOUR GAZETTE 1938, p. 622) are waived, which stipulate that the hours of an employee on a split shift must be confined within the 14 hours after he begins work, and each employee whose split shift extends over 12 hours must be paid at not less than one and one-half times the regular rate for the extended time.

British Columbia Hours of Work Act

Regulation (211) of May 17, 1945, gazetted May 25, provides that workers in the fruit and vegetable industry, including canning, preserving, drying, or packing fresh fruit or vegetables, may be exempt from the operation of the Act until March 31, 1946.

Quebec Minimum Wage Act

Order 16 governing butter and cheese exporters and Order 42 applying to work in connection with peat bogs have been renewed until January 1, 1947, by Orders of March 26, 1945, gazetted April 14.

The following have also been renewed until January 1, 1947, by Orders of April 9, gazetted and coming into force May 12: Order 17 governing laundries in the Montreal district; Order 13 for the match industry; Order 19 for full-fashioned hosiery mills.

Saskatchewan Child Welfare Act Mothers' Allowances

An Order rescinding previous Orders in Council governing mothers' allowances and establishing new regulations was made on April 19 and gazetted April 30, 1945. The amount of the allowance payable has been raised considerably over the scale established in 1942.

Under the new regulations a Social Welfare Board determines the amount payable and advises the Minister of Social Welfare regarding the Child Welfare Act and these regulations. Records are kept by the Director of the Social Aid Branch who advises the Board regarding granting, continuing, altering or withdrawing allowances, and performs other duties under the Act. The regulations lay down the procedure to be followed in connection with the payment of allowances.

The maximum allowances payable have been increased over those established in 1942 and in each case the maximum additional income permitted is \$540 a year. The present allowances and the increases are shown below:

	per month	per annum
Mother and 1 child from ..	\$10	to \$300
Mother and 2 children from	\$15	" \$420
" " 3 " "	\$20	" \$480
" " 4 " "	\$24	" \$540
" " 5 " "	\$28	" \$600
" " 6 " "	\$32	" \$660
" " 7 " "	\$36	" \$720
" " 8 " "	\$40	" \$780
" " 9 " "	\$44	" \$840

Mother with 10 children or more from \$48 per month to \$900 per annum.

The mother's allowance may be increased by \$120 a year where there is an incapacitated husband living at home. The allowance is to be reduced by \$120 where both parents are dead and a guardian is appointed to receive the allowance. In such case the children are not eligible for an allowance if there is other income. Where a mother is dead and the father is living but incapacitated, and a guardian is appointed, the allowance is as indicated above. The Board may permit a higher maximum income, apart from the allowance, where there are dependent children between 16 and 21 living at home, who are going to school or are incapacitated. Satisfactory progress at school must be certified by the teacher. In the case of incapacity of a parent or child a medical examination is required, to be repeated annually, if necessary.

The allowance must be reduced by a proportionate amount when the annual income of the mother, father, or the family exceeds \$540. When the dependent children concerned are outside their own home, no allowance may be paid to the recipient or guardian who must be a relative except with the approval of the Board.

To determine the maximum income involved, an applicant must take all sources of income into consideration: annuities, salary and income except family allowances, free rent, free board and room, and in the case of service men and women dependent's allowance with assigned pay but not including assigned pay where no dependent's allowance is payable.

No parent, or parent and dependent children, may receive an allowance where one or all own real and personal property having a net value of more than \$5,000, of which not more than \$2,500 may be in cash, securities or other liquid assets. The regulations lay down the conditions with respect to the amount that may be charged to income, applying to revenue-producing property.

If a recipient remains out of the province for longer than 30 days, her allowance may

be suspended but may be reinstated when the recipient is again in the province and intends to reside there.

The Board may recover any sum improperly paid as a result of non-disclosure of facts, misrepresentation or other cause. The Board may withhold payment, in part or in whole, until the aggregate amount of suspended payments equals the sum improperly paid less any amount recovered from the recipient. The Director may obtain any necessary information, without charge, from any Saskatchewan Government Department.

Saskatchewan Old Age and Blind Persons Pensions Act

A supplemental allowance of \$3 per month to old age and blind pensioners from May 1, 1945, was authorized by an Order made April 19 and gazetted April 30.

Only pensioners whose pensions originated in Saskatchewan are eligible, except where such a pensioner has moved to another province and this latter province enters into a reciprocal agreement with Saskatchewan regarding the payment of supplemental allowances. Allowances may be paid to pensioners during a temporary absence from the province of not more than one month. Where a pensioner is absent for a longer period, the pension authority may withhold payment until the amount wrongfully paid is made up. The pension authority may pay to the estate of a deceased pensioner the supplemental allowance computed to the date of the pensioner's death. No claim may be made against the estate for payments made by way of supplemental allowance.

Saskatchewan Public Service Act

By an Order in Council of May 15, 1945, (O.C. 723/45) gazetted May 31, the annual holiday of three weeks with pay which, in some cases, had been reduced to two weeks, was restored to employees in the Public Service except attendant staffs of mental hospitals. An earlier Order (LABOUR GAZETTE 1943 p. 1034) had authorized Departmental permanent heads of the Public Service and superintendents of mental hospitals in departments or hospitals where there was an acute shortage of staff, to reduce from three weeks to two the annual holidays granted with pay to employees of the Public Service and to provide compensatory leave to such employees in lieu of the week's holiday. This Order has now been rescinded.

Saskatchewan Steam Boilers Act

Regulations for the inspection, operation, and maintenance of pressure vessels were made

April 18 and gazetted April 30. They apply to any apparatus, over six inches in diameter or over one and one-half cubic feet in capacity, used for containing or storing air, gas, inflammable or lethal liquids, or steam, at a pressure exceeding fifteen pounds per square inch.

An inspector may enter any premises where a pressure vessel is being constructed, installed or operated, to inspect any part of the vessel, and may require it to be subjected to hydrostatic or air pressure to test either the vessel or the safety valve.

The safe working pressure of all vessels must be calculated by the inspector according to the formulae in the A.S.M.E. Code for Un-fired Pressure Vessels if the designs of the vessels have been registered with the Chief Inspector of Steam Boilers, and the manufacturer has furnished an affidavit stating that each vessel has been constructed according to the registered design. Where an unregistered pressure vessel was brought into Saskatchewan before February 6, 1941, the working pressure may be set at 80 per cent of that calculated by the formulae. No vessel brought into the province after February 6, 1941, may be used as a pressure vessel unless its design has been registered with the Chief Inspector of Steam Boilers.

All pressure vessels must be inspected every two years after which the inspector, on payment of the fee prescribed in these regulations, must issue a certificate stating the maximum pressure at which the vessel may be operated. Each owner, renter or lessee of a pressure vessel must hold a valid and subsisting certificate. The certificate must be posted in a conspicuous place near the pressure vessel, and must be produced at any time upon request by the inspector. A person failing to post up or produce an inspection certificate is guilty of a breach of the Act. A person operating a pressure vessel without a certificate, or operating a vessel at a higher pressure than specified on the certificate is liable to a fine of not less than \$10 and not more than \$25 and costs.

Each pressure vessel must be provided with an approved pressure gauge, safety valve, and drain valve, except where two or more vessels are connected in which case one pressure gauge and one safety valve may be used. Where repairs or fittings have been ordered by an inspector, the vessel must not be used until the repairs have been made.

An inspector must prove, by a thorough examination, that the regulations for inspection, operation and maintenance of pressure vessels are enforced. He must also test pressure gauges and see that the safety valves are set to release at the prescribed pressure, and that

they are sealed to prevent change being made by unauthorized persons. An inspector may cut holes in any pressure vessel to ascertain

the thickness of the plate or the internal condition of the vessel, or he may order the removal of any part for inspection.

Legal Decisions Affecting Labour

Nova Scotia Supreme Court Upholds Claim to Check-off of Union in Halifax Shipyards Limited

A MAJORITY decision of the Nova Scotia Supreme Court on February 10 upheld the claim of Local 1 of the Industrial Union of Marine and Shipbuilding Workers of Canada to have the union membership fees deducted by the company from the wages of the members of the union who are employed in Halifax and Dartmouth, by Halifax Shipyards Limited. The question of the union's right to the check-off of union dues was referred for an opinion to the Supreme Court by the Governor in Council of Nova Scotia under the provisions of a statute authorizing the Government to refer to the Court for consideration any matter which it thinks fit to refer. Three members of the Court were of the opinion that the company is required under the Trade Union Act, 1937, of Nova Scotia to make deductions for payments to the trade union.

By an agreement concerning conditions of work which was entered into by the company and the union on January 30, 1945, it was provided:

If it be determined that the provisions of the Trade Union Act of Nova Scotia relating to check-off for union dues apply to this company and the union establishes its legal position, the company agrees to conform with the relevant provisions of the legislation. The company, however, contends that such provisions have no application to this company and reserves all objections thereto.

The agreement was made following an investigation by Mr. Justice Gillanders of the Supreme Court of Ontario into differences between the parties in pursuance of his appointment as an Industrial Disputes Inquiry Commissioner under Section 8 of Order in Council P.C. 4020 (L.G., March, 1945, p. 344).

Section 12 of the Trade Union Act, 1937, reads as follows:

In any industry in which by statute or by arrangement between employer and employees deductions are made from the wages of employees for benefit societies, hospital charges, or the like, deductions shall be made by the employer from the wages of employees for periodical payments to a trade union of employees—

(a) if the officers of such trade union thereunto duly authorized by its members make application to the Minister of Labour for the taking of a vote to ascertain the wishes of the employees of such industry in respect to such deductions; and

- (b) if, upon a vote taken by ballot at times and under conditions fixed by the Minister of Labour, a majority of the employees of such industry vote in favour of the making of such deductions; and
- (c) if the individual employee being a member of such trade union makes to the employer a signed written request that such deductions be made from the wages due to him therein indicating the name of the person to whom such deductions shall be paid.

The question of the application of this section to Halifax Shipyards Limited turned on the question as to whether the section applied when at the actual time when the union requested a check-off for union dues, there was no check-off "for benefit societies, hospital charges, or the like".

The Order in Council referring the question to the Court stated that

Deductions of ten cents per week were made from the wages of employees of Halifax Shipyards Limited, for a benefit society, namely, Halifax Shipyards Employees' Mutual Benefit Society, during the period from December, 1922, to July 7, 1941.

Mr. Justice Doull set out the circumstances in these words:

... at the passing of the Act there was a well-established practice of deducting from time to time periodical payments for a benefit society ... as the practice existed for some eighteen years, I think that the inference is irresistible that it was by arrangement. . . .

The result is that on the passing of the Act, Halifax Shipyards Limited was a company to which Section 12 applied and it was bound to make periodic deductions for a trade union when the employees had complied with (a), (b) and (c) of Section 12.

The employees did not take action under the Section but it is agreed that the Union has claimed, since before July 7, 1941, in correspondence with the employer and with the Minister of Labour, that it had the right to have deductions made for union dues.

On May 7, 1941, a Conciliation Board was set up to consider questions which had arisen between this employer and its employees in regard to wages and working conditions, this matter of deduction of union dues being one of the questions.

On July 7, 1941, while the Conciliation Board had these matters under advisement, the Company discontinued the making of deductions for the benefit society and has since taken the ground that it is not such a Company as is required to make deductions for Union payments under the provisions of Section 12.

The company's argument was that, while the company was checking off deductions for the benefit society, steps must have been

taken by the union to make the application required by the statute for a ballot among the employees to determine their wishes in regard to a check-off of union dues. On this point Chief Justice Chisholm said:

... the deductions were discontinued by the company without notice to the union or the employees. It is now contended by the company that it is the situation at the time when the employees applied under the provisions of the Act for deductions and not at the time when the Trade Union Act became law, namely April 17, 1937, that has to be considered. I cannot agree to that view. The Interpretation Act, Ch. 1, section 23 (1) declares:

The law shall be considered as always speaking and whenever any matter or thing is expressed in the present tense, the same shall be applied to the circumstances as they arise so that effect may be given to every Chapter or Act and every part thereof, according to its spirit, true intent and meaning.

When the Act was passed, certain deductions, as already mentioned, were in fact made by mutual arrangement between the Company and the employees and the right to make application under the Act conferred a present right upon the employees; of which, though still inchoate, they could not be divested by unilateral action by the Company. If it were otherwise, and an employing Company which was making a deduction when the Act was passed decided to put an end to the arrangement by discontinuing the practice, section 12 of the Act would become completely nugatory.

Or, in the words of Mr. Justice Doull:

In the present case the employees of the Company were endeavouring to obtain a check-off of Union dues in 1941 and the Company was insisting that they were not required to make such deductions. While the matter was before a Conciliation Board, the Company endeavoured to change the situation by ceasing to make deductions for the benefit society.

Mr. Justice Graham gave his opinion on the point thus:

... even if the statute is speaking only of the present, the present reasonably includes, in the circumstances of this case, not only the 7th of July, 1941, when the last deductions were made, but the time during which the right to have the check-off has continued to be claimed and to be kept in being by the "check-off article" of the agreement between the Company and the Union.

Mr. Justice Hall, dissenting, held that the Court was bound to apply, "the plain, literal and grammatical meaning of the words" of the statute. He, therefore concluded:

If at the time, or after, the employees have fulfilled the conditions imposed upon them by the subsections the Company is checking-off for benefit societies or the like, it is compelled to check-off for payments to the trade union, but not otherwise.

In re Reference of Application of Section 12 of Trade Union Act to Halifax Shipyards Limited, Supreme Court of Nova Scotia, February 10, 1945.

Application of Ontario Industrial Standards Act to Clothing Industry Valid—Privy Council Refuses Leave to Appeal

An application by certain Ontario clothing firms for leave to appeal to the Judicial Committee of the Privy Council from a judgment of the Supreme Court of Canada in a case involving the Industrial Standards Act of Ontario has been refused by the Privy Council. The Supreme Court had dismissed the appeal with costs and affirmed the judgment of the Ontario Court of Appeal.

The original action was brought against the Advisory Committee for the Men's and Boys' Clothing Industry which was set up to administer a schedule of wages and hours made legally binding on the industry in Ontario by an Order in Council made under the authority of the Industrial Standards Act. The plaintiffs claimed a declaration that the Act was *ultra vires* the provincial legislature. The action was dismissed by Mrs. Justice Roach (L.G., 1940, p. 884). One of the plaintiffs, the Tolton Manufacturing Company, then withdrew from the action.

The Ontario Court of Appeal granted the remaining plaintiffs leave to amend their statement of claim in order that they might claim specifically that the regulations and schedule were invalid as not being in conformity with the Industrial Standards Act. This action was dismissed by Mr. Justice Mackay on September 4, 1942 (L.G., 1942, p. 1504) and an appeal against his judgment was dismissed by the Ontario Court of Appeal on June 30, 1943 (L.G., 1943, p. 1175). The defendants then appealed to the Supreme Court of Canada which gave judgment on October 3, 1944.

The Court of Appeal held that the Industrial Standards Act and regulations were not *ultra vires* the Ontario Legislature and the procedure followed in drawing up the schedule of wages and hours for the men's clothing industry sufficiently complied with the Act and regulations.

The Supreme Court found that the public notice published on January 6, 1939, in three Toronto newspapers that a conference of employers and employed in the industry would be held on January 16 to consider and negotiate a schedule of wages and hours, together with notices sent to a long list of individual employers and trade union representatives in the industry whose names appeared on a list on file in the Department of Labour, was sufficient notice. The Act leaves such matters to the discretion of the Minister and his officers as long as they act in good faith and that was not questioned. In the words of Chief Justice Rinfret:

The Minister and his officers were justified in proceeding upon notice to those employers

whose names appeared on the departmental list and to the officials of the various unions who, in Mr. Fine's opinion, represented the great majority of the employees engaged in the industry. . . . The Minister and his officers were also justified in omitting custom tailors from the conference.

A schedule was agreed to by the conference and as to the objection that this conference was not sufficiently representative of the industry, the Court pointed out that by the Act the Minister had the right to determine what was a proper and sufficient representation and his decision on this point is not reviewable by the Courts.

The objection by the appellants to the fixing of different rates for two sections of the Province when the Minister had designated the whole province as one zone was held to fail. The conference had power under the Act to make separate zones and the Minister approved this division when he approved the schedule.

It was argued that the Act was constitutionally invalid because the legislature in its enactment "delegated" to the Industry and Labour Board of Ontario authority "to override and nullify many of the things previously done by the conference, the Minister and Order in Council". The reference is to the powers of the Board, with the concurrence of the Advisory Committee for the industry, to amend the provisions of any schedule and, in the case of any industry in which there was inter-provincial competition, to approve or withhold approval of the provisions for the collection of revenue from employers and employed in the industry. The Court considered that there was nothing in the British North America Act to prohibit the granting of such authority to the Board.

As to the further point that the legislature had no authority to give to the Industry and Labour Board "the same powers as a Court, being power to exercise judicial functions", the Supreme Court found that the Board was "merely an administrative body", "certainly not a court of justice analogous to a superior, district or county court".

Again, on the argument that the Act and regulations authorized, contrary to the B.N.A. Act, the imposition of an indirect tax in providing for an assessment on employers and employed to take care of the cost of administering a schedule, the Court held that if it were a tax, it was a direct tax and, in the words of the court,

in any event, it may be justified as a fee for services rendered by the Province or by its authorized instrumentalities under the powers given provincial legislature by . . . the British North America Act.

Finally, as regards the argument that the Industrial Standards Act, regulations and schedule are *ultra vires* because they encroach upon a field occupied by the Dominion in the Combines Investigation Act, the Supreme Court agreed with Mr. Justice Kellock of the Ontario Court of Appeal that the legislature

would undoubtedly have power and authority to enact anything which is found in the schedule . . . and such legislation (and therefore the combined effect of the Act, regulations and schedule) cannot be said to be a "combine" within the meaning of the Dominion Act.

In view of these conclusions the Supreme Court held it was unnecessary to consider the question as to whether the Advisory Committee was a proper party defendant. *Ontario Boys' Wear Limited et al. v. the Advisory Committee and the Attorney General of Ontario* (1944) S.C.R. 349.

Action for Damages from Benzol Poisoning Fails Under Both Ontario Workmen's Compensation and Factory Acts

An action brought by a woman employed by Durable Waterproofs, Ltd., for damages caused by poisoning from the inhalation of benzol fumes in the course of her work, was dismissed on January 25, by Mr. Justice Roach of the Ontario High Court of Justice. The Court considered provisions of both the Ontario Workmen's Compensation Act and the Factory, Shop and Office Building Act.

The plaintiff worked on leather handbags to which she applied wet cement. In 1942 when the particular brand of cement became unobtainable, a substitute manufactured by the Gutta Percha and Rubber Ltd., was obtained through one Fingerhut. The manufacturer indicated on the label of the containers that the cement contained benzol, but Fingerhut, desiring to conceal from the Durable Company his source of supply, removed the label. Regulations under the Factory, Shop and Office Building Act require "manufacturers and distributors of substances containing benzol as an ingredient for use in any industrial process," to indicate the presence of benzol by a label affixed to each container.

When the plaintiff became ill after using the cement from November 23, 1942, until April 19, 1943, it was found that her illness was the result of benzol poisoning. The Workmen's Compensation Board, to whom she made application for compensation, paid her medical expenses and a sum by way of compensation for loss of earnings.

The action was originally brought against Durable Waterproofs Ltd., its president and general manager, Gutta Percha and Rubber

Limited, Fingerhut, and Vereschack who was the manager of the leather production division of the Durable Company. At the opening of the trial the action was either discontinued or dismissed (on consent) against all defendants except Vereschack.

The Workmen's Compensation Act provides that compensation is in lieu of all right of action by the employee against the employer, and where the worker would have a right of action against a person other than the employer, the worker may choose to claim compensation or to bring an action. If the worker elects to claim compensation, the Board becomes entitled to bring an action against the person against whom the action lies and any sum recovered by the Board forms part of the provincial accident fund. Since the plaintiff in this case had signed an application for compensation, the Board and not the plaintiff was entitled to bring action against the defendant. The Court thus held that in view of these provisions of the Workmen's Compensation Act, the plaintiff had no right of action against the defendant.

In the opinion of the Court, however, the action would have to be dismissed "quite apart from any of the provisions of the Workmen's Compensation Act." It was alleged that the defendant was negligent in not warning the plaintiff concerning the dangerous nature of the cement, that he violated the Regulations under the Factory, Shop and Office Building Act by not labelling the containers properly and that he breached the Act by failing to provide proper ventilation to carry off the poisonous fumes.

The Court found that the defendant had no knowledge of the dangerous nature of the cement, that he saw no labels on the containers, and that his test of the cement for inflammability did not reveal its dangerous nature. The Court found also that the Factory, Shop and Office Building Act imposes certain duties upon an employer, but that Vereschack was not the employer. He and the plaintiff were both employees of a common employer and the defendant could not be held liable for any injury to another employee. *Siebel v. Vereschack* (1945) Ontario Weekly Notes 185.

Quebec Superior Court Refuses Injunction against Wartime Labour Relations Board

On February 8 Mr. Justice Boulanger of the Superior Court for the Quebec district rejected with costs against the plaintiffs an application for an injunction restraining the Wartime Labour Relations Board of Canada, which was established to administer the Wartime

Labour Relations Regulations (P.C. 1003), from proceeding to determine by a ballot among the employees what labour organization the latter wished to represent them in negotiating for a collective agreement with their employer, La Traverse de Levis, Ltee. The organizations claiming the right to represent the Levis Ferry employees were the Canadian Brotherhood of Railway Employees and Other Transport Workers and the National Catholic Syndicate of Ferry Employees of Levis. This judgment is being appealed.

A temporary injunction prohibiting the Board from proceeding had been granted on July 24, 1944, and was renewed from time to time. On September 27, an interlocutory order to the same effect was made. The plaintiffs in their amended claim for a permanent injunction asked also for a declaration (1) that they had a right to vote with other employees for bargaining representatives and (2) that the exclusion of the plaintiffs from the vote arranged for by the Wartime Labour Relations Board was "illegal, irregular and void" and that the order of the Board providing for such a vote should be annulled.

The six plaintiffs were employed by the Levis Ferry Co., as office workers, captains or second captains. In directing that "the captain, the second captain and the management staff" should not participate in the voting, the Board, in the opinion of the Court, did so on the ground that they were a different class from the crew, labourers, longshoremen and ticket collectors employed by the Levis Ferry. The Regulations stipulate that "employee" does not include "a person employed in a confidential capacity or having authority to employ or discharge employees." Mr. Justice Boulanger stated:

As a means of information, the Board could take a ballot among the workers of La Traverse in order to determine the respective strength of the two rival unions, and find which of them controlled the majority of the workers. As the Board had the right to take this ballot, it certainly had also the accessory and corollary right to declare who could vote.

After obtaining information by lawful means, the Board came to the conclusion that the office employees, the captains and the seconds were in a class of employees different from that of mere crew members, common labourers, longshoremen, ticket collectors and labourers, and that the professional interests of this superior class of employees differ from those of employees in the other group. The Board, therefore, ruled that office employees, captains and seconds would not take part in the voting . . .

It has been proven that it is the office . . . which employs and dismisses the men. Furthermore, it has been proven that captains (and seconds when acting for captains) are

masters on board their ship, and that they have complete authority over the crew and control members, and if they do not hire or discharge men, they, however, make suggestions and recommendations which are taken into account . . . It is, therefore, evident that office employees and captains and seconds are in a class by themselves; that their interests are not the same as those of ordinary salaried workers, and that they participate, to a certain extent, in the management of the enterprise.

It is in line with the spirit of the Order in Council to try and group together workers with identical interests and of the same category for the purpose of signing collective agreements with the employers. That is why those employees who have confidential responsibilities, or who have something to do with the hiring and discharging of men, are grouped in a separate classification.

The defendant, the Wartime Labour Relations Board, claimed that the Superior Court had no jurisdiction over any decision given by it in its official capacity since the Board was established by a Dominion Government Order in Council and is a mandatory body deriving its powers from the Crown. The Exchequer Court, the Board claimed, had jurisdiction in such a matter.

As regards this argument, Mr. Justice Boulanger considered:

If, however, as it has often been ruled, the lower court with general jurisdiction in the province may, by power of injunction or prohibition, exercise its powers of control, of supervision and of reform over bodies created by the Dominion (Army Courts, Arbitration Councils, Conciliation and Investigation Boards) when such bodies are operating in the province, it should—by analogy—be optional for the Province of Quebec Superior Court to claim competency to examine the validity of the Board's actions, when the matter in question was business purely and essentially local and provincial.

In fact, there cannot be any enterprise more local and more provincial than that of "La Traverse", which does nothing else than transport people and merchandise between Quebec and Levis on the St. Lawrence River where it is not a mile wide; its undertaking is fully restricted within the limits of Quebec, Levis and the Quebec Harbour. Looking into relations between workers and employers in this local enterprise, the Board has, in the province of Quebec, exercised its jurisdiction with regard to a matter falling under the territorial competency of the Superior Court sitting in the Quebec District. . . . It would be absurd and inequitable to require the Parties concerned in this purely local case, when their logical forum is at their door, to go to the Exchequer Court of Canada or to the Supreme Court of Ontario, for complaints against the Board's actions and decisions just because it happened to sit in Ottawa. . . . Besides, in the present case, it is not a question of appeal for damages against officials, but the reform of a ruling alleged to have been made contrarily to the law, and which is enforceable in the Quebec district.

Therefore, from this point of view, consideration of the Board as a tribunal performing judicial functions, or as a group of legal or technical advisers counselling the Labour Minister and helping him to enforce the Wartime Labour Relations Regulations, is of no importance. Whether their ruling be judicial or administrative, if they have not observed the law in such a ruling and have overridden their commission, said ruling may be examined and corrected by the lower court of the locality where it is wished to have such ruling executed.

The Superior Court, which by virtue of Article 50 of the Quebec Code of Civil Procedure, has "superintending and reforming power, order and control" of all Courts (except the Court of King's Bench), magistrates and "all other persons and bodies, politic and corporate", within the Province, has "the power to intervene by way of an injunction in the execution within the Province of an Order of the Board". But

it can, however, use this power only after being convinced that the Board in making said order has clearly exceeded its jurisdiction, has gone beyond its competency, has committed an unlawful act or an injustice equivalent to oppression and fraud and that the contested Order constitutes an absolute denial of justice. . . the Superior Court cannot substitute its judgment for that of a lower Court because in exercising the right of supervision conferred by Section 50 of C.P.C., it does not act as Court of Appeal.

Demers et al v. Wartime Labour Relations Board et al. Superior Court, Quebec, February 8, 1945.

Petition Fails for Injunction against Home-Work in Quebec Dress Industry

The position of home-work in the Montreal dress industry came before the Courts when Morris Miller, doing business under the name of Maurice Dress Co., was convicted on July 18, 1944, by Mr. Justice Legrand in the Montreal Court of Sessions on several charges of violating a provision of the Decree relating to the dress industry. The proceedings were instituted by the Joint Committee for the Dress Industry established under the Collective Agreement Act. The defendant was sentenced on each charge to a fine of \$5 and costs or to eight days in jail. On September 9, Mr. Justice Casgrain of the Superior Court refused petitions for writs of certiorari so that these judgments could be reviewed in a higher Court.

An interim injunction was issued on October 6, to restrain Miller from giving out work to be done at the workers' homes. The injunction was to remain in effect until October 25 but was continued until a decision was made on the petition for an interlocutory injunction.

On November 8, Mr. Justice Tyndale of the Superior Court, after hearing argument on the merits of an interlocutory injunction, dismissed the application for an interlocutory injunction with costs against the petitioner.

The Decree applying to the dress industry, made under the authority of the Quebec Collective Agreement Act, was passed by Order in Council on September 24, 1940, and amended from time to time. Section 12 of the Decree stipulates that "no work shall be given to employees to be manufactured or worked on at home".

The facts and history of the case are set out by Mr. Justice Tyndale:

About half of the machine sewing required for the garments produced is done by women who work in their own homes on their own machines... The home workers buy the thread required from the respondent... The home worker is paid by the piece, in the same manner as is the factory worker, but for the former, the rate is ten cents a dozen higher.

As regards the section of the Decree purporting to prohibit home-work, the Court pointed out that the Joint Committee for the Dress Industry was appointed in the fall of 1940 just after the Decree was issued and that there had been no change in its membership.

From the beginning, the Commission knew that Respondent and many other dress manufacturers were giving out home work; and, indeed, the manufacturers were required to send in to the Commission each month a return of the work done outside their establishments. Reference may be made in this connection to Exhibits I-1 and I-5. The Exhibit I-5 is a letter from the Administrator of the Commission to Respondent, dated July 23rd, 1942, and contains the following paragraph:—

"These forms which provide for a complete record of all work given by you to be done outside of your establishment by contractors, subcontractors, homework distributors, home-workers or any other persons, must be submitted monthly together with the payroll report."

It is, therefore, reasonable to conclude that the Commission, at that time, did not consider such home work to be in contravention of Section XII.

A 1943 case was referred to in which the defendant was charged with violating the Decree by paying lower rates for home-work than those fixed by the Decree. The complaint was dismissed by Mr. Justice Tellier who held that the contract for work at home was not a contract of service or employment but a contract to do a job. He considered that the provisions of the Decree did not apply.

In the same Court a similar charge was dismissed by Mr. Justice Guerin who considered that the Joint Committee could have prosecuted the defendant in the case for

giving out work to be done at home in breach of Section 12 but could not prosecute her for paying wages below the rates fixed in the Decree when the latter does not enact any provisions concerning home-work except to prohibit it.

Mr. Justice Tyndale considered that in view of the circumstances the interpretation of Section 12 of the Decree should be deferred until the action has been heard and pleaded on its merits. He discussed the petition before him for an interlocutory injunction to restrain the defendant from giving out work to be done at home in the following terms:

The undersigned is asked to issue an order which would put a stop to a practice which has been going on for some time—which would, in other words, disturb the *status quo*. Petitioner urges that the Decree is specially intended to introduce and enforce important new provisions governing the dress industry, which will and were designed to disturb the *status quo*; and that there should, accordingly, be no hesitation in giving effect to such provisions, which are of public order. That contention is, on its face, perfectly sound; and if Section XII clearly applied to home-workers the undersigned would not hesitate. But there is, in the mind of the undersigned, a real doubt upon the point and he does not feel that the order requested should be issued at this stage of the case. On an application for an interlocutory injunction, if the right of the Petitioner is not absolutely clear, the Judge should consider the "balance of convenience", which in this instance appears obviously against Petitioner. The enforcement of the order would not only seriously disturb Respondent's business; it would also deprive many home-workers of a source of earnings. It seems to the undersigned that if those who drafted the Decree intended to bring about such a drastic change in the existing practice, they could have and should have expressed that intention by clear and unambiguous words.

On the whole, the undersigned is of the opinion that the *status quo* should not be disturbed unless and until the trial judge finds that Section XII should be interpreted as Petitioner contends.

Joint Committee for the Dress Industry v. Morris Miller. Superior Court, Montreal, November 8, 1944.

English Employer's Obligation to Provide Safe Conditions Extends to Normal and Reasonable Acts During Working Hours

The Ministry of Labour Gazette for March 1 summarizes the judgments in an action in England against employers for failure to comply with their common law obligation to maintain proper plant and appliances and to provide a safe system of working. The County Court Judge held that the employers had not carried out their obligation but dismissed the

action on the ground that the plaintiff suffered injury when she was at the place of danger for her own purposes and not for the purpose of her work. The Court of Appeal allowed the appeal and gave judgment for the plaintiff, the Master of the Rolls stating that the obligation of the employer to provide safe working conditions extended to all such acts as were normally and reasonably incidental to the day's work of a workman.

In the workshop against a wall was a row of vats containing "suds" for oiling and cooling the lathes in use in the shop. A "duck-board", or loose wooden step near the vats, enabled the workmen to dip their buckets and fill them with the "suds". It was the duty of a labourer from time to time to clean the floor and the duck-board and to put sawdust on them so as to prevent them from becoming slippery from liquid splashed from the buckets.

During working hours the plaintiff went to a tap, which was above the vats, to wash a teacup which she used for her own purposes. She slipped on the step on which no sawdust had been placed after "suds" had been splashed on it. In the opinion of the County Court Judge the system used by the defendant em-

ployers was not a proper system and the dangerous condition of the duck-board could not be attributed to the casual negligence of the labourer in not putting down sawdust when it was required. He refused damages however, because the plaintiff went to the tap, not for the purpose of her work, but to wash a teacup for her own use.

On this point on appeal, Lord Green, Master of the Rolls, said that a workman might require to tie his boot-lace, he might require to get a drink of water while he was working. It would be an extravagant result if the common law obligation of the employer suddenly came to an end the moment the workman ceased to perform the precise acts which he was employed to perform and did something which was ordinarily and reasonably incidental to his day's work. If the doctrine were as extreme as that, it would mean that if two workmen had gone to the tap, the one to clean his tools and the other to get a glass of water to drink, and either of them had met with an accident because the duck-board was dangerous, one would be entitled to recover damages and the other would not. *Davidson v. Handley Page Ltd.*, Court of Appeal, December 20, 1944.

Workmen's Compensation in New Brunswick

COVERING the calendar year 1944, the twenty-sixth annual report of the Workmen's Compensation Board of New Brunswick shows that the total estimated income for 1944 was \$1,419,295.22 and the estimated expenditure was \$1,162,918.31, leaving an estimated credit balance of \$256,376.91. When this credit balance is added to the cumulative credit balance of \$1,947,112.54 carried forward from 1943, there was an estimated surplus of \$2,203,498.45.

Complete statistics for 1943 are given in the report. The cost of compensation in 1943 was \$899,425.11 when a total of 11,355 accidents were reported to the Board. Of these accidents, 29 were fatal, one resulted in permanent disability, 224 in permanent partial disability, 7,175 in temporary total disability, while 3,926 required medical aid only. This compares with a total of 11,535 in 1942, of which 34 were fatal, 215 resulted in permanent

partial disability, 7,356 in temporary total disability and 3,930 required medical aid only.

Causes of accidents in 1943 which were reported to the Board were classified as follows: Prime movers, 253; working machines, 876; hoisting apparatus, 390; dangerous substances, 353; stepping on or striking against objects, 1,336; falling objects, 1,945; handling objects, 1,716; tools, 1,291; runaways and animals, 85.

In addition to the number of accidents set forth in the report, the Board adjusted all claims submitted through the different Departments of the Dominion Government operating in New Brunswick; also claims submitted through the Departments of the Government of New Brunswick. For these services the Board was remunerated by the respective Governments in the amount of \$13,033.98, which amount was credited to the cost of administration for the year. The net administrative expense for 1944, was \$67,333.22.

Prices, Retail and Wholesale, in Canada, May, 1945

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index for May 1, 1945 of 119.0, indicated a gain of 0.3 points over the April 2 level, and a wartime rise of 18.1 per cent. Strength in foods was mainly responsible for the advance, an index for this series moving up 0.7 points to 131.7. It reflected higher prices for fresh vegetables and fruits which outweighed weakness in dairy products and eggs. Scattered price advances increased group indexes for homefurnishings 0.4 to 118.9 and clothing 0.2 points to 122.0. Rents moved up 0.1 to 112.1, while fuel and light receded a similar amount to 106.6. Changes in hospital

rates and barbers' fees were primarily responsible for a gain of 0.2 to 109.4 in the miscellaneous items index.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of

† Commodities in the cost-of-living index excluding rents and services.

the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing

(11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$32.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime

Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title, *Activities of the Wartime Prices and Trade Board*.

Wholesale Prices, April, 1945

Wholesale prices were firmer again in April, the monthly composite index for 508 commodities advancing 0.4 point above the March level to 103.4. This was due to a rise of 2.2 points to 120.5 in wood, wood products and paper, on higher prices for newsprint paper and spruce lumber. The newsprint advance of \$3 per ton (U.S. funds) affected export prices only. Declines were registered by two groups; animal products decreased 0.1 to

106.9 following a reduction in eggs and butter which outweighed gains in live stock and lard, while chemicals and allied products weakened the same amount to 100.0. The remaining five groups were unchanged at the following levels: vegetable products 96.0; fibres, textiles and textile products 91.7; iron and its products 117.2; non-ferrous metals 79.7 and non-metallic minerals 103.1.

The Canadian farm product wholesale price index recorded an increase of 0.2 to 105.3 between March and April. Animal products advanced 0.6 to 124.2, due to higher prices for live stock which outweighed a decrease in eggs. Field products were unchanged at 94.0, upturns for potatoes and rye balancing weakness in hay and onions.

Legislative Proposals of Labour Organizations

PROPOSALS for legislation were submitted recently to the governments of the provinces of Nova Scotia and Ontario by the provincial federations of the Canadian Congress of Labour and to the government of Alberta

by a delegation from the Alberta Federation of Labour (Trades and Labour Congress). A summary of these proposals which deal with a number of matters of special interest to labour, follows:

Nova Scotia Federation, Canadian Congress of Labour

Recently, a deputation from the Nova Scotia Federation of Labour (Canadian Congress of Labour), headed by Thomas MacLachlan, President, presented a series of legislative proposals to Prime Minister A. S. MacMillan and members of his cabinet.

The following is a digest of some of the recommendations made by the deputation:

(1) That the provincial government take action at once with a view to having new coal mines opened in the Sydney, North Sydney and Inverness areas in order to provide employment for the growing population;

(2) That an increase of from half a cent to one cent per ton of coal sold be made to the government allowance grants to the Workers' Relief Societies in the coal industry;

(3) That inquiries into fatal accidents in the coal mining industry be determined before chosen juries of miners;

(4) That first-aid stations be established underground in the larger coal mines;

(5) That an immediate housing survey of the province be made in co-operation with organized workers and farmers with a view to formulating a town planning program which would include slum clearance, the provision of proper sanitary facilities and the creation of suitable parks, playgrounds and community centres;

(6) That free school books be provided for all Grades, including Grade XII;

(7) That labour be given representation on all planning boards and commissions established in the province in connection with postwar reconstruction and rehabilitation;

(8) That organized government employees be given recognition;

(9) That the Workmen's Compensation Act, the Factories Act and the Coal Mines Regulations Act be amended in several particulars;

(10) That the qualifying age for old age pensions be lowered to 60 years and the minimum pension raised to \$50.00 per month;

(11) That the store hours of the Liquor Control Commission be changed so that workers would have better opportunities to purchase supplies;

(12) That legislation be enacted making accident insurance compulsory for all bus and tram car travellers;

(13) That labour be given direct representation on boards set up to examine applicants for miners' and electrical operators' certificates;

(14) That day nurseries be established by the provincial government in co-operation with the municipalities and that free hospitalization be provided for maternity cases;

(15) That a Labour Code be set up for Nova Scotia which would make provision for (a) ratifying union shop agreements after a union has been certified as the bargaining

agency (b) defining unfair labour practices with adequate penalties therefor (c) the application of the check-off, and (d) the outlawing of company unions.

Ontario Executive, Canadian Congress of Labour

A delegation from the Ontario Federation of Labour (Canadian Congress of Labour) headed by President Elroy Robson, interviewed the Prime Minister, Hon. George Drew and members of his cabinet early in March, and presented several legislative proposals of special interest to Labour. The delegation represented approximately 150,000 union workers employed in such Ontario industries as, automobile, aircraft, steel, mining, building, furniture, textiles, furs, electrical, transportation, printing, rubber, leather, packing house and others.

The delegation urged that a permanent labour code should be established without delay inasmuch as the Regulations provided by the Federal Order in Council P.C. 1003 were considered inadequate. It was suggested that the code should include provisions for the compulsory maintenance-of-membership, union shop and check-off clauses when these were requested by a majority of the employees of a certified bargaining agency. Simplification of certification procedure and the abolition of company unions was urged.

The delegation recommended the appointment of a labour liaison officer whose duty it would be to expedite procedure in connection with cases brought before the Regional War Labour Board of Ontario.

Amendments in the Workmen's Compensation Act were asked to provide for more generous treatment of workmen suffering from silicosis and hernia. It was also suggested that a Legislative Committee be established to make a general study of workmen's compensation in Ontario, especially with regard to the extent and duration of compensation paid to injured workers.

Changes in legislation affecting education were suggested, such as providing free text books in all schools through to university; the establishment of evening classes for adults; the making of larger grants to more students to enable them to continue their education; larger salaries for teachers with provision for greater security and collective bargaining; and the planning of the construction of schools so that they might also be used as community centres. The delegation urged the government to co-operate fully with the Federal government in providing vocational training and refresher courses for ex-members of the armed forces, especially those who were

handicapped. It was also urged that the school-leaving age be raised to 18 years.

The appointment of more factory inspectors and more frequent and thorough inspection of factories was urged. It was also requested that copies of reports of factory inspectors be furnished to the union which has an agreement covering the employees of such plants.

The establishment of a Housing Commission was recommended to study the problem of housing and to formulate a policy to relieve the current shortage of houses, to correct existing sub-standard housing conditions where necessary and to give leadership to municipalities operating under the Federal housing plan.

It was suggested that a conference be called by the Department of Highways of all interested bodies, including labour, to discuss ways and means of improving and extending provincial highways as soon after the end of the war as possible.

The taxation of public utilities was opposed and the extension of hydro-electric power services was urged so that, ultimately, every home in the province would be served.

Improved standards of physical fitness were stated to be necessities and, to this end, a program of health and recreation should be developed. Further, it was suggested that certificates of health be required before marriage licenses were issued.

The Government was commended for legislation providing one week's vacation with pay, but it was recommended that this be extended to two weeks. It was urged that the minimum wages for adults be raised; that the principle of equal pay for equal work be established; and that the payment of premium rates be provided for work done other than on day shifts.

The abolition of the municipal poll tax and the setting of the voting age at 18 years was advocated. The government was urged to take all possible steps to prevent discrimination against workers on grounds of race, colour, creed or nationality.

The delegation also requested the abolition of the means test in connection with old age pensions and expressed opposition to the taxation of co-operatives or credit unions and to the levying of amusement taxes on tickets of less than 50 cents in value.

Alberta Federation, Trades and Labour Congress

A delegation from the Alberta Federation of Labour (Trades and Labour Congress) recently presented a number of legislative proposals to the Government of that Province.

Dealing with collective bargaining and union recognition, the opinion was expressed that the successful operation of the Industrial Disputes and Conciliation Act was being interfered with by the wartime orders and regulations which the Federal Government considered essential. It was claimed that directive orders of Selective Service Officers showed clearly the necessity for defining more clearly what is meant by "temporary employees". It was held too, that the Act should stipulate, or give the Board of Industrial Relations the power to stipulate, the date of closing of lists of employees allowed to vote to elect a bargaining agency. It was requested further, that election procedure be modified to permit of voting over a period of 24 hours, and that union agreements, when duly completed, should remain in force for a minimum of one year. The delegation also urged that both unions be represented on conciliation boards in the case of jurisdictional disputes and that union membership be more clearly defined.

It was recommended that truck and taxi drivers and restaurant employees be brought under the Hours of Work Act and that legislation be provided making statutory holidays and vacations with pay compulsory. While asserting that federal laws controlling wages in wartime interfered with provincial legislation with respect to minimum wages, the Government was urged to enact legislation with a view to raising minimum wages to provide a better standard of living for workers, as soon as federal controls were lifted.

It was asserted that although the Government of Alberta had given a lead in preparing for postwar reconstruction, there was need for a sound housing scheme which would provide adequate housing as well as employment within the province in the postwar period.

The Government was urged to continue to use and control many wartime industries with a view to providing continued employment for workers. The establishment of health clinics, x-ray services and the combatting of social diseases was also urged. In connection with the campaign for better health, it was contended that the nursing profession should be encouraged by providing free courses and text books for probationers, better pay for nurses and an extension of the eight-hour day to cover all the hospitals in the province.

Workmen's compensation was discussed in detail and it was asked that the rate be increased to 100 per cent of earnings at the time of incapacity and made payable from the time of the accident. It was also asked that the present \$2,000 limit on compensation be abolished and that all occupational diseases be covered by the Act.

With regard to the prevention of accidents, the setting up of safety committees, the appointment of more inspectors and first-aid men and the all-round better enforcement of the regulations, was recommended.

The delegation asked that the qualifying age for old-age pensions be reduced to 60 years, that the "means test" be abolished and increases be made in the pensions sufficient to provide a decent standard of living.

Changes in education were suggested to provide for free continuation courses up to and including the university, more and better technical schools and the establishment of vocational guidance committees to help students choose courses for which they were best suited. The Government was urged to make a study of adult education.

Other matters touched upon included requests for: the removal of Japanese from the province; the employment of two qualified journeymen on all service or trouble trucks when it was necessary to do pole-climbing; and changes in the procedure followed in cases coming within the scope of the Masters and Servants Act.

Hon. E. C. Manning, Premier of the Province in his reply stated that the Provincial Government had enacted legislation to help solve the housing problem in the form of a loan company financed by both the provincial and municipal governments. He pointed out that a bill had already been introduced in the legislature, which, if passed, would reduce hours of work for males from 54 to 48 hours per week. The Premier also promised to take over all labour legislation as soon as the war is over and to give consideration to suggestions with respect to holidays with pay, statutory holidays with pay and increased minimum wage scales. It was stated that the Workmen's Compensation Act would receive its quinquennial revision in the near future. Concerning collective bargaining, the Premier suggested that the Federation set up a committee to consult with the Minister and Deputy Minister of Trade and Industry with a view to bringing about satisfactory amendments to the Act.

WAGE RATES AND HOURS OF LABOUR IN CANADA, 1943

REPORT No. 26

SUMMARY

THIS report, the twenty-sixth in the series beginning in 1921, contains tables of index numbers of rates of wages and tables showing average wage rates for selected occupations along with the predominant ranges of rates and the standard or normal hours of labour per week. The statistics of rates are given by province or region and in some cases by cities. They apply to nearly all industries. In most cases the data apply to 1943 only, but for a number of industries comparative figures for earlier years are shown.

A new index number of wage rates has been calculated for the period 1939 to 1943 on the base of rates in 1939, the last pre-war year, as 100. This index is shown by industries and main industry groups in Table I. For the period 1901 to 1939 the index on the base of rates in 1935 to 1939 as 100 has been converted to the new base and the whole series 1901 to 1943 shown in Table II. In Table IIA the index is shown on the base of rates in 1935 to 1939 as 100.

An appendix to the report gives data regarding wages paid to farm labour in 1943 and 1944, as published by the Dominion Bureau of Statistics.

The general level of wages in Canada during 1943 was the highest yet recorded, the index covering six main industrial groups being 32·8 per cent higher than in 1939 and 23·8 per cent higher than in 1920 which was the peak of the inflationary movement following World War I. For the period August 1939 to December 1943 the index number of the cost of living advanced 18·4 per cent.

During the period 1939 to 1943 considerable increase in wage rates in all industries was indicated, continuing the advance from the low levels of the depression reached in 1933. From 1939 to 1940 the general index number of wage rates advanced 3·9 per cent; from 1940 to 1941, 8·8 per cent; 1941 to 1942, 8·3 per cent; and from 1942 to 1943, 8·4 per cent. The gradually upward trend has continued from year to year in all industries since the outbreak of war.

In addition to adjustments made by authority of the War Labour Boards the wage data include any cost of living bonus paid, including the last bonus ordered by the National Board which became effective in November, 1943.

INTRODUCTORY NOTE

Statistics of rates of wages and hours of labour have been collected by the Department since it began to function in 1900 and were published from time to time in the *Labour Gazette*. A separate report on wages was issued in 1921 as a supplement to the *Labour Gazette*. This was the first report in the present series and contained statistics for certain trades and industries in various cities in Canada from 1901 to 1920 with index numbers based on rates in 1913 as 100. The information was obtained mainly from employers and trade unions but data from collective agreements in force and from Departmental officers and correspondents were also used.

In subsequent reports the scope of the statistics has been gradually broadened to include a representative list of occupations in most industries and additional groups were added from time to time to the table of index numbers.

In Report Number 24, containing statistics for 1940 and previous years, the index number was converted to the base 1935 to 1939 as 100 following the publication by the Dominion Bureau of Statistics of a new official index number of the cost of living on that base. Report No. 25 covered the years 1929, 1940 and 1941. No report was published covering the year 1942, but a table of index numbers appeared in the *Labour Gazette* for December, 1943 and again in October 1944.

The method of presenting the statistics on wage rates in the present report has been changed from the method employed in previous reports. In these the rates were shown for most industries in the form of coded samples giving the predominant or representative rate or range of rates paid by each establishment for each of several selected occupations. With few exceptions statistics by region or province were not shown.

The revised form of publication shows the weighted average wage rates as well as the predominant range of rates (approximately the middle 80 per cent) by main occupations and by province or region. Where feasible, rates in Montreal and Toronto are also given. In the construction industry, printing and publishing, street railways, and certain classes of civic employees' rates are given for other cities as well.

The hours shown are the standard or normal hours per week in the industry. Where there is a variation in the number of hours as between establishments affecting a considerable proportion of workers the predominant range is shown.

SOURCE OF INFORMATION

The Statistics for 1943 have been obtained from some 15,000 establishments supplemented by information from trade union returns and from collective agreements. Most of the establishments with 15 or more employees were included in the survey with a representative number of smaller firms in certain industries such as garages, foundries and machine shops, sawmills and in the construction industry.

Prior to 1942 the mailing list of employers contained about 6,000 establishments including most of the larger firms and a representative number of smaller firms.

The more complete coverage was undertaken to meet the needs of the National War Labour Board when it began to function in 1942.

WAGE CONTROL AND THE COST OF LIVING BONUS*

Much of the wartime increase in wages as indicated by the index number of wage rates came about by way of a cost of living bonus, payment of which was provided for under the wages control policy of the Government. All such bonuses have been included in the rates throughout this Report.

The first order relating to the control of wages and the payment of a bonus to cover increases in the cost of living was Order in Council P.C. 7440 of December 16, 1940, for the guidance of Boards of Conciliation and Investigation in their recommendations in dealing with disputes over wages for mining, some public

* For details of the Orders in Council dealing with wage control and cost of living bonus, see appropriate issues of the *Labour Gazette*; a bulletin issued by the Department of Labour, Wartime Orders in Council Affecting Labour (Revised Edition June 1943); and bulletins issued by the National War Labour Board.

utilities and war industries under the Industrial Disputes Investigation Act. The policy was recommended also for the adjustment of wages generally.

This Order was replaced by the Wartime Wages and Cost of Living Bonus Order P.C. 8253 of October 24, 1941, which stabilized all wage rates at the level in effect on November 15, 1941. No change in basic rates was permitted without the approval of The National War Labour Board or a Regional Board which were set up under the Order.

This Order in turn was replaced by the Wartime Wages Control Order P.C. 5963 of July 10, 1942, which was a consolidation of previous orders and amendments thereto.

A cost of living bonus was payable under both the above Orders and adjusted quarterly in accordance with orders issued by the National Board. For each rise of one point in the cost of living index of the Dominion Bureau of Statistics, adjusted to the base of August 1939 as 100, the bonus must be increased by 25 cents a week in the case of adult male employees and all other employees receiving \$25.00 a week or more, and by one per cent of the basic weekly wage rate in the case of men under 21 years of age and women who receive less than \$25.00 per week.

Following the establishment of the ceiling on prices effective December 1, 1941, increases in the cost of living were slight with the result that no general adjustment in the bonus was ordered until the summer of 1942. The first adjustment was 60 cents per week for those on the flat rate or 2.4 per cent for those on a percentage basis as from August 15, 1942. This was later increased to 95 cents per week or 3.8 per cent as the case may be as from November 15, 1943.

The maximum bonus payable under these orders was \$4.60 per week for those on the flat rate bonus and 18.4 per cent of the basic wages for those on a percentage bonus both based on an increase in the cost of living since August 1939 of 18.4 points.

Under Order in Council P.C. 9384 of December 9, 1943, effective February 15, 1944, provision was made for the establishment of wage rates incorporating therein cost of living bonuses payable in respect of the rise in the cost of living, to stabilize the wage structure established in this manner, and to provide machinery for rectification of any gross inequalities and injustices in wage rates so established.

INDEX NUMBERS

In Table I the new index number of wage rates covering the period 1939 to 1943 is shown for each of six main industrial groups and for each of the industries included therein according to the Dominion Bureau of Statistics classification. The index number was calculated by the use of weighted aggregates.

The weighted average wage rate was obtained for each of a representative list of occupations in an industry. Each such average was multiplied by the number of workers in the occupation used as a weight for that occupation throughout the period. For the index number for the industry the sum of these products was expressed as a percentage of the corresponding sum in the base year.

To obtain each main industrial group index, the indexes for the various industries included were weighted by the number of workers in each industry based on census data and to obtain the general index the main industrial groups were weighted in proportion to the number of workers in each group.

For the period 1901 to 1939 no new calculation was made, the index number previously published on the old basis being converted to the base of rates in 1939 as 100. This index was calculated by the use of link relatives. The

percentage change from year to year for each occupation was calculated. The simple arithmetic average of these percentages was obtained and the average increase or decrease applied to the index for the industry for the preceding year. To obtain the general index the main group indexes were weighted in proportion to the number of workers in each group based on data from the decennial census.

For the period 1940 to 1943 the index numbers were calculated by both methods mentioned above. The differences were not substantial for any of the years of "over-lap". The figures are as follows, the new index being shown first in each year and followed by the index as calculated by the former method: 1940, 103·9 and 103·9; 1941, 113·1 and 114·2; 1942, 122·5 and 123·1; 1943, 132·8 and 132·4.

Table V—WAGE RATES AND HOURS OF LABOUR IN MANUFACTURING INDUSTRIES, 1943

(1) PRIMARY TEXTILE PRODUCTS

NOTE.—For more detailed information see report "Wages in the Primary Textiles Industry in Canada, 1943", issued as supplement to the LABOUR GAZETTE for October, 1944.

The rates shown in the Primary Textiles Industry are average straight time wages or earnings per hour. Most of the employees in this industry are on piece work.

Occupation	CANADA	MARITIMES		QUEBEC		ONTARIO

Table VII—WAGE RATES AND HOURS OF LABOUR IN TRANSPORTATION AND STORAGE, 1943

(1) WATER TRANSPORTATION (INLAND AND COASTAL)

NOTE.—Rates include board and lodging and vary to a great extent according to size or type of vessel. Hours on duty for officers, seamen, deckhands, etc., generally average twelve per day (watches—six hours on, six hours off) seven days per week except when in port; for engineers, firemen, oilers, etc., hours generally average eight per day, but twelve in some cases; for stewards, cooks, etc., hours vary according to requirements. All classes may be required for extra duty at any time, especially in the Great Lakes and Upper St. Lawrence service when passing through canals. On most of the British Columbia coastal passenger vessels hours for all classes average eight per day, 6 days per week, with extra pay for overtime. Some of the tug-boat employees in all areas are on the eight-hour day.

* Maximum rates based on length of service.

† Including troublemen and, in some cases, groundmen; in some localities line maintenance work is performed by employees of light, heat and power distribution utilities, rates for which are included here.

‡ Including shedmen, pitmen, cleaners, blacksmiths, carpenters, painters, etc.

(*) Including armature winders, wiremen, etc.

(a) Rate applies also to bus drivers.

(b) Rate per month.

APPENDIX—WAGES IN AGRICULTURE, 1943—Concluded

The information given below has been reproduced from a bulletin on "Farm Wages in Canada", issued September 27, 1944, by the Dominion Bureau of Statistics—Agricultural Branch. The figures were compiled from reports made by farm correspondents in all provinces.

Farm Wage Rates August 15, 1943, 1943 and 1944

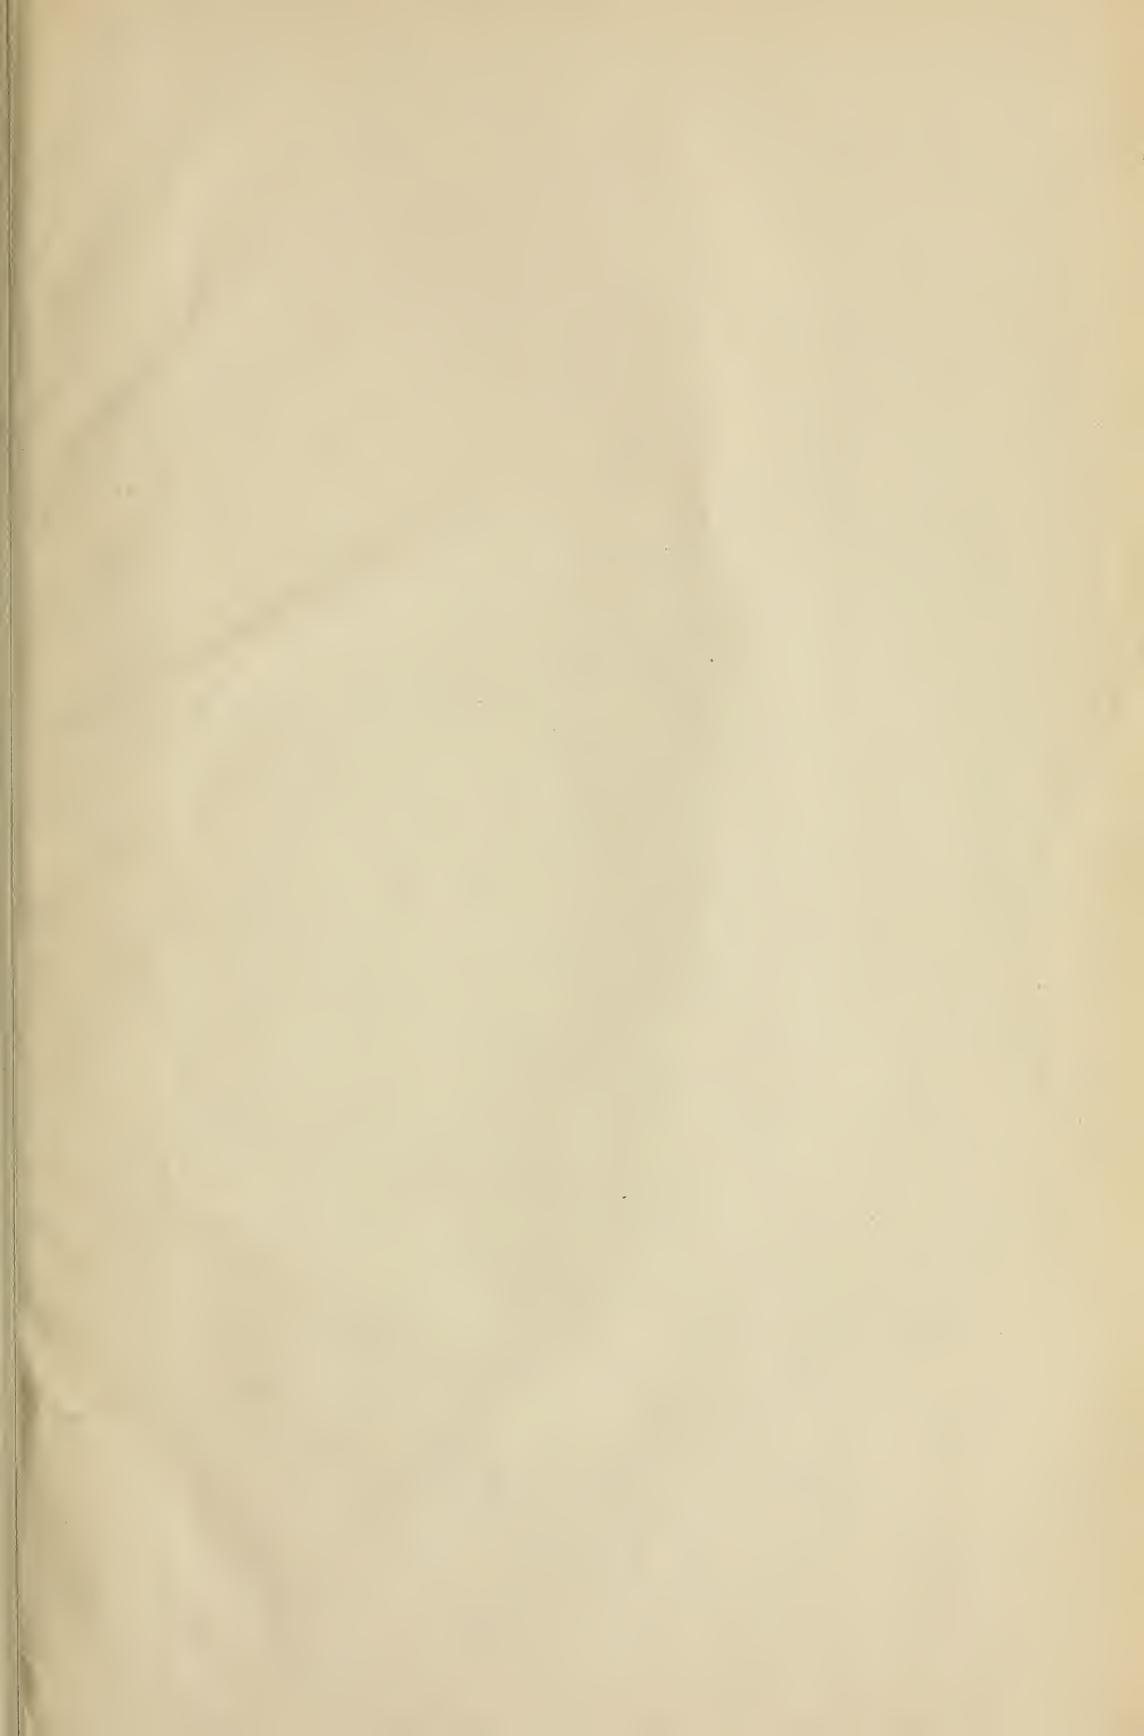

Although the average rates of wages paid to hired farm workers in Canada show a further increase at August 15, 1944, declines in certain provinces are indicated for the first time in some years. The average rate paid for help hired by the day when the employer provided the board of the hired man was \$3.76 at August 15, 1944, compared with \$3.51 at the same date in 1943. Increases are shown for all provinces except Ontario and Quebec. In these two provinces the rate declined about 75 cents per day from last year. Additional farm labour made available through various schemes such as military leave, prisoners of war, the transfer of western farmers, students and "commando" groups tended to ease the labour situation and the lower rates paid to students resulted in the lower average. Rates in the Prairie Provinces were considerably above those of last year as a result of larger crops being harvested this year. When no board was provided the average rate for day labour was \$4.39 compared with \$4.74 in 1943 with lower rates again indicated for Ontario and Quebec. When the men were hired by the month the average monthly rate with board was \$67.92 at August 15, 1944, as compared with \$61.26 at the same date in 1943. When the workers provided their own board the average rate for men hired by the month rose from \$84.26 in 1943 to \$87.86 in 1944.
