VOLUME XLV]

JANUARY, 1945

[NUMBER 1

Notes Of Current Interest

Canada represented at meeting of I.L.O. Governing Body

At the ninety-fourth session of the Governing Body of the International Labour Office, held in London late in January, the Canadian Government was represented by Mr. Paul Martin, K.C., M.P., Parliamentary Assistant to the Minister of Labour. Mr. Martin attended the meeting as a substitute for Mr. Arthur MacNamara, Deputy Minister of Labour, who is the regular Canadian Government representative. He was accompanied by two technical advisers, Mr. Eric Stangroom of the Department of Labour and Mr. A. A. Heaps, of the Unemployment Insurance Commission, who will also attend to other business in Great Britain for the Department of Labour.

Mr. Percy Bengough, President of the Trades and Labour Congress of Canada, also attended the session. Mr. Bengough was elected as a labour member of the Governing Body at the Philadelphia Conference of the I.L.O. last spring.

The session was preceded by meetings of the special I.L.O. committees on constitutional questions (including the relationship between the I.L.O. and other international organizations) and on employment policy. Its agenda included proposals for the setting up of international industrial committees, social provisions in the peace settlement, regional activities of the I.L.O., maritime questions, and the reports of the two special committees.

Canadian delegations to World Trade Union Congress

At the World Trade Union Congress to be held in London, England, beginning February 6, two Canadian labour organizations will be represented.

The delegation of the Canadian Congress of Labour is headed by Messrs. Pat Conroy, Secretary-Treasurer of the C.C.L., C. H. Millard, M.L.A., National Director, United Steelworkers of America, and J. E. McGuire, National Secretary-Treasurer, Canadian Brotherhood of Railway Employees and Other Transport Workers. As alternates, the Congress is sending Messrs. George Burt, Canadian Director, United Automobile Workers, and Nigel Morgan, International Board Member, International Woodworkers of America; and as observer, Mr. C. S. Jackson, President, United Electrical, Radio and Machine Workers of America.

The Trades and Labour Congress of Canada will be represented by Messrs. J. A. Sullivan, Secretary-Treasurer, and James A. Whitebone, First Vice-President.

Increase in labour-management production committees

An increase has occurred in the number of labour-management production committees of which the Industrial Production Co-operation Board has record. The total, as of December 31, is approximately 285, an increase of about 35 since September 30.

A joint statement by the Minister of Labour and the Minister of Munitions and Supply has indicated the Government's intention of continuing to encourage the formation of labour-management production committees in the post-war and reconstruction periods (L.G., Dec., 1944, p. 1464). The Industrial Production Co-operation Board is therefore continuing and expanding its work of increasing the number of committees, whose contribution to war production and to harmonious labour-management relations is praised in the statement and declared to be "essential" to the successful solution of the problems of peace.

**Decline in
time loss from
strikes and
lockouts**

Preliminary figures for the year 1944 show that time loss resulting from strikes and lockouts was approximately half as great as in 1943.

During 1944, according to preliminary records, a total of 501,765 man-working days were lost, as compared with 1,041,198 days in 1943. There were 189 strikes, as compared with 402 strikes in the previous year; and the number of workers involved showed an even greater decline, from 218,404 in 1943 to 77,698 in 1944.

Further details may be found in the article beginning on page 65 of this issue. Final figures will appear in the annual summary of strikes and lockouts in Canada in a forthcoming issue of the LABOUR GAZETTE.

**Proportion of
women in
employment
increasing**

The proportion of women as compared with men in employment in Canada has been increasing, according to a survey undertaken last October by the Dominion Bureau of Statistics.

At October 1, 1944, there were 271 women per thousand persons employed in the industries included in the survey. On the same date in 1943 there had been 262 females per thousand persons employed, and in 1942 the proportion had been 235 per thousand.

The largest proportion of female employees was found in the services industries, where there were 582 women per thousand workers. The proportion in communications was 555 women per thousand; in finance, 539 per thousand; in trade, 493 per thousand; in manufacturing, 283 per thousand. In the other major industrial divisions (logging, mining, transportation, and construction) the employment of women was negligible.

Further details of the survey will be found elsewhere in this issue on page 85.

**Status of
professional
and scientific
workers under
labour code**

On January 9 the Wartime Labour Relations Board (National) conducted a public hearing to hear submissions from various organizations concerning the status of professional and scientific workers in Canada under the Wartime Labour Relations Regulations.

Such workers had been temporarily classified as persons "employed in a confidential capacity" and thus excluded (under Sec. 2 (f) (i) of the Regulations) from the machinery set up for collective bargaining.

At the hearing, representatives of a group of professional organizations, including the Engineering Institute of Canada, asked for their continued exclusion and for the promulgation of a separate code to govern collective bargaining on the part of such workers.

The proposal was opposed by the Trades and Labour Congress of Canada and the Canadian Congress of Labour, as well as by the Association of Technical Employees (CIO) and the Canadian Association of Scientific Workers.

Spokesmen for these organizations argued that professional workers should not be excluded from the labour code and are not to be regarded as employed in a confidential capacity.

The Secretary of the Canadian and Catholic Confederation of Labour expressed the opinion that professional workers should not be included under the code unless they wished it.

**Replacement of
men on post-
ponement from
military training**

Mr. Arthur MacNamara, Director of National Selective Service, announced on December 15 a plan for the replacement wherever possible of civilian men who have been granted postponement of military training while working in industry by qualified men whose services are being dispensed with by the R.C.A.F. because they are surplus to requirements and are not suitable for recall for service in the Army.

Mr. MacNamara pointed out that the Industrial Mobilization Surveys, which have been carried out by National Selective Service over a period of more than a year, have been successful in reducing the number of civilians on postponement in war industry to very small numbers of men in key positions, some of whom are actually of low medical category. However, those who may be available for military training will be called up just as soon as demobilized men can be secured to take over the civilian jobs.

Employment and industrial statistics

The table below shows the latest statistics availables reflecting industrial conditions in Canada.

There was a moderate increase in employment at the beginning of November, according to figures published by the Dominion Bureau of Statistics.

According to pre-war experience, the present increase is contra-seasonal, although smaller than the gains recorded at each November 1 since 1939. The index was 183.8 at the beginning of November and 183.3 at October 1, 1944, as compared with 188.7 at November 1, 1943, and 123.6 at November 1, 1939. The seasonally-adjusted index advanced from 174.4

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended December 23, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1936=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figures for four weeks ended December 23, 1944, and corresponding previous periods. (8) Maclean's Building Review.

in the preceding month to 175.9 at the beginning of November. The 14,983 establishments reporting to the Bureau showed a total working force of 1,867,673 at November 1, an increase of 5,389 since the month preceding. The total weekly wages and salaries paid to these employees increased by 0.1 per cent to \$60,300,839 at November 1. The per capita weekly earnings decreased from \$32.36 in October to \$32.29 in November.

Since June 1, 1941, the number of persons in recorded industrial employment has increased 20.4 per cent and their aggregate weekly payrolls, 51 per cent. The expansion is considerably smaller in the non-manufacturing industries. In manufacturing, employment expanded 31.7 per cent and payrolls 68.1 per cent.

The expansion in recorded employment at November 1 took place in non-manufacturing industries while there was considerable curtailment in manufacturing employment, a decrease of 1.7 per cent in the durable goods group and 0.4 per cent in the non-durable goods. This is the seventh monthly decline in manufacturing as a whole since the beginning of 1944. Logging showed above average seasonal activity. Trade increased due to the employment of unusually large numbers of part-time workers. In the construction and maintenance group, building increased substantially while highway and railway employment decreased. Mining, communications, transportation and services experienced seasonal reduction in activity.

The index of the physical volume of business recorded a decline from 228.0 in October to 227.9 in November. The index based on 1935-39 average as 100.0, was at 242.9 at November, 1943. The factors indicating the trend of commodity distribution recorded a considerable increase while the other four main components of the index, industrial production, mineral production, manufacturing, construction and electric power reached a lower position.

For the first eleven months of 1944, the index of the physical volume of business averaged one per cent higher than for the similar period in 1943. In the same comparison, the index of industrial production was 1.5 per cent lower and the index of industrial employment 0.4 per cent lower; mineral production was 5.0 per cent lower and employment in mining 2.5 per cent lower; manufacturing production was 0.1 per cent higher and manufacturing employment 0.4 per cent lower, construction contracts awarded and building permits issued were 43.8 per cent and 56.4 per cent higher respectively, and construction employment was 19.9 per cent lower. Employ-

ment in building construction was 41.7 per cent lower and in highway construction 3.2 per cent lower. Employment in logging was 18.9 per cent higher and in trade 10.0 per cent higher. In the same comparison, export trade increased 19.3 per cent, import trade 2.0 per cent, carloadings 6.7 per cent, wholesale prices 2.8 per cent and the cost of living 0.5 per cent. Also wholesale and retail sales were considerably above the 1943 level. Bank debits expanded 13.6 per cent and the circulating media averaged 20.7 per cent higher in the first eleven months of 1944 compared with the similar period of 1943.

Cost-of-living index declines

The Dominion Bureau of Statistics cost-of-living index declined from 118.9 for November 1 to 118.5 for December 1, 1944. This change was wholly accounted for by a reduction in the food group index from 131.6 to 130.3, with lower prices for eggs, vegetables and fruits contributing the major portion of the decline. The December, 1944, cost-of-living index of 118.5 compares with a 1943 year-end figure of 119.3, and 115.8 on December 1, 1941, when maximum price regulations went into effect. Group indexes other than foods remained unchanged for December, 1944, as follows: rentals 112.0, fuel and light 108.1, clothing 121.6, homefurnishings and services 118.4, and miscellaneous items 108.9. After adjustment to the base August 1, 1939, as 100.0, the index was 117.6 at December 1 as compared with 118.0 at November 1, 1944.

Wartime Salaries Order modified

An Order in Council (P.C. 9505, December 21, 1944) amending the Wartime Salaries Order (P.C. 1549, February 27, 1942), was announced recently in a joint statement by the Minister of Finance, Honourable J. L. Ilsley, and the Minister of National Revenue, Honourable Colin Gibson.

According to the statement the changes "are based upon experience during the three years that the Order has been in effect and are intended to provide for a control that will be more similar in principle to the control over wage rates than has been possible up to date."

The statement continues:

"The Salary Order has proved in practice to be more severe in its restriction upon salaries than the various orders controlling wages because of the greater difficulties in defining and classifying established positions in the case of salaries. It is now believed that with the experience gained in administration of the Order it is possible to provide for adjustments of

individual salaries within ranges of rates previously established for the positions in question, and to provide for the correction of gross inequities in certain cases where there have been substantial changes in the nature and extent of the duties and responsibilities of salaried officials.

"The principal new provisions of the Order as amended are the following:—

- (1) The salaries paid to newly appointed officials must not only conform to the regulations of the Order but must be reported to the Inspector of Income Tax for approval within three months.
- (2) All persons earning less than \$250 per month are to be excluded from the operations of the Wartime Salaries Control Order and are to be covered instead by the Wartime Wages Control Order. Previously persons earning between \$195 and and \$250 per month came under one order or the other, depending on whether or not they were above the rank of foreman or comparable rank. This action will require a corresponding amendment to the Wartime Wages Control Order in due course.
- (3) The Minister of National Revenue is enabled to authorize adjustments in the salaries paid to salaried officials supervising employees who have received a general increase in wage rates if and to the extent that the relationship between such wage rates and the salaries in question constitutes a gross inequity. This provision is intended to correct a number of very awkward situations which have been existing where persons subject to the Wartime Wages Control Orders have received increases in wage rates but those immediately above them in the same organization and subject to the Salaries Order have not been able to receive any increase and are in some cases therefore receiving only as much as, or in some cases even less than, the wage-earners whom they are supervising.
- (4) The Minister is given authority to permit increases in salary within established ranges of salaries for the position which the official occupies. The Wages Control Order permits the increase of wages within established ranges without reference to the War Labour Boards but it is felt that in the case of salaries a review of each instance is necessary as ranges are usually less well defined and the adjustments even within the range will be subject to careful control.
- (5) Provision is made for permitting increases in exceptional circumstances in salaries paid to individuals whose jobs have substantially altered by reason of a change in the duties and responsibilities involved even though there has been no formal promotion, if the Minister of National Revenue considers such action is necessary to remedy a gross inequity. This provision is considered necessary in order to rectify a relatively small number of cases where for one reason or another the duties and responsibilities of a salaried official have altered very greatly but there has been no way in which an adjustment could be made in his salary to reflect this within the terms of the Salaries Order.

"There are a number of other relatively less important changes and inconsequential changes in wording".

Training and extending over a period of several weeks, for discharged about 700 carefully selected men and women, war veterans representative of every branch of the Armed Services, are being given intensive training as counsellors to assist discharges in every way possible in becoming re-adjusted to civilian life. Following the completion of their training, these counsellors will be stationed at every discharge, release, and rehabilitation centre in Canada.

This service is one of the primary functions of the recently organized Department of Veterans' Affairs. The training course is under the general supervision of Mr. W. S. Woods, Deputy Minister of the Department, with Mr. O. C. Elliott, Chief Welfare Officer, as general Chairman. The Department of Labour, through its Employment and Vocational Training Services will co-operate in this rehabilitation work.

A more detailed report of the training courses will be given in the February issue of the *LABOUR GAZETTE*.

Selection of university science graduates for Armed Forces Arrangements have been completed under which the Armed Forces will select technical personnel from university science students graduating in 1945, it was announced recently by Mr. Arthur MacNamara, Director of National Selective Service.

"Travelling Boards representing the technical branches of the Navy and the Army together with officials of the Wartime Bureau of Technical Personnel, will visit the various universities in the near future for the purpose of interviewing graduates for technical appointment," Mr. MacNamara stated. Similar arrangements were made in 1944.

While the Boards will be chiefly concerned with interviewing the 1945 graduates for the two services, a number of 1946 graduates in engineering, mathematics and physics are required by the Navy and the Army for summer training during the 1945 vacation, and these will be selected at the same time.

It is understood that after the representatives of the Armed Forces have completed their selection, the needs of civilian industry for technical personnel from the 1945 graduates will be considered.

N.S.S. procedure changed regarding female university students

The Selective Service rule under which female university students required a Selective Service permit to return to their studies when they had failed to make qualifying marks during any university term, has now been withdrawn, according to an announcement made by Hon. Humphrey Mitchell, Minister of Labour, on December 16.

The change in procedure does not affect men who are attending university.

The demand for the services of women in industry is now less acute, and because of this the National Selective Service University Advisory Board at a recent meeting recommended that the regulations be relaxed in relation to female university students, so that these students would be permitted to return to their studies without Selective Service permits, even though in a previous term they failed to make qualifying marks. The recommendation of the University Advisory Committee was later approved at a meeting of the National Selective Service Advisory Board, and will be put into effect immediately.

Appointment of Byron F. Wood on veterans' affairs

The appointment of Byron F. Wood as Associate Director of National Selective Service and Assistant to the Deputy Minister of Labour, has been announced by Hon. Humphrey Mitchell, Minister of Labour. Mr. Wood will co-ordinate within the Department of Labour the dealing with veterans' affairs in so far as the Department has jurisdiction.

At the moment the Department of Labour is responsible for the administration of the Reinstatement in Civil Employment Act, under which discharged members of the Forces return to their former civilian jobs. Also, through the Training Branch much of the work of trade training for veterans will come under the supervision of the Labour Department. Placement of veterans in employment will be handled largely, it is planned, through the Employment Service.

Prosecutions under N.S.S. Civilian Regulations

Failure to comply with National Selective Service Civilian Regulations resulted in the prosecution of 149 persons during the month of November.

A total of 111 were convicted, as compared with 122 convictions in October. Eight more charges were laid in November than in the previous month.

Employers were convicted in 11 cases, most of them being charged with engaging workers without permits. Of 69 employees convicted, a majority were charged with leaving employment without giving notice of separation, quitting "designated" high priority work without Selective Service permission, or failing to accept high priority work when referred by a Selective Service officer.

Thirty-one conscientious objectors were convicted of failing to follow a direction to report to an alternative service work camp.

At December 1 a total of 343 cases were still pending—23 being charges against employers, 166 against employees, and 154 against conscientious objectors.

Appointment of V. C. MacDonald to Nova Scotia Boards Hon. Humphrey Mitchell, Minister of Labour, recently announced the appointment of V. C. MacDonald, K.C., of Halifax, as Chairman of the Nova Scotia Regional War Labour Board and also as Chairman of the Nova Scotia Wartime Labour Relations Board.

Mr. MacDonald succeeds the Hon. L. D. Currie, Nova Scotia Minister of Labour, who had asked to be relieved of the Chairmanships of the two Boards by reason of pressure of other duties.

Mr. MacDonald was Assistant Deputy Minister of Labour at Ottawa up to a few weeks ago, when he was granted a transfer to Halifax where he not only resumed his post as Dean of the Law School of Dalhousie University at the opening of the present university session, but where in addition he continued as an assistant to the Deputy Minister of Labour and handled special duties for the Labour Department at Halifax.

Administration of Post-Discharge Re-establishment Order During the month of November 2,844 ex-service men and women of this war received benefits under the Post-Discharge Re-establishment Order

according to an announcement by the Honourable Ian Mackenzie, Minister of Veterans' Affairs. (Under this Order maintenance grants are paid to veterans who are taking vocational training or higher education, who are unemployed because no suitable work is available, who are awaiting returns from a farm or business venture or who are temporarily incapacitated through casual illness. The grants are on the basis of \$60 monthly for a single man and \$80 per month for a man and his wife during training and continuation of education, with appropriate al-

lowances for dependents, and \$50 and \$70 respectively for the other three categories.)

The total receiving benefits during November was the highest yet recorded, and showed an increase of more than 1,000 over the September total of 1,810.

Also during November, 15,487 jobs were found for veterans of this and the first Great War, an increase of nearly 2,500 over the number of veterans placed in employment through National Selective Service in September. Of these 11,930 went to ex-service men and women of this war.

The figure on placements is considerably in excess of discharges from all three services during the month, indicating that National Selective Service, in co-operation with the Department of Veterans' Affairs is much more than keeping pace with discharges, the Minister reported.

Of the 2,844 veterans in receipt of benefits during the month, 425 received payment while seeking suitable employment although only 283 of these were still receiving benefits at the end of November. A total of 78 received payments while temporarily incapacitated and 288 were receiving assistance while awaiting returns from a farm or business venture on their own account. There were 464 ex-service personnel receiving grants while taking university or professional training at the end of the month, an increase of 370 over September figures, and 1,687 grants were being paid to former members of the forces taking vocational training. This training figure represents an increase of 541 over two months ago.

The total amount expended under the Post-Discharge Re-establishment Order during November was \$152,756.27 as compared with \$88,246.51 for September. Of this total almost \$120,000.00 was expended to ex-service men and women who, by vocational training or higher education, are preparing to re-establish themselves more firmly in industrial or professional fields.

Report of Saskatchewan Health Services Survey Commission pamphlet form by the Minister of Public Health of that province. A brochure covering a study of socialized health services in Saskatchewan was issued recently in pamphlet form by the Minister of Public Health of that province. The study was made under the direction of Dr. Henry E. Sigerest, Professor of the History of Medicine at the Johns Hopkins University, late last summer.

Dr. Sigerest was assisted by a "Health Services Survey Commission" of five members, representative of the medical, dental and

nursing professions and hospitalization experts of the province. The Commission conducted hearings in a number of cities and towns throughout Saskatchewan and over 80 briefs were received from interested organizations, including health bodies, urban and rural municipalities, hospital board professional groups, trade unions and agricultural organizations. The hearings were concluded on October 5 and the brochure was issued by the Minister later in that month.

Some of the more important recommendations for immediate action follow:

(1) Establishment of a Saskatchewan Health Services Planning Commission whose immediate tasks would be:

- (a) To determine the cost of the various services recommended.
- (b) To outline the boundaries of the Health Districts in consultation with other Departments of the Government.
- (c) To work out in detail the needs of one or two sample districts, to determine the services required to satisfy these needs, and their costs.
- (d) To make an inventory of those municipalities and L.I.D.'s which at present have no medical service whatsoever and to determine what action has to be taken to relieve them, without delay.
- (e) To study a scheme of compulsory health insurance for the population of the eight cities.
- (f) To assist the Government in planning whatever services are being considered at the moment.

(2) To select as soon as feasible, qualified young medical graduates for post graduate study, notably in the fields of public health, psychiatry and cancer control.

(3) To select qualified registered nurses for post-graduate training in midwifery.

(4) To build a home for mental defectives.

(5) To lay plans for extension of the Medical School and for the construction of a university hospital.

(6) To lay plans for the hospitalization and pre- and post-natal care of maternity cases.

(7) To provide from public funds for complete medical services to old age pensioners, widows and orphans and to persons suffering from mental diseases and venereal diseases.

(8) To establish, as soon as feasible, dental school clinics in the cities, and travelling dental clinics in the rural districts.

The Health Services Act has already authorized the appointment of a Health Services Planning Commission to function along the lines suggested by Dr. Sigerest and his committee of experts (L.G., Dec., 1944, p. 1546).

Post-war policy of British unions

An "Interim Report on Post-war Reconstruction" recently issued by the British Trades Union Congress sets out the basic direction of trade union policy in Britain for the post-war period. The three main objects of the Congress are described as: (1) improving wages, hours, and conditions of work; (2) assuring full employment, meaning that there should be "always more vacant jobs than there are unemployed men", and that these jobs should be "on terms and conditions not less favourable than those negotiated by the unions"; (3) extending workers' control over industry.

To achieve these objectives the report advocates a system of control over the whole of economic life. It takes the position that such controls are inevitable, but the kind of controls and who will exercise them are the problems that must be studied and solved. It suggests three broad types of control for post-war British industry:

(1) Public ownership in certain industries, such as fuel and power, transportation, and iron and steel;

(2) Control over certain strategic points in the economy, such as the utilization of natural resources, the location of industry and general physical planning, foreign trade and certain phases of the monetary system;

(3) Controls over the private section of industry. Equitable compensation is suggested for acquired private industries which would be operated by public corporations.

The report emphasizes the importance of the control of investments and then, indirectly, the control of physical resources. It is claimed that the variations from time to time in the amounts invested in building new capital equipment are the immediate cause of trade cycle depressions. The report advocates making the Bank of England into a public authority under a responsible Minister and a Governor appointed by the Government. Further, it suggests the setting up of a National Investment Board with full powers to survey all industrial planning and lending. It would license investment and would encourage new developments, to meet the most urgent needs first, so as to keep up the total national spending.

In connection with controls over private industry stress is laid upon the need for protection against anti-social practices and it is proposed to keep strong price controls.

The setting up of Industrial Boards composed equally of employers and workers—the latter being appointed by the trade unions—with a chairman appointed by the Govern-

ment, is also advocated. These would be responsible for general planning in industry, the standardization of research, joint marketing and purchasing, pooling of transport, arrangement of common credit and insurance services, etc. These Industrial Boards would have Regional Boards under them. The general principle aimed at throughout is that "the work-people and the public as a whole should participate in the determination of their economic destinies."

Quite apart from these administrative controls there would be the regular trade union negotiating machinery and joint production committees with equal management and labour representation. However, it is indicated that if efficient controls are established, compulsory arbitration or direction of labour will not be necessary and that the unions will be willing to avoid wage and employment policies which might hinder efforts to provide sufficient jobs.

British labour plans effective use of post-war leisure time

Leisure time and its profitable use in the post-war years has been engaging the attention of the trade union movement in Great Britain.

A memorandum submitted by the National Council of Labour Colleges to the General Council of the British Trade Union Congress indicates something of labour's attitude towards, and its plans for utilizing this important factor in post-war social life.

At the outset, the memorandum asserts that "the use to which workers put their leisure time is of special importance to the labour movement. One reason for that is that labour's success depends largely on the number of members who are willing to undertake voluntary work for the movement. A willingness to work, however, is not sufficient if the maximum of effective service is to be rendered. The quality of the work . . . depends upon the educational equipment of each voluntary worker, and that . . . depends materially on the amount of time he is willing to spend, or has spent, in educating himself for service in the labour movement."

It is asserted that, "the primary interest of the trade union movement in the worker's leisure is to ensure that he devotes some of it to the working class movement," in order that labour may play a bigger part, "not only in the economic and the political, but in the social aspects of his life and that of his family."

Warning is given of what is termed, "the danger of irresponsible citizenship," which assumes that it is "the business of the State, or the local authorities, or the trade unions

to provide extensive facilities for amusement on a mass scale." It is suggested that it is the prime duty of "the trade union and labour movement to stress the point that mere recreation must take a very secondary place to work and social responsibilities." However, recreation is not overlooked. Attractive meeting and reading rooms are urged for use for both business and social purposes. Sound pictures are advocated for recreation and education, hostels for week-end schools and the development of youth organizations in the trade union movement.

It is concluded, that any scheme promoted by labour for the use of leisure time should have for its main object the directing of "the intelligence and the emotions of its membership to the end of shaping a new and democratic social order which will make full use of the vast productive machinery now available, while at the same time preserving for the individual man and woman those essential democratic rights that can so easily disappear in an age of largescale planning and highly complicated organization."

Escape Periods in Maintenance-of-Membership Agreements

AN article in the December issue of the *Monthly Labour Review*, U.S. Department of Labour, deals with the effect on union membership of "escape periods" in renewed maintenance-of-membership agreements.

Under a maintenance-of-membership clause in a union agreement, members of a trade union are required to retain their membership for the duration of the contract on penalty of losing their jobs. The U.S. National War Labour Board has generally ordered that before such an agreement takes effect, a 15-day "escape period" must be provided, during which union members may resign their membership if they so desire. When a union agreement comes up for renewal at the end of a year or more, a second escape period must be allowed, according to Board policy. (L.G., 1943, p. 1328.)

In a survey conducted by the U.S. Bureau of Labour Statistics to determine the effect of this second escape period on union membership, 21 plants were visited having a total reported union membership of about 75,000. It was found that only 395 workers, or about one-half of one per cent had made use of the escape period to resign from the union.

In no case did resignations exceed 6 per cent of the total union membership at the time of the award, and in only three cases did resignations exceed 1 per cent of the union membership. In seven cases no resignations were reported.

"In the majority of instances the reasons given by union officials to account for the resignations were based on personal and petty grievances", the article states. "In one case, resignations were prompted by the desire of some of the members to seek affiliation with another union which was conducting an organizing campaign. In one other case, it was stated that internal union friction and

poor administration were responsible for a number of resignations. Promotions to supervisory positions outside the bargaining unit accounted for some withdrawals. Encouragement from supervisors was cited in two instances as responsible for resignations."

Information was not available to determine whether resignations were primarily those of delinquents or of union members in good standing. Delinquents were required by the Board to pay up back dues before they could resign, in certain cases.

Commenting on the attitudes of management and unions, the article states:

"Without exception, management representatives supported the inclusion of an escape period at the beginning of each maintenance-of-membership agreement, as a matter of principle; namely, to permit their employees to exercise the democratic right of free choice. The unions, with but two exceptions, were opposed to a second (or, for that matter, any) escape period. In one of the exceptions, a very small plant, 100 per cent organized, the local union president stated that the escape period served as a test and proof of the union's strength—in a sense, a vote of confidence—and he was willing to have an escape period at any time. In the other case the union representative expressed no opposition to the escape period, because no resignations had occurred during either of the escape periods.

"The objection to a second escape period most frequently voiced by the union officials was that it is, or could be, a threat to the union's security either through the organized opposition of a rival union or anti-union pressure exerted by the company. Also, union representatives argued that a second escape period allowed a person to drop his membership after he had taken advantage of the benefits gained by the union during both the old and new contracts."

Labour and the War Effort

Manpower Shortages in War Industry

Radio Address by Mr. Arthur MacNamara, Deputy Minister of Labour and Director of National Selective Service

IN a radio address on January 6, Mr. Arthur MacNamara, Director of National Selective Service, called attention to manpower shortages in certain key industries.

"Only a national disaster," he said, "could result from the belief that, because a few workers are laid off here and there, or because a report states that no further supplies of a particular item are required, the battle of production is ended."

He declared that "with the vast and complicated production organization which this war makes necessary, it is inevitable that here and there we will catch up on production. We may even over-reach ourselves sometimes." But labour shortages still continued in specific cases.

He stated that perhaps two thousand men and women were needed for the rubber tire factories in order that Canada might do its share in answering an appeal from General Eisenhower for one million heavy military tires for war vehicles, by producing this year 200,000 more tires.

"The rubber tire factories in Canada, located around Toronto, Hamilton and Kitchener, are equipped with machines and materials to increase their output to meet Canada's new quota," he said, "provided additional workers are forthcoming—provided Selective Service makes good on the pledge I have made to find the men and women they are looking for.

"On behalf of the employees, their union officials have agreed to co-operate to increase production in so far as workers already in the plants are concerned. It remains for Selective Service, therefore, to find additional workers, perhaps two thousand men and women, to be placed in the plants so that the new high quota will be fully met.

"Experience in rubber tire building on the part of new workers is helpful, but not strictly necessary. Any able-bodied man or woman can be trained to do some operation in a fairly short time. This training will be given to new employees.

"Men or women, especially those who have had experience in rubber factories are urged to apply for this work."

(In connection with production needs in the tire industry a conference was held in Toronto on Friday, December 29, of national and regional representatives of National Selective Service, the Department of Munitions and Supply, and the United Rubber Workers of America.)

Referring to shortages in other industries, Mr. MacNamara appealed to all workers in essential industry to "do their share by working every day they are required—by agreeing to work overtime when necessary—and by producing the maximum while on the job."

Continuing, he said: "Although many farmers, who are not needed in their home districts for agriculture in the winter, have made excellent response to our appeal to work in the woods and other top priority jobs, there is a shortage of men for work in the woods all across Canada—from British Columbia across the Prairies, through Ontario and Quebec, and down to the Maritimes. For logging and the pulp cutting industries, Selective Service is still trying to find thousands of workers.

"While relying mainly on the help of men from the farms, care is being taken not to use any men off the farms—off dairy and stock farms whose absence would cut down farm production during the winter months.

"Men are required for metal mining in British Columbia and Quebec, and Quebec also needs additional manpower in the leather working industry.

"The textile industries in Ontario and Quebec are calling for workers, chiefly for women. The necessity of turning out sufficient textiles so that our Armed Forces, both here and overseas, will be well supplied; so that our women and children, and, indeed, the men, will have the clothing necessary to face the Canadian climate, is a necessity about which there can be no argument."

Mr. MacNamara declared:

"The airy hopes for a quick termination of the war, the unwarranted optimism of a short time ago have gone. Instead we are faced with the imperative demand to spur production, to increase the output of war materials and to do so with all haste.

"Very large new orders are being arranged, some accepted and some in the negotiation stage, for large quantities of supplies and equipment for United States use including guns, gun barrels, gun ammunition, small arms ammunition, range finders, and many other items.

"Changes in design are the orders of the day, and draftsmen, toolmakers and tool-designers are in urgent demand for many of the war plants.

"High priority industries all across Canada are badly in need of skilled men and many of them are still in need of unskilled or partially skilled men and women to enable them to meet their quota of demanded output."

Mr. MacNamara said that late in December the Employment Service had about one hundred thousand vacancies for men and women in a great variety of occupations. Three-quarters of these jobs were in high priority industries.

"I urge men or women who can undertake employment to contact our employment offices and discuss employment possibilities," he said. "If your services are not needed in your immediate district a transfer could be arranged to a district where workers are in demand."

In conclusion Mr. MacNamara declared:

"Canadian men and women have served with distinction, not only in the battle of production, but on many and scattered battle fronts, and we are proud of the great achievements of those in uniform.

"We have built over three hundred 10,000-ton ships since the beginning of the war, besides thousands of smaller craft, and they have carried the products of our farms and factories across the Atlantic, protected by sailors of the Royal Canadian Navy, in Canadian built corvettes and other warships.

"Canada has built and manned the largest air training plan the world has ever seen, and our airmen have proven second to none in courage and flying ability.

"Maintaining the reputation it gained in the last war, our Army has performed brilliantly in Sicily, Italy, France, Belgium and Holland. Back of them has served another army, more than two million strong—an army of men and women, young and old. Their uniforms are smocks and overalls—their weapons ploughs and binders, picks and shovels, hammers and axes. Their campaigns were fought in the fields, in the factories, in the offices, mines and forests, and in the shipyards.

"Never before in the history of the nation has Canada been so completely mobilized in one common effort. Victory may be in sight, but this is no time to slacken our effort.

"In conclusion let me say that I am confident that Canadians will do as they have done before—meet the need for continued and increased effort and increase production so that the horrors of war may be more speedily ended."

Canada's War Production Record

A REVIEW of Canada's war production record was given by the Minister of Munitions and Supply, Hon. C. D. Howe, in a message issued at the New Year.

According to the Minister's statement Canada enters 1945 with war output still close to its peak. Total physical volume of war production for 1944 is almost equal to the all-time high of 1943. Cutbacks of some items, such as cargo ships, guns and small arms, have been compensated for by increased production of other items such as mechanical transport, instruments, and signals equipment.

According to Mr. Howe, there is no immediate prospect of any substantial over-all cutback for at least three months, and in some items, particularly certain types of ammunition, the output will be stepped up sharply in 1945.

Although over-all production volume has been maintained, improved manufacturing methods coupled with virtual completion of all war construction, have meant a drop in expenditure. During 1944 the Munitions and

Supply Department spent nearly \$8,000,000 a day for shells, ships, guns, fighting vehicles, planes and other war supplies. This is approximately \$1,000,000 per day less than the 1943 expenditure, and \$1,000,000 per day more than was spent in 1942, when Canadian war production was just hitting its stride. Expenditures in 1941 and 1940 ran to about \$3,500,000 and \$1,500,000 per day respectively.

Since the beginning of the war, the Munitions and Supply Department alone has made commitments totalling more than \$10,255,000,000, or not far short of a \$1,000 Victory Bond for every man, woman and child in the country.

Largely because of this enormous war production, and because about four-fifths of her foreign trade is of a wholly wartime character, Canada now ranks as the second greatest exporting nation in the world. During 1944 she exported about \$3,000,000,000 worth of items of all kinds, of which about three-quarters were declared as war materials. Approximately the same as that of 1943, this figure

is two and a half times greater than in any year of the first Great War, and three times greater than in 1939.

To make these achievements possible, the output of raw materials had to be increased greatly. Among the United Nations this country is to-day the third largest producer of timber and the fourth largest producer of steel, and is at or near the top in the output of nickel, asbestos, platinum, radium, gold, aluminum, mercury, molybdenum, copper, zinc, lead, silver, arsenic, and magnesium.

For the first time in her history, Canada is producing synthetic rubber, mercury, magnesium ingots, tin, tungsten, chrome concentrates, aviation gasoline blending agents, optical glass, various chemicals, and new types of plywoods, plastics, textiles, paints and lacquers. For the first time also, she is making many types of complicated machine tools.

Even more startling have been the advances in the production of finished products. With some minor exceptions, before this war Canada was producing no defence equipment. To-day the list of items, ranging from military locomotives to pistol bullets, from destroyers to lifebelts, runs to many hundreds. For the first time in history, this country is making artillery units, both large and small; filled, complete rounds of heavy projectiles; Lancasters, Mosquitos, and other large aircraft; Algerines, frigates, and other fair-size warships; radar and other intricate electrical and signals apparatus; military precision instruments; armoured vehicles, super-explosives, self-propelled guns, and a wide range of other equipments, components, and supplies.

Of war products useful to the civilian, Canada also is making for the first time a Canadian-developed "dry" ammonium nitrate fertilizer, new types of dehydrated foods, surgical and dental instruments, telescopes and other optical instruments, sulfa drugs, penicillin and other pharmaceuticals, and hundreds of other new items and items formerly imported.

Generally speaking, in volume the Canadian war output has been outstripped by that of the United States, the U.S.S.R., and the United Kingdom. But in timeliness, variety, newness and quality it has constituted a major factor in the Allied swing from desperate defence to victorious attack. Indeed, it is possible that without it in the earlier days of the war the United Nations might have been defeated.

From Canadian shipyards have been launched, to the end of 1944, in excess of 1,000 ships, including some 380 frigates, corvettes and minesweepers, more than 280 Fairmiles, motor torpedo boats, war tugs, and

other ships, and some 360 cargo ships and tankers.

From the automotive plants have come some 700,000 units of mechanical transport, and from these and other plants more than 45,000 armoured fighting vehicles, including self-propelled guns and tanks. Apart from motorcycles and tanks, these 745,000 vehicles, costing more than \$2,100,000,000, are enough to equip the whole German army.

Canada also has produced nearly 15,000 planes, more than 1,400,000 machine guns and other small arms, more than 50,000 complete artillery units, approximately 1,500,000 tons of war chemicals and explosives, about \$18,000,000 worth of rail equipment, locomotives, and freight cars, and in excess of \$450,000,000 worth of radar, signals apparatus, electrical devices, and instruments, including devices requiring the finest of optical glass.

On top of this, Canada has made in excess of 110,000,000 heavy projectiles, which is enough to destroy or damage every dwelling in Axis-held Europe. Of small arms ammunition, the cumulative total now reaches 4,200,000,000 or enough to fire two bullets into every living person in the world. And in addition, Canada has produced hundreds of millions of dollars worth of clothing, personal equipment, office, mess and barrack equipment, beds and bedding, photographic supplies, medical and dental stores, and other articles needed for the armed services.

To make these war supplies has called for prodigious quantities of raw materials. Canada is so rich in these raw materials that she produces not only for herself but also for the United States, the United Kingdom, and other United Nations.

Since the war began, Canada has felled and fashioned about 25,000,000,000 board feet of lumber, or enough to build about 2,400,000 houses. In 1944 alone this country produced upwards of 4,700,000,000 board feet, of which about 43 per cent was exported. In the full five years of war, steel output has been an estimated 11,982,000 long tons of ingots, or more than enough to build a double-track railway around the world. The 1944 output was about 2,560,000 tons as against 2,543,771 in 1943.

In terms of the Allied war effort, and excluding U.S.S.R. production, Canada has contributed 85 per cent of the combined nickel output of the United Nations; 20 per cent of the zinc output; 14 per cent of the copper output; 19 per cent of the lead output; 78 per cent of the asbestos output; and 35 per cent of the aluminum output. In addition, Canada turns out substantial quantities of alloying metals, of incalculable importance to the war production of the United Nations.

With total production of about 85,000,000 pounds, the Government synthetic rubber plant near Sarnia, Ontario, in operation for the past 15 months, has supplied all Canadian needs plus enough for some exports. The output of electric power also has reached new heights.

Only 30 per cent of the Canadian war production is delivered to Canadian forces at home and abroad. The remainder goes to the United Kingdom, the United States, the Union of Soviet Socialist Republics, Australia, New Zealand, India, the Union of South Africa, China, France, and other United Nations. Much of it has been shipped under the Mutual Aid Act.

TABLE I—TOTAL CANADIAN MUNITIONS PRODUCTION

	To Oct 31/44 (Actual)	To Dec. 31/44 (Estimated)
10,000 ton ships*	303	314
4,700 ton ships	26	31
3,600 ton tankers	6	6
Tugs	160	182
Frigates, Corvettes, and Minesweepers	349	368
Fairmile patrol boats	88	88
Motor Boats	24	24
52 foot ramped, powered cargo lighters	1,593	1,616
Special base and other vessels over 100 feet	19	22
Small craft with power	505	543
72 foot Minca barges	924	1,045
Small craft without power	3,687	3,725
Service aircraft	4,504	4,771
Advanced trainer planes	5,924	6,260
Elementary trainer planes	3,686	3,686
Tanks	3,640	3,640
Self-propelled gun mounts	2,075	2,175
Carriers	29,213	30,881
Other armoured vehicles	8,134	9,242
Mechanical transport	682,569	707,103
Locomotives for export (From Jan. 1, 1943)	151	151
Railway cars for export (From Jan. 1, 1943)	2,267	2,671
Communications equip- ment	\$329,800,000	\$336,000,000
Instruments	\$116,100,000	\$120,000,000
Machine guns and Machine carbines	371,091	379,920
Rifles and small arms	1,021,785	1,046,760
Gun barrels	66,719	67,221
Gun carriages or mountings	39,769	39,928
Small arms ammunition (including fused cali- bres up to 1 inch; in billions of rounds)	4.1	4.2
Pyrotechnics—units	2,537,680	3,556,337
Heavy ammunition— Shells, empty	64,863,844	65,397,000
Shells, filled	54,910,271	57,112,000
Cartridge cases, empty	123,519,481	125,809,000
Cartridge cases, filled	58,262,720	61,711,200

* These and other shipbuilding figures shown in this table are deliveries; hence the totals are lower than the launching totals.

Heavy ammunition—*Con.*

Bombs and other projectiles, empty	40,549,330	42,231,000
Bombs and other pro- jectiles, filled	28,886,028	30,843,000
Fuses, primers, etc., empty	169,820,561	179,993,000
Chemicals and explos- ives, short tons	1,481,024	1,500,000

TABLE II—GENERAL PURCHASING STORES
Estimated Value of Orders Placed on All
Accounts

TABLE III—CAPITAL COMMITMENTS
Estimated Value as at October 31, 1944
(in millions of dollars)

1. Government-Owned Industrial Facilities.			
A. Crown plants— Crown Operated		65	
B. Crown Companies— Crown Operated		115	
C. Crown Plants— Privately Operated		450	
D. In Privately Owned Plants	160	790	
2. Defence Construction (Includes Wartime Housing Ltd.)			
A. Housing		80	
B. Barracks, Hangars, etc.	417		
C. Airports and Runways, etc.	52		
D. Coastal and Other Defence Works	83	552	632
Grand Total		1,422	

NOTE—

1. Departmental financial commitments for industrial expansion are now in the process of revision by the Accounting Branch and therefore, the estimates shown are necessarily tentative.

2. Estimates for Defence Construction may be revised as a result of the drastic curtailment of the Air Training Plan.

War Effort of Great Britain

Government White Paper Describes Mobilization of Resources

THE extent to which Great Britain's resources have been mobilized for war during the last five years is indicated in a recently issued White Paper, entitled *Statistics Relating to the War Effort of the United Kingdom*.

Manpower

Since 1939 the number of men and women in the Armed Services or in industrial employment¹ has risen from 18½ to 22 millions, an increase of nearly one-fifth.

"The scale of mobilization of manpower achieved has been far greater than was attained in the last war," the Paper states. "The number of men and women in the Services or in industrial employment reached its highest level towards the end of 1943, by which time labour was fully mobilized. Since then the number in the Services or in industrial employment would have been maintained but for the loss of men who became casualties or were invalidated out of the Services and were unfit to take up industrial employment, and of women leaving industry for domestic reasons."

Recruitment

Total mobilization of manpower has been achieved mainly by compulsory measures, the Paper points out. The compulsory enlistment of men into the Services was begun before the outbreak of war, and of women in December, 1941.

For industry, recruitment was largely on a voluntary basis until 1941, when compulsory registration for employment was introduced by the Registration for Employment Order, 1941. Ten million men born in the years 1892 to 1926 and 11·6 million women born in the years 1893 to 1926 have been registered for either military service or industrial employment. In addition there have been registrations of persons with special skill, such as coal miners and shipbuilders.

Mobilization of Men

Including the number killed, missing, taken prisoner, or released on medical and other grounds, the total number of men who have served or are serving in the Armed Forces of the United Kingdom is over 5½ million. Fifty-seven per cent of all men between the ages of 18 and 40 served or are still serving in the Armed Forces. The other men in these age groups have been retained in industry because

of special skill, particularly in making munitions, or because they were unfit for service in the Armed Forces.

In addition to those serving in the Armed Forces, a large number of men have been needed for whole-time Civil Defence, consisting of National Fire Service, A.R.P. Services, Casualty Services, Regular and Auxiliary Police. At the height of enemy air attacks in 1941 the number was 324,000; since then it has been reduced to 225,000 in June, 1944.

Mobilization of Women

In its account of the contribution of women to the war effort, the Paper reveals that an increase of 2¼ million in the employment of women aged 14-59 has occurred since 1939 (or, counting each woman working part-time separately, an increase of nearly 2¾ millions). Those not working "consist mainly of girls at school and of married women with domestic responsibilities such as the care of young children and of invalids, and housekeeping for men and women engaged directly in the war effort."

Almost a million women are doing part-time work in industry and 350,000 are doing part-time Civil Defence Work. Large numbers of married women are members of the Women's Voluntary Services and many perform 48 hours a month Fire Guard duties in addition to industrial work.

The Paper points out that a great number of those who have taken up employment during the war are married women who are doing industrial work in addition to their domestic duties. Of those already employed, large numbers have transferred from less essential industries to munitions work and other war employment. Many have been drafted into this work. Others in civilian industry have replaced men and women who have been withdrawn from this work.

Casualties

Casualties suffered by the Armed Forces up to the beginning of September, 1944, numbered 563,000, including 176,000 killed, 38,000 missing, 194,000 wounded, and 155,000 prisoners of war. Among merchant seamen 30,000 had been killed and 4,000 interned.

The number of civilians killed or injured and detained in hospital was 136,000, of whom 57,000 were killed, including 7,000 children and 24,000 women.

Production

Monthly output of munitions in the United Kingdom in the first half of 1944 was about

¹ Men aged 14-64; women aged 14-59. Two women working part-time are counted as equivalent to one full-time worker.

six times as great as at the outbreak of war. These supplies have gone to equip the Fighting Services of the British Commonwealth and Empire and the Allied Forces dependent on Britain for supplies, to provide "substantial assistance" to Russia, and to assist other Allies.

The production of some of the principal items is shown in table II.

"Of the total supply of munitions produced by, or made available to, the British Commonwealth and Empire since the beginning of the war, it is estimated that about seven-tenths has been produced in the United Kingdom while about one-tenth has come from other Empire countries—making about four-fifths from British Commonwealth and Empire sources," the Paper states. "The remaining one-fifth of the Empire supplies has come from the United States. Of this total American contribution nearly four-fifths has taken the form of Lend Lease and the remainder the form of British cash purchases. These figures relate only to the over-all production of munitions and merchant vessels. They do not take into account work performed on the construction of aerodromes and military bases nor the provision of food and raw materials. All shipping services, as distinct from construction of merchant vessels, have been excluded."

Trade

The Paper describes the drastic curtailment of imports necessitated by the shipping situation. In 1942 imports were less than half the pre-war average and were confined to munitions and essentials. Imports of food were cut by one-half. Exports had to be maintained during the first two years of the war in order to pay for essential imports; but since 1941 assistance received from the United States and Canada under Lend-Lease and Mutual Aid has relieved Britain of the necessity of paying for imports in this way, and the quantity of commercial exports has fallen to only 29 per cent of the 1938 level.

Civilian Consumption

It is estimated that the quantity of all goods and services purchased by consumers has fallen by 21 per cent since 1938. This does not take full account of deterioration in quality. The main cuts were made in the first two years of war.

Food

Meat and bacon, butter, margarine and cooking fats, cheese, tea, sugar and preserves are rationed; distribution of eggs and milk is controlled in order to ensure preferential supplies to priority classes of consumers and the equit-

able sharing of the remainder; canned goods and many other foods (such as dried fruit, breakfast cereals, rice, biscuits) are rationed on a points system; chocolate and sugar confectionery are on a separate personal points system; fish, though not rationed, is scarce; supplies of fruit have dropped by one-half. During the war the United Kingdom has had to depend mainly on supplies from the home crop of fruit except for oranges; in consequence, during considerable periods of the year, fresh fruit is very scarce. Potatoes, other vegetables and bread are the only staple food-stuffs in unrestricted supply. Generally speaking, persons in the United Kingdom have increased their consumption of bulky and starchy foods, and are eating less meat, fats and sugar. The total consumption of milk and cheese has been increased.

The nutritive value of the country's total food supplies had fallen slightly between 1938 and 1943 but rationing and other measures have tended to reduce the inequalities in food consumption which existed before the war.

Other Consumers' Goods

Clothes rationing was introduced in 1941 and the present ration provides adults with about one-half of the average pre-war consumption. The Paper states that the ration is "barely adequate to cover even the minimum requirements of adults and has brought about a considerable deterioration in the state of their wardrobes."

Expenditure on furniture, furnishings and household textiles has been reduced to about one-fifth of peace-time levels, and to one-third in the case of hardware.

The production of many articles such as motor-cars, refrigerators, pianos, vacuum-cleaners, lawn-mowers and aluminium hollow-ware has been completely suspended from 1942 or earlier, while the production of cutlery, wireless sets and valves, bicycles, watches and fountain-pens has been drastically curtailed. Newly produced furniture may be supplied only against permits to persons setting up house (such as newly married persons or people who have been bombed-out), and to parents needing a bed for a growing child.

Housing

During the war there has been an almost complete ban on the erection of new houses and facilities for repair and maintenance work to existing houses have been severely curtailed.

Out of about 13 million houses in the United Kingdom at the outbreak of war, 4.5 millions have been damaged by enemy action. Of these, 202,000 have been totally destroyed or

damaged beyond repair. A substantial number of those seriously damaged are still uninhabitable, and the great majority have not yet been fully repaired.

Finance

Central Government expenditure has risen from £1,013 million in 1938 to £5,782 million in 1943. Almost the whole of this increase is accounted for by war expenditure, the Paper states.

In 1943, fifty per cent of expenditure was provided by taxation and other Government revenue. Rates of taxation have been very greatly increased. Before the war less than one million manual wage-earners were liable to in-

come tax and they paid £3 million; in 1943-44 the number had increased to 7 million and they paid £200 million. Other taxes are also much higher.

Overseas assets to the value of £1,065 million have been sold, and the United Kingdom has incurred liabilities abroad amounting to over £2,300 million.

Difficulty of Living Conditions

The Paper points out that in studying these statistics it should be remembered that the vast re-organization of the British economy which the figures show has been carried through

TABLE I—MOBILIZATION OF MANPOWER IN GREAT BRITAIN, 1939-1944

¹ These figures exclude prisoners and missing.

² About 900,000 women doing part-time work are counted half under "Remainder" and half in the appropriate industrial group.

in particularly difficult living and working conditions. For five years men and women have lived and worked under complete black-out. Family life has been broken up, not only by the withdrawal of men and women to the Services, but by evacuation and billeting. Production has been made more difficult by the dispersal of factories to frustrate the air attacks of the enemy and by the need for training new labour to unaccustomed tasks. There have been two long periods when work was carried on under constant and severe air attacks. Since 1940, 1½ million men have given their limited spare time, after long hours of work, for duty in the Home Guard. Most other adult male civilians and many women have performed part-time Civil Defence and Fire Guard duties out of working hours.

Messages to Labour in the New Year

NEW Year's messages pertaining to labour in Canada were issued during the holiday season by the Hon. Humphrey Mitchell, Minister of Labour, Mr. Percy Bengough, President of the Trades and Labour Congress of Canada, Mr. A. R. Mosher, President of the Canadian Congress of Labour, and Mr. Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour.

Minister of Labour

The Minister of Labour, Hon. Humphrey Mitchell, issued the following message:

"I am glad of another opportunity of extending my best wishes for the New Year to the workers of Canada.

"All classes, in all branches of activity, have resolutely maintained the home front in the past year while our fighting men have been winning battles overseas for our cause. However, while battles have been won, the war has not yet been won.

"In our great war plants, on our farms, in our shipyards, on our railway systems, local transportation systems, in the mines, the woods, the mills, in the smallest shops—in fact everywhere the wheels turn for victory, the record of production of goods and services has excelled any year in the history of the Dominion. Combined, this has been an effective contribution toward winning the war.

"I do not forget also that those fighting overseas largely are the sons and brothers of our working people, that from the workers have come huge sums collected for our war loans and generous subscriptions for our war charities.

"As we cross the threshold of the New Year there will, I know, be the same determination to carry on with our tasks. We had hoped 1944 would see the end of the war in Europe. That has not materialized. The enemy has been pushed out of much of the territory he has occupied for years but recently has shown evidence of reserve strength indicating very forcibly that none of us can relax in our efforts, and Japan remains to be beaten.

"So to all the workers wherever they may be, I wish them the compliments of the Season and let's keep going at top speed."

Mr. Percy Bengough

In extending New Year's greetings to the people of Canada, Mr. Percy R. Bengough, President of the Trades and Labour Congress of Canada, reiterated the decision of the Congress that there should be "no strikes or stoppages of production in wartime". He urged that "governments, employers and workers must not falter in keeping this need continually in mind", as delays in production "can be terribly costly in increased casualty lists and in giving the enemy more time for developing his defence."

"When peace is declared", he asserted, "we must be prepared to devote the same ingenuity for constructive purposes as we have been compelled to use for destructive purposes." He continued, "We must plan, organize and work for the establishment of a lasting peace, and for a democracy in which all people can live in a world rid of fear, a world in which all able to work can have full employment,

with a standard of living allowing comfortable homes . . . efficient treatment for sickness and full protection for the aged."

Mr. Bengough extended the deepest sympathy of labour "to those in many homes that are saddened by the loss of dear ones," and added "We must determine to do all in our power to see that these sacrifices and expended efforts have not been in vain . . . With such thoughts in mind we extend to all our best wishes and our best work for victory and the coming year."

Mr. A. R. Mosher

Mr. A. R. Mosher, President of the Canadian Congress of Labour, in his New Year's message, reviewed the achievements on the war fronts in 1944 and pointed out the "increasingly larger part" that Canada is playing in the international sphere, as well as the "heavier responsibilities" which must be faced in the year ahead.

He asserted that "every agency which can promote national unity and consequently greater unanimity among the people of Canada with respect to national ideals and objective is extremely valuable at this time." He pointed out the importance of the unprecedented growth of the labour movement in recent times and its significance as a factor in the attainment of these ideals. "What organized labour wants to do, in co-operation with all other forward-looking elements in the nation, is to make the economic system function in such a way as to provide employment and incomes for all, and the highest standard of living which can be attained." He contended that "whatever stands in the way of this is contrary to the national well-being and should be eliminated as quickly as possible." Mr. Mosher claimed that the objectives of labour in the past have

been "too limited in their scope." While not relinquishing labour's efforts to obtain adequate wages and better working conditions, labour must now deal with governments as well as with employers, be asserted.

"The New Year will bring fresh opportunities for progress toward the fulfilment of national ideals of peace, security and well-being. If the organizations and institutions representing varied interests in Canada are willing to get together in a spirit of co-operation and goodwill, and undertake to carry through a program of legislative and economic reconstruction, no objective is impossible of attainment." On the other hand "if each one struggles selfishly for his own interests, nothing can save the country from disaster," Mr. Mosher stated.

Mr. Alfred Charpentier

Mr. Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour, Inc., in his New Year's message, directed particularly to the workers of the Province of Quebec, expressed the hope that 1945 will witness the end of the war, the coming of a durable peace and the dawn of a new era throughout the world. "May this war," he said, "which after five years, now shows signs of an early conclusion, bring about the death of totalitarianism and, what is far more important, the rebirth of true Christian democracy."

Mr. Charpentier voiced the hope that women and children who are working in wartime will, when the manpower problem is less acute, at the close of the war, return to their homes and home-making. Men, rather than women and children, should be employed in the performance of labour that is ordinarily done by men in times of peace, he claimed.

Dominion-Provincial Farm Labour Conference

Review of 1944 Program—Problems of Post-War Period

A CONFERENCE of Provincial Directors of the Dominion-Provincial Farm Labour Program and of the Regional Agricultural Employment Advisers of National Selective Service was held at Ottawa, December 4-8, 1944.¹ It was called by the Federal Department of Labour for the purpose of reviewing farm labour activities during the year, considering the program for 1945, discussing probable changes in the transition and post-war periods and the kind of organization necessary to meet them. (The conference was held the same week as the Dominion-Provincial Conference on Agricultural Production so that farm labour officials could attend some of its sessions.)

Mr. MacNamara welcomed the delegates and commended the work which had been accomplished through Dominion-Provincial co-operation. He declared that the operation of the Farm Labour Agreements provided a practical demonstration of getting things done when constitutional difficulties might have impeded progress.

Provincial Reports

Reports of those attending the conference showed that the farm labour situation had been difficult but that by the full utilization of labour available, crops had been harvested.

The harvesting of the Maritime potato and apple crops was made possible by the use of soldiers on farm duty. One hundred and eighty-five of these were employed on Prince Edward Island, 740 in Nova Scotia and a large number in New Brunswick. Two hundred and twenty-five airmen were employed on the same basis in Nova Scotia. In the last named province an Agricultural Committee considered all applications for farm leaves, to ensure that men would be effectively employed.

Placements of farm workers were made in Quebec with the help of the Quebec Farm Labour Supply Bureau operated under the Dominion-Provincial Farm Labour Agreements and 949 local Agricultural Committees. These Committees made approximately 15,000 placements and the two Farm Labour Bureau Offices 3,500. The Province had the services of 2,500 men on farm leave. One thousand one hundred and fifty-nine harvesters were sent to the Prairie Provinces and 1,036 men, women and students to Maine for potato picking.

The Dominion-Provincial organization in Ontario known as the Ontario Farm Service

Force placed about 10,000 students on farms and in Farm Service Force Camps during the summer. Farm Commando Groups in 101 centres organized from 30 to 40 thousand people for temporary help in agriculture. Through the Agricultural Representatives and Local Selective Service Offices, 801 Prairie farm workers were allocated to farmers on a county quota basis for haying and early harvesting. In August and September, 4,166 workers, who could be spared from Ontario farms, were recruited to help with Prairie harvesting. Eight hundred and fifty-six soldiers were detailed on farm duty for work in the tobacco growing districts. Help was received from 2,209 soldiers, 445 airmen and 220 sailors on farm leave. A prisoner-of-war camp was established at Chatham for 300 men for sugar beet work. Japanese and conscientious objectors were also used.

The Prairie Provinces recruited a number of farm workers for grain handling at the head of the lakes in the spring and over 800 to help on Ontario farms from June to August. The most important farm labour problem in the Prairies was to obtain help to take off the harvest.

In Manitoba over 600 Indians from the Northern Reserve were recruited for harvesting. In addition 545 soldiers on farm duty, 254 sailors and 1,029 Eastern harvesters from Quebec and Ontario, as well as additional help from soldiers and airmen on farm leave augmented the supply of harvest help. Some 3,780 harvesters were sent to Saskatchewan. Eight hundred men were detailed to farm duty and a substantial number of Army, Navy, and Air Force personnel assisted with harvesting. Two hostels were established in Saskatchewan to accommodate the 200 prisoners-of-war who helped with stooking and threshing. As outside harvest help, Alberta received 1,584 harvesters directly from Ontario and Quebec and another 700 Eastern men who moved on from Manitoba and Saskatchewan early in October. Three hundred and twenty-two soldiers on farm duty and 312 sailors as well as other Army and Air Force men on leave helped with the harvest. Schools were closed from July 15 to October 2 to make students available for harvesting and food processing. One thousand one hundred prisoners of war were employed in agriculture, of whom 340 were on individual farms at Brooks and Strathmore while the remainder were employed on a day to day basis from the prison camp and hostels at Lethbridge.

¹ Minutes of the Conference in mimeographed form, may be obtained by applying to the Agricultural Division of N.S.S., Ottawa.

British Columbia is giving considerable attention to the placement of workers from towns and cities as temporary help to farmers. On the whole more reliance is being placed on providing transportation rather than establishing hostels for these workers. About half of the 310 girls who came from Saskatchewan and Alberta for fruit picking were placed in hostels which were established. In co-operation with Selective Service 27,000 farm placements involving 19,000 individuals were made during the year. A number of Japanese and about 2,000 Doukhobors were employed in fruit picking in the Okanagan Valley.

Seasonal Labour Supply

Representatives of both railways attended a session of the conference and considerable attention was given to methods for more effectively handling large-scale movements of farm workers. It was requested that arrangements be made whereby all provinces might receive a special rate for intra-provincial transportation of farm workers.

Officials of the Department of National Defence stated that the army had made no change in its policy with regard to the granting of different types of farm leave. However, there was a strong possibility that a reduced number of men would be available for farm work in 1945 as a large number of those available in 1944 would be in training or overseas. It was pointed out to the conference that in future any soldiers detailed for labour duty including work on farms could only receive their regular pay and allowances.

United States Farm Labour Program

A brief review of the United States Farm Labour Program was given by representatives of the War Food Administration, U.S.D.A. who attended one of the sessions. It was estimated that eight and one-half million people were required during the winter to operate the 6,000,000 farms in United States and twelve and one-half million during the summer months. Three-quarters of the additional requirements of an estimated 4,000,000 in the summer are met by members of the farmer's own family working in the fields. The remainder must be secured from outside sources. Labour is supplied so far as possible within each state, but when it becomes necessary to recruit labour elsewhere the Division of Labour, War Food Administration, is responsible for the recruitment and distribution. In such cases no placements are made without individual contacts with the farmers. In 1944, 70,000 workers for farms were brought in from Mexico, 17,000 from Jamaica, 5,000 from the Bahamas, and 1,000 from the Barbados for seasonal work and 1,000 from Newfoundland

for year 'round dairy farm work in the New England States. Approximately 75,000 prisoners-of-war were employed in agriculture. About 14,000 farm workers were moved from crop failure areas, but no success has attended efforts to move men from marginal farms. No steps have been taken towards directing army rejects.

Year 'Round Labour Supply

Considerable attention was given to the more effective direction of rejects and men on postponement. It was pointed out that in one of the provinces stress is being laid on requiring increased production rather than transferring men to more productive farms. Efforts to transfer rejects had not been successful due to differences in interpreting "essential employment" and the number of steps necessary before a final decision can be reached. A committee was appointed to draft recommendations to be submitted to the Director of National Selective Service regarding a more effective direction of rejects. The following recommendations were made and received the unanimous consent of the delegates present.

1. The definition of a reject should be clarified to apply to all persons rejected from military service pursuant to call under NRMA.
2. Authority for determining essentiality should be vested in Regional Agricultural Advisers.
3. The word "agriculture" should be added to Section 210B of the regulations.
4. Enforcement procedure should be speeded up by the deletion of several of the steps presently required.

Conscientious objectors were considered to be a source of help particularly in the western provinces. There are a total of 9,329 postponed conscientious objectors, 80 per cent of whom are employed in agriculture of whom about 5,000 are under contract.

Considerable numbers of farm workers who could be spared from agriculture are now being directed to other essential work, particularly in logging and pulpwood operations. Appeals over the radio and in farm papers were helpful as was the letter to farmers from the Minister of Labour and the Director of National Selective Service, encouraging men to take employment in other essential industries, if they could be spared from their farms during the winter. The most effective means of obtaining this type of labour was through personal contact by either Selective Service officials, provincial fieldmen or company representatives.

Representatives of the Information Division of the Department of Labour and the Canadian Broadcasting Corporation were present to take part in the discussion on publicity. In discussing the effectiveness of the Department's advertisements appealing to people to help on farms the general consensus was that appeals issued locally could be better timed to meet specific needs. Dominion advertisements might be issued early in the season as a general appeal. News-clips at theatres were considered effective if shown at the right time.

Farm Labour Problems in Transitional and Post-War Periods

It was suggested that a gradual relaxation of Selective Service Controls would probably take place during the transition period commencing with the defeat of Germany. Controls were designed to meet shortages of labour, but when supply became more plentiful the need for control would diminish. An order designed to stabilize farm manpower had been one of the first steps taken by Selective Service, and it was generally recognized that this stabilization order must be continued as long as there is an over-all shortage of farm labour. It might be necessary during the transition period for Selective Service to assist in seeing that not too many workers are obliged to make agriculture their means of existence. The necessity of obtaining a complete registration of farm workers as a prerequisite to Unemployment Insurance was noted and some of the practical difficulties mentioned.

The clause in the Selective Service Regulations which permits farm workers to accept non-agricultural employment outside of an urban centre of 5,000 population for a period of 60 days without a permit came up for discussion. Several of the representatives maintained that this clause provided the larg-

est loop-hole for men leaving agriculture. A resolution was passed urging that the clause be deleted and that farm workers be obliged in every case to obtain permits to work in other industries.

Some fear was expressed that agriculture might become a dumping ground for labour in the transitional and post-war periods. The trend is toward fewer workers with greater skills to meet the labour requirements on farms. It was pointed out that farm settlement projects have not been too successful owing to a lack of experience and interest on the part of those settled.

Projects for training city workers as farm help have met with disappointing results. Organized training courses are more suitable for those with some background of farm labour experience.

In discussing labour costs as a factor in the farm business it was emphasized that more attention would have to be given to the efficient use of help employed on farms.

The feeling was generally expressed that the Farm Labour Agreements should be continued so long as there is a general shortage of farm labour. As the farm labour situation becomes less difficult it may not be necessary to continue permanent farm labour divisions in each province or have provincial agricultural fieldmen devote such a large proportion of time to farm labour problems. It was suggested that farm labour administration become a function of the branch of the Provincial Department of Agriculture in which the agricultural fieldmen operate.

If it is found after the war that Farm Labour Agreements are not needed to deal with the farm labour problem during each month of the year, joint arrangements should at least be continued to meet labour shortages during periods of peak demand such as harvesting.

Industrial Music in Australia

Government Reports Indicate Successful Use of Music in Factories

MUSIC in industry has been successfully introduced in Australian factories, and is favoured by government authorities, according to information received recently from the Australian Department of Labour and National Service, dealing with investigations conducted by the Industrial Welfare Division and the Australian Broadcasting Commission.

Sound equipment for broadcasting music has been installed by a considerable number of plants, some of which use their own records, some the radio, and some a combination of both. For the duration of the war the Australasian Performing Rights Association "have waived the usual licence fee. This applies both to factories that formerly paid a licence fee and to factories that have recently installed sound equipment."

Report of Industrial Welfare Division

As a result of inquiries made by the Industrial Welfare Division, it is revealed that while much information at present available on this subject is indefinite, the following conclusions are well-established:—

- (a) A great majority of employees are in favour of music.
- (b) Most employers are favourable either on specific or general grounds.
- (c) Music has some value in the alleviation of monotony and fatigue.
- (d) Both employees and employers claim that its use results in a general improvement of morale.

It is clear, however, the report states, that circumstances, requirements and conditions are varied, not only in different industries, but also in factories in the same industry. This Division has in consequence declared itself in favour of the principle of music in industry, but proposes individual investigation into type of work, work conditions, sex and age groupings, and so on. The Division has agreed to make recommendations, after investigation, on applications to the Directorate of Radio and Signal Supplies for permission to install equipment for broadcasting music.

Because amplifying equipment is in very short supply, recommendations will only be made in favour of firms which can show that efforts have been made to improve standards in other directions as, for example, lighting, ventilation, sanitation and techniques of personnel management. Instruction will also be given to ensure that the managements of such

firms understand what is known about the most suitable music for varying conditions of work and the most suitable times for playing it. It is felt that, as a result of the investigations involved, more definite data may be collected on certain aspects of music in industry and that eventually, the Division may be able to make more specific recommendations about matters which are still debatable.

Results of Investigation by A.B.C.

The Australian Broadcasting Commission regularly broadcasts selected musical programs for people in industry. These programs, known as "Music While You Work" are broadcast three times daily from Monday to Friday, at 9.00-9.30 a.m.; 10.45-11.15 a.m.; 3.30-4.00 p.m.; and on Saturday at 10.45-11.15 a.m., and 3.30-4.00 p.m.

During 1943, an officer of the A.B.C. made an investigation of "music while you work" in 25 Sydney factories. These factories presented a reasonable cross-section of the industries, and included aircraft, boot and shoe manufactures, canvas goods, electrical equipment, food production, heavy steel, laundries, munitions, paper manufactures, radio and accessories, soap works, textiles and tobacco. In the 25 factories there was a total of approximately 25,000 workers employed. It was found that 18 used music; of these 5 broadcast their own records only, and 13 used radio programs. In one large textile factory nearly 300 loud-speakers were used; in the noisy weaving mills 4 speakers were arranged to each square of twenty feet.

Although this investigation was made principally to measure the popularity of the A.B.C.'s "Music While You Work" sessions, certain significant facts emerged which have a general application to the use of music in industry. It was found that the A.B.C. programs were more popular than those of commercial stations because they were not interrupted by announcements and advertising, and, less definitely, because there was a better selection of music. The times of the broadcasts were considered well-chosen; executives claimed that at these times "production lag" had been most noticeable. However, only two companies considered that any actual increase in production had resulted from the introduction of music, and these had no

systematic evidence to support the belief. Where records were used, it was found that programs chosen by the combined vote of the operatives were more satisfactory than those chosen by individual employees in turn.

It was found that "popular music" was most generally favoured by the operatives. The investigator's approximation on a percentage basis was:—

	Per cent
Popular vocalists	50
Popular hit music.....	45
Miscellaneous (Hawaiian music, waltzes, musical comedy, etc.)	5
Amongst executives the approximation was:—	

	Per cent
Familiar, smooth and rhythmic dance music (preferably non-vocal).....	75
Popular vocals	15
Marches and medleys.....	5
Miscellaneous (Hawaiian, waltzes, etc.)	5

There was almost complete unanimity on dislikes in music—classical, "hot" swing, ballads.

This investigation, the report states, was not wide enough to be truly representative, nor was it designed to uncover any evidence as to reduction of fatigue or increase in production. There were 10,000-15,000 people employed in the 18 factories using music which were surveyed. With these limitations the conclusions which may be established are:—

- (I) That both employees and executives agree on the value of music in relieving monotony and improving morale;
- (II) That popular modern dance music and popular vocal music are most favoured for broadcasting in factories.

The A.B.C. also sent a circular questionnaire to many of the principal factories in Australia, and the results of this largely agreed with the findings of the survey.

Music at an Australian Ammunition Factory

On February 22, 1942, a paging system was installed in an ammunition factory. It was intended originally to use the system for paging only, but representations were made to the management and permission was granted to broadcast music throughout the factory areas.

Paging operators are on duty 24 hours of the day, working three shifts with the factory, the report states. Music is relayed throughout the area (with the exception of the main office) by a system of loud speakers fitted in various parts of the shops. One of the big disadvantages of the present system is the lack of volume control—the same volume is used over the whole area and is too loud for some shops and not loud enough for

others. However, the system is being overhauled and several additions are being made whereby the operator will be able to control the volume in each shop separately.

Music is played for half-hourly periods during each shift and operators must adhere to set times and programs.

The program time-table is as follows:—

Morning Shift

8.30 a.m. — 9.00 a.m.
9.50 a.m. — 10.20 a.m.
11.30 a.m. — 12.00 a.m.
12.45 p.m. — 1.15 p.m.
2.30 p.m. — 3.00 p.m.

Afternoon Shift

4.45 p.m. — 5.15 p.m.
6.00 p.m. — 6.30 p.m.
8.45 p.m. — 9.30 p.m.
10.30 p.m. — 11.00 p.m.

Night Shift

11.15 p.m. — 11.45 p.m.
12.45 a.m. — 1.15 a.m.
2.00 a.m. — 2.30 a.m.
3.30 a.m. — 4.00 a.m.
4.45 a.m. — 5.15 a.m.
6.15 a.m. — 6.45 a.m.

Paging operators make up their own programs according to set instructions and have them checked each week by a Welfare Officer. Relayed programs and times are checked also by a Welfare Officer, a switch and speaker having been installed in the welfare office for this purpose.

At the request of employees some of the programs coincide with the tea breaks, as they "like to hear the music without the noise of the machines."

Music is also played slightly more frequently on the night shift to help to combat the effects of fatigue, boredom, etc.

Both records and wireless programs are broadcast. Six records at a time can be placed on the turntable which automatically changes them as each record finishes.

Radio programs such as "Lest we forget", "Choice of the people", "Myer Musicale", etc., are used, and it is the duty of the paging operator to monitor them and see that no speeches or advertising matter go over.

A comprehensive record library has gradually been built up. Orchestral, light orchestral, dance vocal, popular tunes, songs and waltzes, light classics and musical comedy numbers, predominate. Sopranos do not relay well so most vocal numbers are male, or female voices in the lower registers. Very slow waltzes, rhumbas and hot music are avoided. Crooners are found to have a detri-

mental effect on production (operatives get working to their rhythm).

That music is appreciated by the workers is shown by requests to have certain numbers played or a certain program relayed. Many have brought their own records to be played. These are permitted after being "censored" by the welfare officer responsible for the programs.

Report of Welfare Officers at an Australian Explosive Factory

A report made by welfare officers recommending the introduction of music at an Australian explosive factory brings up a number of points and makes practical suggestions regarding the problems that need to be considered when such a project is undertaken.

The report is as follows:—

Value:

Recent consensus of opinion is that music aids production in the following ways:—

- (I) It relieves monotony which causes fatigue.
- (II) It provides a type of psychological satisfaction that replaces to a large extent such other human outlets as conversation.
- (III) It is a good-will builder.
- (IV) It supplies rhythm which helps the worker in the execution of monotonous work.

General:

The following factors should be considered when planning the installation of music in the factory:—

- (I) The type of work performed.
- (II) The noise of the shop.
- (III) The age group and other characteristics of the operatives, including their sex.
- (IV) The length of work-spells.

In the case of this factory no one scheme would be completely satisfactory for all shops because of variations of the above factors in each shop. Independent shop control in the matter of volume, tone and selection is necessary if the best results are to be obtained.

Programs:

While independent control is greatly desired, it is possible, however, to schedule programs which would be satisfactory for the majority of shops.

One of the chief problems associated with the playing of music in the factory is the scheduling of programs. Experience has shown that music soon loses its effectiveness if it is played continually and that the best results are obtained from four or five half-hourly sessions throughout each work-spell.

Recorded Music:

Where a gramophone pick-up is installed it is possible to make full use of recorded music. In such cases it would be necessary to roster operators to cover all shifts. Operators would be responsible for the selection of records, the maintenance of the record library and the drawing up of the programs.

These duties could be performed under the supervision of the Welfare Section which has had experience in such matters. A system of regular exchange of records with other factories could also be introduced.

Points in the Selection of Records:

- (I) Avoid unfamiliar tunes which tend to distract and disturb.
- (II) Avoid "hot" music or music that is too thickly scored.
- (III) Avoid music with much tone level, variation and accentuation.
- (IV) Avoid very pronounced rhythm—e.g. slow waltzes, rhumbas.

Points in Arranging Programs:

- (I) Band music is well suited to very noisy shops.
- (II) Vocal numbers are usually unsuitable excepting for quiet, monotonous work.
- (III) Martial music is most suitable for early morning programs to assist in the "warming up" process.
- (IV) Variation—the key to success.

Radio and Factory Programs Combined:

The most satisfactory arrangement would be a blended combination of recorded and radio programs, thereby obtaining the advantage of the variety of music at the radio stations' disposal in conjunction with specially selected programs of the factory's recordings.

In conclusion it must be remembered that music in the factory is still in the experimental stage and it is largely by trial and error that a scheme can be perfected for the particular factory.

At all times it is advisable to welcome suggestions from the employees themselves and to conduct a questionnaire several weeks after the scheme has been in operation.

Decisions of National War Labour Board

DURING the month of December, the National War Labour Board issued decisions in the following cases:—

British Columbia Electric Railway Company, Limited, and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (Division 134), The Brotherhood of Locomotive Engineers and The Order of Railway Conductors.

Dominion Paper Box Company, Limited, and Alex. Donaldson.

Reliance Industries, Limited.

Phillips Electrical Works, Limited (Brockville).

Messrs. Weiller and Williams Company, Limited (Saskatoon).

The Boot and Shoe Manufacturers of the Province of Quebec and La Federation Nationale du Cuir et de la Chaussure du Canada, Inc., and The Boot and Shoe Workers' Union (A. F. of L.)

Dominion Engineering Works, Limited, Longueuil and Lachine Plants and Lodges 1596-1660 of the International Association of Machinists.

Parke, Davis and Company and the Canadian Pharmaceutical and Chemical Employees' Union (C. C. L.).

The John Ritchie Company, Limited (Quebec) and l'Union Protectrice des Travailleurs en Chaussures de Québec, Inc.

J. C. Malone and Company.

The Continental Paper Products, Limited and Le Syndicat National des Travailleurs de l'Industrie du papier faconne d'East Angus, Inc.

Lever Brothers, Limited and International Chemical Workers' Union, Local 23623, A. F. of L.

B. C. Electric Railway Company, Limited and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America.

British Columbia Packers, Limited, Canadian Fishing Company, Limited, Nelson Brothers Fishery, Limited, Nootka-Banfield Company, Limited, and Fish Cannery, Reduction Plant and Allied Workers' Federal Union No. 89.

Anglo-British Columbia Packing Company, Limited, British Columbia Packers Limited, Canadian Fishing Company Limited, Nelson Brothers Fisheries Limited, Nootka-Banfield Company, Limited, J. H. Todd and Sons Limited, Johnston Fishing Packing Company Limited, North Shore Packing Company Limited, and Fish Cannery, Reduction Plant and Allied Workers' Federal Union No. 89 and United Fishermen's Federal Union No. 44.

Famous Players Canadian Corporation and Motion Picture Projectionists' Union, Local 302, (Calgary).

Re: British Columbia Electric Railway Company, Limited and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America (Division 134), The Brotherhood of Locomotive Engineers and The Order of Railway Conductors

Reasons for Decision

This is an application by the Association for leave to appeal from a decision of the Regional War Labour Board for British Columbia dated December 23, 1943, on an application made by the Engineers and the Conductors to extend the provisions of their agreement. The latter two organizations oppose the appeal, while the Company takes a neutral attitude in the contest.

The Company operates an interurban system divided into 4 geographical districts, three of which are concerned in this appeal. The employees in District 1 are represented

by the Association, while the employees in Districts 2 and 3 are represented by the Brotherhood of Engineers and Order of Conductors who have a joint agreement with the Company.

A certain amount of freight moves across the boundaries of the 3 districts and to handle this type of freight, the practice for many years has been to use pro-rated crews made up of employees from the 3 districts. The past practice for all members of pro-rated crews was that wage rates and working conditions were those provided in the agreement covering the district in which the work was

being performed. By the decision now under appeal, the rates and conditions of the engineers' and conductors' agreement will prevail for employees of districts 2 and 3 for all work performed by them on any part of the system.

It is the view of the Board that, in the circumstances of this case, the nature of the applicant's interest in the Regional Board's

decision is not such as to give it status, within the terms of what was section 11 (4) of this Board's by-laws and is now section 11 of P.C. 9384, to carry an appeal from the decision. We fail to see how the wages of any employees covered by the Association's agreement can be said to have been affected by the decision, and we think the application should be denied.
December 1, 1944.

Re: Dominion Paper Box Company, Limited and Alex. Donaldson

Reasons for Decision

This is an appeal by the Company from the Finding of the Regional War Labour Board for Quebec, dated February 29, 1944, as follows:—

And therefore finds that you have made an infraction to the law, consequently it is expected that this matter will be settled immediately and that within eight days you will inform this Board that it has been done.

If within a delay of eight days no reply is received from your firm this matter will have to be referred to the National War Labour Board.

Donaldson, a salesman for the appellant Company, had been in their employ for several years prior to 1942. He was paid on a commission basis, plus certain additional expenses for car allowance, etc. In the main, all other salesmen, until 1941, were also paid on a straight commission basis. Some time prior to November 15, 1941, when P.C. 8253 came into effect, and due to the uncertainties of the situation as to the supply of paper boxes for civilian consumption, and owing to controls, the Company desiring to suitably provide for its sales' force, decided to alter its commission payment plan. There is considerable evidence to indicate that with the majority of the salesmen this new plan had been put into effect prior to November 15,

1941; and that while Donaldson had been made aware that his contract for 1942 would be changed, complete details were not given him until February 9, 1942. If such were the case, the Company may have established a new range of rates prior to November 15, 1941. The new plan provided a fixed weekly salary plus a much reduced rate of commission.

In August, 1942, Donaldson wrote the Regional War Labour Board for Quebec, and following correspondence with him, without any notification to the Company, Donaldson was advised by the Board on March 12, 1943, that his commission arrangement should not have been changed. On February 29, 1944, the Board, without having notified the Company that Donaldson had made any application, made its Finding above referred to. Following written protest by the Company, the Board gave leave to appeal in April, 1944.

We are of the opinion that the powers of the Board should not be used in the manner indicated, nor as a debt collection agency. We decline, under the circumstances, to make a ruling as to whether the provisions of the Order have been complied with or to recommend prosecution.

The Order of the Regional Board will, therefore, be vacated.

December 5, 1944.

Re: Reliance Industries Limited

Reasons for Decision

(Oral Decision)

The Board is of opinion that this appeal must be dismissed. The employer having stated that under the circumstances he had agreed to the increase in principle, and not having indicated any inability to pay, the employer then should find the means of putting into effect the increase.

Mr. Eldon asked that the National Board clarify the clause in the finding and direction of the Regional Board which reads as follows: "Where employees engaged on the night shift

are required to work overtime such premium shall not apply to overtime hours worked." Mr. Lizotte agreed that this clause required clarification; in fact the difficulty in making effective this clause as phrased had resulted in the employer's objection to complying with the entire finding and direction. It is the opinion of this Board that the clause complained of should be modified to read, "Where employees engaged on the night shift are required to work overtime, such premium shall not be added to the base ordinary time rate for the purpose of computing overtime."

November 21, 1944.

Re: Phillips Electrical Works, Limited (Brockville)*Reasons for Decision*

An appeal from a decision of the Ontario Board dated June 29, 1944, on an application for the establishment of a schedule of classifications and rates for the company's accounting staff. The maximum rate approved by the Regional Board was \$225, while the company had sought a rate of \$325 for a qualified accountant capable of assuming full responsibility for the company's accounts.

By the terms of the proviso in section 17 of order P.C. 9384, this employee is deemed to be above the rank of foreman or comparable rank and subject to the Wartime Salaries Order. There is nothing in the material filed to justify a determination that he is not above the said rank.

The appeal is therefore dismissed.

December 5, 1944.

Re: Messrs. Weiller & Williams Company, Limited (Saskatoon)*Reasons for Decision*

The Company applies for leave to appeal to this Board as to the effective date given by the Regional Board for Saskatchewan to its decision of August 3, 1944. The Regional Board permitted payment of certain wage increases to three employees from the date of application; the appellant, by a subsequent request, asked that they be made retroactive to the dates when it had agreed to pay them. The request was refused on two occasions by the Regional Board who also declined leave to appeal.

The matter of retroactivity is discretionary (section 30 (2) of P.C. 9384) and as a rule this Board does not substitute its discretion for that exercised by a Regional Board, unless it be demonstrated that the latter proceeded upon some material error. All of the pertinent facts in this case were placed before the Regional Board and we perceive no basis upon which it could be said that the decision below resulted from a faulty exercise of discretion.

The application is dismissed.

December 5, 1944.

Re: The Boot and Shoe Manufacturers of the Province of Quebec and La Fédération Nationale du Cuir et de la Chaussure du Canada, Inc. and The Boot and Shoe Workers Union (A.F. of L.)*Reasons for Decision*

This is an appeal by the employee organizations (the Federation and the Union) from a decision of the Regional War Labour Board for Quebec announced on July 10, 1944 refusing an application for a 10 per cent increase in the minimum wage rates fixed by the decree relating to the shoe industry in the province of Quebec passed under the Collective Agreement Act (R.S.Q. 1941, Chapter 163), vacations with pay and an overtime rule after 48 hours per week. If granted the application would have meant a substantial amendment of the collective labour agreement which, as extended by the decree under the provincial legislation, establishes minimum wage rates and working conditions for the entire boot and shoe industry in the province of Quebec. About 140 employers and 12,000 employees are engaged in the industry; 1,795 employees would be entitled to an increase if a 10 per cent increase in the minimum rates were directed.

The Joint Committee set up under the provincial act to administer the agreement was consulted by the Regional Board and the decision followed the committee's recom-

mendation that no change of a major character be made in the provisions of the agreement without the consent of the parties. The parties to the agreement were the two appellant employee organizations and some 68 individually named employers.

The matter must be decided under P.C. 9384 which asserts as a paramount principle that the wage structure in Canada is to be stabilized in order to maintain stability in prices and prevent increases in the general cost of living.

War labour boards have the power to direct or authorize an employer to increase his wage rates but "only if and to the extent that (they find) that such increased rate is necessary to rectify a gross inequality or gross injustice." In section 20 (2) the Order lays down for the Board the duty of taking into account the probable effect of such increase on the cost of production of the employer. These provisions were not contained in the prior Wages Control Order P.C. 5963 and they make it extremely difficult, if not impossible, for war labour boards to interfere with rates and conditions established as minimum standards for an entire industry in a province.

Undoubtedly these minimum rates are not high rates, they are obviously quite low rates and it might very well be that the employees of this or that employer who is paying them are the victims of a "gross injustice". But there was no evidence of that nature adduced and it would seem that with this type of general application, the procedure might become involved and cumbersome, if an attempt were made to make out individual cases.

It should be noted that the Wages Control Order was not designed to replace or supple-

ment the various minimum wage enactments of the provinces. Attention is directed to the decision of this Board in the Canada Starch Company case dated November 28, 1944, wherein it was reminded that war labour boards are not minimum wage boards or fair wage boards, but that they are wage stabilization boards.

Our view is that the appeal must be dismissed.

December 12, 1944.

Re: Dominion Engineering Works, Limited, Longueuil and Lachine Plants and Lodges 1596-1660 of the International Association of Machinists

Reasons for Decision

This is an appeal by leave of the Regional War Labour Board for the Province of Quebec from its decision of July 8, 1944, dismissing the application of the union for an increase in wage rates.

The application, generally speaking, is to increase the rates in the Dominion Engineering Works at its plants at Longueuil and Lachine to those prevailing in the National Railway Munitions plant, although in the schedule proposed by the union some of the rates are in excess of those in the latter Company. In some cases also there are no similar classifications in the National Railway Munitions plant and in such cases the applicant applied for straight wage increases. It was admitted that the average hourly rates in the Dominion Engineering Works (exclusive of any overtime) are at least equal to, if not in excess of, those in the National Railway Munitions plant. The Company has had in operation for some time a job evaluation system. If, therefore, the revisions asked for were granted, it would seriously alter the existing and recognized differentials between the various classifications and would result in an average hourly rate substantially in excess of that in the National Railway Munitions plant.

Without, therefore, finding that the National Railway Munitions plant is comparable to the Dominion Engineering Works (the Regional Board found it was not comparable), we are of the opinion that on the evidence of the

appellant union no gross inequality or gross injustice was shown to exist in the prevailing rates. In fact, the brief read at the hearing by the union stated that it was not claiming that any gross inequality or gross injustice existed, but rather that the rates of pay were lower than those paid in a comparable industry. It would appear that the rates quoted by the union for the Dominion Engineering Works are minimum rates and those for the National Railway Munitions plant are maximum rates.

In addition to the above, the Company has a special "man-rate" by which an additional payment up to ten (10c.) cents per hour may be made in suitable cases. One of the main grievances of the union is that this is not freely used, but that is a matter for discussion between the Company and the Grievance Committee.

On June 30, 1943, the Regional Board stated that the rates then being paid by the Company were higher than the rates being paid by comparable firms in the district. On February 19, 1944, the full cost-of-living bonus of Four Dollars and Sixty (\$4.60) cents was incorporated in all basic rates.

For the reasons above set forth, the appeal will be dismissed and the Finding and Direction of the Regional War Labour Board for Quebec confirmed.

Finding and Direction will be issued accordingly.

December 14, 1944.

Re: Parke, Davis and Company and The Canadian Pharmaceutical and Chemical Employees Union (C.C.L.)

Reasons for Decision

This is an appeal by the union from a decision of the Regional War Labour Board for Ontario, dated July 10, 1944, dismissing an application by the union for an increase in wage rates for four section heads from ninety-

seven (97c.) cents per hour (in some cases composed of lower rate plus bonus) to one dollar and seven (\$1.07) cents per hour (the original application requested \$1.08 per hour). Leave to appeal was granted by the Regional Board.

The chart filed by the Company shows that there are twenty section heads, of whom about fifteen are in the production side. The union's application is on behalf of the section heads of the White Room, Granulating Room, Ointment Room and Elixir Room, all of whom have a rate of ninety-seven (97c.) cents per hour, which at times, by reasons of bonus provisions, is in excess of that amount. The union asks that these be increased to one dollar and seven (\$1.07) cents per hour to place them on a par with the former head of the Pillcoating Section. It is clear that this rate of one dollar and seven (\$1.07) cents was set up as a special case for an old employee who lived in Detroit and who was given increases aggregating ten (10c.) per hour in 1939-1940, to make up the discount on Canadian funds. It was not made applicable to any of the others.

It is clear that the rates paid by the Company are not lower than those paid for similar classifications in the Windsor area.

In this case we are unable to find any gross inequality or gross injustice, nor do we find any power under P.C. 9384 to raise the rates paid to four employees to a higher rate paid to only one employee, particularly when the latter rate was put into effect to meet a particular case and when similar circumstances do not exist for those on whose behalf the application is made.

We are of the opinion that the decision of the Regional Board was correct and the appeal will, therefore, be dismissed.

Finding and Direction will be issued accordingly.

December 15, 1944.

Re The John Ritchie Company, Limited (Québec) and l'Union Protectrice des Trvailleurs en Chaussures de Québec, Inc.

Reasons for Decision

This is an appeal by the Union from a finding and direction of the Regional War Labour Board for Quebec dated September 12, 1944, ordering a set of piece work rates in the lasting room of the Company's plant. This decision rescinded a prior finding and direction dated July 25, 1944, which had put into effect a set of higher rates. Both decisions were made following receipt of recommendations from a standing inquiry committee which had been set up by the provincial Department of Labour to assist that department in matters pertaining to the boot and shoe industry in the city of Quebec.

The first report of the committee is dated July 17, 1944, and states that an investigation was made of the rates paid by A. E. Marois, Ltée, Gale Brothers, Children Shoe, Lachance & Tanguay and Ludger Duchaine. The committee in a unanimous report recommended a substantial increase in the piece rates for practically all of the operations in the Company's lasting department and by its Finding and Direction dated July 25, 1944, the Regional Board adopted the report and ordered payment of the rates.

On July 27, 1944, the Company wrote to the Regional Board alleging that they had not been given full opportunity to make representations to the committee. The committee was then requested to re-open the matter and to give the Company an opportunity to make its representations.

The committee then filed a majority report and a minority report. The majority report renewed the prior recommendation and said that no examination had been made of the relative plant efficiencies and that the piece rates were considered without taking earnings into account. The minority report stresses the importance of converting piece rates into hourly rates in order to make proper comparisons. The contention is maintained throughout the minority report that under the conditions prevailing in the Ritchie plant workers in the lasting department are able to make more money than in the other plants at the same piece rate. The Regional Board adopted the view of the minority report and issued its Finding and Direction dated September 12, 1944, in which it ordered the piece rates which the Company said it was prepared to put into effect. There were some increases, but not in all classifications nor were they as large as the rates first ordered.

We have considered the supplementary material filed by the Company with respect to its allegation that this plant affords an opportunity for higher earnings in the lasting room and we are of the view on this information that there was reasonable ground for the position finally adopted by the Regional Board.

The appeal must therefore be dismissed.

December 18, 1944.

Re: J. C. Malone & Company

Reasons for Decision

By leave of the Quebec Regional Board this is an appeal by the Company from a decision dated September 12, 1944, ordering an increase of 4 cents (from 56 to 60 cents) per hour to pulpwood loaders employed at Chaudière Bassin near Quebec.

The appellant asserts that on a comparison with rates paid in the locality for this type of work the increase is not justified. The Regional Board appears to have compared rates on a wider basis, particularly with the

rate for unloading pulpwood at Trois-Rivières, and to have found that there was sufficient ground for the exercise of the power contained in section 20 (1) (a) of P.C. 9384.

In the light of all relevant circumstances, including the rather strenuous nature of the work involved, we are unable to say that the Regional Board misapplied the provision of the Order. The Finding and Direction effective from September 5, 1944, will be confirmed.

December 19, 1944.

Re: The Continental Paper Products, Limited and Le Syndicat National des Travailleurs de l'Industrie du papier façonne d'East Angus, Inc.

Reasons for Decision

An appeal by the Company from that part of the decision of the Regional War Labour Board for Quebec dated June 20, 1944, ordering an increase of the wage rates of female employees at the Company's plant located at East Angus. The increase ordered in the male rates is not under appeal.

The syndicate in its application sought comparison with rates paid by Pyramid Paper Products Limited at East Angus and by Kilgour Paper Bags Limited at Windsor Mills. The appellant submits that "neither participation in the same general industry nor proximity are sufficient alone or in combination, to make manufacturing plants comparable" and that the only comparable mill producing multiwall bags is that of the Bates Valve Bag Company at Trois-Rivières. The Company's brief also refers to the differential recognized in previous cases between rates for the same occupational classification in newsprint mills and in fine grade paper mills in the same locality.

In considering the appellant's argument it is necessary to keep in mind that the cases referred to were decided by means of the rule of comparability contained in section 25 of the then governing Order in Council (P.C. 5963), while the decision in this case was made under the "gross injustice and gross inequality" provision of section 20 (1) (a) of P.C. 9384. The present formula presents a severe condition, but in applying it a war labour board is not held necessarily to a test of comparison, either within an industry or within a section of an industry or even within a locality. It is evident from the Regional Board's Finding and Direction that in increasing the range of the rates here in question from 25-30 cents to 30-35½ cents, the Regional Board had come to the conclusion that this was a proper case for an application of the rule now in effect. This Board is of the opinion that that conclusion should not be disturbed and that the appeal must be dismissed.

December 19, 1944.

Re: Lever Brothers Limited and International Chemical Workers' Union, Local 23623, A. F. of L.

Reasons for Decision

This is a Joint Appeal by the Company and the Union from a decision of the Regional War Labour Board for Ontario dated September 23, 1944, and confirmed on review under date of November 1, 1944, refusing permission "to establish a 40 hour week and pay employees amounts commensurate to those earned for 48 hours, and to pay a premium rate of time and one-half beyond 40 hours a week", at the Company's Toronto plant.

Representatives of the Company and of the Union met this Board to discuss the conditions involved in the Appeal. As a result of

this conference it became apparent that the conditions requested by the application to the Regional Board could not be shown to be "necessary to rectify a gross inequality or gross injustice", as required under the provisions of Section 20 (1) of Wartime Wages Control Order, 1943, P.C. 9384, and that, therefore, the said Board was justified in refusing to approve the application. However, as a result of additional information and further representations submitted to this Board, it was shown that following the setting up by the Company and the Union of an Industrial Production Co-operation Board, as

the result of the Government's encouragement of the operation of Joint-Labour Management Committees, such increased production in relation to wage costs has been secured during a trial period as in the opinion of the parties justified the adoption of the improved working conditions for the Company's hourly rated employees as requested by the application.

The problem involved, therefore, appears to be one which would justify the adoption of an Incentive Production Bonus Plan within the spirit and intent of Section 20 (1) (c) (v) and Section 24, of P.C. 9384, provided that the application of such a Plan would not result in any increase in established unit production costs, and, as a result of the discussion of the problem between representatives of the Company, and of the Union with the Board, the parties have agreed upon the conditions of a proposed Incentive Production Bonus Plan as an experiment for a period of six months commencing January 1, 1945, based

upon results of co-operative efforts between the Company and its employees during the September Quarter 1944, as compared with the December Quarter 1943, which if maintained will result in the Company's hourly rated employees earning approximately the same compensation working a 40 hour week as they previously earned working a 48 hour week, and without involving any increase in unit production costs.

The National War Labour Board is prepared to give approval to the adoption of the proposed Incentive Production Bonus Plan for hourly rated employees at the Company's Toronto plant, subject to review after a period of six months, to be assured that the continuation of the Plan can be fully justified within the provisions of Wartime Wages Control Order, 1943, P.C. 9384.

Finding and Direction will follow accordingly.

December 18, 1944.

Re: B.C. Electric Railway Company, Limited and Amalgamated Association of Street Electric Railway & Motor Coach Employees of America

Reasons for Decision

This is an appeal by the Union from the Finding and Direction of the British Columbia Regional War Labour Board dated the 22nd day of August, 1944, increasing "the wage rates of all employees covered by the application by 4½ cents per hour." The Company cross appeals against this Finding and Direction. In the application on which this said Finding and Direction was made, the employees sought, among other things, increases in their wage rates in amounts ranging from 12½ cents per hour to 29 cents per hour. On the 14th of September, 1944, the said Regional Board filed and delivered to each of the parties its reasons for decision in which it was stated:

This Board wishes to convey to both parties involved that, after having made a careful study of wage scales for all street railways in Canada, they were unable to concur with the Amalgamated Association of Street Electric Railway and Motor Coach Employees of America's application that in the basic wage rates paid to the occupational classifications under review, gross inequalities or gross injustices exist.

On the hearing of the appeal by this Board the argument was again stressed that the increases sought by the employees in the application were necessary to rectify gross inequalities and gross injustices, and, in support of this argument, it was urged with much ingenuity that gross injustices and gross inequalities were apparent on an examination of the relationship existing between the wage rates received by certain classifications of the B.C. Electric Com-

pany and those received by corresponding classifications in other industries in the Vancouver area. This Board, however, is unable, in the circumstances of this case, to accept this basis of comparison as the correct one. It should be pointed out moreover that the employees in developing this comparison did not furnish sufficient information as to the skill, working conditions, and other factors involved, to indicate clearly that the wage rates on which the comparisons were made were for *substantially the same classifications*. However, it is unnecessary for this Board to discuss in detail the comparisons offered because the same arguments were advanced to the Regional War Labour Board of British Columbia, and this Board entirely agrees with the British Columbia Regional Board that the Union has failed to demonstrate the existence of any gross inequality or gross injustice.

This Board, however, is unable to agree with the said Regional Board that the employees are entitled to any increase in their wage rates pursuant to the provisions of section 20, sub-section 1 (b) of P.C. 9384, as amended. The submission made to the said Regional Board and repeated to this Board indicates that wage increases totalling \$23.75 per month for the employees working a forty-eight hour week, and \$22.28 per month for the employees working a forty-four hour week, had been granted to the employees since August, 1939.

In order to indicate that the employees were entitled to a further increase, pursuant to section 20, sub-section 1 (b) of P.C. 9384, the said

Regional Board in its reasons for decision stated:

This Board is of the opinion that the increase of 6 cents per hour granted in May, 1941, increased the wage rates of the employees to a fair and reasonable level without regard to any increases in the cost of living since August, 1939. On this basis, the Board considers that in addition to the increase granted in May, 1941, the employees are entitled to the equivalent of the full cost-of-living bonus and have, therefore, granted them an increase of $4\frac{1}{2}$ cents per hour which, with the cost-of-living bonus of $5\frac{1}{2}$ cents per hour paid by the employer at February 15, 1944, equals an increase of 10 cents per hour to fully compensate the employees for the increase in the cost of living since August, 1939.

This Board is not of opinion that any increase is justified pursuant to the sub-section relied on by the Regional War Labour Board. The maximum amount of the cost-of-living bonus, as referred to in the sub-section, is \$19.93 per month. The employees, therefore, had received increases since August, 1939, which

gave them wage rates greater than those received by them in August, 1939, "by more than the amount of the appropriate cost-of-living bonus." Moreover, after reading the report of the Conciliation Board which awarded the increase of 6 cents per hour in June, 1941, it is clear to this Board that the said Regional War Labour Board should not have given this interpretation to the reasons for the increase in wage rates awarded by that report.

This Board is of the opinion that the British Columbia Regional War Labour Board did not apply to the facts in this particular case the proper principle in awarding the increase of $4\frac{1}{2}$ cents per hour, and, therefore, dismisses the appeal and allows the cross appeal.

With respect to the many other matters referred to in the application, and subject to this appeal, this Board sees no reason why the determination of the said Regional Board respecting them should be disturbed.

December 27, 1944

**Re: British Columbia Packers, Ltd., Canadian Fishing Company, Ltd.,
Nelson Brothers Fishery Ltd., Nootka-Banfield Company Ltd., and
Fish Cannery, Reduction Plant and Allied Workers'
Federal Union No. 89**

Reasons for Decision

This is an appeal by the companies from findings and directions of the Regional Board for British Columbia dated September 12, 1944, adjusting wage rates and working conditions for reduction plant employees. We grant the required leave in the case of Nootka-Banfield Company, the 30-day time limit having elapsed when application was made below.

We shall dispose of this case on the same basis as in the case concerning net workers

and cannery workers. All increases in wage rates (monthly, hourly or overtime), except in so far as they may reflect the amount of compulsory cost-of-living bonus, shall be disallowed. It was not shown that they are necessary to rectify a gross or obvious injustice or inequality. In all other respects, including the establishment of the 9-hour day when actually processing fish, the decisions are confirmed.

Findings and Directions will issue accordingly.

December 27, 1944.

**Re: Anglo-British Columbia Packing Co. Ltd., British Columbia Packers
Ltd., Canadian Fishing Company Ltd., Nelson Brothers Fisheries
Ltd., Nootka-Banfield Company Ltd., J. H. Todd and Sons Ltd.,
Johnston Fishing Packing Company Ltd., North Shore Packing
Company Ltd., and Fish Cannery, Reduction Plant and
Allied Workers' Federal Union No. 89 and United
Fishermen's Federal Union No. 44**

Reasons for Decision

This is an application for leave and an appeal by the companies from Findings and Directions of the Regional Board of British Columbia dated June 19, 1944, and June 30, 1944, altering certain contract provisions with respect to the standard working hours and the overtime rate, establishing new classifications of net workers and increasing the minimum of the range for yearly net bosses.

Because leave to appeal was granted by the Regional Board in the case involving reduction plant employees, we think that the application for leave should be allowed in this case as well.

There are many points involved in this appeal and we do not propose to set out reasons at length for the conclusions which the Board has adopted. The main matter of controversy appears to be the setting by the

Regional Board of a standard nine-hour day on fish-processing days for both monthly-rated and hourly-rated employees. We shall not disturb that part of the decisions, except in the case of watchmen who shall continue to be governed as to hours of work by the contract provisions or practice in effect for them prior to the decision under appeal.

In other respects the decisions will be modified to the extent that any increase in hourly rates from 78 cents (including cost-of-

living bonus) to 79½ cents, either for purposes of straight time or overtime, shall be disallowed; that there shall be no increase in the minimum of the range for yearly net bosses and the new classifications established by the Regional Board for assistant net bosses and campmen mending gear shall also be disallowed. As to their other provisions the decisions are confirmed.

Findings and Directions will issue accordingly.
December 27, 1944.

Re: Famous Players Canadian Corporation and Motion Picture Projectionists' Union, Local 302 (Calgary)

Reasons for Decision

This is an appeal by the Company from the Finding and Direction of the Regional War Labour Board for Alberta, on an application presented to that Board on the 6th day of May, 1944. The appeal of the Company is directed solely to that part of the Finding and Direction of the Regional War Labour Board which required the Company to pay to the employees double time when they were required to work on statutory holidays.

On behalf of the Company the argument was advanced that the order of the Alberta Regional War Labour Board appealed from was made contrary to, or for the purpose of circumventing the decision of this Board, in the case of Famous Players of Canada and B.C. employees (L.G., Feb. 1944, p. 164). Reference to the evidence given and argument submitted on the hearing of that appeal clearly indicates that the sole matter under consideration was the length of the period for which holidays with pay should be authorized. The question of double time for service on statutory holidays was not argued or considered.

On behalf of the employees, it was urged that the nature of their duties was injurious to human health. This submission, however, was completely and effectively met by the Company and the employees did not succeed in demonstrating it as a reason for the extra pay claimed for holidays.

On behalf of the Company it was also submitted that the employees in question performed duties necessary for the entertainment of the public on statutory holidays, and that they, therefore, should be grouped with hotel, restaurant, street railway employees, and

others, the nature of whose duties required the performance of the same on statutory holidays. While this Board agrees that there is a degree of similarity in certain features of their respective duties, it realizes also that there is undoubtedly a distinction between those services which are necessary for the life of the community, and those services which an employer from choice may render both with profit to himself and as a convenience to those members of the public who if they so wish have greater opportunity for the enjoyment of entertainment on public holidays. The Board, however, was much impressed by the argument urged by the Company, and admitted by the employees, that the employees when seeking employment with the Company knew that incidental to the terms of their service with the Company was the requirement that theatres would operate on statutory holidays. It was admitted also by the employees that this characteristic feature of their employment had been one which had existed for many years in this country, as well as in others, and that in agreements with their employers no provision had been made for the payment of any premium for time worked on statutory holidays. Under the circumstances the payment of premium rates for services on statutory holidays would appear to be a matter which should be the subject of negotiations between the parties preliminary to any application for direction or authorization by a War Labour Board. Moreover, this Board does not consider that the present Wages Control Order should serve to introduce by compulsion a new condition of employment in this kind of industry.

The appeal is, therefore, allowed.

December 30, 1944.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Wartime Labour Relations Regulations.—Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for three days during the month of December. During this period the Board received 17 applications, held 8 public hearings, issued 4 certificates designating bargaining representatives, rejected 2 applications for certification and gave decisions in 2 appeal cases.

Certificates Issued

(1) *The Association of Federal Employees of the Port of Quebec, Inc., and the National Harbours Board, Quebec, P.Q.* (L.G. Aug. 1944, p. 968). The Association and Messrs. P. Edmond Trudel and R. Bissonnette were certified as bargaining representatives for the employees of the National Harbours Board employed at the Port of Quebec, Quebec, P.Q.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation Work of the Industrial Relations Branch.—Conciliation proceedings are carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appeared in the *LABOUR GAZETTE* for March, 1944.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Excluded from the bargaining unit were the harbour railway and grain elevator employees, the port manager and acting chief engineer, port manager's stenographer, harbour master, assistant harbour master, wharfinger, grain accountant, employment officer and chief time-keeper, purchasing agent, senior assistant engineer, assistant engineers, assistant superintendent of the General Operation and Maintenance Department, electrical foreman, superintendent of the cold storage plant, foreman of the main cold storage warehouse, bridge foreman and diver, storekeeper, chief sergeant, sergeants and constables of the police force, machine shop employees employed as machinist foreman, machinist and toolmaker, machinists, welder and repairer, boilermakers, machinist-helper,

locomotive and crane fitters, blacksmiths and blacksmith-helper. Certification followed a hearing by the Board and an examination of the Association's membership records by an officer of the Board.

(2) *The International Brotherhood of Electrical Workers, Local B-1039 and Gatineau Power Company, Gatineau Electric Light Company Limited, and Gatineau Transmission Company, Ottawa, Ontario.* (L.G. Sept. 1944, p. 1109). Following an examination of the Union's membership records by an officer of the Board and a public hearing, the Union and Messrs. P. A. Raby, J. E. Landreville, J. F. Coyne, T. McMahon, H. Lavigne, J. N. Bugeaud, G. C. Walsh and R. P. Kean were certified as bargaining representatives for the field employees of the Gatineau Power Company, Gatineau Electric Light Company Limited and Gatineau Transmission Company employed in the service of the companies in the provinces of Ontario and Quebec in the classifications of watchmen, labourers, cleaners or general hands, wheelmen, powerhouse and sub-station switchboard operators, chief operators, shift foremen, electricians and their helpers, mechanics and their helpers, working foremen, machinists, diver-labourer, groundmen, patrolmen, truck drivers, meter readers, meter testers, meter servicemen, meter repairers, meter foremen, meter and relay maintenance men. Excluded from the bargaining unit were sworn-in guards, solely employed as such, office employees, superintendents, division managers or other employees having equal or higher authority and non-working foremen, system supervisors and powerhouse clerks.

(3) *The Vancouver Harbour Employees' Association and National Harbours Board, Vancouver, B.C.* (L.G. Oct. 1944, p. 1221). Following an examination of the Association's membership records by an officer of the Board, the Association and Messrs. L. A. Titelborn, A. D. Kerr and J. D. Kennedy were certified as bargaining representatives for the regularly employed employees of the National Harbours Board employed at the Port of Vancouver, B.C. Excluded from the bargaining unit were the port manager, port manager's stenographer, harbour master, deputy harbour master, superintendent, chief engineer, assistant engineers, terminal railway agent, yardmaster, assistant yardmaster, employment and purchasing agent, piers supervisors, bridge supervisor, fish wharf supervisor, chief clerk of the terminal railway, chief clerk at Ballantyne Pier, general foreman of Ballantyne Pier, maintenance foreman in the Engineer's Department, all regular watchmen sworn in as special constables, all locomotive engineers, locomotive firemen, yardforemen and yardmen or switchmen.

(4) *The Brotherhood of Locomotive Firemen and Enginemen, Clearwater Lodge No. 930 and Canadian National Railways (Western Lines).* (L.G. Nov. 1944, p. 1338). The Union and Mr. Francis Rasmussen were certified as bargaining representatives for jitney car operators employed by the Canadian National Railways, conveying passengers between Kamloops and Kamloops Junction, B.C. Certification followed the examination of the Union's membership records by an officer of the Board.

Applications For Certification Rejected

(1) *The Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Sarnia Elevator Company, Limited, Sarnia, Ontario.* (L.G., Nov., 1944, p. 1338.) Following a representation vote, ordered by the Board, in which the applicant union was not supported by a majority of the eligible employees, the Board rejected the application for certification of bargaining representatives.

(2) *The British Columbia Seamen's Union and the Union Oil Company of Canada, Limited (M.V. "Unacana"), Vancouver, B.C.* (L.G., Oct., 1944, p. 1221.) Following a representation vote, ordered by the Board, in which the applicant union was not supported by a majority of the eligible employees, the Board rejected the application for certification of bargaining representatives.

Applications For Certification Under Investigation

(1) The International Brotherhood of Electrical Workers, Local 348 on behalf of the electricians and helpers employed in the ammonia products and other chemicals plant of the Alberta Nitrogen Products, Calgary, Alberta.

(2) The United Brotherhood of Carpenters and Joiners of America, Local 1779, on behalf of the carpenters employed in the chemical plant of the Alberta Nitrogen Products Limited, Calgary, Alta.

(3) Mercantile Marine Officers' Guild of Canada on behalf of mates on steamers on Canadian lakes and coastal waters employed by the Gulf and Lake Navigation Company, Ltd., Montreal, P.Q.

(4) The Mercantile Marine Officers' Guild of Canada on behalf of mates on steamers on Canadian lakes and coastal waters employed by Keystone Transports Limited, Montreal, P.Q.

(5) The Canadian Brotherhood of Marine Engineers on behalf of certificated and/or marine engineers below the certified grade of chief engineer employed on the vessels of the

Gulf and Lakes Navigation Company, Ltd., Montreal, P.Q.

(6) British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers International Union of North America on behalf of unlicensed crew members in engine room deck and stewards' departments on vessels operating from Pacific coast ports of the Park Steamship Company, Ltd., Montreal, P.Q.

(7) Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 274, on behalf of certain employees of Hotel Saskatchewan, Canadian Pacific Railway Company, Ltd., Regina, Saskatchewan.

(8) British Columbia Seamen's Union, Vancouver Branch Pacific District, Seafarers International Union of North America on behalf of employees in the Ferry Service of the municipality of North Vancouver, North Vancouver, B.C.

(9) National Union of Coal Dock Workers, Local No. 1, on behalf of coal dock workers employed by the Century Coal Company Ltd., Midland, Ontario.

(10) Western Canadian Greyhound Employees Union affiliated with the Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America on behalf of operators, ticket agents, clerks, package and express clerks, platform loaders and unloaders, mechanics, janitors and cashiers of the Western Canadian Greyhound Lines Limited, Calgary, Alta.

(11) Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 49 on behalf of certain employees of the Prince Edward Hotel, Canadian National Railways, Brandon, Man.

(12) Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station employees on behalf of Maintenance Men (carpenters and helpers), shipyards at Nelson, Nakusp and Okanagan Landing, Canadian Pacific Railway Company, B.C. Lake and River Service, Nelson, B.C.

(13) International Longshoremen's and Warehousemen's Union, Local 501 on behalf of all employees handling cargo and operations necessary for loading cars and the maintenance of dock equipment of the Great Northern Railway Company, Vancouver, B.C.

(14) Calgary Power Employees Association on behalf of certain employees of the Calgary Power Company, Limited, Calgary, Alta.

(15) Rolling Mill Employees Federal Union, Local 23180 (A.F. of L.), on behalf of certain employees of the Calgary Rolling Mill Department, Dominion Bridge Company, Limited, Calgary, Alta.

(16) Railway Supervisors Association on behalf of certain employees in the Motor Power, Car and Stores Departments of the Canadian National Railways (Western Region), Port Arthur, Ont., to Vancouver, B.C.

(17) Deepsea and Inlandboatmen's Union of the Pacific Coast District of the Canadian Seamen's Union on behalf of unlicensed personnel on (M.V. "Unacana") of the Union Oil Company of Canada, Ltd., Vancouver, B.C.

Decisions of Board in Appeal Cases

The following appeal from a decision of the Manitoba Wartime Labour Relations Board and an application for leave to appeal from a decision of the Quebec Wartime Labour Relations Board were considered by the Wartime Labour Relations Board (National) and judgment given.

(1) The Wartime Labour Relations Board (National) set aside both the certificate and the amended certificate issued by the Manitoba Wartime Labour Relations Board to the bargaining representatives of the International Union United Automobile, Aircraft and Agricultural Implement Workers of America and rejected the application for certification submitted by the applicant union.

The Company appealed from the decision of the Provincial Board on the following among other grounds: that there was a mistake in the name of the applicant union; that the application should have been made to the Board by or on behalf of the bargaining representatives instead of by the union; that the union was not a legal entity; that the words "officers or other persons" in Section 5 (2) of the Regulations did not give the union the right to choose both officers and other members as bargaining representatives; that the bargaining representatives were not properly appointed or elected by the union; that the company was given no opportunity to adduce evidence or make representations on the first hearing of the application; that the bargaining unit should be limited to the hourly-rated employees and should not include clerks; that the granting of the amended certificate after a second hearing was beyond the powers of the Provincial Board.

The National Board rejected the first four grounds but having regard to the unsatisfactory evidence as to the election of bargaining representatives by the union and the fact that counsel for the employer withdrew from the hearing on the amended application on the ground that the provincial Board had no jurisdiction; as well as the doubt whether the Manitoba Wartime Labour Relations Board

actually had jurisdiction to amend the certificate, the National Board has set aside both the certificate and the amended certificate issued by the Provincial Board. It was suggested that the union may now make a fresh start and proceed to elect or appoint bargaining representatives and, if it so desires, to make a new application to the Manitoba Board for their certification, at which time the employer must have an opportunity to present evidence and to make representations to the Board if desired.

The appellants were represented by Messrs. D. H. Laird, K.C., J. E. Swancar and W. C. Clark and the respondent union by Mr. John Eldon.

(2) The Wartime Labour Relations Board (National) denied the appeal of the Professional Union of Construction Workers of Quebec from the decision of the Quebec Wartime Labour Relations Board rejecting the application for certification of bargaining representatives for employees in the Shipyard of the Anglo-Canadian Pulp and Paper Mills, Limited. Respondents in this case in addition to the Company were five International Unions,

namely, International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America; International Brotherhood of Electrical Workers, Local 1118; International Brotherhood of Pulp, Sulphite and Paper Mill Workers, Local 137; United Association of Journeymen Plumbers and Steam Fitters of the United States and Canada, Local 511; and United Brotherhood of Carpenters and Joiners of America.

A comparison of the membership list presented by the applicant union with the payroll of the Company did not show that the union had a majority of the employees as members. The shipyard is now closed and there are only 15 persons employed, all of whom are office employees engaged in making inventories preparatory to closing the books and similar work. If the shipyard is reopened the union may renew its application.

The appellants were represented by Messrs. H. Dennis and L. P. Bedard and the respondents by Messrs. Ross Drouin and J. R. Latter for the Company and Messrs A. C. Beaulé, J. W. Bruce, L. Guerard, E. Larose and J. Broderick for the five International Unions.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement have been unsuccessfully continued for thirty days following certification of bargaining representatives. Disputes of this nature are referred to the Minister of Labour, by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavour to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During December reports were received from six Boards of Conciliation:—

Concerning the Aluminum Company of Canada, Limited, Ile Maligne, P.Q., and

the National Syndicate of Aluminum Workers of St. Joseph d'Alma, Inc.

Concerning the Aluminum Company of Canada, Limited, Shipshaw, P.Q., and the National Syndicate of Electric Power Employees of Shipshaw.

Concerning Page-Hersey Tubes, Limited, Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America.

Concerning the Electro-Metallurgical Company of Canada, Limited, Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America.

Concerning the Corporation of the Township of York Hydro System, Toronto, Ont., and the Canadian Electrical Trades Union, Branch No. 1.

Concerning the Steel Company of Canada (Hamilton and Ontario Works) Hamilton, Ont., and Local 1005, United Steelworkers of America.

Board Fully Constituted

During December fifteen Boards of Conciliation were fully constituted:

Beatty. Mr. Beatty was appointed by the Minister on a joint recommendation from the other two members, Mr. D. R. Anderson and Prof. E. S. Farr, both of Victoria, appointed on the nomination of the employer and employees respectively.

Westminster Foundry, Limited, New Westminster, B.C.—The Board of Conciliation established to deal with a dispute between Westminster Foundry, Limited, New Westminster, B.C., and Local 3254, United Steelworkers of America, was fully constituted on December 28 with the appointment of Mr. J. Edwin Eades. Mr. Eades was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. R. L. Norman and C. Grant MacNeil, M.L.A., both of Vancouver, appointed on the nomination of the employer and employees respectively.

Boards Established

During the month nine Boards of Conciliation were established but not fully constituted.

De Havilland Aircraft Co. of Canada, Ltd., Toronto, Ont.—On December 19 the Minister of Labour established a Board of Conciliation to deal with a dispute between the De Havilland Aircraft Company of Canada, Limited, Toronto, and Local 112, United Automobile, Aircraft and Agricultural Implement Workers of America. Mr. F. J. Ainsborough of Toronto investigated the case as Conciliation Officer. On December 18 Mr. Ainsborough's report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. Norman L. Mathews, K.C., of Toronto, Ont., on the nomination of the employing company, and Mr. Bora Laskin, also of Toronto, on the nomination of the employees concerned. Mr. Mathews and Mr. Laskin have been requested to confer on the nomination of a chairman and third member of the Board.

Fowler's Canadian Company, Limited, Hamilton, Ont.—On December 6 the Minister of Labour established a Board of Conciliation to deal with a dispute between Fowler's Canadian Company, Limited, Hamilton, Ont., and the United Packinghouse Workers of America. Mr. F. J. Ainsborough of Toronto investigated the case as Conciliation Officer. On December 6, Mr. Ainsborough's report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. Norman W. Byrnes of Hamilton, Ont., on the nomination of the employing company, and Mr. Arthur Williams of Oshawa, Ont., on the nomination of the employees concerned. At the end of the month Mr. Byrnes and Mr. Williams were conferring on the selection of a Chairman.

General Dry Batteries of Canada, Limited, Toronto, Ont.—On December 14 the Minister of Labour established a Board of Conciliation to deal with a dispute between General Dry Batteries of Canada, Limited, Toronto, Ont., and Local 512, United Electrical, Radio and Machine Workers of America. Mr. Harold Perkins, Toronto, investigated the case as Conciliation Officer. On December 12, Mr. Perkins' report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. John J. Robinette, K.C., of Toronto, Ont., on the nomination of the employing company, and Miss Idele Wilson, also of Toronto, on the nomination of the employees concerned. Mr. Robinette and Miss Wilson have been requested to confer on the nomination of a chairman and third member of the Board.

Canadian Car & Foundry, Limited, Brantford, Ont.—On December 11 the Minister of Labour established a Board of Conciliation to deal with a dispute between Canadian Car & Foundry, Limited, Brantford, Ont., and Local 397, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO). Mr. F. J. Ainsborough, Toronto, investigated the case as Conciliation Officer. On December 8 Mr. Ainsborough's report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. D. A. Paterson of Montreal, on the nomination of the employing company, and Mr. Bora Laskin

of Toronto, on the nomination of the employees concerned. At the end of the month Mr. Paterson and Mr. Laskin were conferring on the selection of a chairman.

Willard Storage Battery Company of Canada, Ltd., Toronto, Ont.—On December 6 the Minister of Labour established a Board of Conciliation to deal with a dispute between Willard Storage Battery Company of Canada, Limited, Toronto, Ont., and Local 512, United Electrical, Radio and Machine Workers of America. Mr. Wm. Dunn, Toronto, investigated the case as Conciliation Officer. On December 4 Mr. Dunn's report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. W. M. Gordon, Toronto, on the nomination of the employing company, and Miss Idele Wilson, also of Toronto, on the nomination of the employees concerned. Mr. Gordon and Miss Wilson have been requested to confer on the nomination of a chairman and third member of the Board.

Macassa Mines, Limited, Kirkland Lake, Ont.—On December 20 the Minister of Labour established a Board of Conciliation to deal with a dispute between Macassa Mines, Limited, Kirkland Lake, Ont., and Local 240, Kirkland Lake Mine and Mill Workers Union. Mr. Harold Perkins, Toronto, investigated the case as Conciliation Officer, and on December 19 his report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. Gilbert E. Jackson, Toronto, on the nomination of the employing company, and Mr. George Harris, also of Toronto, on the nomination of the employees concerned. Mr. Jackson and Mr. Harris have been requested to confer on the nomination of a chairman and third member of the Board.

Andrews Wire Works of Canada, Limited, Watford, Ont.—On December 29 the Minister of Labour established a Board of Conciliation to deal with a dispute between Andrews Wire Works of Canada, Limited, Watford, Ont., and Local 2, Federation of Industrial Workers Union. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, had investigated the case as Conciliation Officer and on December 28 his report was received recommending a Board of Conciliation. The parties concerned were requested to make nominations for membership on the Board.

Miramichi Lumber Company, Limited, Minto, N.B.—On January 4, 1945, the Minister of Labour established a Board of Conciliation to deal with a dispute between Miramichi Lumber Company, Limited, Minto, N.B., and Local 7409, United Mine Workers

of America. Mr. H. R. Pettigrove, Fredericton, N.B., investigated the case as Conciliation Officer, and on December 18 his report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. Kenneth L. Golding of Fredericton, N.B., on the nomination of the employing company, and Mr. E. A. Dinsmore, Minto, N.B., on the nomination of the employees concerned. Mr. Golding and Mr. Dinsmore have been requested to confer on the nomination of a chairman and third member of the Board.

Empire Brass Company, Ltd., & Pumps and Softeners, Ltd., London, Ont.—On December 28 the Minister of Labour established a Board of Conciliation to deal with a dispute between Empire Brass Co., Limited, & Pumps and Softeners, Ltd., London, Ont., and Local 2699, United Steelworkers of America. Mr. Harold Perkins, Industrial Relations Officer, Toronto, investigated the case as Conciliation Officer and on December 26 his report was received, recommending the establishment of a Board. The parties concerned were requested to make nominations for membership on the Board.

Agreements Facilitated by Conciliation Officers

Consumers Gas Company, Toronto, Ont.—On October 10 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, had been appointed Conciliation Officer to confer with the Consumers Gas Company, Limited, Toronto, and Local 161, International Chemical Workers Union to attempt to effect an agreement between them.

On December 4 a report was received from Mr. Nicol indicating the successful conclusion of the negotiations and the signing of an agreement.

Saguenay Quebec Telephone Company, Chicoutimi, P.Q.—On October 20 Mr. Liguori Pepin, Industrial Relations Officer, Montreal, had been appointed Conciliation Officer to confer with the Saguenay Quebec Telephone Company, Chicoutimi, P.Q., and the National Catholic Syndicate of Telephone Employees of Saguenay to attempt to effect an agreement between them.

On December 18 a report was received from Mr. Pepin indicating the successful conclusion of the negotiations and the signing of an agreement.

Northern Cartage and Contracting Company, Prince Albert, Sask.—On November 14 Mr. H. S. Johnstone, Winnipeg, had been appointed Conciliation Officer to confer with the Northern Cartage and Contracting Company, Prince Albert, Sask., and the Canadian Brotherhood of Railway Employees and

Other Transport Workers, Division 188, to attempt to effect an agreement between them.

On December 7 a report was received from Mr. Johnstone indicating the successful conclusion of the negotiations and the signing of an agreement.

Assignments of Conciliation Officers

Charlevoix-Saguenay Telephone Company, La Malbaie, P.Q.—On November 29 the Minister of Labour was advised by the Quebec Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Charlevoix-Saguenay Telephone Company, La Malbaie, P.Q., and the National Catholic Syndicate of Charlevoix-East, and that there was no indication of the successful completion of an agreement.

On December 1 Mr. Liguori Pepin, Industrial Relations Officer, Montreal, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Dominion Fire Brick and Clay Products, Limited, Moose Jaw, Sask.—On December 13 the Minister of Labour was advised by the Saskatchewan Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Dominion Fire Brick and Clay Products, Limited, Moose Jaw, Sask., and the Claybank Workers Union, and that there was no indication of the successful completion of an agreement.

On December 20 Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

National Electric Manufacturing Company, Toronto, Ont.—On December 18 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the National Electric Manufacturing Company, Toronto, Ont., and Local 512, United Electrical, Radio and Machine Workers of America, and that there was no indication of the successful completion of an agreement.

On December 20 Mr. Harold Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

City of Winnipeg, Winnipeg, Man.—On December 11 the Minister of Labour was advised by the Manitoba Wartime Labour Relations Board that negotiations had been continuing for thirty days between the City of Winnipeg, Winnipeg, Man., and the Joint Council of Civic Employees, One Big Union, and that there was no indication of the successful completion of an agreement.

On December 13 Mr. Thos. Williams of the Manitoba Department of Labour was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Ford Motor Company of Canada, Limited, Windsor, Ont.—On December 4 the Minister of Labour was advised by the Ontario Labour Relations Board that there was a breakdown

in negotiations of a collective agreement between the Ford Motor Company of Canada, Limited, Windsor, Ont., and Local 200, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

On December 4 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Report of Board in Dispute between the Aluminum Company of Canada, Limited, Ile Maligne, P.Q., and the National Syndicate of Aluminum Workers of St. Joseph d'Alma, Inc.

On December 4 the Minister of Labour received the unanimous Report of the Board of Conciliation which dealt with a dispute between the Aluminum Company of Canada, Limited, Ile Maligne, P.Q., and the National Syndicate of Aluminum Workers of St. Joseph d'Alma, Inc.

The Board was under the chairmanship of the Hon. Mr. Justice A. Savard appointed by the Minister on the nomination of the other two members of the Board, Messrs. D. A. Paterson and Philippe Boily, the nominees of the company and the union respectively.

The text of the Board's report follows:—

Report of Board

Montreal, December 2, 1944.

Re: *In the matter of Wartime Labour Relations Regulations, P.C. 1003, and in the matter of Aluminium Co. of Canada Ltd., Ile Maligne, and its Employees Members of the National Syndicate of Aluminium Workers of St. Joseph d'Alma.*

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Dear Sir:—

The Conciliation Board appointed to arbitrate the above dispute, has completed its work and begs herewith to submit its report.

Several meetings were held in Montreal and in Arvida.

The Company was represented by Mr. J. B. White, Mgr. of personnel, Mr. Radley, Mr. Adrien Boivin, Mgr. of the plant at Ile Maligne, and its counsel, Mr. Alex Prud'homme, K.C.

The members of the National Syndicate were represented by Mr. A. J. Chambers, president of the Syndicate, Mr. Rene Harmegnies, and their counsel, Mr. P. Cusson.

The plant of the Aluminium Co. of Canada, at Ile Maligne is a new one. It has been

recently put in operation, and the National Syndicate had requested that a collective agreement be signed to govern the working conditions of the employees, and the Company was willing to accede to their request.

A contract had been prepared by the National Syndicate, but the Company felt that it could not agree to all the clauses of the agreement, and more specially to the seniority clauses in the form in which they had been drafted.

The employees were asking that seniority should prevail in cases of promotions, demotions or lay-offs.

On the other hand, the Company, while it was willing to give full consideration to seniority, held the view that other factors had to be considered, such as education, ability, family responsibilities, and past experience.

Mr. Liguori Pépin, Industrial Relations Officer of your Department, was delegated to obtain a satisfactory settlement between the parties.

A joint meeting took place on July first, at the office of Mr. Adrien Boivin, Mgr. of the plant at Ile Maligne.

On July the 14th., Mr. Pépin was advised by Mr. Boivin that the Company could not accede to the demands of the Syndicate.

In his letter to Mr. Maclean, dated July 15, 1944, Mr. Pépin recommended that a Board of Conciliation be appointed to handle both issues, as they were the same in both plants, at Ile Maligne, and at Shipshaw and Chute a Caron, in so far as seniority was concerned.

Another point was also considered by Mr. Pépin, and that was the matter of the specific number of pots to be allotted with each potman. This point was not pressed, because the Company and its employees were negotiating, and since, have disposed of the matter to their mutual satisfaction.

At the first meeting which was held in Montreal, both parties were requested to submit a brief of their respective contentions.

This procedure was accepted by both sides and the issue was joined.

The final meetings were held in Arvida on September 25, 26 and 27.

Each clause of the contract was read, discussed, amended and finally both sides agreed to signing the collective agreement which is attached herewith.

The seniority clauses were fully covered and accepted by both sides.

This Board wishes to thank both the employers and the employees on the spirit of conciliation and goodwill which they have shown throughout their deliberations.

It is thankful for the assistance given by Mr. Alex. Prud'homme, K.C. counsel for the Company, and Mr. P. Cusson, counsel for the employees.

Attached, you will find draft contract which has been signed by the officials of the Company and the officials of the National Syndicate.

Yours very truly,

(Sgd.) ALFRED SAVARD,
Chairman.

(Sgd.) D. A. PATERSON,
Member.

(Sgd.) P. BOILY,
Member.

Report of Board in Dispute between the Aluminum Company of Canada, Limited, Shipshaw, Que., and the National Syndicate of Electric Power Employees of Shipshaw.

On December 4 the Minister of Labour received the unanimous Report of the Board of Conciliation which dealt with a dispute between the Aluminum Company of Canada, Limited, Shipshaw, P.Q., and the National Syndicate of Electric Power Employees of Shipshaw.

The Board was under the chairmanship of the Hon. Mr. Justice A. Savard appointed by the Minister on the nomination of the other two members of the Board, Messrs. D. A. Paterson and Philippe Boily, the nominees of the company and the union respectively.

The text of the Board's report follows:—

Report of Board

Montreal, December 2, 1944.

In the matter of Wartime Labour Relation Regulations, P. C. 1003, and in the matter of Aluminium Co. of Canada Ltd. and its employees members of the Syndicat National des Employés des Pouvoirs Electriques de Shipshaw et de Chute à Caron.

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

DEAR SIR:—

The Conciliation Board appointed to arbitrate the above dispute, has completed its work and begs herewith to submit its report.

Several meetings were held in Montreal and in Arvida.

The Company was represented by Mr. J. B. White, Mgr. of personnel, Mr. Radley, Mr. Adrien Boivin, Mgr. of the plant at Ile Maligne, and its counsel, Mr. Alex. Prud'homme, K.C.

The members of the National Syndicate were represented by Mr. A. J. Chambers, president of the Syndicate, Mr. René Harmegnies, and their counsel, Mr. P. Cusson.

The plant of the Aluminium Co. of Canada, at Shipshaw and Chute à Caron, is a new one. It has been recently put in operation, and the National Syndicate had requested that a collective agreement be signed to govern the working conditions of the employees, and the Company was willing to accede to their request.

A contract had been prepared by the National Syndicate, but the Company felt that it could not agree to all the clauses of the agreement, and more specially to the seniority clauses in the form in which they had been drafted.

The employees were asking that seniority should prevail in cases of promotions, demotions or lay-offs.

On the other hand, the Company, while it was willing to give full consideration to seniority, held the view that other factors had to be considered, such as education, ability, family responsibilities, and past experience.

Mr. Liguori Pépin, Industrial Relations Officer of your Department, was delegated to obtain a satisfactory settlement between the parties.

A joint meeting took place on July first, at the office of Mr. Adrien Boivin, Mgr. of the plant at Ile Maligne.

On July the 14th, Mr. Pépin was advised by Mr. Boivin that the Company could not accede to the demands of the Syndicate.

In his letter to Mr. Maclean, dated July 15, 1944, Mr. Pépin recommended that a Board

of Conciliation be appointed to handle both issues, as they were the same in both plants, at Ile Maligne, and at Shipshaw and Chute à Caron, in so far as seniority was concerned.

At the first meeting which was held in Montreal, both parties were requested to submit a brief of their respective contentions.

The final meetings were held in Arvida, on September 25, 26 and 27.

Each clause of the contract was read, discussed, amended, and finally both sides agreed to signing the collective agreement which is attached herewith.

The seniority clauses were fully covered and accepted by both sides.

This Board wishes to thank both the employers and the employees on the spirit

of conciliation and goodwill which they have shown throughout their deliberations.

It is thankful for the assistance given by Mr. Alex. Prud'homme, K.C., counsel for the Company, and Mr. P. Cusson, counsel for the employees.

Attached, you will find draft contract which has been signed by the officials of the Company and the officials of the National Syndicate.

Yours very truly,

(Sgd.) ALFRED SAVARD,
Chairman.

(Sgd.) D. A. PATERSON,
Member

(Sgd.) P. BOILY,
Member.

Report of Board in Dispute between Page-Hersey Tubes, Limited, Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America.

On November 20 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Page-Hersey Tubes, Limited, Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America. A minority report was submitted by Mr. J. S. O. Tory and a supplementary report by Dr. H. G. Forster.

The Board was under the chairmanship of Dr. Alexander Brady, Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members; and Messrs. J. S. D. Tory and the Rev. Dr. H. G. Forster, appointed on the nomination of the employer and employees respectively.

The text of the Board's report, minority report and supplementary report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations, P.C. 1003, and re Page-Hersey Tubes, Limited, Welland, Ontario and its employees, members of Local 523, United Electrical, Radio and Machine Workers of America.*

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The cause of dispute in this case resembles that in the dispute between a neighbouring plant, operated by the Electro-Metallurgical Company of Canada, and the same local of the United Electrical, Radio and Machine Workers of America; namely, the demand for a union shop and check-off. Here also the original agreement between the parties was

made on May 7, 1943, and negotiations for an amended renewal of this agreement were carried on from March 21 to June 14 of the present year. There is mutual acceptance of all clauses except those submitted by the union for the introduction of a union shop and check-off.

As in the other case cited the union is strongly represented in the plant with apparently well over 85 per cent of the eligible employees. Some minor frictions have occurred between union and non-union employees, and the union again presents the argument that under the union shop it could more effectively discipline its members, and the time spent by shop stewards in developing membership could be devoted to discipline, maintenance of employee morale, and the combating of absenteeism and labour turnover. The officials emphasized the low-strike record which their organization has had since its inception as an international union in 1937, and offered this record as testimony that it is responsible and seeks to be responsible.

The company on its part is unfriendly to a union shop. It considers that the union is already strong in the plant, and that it should be content with its strength achieved by voluntary membership. It does not accept the claim of the union that its presence in the plant has improved employees' morale, insured continuous production, and reduced absenteeism. It is not yet confident that the union has the proper standards of a trade union, and it does not think that the union should be able to coerce a minority of employees in the plant to become members.

The company is anxious to see what the behaviour of the union is within the post-war period.

The purpose of the present Board is to effect conciliation in the given case rather than to prescribe any general industrial relations policy. The Board would emphasize to both parties that the primary task at the present stage in their relations is to build up mutual confidence and to achieve agreement upon the basis of this confidence. Collective bargaining between them is still of quite short duration, and it can grow strong and valuable only if both parties reflect a spirit of give and take, reaching an agreement now with the minimum of mutual irritation. It recommends, therefore, that the union should withdraw its request for the union shop and that on the other hand the company should grant a check-off, voluntary at the outset but irrevocable during the duration of the collective agreement. The Board notes from the briefs submitted that frictions have occurred in the plant over the non-payment of dues by a few union members. The check-off should bring an end to such frictions. But more important, its acceptance by the company will clearly demonstrate its genuine anxiety to go some way towards fulfilling the requests of the union for security without conceding the union shop. The Board would also recommend that the conventional maintenance-of-membership clause, requiring present members of the union to remain members during the duration of the agreement as a condition of their employment, should be included in the agreement.

The introduction to the agreement of these two clauses appears to the Board a reasonable compromise between the divergent positions adopted by the two parties, and the Board duly urge their acceptance.

All of which is respectfully submitted.

Dated at Toronto this eleventh day of November, 1944.

(Sgd.) ALEXANDER BRADY,
Chairman.

(Sgd.) HARVEY G. FORSTER.

Minority Report

Re: *Wartime Labour Relations Regulations, P.C. 1003; and re: Page-Hersey Tubes, Limited, Welland, Ontario, and its Employees, Members of Local 523, United Electrical, Radio and Machine Workers of America.*

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

As I am unable to agree with the findings and recommendations of the majority of this Board, I submit herewith a separate report.

Written briefs were filed with us by the parties, the Company being represented at the hearings of the Board by C. S. Webber, Assistant General Manager, and J. C. Adams, K.C. as Counsel. The Union was represented at the first hearing by George Harris, District Secretary, and C. R. Sullivan, Business Agent for the Local. At the second hearing Mr. C. S. Jackson appeared in place of Mr. Harris.

All of the usual arguments in connection with the issue of union security were referred to and dealt with by the parties. As this is now familiar ground, I do not attempt to deal with all of the arguments on each side, but content myself with comments on such of the arguments as led the Chairman and the other Member of the Board to a conclusion different from my own.

The majority report refers to the Union's argument that under the union shop it could more effectively discipline its members and that the time spent by shop stewards in developing membership (which admittedly is carried on in company premises and on company time if the argument is to have any validity) could be devoted to discipline, maintenance of employees' morale, combating of absenteeism and labour turnover.

There is nothing whatever in the record to indicate any foundation for the claim by the Union that it could accomplish its objectives if granted the union shop; or that it would even attempt to do so. It appears to have been forgotten entirely that the problem of maintaining discipline is an essential function of Management and that if there is any lack of discipline this situation could be quite effectively cured by Management now, given the co-operation of the Union in its present status.

Reference is also made to the low strike record of the Union, but nothing whatever is said about the fact that the Union in this case threatened to strike during the recent negotiations with the Company. The Union did not attempt to dispute this statement by the Company and it must, therefore, be taken to be an established fact. No reference is made either to the somewhat obvious fact that there has been no occasion for the Union to strike at any time since it first entered into bargaining relationship with the Company.

Even if one would be justified in assuming that under the union shop status the Union would be more competent to carry out its professed objectives of maintaining discipline, improving employee morale, absenteeism and labour turnover, I fail to see how a Board of Conciliation can logically reject the claim of the Union for the union shop status and then proceed to recommend mere mainten-

ance-of membership and voluntary check-off. It is quite obvious that neither of these recommendations will enable the Union to function in any different manner from that in which it has functioned during the past year. The Union itself stressed before this Board its claim for the complete union shop status and specifically asked that no compromise be suggested. The Union has admitted during the course of the hearing that it had no problem of dues collection and no problem arising out of defections from its membership by employees who had voluntarily joined. How then is the situation to be improved by maintenance of membership and check-off?

The parties have been dealing with each other for little more than one year. During this time the Union claims to have secured on a voluntary basis the support of approximately 92 per cent of all the employees eligible to join the Union. It has also apparently canvassed the balance of the working force and supplied to this Board a summary of the reasons why that small minority of employees had thus far failed to join the Union. Some of those reasons appeared to be quite substantial; for example, some of the employees concerned were farmers working temporarily in the plant; some were female employees who had no intention of remaining after the duration of the present acute labour shortage; while some of the older men, it was frankly admitted, were waiting to "see if the Union was here to stay".

On the whole, the circumstances of this case indicate that the Union has already achieved a membership position which is well nigh perfect and its insistence that the small minority of employees in the plant who have not yet joined its ranks should be compelled to do so is based purely and simply upon the Union's conviction that compulsory unionism should be imposed upon all employees.

The Company takes the position that it does not believe in compulsory unionism and nothing has been brought forward in this case which in my opinion would justify any change of attitude.

The issue here demonstrates that there is a difference of opinion with respect to the ultimate status of trade unions in industry. At the moment this difference appears to be irreconcilable and any suggestions that the parties merely forget about the main issue and in the meantime compromise the claim seems to me to be a most illogical procedure. If there were any practical value in the arrangements for maintenance of membership and check-off in a particular case I should be prepared to give them earnest considera-

tion; but in a case where it has been demonstrated that neither of these arrangements will assist the Union, and where the suggestion that these arrangements be put into effect merely as a compromise, I am inclined to the view that these arrangements will only emphasize the real issue between the parties and that instead of lessening friction between the Union employees and the non-Union employees, it will tend to increase it.

In a recent report to you dated November 4, 1944, I said that it may very well be that when parties are opposed in principle it is not a question of "conciliation"; certainly not a case for a "saw-off" as there may be no middle ground in such circumstances. Experience on two additional boards of conciliation had led me to the conclusion that conciliation procedure on this issue is quite futile. This Union makes no secret of the fact that its ultimate object is a full measure of union security, including union shop, maintenance of membership and involuntary check-off of union dues. In the circumstances, I cannot see that the Company should, as a matter of "conciliation" and in the absence of proof of any particular problem either as to maintaining membership or collection of dues by the Union, be asked to accept the first step in a progressive program of union security which will simply be used as the taking off point for the next higher stage of union security when this agreement next comes up for renewal.

Apparently the Union also shares my view that there is really no half-way point or middle ground in settling this issue because the concluding paragraph of its brief filed with this Board states in part as follows:—

We urge your Board to disregard the compromise element which has entered into many of the decisions of previous Boards and if for no other reason than in a spirit of bona fide and justified experimentation for the shaping of things to come grant full and unqualified union security to this Union.

My colleagues on this Board have not been prepared in the circumstances to grant the full and unqualified union security asked for by the Union but have, nevertheless, dealt with the matter on a compromise basis contrary even to the Union's request.

I should refer here, not only to the position taken by the Union during the course of the hearing, but to the position taken by my colleague who was appointed on the recommendation of the Union. He is firmly convinced that the complete union shop status should have been granted and it is quite evident that his concurrence in the majority report does not represent his actual views. During the course of our discussion he indi-

cated emphatically that if the Union did not secure a recommendation for the union shop in this instance it would nevertheless secure it by other means, which included references to physical compulsion. In addition he made it quite clear that in his considered opinion not more than one out of every 50 men who hold executive positions had succeeded on grounds of merit. If these and similar ideas are harboured in the minds of union leaders and the representatives which they put forward on Boards of Conciliation, then this constitutes in my opinion an additional ground why the Company should not be expected to enter into or agree to any compromise arrangement designed to make this Union more secure.

Personally, I feel it is impossible to build up mutual confidence and to achieve agreement upon the basis of such confidence as referred to in the report of the majority so long as one side to the dispute, through its representatives holds such views.

As you are aware, I have now served on a number of conciliation boards. At the outset I was inclined to the view that on the issue of union security, conciliation boards should attempt to find the solution to the dispute by recommending an arrangement somewhat less than that requested by the Union and somewhat more than that which the Company was prepared to grant. I am now convinced, however, that such a procedure is wholly futile so far as this issue is concerned, and I am convinced that no useful purpose can or will be served by establishing boards of conciliation to deal with disputes of this nature where honest differences of opinion prevail between the parties on a question of principle, as is the case here.

Accordingly, I beg to report, sir, that the parties here hold honest opinions on matters of principle which cannot be reconciled or conciliated by any halfway measure. I recommend that the Union drop its claim for union shop and check-off and that the parties carry on under the existing arrangements.

Report of Board in Dispute between Electro-Metallurgical Company of Canada, Limited, Welland, Ont., and Local 523, United Electrical, Radio & Machine Workers of America.

On November 20 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Electro-Metallurgical Company of Canada, Limited, Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America. A minority report was submitted by Mr. J. S. D. Tory and a supplementary report by Dr. H. G. Forster.

I wish to add, however, that what I have said above with respect to the futility of conciliation in cases where the parties hold different views on the principles involved do not apply to other matters, such as hours of work, seniority, grievance procedure and other terms and conditions of employment of that nature.

All of which is respectfully submitted this 16th day of November, 1944.

(Sgd.) J. S. D. TORY,
Member.

Supplementary Report

Re: Wartime Labour Relations Regulations P.C. 1003 and Page-Hersey Tubes, Ltd., Welland, Ontario and its Employees Members of Local 523, United Electrical, Radio and Machine Workers of America.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

I regret that the Company's nominee on this Board has seen fit in his minority report to make direct reference to what he alleges to be my personal views on a variety of matters, and has attempted to use this in his argument.

Inasmuch as this reference is a gross misrepresentation of my views or any views I expressed during the meetings of the Board, it follows therefore that his argument on this ground has no validity.

I am forced to make this additional report because owing to the delay in the presentation of the minority report the majority report was completed and forwarded to you before a copy of the minority report was available to other members.

Respectfully yours,

(Sgd.) HARVEY G. FORSTER,
Member.

The Board was under the chairmanship of Dr. Alexander Brady, Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. J. S. D. Tory and the Rev. Dr. H. G. Forster, appointed on the nomination of the employer and employees respectively.

The text of the Board's report, minority report and supplementary report follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and re United Electrical, Radio and Machine Workers of America, Local 523, and Electro-Metallurgical Company of Canada, Limited, Welland, Ontario.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The cause of dispute in this case is found in the request of the Union for the introduction of the union shop and check-off clauses in the Agreement at present under negotiation. The original agreement between the parties was made on May 7, 1943, and provided for modification. Negotiations for an amended agreement were carried on from April of the present year to June 14, and the parties are in agreement on the new clauses proposed by the union to cover the union shop and check-off.

The two parties have presented in detail their respective cases before the Board. The union, which claims to represent well over seventy-five per cent of the eligible employees, emphasizes that without the union shop it is handicapped in disciplining or controlling its members and that frictions, injurious to smooth labour relations, occur between union and non-union employees. It is responsible for an agreement covering all employees, but cannot discipline those outside its membership. Much energy of its officials is at present devoted to maintaining membership whereas it could, under a union shop, be devoted to improving working morale and increasing production. An important undercurrent in the attitude of the union is fear for the future. Prior to the outbreak of war in 1939 the company employed about 490 wage-earners while to-day, due to war contracts, it employs about 1,500. Any drastic contraction in the number of workers, owing to reduced war orders, might have sweeping effects upon the membership of the union. Hence, like many other contemporary unions, it naturally seeks as much security as possible, and looks to the union shop as the most effective device for obtaining it. The labour turn-over in the plant is set forth as another circumstance to justify a union shop. The union circulated authorization cards among its members in the plant, and a strong vote was reflected for union shop and check-off.

The company on its part opposes the request of the union on the ground that the union shop and check-off are illegal in terms

of P.C. 1003. In addition it is opposed to provisions in a collective agreement which exert compulsion upon any of its employees to join the union. Underlying its stand in opposition to compulsory unionism within the plant is the scarcely disguised fear that under the union shop it might have to deal with a body irresponsible simply because it was secure.

Thus on both sides, as is often the case where collective bargaining is of relatively short duration, the element of fear is the cause of the present disagreement. The union is afraid that the company may seize the opportunity, when the demand for labour is less urgent, either to break the union or to pay little attention to its bargaining power. On the side of the company there is fear that the union may proceed from one disturbing demand to another with little regard to the manner whereby these demands will embarrass management. There is plainly no remedy for this condition of mutual fear except a frank readiness of both parties to place more trust in each other. Such trust may be expressed in and promoted by a moderation of the demands made, and a readiness on the other side to accept the moderated demands.

Genuine collective bargaining, in consonance with the essential principles of a democratic state, must reflect a spirit of give and take. It is obvious that it can grow sturdy and effective only where compromise is present. It must seek agreement with the minimum of mutual irritation. To this type of collective bargaining there is little alternative except harsh industrial struggle or a highly rigid prescription of industrial relationships by the state, under which both employers and employees would lose much of their present free decision.

The Board would recommend that, in view of the short period of collective bargaining between the parties, the union should reduce its request in order to demonstrate its trust and that on the other hand the Company should depart from its rigid opposition to any union security provisions whatever. More concretely the Board would recommend that a maintenance-of-membership clause should be introduced to apply to the existing employees who are members of the union and new employees who may become members, and that there should be a check-off, voluntary at the outset but irrevocable during the duration of the annual agreement. These recommendations avoid, as a concession to the company, any compulsion of employees who at present are non-union members and also any compulsion of new employees to join the union. In the case of these two categories

of employees the union would continue to depend upon the traditional arts of persuasion in the recruitment of members.

The Board notes that the company in its brief lays prime emphasis upon the claim that recommendations for a union shop and check-off would run counter to the law in P.C. 1003 itself because a union shop and a check-off are aids to a union and affect the power of the employer to discharge employees. The Board takes the simple stand that it is not called upon to decide the legality of either provision under P.C. 1003 to make the union shop and check-off illegal, and, if it is wrong in that assumption, it seeks a fresh directive from the Government.

In conclusion the Board wishes to point out to both parties that, during the year of the next agreement between them, a period of transition from war to peace may begin, and new and acute industrial strains may be felt. An abundance of mutual trust between the parties will be imperative in order to cope effectively with these strains. It urges a compromise in the present instance as concrete evidence of such trust now and for the year ahead.

All of which is respectfully submitted.

Dated at Toronto this 11th day of November, 1944.

(Sgd.) ALEXANDER BRADY,
Chairman.

(Sgd.) HARVEY G. FORSTER.

Minority Report

Re: Wartime Labour Relations Regulations, P.C. 1003; and re Electro Metallurgical Company of Canada, Limited, Welland, Ontario, and its Employees, Members of Local 523, United Electrical, Radio and Machine Workers of America.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

As I am unable to agree with the findings and recommendations of the majority of this Board, I submit herewith a separate report.

Written briefs were filed with us by the parties, the Company being represented at the hearings of the Board by the Honourable Salter A. Hayden, K.C. and W. R. West, as Counsel, and by Messrs. Deitch, Sager and Taylor. The Union was represented at the first hearing by Mr. George Harris, District Secretary, and Mr. C. R. Sullivan, Business Agent for the Local. At the second hearing Mr. C. S. Jackson appeared in place of Mr. Harris.

The issue in this case was the same as in the Page-Hersey* case, which was heard on the

same days, and the extensive arguments put forward by the Union in that case were incorporated by reference in its brief filed in this case. The dispute concerns the Union's claim for the inclusion in the first renewal of an existing collective bargaining agreement dated May 7, 1943, of provisions for a union shop and check-off. Under the existing agreement the Company recognizes the Union as the sole and exclusive bargaining agency for all employees on the hourly payroll at its Welland plant except certain designated occupations and does not wish to concede the Union's claim, which is now in dispute.

As in the Page-Hersey case, all of the usual arguments in connection with the issue of union security were put forward and dealt with by the parties. In addition, however, the Company in this case based its objections to the Union's claim upon the legal aspects of the issues in dispute, contending that, if settled in favour of the Union, they were illegal under the Wartime Labour Relations Regulations P.C. 1003 and contrary to the National Selective Service Civilian Regulations, P.C. 246. The majority report notes this fact and takes the simple stand that it is not called upon to decide the legal question but assumes that it was not the broad intention of P.C. 1003 to make the union shop and check-off illegal and that if that assumption is wrong, a fresh directive from the Government is sought.

I agree only to the extent that it is probably not the function of a Board of Conciliation, the members of which have accepted appointment under P.C. 1003, to question the legality of any findings or recommendations that they may make by way of conciliation; and as suggested by the Company, the matter may have to be determined elsewhere.

In view of my own conclusions with respect to the matters before the Board, I am not in any way embarrassed by the question of legality; but having regard to the findings and recommendations of the majority report, I think the Company is entitled to have its carefully prepared argument on this issue brought to the attention of the proper authorities for consideration and determination.

Without quoting, but merely referring to, the detailed provisions of P.C. 1003, the Company's argument may be summarized by saying that Section 4 (1) grants the right to an employee to be a member of a trade union but does not take away his right to refrain from joining a union. Reading that provision with Section 19 (2) (b), which provides that no employer shall impose any condition in a contract of employment seeking to restrain an employee from exercising his rights under the Regulations, the Company

* See page 44.

contains that the right of an employee not to join a trade union cannot be abrogated by an employer.

The Company's argument further submits that any form of compulsory unionism constitutes support to a trade union in contravention of Section 19 (1), as does the check-off of union dues, while the obligation imposed on an employer under the usual forms of closed shop, union shop or maintenance-of-membership affects the right of an employer to discharge employees as provided by Section 19 (2), it being nowhere "otherwise . . . expressly stated" in the Regulations that an employer is authorized to discharge an employee for failing to belong to a union, to join a union or to maintain membership therein.

It is also argued by the Company that Section 20 (1) in no way authorizes the employer to include in a collective agreement any provision for financial or other support of a trade union, the proviso to that section not over-riding the prohibition contained in Section 19 above referred to.

The Company's argument under the National Selective Service Civilian Regulations P.C. 246 proceeds on the basis that the Company is a "designated establishment" thereunder, and that as a consequence it is not free to discharge employees even for misconduct, nor are its employees free voluntarily to terminate their employment. The Company refers to Section 202 (A) (4) (a) and (b) and to Section 209 of those Regulations, and submits that in the result compulsory unionism in any of its forms is contrary thereto.

As mentioned above, I do not propose in the circumstances to pass any opinion on these questions but recommend, in view of the frequency with which the whole question of legality or illegality of various forms of union security has been raised, that a final determination of this aspect of the matter would be of assistance to all Boards of Conciliation which are or may be called upon to deal with it.

I do not propose to deal with all the familiar arguments for and against union security which were discussed by the parties but, as in the Page-Hersey case, feel that I should comment on such of the arguments as led the Chairman and the other member of the Board herein to a conclusion different from my own.

The Company takes the position that it does not believe in any form of compulsory unionism and, as in the Page-Hersey case, nothing has been brought forward in this case which would justify any change of attitude on its part. The issue here demonstrates that

there is an honest difference of opinion between the parties with respect to the ultimate status of trade unions in industry. At the moment this difference appears to be irreconcilable and any suggestion that the parties merely forget about the main issue and in the meantime compromise the claim seems to me to be a wholly unwarranted procedure. If there were any practical value in the arrangements for maintenance-of-membership and check-off in a particular case I should be prepared to give them earnest consideration; but in a case where it has been demonstrated that neither of these arrangements will assist the Union, and where the suggestion is made that these arrangements are put into effect merely as compromise, I am inclined to the view that this would serve only to emphasize the real issue between the parties and that instead of lessening the friction between union and non-union employees, it would only tend to increase it.

As I have previously said, it may very well be that when parties are opposed in principle it is not a question of "conciliation"; certainly not a case for a "saw-off", as there may be no middle ground in such circumstances. Growing experience as a member of Boards of Conciliation has led me to the conclusion that conciliation procedure on the issue of union security is quite futile. The Union makes no secret of the fact that its ultimate object is a full measure of union security, including union shop, maintenance of membership and involuntary check-off of union dues. In the circumstances, I cannot see that the Company should, as a matter of "conciliation", and in the absence of proof of any particular problem either as to maintenance of membership or collection of dues by the Union, be asked to accept the first step in a progressive program of union security which will simply be used as a spring-board to jump to the next higher stage of union security when the agreement between the parties is again the subject of negotiations for renewal.

The Union's argument that under the union shop it can more effectively discipline its members, and that the time spent by shop stewards in developing membership and collecting union dues (which activities are admittedly carried on in Company premises and on Company time) could be devoted to discipline, maintenance of employee morale and combatting absenteeism and labour turnover, overlooks entirely that the problem of maintaining discipline is essentially a function of Management and that if there is any lack of discipline this situation could be quite effectively cured by Management now, given the co-operation of the Union in its present status; and there is nothing whatever in the

record to indicate any foundation for the claim by the Union that it could accomplish its objectives if granted the union shop, or that it would even attempt to do so.

The Union has admitted and proudly asserted during the course of the hearing that it had no problem of dues collection nor loss of membership, and I am unable to see how the recommendation of the majority of this Board for the inclusion in the renewal agreement of the provisions for maintenance of membership and check-off will improve the situation; on the contrary, I am convinced that "freezing" in membership employees who have voluntarily joined the Union will only aggravate any problem which might exist between union and non-union employees.

The Union's argument and the report of the majority emphasize the fear of the Union that unless it is made "secure" the Company may free itself from collective bargaining undertakings in the future. I think it is a complete answer to this argument that so long as a majority of the Company's employees support the Union voluntarily and wish it to represent them for purposes of collective bargaining with the Company, the latter is obliged by law, if for no other reason, to recognize and deal with the Union. The Company submits that its record in dealing with the Union is one that will stand the closest scrutiny and will show that at no time has it engaged in any combat tending to interfere in any way with any of the rights of the Union or of its members, or of any other employees in the plant; but on the contrary, it voluntarily entered into a contractual relationship with the Union when there was no law requiring it to do so. I think there is no ground for the Union's apprehensions in this regard and that the Company's sincerity cannot be brought into question on the record as it stands.

In my opinion, it by no means follows that the refusal of an employer to agree to provisions for a union shop, maintenance of membership and check-off amounts to a negation of collective bargaining. Genuine collective bargaining can and does exist without any necessity for agreement on these particular items, which are merely the subject of collective bargaining. The Union's insistence that agreement by the employer to union security provisions is the acid test of the latter's bona fides in his approach to collective bargaining, and that to withhold union security is the equivalent of withholding full acceptance of collective bargaining, simply confuses the issue.

In putting itself forward as a collective bargaining agency a union voluntarily assumes

certain risks of lack of support and it seems to me quite inconsistent for a union, after being accorded full recognition by the Company as the exclusive bargaining agency for its employees in a designated unit, and after having entered into an agreement on behalf of all the employees, to expect the Company to solve any problems of non-support which it has voluntarily assumed, or to say that it cannot effectively carry out the obligations of the agreement which it has voluntarily entered into unless the Company takes steps to make the union "secure". To the extent that trade unions win the voluntary support of the employees they will be secure and will have no problem on that score; to the extent that they fail to win such support they are in no worse position than any other organization which offers a service to any section of the public.

In my report in the Page-Hersey case I referred also to the position taken by my colleague who was appointed on the recommendation of the Union and who occupies the same position as a member of this Board. He is firmly convinced that the complete union shop status should have been granted and I am satisfied that his concurrence in the majority report does not represent his actual views. It is unnecessary and undesirable that I should repeat this attitude toward the steps which might be taken by union members to compel adherence to the Union by non-members, nor to his opinion of business executives generally who have devoted their lives and best efforts to attaining the positions which they occupy. It is sufficient for me to say that the millenium will never be reached in industrial relations while such views are held by those responsible for the conduct of Labour's case; and by this I do not mean to convey that my colleague's views on these matters are typical of all representatives of Labour, nor that Labour leadership is the only one at fault in appraising the motives and merits of the other side.

I beg to report, sir, that the parties in this case hold honest differences of opinion on matters of principle which cannot be reconciled or conciliated by any half-way measure and that in such circumstances no useful purpose can or will be served by Boards of Conciliation. I recommend, therefore, that the Union drop its claim for union shop and check-off, and that the parties carry on under the existing arrangements.

I wish to add, however, that what I have said above with respect to the futility of conciliation in cases where the parties hold different views on the principles involved, does not apply to other matters, such as hours of work, seniority, grievance procedure and other

terms and conditions of employment of that nature.

All of which is respectfully submitted this 16th day of November, 1944.

(Sgd.) J. S. D. TORRY,
Member.

Supplementary Report

Re: *Wartime Labour Relations Regulations, P.C. 1003; and Electro Metallurgical Company of Canada, Limited, Welland, Ontario, and its Employees, Members of Local 523, United Electrical, Radio and Machine Workers of America.*

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

I regret that the Company's nominee on this Board has seen fit in his minority report

to make direct reference to what he alleges to be my personal views on a variety of matters, and has attempted to use this in his argument.

Inasmuch as this reference is a gross misrepresentation of my views or any views I expressed during the meetings of the Board, it follows therefore that his argument on this ground has no validity.

I am forced to make this additional report because owing to the delay in the presentation of the minority report the majority report was completed and forwarded to you before a copy of the minority report was available to other members.

Respectfully yours,

(Sgd.) HARVEY G. FORSTER,
Member.

Report of Board in Dispute between the Corporation of the Township of York Hydro System, Toronto, Ont., and the Canadian Electrical Trades Union, Branch No. 1

On December 16 the Minister of Labour received the unanimous Report of the Board of Conciliation which dealt with a dispute between the Corporation of the Township of York Hydro System, Toronto, and the Canadian Electrical Trades Union, Branch No. 1.

The Board was under the chairmanship of Dr. Alexander Brady, Toronto, appointed by the Minister in the absence of a joint recommendation from the other two members; and Messrs. J. D. McNish, K.C., and Drummond Wren, also of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations, P.C. 1003 and Township of York Hydro System, Toronto, Ontario, and the Canadian Electrical Trades Union, Branch No. 1.*

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation established to deal with the above dispute begs to submit its report.

This dispute arises out of various requests submitted by the Canadian Electrical Trades Union, recognised as the bargaining agent, to York Township with respect to conditions of employment in the Hydro System of the Township. In a number of instances York Township decided that it could not satisfy the requests, with the result that the parties

failed to renew their agreement, and the present Board of Conciliation was appointed to effect conciliation between them. The Board duly held meetings with representatives of the parties and endeavoured to bring them into agreement on as many as possible of the fourteen points on which they previously disagreed. In these discussions the Township was represented by Mr. Howard Hall, K.C., Township Clerk and Solicitor and by Mr. McClymont, Manager of the Township Hydro. The Union was represented by a number of its officials and in particular by Mr. T. F. Stevenson, Business Secretary. As a result of these discussions the parties agreed on three disputed points which may be listed but need not be described in detail. Agreement was reached concerning:

- (1) An extra payment which may be made to employees who left the service or went on leave of absence since January 1, 1944.
- (2) The rate of pay for Mr. A. Keast, line foreman.
- (3) The clauses which shall apply to the classification already approved respecting new employees and employees transferred from one classification to another.

The Board wishes to make recommendations concerning those matters on which agreement was not reached as a result of its conciliatory efforts.

(1) *Cost-of-Living Bonus*

The Union has requested that the girls on the staff should be paid a cost-of-living bonus

of \$3.35 per week or 13.4 per cent according to their rate of wages, and that the cost-of-living bonus be added to and form part of the wages paid to all Hydro employees.

At present the girls in the Hydro Office receive the same cost-of-living bonus as that paid to the other employees of the municipality outside the Hydro System; namely, the rate of \$3.35 per week for married men and others who are the sole support of a household and \$1.85 per week in the case of single employees. In York Township hydro is considered a municipal service directly under the Township rather than under a distinct commission. Payment of a cost-of-living bonus is not obligatory for a municipal body, but the Township council has voluntarily paid the bonus noted above.

The Board does not recommend compliance with the request of the Union to pay an increased cost-of-living bonus to the twenty-six girls in the Hydro office unless the same bonus was also paid to the forty odd girls in the other departments of the municipality. The payment to the girls in one department would involve discrimination which, if it was attempted, would likely breed unrest and friction in the general municipal office. Whether an increased bonus should be paid to all female employees in the municipality is a matter for the Council to decide after considering all the pertinent circumstances. It may be noted that the bonus now paid by the Township corresponds rather closely to that paid by the city of Toronto:

	Single Persons	Married or those with dependents
The Township rate..	\$1 85	\$3 35
The Toronto rate....	2 00	3 25

The other request of the Union that the cost-of-living bonus be added to and form part of the wages payable to all Hydro employees is less important than at first might appear. The Township council is paying the bonus voluntarily because it recognizes that the cost of living has gone up during the war years, and the bonus is necessary to help the workers maintain their standards of living. We may assume that the Township will continue to pay the bonus unless a profound change occurred in prices and general costs, the type of change which would also affect wages. Unlike private industry it is not obligated under P.C. 9384 to make the bonus a part of the wages paid to employees. But on the other hand it is not prevented from doing so. Political units in general were exempt from the requirement in P.C. 9384

because the government which drafted the order was anxious to avoid interfering with the discretion of a body elected by the people for the payment of wages to its employees. This discretion of the municipal body remains intact. The council of the Township of York is free, if it deems fit, to make the cost-of-living bonus a part of the wage, and the Board sees no substantial reason to recommend for or against such action. It is hardly of major importance whether the payment is called a bonus or a part of a wage. It may perhaps be easier to withdraw a bonus than to reduce a wage, and hence the employees would prefer to make the change from a bonus to an increased wage. But on the other hand, if prices should rise, an increase in the bonus could more promptly be made than an increase in wages, mainly because the bonus is looked upon as a payment which should be adjusted to prices. It may be noted that the city of Toronto has not added the cost-of-living bonus to the wages of its employees.

(2) Pension and Insurance

The Union requests that the Township include a provision in the agreement designed to establish for all Hydro employees a municipal Hydro-Electric Pension and Insurance Plan from the date of their employment. The Council takes the view that a pension plan must embrace more than merely one group of employees and that it is not a suitable matter for inclusion in an agreement between the Township and the Union.

The Board accepts the view of the Council that the request for a Pension and Insurance Plan is not suitable for inclusion in the agreement, but strongly recommends to the Council that it should develop at the earliest opportunity a comprehensive plan of pensions and insurance for all its employees. Such a plan would make employment with the Township more attractive, and would add substantially to the contentment of Township employees.

(3) Credit for Previous Employment

The present regulations of the Township Hydro provide that "all employees who came direct from the Toronto Hydro will be credited with their years of service with that organization as far as sick pay, accidents and vacations are concerned."

The Union requests that this clause be amended to read that "all employees who came direct from the Toronto Hydro Electric System and any other Department of the Municipality of the Township of York, will be credited with their years of service with these organizations as far as sick pay, accidents and vacations are concerned."

The Board of Conciliation wish to support the request of the Union in this matter for equal treatment of the employees who came from other departments of the municipality along with those who came from the Toronto Hydro. The number of men actually involved is small, and the additional expense to the Township in sick pay at the more liberal Hydro rate is not likely to be large. In any case the additional expense is warranted in order to remove a just sense of grievance among the few men affected. Equality of treatment among men doing the same kind of work in close contact with one another is essential for the maintenance of morale among the employees.

(4) *Week-end Trouble Clause*

The Union has requested that an additional paragraph be added under this heading to read as follows:

"In each Trouble Crew of two men at least one will be receiving Class AA Lineman's rate, and the other not less than Class A Lineman's rate."

The Board recommends the adoption of this amendment. The additional cost to the Township in wages is negligible.

(5) *Claim of pay for work stoppage*

A stoppage of work occurred for some hours on May 30, 1944, when employees were dissatisfied with the decision of the manager as to the composition of a Trouble Crew. During this stoppage the employees provided for what might be deemed necessary services to the consumers by taking all telephone calls, bill payments and trouble calls. As a consequence of this service the Union asks that the employees who participated in the stoppage of work should be paid for the period of the stoppage, which in the case of some employees covered 3½ hours and in the case of others 4½.

The Board cannot recommend the acceptance of this request by the Union.

(6) *Maintenance of Union membership*

The Union wishes to have incorporated in the agreement the following provision:

"It is agreed that all present members of the Union must retain their membership. Any present employees who are not new members but become members must retain their membership. All future employees, as a term of their employment, must become members of the Union within six months of the date of their employment for the term of this and any subsequent agreements."

In considering this request for a maintenance-of-membership clause it is significant to note that almost one hundred per cent of the em-

ployees of the York Township Hydro are now enrolled in the Canadian Electrical Trades Union. The Board of Conciliation is convinced that it is in the public interest of the Township to assist the Union in maintaining membership. Where membership of the Union is secure, all the many frictions which often occur between Union and non-union men in the same employment are avoided, no suspicion can arise that there has been discrimination by management between Union and non-Union workers, and it removes any temptation from Union leaders to whip up employee grievances in order to insure a wider interest in the Union. In brief a maintenance-of-membership clause would help to stabilize the Union, and hence assist it in becoming a permanent business agent for the employees in bargaining with the Township. The Union is democratically organized, and at general meetings all members have an opportunity to express their views on union policies. The compulsory element in membership has, therefore, its compensation in that the employees have the opportunity to influence the action of their bargaining unit, an opportunity which is of course denied to them if they are not members of the Union. In the discussions before the Board, the representatives of the Township thought that the proposal for maintenance of membership should not be considered until it was first adopted by the Toronto Hydro Electric System. But the Board believes that if the principle involved is sound, there is no reason why the Township of York should delay in implementing it. Indeed the ready action of the Township ahead of other bodies would win it extra confidence from the body of employees. In brief the Board of Conciliation recommends that the Township incorporate a maintenance-of-membership clause in the agreement. The Board of Conciliation recommends that the clause under the heading "maintenance of membership" should read as follows: "It is agreed that all present members of the Union must retain their membership. Any present employees who are not now members but become members must retain their membership, and any future employees who become members of the Union must retain their membership."

(7) *The salaries of general office employees*

The issue in this matter pertains to the method of applying a classification for the office staff. The Township adopted a classification for the female staff in the municipality, including the Hydro System, providing for annual rate increases which are to commence on January 1, 1945. The Township has filed with the Board its salary scheme involving

increases which the Township is prepared to make effective as from January 1, 1944. The Union, however, is not satisfied with the method of applying the classification. It contends that the time-period in the classification for purposes of determining the wage increases should date from the day of employment where employees have not changed their classification or where classifications have changed since employment, they should be dated from the day of such change. The Union, in other words, rejects the plan that the increases on the basis of classification should all be made effective as from the fixed date of January 1, 1944.

The Board is fully in agreement that the Township has taken an excellent step in introducing a classification for its office staff. But it is not unanimous as to the method of dating the classification for purposes of wage increases. Mr. Wren thinks that the request of the Union is sound, and that it conforms with the classification systems commonly introduced in industrial concerns. He recommends that levels of wages for the employees should be immediately introduced in accordance with the length of time of the employees in the different classifications. On the other hand, Mr. McNish and the chairman think that it is best for the Township to proceed with the implementing of their present plan of wage schedules. Any attempt to reopen the issue of wages now would involve considerable delays and might jeopardize the whole classification scheme. They note, moreover, that the employees in the office have usually had steady increases in wages, and are not the victims of an obvious injustice.

(8) *Dispute over Bicknell Clerks Work Hours*

The issue here consists in the request of the Union that the employees in question should be allowed time off for the eight statutory holidays at the period of their annual vacation or at some other period suitable to both parties.

The Board recommends in regard to these clerks that the times off for statutory holidays,

equal to seven and a half (7½) working days, be allowed at the period of their annual vacation or at some other period suitable to both parties provided that all accrued time off, if not taken at the period of the annual vacation, shall be taken all at one time.

(9) *Equal pay for equal work*

The Union requests that Miss M. Doughton who was appointed to perform a man's work in the meter testing department at \$20 per week plus cost-of-living bonus should receive the bonus at the same rate formerly paid to an unmarried man in this position; namely, at 13.4 per cent. To refuse the Union request in this instance is to discriminate between the pay given to a woman in performing the same work formerly performed by an unmarried man who has gone on military service.

The Board recommends that the principle of equal pay for equal work should be respected in this instance, and that Miss M. Doughton should be granted a cost-of-living bonus at the rate of 13.4 per cent as long as she performs the work required in the meter testing department. The Board would emphasize that this recommendation does not justify a request from the other female employees that they should have the 13.4 per cent rate. Miss Doughton is entitled to it purely because of the man's position which she fills while the former employee is on military service.

(10) *Pre-arranged overtime re holidays*

The Union has requested that the provision in the agreement respecting pre-arranged overtime should be amended so that only 44 hours pre-arranged overtime should be worked in any year without pay instead of 88 hours as at present.

The Board of Conciliation recommends the adoption of this request as reasonable.

All of which is respectfully submitted.

Signed in Toronto, December 11, 1944.

(Sgd.) ALEXANDER BRADY,
Chairman.

(Sgd.) J. D. McNISH,
(Sgd.) DRUMMOND WREN.

Report of Board in Dispute between the Steel Company of Canada (Hamilton and Ontario Works) Hamilton, Ont., and Local 1005, United Steelworkers of America.

On December 16 the Minister of Labour received the unanimous Report of the Board of Conciliation which dealt with a dispute between the Steel Company of Canada, Limited (Hamilton and Ontario Works), Hamilton, Ont., and Local 1005, United Steelworkers of America.

The Board was under the chairmanship of Dr. Cecil A. Wright, Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. John J. Robinette and Drummond Wren, also of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: *Wartime Labour Regulations, P.C. 1003, and re Dispute Between Steel Company of Canada, Limited (Hamilton and Ontario Works) Hamilton, Ontario, and United Steelworkers of America, Local 1005.*

To: The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you pursuant to s. 13 of P.C. 1003 begs to report as follows:

At a meeting of the Board held at Toronto on November 9, counsel for the Company and the Union attending, at the request and with the consent of both parties further proceedings were postponed until November 27th, on which day and the following day, the Board sat in the Court House, Hamilton, Ontario to hear the representations of the parties. At the public hearings the Company was represented by R. A. Gillies, Works Manager, A. L. Lott, Manager of Industrial Relations and G. R. Munnoch, K.C., as counsel. The Union was represented by T. W. McClure, President of Local 1005, Roy Aindow, Field Representative of the United Steelworkers and F. Andrew Brewin, as Counsel.

THE FACTS

The present dispute arises from a failure to agree on certain matters in the course of negotiating a first collective agreement at the Hamilton Works of the Company. The Union was certified as the collective bargaining agency for the hourly and production employees of the Company, excluding brickmasons, by an order of Mackay J., April 6, 1944, under the provisions of the Ontario Collective Bargaining Act. By virtue of P.C. 2301 (1944) the officers of the Union are, therefore, the bargaining representatives under P.C. 1003. The eligible employees on whose behalf, as such representatives, the present agreement is being negotiated, are in the neighbourhood of 4500. The certification was made following a vote directed by the Court in the course of proceedings for certification by the Union, contested by the Company, and in which the Independent Steel Workers Association appeared as intervener. The list of those eligible to vote contained 4463 names. 3781 ballots were cast, of which, after rejecting spoiled ballots, some 3743 were counted by the Registrar. In a three way vote (a) for the present Local of the

United Steelworkers, (b) for the Independent Steelworkers Association, (c) for neither, the results were 2461 for the present Union; 889 for the Independent Union; 393 for neither.

It is clear, therefore, that the present Union has a mandate from an overwhelming majority of the employees to conclude a collective agreement. The Company laid great emphasis on the fact that this particular Union could not be said to be representative of the employees "in the full sense of the word," since, so it was urged, it did not represent a sufficiently large group of employees who were willing to show "loyalty" to the Union by the regular payment of Union dues. The Union quite frankly admitted that at the time of the vote for certification proceedings its paid-up membership totalled only 259. The all-time high for paid-up membership on the Union's figures was in January, 1943, when it stood at 771. At the present time the paid up members, according to the Union, number 373.

Other figures, for other significant periods in the struggle of the present Union for recognition by the Company, were put before the Board by the Union. From them the Board was invited to infer that the low paid-up membership was due to a sense of "frustration" among the employees due to the continued opposition of the Company to the present Union. That the Company "did not welcome the present Union with open arms" was freely admitted by the Company at the hearing, and we think it fair to say that up to the certification order the Company opposed the present Union. Indeed, this is impliedly admitted by the Company which suggested that its "opposition" should have served as a rallying point for the Union on the theory that "movements are promoted by opposition."

We see no useful purpose in pursuing this line of inquiry, nor in speculating on the number of possible reasons that might exist for the low paid-up membership figures in a plant of this size and with a vote so overwhelmingly pro-Union. Nor do we believe that any useful purpose can be served in recapitulating the story of this Union's struggle for recognition, which can be found in the judgment of Mackay J., dated January 10, 1944. That the Company's opposition to this Union may have had something to do with the decrease from 771 paid-up members in 1942, the time when the Union elected its representatives to the Works Council, to the low figure of 170 in September 1943, following the Company's refusal to recognize the Union or hold a vote in the plant, followed by the formation in May, 1943 of the Stelco Employees Association, supplanted in June 1943 by the

Independent Steelworkers Association, is a reasonable possibility. So also is the inherent difficulty of organization in a plant covering some 340 acres, working in three daily shifts, and subject to the Company's restrictions, to be later referred to, against engaging "in Union activities" on the Company's premises.

While the past relations between the parties must of necessity furnish the background against which a Board such as this must view the respective claims of the parties in the course of negotiating an agreement, it is chiefly concerned with the future. Both parties have entered in good faith on negotiations for a collective agreement following the certification order. Some fourteen meetings have been held in the course of these negotiations, and many difficult matters have been agreed upon. Some eight points only were placed before this Board as matters on which the parties could not agree. In a plant as large as this, and considering the strongly held, and openly expressed, views of both parties over a period of more than five years, and bearing in mind that the Company sincerely believed the former system of regulating employer-employee relations to be superior to that in which the Union has an equally sincere belief to the contrary, it should be a matter of gratification that so much progress has been made.

It became evident in the course of the proceedings before this Board that conciliation of the points in dispute was impossible. In that event, the position which a Board of Conciliation should take is not easy to state. No principles have been laid down anywhere for the guidance of Boards in making recommendations. All that is possible is for a Board to consider what it, being divorced from personal participation in, but with knowledge of past differences, considers to be a reasonable basis for concluding an agreement for the future. To the extent that a Board is composed of members nominated by Company and the Union, within the Board itself an opportunity is presented for negotiations in miniature. We are pleased to be able to report that the recommendations of this Board are unanimous.

Before dealing with these recommendations it may be of assistance to state the basic principles on which the Board was able to reach an agreement. Granted that the Union has the mandate of a large majority of employees to conclude an agreement with the Company, as it has, on the evidence, in the present case, the Board assumed as fundamental that neither party should so act, or stipulate, as to impede the successful operation of a collective agreement. P.C. 1003, which contemplates the conclusion of a col-

lective agreement, must be understood as meaning an agreement in which a bargaining agency or representatives can truly act for all employees during the life of the agreement. This involves allowing for considerable freedom in conducting matters of concern to the employees under the agreement. It follows, therefore, that no unnecessary impediment should be placed in the way of a Union's freedom of action—even, or especially, a Union with which an employer may in many respects, not be in sympathy. To do so would be to deny the wishes of the majority of employees with respect to their method of dealing with employer-employee relations.

At the same time, however, a right to bargain collectively on behalf of all employees does not of itself confer, nor should it be used by a Union merely as a means of compelling a reluctant employer to support or encourage the growth of Union strength, particularly where there is any suggestion of reluctance on the part of a considerable number of employees. It is quite possible that employees may wish a Union to represent them without such employees becoming members of the Union. Whether or not employees wish to become members of the Union is not, and should not be primarily the concern of the employer.

In the present dispute it was clear that the Union felt that the Company was insisting on some provisions which would make an increase in their membership difficult or impossible and which would seriously impede the Union in acting as bargaining representative. The Union, therefore, asked for provisions, which, in its view would help to make its position secure and indicate Company co-operation towards that end. The Company interpreted some of the Union's claims as an indication that the Union wished Company support to increase Union membership. One thing is clear. The Union has been chosen to represent the employees. The Company cannot reasonably deny that it should permit the Union to prove that the employees were right or wrong in entrusting their bargaining rights to the Union. The employees, apart from the Union, have that right, and it is with the rights of the employees in mind, rather than with the rights of the existing small percentage of Union member employees that this Board approached the matters presented to it for recommendation.

MAINTENANCE OF MEMBERSHIP

The Union asked for, and the Company refused, the inclusion of the following clause in the agreement:

In order to secure the increased production which will result from harmony between em-

ployees and the Company and in the interests of increased co-operation between the Union and the management of the Company, which cannot exist without a stable and responsible Union, the parties hereto agree as follows:— All employees who, fifteen days after the execution of this agreement, are members of the Union in good standing and those employees who may hereafter become members of the Union, shall, during the lifetime of this agreement, remain members of the Union in good standing.

This clause is one to which the Company objects on the ground that it should not be called upon to "nourish" Union support. As the claim of the Union to represent employees is, in the present case, based almost entirely on the support of employees who are not members in good standing of the Union, it is a little difficult to understand how the Union's position as bargaining representative can be made more "stable" and the Union more "responsible" by compelling some 373 employees out of 4,500 to remain members of a Union as a condition of continued employment. Whatever the situation might be if a majority of employees were members of the Union, in which case the Union could be said to have asked for this provision on behalf of such majority, it would seem clear that the Union received no mandate as a result of certification to require the Company to discharge a few hundred employees if they failed to keep up membership. It may be true that in one sense the existing members are asking for this self-imposed condition and from the point of view of logic alone it may be said they should not be denied their request. Presumably, however, the Union looks forward to obtaining future members whose consent has not yet been so given. In any event, to ask in a first agreement that "good standing" in a Union as yet untried in this plant, and one whose conditions of "good standing" are consequently an unknown factor to this Company, be made a condition of employment does not commend itself to this Board, and it is accordingly recommended that the Union withdraw its request for inclusion of this clause.

CHECK-OFF

The Union requested that the Company agree to the following clause regarding check-off, and the Company refused:

The Company shall, upon receipt of written authorization from each or any of the said employees, deduct dues at the rate of 50c per bi-weekly pay period, excepting the 13th and 26th bi-weekly pay periods of the year and shall remit same promptly to the Financial Secretary of the Union.

As voluntary check-off can be, and has been considered, as not unlike an ordinary assignment of wages, it has on several occasions been recommended as a gesture of co-operation by the Company and as a means of relieving the bargaining agency from the task of collecting dues, thus permitting the Union to use time that might be thus occupied for the better advancing of the interests of the employees whom it represents. Viewed in this way it could only be treated as the individual requests of some 373 employees out of 4,500. So far as this Board knows there may be now, or in the future, other groups or Unions in the plant, the individual members of which might, as individuals, request the same privilege. We cannot see that merely, because the individuals concerned are members of the Union which represents all employees, a benefit to one Union should be given in this way that would be denied, and strenuously opposed, by the bargaining agency.

It would be solely as a convenience to the present Union, therefore, that the check-off could be seriously urged in the present case. The nominee of the Union on this Board strongly urged on the other two members the desirability of the Company accepting the slight inconvenience involved in making an additional deduction to those already made from employees' pay, as a gesture of co-operation to the present bargaining agency, which admittedly, must face serious difficulties in collecting dues in a plant as large as the present. The majority of the Board felt, however, that they could not recommend that the Company make a change in its bookkeeping system in favour of such a small group, and that while it might be a gesture of good will, in view of the more important concessions which, in the interest of successful collective bargaining the Board was asking the Company to make, and in view of the fact that practically the Union's real problem for the future was in obtaining more members, the Union should, at the present time in any event, withdraw its request for this clause. As an indication of successful conciliation it is a satisfaction to report that with a view to a unanimous report and in the hope of a concluded agreement between the parties, the nominee of the Union concurs in this recommendation, which is, therefore, unanimous.

RECOGNITION

Under this heading, the Company proposed that the following clause should be included:

The Union agrees that neither it, nor any of its officers or members will intimidate or coerce employees into membership in the Union. It further agrees not to solicit membership, collect

dues, hold meetings or engage in any Union activities on the Company premises. Violation of the foregoing shall be just cause for discharge or other discipline by the Company.

The Union, while willing to agree to a clause prohibiting Union activity during an employee's working hours, objected to a clause which would prevent employees from discussing matters of concern to them while on their own time.

The Company frankly admitted that the proposed clause was intentionally drawn in the widest possible form so as to exclude all reference to or mention of the Union by employees while on Company premises. Considering that the premises of the Company are so large—some 340 acres—and that some employees must walk twenty minutes from the time they enter the gates of the Company until they reach the locker room, it is apparent that employees must spend considerable of their own time, apart from working hours, on the Company premises.

To attempt to impose restrictions so severe as those suggested by the Company seems to us an impossibility. Even if it were possible, such interference with the individual freedom of employees seems difficult to justify. The Union is now a recognized part of the present industrial enterprise in the sense that it has been chosen by a majority of employees to represent their interests and this choice has been confirmed by law. It is this fact which prevents any analogy being drawn between the Company's policy of preventing "canvassers" or "drives" of all kinds on the premises, and preventing a bargaining agency from carrying on its normal activities, or even being discussed on those premises. We fail to see how a Company can demand that some matters affecting the employees' interests may not be discussed between them, for example where the Union is involved, and yet permit discussions where other matters, for example, management, may be involved.

We readily concede that the Company may insist on prohibiting Union activities during an employee's working hours. We can also appreciate the fact that with three shifts in the plant an employee on his own time should not engage in Union activities which would interfere with other employees on Company time. We think, however, that this can be dealt with by agreement in such a way as to allow employees and Union officials a maximum of individual liberty while preserving efficient working conditions.

The Board therefore recommends that the proposed clause be amended to conform with these views. No objection is taken by either party to the first sentence regarding intimidat-

tion or coercion, which we believe can stand alone. Both parties are also agreed that no meetings of the Union be held on Company premises. This also can stand alone. In place of the remaining part of the clause we recommend something similar to the following:

No employee or Union official shall solicit members, collect dues or engage in any Union activity during his working hours or on Company time, save as expressly provided by this agreement; nor shall any employee or Union official solicit members, collect dues or engage in any Union activity on Company premises in such manner, place or time as to interfere with other employees during the working hours of the latter, save as expressly provided by this agreement. Violation of the foregoing shall be just cause for discipline by the Company.

GRIEVANCES

While the parties have agreed on their grievance procedure, two clauses of general application are in dispute. The Company requested the inclusion of the following clause, which the Union was unwilling to accept:

There shall be no solicitation of grievances by any grievance committee men or any other officer or member of the Union, or agent of the Union. Any grievance which has been solicited may not be presented under the grievance procedure set forth above.

As collective bargaining is designed to afford to the weak individual the benefit of collective strength, through the medium of a bargaining agency or representatives, insistence on a clause of this nature appears to us completely opposed to that principle. We believe that it is the proper function of a bargaining representative to discover whether any grievance of an employee exists which, in the interest of the individual employee or of the group of employees should be brought to the attention of management. To leave the whole initiative to an individual would be to frustrate the whole object of collective representation. The Board therefore recommends that the Company withdraw this clause.

The other clause which the Company requested, and which the Union refused, is, at present, in the draft agreement under the heading "Recognition". It reads as follows:

Nothing in the agreement shall be construed to limit or take away the right of the individual employee to present grievances directly to the representatives of the Company.

While, as will appear, the Board does not disagree with the principle of preserving individual freedom of action in connection with grievances, the interpretation which the Company places on this clause gives rise to a question of fundamental importance in

collective bargaining. The Company's intention is to permit the presentation and settlement of grievance by an individual completely apart from any participation by the Union. We believe that this ignores or oversimplifies the true nature of a grievance.

Every grievance while in one sense an individual matter is, in another sense, of equal concern to the body of employees as a whole. It will not infrequently involve an interpretation of the collective agreement itself. Even when it does not, every employee in the industry has a real interest in the dispute since each of them may, at some later date, be involved in a similar dispute.

An individual should not be prevented from submitting or discussing his own grievance with his employer. In the Ontario Collective Bargaining Act of 1943 this right of an individual was expressly reserved by s. 23. It is likewise preserved in a proviso to s. 9(a) of the United States Labour Relations Act. Both sections state, in language very similar to the clause put forward by the Company, that "any individual employee... shall have the right at any time to present grievances to his employer." We believe that this right should be preserved and that a Union is wrong in attempting to oust completely such individual presentation and discussion. At the same time, we believe, that for an employer to insist on an individual presentation of a grievance completely apart from, and in the absence of a representative of the collective bargaining agency, is as much opposed to the principle of collective bargaining as would be individual bargaining concerning working conditions. What is required is a recognition that both the individual and the collective bargaining agency have rights of participation in the settlement of grievances. The two are not inconsistent but complementary. If a grievance is of a type which the collective bargaining agency feels to be of general concern to all the workers, it should not be left to "the whim or weakness of an individual worker." On the other hand an individual should, at every stage of the grievance procedure, have a right to appear and discuss his own personal grievance. No grievance can be deemed satisfactorily settled unless there has been an opportunity for both the bargaining representative, the individual, and the employer to reach an agreement. Such is the interpretation which has been placed on the respective claims of the individual employee and the collective bargaining agency under the National Labour Regulations Act (see Boudin, *The National War Labour Board* (1944), 43 Michigan Law

Review 329 at pp. 371-73) and such we believe to be the attitude which should be adopted here.

The grievance procedure as agreed upon in the present case provides for presentation of grievances after "Step No. 1", only by Union officials. We believe that, to carry into effect, the principles mentioned, all that is needed is an additional clause being added to the grievance procedure, somewhat to the following effect:

Nothing herein shall prevent an individual employee from presenting and discussing his grievance at any stage, but this shall be in addition to and not in substitution for the procedure for the adjustment of disputes in this agreement.

The Board recommends that the Company's request in this connection be modified and clarified accordingly.

SENIORITY

The Union made a request that the crane men be continued, as they had been until this year, as a separate department and not included as members of other departments in the plant. Its argument was based on the fact that the operation of cranes involved a separate skill and, therefore, promotions should be made from crane to crane, rather than from within a given department to a crane and on, in that department, to other positions. Even admitting the strength of the Union's argument regarding separate skill, the Union did not question either the good faith of the Company or the statement of the Company officers that the present system was customary in steel plants, and was adopted because it created a greater sense of responsibility in participation in the work of the department in which the crane operated. This Board, on the evidence before it, can not, therefore, recommend that the Company's practice be changed, and it accordingly recommends that the Union withdraw this request.

WAGES: HOURS OF WORK: VACATIONS WITH PAY

There can be no doubt that questions of wages, hours of work, and vacations with pay, constitute, in normal times the essence of matters with which collective bargaining should be primarily concerned. This is, indeed, contemplated by the definition of "collective agreement" in s. 2 (1) (d) of P.C. 1003. Further, this Board agrees with the view expressed by the Company that a collective agreement, the chief purpose of which is the attaining and maintaining of peaceful and stable industrial relations within the industry, should

deal with this matter of vital concern to employer and employee alike. At the present time, however, on all these matters there is no complete freedom of collective bargaining inasmuch as it is admitted that the National War Labour Board and the provincial Regional War Labour Boards are not only entitled to disregard any agreement that might be reached by the parties on any or all of these matters but also any possible agreement involving a rise upwards in existing wages is expressly forbidden by the provisions of s. 10 (4) of P.C. 1003 unless the approval of the appropriate War Labour Board has first been obtained.

The Company urges that existing wage regulations merely limit collective bargaining on these topics and do not exclude it. With this contention the Board is inclined to agree. Had the parties actually bargained concerning all the basic rates, classifications, hours of work etc., and reached a comprehensive agreement on all of these points, so that a joint application to an appropriate War Labour Board for approval could have been made, the rates, hours etc., to the extent approved, should, we believe, be incorporated in an existing agreement and made binding on both parties for the duration of the agreement subject to any general order of an appropriate authority affecting all industry or this particular industry. If, as a result of comprehensive bargaining on rates, hours, etc., a general agreement could not be reached, some method involving either a survey by an independent body or person might be agreed upon, each party undertaking, subject to approval of an appropriate Board to accept the result, or the parties might otherwise have agreed on some wage rates etc., on which joint application would be made, some on which the employees might apply with the company contesting and some on which no change was thought desirable or necessary by either party.

Any of these methods involve true negotiation and bargaining within the permissible limits. This Board believes that the parties should, in their mutual interest, adopt some such method of permissible bargaining, obtain the approval of an appropriate Board and incorporate in detail the rates, hours etc., as approved, in a collective agreement.

The clauses put before this Board, however, are of an entirely different nature. As to wages, the Company desired the inclusion of a clause in the agreement to the effect that

the Company agrees to pay and the Union agrees to accept during the life of the agreement the scale of wages now in effect, subject to any general order affecting the Company in respect to wages that may be made under due authority by the

National War Labour Board, the Regional War Labour Board, or the Government of Canada.

Such a clause would compel the bargaining agency to accept existing rates and prevent it, for the duration of the agreement, from making future applications to an appropriate Board. We do not express any opinion as to the legality of an agreement depriving a person of his right to apply for an order to "rectify" what might be "a gross inequality or gross injustice" (P.C. 9384, s. 20 (1) (a)). The clause advanced by the Company, however, eliminates any collective bargaining on rates within the limits we have mentioned. We do not know whether any discussions of general or specific wage rates have taken place between the parties; nor are we in any position to say whether existing wage rates in any particular classification are "unjust" or "inequal"; nor is such our province. Being in such a position we cannot recommend the acceptance by the Union of such a clause put forward by the Company.

We do, however, suggest that the parties negotiate on wage rates generally with a view to their inclusion in a schedule to the agreement when approved following such negotiations, and when so negotiated and approved we would recommend their acceptance by the Union for the duration of the agreement. Pending such general settlement we believe that a collective agreement should be signed between the parties either omitting all reference to this question, or, in the alternative, a clause might be inserted by which the parties agree on a general survey or negotiations looking towards the establishment of an approved schedule of rates for all classifications, such survey or negotiations to be completed within a certain time, during which limited time, the Union agrees to accept the wages now in effect (subject to any general order). If the latter course were adopted, at the end of the stated period (or conclusion of negotiations) joint or individual applications could be made for approval to the appropriate Board and the rates so approved should by agreement be accepted as binding by both sides for the duration of the agreement. Either of these methods insures an opportunity for collective bargaining within the limits open at the present time. The clause as presented by the Company precludes such bargaining.

Somewhat similar remarks are applicable to the question of hours of work. The Company insists on the present hours being agreed to by the Union. Again, this Board is in no position to express any views as to the fairness or otherwise of those hours, nor is it part of this Board's functions. The utmost this

Board could do, even if it had evidence before it, which it has not, on which it felt a change in hours was justified, would be to recommend a joint application to an appropriate War Labour Board. In the absence of any evidence this Board can only recommend that, for the time being, the clause as proposed by the Company be omitted from the agreement altogether, leaving the matter entirely open to the appropriate War Labour Board. In the alternative the Board suggests that the question of hours of work might be made part of an agreed general negotiation or survey of wages and hours, the results to be included, when approved, in the agreement, both parties binding themselves thereto for the duration of the agreement. Pending the conclusion of such negotiations within a stated time we think the parties might agree to abide by the existing system.

As to vacations with pay, the Union at present has an appeal pending to National War Labour Board from a dismissal of its application to the Regional War Labour Board for two weeks vacation with pay after five years of service. The Company has requested the inclusion of a clause in the agreement by which the Union accepts the present practice of allowing two weeks vacation with pay after twenty-five years service. This Board does not feel that it is proper to ask the Union to accept a clause at the present time which would affect its right to carry on this appeal. Nor will this Board speculate as to the decision which the National War Labour Board may render. We would therefore recommend that the request of the Company be withdrawn for the present and the collective agreement signed without reference to this matter. If, on appeal, the National Board refuses to authorize or direct a change, the Union will be found by the existing practice in any event, and we see no reason why a clause should be inserted to that effect in the agreement since any such clause should, we believe, be stated to be subject to any change of policy on the part of the National War Labour Board or any general direction or change of law affecting the Company. With bargaining between the parties limited as it is, such exceptions are, we believe only fair to a Union and the employees it represents. If, on the other hand, the Board directs a change in the vacation plan, a clause is unnecessary. If it merely authorizes a change, without directing it, this Board fails to see how it could recommend what the National Board did not direct. In any eventuality therefore, this Board feels that the clause requested by Company should be wholly omitted from the agreement. If, and

when, wages and hours of work are, as a result of general bargaining, included in the agreement, a statement of the Company's vacation plan within the limits approved by the appropriate Board might also be included.

We have dealt with these clauses at some length because the parties at the hearing refused to withdraw them from the consideration of this Board and leave the questions involved to be determined under the existing regulations concerning wages, and because we felt that we should express our unanimous opinion that the signing of a collective agreement on matters where unfettered collective bargaining has full scope should not be withheld because of failure to agree on clauses purporting to limit even further the field already circumscribed by governmental regulation. We have suggested methods by which, within those circumscribed limits, such measure of stability for the employer and opportunity for the employee to bargain may be fairly and reasonably obtained as war-time conditions permit.

Our formal recommendation is, therefore, that the Company's clause and the Union's counter proposals on wages, hours of work and vacations with pay be withdrawn and a collective agreement be signed excluding, for the present, these items. The alternatives discussed, leading to an agreement to accept rates of pay, hours of work, etc., set out in full and after complete negotiation, are put forward as suggestions rather than as recommendations.

RECOMMENDATIONS

This Board accordingly recommends:

- (1) That the Union withdraw its request for inclusion of a maintenance of membership clause;
- (2) That the Union withdraw its request for the inclusion of a voluntary check-off clause;
- (3) That the Company withdraw its present clause forbidding Union activity on Company premises, and agree to a clause similar to that suggested, which would prevent Union activities on Company time or in a manner which would interfere with employees on Company time;
- (4) That the Company withdraw its clause regarding "solicited" grievances; that the grievance procedure be amended to provide for an individual employee's right to participate in the settlement of grievances, as suggested by the Company, but in addition to, and not in

substitution for, the Union's right to present and participate in such settlement;

- (5) That the Union withdraw its request for the establishment of cranimen's seniority rights on a separate departmental basis;
- (6) That the present agreement be signed without binding either party to existing wage rates, hours of work, vacations with pay, but that these matters be the subject of negotiation on a comprehensive scale, and that when so settled and approved by the appropriate

Labour Board, they be incorporated in the agreement, as binding on both parties, as suggested in this report.

All of which is respectfully submitted.

Dated at Toronto this fourteenth day of December 1944.

Conciliation Work of the Industrial Relations Branch During December, 1944

Activities Under the Conciliation and Labour Act and Other Legislation

DURING the month of December, officers of the Industrial Relations Branch were called upon to handle 30 industrial disputes or controversial situations involving 5,095 workpeople employed in 74 different establishments. Of these 21 were new disputes which originated during the month, while 9 were situations which had been unterminated as of November 30, and received further attention in December. They were dealt with under the provisions of the Conciliation and Labour Act, being distinct from and in addition to Conciliation proceedings under the Wartime Labour Relations Regulations described on previous pages, and under Order in Council P.C. 4020.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B. and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:—

Settlement Pending	9

Brief summaries of a few of the cases of chief interest are given below:—

Metal Products Workers, Windsor, Ont.—When the Kelsey Wheel Company of Windsor, Ont., dismissed thirteen employees for the reason that they had engaged in a slowdown, a strike of all the workers in the plant occurred on December 20, 1944. About 496 workpeople were involved. The employees, who were for the most part members of Local 195, International Union, United Automobile, Aircraft and Agricultural Implementation Workers of America, decided by a unanimous vote not to return to work until the dismissed employees were reinstated. The background of the alleged slowdown, the existence of which the Union denied, was a dispute over production standards for the pressing of a certain wheel which was required in large numbers by other war plants in the vicinity. The situation was first investigated by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, when a solution was not reached, Mr. Louis Fine, Chief Conciliation Officer for Ontario, intervened as mediator. On December 29 a settlement was reached and signed by all parties under which all employees of the Company as of December 20 were to return to work without discrimination, and to agree to make every possible effort to reach the production standards required of them by the Company. It was also agreed that both Company and Union representatives would meet for the purpose of deciding upon a mutually satisfactory standard of production, and that if agreement could not be reached, the Minister of Labour for Canada would appoint a representative of a recognized firm of industrial engineers to determine the proper production standards. Both sides undertook that such decision would be final and binding. Work was resumed on the night shift of December 29.

Electrical Apparatus Workers, St. Catharines, Ont.—Reference was made in the December issue of the LABOUR GAZETTE (page 1509) to the appointment of His Honour Judge J. J. Coughlin of Windsor, Ont., as an Industrial Disputes Inquiry Commissioner to investigate charges that two employees of the Packard Electric Company, Limited, of St. Catharines, Ont., were dismissed for the reason that they

were members of and working on behalf of the United Electrical, Radio and Machine Workers of America. The investigation took place at St. Catharines during December, a large number of witnesses being heard. The findings of the Commissioner, as reported to the Minister of Labour late in December, were that the discharge of the two employees was because of their part in an illegal strike, and that they were not dismissed or discriminated against for the reason of their union membership or activity. Unlike the majority of the workers, the two employees had not complied with the condition laid down by the Company for resumption of work and were, therefore, not excused for their participation in the strike.

Bakery Workers, Toronto, Ont.—Late in November, the Department was asked to appoint an Industrial Disputes Inquiry Commissioner under Order in Council P.C. 4020 to investigate the dismissal of an employee of the Canada Bread Company, Limited, Toronto, Ont. The complaint was laid by the International Brotherhood of Teamsters, Chauffeurs, Stablemen and Helpers. As the industry was one which normally comes within the exclusive jurisdiction of the provincial authorities, the matter was referred to the Department of Labour for Ontario, following which the Provincial Minister of Labour requested the Minister of Labour for Canada to appoint an Industrial Disputes Inquiry Commissioner. A preliminary investigation was conducted by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, Ont. On December 4 the Minister of Labour appointed His Honour Judge W. T. Robb of Orangeville, Ont., as an Industrial Disputes Inquiry Commissioner. The findings of the Commissioner were that the employee in question was not dismissed because of union membership and activity.

Wood Factory Workers, Meaford, Ont.—In the December issue of the LABOUR GAZETTE (page 1508) reference was made of the appointment of His Honour Judge J. G. Harvie of Barrie, Ont., as an Industrial Disputes Inquiry Commissioner to investigate a complaint that four employees of the Knight Manufacturing and Lumbering Company of Meaford, Ont., had been dismissed because of union activity and membership in the Woodworkers Local Union No. 8 of the Canadian Congress of Labour. The Commissioner found that the dismissals were due to necessary re-organization of the plant because of the scrapping of certain obsolete machinery and installation of new equipment and the closing down of one department because of shortage of materials. He therefore dismissed the charges that the workmen were dismissed because of union membership and activity.

Strikes and Lockouts in Canada during December, 1944

DURING the month of December, 1944, strike activity in Canada continued at a low level. The number of strikes, the number of workers involved and the time loss in man-working days were all somewhat higher than in the previous month but showed decided decreases as compared with December, 1943. Preliminary figures show 11 strikes recorded for December, 1944, with 2,273 workers involved and a time loss of 11,484 man-working days, as compared with 10 strikes in November, involving 1,456 workers, with a time loss of

4,357 days. The figures for December, 1943, show 22 strikes, with 35,227 workers involved and a time loss of 52,350 days.

Preliminary figures for 1944 show a total of 189 strikes, involving 77,698 workers, with a time loss of 501,765 man-working days. Comparative figures for 1943 show 402 strikes, with 218,404 workers involved and a time loss of 1,041,198 days.

Two strikes, involving 140 workers were carried over from November and nine commenced during December. Of these 11 strikes,

* Preliminary.

† Strikes un-terminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1944*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to December, 1944				
MANUFACTURING—				
<i>Miscellaneous Wood Products—</i>				
Wood factory workers, Meaford, Ont.	1	15	60	Commenced November 8; alleged discrimination against union members in lay-off of workers; terminated December 5; conciliation, provincial, and reference to an impartial chairman; in favour of employer.
<i>Metal Products—</i>				
Foundry workers, L'Islet Station, P.Q.	1	125	1,500	Commenced November 18; in protest against change in management; employment conditions no longer affected by December 30; return of workers; in favour of employer.
Strikes and Lockouts Commencing During December, 1944				
MINING—				
Coal miners, Robb, Alta.	1	26	550	Commenced December 5; for adjustment of contract rates on new development work; unternminated.
MANUFACTURING—				
<i>Rubber and Its Products—</i>				
Tire factory workers, Hamilton, Ont.	1	950	3,800	Commenced December 1; for adjustment of piece-work rate; terminated December 5; conciliation, provincial, and return of workers pending reference to RWLB‡; indefinite.
<i>Textiles, Clothing, etc.—</i>				
Canvas factory workers, Montreal, P.Q.	1	266	600	Commenced December 15; against dismissal of a superintendent; terminated December 18; negotiations; in favour of workers.
<i>Miscellaneous Wood Products—</i>				
Furniture factory workers, Victoriaville, P.Q.	1	90	360	Commenced December 6; against re-employment of a worker dismissed for absenteeism; terminated December 11; conciliation, provincial, and return of workers pending settlement; indefinite.
Sawmill workers, Slave Lake, Alta.	1	58	290	Commenced December 26; misunderstanding <i>re</i> order given by foreman; terminated December 30; conciliation, provincial; compromise.
<i>Metal Products—</i>				
Motor vehicle factory workers, Windsor, Ont.	1	(a) 45	14	Commenced December 5; against dismissal of a worker for insubordination; terminated December 5; return of workers; in favour of employer.
Metal factory workers, Windsor, Ont.	1	496	3,700	Commenced December 20; against dismissal of 13 workers for alleged slow-down; terminated December 28; conciliation, federal, and return of workers pending settlement; indefinite.
Railway car factory workers, Hamilton, Ont.	1	82	370	Commenced December 22; for reduction in quota of cars per day; terminated December 30; return of workers; in favour of employer.
CONSTRUCTION—				
<i>Buildings and Structures—</i>				
Plumbers, Ottawa, Ont.	45	120	240	Commenced December 1; for renewal of agreement with clause incorporating cost-of-living bonus in basic wage rate; terminated December 4; conciliation, federal, in favour of workers.

*Preliminary data based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

†In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

‡RWLB—Regional War Labour Board.

(a) 468 indirectly affected.

two resulted in favour of the workers, four in favour of the employers, one was a compromise settlement and three were indefinite in result, work being resumed pending final settlement. At the end of the month there was one strike of coal miners at Robb, Alta., recorded as undetermined.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the Labour Gazette from month to month, bringing down to date that given in the March, 1944, issue in the review "Strikes and Lockouts in Canada and Other Countries". The latter included a table summarizing the principle statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken, as far as possible, from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in October, 1944, was 208 and 17 were still in progress from the previous month, making a total of 225 during the month, in which 61,500 workers were involved and at a time loss of 233,000 working days was caused.

Of the 208 work stoppages commencing in October, 23 arose out of demands for increased

wages, eight over proposed reductions in wages, 78 over other wage questions, four on questions as to working hours, 26 over questions respecting the employment of particular classes or persons, 58 on other questions respecting working arrangements, seven over questions of trade union principle and four were in support of workers involved in other stoppages.

Australia

The number of industrial disputes recorded for the first quarter of 1944 was 233, involving 71,750 workers, with a time loss of 348,158 working days. Corresponding figures for the first quarter of 1943 are 218 strikes, involving 96,955 workers with a total time loss of 275,593 working days.

United States

Preliminary figures for November, 1944, show 375 strikes beginning in the month, in which 200,000 workers were involved. The time loss for all disputes in progress during the month was 710,000 working days. Corresponding figures for October are 440 strikes, involving 220,000 workers, with a time loss of 690,000 working days.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Fur and Leather Products

TORONTO, ONT.—THE INDEPENDENT FURRIERS' ASSOCIATION AND THE INTERNATIONAL FUR AND LEATHER WORKERS' UNION, LOCALS 35, 40 AND 65.

Agreement to be in effect from July 10, 1944, to April 30, 1946, or until such time as a new agreement has been made. New help will be secured from the union, if available. If none available, others employed must join the union. All employees must be union members in good standing.

Hours: 8 per day, Monday to Friday, a 40-hour week.

Overtime may not extend beyond 7 o'clock during the first five days of the week. All overtime and work on Saturdays and Sundays is payable at time and one-half. Holidays: employees are entitled to be paid for eight statutory holidays, and if they work on such holidays to be paid at time and one-half in addition to the regular pay for the day.

Minimum weekly wage rates: cutters \$46 for 1st class, \$40 for 2nd class; operators and finishers (male) \$35 and \$30; operators (female) \$30 and \$25; blockers and nailers \$33 and \$28; assistant finishers and tapers \$23.

Vacation: one week with pay to employees with at least six months' service; those with less than six months' service will be given vacation but will only be paid when they complete six months' service. Equal division of work as far as this is practicable. No homework allowed; contracting and sub-contracting only with union consent and work may only be sent to a union shop. Apprentices: one apprentice allowed to 13 experienced workers. Provision is made for the settlement of disputes.

TORONTO, ONT.—INDIVIDUAL FIRMS AND THE FUR WORKERS' UNION, LOCALS 21479, 21480, 21481.

Agreement to be in effect from April 15, 1944, to April 15, 1946, and thereafter subject

to notice. Help is to be engaged through the union. If none available, others employed must join the union. All employees must be union members in good standing.

Hours: 8 per day, Monday to Friday, a 40-hour week.

Overtime permitted only in July to December, and never after 7 p.m. Monday to Friday. Overtime and all work on Saturdays and Sundays is payable at time and one-half. Holidays: employees to be paid for eight statutory holidays, and if they work on such holidays they will be paid at time and one-half in addition to the regular pay for the day.

Weekly wage rates: cutters \$40 first class, \$35 second class; operators and finishers (male) \$30 and \$25; operators and finishers (female) \$25 and \$20; blockers and nailers \$28 and \$23; assistant finishers and tapers \$18.

Vacation: the first week in August of each year is a vacation with pay, to all employees with 4 months' service or more. Equal division of work as far as practicable. No homework allowed; no contracting or sub-contracting except with the union's consent. Apprentices: no apprentices to be taken on during 1944 and 1945; ratio of apprentices is one to every 13 experienced workers. Provision is made for the settlement of disputes.

Manufacturing: Non-metallic Minerals, Chemicals, etc.

WALLACEBURG, ONT.—DOMINION GLASS CO. LTD. AND UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 25.

This agreement covers hourly and piece rate employees, with the exception of the mould makers and the skilled glass workers in the furnace department.

Agreement to be in effect from November 17, 1944, to November 16, 1945. No discrimination or coercion by the company against any employee because of membership in the union, and the union will not intimidate or coerce employees into membership.

Hours: starting and quitting time to be left to the option of the management. Work on two holidays at double time; work on two other holidays at time and one-half. At least 3 hours' pay for an emergency call. Overtime will be distributed among those normally performing the relevant work.

Provision is made for seniority rights and grievance procedure.

Transportation and Public Utilities: Electricity and Gas

TORONTO, ONT.—CONSUMERS GAS COMPANY OF TORONTO AND INTERNATIONAL CHEMICAL WORKERS UNION, LOCAL 161.

Agreement to be in effect from December 1, 1944, to November 30, 1945, and thereafter

from year to year, subject to notice. This agreement is similar to the one previously in effect with the United Gas, Coke and Chemical Workers, as summarized in the *LABOUR GAZETTE*, July, 1943, p. 988, with certain exceptions:

There is a similar maintenance of membership clause and freedom of new employees to join or not join the union, but the agreement provides that any employees who were union members at December 1, and wished to withdraw might do so between December 1 and December 15.

The cost of living bonus is incorporated into the basic wage rates. The hourly wage rates are now 10 cents per hour higher for over half of the classes mentioned in the previous wage scale and 9 cents per hour for the others; for weekly paid employees, the rate is now \$4.60 per week higher.

Trade

MONTREAL, QUEBEC.—DOMINION STORES LTD. AND THE RETAIL CLERKS' INTERNATIONAL PROTECTIVE ASSOCIATION.

Agreement to be in effect from July 19, 1944, to July 18, 1945, and thereafter from year to

year, subject to notice. The company recognizes the union as the sole bargaining agent for all its employees. All employees must be union members.

Hours: stores close on Wednesday for half a day; total weekly hours for full time employees is 48 per week. However, time required to complete ordinary routine duties after store closed will not be considered overtime; this time not to exceed 15 minutes on Monday to Thursday inclusive, 30 minutes on Friday and one hour on Saturday. Overtime is payable at time and one-half; all work on Sundays and holidays, at double time. Rest periods of ten minutes twice a day are granted. Stores are closed for seven statutory holidays during the year. Vacation: one week with pay during the summer to employees who have been in continuous service at or before November 1 of the previous year; two weeks with pay to employees who have had one year's continuous service at or before November 1, of the previous year. Laundry: coats and aprons will be furnished and laundered by the employer.

Provision is made for seniority rights and for the settlement of grievances.

Collective Agreement Act, Quebec

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, page 86. Proceedings under this Act and earlier Legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the repeal of one agreement and the amendment of seven others, all of which are noted below. A request for a new agreement for clerks and accountants at Jonquière was published in the *Quebec Official Gazette* December 2. Requests for amendment of the barbers' and hairdressers' agreement at Quebec, and for a new party to the tannery agree-

ment at Quebec were gazetted December 9. A request for a new party to the shoe-manufacturing agreement for the province, and a request for a new agreement for employees of religious institutions at St. Hyacinthe were gazetted December 16. A request for a new agreement for the men's and boys' clothing industry in the province was gazetted December 23.

Orders in Council were also published during December approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Construction: Buildings and Structures

PLUMBERS, ETC. THREE RIVERS

An Order in Council, dated December 1, and gazetted December 9, amends the previous Orders in Council for plumbers, steamfitters, cooling system fitters, sprinkler fitters, oxygen and electric welders, tinsmith roofers and asbestos insulation mechanics (*L.G. March*, 1940, p. 283; August, 1941, p. 1011; May, 1942, p. 631, April, 1944, p. 496).

Hours: 8-hour day, 44-hour week. Overtime: All work after 6 p.m. Monday to Friday and after noon on Saturday, and all work on nine holidays is payable at time and one-half; double time for all work on Sunday. Urgent or special work which for good reasons cannot be performed during regular working hours is payable at regular rates.

Hourly wage rates including cost-of-living bonus: Contractors (personal service) \$1 in zone I, 90 cents in zone II; senior journeymen 70 cents in zone I, 60 cents in zone II; junior journeymen 55 cents in zone I, 50 cents in zone II; apprentices in zone I and II from 21 cents in first year to 41½ cents in fourth year;

labourers 47 cents in zone I, 42 cents in zone II. Not more than one apprentice to each journeyman.

BUILDING TRADES, ST. JEROME

An Order in Council, dated December 7, and gazetted December 16, amends the previous Orders-in-Council for this industry (L.G., April, 1943, p. 490, Feb., p. 220 and previous issues as therein noted), by the substitution of a new wage scale. Territorial jurisdiction comprises: zone I, the municipalities of St. Jerome, Ste. Agathe des Monts, Terrebonne, Ste. Thérèse de Blainville, Ivry sur le Lac and all contracts in the rest of the county of \$5,000 or more; zone II the rest of the county.

Watchmen (by the week: 12 hours per day)35	.35
Material checkers and time keepers (by the week)	19.00	19.00

For the municipalities of Saint-Hilaire, Saint-Hilaire est and parc Otterburn, the minimum wage rates are 5 cents per hour less than zone I.

Apprentices to be paid 25 cents per hour during first year, 30 cents during second year; 40 cents in zone I and 35 cents in zone II during third year; 45 cents in zone I and 40 cents in zone II during fourth year.

Maintenance men to be paid in zone I at least \$22 per week of 55 hours, if tradesmen, and \$19 for labourers; in zone II \$19 for tradesmen and \$16 for labourers.

BUILDING TRADES, MONTREAL

An Order in Council, dated December 14, and gazetted December 23, extends the term of the previous Orders in Council for this industry (L.G., March, 1944, p. 359, July, p. 868, November, p. 1369, December, p. 1515) to March 31, 1945.

Service: Public Administration

MUNICIPAL EMPLOYEES, ST. JOSEPH d'ALMA

An Order in Council, dated December 21, and published December 23, repeals former Orders in Council for this industry (L.G., Sept., 1940, p. 972; April, 1941, p. 473).

Service: Business and Personal

BARBERS AND HAIRDRESSERS, JOLIETTE

An Order in Council, dated December 7, and gazetted December 16, amends the previous Orders in Council for this industry (L.G., January, 1944, p. 70, September, p. 1143). Hours of labour for barbers and hairdressers are reduced to 59 per week.

Another Order in Council, dated December 21, and gazetted December 30, amends the minimum prices for services.

BARBERS AND HAIRDRESSERS, ST. HYACINTHE

An Order in Council, dated December 21, and gazetted December 30 amends the previous Orders in Council for this industry (L.G., Oct., 1941, p. 1426; Sept., 1942, p. 1098; April, 1943, p. 490, May, p. 639, Sept., p. 1253; Feb., 1944, p. 199, July, p. 868, Dec., p. 1515). Certain hours of labour are modified in some zones.

The scale of minimum prices is changed. There are new regulations governing apprenticeship.

Slaughtering and Meat Packing Industry in Canada

IN December, 1944, the Dominion Bureau of Statistics published a report covering a statistical analysis of the slaughtering and meat packing industry in Canada for the year 1943. This industry, which is among the ten most important in Canada, has shown a consistent and extensive expansion since the beginning of the war, especially from the points of view of the value of products sold and the cost of animals slaughtered and materials used.

The capital investment in the industry has nearly doubled since 1925 and from 1939 to 1943 it rose from \$68,660,761 to \$102,948,528. The number of employees increased from 12,765 in 1939 to 18,775 in 1943 and salaries

and wages paid from \$17,109,682 in 1939 to \$29,994,640 in 1943. The cost of animals slaughtered and materials used in 1939 was \$154,692,370. In 1943 it had risen to \$382,284,793. The value of products sold in 1939 was \$185,196,133 and in 1943 it was \$437,228,577.

With the exception of the Maritime provinces, where it is relatively small, the industry is fairly well distributed across Canada. However, the main concentration is in the provinces of Ontario and Quebec. The following table gives the number of salaried employees and wage earners, together with salaries and wages paid, by provinces, during 1943.

CANADIAN SLAUGHTERING AND MEAT PACKING INDUSTRY—EMPLOYMENT, SALARIES AND WAGES 1943

PROVINCE	SALARIED EMPLOYEES			WAGE EARNERS		
	No. of Male Em- ployees	No. of Female Em- ployees	Total Salaries	No. of Male wage- earners	No. of Female Wage- earners	Total Wages
Maritimes.....	69	24	176,823	196	76	290,286
Quebec.....	495	96	1,187,891	1,715	337	2,866,858
Ontario.....	958	381	3,130,040	3,766	947	7,276,522
Manitoba.....	400	243	1,373,211	2,187	670	4,180,677
Saskatchewan.....	244	170	595,240	1,084	240	2,043,283
Alberta.....	406	225	1,086,958	2,089	772	4,171,348
British Columbia.....	142	86	437,823	600	157	1,176,680
Total.....	2,714	1,225	7,988,986	11,637	3,199	22,005,654

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the upgrading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to November 30, 1944, the gross enrolment under Canadian Vocational Training has been as follows:—

Training for Industry.....	243,905
Army Tradesmen	45,811
Navy Tradesmen	8,682
R.C.A.F. Tradesmen	65,199
Rehabilitation (discharged persons from the forces).....	5,896
Students	7,254
Total	376,747

The training of workers for war industries is now on such a small scale that in most provinces there are very few changes in the number of trainees from month to month. Therefore, the statement in the *LABOUR GAZETTE* for this type of training will just show the Dominion summary in the future.

Training in full-time pre-employment classes has practically ceased in the four western provinces; the total enrolment in those provinces at the end of November stands at 14 and the similar enrolment in the Maritime Provinces at 37. Full-time plant schools are still carried on in Nova Scotia, New Brunswick, Quebec and Ontario. The great majority are now operating in the Province of Quebec in companies engaged in primary or secondary textile industry. The majority of the employees are women and are being trained for the making of uniforms and essential civilian clothing.

Rehabilitation Training

The enrolment of men and women in vocational training courses showed a substantial increase during the month of November and reached an all-time peak of 1,952. The total still falls very short of the number that it was expected some months ago would be in training by the end of 1944.

Additional buildings declared surplus to Army or Air Force requirements have been secured for rehabilitation training in some localities and are being adapted for training purposes. The work of equipping these buildings with machine tools and other items of equipment still progresses very slowly as comparatively few of the items required have as yet been declared surplus by the War Assets Corporation.

TABLE 1—PRE-EMPLOYMENT TRAINING IN VOCATIONAL SCHOOLS

		NUMBERS IN TRAINING				PLACED IN EMPLOYMENT	
		From April 1/44 to Nov. 30/44	At First of November	Enrolled in November	At End of November	From April 1/44 to Nov. 30/44	In Nov. (2)
<i> Dominion Summary </i>							
Pre-Employment.....	{Men	2,206	361	38	313	1,550	71
	{Women	975	225	33	146	728	104

	{Women	517	197	43	162		
Total.....		5,574	1,394	319	1,412	2,278	175

(1) Trainees in part-time classes consist largely of employed persons who are being given training at the request of employers in war production, who wish to up-grade their employees.

(2) Includes those graduates, who, though actually placed prior to November 30, 1944 were not so reported until after November 1, 1944.

Activities of Unemployment Insurance Commission

Statistical Analysis of Insurance Activities—Report on Joint Meeting of Employment Committees—Arrears and Special Payments to Fund—Amendments to Benefit and Contribution Regulations

THE number of applications for unemployment insurance benefit continues to increase each month, as is expected during this season of the year. Recent months have, however, shown a considerable increase in the number of claims submitted over the corresponding months of last year. During November, 11,798 claims were filed in the local offices compared with 6,222 in October and 2,896 during November, 1943.

In the last six working days of November, 13,431 persons (9,324 males and 4,107 females) signed the unemployment register compared with 8,009 (5,207 males and 2,802 females) who signed during the last week in October. Persons reporting unemployed days for the purposes of the Act must sign the unemployment register once a week, so this includes current beneficiaries as well as claimants who have not yet qualified for benefit.

Of the 8,916 claims adjudicated at insurance offices during November, 7,405 were considered entitled to benefit and 1,511 not entitled to benefit. The chief reasons for non-entitlement were: "voluntarily left employment without just cause" (783 cases); "insufficient contributions and not in insurable employment" (467 cases); and "discharged for misconduct" (55 cases).

A total of 7,114 persons were paid benefit under the Unemployment Insurance Act during November, compared with 5,735 in October and 1,297 during November last year. During the current month these 7,114 persons were paid a total of \$179,001 for 95,720 compensated unemployed days. Thus, the average amount paid per beneficiary was \$25.16; the average number of days paid per beneficiary was 13.5 and the average amount paid per compensated day of unemployment was \$1.87.

In October, the 5,735 persons were paid \$132,467 for 70,552 days, or an average of \$23.10 and 12.3 days per beneficiary, and \$1.88 per compensated day of unemployment.

During November of last year, the 1,297 beneficiaries were paid \$33,584 for 19,275 days, or an average of \$25.89 and 14.9 days per beneficiary and \$1.74 per compensated day of unemployment.

National and Regional Employment Committees Hold Joint Conference

Brief reference was made in the last issue of the *LABOUR GAZETTE* to the joint meeting held by the National Employment Committee and the Prairie Regional Employment Committee at Regina on December 1 and 2, 1944. This meeting was the twenty-third held by the National Employment Committee, but the first to take place in association with one of the five Regional Committees. Its success ensures the holding of similar conjunctive meetings in the other regions as time goes on.

The meeting opened with an address by Judge W. J. Lindal, Chairman of the Prairie Regional Employment Committee, in which he referred to the important work of advisory employment committees. Judge Lindal reminded the meeting that all employment advisory committees appointed under the Unemployment Insurance Act were representative of employees and employers, as well as of agriculture, veterans, women and sometimes social services. Committees thus constituted should be able to find facts, reach conclusions, and embody them in recommendations of real value.

Mr. R. J. Tallon, Acting Chairman of the National Employment Committee, referred to the gratifying response which people across Canada had made to appeals for their cooperation in connection with the establishment and operation of employment advisory committees. The suggestions and recommendations of those Committees were of real value inasmuch as their members were in contact with the public on the one hand, and with the personnel of the local or regional offices on the other.

Committees would probably find themselves working in a wider field with the gradual disappearance or relaxation of National Selective Service restrictions, Mr. Tallon pointed out. With this in view, it was hoped that Local, Regional, and National Committees could build themselves into a strong, effective organization to carry on now and after the war.

During the meeting, which occupied the entire day on Friday, December 1, and Saturday morning, addresses were given by Mr. T. R. Walsh, Chief Enforcement Officer, Unemployment Insurance Commission; Brigadier John Lyon, Veterans' Placement Adviser, Unemployment Insurance Commission; and Mr. H. C. Hudson, Supervisor of Special Placements, Unemployment Insurance Commission. Mr. Walsh spoke on the continuation of manpower controls in the transition and postwar period. Brigadier Lyon's address concerned the rehabilitation of men and women who have served, or are still serving, in the Armed Forces of Canada. Mr. Hudson spoke on vocational guidance and handicap placement work.

In the course of his address, Mr. Walsh suggested the probable course of events in respect to manpower controls assuming that certain conditions and precedents existed.

Following his address, the meeting was thrown open for discussion and questions, during which the view was expressed that N.S.S. regulations should be lifted as they outlived their usefulness. Members discussed one or two features of the regulations which they considered were open to some criticism. It was generally felt that the operation of an efficient Employment Service was a very important factor in the successful handling of postwar employment problems.

Brigadier Lyon reviewed the procedure which was being followed in respect to placing the returned man or woman in suitable employment. A considerable discussion developed following his speech in the course of which Brigadier Lyon indicated the special treatment which was being given and would be given to members of the Armed Forces. A general preferential treatment in placement was given to all persons who had been discharged from the Forces.

Mrs. Rex Eaton, Associate Director, National Selective Service (Women's Employment) outlined for the meeting work which had been done through Selective Service Offices in the placing of women who had been in the Military Forces. Women would be given proper attention and careful placement, and an attempt would be made to follow up placements until a permanent arrangement was made.

A number of members suggested the advisability of assisting ex-servicemen who wished to start small independent business undertakings. Some training along these lines might very well be helpful.

The change in attitude toward the physically handicapped, was referred to by Mr.

Hudson who stated that his Section was endeavouring to convince employers that handicapped persons should be accepted for their abilities, not rejected for their disabilities. What a man had lost was not the important thing, but rather what he had left.

During the discussion following his speech, the importance of having trained personnel in the Special Placements Division throughout Canada, was emphasized. Mr. Hudson informed the meeting that certain of the universities are now giving courses in vocational guidance, and some of these courses were available at night so that employees could take advantage of them.

Before adjournment, the joint meeting emphasized the importance of following up recommendations made by Committees across Canada with a view to keeping the Committees advised of any action which resulted from their deliberations.

Arrears and Special Payments Added to Fund

During the month of November the sum of \$940,000 was paid to the Unemployment Insurance Fund to cover arrears of contributions in respect of Government employees who had not been insured during the first year that the Unemployment Insurance Act was in effect. This payment to the Fund was made from the War Appropriation by the Minister of Finance under authority granted by Order in Council P.C. 56/8550 of November 8, 1944.

Contributions received during November from the Department of Veterans' Affairs in respect of persons who have served in the armed forces amounted to \$53,931.54 as compared with \$39,903.89 received in October.

Benefits paid during November, 1944, amounted to \$178,138.04 as compared with \$131,706.91 for the previous month. The net increase to the Fund during November was \$9,424,153.82.

Unemployment Insurance Regulations Amended

Amendments to the unemployment insurance benefit and contribution regulations were announced by the Unemployment Insurance Commission during the autumn. These were formally ratified by Orders in Council promulgated on November 24, 1944. Essential portions of the Orders may be found on page 102 of this issue of the LABOUR GAZETTE.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed

that as at December 31, 1944, 2,947,990 employees had paid contributions to the fund since April 1, 1944, an increase of 51,159 since November 30, 1944, and 742,234 since the commencement of the current fiscal year.

As at December 31, 1944, 142,390 employers were registered as having insurable employees, an increase of 818 from November 30, 1944.

Registrations as at December 31, 1944, by regions follow:

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month give the following information concerning employment and unemployment across Canada.

The employment situation at the beginning of November as reported by employers. Moderate increases in employment and payrolls were indicated at November 1, as reported to the Dominion Bureau of Statistics by employers. The employment index rose slightly from that of the previous month, but was below that of November, 1943.

The index number of employment (based on the 1926 average as 100) was 183·8 as compared with 183·3 at October 1, 1944, and 188·7 at November 1, 1943.

The average weekly wage per employee was \$32.29, 7 cents lower than at the beginning of October, and 70 cents higher than at November 1, 1943.

The Bureau's reports come from firms employing fifteen or more employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. Reports for November were received from 14,983 establishments with staffs aggregating 1,867,673 men and women.

Unemployment during November as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit increased substantially. During November, 11,798 claims were filed as compared with 6,222 during October. These figures are well above the total 2,896 claims filed during November, 1943, but below last February's maximum of 12,284.

Employment Placements during November.—An increase in placements was reported by the Employment and Selective Service

Offices of the Unemployment Insurance Commission.

Reports received from the Offices during the four-week period November 3 to November 30, 1944, showed gains in the average number of placements made daily both when compared with the previous period of five weeks duration and with the five weeks October 29 to December 2, 1943. Forestry and logging were responsible for the gains under both comparisons, the other noteworthy changes being an appreciable increase in trade as compared with the five weeks September 29 to November 2, 1944, and a decrease in manufacturing when compared with the five weeks ending December 2, a year ago. During the period under review there were 205,131 vacancies reported, 229,290 applications for employment and 156,438 placements effected in regular and casual employment.

Unemployment in trade unions.—At the beginning of October the percentage of unemployment among trade unions was 0·3. This figure was identical with that shown both at the beginning of July, at which date the percentage was indicated as for the June quarter, and at the beginning of October, 1943. The October figure was based on returns received from 2,377 labour organizations having a total membership of 416,664 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution at June 1, 1944, has been made by the Research and Statistics Branch of the Department of Labour. At that date it is estimated that 4,232,000 persons, 14 years of age and over, were gainfully occupied, of whom 2,232,000 were in non-agricultural industry, including 975,000 in war industry. In addition, there were 784,000 persons in the Armed Forces.

The Employment Situation at the Beginning of November, 1944, as Reported by Employers

MODERATE increases in employment and payrolls were indicated at the first of November, when the 14,983 firms co-operating in the Dominion Bureau of Statistics' monthly survey reported the addition of 5,389 persons to their staffs, which aggregated 1,867,673. The weekly salaries and wages disbursed at Novem-

ber 1 by these establishments amounted to \$60,300,839; as compared with the sum of \$60,258,445 paid on or about October 1, there was an advance of 0·1 per cent. The contents of the average pay envelope of the men and women in recorded employment, however, fell from \$32.36 paid in the preceding period of

observation, to \$32.29 at the beginning of November.

An upward movement in industrial employment at November 1 is contra-seasonal, according to the experience of pre-war years. Beginning with 1939, however, there have been annual increases in employment at that date; the latest gain is smaller than at the first of any other November during the war.

The expansion at the date under review took place in the non-manufacturing industries, there being considerable curtailment in manufacturing, mainly in the vegetable foods, iron and steel, non-ferrous metal and lumber divisions. This is the seventh monthly decline in manufacturing as a whole since the beginning of 1944. Among the non-manufacturing industries, logging showed substantially greater seasonal activity, some 17,600 men having been taken on by the co-operating camps, in which the advance exceeded the average for the time of year. Building and trade also afforded more employment. In the latter, the reported gain

of over 4,900 persons was larger than normal for November 1; this was no doubt partly due to the employment of unusually large numbers of part-time workers. On the other hand, mining, communications, transportation, highway and railway construction and maintenance and services indicated reduced activity, the losses being seasonal.

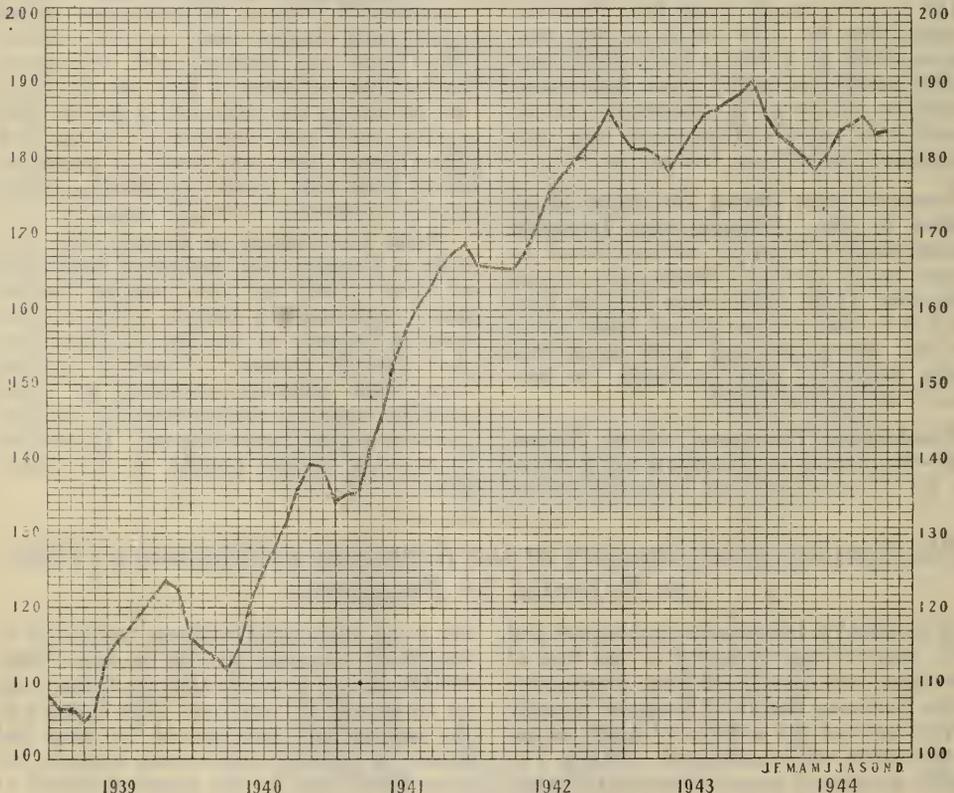

Based on the 1926 average as 100, the general index number of employment at the beginning of November was 183.8, as compared with 183.3 at October 1, 1944, and 188.7 at November 1, 1943. The decrease of 2.6 per cent in the latter comparison was accompanied by a fractional reduction in the index number of payrolls. The seasonally-adjusted index number of employment rose from 174.4 in the preceding month to 175.9 at the beginning of November.

Payrolls

As already stated, the firms whose returns were tabulated reported the payment of \$60,-

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

300,839 in salaries and wages at November 1, a sum which exceeded by 0.1 per cent the amounts they had disbursed at the beginning of October. The per capita weekly earnings averaged \$32.36 at October 1 and \$32.29 at November 1, 1944, being then higher than the November 1, 1943, average of \$31.60; the figures at November 1, 1942 and 1941, had been \$29.81 and \$27.02, respectively.

If the statistics for financial institutions are included, the latest survey of employment and payrolls shows that the number of persons in recorded employment was 1,934,218, as compared with 1,928,796 at the beginning of October. The amounts received as weekly salaries and wages by these persons were stated as \$62,459,770 paid on or about November 1, and \$62,414,138 paid on or about October 1.

The average earnings per person in the nine industries, including finance were also \$32.29; this was seven cents lower than the per capita figure indicated at the beginning of October. At November 1, 1943, the average in the nine leading industrial groups was \$31.59, while in 1942, the November 1 figure was \$29.85.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the 20 leading industrial cities, and gives comparisons as at October 1, 1944, and November 1, 1943, where these are available.

The indexes of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the index numbers of employment have been

converted from their original base 1926=100 to June 1, 1941, as 100. Table I shows that, in the period for which data are available, there has been an increase of 20.4 per cent in the number of persons in recorded employment in the eight leading industrial groups while the weekly earnings of these persons have risen

by fifty-one per cent. Including finance, the gain in employment from June 1, 1941, to November 1, 1944, has amounted to 20 per cent, and that in payrolls, to 49.9 per cent. The reasons previously given for the relatively greater rise in the salaries and wages than in employment may again be stated: (1) the con-

TABLE II—EMPLOYMENT AND EARNINGS

Number of Persons Employed at November 1, 1944, by the Co-operating Establishments and Aggregate and Per Capita Weekly Earnings of Such Employees, Together with Index Numbers of Employment and Payrolls as at November 1 and October 1, 1944, with Comparative Figures for November 1, 1943 Where Available, Based on June 1, 1941, as 100 p.c.

(The latest figures are subject to revision.)

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

centration of workers in the heavy manufacturing industries, where rates of pay are above the average, and in which there has been a considerable amount of overtime work; (2) the payment of cost-of-living allowances to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates from February 15, 1944; (3) the progressive up-grading of employees as they gain experience; and, (4) the granting of higher wage rates in numerous cases.

The expansion of employment and payrolls in manufacturing in the period of observation has for obvious reasons been on a much greater scale than that in the non-manufacturing industries, the index of employment in factories having risen by 31.7 per cent from June 1, 1941, and that of payrolls by 68.1 per cent; these proportions considerably exceed those

elsewhere given for the eight leading industries. The factors given above as influencing the all-industries' statistics operate with greater force in the case of manufacturing.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is also obviously an extremely important factor.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Sex Distribution of Persons in Recorded Employment at October 1, 1944

THE proportion of women as compared with men in employment in Canada has been increasing according to a survey undertaken last October by the Dominion Bureau of Statistics.* As in previous surveys of sex distribution of persons in recorded employment (L.G., 1944, p. 89) the Bureau obtained the information from firms co-operating in the monthly survey of employment and payrolls for October 1, 1944.

Coverage of Industry.—The monthly surveys include important proportions of the total number of persons employed in the following industries: manufacturing, logging, mining, communications, transportation, construction, services, trade and finance. In the main, however, returns are limited to establishments having 15 employees and over. The more important groups excluded are the following: agriculture, domestic and personal services, and professional services such as governmental, educational, health, etc.

Situation at October 1, 1944.—Firms in the nine leading industrial groups reported the employment of 1,406,132 men and 521,979 women, the latter constituting 271 per thousand of the total staff of 1,928,111. At April 1, 1944, 1,374,747 male and 507,575 female workers had been reported, the proportion of women per thousand of both sexes being 270. During that six-month period some changes took place in the list of co-operating establishments. When allowance is made for these changes, it appears there have been increases of about 20,600 men and 9,500 women in the numbers in recorded employment. In spite of the fact that industrial activity ordinarily increases as the year advances, it is of interest to note that in the six-month period under review there was a gain of some 1.9 per cent in the number of women employed by the firms furnishing statistics, as compared with that of about 1.5 per cent in their male workers.

The comparison of the data at October 1, 1944 and October 1, 1943, by eliminating the seasonal factor, provides a more valid measure of the changes which took place. At the beginning of October, 1943, 1,439,416 men and 510,715 women, were reported by the establishments furnishing information, there being 262 females per thousand of both sexes. When adjustment has been made for changes in the list of reporting firms during the year it may

be estimated that the number of females in the nine leading industrial divisions had risen at October 1, 1944, by approximately 1.2 per cent, while the number of male employees had fallen by 3.3 per cent in the twelve months. The general decline in recorded employment in these industries was 2.1 per cent.

The proportion of 271 women per thousand employees at October 1, 1944, was considerably higher than that of 262 per thousand a year earlier, there being a gain of 3.4 per cent in this comparison. As compared with the October 1, 1942, ratio of 235 per thousand there was an increase of 15.3 per cent.

Table I provides a summary of the statistics reported at October 1, and gives the proportions of male and female workers indicated at October 1, 1944, and the percentages at October 1, 1943 and at October 1, 1942, by provinces, by leading cities, and by main industrial groups.

Of the total of 521,979 women in recorded employment at October 1, 1944, in the nine leading industrial divisions, 332,180 or 63.6 per cent were reported by manufacturers, including those in central electric stations; the October 1, 1943, proportion had been 66 per cent. The next largest group of female employees were those of 88,732 in trade, 35,854 in finance and 27,659 in services. The remaining industrial divisions, namely, communications, transportation, construction, mining and logging, together employed 37,554 women workers, or only 7.2 per cent of the total at the beginning of October, 1944. This proportion was slightly greater than that of 6.7 per cent at October 1, 1943. It is worthy of note that while there was a falling off in the number engaged in manufacturing in the year, the non-manufacturing classes, with the exception of logging and construction, showed increases in this comparison.

Women Workers in Industry.—The 8,288 manufacturers furnishing statistics at October 1, 1944, indicated a staff of 840,306 men and 332,180 women, the latter constituting 283 per thousand of the personnel of 1,172,486. This ratio exceeded that of 279 per thousand at October 1, 1943. The textile industries provided work for 80,384 women, or some 24 per cent of all those engaged in manufacturing at October 1, 1944. The second largest group of women workers (71,126) belonged in the iron and steel industries, in which were employed over 21 per cent of the total in manufacturing. The greatest numbers of females in the iron and steel division belonged in aircraft and firearms manufacturing. In

**Sex Distribution of Persons in Recorded Employment at October 1, 1944.*—Supplement to October 1, 1944, Bulletin on *Employment and Payrolls*, Dominion Bureau of Statistics. Price 25 cents.

these industries however, there was a decline in the number and in the proportion of women as compared with October 1, 1943.

Between 22 and 23 per cent of the total number of women reported at October 1, 1944, belonged in the heavy manufacturing industries, a ratio which was smaller than that of over 25 per cent, six months earlier. Among the male employees, there was a decline in the proportion engaged in these industries from about 38 per cent of the total at April 1, to 36 per cent at October 1, 1944.

Provincially, the greatest increases in the number of female employees between April 1 and October 1, 1944, took place in Ontario and British Columbia. In both cases, they constituted higher proportions per thousand workers of both sexes than at the time of any earlier survey. There was a slight decrease in the number and ratio in Quebec. However, that province, with Ontario, again reported important percentages of the total women in recorded employment, 30.5 per cent

TABLE I.—SEX DISTRIBUTION OF THE WORKERS IN RECORDED EMPLOYMENT IN THE PROVINCES, THE LEADING INDUSTRIAL CITIES, AND THE MAIN INDUSTRIAL GROUPS, AS AT OCT. 1, 1944, OCT. 1, 1943 AND OCT. 1, 1942

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries with the exception of electric light and power.

of the Canadian aggregate belonging in the former and 47 per cent in the latter.

Wartime Trends of Employment in Manufacturing.—Without exception, there were highly important increases in the number and proportions of female workers in the various industries between 1939 and October 1, 1944. Extremely marked expansion was indicated in the aircraft industry, where the ratio rose from 30 per thousand of both sexes in 1939 to 291 at October 1, 1944, and the number of females increased by approximately 129 per cent. In shipbuilding, the increase was from 14 per thousand in 1939 to 68 at October 1, 1944. At the latter date, as in 1939, the tobacco and textile industries reported the highest proportions of female workers. The growth in the proportion of women in the last two industries during the war, however, was not as great as in many other lines.

As in previous surveys conducted by the Bureau of Statistics, the largest proportions of female employees were found in services (582 per thousand); communications (555 per thousand); finance (539 per thousand); trade (493 per thousand); and manufacturing (283 per thousand). These five groups together

accounted for some 96 per cent of the total number of women in recorded employment at the beginning of October, 1944.

The non-manufacturing industries provided work for over 36 per cent of all females in recorded employment at October 1, 1944, at which time they constituted 251 per thousand of the workers of both sexes. The ratio twelve months earlier had been practically 234 per thousand.

Table II depicts the wartime trends among women engaged in manufacturing and the results of the current surveys for October 1 in 1942, 1943 and 1944. The average ratio of female as compared with male employees in 1942 was 257 per thousand. At October 1, 1942 the females in recorded employment made up 260 per thousand workers. It is probable that the employment of women ordinarily reaches its peak in the autumn, thus accounting for the difference between the annual average figure for 1942 and that at October 1, in the same year. The ratio of females per thousand workers continued to rise in 1943, the October 1, figure being 282 per thousand, while that at October 1, 1944, showed a further gain to 286 per thousand.

¹ Electric Light and Power not included.

² Data of the Census of Industry annual average.

Report on Employment Conditions, December, 1944

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE overall manpower shortage was reduced by 16,656 during the last month of 1944 and at the year-end stood at 103,601. This is the lowest level of net labour demand¹ since National Selective Service Civilian Regulations went into effect in January, 1943. Unsatisfied labour requirements at December 28, 1944, were lower by almost 78,000 than at June 15, the peak date for the year 1944, when demand rose to 181,352. As compared with the labour requirements reported one month previously, demand for male workers at the end of December (73,591) was smaller by 16,166 or 18 per cent. There was very little change in female labour requirements during the month, 30,010 women being required at the end of December as compared with 30,500 one month earlier.

Net Labour Demand in A and B Priority Industries

High priority industries were still calling for 61,594 more men and 16,956 more women at the close of 1944. The percentage distribution of the demand for workers in high priority industries by sex and by broad industry groups as reported to Employment and Selective Service Offices, follows:

Net Labour Demand in A and B Priority Industries as at December 28, 1944.

Total A and B Priority Industries	Male	Female	Total
Industries	100.0	100.0	100.0
Logging	44.5	.2	34.9
Mining, Smelting and Refining	9.0	1.4	7.3
Manufacturing	25.1	56.1	31.8
Construction	4.1	.2	3.3
Transportation	7.9	1.3	6.5
Other Public Utilities	1.1	2.5	1.4
Public and Professional Service	3.2	11.5	5.0
Trade, Finance and Other Service	3.8	25.9	8.6
Agriculture	1.3	.9	1.2

¹ Net Labour Demand is calculated by deducting unconfirmed referrals from unfilled vacancies. Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated. A vacancy is considered unfilled until it is cancelled or until the employer notifies the employment office that

MANUFACTURING

Extensive lay-offs at many large plants have made considerable changes in the general employment picture during the past month. These anticipated lay-offs were carried out according to schedule and were due in most cases to the termination of war contracts and the necessity for the reconversion of plants to meet the expanding demand for new types of military requirements. Highly skilled hands were readily absorbed by other plants but the release of great numbers of light factory labourers has created new employment problems.

Thirty-two per cent of the total labour shortage in high priority industries at December 28, was reported by essential manufacturing, which still required 15,458 men and 9,513 women. Four weeks previously, 19,211 men and 8,413 women were needed. Thus, while the demand for male workers in essential manufacturing was smaller by 3,753, there was need for 1,100 more females at December 28 than were required one month previously. The manufacturing industries listed in the following table accounted for 86 per cent of the labour requirements of essential manufacturing at December 28.

Net Labour Demand in Selected A and B Priority Industries as at December 28, 1944

	Male	Female	Total
Textiles and Products	1,577	4,246	5,823
Machinery and Equipment	2,169	492	2,661
Chemicals and Non-Metallics	1,219	1,337	2,556
Wood Products	2,237	125	2,362
Guns and Ammunition	1,417	922	2,339
Food Processing	1,154	895	2,049
Shipbuilding and Repairs	1,800	43	1,843
Secondary Metal Industries	1,561	241	1,802

Textiles and Products—The textile industry is in a much more favourable position than it has been for some time although the mills are still in need of experienced help. The labour situation in the clothing industry remains tight with almost unlimited orders for experienced sewing machine operators, pressers, etc. Training schools have been opened but enrolment has not come up to expectations as the comparatively low wage rates offered have not proved very attractive.

The labour shortage in high priority textile plants is largely in the Quebec and Ontario

it has been filled by the placement of a referred applicant. Unconfirmed Referrals are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

Regions. Of a Dominion-wide need for 4,246 women workers in this industry at the year-end, Ontario was asking for 2,066 and Quebec for 1,929 women, 49 and 45 per cent respectively of the total female demand. Virtually all of the male demand of 1,577 was equally divided between these two regions.

Machinery and Equipment.—Plants turning out railway equipment were in need of 516 men at December 28, and in addition, a shortage of 441 males was reported by manufacturers of agricultural machinery and tractors. Demand for labour in these two industries comprised 56 per cent of the male labour shortage in machinery and equipment (excluding electrical) as at the end of December. There were 337 persons (214 of them women) needed in the manufacture of electrical communication equipment; seventy-two per cent of the total labour shortage in this industry was in the Ontario Region. Net labour demand in firms turning out electrical machinery for industrial use totalled 309 at the end of December, with 223 of the 243 males being required for Ontario plants.

Chemicals and Non-Metallics.—Seventy-eight per cent of the demand for 2,556 workers at the end of December in plants turning out chemicals and non-metallics was in the Ontario Region. Of the 1,337 female workers needed, 1,088 were being sought by manufacturers of industrial chemicals in Ontario; this was an increase of 531 during the month. Demand for males in this industry remained steady during December amounting to 410 at the end of the month.

Wood Products.—The need for men for saw-mill work comprised 84 per cent of the labour shortage in the wood products industries at the end of 1944. The situation remains unchanged in the newsprint, paper and pulp mills. Some of the mills, principally in the Lake St. John District of Quebec, have operated on a four or five-day week basis owing to shortages of raw material.

Guns and Ammunition.—Total labour requirements at December 28 were little changed from demand four weeks earlier. There was a drop of 364 in male demand (from 1,781 to 1,417) but this was more than counter-balanced by a rise of 421 in female labour requirements (from 501 to 922). On the whole, no serious difficulty has been encountered in meeting labour requirements in this industry.

Shipbuilding.—Although there was a decrease of 256 in labour demand in shipbuilding during December, the shortage of 1,843 at the end of the year was still serious. Place-

ments in this industry have been difficult owing to the lack of skilled labour, particularly sheet metal workers, electricians and pipe fitters.

Secondary Metals.—The need for workers in the secondary metal industries grew smaller by 563 or 24 per cent during December to amount to 1,802 at the close of the year. Within the group, the chief pockets of male labour shortage were in the manufacturing of iron and steel foundry products (336) and heating apparatus (256). The bulk of the demand in these two industries was reported by the Ontario Region. Efforts to bring workers from the Prairies to supply the requirements of the malleable iron industries in Ontario have been quite successful.

Rubber.—Measures are being taken to speed-up the manufacture of tires for military purposes and this will probably affect the labour situation in the rubber industry, particularly in Ontario and Quebec. It is not expected that the labour requirements of this industry will be entirely met until spring when the condition of the highways will allow transportation to the plants by bus and automobile.

LOGGING

The usual lull in logging operations during the Christmas holiday season is apparent, the manpower requirements of high priority logging as reported to the employment offices at December 28 being 10 per cent smaller than demand one month previously. Of the total of 27,403 men required at the year-end, 16,014 were needed in pulpwood logging, 9,226 in lumber logging and 2,163 in other types of logging. More than 70 per cent of the labour shortage in pulpwood logging was reported by two regions, Quebec and the Prairies, with respective requirements of 7,234 and 4,105.

MINING, SMELTING AND REFINING

High priority mining, smelting and refining establishments were in need of 5,520 men at the end of 1944. There were 1,493 required in the coal mining industry alone. Coal mines in the Maritime region were seeking to augment their labour force with 706 additional men, and in the Prairie region there was a shortage of 619. Sudbury nickel mines were short of 1,526 men at the year-end, and a considerable number were being brought in on clearance from Quebec and the Prairies. There was little change during December in the demand for labour in the iron and steel industry. Male demand stood at 931, with 801 men needed in

Ontario blast furnaces, steel works and rolling mills.

CONSTRUCTION

Winter weather and in some cases shortage of materials were responsible for the slackening of construction activity and as a result the overall decline in demand for labour in high priority construction continued throughout December. Demand fell from 3,446 at November 30 to 2,555 at December 28. In the Maritimes, 163 men were required for the construction and maintenance of aerodromes and highways, and 146 for cantonment construction. Although highly skilled labour is still in great demand the military hospitals projects have progressed to a point where some skilled hands are being released and will be available for other programs of lesser importance.

TRANSPORTATION

The labour situation with respect to transportation showed a general improvement during the month of December. Demand for male workers across the Dominion fell by 1,305 or 21 per cent. In steam railways (including express) the number of men needed at the end of December (3,135) was smaller by 765 than at November 30; in addition, there were 405 fewer male workers needed in water transportation with the year-end requirements standing at 363. The labour needs of transportation eased during December in all regions except Quebec, where severe snowstorms complicated matters. Transportation facilities were taxed to capacity and additional trainmen and extra road gangs were taken on at several divisional points. Elsewhere little difficulty was experienced in meeting labour requirements.

TRADE, FINANCE AND SERVICE

The shortage of help in high priority trade, finance and service industries amounted to 10,675 at December 28, little changed from the situation at the end of November when 10,432 persons were needed. Of the total requirements at the year-end, almost 60 per cent represented

demand for women. Nearly all the extra help required for the Christmas trade was supplied by students and teachers who were hired directly, as National Selective Service regulations were waived for this type of employment. In the various types of retail trade the labour shortage at December 28 was 1,240 (835 men and 405 women); in wholesale trade 464 men and 337 women were being sought for immediate employment. In public service there were 1,589 men and 619 women required at the end of December. Hospitals required an additional 1,027 persons (236 men and 791 women) and other types of professional service 666 persons. All five regions showed increases during December in the number of women required in hotels and restaurants with total female demand rising from 2,264 to 2,771. The percentage distribution of female labour demand in hotels and restaurants as at December 28, follows: Ontario 33, Prairies 28, Quebec 17, Maritimes 15, Pacific 7.

Employment of Women

Although quite a number of women and girls are available on account of lay-offs from war plants, the service trades generally are not benefitting as much as might be expected. Many women, particularly married women, are not looking for other jobs until after the holiday season. Some claimants for Unemployment Insurance benefits have accepted temporary work during the Christmas rush, especially in areas where there is a possibility of war plants re-engaging female labour.

While the employment situation with regard to hospitals has improved considerably, there is still cause for grave concern over the shortage of help, particularly in sanatoria and mental hospitals, and very few suitable applicants are responding to the appeal for experienced help.

In the West there is a considerable surplus of stenographers and clerical workers and where there are vacancies, employers are demanding experienced workers. These types of workers are badly needed in Ontario and Quebec.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended December 22, 1944.

Maritime Region

Agriculture—The grading and shipping of fruit and potatoes, which followed the successful harvesting of field crops, marked

the conclusion of the season. Mild weather enabled the farmers to increase their fall ploughing acreage and many have gone to the woods for the winter months.

Logging—At the beginning of the month it was estimated that another 5,000 bushmen would be required to fill all outstanding orders of the logging industry, but even with this deficiency the manpower supply on the whole was considered fairly satisfactory. Permits to

canvass for woodsmen were granted by local offices in New Brunswick and Nova Scotia and the canvassers met with considerable success during the early part of December.

Throughout the region, many men are leaving the lumber camps to return home for Christmas and numbers of others who will go to bushwork are postponing their departure until after the holiday season. Production has lessened in consequence but it is expected that activity will increase with colder weather in the new year.

Fishing—The smelt fishermen have begun operations and the catch is reported as fair. One large plant in the vicinity of Bathurst has procured a sufficiently large harvest to keep 200 men busy during the winter months.

Mining—Production in the collieries is being maintained without any tie-up, although there is a continual shortage of certificated miners. Mines in the Amherst area are carrying on with about 85 per cent of the required staff, while in the neighbourhood of New Glasgow some 55 miners and 23 workers are needed. Placements, while satisfactory, are largely offset by releases granted on medical grounds.

In the Saint John district the lime quarries are calling for additional labourers, but the scarcity of housing accommodation makes it difficult to procure these helpers.

Manufacturing—Lay-offs of some proportions have been occurring in the region's manufacturing plants. Some 200 men and women have been released from the Canadian Car and Foundry's plant at Amherst: approximately 25 of the men have been absorbed elsewhere but none of the women, and while some of the latter can be placed through clearance, this will not occur until after the Christmas season.

At Bridgewater, the lay-off from the Foundation Maritime shipyards has been completed, with 490 men and 29 women affected. The Industrial Shipping Company, also of Bridgewater, has released 40 Newfoundlanders whose contracts had expired, and at present only a few labourers are needed. The shipyards at Springhill, having completed their contract, have paid off about 40 of their employees, about 20 of whom will be re-engaged for woods work by the same firm.

Bruce Stuart and Company of Charlotte-town have reduced their working staff from about 250 to 125, and those remaining on duty are engaged chiefly on gas engines for fishing boats and other private jobs.

The approach of the holiday season has made it difficult for short-staffed maritime industries to procure extra labour. The

Halifax office reports that very few referrals have been made on clearance orders for the local shipyards. Dehydration and processing plants in the Acadia valley, operating 24 hours a day, are short of workers. Fertilizers and lime plants in the Saint John area are calling for suitable labour and there is also a considerable shortage of staff in the city's foundries, iron works, etc.

Construction—The industry's demands on the regional labour force continue to decline. There will be no new building projects of any importance launched before spring and in the meantime many construction tradesmen have been absorbed into the logging camps or factories of the Maritimes. Military hospital building at Halifax and the wartime housing project in Saint John are making satisfactory progress, and some labour is still in demand for these programs.

Quebec Region

Agriculture—Farming activity in the province is at an end for the season but the number of farmers leaving the land for employment in other essential industry has been halted by the approach of the Christmas holidays.

Logging—The labour situation of the industry has been greatly affected by the fact that not only are there few applicants at this season, but many loggers are leaving the camps to return home for Christmas and the New Year, and will not be returning until the early part of January.

The Sherbrooke office reports a marked increase in recruiting for bushworkers, with some 50 permits to canvass issued recently. Similar activity is observed in other parts of the region, and the Montreal office reports that recruiting is proceeding at a level which should procure some 250 men during December.

Another 1,000 loggers could be used in the Chicoutimi area, in addition to the 4,000 now in the camps. Matane, also, reports about 1,200 vacancies, Levis has 400 orders and Port Alfred still needs 580 choppers. St. Joseph d'Alma is endeavouring to secure 200 to 300 men for one large company and Val d'Or could use another 600. The majority of local offices predict a satisfactory influx of bush workers in January, as work in other industries is not so plentiful as a year ago.

Mining—Little appreciable change is noted in the manpower situation of the Quebec mines. The labour demands of the gold operations in the Rouyn area are negligible at present, but the base metal mines of the area need more than 600 miners of all kinds,

as well as another 60 diamond drillers and the same number of helpers for developing and prospecting work in the neighbourhood. Although the gold mines in the Val d'Or section are still calling for labour, there has been some lessening of the demand during the past several months.

Manufacturing—The labour demands of the industry continue to decline and lay-offs are still in progress, though on a lessening scale. The Montreal office reports that to date 3,500 aircraft workers have been released from the Fairchild, Canadian Vickers and Noorduyn factories, and the United Shipyards have completed a lay-off of some 761 men. Between December 4 and December 19, 440 women were laid off from various Montreal plants, chiefly small arms munitions and radio factories.

Mass shipbuilding lay-offs are at an end in the vicinity of Quebec, and the shipyards at Levis will carry on throughout the winter with their present staff, having closed down temporarily from December 23 to January 8, when machinery repairs were being carried out. The Quebec arsenals, too, have ceased staff reductions and the recent placing of new contracts indicates that present workers will be retained indefinitely.

Lay-offs from the various plants of the Aluminum Company of Canada are continuing, with the result that unemployment insurance benefit claims in the Chicoutimi, Jonquiere and Port Alfred offices now total 1,000, and at Shawinigan Falls some 900 people are now drawing such benefits. It is expected that a considerable number of the men affected will go to the bush, or to Ontario war plants, after the Christmas holidays.

Textile plants and kindred industries are insistent in their demand for extra staff. Drummondville and Granby, Magog and Valleyfield share in a dearth of both experienced and unskilled workers. St. Jerome factories have still large unfilled orders on file for female helpers, and the Richmond office reports that textile and footwear plants are very short of labour.

Construction—While skilled building tradesmen can always be absorbed, activity is diminishing throughout the region, as projects under way reach completion. Montreal and Sherbrooke alone report an extensive demand for building labour, sharing in the need for extra bricklayers and carpenters, plumbers and electricians.

Ontario Region

Agriculture—Except for continual demand for experienced dairy hands, the agricultural in-

dustry has no present need for workers, and there are still a number of farmers applying for seasonal permits to enter other industries.

Logging—In Ontario, as in other parts of the Dominion, the annual Christmas exodus from the logging camps is reducing production substantially, but on the whole the labour situation is more satisfactory than it was last year. The Hawkesbury office reports that its extensive orders are being filled gradually, but Perth has been disappointed in the number of agriculturalists applying for bushwork. Pembroke has orders on file for some 482 bushmen and Bracebridge could handle another 250 satisfactorily. Sturgeon Falls and Timmins are calling for reinforcements after the Yuletide season, and Kirkland Lake has orders for 250 log and pulpwood cutters. Sault Ste. Marie, too, reports many vacancies and one new company commencing operations in the Batchawana area requires 100 bushworkers.

Gold Mining—There is little change in the labour situation of the understaffed mines. Kirkland Lake operations could use 200 experienced gold miners and another 200 beginners, and the Timmins office reports a decrease of 250 mine workers during the past six months. In the latter district, operations are carrying on with 60 per cent of the requisite manpower and production is down approximately 50 per cent in consequence.

Manufacturing—There has been a general easing of the demands of the industry, attributable to the influx of farmers for seasonal employment as well as to cutbacks in contracts and the resultant lay-offs. Heavy labour is still required in many sections, but the most pressing need is now for additional men and women to help carry out the Government's vital shell production program. Quite a number of the 100 employees recently released by Reliance Industries, Limited, of Belleville, have been referred to a local munitions plant, and the women's division of the Toronto office is giving foremost attention to very urgent demands for shell fillers. Wallaceburg, Fergus and New Toronto plants share in this pressing need for skilled and unskilled munitions workers.

The launching of a new craft by the Collingwood shipyards has resulted in a call for workmen for the completion of the vessel, and orders for electricians have been placed in clearance. Brantford's aircraft plant is asking for skilled and semi-skilled woodworkers, and the local manufacturers of agricultural implements are also in the market for additional staff, but the foundries of the city are decreasing the number of orders, except for toolmakers and skilled machinists.

Textile plants and kindred industries throughout Ontario are persistent in their call for workers, who are available only in limited number. Plants in Lindsay and Orangeville are especially exigent in this regard.

Lay-offs of some proportions have occurred during the month. Staggered staff reductions at the London factory of Kelvinator of Canada and Leavens Brothers (Training), Limited, are proceeding satisfactorily and no difficulty has been encountered in placing those affected in other employment. In Windsor curtailments of manufacturing activities are resulting in many plant lay-offs, including 135 men from Border Cities Industries, 89 from Chrysler Corporation and 32 from Brunner Mond Limited. The majority of Windsor's large plants are closing for three days during the Christmas season.

In Hamilton, Wallace Barnes Company Limited has laid off 190 women, most of whom have gone to other jobs, have returned to their western homes, or are not seeking other employment.

Seasonal cessation of production has resulted in several reductions of staff. At Wallaceburg the sugar refinery has released some 200 or 300 workers, most of whom have returned to neighbouring farms. Approximately 100 to 125 men have been retained to change over machinery for the later raw sugar manufacturing run.

Construction—While there is a continuous call for general labourers, building activity is confined for the most part to small scale projects, houses and repairs.

Transportation—Demands on the labour force continue to decrease. Trucking companies and bus lines are fairly well supplied with drivers and calls for railway maintenance workers have greatly diminished. The close of navigation has released the crews of lake boats for work in other essential industries, but the majority of these Great Lake seamen are enjoying a brief holiday before accepting other employment.

Prairie Region

Agriculture—Requests for assistants at this season are confined to orders for choremens and married couples for year-round employment, and few of these are available. There has been a marked diminution in the number of agriculturists leaving the farm for off-season work, and few placements are likely until after the holiday season.

Logging—The demand for labour continues to be heavy in all parts of the region, but more noticeably in the Lakehead area. While the influx of farmers has lessened appreciably as the season advanced, it is noted that with

the close of navigation there has been a considerable movement of Great Lake seamen to the woods. A fairly heavy seasonal movement from the camps is anticipated as Christmas approaches, but it is expected that the majority of those leaving will return after the turn of the year.

The consensus of local office opinion indicates that more men are interested in bush work than for some time past, and while a continuing shortage exists in some areas, on the whole, orders are being fairly well met. The Port Arthur office reports that current requirements stand at 2,000 pulp cutters and general bush labourers, for whom there is immediate need. These orders have been cleared through Manitoba and Saskatchewan and the first Ontario zone. Immediate requirements in the Fort Frances area total 250 lumbermen. A further 150 can be placed before the beginning of the year, and an additional 100 are needed for pulpwood cutting. Kenora has outstanding orders for several hundred bushmen.

Logging operators at Simonhouse, in The Pas area, have been supplied with some 60 men out of an initial order for 150, but at least another 50 are needed to complete the crew. A Cormorant lumber company, too, is calling for 50 more bushworkers, and could use 70 to 100 if obtainable.

Fishing and Trapping—Activities are proceeding normally, but the movement of the catch to the market has been retarded in some areas by the mild weather and consequent lack of snow. Arrangements are being made to recruit northern trappers for off-season work in the woods industries immediately after the New Year. An effort will be made to place these men as close to their trapping grounds as possible, in order to facilitate their return for the spring muskrat season in March.

Coal Mining—Certificated miners can always be utilized, but on the whole the prairie collieries are reasonably well supplied with labour. While Drummond, Edmonton and Red Deer operators are continually calling for experienced miners, the Blairmore office reports that as a result of discussions with the mines inspector and various coal companies, certificates are to be issued to men on payrolls in the district and promotions made in each mine to meet the demand for certificated miners.

Gold Mining—Slight improvement is apparent in the manpower situation throughout the region. Two gold mines in the Port Arthur area have recently been forced to close their mills in order to concentrate on underground developments, but the majority of the mill workers are not up to underground labour re-

quirements and have had to seek other employment.

Manufacturing—No new development of note has taken place in the industry during the past month. The textile trades and kindred industries are making the most immediate demand for labour and fur factories in Selkirk and Winnipeg are also calling for a number of workers. Very few vacancies exist in the aircraft and shell plants of Fort William and there is little activity in aircraft or shipbuilding operations at Port Arthur.

The Moose Jaw and Winnipeg offices are unable to satisfy the demand for heavy labour, but the region's packing plants on the whole are well supplied. Light labour is increasingly difficult to place, but skilled tradesmen are in demand, especially in trades calling for long training or apprenticeship.

Most of the male workers laid off from the aircraft parts department of the Port Arthur Shipbuilding Company have been absorbed elsewhere, for the most part in a local shell plant, but the majority of the women released have not applied for other positions. The Edmonton office reports that some 300 of the men released from the Aircraft Repair plant are being placed with the Alaska Wing of the United States Government.

Construction—Activity has practically ceased, and only a few projects are making demands on the provincial labour force. Additional carpenters, timbermen and riggers, who are urgently needed for the completion of the C.N.R. ore docks at Port Arthur early in 1945, will have to be brought in from outside points and must be able to work at considerable heights in cold winter weather.

Pacific Region

Agriculture—There is a negligible demand for farm labour at this season and the only movement is that of farmers to temporary employment outside of agriculture.

Logging—The need for common labour has eased considerably along the coast and this situation will prevail until after the New Year, as many camps are enjoying their customary Christmas and New Year holiday. After the festive season it is anticipated that the demand will again become fairly heavy, as there is every indication that several British Columbia operators intend to increase production now that there is promise of an adequate labour supply. For the first time in several years, logging companies in the interior are well supplied with bushmen.

Coal Mining—There is little of interest to record in the coal mining industry. Collieries at the Crow's Nest Pass continue to call urgently for unskilled workers, and if these were available it would be possible to move up to the face certified miners at present engaged in haulage and other underground labour. Any miners now being supplied are serving merely as replacements for men leaving on medical grounds.

Base Metal Mining—The situation in the province's base metal operations likewise remains unchanged. As always, requests for hard rock miners are numerous, and muckers and ball mill operators also are in general demand. The Nelson office reports that the number of men coming in from the prairies has been disappointingly small and a definite shortage of miners is threatening.

Manufacturing—There is little demand for labour in British Columbia industries at this time. The calls for shipyard workers are still comparatively heavy, but there has been a good response to clearance orders, now placed practically across Canada. The shortage of riveting crews in the Victoria yards has created a disturbing bottleneck but workers coming in from Edmonton and Vancouver are relieving the situation.

In Vancouver there is a persistent, though lessening, demand for machinists and moulders, and it is extremely difficult to meet the call for shipbuilding electricians. Sheet metal journeymen as well as pipe fitters are also required in large numbers, and there is a definite lack of qualified applicants.

The province's sawmills are calling for a minimum of workers, and the annual shutdown is due to take place shortly. In New Westminster alone, some 725 workmen are involved in this closing, which will permit mill repairs. The majority of the mills in question will reopen immediately after January 1.

Lay-offs during the month have been of a minor nature. Several small staff reductions have occurred in New Westminster foundries and engineering plants, and the C.P. Airlines are continuing to release 10 to 15 employees weekly with the result that the plant has now little more than a maintenance skeleton crew.

Construction—Scarcity of building materials has lessened labour demands, and for the most part British Columbia carpenters are being employed on low priority jobs. The high priority order for carpenters for the province's military hospital program have mostly been filled, and airport construction at Courtenay is practically completed.

Applications for Employment; Vacancies and Placements; November, 1944

REPORTS received from Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period November 3 to November 30, 1944, showed a gain of 5 per cent in business transacted, when compared with the preceding period September 29 to November 2, 1944, and an increase of 3.2 per cent in comparison with the five-week period October 29 to December 2, 1943, this computation being based on the average number of placements recorded daily. Under the first comparison the most noteworthy changes were a substantial expansion in forestry and logging, an appreciable improvement in trade and moderate declines in services and agriculture. When compared with the five weeks ending December 2, 1943, though a fairly substantial decrease was recorded in manufacturing, the marked gain in forestry and logging and small increase in trade offset losses in all other industrial groups.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each one hundred applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took downward courses. The ratio of vacancies to each one hundred applications being 89.4 during the four weeks ending November 30, 1944, in contrast with 106.4 during the preceding five weeks and 107.7 during the five weeks October 29 to December 2, 1943. The ratio of placements to each one hundred applications was 68.2 as compared with 70.5 in the previous period and 72.4 in the five-week period ending December 2, a year ago.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the period under review was 8,547 compared with 9,357 during the preceding five-week period and 9,385 in the period October 29 to December 2, 1943. The average number of applications for employment received daily by the offices during the four weeks ending November 30, 1944, was 9,554 in comparison with 8,791 in the previous five weeks and 8,710 in the five weeks ending December 2, a year ago. The average number of placements made daily by the offices during the four weeks November 3 to November 30, 1944, was 6,518 of which 6,376 were in regular employment and 142 in work of one week's duration or less, as compared with a total daily average of 6,202 during the

previous five weeks. Placements in the five weeks ending December 2, 1943, averaged 6,314 daily, consisting of 6,163 placements in regular and 151 in casual employment.

During the period November 3 to November 30, 1944, the offices of the Commission referred 215,130 persons to vacancies and effected a total of 156,438 placements. Of these the placements in regular employment were 153,028 of which 101,356 were of males and 51,672 of females, while casual placements totalled 3,410. The number of vacancies reported by employers was 131,327 for males and 73,804 for females, a total of 205,131, and applications for work numbered 229,290, of which 152,850 were from males and 76,440 from females. Reports for the five weeks September 29 to November 2, 1944, showed 271,350 positions available, 254,937 applications made and 179,860 placements effected, while from October 29 to December 2, 1943, there were recorded 281,536 vacancies, 261,309 applications made and 189,410 placements in regular and casual employment.

The following table gives the placements effected by employment offices, each year, from January, 1934, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944 (48 weeks).....	1,589,882	43,119	1,633,001

Nova Scotia and Prince Edward Island

Opportunities for employment at Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the four weeks ending November 30, 1944, numbered 289 daily in comparison with 297 in the previous period and 361 during the five weeks October 29 to December 2, 1943. Placements recorded a daily average of 219 during both the period under review and the preceding five weeks, but 256 during the period terminating December 2 a year ago. Moderate decreases in public utilities operation, construction and trade were the only changes of importance in the daily average of placements from the five weeks ending December 2 last year.

Ontario

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Ontario during the period under review, was 3,468 as compared with 3,703 in the previous five weeks and 3,779 during the period ending December 2 a year ago. The average number of placements registered daily was 2,551 during the four weeks November 3 to November 30, in contrast with 2,515 in the preceding period and 2,542 during the five weeks terminating December 2, 1943. The gain in the daily average of placements over the period October 29 to December 2 last year, was due to a fairly large increase in forestry and logging, supplemented by moderate advances in construction, trade, mining and public utilities operation. The improvement in these groups was almost entirely offset by a fairly large loss in manufacturing and a moderate decline in agriculture. Placements by industrial divisions numbered: manufacturing 27,965; services 9,325; trade 9,098; forestry and logging 5,254; public utilities operation 3,904; construction 3,650 and mining 1,068. There were 37,471 men and 22,892 women placed in regular employment.

Manitoba

Employment opportunities, as indicated by orders received at Employment Offices in Manitoba during the four weeks ending November 30, showed a daily average of 406, in comparison with 458 in the period terminating November 2, and 412 during the five weeks ending December 2 last year. There was a daily average of 335 placements in contrast with 274 in the previous period and 338 during the five weeks October 29 to December 2 a year ago. The reduction in placements from the period ending December 2, 1943, was small for the province as a whole under this comparison. The most significant changes were losses in services and mining, and gains in trade and manufacturing. Placements by industries included: manufacturing 2,667; trade 2,089; services 1,800; public utilities operation 747; construction 317 and mining 181. Regular placements numbered 3,555 of men and 3,486 of women.

Saskatchewan

During the period under review, the daily average of positions offered through Employment Offices in Saskatchewan was 217, compared with 296 in the preceding five weeks and 228 during the period terminating December 2, 1943. Placements registered a daily average of 191, in comparison with 179 in the previous five weeks and 178 during the period ending December 2 last year. The only gain of importance in the daily average of placements

when compared with the period terminating December 2, a year ago, was a moderate increase in trade. Of the small changes in other industrial groups, the gains exceeded the losses. Industries in which employment was found for more than 100 workers included: services 1,355; trade 1,246; manufacturing 999; public utilities operation 358; forestry and logging 172; construction 158 and agriculture 136. Placements in regular employment numbered 2,468 of men and 1,787 of women.

Alberta

Orders received at Employment Offices in Alberta during the four weeks terminating November 30, 1944, called for an average of 420 workers daily in contrast with 461 in the preceding period and 473 during the five weeks ending December 2, 1943. The average number of placements effected daily was 341 during the period under review, in comparison with 307 in the previous five weeks and 370 during the period terminating December 2 a year ago. The decline in the daily average of placements from the period October 29 to December 2 last year, was greatest in construction. Losses smaller in volume were recorded in services and trade but were offset by a moderate gain in forestry and logging. Placements by industrial divisions numbered: manufacturing 1,985; services 1,836; trade 1,417; forestry and logging 798; mining 668; public utilities operation 662; construction 594 and agriculture 154. There were 5,183 men and 2,578 women placed in regular employment.

British Columbia

There was a decrease in the average number of positions available daily at Employment Offices in British Columbia during the period ending November 30, 1944, there being 805 in contrast with 997 in the previous five weeks and 857 during the period terminating December 2 last year. Placements, likewise, decreased under both comparisons, the daily average being 655 during the four weeks under review, in contrast with 687 in the preceding period and 662 during the five weeks October 29 to December 2, 1943. Reduced placements in manufacturing and construction accounted for the decrease from the five weeks ending December 2 a year ago. Moderate improvement was noted in forestry and logging, and public utilities operation, with small changes only being reported in remaining groups. Industrial divisions in which the majority of placements were effected were: manufacturing 4,635; services 3,187; trade 2,477; forestry and logging 2,008; public utilities operation 1,548; construction 1,216 and mining 417. Regular placements numbered 10,500 of men and 4,666 of women.

Labour Law

Recent Regulations under Dominion and Provincial Legislation

FIVE representatives of the Department of Veterans' Affairs have been appointed as members of Regional Selective Service Advisory Boards. An arrangement regarding deductions which an employer may make for board and lodging he supplies to each soldier in his employ, has been made between the Minister of National Defence and the Minister of Labour. Canadian Forces detailed for duty in civilian employment are entitled to receive only their military pay and allowances, including Dependents' Allowance. Amendments have been made to the Wartime Salaries Order. Regulations have been made under the War Service Grants Act. Contribution and Benefit Regulations under the Unemployment Insurance Act were amended.

In the provincial field, an Order under the Alberta Boilers Act waives the provision that no temporary certificate may be issued to any person that would permit him to have charge of any steam-plant, exceeding 100 horsepower, unless he holds a required certificate. Alberta regulations regarding the issue of temporary welders' licences have been relaxed, due to the present shortage of welders. The "Hours of Work" clause in all Orders under the Nova Scotia Female Minimum Wage Act, is amended to read that all hours worked in excess of a maximum of 48 per week, must be counted as overtime, and must be paid for at time and a half.

Dominion

Appointments to Regional Selective Service Advisory Boards

An Order in Council, P.C. 8937, made December 12, 1944, and gazetted December 18, appoints the following persons, representing the Department of Veterans' Affairs, to be members of Regional Selective Service Advisory Boards:—

Mr. G. C. Derby, of Vancouver, B.C., to the Pacific Employment Region; Mr. W. G. Rumball, of Winnipeg, Manitoba, to the Prairie Employment Region; Mr. George McRae, of Toronto, Ontario, to the Ontario Employment Region; Major H. M. Bell of Montreal, Quebec, to the Quebec Employment Region; and Mr. J. H. Barnett, of Saint John, New Brunswick, to the Maritime Employment Region.

Employment of Members of the Canadian Army

An Order in Council, P.C. 50/9555, made December 28, 1944, confirms to December 1, 1944, an arrangement between the Minister of National Defence and the Minister of Labour made under Order in Council P.C. 7429, October 3, 1944 (L.G., 1944, p. 1309) which deals with employment of members of the Canadian Army on Active Service employed on projects or undertakings in Canada deemed to be in the National Interest.

Under the arrangement an employer may deduct not more than \$1.50 per diem for board and lodging which he supplies for each soldier in his employ. A maximum of \$1.25 per diem may be charged against the soldier's account while he is so employed, in accordance with the Army subsistence rate. Any charge for board and lodging between \$1.25 per diem and the maximum allowance of \$1.50 for each soldier, is to be charged to the Department of National Defence (Army). Expenditure under the arrangement may not exceed \$1,000.

War Service Gratuity Regulations

Regulations under The War Service Grants Act, 1944 (L.G., 1944, p. 1174) were approved by Order in Council (P.C. 9440), December 19, 1944, and gazetted December 26.

The gratuity provided by the Act for every member of the forces, upon discharge, is to be computed at the rate of \$7.50 for every completed period of thirty days of service, together with an additional 25 cents for every day of overseas service which falls within this period. Overseas service begins on the day of posting overseas and concludes on the day taken on strength on return from overseas. Temporary duty commences on the day of proceeding from the parent unit and concludes on the day of return.

In calculating the supplement for overseas service, all allowances payable on a daily

basis, and also dependents' allowance, are to be included in the expression "pay and allowances", with the following exceptions: (a) kit upkeep allowance; (b) underclothing allowance; (c) travelling allowance; (d) lodging and provision allowance or subsistence allowance, in excess of the standard rates payable in Canada at the date of discharge; (e) any special allowance payable overseas but not payable in respect of service in Canada. Pay and allowances, and also dependents' allowance, in issue to a member of the forces at the date of discharge, must be used in calculating the supplement to the gratuity, unless, solely resulting from his posting to a special discharge unit prior to discharge, a lower rate of pay and allowances was in issue at the date of discharge, in which case the pay and allowances and dependents' allowance in issue at the last unit where the person concerned served in his normal capacity, must be used to calculate the supplement.

If any member rejoins the forces after his services have been terminated by discharge or dismissal for misconduct he is not to be barred from the benefits provided in the Act in respect of his service, after rejoining, merely by reason of the circumstances attending the first termination of service. The regulations also provide for the establishment of a Board of Review, to be composed of a chairman and two or more members, appointed by the Minister of National Defence, with power to decide cases in which applications for grants have been refused on the ground that the applicant had been discharged or dismissed owing to misconduct.

When a person has had service in more than one force, benefits must be calculated as if his total service had been uninterrupted in any one of these forces, and the benefits payable to him, including overseas service in one or more forces, must be calculated proportionately, considering the time spent in each force, and the pay and allowances in issue to him at the date of discharge from each force in which he has seen overseas service.

The Minister, or designated authority, must decide whether pecuniary benefits granted by the government of any of His Majesty's Dominions other than Canada are of the same nature as the gratuity or credit payable under the Act. Benefits of the same nature received from another British dominion must be deducted from the gratuity to the extent of the amount payable, and the balance of such benefits must be deducted from the re-establishment credit.

Under the Act no gratuity payable or credit available to a member of the forces or his dependents is subject to attachment, levy,

seizure or assignment under any legal process, or to taxation. The regulations provide that it must not be assigned, charged, anticipated, commuted, given as security or otherwise dealt with, prior to its being paid out to the member of the forces or other person who may be entitled to the benefit. Any purported assignment or other transaction relating to the gratuity or credit made contrary to these provisions is void and of no effect.

These Regulations came into operation January 1, 1945, except those necessary to make the Act effective from its commencement, which came into operation December 19, 1944.

Unemployment Insurance Benefit Regulations Amended

An amendment in the Unemployment Insurance Benefit Regulations (L.G., 1942, p. 196; 1943, p. 1417) approved by Order in Council (P.C. 8061), November 24, 1944, and gazetted December 30, replaces the section governing delay in making application for benefit. The new section provides that where good cause is shown for such delay the period of unemployment shall, for the purposes of the second statutory condition, begin on a day determined by the insurance officer which must not be earlier than the day on which the period of unemployment actually began.

Unemployment Insurance Contribution Regulations Amended

A further Order in Council (P.C. 8062), made and gazetted on the same dates, amends the Unemployment Insurance Contribution Regulations (L.G., 1943, p. 1414) relating to the number of contribution days and bulk payment contributions.

Where a person is employed on each working day in a pay period, other than a semi-monthly or monthly pay period, a contribution must be paid for each working day and each recognized holiday during the pay period. Where a person is employed on each working day in a semi-monthly or monthly pay period contributions are to be paid for 13 or 26 days respectively in each pay period, or for the actual number of working days in a particular pay period and for any recognized holidays in that pay period. Only one of these methods may be used by an employer in respect of a particular employed person. If a person is not employed for the whole pay period a contribution must be paid for each day on which work is done by him, subject to the regulations dealing with abnormal working days and overlapping days. In any case not coming within the above categories,

the employer must submit to the Commission for approval a method of determining the number of daily contributions payable.

Bulk payment contributions, must be calculated by multiplying the number of days for which contributions are payable by one-sixth of the weekly rate of contributions set out in the second Schedule to the Act.

Other Orders

The following orders are summarized elsewhere in the *LABOUR GAZETTE*:

P.C. 9201, amending the Wartime Salaries Order; and P.C. 9505, approving appointment to the Regional War Labour and the Wartime Labour Relations Board of Nova Scotia.

Provincial

Alberta Boilers Act

An Order in Council made December 4, 1944, and gazetted December 15 waives, for the period of one year from November 20, 1944, the provision of the Regulations as to Qualifications and Examination of Engineers and Firemen which stipulates that no temporary certificates may be issued to any person that would permit him to have charge of or operate any engine, boiler or steam plant, exceeding 100 horse-power, unless he holds a valid Engineer's Certificate of not less than one grade lower than the certificate required. Authority may now be granted to applicants of approved standing to operate steam plants.

Alberta Welding Act

Due to the present shortage of welders, the regulations regarding the issue of temporary licences have been relaxed by an order made December 4, and gazetted December 15, 1944. For a period of one year, the length of employment required of a candidate in order to qualify for an examination for a temporary certificate under The Welding Act, may be varied. Formerly, a specific length of time was necessary, according to the class of welder's certificate required (L.G., 1939, p. 675).

Nova Scotia Female Minimum Wage Act

By an Order made December 13, 1944, and gazetted December 20, the "Hours of Work"

clause in all Orders of the Nova Scotia Minimum Wage Board is amended as from December 28, 1944. The clause now stipulates that all hours worked in excess of 48, or in excess of the normal number of hours worked, if this number is less than 48, must be counted as overtime, and must be paid for at a rate of not less than time and a half.

Quebec Minimum Wage Act

By-law B-2 of the Minimum Wage Commission (L.G., 1940, p. 1037) made September 6, 1944, and gazetted September 14, governing the keeping of registers, was repealed by an Order made November 4, 1944, and gazetted December 16, coming into effect on the latter date.

Quebec Minimum Wage Act

By-law B-4 of the Quebec Minimum Wage Commission, made August 27, 1940, and gazetted September 14 (L.G., 1940, p. 1037) and governing the mode of payment of wages, is repealed by a by-law made November 15, 1944, and gazetted December 9.

Renewal: Order No. 33 governing wholesale foodstuffs in the district of Quebec (L.G., 1943, p. 1745) is maintained in force until January 1, 1946, by an Order made November 21, 1944, and gazetted December 16.

Prices

Prices, Retail and Wholesale, in Canada, December, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

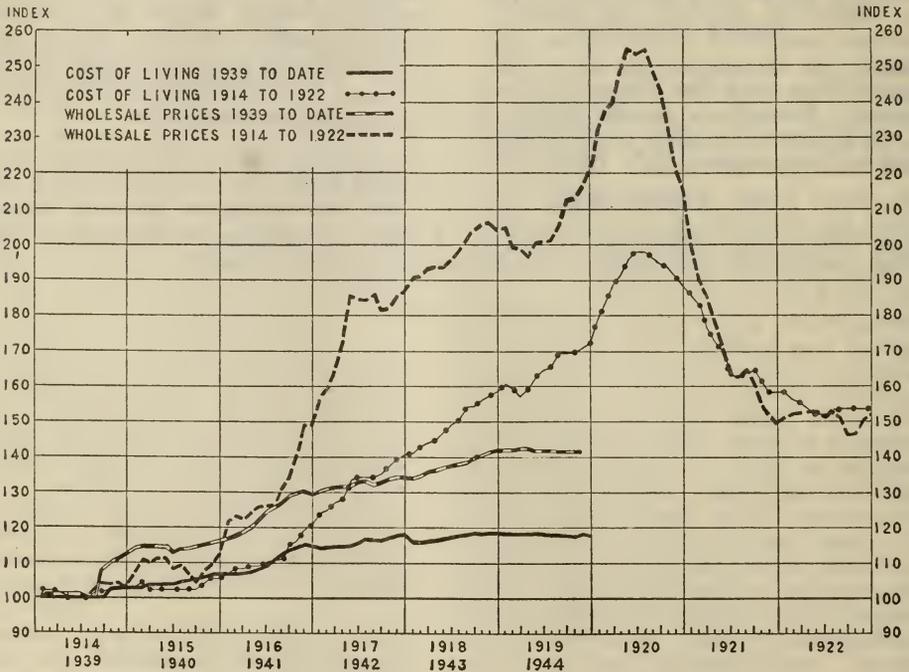

A DECLINE of 0.4 to 118.5 (1935-39=100) occurred for the Dominion Bureau of Statistics cost-of-living index between November 1 and December 1, 1944. Weakness in foods was responsible, a decline of 1.3 points to 130.3 in this series reflecting lower prices for eggs, vegetables and fruits. Other group indexes were unchanged in December at 112.0 for rentals, 108.1 for fuel and light, 121.6 for clothing, 118.4 for homefurnishings and services and 108.9 for miscellaneous items.

When compared with the December, 1943, figure of 119.3 the current level for the cost-of-living index showed a decline of 0.8 points. A rise of 2.7 points has occurred since the implementation of the price ceiling on December 1, 1941.

Changes in the cost-of-living indexes for eight regional cities, August, 1939=100, were comparatively small between October and December 1944. The largest change was a drop of 0.5 to 116.5 in the Toronto index due to lower prices for foods and a rebate in electricity rates. Saint John at 118.4 for December was 0.3 points lower, as the food index moved downward. A decline of the same amount in the Vancouver index to 116.9 likewise reflected easier food quotations along with a drop in the fuel and light index. Lower food prices were responsible also for a loss of 0.2 to 115.6 in the Edmonton Index. On the other hand, December food quotations were slightly higher in Montreal, advancing the composite index 0.1 to 120.2. Cost-of-living indexes for Hali-

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1944

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

fax at 118.4, Winnipeg 115.8 and Saskatoon 119.2 remained unchanged. Over the past year point changes in city indexes were as follows: Winnipeg +0.4, Halifax +0.3, Saint John -0.1, Saskatoon -0.3, Edmonton -0.4, Vancouver -0.7, Toronto -0.9 and Montreal -1.2.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows

the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (3.3 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title *Activities of the Wartime Prices and Trade Board*.

Wholesale Prices, December, 1944

Wholesale prices recorded a net gain of 0.1 to 102.5 between November and December, 1944, but absolutely no change when compared with December, 1943. Non-metallic minerals advanced 0.9 to 102.7 between November and December, reflecting higher prices for bituminous coal imported from the United States, and also a seasonal increase

(Continued on page 112)

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

in gravel. Vegetable products rose 0.4 to 95.0 due to substantial increases in potato prices and small advances in hay, rye and onions. Lemon prices were off slightly in this group. Recovering a loss of the previous month, chemicals and allied products closed 0.2 points higher at 100.1, while animal products declined 0.7 to 106.0 following a sharp drop in egg prices. This outweighed firmness in live stock, meats and butter. Other groups remained unchanged, fibres, textiles and textile products at 91.7, wood, wood products and paper at 118.1, iron and its products at 117.0 and non-ferrous metals at 79.4. Canadian farm products prices were firmer in December also, the composite index

moving up 0.2 to 103.3. Field products, with a gain of 0.7 to 92.2, were responsible for the December rise, and reflected higher prices for potatoes, hay and onions. The animal products index weakened 0.5 to 122.0 due to substantial reductions in egg quotations which more than outweighed upturns in live stock.

The composite index of Canadian farm products moved downward 1.3 points between December, 1943 and December, 1944. Animal products were responsible for the decline, as the index for this series fell 4.1 points during the year due to substantial reductions in egg prices. Over the same period field products were fractionally firmer, recording a gain of 0.5 points.

Report of Commissioner on Trenton Steel Works

THE Government of Nova Scotia on November 26, 1943, appointed Mr. Justice W. F. Carroll as a Commissioner to inquire into the causes of curtailment of operations at the Trenton steel plant of Dominion Steel and Coal Company.

The Report of the Commissioner has been published by the Provincial Secretary, Halifax. It reviews the financial position and affairs of the Trenton Works, and summarizes its association with related companies, and past dealings with the Governments of Canada and of Nova Scotia. It goes on to analyse the products and costs of the Company, and discuss the relations between management and employees, and the reasons given by the company for the shutdown. Finally the Commissioner makes a number of recommendations.

Cause of Shut-Down

The Commissioner found that the bolt and nut and rolling mills departments of the Trenton Steel Works had not been profitable. On the other hand evidence was given that the mills at Trenton had had no improvement since the winter of 1917-18 at which time they were already "old and practically antiquated hand mills."

The curtailment of operations followed a decision of the Nova Scotia Regional War Labour Board granting an increase in wages, as a result of which the Company "was bound to lose more money." In this connection the Commissioner declares however that

it is generally conceded to-day that industrial corporations are given charters not alone to make profits for their shareholders but to give service—service to the public and service in and near their fields of operation . . . It would seem that Dosco and its predecessors, and especially its predecessors, are open to criticism for allowing the Trenton plant to deteriorate, not keeping it up to date, not keeping it in such condition that would enable it to give service to the public in its lines, and have a fair chance to compete with like industries elsewhere located.

Relationship Between Industry and the Public

The curtailment of operations effected about 660 employees. Most of the men have since found employment in other work, but "this does not mean that the event did not cause hardships." The report refers particularly to the "very serious blow to the splendid sense of future security" in the case of "all classes who depend on industry for a livelihood."

In reviewing the past history of the steel and coal industry in Nova Scotia, the Commissioner refers to financial assistance given by the

federal and provincial governments. He expresses disapproval of a statement by the President of Dosco to the effect that "in running a company in a business way it is not necessary to report to any Government when you have to change your operations." In this connection he asserts that "the public, governmental or otherwise, are shareholders in this huge corporation and as such, Public Authority, those shareholders' representatives, have a right to know what is going on especially when a crisis is blowing up." He suggests that if "Dosco had taken the Nova Scotia Government and the Union representatives into its confidence" and frankly advised both of its intention of closing down, ways and means would have been found of remedying the situation "during at least the duration of the war."

The Commissioner finds, however, that Dosco had previously intended in any case to transfer operations carried on in the departments affected to Montreal, (Canadian Tube and Steel Products Ltd.) and declares: "This it seems to me cannot be looked on as fair treatment to Nova Scotia."

He concludes:

I am firmly convinced that had a fairly substantial expenditure been undertaken at the Trenton steel plant for improvements and replacements even at that late date the picture there to-day would be vastly different, and I am advised that the expenditure of less than half the amount paid for Canada Tube would have made Trenton not only "commercially practicable" but a sound business proposition.

Recommendations

The Commissioner recommends: Revision of the Company Acts of the Province, and consideration of "this whole matter of corporations" by a Dominion-Provincial Conference; legislation preventing an industry from closing down its operations without notifying the government; appointment of a factory inspector to study maintenance of plant machinery; representation of the Province of Nova Scotia on the Dosco board of directors; and other matters.

In closing, the Commissioner states:

It would seem that the future of Trenton and its industries is to say the least not unpromising and with cordial co-operation between employer and employee the Companies there should continue.

There is no doubt too that Dosco will do everything in reason to keep the new war industries there in motion after the war and I do hope that the prospect of making profits, which inspires companies to keep industry going, will not be the sole reason which will prompt that thought, but that there will be added to it the fact that there is a duty of service to this province even if greater profits may be made elsewhere.

Library of the Department of Labour

Select List of References on Absenteeism and Armed Forces, their Civil Employment and Rehabilitation.

THE Library of the Department of Labour was organized in 1900, and is both a reference and a circulating Library. It is maintained by the Department for the purpose of assembling and dispensing or distributing information required on all subjects which affect in any way the labour movement and the laws by which it is governed. These sources include a valuable collection of publications of labour organizations and periodicals published in the interest of organized labour, a collection of books and periodicals and newspapers dealing with economic and social problems, books of reference and volumes on history and law, a comprehensive collection on industrial combinations and related subjects, and all publications of the International Labour Office.

While the Library is primarily for departmental use, it also serves other government departments, provincial departments, the International Labour Office, labour organizations, and the public in general. Bibliographies on various subjects are compiled by the Library and supplied as required.

The Library contains approximately 50,000 volumes, many thousand pamphlets, and it also receives 150 newspapers and 1,000 periodicals. All periodicals are analysed, and articles on labour and economic subjects catalogued for permanent reference. The Library catalogue contains some 280,000 cards. There is also a newspaper clipping service maintained by the Library.

Starting with this issue, a series of bibliographies on labour and related problems will be compiled by the Library and published regularly in the *LABOUR GAZETTE*. The first of the series follows. It consists of a select list of references received in the Library of the Department of Labour from 1940 to 1944 on (1) Absenteeism; and (2) Armed Forces, their Civil Employment and Rehabilitation.

Causes and Treatment of Carbon Monoxide Poisoning

Carbon monoxide poisoning is especially prevalent during the winter months, although exposures in industry and from industrial processes are a source of trouble the year round. Dr. C. F. Blackler, in an article in the December issue of *Industrial Hygiene and Industrial Medicine Bulletin*, points out that "the common sources of carbon monoxide poisoning in winter are from furnaces and exhaust gases from automobiles." The smoke from a coal fire contains varying amounts of carbon monoxide—depending on how free the draft is. The greatest danger exists when the heating equipment is faulty because of ill fitting pipes, worn and corroded parts, or where pipes and chimneys are clogged with soot and unburned materials. "Too masterful checking and banking of fires constitute a very real source of danger." It is pointed out that hot air furnaces are most prone to give rise to carbon monoxide poisoning and sufficient thought is not always given to the fact that defective parts "may allow direct penetration of coal gas from the burning surfaces right into the room". Attention is also drawn to the fact that gas from charcoal braziers and from coal and coke-burning "salamanders" contains considerable quantities of carbon monoxide, especially when operated without flues. Then too, illuminating gas, notably when made by passing steam over heated coke, may contain as much as 35 to 40 per cent of carbon monoxide. A still further danger exists this year in that many householders must take delivery of grades of coal with the combustive qualities of which they are not always familiar. The most obvious remedy is close attention to the firing characteristics of the fuel used, removal of soot or other obstruction from flues and

chimneys and the prompt stopping of all cracks and leaks in the heating or gas-lighting systems.

Dr. Blackler points out that "well over a hundred occupations offer exposures in varying degrees" to carbon monoxide poisoning. The more important of these are: "blasting operations, explosions in mines and quarries, in steel mills, blast furnaces, in artificial gas and coke plants". A considerable hazard also exists in the distillation of coal tar, acetylene welding and in the melting and pouring of metal in foundries.

Motorists and truck drivers are also frequently exposed to carbon monoxide from their motor engines. To avoid this danger, cars and trucks should be inspected regularly for leaky exhaust connections, loose or broken floor boards, and defective floor coverings. Motors should never be kept running in a closed garage, nor should cars or trucks be driven with all the windows closed. As carbon monoxide gives no warning of its presence, drivers should get out of their vehicles and into fresh air at the first sign of headache, smarting eyes, dizziness, sickness or drowsiness.

Dr. Blackler provides the following method of treating persons affected by carbon monoxide poisoning:

"All treatment begins with the prompt removal of the patient from the exposure. Artificial respiration should be begun at once if breathing has stopped. A mixture of 95 per cent oxygen and five per cent carbon dioxide should be obtained as quickly as possible and for this purpose it may be necessary carefully to remove the patient to hospital. The circulation may be helped by brisk rubbing."

Accident Prevention in British Columbia

Formation of Plant Employer-Worker Committees

ON December 6, 1944, the British Columbia Workmen's Compensation Board in Vancouver issued directions relative to the creation and functioning of Accident Prevention Committees.

Such a Committee, consisting of between four and twelve members, must be maintained for every operation in which twenty-five or more men are employed. Committee members must be designated in equal numbers by the workmen and by the employers, the workmen's representatives being regular employees with at least one year's experience in the type of operation over which their duties extend.

It is the duty of the Committee to make a thorough inspection of the entire plant at least once a month in order to determine hazardous conditions, check unsafe practices and receive complaints and recommendations. It is also required to investigate all serious accidents and unsafe conditions and practices reported to it, including accidents which might have caused serious injury. Regular meetings are to be held monthly or oftener, for the discussion of recent accidents, their causes, means of prevention, and inspection and investigation reports. Records of investigations, inspections, complaints, recommendations and minutes of the meetings are to be kept, the minutes indicating what action has been taken on previous suggestions and recommendations and if no action has been taken regarding a recorded accident, the reason is to be given. Copies of the records must be sent to the Workmen's Compensation Board. Committees must investigate fire conditions, and examine

all fire-fighting appliances and lighting arrangements, reporting all insufficiently lighted places to the employers. All machinery, transmission stops, cables, blocks, slings, chains, tongs, tools, equipment and accident prevention devices must be inspected. The Committee is to provide facilities in each establishment for receiving written complaints and recommendations.

In addition to these duties, Committees in logging camps must inspect particularly all spar-trees, gin-poles, skid-roads, and general working conditions around the camps.

The Board has also issued a letter to employers warning against allowing methods of conserving consumer goods to endanger the safety of workmen. It is pointed out that while the slogan *Wear it out; Make it do; Do without;* serves a useful purpose in wartime, the "Make it do" portion presents difficulties, and that although it is sometimes necessary to use inventive skill to keep the wheels of industry turning, and cleverness in doing make-shift repairs has a definite place in operations carried on in remote areas where there are no supply houses and repair shops, resourcefulness in contriving repairs and substitutes may be a liability instead of an asset if the safety of the workmen is not kept in mind. Ingenuity should be used only if the laws governing the action of the contemplated device are observed.

The letter concludes with a warning against allowing pressure in any kind of container to exceed a safe limit and requests employers to make certain that their workmen never use unsafe pressure vessels.

United States Accident Reduction Drive

AN article, in the "Labour Information Bulletin", for November, 1944, issued by the United States Department of Labour, shows the progress being made by certain American plants in the drive for a 40 per cent reduction in accident frequency.

The article points out that in seeking the co-operation of New England war plants, the accident reduction goal was tied directly in with production and manpower requirements of industrial groups in this section. Reports received from the participating firms show that the record stood at 11,709 injuries among 624,026 workers during the first half of 1944, an average of one injury per 52 workers. During the corresponding period of the previous year, 13,999 injuries occurred among

639,258 workers, an average of one injury per 46 workers. The same group of firms reduced their 1943 total by 1,433 during the third quarter of 1944, the first three months of the drive, achieving a 25 per cent improvement over the record for the first six months of the year. The total reduction for the first nine months of 1944, amounts to 3,730 injuries. "Assuming that all of the prevented accidents would have produced nothing more serious than temporary disability," says the report, "the resultant saving, on the basis of 15 days' lost time per temporary total, would amount to some 56,000 days".

The Secretary of Labour has promised an award to firms attaining a 40 per cent accident reduction in their own operations.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—Hon. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Editor—HARRY J. WALKER

VOLUME XLV]

FEBRUARY, 1945

[NUMBER 2

Notes of Current Interest

Effect of
wartime labour
regulations in
reducing time
loss from strikes
Reference was made in the
January LABOUR GAZETTE
(p. 2) to the decline in
strike activity during 1944.
Working time lost through
strikes and lockouts during
1944 was 51.8 per cent less
than in 1943, according to preliminary figures.

In commenting upon the decline in the time lost through work interruptions arising out of industrial disputes, Hon. Humphrey Mitchell, Minister of Labour, pointed out that the War-time Labour Relations Regulations, P.C. 1003, became effective on March 20, 1944, and that undoubtedly the administration of the Regulations through the National and Provincial Wartime Labour Relations Boards had had an important effect in reducing time lost due to industrial disputes.

The Regulations, the Minister pointed out, established an orderly procedure for the settlement of what had at times been a most contentious question, namely, the designation of the particular organization which employers should recognize as the bargaining agency of their employees.

"Prior to the passage of the Regulations," the Minister said, "the settlement of this question caused considerable industrial unrest among employees, to the detriment of Canada's war effort. It was with a view to minimizing the effect of this problem on industrial production that the Regulations were passed."

Under the Regulations a National Board and a number of Provincial Boards were set up.

The Provincial Boards were established to deal with certain cases which ordinarily would come within the jurisdiction of the Province; while the National Board deals with industries and public utilities ordinarily under the jurisdiction of the Federal Government. (L.G. Feb., 1944, p. 135.)

From the passage of the Order in Council to December 30, 1944, more than 1,800 applications for the certification of bargaining representatives have been dealt with by the National and Provincial Boards and bargaining representatives had been certified in 85 of these cases by the National Board, and 1,046 certificates had been issued by Provincial Boards. A further 357 cases were still pending before the Boards at the end of the year.

At the recent session in London of the International Labour Organization committee on constitutional questions the Canadian Government representative, Mr. Paul Martin, K.C., M.P., was elected to preside as chairman.

The committee's principal function was to study the relationship of the I.L.O. to other international bodies (such as U.N.R.R.A.) and the place of the I.L.O. in a general international organization such as was planned at the Dumbarton Oaks conference last summer (L.G., Dec., 1944, p. 1463).

Last May Mr. Martin was chairman of the Employment Committee at the Philadelphia Conference of the I.L.O.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

At the beginning of December, industrial employment showed further increase to 185·7, exceeding the gain which

had taken place in the corresponding period of 1943. It was lower however than at December 1, 1943. Although the upward trend is contra-seasonal according to pre-war experience, it conforms with the movement which has occurred at the beginning of December in 1941, 1942 and 1943. The index was 183·8 in

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended January 25, 1945.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figures for four weeks ended January 27, 1945, and corresponding previous periods. (8) Maclean's Building Review.

the preceding month, and 190.5 at December 1, 1943. The average of the indexes of employment for the twelve months of 1944 is lower than the average for 1943, although higher than for the other years of the war. The 15,018 establishments reporting to the Bureau showed a total working force of 1,887,752 which was 1.1 per cent greater than at November 1. The total weekly wages and salaries paid to these employees increased from the previous month by 0.8 per cent to \$60,770,994 at December 1. Per capita weekly earnings declined from \$32.29 at November 1 to \$32.19 at the date under review.

The greatest advances in employment at the beginning of December, as compared with the previous month, occurred in logging and in trade. There were smaller but important gains in mining and transportation. Activity in manufacturing showed a seasonal decrease in the first December contraction recorded since the outbreak of hostilities. There was a contra-seasonal upward trend in transportation which took place in local and steam railway transportation, while the shipping and stevedoring division was slacker. The seasonal curtailment in construction and maintenance was decidedly below average.

The index of the physical volume of business increased from 227.9 at November to 233 at December. Productive operations were greater in 1944 than in any other year; the index averaged 236.8 as compared to 235.9 in 1943. Mineral production, manufacturing and electric power production averaged lower in December while the indexes for the distribution of commodities and for construction experienced increases.

Wages Control Order amended With the passage last December of an amendment to the Wartime Salaries Order (L.G., Jan., 1945, p. 4) which among other things excluded all persons earning less than \$250 per month from the operations of the Salaries Order, a corresponding amendment became necessary in the Wartime Wages Control Order.

Such an amendment has been made by Order in Council P.C. 655 of January 30, which brings all employees earning less than \$250 per month under the Wages Order.

Previously all persons earning less than \$195 per month came under the Wages Order, and persons earning between \$195 and \$250 per month came under one order or the other depending on whether or not they were above the rank of foreman or comparable rank.

Inasmuch as the Wartime Wages Control Order, 1943, had directed all employers to incorporate the cost-of-living bonus into basic

wage rates and the Wartime Salaries Order as amended had only authorized such action, it was also found necessary to direct that employers of those employees now being brought within the provisions of the Wages Order incorporate the cost-of-living bonus, if such action had not already been taken. Accordingly Order in Council P.C. 655 has undertaken to direct such employers to incorporate, in any payroll period commencing on or after March 15, 1945, the cost-of-living bonus being paid on the last payroll period ending on or before December 1, 1944.

Royal Commission on Coal continues hearings

The Royal Commission on Coal, having conducted hearings in the Maritimes during January and February, planned to continue its inquiry in Ottawa commencing on February 26. The Commission will then proceed to the Pacific Coast to commence sittings on the 26th of March.

This itinerary is based on the decision to study questions of production prior to studying questions of distribution and related matters.

During January the Commission heard briefs from the Dominion Steel and Coal Corporation; the Independent Coal Operators' Associations; various municipal and citizens' groups; and the Northside Credit Union Chapter.

The United Mine Workers, District 26, which had prepared a brief, decided to prepare a new brief to be presented to the Commission at a later time, probably in Sydney, when Dosco will be presenting further information requested by the Commission.

Wage rates for trainees in industry

A recent Order in Council gives authority to the Department of Labour, with the approval of the Department of Veterans Affairs, to establish wage rates to be paid to ex-members of the Forces who are placed with employers for training in industry after discharge. The Order in Council, announced by the Hon. Humphrey Mitchell, Minister of Labour, was passed on the joint recommendation of the Ministers of Labour and Veterans Affairs.

The training referred to is given through the Department of Labour under the Vocational Training Co-ordination Act, and while the Dominion Government meets most of the cost of training discharged persons, the actual training is carried on in co-operation with the Provincial Governments.

The Order defines a "trainee" for its purposes as "a former member of His Majesty's

Canadian Forces or former member of any of His Majesty's Forces who was, at the time of enlistment, domiciled in Canada or any other persons with respect to whom authority for the granting of vocational training is or may be vested in the Minister of Veterans Affairs, if such former member or other persons are approved for such training by such Minister."

It is provided that the schedule of compensation established under the Order as payable to the trainee during his period of training shall be made up of two separate amounts: one amount is to be payable by the employer to the trainee, and the second amount is to be payable as a grant from the Department of Veterans Affairs, but this amount is not to exceed the sum which may be paid to the veteran under the Post Discharge Re-Establishment Order.

One effect of the new regulation is that the Department of Labour may establish schedules of rates for trainees without its being necessary for the employer to apply to a War Labour Board for the fixing of rates. When fixing the rates the Department will also have to determine the length of the training period, based on the nature and extent of the skill to be acquired, and on previous experience and training. Also, the total sum payable to the trainee—that is, by both employer and by the Department of Veterans Affairs—is to be fixed at approximately 80 per cent of the wage ordinarily payable by an employer for the occupational classification in which the person is being trained.

Employers or employees, when making contributions under Unemployment Insurance, Workmen's Compensation or other similar legislation, are required to regard as the wage rate for contribution purposes the total sum paid to the trainee—that is, both the amount paid by the employer and the amount paid by the Department of Veterans Affairs.

In commenting upon the fixing of training compensation by the Labour Department, the Minister of Labour said: "It will be the object of the Department to relate the portion of compensation payable by the employer, to the value received by the employer from the trainee's services at various stages during the course of the training. Thus, as the trainee improves his value, but continues at training, rates will be adjusted so that the employer will pay more and the Department of Veterans Affairs will pay less."

A more detailed summary of the provisions of this Order (P.C. 9597) appears in the *Labour Law* section of this issue.

Fractional advance in cost-of-living index

The Dominion Bureau of Statistics cost-of-living index advanced from 118.5 for December 1, 1944 to 118.6 for January 2, 1945. Increases in the fuel and light, clothing and miscellaneous groups outweighed fractional decreases for foods and home furnishings and services.

The fuel and light index advanced from 108.1 to 109.1; rebates in electricity bills made a year ago were spread over the past year, since in effect they represented a return to the customer covering an annual period. This change, therefore, reflects a return to an index level based upon normal rates and not an increase in rates. The clothing index moved up from 121.6 to 121.8 on scattered price changes affecting men's wear, women's wear and piece goods. An advance in the miscellaneous items index from 108.9 to 109.2 was due mostly to higher hospital rates. The food index fell from 130.3 to 130.2 as lower prices for eggs overbalanced increases for vegetables and fruits. Home furnishings and services declined fractionally from 118.4 to 118.3.

After adjustment to the base August, 1939, as 100 the index was 117.7 at January 2. The wartime increase has been 17.7 per cent.

Conference of Industrial Production Co-operation Board

attendance.

A three-day conference of the Industrial Production Co-operation Board was held in Ottawa during January, with members of the Board, the Advisory Committee and Fieldmen in attendance. Matters relating to the progress made to date in the formation of labour-management production committees in various industries were considered. A round table discussion followed as to further ways and means of bringing to the attention of employer and employee groups the benefits of these committees in operation.

Arthur MacNamara, Director of National Selective Service, congratulated the officers of the Board and the field men on their efforts to date in establishing about 300 joint labour-management committees in various industries. "This form of co-operation between labour and management has resulted in a fuller understanding and a pooling of their resources", he said.

The following Fieldmen of the Board attended the conference sessions: E. A. Collom and S. J. Walton, Toronto; C. J. Richardson and C. A. Baby, Hamilton; H. A. Spence and Albert Elson, Windsor; O. L.

Lussier and R. J. Zanettin, Montreal; A. S. Farrell, Amherst, N.S.; and Allan MacDonald, Glace Bay, N.S.

H. R. Pettigrove, Fredericton, and H. S. Johnstone, Winnipeg, of the Industrial Relations Branch, Department of Labour were also present.

Other representatives who attended the sessions included D. B. Chant, Adviser to the Board; Willis George of the Canadian Manufacturers' Association; J. Clark Reilly of the Canadian Construction Association; A. Hemming of the Trades and Labour Congress; and Messrs. H. Ross Rutherford and J. Marlyn of the Department of Labour; Harry Carmichael, Co-ordinator of Production, Department of Munitions and Supply; R. J. Tallon, Commissioner of the Unemployment Insurance Commission; O. C. Elliott, Chief Welfare Officer of the Department of Veterans Affairs; T. R. Walsh, Chief Enforcement Officer of the Unemployment Insurance Commission; D. B. Chant, Adviser to the Board; V. C. Phelan, Director of Information, Department of Labour; R. W. Crumb, Supervisor of Field Staff; J. McCullough of the Industrial Relations Branch, Department of Labour.

Paul Goulet, Associate Director of National Selective Service and a Board member acted as Chairman for most of the Conference sessions, and H. Carl Goldenberg, Director General of Economics, Department of Munitions and Supply, and Chairman of the Industrial Production Co-operation Board, presided over the concluding meeting. M. M. Maclean, Director of Industrial Relations of the Labour Department and a member of the Board was unable to attend the sessions. Arrangements for the conference were under the supervision of H. Ross Rutherford, the Board's Executive Secretary.

Placement of technical employees after discharge from Forces

Employers who intend to engage an engineer or other technical person discharged from a branch of the Armed Forces must first obtain a permit from the

Wartime Bureau of Technical Personnel, it was announced recently by H. W. Lea, Associate Director of National Selective Service, who is in charge of the Bureau.

National Selective Service Regulations define a technical person as "one who is a graduate of a recognized university in any branch of engineering or pure science, or is a member of a professional engineering or scientific body."

Technical personnel who have not previously registered with the Bureau, must do so following discharge from the Forces before the regu-

lations permit them to seek employment. Having registered, however, the applicant for a position as a technical person does not require a permit to seek work, although as already pointed out, the employer must have a permit before he can engage such an applicant.

The Bureau is actively engaged in a program to assist in the placement of engineers and science workers who have been discharged from the Forces. Applicants may apply either at the head office of the Bureau in Ottawa, or at any of the branch offices which are located at Halifax, Quebec City, Montreal, Kingston, Toronto, Hamilton, Winnipeg and Vancouver.

The National War Labour Board in a recent case made an expression of policy on the subject of vacations with pay of more than a week's duration (*see Reasons for Decision, Modern Press Limited, p. 146*).

The Board stated that on the whole its policy had been to adhere to the general pattern of its Decision Bulletin No. 17 which limits vacations with pay to one-half day for each 25 days worked, or six days a year (L.G., 1943, p. 1636). "However," it continued, "in certain cases where employer and employee were in agreement upon a modification which was shown to have been an established condition in a certain industry in a certain area, certain departures from the plan outlined in D.B. 17 have been authorized." The Board pointed out that two weeks' vacation have been authorized in a few cases (L.G., 1943, pp. 1351, 1492; 1944, p. 840) "but always subject to a continuous service requirement of at least 5 years."

Canadian plants make munitions for United States

troops in Europe.

Canadian war plants are described as available because they are well ahead on British ammunition orders. It is estimated that about two-thirds of the 12,000 or more workers required for the United States contracts will shift directly from ammunition production for Britain. It is stated that two large government-owned brass-rolling plants in Ontario and Quebec will operate at capacity, and it is possible that some other plants will require small additions involving new construction.

Business Week, in its issue of January 6, reported that the United States is calling on Canada to supplement United States output of ammunition for American

Strike of street railway workers on Pacific coast

A strike for increased wage rates by street railway workers in Vancouver Victoria, and New Westminster, B.C., which tied up transportation on street railway and motor bus routes for ten days, was terminated on January 19. An account of this strike, its background and the terms of the settlement, is contained in the article *Conciliation Work of the Industrial Relations Branch* on page 175 of this issue.

Canadian Indians relieve farm labour shortage

Canadian Indians played an important part in the harvesting of the 1944 prairie grain crop, it was disclosed recently by A. MacNamara, Director of National Selective Service.

In the province of Saskatchewan, more than 3,500 men from local reserves volunteered to help with the harvesting when their own farm operations were completed. Officials of the Indian Affairs Branch of the Department of Mines and Resources stated:

"... it is safe to say that every Indian available in the province was out threshing ... if it had not been for the Indians (in some areas) the threshing would probably have had to be finished in the spring ..."

In Manitoba, many of the Indians live north of the grain growing districts, and it was necessary to send a special agent to the reserves north of Lake Winnipeg to recruit harvest help.

In August, 603 Indians were brought south to help with the grain harvest. Total time worked by the volunteers came to 12,024 days—an average of 20.6 days per man—for which they received a total of \$48,000 in wages.

Saskatchewan Trade Union Act brought into force

A proclamation has been issued bringing into force the Trade Union Act passed by the Legislature of Saskatchewan at its special session last fall (L.G., Dec., 1944

p. 1542) and providing for compulsory collective bargaining.

The members of the Labour Relations Board which will administer the Act have been appointed. They include two representatives each of employers, employees and the general public, and a chairman, Mr. W. K. Bryden, adviser to the Saskatchewan Minister of Labour.

The Board has power to make orders determining the union representing the majority of employees in any firm, requiring employers to bargain collectively with such a union, directing reinstatement of workers discharged contrary to the provisions of the Act, requiring the dis-establishment of company unions, and

ordering any person to refrain from unfair labour practices as defined in the Act. Check-off of membership dues is compulsory if requested by the union and the employees. A maintenance-of-membership clause is also compulsory in an agreement if the union requests it.

In a case of doubt as to which union represents the majority of employees the Board may order a vote, and must do so on request of a union having a membership of 25 per cent or more of the employees of a plant. If votes are cast by a majority of those eligible to vote, a majority of those voting determines the bargaining agency.

The Act applies only to industries under provincial jurisdiction and does not apply to war industries or others coming under Dominion jurisdiction.

Ontario Court holds child may not be employed in bowling alley

On January 25, in the Police Appeal Court, Toronto, Judge Ian Macdonell dismissed, with costs, an appeal by Olympia Recreation Club, Ltd., and George Ivals against the conviction and a fine of \$20 for violating the

Factory Shop and Office Building Act by employing a child in a bowling alley. For the appellant it was argued that the Act had been amended by the addition of the words "and shall include bowling alleys, poolrooms and billiard parlours", but that it was intended to cover places where goods and services were sold and that it could not apply to bowling alleys since neither goods nor services were sold by the appellant Company. The Court held, however, that "it is a fair assumption that it was the intention of the Legislature to prevent the employment of children in bowling alleys when it added the amendment to the Act." He had no alternative but to dismiss the appeal. It is reported that some 50 similar actions are pending.

Vocational guidance program allows pupils to observe various types of occupations

A recent article in the *Montreal Gazette* describes a practice under which pupils at Westmount Junior High School have the opportunity, as part of the school's vocational guidance program, of observing various

types of occupations in which they are interested.

Groups of pupils visited banks, offices, manufacturing concerns, hospitals, a broadcasting studio, a university science laboratory, the Montreal Court House, and other places. They were able to ask questions and to have a first-hand view of occupations, to help them eventually make their own choice of a life work.

**Resignation of
W. H. Browne
from Wartime
Labour Relations
Board**

The resignation of W. H. Browne from membership on the Wartime Labour Relations Board (National) has been accepted by Mr. Justice G. B. O'Connor, Chairman of the Board.

Mr. Browne had been a member of the Board since its establishment in April, 1944, being one of the members selected as representing the viewpoint of employers.

Mr. Justice O'Connor, in commenting upon the resignation, expressed his regret, and said that Mr. Browne had made a genuine contribution in the work of organizing the Board and in its functioning to date.

**National
wage structure
in Great Britain**

A bill to establish a national wage structure has been introduced in the British House of Commons by Rt. Hon. Ernest Bevin,

Minister of Labour and National Service. Known as the Wages Councils Bill, the measure is designed to abolish "sweated industries" and to ensure that every worker will receive a reasonable standard of remuneration, by establishing where necessary Wages Councils with power to recommend the fixing of "statutory minimum remuneration." In industries where unions and employers voluntarily agree on adequate standards, and a Council is not necessary, the bill will give their agreement the force of law over a five-year period.

The Minister of Labour and National Service will have power to make an Order establishing a Wages Council either—

- (a) where no adequate machinery exists for the effective regulation of workers' wages and wages are inadequate; or
- (b) where voluntary machinery exists, but is not and cannot be made adequate, or is likely to cease to exist, and as a result a reasonable standard of remuneration is not being or will not be maintained.

An application for the establishment of a Wages Council may be made to the Minister either by a Joint Industrial Council or similar body, or jointly by organizations of employers and trade unions.

Alternatively the Minister may himself decide that a Wages Council is desirable.

In either case, the procedure will be that the matter be referred to a commission of inquiry, composed of employers, workers and independent persons. Such a commission may report that voluntary machinery under (b) is adequate or can be made so, in which case a Council will not be set up. Otherwise

the commission may recommend the establishment of a Wages Council, whereupon the Minister will issue the necessary Order.

Before issuing an Order establishing a Council, the Minister must publish notice of his intention, and consider any objections that may be raised. If objections are substantial he must either amend the draft Order, or refer the objections to a commission of inquiry, unless they are objections which have already been considered.

Wages Councils will consist of independent persons and representatives of employers and workers. A Council may recommend the fixing of "statutory minimum remuneration," and will also be able to recommend annual vacations with pay beyond one week.

A Wages Council must publish its proposals, and consider any objections that may be raised. The Minister will then make a Wages Regulation Order in the terms of the Wages Council's proposals, although he has the right alternatively to refer it back to the Council for reconsideration.

Provision is made for the enforcement of Wages Regulation Orders.

The Bill provides for the appointment of a Central Co-ordinating Committee where co-ordination of the work of two or more Councils seems desirable.

Part of the Bill is designed to give support in the transition period to joint voluntary machinery. It provides that for a period of five years employers will be under obligation to observe terms and conditions of employment not less favourable than those established in the trade or industry in the district by virtue of agreements between employers' organizations and trade unions representative of substantial proportions of employers and workers engaged in the trade or industry in the district concerned. This will continue with minor modifications the wartime provisions of Part III of the Conditions of Employment and National Arbitration Order, 1940, and will come into operation when the Part of that Order ceases to have effect. The obligation will not, however, apply to a worker during any period during which his remuneration is fixed by a Wages Council or by other Boards.

**Fine imposed
by union on
"wildcat" strikers
deducted
from wages**

Reference was made in the November issue of the LABOUR GAZETTE (p. 1304) to the action of the President of the United Rubber Workers of America (CIO) in imposing fines of \$12.50

each on union workers in Detroit who had failed to return to work after he had ordered

them to end a "wildcat" strike. The strike, which had held up production for three days, had not been authorized by the union, and was in violation of the union's "no-strike" pledge.

When 572 of approximately 800 union members affected failed to pay the fine, the union informed the company that these employees were automatically expelled from the union, and asked what action the company would take under the maintenance-of-membership clause of the contract.

The company thereupon applied to the National War Labour Board which had directed adoption of the maintenance-of-membership clause in 1943. The company pointed out that in view of the emergency demands of the Armed Forces for tire production and in view of the manpower shortage it was impractical to discharge 572 employees in accordance with the maintenance-of-membership clause.

On January 16 the Board issued an order directing the company to deduct the amount of the fine from the wages of the employees who had failed to pay. The company was further directed to deduct the fee required under the union's constitution to restore the workers to the membership status they occupied before the fine was imposed.

The Board stated that it was taking this action because of "the urgent need for tire production as well as the necessity for reinforcing to the fullest extent the contractual agreement of the parties and the no-strike pledge."

It added: "The Board expects the Company and the union to take prompt and vigorous disciplinary measures against those employees who are responsible in the event there is any further interruption of war production."

**Management—
labour court
in U.S.A.
reduces
absenteeism**

It was asserted in *Business Week* of January 20, that the absentee record of an important shipbuilding plant in Alabama, which was reported the country's worst a year ago, is now one of the lowest in the Gulf region. This has been brought about by a labour-management court conducted by the Maritime Commission with the Industrial Union of Marine and Shipbuilding Workers. The court, set up by the company's labour-management committee, with three representatives from the company and three from the union, discharges, penalizes, exonerates and places on probation the workers accused of absenteeism. Both the

management and the union support the court's orders and accept its recommendations for correction of conditions regarded as factors in group absenteeism. Extension of the plan to the New Orleans area is under consideration, it is stated.

**University of
Chicago gives
special training
in industrial
relations**

According to a recent article in the *New York Times*, the University of Chicago has established an Industrial Relations Centre as a means of providing university-wide service in industrial relations for management, executives, union leaders, government officials, faculty members and students.

The centre brings together and expands the work touching on industrial relations which has been carried on in several of the departments of the university. It will cover four major activities: (1) the direction of an instruction program designed to meet the particular requirements of executives in companies, unions and government agencies, who want broader training in the field of industrial relations; (2) the development and maintenance of a specialized industrial relations library and reference service; (3) the encouragement and integration of individual and co-operative research; and (4) dissemination of research findings.

The instruction program will include weekly seminars and conferences and institutes. The conferences and institutes, which, it is stated, will be planned with advisory groups outside the university, include one each for management and labour on policies and procedures of re-employment and retraining of veterans and industrial workers.

**Trade unions
planned
for Germany**

German workers will be allowed to form democratic trade unions "when circumstances permit," a proclamation issued in the name of General Dwight D. Eisenhower has announced.

According to the proclamation, which was broadcast to Germany by Allied transmitters, the Nazi-controlled Labour Front will be dissolved, and "all forms of free economic association and combination among workers will be permitted, provided that they do not assume any political or militaristic complexion." The trade unions will be permitted to bargain collectively with employers, but "strikes threatening security, directly or indirectly, will be prohibited" and "so will lockouts."

Reinstatement

Regulations Under Reinstatement in Civil Employment Act

Right of Veteran to Return to Former Job after Discharge

REGULATIONS reinforcing the Reinstatement in Civil Employment Act under which members of the Armed Services are entitled to return to their former employment after discharge, were passed on January 11.

The Reinstatement in Civil Employment Act, introduced into the House of Commons in 1942 by Hon. Humphrey Mitchell, Minister of Labour, is administered under the direction of the Minister of Labour, through the field offices of the Unemployment Insurance Commission. Group Captain Byron F. Wood, Associate Director of National Selective Service and Assistant to the Deputy Minister of Labour, who is the co-ordination officer within the Labour Department in relation to departmental activities on rehabilitation, has general supervision over the administration of the Reinstatement in Civil Employment Act.

"The general intention of the Regulations, passed under authority of the War Measures Act and the Reinstatement in Civil Employment Act itself", stated the Minister, "is to assist in carrying out the general purposes of the Reinstatement Act, namely, that any man or woman who has left, or leaves employment after three months on the job to join the Forces, may have the right to return to their former job within the time limit under the Act, wherever it is at all feasible for an employer to take his employee back. The Reinstatement Act, read together with the present Regulations, we hope will cover many of the foreseeable contingencies, so that reinstatement in employment for former members of the Forces will be a reality in all but the cases where employment has actually ceased to exist."

Summary of Regulations

The main points in the new Regulations may be summarized as follows:—

(a) A man who is called up for Army training, and who thereupon leaves his employment, but is later rejected by the Army, must now be treated as though he had had service with the Forces: in other words, he may claim reinstatement in his former job, subject to the usual conditions in the Act. (Sec. 3.)

(b) In the case of a person who immediately after discharge is delayed in returning to his or her former employment by reason of hospitalization or physical incapacity, any period of hospital treatment or incapacity may be counted as continuity of service for seniority, pension, and so forth, in the same way as is the period in the Armed Forces under the Act. (Sec. 4.)

(c) Where National Selective Service directs a man on discharge from the Forces to employment other than his regular job, the man will still be entitled to claim reinstatement in his pre-enlistment occupation after the termination of the work to which he has been directed. (Sec. 5.)

(d) Where an employer's business is carried on in more than one establishment, and where an employee cannot reasonably be reinstated in the particular establishment in which he was last employed, the employer is required to reinstate the applicant in one of his other establishments if it be reasonably practicable to do so, and if it has been the practice of the employer to transfer employees of the type of the applicant from one establishment to another. (Sec. 6.)

(e) A person discharged from the Forces in Canada is allowed three months under the Act in which to claim his former employment—or four months if discharged overseas. The Regulations guarantee the applicant this interval between discharge and reinstatement, regardless of whether an employer may in the meantime offer the applicant an immediate return to his employment. It is felt that those discharged from the Forces may require a period of rest or reorientation, and should be free to have this rather than be obliged to return immediately to employment upon notification from the employer. (Sec. 7.)

(f) Officers, who will be designated as Reinstatement Officers, are to be available for consultation by ex-members of the Forces in regard to return to former jobs. Where a person feels that the

reinstatement terms offered by an employer are less than the guarantee given in the Act, the person may accept the employer's offer without prejudice to subsequently claiming full rights, and may then consult with a Reinstatement Officer. (Sec. 8.)

- (g) A discharged person, who requires time to recuperate from a physical or mental disability before returning to work, will be allowed to claim reinstatement during an additional period of six months—in other words, such a person may claim reinstatement within 9 months if discharged in Canada, or 10 months if discharged overseas. The effect of this section will be to safeguard for this extra period the rights of a man who returns in a handicapped condition. (Sec. 9.)
- (h) Where an employer claims (under Sec. 4 (e) of the Act) that an applicant is not eligible for reinstatement since he was employed to take the place of an employee who had previously entered the Forces, the employer must prove that the applicant was employed directly or indirectly to take the place of the other employee and would not have been employed if the other employee had not left. (Sec. 10.)
- (i) Reinstated employees are to be promoted or given such pay increases as it may be the practice to give for length of service with the employer, taking into account the time spent in the Armed Services. Account must be taken also of any useful skill acquired while with the Services in cases where wage rates are adjusted on the acquiring of new skill. (Sec. 11.)
- (j) Where an employee after being with an employer for a specified length of time acquires permanent status or is entered on the seniority lists, time spent with the Forces is to be counted in determining status with the employer. (Sec. 11.)
- (k) Where it is the policy of the employer to give a vacation with pay, time spent with the Forces is to be counted as time in the service of the employer in arriving at the amount of vacation to be given, subject, however, to the reinstated employee being actually in the employment for 90 days in the calendar year after reinstatement—except that an employer may, in accordance with existing practice or under a collective labour agreement, deal more generously with a reinstated employee on the vacation question. (Sec. 12.)

The Regulations also cover details of the enforcement of the Act and the Regulations, and the duties of the Reinstatement Officers.

In announcing the Regulations the Minister declared that it was hoped by the Government that they would assist employers and their returning employees to adjust any problem cases which arise. "I think that 'magnificent' is the proper word to describe the helpful attitude of employers on this subject of reinstating discharged members of the Forces—and at the same time I should add that the individual employee returning to his old job has been most co-operative in ironing out any difficulties. All in all, the Act appears to be working out even better than could have been anticipated."

The text of the new Regulations is as follows:—

Text of Reinstatement Regulations

P.C. 77

Whereas The Reinstatement in Civil Employment Act, 1942 made provision for the reinstatement of members of His Majesty's forces in civil employment after discharge;

And whereas the Minister of Labour reports that it is necessary to make regulations to carry out the purposes and intentions of the Act under section eleven of the said Act;

That difficulties have arisen in the interpretation of the said Act and in the application of the said Act to circumstances that were not contemplated at the time the Act was passed; and

That it is therefore, by reason of the war, deemed necessary, for the security, defence, peace, order and welfare of Canada, to make regulations defining the rights of persons to reinstatement in civil employment pending reconsideration of the said Act by Parliament;

Therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and under the authority of the War Measures Act and The Reinstatement in Civil Employment Act, 1942, is pleased to make the following regulations and they are hereby made and established accordingly.

The Reinstatement Regulations

1. These regulations may be cited as THE REINSTATEMENT REGULATIONS.

2. In these regulations, unless the context otherwise requires,

- (a) "Act" means The Reinstatement in Civil Employment Act, 1942;
- (b) "applicant" means a person who is or claims to be entitled to reinstatement under the Act;
- (c) "Minister" means the Minister of Labour;
- (d) "reinstatement" means reinstatement under the Act;
- (e) "reinstated employee" means an employee who has been reinstated under the Act;
- (f) "Reinstatement Officer" means a person designated as such under these regulations;
- (g) "Selective Service Officer" means a National Selective Service Officer appointed under the National Selective Service Civilian Regulations; and
- (h) other words and expressions have the same respective meanings as in the Act.

3. For the purposes of the Act and these regulations, where a man has,

- (a) upon being served with an order requiring him to report for military training, service or duty under regulations made by the Governor in Council, or
- (b) in the belief that he has been or will be accepted for service in one of His Majesty's armed forces, left his employment to comply with the order or to enter the service,
- (c) he shall be deemed to have been accepted for service in His Majesty's forces at the time he left the employment whether that time is before or after the time these regulations come into force; and
- (d) his service in His Majesty's forces shall be deemed to have been terminated when he ascertained that he was not being accepted for service therein whether that time is before or after the time these regulations come into force.

4. Where, after termination of his service in His Majesty's forces, a person receives hospital treatment or is physically or mentally incapable of performing work to which he would have been entitled upon reinstatement, the period of the treatment or incapacity shall, upon reinstatement thereafter, be deemed to have been a period of service in His Majesty's forces for the purposes of section three of the Act.

5. Where the Minister or a Selective Service Officer has, within the period described in paragraph (a) of section four of the Act, directed or requested a person entitled to reinstatement to accept other employment and the person so directed or requested accepts the employment, his service in His Majesty's forces shall be deemed not to have been terminated for the purposes of the Act until the termination of the work which he has been so directed or requested to accept.

6. Where an employer's employees are employed in various establishments and it is not reasonably practicable to reinstate an applicant in the establishment in which he was employed at the time he was accepted for service in His Majesty's forces, the employer shall reinstate the applicant in one of his other establishments in Canada if

- (a) it is reasonably practicable so to reinstate him; and
- (b) it is or has been the policy or practice of the employer to transfer employees in the applicant's classification from one establishment to another.

7. (1) An applicant may apply to the employer verbally or in writing for reinstatement.

(2) The Minister may prescribe forms to be used in applying for reinstatement but an application is not invalid or defective because it is not in prescribed form.

(3) The fact that an employer has offered to reinstate a former employee within the period described by paragraph (a) of section four of the Act but before the employee has applied for reinstatement does not affect the employee's right to apply for reinstatement at a later time within the said period, and, notwithstanding section four of the Act, it is not a defence in proceedings for a violation of section three of the Act for the employer to prove facts described by paragraph (b) of section four of the Act unless he also proves that the employee applied for reinstatement before he offered reinstatement to him.

(4) For the purposes of the Act and these regulations, if an applicant inquires about reinstatement but does not expressly apply for reinstatement he shall be deemed not to have applied for reinstatement.

8. (1) A person who has been offered reinstatement may accept the offer without prejudice to a claim that it does not comply with the requirements of the Act.

(2) Where an applicant, having been offered reinstatement by the employer and having presented himself for employment, is of opinion that the employment offered does not comply with the requirements of the Act, he may apply for assistance to a Reinstatement Officer in person or in writing.

(3) Failure of a person who has applied for assistance under subsection two of this section to perform the duties of the employment during a period when he is being assisted by a Reinstatement Officer shall, for the purposes of section five of the Act, be deemed not to be reasonable cause for terminating the employment.

(4) The fact that an applicant has applied to a Reinstatement Officer for assistance under this section shall, for the purposes of paragraph (b) of section four of the Act, be deemed to be a reasonable excuse for failing to present himself for employment during the period when he is being assisted by the Reinstatement Officer.

9. (1) If an employer claims that an applicant is physically or mentally incapable of performing work available in the employer's service, a Reinstatement Officer may arrange for a medical examination of the applicant.

(2) Where, upon discharge from His Majesty's forces, a person is physically or mentally incapable of performing work available in the service of the employer by whom he was employed when accepted for service in His Majesty's forces, he may notify the employer, during the period described by paragraph (a) of section four of the Act, that he intends to apply for reinstatement when he is capable of performing the work, and, where a person has so notified an employer and has, within nine months after discharge in Canada from the service or from hospital treatment following discharge in Canada or within ten months after discharge overseas or from hospital treatment following discharge overseas, made one or more applications for reinstatement, it is not a defence in proceedings for a violation of section three of the Act for the employer to prove

(a) that the applicant was physically or mentally incapable of performing work available in the employer's service unless he proves that the applicant was so incapable at the time of the last application for reinstatement made within the said period of nine or ten months, as the case may be;

(b) the facts described by paragraph (a) of section four of the Act; or

(c) the facts described in paragraph (b) of section four of the Act, unless he proves that the applicant applied for reinstatement before he offered to reinstate him.

10. Proof, for the purposes of paragraph (e) of section four of the Act, that an applicant was employed to take the place of an employee who had been previously accepted for service in His Majesty's forces may only be made by proving that the applicant was employed directly or indirectly to take the place of the other employee and would not have been employed if the other employee had not left the employment.

11. (1) Where there is a practice or policy of paying graduated scales of wages and where increases are given to employees principally on the basis of length of service, it shall be deemed, for the purposes of the Act, that increases are given on the basis of length of service only and in any such case the employer shall, upon reinstatement of an applicant in his previous classification, remunerate him at the rate at which he would, on that basis, have been remunerated if his service in His Majesty's forces had been service with the employer.

(2) Where there is a practice or policy of giving increases in wages to employees by reason of acquired skills, experience or training, the employer shall, as soon after an applicant has been reinstated as he has manifested the skills, experience or training, give to the applicant the increases which he might have been given if the relevant skills, experience or training acquired in His Majesty's forces had been acquired in the employment.

(3) The employer shall grant to a reinstated employee upon reinstatement or as soon as thereafter as is reasonably practicable every promotion to which he would have become entitled by reason of length of service or seniority if the time spent by the reinstated employee in His Majesty's forces had been spent in the service of the employer.

(4) Where, under the terms of employment, whether under a collective agreement or otherwise, employees obtain a permanent status in the employment or are entered on the seniority lists after having been in the employer's services for a fixed period, service in His Majesty's forces shall be deemed to have been service with the employer for the purposes of determining

- (a) his status or position insofar as it affects his right to reinstatement; and
- (b) his status or position after reinstatement.

12. (1) Subject to the other provisions of this section, for the purpose of determining a reinstated employee's right to vacation with pay for the calendar year in which he is reinstated and all subsequent years, the period of service in His Majesty's forces shall be deemed to be time spent in the service of the employer.

(2) Subject to subsection three of this section, a reinstated employee is not entitled to vacation with pay for the calendar year in which he is reinstated unless he is in the employment ninety days in the calendar year after reinstatement.

(3) Notwithstanding these regulations, the employer may, in accordance with his existing practice or policy or in accordance with a collective labour agreement or otherwise, grant vacation with pay commencing at any time after reinstatement.

13. The Minister may designate any person as a Reinstatement Officer to assist in the administration and enforcement of the Act and these regulations and may issue to a Reinstatement Officer a certificate of his designation as such.

14. (1) A Reinstatement Officer may, for the purpose of enforcing and administering the Act and these regulations,

- (a) enter at all reasonable times any premises or place, other than a private dwelling house not being a workshop, where he has reasonable grounds for supposing that an applicant was employed before being accepted for service in His Majesty's forces;

(b) make such examination and inquiry as may be necessary for ascertaining whether the provisions of the Act and these regulations are being complied with in any such premises or place; and

- (c) examine orally, either alone or in the presence of any other person, as he thinks fit, with respect to any matter arising under the Act or these regulations, any person whom he finds in the premises or place, and require a person so examined to sign a declaration as to the truth of the statements made by him with respect thereto.

(2) Every person shall forthwith furnish to a Reinstatement Officer such information as the Reinstatement Officer may reasonably require in connection with the enforcement or administration of the Act or these regulations and shall produce for inspection every register, book, card, wage sheet, record of wages or other document that he reasonably requires in that connection.

(3) The production of a document purporting to be a certificate of designation as a Reinstatement Officer signed by or on behalf of the Minister is evidence of the designation and a Reinstatement Officer applying for admission to any premises or place under this section shall, if required, produce his certificate of designation.

15. (1) Subject to subsection two of this section, information, written or verbal, obtained under these regulations shall not be disclosed to any person except the Minister or his officers in the course of their employment.

(2) The Minister or a Reinstatement Officer may—

- (a) disclose to an applicant or any person acting on his behalf, such information as may be necessary for the enforcement of his rights under the Act or these regulations;
- (b) disclose information obtained under these regulations to a department of the Government or to a Court in connection with the administration or enforcement of the Act or these regulations.

16. (1) Any person who—

- (a) refuses to supply information as required by these regulations;
- (b) obstructs, hinders or delays a Reinstatement Officer in making an inspection of registers, books, cards, wage sheets, records of wages and other documents under these regulations; or
- (c) fails or refuses to produce a register book, card, wage sheet, record of wages or other document, as required by these regulations

is guilty of an offence and liable, on summary conviction, in the case of a corporation to a fine of not less than one hundred dollars and not more than one thousand dollars and in the case of any other person to a fine of not less than twenty-five dollars and not more than five hundred dollars.

(2) Every person who contravenes any of the provisions of these regulations is guilty of an offence and, where no penalty is expressly provided, liable on summary conviction, in the case of a corporation to a fine of not less than one hundred dollars and not more than one thousand dollars and in the case of any other person to a fine not exceeding two hundred dollars.

17. Where there is any conflict between the provisions of the Act and the provisions of these regulations, the regulations prevail

Manpower

Manpower Control Measures During January

Key Workers Retained in Munitions Industry—Call-up of Men Discharged from Armed Services—Other Measures

MEASURES taken by National Selective Service during the past month to ensure an effective use of available manpower included the following:—

1. A ruling that men discharged from the Armed Services who have not seen service outside Canada will in future be subject to call-up for Army training.

2. An Order-in-Council providing for the retention in munitions work of trained key workers in age classes subject to the call-up, and specifying draftsmen, toolmakers and tool designers working in war industry as subject to this Order.

3. Instructions to customs officers at border points not to permit men subject to the call-up to leave Canada unless they have written permission from a Mobilization Board.

The check-up of male employees to make sure that they are in good standing under the Mobilization Regulations is continuing. Contraventions of N.S.S. Civilian Regulations, such as engaging workers without permits, or leaving employment without giving notice of separation, continue to be subject to prosecution.

Call-up of Men Discharged from the Armed Services

National Selective Service has issued instructions that generally speaking, all men discharged from the Armed Services who have not had service outside Canada will be subject in future to call-up for Army training if in an age and marital class designated under Mobilization Regulations.

The new rule, which went into effect on January 15, cancels the previous practice of not calling up men who have had three years' or more service in Canada only.

Those who are discharged after service with any branch of the Canadian Forces overseas,

or after service with the Royal Canadian Navy in international waters, will not be called up following discharge, and also the same exemption extends to those with the R.C.A.F. who have been on operational duty on either of the Canadian coasts.

This means that a man who has seen service in the Aleutians, Greenland, Baffinland, Iceland, Labrador, Newfoundland, Bermuda, British West Indies, Australia and the Far East, Europe, Asia and Africa, is not subject to recall.

Similarly, men discharged from the R.C.A.F. who have been on operational duty on either the East or West Coast, flying over the territorial waters of Canada, are not liable for further military duty.

For the Navy, the governing factor is whether a man was ordered to and did proceed outside the mainland of Canada in a ship or vessel. If so, such a man is not subject to recall for military duty.

Exemption of Special Aircrew Reserve

It is pointed out, however, that one class of R.C.A.F. personnel who may not have served outside Canada, will not be subject to call after separation from the Air Force. The revised regulations do not make liable for Army call the graduated aircrew personnel who are transferred to the Special Aircrew Reserve of the R.C.A.F. The Defence Departments and National Selective Service recognize that with the closing of the training plan these personnel constitute an essential source of aircrew reinforcements for the R.C.A.F. immediately available to meet commitments for the European War and the subsequent Japanese phase. All these personnel have received a personal letter clearly outlining their status, and machinery has been set up to ensure that they will be readily available for immediate recall when required. However, ground crew personnel, including officers, will be liable to call-up.

Direction to Essential Employment under Call-up

If the medical category of any discharged man now made liable to call-up is below the point at which the Army will accept his services, he will be liable to direction by National Selective Service to essential employment in civilian industry. Similarly, any discharged man not callable by reason of not being in an age or marital class subject to Mobilization Regulations, may be directed to essential work.

The new regulation applies only to men discharged on January 15, 1945, or later, and for the present will not have retroactive effect for those discharged earlier. It follows as a result of recommendations from several of the Mobilization Boards, the National Selective Service Advisory Board and discussions between a committee of senior officers of the three Armed Services—Navy, Army and R.C.A.F.—and officials of National Selective Service.

It is explained that the new ruling has been made with two main objectives in mind. One is to avoid a situation where men with service in Canada only for three years or longer would be excused from further military duty, at a time when it would be impossible to release men who are serving in a field of actual operations, who may be required to continue in service for a much longer period. The other objective is to secure the additional men needed for the Army, and by essential industry. It was further pointed out that regulations already exist under which men who transfer voluntarily to the Army receive certain credits for services in the Navy or R.C.A.F.

Retention of Trained Key Workers in Munitions Industry

An Order in Council of January 25 (P.C. 496) makes further provision for retaining in munitions production certain trained key workers who are in designated age classes under the Mobilization Regulations and for whom replacements cannot be obtained.

The Order provides that any man classified as a "War Industry Reservist" shall be granted a postponement order for an unlimited period of time, subject, however, to cancellation should the man cease to be so classified.

Limiting the coverage of the Order for the time being to the three classifications, draftsman, toolmaker and tool designer, the Order defines, a War Industry Reservist as follows:—

"War Industry Reservist" means a man in a designated age class fit for military service and employed in an industrial establishment at least eighty-five per cent of the produc-

tion of which, as determined by the Department of Munitions and Supply, is for war purposes and who is employed in such establishment as a tradesman in, or as an apprentice with at least two years' experience in, any of the following occupational classifications namely; draftsman, toolmaker, tool designer, or any other occupational classification hereafter designated by the Minister of Labour.

The Minister of Labour, with the concurrence of the Minister of National Defence, may from time to time add to or subtract from the list of occupational classifications included in the definition of War Industry Reservist contained in the Order.

Check-up at Border Points

Beginning February 1, 1945, customs officers at border points have instructions not to allow any man to leave Canada if he requires permission from a Mobilization Board but fails to produce the necessary document, according to an announcement made on January 31 by the Minister of Labour.

Men in age groups designated under Mobilization Regulations can only leave Canada, regardless of the length of time they plan to be absent, with the permission of the Chairman or Deputy Chairman of a Mobilization Board.

In very rare cases, such as a hurried visit due to serious family sickness, a customs officer may permit a man to cross the border after very careful questioning; but in almost all cases the rule will be rigidly enforced.

It was pointed out by National Selective Service that the permission of the Chairman or Deputy Chairman of a Mobilization Board to leave Canada temporarily does not remove the necessity for having a labour exit permit where such permit is necessary.

Commuters and those men who cross the border frequently while engaged at their work, as for example, workers in the transportation industry, are required to have permission from a Mobilization Board in the same manner as other men, but commuters and transportation workers were allowed a few days to secure the necessary documents, and in the meantime were not stopped from crossing the border.

Check-up Under Mobilization Regulations

Up to December 30, 1944, employers reported to Mobilization Registrars on 44,336 cases where the standing of male employees under Mobilization Regulations was in doubt. Of the total, 8,812 men were found to be not in good standing after a check of the records.

Orders issued last year by Hon. Humphrey Mitchell, Minister of Labour, under authority of Mobilization Regulations require all

employers to check on the documents of male employees, to find whether each employee is in good standing under Mobilization Regulations (L.G., Sept., 1944, p. 1096). Under these orders an employer is required to report to the nearest Mobilization Registrar on any doubtful case. At the end of December only 868 cases, out of the total of 44,336, were still being checked. The 8,812 men found not to be in good standing had been dealt with, or were being dealt with under the Military Call-up.

Contravention of National Selective Service Civilian Regulations

A total of 122 persons were convicted during December, 1944, of failing to comply with National Selective Service Civilian Regulations.

During the month, 82 new prosecutions were commenced, in addition to 343 cases carried over from the previous month. In November, 149 new prosecutions were started.

The December judgments included 15 against employers, most of whom were found guilty of engaging workers without permits. Of 67 employees convicted, a majority were charged with leaving employment without giving notice of separation, quitting "designated" high priority work without Selective Service permission, or failing to accept high priority work when referred by a Selective Service officer.

Forty conscientious objectors were convicted of failing to follow a direction to report to an alternative service work camp.

At January 1, a total of 256 cases were still pending—14 being charges against employers, 100 against employees, and 142 against conscientious objectors.

Since August, 1942, when prosecutions were first commenced under National Selective Service Regulations, a total of 1,789 charges have been laid. There have been 1,207 convictions to date, 38 acquittals, and 288 cases not proceeded with.

Labour-Management Production Committees in United States

AN analysis of labour-management production committees in the United States, carried out by War Production Drive Headquarters in Washington, provides figures as to the establishment of the committees in various industries.

At September 15, 1944, there were almost 5,000 committees, representing over 7,000,000 workers. The greatest concentration of committees was in shipbuilding and ordnance, in each of which industries over a million employees were covered.

Details are contained in the following table:

LABOUR-MANAGEMENT PRODUCTION COMMITTEES IN UNITED STATES, BY INDUSTRIAL CLASSIFICATION

(as of September 15, 1944)

Industrial Classification	Number of Committees	Number of Employees
Shipbuilding and Ship Parts.....	196	1,132,310
Ordnance (includes all types of gun manufacture, ammunition and tanks).....	587	1,162,260
Aircraft and Aircraft Parts (includes airframe, aircraft parts and propeller manufacturing).....	171	811,540
Iron and Steel (includes blast furnaces, rolling mills, steel plants, steel fabrication plants and iron foundries).....	505	728,710
Engine and Engine Parts (includes aircraft, marine and tank engines).....	115	404,090
Coal and Iron Mines.....	428	178,000
Communication Equipment (includes telephone, telegraph, radio and radar equipment and communication wire).....	248	294,540
Machinery and Industrial Equipment (includes electrical machinery and industrial equipment except machine tools).....	416	286,660
Synthetic Products (includes products and materials of chemicals, glass and paper).....	316	200,390
Scientific Instruments (includes navigation instruments, range finders, etc.).....	98	171,440
Machine Tools.....	199	136,430
Motor Vehicles.....	80	117,220
Non-Ferrous Metals (includes the mining and smelting processes).....	241	164,100
Textile and Textile Products.....	252	144,810
Lumber and Wood Products.....	125	29,350
Leather and Leather Products.....	60	22,300
Petroleum Products (includes refining).....	32	28,650
Rubber and Rubber Products.....	58	83,850
U.S. Naval Shore Establishments (employment in U.S. Naval Shore Establishments not obtainable by regions).....	46	748,600
All Others (includes safety equipment, miscellaneous hardware, plumbing supplies, food products, railroads, airlines, and Government Agencies).....	632	420,280
Total (All Classifications).....	4,835	7,265,530

Recommendations of Boards of Conciliation on Union Security

Disposition of Union Requests for Closed or Union Shop and Check-off During 1944

DURING the year 1944, 25 disputes arising from a union's request for union security and check-off clauses in a collective agreement were investigated by Boards of Conciliation appointed under the Wartime Labour Relations Regulations (P.C. 1003) or under the now superseded Industrial Disputes Investigation Act.

The forms of union security that have generally been asked for by unions are the closed shop or the union shop. Under a closed shop agreement the company agrees to hire and retain in its employment only union members in good standing. Under a union shop agreement a company may hire non-union members, but these new employees must join the union within a specified period of time.

In no case has a Board of Conciliation recommended a closed shop agreement, but a union shop has three times been recommended in majority reports, with the employer's nominee disagreeing in every instance. In two of these cases a modified form was recommended which does not require existing employees who are non-union members to join the union, but requires all new employees to join after a specified time.

Maintenance of Membership

Where the union shop has been refused Boards have frequently recommended a maintenance-of-membership clause as a compromise measure of union security. Such an agreement requires all employees who are union members when the agreement is signed, and all those who subsequently become members, to retain their membership as a condition of continued employment. Maintenance of membership was unanimously recommended four times by Boards, and eight times in majority reports.

Recommendations of the various Boards dealing with these three forms of union security were as follows during 1944:—

<i>Union shop</i>	
recommended in majority report.....	3
opposed unanimously	1
<i>Maintenance of membership</i>	
recommended unanimously	4
recommended in majority report.....	7
opposed in majority report.....	1
opposed unanimously	3
Union security issue voluntarily dropped by union	4
Union security issue to be conditional.....	1
	24

In cases where maintenance of membership was unanimously opposed, or the union security issue voluntarily dropped by the union, two factors frequently operated. Boards have several times ruled that such a clause should not be granted where the union has had less than a year's experience of collective bargaining; and the check-off has frequently been granted in place of union security. In one case a Board unanimously declined to make a recommendation on union maintenance or the check-off because of doubt as to the authority of a Board to make such a recommendation under P.C. 1003.

Check-off

Requests for the check-off of union dues have had a favourable result for the union in a majority of cases, as shown in the following table:—

<i>Check-off</i>	
recommended unanimously	6
voluntarily agreed to by employer.....	3
recommended in majority report.....	6
opposed in majority report.....	1
opposed unanimously	4

20

In two of the six cases where the check-off was unanimously recommended, union security was not recommended; in two other cases the check-off was accompanied by a majority recommendation for a modified form of union shop; and once, by a unanimous recommendation for maintenance of membership.

Where the check-off was unanimously opposed, the reason given on two occasions was that the union's request was premature; once (as noted above) that the Board doubted its power to make such a recommendation; and once because of the small number of employees concerned "and the other circumstances of the case." In the latter case maintenance of membership was unanimously granted.

The type of check-off clause generally favoured by Boards is the so-called "voluntary" form, under which each employee must make a written submission to the employer, authorizing him to deduct each month the amount of the union dues, and to remit the amount to the union treasurer.

Under the Wartime Labour Relations Regulations, Boards of Conciliation are appointed when negotiations for an agreement have been unsuccessfully continued for thirty days following certification of bargain-

ing representatives; and, further, a conciliation officer has been unable to bring about a settlement and reports that in his view an agreement might be facilitated by the appointment of a Board.

Boards consist of representatives of employers and employees and a neutral chairman. Their recommendations are not binding on the parties to a dispute.

The matters under consideration by Boards, which before the war under the Industrial

Disputes Investigation Act encompassed the whole field of labour relations, including wages, union recognition, and working conditions, have under the Wartime Labour Relations Regulations been almost exclusively concerned with union security and the check-off, since wage questions now come within the jurisdiction of the National War Labour Board, and questions of union recognition are settled in an earlier stage of proceedings under the Regulations.

Dismissal-Pay Provisions in Union Agreements

A SURVEY of some 9,500 current union agreements in the United States, conducted during December by an official of the Bureau of Labor Statistics at Washington, revealed that approximately 450 of the agreements contained dismissal-pay clauses, covering some 135,000 workers. Roughly five-sixths of these agreements were negotiated by affiliates of the two major labour organizations, the C.I.O. and the A.F.L., and the remainder by various other unions. The results of the survey, together with a treatise on the intent of the varying forms of dismissal-pay clauses, were published in the January issue of the *Monthly Labor Review*, the Bureau's official publication.

At the outset, the treatise defines dismissal pay as a payment, in addition to wages or salary, of a sum of money by an employer to an employee who is laid off or discharged through no fault of his own. In almost all cases studied the amount of this dismissal pay was based on the employee's length of service with the company, his rate of pay during such employment and also on the reason for dismissal. It was found, however, that a few of the plans made no distinction as to the reasons for dismissal and provided payment to employees discharged for cause, as well as to those who retired or resigned. A week's wages, or a month's salary was usually the unit for determining dismissal pay. In most instances length of service determined the amount paid to the individual worker in terms of either a number of weeks' or months' pay, the amount being generally less if the separation from employment was due to the worker's incompetence, rather than for business reasons.

It was pointed out that, although dismissal pay is designed to ease the burden resulting from unemployment, it differs basically from unemployment insurance. The latter is usually financed from a fund to which employer, employees and the Government contribute,

whereas dismissal pay is financed solely by the employer and is usually paid in a lump sum. Unemployment insurance provides weekly, or bi-weekly, or monthly payments, varying not only with length of insurable employment but also determined by conditions of availability for other employment, etc. On the other hand, current union agreements that provide for dismissal pay do not distinguish between temporary lay-offs and permanent separation.

Some agreements, notably those covering clerical or professional workers, do not use the term "lay-off"; others use the term to denote dismissals; while still others allow dismissal pay to workers "laid off or dismissed." Thus the term "dismissal pay" is seen to be by no means uniform in union agreements. The phrases, "severance pay", "severance compensation", "termination allowance" "separation pay", etc. are also found. Then too, such agreements usually provide against loss of seniority, if an employee is re-hired within a stated time.

In addition to the dismissal-pay plans in agreements arranged between individual employers and unions are those provided by law or by arbitration to take care of special conditions in given industries. For example, in 1943 the Congress of the United States amended legislation in order to provide dismissal pay for certain telegraph workers whose jobs were terminated as a result of a merger of telegraph companies.

According to the treatise, dismissal pay, or compensation, has not been common in American industry. "When adopted, it has most frequently been applied to lay-offs caused by technological improvements or to retrenchments involved in consolidations. In only a few industries, notably newspaper publishing and railroad transportation, have such provisions been adopted to any considerable extent through collective-bargaining procedures."

Decisions of National War Labour Board

DURING the month of January, the National War Labour Board issued decisions in the following cases:—

Hamilton Spectator and Hamilton Typographical Union No. 129.

Messrs. Seligman and Latz (New York).

Hammond Cedar Company, Limited, and International Woodworkers of America, Local 1-367.

Proctor and Gamble Company of Canada, Limited (Hamilton).

Various Coal Mining Companies of Nova Scotia and New Brunswick.

Harry Hayley and Ottawa General Workers' Union, Local No. 1 (C.C.L.).

Oil Well Supply Company (Calgary).

Old Sydney Collieries Limited and United Mineworkers of America, District 26.

Mortgage and Discount Corporation of Canada.

Western Grocers Limited (Regina) and Canadian Distributors' Union, Local No. 1.

Neon Products of Western Canada Limited (Vancouver).

Modern Press Limited and Saskatoon Typographical Union No. 663.

Retail Merchants' Association of Canada, Inc. (Fur Division), and National Clothing Workers' Union Inc.

Grand Trunk Pacific Development Company Limited (Prince Rupert Drydock and Shipyard) and certain unions.

Canadian National Railways and Canadian Pacific Railway and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Freight Handlers, etc., at Montreal Wharf, P.Q.).

Ottawa Electric Railway Company and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division No. 279.

Canada Steamship Lines Limited and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Water Front Freight Handlers, Checkers, Coopers, etc., at Quebec, Montreal, Toronto, Hamilton, Sarnia-Point Edward, Windsor, Port Arthur, Fort William).

Canadian Pacific Railway Company and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Hourly rated Freight Handlers, etc., at Port McNicoll).

Eastern Canada Stevedoring Company Limited, Halifax, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Freight Handlers, etc., at Halifax).

Canadian Pacific Railway Company and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Freight Handlers, etc., at West Saint John).

Re: The Hamilton Spectator and Hamilton Typographical Union No. 129

Reasons for Decision

This is an appeal by the employer from a decision of the Ontario Regional Board dated September 7, 1944, directing approximately the equivalent of a 4-cent hourly increase in the wage rates paid to its composing room employees. The required leave to appeal was granted by the Regional Board.

Although the Regional Board appears to have granted the increase under the "appropriate maximum cost-of-living bonus" provision of section 20 (1) (b) of P.C. 9384, an examination of the various wage increases since August, 1939, by way both of increases

in the basic rates and payments of cost-of-living bonus, discloses that the 4-cents now under appeal were only partially allowable under that provision. That being the case, the increase must justify itself under the "gross inequality" rule of paragraph (a).

We have come to the conclusion that taking a fairly broad basis of comparison the increase is not one which can be said to be altogether unjustifiable and we shall not interfere with the decision of the Regional Board.

The appeal is, therefore, dismissed.

January 8, 1945.

*Re: Messrs. Seligman and Latz (New York)**Reasons for Decision*

The above-named are concessionnaires of a beauty salon in the David Spencer Limited department store in Vancouver. They apply for leave to appeal from two decisions of the Regional War Labour Board for British Columbia respectively dated March 4, 1944, and March 25, 1944, and declaring the employees in the salon entitled to a cost-of-living bonus of 19 per cent of their weekly wage rates from January 1, 1942 and, for the purposes of wage control, that David Spencer Limited were the employer of these employees.

The request for leave to appeal was made to the Regional Board after the expiration of the period of 30 days stipulated in section 11 (1) (a) of P.C. 9384 and was refused, but it was made to this Board within the period of 60 days of paragraph (b) of the subsection; because of the nature of the case we think that leave should be granted.

First, with respect to the question of employment, it appears from the agreement between the appellants and the Spencer Company dated January 12, 1939, copy of which is filed in this appeal, that, although the Company acts in some respects as agents for the appellants who agree to operate the hair-dressing department in accordance with many of the general rules prevailing for the department store as a whole, it seems fairly clear that the wages of the employees in this particular department are determined and paid by the appellants and that the real employer-employee relationship is between the appellants and the employees. We do not think that it was appropriate to declare David Spencer Limited to be the employer "for the purpose of the Wartime Wages Control Orders", when the contract of service appears to run in reality with the appellants.

On the issue of cost-of-living bonus, it is necessary to relate the sequence of events indicated by the file. There was correspondence between the Spencer Company and the appellants concerning payment of a bonus, which was estimated in a letter of September 12, 1941, at 15 per cent and referred to in a subsequent letter from the Company dated

March 27, 1942, as a "compulsory bonus". On March 31, 1942, the appellants wrote as follows:—

Received your letter of the 27th and wish to advise that it is satisfactory for our employees to share in the bonus the same as other store employees. This is to be effective as of January 1, 1942.

The first wages control order (P.C. 8253) had then come into operation and at the time of this correspondence there was in fact no compulsory bonus payable, unless payment had been commenced in accordance with the provisions of section 12 of that order, which does not appear to have been the case here. In any event, a complaint having been made to the Regional Board by certain employees paid on a commission basis about the computation of the bonus, instructions were issued by the Board on September 28, 1943 to discontinue payment of the 19 per cent additional payment, presumably as being unauthorized, and to commence payment of cost-of-living bonus in accordance with the General Order of the National Board dated August 4, 1942.

Later, after passage of the current order P.C. 9384, the matter came to the Regional Board again and the decisions now under appeal were made, revoking in effect although not in terms the direction previously given on September 28, 1943, under a different order P.C. 5963, successor to P.C. 8253.

We believe that the present appeal can be disposed of on the short ground that the Regional Board should not have revoked its prior instructions. We are inclined to the view that these instructions were correct under the Order in Council then in effect and also that section 30 (1) of P.C. 9384 does not give a war labour board power to rescind or revoke a direction or order made by it under P.C. 5963 or P.C. 8253.

The decisions of the Regional Board under appeal will, therefore, be set aside and the appellants will be governed by the instructions of September 28, 1943, and subsequent orders of general application with respect to payment of cost-of-living bonus.

January 8, 1945.

*Re: Hammond Cedar Company, Limited and International Woodworkers of America, Local 1-367**Reasons for Decision*

This is an appeal by the employer from a decision of the Regional Board for British Columbia dated January 31, 1944 (amended on February 2, 1944). Leave to appeal was granted by the Regional Board. The decision under appeal was issued under the provisions

of the former Wartime Wages Control Order, P.C. 5963.

The Finding and Direction under appeal ordered the employer to pay from December 4, 1943, a schedule of wage rates in respect of the occupational classifications engaged in its milling operations. There is a single rate

or a range of rates set out for each classification and there are no female rates mentioned in the schedule. The Company is seeking to have established by this Board a somewhat lower rate for women who are employed on some of the jobs. The Company also appealed in respect of the rates ordered for a number of specific classifications: crane operators, welders, etc. and of the incentive rate for sawyers and clippers on a hand-operated shingle machine.

With respect to rates for women employees, the appellant advanced some evidence that female labour was less productive than male labour on a particular machine operation. We find that evidence insufficient and rather inconclusive. The base labour rate in the mill being 65 cents, we have come to the conclusion that, for the type of work in which they are actually engaged, women should attain that rate in periodic increases as follows:—

- Floor Woman;
- Picking Kindling Wood out of Conveyor;
- Grading;
- Tying Up;
- Picking Stock for Tie Plug Machines;
- Tie Plug Machine Operators;
- Packing Tie Plugs in Boxes;
- General Work in Planer Mill;
- Piling Moulding and Short Stock on Trucks;
- Stencilling;
- 1st 4 months—50 cents per hour.
- 2nd 4 months—55 cents per hour.
- 3rd 4 months—60 cents per hour.
- Thereafter—65 cents per hour.

As to the other rates involved, we are of the opinion, as a result of a comparative

examination, that the basic rates set by the Regional Board for the following occupational classifications should be revised and be as follows:—

<i>Classifications</i>	<i>Basic Wage Rate</i> (pr. hr.)
Crane Operator—No. 1.....	90¢
Crane Operator—No. 2.....	85¢
Crane Operator—No. 3.....	75¢
Gang Sawyer —No. 2.....	85¢

(When a spare man operates the gang saw, he should be paid the gang sawyer's rate and when assigned to other work he should be paid the rate applicable to the job which he performs.)

Vertical Resaw Man (small machine) ..	80¢
Vertical Resaw Man (large machine) ..	85¢
Welder No. 1—Day Man.....	95¢
Welder No. 2	90¢
Automatic Trimmerman	90¢

INCENTIVE RATE—HAND SHINGLE MACHINE

<i>Classifications</i>	<i>Hourly Base Rate</i>	<i>Incentive Rate per Square</i>
Sawyer	80¢	33¢
Clipper	68¢	27.8¢

The Union introduced a new feature before this Board with regard to rates for the classifications engaged on power shingle machines. As these were not before the Regional Board, we shall not deal with them in disposing of this appeal.

Finding and direction accordingly.

January 12, 1945.

Re: Proctor and Gamble Company of Canada, Limited (Hamilton)

Reasons for Decision

This is an appeal by the Company, leave having been granted below, from a Finding and Direction dated August 25, 1944, of the Regional War Labour Board for Ontario declining to authorize the payment of a night differential of five (5) cents per hour to all hourly paid workers for work performed between the hours of 7:00 p.m. and 7:00 a.m.

This type of compensation under wartime wage control had its origin in the Ford Motor Company case (L.G., May, 1943, p. 585) when the Board said:—

The present application should not be taken as any precedent except as to the cases of employers engaged in the production of munitions and supplies. . . . While each applica-

tion must, of course, be dealt with on its individual merits, the National Board considers that what we are dealing with primarily are industries engaged in war production.

These considerations do not appear to be applicable in this case; in fact the request would appear to stem from the fact that for some time the parent company in the United States has been paying such a premium.

The observations of this Board in the Cockshutt Plow Company, Massey-Harris Company and International Harvester cases (L.G., Dec., 1944, p. 1475) are also relevant in some respects to this case.

We do not find reason to disturb the decision appealed from, and the appeal is dismissed.

January 12, 1945.

Re: Various Coal Mining Companies of Nova Scotia and New Brunswick as follows: Dominion Coal Co., Ltd. (Cape Breton and Springhill Mines), Acadia Coal Co., Ltd., Old Sydney Collieries, Ltd., Avon Coal Co., Ltd., Minto Coal Co., Ltd., Miramichi Lumber Co., Ltd., Welton and Henderson, Ltd., G. H. King, Newcastle Coal Co., Ltd., Cumberland Railway and Coal Co., Ltd., Franklyn Coal Co., Ltd., Bras d'Or Coal Co., Indian Cove Coal Co., Joggins Coal Co., Standard Coal Co., Hillcrest Coal Co., E. S. Crawford Coal Co. and United Mine Workers of America, District No. 26.

Reasons for Decision

This is an application by the Union on behalf of certain employees of the above Companies for the following:—

1. Levelling up of all datal rates to the rates paid under the agreement between District 18, United Mine Workers of America, and the Western Canada Bituminous Coal Operators' Association.
2. Two weeks' vacation with pay.
3. Payment of contract miners by the short ton, instead of the long ton, as at present; and an increase of twenty per cent in contract rates.
4. Time and a half for overtime and double time for Sundays and statutory holidays for all employees.
5. Elimination of boys' rates.
6. A separate contract for borers on longwall.
7. Payment of datal men who are obliged to work in water at the same rate as contract men who work in water.
8. Free rent and coal for employees injured in the mines and receiving compensation.

With respect to the above noted requests, it should be noted at the outset that all the items above, with the exception of (1), (2) and (8), have been considered by this Board on previous occasions when applications were submitted by the said Union on behalf of some, or all, of the employees covered by this application. The first such application was made in January, 1942, on behalf of employees of Dominion Coal Company, Limited, Cumberland Railway and Coal Company, Limited, Old Sydney Collieries, Limited, and Acadia Coal Company, Limited, and in dealing with the various matters in that application, and in supplementary applications arising therefrom, certain assistance was made available to the Companies by the Government to make possible certain requests then made by the Union, and the Union at that time indicated, in writing, that all such requests were fully adjusted, including items (3), (4), (6) and (7). Subsequently an application was made to this Board in August, 1943, for an increase in wages for employees of the Companies mentioned and for the adjustment of a number of matters which had been referred to in the application in 1942, and for item (5). In, or about, December, 1943, an application for an increase in wages was also made by the Union on behalf of employees of the other Com-

panies covered by the present application. As a result of these applications an increase in wage rates was granted, but the other requests, including those mentioned above, were denied. On the hearing of the present application no additional information was submitted to the Board which justified the Board in granting the requests mentioned above. The application with respect to these items is, therefore, denied.

With reference to item (1), this would involve wage increases to the employees concerned amounting to approximately \$3,660,951 per annum. The employees argued that gross injustices and gross inequalities were suffered by the employees covered by this application by reason of the fact that similar employees of the Western Canada Bituminous Coal Operators' Association were in receipt of higher wage rates. This Board cannot accept that argument as sufficient in itself to establish gross inequality or gross injustice. Certainly applicants do not discharge the burden on them merely by indicating that a differential exists. Moreover, with respect to this item in the application, as well as all other items in the application, this Board, after examination of the material submitted to it in this and the other applications above referred to, is satisfied that the employers have demonstrated their inability to provide the additional money required to meet the demands and requests herein before set forth, unless they first receive permission to increase the price of coal to their customers.

With regard to item (8) it appears to this Board that what is requested is, in effect, an increase in the benefits received from the Workmen's Compensation Board by workmen in respect of injuries in a mine. The adequacy, or otherwise, of such benefits is not a matter which is within the purview of the National War Labour Board.

With reference to item (2) "Two weeks vacation with pay", it should also be noted that it has not been the policy of this Board to direct vacations with pay beyond a period of one week as provided for in supplementary D.B. 17, and no good reason has been suggested in this case why the Board's policy in this regard should be modified and enlarged

to make possible the granting of the request in question.

The result, therefore, is that the application on behalf of the employees in question is denied. The Board wishes to observe that some at least of the arguments addressed to it in the course of the hearing of the application were related to matters outside the scope of the inquiries it makes with respect to

applications such as the one under consideration, and it would appear that such arguments would be more properly addressed to the Royal Commission inquiring into the coal industry. This Commission, we understand, will be conducting hearings in Nova Scotia and New Brunswick at an early date.

January 15, 1945.

**Re: Harry Hayley and Ottawa General Workers' Union,
Local No. 1 (C.C.L.)**

Reasons for Decision

(Oral Decision)

This was an application made under the provisions of Order in Council P.C. 5963, and it is unfortunate for the employer that he did not act on the notice that was sent to him, and at that time enter his plea of inability to pay, so that both angles of the case could be discussed together.

An important part of the application, viz., the question of the increase in wages, is so

tied up with the other part that both should have been dealt with together.

The Board realizes that in the winter season there may be some difficulty, or hardship, in arranging a double shift, as Mr. Hayley suggested at the last meeting here, but realizing also that a common practice in industries is to institute an eight hour day, the Board feels that the decision of the Regional Board should not be disturbed.

The appeal is dismissed.

January 12, 1945.

Re: Oil Well Supply Company (Calgary)

Reasons for Decision

This is both an application for leave and an appeal from a decision of the Regional War Labour Board for Alberta dated September 25, 1944, refusing permission to increase the wage rate of a stenographer from \$126.52 to \$136.52. Leave to appeal was refused by the Regional Board.

The formal finding and direction states that there was "nothing in the data submitted to show that the duties or responsibilities of this employee have been increased since August, 1939". This finding, it seems to us, might have been an appropriate one to make if the application had been one for the establishment of a new occupational classification, and the case was not presented to the Board as an application under section 17.

The application was for a wage increase and had to be considered under either section 20

(1) (a) or 20 (1) (b) of P.C. 9384. There was no fully developed case under the "gross injustice or gross inequality" provision of paragraph (a), but it was open to the Regional Board to consider the matter under paragraph (b). Nothing indicates that the application was considered on the latter basis. The case is not of the kind, however, which this Board should admit to appeal in the face of a refusal of leave by the Regional Board, even though on the evidence filed here we might think that the increase should be permitted. We must deny the application, but it will be without prejudice to the fresh application the Company might want to make to the Regional Board on the basis of the submissions presented to this Board and such other submissions, as may be deemed advisable, for allowance of the increase from June 1, 1944.

January 15, 1945.

**Re: Old Sydney Collieries Limited and United Mineworkers of
America, District 26**

Reasons for Decision

This is an application by the Union for an increase in the contract rate payable to the Deepmen, Landing Tenders and Grab Handlers in and about the Florence Colliery, Cape Breton. Since 1918 these men have been paid on a sliding scale of wages, determined

by the number of men employed. This sliding scale is as follows:—

	Per Ton
14 men	0510
15 men	0546
16 men	0583
17 men	0619
18 men	0656
19 men	0692
20 men	0725

In addition to these rates, the men received, by virtue of various orders of this Board, an additional sum of \$1.77 per day. In this application the Union seeks to eliminate the sliding scale, mentioned above, and to establish an over-all contract rate of 10.5 cents per ton, with a provision that there be a minimum wage of \$6.30 per day, plus \$1.77 per day. It also asks that the requested 10.5 cents per ton be not paid on anything less than a weekly average of sixty tons per day.

At the hearing it developed that under the sliding scale now in existence the employees in question receive on the average 24 cents per day less than men similarly employed in the Princess mine about three miles distant. The suggested over-all rate of 10½ cents per ton with the guaranteed minimum above referred to would, however, provide daily pay on the average of 51 cents above the daily average in the Princess mine. It also developed that in no other mine in this area are such employees paid on the basis suggested in the application. The Company stated moreover that the men's earnings would be very considerably increased under the existing sliding scale if less absenteeism prevailed, and if men employed at the Collieries would increase production. On

behalf of the employees, it was urged that the difficulties did not arise so much from unavoidable absenteeism as from faults in the seams of coal and from the methods employed by the Company in extracting the coal from the mine.

The applicant did not satisfy this Board that the increase sought could be justified. Moreover, the applicant did not furnish sufficient information to indicate to what degree, if any, the sliding scale method of payment should be modified, neither is there sufficient information before this Board to enable it to direct an alternative method of payment.

It would seem that there should be further discussions between the employer and employees with respect to this matter. It would appear that the employees should consider more seriously the complaint of the employer as to absenteeism and unsatisfactory production, and, on the other hand, that the employer should more seriously consider the desire of the employees that there be established for them compensation more in line with that provided for similar work in the Princess mine.

This application should be dismissed.

January 22, 1945.

Re: Mortgage and Discount Corporation of Canada

Reasons for Decision

An appeal from a finding and direction of the Quebec Regional Board dated November 7, 1944, determining that the company's managing director was a salaried official and his remuneration controlled by the Wartime Salaries Order. Leave to appeal was granted by the Regional Board.

The individual concerned has no financial interest in the company and his duties as managing director of the appellant are merely incidental to his main occupation which is that of accountant for a law firm. In fact

these duties are performed in spare time and could be considered as overtime worked for the principal employer, and on this basis the status of the employee should be determined with regard to the main occupation which is remunerated at a rate of \$250 per month. The duties and responsibilities involved in the occupation of accountant in the circumstances of this case do not appear to place the employee above the rank of a foreman and as a consequence we think the appeal should be allowed.

January 22, 1945.

Re: Western Grocers Limited (Regina) and Canadian Distributors' Union, Local No. 1

Reasons for Decision

This is an appeal by the Union, concurred in by the Company, from a decision of the Regional War Labour Board for Saskatchewan dated November 2, 1944, denying payment at the rate of time and one-half for time required to be worked by office and warehouse employees in excess of 47½ hours per week. Payment for such overtime was authorized at straight *pro rata* time. Leave to appeal was granted by the Regional Board.

The appeal is concerned only with the warehouse employees and the employer states that similar classifications in its employ in Manitoba and Alberta receive the time and one-half rate. The Regional Board held that on a local comparative examination it would not introduce the new condition for these monthly rated employees.

Under section 20 (1) (c) (i) of P.C. 9384, the power to authorize the application is, to a degree, of a discretionary nature and our

policy has been to refrain from interfering with an exercise of discretion by a Regional Board unless an error of principle has been shown in the decision or some failure to give weight to material evidence is demonstrated.

We do not think this is a case in which we can substitute our views for those of the Regional Board and the appeal must be dismissed.

January 22, 1945.

Re: Neon Products of Western Canada Limited (Vancouver)

Reasons for Decision

An appeal from a decision of the Regional Board for British Columbia dated October 10, 1944, denying a request for permission to inaugurate in the appellant's engineering division the practice of paying employees at the rate of time and one-half for work performed on Saturday afternoons after completion of a 44-hour week. The Regional Board granted leave to appeal.

This division of the appellant's operations was started in July, 1942, for production on war contracts and a work-week of 48 hours was established with a system of bonus hours. In another division manufacturing, installing and servicing Neon signs and lighting, a 44-hour week has been the practice since 1928 and time and one-half is paid for work required to be performed on Saturday afternoons. The Regional Board thought that the two divisions, which are housed in separate plants, should each be considered independently of the other and we are in agreement with that view.

This matter must be considered in the light of section 20 (1) (c) (i) of the Wartime Wages Control Order, 1943 (P.C. 9384) which reads as follows:—

The National Board (or a Regional Board) may . . . authorize or direct an employer to alter a term of employment, which may have the effect of increasing, directly or indirectly, a single rate or the rates within a range established under this Order for an occupational classification of his employees . . . in such manner or at such rate or range as in the opinion of the National Board (or a Regional Board) is fair and reasonable and is consistent with and will give effect to the purposes of this Order, having regard to all the circumstances deemed by it, in its discretion, to be material.

Under the terms of this provision a Board has a fairly wide discretion to exercise and one of the circumstances which would be material, in the sense that it would be relevant to the subject matter of this application, would be the condition prevailing in the industry in the area. The appellant alleges that the practice followed in the metal trades industry, to which its engineering division would belong, is a 44-hour week with time and one-half for Saturday afternoon. Assuming as we do that the Regional Board have examined the application from the point of view of this allegation and have exercised their discretion against the application, we do not think that we should substitute our discretion for theirs. Consequently, the appeal will have to be dismissed.

January 22, 1945.

Re: Modern Press Limited and Saskatoon Typographical Union No. 663

Reasons for Decision

Leave having been granted by the Regional War Labour Board for Saskatchewan, this appeal is taken by the Union from a decision of that Board dated November 2, 1944, denying an application by the employer for permission to inaugurate the practice of giving annually two weeks' vacation with pay to printers, pressmen and bindery workers who had completed 12 months' service.

The application was denied on the ground that decision bulletin No. 17 was binding upon Regional Boards and that it did not provide for more than one week's vacation. D.B. 17 was issued for the guidance of war labour boards and on the whole our policy has been to adhere to its general pattern. However, in certain cases where employer and employees were in agreement upon a modification which was shown to have been an established condi-

tion in a certain industry in a given area, certain departures from the plan outlined in D.B. 17 have been authorized. For example, two weeks' vacation have been authorized in a few cases (Hiram Walker & Sons, Limited, L.G., 1944, p. 840), but always subject to a continuous service requirement of at least 5 years.

In this case the appellant has not supplied the Board with sufficient information about the general practice in these trades in Saskatoon and in any event the application would have to be altered to provide a longer period of qualification for the two weeks' vacation.

We shall dismiss the appeal without prejudice to such new application as the parties might care to make to the Regional Board.

January 22, 1945.

**Re: Retail Merchants Association of Canada, Inc. (Fur Division) and
National Clothing Workers' Union Inc.**

Reasons for Decision

On or about June 9, 1944, the Union and the Association filed a joint application to the Regional Board for Quebec for an increase in the minimum wage rates payable under the decree relating to fur employees in the retail trade in the Montreal area. This decree resulted from a collective labour agreement between the Association representing the employers and the Union representing the employees. With respect to duration, section 12 of the decree provides as follows:—

The present decree shall remain effective until May 1st, 1944. It shall renew itself automatically on the date of its expiration, for another period of two (2) years, unless one of the parties hereto declares to the other party, in writing, its intention not to renew same, at least two (2) months before the date of its expiration.

The joint application is dated May 1, 1944, and was signed June 3, 1944. It contained the following: "Le décret relatif à la fourrure, avec les amendements ici mentionnés, demeurera en vigueur jusqu'au 1er mai, 1945", but there is no request made with respect to the effective date of the decision sought from the Regional Board. On June 28, 1944, the secretary of the Regional Board advised the Union that the employers who had consented to the changes in the rates were authorized to pay the increased rates from May 1, 1944. The Regional Board then gave individual notices (on June 24, 1944) to the employers who were not members of the association. The Regional Board's decision approving the

new rates for all employers is dated July 4, 1944, and was made effective from the date of publication in the Quebec Official *Gazette* of the provincial Order in Council amending the decree. Such publication was made August 5, 1944.

The Union appeals from this decision and its request is that the increased rates be payable by all employers, both members and non-members of the Association, from June 3, 1944, which apparently is the date upon which the Union and the Association came to an agreement upon the new rates.

As to employers who are members of the Association, they are now authorized to pay the increases from May 1, 1944. But as to the non-members, it would hardly be fair to impose upon them now a liability for wage arrears for approximately two months during which the application was pending before the Regional Board and in the provincial Department of Labour. If the Union had framed a petition to the Regional Board for retroactive payment by certain named employers who were members of the Association, that Board may possibly have ordered it as to them. But having undertaken under the Collective Labour Agreement Act to obtain increases of general application, we do not think that the Regional Board, in making August 5, 1944, the obligatory date of the new rates for all employers, erred to the point that we should alter its decision.

The appeal must therefore be dismissed.

January 23, 1945.

Re: Grank Trunk Pacific Development Company, Limited (Prince Rupert Drydock and Shipyard) and the following Unions:—Brotherhood of Painters, Decorators and Paperhangers of America; National Union of Operating Engineers; Sheet Metal Workers' International Association; United Association of Journeymen Plumbers and Steamfitters; United Brotherhood of Carpenters and Joiners of America; International Brotherhood of Electrical Workers; Boiler-makers and Iron Shipbuilders' Union of Canada, Local No. 4, National Union of Machinists' Fitters.

Reasons for Decision

This is an application by the unions for increases in pay of ten (10c.) cents per hour for all classifications represented by the unions and is based on the allegations that, while they are now receiving the same rates as those paid in the Vancouver area, the cost of living in Prince Rupert is twenty per cent higher than in the City of Vancouver.

Following exhaustive investigation by Mr. Justice Richards, application to the National

War Labour Board was made by the various employers and employees in the shipbuilding industry in the Vancouver area to establish wage rates for various classifications and by Finding and Direction of January 19, 1943, the Board gave effect thereto. The unions in the present application did not at first approve of the application of the said Finding and Direction to their organizations at Prince Rupert, but following conferences of both employers and employees, under the Chair-

manship of Mr. Justice Richards, on the 3rd and 4th of March, 1943, a joint application by them was filed with the National War Labour Board on or about March 15, 1943, requesting that the above-mentioned Finding and Direction of January 19, 1943, be made applicable in shipyards of the Grand Trunk Pacific Development Company, Limited, at Prince Rupert. On April 8, 1943, by Finding and Direction the Board gave its approval to the said application.

In the present application no evidence was furnished to the Board to indicate that there had been any change in the cost of living in Prince Rupert since March 15, 1943, which altered the relative positions of the employees in the Prince Rupert and Vancouver shipyard. It must have been considered by all parties that as of the date of the application on March 15, 1943, it was fair and reasonable to equalize the rates and there is no evidence of

any change since then which affects adversely only the Prince Rupert shipyard.

Without determining in any way the general question as to whether the Board could, or should, approve of rates which vary merely because of some difference in the local cost of living, the Board does not consider that the applicants in this case have satisfactorily established that there is a differential of twenty per cent in the cost of living as between Prince Rupert and Vancouver. It is, undoubtedly, true that some items are higher in Prince Rupert and some lower, but the survey used by the applicants was incomplete and not sufficiently general to indicate the actual situation. It is probable that the differential is, in fact, very much smaller.

For the reasons above mentioned, the application will be dismissed and Finding and Direction will be issued accordingly.

January 24, 1945.

Re: Canadian National Railways and Canadian Pacific Railway Company and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Freight Handlers, etc., at Montreal Wharf, P.Q.)

Reasons for Decision

This is an application by the Union in renewal of a previous application in which, among other things, claim was made for Finding and Direction by the National War Labour Board requiring the Companies to make effective annual vacations with pay for its Wharf Freight Handlers at Montreal, P.Q., and at Saint John, N.B.

In dealing with the previous application the Board in its Reasons for Decision dated September 30, 1943, stated:—

As to the claim for vacations with pay, we have dealt with that subject in a general way in the case of District 4. However desirable the condition may be, its basic foundation is upon the principle that the over-worked human machine should have a period of rest in the interests of productivity and the workers' well being and health. The workers concerned here are seasonal workers.

As far as the employing Railway Companies are concerned these workers' services are not in demand the year round. As long as human nature is what it is, the likelihood is that the worker takes his period of rest in the off season and in that is assisted by the privilege accorded all railway workers of free transportation within certain limits.

Accordingly, we feel this branch of the claim must be refused particularly with the manpower situation as it is.

The service of Railway Wharf Freight Handlers at Montreal is seasonal, being required during the period of open navigation of approximately seven months each year. The Board cannot find justification for now making any change in its previous conclusion as stated in its Reasons for Decision as quoted, and therefore the application of the employees must be disallowed.

There will be Finding and Direction accordingly.

January 25, 1945.

Re: Ottawa Electric Railway Company and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division No. 279

Reasons for Decision

This is an application on behalf of the employees of the Ottawa Electric Railway Company for a direction for the following:

1. (a) Increases of 8 cents per hour in the wage rates of all classifications of employees covered by the application with the exception of those employees referred to in sub-paragraphs (b) and (c).
- (b) That the wage rates of the linemen be increased by 12 cents per hour.

(c) That the wage rates of the grease pit men be increased by 6 cents per hour.

2. Superannuation to begin at 65 years of age from a fund to be established on a joint contributory basis.

3. An increase from \$15 to \$20 a week of the allowance for sick benefit, and where an employee is sick for two or more weeks he shall receive pay for the first week of his illness.

4. All employees should receive two weeks holidays with pay after one year's service.

5. On all runs pulling out and pulling into barns and garages there should be added ten minutes to the time as presently computed.

6. All the garage men, linemen and shop men should receive 2 pairs of overalls per year from the Company.

7. All runs or part of runs which are completed in less than two hours shall be paid a minimum of two hours' wages.

In considering the foregoing request, it must be kept in mind that in February, 1943, the National War Labour Board had before it an application on behalf of these same employees for a wage rate increase of 12 cents per hour. By Finding and Direction of the said Board dated February 27, 1943, a wage increase amounting to 4 cents per hour was directed to be paid to all classifications. That application, it is important to note, was considered pursuant to the provisions of Order in Council P.C. 5963, and it appears that the said increases were directed in order to adjust fairly and reasonably the wage rates of the employees whose hours of work per day had previously been reduced from 9 hours to 8 hours, as well as to reflect the result of certain comparisons with the wage rates of employees of street railways in certain other urban centres. This Board, in order to determine whether pursuant to the provisions of *Section 20, Sub-section 1 (a), of the Wartime Wages Control Order, 1943, P.C. 9384*, further wage increases should be directed, gave careful study to the wage rates of the employees of other street railways, whose general conditions, such as locality, volume of traffic, mileage, etc., made them properly comparable to the Ottawa Street Railway, and attention was directed as well to the working conditions for street railway employees engaged in classifications reasonably similar to the employees whose application is being considered. In this connection the Board gave particular attention to the wage rates of the employees of those street railway companies who do not enjoy the benefits of a pension or superannuation plan. As a result of this study the Board, having made due and proper allowance for all relevant factors and conditions, is of opinion that the employees concerned in this application are entitled to the wage increases hereinafter set forth in order that gross inequalities and gross injustices may be rectified. The wage increases necessary to obtain this result are as follows:

I. INCREASES IN WAGE RATES

(a) The wage rates of all classifications of employees covered by the application with the exception of those referred to in paragraphs 1 (b) and 1 (c) above should be increased by 5½ cents per hour.

(b) In the application a request is made that certain power house employees have their wage rates increased from 8-10 cents. At the hearing, however, the increase sought was for

the linemen, and the amount of the wage increase as stated at the hearing was 12 cents.

The Board is of opinion that these linemen should receive increases in their wage rates in the amount of 7½ cents per hour.

(c) In the application, and at the hearing, an increase of 6 cents per hour was requested for the grease pit men.

The Board is of opinion that the grease pit men should have their wage rates increased by the amount of 4½ cents per hour.

All of the increases referred to in paragraphs 1 (a), 1 (b) and 1 (c) should be effective as and from the 1st day of November, 1944.

II. SUPERANNUATION

Much of the argument on the hearing of this application was concerned with this matter, and it is apparent that the matter of superannuation fund for the employees has been under discussion for many years by the employer and employees. This question is also dealt with in the Finding and Direction of February 27, 1943. At that time the National War Labour Board said:

It is not within the jurisdiction of the National War Labour Board, under the provisions of the Wartime Wages Control Order, P.C. 5963, to direct the establishment of a contributory superannuation retirement fund, the condition being one which, if possible, should be developed through the process of collective bargaining.

This Board concurs in that statement, and is further of opinion that it applies equally when consideration is being given to applications made pursuant to P.C. 9384. We are, therefore, unable to grant the request made on behalf of the employees to direct that a superannuation fund be established.

III. SICK BENEFITS

This Board declines to direct any increase in the rate of sick benefits now provided by the employer for the employees and declines also to direct any modifications in the existing arrangements with respect to such benefits so as to enable the employees to receive pay for the first week of illness.

IV. HOLIDAYS

This request made on behalf of the employees is for a holiday with pay plan not in accordance with the provisions of D.B. 17, and must, therefore, be refused.

V. PULLING IN AND PULLING OUT TIME

VI. OVERALLS

VII. SHORT RUNS

No sufficient evidence or reasons were furnished on behalf of the employees to justify this Board in directing the requests sought in the foregoing paragraphs 5, 6 and 7.

January 25, 1945

Re: Canada Steamship Lines Limited and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Water Front Freight Handlers, Checkers, Coopers, etc., at Quebec, Montreal, Toronto, Hamilton, Sarnia—Point Edward, Windsor, Port Arthur, Fort William).

Reasons for Decision

This is an application by the Union requesting Finding and Direction by the National War Labour Board requiring the Company to make effective annual vacations with pay for its Water Front Freight Handlers, etc., at the places mentioned.

In dealing with a similar application (Case No. N-1091) the Board in its Reasons for Decision dated September 30, 1943, stated:

As to the claim for vacations with pay, we have dealt with that subject in a general way in the case of Division 4. However desirable the condition may be, its basic foundation is upon the principle that the overworked human machine should have a period of rest in the interests of productivity and the workers' well-being and health. The workers concerned here are seasonal workers. As far as the employing Railway Companies are concerned these workers' services are not in de-

mand the year round. As long as human nature is what it is, the likelihood is that the worker takes his period of rest in the off season and in that is assisted by the privilege accorded all railway workers of free transportation within certain limits.

Accordingly, we feel this branch of the claim must be refused particularly with the manpower situation as it is.

The service of Water Front Freight Handlers at the places mentioned is seasonal, being required during the period of open navigation of approximately seven months each year. The Board cannot find justification for making for such service any change in its conclusion as stated in its Reasons for Decision as quoted, and therefore the application of the employees must be disallowed.

There will be Finding and Direction accordingly.

January 26, 1945

Re: Canadian Pacific Railway Company and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Hourly rated Freight Handlers, etc., at Port McNicoll)

Reasons for Decision

This is an application by the Union requesting Finding and Direction by the National War Labour Board requiring the Company to make effective annual vacations with pay for its hourly-rated Freight Handlers, etc., at Port McNicoll, Ontario.

In dealing with a similar application (Case No. N-1091) the Board in its Reasons for Decision dated September 30, 1943, stated:

As to the claim for vacations with pay, we have dealt with that subject in a general way in the case of Division 4. However desirable the condition may be, its basic foundation is upon the principle that the overworked human machine should have a period of rest in the interests of productivity and the workers' well-being and health. The workers concerned here are seasonal workers. As far as the employing Railway Companies are concerned these workers' services are not in de-

mand the year round. As long as human nature is what it is, the likelihood is that the worker takes his period of rest in the off season and in that is assisted by the privilege accorded all railway workers of free transportation within certain limits.

Accordingly, we feel this branch of the claim must be refused particularly with the manpower situation as it is.

The service of Railway Freight Handlers, etc., generally at Port McNicoll, Ontario, is seasonal, being required during the period of open navigation of approximately seven months each year. The Board cannot find justification for making for such service any change in its conclusion as stated in its Reasons for Decision as quoted, and therefore the application of the employees must be disallowed.

There will be Finding and Direction accordingly.

January 26, 1945

Re: Eastern Canada Stevedoring Company Limited, Halifax, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (Freight Handlers, etc., at Halifax)

Reasons for Decision

This is an application in renewal of a previous application in which, among other things, claim was made for Finding and Direction by the National War Labour Board requiring the Company to make effective annual vacations with pay for Wharf Freight Handlers at Halifax, Nova Scotia.

In dealing with the previous application, the Board in its Reasons for Decision dated September 30, 1943, stated:

As to vacations with pay, we think the reasoning set forth in the Montreal and Saint John case applies here with the exception that these workers do not enjoy railway transportation privileges. The greater night differential is an important offsetting factor in comparison with Montreal.

In its Reasons for Decision dated September 30, 1943, in respect of the other application mentioned (Case File N-1091) to make effective annual vacations with pay for Wharf Freight Handlers of other companies at Montreal and West Saint John, the Board stated:

As to the claim for vacations with pay, we have dealt with that subject in a general way in the case of Division 4. However desirable the condition may be, its basic foundation is upon the principle that the overworked human machine should have a period of rest in the interests of productivity and the workers' well-being and health. The workers concerned here are seasonal workers. As far as the employing Railway Companies are concerned these workers' services are not in demand the year round. As long as human nature is what it is, the likelihood is that the worker takes his period of rest in the off season and in that is assisted by the privilege accorded all railway workers of free transportation within certain limits.

Accordingly, we feel this branch of the claim must be refused particularly with the manpower situation as it is.

The service of Wharf Freight Handlers, etc., generally at Halifax in the past has been seasonal, being required during winter port periods of approximately five months each

**Re: Canadian Pacific Railway Company and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees
(Freight Handlers, etc., at West Saint John)**

Reasons for Decision

This is an application by the Union in renewal of a previous application in which, among other things, claim was made for Finding and Direction by the National War Labour Board requiring the Company to make effective annual vacations with pay for Wharf Freight Handlers at Montreal, P.Q., and at West Saint John, New Brunswick.

In dealing with the previous application the Board in its Reasons for Decision dated September 30, 1943, stated:

As to the claim for vacations with pay, we have dealt with that subject in a general way in the case of Division 4. However desirable the condition may be, its basic foundation is upon the principle that the overworked human machine should have a period of rest in the interests of productivity and the workers' well-being and health. The workers concerned here are seasonal workers. As far as the employing Railway Companies are concerned these workers' services are not in demand the year round. As long as human nature is what it is, the likelihood is that the worker takes his period of rest in the off season and in that is assisted by the privilege accorded all railway workers of free transportation within certain limits.

Accordingly, we feel this branch of the claim must be refused particularly with the manpower situation as it is.

The service of Railway Wharf Freight Handlers, etc., generally at West Saint John in the

year. Under such conditions the Board could not find justification for now making any change in its previous conclusion as stated in its Reasons for Decision as quoted.

However, it has been shown that under wartime traffic conditions the service of Wharf Freight Handlers, etc., generally at Halifax is required throughout the twelve months of the year. In the circumstances the Board is of the opinion that it would be fair and reasonable and consistent with the intent of Wartime Wages Control Order, 1943, P.C. 9384, that while existing wartime traffic conditions continue, and as a special measure under such conditions, Freight Handlers, etc., covered by the application should be allowed a vacation with pay during the year 1945, subject to the following condition—employees who during the year 1944 have worked on 250 or more calendar days will be entitled to a half day vacation with pay for each 25 days worked during the twelve months preceding the date at which conditions permit that vacation with pay is to be taken.

There will be Finding and Direction accordingly.

January 26, 1945

past has been seasonal, being required during Winter port periods of approximately five months each year. Under such conditions the Board could not find justification for now making any change in its previous conclusion as stated in its Reasons for Decision as quoted.

However, it has been shown that under wartime traffic conditions the service of Railway Wharf Freight Handlers, etc., generally at West Saint John is required throughout the twelve months of the year. In the circumstances, and in view of annual vacation with pay plans as now generally established for various classes of employees in railway service, the Board is of the opinion that it would be fair and reasonable and consistent with the intent of Wartime Wages Control Order, 1943, P.C. 9384, that while existing wartime traffic conditions continue, and as a special measure under such conditions, Freight Handlers, etc., covered by the application should be allowed a vacation with pay during the year 1945, subject to the following condition—employees who during the year 1944 have worked on 250 or more calendar days will be entitled to a half day vacation with pay for each 25 days worked during the twelve months preceding the date at which conditions permit that vacation with pay is to be taken.

There will be Finding and Direction accordingly.

January 26, 1945

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for six days during the month of January. During this period the Board received eleven applications, held ten hearings, issued four certificates designating bargaining representatives, rejected two applications for certification, allowed withdrawal of two applications, ordered four representation votes and gave decisions in three appeal cases.

At the end of the month a large number of applications for certification were before the Board which was in session from January 30 to February 2 inclusive. These applications were dealt with during the session but not before the close of the month. They will be reported in the March issue of the *LABOUR GAZETTE*.

Certificates Issued

1. *United Brotherhood of Carpenters and Joiners of America, Local 1614, and Hudson*

Bay Mining and Smelting Company Limited, Flin Flon, Man. (L.G., Oct., 1944, p. 1221). The Local Union and Messrs. J. B. Graham, S. Arthur Lundman and Robert L. Johnson, were certified as bargaining representatives for the carpenter-foreman, carpenter sub-foreman, carpenter jigger-boss, carpenters, carpenters' helpers and open pit bridgemen of the Hudson Bay Mining and Smelting Company, Flin Flon, Man. Certification followed a hearing by the Board and an examination of the Union's membership records by an officer of the Board.

2. *Brotherhood of Painters, Decorators and Paperhangers, Local 1497, and Hudson Bay Mining and Smelting Company Limited, Flin Flon, Man. (L.G., Oct., 1944, p. 1221).* Following a hearing by the Board and an examination of the Union's membership records, the local union and Messrs. Fred Molineaux, George Carner, and Everett Devers-

pile were certified as bargaining representatives for the painter foreman, painters, sign painters and helpers, of the Hudson Bay Mining and Smelting Company Limited, Flin Flon, Man.

3. *The International Brotherhood of Bookbinders Local 28, International Printing Pressmen and Assistants Union Local 195, and International Typographical Union No. 411, and McCaskey Systems, Limited, Galt, Ont.* The Unions and Messrs. Robert E. Brown, Frank J. Barrett and Arthur Barlen, were certified as bargaining representatives for the employees engaged in the press room, bindery and composing room of McCaskey Systems, Limited, Galt, Ontario.

Certification of bargaining representatives followed an appeal by the applicant unions from a decision of the Ontario Labour Relations Board by which the bargaining unit of the employees was established on a plant basis and a vote of the employees conducted including a number not specified in the application for certification. The National Board in allowing the appeal determined the bargaining unit on a craft basis and ordered that a new vote be taken of the employees of the Company employed in the press room, bindery and composing room. In this vote a majority of the eligible employees authorized the applicant unions to choose bargaining representatives on their behalf.

4. *The International Brotherhood of Blacksmiths, Drop Forgers and Helpers, Sunshine Local 520, and Canadian Pacific Railway Company (B.C. Coast Steamship Service) (L.G., Dec., 1944, p. 1482).* The Union and Messrs. Albert Young, George Hardy, Thomas Hammond, and J. T. Galloway were certified as bargaining representatives for the employees in the Maintenance Department of the Canadian Pacific Railway (B.C. Coast Steamship Service), Victoria, B.C. Foremen were excluded from the bargaining unit. Certification followed a hearing by the Board and an examination of the union's membership records by an officer of the Board.

Applications for Certification Rejected

1. *Brotherhood of Maintenance-of-Way Employees and Canadian National Railways, Western Lines (coaling station employees at intermediate points, Winnipeg, Man., to Vancouver, B.C.) (L.G., Nov. 1944, p. 1338).* Following an investigation of the application by an officer of the Board, and a public hearing, the Board rejected the application on the grounds that the unit applied for was not considered appropriate for collective bargaining inasmuch as coaling station employees,

other than those covered by the application, are affected by it, and it was not shown that the applicant organization acted with the authority of the majority of all such employees as required by the Wartime Labour Relations Regulations.

Applications For Certification Withdrawn

1. *Mercantile Marine Officers' Guild of Canada and Gulf and Lake Navigation Company Limited, Montreal, P.Q. (L.G., January, 1945, p. 35).* On the request of the President of the applicant union the application for certification of bargaining representatives was withdrawn.

2. *Canadian Brotherhood of Marine Engineers and Gulf and Lake Navigation Company Limited, Montreal, P.Q. (L.G., January, 1945, p. 35).* On the request of the President of the applicant union the application for certification of bargaining representatives was withdrawn.

Representation Votes Ordered

1. *International Association of Machinists, Local 182, and Hudson Bay Mining and Smelting Co. Ltd., Flin Flon, Man. (L.G., Oct., 1944, p. 1221).* Representations were made before the Board by the applicant union, the Company and the Northern Manitoba Mine, Mill and Smelter Workers' Union, as intervener. Those eligible to vote are machinists, mechanics, repairmen, pipe fitters, blacksmiths and their helpers and apprentices.

2. *International Brotherhood of Electrical Workers, Local B-1405, and Hudson Bay Mining and Smelting Co. Ltd., Flin Flon, Man. (L.G., Oct., 1944, p. 1221).* Representatives of the applicants and company as well as those of the Northern Manitoba Mine and Mill Workers' Union as intervener, appeared before the Board. The eligible voters are electricians, substation operators, powerhouse operators, hoist men, Cottrell operators, surface cranes, locomotive drivers and shovel runners and their helpers and apprentices.

3. *International Brotherhood of Boilermakers, Iron Shipbuilders and Helpers of America, Local 451 and the Hudson Bay Mining and Smelting Co. Ltd., Flin Flon, Man. (L.G., Oct., 1944, p. 1221).* Representations were made before the Board by the applicant union, the Company and the Northern Manitoba Mine, Mill and Smelter Workers' Union, as intervener. The eligible voters are boilermakers, punch and shear operators first, boilermaker helpers, acetylene and electrical welders, electrical welders, boilermaker apprentices, electric welding apprentices, tinsmiths, tinsmith helpers, in the machine shop, head

rigger and coal plant operators in the Surface and Transportation Department, and open pit pumpmen.

4. *Flin Flon Base Metal Workers Federal Union, No. 172 (T. & L.C.) and Hudson Bay Mining and Smelting Co. Ltd., Flin Flon, Man. (L.G., Oct., 1944, p. 1221)*. Representatives of the applicant union, the Company and the Northern Manitoba Mine and Mill Workers' Union, as intervener, appeared before the Board. Employees in the following Departments are eligible to vote: Mine (underground), open pit, crusher, concentrator, zinc roaster, tankhouse, zinc casting, cadmium plant, bedding bins, copper smelter, machine shop, drill steel shop, ball making plant, surface and transportation, coal pulverizer, warehouse and truck scale department, turbine, Air and Heating Department and watchmen.

Applications For Certification Under Investigation

1. Federal Labour Union, Local 23736 (A.F. of L.), on behalf of the employees of the Goderich Elevator and Transit Company, Limited, Goderich, Ontario, except office staff and licensed engineers.

2. Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of certain employees of the Chateau Laurier Hotel, Canadian National Railways, Ottawa, Ontario.

3. Deepsea and Inlandboatmen's Union, Pacific Coast District, Canadian Seamen's Union, on behalf of towboat operators of Stone Brothers, Limited, Port Alberni, B.C.

4. Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America, Local 724, on behalf of certain employees of the Bessborough Hotel, Canadian National Railways, Saskatoon, Saskatchewan.

5. Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of certain employees of the Vancouver Hotel Company, Vancouver, B.C.

6. United Association of Journeymen Plumbers and Steamfitters of the United States and Canada, Local 170, on behalf of the employees of the Plumbing Department of the Hotel Vancouver Company, Vancouver, B.C.

7. Canadian Navigators Federation on behalf of certain employees of the Clarke Steamship Company Limited on S.S. *Gaspesia*, M.S. *North Gaspé* and *Sable Island*, Montreal, P.Q.

8. Canadian Seamen's Union on behalf of certain employees of the Canadian National (West Indies) Steamships Limited and Cana-

dian Government Merchant Marine Limited, Montreal, P.Q.

9. British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers' International Union of North America, on behalf of the unlicensed personnel in Deck, Engine Room and Steward's Departments on M.V. *Island King* of the B.C. Cement Company Limited, Victoria, B.C.

10. British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers' International Union of North America, on behalf of the unlicensed personnel in Deck, Engine Room and Steward's Departments on the vessels *Teco* and *P.W.* of the B.C. Packers Limited, Vancouver, B.C.

11. Canadian Brotherhood of Railway Employees and Other Transport Workers, "Empress" Division, on behalf of certain employees of the Empress Hotel, Canadian Pacific Railway Company, Victoria, B.C.

Decisions of Board in Appeal Cases

The following appeals from decisions of Provincial Labour Relations Boards and applications for leave to appeal therefrom were considered by the Wartime Labour Relations Board (National) and judgment was given.

1. The Wartime Labour Relations Board (National) granted leave to the Canadian Fishhandlers Union Local No. 1, Halifax, N.S., to appeal from decisions of the Nova Scotia Labour Relations Board under which the application of the Union for certification of bargaining representatives of certain employees of the National Fish Company Limited, Halifax, N.S., was denied and the application of the Employees Mutual Benefit Association was granted.

The union's appeal for certification had been denied because an examination of the membership records of the Union by the Nova Scotia Board indicated that a majority of the employees affected were not members of the appellant union. The Nova Scotia Board directed a vote which resulted in a majority of the eligible employees voting for the Association. The appellant union contended that it was not given an opportunity to present evidence and make representations at the time the Nova Scotia Board certified the representatives of the Association and that the Association was dominated by the employing Company contrary to Section 19 of the Wartime Labour Relations Regulations P.C. 1003.

Messrs. Fred Molineaux and A. R. Mosher in their Reasons for Judgment stated: "We find that there was interference with the

administration of the Association by the employer Company and we set aside the certificate of bargaining representatives issued by the Nova Scotia Board and reject the application of the Association."

Messrs. A. J. Hills, H. Taylor and A. Deschamps concurred in the result.

In a dissenting opinion, Mr. Justice G. B. O'Connor, Chairman of the Board, stated that "the evidence justified the finding of the Nova Scotia Board that the Association was not dominated by the Company", and that "it may be better for the employees who desire an Association to incorporate without the objectionable provisions (now embodied in the constitution) and to make a new application for certification of bargaining representatives".

The appellants were represented by Messrs. J. A. Sullivan and H. C. Mead and the respondent Company by Mr. C. B. Smith, K.C.

2. The Wartime Labour Relations Board (National) granted leave to appeal but denied the appeal of Motor Products Corporation, Windsor, Ontario, from a decision of the Ontario Labour Relations Board which referred to the Federal Minister of Labour the matter of the negotiations between the Company and Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.), for a collective agreement, so that the Minister might instruct a Conciliation Officer to confer with the parties and attempt to effect an agreement pursuant to Section 12 of the Wartime Labour Relations Regulations.

The Ontario Board made a previous direction to the same effect. The employer appealed to the National Board and the latter allowed the appeal on the ground that, at the time of the reference, the conciliation provisions were not available unless and until bargaining representatives had been certified, but the parties were referred to the amendment of Sections 15 and 16 of the Regulations of September 1, 1944, providing for conciliation services where a collective agreement was in effect, and it was suggested that the Ontario Board might again refer the matter to the Minister.

The Ontario Board accordingly again referred the matter to the Minister, and the employer applied for leave to appeal from the second reference on the ground that the collective agreement dated April, 1942, was automatically renewed on April 30, 1944, and that the provisions of Section 11 of the Regulations do not apply where there is in fact a collective agreement in full force. In its previous judgment the National Board said "the Ontario

Board held that an automatic renewal clause, such as that contained in the agreement under consideration is inconsistent with the regulations and cannot operate as a bar to the intervention of the Board pursuant to the request made by the union. The Board adopts the same view".

The Company further contended that the negotiations between the parties resulted from a notice by the union on March 8, 1944, and this notice was not sufficient compliance with Section 16 of the Regulations. Pursuant to communications between the company and the union, the parties had proceeded to negotiate but were unable to reach an agreement. The Board was satisfied that the union required the employer to enter into negotiations.

Finally the employer contended that although the Regulations were enacted on the 17th of February, 1944, they did not come into force until March 20 of that year, so that a notice dated March 8, 1944, could not be a compliance with Section 16. The Board did not agree with this contention and interpreted renewal in Section 16 of the Regulations as meaning renewal with or without amendment. In the Board's opinion where there are negotiations for renewal of a collective agreement, the terms of the agreement are subject to change when renewal with amendment is requested in the same way as when notice of termination has been given. The negotiations for renewal do not interfere with the right to terminate.

Leave to appeal was granted but the appeal was dismissed.

The appellant was represented by Mr. G. P. Dickson, Windsor, Ontario, and the respondent union by Mr. J. L. Cohen, K.C., Toronto, Ontario.

3. The Wartime Labour Relations Board (National) denied the appeals of the United Electrical Radio and Machine Workers of America, Locals Nos. 529 and 512 from decisions of the Ontario Labour Relations Board which refused certification to the appellant unions for the employees of Packard Electric Company Limited, St. Catharines, Ontario, and Philco Corporation of Canada Limited, Toronto, Ontario.

In each case the Ontario Board directed a vote of the employees in an effort to satisfy itself that an election or appointment of bargaining representatives was regularly and properly made. The union in each case obtained a majority of the employees who voted but failed to secure the votes of those eligible to vote. The National Board dismissed the appeals and refused the applications for certification.

Mr. Justice G. B. O'Connor, Chairman, and Messrs. A. R. Mosher, and F. Molineaux dissented from the Reasons for Judgment stating: "the Regulations were enacted to enable employers and employees to organize for the conduct of negotiations. There must be some peaceful solution of the apparent deadlock and that can best be accomplished in a democratic way by directing new votes of the employees of the Packard and Philco Companies. In the case of the Packard Company, the bargaining unit should be that mentioned in the petition; namely, 'hourly-rated and piece-work production workers' with the exclusions contained in the certificate of the Ontario Board—that is, the hourly-paid factory clerks will not be included in the bar-

gaining unit. In the Philco case the bargaining unit should be that directed by the Ontario Board.

"We should direct these votes but a majority of the Board takes a different view. There is still time for the applicants to again elect or appoint bargaining representatives and to make new applications and obtain certification of them before April 1, 1945, so as to give the necessary notice to prevent the automatic renewal of the agreement with the Employees' Council."

The appellants were represented by Mr. J. L. Cohen, K.C., and the respondent Companies by Mr. M. W. Seymour, K.C., and W. R. Best.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provides for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiation for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdiction. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During January reports were received from five Boards of Conciliation:—

Concerning the Corporation of the City of Kelowna, Kelowna, B.C., and the Kelowna Civic Employees Union.

Concerning Noranda Mines, Limited, Noranda, P.Q., and Local No. 688, International Union of Mine, Mill & Smelter Workers.

Concerning Defence Industries, Limited, Ajax, Ont., and Local 521, United Electrical, Radio & Machine Workers of America.

Concerning the Vancouver News-Herald, and the Vancouver Newspaper Guild, Local No. 2, Vancouver, B.C.

Concerning Various Employers, Members of the Okanagan Federated Shippers Association, Vancouver, B.C., and the Fruit and Vegetable Workers Union, Locals 1, 3, 4, 5, 6, 7 and 8.

Boards Fully Constituted

During January six Boards of Conciliation were fully constituted:—

Fowler's Canadian Company, Limited, Hamilton, Ont.—The Board of Conciliation established to deal with a dispute between Fowler's Canadian Company, Limited, Hamilton, Ont., and the United Packinghouse Workers of America, was fully constituted on January 6 with the appointment of His Honour Judge Ian M. Macdonell of Toronto, as Chairman of the Board. Judge Macdonell was appointed to the Board by the Minister of Labour in the absence of a joint recommendation from the other two members, Mr. Norman W. Bryne, of Hamilton, appointed on the nomination of the employing company, and Mr. Arthur Williams of Oshawa, appointed on the nomination of the employees concerned.

Miramichi Lumber Co., Limited, Minto, N.B.—The Board of Conciliation established to deal with a dispute between the Miramichi Lumber Co., Ltd., Minto, N.B., and Local 7409, United Mine Workers of America, was fully constituted on January 18 with the appointment of the Honourable Mr. Justice J. H. A. L. Fairweather of Rothesay, N.B., as Chairman of the Board. Mr. Justice Fairweather was appointed to the Board by the

Minister of Labour on the joint recommendation of the other two members, Mr. Kenneth L. Golding of Fredericton and Mr. E. A. Dinsmore of Minto, appointed on the nomination of the employer and employees respectively.

De Havilland Aircraft Co. of Canada, Ltd., Toronto, Ont.—The Board of Conciliation established to deal with a dispute between the De Havilland Aircraft Company of Canada, Limited, Toronto, Ont., and Local 112, United Automobile, Aircraft and Agricultural Implementation Workers of America (U.A.W.-C.I.O.) was fully constituted with the appointment of Mr. Leonard W. Brockington, K.C., Ottawa, Ont., as Chairman of the Board. Mr. Brockington was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Mr. Norman L. Mathews, Toronto, and Mr. Bora Laskin, also of Toronto, appointed on the nomination of the employer and the employees respectively.

Willard Storage Battery Company of Canada, Limited, Toronto, Ont.—The Board of Conciliation established to deal with a dispute between the Willard Storage Battery Company of Canada, Limited, Toronto, and Local 512, United Electrical, Radio and Machine Workers of America, was fully constituted on January 13 with the appointment of the Honourable Mr. Justice W. D. Roach of Toronto, Ont., as Chairman of the Board. Mr. Justice Roach was appointed by the Minister on the joint recommendation of the other two members, Mr. W. M. Gordon and Miss Idele Wilson, both of Toronto, appointed on the nomination of the employer and employees respectively.

Island Mountain Mines Company, Limited, Wells, B.C.—On January 17 the Board of Conciliation established to deal with a dispute between the Island Mountain Mines Company, Limited, Wells, B.C., and Local No. 685, International Union of Mine, Mill and Smelter Workers was fully constituted with the appointment of Mr. A. Reginald MacDougall of Vancouver, B.C., as Chairman of the Board. Mr. MacDougall was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. R. H. Pooley, K.C., of Victoria, B.C., and Malcolm MacLeod of Vancouver, B.C.; appointed to the Board on the nomination of the employer and employees respectively.

Cariboo Gold Quartz Mining Company, Wells, B.C.—On January 17 the Board of Conciliation established to deal with a dispute between the Cariboo Gold Quartz Mining Company, Limited, Wells, B.C., and Local No. 685, International Union, Mine, Mill and

Smelter Workers was fully constituted with the appointment of Professor J. N. Finlayson of Vancouver, B.C., as Chairman of the Board. Professor Finlayson was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. R. L. Norman of Vancouver, B.C., and Malcolm MacLeod also of Vancouver, B.C., appointed on the nomination of the employer and employees respectively.

Boards Established

During the month two Boards of Conciliation were established but not fully constituted.

Genelco, Limited, Peterborough, Ont.—On January 3, 1945, the Minister of Labour established a Board of Conciliation to deal with a dispute between Genelco, Limited, Peterborough, Ont., and Local 524, United Electrical, Radio and Machine Workers of America. Mr. J. P. Nicol, Sr., of Toronto, investigated the case as Conciliation Officer. On January 2 Mr. Nicol's report was received, recommending the establishment of a Board.

Appointed to the Board were Mr. J. S. D. Tory, of Toronto, Ont., on the nomination of the employing company, and Mr. George Burt, Windsor, Ont., on the nomination of the employees concerned. Mr. Tory and Mr. Burt have been requested to confer on the nomination of a chairman and third member of the Board.

Campbells Soup Company, Limited, New Toronto, Ont.—On January 19 the Minister of Labour established a Board of Conciliation to deal with a dispute between the Campbells Soup Company, Limited, New Toronto, Ont., and the United Packinghouse Workers of America. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, investigated the case as Conciliation Officer. On January 19 Mr. Ainsborough's report was received, recommending the establishment of a Board.

Appointed to the Board were the Honourable Senator G. Peter Campbell, Toronto, Ont., on the nomination of the employing company, and Mr. Arthur Williams, Oshawa, Ont., on the nomination of the employees concerned. Senator Campbell and Mr. Williams have been requested to confer on the nomination of a Chairman and third member of the Board.

Agreements Facilitated by Conciliation Officers

Charlevoix-Saguenay Telephone Company, La Malbaie, P.Q.—On December 1 Mr. Ligouri Pepin, Industrial Relations Officer, Montreal, had been appointed Conciliation

Officer to confer with the Charlevoix-Saguenay Telephone Company, La Malbaie, P.Q., and the National Catholic Syndicate of Charlevoix East, to attempt to effect an agreement between them.

On January 15 a report was received from Mr. Pepin indicating the successful conclusion of the negotiations and the signing of an agreement.

Assignment of Conciliation Officers

Dominion Bridge Company, Limited, Toronto, Ont.—On January 5 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Dominion Bridge Company, Limited, Toronto, Ont., and Local 2808, United Steelworkers of America, and that there was no indication of the successful completion of an agreement.

On January 9 Mr. J. P. Nicol, Sr., Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

John T. Hepburn, Limited, Toronto, Ont.—On January 5, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between John T. Hepburn, Limited, Toronto, Ont., and Local 28, International Moulders and Foundry Workers Union of North America, and that there was no indication of the successful completion of an agreement.

On January 9 Mr. H. Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Seiberling Rubber Company of Canada, Limited, Toronto, Ont.—On January 5 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Seiberling Rubber Company of Canada, Limited, Toronto, and Local No. 118, United Rubber Workers of America, and that there was no indication of the successful completion of an agreement.

On January 9, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Chesley Manufacturing Company, Chesley, Ont.—On January 10, the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Chesley Manufacturing Company, Chesley, Ont., and Local No. 6, the National Union of Furniture

Workers, and that there was no indication of the successful completion of an agreement.

On January 12 Mr. H. Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Moffats, Limited, Weston, Ont.—On January 11 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Moffats, Limited, Weston, Ont., and Local 3129, United Steelworkers of America, and that there was no indication of the successful completion of an agreement.

On January 12 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Dominion Electric Power, Limited, Estevan, Sask.—On January 13 the Minister of Labour was advised by the Saskatchewan Labour Relations Board that negotiations had been continuing for thirty days between Dominion Electric Power, Limited, Estevan, Sask., and the Electric Utilities Employees Union, and that there was no indication of the successful completion of an agreement.

On January 16 Mr. Ronald H. Hooper, Industrial Relations Officer, Winnipeg, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Thompson Bros. Machinery Company, Ltd., Liverpool, N.S.—On January 15 the Minister of Labour was advised by the Nova Scotia Wartime Labour Relations Board that negotiations had been continuing for thirty days between the Thompson Bros. Machinery Company, Limited, Liverpool, N.S., and the Federated Council of the Thompson Bros. Machinery Company, Limited, and that there was no indication of the successful completion of an agreement.

On January 16 Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was appointed Conciliation Officer to confer with the parties and attempt to effect an agreement.

Highland Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Highland Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Con-

ciliation Officer to confer with the parties in an attempt to effect an agreement.

Toronto Dairies, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Toronto Dairies, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Hastings Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Hastings Dairy, Limited, Toronto, and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Hall's Pure Milk Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Hall's Pure Milk Dairy, Limited, Toronto, and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful conclusion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Ritchie's Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Ritchie's Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Blantyre Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Blantyre Dairy, Limited, Toronto, Ont., and Local 647, Milk

Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Findlay Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Findlay Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Walnut Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Walnut Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Dorland's Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Dorland's Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Pilkington Bros. (Canada) Limited, Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Pilkington Bros. (Canada) Limited, Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Excelsior Plate Glass Co., Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Excelsior Plate Glass Company, Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators & Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Canadian Plate and Window Glass, Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Canadian Plate and Window Glass, Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators & Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Consolidated Plate Glass Company, Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Consolidated Plate Glass Company, Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Robert McCausland Company, Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Robert McCausland Company, Toronto, Ont., and the Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Queen City Glass Company, Limited, Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Queen City Glass Company, Limited, Toronto, Ont., and the Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Advance Glass and Mirror Company, Limited, Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Advance Glass and Mirror Company, Limited, Toronto, Ont., and the Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Hobbs Glass Company, Toronto, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Hobbs Glass Company, Toronto, Ont., and the Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators & Paperhangers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Canadian Westinghouse Company, Limited, Hamilton, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Canadian Westinghouse Company, Limited, Hamilton, Ont., and Local 504, United Electrical, Radio and Machine Workers of America, and that there was no indication of the successful completion of an agreement.

On February 8, Mr. H. Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Beatty Bros. (Spencer Division) Penetang, Ont.—On January 27 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Beatty Bros. (Spencer Division) Penetang, Ont., and Local 3425, United Steelworkers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. H. Perkins, Industrial Relations Officer, Toronto, Ont., was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Canadian Bridge Company, Limited, Plant No. 3, Windsor, Ont.—On January 25 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Canadian Bridge Company, Limited, Plant No. 3, Windsor, Ont., and Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Ford Motor Company of Canada, Limited, Windsor, Ont.—On January 23 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Ford Motor Company of Canada, Limited, Windsor, Ont., and Local 200, United Automobile, Aircraft and Agricultural Implement Workers of America, and that there was no indication of the successful completion of an agreement.

On January 29 Mr. Louis Fine, Chief Conciliation Officer, Ontario Department of Labour, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Valley View Dairy, Limited, Toronto, Ont.—On January 22 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Valley View Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 23 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Scarboro Farm Dairy, Limited, Toronto, Ont.—On January 22 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Scarboro Farm Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 23 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Corbin Lock Company of Canada, Belleville, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between the Corbin Lock Company of Canada, Belleville, Ont., and Local 426, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.), and that there was no indication of the successful completion of an agreement.

On January 20 Mr. H. Perkins, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Rice's Dairy, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Rice's Dairy, Limited, Toronto, Ont., and Local 647, Milk Drivers and Dairy Employees Union, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. J. P. Nicol, Industrial Relations Officer, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Gelber Brothers, Limited, Toronto, Ont.—On January 19 the Minister of Labour was advised by the Ontario Labour Relations Board that negotiations had been continuing for thirty days between Gelber Brothers, Limited, Toronto, Ont., and Building Service Employees' International Union, Local 204, and that there was no indication of the successful completion of an agreement.

On January 20 Mr. G. Fenwick, Conciliation Officer, Ontario Department of Labour, Toronto, was appointed Conciliation Officer to confer with the parties in an attempt to effect an agreement.

Report of Board in Dispute between the Corporation of the City of Kelowna, Kelowna, B.C., and the Kelowna Civic Employees' Union

On December 27 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Corporation of the City of Kelowna, Kelowna, B.C., and the Kelowna Civic Employees' Union. A minority report was submitted by Mr. W. Sands.

The Board was under the chairmanship of His Honour Judge J. R. Archibald, Kamloops, B.C., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. John Galbraith, of Kelowna, B.C., and W. Sands, also of Kelowna, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations P.C. 1003, and in the matter of the Corporation of the City of Kelowna, Kelowna, B.C. (Employer), and certain of its employees, members of the Kelowna Civic Employees' Union (Employees).

The Board started sittings on Wednesday the 13th inst., the Employer being represented by Mr. E. C. Weddell, solicitor, and the Employees by Mr. Ross Heniot. It was agreed by both parties that the only matter in dispute which it would be necessary for the Board to consider was the question of union shop and check-off. Five witnesses for the Employees, all members of the Kelowna Civic Employees' Union, gave evidence. The Union was certified on June 1, 1944, and now consisted of 29 members. although in August last the membership was 41. Amicable relations had for a number of years existed between the employer and the employees and the Union was not formed because of any unpleasantness in these relations. The witness Weeden, Secretary-Treasurer of the Union explained that the Union was formed because certain employees who in the busy season worked in the packing houses, thought it would be in the best interests of the City Employees to have a union. The Union having been formed, a negotiating committee met the committee of the City Council appointed for the purpose, on several occasions. A draft agreement was prepared by the Employees and the result of negotiations was that agreement was reached on all points except:—

1. Union Shop and check-off.
2. Seniority clause.
3. Holidays with pay.

A conciliation officer then met with the parties and agreement was reached on matters 2 and 3.

The benefits and necessity of a union shop and check-off were fully dealt with by the Employee Witnesses. The case for the Employer was presented by the evidence of Mayor George Alexander McKay and Alderman George W. Sutherland.

After a full consideration of the evidence and the arguments presented, this Board is of the unanimous opinion that a case for union shop and check-off has not been made out according to the relations at present existing between Employer and Employees.

The Board member, William H. Sands would, however, recommend that a maintenance membership clause be placed in the agreement and will submit a minority report with this recommendation. The other members of the Board do not agree in this.

Respectfully submitted.

J. R. ARCHIBALD,
Chairman.
JOHN GALBRAITH,
Member.

Dated at Kelowna, B.C., the 18th day of December, 1944.

Minority Report

Kelowna, B.C.,
Box 422,
December 20, 1944.

Re: Wartime Labour Relations Regulations P.C. 1003 and re the Corporation of the City of Kelowna, and certain of its employees, members of the Kelowna Civic Employees' Union, Kelowna, B.C.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

SIR,

I cannot concur in the report of my fellow board members with regard to the above-mentioned dispute, and therefor must make a minority report.

Both the Employer and the Employees in the evidence have shown that there has not been animosity between them, and further the Negotiating Committee and the Employer have in the past negotiated on an amicable basis, but I do not consider such relationship sufficient evidence for not recommending union shop and check-off.

Evidence given shows that the Union has 76 per cent of the employees in the Union, but in view of the infancy of the Union I cannot recommend union shop and check-off, but I believe that there should be a security clause embodied in the agreement and would recommend maintenance of membership without the check-off.

There are a number of good reasons for this and among them the following, which will be quite applicable to the Union.

There would be a better spirit among the workers themselves and greater efficiency.

It would provide responsibility to those who share the benefits.

The principle of majority rule would be carried throughout, and it can only be done through a form of union security.

With the inclusion of a union security clause in the collective agreement it leaves the Union in a position to turn its attention to the problems of efficiency.

Then, if the Union is to carry out its share of responsibility, it must have authority which matches its responsibility.

In recommending the maintenance of membership clause I do so with the above thoughts in mind, and also further believe that the Union is capable of such a responsibility and proper policing of their agreement.

All of which is respectfully submitted, I remain.

Faithfully yours,

W. H. SANDS,
Board Member.

Report of Board in Dispute between Noranda Mines, Limited, Noranda, P.Q. and Local No. 688, International Union of Mine, Mill and Smelter Workers

On January 9 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Noranda Mines, Limited, Noranda, P.Q., and Local No. 688, International Union of Mine, Mill and Smelter Workers. A minority report was submitted by Mr. Guy M. Desaulniers.

The Board was under the chairmanship of His Honour Judge Chas. E. Guerin, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. Walter A. Merrill, K.C., Montreal, and Guy M. Desaulniers, also of Montreal, appointed on the nomination of the employer and employees respectively.

The text of the Board's report, and of the minority report follows:—

Report of Board

Re: Wartime Labour Relations Regulations P.C. 1003 and Noranda Mines Limited, Noranda, P.Q., and Local 688, International Union of Mine, Mill and Smelter Workers.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

Sir:

The Board of Conciliation appointed herein, consisting of His Honour Judge Charles E. Guerin, Chairman; Mr. Guy Merrill Desaulniers, representing the "Employees"; and Mr. Walter A. Merrill, K.C., representing the "Employer"; after hearing the Parties on the

27th and 28th of November, 1944, and after numerous meetings for the purpose of making its recommendations, begs to report as follows.

The "Employees" were represented by Mr. David Cote and Mr. Thomas F. McGuire, and the "Employer" was represented by Mr. L. E. Beaulieu, K.C., Mr. William A. Walton and Mr. R. V. Porritt.

The Board unanimously wishes to take this opportunity of expressing its appreciation to all the parties who appeared before it, for the friendly and co-operative spirit which prevailed throughout and for the dignified and able manner in which both sides presented their case.

The matters referred to the Board to be dealt with were the following, taken in their order in the proposed Collective Labour Agreement, in regard to which the Parties are negotiating:—

1. Existing benefits
2. Maintenance of membership
3. Check-off
4. Arbitration
5. Union rights

UNANIMOUS FINDINGS

ARTICLE 3—EXISTING BENEFITS AND CANCELLATION OF EXISTING PRACTICES AND CONDITIONS

The Board is unanimously of the opinion that neither of the suggested paragraphs of the Parties in regard to this matter be included in the proposed Collective Labour Agreement, and recommends that the following Article 3 be included in the said Agreement in the place and stead of the suggestions of the Parties:—

"Article 3—Replacement of former Agreements"

This Agreement supersedes all previous Agreements relative to rates of pay, hours of work and other working conditions heretofore existing between the hourly rated employees and the Company.

The Board unanimously considers that it has no jurisdiction in regard to the question of existing benefits inasmuch as they affect labour costs which are matters within the exclusive jurisdiction of the National War Labour Board.

ARTICLE 7—ARBITRATION

The Board unanimously recommends that Article 7—Arbitration—as proposed by the Employer, be accepted, subject, however, to the replacement of Paragraph 2 thereof, so that Paragraph 2 should read as follows:—

2. Should the Arbitrator appointed by the Union and the Company fail to agree within five (5) days upon the appointment of a third Arbitrator, the Director of Industrial Relations of the Department of Labour, Canada, shall appoint a third Arbitrator.

ARTICLE 25—UNION RIGHTS

The Board is unanimously of the opinion that this Article, suggested by the "Employees", should not be included in the proposed Collective Labour Agreement, because the matter of Shift Premium, which deals with labour costs and is within the exclusive jurisdiction of the National War Labour Board, will, no doubt, be dealt with in the pending application by the Union to the National War Labour Board, and as regards Classification Adjustments, the Board is also unanimously of the opinion that this is a matter which comes within the purview of Article 6 dealing with Adjustment Grievances.

(Sgd.) C. E. GUERIN,
Chairman,
(Sgd.) WALTER A. MERRILL,
Member of the Board,
(Sgd.) GUY M. DESAULNIERS,
Member of the Board.

Majority Report

MAINTENANCE OF MEMBERSHIP AND CHECK-OFF

The majority of the Board, consisting of His Honour Judge Charles E. Guerin and Mr. Walter A. Merrill, K.C., are of the opinion that they cannot in this matter recommend the inclusion of the proposed clauses of Maintenance of Membership and Check-Off in the Collective Labour Agreement.

In order to clarify the issues, it is necessary to review the arguments of the respective parties.

The Union submits that Maintenance of Membership and Check-Off clauses in a Collective Labour Agreement are of common interest; that they result in the Union becoming stronger; and that they permit its organizers to devote more time to Union affairs, as well as permitting them to make the Collective Labour Agreement more workable and as a result obtain greater production and greater profits for the Company.

The Company, on the other hand, energetically opposes the inclusion of Maintenance of Membership and Check-off clauses in the proposed Collective Labour Agreement, which—according to the Company—are for the sole benefit and advantage of the Union.

The Company takes the position that it would not consent to accept these clauses until the Union, which has only recently become established in the Mines of Noranda and which has not yet demonstrated its utility, has proved its worth and necessity.

The Company adds that it wishes to satisfy itself as to how the Union carries on its affairs before it engages itself to dismiss its employees—who may be its most competent and key-men—on the mere demand of the Union and without knowing why these employees no longer form part of the Union or have ceased to be Members of the Union.

The Company further adds that it has no desire to include in the proposed Collective Labour Agreement sanctions to carry out decisions of the Union, in which it has no interest and to which it is not a party.

The Company admits that the Union exists in the United States and is well-established there, but it maintains that the Company has the right to establish to its own satisfaction the working of the Union at its Mine at Noranda before it binds itself to fulfil such drastic clauses, which may prove to be prejudicial to its rights.

As regards Check-off, the Company refuses to collect Union dues, which would be for the benefit of the Union only and it concludes that to collect Union dues and keep special books for the Union without being satisfied of the collaboration of the Union in the carrying out of the Collective Labour Agreement would most certainly not be to the Company's advantage.

It is admitted by the two parties that the Union has only recently been established at Noranda at the Company's Line and that it is only in process of organization.

The Chairman, His Honour Judge Charles E. Guerin, is of the opinion that Maintenance of Membership and Check-Off can only be of advantage to the Company if the Union sees to it that its members voluntarily carry out

the clauses of the Collective Labour Agreement and if the Union collaborates with the Company in securing from its employees greater effort, which would result in increased production, and, further, seeing that the Union is only in process of organization at Noranda, it is too soon to judge of the benefit which it may be to the Company.

Mr. Walter A. Merrill, K.C., is of the opinion that, under no circumstances, should Maintenance of Membership Clause be included in a Collective Labour Agreement and that only in exceptional cases where the parties are in full agreement should a Check-Off Clause be included.

The reasons advanced by the Company are convincing that it is premature to recommend the inclusion of Clauses of Maintenance of Membership and Check-Off in the proposed Collective Labour Agreement.

It is the conclusion arrived at by the Board of Conciliation in the matter of Lake Shore Mines Limited and Kirkland Mine and Mill Workers Union Local 240, which is analogous to the one submitted to this Board, and in which Professor Bora Laskin, of Toronto University, expressed himself as follows:—

While I regard the check-off as an aid to Union stability, which is important to good collective bargaining, I do not think that it should be made the means of initiating that stability, saving perhaps cases where it appears that an employer's unfair labour practices have prevented a Union from establishing itself on solid footing.

Having reached the above conclusion that Maintenance of Membership and Check-Off should not form part of the proposed Collective Labour Agreement, the majority of the Board does not consider it necessary to express its opinion as regards the legal questions raised in the very learned and able argument of Counsel for the Company.

Montreal, 27th December, 1944.

(Sgd.) C. E. GUERIN,
Chairman.

(Sgd.) WALTER A. MERRILL,
Member of the Board.

Minority Report

In spite of my desire to agree with my two colleagues in the matter of maintenance of membership and check-off, I feel constrained, in view of their recommendations, to dissent from them and submit a minority report.

Since the requests for maintenance of membership and check-off are different and must be considered from different angles, I shall deal with them separately.

MAINTENANCE OF MEMBERSHIP

After considering the arguments brought forward by the Union and by the Company on the advisability of incorporating a maintenance of membership proviso in the collective bargaining agreement, I have reached the following conclusions:

The opposition made to such a proviso by the Company may be summarized in the three following objections:

1. That such a proviso would deprive the employees of their freedom.
2. That such a proviso is unlawful.
3. That such a proviso would, if I may say so, turn the Company into an executioner.

I

There can be no question of freedom in the present case, since the employees of the Noranda Mines Limited, members of the Union, themselves, have consented to the inclusion of such a proviso in the collective bargaining agreement, and that on the three following occasions:

- (a) When they signed their application card for membership in the Union, they thereby authorized said Union to negotiate a collective bargaining agreement on all matters pertaining to their working conditions and relations between Union and employer.
- (b) Before submitting such an agreement to the employer, the Union officers had it ratified by the members. That ratified agreement provided for a maintenance of membership proviso.
- (c) Declarations, signed by the Union members, to the effect they wanted the inclusion of a maintenance of membership provision in the collective bargaining agreement, were adduced before the Board of Conciliation.

Considering the position taken by the Union members on those three occasions, I believe that the freedom argument raised by the Company does not hold.

II

Counsel for the Company based his contention of the unlawfulness of such a proviso on the following grounds:—

- (a) Section 20, subsection 1, of Order in Council P.C. 1003 does not grant the inclusion of such a proviso in the collective bargaining agreement.
- (b) An agreement may not include a maintenance-of-membership proviso for the reason that such a proviso does not per-

tain to wages, hours of work and other working conditions.

- (c) Such a proviso is contrary to public policy because it takes from the employee his right to work.
- (d) Such a proviso is unlawful because it is a form of support given the Union by the Company, a thing which is prohibited by section 19, subsection 1, of Order in Council P.C. 1003.

(a)

According to said subsection, an employee may not, indeed, be coerced or intimidated into joining a Union or a workers' organization, but the subsection does not in any way prevent an employer from dismissing an employee for the reason that he no longer belongs to the Union, when the collective bargaining agreement includes a maintenance of membership proviso, especially when the employees, members of the Union, happen to have personally ratified said proviso.

The last line in subsection 1 of section 20 was added simply in order to allow the parties to incorporate in their agreement provisos relative to the closed shop, the Union shop or the maintenance of membership.

(b)

A collective bargaining agreement may include all kinds of provisos, as long as they do not break a law or be against public policy.

As I have mentioned in paragraph "a" of my memorandum, the section dealing with maintenance of membership is not contrary to the law.

As for the topic of public policy, I will deal with it in the following paragraph.

(c)

When we speak of the right to work, we deal with something which does not actually exist. Every individual has the right to look for work, but he cannot force anyone to employ him for the simple reason that he has a presumed right to work.

An employer may always impose his terms of employment, and he may even insist an employee become a Union member if the latter wishes to work for him.

The membership maintenance proviso is not contrary to public policy and may very well be included in a collective agreement.

(d)

When an employer, by virtue of a maintenance of membership proviso, dismisses an employee who is not a Union member, he does not support the Union in any way in so doing, but is simply acting in accordance with a

proviso of the collective agreement and, thus, he is not going against the terms of subsection 1, section 19, of Order in Council P.C. 1003.

Section 19 of Order in Council P.C. 1003 is only intended to prevent an employer from organizing his employees' trade union himself, or else controlling himself his employees' trade union with which he bargains.

III

The Company, in its memorandum, contends that a maintenance of membership proviso would make it the headman or, to use a popular expression, "the one that wields the axe."

This objection appears to be the only one to have any effect on the decision of the Chairman of our Conciliation Board.

The Chairman has thus summarized this objection of the Company:

Why should I force the Company to accept the maintenance of membership proviso when the latter refuses to do so on the ground that the Company would not profit by it? Why not ask the Government to adopt legislation which would oblige the employer to accept the union shop, the closed shop or the maintenance of membership proviso? In order to reply to this question, I am first referring to Honourable Justice Boulanger's decision, to be found at page 26 of his report in the case of United Shipyard (L.G., April, 1944, p. 481):

"I do not believe that we should discuss the necessity of adopting legislation forcing an employer to accept a security proviso, but that rather we should weigh the merits of the principle of a maintenance of membership proviso".

When we consider the merits of the principle of the maintenance of membership proviso, we find that such a proviso may be of advantage to both parties.

There is no doubt that said proviso will be advantageous to the Union; as for the employer, we should first find out if he admits the following facts:

I. Does the employer admit that the collective agreement is an excellent way to determine his relationship with his employees.

II. If the employer admits that the collective agreement is a good thing, he must see to it that it is protected and observed.

III. If the employer wishes that the collective agreement be observed, he must assist the Union in controlling its members.

IV. In order to assist the Union in controlling members who do not want to follow the terms of the agreement and who are working against the common interest, it will be

absolutely necessary that the employer do his part and assist the Union in dismissing his employees.

V. If the employer assists the Union in controlling its members, he is assured of a better co-operation and, therefore, he profits by it.

In brief, I must say that if the employer finds that the collective agreement is a good thing and that the Union is also a good thing, he must be prepared to see that his employees maintain their membership.

If Noranda Company has felt it necessary that its employees adhere to an insurance plan, even as a condition of employment and of maintenance of employment, it is because the Company believes that this insurance plan is in the common interest. The Agreement is likewise in the common interest; a Union composed of members who cannot quit it during the duration of the agreement is a good thing for the common interest.

If the Noranda Mines Company Limited lays off an employee because he no longer wishes to be a member of the insurance plan and in doing so acts against general interest, it may very well, according to the same principle, lay off an employee who no longer wants to be a member of the Union.

The maintenance-of-membership proviso was granted by several Arbitration bodies, and I may state the following cases:

- (a) The case of West Coast Shipbuilders Limited and Hamilton Bridge (Western) Limited, Vancouver, B.C. (L.G., May, 1944, p. 620.)
- (b) The case of United Shipyard Limited, Montreal. (L.G., April, 1944, p. 481.)
- (c) The case of Dominion Rubber, St. Jerome, P.Q. (L.G., May, 1944, p. 620.)

For all the above-mentioned reasons, I recommend that a maintenance-of-membership proviso be included in the Agreement.

CHECK-OFF

In this request of the Union, there is no principle involved, since the check-off system, as requested, is voluntary.

The Company has brought up two objections to this proviso:

1. That it would entail expenses and book-keeping difficulties. 2. That the Company did not want to be the collecting agent of the Union and that the rules did not permit it.

1. To the first objection, the Union replied that it was willing to pay the expenses in connection with the check-off and, as far as book-keeping is concerned, it would be easy for the Company to make such deductions since it was already doing so in several other cases.

2. To the second objection, the Union replied that the check-off was absolutely voluntary and requested by the members in each case; consequently, the Company cannot consider itself a collecting agent when the employees themselves require the Company to make the deductions, and not the Union. It is true that the law forbids a company to finance in any way a union or association of employees, but the law does not forbid the employer at the request of his employees to deduct from their wages their fees to an independent labour organization which is in no way governed by the employer. By its refusal, the Noranda Mines Company Limited shows that it does not wish to co-operate fully with the Union and that it refuses to give the Union the least encouragement. Not considering the arguments of the Company as well-founded, and believing that the establishment of a check-off system by the Company would bring relief to the officials of the said Union and would permit them to deal more fully with other problems of common interest to the Company and the employees, I recommend the inclusion in the collective agreement of a maintenance-of-membership proviso.

In conclusion, I would like to submit a few general remarks which, in my opinion, are of great importance and which, if followed, could result in more effective application of the principles set forth in the official labour legislation.

It is obvious that the members of a conciliation board, after hearing the parties and before stating their recommendations, should consider the state of mind of those before them. If the Union and the employer both show that they are sincere and willing to co-operate, the members of the board should see that they are both protected in their recommendations.

If one party shows, even indirectly, that it does not wish to co-operate fully and truly, it is the duty of the board to protect the other party. If an employer is in favour of the union and of the collective labour agreement system, he cannot be against a maintenance of membership and voluntary check-off proviso.

On the other hand, if an employer does not favour the union or the principle of collective labour agreement and accepts them only because he is forced to do so by an Act, then in such a case the members of the board should take upon themselves to protect the labour organization and the principle of the collective labour agreement, universally recognized, by suggestions permitted by legislation and guaranteeing labour unions their security and stability.

Montreal, December 30, 1944.

(Sgd.) G. M. DESAULNIERS.

Report of Board in Dispute between Defence Industries, Limited, Ajax, Ont., and Local 521, United Electrical, Radio and Machine Workers of America

On January 10 the Minister of Labour received the unanimous Report of the Board of Conciliation which dealt with a dispute between Defence Industries, Limited, Ajax, Ont., and Local 521, United Electrical, Radio and Machine Workers of America.

The Board was under the chairmanship of the Hon. Mr. Justice A. W. Greene, Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Mr. Gerald H. Brown, Ottawa, and Miss Idele Wilson of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations P.C. 1003, and in the matter of Defence Industries Limited, Ajax, Ontario (Employer) and United Electrical, Radio and Machine Workers of America, Local 521 (Employees).

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

The Board of Conciliation appointed by you in connection with the above dispute begs to submit its report as follows:—

The Board held eight sittings in all; seven at Toronto and one at Ajax, Ontario, in an examination of the plant.

The Union was represented by George Harris, Secretary-Treasurer of District 5; and by W. R. Cambers, President of Local 521.

The Company was represented by E. G. Taylor and H. J. Clawson, of the Employee Relations Department of Defence Industries, Limited, Montreal; also by J. D. Wright and A. Russell from the staff of the Ajax plant.

The Board is pleased to report unanimously that an amicable agreement was reached between the parties on the points at issue.

As the meetings with the representatives of both parties were only concluded yesterday, the 5th inst., there has been no opportunity to complete a formal agreement. However, memos covering all the points in dispute have been approved by all parties so that the Board anticipates no difficulty in the completion of the formal document.

Toronto, Ont., January 6, 1945.

Member.

Report of Board in Dispute between the Vancouver News-Herald and the Vancouver Newspaper Guild, Local No. 2.

On January 13 the Minister of Labour received the Supplementary Report of the Board of Conciliation which dealt with a dispute between the Vancouver News-Herald, and the Vancouver Newspaper Guild, Local No. 2. An earlier Report was published in the LABOUR GAZETTE, October, 1944, p. 1236.

The Board was under the chairmanship of Mr. J. H. Harman of Victoria, B.C., appointed by the Minister on the joint recommendation of the other two members; and Messrs. W. S. Owen of Vancouver and H. W. Herridge, M.L.A., of Trail, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Supplementary Report

Since the original report herein dated September 14, 1944, the following developments have occurred, namely:—

1. The representatives of the Employees approached the Provincial Minister of Labour

with a request that the Board reconvene to hear the matters in dispute on the basis of the ruling of the Board made September 13 and appearing on page 1 of the transcript of evidence attached to the September 14 report.

2. After consultation between the Provincial and Dominion authorities the Chairman received the following wire from M. M. Maclean, Director of Industrial Relations:—

Re Board of Conciliation Vancouver News-Herald stop Minister of Labour has agreed that Board should reconvene and resume its inquiry.

3. Pursuant to this wire the Board held preliminary meetings before the expiry of the life of the Board on September 30. The life of the Board had been extended to this date by agreement of all concerned before any formal hearings of taking of evidence were commenced.

On this occasion the Employer was represented by Mr. Stultz, of the office of Farris & Company.

By agreement the week of October 23 was set for the formal hearings and the life of the Board further extended by agreement.

4. Shortly after the Board commenced its hearings on October 23, Senator Farris for the Employer, took the stand that the Board was without authority to proceed as the report of September 14 was a final report and ended the Board's duties.

The majority of the Board ruled that the Board would have authority to proceed if the Minister directed the Board to clarify and amplify its report of September 14.

The Board was of the opinion that the wire of September 22nd set out in paragraph No. 2, was not in itself sufficient to authorize the Board to proceed.

As a result, the following telegram was sent:—

Vancouver, B.C., Oct. 23, 1944.

Rush

M. M. MACLEAN,
Chief Executive Officer,
Director Industrial Relations,
Parliament Buildings or Private Residence,
Ottawa, Canada.

Reference News Herald your wire September twenty-seventh and letter twenty-eighth, stop Board reconvened to-day pursuant to above as per my letter September twenty-eighth stop Employer contends jurisdiction Board to hear evidence ended with report to Minister September Fourteenth stop Majority of Board being Chairman and Herridge ruled Board should adjourn to October twenty-fourth ten thirty to enable Minister give direction to Board pursuant Section thirty-one subsection nineteen to clarify and amplify statement in report quote unable to make recommendation on merits of matter referred to it unquote stop And direction to call such further evidence as may be necessary this end stop Direction of Minister should contain indemnification members of Board against costs of possible injunction or other proceedings stop Owen contends life and authority of Board ended at date report passed to parties namely September twenty-second stop Rush reply undersigned Hotel Vancouver.

J. H. Harman,
Chairman.

The Board adjourned from day to day awaiting reply from the Minister.

On the morning of October 24 no reply had been received from the Minister, and before adjourning, the Board invited the parties to attend informal and private meetings for members of the Board with a view to reaching settlement of the dispute. This invitation was refused by the Employer. The Board then adjourned until 2.30.

At the time of the afternoon session no reply had been received from the Minister, but the Employer indicated willingness to re-open negotiations direct with the then existing duly appointed Bargaining representatives

of the Employees. The Employer stated that it had no opportunity of meeting the new Bargaining representatives. The former Bargaining representatives of the Employees had left the service of the News-Herald Company. It is the understanding of the Board that one of these persons was discharged, and that the other had left in order to obtain a more advantageous position with an Advertising Company.

The Board then adjourned until October 25, after making arrangements for a private meeting with the representatives of the parties in order to ascertain whether the proposed renewal negotiations had been successful or otherwise.

On the morning of the 25th the parties informed the Board that an agreement had been reached on a proposed contract except in respect of the question of compulsory Guild membership and a minor question in respect of differences over adjustments for overtime pay.

The Bargaining representative of the Employees stated that he personally was willing to waive the compulsory Guild membership provisions, but before so doing he desired to consult with the persons who had appointed him.

The Employer took the stand that as only approximately sixty (60%) per cent of the Employees concerned were Guild members, all Employees should be consulted by the Bargaining representative.

After consultation, the Board advised the Bargaining representative that it was a matter of his own discretion as to whom, if anybody, he consulted. The Chairman and Mr. Owen are of the opinion that the Bargaining Agent was informed that the members of the Board were all of the opinion that having regard to the existing circumstances, all Employees affected should be consulted.

Mr. Herridge is of the opinion that the Board's unanimous recommendation was that the Guild make arrangements to consult all Employees affected.

A short public session was then held at which the proposed agreement to be submitted to the Employees was filed as Exhibit 9, and the parties instructed to notify the Chairman as to whether or not the agreement had been ratified by or on behalf of the Employees.

The Chairman was eventually advised that an agreement had been reached, and later a duplicate executed copy thereof was received by the Chairman.

The executed duplicate copy in question was passed to the Chairman by the Employer as

the result of letters from the Chairman addressed to both the Employer and to the Bargaining representative of the employees.

A copy of the agreement in question is attached to this report.

The Board takes pleasure in announcing that the dispute in respect of which it was

appointed a Board of Conciliation has been ended.

Dated the 5th day of January, A.D. 1945.

(Sgd.) HERBERT W. HERRIDGE,

(Sgd.) W. S. OWEN,

(Sgd.) J. H. HARMAN,

Chairman.

Report of Board in Dispute between the Various Employers, Members of Okanagan Federated Shippers' Association, Vancouver, B.C., and the Fruit and Vegetable Workers' Union, Locals 1, 3, 4, 5, 6, 7, and 8

On January 25 the Minister of Labour received the unanimous report of the Board of Conciliation which dealt with a dispute between the various employers, members of the Okanagan Federated Shippers' Association, Vancouver, B.C., and the Fruit and Vegetable Workers' Union, Locals 1, 3, 4, 5, 6, 7, and 8. A minority report was submitted by Mr. Bernard G. Webber.

The Board was under the chairmanship of Mr. F. M. Clement, Vancouver, B.C., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. W. E. Haskins, also of Vancouver, appointed on the nomination of the employing company; and Mr. Bernard Webber, M.L.A., of Penticton, appointed on the nomination of the employees concerned.

The text of the Board's report and of the minority report follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and Various Employers, Members of the Okanagan Federated Shippers' Association, and the Fruit and Vegetable Workers' Union, Locals 1, 3, 4, 5, 6, 7, and 8.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

Dear Sir:

The sittings of this Board were held in the Court Room at Kelowna, B.C., from November 14 to 19 and December 11 to 15, 1944, and in Vancouver, B.C., on certain days between January 9, and 17, 1945.

His Honour Judge A. M. Harper was originally appointed Chairman of this Board on October 6, 1944, but owing to the pressure of official duties occasioned by his elevation to the Supreme Court of British Columbia found it necessary to resign. The present Chairman was appointed on October 19, 1944.

In the statement made in the application for the Board the nature of the cause of the dispute was stated to be: "The parties were unable to agree on the Union Shop and Checkoff provision" in the proposed agreement. This was the only point in dispute. Two agreements have been signed on previous occasions. The first was dated June 26, 1942, and the second June 15, 1943. The latter was to run for one year and was subject to the usual terms and conditions of amendment.

The employers were represented by Mr. Walter Owen, Lawyer, of Vancouver, and Mr. Daniel O'Brien, Regional Director, Canadian Congress of Labour, Vancouver, represented the employees.

A careful record has been kept of all evidence submitted.

The packing firms, and consequently the union membership, in the dispute are spread over one hundred and fifty miles of territory. In this area there are twenty-eight packing firms. These operate one or more houses each, making a total of forty packing houses in all. Sixteen out of twenty-eight separate packing firms have been organized and in them the Union certified as the bargaining agency. The balance, twelve in number, have not been organized or certified. The twelve that are unorganized are also part of the general economic set-up in the Valley.

One basic wage prevails over the whole area (See Exhibit No. 17, Regional War Labour Board Findings ABC 4494 and ABC 4828-4840).

The case of the employees was ably presented and was based mainly on the following general points:

1. That the growers themselves have a strong collective bargaining agency in British Columbia Tree Fruits Limited, an incorporated body set up by the growers themselves acting through the British Columbia Fruit Growers Association.

2. That over a long period of time, as recorded in official documents (Duncan Report, McGregor Report, Harper Report), there has been some coercion of a minority of fruit growers by a strong majority in order to bring them into line with the organization and marketing

plans of the majority to the advantage of the industry as a whole.

3. That the growers, packers and sales agency operate under a very strong and binding contract (Exhibit No. 9) which in effect gives the sales agency control of all sales of fruit from the Valley. That is, all fruit sold from the Valley is sold through one agency.

That it is the desire of the Union to co-operate with the employees and generally strengthen the position of the two groups, employers and employees, working in harmony within the framework of an agreement containing the standard Union shop and check-off clauses; and further to strengthen the position of the growers by winning the support of the Union in requests for suitable marketing legislation.

5. As is the case with the growers, so it should be with the workers: i.e., no small minority should be permitted to enjoy the advantages and privileges of strong organization without paying their share of the cost and accepting their share of responsibility.

The case for the employers was based mainly on the following general points:

1. There is no dispute with the Union or with its members individually. The place and value of the Union are recognized. The employees have a perfect right to organize as they please. That is their business.

2. The employees should not expect the employers to assist in organizing the worker and by the acceptance of the union shop principle thereby coerce certain employees who do not wish to belong to the Union. Coercion is a matter for the Government, not for the employers.

3. Only a part of the Valley is organized, and consequently the union houses might be at a decided disadvantage with regard to the supply of labour.

4. Under the War Measures Act, British Columbia Tree Fruits Limited is operating as a sales agency for all apples sold from the Valley (Order in Council making regulations with respect to the British Columbia Fruit Board, P.C. 7060—Exhibit No. 13). This order has been renewed each year since the outbreak of war and may or may not be renewed next year. There is no comparable peacetime legislation.

5. The British Columbia Tree Fruits Limited is operating as the agency for all other fruits under a three-party agreement.

6. The Three-party Contract (Exhibit No. 9) is entirely voluntary. The growers as a whole feel that the contract is to their advantage and sign it. There is no coercion.

7. That the general set up (Exhibit No. 12) is voluntary. Membership in the British Columbia Fruit Growers Association is voluntary.

8. There is no check-off for the membership, but rather the British Columbia Fruit Growers Association is financed by a lump sum grant from British Columbia Tree Fruits Limited.

The evidence indicated that at the peak of the season this year there were 3,656 non-permanent employees in all the houses in the Valley. Of this number, 2,195 were employed in the certified houses. At the same time, there were 183 permanent employees, of whom 111 were in certified houses.

The total numbers of permanent and non-permanent employees belonging to the Union were not disclosed. This number would vary from week to week. In some houses the Union membership was as high as one hundred per cent.

Also, the labour turnover is relatively high. The peak number at any one time this year in a house that is believed to be fairly representative was 186, while the number of names of different employees appearing on the books was 378.

It is admitted by all that many employees are temporary and transitory. Some are high school boys and girls and other bright though less responsible people who wish to earn a little additional money or for patriotic reasons to help out in an emergency.

What might be termed "seasonal" employees are a more responsible type of people. Many local residents, housewives, farmers' sons and daughters, restaurant workers, and others have worked in the packing houses for some years and are at least very competent, if not expert workers.

The time or period of employment of seasonal workers varies materially. An experienced, competent packer, who was a witness, worked 109 days. Some seasonal employees may have worked longer than this. Others would work a much shorter time. There were ten packers in this house, six of whom were housewives, two were girls who generally worked in restaurants. There was no information about the occupations of either of the other two girls. This may be considered fairly typical. One witness earned \$487 last year. This could be more or less than others earned, but was a general figure for that kind of worker. The time worked and the amount earned, coupled with the fact as indicated by the evidence that many of these people are housewives and many others are employed in different occupations throughout the remainder of the year, raises the question as to whether or not money earned from packing houses employment is the main income or simply supplementary to a more substantial family or individual income. Undoubtedly in the majority of cases, although very important, it is supplementary income, and the employment is supplementary employment.

Most of these seasonal workers are resident in the fruit producing area and have an interest in the welfare of the community.

The other type of employee previously referred to is the one who is still less dependent on this type of income and should perhaps be considered temporary or transient. Sometimes he or she works to earn "pin" money and sometimes for diversion or for patriotic reasons.

Consequently the question is raised with regard to placing a share of the responsibility for the welfare of the industry (and the Union) in the hands of persons who have so little definite interest in the industry as a whole.

Under the general set-up, the fruit is sold, all charges and expenses paid, and what is left over is paid back to the growers from a series of pools based on the quantities, varieties, and qualities produced by each grower. The grower gets what is left, and this fluctuates materially from year to year.

There is a feeling of uneasiness in the minds of the growers with regard to future prices, since at the present time insofar as apples are concerned they are operating under the War Measures Act. They have confidence in the effectiveness of the Three-party Contract but are asking for special federal marketing legislation, i.e., legislation of a type that would tend to preserve the present set-up. This may or may not be forthcoming.

While there is no dispute with regard to wages and the matter of wages was not (and could not be) referred to this Board, it should be pointed out that wage increases over a period of years have been substantial and steady (Exhibit No. 32). A single example is found in unwrapped apples and pears, where the rate has been voluntarily increased from 3½c per box in 1935, to 4c per box in 1938, to 4½c per box in 1940, to 5½c per box in 1944. The rate was increased to 5c, 5½c, and 6½c per box in 1944 by direction of a Regional Labour Board, the latter rates depending on the number of apples in the box. This illustration is used only to indicate the consistency of the upward trend in wages.

On the other hand, there has been a marked variation in returns per box to the grower. Reference is made in particular to page 62, Second Section of the Transcript:—

A. I shall take these same years, 1936 to 1943. Average Price Received is the average of all varieties and grades marketed in that year.

Year	Average Price Received	Cost per Package	Difference cents
1936	·5416	·3046	23·70
1937	·50	·431	6·9
1938	·4417	·3958	4·59
1939	·5196	·4438	7·58
1940	·53	·504	2·6
1941	·9875	1·248	26·05
1942	·959	·477	48·2
1943	1·596	·781	81·5

I might say, Mr. Chairman, that in these costs of production I have not included any interest on investment. These figures are simply for my own information, and I suppose for reasons of my own I do not include interest on the investment in these costs.

The Chairman: Do they include the wages of management?

A. No return for myself of any kind whatever.

Mr. Haskins: No allowance for supervision? A. No allowance for supervision and no interest on investment, only I include allowance for depreciation.

(NOTE: The column headed "Difference" above is not taken from the Transcript.)

Again this is used for purposes of illustration only and to indicate the absence of consistency in trend of price per box to the grower.

Exhibit No. 25 indicates the price variation in McIntosh apples Medium Fancy from as high as \$2.00 to as low as 85c per packed box f.o.b. shipping point over a ten-year period. Or, in other words, there is a profit in some years and no profit in other years.

The representatives of the packing industry feel that they have been fair and reasonable and have gone far enough in meeting the wishes of the most trusted employees. They also admit and recognize a fair, constructive attitude on the part of the present leadership in the Union, but cannot be assured with regard to future leadership.

Mr. G. A. Barret summed up the situation for the packers in these words: "They do fear what might happen in an industry like this where only a small portion of the employees are on full time and such a very great number needed at peak seasons. They fear what might happen if they could not take on anyone who might apply, regardless of their leanings towards or against Unions." (Transcript, Second Section, Page 84) (The ratio of permanent to seasonal and temporary employees is about one to twenty.)

Mr. O'Brien summed up in part in these words: "I do ask you to bear in mind and to see our point that Maintenance of Membership would be a useless thing—no use to us at all. We should have to refuse to accept it, even if the employer offered it to us without a Board, because it does nothing, in our opinion, in an industry such as this, but day-nurse a minority . . . to wiggle their fingers to the others and say: 'You go ahead and keep on making the bread, and we will eat it'."

The Board has tried to reach a compromise solution, but at the end of the discussions was unable to do so. Consequently, under the circumstances there seems to be no alternative other than to recommend that the present amicable relations between the Union and the packing houses be continued and that the proposed agreement (Exhibit No. 14) be executed after deleting all that part, Section 2, Article 3, i.e., the section that has to do with union shop and check-off.

A minority report is being presented by the representative of the employees.

Respectfully submitted,

(Sgd.) W. E. HASKINS,
Member of the Board.

(Sgd.) F. M. CLEMENT,
Chairman.

Minority Report

Re: Wartime Labour Relations Regulations, P.C. 1003, and Various Employers, Members of the Okanagan Federated Shippers' Association and the Fruit and Vegetable Workers' Union, Locals 1, 3, 4, 5, 7, 8.

I find it necessary to dissent from the majority award of the Conciliation Board which justifies the open shop agreements hitherto prevailing in 16 fruit packing houses of the Okanagan Valley. The employees applied for a Conciliation Board on the issue of union shop and check-off.

Certain facts have to be kept in mind in consideration of this dispute.

- (a) The trade union is certified in 16 of the 28 fruit packing houses in the Okanagan Valley. Of these 16, 12 are co-operatives.
- (b) The fruit packing industry is a highly seasonal one with a vast differential between slack season employment and peak employment. Permanent employees of the 28 fruit packing houses of the Okanagan Valley are listed at 184, while in the peak season, 3,696 approximately, are employed.
- (c) A large number of transient and occasional workers, including high school students, shop workers, migratory workers, are employed for relatively brief periods in the industry and cannot be said to have a permanent stake in the industry.
- (d) Prior to the war particularly, seasonal workers in many cases had to earn sufficient income in the relatively short and intense packing period to suffice the year. This meant that mothers, fathers, and older sons and daughters had to work in the industry to build up an income that was rarely sufficient to allow a satisfactory standard of living.
- (e) Because the growers had no assurance that the price they received for their fruit would even meet the cost of production, packing and associated orchard costs were necessarily kept down with the result that wages in the fruit packing industry were relatively low.
- (f) The fruit growers of the Okanagan Valley have, through their co-operative

endeavour, established a central selling agency, B.C. Tree Fruits Limited, (wholly grower-owned and controlled) in an attempt to assure equitable prices for their products. This organization has been conspicuously successful since its inception in 1939 particularly under the protection of the War Measures Act which requires that all apples grown in the area served by B.C. Tree Fruits be sold through its central agency in Kelowna. Prices have also been good due in no small degree to the increased purchasing power available under war conditions. However, when the war ends and the War Measures Act ceases to be effective, and unless further legislation is enacted, there will be no legislative authority to compel selling through the central grower controlled and owned agency. The growers practically unanimously desire such legislation.

Having regard to these facts, the argument of the union on the necessity of union shop was substantially as follows:—

- 1) It was pointed out that the union was seeking union security through collective bargaining with the employers in like manner to the way in which the growers have sought to stabilize their industry through legislation enforcing central selling.
- 2) Union security was necessary in order to establish wages and working conditions on a fair basis in the fruit packing industry.
- 3) With union security achieved, the union would be able to direct its energies toward greater labour-management co-operation in the interests of the industry at large. Now it is required to concentrate on obtaining union security.
- 4) The fact was stressed that under the open shop agreement the union was required to observe its commitments under the contract without having control over the minority of workers in the 16 plants involved who were not members of the union. The union argued that it was to the interest of the industry to have the union in a position to fulfil its responsibilities adequately.
- 5) It was argued that union shop would facilitate the settlement of grievances.
- 6) This principle was stressed. That the minority unorganized in a certified house were protected under the umbrella held by those in the union, and accepted improved wages and working conditions obtained by the union without contributing to the support of the union.

The representatives of the employers argued substantially that union shop was not practicable in an industry with such an extreme turnover of labour; that in these days of labour shortages key men who were irreplaceable might leave their jobs if forced to join the union; that the Canadian Congress of Labour was in politics and men should not be forced to join a union which might subscribe to a political party in which they did not believe; that it was undemocratic to force a man to join a union; that the check-off would entail an unjustifiable burden on already overworked office staffs; that conditions between workers and management in the industry had always been harmonious and there was no need for a union shop; that 12 of the valley packing houses were unorganized; that union shop would lead to abuses by the union; that wages should not be artificially pegged when the price of the product was so variable; that there was no analogy between the endeavours of the union and that of the growers; that the employer did not believe it was incumbent upon him to aid the union to consolidate its position.

In reference to these objections the most tenable one to me is in regard to the seasonal character of the industry, and to the fact that so many transient workers have no stake in the industry.

It does not seem reasonable that a key man would leave his job solely because he had to join the union. On the contrary, if real conciliation is not achieved it is likely that the union membership in the 16 packing houses may be dissatisfied.

I cannot believe that check-off would involve the additional burden claimed; nor that union shop would necessarily lead to the abuses suggested. The Canadian Congress of Labour has recently disavowed any official political affiliation.

The union gave assurances to the Conciliation Board that it would be prepared to negotiate wage adjustments in line with any declining prices for fruit. It is not likely that it would wantonly jeopardize the source of income of its members.

I cannot accept the argument that it is undemocratic to require a man to join the union certified in his place of employment, especially when that man has accepted without misgivings the benefits the union has achieved. Democracy does not mean that everyone shall do as he pleases. While the minority has the right to voice its objections, democracy often requires that in the interests of the general welfare as democratically determined the minority be required to conform.

There is a distinct though by no means complete analogy between the demands of the workers and the endeavours of the growers through their collective bargaining to protect their livelihood. In this particular the analogy is true. Under existing circumstances all apple growers in the area are compelled to sell through B.C. Tree Fruits Limited. B.C. Tree Fruits Limited obtains its working capital through a per packed box levy on the fruit it handles. Out of the funds so raised it makes a grant to the growers' organization British Columbia Fruit Growers' Association to defray its cost of operation. This can be likened in general terms to a compulsory check-off on all apple growers and on the growers of other fruits who ship without exception through B.C. Tree Fruits Limited. While a grower shipping through the agency is not compelled to belong to the growers' organization, he nevertheless contributes indirectly but tangibly to the upkeep of it. I am in complete accord with that principle and believe in extending it to the union.

It is not at all indisputable that relations between the workers and management have always been harmonious. Unions come into existence when the workers demand them to rectify abuses which they believe to exist. The fact that the union has been certified in 16 of the 28 houses since it entered the Okanagan Valley in 1942 attests to the fact that it fulfilled a need felt by the workers. Moreover the sessions of the conciliation board itself, the very fact that a conciliation board was necessary, indicates that complete harmony does not exist.

It would appear to be true that negotiations have always been conducted with commendable good will. That is indicative of the reasonable character not only of the shippers concerned, but of the representatives of the Union. In the three years that the union has been in existence it has proven its concern for the welfare of the industry as a whole. On their part, the shippers have not, according to the evidence, discriminated against union members, nor are they opposed to the existence and recognition of the union. I feel however that the employers have not sufficiently appreciated the advantage which a strong and well disciplined union can be to the orderly and efficient operation of their plants.

I am prepared to take cognizance of the seasonal nature of the industry concerned. It does not appear that a case has been made for the inclusion of transient workers in a union shop agreement. However I most definitely am of the opinion that permanent and seasonal workers who work upward of

30 days per year in the industry, and do so from year to year, are entitled to union shop and check off. It may be pointed out that union shop contracts have operated satisfactorily in the seasonal fruit packing industry of the United States.

At the same time as I advocate union shop and check-off clauses in the agreement to cover permanent and seasonal employees of the character defined, I feel that as evidence of their good faith, and in recognition of obtaining these clauses, the union should be prepared to accept a no strike, no walkout or slowdown clause in the agreement. To com-

plete the picture, the employers should subscribe to a no-lockout clause.

While I regret exceedingly that common ground has not been found in these conciliation proceedings, I wish to commend the integrity and restraint of all witnesses before the Board, and the orderly and efficient manner in which the business of the Board was despatched.

Dated at Penticton, 19th January, 1945, and respectfully submitted.

(Sgd.) BERNARD G. WEBBER,
Member.

Conciliation Work of the Industrial Relations Branch during January, 1945

Activities Under the Conciliation and Labour Act and Other Legislation

DURING the month of January, officers of the Industrial Relations Branch were called upon to handle 28 industrial disputes or controversial situations involving 19,816 work-people employed in 24 different establishments. Of these 20 were new disputes which originated during the month, while 8 were situations which had been un-terminated as of December 31, and received further attention in January. They were dealt with under the provisions of the Conciliation and Labour Act, being distinct from, and in addition to Conciliation proceedings under the Wartime Labour Relations Regulations described on previous pages, and under Order in Council P.C. 4020.

Industrial Relations officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B. and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Classified by industries, the disputes occurred as follows:—

MINING AND SMELTING, ETC.:

Coal Mining	5
Metal Mining	1

MANUFACTURING:	
Vegetable Foods	1
Metal Products	12
Fur and Leather and other animal products	1
Textiles, Clothing Products, etc.	1

Arbitration	2
Administrative action	4
Investigation Only	3
Settlement Pending	6

Brief summaries of a few of the cases of chief interest are given below:

Street Railway Workers, Vancouver, Victoria and New Westminster, B.C.—Transportation on street railway and motor bus routes was completely tied up for ten days during January in three major Pacific Coast cities. In a strike for increased wage rates, work was stopped on January 9, by some 2,454 urban employees of the British Columbia Electric Co. Ltd., of whom 1,919 were situated in Vancouver, 350 in New Westminster and 185 in Victoria, B.C. The men were members of local unions of the Amalgamated Association of Street Electric Railway Operators and Motor Coach Employees of America.

Prior to the strike an application had been made by the Union to the Regional War Labour Board of British Columbia for increases in wage rates ranging from 12½ to 29 cents per hour. The Regional Board declined to allow the increases requested on the ground that gross inequalities or injustices did not exist. However, it directed a general increase of 4½ cents per hour under a permissive provision of the Wartime Wages Control Order which allows increases not having the effect of increasing weekly rates payable in August, 1939, by more than the amount of the appropriate cost-of-living bonus.

The Union appealed to the National War Labour Board against the Regional Board's decision and the Company made a counter appeal. At the request of the Union the case was heard on November 8, 1944. It was understood that although the hearing was being given precedence, decisions in cases pending would have to be handed down in order of priority. On December 27, union members voted to strike if decision of the National Board were not made by a certain date. However, the Board's decision had been reached on the 27th, and reasons for decision were sent to the parties by airmail on December 29.

The decision of the National Board was that the Union had not used a correct basis of comparison in claiming that the original increases requested were necessary to rectify gross inequalities and injustices as revealed by a comparison of street railway wage rates with those of other industries in the area of Vancouver. At the same time the National Board found that the Regional Board, in awarding a general increase of 4½ cents per hour, did not apply the proper principle. On the evidence and

under the formula contained in the Wages Control Order, the National Board felt itself compelled to allow the cross appeal of the Company and deny any general increase.

Notice was immediately issued by the Union that a strike would occur on January 9, 1945. The Union also wired the National War Labour Board for a review of the case. Two days later it again asked for a review, stating that additional evidence was following by airmail. The Chairman of the National Board replied that the application for a review would be considered by the Board upon the receipt by it of the additional evidence promised. On January 5 the head of the Union's Joint Advisory Committee advised the Board that after reviewing the evidence already submitted, it was found impossible to add to what had already been adduced.

On January 6, the parties agreed to meet and try to work out a new formula for presentation to the Regional War Labour Board. On January 7, the Company management, subject to approval by the Regional Board, made a formal offer to the Union which included, among other things, an undertaking to apply the Regional Board's 4½-cent award retroactive to March 1, 1944; to increase by 8 cents per hour all trackmen and skilled mechanics; and to grant certain other concessions, in return for a 3-year agreement. The Union offered a 2-year agreement and held out for a new joint application to the Regional Board for a general increase of 6 cents per hour.

Following a referendum on the question of accepting the Company's offer, the employees went on strike at 4 a.m. on January 9, by a vote of 1,889 to 150. In spite of a complete tie-up of urban operations and of an interurban line from Vancouver to New Westminster, most important war industries were able to keep operating under special transportation arrangements with attendance varying from 90 per cent of normal to full attendance. Other important industries reported attendance from 75 per cent upwards. On the third day of the strike, operations on a suburban line from Vancouver to Lulu Island were discontinued because of alleged picketing. They were resumed later the same day, and with other lines on which the operators were members of the railroad Brotherhoods, suffered no further interruptions. As the strike progressed a large number of schools had to close down owing to the inability of teachers to attend. Retail trade fell off but, generally speaking, only inconvenience was suffered by the public. The entire stoppage was thoroughly orderly.

In the interval between January 2 and the occurrence of the strike, the situation received

close attention by the Department of Labour. Mr. F. E. Harrison, Western Representative of the Department, aided by Mr. G. R. Currie, Industrial Relations Officer, kept in constant touch with the parties locally, and officials of the Department in Ottawa gave unremitting attention to developments. On January 13 the International Headquarters of the Union sent an Executive Board member to Vancouver to assist in reaching an early settlement.

Numerous separate and joint conferences of the parties were held in the local offices of the Department of Labour. On the evening of January 16, with the approval of the Honourable the Minister of Labour and the Deputy Minister, a proposal was put by Mr. F. E. Harrison to the Joint Advisory Committee of the Union that the employees should immediately return to work and make a new application to the Regional War Labour Board for British Columbia for approval of adjustments in wage rates affecting certain classes of labour, to which the Company had already agreed on January 7, and for approval of an increase in the basic wage rate of 6 cents per hour. The Joint Advisory Committee agreed to recommend acceptance of the proposal by the employees.

It was made very clear by officials of the Department of Labour, both in Ottawa and Vancouver, that the Company had entered into no undertaking not to make representations opposing any increase over 4½ cents per hour, and that there was no understanding, secret or otherwise, with the Regional Board which would in any way restrict the freedom of that body in coming to its decision. On instructions from Ottawa, Mr. Harrison on January 17 pointed out in a formal memorandum to the Joint Advisory Committee that it was their duty to make it clear to the employees that no such commitments had been made. By statements at a meeting of the employees, and otherwise, Union leaders carried out the suggestion conveyed by Mr. Harrison, while submitting the formula proposed for a termination of the strike. A ballot was then conducted with the result that the employees voted to return to work by a majority of 1,768 to 262. Operations were resumed by the men on the morning of January 19.

A new application to the Regional War Labour Board was then made by the Union on January 24. Opposition was voiced by the management of the Company to the request for a 6-cent general increase and a proposal that all of the Union's requests should be conditional upon the negotiation of a 2-year agreement as from March 1, 1944.

The decision of the Regional Board on the new application directed the Company to increase the wage rates of all employees affected by the application by 4½ cents per hour retroactive to March 1, 1944, to rectify certain inequalities and injustices, having in mind the employees' increased responsibilities. In addition, it granted trackmen and certain employees in skilled trades increases of 8 cents per hour, of which 4½ cents would be retroactive and the balance payable as from March 1, 1945. Other minor revisions were also granted.

The Union then applied for a review of the case by the Regional Board, but their request was denied. At the time this issue of the *LABOUR GAZETTE* went to press, it was reported that the Union had decided against a further appeal to the National War Labour Board.

Grain Elevator Employees, Port Arthur, Ont.—In the December issue of the *LABOUR GAZETTE* reference was made (page 1509) to the appointment of His Honour Judge W. J. Lindal, of Winnipeg, Man., as an Industrial Disputes Inquiry Commissioner to investigate charges made by the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees that two workmen were dismissed by the Reliance Grain Company Limited of Port Arthur, because of union membership and activity. In a comprehensive report made to the Minister of Labour during January, the Commissioner found that, while the Company was antagonistic to its employees becoming members of a union and had resisted such a development as long as it could, the charges against the Company had not been substantiated. Membership in the union was not an inducing element leading to the dismissal of the two men. They had refused to take the initiative on request of a Company official in repairing a serious breakdown of machinery in the elevator. In refusing they were not only responsible for delay which entailed heavy loss, but were actually breaking the rules of their own union with regard to overtime repair work in cases of emergency.

Metal Products Workers, Hamilton, Ont.—Early in December, the Department received a complaint from the International Association of Machinists that Remington Rand Limited had discriminated against an employee in dismissing her from its Hamilton plant after 9 years of service. The union was referred to the Ontario Department of Labour as the authority having jurisdiction. An investigation was conducted by Mr. J. Hutcheon of the Provincial Conciliation Service, following which the Chief Conciliation Officer for Ontario approved a recommendation to the Federal Minister of Labour for the appointment of an In-

dustrial Disputes Inquiry Commissioner. His Honour Judge W. T. Robb, of Orangeville, was appointed as Commissioner and heard evidence in the case on July 11. After the hearing the Commissioner suggested that the parties get together to dispose of the matter, and a mutually satisfactory settlement was reached under which the employee would be taken back into the employ of the Company. It was therefore unnecessary for the Commissioner to make a formal recommendation in the matter to the Minister of Labour.

Rubber Products Workers, New Toronto, Ont.—A dispute over the rate of production for a particular tire resulted in a strike by some 215 employees in the New Toronto plant of the Goodyear Tire and Rubber Company on January 12, 1945. Approximately 1,171 others either quit with the tire room employees or were unable to work. Time studies by the Company had resulted in the setting of a production standard of 20½ tires per shift by each tire builder whereas the employees claimed that it was impossible to produce more than 18 per shift. Mr. F. J. Ainsborough, Industrial Relations Officer, of Toronto, conferred with representatives of the Company and of Local Union No. 232, United Rubber Workers of America, with which the employees were affiliated. On Sunday afternoon, January 14, Mr. Ainsborough attended a mass meeting of the strikers at which the employees voted to resume work immediately in accordance with a recommendation by the executive of the union. Later at a general meeting of the representatives of the Company and of the Union the Industrial Relations Officer succeeded in having the parties agree on an interim agreement for a period of two weeks during which the parties would endeavour to work out a permanent solution.

Bakery Workers, Toronto, Ont.—During January the Minister of Labour appointed His Honour Judge W. T. Robb, of Orangeville, Ontario, as an Industrial Disputes Inquiry Commissioner to investigate charges that Brown's Bakery Limited, of Toronto, had dismissed 14 of its employees for the reason that they were members of or working on behalf of the Bakery and Confectionery Workers' International Union, Local 264. The appointment was made following a preliminary investigation under the auspices of the Provincial Conciliation Service and a request to the Federal Minister by the Honourable the Minister of Labour for Ontario. At the end of the period under review arrangements were being made for a hearing of the case early in February.

Metal Miners, Timmins, Ont.—During December, 1944, the Department was asked to appoint an Industrial Disputes Inquiry Commissioner on complaint that an employee of Dome Mines Limited, Timmins, Ont., had been dismissed because of activity on behalf of the Timmins Mine and Mill Workers' Union, Local No. 241. Following a preliminary investigation conducted by Mr. G. L. Fenwick of the Ontario Conciliation Service, the Minister of Labour issued a commission, under the provisions of Order in Council P.C. 4020, to His Honour Judge J. P. Madden, of Ottawa. Following a hearing of the case the Commissioner reported to the Minister of Labour that, on the evidence, he found that the employee was discharged for the sole reason that the Company was dissatisfied with his services as a result of a series of incidents, and that he was not discharged or discriminated against because of union activity.

Retail Trade Employees, Toronto, Ont.—Following a preliminary investigation by Mr. J. P. Nicol, Industrial Relations Officer, of Toronto, and a formal request by the Minister of Labour for Ontario, the Federal Minister of Labour in December, 1944, appointed His Honour Judge Ian Macdonell, of Toronto, as an Industrial Disputes Inquiry Commissioner to investigate the dismissal of 5 employees of the Robert Simpson Company Limited, of Toronto. It has been alleged that the employees in question had been discriminated against because they were members of or working on behalf of the Retail Clerks' Protective Association or the Building Service Employees' International Union. At a preliminary discussion with representatives of the parties, in which a settlement was suggested, the Commissioner appointed a date for the hearing of evidence. When the case came up for hearing, it was agreed that direct negotiations would be undertaken and Minutes of Settlement were drawn up and signed by the parties. Under the terms of the settlement, two of the employees requested that their cases be withdrawn, and the Company agreed to re-instate two others in employment of equal standing and remuneration, without loss of seniority or privileges, and to reimburse them for lost time. The dismissal of the fifth employee was upheld without prejudice to application for re-employment as a new employee, it being understood that the Company's records contained nothing to her detriment. All allegations that any of the employees had been discharged or discriminated against because of union membership or activity were withdrawn.

Coal Miners, Midlandvale, Alta.—Reference was made in the November issue of the LABOUR

GAZETTE (page 1361) to a dispute between the Midland Coal Mining Co., Ltd., Midlandvale, Alta., and its employees as represented by District 18, United Mine Workers of America. At that time the employees decided to terminate a strike and, under certain conditions, have the dispute referred to an Independent Chairman as provided by the collective agreement between the parties. In December the Minister of Labour nominated Mr. W. Stanley Ross, of Edmonton, as Independent Chairman. The report of Mr. Ross, which was received on January 2, 1945, indicated that the dispute arose out of a claim by the miners that they were entitled to be paid 35 cents per car of bone loaded out from entries, narrow work, etc. This claim was based on the contention that the wage agreement respecting payment for bone did not require that the bone be loaded into cars, but that loading into cars was an additional service for which extra payment

should be made. The decision of Mr. Ross was that the Company had the right to designate where the bone was to be put and that, in depositing it in cars, the men were only performing the act of removal which was required of them by their contract. The claim of the Union was therefore denied.

At the same time, Mr. Ross was requested to arbitrate a dispute between District 18, United Mine Workers of America and the Hy-Grade Coal Mining Co. Ltd., in the same locality. The issue involved was whether an employee was entitled to holidays with pay under the terms of an award of a Royal Commission under Mr. Justice G. B. O'Connor. As Independent Chairman, Mr. Ross ruled that having regard to all the facts and the requirements of National Selective Service Regulations in respect of termination of employment, the employee was entitled to two weeks' vacation with pay, as claimed.

United States Bill to Establish Full Employment Policy

A BILL aimed at providing full employment in the post-war period has been submitted in the United States Senate by Senator James Murray.

The bill asserts the right of "all Americans able to work and seeking work" to "useful, remunerative, regular, and full-time employment." It seeks to foster private enterprise as a means of providing employment, but calls for a federal program to relieve any threatened job shortage.

Under the terms of the proposed legislation the President of the United States would submit to Congress at the beginning of each regular session a "national production and employment budget." This budget would contain estimates of the size of the labour force and the aggregate volume of investment and expenditure.

When the budget indicated the likelihood of unemployment, the President would recommend action by the federal government to provide jobs. Such action would be directed in the first place towards encouraging investment and expenditure by private enterprise; but wherever it was obvious that such measures would fall short of the indicated scope of the employment lack, the President would trans-

mit to Congress a general program for federal expenditure sufficient to bring the level of investment up to the required volume of production.

"Such a program", the bill reads, "shall be designed to contribute to the national well-being, and to stimulate additional non-federal investment and expenditure. Any of such programs calling for the construction of public works by the Federal Government shall provide for the performance of the necessary construction work by private concerns, under contracts awarded in accordance with applicable laws, except where the performance of such work by some other method is necessary by reason of special circumstances."

Conversely, if the estimated aggregate volume of prospective investment and expenditure is well beyond that required to assure a full employment volume of production, the President is directed to set forth in the national employment and production budget a general program for preventing inflationary economic dislocations.

The proposed legislation contemplates the co-operation of industry, agriculture, labour, and state and local governments with the national government.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Animal Products

EDMONTON, ALBERTA.—BURNS & CO. LTD. AND THE UNITED PACKING HOUSE WORKERS OF AMERICA, LOCAL 233.

Agreement to be in effect from June 30, 1944, to September 1, 1945, and year to year thereafter subject to 30 days notice. The Company recognizes the union as the sole bargaining agency for all production and maintenance employees, excluding only office employees, watchmen, foremen, and those above the rank of foreman. Check-off: Any member of the union who requests the company in writing to deduct his membership dues shall maintain his membership in the union, and any new employee who later becomes a member and who requests the company to deduct his membership dues, shall also maintain his membership in the union.

Hours of work and wages shall be reviewed by the Regional War Labour Board of Alberta and/or the National War Labour Board and a schedule set forth to form part of this agreement. Earnings equivalent to a 40 hour week, subject to certain conditions, are guaranteed. This schedule also gives the rate of wages to be paid for work on six statutory holidays and four additional days, if and when such days are proclaimed as holidays by the Dominion, Provincial or Municipal governments. (This schedule was not received in the Department).

Vacation: one week with pay annually after one year's service; two weeks annually after five years' service; three weeks after 20 years' service for men, after 15 years' service for women. Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Miscellaneous Wood Products

OWEN SOUND, ONTARIO.—CERTAIN FURNITURE MANUFACTURERS AND NATIONAL UNION OF FURNITURE WORKERS, LOCAL 1.

Agreement to be in effect from June 7, 1944, to June 6, 1945, and year to year thereafter subject to notice. The Company recognizes the

union as the sole collective bargaining agency for the employees, coming within the scope of this agreement.

Hours and wages are those specified in the Furniture Code under Industrial Standards Act (see **LABOUR GAZETTE**, Aug., 1944, p. 1008). All other hours worked to be paid for at the rate of time and one-half, also time and one-half to be paid any employees required to work on any of eight specified holidays.

Vacation: one week with pay to all employees after one year's continuous service with the Company. Provision is made for seniority rights and the settlement of grievances.

Manufacturing: Metal Products

TORONTO, ONTARIO.—COULTER COPPER AND BRASS CO. LTD. AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 514.

Agreement to be in effect from April 4, 1944, to February 1, 1945 and year to year thereafter subject to 90 days notice. The Company recognizes the union as the sole bargaining agency for all employees coming within the scope of this agreement. All employees who are members of the union or who later join the union must maintain their membership.

Hours: 8½ Monday through Friday and 4½ Saturday, a 48 hour week. Overtime is payable at time and one-half for all time worked in excess of these hours and also on Sundays and six statutory holidays.

Vacation: one week with pay for employees with one year's service; for those with less service, one day's paid vacation for each two months' service.

Wages: a committee to be established to draw up a job and wage classification which is to be submitted jointly or separately to the Regional War Labour Board for approval. Increases in rates brought about through approval of the Board shall be retroactive to the date of the original submission. Provision is made for seniority rights and the settlement of grievances.

ISLE MALIGNÉ, QUEBEC.—ALUMINUM COMPANY OF CANADA, LTD. AND LE SYNDICAT NATIONAL DES EMPLOYÉS DE L'ALUMINIUM DE ST-JOSEPH D'ALMA, INC.

Agreement to be in effect from November 22, 1944, to November 21, 1945, and year to year thereafter subject to 60 days notice. The Company agrees to negotiate with the Syndicate any matters pertaining to wages, hours and working conditions.

Hours: 8 per day, 48 per week. Overtime for all workers, and work on six holidays for day workers, at time and one-half.

Vacation: one week with pay for employees after one year of continuous service; two weeks with pay for employees after 10 years' continuous service.

Minimum wage rates: plant maintenance—boiler operators 68 to 83 cents, blacksmiths 73 to 93 cents, carpenters 73 and 83 cents, electricians 78 to 93 cents, internal combustion fitters 73 to 93 cents, labourers 56 cents; machinists 78 to 98 cents, millwrights 73 to 93 cents; operators (electrical department) 82 and 85 cents, welders 73 to 93 cents; potroom operation and control—potman 68 cents, crane-men 70 cents, controlman 61 cents; remelt, shipping, distribution and potlining—craneman 62 cents, pourer 62 cents; atomized aluminum plant—fireman (furnace) 73 cents, metal transfer man 73 cents, operators 66 and 73 cents, packers 66 and 73 cents. Provision is made for seniority rights and adjustment of grievances.

Manufacturing: Shipbuilding

KINGSTON, ONTARIO.—KINGSTON SHIPBUILDING CO. LTD. AND INTERNATIONAL BROTHERHOOD OF BOILERMAKERS, IRONSHIPBUILDERS AND HELPERS OF AMERICA, LOCAL 210; INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCAL 1729; INTERNATIONAL BROTHERHOOD OF CARPENTERS AND JOINERS OF AMERICA, LOCAL 2308; INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS.

Agreement to be in effect from August 4, 1944, to August 5, 1945, and year to year thereafter subject to 60 days' notice. The Company recognizes the union as a collective bargaining agency for the employees but reserves the right 60 days prior to the termination of this agreement to negotiate with any other collective bargaining agency representing all or part of its employees.

Hours: summer schedule, 50 hours per week, 9 hours Monday through Friday and 5 hours on Saturday; winter schedule, 44 hours per week, 8 hours Monday through Friday, 4 hours on Saturday; night shift 55 hours per week, 11 hours for 5 nights. Overtime: time and one-half for work in excess of these hours; double time for all work on Sundays and eight specified holidays.

Wages: shall be paid in accordance with the provisions of Finding and Direction of National War Labour Board of January 7, 1944 (L.G., Feb., 1944, pp. 166-169). For work on night shift, 5 cents per hour over day rates. Provision is made for seniority rights and the settlement of grievances.

Manufacturing: Non-Metallic Minerals Chemicals, etc.

THOROLD, ONTARIO.—THE EXOLON COMPANY AND FEDERAL LOCAL 22,689 A.F. OF L.

Agreement to be in effect from May 1, 1944, to May 1, 1945 and year to year thereafter subject to 30 days' notice. The Company recognizes the union as sole bargaining agent and both the Company and union agree there shall be no discrimination, interference or coercion of employees because of membership or non-membership in the union. New employees must join the union.

Hours: 8 per day, 48 per week where possible. Overtime and work on Sundays and holidays, at

time and one-half. Joint application to be made for right to give a cash bonus of one day's pay for Christmas and Labour Day to employees who have worked for the company for three months prior to the holiday.

Vacation: one week with pay for employees with one year's continuous service, an additional day for each year's service over five to a maximum of two weeks to employees with over ten years employment.

Wages: Carbolon plant—cranemen 83 cents, furnacemen 78½ cents, cleaners 68 cents, furnace repairs 66 cents, general labour 66 cents; Exolon plant—cranemen 83 cents, furnacemen 68½ to 78½ cents, breaking floor 68½ cents, bottoms 68½ cents, grain crusher operator 71 cents, general labour 66 cents, loading and unloading 66 cents; control operators 83 cents; mechanical—machinist 90 cents, millwrights 85 and 87 cents, welders 81½ and 85 cents, pipe fitter 83 cents, painter 81½ cents, motor mechanic 78 cents; electricians 87 cents; carpenters 82 and 85 cents. Provision is made for seniority rights and the adjustment of grievances.

Transportation, Etc.: Electric Railways and Local Bus Lines

VANCOUVER ISLAND, B.C.—VANCOUVER ISLAND COACH LINES LTD. AND CANADIAN BROTHERHOOD OF RAILWAY AND OTHER TRANSPORT WORKERS, VANCOUVER ISLAND DRIVERS' DIVISION 234.

Agreement reached in settlement of a strike, to be in effect from January 12, 1945, to December 31, 1947. The Company recognizes the union as the sole collective bargaining agency for all employees. All drivers now employed and all new employees shall become and remain union members. Check-off: all drivers agree to sign check-off for all union dues and assessments which will be deducted by the company from wages and turned over to the union.

Hours: regular runs shall be deemed to consist of a minimum of 8 hours if the regular run equals at least 6 hours.

Overtime: time and one-half after working 8 hours and 35 minutes in any one day, and also for any time worked after 12 hours have elapsed from time of starting work. All work done on Sundays on certain runs to be paid at the rate of time and one-quarter; work done on a driver's day off is payable at time and one-half, with a minimum of four hours' straight time.

Vacation: after the first year of service drivers granted nine days with pay and after the fourth consecutive year of employment twelve days.

Wages: rates shall be paid as provided in the joint application of January 10, 1945. Regular drivers breaking in and teaching new drivers shall be paid 5 cents extra per hour. Spare drivers available for service including drivers on certain end runs are guaranteed a minimum monthly wage of \$108. Students while breaking in as drivers and learning runs shall be paid 57 cents per hour. On charter runs drivers shall be paid regular rate for driving and 57 cents per hour waiting time. Provision is made for adjustment of grievances.

Collective Agreement Act, Quebec

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or evoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the act include the repeal of one agreement and the amendment of four others, all of which are noted below. A correction of the Order in Council number for clerks and accountants at Jonquière, published December 30, was gazetted January 13. A request for a new party for the fur industry (wholesale) at Montreal was published January 13. A request for the amendment of the building trades agreement at Hull was also gazetted January 13.

Orders in Council were also published approving or amending the levy of assessments on certain parties.

Manufacturing: Textiles and Clothing

TEXTILE AND JUTE BAG MANUFACTURING INDUSTRY, MONTREAL.

An Order in Council, dated December 28, and gazetted January 5, extends the time of

the agreement (L.G., May, 1939, p. 527; Mar., 1940, p. 282, June, p. 608; Feb., 1941, p. 183; Jan., 1942, p. 110; Jan., 1943, p. 88; Jan., 1944, p. 70) to December 31, 1945.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated December 23, and gazetted January 5, extends the term of this agreement (L.G., May, 1944, p. 637, August, p. 1007, Nov., p. 1368 and previous issues) to March 31, 1945.

Manufacturing: Metal Products

ALUMINUM INDUSTRY, SHAWINIGAN FALLS.

An Order in Council, dated December 23, and gazetted January 5, repeals this agreement and all Orders in Council relating thereto (L.G., Nov., 1937, p. 1273; April, 1940, p. 390).

Construction

BUILDING TRADES, ST. JEROME.

An Order in Council, dated December 28, and gazetted January 5, amends the previous Orders in Council for this industry (L.G., Feb., 1943, p. 220, April, p. 490, and other issues as noted therein).

Weekly wage rates for maintenance workers: journeymen \$26.40, apprentices \$13.45, common labourers \$19.20.

Service Business and Personal

BARBERS AND HAIRDRESSERS, THREE RIVERS.

An Order in Council, dated December 28, and gazetted January 5, amends the previous Orders in Council for this industry (L.G., March, 1942, p. 353, Sept., p. 1098; April, 1943, p. 490, Aug., p. 1131; May, 1944, p. 637, June, p. 754).

Hours are slightly reduced. Weekly wage rates: barbers and male hairdressers, \$16 plus 50 per cent of all receipts in excess of \$21 made by the employee during the week or \$20 per week without commission. The scale of minimum charges is changed. Apprenticeship regulations are slightly altered.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the upgrading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to December 31, 1944, the gross enrolment under Canadian Vocational Training has been as follows:—

Training for Industry.....	246,401
Army Tradesmen.....	46,088
Navy Tradesmen.....	8,685
R.C.A.F. Tradesmen.....	65,201
Rehabilitation (discharged persons from the forces)..	6,193
Students	7,472

Total 380,040

During December there was no full time pre-employment industrial training in British Columbia, Manitoba, and Saskatchewan and an enrolment of only 39 in the Provinces of Nova Scotia, New Brunswick and Alberta. Twenty-five Plant schools were still operating with the majority being in the Province of Quebec.

As reports indicated a shortage of certain skilled workers related to agricultural production, special courses in egg-grading have been given in the Prairie Provinces and special dairy schools operated in the Prairie Provinces and in Ontario and Quebec.

There was little change in the provision of Vocational Training for persons discharged from the forces but the usual small monthly increase in enrolment continued. Arrangements have been completed for special schools for ex-service personnel who cannot enter universities or certain occupations because they have not completed matriculation. The pre-matriculation school in Toronto was the first to open in November and similar schools opened in January, in Nova Scotia, British Columbia, Alberta and Saskatchewan. Additional schools will be opened as the demand for this type of training increases.

TABLE 1—PRE-EMPLOYMENT TRAINING IN VOCATIONAL SCHOOLS

	NUMBERS IN TRAINING				PLACED IN EMPLOYMENT	
	From April 1/44 to Dec. 31/44	At First of December	Enrolled in December	At End of December	From April 1/44 to Dec. 31/44	(?) In December

(3) Includes graduates from previous month's classes who were not reported placed until after December 1, 1944.

Activities of the Unemployment Insurance Commission

Analysis of Monthly Statistics—Insurance Registrations—Unemployment Insurance Fund at end of December

DURING December, 1944, a total of 13,770 claims for unemployment insurance benefit were received at local offices of the Unemployment Insurance Commission. This represents some increase over November, when 11,798 claims were filed and is more than double the 6,562 claims registered in December 1943.

A check on the number of persons reporting unemployed days under the Act is given by a count of those who signed the live unemployment register within a given week. This includes claimants in that week, those putting in "waiting days" and current beneficiaries all of whom must sign once a week. During the last week in December 19,313 persons (14,344 males and 4,969 females) signed the unemployment register compared with 13,431 (9,324 males and 4,107 females) in the last week of November and 6,216 (4,893 males and 1,323 females) during the last week of December 1943.

The claims of 10,880 claimants were adjudicated at insurance offices in December of which 9,042 were considered entitled to benefit and 1,838 not entitled to benefit. The chief reasons for non-entitlement were "voluntarily left employment without just cause" (786 cases); "insufficient contributions and not in insurable employment" (702 cases); and "discharged for misconduct" (122 cases).

10,656 persons received one or more benefit payments during December, of whom 7,107 commenced receiving benefit in that month. This compares with 7,114 persons who were paid benefit in November (3,625 commenced receiving benefit in November) and 2,226 who were paid benefit in December of last year (1,491 of whom commenced receiving benefit in that month).

The 10,656 persons were paid a total of \$337,-220 for 176,084 unemployed days in December 1944, whereas the 7,114 persons received \$179,-001 for 95,720 unemployed days in November and the 2,226 persons were paid \$52,600 for 29,160 unemployed days in December 1943.

The average duration of unemployment compensated was, then, 16.5 days in December 1944, 13.5 days in November 1944 and 13.1 days in December 1943. The average amount of benefit paid per beneficiary was \$31.65 this December, \$25.16 in November and \$23.63 in December of last year. The average amount paid per compensated day

of unemployment was \$1.92 in December 1944, \$1.87 in November 1944 and \$1.80 in December 1943.

Net Increase in Fund in 1944

Benefit payments during the year ended December 31, 1944, amounted to \$3,265,707.67. This figure shows an increase of \$2,336,488.34, or 251 per cent, over the corresponding figure for the previous year.

Notwithstanding the increased benefit payments during 1944, the net increase to the Fund during the year was \$79,558,109.20 as compared with a net increase of \$75,032,131.25 during 1943. The greater increase to the Fund during 1944 is due to the fact that total revenue for 1944 exceeded total revenue for 1943 by \$6,862,466.29.

This increase in total revenue is made up as follows:—

	Actual	Per Cent
Increase in Employer—		
Employee Contributions..	\$3,928,050.80	6.5
Increase in Government's		
Contribution.	785,610.17	6.5
Increase in Interest Earned		
and Profit on Sale of		
Investments.	2,148,805.32	61.7
Total.	\$6,862,466.29	9.0

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at December 31, 1944, 2,947,990 employees had paid contributions to the fund since April 1, 1944, an increase of 51,159 since November 30, 1944, and 742,234 since the commencement of the current fiscal year.

As at December 31, 1944, 142,390 employees were registered as having insurable employees, an increase of 818 from November 30, 1944.

Registrations as at December 31, 1944, by regions follow:—

The column "Interest on Investments and Profits on Sale of Securities" represents—

- (a) Interest received on due dates of the various Government Bonds, with proper adjustments being made at the end of each year for interest accrued and amortization charges.
- (b) Profit on sales of securities taken into account at the end of each year only.

The "Miscellaneous" column includes the following:—

Arrears of contributions received from Government Departments in November 1944	\$ 940,000 00
Penalties	3,867 80
Contributions in respect of services in the armed forces	404,384 36
Miscellaneous	1,527 26
	\$ 1,349,789 42

Rehabilitation of Disabled Persons in Industry

H. C. Hudson Discusses Some of Problems Involved if Necessary

ADVANCES in the art of healing are restoring to varying degrees of health and fitness a larger percentage of casualties in the present war than in any former conflict. As a necessary corollary, more and more attention is being given to the rehabilitation of the handicapped, ex-service personnel and civilians alike. In this task the Employment Services and the technical and vocational training divisions of the Department of Labour are co-operating with many other agencies to the fullest possible extent.

The following is a summary of a paper on the subject prepared by Mr. H. C. Hudson, Supervisor of Special Placements, Unemployment Insurance Commission and published in the January 15th issue of *Welfare*, official organ of the Canadian Welfare Council.

Mr. Hudson pointed out that while Canada has "no all-out program of civilian rehabilitation," the Unemployment Insurance Commission has recognized the need and has established what are known as Special Placements Sections in the larger Employment and Selective Service offices across Canada. The officers of these Sections receive training which includes the following fundamental principles:

"The physically handicapped person, when properly placed in employment, is not vocationally handicapped.

"The employer should accept a man for his abilities, not reject him because of his disabilities.

"It is not what a man has lost that is important but what he has left.

"Every handicapped person has a right to remunerative employment, and Canada will need the services of every man and every woman . . . in the reconstruction period."

In the development of a plan for the work, the Special Placements Sections have followed largely the pattern successfully pursued in the United States. "Briefly, that involves, first, an examination of the job from the point of view of the actual physical demands of the occupation; second, an analysis of the man from the point of his physical capacities."

Illustrations are given to support the assertions that "practically no job requires full physical fitness," and that "a physical handicap can even be an occupational advantage."

Mr. Hudson stated that "the Employment and Selective Service offices are embarking on a program of analyzing jobs to ascertain exactly what physical capacities are essential." Already it has been demonstrated that very many Canadian veterans of the two Great World wars are, quite definitely, able to return to their pre-war jobs, or to take over even more important responsibilities—some by the use of artificial appliances and some without

this help. However, "probably the most difficult obstacle in the way of successful placement of the physically handicapped lies in certain misconceptions on the part of the employer." For instance, fear of liability to a second accident, or fear of a higher degree of absenteeism. Authentic statistics of both indicate that handicapped workers, on the whole, make a better showing than those not handicapped. The question of labour turnover is also "one where the advantage is definitely with the handicapped group. Realizing their difficulties in securing employment, they are less likely to move from job to job."

A tangible but none the less real factor in the successful performance of persons suffering from serious disabilities is their spirit. Illustrations are legion. Mr. Hudson stated, of the determination of handicapped civilians, as well as "Canadian ex-service men, to take their place in the life of Canada in spite of serious disabilities." He referred to "an employer in Winnipeg who has amputation cases, persons who are deaf or hard of hearing, and those with defective vision on his payroll, who had stated at a public meeting organized by the Special Placements Division that the handicapped men and women in his employ would be the last to be laid off rather than the first, in the post-war." Mr. Hudson continued: "Where agencies interested in the problems of the handicapped are anxious to do so, encouragement and assistance are being given to the formation of a centralized organization such as the Council for the Guidance of the Handicapped, established several months ago in Vancouver."

"It is not the intention of Special Placements to duplicate community services already available," such as the local, provincial, and national organizations on behalf of the blind, the amputations, the deaf and the hard-of-hearing, the arrested T.B. cases, etc. Co-operation with such agencies is being practised to the fullest possible extent. Moreover, Special Placements is working unitedly with employers such as the mining and textile industries, the railways and others that have made special studies of the problem as it affects their own work-people. Last, but by no means least, "close co-operation is also being developed with the newly-organized Disability Training and Placement Branch of the Department of Veterans' affairs." By co-ordinating the work of all these agencies, the objective should be "not merely to place handicapped persons in jobs, but to place them in the best jobs of which they are capable."

Training Courses for Rehabilitation Counsellors

REHABILITATION of men and women discharged or demobilized from the Armed Services is a primary task of the newly established Department of Veterans' Affairs. An initial aspect of this task is the setting up of administrative staff, including a counselling service, that will be fully qualified to handle this work sympathetically and efficiently.

Emphasis is being laid on the counselling service, as it is felt that the future of discharged personnel will depend very much on their first impact on civilian life and conditions, after having spent long periods in the Armed Services under the stress and strain of war.

To meet this situation the Department of Veterans' Affairs has organized an intensive course of study for those representatives of the Navy, Army, and Air Force who have been selected to meet dischargees, as well as representatives of the Departments of Labour and Veterans' Affairs, at discharge and release centres, after discharge has been effected.

These study and training courses will be held every month until approximately 750 counsellors have been trained. The counsellors are men and women who are either in the Armed Services, or have been on active service and consequently have, to begin with, a measure of familiarity with the problems of those who are still in the Armed Forces and the difficulties that will confront them when they return to civil life. In order to facilitate discussion, the trainees have been grouped in classes or panels of approximately 30 members each. Instruction is being given by experienced and otherwise thoroughly qualified administrators and leaders in cognate work.

The courses have been arranged under the general direction of the Minister of Veterans' Affairs, Hon. Ian Mackenzie, and Mr. W. S. Woods, Deputy Minister, with Mr. O. C. Elliott, Chief Welfare Officer of the Department as general Chairman. The courses have been divided into two main sections. Part "A" provides a two-week basic course in rehabilitation legislation, organization for demobilization and a study of commoner case types. Following completion of Part "A", the Department of National Defence (Army and Navy) provide a Part "B" course of two weeks' duration, which continues studies of demobilization and rehabilitation from the perspective of the Services concerned. Representatives of the R.C.A.F. have already covered this phase in the Personnel Counsellors' Training course recently conducted at the Rockcliffe Air Station. The two civilian Departments of Labour and Veterans' Affairs will combine for a special one-week course in which phases of demobilization and rehabilita-

tion common to both Departments will be stressed. It will deal with administrative details and interviewing technique. During the latter part of that week the labour representatives will meet as a group for continued specialization in specific labour problems. The members of the classes will be required to be familiar with the terms of such legislation as the Veterans' Land Act, the Veterans' Insurance Act, the War Service Grants Act of 1944 and all Orders in Council having a bearing on the rehabilitation of veterans.

In his keynote address at the opening of the training courses, Mr. W. S. Woods outlined what he termed "the concept, or philosophy of rehabilitation." It was not, he said, a plan to save money for the country at the expense of service men and women. On the contrary it was designed to assist them sympathetically and unreservedly in the transition from the Armed Services to civilian life. It was a sincere effort to help them avoid, or overcome, any sense of frustration in solving problems that would inevitably confront them from the moment they were demobilized; to restore and compensate as far as possible, those who were handicapped by disabilities resulting from war service; to protect them from fraudulent self-seekers who might try to filch from them their gratuities and pensions; to arrange for professional and vocational training, when and if required, and to help them find satisfying employment. Nor does assistance end at this point, but efforts would be made to keep in touch with ex-service personnel for years to come if necessary, in order to guarantee the fullest possible restoration to their pre-war status.

The application of these principles, Mr. Woods stated, would in the first instance, be the duty of the counselling service. He gave as prime qualifications for counsellors, patience and an innate love of their fellowmen. Those who did not possess these qualities, he pointedly advised to seek employment elsewhere. The counsellors will work in conjunction with local Citizens' Committees, composed of business men and retired officers of the First World War, as well as the nearest employment offices of the Unemployment Insurance Commission, in giving any assistance, information and advice to all dischargees with respect to rights, benefits and procedures in connection with their re-establishment in civil life. Particular attention will be paid to handicapped and disabled veterans who will be especial proteges of the Department of Veterans' Affairs. "We are going to specialize in the placement of the disabled", Mr. Woods stated "because we believe much more can be done in this or any other country than has been done already".

Labour Law

Recent Regulations under Dominion and Provincial Legislation

INCOME tax adjustments for persons from abroad engaged in essential Canadian war work have been extended for another year. Any party to a proceeding pending in the Labour Court of Ontario on March 20, 1944, upon which no final order has been made, may institute proceedings before the Wartime Labour Relations Board or the Ontario Labour Relations Board. Pension benefits for female members of the Armed Forces have been authorized, and the member is to receive the rates provided in the Schedules to the Pension Act. A discharged person who commences or resumes a university post-graduate course may receive a grant upon the conditions set forth in the Post-Discharge Re-establishment Order. Regulations under the Wartime Wages Control Order authorize the establishment of schedules of rates for trainees. Regulations have been made under The Reinstatement in Civil Employment Act. Any overpayment of pay and allowances, including dependents' allowance made to a member or his dependents, may be deducted from the war service gratuity. Every employer must establish a single rate or range of salary, as set out in the Wartime Wages Control Order, for each occupational classification of employees for whom the highest rate in the previous authorized range is less than \$250 per month.

In the provincial field, Alberta has made a new blanket Order applying to male employees in the Province, except farm labourers and domestic servants. The British Columbia Workmen's Compensation Board has added to the list of Industrial Diseases under the Act. New Brunswick has amended regulations under the Steam Boiler and Pressure Vessel Act.

Income Tax Order Extended

An Order in Council (P.C. 53/505) made January 24, 1945, and gazetted January 29, extends the provisions of an Order in Council (P.C. 1/945) (L.G., 1943, p. 389), governing income tax adjustments for persons from abroad engaged in essential Canadian war work.

The original Order provided for taxation adjustments for the income tax years 1942 and 1943. By a subsequent Order (P.C. 53/9180) the provisions were extended to

cover the income tax year 1944. The new Order again extends the provisions of the original Order to cover the taxation year 1945.

Order Regarding Cases Pending in the Labour Court of Ontario

An Order in Council made January 9, 1945, provides that on or after that date any party to a proceeding pending in the Labour Court of Ontario on March 20, 1944, upon which no final order has been made, may institute proceedings before the Wartime Labour Relations Board or the Ontario Labour Relations Board, which have authority to dispose of these proceedings.

Pension Benefits to Female Members of the Armed Forces

An Order in Council (P.C. 213/185) made January 10, 1945, and gazetted January 15, rescinds Order in Council 119/2595 of April 12, 1944, governing pension benefits for female members of the Armed Forces of Canada, and substitutes the following provisions.

Pension awards authorized for disability to or in respect of a member of the Women's Royal Canadian Naval Service, the Canadian Women's Army Corps and the Royal Canadian Air Force (Women's Division) must be paid at the rates provided in Schedule A of the Pension Act. Pensions awarded in respect of the death of a member of one of the women's services must be authorized at the rates provided in Schedule B of the Pension Act.

The Commission may award or refuse to award a pension or additional pension as provided in Schedules A and B of the Pension Act, in respect of a child or children of a female member of the forces. No pension may be paid to a widower of a member of the forces.

All provisions of the Pension Act not inconsistent with the provisions of this Order are to apply to every claim for pension made under the Order, and every claim must be dealt with and adjudicated upon by the Canadian Pension Commission as if the claim were made under the Act. Where the language of the Pension Act does not accurately fit the circumstances pertaining to the purpose of this Order, but where the circumstances are the

same by analogy, the provision of the Pension Act will be assumed, for the purpose of this Order, to read as if it had been drafted as a provision of this Order.

No payment or additional payment under the provisions of this Order may be authorized prior to the date on which it becomes effective, January 10, 1945.

Post-Discharge Re-Establishment Order Amended

An Order in Council (P.C. 331) made January 16, 1945, and gazetted January 22, amends that section of the Post-Discharge Re-Establishment Order (L.G., 1944, p. 935) which governs post-graduate university courses for discharged personnel.

The amending Order stipulates that any discharged person who commences or resumes a university post-graduate course within one year and three months after discharge or as soon as possible after completing an under graduate course begun or resumed after discharge, or delays in beginning or resuming such a course because of ill health or some other reason satisfactory to the Department of Veterans Affairs, may receive a grant upon the conditions set forth in the Order.

Regulations Under the Wartime Wages Control Order

Regulations under the Wartime Wages Control Order were made January 3, 1945, and gazetted January 8.

The Department of Labour, with the approval of the Department of Veterans Affairs, may establish wage rates to be paid, during the period of training, by an employer, to trainees undertaking a course of training under the Vocational Training Co-ordination Act, 1942, on the job in any industrial, commercial or agricultural establishment.

In establishing schedules of rates for trainees, the following principles should be observed: (a) the length of the training period to be fixed for each trainee will be based on the nature and extent of the skills to be acquired in the training course and his previous experience and training; (b) the total compensation payable to the trainee during the prescribed training period, including wages paid by the employer and grants paid by the Department of Veterans Affairs, will be established at approximately 80 per cent of the wage ordinarily payable by the employer, for such occupational classification, for such period as established in accordance with the provisions of the Wartime Wages Control Order (L.G., 1943, p. 1603); (c) the schedule of compensation established pursuant to this

Order as payable, during the training period, must show the separate amounts payable by the employer and the Department of Veterans Affairs to the trainee during the period. The amount fixed as payable by the employer at each stage of the training period must be based on the earning capacity of the trainee. The balance of the compensation payable during the training period is provided, by way of a grant, by the Department of Veterans Affairs, but must not exceed the amount fixed and authorized by the Post-Discharge Re-establishment Order (L.G., 1944, p. 935).

For the purpose of assessment of contributions or premiums payable by employers or employees for Workmen's Compensation or Unemployment Insurance under Dominion or Provincial laws or regulations, and payment of benefit or compensation to them, the remuneration payable to a trainee while taking a course in an employer's establishment, must be assumed to be the total of both the wage payable by the employer to the trainee and the grant or living allowance payable to the trainee by the Department of Veterans Affairs for the period, within the training period, in respect of which the assessment is payable.

Reinstatement Regulations

Reinstatement Regulations under the War Measures Act, 1914, and the Reinstatement in Civil Employment Act, 1942 (L.G., 1942, p. 920), were approved by Order in Council (P.C. 77) January 11, 1945, and gazetted January 22.

When a man leaves his employment after being served with calling up papers, or in the belief that he is about to be accepted for military service, it is assumed that he has been accepted at the time he left his employment, and his service is deemed to be terminated upon learning that he was not accepted. When a man receives hospital treatment after his service is terminated, or is physically or mentally incapable of work to which he would otherwise be entitled upon reinstatement, the period of treatment will be assumed to have been a period of military service. If a man accepts work directed by the Minister of Labour or a Selective Service Officer, his period of service will not be assumed to be completed until this work is terminated.

Where an employer has employees in more than one establishment, he may reinstate an applicant for reinstatement in either establishment.

Application for reinstatement may be made verbally or in writing. The fact that an employer has offered to reinstate a former employee within the period fixed by the Rein-

statement in Civil Employment Act, 1942, but before the employee has applied for reinstatement does not prevent the employee from making application at a later time within this period. It is not a defence for an employer to prove in such cases that he offered employment to the employee and that the latter failed to present himself unless he also proved that the employee had applied for reinstatement before he offered to reinstate him.

When a person who has accepted employment offered by an employer, feels that his employment does not comply with the requirements of the Act, he may make application, in person or in writing to a Reinstatement Officer. When an applicant applies to a Reinstatement Officer for assistance, this is assumed to be sufficient excuse for failure to appear for employment during the period of assistance unless the employer can prove that the applicant applied for reinstatement before he offered to reinstate him.

When an employer claims that an applicant for reinstatement is mentally or physically incapable of performing his duties in the employer's service, a Reinstatement Officer may arrange for a medical examination. When an applicant is mentally or physically incapable of performing work available with his former employer, he may notify the employer within the period fixed by the Act for making application that he intends to apply for reinstatement when he is capable. When a person has so notified his employer and has made one or more applications within nine months after discharge in Canada—from the service or from hospital treatment—or within ten months after being discharged overseas, or from hospital discharge overseas, it is not a defence for the employer to prove that the applicant was incapable of performing the available work, unless he also proves that the applicant was mentally or physically incapable at the time of his last application for reinstatement made within the prescribed period. Neither is it a defence in such cases for the employer to prove that the employee failed to apply for reinstatement within the period prescribed by the Act or to prove that the employee had been offered reinstatement and failed to present himself for employment unless he also proves that the employee applied for reinstatement before he offered it.

Proof that an applicant was employed to take the place of an employee who had previously been a member of the forces and who had been reinstated may only be made by proving that the applicant was employed directly or indirectly to take the former's place, and would not otherwise have been employed.

In cases where there is a practice of paying a graduated scale of wages and where increases are given to employees principally on the basis of length of service, a reinstated employee must be paid at the rate at which he would have been paid if his service in the forces had been service with the employer. Where increases are given principally on the basis of acquired skills, experience or training, the employer must give the employee increases which he might have been given if the skills acquired in the forces had been acquired in the employment, as soon as he has manifested such skills, experience or training after reinstatement.

As soon as is practicable after reinstatement, an employer must grant the reinstated person every promotion to which he would have been entitled by seniority, had he been continually in the service of the employer. Where employees obtain a permanent status in the employment, or are entered on the seniority lists after having been in the employer's service for a fixed period, the length of service of a reinstated employee will be assumed to be continuous for determining his status.

In determining a reinstated person's right to vacation with pay for the calendar year in which he is reinstated and subsequent years, the time spent in the forces must be credited to him as if it had been spent in the service of his employer, provided that he has been in the employment for 90 days after reinstatement. The employer, in accordance with his existing policy or in accordance with a collective labour agreement, may grant vacation with pay at any time after reinstatement.

The Minister of Labour may appoint a Reinstatement Officer to administer and enforce the Act and regulations. The Officer may, at any reasonable time, enter any premises where he has reasonable ground for supposing that an applicant was employed before being accepted in the forces, to ascertain whether the provisions of the Act and regulations are being observed, and examine orally any person on the premises and require him to sign a declaration of truth regarding his statement. The Officer may require any person to produce for inspection any register, book, card, wage sheet, record of wages or document he may require for investigation. Information obtained under these regulations must not be disclosed to any person except the Minister or his officers, other than such information as may be necessary for the enforcement of the Officer's rights.

Failure or hindrance in complying with these regulations is an offence, and renders the offender liable to a fine, in the case of a

corporation of between \$100 and \$1,000 and, in the case of any other person, to a fine of between \$25 and \$500. Any person who contravenes any of these provisions is liable to a similar fine, except in the case of an individual, where the fine must not exceed \$200.

War Service Gratuity Regulations Amended

An Order in Council (P.C. 450) made January 23, 1945, and gazetted January 29, amends the War Service Gratuity Regulations (L.G., 1945, p. 101) by the addition of a section regarding overpayment of pay and allowances. The amendment provides that any overpayment of pay and allowances, including dependents' allowance made to a member or his dependents, may be deducted from the war service gratuity.

Overpayments of pay and allowances, including assigned pay, but other than dependents' allowance, include (a) pay or allowances issued to or on account of a member of the forces at rates in excess of those authorized by the provisions of the appropriate military financial regulations; (b) pay or allowances issued to or on account of a member which, having regard to his military, naval or air force status at the time, were not authorized by the provisions of the appropriate financial regulations; (c) advances of travel allowances not accounted for by a member at the time of gratuity payment.

An overpayment of pay and allowances in respect of dependants' allowance, means any overpayment which the Dependents' Allowance Board has ordered to be recovered from a member of the forces when he has been found guilty of misrepresentation or fraud. If a member of the forces dies before full payment of the gratuity, has been received overpayment of pay and allowances includes any overpayment made to a dependent as a result of wilful misrepresentation or fraud by the member or the dependent. No such overpayment may be deducted unless the finding of the Dependents' Allowance Board has been concurred in by the Judge Advocate General.

Where the Crown has been reimbursed by any person other than the member to whom the overpayment was made, the amount deducted from the gratuity is to be paid to that person.

Wartime Wages Control Order Amended

An Order in Council (P.C. 655) made January 30, 1945, amends The Wartime Wages Control Order (L.G., 1943, p. 1603), by rescinding the sections governing the establishment and stabilization of wage rates, and substituting the following provisions.

Every employer must establish a single rate or range of salary as prescribed by the rules set out in Schedule "A" of the Order, for each occupational classification of employees in his employment for which the previous authorized single rate or the highest rate in the previous authorized range is less than \$250 per month, or where, notwithstanding that the rates are \$250 a month or more, the employees are not above the rank of foreman or an equivalent rank. It is provided, however, that, where the previous rate is \$250 or more per month, the employees are presumed to be above the rank of foreman, unless their duties indicate that they are not above this rank. Where the previous authorized single rate or the highest rate in the previous authorized range of an occupational classification of employees was not more than \$175 per month, and for which a single rate had not been required to be established under this Order prior to January 30, 1945, the previous authorized bonus must include only any such bonus actually being paid to the employees in the classification in the last payroll period ending on or before December 1, 1944. The National Board may make additional rules, not inconsistent with those set out in Schedule "A" regarding the manner in which an employer must establish single rates or ranges for the occupational classifications of his employees. The Board may direct the manner in which a rate or range must be established by an employer for an occupational classification of his employees to give effect to the rules in Schedule "A" or any additional rules made by the Board.

Except in accordance with a written direction of the National Board no employer may pay wages to an employee in an occupational classification for which he is required to establish a single rate or range under the above provisions, at a rate other than a single rate or a rate within an established range, except in the case of an employee receiving a rate of not more than \$175 per month and for whom a single rate had not been required to be established prior to January 30, 1945. No employer may, except in accordance with the written direction of the National Board, in any payroll period commencing on or after March 15, 1945, pay wages to an employee in an occupational classification where the rate is not more than \$175 per month and for which a single rate was not required to be established prior to January 30, 1945, at a rate other than a single rate or a rate within a range established in the manner prescribed for the classification. Until the first payroll period the employer must not, except with a written direction of the Board, pay wages to an employee in the classification at a rate other than the previous authorized single rate or a

wage within the previous authorized range, together with the previous authorized cost of living bonus actually being paid to the employee in the last payroll period ending on or before December 1, 1944.

No employer may pay wages to an employee for performing work or duties or for a type and degree of skill and accuracy in any work not performed or exercised by his employees in any occupational classification prior to December 9, 1943, or who are employed in any establishment or site of operations at which the employer commenced operations after that date, at a rate of less than \$250 per month, or at that rate or more, if the employee is not above the rank of foreman, until the employer has obtained a direction of the National Board establishing a single rate or range for the occupational classification in which the employee is em-

ployed, or unless the payment of this rate was authorized prior to January 30, 1945, pursuant to the Wartime Wages Control Order or The Wartime Salaries Order. It is provided, however, that where the employer proposes to pay wages to the employee at a rate of \$250 per month or more, the employee must be considered to be above the rank of foreman, and subject to the provisions of the Wartime Salaries Order, unless the National Board decides that the employee is not above this rank.

Postponement Order

Order in Council P.C. 496 (Jan. 25) providing for the postponement of military call-up in the case of men classified as war industry reservists is summarized on page 136 of this issue.

Provincial

Alberta Male Minimum Wage Act

A new Order (No. 24) approved December 22, 1944, and effective February 1, 1945, replaces Order No. 8 of June 15, 1939 (L.G., 1939, p. 675).

Like its predecessor, Order No. 24 is a blanket Order applying, with certain exceptions, to all male employees in the province, within the scope of the Act, that is, to all except farm labourers and domestic servants. The Order also excepts indentured apprentices; employees governed by a subsisting schedule of wages and hours under the Industrial Standards Act, or by codes drawn up under the Department of Trade and Industry Act; persons employed on a commission basis, or for a stated weekly, monthly, or yearly wage and hired by contract approved by the Board; workers hired for temporary work, not for the purpose of the employer's business; and any other employees from time to time declared exempt by the Board.

The minimum wage rates payable to employees affected by this Order, including persons employed on a commission and piece work basis, whose weekly working hours are 40 or more, are: \$13.50 per week to employees under 17; \$16 per week between 17 and 18; \$18.50 between 18 and 19; and \$20 per week where the employee is over 19 years of age.

Where employees normally work less than 40 hours per week, the minimum wage rates are 30 cents per hour for employees under 17; 35 cents between 17 and 18; 40 cents between 18 and 19; and 45 cents per hour where an employee is over 19.

When an employee is consecutively employed for less than four hours, the minimum

wage is the rate applicable to his classification as given above, and he must be paid for four hours.

Where board and/or lodging are furnished to an employee as part payment of wages, deductions must not exceed \$5 where board is furnished for a full week of 21 meals; 25 cents for single meals; \$2 per week where lodging for a full week of seven days is provided; and 25 cents per day where lodging is furnished for less than a full week.

Overtime is continued to be paid for at the rate of time and a half.

Alberta Welding Act

An Order in Council of January 4, 1945, approves an amendment in the Welders Regulations of May 30, 1939 (L.G., 1939, p. 675). These Regulations were first issued under the Tradesmen's Qualification Act and continued in force under the Welding Act passed in 1941. The Amendment provides that for an applicant for any type of certificate who was a resident of Alberta for 12 months prior to January 1, 1940, and has, since then, been employed as a welder in the forces or in an essential industry outside Alberta, the provision of the Regulations requiring twelve months employment in Alberta is waived.

British Columbia Workmen's Compensation Act

An Order of the British Columbia Workmen's Compensation Board, made January 9, 1945, and gazetted January 15, alters and adds to the Schedule of Industrial Diseases under the Act, effective November 15, 1944.

Compensation is now payable for subcutaneous cellulitis over the patella or pre-patellar bursitis (beat knee) not only when it arises from employment in mining, shipbuilding, and construction, as formerly, but also where it is due to employment in other processes or industries in which injury is caused by frequent kneeling.

Dermatitis, developing from any process or industry involving contact with cedar-bark fluff or palco wool, is added to the Schedule.

New Brunswick Steam Boiler and Pressure Vessel Act

Regulations made under the Act (L.G., 1943, p. 1205) have been amended by an Order made October 31, 1944, and gazetted January 3, 1945.

A new sub-section is added to the section regarding interpretation, stipulating that "boiler horse power" means boiler horse power as calculated from the following formula:—

- (1) 15 square feet of heating surface in return tubular boilers;
- (2) 12 square feet of heating surface in internally fired boilers;
- (3) 10 square feet of heating surface in water tubular boilers;
- (4) The input of 10 K.W. hours in electric boilers.

A new sub-section is added to the section governing qualification of candidates, stipulating that no person may be a candidate for examination as a First Class Stationary Engineer unless the person has been the holder of a valid Second Class Stationary Engineer's Licence for at least one year. No person may be a candidate for examination as a Second Class Stationary Engineer unless he has held a valid third class licence for at least one year. A candidate for examination as a third class Stationary Engineer must have had at least one year's experience in the operation of a steam plant. No person may be a candidate for examination as a Stationary Boilerman unless he has had three months' practical experience in the operation of a boiler.

The section concerning classification of certificates and candidates is repealed, and a new section substituted under the heading, "Classification of Successful Candidates and Granting of Licences to such Candidates". Every successful candidate for a certificate of competency must be classified according to the type of examination and qualifications of the candidate.

A First Class Stationary Engineer must be granted a licence to operate or have charge of

a steam plant of any boiler horse power. A Second Class Stationary Engineer must be authorized to have charge of a steam plant, whose boiler horse power is less than 600 and which authorizes him to operate a steam plant of any boiler horse-power. A Third Class Engineer must be authorized to operate a steam plant whose horse power is less than 600. A Stationary Boilerman must be granted a licence authorizing him to operate or have charge of a boiler only, the horse power of which is less than 100. A Boiler Inspector must be authorized to inspect a boiler and to issue a certificate, valid for one year, that the boiler is suitable for use.

In any prosecution under the Act no person may be deemed to possess a certificate or licence of competency unless he is the holder of a valid licence, issued under the Regulations, authorizing him to perform certain duties.

The section governing fees to be paid under the Act, is repealed, and the following provisions are substituted. A candidate for a certificate or licence must pay in advance to the Provincial Secretary-Treasurer an examination fee of \$10 for a Boiler Inspector's and for a First Class Stationary Engineer's Licence; \$7 for a Second Class Stationary Engineer; \$5 for a Third Class Stationary Engineer; \$3 for a Boilerman; and \$2 for any re-examination. The fee payable to the Provincial Secretary-Treasurer for renewal of any licence is \$1.50. The fee for issuance of any licence without examination is \$1.50 where the certificate is issued to the holder of a valid licence during any of the years 1942, 1943 or 1944; where the person was a member of the Armed Forces or a Merchant Seaman during the present war and was the holder of a valid certificate in 1942, 1943 or 1944 or at the time of his enlistment, providing that in the case of a Merchant Seaman, the date of his entry into the service was not prior to September, 1939. A \$5 fee for issuance of a licence without examination is payable where any person has had special engineering training in a recognized University, or has had practical experience in the construction or repair of boilers or auxiliary equipment without regard to practical experience, for any class of licence the Board of Examiners deems advisable. Any person holding a valid licence issued under authority by any province in Canada, may be issued the class of license, with or without examination, that the Board deems reasonable, upon application and payment to the Board.

During the temporary absence of a Stationary Engineer due to sickness or holidays, the holder of a licence of not more than one class lower may operate or take charge of a steam

plant for a period not exceeding 21 days in any one year, unless special application is made to the Board.

Quebec Minimum Wage Act

Renewals: The following Ordinances have been renewed until February 1, 1946, by Orders made December 15, 1944, and gazetted January 20, 1945: Order No. 8 Revised, made

December 20, 1940, and gazetted December 28 (L.G., 1941, p. 31) governing the cotton textile industry; Order No. 22 Revised, made December 7, 1939, and gazetted December 16 (L.G., 1940, p. 22) governing the manufacturing of bricks and building blocks; and Order No. 27 issued December-28, 1939, and gazetted January 20, 1940, (L.G., 1940, p. 123) governing the canning industry.

Legal Decisions Affecting Labour

Driver of Street Railway Company's Bus Held Liable in Manitoba for Injury to Workman Employed by Another Company

ON October 18, 1944, the Manitoba Court of King's Bench awarded damages of \$1,788 to the dependents of an employee of the Canadian National Railways who was killed by a bus owned by the Winnipeg Electric Co. The action was brought by the administratrix of the workman's estate who charged the bus driver with negligence in the operation of the bus. No action had been brought against the employer of the defendant driver and no claim for compensation had been made under the Workmen's Compensation Act.

The ground taken by the defence was that the claim was barred by section 5, subsections (1) and (6) of the Workmen's Compensation Act. Subsection (1) declares that a worker or his dependents may either claim compensation or bring action if he is injured through the negligence of some person other than his own employer. Subsection (6) denies to such a workman or his dependents right of action against an employer (other than his own employer) of another workman, through whose negligence the accident happened.

Mr. Justice Donovan, in giving judgment, declared that the question at issue was whether the Act, by depriving the workman of right of action against the employer of the other workman, had also taken away his right of action against that workman. He considered that subsection (1) presented alternative courses rather than joint or joint and several courses. The injured workman or the administrator of his estate, in case of his death, might for sufficient reasons prefer to sue the workman or employer rather than accept such compensation as might be allowed him under the Act.

It was held that the Legislature under section 5 (6) of the Workmen's Compensation Act had intervened to relieve the employer and to that extent expressly took away an existing right from the injured workman. It

had refrained, however, from taking away any right of action against any of the workmen of the employer who might otherwise be liable. The plaintiff's action was not barred by the provisions of the Statute relied upon by the defence.

The evidence showed that it was the negligence of the defendant which caused the death of the workman.

The claim for damages was only for loss of expectation of life, under the Trustee Act. The deceased was 64 years of age. General damages of \$1,500 and special damages of \$288 with costs of the action were awarded to the plaintiff. *Lytwyn v. Vincent.* (1942) 3 Western Weekly Reports 452.

Quebec Court Orders Refund of Amount deducted from Wages of Employee to offset Compensation Payments

On June 23, 1944, Mr. Justice Cousineau, in the Superior Court of Quebec, awarded to an employee of the Gatineau Power Company a claim for \$1,299.60 retained from his wages over a period of five years, to offset payments which he received from the Workmen's Compensation Commission as compensation for injury.

In October, 1935, the plaintiff was awarded compensation for 40 per cent permanent disability as a result of an accident while he was in the service of the defendant Company. At the time of the accident the plaintiff was receiving 27 cents an hour and in July, 1936, he resumed work for the Company as a sub-operator, at the same wage. From November, 1936, he appeared on the Company's books as a permanent regular operator employed by the month.

It was proved that the wage of regular operators doing the same work as the plaintiff was, at that time, \$90 a month, but the plaintiff was paid only \$63.34 per month, the Company having deducted \$21.66 representing 40 per cent disability, as computed by the Workmen's Compensation Commission.

During the whole course of his employment, a period of 64 months, the plaintiff had done the same work as the other operators who were employed by the Company and received \$90 per month while he received only \$68.34 and he accordingly claimed the difference.

The defendant Company alleged that the plaintiff had consented to the deductions and that he had been paid the wage agreed upon. The plaintiff based his claim on the section of the Workmen's Compensation Act voiding all agreements which are contrary to the provisions of the Act and which have the effect of preventing the injured workman or his dependents from receiving and enjoying the full amount of the compensation provided by the Act, either directly or indirectly.

The Court found that this section applied to the present case. The defendant Company benefited from the plaintiff's work as operator to the extent of 100 per cent and deducted 40 per cent from his wage. In order to obtain the full payment for his work the plaintiff had to add the amount of his compensation payment to his wages. The defendant had actually, therefore, profited by the compensation payments for five years. The trial Judge declared the action of the defendant company to be illegal and immoral and forbidden by law. It had the effect of preventing the plaintiff from receiving his indemnity and having the full enjoyment of it. Under section 18 of the Act the employer must reimburse the employee for the full amount deducted. The plaintiff was therefore entitled to be reimbursed for the sum of \$21.66 per month for 60 months, amounting to \$1,299.60, with interest from May 5, 1942.

The Court held that there was no question of short prescription. Prescription by thirty years was the only one which applied. Furthermore the defendant Company could not plead prescription in view of the provisions of Section 16 of the Workmen's Compensation Act, which voids agreements contrary to the Act.

There was no question either of acquiescence, as inquiry had shown that the plaintiff had protested at each payment and the manager had admitted that refusal to reimburse him had been the cause of the plaintiff's leaving his job.

It was a fact that the defendant company had benefited from the plaintiff's work for five years to the extent of 40 per cent without paying for it. If the Company had made an error in the calculation of the wage it was unjust that they should profit by it. Judgment was given for the full amount of the claim.

Legault & Gatineau Power Co. (1944)
Rapports Judiciaires de Quebec, Cour Supérieure, 368.

English Court Holds Fencing of Dangerous Machinery as Securely as is Consistent with Work it is to do is not Sufficient Compliance with Factories Act.

This case, which was an appeal by way of case stated brought by one of His Majesty's Inspectors of Factories against the dismissal by the justices at Redditch of an information laid against the occupiers of a factory, was reported in the British Ministry of *Labour Gazette* for November, 1944.

The case arose owing to injuries to a boy of 15 who was operating a power press used to cut off the ends of springs. Although an implement was provided, the boy put his fingers in the machine to remove some pieces of wire. In reaching forward he slipped and started the machine which crushed the top of his finger. There was a safety catch on the press and if the boy had put this on before putting his fingers in the press it could not have been operated.

The information laid against the occupiers of the factory alleged that, in contravention of Section 14 (1) of the Factories Act, a dangerous part of the machinery, namely, the tools of the power press, was not securely fenced and in consequence the boy had suffered injury for which the occupiers were liable.

On the hearing before the Justices, the defendants contended that the fences were adequate and were the only type practicable in view of the use to which the machine was being put and that the boy's injury was due to his deliberate failure to use the clearing tool and using his hand instead. The justices were of opinion that the machine was securely fenced, having regard to the work it had to do, and dismissed the information.

The Divisional Court unanimously allowed the inspector's appeal. The Lord Chief Justice said that for some time a question had arisen as to whether secure fencing must be provided if the result was to make the machine useless either commercially or mechanically for the purpose for which it was designed. He cited a case in which the late Mr. Justice Salter had said "The workman is entitled to have secure fencing in fact. The observations of the jury to the effect that secure fencing is commercially and mechanically impracticable are irrelevant." The Lord Chief Justice said further that the Court of Appeal had held (apart from cases, of which this was not one, where the absolute provisions of the section had been modified by regulations) that this was a correct statement of the law and was therefore binding on the Court. The evidence in the present case showed that the fencing was not sufficient to prevent injury. Machinery must be securely fenced and the justices, in finding that it was securely fenced

for the purposes for which it was used, had arrived at a decision which was irrelevant for the purposes of the case. His Lordship said he could not help observing that this emphasis upon the absolute nature of the provision contained in section 14 of the Factories Act might have the effect of hampering the use of machines but that consideration ought not to weigh with the Court.

Mr. Justice Humphrey said, that the section provided that "every dangerous part of any machinery . . . shall be securely fenced." It did not say that a dangerous machine is to be fenced as securely as possible or only so far as will leave it commercially or mechanically usable.

Dennistown v. Charles E. Greenhill Limited,
Divisional Court, 12th October, 1944.

Conference on Labour Legislation in United States

Recommendations on Social Security, Accident Prevention, Wages and Hours, and Labour Relations

THE Eleventh National Conference on Labour Legislation, which met at Washington, December 12-14, on the invitation of the United States Secretary of Labour, was attended by Governors' representatives from more than 35 States. Among the resolutions adopted was a recommendation that social security legislation be extended to protect workers who are not now covered, including federal employees and the self-employed, to provide income to help make up for that lost through sickness, and to conform to accepted minimum national standards.

The members urged that appropriations for State Labour Departments should be sufficient to ensure an adequate inspection staff so that a regular inspection of all establishments subject to State labour laws could be made at least annually and also such additional inspections as are necessary owing to special hazards, accidents, or complaints. It was also urged that appropriations for the Division of Labour Standards should permit an extension of its training program for State safety and health inspectors. A close working relationship between Federal and State Labour Departments in the administration of laws relating to wages, hours, child labour, home work and safety and health, was also recommended. Suggestions for improving labour conditions of migratory workers included licensing of labour camps and establishing standards of housing, health and welfare for them, as well as effective control of recruitment of such workers.

Recommendations relating to workmen's compensation included: protection of all wage earners in public and private employment, with benefit for all occupational disabilities, establishment of minimum weekly compensation rates adequate to meet subsistence needs of injured workers, provision of second injury funds to encourage employment of handicapped workers, and removal of limitations on the amount of medical service to be supplied.

A nation-wide campaign to reduce industrial accidents was advocated with the State and Federal Governments, management and labour contributing. It was suggested that each State should have a basic labour law making employers responsible for maintaining safe and healthful conditions, a safety code, in the formulation of which management and labour should participate, and an adequate enforcement staff. The conference advocated provision by the Federal Government of additional advisory and consultative service to State Labour Departments, including technical assistance in the preparation of safety and health codes, assistance in the training of factory inspectors, distribution of safety information, encouragement of labour participation in accident prevention and plant safety programs, preparation of data on scientific engineering control methods and practices, and grants-in-aid to the States to further their efforts for health and safety. It was noted that representatives of organized labour had participated in plant safety committees with much success and the Conference urged their increasing assistance in safety matters. It was recommended that the U.S. Secretary of Labour ask the national leaders of organized labour to urge their membership to take advantage of courses of training in accident prevention made available by the Federal Department of Labour in collaboration with the Office of Education and to lend their active assistance and co-operation in the nation-wide drive for a 40 per cent reduction of the accident rate.

Recommendations relating to wages and hours included a basic minimum wage for women and minors, with a provision that no man should be paid less than the minimum and that the minimum rate should be raised on recommendation of industry wage boards representing employers, workers and the public. It was urged that where possible relaxation of laws relating to hours should end on V-day

or earlier, that working hours of women and minors should be limited and a weekly rest-day, a minimum lunch period of 30 minutes, and penalty overtime for hours in excess of 8 per day and 40 per week provided for all workers. As to "equal pay" the Conference recommended that the principle of "the rate for the job" be embodied in legislation covering all workers and occupations and providing for wage rates based on job content and not in the sex of the worker. On "women's jobs" where no comparison between work of men and women is involved it was recommended that minimum wage rates be established.

The Conference advocated the abolition of home work, recommending that it be prohibited at once in States where it is not extensive and gradually done away with in other States.

The Conference reaffirmed recommendations of the 1941 Conference that provisions for the peaceful settlement of disputes and prevention of work stoppages, including grievance procedure, voluntary arbitration and conciliation should be written into all union agreements and that unions should give serious attention to training of stewards, committee men and other representatives in collective

bargaining techniques. It was also urged that labour and veterans' organizations should co-operate in developing programs, based on collective bargaining, for assimilation of veterans into civilian employment at their highest skill with special attention to rehabilitation of the wounded. It was also recommended that voluntarily negotiated wage increases which do not involve a price increase should not require the approval of the National War Labour Board.

The Conference urged a 16-year minimum age for all employment during school hours and for employment in manufacturing mechanical and processing establishments at any time, with a 14-year minimum for employment outside school hours and during holidays, prohibition of employment of children under 16 between 6 p.m. and 7 a.m. and of minors 16 and 17 years of age between 10 p.m. and 7 a.m. For persons under 18 an 8-hour day and 40-hour week with a weekly rest-day and provision for a daily meal period of at least 30 minutes was advocated and also a maximum of 8 hours a day for combined school and work, prohibition of employment in hazardous occupations and a requirement of employment certificates.

Guide to Labour Law for Supervisors and Shop Stewards in the United States

A new Bulletin (No. 66A), entitled "A Guide to Labour Legislation for Supervisors and Shop Stewards," has been issued by the Division of Labour Standards of the United States Department of Labour. In the letter of transmittal, the Director of the Division states that the Guide is intended to assist representatives of labour and management who are responsible for maintaining good industrial relations and who often find themselves handicapped by inadequate knowledge of labour laws and of the services available to them from Government agencies.

A summary is given of the principal Federal labour laws and regulations which are of general application and also of emergency war-

time legislation. The services available in the Department of Labour and the agencies set up to deal with wartime problems are described. Sections are devoted to veterans' legislation dealing with employment and labour matters and to the labour branches of the War and Navy Departments and the Maritime Commission.

The Bulletin is in loose-leaf form so that pages may be added or removed for local revisions or adaptations. It is stated that digests of State labour laws have been prepared on loose-leaf pages for insertion in the Guide and may be obtained from the Division of Labour Standards.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month give the following information concerning Employment and Unemployment across Canada.

The employment situation at the beginning of December as reported by employers.—Industrial employment at the beginning of December showed further expansion on a scale which was greater than that indicated in the preceding monthly report; but remained at a lower level than at December 1, 1943, according to the Dominion Bureau of Statistics.

The general index number of employment at December 1, 1944, stood at 185.7, as compared with 183.8 in the preceding month and 190.5 at December 1, 1943 (based on the 1926 average as 100).

The weekly per capita earnings showed a decline at December 1, 1944, averaging \$32.19 as compared with \$32.29 at November 1, 1944, and \$31.61 at December 1, 1943.

The Bureau's reports come from firms employing fifteen or more employees, representing practically all industries except agriculture, fishing, hunting and highly specialized business operations. Reports for December were received from 15,018 establishments in the eight leading industries with staffs totalling 1,887,752.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit increased substantially. During December, 1944, there were 13,770 claims filed as compared with 11,798 during November. December's total exceeded that of any of the other months during 1944, February coming next with a total of 12,284.

Applications for employment; vacancies and placements, December, 1944.—Reports received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the four weeks December 1 to December 28, 1944, showed a marked decline in business transacted when compared with the four-week period Novem-

ber 3 to November 30, 1944, and a minor reduction when compared with the four weeks December 3 to December 30, 1943. Manufacturing was mainly responsible for the loss under the first comparison though all industrial groups except fishing, hunting and trapping recorded declines and the reduction in forestry and logging and trade were substantial. In comparison with the four weeks December 3 to December 30, 1943, moderate increases were shown in public utilities, services, and forestry and logging but all other industrial divisions showed decreases, the largest being in manufacturing and trade. Vacancies during the four weeks ending December 28, 1944, numbered 149,643, applications 156,930 and placements in regular and casual employment 106,916.

Unemployment in trade unions.—The percentage of unemployment among trade union members increased fractionally between October and January, though remaining less than one per cent. At the beginning of January the figure was 0.6 per cent, while at October 1, 1944, the last quarterly date, the figure had been 0.3. Compared with the preceding year, however, unemployment was somewhat less, the figure at the beginning of January, 1944, having been 0.8 per cent. At the beginning of 1939 unemployment had been 16.2 per cent.

The January, 1945, figure was based on returns received from 2,332 labour organizations having a total membership of 409,338 persons.

Total employment in Canada.—An estimate of Canada's total manpower distribution at June 1, 1944, has been made by the Research and Statistics Branch of the Department of Labour. At that date it is estimated that 4,232,000 persons, 14 years of age and over, were gainfully occupied of whom 3,232,000 were in non-agricultural industry, including 975,000 in war industry. In addition there were 784,000 persons in the Armed Forces.

The Employment Situation at the Beginning of December, 1944, as Reported by Employers

INDUSTRIAL employment at the beginning of December showed further expansion, on a scale which was greater than that indicated in the preceding monthly report, also exceeding the gain which had taken place at December 1, 1943. Improvement at the beginning of December is contra-seasonal according to pre-war experience, although the trend was favourable at that date in 1941, 1942 and 1943. The

and wages. The per capita earnings showed a slight reduction, from \$32.29 at November 1, to \$32.19 at the date under review.

The general index number of employment at December 1, 1944, stood at 185.7, as compared with 183.8 in the preceding month, and 190.5 at December 1, 1943. The 1926 average equals 100 in calculating these indexes. Since the increase at the date under review was contrary

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

Dominion Bureau of Statistics, in its latest survey, tabulated data from 15,018 employers in the eight leading industries, whose working forces totalled 1,887,752, as compared with 1,867,727 at November 1. The weekly payrolls disbursed amounted to \$60,770,994, as compared with \$60,314,032 in the preceding report. There was thus a rise of 1.1 per cent in the number of employees, accompanied by that of 0.8 per cent in the reported salaries

to the usual seasonal tendency, the seasonally-adjusted index showed a further rise, standing at 181.3, as compared with 175.9 in the preceding report. Employment was lower by 2.5 per cent than at the beginning of December in 1943, since when the index number of payrolls has fallen by 0.8 per cent.

The greatest advance at December 1, 1944, was in logging, in which was reported the employment of an additional 18,294 persons,

and in trade, in which the increase of 10,116 was also above the average at December 1. There were smaller but important gains in employment as compared with November 1 in mining and transportation. On the other hand, activity in manufacturing showed a contraction, due partly to seasonal causes. There were large reductions in iron and steel plants, from which over 5,100 men and women were laid off; lumber and vegetable food factories also released employees. The decline in manufacturing was in accordance with the usual seasonal movement in the pre-war period, although it was at variance with the gains indicated at December 1 in earlier years of the war.

Payrolls

The aggregate payroll of \$60,770,994, already mentioned as having been disbursed in weekly

salaries and wages at December 1 by the co-operating employers, was 0.8 per cent higher than the sum of \$60,314,032 paid at the beginning of November. The weekly per capita earnings showed a decline at the date under review, averaging \$32.19, as compared with \$32.29 at November 1; at the beginning of December, 1943, the figure was \$31.61, while in 1942 and 1941, the December 1 averages were \$30.06 and \$27.32, respectively.

Including the data received from financial institutions, the latest survey of employment and payrolls shows that the number of persons in recorded employment was 1,954,237, as compared with 1,934,272 at the beginning of November. The amounts received in weekly earnings by these persons were stated as \$62,926,391 paid on or about December 1, and \$62,472,963 paid on or about November 1.

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. Table 1 shows that in the period for which data are available, there has been an increase of 21.6 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the aggregate weekly payrolls of these employees have risen by 52.1 per cent. Including finance, the gain in employment from June 1, 1941, to December 1, 1944, amounted to 21.2 per cent, and that in payrolls to 51.0 per cent. The reasons previously given for the much greater rise in the latter than in employment may again be stated:—(1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work; (2) the payment of cost-of-living allowances to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944; (3) the progressive up-grading of employees

as they gain experience in their work; and (4) the granting of higher wage rates in numerous cases.

For obvious reasons, the growth in employment and payrolls in manufacturing in the period of observation has greatly exceeded that in the non-manufacturing industries, the index of employment in the former having risen by 31 per cent from June 1, 1941, to December 1, 1944, and that of payrolls, by 68 per cent. The weekly earnings of the typical individual engaged in factory work have increased by 30.4 per cent, while the all-industries' average has risen by 27.5 per cent. The factors given above as influencing the all-industries trends operate with greater force in the case of the manufacturing group.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the

NOTE.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which like-

wise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in different industries is obviously an exceedingly important factor.

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

(The latest figures are subject to revision.)

Industries	Relative Weight	Dec. 1 1944	Nov. 1 1944	Dec. 1 1943	Dec. 1 1939

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions, January, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

CANADIAN industries reported a net labour demand¹ for 96,205 workers at January 18, 1945. This was 7,579 fewer than the number required at December 21, 1944, one month earlier, and 19,170 less than the shortage of workers at January 20, 1944, the corresponding reporting date one year ago. Approximately 70 per cent of the total demand at January 18 was for male workers, 68,092 of whom were required. This was 6,556 fewer than were needed one month previously. Table I shows net labour demand, by main industry groups and by sex, as at January 18, 1945, with actual and percentage changes in total demand as reported at December 21, 1944.

Net Labour Demand in A and B Priority Industries

Seventy-four per cent of the total labour shortage at January 18, 1945, was in high priority industries, in which 70,828 persons were required; this was 10 per cent fewer than the number needed four weeks earlier. Male labour requirements at January 18, stood at 55,559 as compared with 61,990 at December 21, the decrease being largely due to a lowered demand in logging (from 27,731 to 22,325). Demand for women in high priority industries was smaller by 1,168 than one month previous, 15,269 female workers being required at January 18.

Logging

Employment offices reported a demand for 22,325 men in high priority logging at January 18; this was fewer by 5,406 than the number required one month previously. Sixty-one per cent of the total labour shortage was in pulpwood logging, for which 13,637 men were required. In the Quebec Region alone there was need for 5,785 men for this type of

To meet unsatisfied labour requirements, the supply of workers available, as measured in terms of unREFERRED applicants² at January 19, 1945, totalled 50,724 (32,593 males and 18,131 females). As shown in Table II the demand for workers exceeds the potential supply in all occupational groups except clerical, sales, agricultural and construction workers. Seasonal factors are largely responsible for the surplus of applicants classified as agricultural and construction workers, and the relative demand-supply position will undoubtedly be reversed when operations are resumed in the early spring. Clerical and sales workers are in surplus supply in the western regions and Quebec. In many cases the applicants have not the requisite qualifications and experience for the jobs offered. Ontario and Quebec still report a shortage of qualified stenographers. It is in the skilled and semi-skilled occupations that the greatest discrepancies show up, there being only 15,453 qualified applicants for 50,778 jobs. In particular, textile workers, loggers and miners are in short supply.

logging activity. On the whole, the labour supply in the logging industry has been adequate to ensure a larger cut than last year, and some pulp and paper mills which have been suffering from a shortage of raw materials are expected to benefit.

Mining and Primary Smelting

There was a demand for 4,854 workers in high priority mining and primary smelting at January 18. The Ontario nickel mines reported a labour shortage of 1,015 and workers were still being referred here from neighbouring regions. Labour requirements in coal mining were somewhat easier at January 18, with the Maritime and Prairie Regions in need of 617 and 544 miners respectively. Some difficulty is being encountered in procuring men of sufficient physical stamina for gold and base metal mining.

Manufacturing

The need for workers in high priority manufacturing industries continued to be urgent; there was a demand for 24,259 persons (15,477 males and 8,782 females) at January 18. More than two-thirds of the labour shortage was in the following industries: Textiles and Products,

¹ Net Labour Demand is calculated by deducting unconfirmed referrals from unfilled vacancies. Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated. Unconfirmed Referrals are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

² Applicants who have not been referred to jobs as at the date indicated.

TABLE I—NET LABOUR DEMAND BY INDUSTRY AND BY SEX AS AT JANUARY 18, 1945
(excluding Agriculture)

Industry	Male	Female	Total	Change from December 21, 1944

Chemicals and Non-Metallics, Secondary Metal Industries (excluding Machinery and Equipment), Guns and Ammunition, Shipbuilding and Repairs, and Food Processing.

Textiles and Products.—The labour situation in the high priority textile industries was still tight and there was a demand for 6,063 workers (1,598 males and 4,465 females) at January 18 as compared with 5,623 at December 21. Quebec and Ontario accounted for 94 per cent of the shortage with respective requirements of 2,884 and 2,834. Sixty-five per cent of the labour demand in the textile industry in Quebec was in the cotton textile mills which required 721 persons, while firms manufacturing women's and misses' outerwear needed 608 and those turning out men's and boys' clothing, 549 workers; in Ontario, labour requirements of the cotton textile mills amounted to 1,057, knitting mills required 646 persons and woollen and worsted textile mills 453; these three industries together accounted for 76 per cent of the regional labour requirements in the textile industry. Skilled workers, such as spinners, weavers and sewing machine operators, were in very short supply.

Chemicals and Non-Metallics.—Net labour demand at January 18 in the chemicals and non-metallics industries (2,329) showed a slight increase over demand four weeks previously. The Ontario region, where 1,702 workers were required, accounted for 73 per cent of this shortage. About two-thirds of the labour shortage in chemicals and non-metallics in this region was in the manufacture of industrial chemicals where there was a need for 292 men and 823 women at January 18.

Guns and Ammunition.—Labour requirements in the guns and ammunition industry dropped from 2,578 at December 21, 1944 to 2,036 (1,472 males and 564 females) at January 18. As large contracts for war supplies have recently been placed in Canada by the United States Government, there will probably be an increased demand for labour in this industry when the retooling of plants to fill these orders has been completed.

Shipbuilding and Repairs.—There was a need for 1,877 additional men in this industry at January 18, which was slightly more than the number required one month previous. Net labour demand in the Maritime Region constituted 41 per cent of the Dominion requirements. Skilled tradesmen are required in the Halifax shipyards but few are available locally and lack of housing accommodation makes it difficult to recruit workers from outside centres. On the West Coast, the shipbuilding industry is fairly well supplied with labour although

additional electricians and qualified sheet-metal workers could be utilized if available.

Construction

Activity in the construction field at this time of year is more or less limited to inside work and the completion of projects already underway. Overall labour requirements for high priority construction totalled 2,346 at January 18.

Transportation

Heavy storms, particularly in Eastern Canada, have continued to add to the manpower problems of this industry; 4,455 workers, mostly men, were required at January 18. Large numbers of snow shovellers were needed by the railways during the month and in addition, there was a shortage of men for track maintenance and railway machine shops. Some of the congested areas are experiencing difficulty in procuring bus and tram operators.

Trade, Finance and Service

The overall labour requirements in high priority trade, finance and service industries at January 18 amounted to 10,446 (4,903 males and 5,543 females). Forty per cent of the labour shortage was in public and professional service in which demand totalled 4,162 (2,255 males and 1,907 females). In trade, finance, and service other than public and professional, there was a need for 6,284 workers (2,648 males and 3,636 females).

While labour requirements in this industry group are far from satisfied, the situation would appear to be somewhat easier. Women released from the more lucrative jobs in war industries, although expressing a preference for any type of work rather than domestic service, are showing more willingness to accept employment of this nature. Hotels, restaurants and to some extent hospitals and sanatoria are benefiting by this change in attitude, although the labour situation is still tight in some regions. Demand for female workers in hotels and restaurants across Canada totalled 2,005, at January 18, but this was 547 less than the number required a month earlier. At the same date hospitals were in need of 719 female workers, apart from professional staff.

Wholesale and retail trading establishments were asking for 1,000 and 1,323 workers respectively at January 18. In both groups demand was higher in the Maritime, Quebec and Pacific Regions than one month previous, but there was an easing of the situation in the Ontario and Prairie Regions.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended January, 22, 1945.

Maritime Region

Agriculture—At this season, only dairy farmers are asking for helpers. Requirements for such agricultural labour have been placed in clearance, and through the continued effort of local offices and the co-operation of the Provincial Department of Agriculture, some reduction in the number of vacancies has been effected.

Logging—The demand for bushmen is continuously heavy throughout the region, but in no section is the shortage acute, and all operations of any magnitude are being maintained with fairly adequate crews. Present conditions point to greater production than that of a year ago.

Companies operating in the vicinity of Halifax and New Glasgow could use more loggers, if available, but the need for additional bushmen is greater in New Brunswick. Many men are being brought in from other districts, to meet the demand in the vicinity of Fredericton. In the neighbourhood of Minto, where a 33 per cent advance in production is foreseen, the largest operator has 43 sub-contractors at work, as compared with 16 last season.

The Saint John office reports that, in spite of the large number of bush workers secured by company canvassers, there is a persistently heavy demand. In the Campbellton and Bathurst areas, where heavy snow is handicapping operations, some 800 men in all are needed, and a concerted effort is being made to procure at least part of this number.

Coal Mining—After a slight drop during the holiday season, production is again being steadily maintained in the collieries. In the Minto area, shaft production is reported to be about 10 per cent higher than a year ago and strip mining operations about 64 per cent greater. The manpower situation is satisfactory, with fewer vacancies on file than for two years past.

Manufacturing—There have been no major developments in the industry during the month. The Halifax office reports that, while the local shipyards are still in need of many skilled workmen, their unskilled labour wants are being met locally. Many seasonal workers coming into the city are being referred to these and other high priority projects, but lack of

housing accommodation is proving a handicap to such placements. The local supply of heavy labour is insufficient to complete the orders of the Bridgewater shipyards, but no difficulty is anticipated in filling the requirements of the car factory and shell plant at Trenton, both engaged on war contracts.

Workers of both sexes, but especially women, are in great demand throughout the textile and food processing plants of the Maritimes.

Construction—The usual seasonal slackening is noticeable in all areas, with activity confined for the most part to remodelling and repair work, and the completion of well-advanced projects. Labourers are still needed for the hospital program in Halifax, but living quarters for the men are not available as yet.

Transportation—Heavy storms have tied up bus and rail service, and the greatest labour need has been for large gangs of snow-shovellers. The stevedoring companies on the Halifax waterfront can use all the labour procurable, but as yet no serious shortage has developed.

Quebec Region

Agriculture—No demand for farm labour is being made at this time. Farmers in lessening numbers are still applying for temporary permits to enter other essential industry, and from various parts of the province comes the report that many of them are being referred to ice harvesting, when no vacancies in higher priority projects exist.

Logging—The majority of those who left the woods for the holiday season have returned to the camps, and a goodly number of farmers detained at home by their own logging and fuel-wood operations have now accepted bushwork for the next two months. The slackening of work in war plants also has resulted in increasing applications for logging jobs, and consequently the manpower requirements of Quebec companies have shown a downward trend. Four of the local offices primarily concerned with the securing of bushmen report that present needs have been reduced from several thousand each to only 500, while a few others require 200 or less, as compared with earlier requirements ranging as high as 500 men.

In the LaTuque area, however, logging operations are critically short of manpower, and this shortage may result in irregular saw-mill production. Contractors in the vicinity of St. Jovite, also, are finding it difficult to obtain the bushmen needed to carry out their plans for continuing cutting as far into the spring as possible.

Mining—The labour needs of the base metal mines have been receiving consideration during the past few weeks. An intensive drive now under way, to procure much-needed workers for the operations which produce the region's entire copper supply, is meeting with some success.

An outstanding development in the mining field is reported from Baie St. Paul, where iron ore operations long inactive are re-opening to fill a large war contract. This mine will give steady employment to approximately 100 men.

Manufacturing—There has been no signal change in general manpower conditions during the last month. In the iron and steel mills, requirements are being fairly well met, although the few highly skilled workers needed are not available. The labour situation in aircraft and shipbuilding plants, also, remains static and for the present the demand for women workers for the heavy shell-filling factories has been fairly well met.

Textile plants and kindred industries have not abated their persistent call for skilled and unskilled workers. The largest textile establishment in the Three Rivers area is hard pressed for experienced operators, and similar shortages are noted in other centres where textile, clothing, rubber and allied industries are situated.

Lay-offs from the various foundries of the Aluminum Company of Canada continue steadily. The Chicoutimi office reports that so far 2,800 men have been laid off from the company's plants in that area, and as a result, unemployment insurance claims in Chicoutimi, Jonquiere and Port Alfred have reached 1,000. The staff of the Shawinigan Falls plant is being gradually reduced, by means of weekly lay-offs, and about 1,100 persons in that area have filed unemployment claims.

The gradual release of women workers from the Quebec City arsenals continues, and the Morton Engineering and Dry Dock Company recently dispensed with the services of another 200 employees. The close-down of the manufacturing and bottling department of the Joliette distillery affected 125 workers. As the result of a fire on January 1, Sorel Industries, Limited, was forced to lay off about 300 employees, but repairs are under way and production should be resumed in several weeks' time.

Construction.—Building operations throughout the province are practically at a standstill. A number of carpenters and painters are currently unemployed, and many building tradesmen have been referred to the ice harvesting. The cessation of building and repairs at the Hydro-Electric plant at Shipshaw has released some 300 workmen.

Only in Montreal is there any great demand for construction labour, and of the 200 bricklayers required (but not available) more than 25 per cent are needed for high priority jobs. Plumbers, pipefitters and electricians are also in demand, but the competency card required for building tradesmen limits the supply strictly to qualified applicants, of whom few are obtainable.

Transportation.—Little change is apparent in the manpower demands of the industry. Snow shovellers and maintenance gangs for the railways are the chief requirement at this time. In Montreal, vacancies for 242 drivers and automobile repair mechanics are reported.

Ontario Region

Agriculture.—It is expected that the heavy snowfalls will prove most beneficial to the soil, and already in a few instances farmers have made inquiries as to the prospect of procuring helpers for spring. Stratford, Ottawa and Brockville offices report current orders for dairy farm workers.

Logging.—Deep snow has hindered woods operations in almost every part of the province, practically putting an end to log cutting and making the sleigh haul of primary importance for the time being.

Logging operators in general have expressed satisfaction with the season's supply of bush labour, but in some districts a shortage still prevails. Ottawa Valley companies continue to call unavailingly for bushmen, Kirkland Lake requires an additional 250 cutters as well as teams and teamsters, and in the Timmins area, although conditions have improved somewhat, the lack of labour is causing concern. However, Sault Ste. Marie reports a satisfactory movement of men to the bush, with transfers-in from Kitchener, Montreal and Regina to limits in the district, and Quebec farmers are still arriving in the Kapuskasing neighbourhood. Teamsters and tractor operators are now in much greater demand than cutters.

Mining.—No improvement is noted in the labour situation of the under-manned mines of the region, nor is any amelioration looked for in the near future. The Kirkland Lake office reports that 200 experienced miners and 200 beginners are needed for the gold operations in that area, and emphasizes the strictness of the physical test to be passed.

Manufacturing.—New war contracts have entailed an increase in production during the past month, and there has been a corresponding rise in the number of workers required, with the need of skilled labour predominant. Iron works, textile and rubber plants rank foremost in their pressing demand for addi-

tional labour. The province's manufacturing centres, New Toronto, London, Brantford, Hamilton, St. Catharines, Windsor, Kingston and Peterborough have shared alike in this rising demand, which comprises highly qualified labour of all types, both male and female.

Orders for heavy labour for the foundries and agricultural implement factories, while not as extensive as heretofore, remain substantial. The abrasive plants of Niagara Falls, with new contracts on hand, have put additional furnaces into operation and are calling for labourers to man them. Oshawa, too, is finding it difficult to meet heavy labour orders locally, while foundries in the Welland area are obtaining the necessary men from the east and west on clearance orders.

The increase in the number of female applicants for manufacturing jobs since the beginning of the year has been of substantial assistance in meeting the demand of Ontario establishments busy on the government's shell program. Textile plants and kindred industries have likewise benefited to some extent by this increase, but throughout Ontario these factories remain shortstaffed, and the supply of women workers falls far short of the persistent demand.

Lay-offs during the past month have been of a minor character, and renewal of war contracts has made several anticipated staff reductions unnecessary. Other local munitions works have absorbed the staff recently released from one shell plant in Galt. In Windsor, the majority of factories closed for Christmas stocktaking have re-opened, the 500 employees involved in a recent strike at the Kelsey Wheel Company's plant have returned to work, and men affected by the shutdown of Border Cities Industries, Limited, have been taken on strength by other Windsor establishments.

Construction.—Severe weather has halted practically all outdoor building work, and orders on file in local offices are mostly for plumbers, carpenters and labourers. The Hamilton office, in reporting a continuing demand, comments on the fact that, whereas 60 carpenters were drawing unemployment insurance benefits at this time last year, there are now no claims. In Toronto, good husky labourers are badly needed for work at the Sunnybrook Hospital.

Transportation.—Men for snow shovelling and railway track maintenance are the only pressing needs. Prevailing weather conditions have also increased the demand for coal delivery men, but the low wages and heavy nature of the work have made these orders hard to fill.

Prairie Region

Agriculture.—There is little activity at this season, and a small number of farmers are still making applications for temporary permits to enter other essential industries. The few agricultural vacancies reported are for choremen, but there are no applicants for employment of this sort.

Logging.—On the whole, the labour supply is greater than that available during the corresponding period last year, but active and heavy labour demands are still reported by numerous local offices serving woods operations. Offices in Manitoba and Saskatchewan have been specially instructed to concentrate their efforts on filling orders for areas where severe shortages of logging labour persist, and the results of this campaign are proving encouraging.

The Port Arthur office reports a pressing demand for teamsters, loaders and skidders for the logging camps of the area, and contractors in the Kenora district are similarly short-staffed, but in the Fort Frances section the past fortnight has seen a marked reduction in the earlier order for another 250 bushworkers. Orders being received in the Winnipeg office are still very heavy. In the vicinity of The Pas, referrals are said to be light and transfers in slow; another 100 woodsmen could be utilized, but operators engaging farmers on 60-day exemption without permit seem to be keeping their camps fairly well filled.

Farther west, the Edmonton office records a greater need of logging labour, with 230 men placed during the past week and approximately another 880 required.

Coal Mining.—All collieries, with the exception of those in the Estevan area, are operating on a full production schedule, but the lack of certificated miners remains a handicap, especially in the vicinity of Red Deer, Edson and Drumheller.

The bituminous fields in the Blairmore area are working to full capacity, completing contracts for 1945. An effort is being made to locate miners from the domestic coal fields, where the season will soon be at an end, to replace the farm labourers leaving the industry at the close of March.

Base Metal Mining.—No improvement is evident in the labour situation, and few men are available to fill the vacancies existing in all northern operations. Prospecting is active, however, and a fair amount of diamond drilling is under way.

Manufacturing.—There is little change apparent throughout the region. Aircraft and

shell plants at Fort William are inactive, and the Port Arthur shipyards are calling only for a few skilled craftsmen, the lack of whom is holding up the employment of many unskilled workmen. Winnipeg's aircraft factories are inactive, also, and lay-offs in that industry are becoming general, as well as an occasional staff reduction in foundries and machine shops. The local office reports a gradual increase in male applicants from the Armed Forces and aircraft plants, and some of these applications have been forwarded to the eastern rubber factories for consideration. Women in considerable numbers are needed for general factory work in Winnipeg, and textile manufacturers and furriers can always employ extra staff.

Farther west, one large Regina industry has been successful in obtaining the additional 100 men, veterans for the most part, required to institute a third full shift in its plant. The region's packing plants are well supplied, although, as always, a few fully qualified and experienced knifemen could be placed.

Construction—Adverse weather conditions and the usual seasonal decline in activity have created a surplus of general outside building labour, but a shortage of some experienced tradesmen needed for the military hospital program persists.

Transportation—Labour demands throughout the region are confined for the most part to railway maintenance gangs and to experienced machinists for the Canadian Pacific's shops at Winnipeg.

Pacific Region

Agriculture—A few orders for dairy workers are coming in, and there is a small demand for pruners for fruit farms in the interior of the province. Otherwise there is little activity.

Logging—The labour situation is better than for several years past. Some operations in the higher area around Nelson have closed down for about six weeks on account of heavy snow, but on Vancouver Island all the big camps are operating, with a better supply of bushmen than usual. The general demand for fallers and buckers is fairly heavy, owing to an increased production program for 1945.

Sawmilling—British Columbia sawmills have benefited by the general increase in labour supply, and, for the most part, are reported to be reasonably well staffed. According to the Vancouver office, no mills in the district have been forced to close down on account of log shortage, and some of the larger operations

which have placed orders for helpers would start extra shifts if key men such as sawyers and graders were procurable. In adjoining New Westminster, orders have been reduced to a few heavy labourers and a number of skilled workers, procurable locally. Orders will increase, however, as the larger mills of the district swing back into full production after the holiday shutdown.

Coal Mining—The labour situation in the collieries is fairly satisfactory, but there is a continuing over-all demand for about 150 qualified miners.

Base Metal Mining—A continuing shortage of miners and muckers hinders the efficient operation of the mines. The outstanding manpower demand at this time is a progressive order for miners for the Kimberley workings, which calls for some 375 men during the first three months of this year. Housing accommodation is being arranged.

Manufacturing—The demand for shipbuilding labour ranks foremost, with Victoria shipyards continuing to make heavy calls on the manpower force. Skilled, semi-skilled and unskilled workers are alike essential and there has been a fair response to orders placed in clearance. A number of the women released from the Victoria yards a while ago are being recalled and a gradual uptrend in female employment is indicated, making it possible to return a number of those drawing unemployment insurance benefits to essential industry.

Vancouver foundries and machine shops continue to call for first class machinists and moulders, of whom few are available. A revival of aircraft activity is noted, but orders are readily filled with applicants of a fairly high standard, nor is there any difficulty in finding the women workers required. Elsewhere in the province there is little activity.

Construction—In all save the Victoria and Kelowna areas, a shortage of building material has slowed down private building. In these two districts, a building boom is keeping all available carpenters and labourers busy through an ordinarily slack period, and the fairly general demand for finishing artisans is heavier than elsewhere.

Transportation—The outstanding development of the month was a complete tie-up of the B.C. Electric Company's facilities in Vancouver, New Westminster and Victoria. The effect of the strike on war and other essential industries was amazingly light, and service is now completely restored to normal.

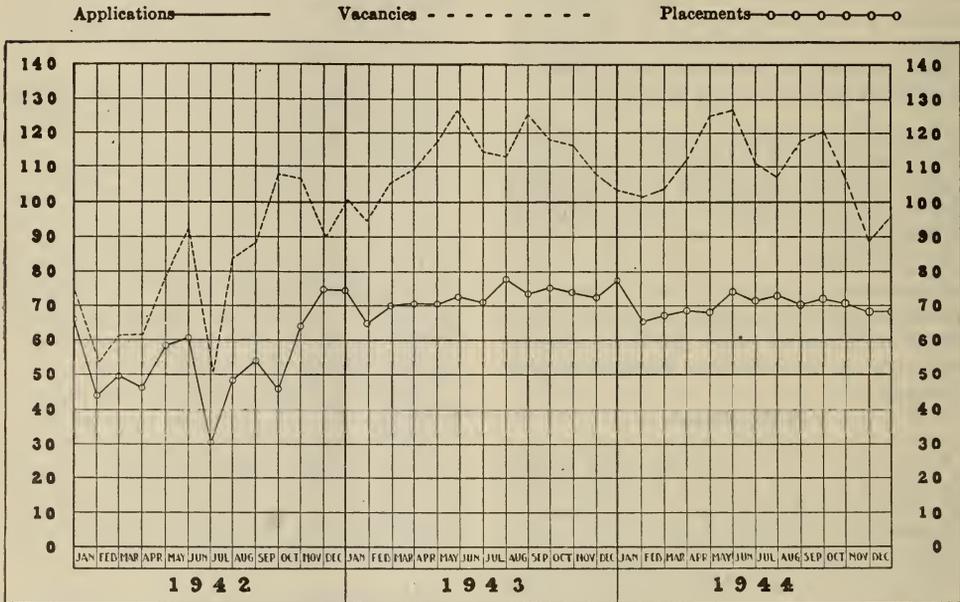

Applications for Employment; Vacancies and Placements, December, 1944

THE volume of business transacted by the Employment and Selective Service Offices of the Unemployment Insurance Commission during the four weeks December 1 to December 28, 1944, showed losses in the average daily placements of 28.6 per cent and 6.2 per cent respectively when compared with the previous period November 3 to November 30, and with the four weeks December 3 to December 30, 1943. Fishing, hunting and trapping remained practically unchanged but all other industrial divisions showed losses from November, the most pronounced being in

an upward trend, while that of placements remained about the same, the ratio of vacancies to each 100 applications being 95.4 during the four-week period ending December 28, 1944, in contrast with 89.4 in the preceding four weeks and 102.2 during the four weeks ending December 30, 1943. The ratio of placements to each 100 applications during the period under review was 68.1 compared with 68.2 for the previous four weeks and 78.4 during the four-week period in December a year ago.

The average number of vacancies reported daily by the employers to the offices through-

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

manufacturing. Heavy declines were noted in forestry and logging, trade, services and construction, the decreases in other groups being slight. In comparison with the four weeks ending December 30, 1943, moderate gains were shown in public utilities, services, and forestry and logging, but all other industrial groups recorded losses, the largest being in manufacturing and trade.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curve of vacancies in relation to applications showed

out Canada during the four weeks December 1 to December 28, 1944, was 6,506 compared with 8,547 during the preceding four weeks and 6,462 during the four weeks ending December 30, 1943. The average number of applications for employment received daily by the offices during the four weeks ending December 28, was 6,823, in comparison with 9,554 during the previous four weeks ending November 30, and 6,323 during the corresponding period a year ago. The average number of placements made daily by the offices from December 1 to December 28, was 4,649 of which 4,489 were in regular employment and 160 in work of one week's duration or less, as compared with a total daily average of 6,518 during the previous four weeks. Placements during the four

weeks December 3 to December 30, 1943, averaged 4,957 daily, consisting of 4,802 in regular and 155 in casual employment.

During the four weeks ending December 28, 1944, the offices referred 136,964 persons to vacancies and effected a total of 106,916 placements; of these, the placements in regular employment were 103,237 of which 71,807 were of males and 31,430 of females, while placements in casual work totalled 3,679. The number of vacancies reported by employers was 101,770 for males and 47,873 for females, a total of 149,643, while applications for work numbered 156,930, of which 113,117 were from males and 43,813 from females. Reports for the four-week period November 3 to November 30, 1944, showed 205,131 vacancies notified, 229,290 applications made and 156,438 placements effected, while during the four weeks December 3 to December 30, 1943, there were recorded 148,618 vacancies, 145,425 applications for work and 114,019 placements in regular and casual employment.

During the year 1944, the offices throughout Canada reported 2,728,771 vacancies, 2,485,283 applications and 1,739,917 placements in regular and casual employment, a reduction in placements of 10.4 per cent compared with the year 1943.

The following table gives the placements effected by the offices, each year, from January 1934, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1934.....	223,564	182,527	406,091
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295

1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917

Nova Scotia and Prince Edward Island

Orders listed at Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the four weeks ending December 28, 1944, called for a daily average of 241 workers, in contrast with 289 in the preceding period and 270 during the four weeks December 3 to December 30, 1943. Placements, likewise, were fewer under both comparisons, the daily average being 179, as compared with 219 in the previous period and 206 during the four weeks ending December 30 a year ago. When comparing placements by industrial groups with the period terminating December 30 last year, the most significant

changes were moderate losses in trade and construction and a gain in forestry and logging. Placements by industries included: manufacturing 1,324; services 814; trade 673; public utilities operation 513; construction 346; forestry and logging 308, and mining 117. There were 2,868 men and 1,174 women placed in regular employment.

New Brunswick

Positions offered through Employment Offices in New Brunswick during the period under review, averaged 349 daily compared with 251 in the previous four weeks and 190 during the period ending December 30 last year. There was a daily average of 149 placements compared with 211 in the four weeks terminating November 30, and 141 during the period ending December 30 a year ago. Placements by industrial groups showed small variation from the four weeks December 3 to December 30, 1943, the largest changes being moderate gains in services and construction. Placements by industrial divisions included: forestry and logging 744; manufacturing 678; services 620; trade 565; public utilities operation 372 and construction 337. Regular placements numbered 2,540 of men and 844 of women.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the Province of Quebec during the four weeks ending December 28, 1944, there being 2,044 in comparison with 2,691 in the preceding period and 2,095 during the four weeks terminating December 30, 1943. Placements decreased under both comparisons, the daily average being 1,412 during the period under review, in contrast with 2,016 in the previous four weeks and 1,519 during December last year. A fairly large reduction in manufacturing together with losses much smaller in volume in construction and trade, was responsible for the decline in placements from the four weeks ending December 30, 1943. Improvement of moderate proportions was noted in services and public utilities operation, while the changes in all other groups were small. Industrial divisions in which most of the placements were effected were: manufacturing 10,855; forestry and logging 9,462; services 4,433; trade 2,655; public utilities operation 2,299; construction 2,081 and mining 402. Placements in regular employment numbered 23,671 of men and 8,660 of women.

Ontario

Opportunities for employment at Employment Offices in Ontario during the period

December 1 to December 28, numbered 2,500 daily compared with 3,468 in the previous four weeks and 2,436 during the period ending December 30 last year. The average number of placements registered daily was 1,808 during the four weeks under review, in comparison with 2,551 in the preceding period and 1,855 during the four weeks terminating December 30, 1943. The loss in placements from the period December last year, was chiefly attributable to declines in trade and manufacturing supplemented by smaller decreases in agriculture and mining. These losses, however, were offset in part by moderate gains in forestry and logging, services and public utilities operation. Placements by industries included: manufacturing 18,111; services 6,982; trade 5,790; forestry and logging 3,874; public utilities operation 3,175; construction 2,241 and mining 774. Regular placements numbered 27,634 of men and 12,896 of women.

Manitoba

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Manitoba during the four weeks terminating December 28, 1944, was 301, as compared with 406 in the preceding period and 327 during the four weeks ending December 30, 1943. Placements showed a lower average during the period under review, being 219 daily in contrast with 335 in the previous four weeks and 293 during December last year. With the exception of a small gain in construction and a nominal increase in fishing and hunting, all industrial groups recorded decreases in placements from the four weeks ending December 30, 1943, the greatest reductions being in trade and manufacturing, followed by smaller losses in public utilities operation and services. Other declines were of minor importance only. Placements by industrial divisions numbered: services 1,381; trade 1,303; manufacturing 1,302; public utilities operation 47; construction 229, and forestry and logging 169. There were 2,272 men and 1,779 women placed in regular employment.

Saskatchewan

Orders received at Employment Offices in Saskatchewan during the period under review, called for an average of 154 workers daily in contrast with 217 in the previous four weeks and 159 during the period ending December 30 a year ago. There was a daily average of 119 placements compared with 191 in the period terminating November 30, and 129 during the four weeks ending December 30, 1943. When comparing placements by indus-

trial divisions with the period December last year, none of the changes was large, the most important being moderate declines in manufacturing, forestry and logging, and a gain in public utilities operation. Industries in which employment was found for more than 100 workers included: services 883; trade 577; manufacturing 445; public utilities operation 305; forestry and logging 260; and construction 101. Placements in regular employment numbered 1,598 of men and 805 of women.

Alberta

Employment opportunities as indicated by orders received at Offices in Alberta during the four weeks ending December 28, 1944, showed a daily average of 324 workers, compared with 420 in the preceding period and 321 during the four weeks terminating December 30, 1943. The average number of placements effected daily was 253 during the period under review, in contrast with 341 in the previous four weeks and 292 during the period ending December 30 last year. Reduced placements in construction, manufacturing, trade and services accounted for the decrease in placements from the four weeks terminating December 30, a year ago. A moderate increase in public utilities operation and a slight gain in finance and insurance were the only advances registered. Placements by industrial groups included: services 1,564; trade 1,050; manufacturing 910; public utilities operation 684; forestry and logging 554; construction 502 and mining 390. Regular placements numbered 3,544 of men and 1,966 of women.

British Columbia

During the period ending December 28, 1944, the daily average of positions offered through Employment Offices in British Columbia was 594, in contrast with 805 in the previous four weeks and 663 during December last year. Placements recorded a daily average of 510 during the four weeks under review, in comparison with 655 in the preceding period and 522 during the four weeks terminating December 30, 1943. The only declines of importance by industrial divisions from the period ending December 30 a year ago were in manufacturing and trade, the highest being in the first-named group. These losses were partly offset by moderate improvement in public utilities operation and services. Industrial groups in which the majority of placements were effected were: manufacturing 3,181; services 2,887; trade 2,015; public utilities operation 1,295; forestry and logging 1,014; construction 880 and mining 266. There were 7,680 men and 3,306 women placed in regular employment.

Quarterly Report of Employment and Selective Service Offices, September 29 to December 28, 1944

EMPLOYMENT conditions, as indicated by the work of Employment and Selective Service Offices of Canada during the quarter September 29 to December 28, 1944, was somewhat less in volume than in the corresponding quarter of 1943, there being a decline of 4.8 per cent in vacancies offered and under one per cent in placements effected. A very heavy reduction in vacancies in manufacturing was almost entirely responsible for the total decrease reported, although a fairly large loss occurred in construction. Of the

changes in other groups, a gain in public utilities operation and a decline in logging were the most significant. Placements in forestry and logging were considerably higher than in the same quarter a year ago, but this gain was almost entirely offset by a substantial decrease in manufacturing. All provinces, except New Brunswick, Manitoba and Saskatchewan reported fewer vacancies notified, the most noteworthy reduction being in Ontario. Placements were more numerous in New Brunswick and the province of Quebec

than during the corresponding quarter of 1943, the most important gain being in the latter province.

The accompanying table gives the vacancies and placements of the Employment and Selective Service Offices by industrial groups in the various provinces during the period September 29 to December 28, 1944.

From the chart appearing elsewhere in this issue, which accompanies the article on the work of the Employment and Selective Service Offices during December, 1944, it will be noted that the curve of vacancies in relation to applications was downward throughout the first two months, but during December showed

a moderate upward trend, while that of placements recorded a downward course during the thirteen weeks. (See p. 214.)

During the period September 29 to December 28, 1944, there was a ratio of 97.0 vacancies and 68.9 placements for each 100 applications for employment, as compared with 109 vacancies and 74.8 placements during the same quarter of 1943.

The average number of positions offered daily during the quarter under review was 8,238, of applications registered 8,436, and of placements effected 5,832, in contrast with a daily average of 8,625 vacancies, 7,908 applications and 5,877 placements in regular and

casual employment during the fourth quarter of 1943.

During the thirteen weeks, September 29 to December 28, the offices reported that they had referred 600,828 persons to positions and had effected a total of 443,214 placements, of which 431,787 were in regular and 11,427 in casual work. Of the placements in regular employment, 284,169 were of males and 147,618 of females, while casual work was found for 3,614 males and 7,813 females. A comparison with the corresponding period in 1943 showed that 446,659 placements were

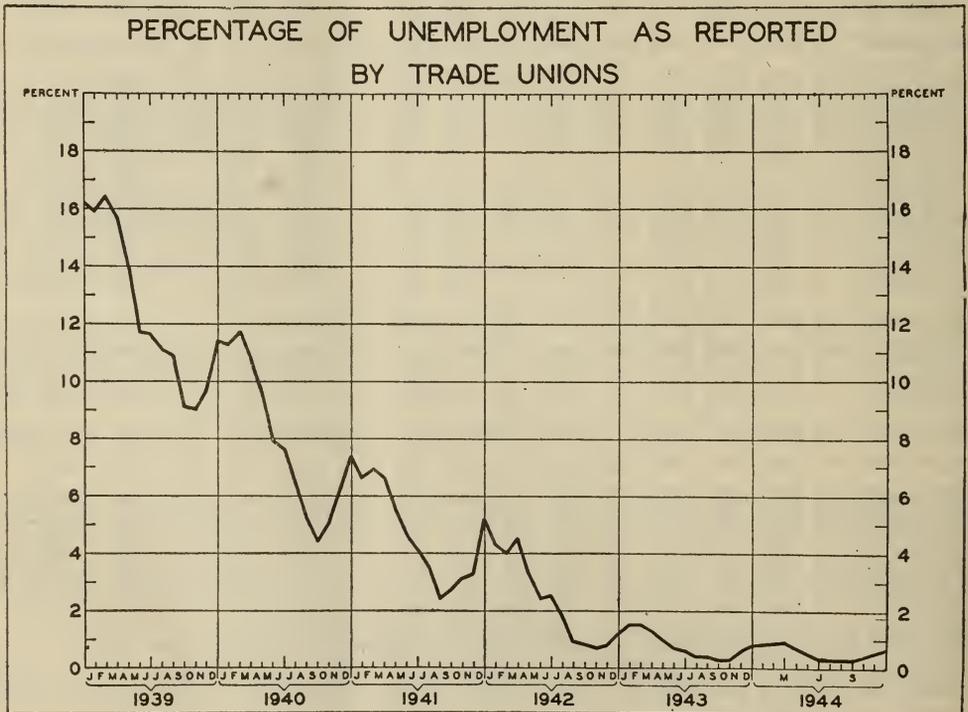

then effected, of which 435,229 were in regular and 11,430 in casual work. Applications for employment during the period under review were received from 426,718 males and 214,439 females, a total of 641,157 in contrast with the registration of 601,040 persons during the same quarter of 1943. Employers notified the offices of 626,124 positions, of which 415,201 were for men and 210,923 for women, as compared with 655,508 opportunities for employment offered during the last quarter of 1943.

Unemployment in Trade Unions at the Close of the Quarter Ending December 31, 1944

UNEMPLOYMENT in the following report has reference to involuntary idleness due to economic causes. Persons who are without work on account of sickness, a strike or a lockout, or who are engaged in work outside their own trades are not considered as unemployed. As returns from unions making reports vary from quarter to quarter, with consequent variations in the membership, upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

For the close of the quarter ended December 31, returns were received from 2,332 local

labour organizations showing a total membership of 409,338 persons of whom 2,473, or 0·6 per cent, were without work. In comparison, 2,377 locals reported at the end of September, 1944, a membership of 416,664, of which 1,262 or 0·3 per cent were unemployed; at the end of December, 1943, the unemployed were 0·8 per cent of the total reported membership. The percentage of unemployment at the date under review is the lowest reached for any December since the inception of the record in 1915. The increase in the percentage of unemployment at December, although slight, conforms with the seasonal experience in previous

years and occurred chiefly among the unions in the building and construction trades and in the manufacturing and transportation industries. It may be noted that the unemployment indicated at the present time, and for several of the preceding monthly or quarterly periods, has been due principally to temporary lay-offs.

The percentages of unemployment in each province is shown in Table I. In comparison with the previous quarter employment conditions improved in Nova Scotia and New Brunswick, while Quebec, Ontario, Manitoba, Alberta and British Columbia experienced minor recessions. The percentage of trade union members unemployed in Saskatchewan remained unchanged. In comparison with December of the previous year, much better conditions prevailed in Nova Scotia. In Saskatchewan, Alberta, Ontario, and New Brunswick employment levels were very little higher while in Quebec and British Columbia they were slightly lower.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. At the end of December, the percentages ranged from no unemployment reported in Saint John and Halifax to 1.2 in Edmonton. The percentage for Winnipeg was 0.9, for Vancouver 0.6, for Montreal 0.5, for Toronto 0.2 and for Regina 0.1. In comparison with the conditions at the end of the previous quarter, a slight employment recession was recorded in Edmonton, Winnipeg, Montreal and Vancouver while in the other cities employment remained on a high level. As compared with December, 1943, employment remained on a very high level in each city for which tabulations were made. In Halifax conditions improved from 1.8 per cent unemployment among trade union members at December 31, 1943, to no unemployment at December, 1944, while in Edmonton the percentage of unemployed increased from 0.8 to 1.2.

For the manufacturing industries returns were received from 847 unions having a combined membership of 213,361 persons of whom 810, or a percentage of 0.4 were listed as unemployed. In comparison, 0.1 per cent of 220,441 members were unemployed at the end of the previous quarter and 0.6 per cent of the number of members reported at the end of December, 1943. Among union members in the printing and publishing, the vegetable products, and the textile and clothing manufactur-

ing industries the employment situation was more favourable than at the end of September, while among the pulp and paper mill workers, electric power production employees, workers in the ferrous and the non-ferrous metal groups and in the miscellaneous manufacturing industries there were somewhat less favourable conditions. Of the members reported in the aluminum industry 331 or a percentage of 7.5 were reported unemployed at the end of December. Also, 80, or 1.7 per cent, of the members of unions of moulders were reported unemployed. Employment in the other metal groups was at a high level. As compared to December, 1943, there was less unemployment among trade union members in the printing and publishing trades, the manufacture of vegetable and animal products, textiles and cloth-

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

Month	N.S. and Prince Edward Island	New Brunswick	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Canada

ing, and iron and its products, while there were small increases in unemployment among pulp and paper mill workers, electric power production employees and woodworkers. Somewhat larger increases were evident in the non-ferrous metal and in the miscellaneous manufactures groups. Employment continued at a high level among workers engaged in the manufacture of rubber, clay, glass, stone, mineral and chemical products.

There were 56 unions of coal miners reporting 18,391 members, all of whom were employed at the end of December, 1944, as compared with 0.2 per cent reported unemployed at September, 1944, and 0.1 at December, 1943. Practically no unemployment was recorded among the 8,087 members of unions engaged in metal mining. None were unemployed at September while 0.6 per cent were reported unemployed at December, 1943. Four point nine per cent of the 2,731 union members engaged in non-metallic mining were reported as without work, an increase from the 3.5 per cent at September and 1.6 at December 31, 1943.

Reports were received from 206 local unions in the building and construction trades which indicated that 807, or 2.8 per cent of the total reported membership of 29,086 persons were unemployed at the end of December. In comparison, 0.7 per cent were reported unemployed at September and 3.1 at December, 1943. As compared to the preceding quarter, there were more unemployed members among steam shovel operators and dredgemen, bricklayers, masons, and plasterers, carpenters and joiners, and painters, decorators, and paperhangers, while there were fewer unemployed electrical workers, granite and stone cutters and hod carriers and miscellaneous building workers. Unemployment among bridge and structural iron workers, plumbers and steam fitters, and lathers remained at low levels of less than one per cent. As compared to the similar period in the previous year, conditions were more favourable for the employment of shovel operators and dredgemen, bridge and structural iron workers, bricklayers, masons, and plasterers, and granite and stone cutters, a little less favourable for painters, decorators and paperhangers, while for the other building and construction trades there was very little or no change with employment remaining on a fairly high level.

Reports were received from 877 local unions in the transportation industries. The total

membership covered in these reports was 88,406 persons of whom 434, or a percentage of 0.5, were without work on the reporting date. In comparison, 0.3 per cent were reported unemployed in September and 0.7 in December, 1943. A decrease of about 0.5 per cent in unemployment was recorded among unions of navigation workers, from 3.2 in December, 1943 and 3.1 in September, 1944 to 2.7 at the end of the quarter under review. Unemployment remained at less than one-tenth of 0.1 per cent for street and electric railway employees, teamsters and chauffeurs in all three periods mentioned. There was a very slight employment recession in the steam railway division since the last quarter although conditions were more favourable than at December 1, 1943.

Forty-eight union members, or 0.5 per cent of the total membership of 8,890 were reported as out of work among the 49 local unions in the communications groups. At September, 1944, 1.9 per cent were unemployed and 1.1 per cent at December, 1943. The 0.4 per cent unemployment for December, 1943, and 1944, in services represents little change from the level reported at the previous quarter. The 28,927 members in this group at the end of 1944 were reported by 104 locals. While all retail and wholesale employees were reported employed at September, 1944, and at December, 1943, there were 35 unemployed members, or 1.3 per cent of the total of 2,632 members which were reported by 15 locals at the end of December, 1944.

There were 100, or 4.4 per cent of the 2,250 fishermen reported unemployed as compared with the 11.1 per cent reported at the previous quarter and the 18.2 for the end of the previous year. In this quarter, as in the previous quarter and in December, 1943, all of the lumber workers and loggers which were reported at the end of 1944, a total of 6,577, were employed.

The accompanying chart illustrates the trend of unemployment from January, 1939, to date. Table I shows by provinces the average percentage of union members who were unemployed each year from 1933 to 1943, inclusive, and also the percentage of those without work for December of each year since 1932, for each month of 1943 and for each quarter of 1944. Table II indicates the percentage of unemployment in the various groups of industries since 1932.

Unemployment in Canada, as Reported by Trade Unions for the Year 1944

AVERAGE unemployment in trade unions during 1944 was 0.5 per cent, according to reports received by the Department of Labour quarterly from local trade unions throughout the country showing the number of members in good standing (excluding members in the armed forces) and the number of these members unemployed at the end of the quarter. From the data obtained the percentage of unemployment among union members is calculated.

The record was commenced on a quarterly basis at the end of 1915, but at the beginning of 1919 was placed on a monthly basis. The monthly calculation was discontinued in December, 1943, and since that time has been made only quarterly.

The situation at the end of each quarter is summarized in the *LABOUR GAZETTE*, the previous article being a review of the quarter ended December 31, 1944. A review for the year 1944 follows.

The average number of locals or union branches which reported for each quarterly period of 1944 was 2,308 with an average combined membership of 424,713 persons, of whom 0.5 per cent were unemployed. This annual average of the unemployment percentages is the lowest which has been recorded. It is noted that union membership tends to increase during periods of high employment and to decline in periods of high unemployment.

The highest percentage of unemployment during 1944 was recorded in March. At that time, 0.9 per cent were unemployed as compared to 0.8 per cent at the end of the previous quarter and 1.3 at March, 1943. The lowest was 0.3 per cent at June and September. The seasonal increase to 0.6 at the end of September was less than the average for previous years.

The quarterly reports on trade union unemployment in 1944 indicate that manufacturing employment continued to expand beyond the high levels of 1943 and 1942. The average trade union unemployment in this group of industries for the year 1944 was 0.2 per cent, as compared to a percentage of 0.4 for 1943, 1.5 for 1942 and 12.0 for 1939. The percentage was 0.4 at the end of 1944, 0.3 at the end of March and 0.1 at June and September. In the iron and steel group, unemployment declined from 0.8 per cent at the end of 1943 to 0.3 at March and 0.2 per cent at December, 1944. While the printing and publishing trades experienced moderately improved conditions,

there was a slight recession for pulp and paper mill workers in the latter part of 1944. Employment in the non-ferrous metals group declined considerably, due to reduced production in the aluminum industry. Also, unemployment in miscellaneous manufacturing industries increased substantially at the end of the year. In 1944 employment among woodworkers was in a less favourable position than at the corresponding quarters of the previous year. Among union members in the animal products industry employment was slightly improved to a very high level while for other manufacturing industries employment conditions continued favourable.

The low level of unemployment among coal miners in 1943 was maintained in 1944, at a yearly average of 0.4. In comparison, the average annual percentage of unemployment for 1942 was 2.2 and for 1939 was 10.3. The percentages for 1944 ranged between 0.7 and 0.3.

In the building and construction trades the percentages of unemployment among union members ranged between a high of 6.5 in March and a low of 0.7 in September. The corresponding figures in the preceding year were 9.0 per cent in March and 1.0 in September. The average percentage of building and construction trade union members unemployed in the four quarters for which reports were received was 2.3 as compared with 3.7 per cent for the year 1943 and 31.4 per cent for 1939.

In 1944, although less than in 1943, employment conditions for union members in the transportation industries improved as compared to the previous year; the average percentage of unemployment reported by trade union members in this group was 0.4 in 1944, 0.7 in 1943 and 8.3 in 1939. In 1944, the percentages ranged from a low of 0.3 in June and September to 0.5 in December, whereas in 1943 the corresponding figures were 0.4 in July and 1.3 in January and February.

Slight improvement was recorded for communication employees. The average percentage of trade union unemployment in this industry was 1.3 in 1944, 1.5 in 1943, and 6.3 in 1939. A substantial decrease in unemployment was indicated at the end of December 1944.

In the service group, which includes civic, hotel, restaurant, theatre, and stage employees, barbers, stationary engineers, firemen and unclassified workers, the percentage of union members unemployed, on the average for the four quarters of 1944, was 0.3. In comparison,

the monthly average was 0.6 for 1943 and 4.7 for 1939.

Employment in logging remained at a high level in 1944. As in the previous year, the average reported unemployment was 0.2.

Tables showing percentages of unemployment among union members by industries and by provinces appear in the preceding section on Unemployment in Trade Unions at the close of the quarter ending December 31, 1944.

Strikes and Lockouts in Canada During January, 1945

STRIKE activity in Canada during January, 1945, showed an increase as compared with the previous month. As compared with January, 1944, the number of strikes recorded showed a decrease of seven but the workers involved and the time loss in man-working days were both higher. Preliminary figures show 16 strikes in progress during January, 1945, with 5,435 workers involved and a time loss of 32,142 man-working days, as compared with 11 strikes in December, 1944, involving 2,273 workers, with a time loss of 11,484 days. The figures for January, 1944, show 26 strikes, with 8,140 workers involved and a time loss of 23,408 days.

During the month under review a strike of street railway employees at Vancouver, Victoria and New Westminster, B.C., was respon-

sible for more than 76 per cent of the total time loss.

One strike, involving 26 workers, was carried over from December, 1944, and 15 commenced during January, 1945. Of these 16 strikes, one resulted in favour of the workers, five in favour of the employers, three were compromise settlements and six were indefinite in result, work being resumed pending final settlement. At the end of the month an alleged lockout of coal miners at Robb, Alta., was recorded as unterminated.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

STRIKES AND LOCKOUTS IN CANADA, JANUARY AND DECEMBER, 1944, JANUARY, 1945

Date	Number of strikes and lockouts		Number of workers involved		Time loss in man-working days
	Com-mencing during month	In existence	Com-mencing during month	In existence	
*January, 1945.....	15	16	5,409	5,435	32,142
*December, 1944.....	9	11	2,133	2,273	11,484
*January, 1944.....	22	26	4,839	8,140	23,408

* Preliminary.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is seldom encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1945*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to January, 1945				
MINING— Coal miners, Robb, Alta.	1	26	676	Commenced December 5, 1944; for adjustment of contract rates on development work; untermintated.

Strikes and Lockouts Commencing During January, 1945

MINING— Coal miners, Sydney Mines, N.S.	1	1,212	3,000	Commenced January 3; protesting reduction in number of chain runners on one section of long wall; terminated January 5; return of workers pending further negotiations; indefinite.
Coal miners, Sydney Mines, N.S.	1	35	140	Commenced January 9; for employment of pushers for mine cars; terminated January 12; return of workers pending further negotiations; indefinite.
Coal miners, New Waterford, N.S.	1	(a) 32	32	Commenced January 12; for employment of extra workers on longwall; terminated January 12; return of workers; in favour of employer.
Coal miners, Midlandvale, Alta.	1	90	90	Commenced January 18; protesting failure of machinemen to clear slack from cuts; terminated January 18; return of workers; in favour of employer.
Coal miners, Nordegg, Alta.	1	407	814	Commenced January 18; for installation of man-riding trips and erection of new washhouse; terminated January 19; negotiations; compromise, man-trips to be installed and washhouse to be considered after the war.
Coal miners, Foothills, Alta.	1	97	97	Commenced January 23; misunderstanding re shortage of rationed foods in cookhouse; terminated January 23; return of workers; in favour of employer.
MANUFACTURING— <i>Vegetable Foods, Etc.</i> — Canning factory workers, New Toronto, Ont.	1	(b) 244	732	Commenced January 23; for settlement of various grievances (dismissals and transfer of workers, payment for time lost following mishap, etc.); terminated January 25; conciliation, federal, and reference to IDI† Board; indefinite.
<i>Rubber and Its Products</i> — Rubber factory workers, Kitchener, Ont.	1	103	225	Commenced January 5; for increased wages, piece rates, following revision of time standards; terminated January 8; negotiations and return of workers pending reference to RWLB†; indefinite.
Tire factory workers, New Toronto, Ont.	1	(e) 215	240	Commenced January 12; for increased wages, piece rates, following changeover from hourly rates in effect during test period on new work; terminated January 13; conciliation, federal, and return of workers pending two-weeks' trial; indefinite.
<i>Miscellaneous Wood Products</i> — Wood products factory workers, Owen Sound, Ont.	1	148	700	Commenced January 2; against dismissal of foreman for cause; terminated January 8; conciliation, provincial; in favour of employer.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1945*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing During January, 1945—Conc.				
MANUFACTURING—Con.				
<i>Metal Products—</i>				
Metal factory workers, London, Ont.	1	(c) 121	60	Commenced January 8; for observance of seniority in lay-off of two workers; terminated January 8; conciliation, provincial; compromise, one worker reinstated at another job.
Freight car factory workers, Trenton, N.S.	1	(d) 166	475	Commenced January 25; for employment of more workers on steel erection gang; terminated January 27; conciliation, federal; in favour of employer.
Machinists, Woodstock, Ont.	1	22	11	Commenced January 30; against dismissal of two workers for infraction of company rules; terminated January 30; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.
TRANSPORTATION—				
<i>Electric Railways and Local Bus Lines—</i>				
Street railway employees, Vancouver, Victoria and New Westminster, B.C.	3	2,454	24,500	Commenced January 9; against decision of NWLB denying appeal for greater increase in wages and cancelling increase approved by RWLB; terminated January 19; conciliation, federal, and return of workers pending further reference to RWLB; compromise.
<i>Other Local and Highway Transport—</i>				
Bus drivers, Victoria (Vancouver Island), B.C.	1	63	350	Commenced January 6; for increased wages and a new agreement; terminated January 12; conciliation, provincial, and reference to RWLB; in favour of workers.

* Preliminary data based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

‡RWLB—Regional War Labour Board. †NWLB—National War Labour Board

‡IDI—Industrial Disputes Investigation.

Prices

Prices, Retail and Wholesale, in Canada, January, 1945

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index registered an increase of 0.1 to 118.6 between December 1, 1944 and January 2, 1945, marking a wartime gain of 17.7 per cent. Three sub-groups were higher while two were lower. Fuel and light moved up 1.0 points to 109.1, reflecting the return of electricity rates to a normal level following rebates to customers in the previous year. A gain of 0.2 to 121.8 for the clothing index was due to scattered increases among men's wear, women's wear and piece goods, while higher hospital rates were mainly responsible for an advance of 0.3 to 109.2 in the miscellaneous items index. Easier quotations for eggs outweighed seasonal advances for vegetables and fruits to reduce the food index 0.1 to 130.2 between December 1 and January 2, while home furnishings and services declined a like amount to 118.3.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of

expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Activities of the Wartime Prices and Trade Board*.

Explanatory Note re Wholesale Prices

Since it has been found necessary to advance the date of publication of the LABOUR GAZETTE, and the information on wholesale prices cannot be prepared in time to meet the new date, the figures for the month of January which would ordinarily have appeared in table V in this issue will appear instead in the March issue.

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1944

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

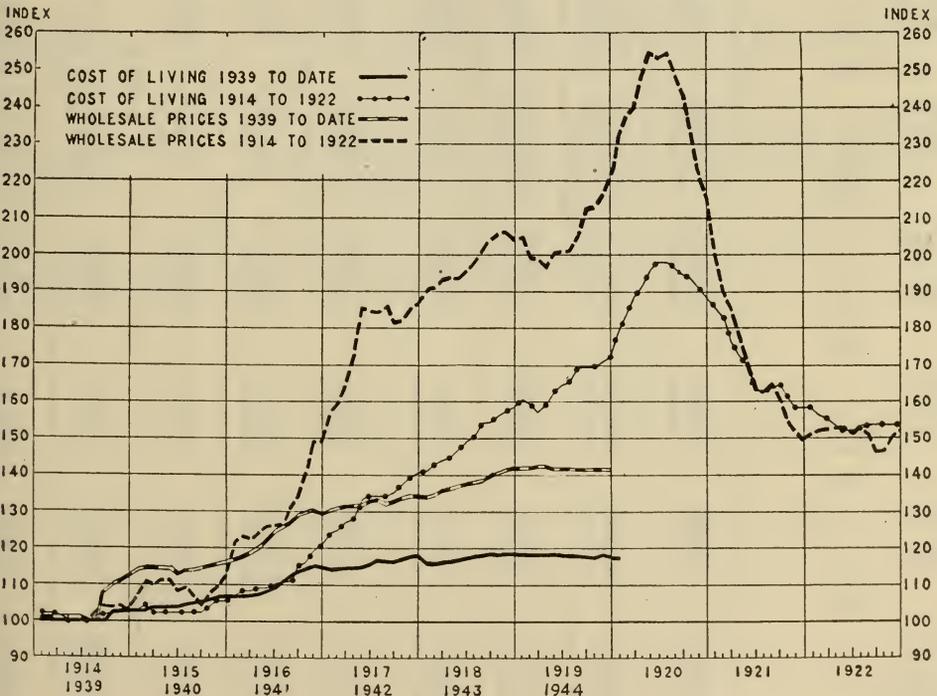

TABLE I.—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

	Adjusted to base 100.0 for August 1939	On base of average prices in 1935-39 as 100*							Retail Prices Index (Commodities only)†
		Total	Food	Rent	Fuel and Light	Clothing	Home Furnishings and Services	Miscellaneous	
1913.....		79.7	88.3	74.3	76.9	88.0	70.3		
1914.....		80.0	91.9	72.1	75.4	88.9	70.3

(b) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(c) Rents marked (c) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

(f) Yearly averages are for period from July of preceding year to June of year specified. (g) July. (h) June. (i) Revised.

Fatal Industrial Accidents in Canada During the Fourth Quarter of 1944

DURING the fourth quarter of 1944 there were 262 fatal industrial accidents, including deaths from industrial diseases reported by workmen's compensation boards, etc. This compares with 295 fatal accidents during the fourth quarter of 1943. Of the 262 fatalities during the period under review, 97 occurred in October, 88 in November and 77 in December. Fatal accidents during each year are recorded by quarterly periods in the issues of the *LABOUR GAZETTE* for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred contain 25 fatalities for the first three quarters of 1944 and one fatality for 1943.

In this series of reports it is customary to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the *LABOUR GAZETTE* and newspaper reports.

Classified by groups of industries the fatalities occurring during the fourth quarter of 1944 were as follows: agriculture, 24; logging, 29; fishing and trapping, 5; mining, non-ferrous smelting and quarrying, 40; manufacturing, 55; construction, 25; central electric stations, 4; transportation and public utilities, 56; trade, 11; service, 13.

Of the mining accidents, 23 were in "metaliferous mining," eleven in "coal mining," four in "non-metallic mineral mining and quarrying, n.e.s." and two in "structural materials."

Of the accidents in manufacturing, two were in "vegetable foods, drink and tobacco," two in "animal foods," two in "leather, fur and products," seven in "saw and planing mill products," one in "wood products," one in "pulp paper and paper products," one in "printing and publishing," 19 in "iron, steel and products," one in "non-ferrous metal products," 9 in "non-metallic mineral products," four in "chemical and allied products," four in "ship-building," and two in "miscellaneous products."

In construction there were 17 fatalities in "buildings and structures," and eight in "highway and bridge".

In transportation and public utilities, there were 31 fatalities in "steam railways," two in "street and electric railways," eight in "water transportation," four in "air transportation," nine in "local and highway transportation," and two in "storage."

In trade there was one fatality in "wholesale," and 10 in "retail".

Of the fatalities in service, nine were in "public administration," and four in "personal, domestic and business."

There was no major disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:

On November 16, near North Bend, B.C., a train was derailed when it struck a rockslide and an engineer, a fireman, a conductor and a trainman were killed.

A riding rake carrying men to work plunged down a slope when the engine of the haulage rope failed and three coal miners lost their lives at Glace Bay, N.S., on December 18. Another two coal miners were killed when struck by a string of coal cars, on November 2, at New Waterford, N.S.

A prospector and his helper were frozen to death on a trail while staking claims, near Kirkland Lake, Ontario, about December 19.

When a train struck a truck, on December 22, three gas plant employees were killed, at Sherbrooke, Que.

Two test pilots employed by an airplane factory died in a crash while testing a plane, near Toronto, Ontario, on December 21.

Two electricians in a nitrogen plant were electrocuted from a short circuit while working in a sub-station, near Calgary, Alberta, on October 19.

When a train struck their auto, at Bourget, Ontario, on December 4, three plasterers were killed.

A welder and a plumber's helper died from burns received while using a blow torch in welding a tank, at Montreal, on November 21.

Two road workers lost their lives near Mannville, Alberta, on October 10, when crushed under an overturned power road grader.

On October 28, two labourers engaged in trucking gravel, were killed when buried in a landslide in a gravel pit, near Sherbrooke, Quebec.

Two dairy truck drivers were killed when a train struck their truck, at Joly, Quebec, on October 3.

At Halifax, N.S., on November 4, three employees lost their lives in a fire in a hostel.

When overcome by sewer gas while cleaning a septic tank, an engineer and a superintendent at an experimental farm laboratory died, at Richmond Hill, Ontario, on November 9.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first three quarters of 1944 has been compiled which contains 25 fatalities, of which three were in logging, six in mining, non-ferrous smelting and quarrying, five in manufacturing, three in construction, six in transportation and public utilities, and two in service. One of these accidents occurred in April, two in June, eight in July, four in August and 10 in September.

A further supplementary list of accidents occurring in 1943 has been made. This includes one fatality which occurred in transportation and public utilities in July.

Library of the Department of Labour

Select List of References on Employment Management

THIS is the second of a series of bibliographies on labour and related problems compiled by the Library for publication in the *LABOUR GAZETTE*. It consists of a select list of references on employment management available in the Library of the Department of Labour. Except for a few standard texts the list refers to material published since the war. The first list in this series appeared in last month's issue (p. 115).

Employment Management

GENERAL

Aircraft Industry Relations Committee. *Information digest*, Report of the Canadian aircraft industry's first national conference of personnel directors, Seignior club, June 7-9, 1943. Toronto, Aircraft Industry Relations Committee, 1943. 78 p.

ALBU, AUSTEN. *Management in transition*. London, Victor Gollancz, 1942. 24 p. (Fabian Society Research Series No. 68.)

Policies and Procedure of National Selective Service

Minutes of Meeting of Administration Board Attended by Representatives of U.S. War Manpower Commission

A SPECIAL meeting of the National Selective Service Administration Board was held on January 22, at which two representatives of the United States War Manpower Commission were invited guests.

Because of the special interest of this meeting, at which Canada's manpower policies were outlined in detail by the officers responsible for their administration, the minutes are herewith published in full.

The following topics were dealt with: National Selective Service organization; legal set-up; mobilization for Armed Services; labour priority arrangements; labour supply; alternative service; agricultural labour; industrial mobilization surveys; placement of veterans; and women's employment.

Those present were:

Board Members: Mr. A. MacNamara, LL.D., Director of National Selective Service, Chairman; Mr. S. H. McLaren, Associate Director, N.S.S. (Mobilization), Vice-Chairman; Messrs. H. F. Calore, Chief Executive Officer of Employment Service, Paul Goulet, Associate Director, N.S.S. (French), G. V. Haythorne, Associate Director, N.S.S. (Agriculture), Allan M. Mitchell, Director of Employment Service, Sheldon Ross, Associate Director, N.S.S. (Priorities), R. J. Tallon, Commissioner Unemployment Insurance Commission, L. E. Westman, Associate Director, N.S.S. (War Industries), G/C B. F. Wood, Associate Director, N.S.S. (Essential Civilian Services), Harry Hereford, M.B.E., Director of Planning, N.S.S. and Secretary, P. R. Parent, Assistant Secretary.

Non-Board: Miss M. Grier (for Mrs. Rex Eaton), Associate Director, N.S.S. (Women's Employment), Mr. W. K. Rutherford, (Assistant Director, Employment Service), Mr. T. R. Walsh, (Chief, Legal and Enforcement Branch, Employment Service), Dr. E. P. Laberge, (Chief Operations Division, Employment Service).

Invited Guests: Messrs. Reginald J. Conley, James E. Heffernan, Chester W. Hepler of the United States War Manpower Commission.

Chairman and Minister Extend Welcome

The *Chairman* welcomed the United States representatives of the War Manpower Commission to the meeting and explained that this Special Meeting of the N.S.S. Administration Board had been called in order that the War Manpower Commission representatives might have knowledge of how policies are decided and of the general administrative procedure and control of N.S.S. from a Head Office point of view. He explained that a meeting of this Board is held weekly to deal with administrative matters and that the N.S.S. Advisory Board decided on matters of policy; the Advisory Board was comprised of representatives of labour, employers, agriculture, war veterans and government departments most interested in manpower problems. In regard to the operations of N.S.S., he explained that each member of the Administration Board was a senior official in charge of a specific branch of operation and he would ask that during the course of the meeting each Associate Director would give an outline of the operations of his administration for the benefit of the visitors from the United States. Before proceeding, however, he felt sure that the Honourable Humphrey Mitchell, Minister of Labour who had joined the meeting would wish to voice a welcome.

The *Hon. Mr. Mitchell* said he was pleased to extend to the officials of the War Manpower Commission of the United States, a most cordial welcome and to assure them of the Department's entire co-operation in making their stay in Canada not only pleasant but instructive. To-day and to-morrow, they would be given an outline of operations of N.S.S. and the Employment Offices; the regulations in force and how these are administered and controlled from Head Office. Following the days here they would be visiting a local Employment Office, seeing actual field administration, and the regulations in actual operation. No doubt, problems facing us in Canada have already been encountered in the United States, and it has been realized that through mutual understanding and exchange of thought that we can assist in overcoming the many problems relating to manpower and employment matters which face both countries. We must work through to the end, that the vast resources of both countries shall be put to the greatest use in furthering our goal of total victory in the shortest possible time, and this can only be done by extending our war production to the limit. He wished them success in their tour and a safe journey home.

The *Chairman* asked Mr. Hereford, Director of Planning to outline the organization of National Selective Service.

National Selective Service Organization

Mr. Hereford addressed the meeting as follows:

In March, 1942, following a series of special studies National Selective Service was initiated. Its purpose was to make possible "the orderly and efficient employment of the men and women of Canada for the varied purposes of the war," and to provide direction of the nation's utmost effort on three fronts—the active service front, the industrial front, and the agricultural front.

The program could not be carried out without the use of employment offices. So, to avoid unnecessary duplication, it was decided to use the offices and staffs of the Unemployment Insurance Commission for the purposes of National Selective Service for the duration of the war. The manpower policy was applied in a series of gradual steps in pace with the development of the employment service, the setting up of employment offices and the demands on the manpower of Canada.

At the top of the organization is the National Selective Service Advisory Board, under the Chairmanship of the Director of N.S.S., composed of representatives of labour, employers, farmers, war veterans and government departments most interested in manpower problems, namely: Munitions and Supply, Agriculture, National Defence, Finance and Labour, also the Wartime Prices and Trade Board and the Civil Service Commission. No significant regulations concerning manpower are issued without approval of this Board, which is, in fact, one of the major instruments for consultation and collaboration between government, employers, workers, and farmers.

Day by day administrative problems are considered by the N.S.S. Administration Board, over which the Director of N.S.S. also presides. This Board is composed of a number of Associate Directors, in charge of various phases of N.S.S. operation, who carry the burden of the day-to-day administrative problems. As members of the Administration Board are also members of the Advisory Board, co-ordination of advisory and administrative functions is as complete as possible.

Decentralization has been provided for by the creation of five Regional Directors and five Regional Advisory Boards for the five economic areas: the Maritime Provinces (Nova Scotia, New Brunswick and Prince Edward Island), Quebec, Ontario, the Prairie Provinces (Manitoba, Saskatchewan and Alberta), and British Columbia.

These Regional Boards are under the Chairmanship of the respective Regional Directors and include the Chairmen of the Mobilization Board and the Regional Employment Committee, the Regional Employment Superintendent, one or more representatives of organized labour, representatives of the Wartime Prices and Trade Board and the Departments of Munitions and Supply, National Defence, Veterans Affairs and Agriculture.

These Boards act in an advisory capacity to the Regional Director in the same way that the N.S.S. Advisory Board assists the Director of National Selective Service. Minutes of the meetings of the Regional Boards are exchanged with other Boards and with the N.S.S. Administration Board, and recommendations and suggestions flow from the Regional Boards to the N.S.S. Administration Board.

The Employment Service is served in a similar manner by local and regional Employment Advisory Committees. These committees consist of an independent chairman with representatives of labour, employers, war veterans, agriculture, women's organizations, schools and universities, and other representative citizens. The committee members give their service voluntarily.

The heart of Canada's manpower policy is centred in the Labour Priorities Division of the National Selective Service. In co-operation with the Department of Munitions and Supply, which is responsible for war production, and the Wartime Prices and Trade Board, which is concerned with civilian supply, every industry is

classified as having either very high, high, low, or no labour priority. This classification covers practically every establishment, so that every employment office manager knows the labour priority of every employer in his area and uses it in assigning and transferring labour. Mr. Ross, Associate Director, will give some details of how the priority system is set up and operates.

With few exceptions, all employers and employees are required to use N.S.S. Employment Offices. No employee can quit or be discharged without giving or receiving seven days' notice on a form of which a copy goes to the nearest employment office. No employer may interview or engage any worker and no worker may seek or accept work unless he has a permit to do so from the local employment office. Permits to seek employment may be restricted as to duration, locality, industry, and occupation. They may even be restricted to specified employers. Employers cannot advertise for help—except anonymously in the name of Selective Service—and must requisition all their required labour from the employment office.

For some time military mobilization regulations and civilian manpower regulations were administered by two separate departments of the government. But in 1942, in order to co-ordinate the allocation of manpower between industry and the Armed Forces, the administration of regulations under which men were being called up for compulsory military training was transferred to the Department of Labour and has since been carried out under N.S.S. Mobilization Regulations.

Mr. McLaren, Associate Director of National Selective Service, will be giving you information regarding the military call-up.

On the civilian side a major problem has been to maintain adequate working forces in the high priority labour establishments. In 1943 it became necessary to issue a number of compulsory employment transfer orders to meet the growing labour shortages in certain industries. It became necessary also to issue an order re-directing ex-coal mine workers back to the coal mines and "freezing" farm workers to farm employment during seasonal periods.

Existing N.S.S. regulations were amended in 1943 to provide that no person employed in an establishment with a high priority rating may quit without the permission in writing of a Selective Service officer; also that no employer of such an establishment may discharge an employee without written permission of an N.S.S. official. These amended regulations which were put into effect September, 1943, resulted in a marked reduction in labour turnover. There are now seven Compulsory Transfer Orders in effect applicable to every male person between the ages of 16 and 40 years inclusive. It was never anticipated that these orders would effect a large scale movement of workers, but they have served their primary purpose in allowing us to divert workers from their former employment to other employment in which they could make a much greater contribution to Canada's war effort. In cases where persons are directed or requested by a Selective Service officer to accept other employment allowances may be granted where necessary to cover travelling, the moving of dependents and other necessary expenses arising out of a change of residence. If such change of residence requires a worker to be separated from his family and the earnings from the new employment do not compensate him for the increased cost of living a supplementary living allowance may be granted him.

A person transferred from one employment to another is entitled to reinstatement in his original employment on termination of the work to which he has been directed. The physical condition of persons subject to transfer not being particularly high (as a large proportion of such workers have previously been rejected for military service) there are claims of inability to accept the alternative employment offered because of physical condition. Therefore we have established throughout the country, panels of civilian doctors to whom all such cases are referred by Selective Service officers. A large group who have not been transferred, although subject to compulsory orders, is made up of married persons and single persons with dependents. We do not generally require transfers in these cases if it involves a change of residence. Further, we have not generally required a change of employment on the part of a married person where it would involve a reduction in pay.

Special features of N.S.S. operation include agriculture on which Mr. Haythorne, Associate Director, will speak, and coal mining, which Mr. Westman, Associate Director, will discuss.

The Chairman called on Mr. Walsh to give an outline of the legal set-up of National Selective Service and Employment Offices.

Legal Set-up of National Selective Service and Employment Offices

Mr. Walsh explained that under the War Measures Act which was in effect an Act of Parliament with no limit to its authority, National Selective Service Regulations were first approved in March, 1942. These regulations were restricted to some extent in as much as they only applied to persons between the ages of 17 and 45 years. The regulations now, however, are much broader. They apply to all persons both male and female from 16 to 64 years of age. The basic features of the regulations are that no person can get employment without a permit from National Selective Service. An employer cannot hire without permission of N.S.S. Every unemployed person must register with the local Employment Office. The regulations also provide that no person may leave his employment without first giving 7 days' notice; this requirement has been extended in cases of high priority industries, that is, designated establishments, where the notice must be approved in writing by a N.S.S. officer. An employer likewise cannot discharge or lay-off workers without first giving 7 days' notice. Advertising for workers is also controlled through National Selective Service. Compulsory direction has been provided by way of transfer orders from low priority establishments to high priority establishments. Direction is also provided for persons rejected from Military Service, and of course to unemployed persons. The labour exit permit is a means of control on persons leaving Canada. Agriculture is a frozen industry and no person may leave without permission of the Employment Service. Treatment of Conscientious Objectors is another phase of the regulations and such persons are directed to high priority employment, under special agreements. In regard to veterans, the Reinstatement in Civil Employment Act is an important factor and the terms of this Act have also been applied to persons who through direction by N.S.S. have lost contact with their original employer. Technical

and professional personnel are controlled by special features under the supervision of the Wartime Bureau of Technical Personnel.

The Chairman advised that owing to pressing duties he regretted that he had to leave the meeting but asked Mr. McLaren to take the chair in his stead.

Mobilization for Armed Services

Dealing with the subject of Mobilization, Mr. McLaren compared the Canadian system with the American system, pointing out that there are thirteen Mobilization Boards in Canada, but there are 6,500 Draft Boards in the U.S.A. It was explained that the functions of the actual members of the Mobilization Board relate solely to adjudicating upon applications for postponement. The Registrar of the Mobilization Division, as chief administrative officer, is responsible for all call-ups in connection with medical examination, recording of same, calling fit men for military training, obtaining necessary information from men applying for postponement, etc.

Priority Arrangements

Mr. Ross remarked that no doubt it is easily recognized that labour priorities are the key to the whole permit system of control of civilian manpower and employment. Perhaps a description of labour priorities should start with a brief outline of their origin and development. One of the first steps in establishing employment by permit, was an order requiring a permit for anyone to accept employment in specified less essential industries. Another group of industries was declared to be essential. Therefore, when the permit system was adopted for practically all employment outside agriculture, it was obvious that some guide, based on relative essentiality, was needed for orderly distribution of manpower.

An Industrial Classification Manual was prepared. An Interdepartmental Labour Priorities Committee was formed representing Departments of Munitions and Supply, Trade and Commerce, Wartime Prices and Trade Board, and the Employment Service. A simple range of four priorities: "A," "B," "C," and "D," was adopted and each industrial classification was assigned a separate rating for men and women.

Every establishment employing labour was required to report on employment, specific activities, war production, etc., and on this basis they were each classified and assumed the priority previously assigned to the industry. Each Local Selective Service Office was provided with the classification and priority of every employer in the particular area. The labour priority is marked on every order card and applicants are referred to employers on this priority basis.

Many exceptions have had to be made to this general priority schedule and applications for higher priority are considered by the Interdepartmental Labour Priorities Committee which functions in an advisory capacity. This Committee meets regularly once a week co-ordinating the viewpoint and recommendations of all Government Departments concerned. Aside from the establishments whose priority is determined by that assigned to the industry under which it is classified, about 3,000 special individual ratings have been set up. For construction, each project authorized by the Construction Control is named with a rating based on the relative importance of the work. In spite of the usual pressure to increase the range of priority categories or to sub-divide them, this has been avoided with the exception

of an emergency "A" rating. This category is very jealously guarded and only war production causing a bottleneck is intended for this priority.

There is a tendency to move employers up the priority scale but a recent check indicates employees to be distributed through the priority scale, only 5½ per cent in "A"; 17½ per cent in "B"; 37 per cent in "C" and 40 per cent in "D". I think this shows that our negative attitude toward some of the appeals has been effective in maintaining a useful priority system even though sometimes we are a little unpopular.

Although labour priorities are primarily for the purpose of guiding the Local Offices in referring available workers to jobs, they are used for several other purposes:

1. Compulsory Employment Transfer Orders, declaring those men of military age to be subject to direction, were based on labour priorities. The Priorities Committee prepared the list of activities to be included in the Orders largely from the "D" or "no priority" group of industries.

2. Mobilization Boards are provided with priority information which may be used in judging the merit of applications for deferment.

3. The Wartime Bureau of Technical Personnel use the priority schedule in allocating technical workers.

4. "Designated establishments" or the "freeze" Order is based on labour priorities.

5. For repatriation and rehabilitation the Air Force now use labour priorities as a guide.

6. The Department of Munitions and Supply use labour priorities occasionally as a stick to hold over the heads of some contractors of war production who fall down on the schedule required of them.

It is generally intended that the "A" priority will be reserved for direct war production activities of the highest essentiality. "B" priority reserved for less essential or partial war production and highly essential civilian activities. However, occasionally because of extreme or critical shortages of civilian commodities, production of goods to avoid rationing or to eliminate a bottleneck is placed temporarily in the "A" priority category. Labour priorities are based primarily on relative essentiality to the prosecution of the war and maintenance of civilian economy rather than on the urgency of the demand for workers. Urgency does sometimes become the deciding factor and a high priority is extended temporarily on this basis.

Further details concerning the operation of the priority system no doubt will be brought to the attention of our visitors during the time spent in the Local and Regional Offices. Rather than to describe our system of records, directives and statistical uses of priority I will leave this subject as no doubt such items of interest to them will be brought to their attention in their local examination of the administration of Selective Service.

Special Labour Supply Arrangements and Alternative Service

Mr. Westman addressed the meeting as follows:

Mr. Chairman, perhaps the nature of our organization as it is illustrated by the composition of the Administration Board can be

seen more clearly in a diagrammatic picture. Some Associate Directors and members of the Board are concerned with what might be described as horizontal manpower activities, i.e., they deal with certain types of affairs common to all, whether they be engaged in war work or essential civilian enterprise, or whether they are subject to mobilization.

Others are concerned with what might be described as vertical divisions of manpower activities. In the latter class there are three broad divisions recognized, namely (1) war industries (2) essential civilian industries and services (3) agricultural and primary industries including woods operations and fishing. One Associate Director, Mrs. Rex Eaton, is concerned with the employment of women. My responsibility is war industries and mining operations including coal mining.

This work consists of planning, spot assistance in critical labour situations, and in contacting the Dept. of Munitions and Supply and the Head Office operational divisions of the employment offices. Contacts are maintained with Chief Regional Officers. Part of the work is to keep the Dept. of Munitions and Supply advised of the availability of workers of various skills and capacities in different parts of the country in an effort to effect the placement of contracts as far as possible so as to diminish labour transfers and pressures on services, housing and transportation in particular.

Canadian pre-war industrial plants were rather concentrated in Ontario and areas in Quebec centering about Montreal. New plants wholly intended for shells, explosives and shell filling have been established at points selected from the standpoint of labour supply but where single plants were engaged in producing specific items and were associated with the general pre-war pattern of industry, it has not been impossible to avoid excessive loads on housing, and labour stringencies. Plant locations from the angle of total war over a long period were not planned perfectly of course.

While it might be fair to say that on a theoretical basis if it were possible to move workers quickly over considerable distances, they could be shuffled in such a way that they could carry the present load fairly well. However, these ideal conditions cannot be met and there is a constant struggle to bring labour to spots where it is most required and only to some extent is it possible to erect new plants in areas where any surpluses of labour may exist.

In general, excellent co-operation is received from the Dept. of Munitions and Supply and Selective Service is consulted constantly on the problem of locating war industries with respect to labour. This was not as true at the beginning as it has become. With respect to mining, emphasis has been placed on production of essential metals including magnesium, aluminum, nickel, copper, zinc, lead, mercury and key materials such as asbestos and radium. The gold mining industry has been suppressed. Canada supplies some of these metals in quite high percentages in terms of the total allied requirements. Manpower has been secured for the maintenance of this essential production. The iron, steel, metallurgical, petroleum and chemical industries have been considered as war industries. Canadian coal supplies of chief importance to war industry are located in Nova Scotia and must now be hauled by rail nearly one thousand miles to be effective. Railway facilities are somewhat inadequate and the coal

mines rather deteriorated. Without detailing the picture it has been found necessary to restrict the enlistment of coal miners and to release coal miners from the services. The labour supply remains unsatisfactory. This is the only industry where volunteers have been refused enlistment because of their occupation.

Alternative Service may be described as an extreme form of the application of civilian Selective Service. An individual who insists on refusing direction to employment may be placed in an Alternative Service Camp where he receives 50c a day plus subsistence. Very few have allowed a direction of Selective Service (Civilian) to place them in this position.

However, about 10,000 have been postponed by Mobilization Boards as conscientious objectors on religious grounds. Canada received these groups from 1885 to 1926 and in specific and general ways indicated that they would not be compelled to bear arms. A unique system of handling them has been developed, involving an arrangement whereby they remain in employment under contract with a portion of their earnings being paid to the Canadian Red Cross Society. The precise amount is determined in accordance with what is required for bare subsistence, leaving a basic sum to the individual of \$25.00 a month in cash. Eighty per cent of the postponed conscientious objectors are engaged in agriculture. Of the total, approximately 450 are in Alternative Service Camps following prosecution for refusal to accept direction and are carrying on alternative service work as postponed conscientious objectors. Of this number the great majority are Jehovah's Witnesses. They are working in National Parks and are a factor in the production of pit props and mine timbers for western coal mines.

As a result of this arrangement, postponed conscientious objectors have remained in industry or in useful employment. They have contributed a very considerable sum in the order of 10 per cent of the total revenue of the Canadian Red Cross Society and now there is good public acceptance of this arrangement. This plan is mentioned in detail because it differs from any procedure elsewhere and has worked well.

Agricultural Labour Supply

Mr. Haythorne said that during the early years of the war in Canada, there was a surplus supply of agricultural workers as well as a surplus of several farm products. With the large exodus of farm workers to the Armed Services and to other war industries paying higher wages, on the one hand, and with the greatly increased food requirements of the Allied nations on the other, these surpluses soon disappeared. As the war progressed it became apparent that special provisions were needed to protect farm labour supply; (a) by giving special consideration to farm workers applying for postponement of military training and (b) by freezing agricultural workers on the farm. In order to cope with the problem, the Department of Labour launched a Dominion-Provincial Farm Labour Program early in 1943, based on agreements with each province for sharing the responsibilities of carrying out the program as well as for sharing equally expenditures incurred. It was realized that a joint Dominion-Provincial approach to the problem would remove unnecessary duplication and make for greater efficiency. The Provincial Departments

of Agriculture, through their field representatives, with their experience and training in agriculture as well as knowledge of local conditions, have been able to assist greatly in meeting local farm labour problems. Their services have also been used extensively by the Mobilization Boards to guide them in their decisions concerning applications for postponement from military service. On the other hand, the local Employment and Selective Service Offices of the Department of Labour have contributed to the "partnership" as the responsible agency for interpreting and administering wartime manpower regulations. These local Selective Service Offices have also helped to make available additional farm labour through their knowledge of over-all labour supplies. In order to assist in co-ordinating the program, Dominion-Provincial Farm Labour Committees were established in each province composed of the principal Provincial and Selective Service officials associated with farm labour problems. The three major objectives of this over-all program have been:

(a) To stabilize existing manpower on farms: this has been accomplished in part by tightening the control over workers leaving agriculture and in part by the Mobilization Boards taking a generous attitude towards application of workers for postponement from the Armed Services.

(b) To increase the efficiency of labour on farms: the work of provincial agricultural fieldmen, local Farm Production Committees and Local Employment and Selective Service Offices have contributed to this objective, by encouraging farm workers, particularly farm rejects and men on postponement, to move to other farms where their services were more urgently required; by encouraging improved farming methods and by encouraging the more extensive use of labour saving equipment.

(c) To make available additional labour from outside sources to meet peak seasonal needs: among numerous steps taken to meet this objective, special mention might be made of large scale farm labour excursions. These include Prairie farmers who go east for haying during July and August; Ontario and Quebec workers who go west for harvesting in the late summer; berry picking from the Prairies to British Columbia, and several movements across the United States-Canadian boundary. You are no doubt familiar with the international arrangements made for an exchange of harvest combines and workers in the west, the Canadian potato harvesters and woodsmen who go to the New England States and the skilled tobacco workers from the Southern States who come to western Ontario. We would like particularly at this time to express our appreciation of the excellent assistance rendered by these workers. Another important source of seasonal labour, is that obtained from the Armed Services; others include part-time workers from cities and towns, high school youth, prisoners-of-war, conscientious objectors, Canadian Japanese and Indians from reserves. During the off-seasons on the farm, workers who can be spared from agriculture are encouraged to work on woods operations or in other essential employment. This movement of workers is controlled by National Selective Service, in cooperation with the provincial agencies, in order to ensure that all available labour is mobilized in the national interest. While there are places where improvements might be made, it is

generally agreed that this co-ordinated Dominion-Provincial program has been successful in meeting the most urgent farm labour problems.

Industrial Mobilization Surveys

In the absence of Mr. Willard Scott, Mr. McLaren outlined the method of operation of the Mobilization Surveys. He explained that the whole purpose of this operation is the continual screening of industry, etc., to ensure that no men fit for military duty are left on postponement for a longer period than is absolutely necessary. He indicated that the field staff actually enter the plants, establishments, etc., and deal with the workers, foremen, plant management, etc. By this method they are able to see the actual work being performed by each man and assess the necessity for his continued postponement. Consultation is then held with the plant management and every endeavour made to arrive at an amicable solution. In the vast majority of cases, agreement is reached, but management can always make further representations to the Mobilization Board if they are not satisfied with the previous decision of the Mobilization Survey officials.

Employment of Men and Women Discharged from Armed Services

G/C Wood said a department has recently been established known as the Department of Veterans Affairs and all veterans pass through its hands. The Department of Labour, however, is responsible for a number of matters such as Reinstatement in Civil Employment, Plant and Vocational Training, Placement Operations, etc.; approximately 86 per cent of men discharged had passed through our hands. The Department of Veterans Affairs is setting up Rehabilitation Centres everywhere throughout Canada and Employment Service personnel will be available in these centres to give information on labour matters. The local offices will have special registration units for veterans who will be given preferential treatment in regard to placement, i.e. those veterans who have overseas service. Veterans with only service in Canada are subject to call-up to the Army or direction to essential employment in order to replace as many men as possible who are on deferment in industry. These discharges are, of course, protected under the Civil Reinstatement Act for a period after they leave their employment in essential industry. Citizens Committees are also being inaugurated in various centres throughout Canada and it is advocated when such committees are named that a representative of the Employment Service be named to the committee. Negotiations are presently underway with trade unions in order to establish seniority rights for veterans.

Women's Employment—Nurses

Miss Grier remarked that while women have not been subject to call-up or compulsory transfer orders, they come under the general Selective Service Regulations which have exercised indirect control.

In meeting the nursing shortage which began developing toward the end of 1942, use was made of the various restrictive measures. Following a conference with the Canadian Hospital Asso-

ciation, the Canadian Nurses Association and the Provincial Departments of Health in the Fall of 1942, nurses were frozen to their profession and later, under the labour exit permit regulations, were not allowed to enter employment or take post-graduate work outside of Canada except under exceptional circumstances.

Through a compulsory registration and a national survey of hospital needs, statistical data were obtained of the number of nurses available and the distribution across Canada.

In the Fall of 1944 a conference was held at which the medical directors of the three Armed Forces and Veterans' Hospitals forecast their probable requirements for six months. This indicated that there would be a further shortage in civilian hospitals.

In an effort to induce more nurses to undertake institutional nursing, supplementary allowances were made available to nurses willing to give up other employment to assist in hospitals, tuberculosis sanatoria, or mental institutions where shortages are the most acute. At first they were asked to serve for six months in order to qualify for the allowances but this has recently been shortened to two months in an endeavour to secure more applicants.

To increase the number of student nurses encouragement has been given in Local Employment Offices to any girl who wished to train as a nurse and a grant of \$200.00 may be made available under the provisions of the War Emergency Training Plan, with the co-operation of the provinces, to assist in the cost of entering training. Through this means and an intensified publicity campaign, the enrolment of student nurses has been increased by 30 per cent.

The use of nurse aides in the hospitals is being urged to a much greater degree to relieve

pressure upon the fully trained personnel and it is probable that supplementary allowances will be made available to this group also.

An effort was also made to provide adequate sub-staffs for hospitals by placing employees, both male and female, in the highest priority rating and more recently regulations have been relaxed in regard to this type of employee, allowing hospitals to advertise, interview and engage sub-staffs without reference to National Selective Service Local Offices.

In the event that the need of further restriction is clearly demonstrated at a later date, the first regulations would be to prevent recent graduates (graduating in 1942 or a year decided upon) from engaging in private duty nursing, except by permission of National Selective Service. This regulation has already been given consideration in principle by the Advisory Committee of the Canadian Nurses Association and the Administration Board of National Selective Service.

All these measures have tended to conserve the supply of trained nurses but because we still face shortages in many localities, and in certain types of institutions, the situation is under constant review.

The Chairman invited questions from the United States representatives on any matters which were not clear.

The War Manpower Commission representatives asked a number of questions which were replied to in detail.

Mr. Hepler thanked the Board for the comprehensive outline of the operations of N.S.S. in Canada and assured them that they were most instructive and would form a comprehensive basis for the tour of the local offices when looking over the actual field operations.

Legislative Proposals of Labour Organizations

PROPOSALS for legislation were submitted recently to the governments of the provinces of Ontario, Manitoba and British Columbia by the Provincial execu-

tives of the Trades and Labour Congress of Canada. A summary of these proposals dealing with a variety of matters including wages and conditions of work, follows.

Ontario Executive of Trades and Labour Congress

On January 9, 1945, the Ontario provincial executive of the Trades and Labour Congress of Canada presented its annual memorandum of requests for legislation to the government of Ontario.

Vocational and Technical Training.—The Congress recommended that all schools built for the technical training of men from the Armed Forces, should be supervised by an advisory committee composed of employer and employee representatives, the latter to be selected from trade unions wherever the craft is organized. It was suggested further, that educational facilities be extended to civilians now employed in war industry, who are desirous of re-training for peace-time occupations.

Extension of Franchise.—It was urged that at the next session of the legislature the franchise be extended to all citizens of the province over 18 years of age.

Health Insurance.—The Congress favoured national health insurance and exhorted the provincial government to take full advantage of the next Dominion-Provincial conference to press for such a project.

Hospitalization.—The Provincial Government was urged to take over all hospitals in the Province now operating as a result of public subscriptions or municipal grants, and to operate them as public utilities.

Taxation of Public Utilities.—The taxation of public utilities was protested on the ground

that it would only serve to promote an unfair distribution of taxation by adding to the cost of the services, provided in the main to people of small means. It was asserted that the operation of publicly owned and controlled utilities is based on the principle of service at cost, without impairment of the working conditions and wage rates.

Housing.—The setting up of a Housing Commission at the next session of the legislature was urged under the Department of Planning and Development, with a view to taking full advantage of Federal legislation with respect to housing as an aid to solving the housing crisis.

Workmen's Compensation.—The Government was asked to amend existing regulations so as to provide 100 per cent compensation blanket coverage for all occupational diseases, regardless of the disease or the occupation of the worker; the placing of the supervision of preventive measures under the Workmen's Compensation Board; and the payment of compensation from the date of injury or disability.

Hours of Labour and Vacation with Pay.—Amendment of the present Act was recommended with a view to extending the regulations to include all lines of employment in the building trades where part time or casual help is employed; that all uncertainty concerning the inclusion of municipal employees under the Act be removed; that the vacation period be extended to two weeks; and that a 40-hour, five-day week, with no reduction in pay shall take effect at the conclusion of the war, as a means of creating full employment.

Justices of the Peace.—For the convenience of members of the several trade unions, it was suggested that the appointment of representatives of the trade union movement be made as Justices of the Peace, after consultation with the Ontario executive of the Trades and Labour Congress of Canada.

Recreational Program.—The Government was urged to create the necessary machinery and formulate a program for the fullest use of the National Fitness Act.

Home Work.—It was suggested that the Government by legislation abolish all home work, where such work by common practice has been done in factories set up for that purpose.

Collective Bargaining.—Inasmuch as the present collective bargaining regulations (P.C. 1003) are a temporary wartime measure, it was recommended that the Government, after consultation with the Ontario Executive of T. and L.C., enact a provincial Collective Bargaining Act, embodying all the best fea-

tures of P.C. 1003 and the Collective Bargaining Act of Ontario.

Old Age Pensions.—As an aid to creating full employment, the Government was strongly urged to provide for the payment of old-age pensions at age 60; that the only residential requirement be 15 years in Canada; that no deductions be made on account of other incomes; that pensions be increased to at least \$40 per month; that the same pension be made available for blind persons; that the practice of combining the Parents' Maintenance Act with the Old Age Pensions Act be discontinued; and that the placing of liens on the houses of pensioners be stopped.

Minimum Wage.—With a view to combating poverty and raising the general standard of living in the Province, it was recommended that the Government pass legislation, providing that no employed person in Ontario, under present conditions, receive less than an aggregate sum of \$1,500 per annum.

School Leaving Age.—It was urged upon the Government to maintain the compulsory school leaving age at 16 years and that every facility be provided to assure children free education, scientific and cultural instruction, up to and including universities.

Ontario Forest Resources.—The Government was petitioned to include a member of organized labour, when setting up the projected Forest Resources Commission.

Post-War Employment.—As a factor in avoiding confusion and unemployment in the post-war period, the Government was strongly urged to allot a larger per capita expenditure for the development of industrial research, with a view to the creation of new industries and thus provide more jobs and a higher standard of living. It was further recommended that immediate steps be taken to encourage the tourist industry; to extend electrical services in the rural areas by the development of all possible power projects; to encourage fullest use of national parks; to develop mineral and forest resources; and to extend and improve the provincial highway system.

Family Allowances.—Approval was given by the Congress of the Family Allowance Act. It was asserted emphatically, however, that such allowances must not take the place of an adequate wage rate.

Appointments on Government Boards and Commissions.—The Government was recommended for its appointment of labour representatives on several boards and commissions and urged an extension of that policy in the future.

Planning and Development Department.—The appointment of local Advisory Committees was recommended in connection with the

Planning and Development Department and that labour be given proper representation on all such committees.

Manitoba Executive of Trades and Labour Congress

The following is a digest of the brief submitted jointly by the Manitoba Executive of the Trades and Labour Congress of Canada and the Winnipeg and District Trades and Labour Council to the Government of Manitoba, December 11, 1944.

Before presenting its brief the delegation commended the Government for making the provisions of the Federal Order in Council, P.C. 1003 applicable to all workers in the Province and suggested that these be continued in the post-war period; for "Placing the Apprenticeship Act on the statutes of Manitoba and for the splendid effort put forth to get the various Trade Committees functioning." Continued support was promised the Government in its efforts to have the Provincial discussions on the Sirois Commission report reconvened, as an aid to post-war reconstruction in Manitoba.

Labour's Right to Organize.—The delegation reiterated its previous requests for legislation providing "adequate penalties" for any employer who interfered in any way with his employees joining any legitimate union. It was urged that company-sponsored unions be outlawed, and collective bargaining be made compulsory on the part of the employer, with that union which the majority of his employees had selected as their bargaining agency.

Highway Traffic Act.—The delegation supported the Railway Transportation Brotherhoods in urging that more adequate enforcement along with more advanced regulatory measures be provided to abolish what was termed "the unfair competition between commercial motor vehicle traffic and steam railway traffic". It was suggested that not more than one trailer should be allowed to be operated behind any commercial truck or bus and that such vehicles when hauling trailers, should be equipped with distinguishing lights, automatic brakes and non-swung couplers. In the case of buses, regulations were considered necessary to prevent over-crowding. It was urged also, that level crossings be eliminated wherever possible; that "stop" signs be placed at all level crossings and obedience thereto rigidly enforced.

Post-War Reconstruction.—The attainment of a post-war program of full employment and economic security will require the common effort of all classes and interests in the

province, the delegation stated, and declared that union labour was willing to co-operate with others in planning and promoting the objectives presented in their brief. It was urged that the hours of labour for all usefully employed persons be on the basis of a 40-hour work week in all branches of industry, with the ultimate adoption of the six-hour work day and five-day work week, with no reduction in earnings. A further reduction of hours was suggested, if necessary to avoid periods of unemployment after the war, without reducing wages and salaries.

It was asserted that many and varied projects will need to be undertaken in the immediate post-war period and, wherever possible, they should be planned thoroughly in advance. The following were suggested (1) Rural electrification; (2) housing and garden city projects, urban and rural slum clearance; (3) rapid electric transportation, both urban and rural; (4) main arterial highways and bridges; (5) reforestation; (6) development of waterways and canals; (7) hospital and educational institutions; (8) progressive development of transportation facilities with a view to making the scenic beauties of the province more readily accessible and thus encouraging the tourist industry.

Reconversion.—The Government was requested to set up a committee of the Legislature to study industrial development with a view to the conversion of wartime industrial plants into useful production for the benefit of the people of Manitoba.

Minimum Wage.—A protest was entered against the proposal of the Provincial Minimum Wage Board to recommend a minimum wage of 30 cents per hour, or \$14.40 per week of 48 hours for females and male miners, inasmuch as the Federal Order in Council made it possible for the province to increase the minimum wage to 35 cents per hour, without having to consult the War Labour Board. It was asserted that the Governments of Alberta and Saskatchewan had already established the 35-cent rate. The delegation recommended that "no employed person in Manitoba, under present conditions, shall receive less in wages than an aggregate sum of \$1,500 per year."

Department of Labour.—The Government was urged to appoint a full-time Minister of Labour.

Old Age Pensions.—While the Trades and Labour Congress of Canada in annual convention had gone on record as demanding a National Act providing for adequate pensions to the aged, the delegation felt that there was need for immediate action and urged that, in the meantime, the following proposals should be acted upon at once: (a) payment of pensions at 60 years of age; (b) that the only residential qualifications required be 15 years in Canada; (c) that no deductions be made on account of other incomes; (d) that an increase be made in the present amount to at least \$40 per month; (e) that the same pension be made applicable to blind persons; (f) that the practice of combining the Parents' Maintenance Act with the Old Age Pensions Act, be discontinued.

Health Insurance.—The Government was urged to take the necessary steps immediately to establish a sound health insurance scheme, keeping in mind the desirability of such scheme becoming national in scope.

British Columbia Executive of Trades and Labour Congress

In a brief submitted to Premier Hart of British Columbia on January 12, a delegation from the provincial executive of the Trades and Labour Congress of Canada presented the following fourteen-point legislative program:

1. Enforce minimum hours (44 a week) of work in the automotive industry.
2. Increase the present wage schedule for females to \$18 a week or 45 cents an hour.
3. Discontinue present system of allowing female help under 18 being hired as apprentices.
4. Require all persons in preparation or serving of foods to take a health examination annually.
5. Forbid double-decker bunks in work camps.
6. Grant the franchise to 18, 19 and 20-year-olds.
7. Abolish the poll tax.
8. Grant old-age pensions at 60 years.
9. Grant old-age pensions of \$50 a month.
10. Call old-age pensions "senior citizens' pensions."

Text Books and Education.—It was recommended that the Government exert every possible effort to have the compulsory school age raised to at least 16 years. Further, it was suggested that every facility be provided to assure young students educational, scientific, and cultural instruction, with opportunities for free continuation courses up to and including universities. The delegation urged the Government to provide free text books in public schools and to co-operate with other provincial governments and the Federal government in inaugurating a uniform, national system of education.

Salvage of War Materials.—The Government was enjoined to petition the Dominion Government with a view to the prevention of profiteering and wastage in the sale of salvaged wartime building material.

Excessive Radio Advertising.—Excessive commercial radio advertising was deprecated and the government was exhorted to reduce, and possibly eliminate, commercial advertising programs broadcast from the government-owned station.

11. Enact legislation which would give all workers two weeks' vacation a year with pay.
12. Grant compulsory rest periods for all workers in the retail merchandising industry.
13. Revoke all previous orders whereby residents of company towns are prohibited from enjoying the same rights and privileges that apply to other citizens.
14. Immediately increase teachers' salaries.

In its brief, the labour delegation said, "The government, and particularly the Department of Labour, are to be commended for the co-operation and assistance extended to organized labour in the last year."

The delegation asked further amendments to the Workmen's Compensation Act, including entire removal of the workers' contributions; 100 per cent compensation; that qualified chiropractic and naturopathic treatment be available to the workers without a recommendation from a medical doctor; that spectacles be replaced by the board when broken or damaged as a result of an accident suffered by a worker.

Community Planning in Manitoba

A STUDY of four small towns in the Province of Manitoba undertaken to "show what might be accomplished by long-term planning," is contained in a report prepared for the Post-War Reconstruction Committee of the Government of Manitoba entitled *Town and Community Planning*. Development plans were prepared for each town by Mr. Eric Thrift, Department of Architecture and Fine Arts, University of Manitoba, and the main part of the report consists of large maps (34 x 21 inches) showing each town as it is now and as it might become.

The report points out that in the past towns have for the most part been planned according to immediate needs or have grown up haphazardly. Deteriorated conditions have frequently resulted when areas in a town have a mixture of functions or uses. Stressing the value of long-range planning, the report suggests that living and working conditions could be greatly improved by providing separate areas for residential, commercial and industrial purposes. Running between these areas, strips of open ground treated with grass and trees would form a park network through the whole town. By laying walkways through these parks, pedestrian and motor traffic would be segregated, thus largely removing the danger of accidents, particularly in the case of children. Underpasses would be placed where walkways cross avenues of heaviest traffic.

Residential areas would be surrounded by the green parks to protect the homes against the encroachment of business or small industries and from any disturbance which these would cause. The use of the open strips within the residential areas also would provide more pleasant surroundings for homes; while small enclosed play spaces are suggested for tots under school age.

Considerable changes in traffic planning are proposed, in order to eliminate interference in the movement of traffic as much as possible, and to improve safety conditions. The elimination of the familiar grid planning of streets is suggested, to be replaced by a system of arterial roads carrying heavy traffic, supplemented by "minor access" roads on which, particularly in the residential sections, there would be no through traffic (thus discouraging unnecessary traffic and increasing the enjoyment and safety of residents).

To avoid having highways passing through towns and cities by congested and difficult routes, the proposed plans show them built

outside the towns, connected with them by feeder roads with "easy and attractive" entrances. The report points out that where such proposals have been carried out elsewhere, they have frequently been received in the beginning with much misgiving, but that "the feared loss of business through by-passing has not materialized and the benefits have been heartily applauded."

The plans make provision for schools, hospitals, halls, athletic centres, and other community facilities, such as are now being considered by some towns as post-war developments. Suitable locations are suggested, taking into consideration factors of accessibility, exposure for light and air, and in the case of schools particularly a minimization of traffic crossings.

The maps indicate how these plans could work out in specific cases.

Implementation

In bringing into effect a proposed town plan, the report points out that most of the action necessary to attain the objectives of the proposals must come from the community itself. "It is up to its citizens to have a complete comprehension of the values to be derived from town planning and what will be lost should they be shelved or neglected." It declares that "one of the first essentials is the establishment of a competent and responsible committee in any town. Much of the necessary work of surveying and gathering basic information can be done on a voluntary basis by existing community-minded groups whose work would be organized by the committee. . .

"The development of a broad scheme or future plan for the community would be largely in the hands of a consultant working in close contact with the local committee."

A program of publicity is suggested to make the value of planning and the results achieved the general knowledge of the public.

The second part of the report is entitled *Community Surveys*. Based on a publication of the United States Chamber of Commerce entitled *A Procedure for Post-War Planning*, it contains three sets of instructions and forms which can be used to make a survey of post-war employment within a community, including the number of persons likely to be seeking employment and the number of jobs likely to be available, and a survey of post-war markets.

THE LABOUR GAZETTE

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—Hon. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Editor—HARRY J. WALKER

VOLUME XLV]

MARCH, 1945

[NUMBER 3

Notes of Current Interest

Government policy on labour relations in Crown companies has issued a statement of policy regarding labour relations in Crown companies, the text of which is as follows:—

1. The government's attitude, in the following respects, is the same whether a company is publicly or privately owned:

- (a) concerning the right of labour to organize;
- (b) concerning any agreement between management and a union so long as it is not contrary to the public interest.

2. In private companies, the content of a collective agreement is a matter to be determined by the management and labour in the light of conditions affecting the particular industry.

In Crown companies, the content of an agreement is likewise a matter to be determined by the management and labour on the same principles.

3. Broadly speaking, except where provision is made for preferential treatment, as in the case of war veterans with overseas service, all citizens of Canada have equal rights in the matter of employment in government undertakings. As Crown companies are owned by the public, their directors are expected to be careful to see that no provision is included which would create discrimination as between one employee and another, or which would have the effect of excluding any citizen from employment therein because he does not belong to a particular union.

Conference on provincial minimum wage schedules

Provincial Ministers of Labour have been asked for their views on the desirability of attending a conference with the Dominion Minister of Labour, to consider any proposals which will make it possible for provincial authorities to have greater latitude in the establishment of minimum wage schedules.

In writing to the Provincial Ministers and suggesting the conference, the Federal Minister at the same time emphasized that his Department takes the view that the policy of price and wage control as implemented by the Wage Control Order must be maintained.

The date proposed for the conference was the week of March 19. However this date was found inconvenient by some of the Ministers, and it now appears probable that the conference will be held in April or May.

The text of the letter from the Hon. Humphrey Mitchell to the Provincial Labour Ministers, sent out on February 15, is as follows:—

“At the time the Wartime Wages Control Order was under revision in the latter part of 1943, provision was made in section twenty-three of the revised Order P.C. 9384 to enable provincial Minimum Wage Boards to operate without restriction under the Wage Order in establishing wage scales with certain limitations.

“Since that time, representations have been received from some provinces for further amendments to the foregoing provision to

permit more freedom of action for provincial Minimum Wage Boards to establish schedules of rates for specified classes of employees without recourse on the part of the individual employer or representatives of employees to the Wage Control Board.

"Insofar as this Department is concerned, we take the view that the policy of price and wage control as implemented by the Wage Control Order must be maintained but subject to this consideration, we are quite prepared to consider any reasonable proposals which will enable provincial Minimum Wage authorities to have a greater measure of latitude and a greater degree of flexibility in the establishment of minimum wage schedules. With this in mind, and for this purpose, I am suggesting that a conference should be held at a convenient date at Ottawa between the provincial Ministers of Labour and myself at which these matters of Minimum Wage legislation in relation to the Wage Control Order would be discussed. I have in mind that sometime during the week of March 19 may be suitable for such conference.

"I would be glad to have your views as to the desirability of such conference and whether the date suggested would be suitable to you."

Annual summary of strikes and lockouts

The annual article summarizing in detail strikes and lockouts in Canada, appears elsewhere in this issue, on page 383. Notable features brought out in the report are the decline in strike activity during 1944, from over a million lost days the previous year to under half a million; and the changes in the predominating causes of strikes. Strikes over wage demands, which caused over 326,000 lost days, or about a third of the time-loss in 1943, resulted in only 66,000 lost days in 1944; while time loss caused by strikes over various union questions (including closed or union shop and check-off) increased from 266,000 to 357,000 days. This loss was almost entirely accounted for, however, by two strikes (at Ford Motor Company and Halifax Shipyards) where the time-loss was over 300,000 days; and the actual number of strikes over union questions dropped from 75 to 34. Strikes over union recognition dropped sharply (from 139,000 lost days to 3,000) indicating a general compliance on the part of workers and management with the procedure for union certification and collective bargaining established under the Wartime Labour Relations Regulations during 1944.

Cost of living index unchanged

The Dominion Bureau of Statistics cost of living index, on the base 1935-1939=100, remained unchanged at 118.6 between January 2 and February 1, 1945. Increases in the foods and homefurnishings and services sub-groups were balanced by declines in the fuel and light and clothing sections. For foods a gain of 0.4 to 130.6 was due to higher prices for fresh vegetables and certain fruits and meats which outweighed continued weakness in eggs.

In the homefurnishings and services section an index increase of 0.1 to 118.4 reflected scattered increases in the furniture and floor coverings section. Fuel and light recorded a sharp drop to 107.4 from 109.1 due to further rebates in electricity bills coupled with a rate reduction in Toronto.

Clothing, the only other group to register a change, eased 0.1 to 121.7, reflecting lower prices for women's wear and piece goods which outweighed strength in footwear. Rentals at an index level of 112 and miscellaneous items at 109.2 remained unchanged.

After adjustment to the base August, 1939, as 100 the index was 117.7 at February 1. The wartime increase has been 17.7 per cent.

Catholic syndicates represented on advisory committee

The President of the Canadian and Catholic Confederation of Workers, Mr. Alfred Charpentier, was recently added to the membership of the Advisory Committee of the Industrial Production Co-operation Board.

The Advisory Committee which is made up of representatives from trade union and employers' organizations, and officers of the Department of Labour, acts in a consulting and an advisory capacity to the members of the Industrial Production Co-operation Board. The Board consists of officers of the Departments of Labour and Munitions and Supply, and promotes the formation of labour-management committees in industry.

Other labour representatives on the Advisory Committee are Pat Conroy, Secretary-Treasurer, Canadian Congress of Labour, and Percy Bengough, President, Trades and Labour Congress of Canada.

Employers' representatives on the Committee are J. Clark Reilly, Canadian Construction Association and C. Willis George, Canadian Manufacturers' Association.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

In conformity with the movement invariably indicated at the year-end holiday season in the period since 1920, indus-

trial employment showed an exceedingly marked contraction at the beginning of January. The percentage loss in employment, however, was rather smaller than in the years prior to the outbreak of war. The index of industrial employment declined from 185.7 at the previous month to 180.4 at January 1, as

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price \$1.00 per year.

† Week ended February 22, 1945.

(1) Base 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public at the end of the preceding month. (7) Figures for four weeks ended February 24, 1945, and corresponding previous periods. (8) Maclean's Building Review

compared with 185.7 at January 1, 1944, and 183.7 at January 1, 1943.

The reduction in employment, at the date under review, was accompanied by a relatively larger shrinkage in the indicated salaries and wages; the very general observance of Boxing Day as a holiday following Christmas, the loss of working time due to increased absenteeism, lessened overtime work, combined with the reductions associated with lowered employment, affected extremely the disbursements made on or about January 1 for services rendered in the week preceding.

The 15,042 establishments reporting to the Bureau showed a total working force of 1,834,450, which was 2.9 per cent less than at December 1. The total weekly wages and salaries paid to these employees decreased from the previous month by 9.2 per cent to \$55,207,831 at January 1. The per capita weekly earnings declined from \$32.19 at December 1 to \$30.10 at the date under review.

At the recent meeting in London of the Governing Body of the International Labour Office, a resolution was passed affirming the desire of the I.L.O. for association with the general world security organization contemplated as a result of the conversations at Dumbarton Oaks and Yalta.

The resolution emanated from the Special Committee on Constitutional Questions which met under the chairmanship of Mr. Paul Martin, K.C., M.P., Canadian Government Delegate. It placed the I.L.O. in favour of association with the general international organization "on terms which will permit the International Labour Organization, with its tripartite character, to make its best contribution to the general effort of the organization of international machinery for the better ordering of a peaceful and prosperous world while retaining for the International Labour Organization the authority essential for the discharge of its responsibilities under its Constitution and the Declaration of Philadelphia."

Two resolutions were proposed by Canadian delegates. Mr. Martin suggested a plan for constituent states or provinces of a federal state to send representatives to accompany the official delegations to sessions of the Conference. This was favourably reported on and referred to the Standing Orders Committee.

Mr. Percy Bengough, workers' delegate, moved that the standing orders be amended so that any provincial government may ratify I.L.O. conventions on behalf of that province only. This amendment would apply to a

situation where the subject matter of a convention came within provincial rather than dominion jurisdiction. Owing to lack of time at the meeting action on this resolution was deferred.

A further account of the proceedings at the meeting will appear in a forthcoming issue of the LABOUR GAZETTE.

A recent *Reasons for Judgment* issued by the Wartime Labour Relations Board (National) sets down a procedure for dealing with applications by unions for certification. The judgment dealt with two cases (appealed from the Ontario Regional Board) where votes had been taken in which the applicant union had received a majority of the votes cast but not a majority of the eligible voters. The Ontario Board had directed a run-off vote, but the National Board set aside this direction, and rejected the applications for certification.

The Board then outlined a procedure designed to obviate future difficulties in dealing with applications by unions.

In future, an officer of the Board will examine membership records of the applicant union and check with the company's payroll. Unless the Board is satisfied that a majority of the employees are union members, the application will be rejected.

If a "substantial majority" are found to be union members, certification will be granted without a vote.

If, however, the majority is not substantial, or if an important section consists of employees who are not regular, dues-paying members of the union but who have signed requests that the union act on their behalf, the Board will "in most cases, on the application of the employer," direct a vote.

The Board will not include in the ballot the name of any competing union, except in such a rare instance as when a number of employees are members of both unions and thus both unions have evidence to indicate that they represent the majority of employees.

If the applicant union fails to secure a majority vote, another organization may then apply.

When this procedure has been followed and an application is rejected, a new application by the same union will not be entertained until a period of at least six months has elapsed.

The full text of this *Reasons for Judgment* appears on page 290 of this issue.

Status of professional employees under Labour Relations Order Hon. Humphrey Mitchell, Minister of Labour, announced on February 13 that the Wartime Labour Relations Board (National) had submitted a recommendation that the Wartime Labour Relations Regulations be applied for a further six months at least, to employees described as professional or scientific personnel.

In recommending that the Regulations be continued as applying to professional workers for the present, the Board proposes to subdivide bargaining units so that employees engaged in a professional capacity may elect or appoint (as the case may be) bargaining representatives on their own behalf in a proper case. It is felt by the Board that this course will give professional employees an opportunity to acquire some experience in collective bargaining, if they so desire, and when they have this experience they will be in a position to decide as to what kind of collective bargaining they want.

The Board promises to review further the application of the Regulations to professional workers after the lapse of this six-month period.

(The Wartime Labour Relations Regulations cover professional and scientific employees, in the same manner as other employees, safeguarding the right to organize, and giving organizations consisting of this type of employee the right to apply for the naming of bargaining representatives to negotiate with employers in regard to their working conditions. Professional or scientific employees who have authority to engage or discharge other employees, are not covered by the Regulations, however.)

On January 9, 1945, the National Board had heard representations from a number of organizations representing professional workers, in which the Board was asked to recommend the enactment of a new Order in Council, applicable exclusively to professional employees (L.G., Jan., 1945, p. 2). Professional organizations making representations to the Board at the time included the American Institute of Electrical Engineers, the Chemical Institute of Canada, the Canadian Society of Forest Engineers, the Royal Architectural Institute of Canada, the Association of Professional Engineers of Manitoba, the Ontario Architects' Association, the Institute of Radio Engineers, and other organizations.

Any change in the present Regulations was opposed by representatives of the Canadian Manufacturers' Association, the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Canadian Association

of Technical Employees, and the Canadian Association of Scientific Workers.

During the hearings a representative of the Canadian Universities objected to collective bargaining for University professors.

In the report, now filed with the Minister of Labour, the Board points out that the cost of a new National Board and the necessary Provincial Boards to deal with professional employees separately, would be substantial, and that the proposal to include professional employees who influence the hiring or discharging of scientific personnel would not work out satisfactorily.

The present report of the National Board to the Minister is unanimous.

Meeting of Vocational Training Advisory Council The Vocational Training Advisory Council met in Ottawa on Tuesday, March 6, for a 3-day session.

Dr. G. F. McNally, Deputy Minister of Education for Alberta, who is chairman of the Council, presided. The Council consists of officers of Provincial Governments in charge of vocational training; of representatives of trade unions and of employers; of the Canadian Legion and of women's organizations; and officers of the Department of Labour.

The agenda included the following topics: training of ex-service personnel; training of women; training of war workers; apprentice training; assistance to vocational schools; youth training and employment; and training of supervisors.

Meetings were addressed by several officers of the Dominion Department of Labour including R. F. Thompson, Director of Training and J. H. Doige, Assistant Director. Other speakers included C. C. White, Veterans Land Act Administrator; A. W. Crawford, Director of Training, Department of Veterans Affairs; E. R. Complin, Canadian Industries Limited, Montreal; F. S. Rutherford, Director of Vocational Education, Toronto; and Lt.-Col. Fairey, Director of Vocational Education, Victoria, B.C.

An account of the proceedings will appear in next month's *LABOUR GAZETTE*.

Additional wartime day nurseries in Ontario Recent approval by the Hon. Humphrey Mitchell, Minister of Labour, of three new wartime day nurseries, brings to 27 the total number of such units in operation in Ontario under Dominion-provincial agreement.

Under an agreement between the Government of Ontario and the Dominion Depart-

ment of Labour, facilities have been set up for the daytime care of children of women war workers, thus making it possible for these women to take part in essential war work (L.G., Feb. 1943, p. 175).

Toronto will have a total of 19 wartime day nurseries, and Hamilton will have 3 when the new units are completed. There are also two in Brantford, and one each in Oshawa, St. Catharines and Galt.

In Quebec, the only other province having wartime day nurseries under Dominion-provincial agreement, five units are in operation.

Reinstatement of school teachers A note of warning that school boards must be prepared to reinstate any of their teachers who have been serving with the

Armed Services, was sounded recently by Hon. Humphrey Mitchell, Minister of Labour, in a statement issued to the press.

"In a few cases which have come to the notice of the Department of Labour," the Minister said, "it appears that some school boards have got into difficulties by forgetting that the Reinstatement in Civil Employment Act requires them to reinstate their teachers after discharge from the Armed Services just as other employees must be reinstated. School boards should protect themselves when engaging substitutes to replace teachers who have gone into the Armed Services, by inserting a clause in the contract that the engagement of the substitute may be terminated after the return of the teacher from the Forces."

The Minister said that some school boards have taken the necessary precautions, and that so far cases where difficulties have arisen are not numerous. He expressed the hope that all boards would make the necessary provision in engaging teachers as replacements for those with the Services.

"Boards might well consult with the Employment and Selective Service Offices, which administer the Reinstatement in Civil Employment Act," the Minister added.

Report of Dominion Department of Labour The report of the Deputy Minister of Labour for the fiscal year ending March 31, 1944, has been issued. In the interest of economy the report has been made as brief as possible. It contains a succinct historical account of both the peacetime and wartime functions of the Department and reviews the administrative work for the year in connection with National Registration; National Selective Service operations; Industrial Relations (including the application of the Conciliation and Labour Act, the Industrial Disputes

Investigation Act and Statistics with respect to strikes and lockouts); the Wartime Labour Relations Board; the Industrial Production Co-operation Board; training activities under the Vocational Training Co-ordination Act; fair wages policy; the Unemployment Insurance Commission; the Reinstatement in Civil Employment Act; Japanese affairs; relief legislation; Government Annuities Act; National War Labour Board; International Labour Organization; and such special services as the LABOUR GAZETTE, the Information Division and Labour Legislation. The report of the Commissioner, Combines Investigation Act, is included as an appendix.

British Disabled Persons (Employment) Act

It is stated in the *Ministry of Labour Gazette* for January that the main purposes of the Disabled Persons (Employment) Act, which was passed in March, 1944, are: (1) to promote and facilitate the rehabilitation and training for employment of persons handicapped by injury, disease or congenital deformity; and (2) to enable such disabled persons to obtain employment or undertake work on their own account.

Certain sections of the Act were brought into operation by Order in Council in August, 1944, including those dealing with the provision of vocational training and rehabilitation courses. Other sections dealing with the registration of disabled persons, the obligation on employers to employ a quota of disabled persons and the appropriation of vacancies in designated classes of employment to persons registered as disabled, were to be applied at a later opportune date. It is expected this date will be advanced considerably since the creation of a National Advisory Council under the Act, by the Minister of Labour and National Service. The functions of the Council will be to advise and assist in matters relating to the training and employment of disabled persons.

Rival U.S. telegraph unions agree to uphold majority rule

An agreement between rival unions to avoid inter-union disputes was secured by the U.S. National Labour Relations Board following elections among employees of the Western Union Telegraph Co. A.F.L. unions won elections in six bargaining units and C.I.O. unions in one unit. Before the merger of the Western Union and Postal Telegraph companies, A.F.L. unions had bargained for most of the employees of the Western Union, while C.I.O. unions had bargained for most of Postal Telegraph employees and in

several large cities for Western Union employees.

The National Labour Relations Board considered that in these circumstances and in view of the warmly contested elections, inter-union disputes might arise which would hamper the operation of the nationally important telegraph industry. It therefore sought an undertaking by the unions to prevent such disputes.

The unions agreed that each, with respect to the unit or units for which it was certified, would

- (1) Represent all employees within such unit fully and fairly as their collective bargaining agent;
- (2) Admit all employees within such unit to membership without discrimination by reason of prior membership or activity in another union, or because of former employment by another company;
- (3) In any unit in which it lost the election, recognize the right of a majority union to represent all employees in such unit for collective bargaining purposes and not attempt to bargain with the company as a separate minority.

The Board, in its announcement of the agreement, remarks:

"Good sportsmanship and good sense, as well as good labour relations, require that these minorities fuse themselves for the duration of the certification with the majorities and work with them for the establishment of conditions which are favourable to the entire group."

Veterans' protection clauses applied in United States

It is stated in *Business Week* of February 17, that provisions in union agreements to protect the rights of veterans have received initial application in two

recent cases involving the United Automobile Workers and the United Electrical Workers, both C.I.O. Unions.

In the former case, when some 5,000 workers were slated for lay-off because of a cutback order, 500 veterans employed by a leading automobile manufacturing company in Detroit were granted sufficient seniority to stay on the job. In the latter case, that of an electric company in St. Louis, the company had to pay \$2,000 to 29 veterans, re-employed at their old jobs, who were entitled under the union agreement to receive the benefit of wage increases granted for workers on similar jobs during the absence of the veterans on active service. The company's attempt to re-employ the veterans at their former rates of pay was protested by the union and was settled through the grievance procedure provided in the collective agreement.

Trends in child labour legislation in U.S.A.

A 16-year minimum age for employment is proposed by the Children's Bureau of the United States Department of Labour for 1945 legislative action by the

States, following recommendations which were adopted in March, 1944, by the National Commission on Children in Wartime. The proposal has been approved by the Children's Bureau General Advisory Committee on Protection of Young Workers and by the Committee on Plans for Children and Youth of the National Commission. The date when the new laws become effective might be deferred to avoid any objection to raising the minimum age during the war and to allow employers time to make necessary readjustments.

A recommendation for a basic minimum age of 16 for employment was made by the 1940 White House Conference on Children in a Democracy, as well as by the earlier 1930 Conference on Child Health and Protection. The International Association of Governmental Labour Officials recommends as one of the basic standards for State child-labour legislation, a 16-year minimum age for all employment during school hours and for factory work at any time. The National Conference on Labour Legislation has recommended revision of State child-labour laws to provide a basic 16-year minimum age for employment. Thirty-three States have a basic minimum age of less than 16 for employment during school hours.

While young people have contributed greatly to the war effort, the Children's Bureau believes that this contribution has been made at the expense of their education. It has therefore become of urgent importance to reduce the employment of persons under 18 in order to give these young people the opportunity to develop both physically and mentally to their fullest capacity and to lessen the impact of unemployment in the reconversion period by delaying the entrance of young people into jobs.

It is recommended, as a first step, that State laws be amended to provide that no minor under 16 shall be permitted to work during school hours, and that no minor under 16 shall be permitted to work in connection with any manufacturing or mechanical establishment. The federal Fair Labour Standards Act, 1938, fixes a minimum age of 16 for persons engaged in producing goods for shipment in interstate or foreign commerce. This is as far as Congress can go in establishing a minimum age for employment in industry. The State legislation recommended would fill, in part, the gap left by the federal statute.

In April, 1944, nearly 3,000,000 children between 14 and 17—three times as many as were at work at the time of the Census in March, 1940—were working full or part-time. Nearly a million—almost one out of every five—were between 14 and 15. During the last six months of 1943, 3,667 minors in 1,314 establishments were found to be illegally employed under the Fair Labour Standards Act—over twice as many minors and establishments as were found to be employed illegally in the entire year ended June 30, 1941. In the school year 1943-44, a million fewer pupils were enrolled in high schools than in the school year 1940-41, as a result of increased employment.

The Bureau considers that attention should also be given to improving the work standards outside school hours, strengthening or extending other State laws, regulating hours of work, protecting young persons from night work and hazardous occupations, requiring employment or age-certificates, and other administrative provisions for the adequate enforcement of the law.

World Trade Union Conference

Convened at the instance of the British Trades Union Congress, the World Trade Union Conference met in London, England, from

February 6 to 16. According to press despatches, it was estimated that the delegates represented over fifty million workers in more than forty countries. Representatives of the Trades and Labour Congress of Canada and the Canadian Congress of Labour attended the Conference (L.G., Jan., 1945, p. 1).

Among the subjects on the first week's agenda were the furtherance of the Allied war effort, the attitude to be taken by organized labour with respect to peace terms and the general organizations of the world after the war and the representation of organized labour at the Peace Conference and on commissions for relief, rehabilitation and post-war reconstruction.

Delegates from neutral countries shared in the discussions during the second week when the basis of a world federation of trade unions was under review. A "continuation committee" was set up to prepare the groundwork for the new organization and the report to a subsequent conference to be held late in the summer. This committee, according to the *New York Times* of February 21, later named "a policy-making or administrative committee of thirteen members to meet in Washington in April and work out a program of labour peace and post-war objectives for the meeting of the United Nations in San Francisco on April 25."

A summary of the proceedings of the Conference will be published in a forthcoming issue of the *LABOUR GAZETTE*.

Australian opinion regarding fatigue in industry

Avoidance of fatigue in industry is discussed by an Australian Medical Officer of Health in the January issue of "Accident Prevention Bulletin", published by the Factory Welfare Board in association with the Departmental Factory Inspectorate and the Standing Committee for the Prevention of Accidents, Sydney, Australia.

At the outset, the officer pointed out that the experience of Great Britain in increasing hours of work had but a brief period of success in increasing production, which was soon "completely wiped out by an ever-increasing diminishment in production." It was clearly demonstrated that both mental and physical fatigue resulting from too long working hours, were primary factors in the decline. It was necessary therefore, to determine maximum hours of work. During each day, short rest periods were also considered necessary and a regular rest at the week-end to give the worker "a chance to break the regular routine of every-day work and achieve a refreshing outlook on life." At the week-end break the aim should be towards recreation in the open air. Long periods of daily travel to and from home and factory were mentioned as another factor contributing to fatigue and it was suggested that in the post-war reconstruction period careful thought should be given to the zoning of new homes near the place of work, with community centres giving all the necessary means of social intercourse and health benefits.

It was also suggested that management might accomplish much by preventing the onset of "such malign influences as irritation which is one of the products of fatigue." Factories should be well lighted, as "tired eyes are a very real cause of fatigue, poor workmanship and output. Attention must be given to ventilation in the factories, for where air change is poor, workers rapidly tire." Another cause of fatigue referred to is boredom brought on by monotony. It is asserted that this can be successfully countered where "the management is keenly interested in both workers and in everything that would help to produce good work."

Workers on their part were urged to observe the laws of physical and mental health. It was essential that the importance of personal cleanliness should be recognized, as many disabling diseases are brought about where this is disregarded.

In conclusion, the report urges the employment of qualified medical men in all large factories, so as to safeguard workers and as "a real means towards maintaining production."

Reconstruction

Survey of Post-War Intentions of Workers

A SURVEY to determine the post-war intentions of Canadian workers is being carried on by the Research and Statistics Branch, Department of Labour. Information obtained from this survey will supplement that obtained from the survey of employers last year (L.G., July, 1944, p. 815.)

To aid the government in planning for post-war employment, quantitative information on both aspects of the post-war labour market is needed:

(1) *Demand*—the number of workers for whom employers expect to have jobs after the war

(2) *Supply*—the number of workers that intend to remain in the labour force after the war.

The first need is being filled by the Post-War Employment Survey of employers. It is to fill the latter gap that the present Post-War Intentions Survey has been undertaken.

This survey will provide answers to such questions as:

- (a) How many married women, now working, intend to return to their homes?
- (b) Do the youths, who have been drawn into the labour force, intend to return to school?
- (c) Will there be a "back to the farm" movement?
- (d) Will there be many people wanting to start their own business?
- (e) What are the intentions and hopes of "war workers"?
- (f) Do the older men who are now working, intend to retire after the war?

Information on these questions will be of great significance for post-war planning.

The procedure of the survey will be to mail a questionnaire to a 2½ per cent sample (about 65,000 workers) of the insured population. This sample will be picked completely at random from the registration cards for 1944 of the Unemployment Insurance Commission. These people will be queried as to their intentions concerning place of residence and type of activity one year after Germany surrenders. These intentions will then be analyzed in the light of their present place of residence and their present type of activity. This is information which can be obtained from the unemployment insurance cards.

However, to interpret post-war movement of this nature, it is necessary to know where these same people were living and what they were doing at or near the beginning of the war. This information will be secured from each person's 1940 National Registration card.

Thus, for each of approximately 65,000 people, information will be available as to their place of residence and type of activity in 1940, in 1944, and "one year after Germany surrenders." This data, when analyzed by age group, sex and marital status, will be the source of some very valuable information. It will enable, for instance, some prediction to be made on the extent and nature of post-war "counter movement" in relation to that which occurred during the war. It will also enable some prediction to be made on the numbers that will be seeking employment after the war. This will be most significant data when viewed in relation to the numbers that employers expect to hire.

Departmental Committee on Post-War Training

A COMMITTEE has been set up in the Department of Labour to bring about close co-ordination between the post-war training of veterans and their placement in employment. The committee will also develop plans whereby any workers displaced from war work could be trained for other occupations, and work out arrangements with the Unemployment Insurance Commission to provide training for

men and women while they are in receipt of unemployment insurance benefit in order that they would be fitted for new jobs.

L. E. Westman, one of the Associate Directors of National Selective Service, has been appointed Chairman of the Committee, and Mrs. Rex Eaton, Associate Director of National Selective Service in charge of the Women's Division, has been named Vice-Chair-

man. Other members of the Committee are R. J. Tallon, member of the Unemployment Insurance Commission; R. F. Thompson, Director of the Vocational Training Branch, Labour Department; and Group Captain Byron F. Wood, Assistant to the Deputy Minister to look after Labour Department matters affecting placement of veterans.

Miss M. Grier, of the Labour Department, has been named Secretary to the Committee.

The Committee will report to Arthur MacNamara, Deputy Minister of Labour.

In addition to studying the possibilities of post-war training of men and women now in war jobs, the Committee will also go into the

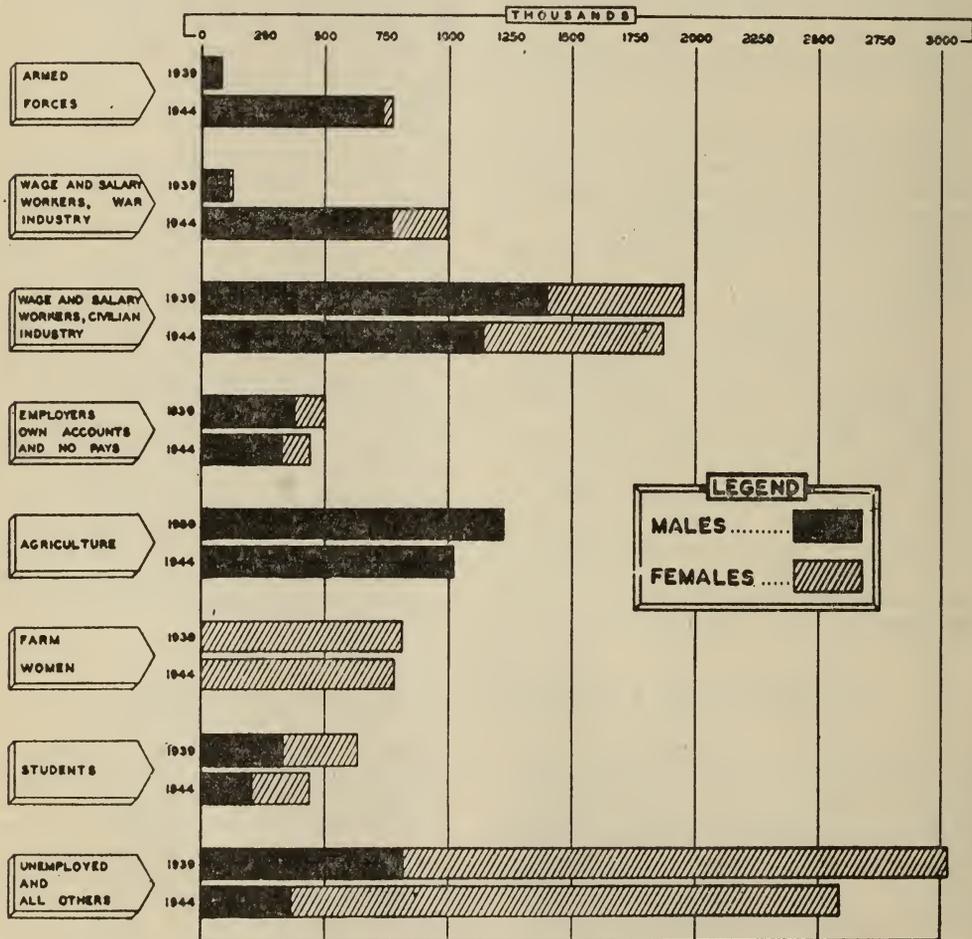

question of post-war participation of the Employment Service in training procedures.

It is pointed out that one of the "statutory conditions" attaching to the receipt of unemployment insurance benefit is that any insurable worker while receiving benefit must be prepared to undertake a course of training to fit him to accept employment, if required to pursue a course by direction of the Unemployment Insurance Commission.

An interdepartmental committee, of which Arthur MacNamara, Deputy Minister of Labour, is chairman, is already dealing with the subject of vocational training in reference to ex-members of the Armed Services.

ESTIMATED MANPOWER DISTRIBUTION IN CANADA
(14 years of age and over)

October 1, 1939 and October 1, 1944

Manpower

Canadian Manpower Situation at Close of 1944

THE Canadian manpower situation was considerably easier at the close of the year 1944 than at June 15, the peak date of demand for the year. At that latter date there was a labour shortage of approximately 134,000 workers for high priority industries exclusive of agriculture. By the end of the year demand for industrial workers in high priority industries had declined by about 56,000. In Ontario, where there is a heavy concentration of war industry, the labour situation was particularly acute at the peak date, but by December, the labour demand in high priority industries exclusive of agriculture was less than half the peak requirements. Cut-backs in the aircraft and ship-building programs with accompanying lay-offs were largely responsible for the easing of the manpower situation, together with the employment in other essential industry of more than 62,000 farmers on temporary permits to leave agriculture for the winter months. The logging industry has benefited particularly from the latter arrangement and as a result a much larger cut than last year is in prospect.

Manpower controls now in effect will in all probability be retained in 1945. A moderate upswing in labour demand may be anticipated early in April when the farmers will be returning to agriculture on the expiration of their temporary permits. About this time, also, retooling will have been completed in war plants for the large contracts placed in Canada by the United States Government late in 1944. These programs will call for additional employment of an estimated 12,000 persons for the manufacture of small arms ammunition, heavy ammunition cases, mortar shells and other urgently needed war supplies.

Distribution of Manpower, 1939-1944

The accompanying table and chart shows comparative estimates of the distribution of Canada's manpower from October 1, 1939, to October 1, 1944. During the five years of war there has been a natural increase of 572,000 in the population of Canada 14 years of age and over. It is estimated that at October 1, 1944, of the total 8,904,000 persons in that age group, 5,095,000 (exclusive of farm women) were in the Armed Forces or gainfully occupied, an increase of 1,232,000 from October 1,

1939, and of 66,000 from the corresponding date in 1943. Total employment in war industry reached a peak of 1,166,000 at October 1, 1943. Since that date there has been an estimated decrease of 172,000 wage and salary workers in war industry. These workers have been absorbed in other industry (excluding agriculture) where employment rose by an estimated 174,000 during the year ended October 1, 1944. There was an increase of 24,000 in the total strength of the Armed Forces during the year, and an additional 17,000 women, not including farm women, were drawn into the labour force.

The total female population in Canada, 14 years of age and over, was estimated to be 4,349,000 at October 1, 1944. Of these, an estimated 1,114,000 were in the Armed Services or gainfully occupied in industry other than agriculture. At that date 229,000 women were employed in war industry, 37,000 women had entered the Armed Services, and female employment in civilian industry had expanded by 174,000 or over 30 per cent from October 1, 1939, to total 737,000 at October 1, 1944.

In spite of an estimated decrease of 200,000 in the number of males employed in agriculture since the outbreak of war, the effective handling of a considerably larger volume of agricultural production in 1944 than in 1939 was accomplished by close co-operation between local farm committees, provincial governments and National Selective Service officials. Additional farm help was secured by granting special leave to members of the Armed Forces and the employment on farms of prisoners-of-war, Japanese internees and conscientious objectors. Also, more effective use was made of the available manpower by large scale movements of farm labour from areas where the harvest was completed to more critical areas. Since fewer men will be available from the Armed Services for farm work in 1945, it is expected that unless drastic reductions take place in military requirements, the farm labour situation will be more difficult to cope with in the coming season than in 1944.

War employment had reached its peak on October 1, 1943, when 1,166,000 persons, 13.3 per cent of the total population 14 years of age and over, were employed either directly or indirectly on war work. By October 1, 1944,

ESTIMATED MANPOWER DISTRIBUTION IN CANADA
14 YEARS OF AGE AND OVER
(In Thousands)

Population Class	October 1, 1939			October 1, 1941			October 1, 1943			October 1, 1944

V. All Others—includes homemakers not on farms.....	179	2,193	2,372	332	2,163	2,495	330	2,196	2,526

NOTE.—The above estimates are based on the most recent information obtainable from the Dominion Bureau of Statistics and other official sources. Very little statistical information is available for domestic servants, agricultural males, farm women, and employers, own accounts and no pays. In these cases the estimates are subject to a possibility of considerable error, especially for dates furthest from the date of the Decennial Census (June 2, 1941).

(i) Includes prisoners of war and persons missing but still on strength. Excludes persons enlisted but on leave and engaged in civilian occupations.

(ii) Does not include women gainfully occupied on farms or in farm homes, who are included in Item II. Does not include wage and salary workers who are temporarily unemployed owing to "No job" or "Lay-off."

(iii) Includes employment on direct and indirect war production and construction, and the war contract of employment in ancillary industries.

(iv) Own accounts are persons who carry on their business without assistance of employees. "No pays" are mainly family workers receiving no fixed money payment.

(v) Since it is impossible to measure statistically the amount of farm work done by women, all women residing on farms are here included except students, women 65 years of age and over and those gainfully occupied outside the farm.

(vi) In 1943 and 1944 the number of unemployed was accounted for almost entirely by persons temporarily out of work while moving from one job to another.

total war employment had dropped to 994,000 persons of whom 695,000 were engaged in war manufacturing. This represented a drop of 16.6 per cent in war manufacturing from the peak date when it stood at 834,000. Sixty-six per cent of all persons engaged in manufacturing were on war work at October 1, 1943, whereas one year later the proportion had dropped to 57 per cent. This decline in war manufacturing was mainly due to lay-offs caused by the tapering off of aircraft and

shipbuilding programs. Employment in these two industries will probably remain at present levels but further declines in other war manufacturing employment are anticipated in the coming months. These declines, however, are likely to be more moderate than during the last quarter of 1944, due to recent expansion in production schedules for chemicals and explosives, heavy guns and ammunition, small arms ammunition, armoured fighting vehicles and rubber tires.

Recent Manpower Orders

Two Orders in Council relating to the manpower situation in Canada were made during February.

Medical Examination of Naval and Air Force Personnel.—An order of February 13 (P.C. 944) provides that members of the Canadian Naval or Air Force on active service who are about to be discharged are to have a medical examination before their discharge to ascertain whether they are fit for training in the Army.

Provision had previously been made for the service of "Order-Military Training" on such men.

The Order amends the National Selective Service Mobilization Regulations.

Transportation of Agricultural Workers.—To facilitate the placement of agricultural workers in high priority industry during the season when they are not required on farms, authorization has been made (P.C. 692, Feb. 1) for the payment of travelling expenses of a worker who agrees to accept transfer.

Assistance of Soldier Workers Under Farm Duty Plan

REFERENCE was made in the December LABOUR GAZETTE (p. 1461) to farm labour provided by the Armed Forces during 1944. Mr. A. MacNamara, Director of National Selective Service, recently paid particular tribute to the contribution of soldiers under the Farm Duty Plan, by means of which soldiers worked more than 80,000 man days on Canadian farms from coast to coast and played an important part in helping to harvest crops during the summer and fall of 1944.

Under the Farm Duty Plan—an agreement between the Dominion Departments of Labour and National Defence and the Provincial Departments of Agriculture—more than 3,000 soldiers each worked an average of approximately 25 days between July and November. These men helped with haying and harvesting in Eastern Canada; potato and apple picking in the Maritimes; tobacco and fruit harvesting and food processing in Ontario; grain harvesting on the Prairies; and general farming in British Columbia.

Officers in charge report the following total number of soldiers employed in each province during the harvest season:

Prince Edward Island	186
Nova Scotia	738
New Brunswick	436
Quebec	65
Ontario	856
Manitoba	523
Saskatchewan	797
Alberta	322
British Columbia	159

The soldier-workers were employed by farmers on a contract basis at fixed wage rates. Each man was allowed to keep his earnings—except in Western Ontario, where tobacco pickers paid part of their wages, amounting to more than \$27,000, to the Red Cross.

Reports from provincial officers in charge of the program expressed high commendation for the quality of work done by the soldiers. It was stated that in many areas crops could not have been harvested without their help.

The contribution made by soldiers detailed to farms under the Farm Duty Plan is distinct from the work done by members of the Armed Forces who were granted compassionate leave to assist in harvest work on their own or their parents' farms during emergency periods.

Manpower Policy in Great Britain After Defeat of Germany

GR^{EAT} Britain has supplemented its program for full employment after the war (L.G., Aug., 1944, p. 942) with a plan for the orderly release of workers from munitions factories and their placement in civilian industry.

Like the plan for the demobilization of members of the Armed Forces (L.G., Nov., 1944, p. 1311), the present scheme which is contained in a White Paper,¹ applies primarily to an anticipated interim period between the defeat of Germany and the defeat of Japan.

This period, it is expected, will be one of continued labour shortages, since Britain will continue its war effort while at the same time attempting to make a start on civilian production. Manpower controls will, therefore, be continued. Men aged 18 to 27 will continue to be liable to call-up for the Armed Forces, in order to enable some of those now in the Forces with long military service to return to their homes. Young men not required for the Forces will be subject to employment transfer, in accordance with labour needs in essential industry. Women will continue to register, but will not be called up. They may volunteer, however, and will still be subject to employment transfer (though girls under 19 will not be sent away from home).

In spite of the need for continuing these controls, the Government intends to mitigate their severity to some extent, and to "pay such regard as is possible to the natural desires of workers to seek work where they please and of employers to engage labour freely." Controls will be continued also over industry, and the allocation of raw materials and labour will be planned so as to ensure that the efforts of industry are concentrated not on the production of luxuries, but

first upon those munitions required for the Armed Forces, and, second, upon those products which are most important to national recovery and to an improvement in the standards not of those people who can pay the highest prices but of the community as a whole.

Release from War Work

Release of workers from war industry will be based on the principle that certain classes of workers have special claims for priority or release, immediately after the end of the war in Europe. The following will be given permission to leave industry altogether if they wish, regardless of the importance of the production on which they are engaged:—

¹ *Re-Allocation of Manpower between Civilian Employments during any Interim Period between the Defeat of Germany and the Defeat of Japan*: London, H.M. Stationery Office, 1944.

(1) Women (married or single) with household responsibilities and women wishing

to join their husbands on release from the Forces.

- (2) Women over 60.
- (3) Men over 65.

In addition, women over 50 will be given permission to leave their jobs and retire unless there are strong production reasons to the contrary.

Workers who have worked away from home for three years or more and who want to obtain jobs near home will be given priority of release, for transfer to work of importance.

If, following the release of these priority classes in any company, there is still a surplus of workers, the order of discharge will be as follows:—

- (1) Men aged 18-27 for call-up to the Forces.
- (2) Workers needed for priority vacancies elsewhere including skilled and experienced workers needed for the re-establishment of civilian industries.
- (3) Those who have been away from home less than three years but more than one, in order of their length of absence from home.
- (4) Other releases in accordance with current practice, e.g., as determined by industrial agreements.

The Paper states that consultation and co-operation with workers and employers will be needed in the working of the scheme.

Release from Armed Forces

As noted in the White Paper on Demobilization, members of the Armed Forces are being released in two classes: A, in accordance with age and length of service, and B, those with special skills needed in industry.

Men and women in Class A will not be subject to labour controls during their period of paid leave (8 weeks, plus additional time for men with foreign service), during which they may seek reinstatement in their former employment or find such other work as they wish. Following this period, however, they will become subject to the controls and if they are still unemployed or become unemployed they will be placed in work in accordance with existing priorities.

Those released in Class B may move from one job to another within their particular employment, but if they leave the employment they will be directed back to the Forces.

In the case of disabled persons, the report states, the primary object will be to find them employment which will result in their satisfactory and, so far as possible, permanent resettlement in employment of the kind they wish to follow. They will not be required to take, or to remain in, employment on the grounds of its immediate importance if this does not also serve towards their permanent resettlement.

Family Allowances in Canada

Registration Now in Progress—Payments to Commence in July

FIRST cash payments under the Family Allowances Act, passed in August, 1944, will be made this July and registration for the allowances is being held throughout Canada after March 15.

All children under sixteen years of age are eligible for an allowance. This includes Indians and Eskimos. All children must have been born in Canada or have lived here for three consecutive years. Children of members of the three armed services are eligible even though born out of the country. For instance, a Canadian soldier's child born overseas will be eligible for an allowance as soon as it arrives in Canada.

There is a further important clause in the eligibility regulations. The allowance is not payable to a child who, being above the age of six years and physically fit to attend school, fails to do so or to receive equivalent training.

Allowances which are tax free will be made monthly as follows:

Children under 6 years of age—	\$5 a month
Children from 6 to 9 years of age—	\$6 a month
Children from 10 to 12 years of age—	
	\$7 a month
Children from 13 to 15 years of age—	
	\$8 a month

The allowances are reduced after the fourth child, because clothing, school books and other equipment can be used again by the younger children in the family. There will be a reduction of one dollar for the fifth child, two for the sixth and seventh child, and three dollars for each additional child.

Registration forms will be delivered through the Post Office after March 15 to every household, and an illustrated sheet for guidance and a return envelope will accompany the form. If for some reason a registration form is not received, it can be obtained at the local Post Office. These forms will then be mailed back to the regional office which is being established in each provincial capital. There they will be sorted and listed.

Although it is not necessary to send in birth certificates with registration forms, births reported on the forms will be checked against provincial records, so that parents who have omitted to register the births of their children are advised to do so immediately.

P.E.I. Proving Ground

The first registration for family allowances was held in Prince Edward Island. As the smallest province in Canada, it was deemed a good proving ground on which to test the registration administration. The provincial officials gave excellent co-operation and within the first month 95 per cent of all families had registered.

An examination of the Prince Edward Island forms makes apparent the usefulness of the information collected through the registration. For instance, it was shown that 550 children, over six years of age, were not attending school. The reasons were given as follows:

(a) No teacher, no school.....	73
(b) Helping or working at home or elsewhere	209
(c) School too far, weather, bad roads.....	69
(d) Helping on farm.....	91
(e) Can't afford, no clothing.....	26
(f) Can't learn, doesn't like, won't go, etc.	44
(g) Others	38

550

The Family Allowances Act was passed for the purpose of giving the children of Canada a greater degree of equal opportunity. As wages are not based on the number of children a woman or man has, but on work done, a single man and a man with five children must often make the same sized pay cheque meet very different needs. In the higher income brackets, the man with children is assisted to meet his family's costs by income tax reductions, but in the income group below the income tax level no allowance is made for children.

The Act is so designed that no one can benefit by both income tax deductions and family allowances. Income tax payers have the option of applying for the family allowance, but they must deduct the allowance from their income tax exemption. No one can say in advance, however, whether or not he will benefit from family allowance, as incomes may change during the course of a year. It is suggested that anyone who is uncertain whether or not he will benefit from family allowances more than from tax exemptions should register for the allowance and in this way be on the safe side.

Distribution by Provinces

Federal tax monies will be distributed among the provinces as follows:

	Total Federal Tax Collections (millions) (%)	Estimated Distribution of Family Allowances (millions) (%)
Maritimes ..\$	109 4	\$ 28 11
Quebec	905 34	84 33
Ontario	1,235 47	75 29
Prairies	186 7	54 21
Br. Columbia	206 8	15 6
	<u>\$2,640 100</u>	<u>\$256 100</u>

The estimated annual cost of \$200,000,000 for family allowances was based on the following table compiled by the Dominion Bureau of Statistics:

Number of children in family allowance age groups:

0- 5 years	1,424,913
6- 9 "	839,722
10-12 "	618,369
13-16 "	652,930
	<u>3,535,934</u>

It is further estimated that since the average size of family varies in respect of urban and rural families across Canada the average allowance per child will be \$5.96 per month in rural communities, while in urban communities children will average \$6.12 a month. The whole average for Canada is \$6.04. How-

ever, the difference in size of rural and urban families means that the rural family as a whole will get an average of \$16.01 while the urban family will draw \$13.33.

A study of the system shows that in respect of the different provinces in Canada what any family may lose through the per capita amount received per child, it will make up in the amount received per family.

In the parliamentary debate on family allowances, Mr. Paul Martin, Parliamentary Assistant to the Minister of Labour, opposing the suggestion that family allowances might affect the rise of wages, declared: "The fact is that to-day in this country we have a trade union membership of 700,000 as compared with about 300,000 at the beginning of the war. In my opinion that is a good thing not only for the workers but for Canada. As long as we have an informed trade union movement, as we have in this country, one which I repeat is good for Canada and good for the workers themselves, there need be no fear on the part of labour of the system of family allowances being used as a weapon by irresponsible employers."

It was further pointed out that as allowances will continue during strikes they constitute a guarantee of basic care for the children in every home and actually give the worker more freedom to oppose unscrupulous employers.

Lever Brothers' 40-Hour Week Plan

THE management of Lever Brothers Limited, whose Canadian executive offices are in Toronto, and the members of Local 32 of the International Chemical Workers (TLC), after several conferences, jointly evolved a plan for the adoption of a 40-hour work week, without reducing plant production or the "take-home" pay of the workers. The plan was scrutinized and approved by a well-known firm of actuaries and also by the War Labour Board (L.G., January, 1945, p. 30). It has been in effect since the beginning of the year, and is to be tested for a trial period of six months.

The LABOUR GAZETTE is indebted to Mr. J. P. Brierley, Technical Director of the Company, for the following details of the project.

In November, 1943, the Company and the Union were negotiating a new agreement. The expiring contract had provided for a 48-hour week consisting of six days of eight hours each. The advantages of shorter hours of work were clearly recognized by both parties. Saturday absenteeism had proven an irksome problem to both the Union and the Company.

On the other hand, the need for maintaining the Company's output of essential products appeared to be an insuperable obstacle to reducing the hours of work. In the course of discussions, it was suggested that if all the ideas and suggestions of Union members and Management were pooled, it might be possible to reduce the working hours without reducing either the weekly earnings of the individual workers or the output of products.

Principles Agreed Upon

As a result, a joint committee was formed composed of workers appointed by the Union, and Management representatives. Recognizing that any change in hours of work would require the approval of the War Labour Board, two important principles were agreed by the joint committee at its first meeting—

- (1) that all suggestions for improvement in efficiency should be immediately introduced and continued in actual practice, without any adjustment in the standard hours of work, in order that full proof

of the value of the suggestions might be available;

- (2) that the then current operating period should be taken as the basis with which the improved labour efficiencies should be compared.

At a subsequent series of 23 meetings, the operation of all factory departments was discussed and the accumulated suggestions of Union members and Management were investigated, and those thought to be practicable put into effect immediately. It is a tribute to the determination of the workers and the discipline and morale of the Union as a body that the employees accepted the resultant reduction in total staff and the increase in output per man-hour without immediate additional recompense, in the hope of achieving their final objective of a shorter work week.

By July 1, 1944, it was proved that slightly better than a 20 per cent decrease in wages costs per standard unit of output had been realized. Based on the improved methods of operation, production costs were estimated on a basis which assumed the following conditions—

- (1) a reduction of working hours from a 48-hour week to a 40-hour week, consisting of five days of eight hours each;
- (2) payment at time and one-half for all hours worked in excess of the above;
- (3) increasing all hourly rates so as to ensure that workers would receive the same earnings for 40 hours as they had previously received for 48 hours.

The production costs so estimated indicated that the introduction of a 40-hour week would not increase the cost of production above the cost during the basic period of November, 1943. All figures used were checked by an independent audit before an application for approval of the changes outlined in Sections 1, 2 and 3 above, was sub-

mitted to the Regional War Labour Board for Ontario in August, 1944. At the time when the application was filed, the efficiencies introduced had been successfully maintained for periods varying from three to six months.

Action of War Labour Boards

The Regional War Labour Board for Ontario was unable to approve the application as submitted, as it involved an upward adjustment in hourly wage rates. Permission to appeal to the National War Labour Board was, however, granted. After a hearing before the National Board, the form of the application was modified and approval of the following scheme was requested.

- (1) Reduction of the normal hours of work from a 48-hour week, consisting of six days of eight hours each, to a 40-hour week, consisting of five days of eight hours each.
- (2) Payment at the rate of time and one-half for all hours worked in excess of eight hours in any consecutive 24-hour period, or 40 hours in any one week.
- (3) No change in the present hourly rates for factory workers.
- (4) Payment of an incentive production bonus, based on the efficiencies achieved, of 20 per cent of the total weekly earnings of each worker.

On December 27, 1944, the National War Labour Board approved this application with effect as from January 1, 1945, for a trial period of six months. During this trial period, the National War Labour Board will determine whether the wage cost per standard unit of output is being maintained at the same level as during the basic period in 1943. Consideration will then be given to the renewal of approval for the continuance of the plan for a further period.

Hiring of Housewives for Part-time Employment

Housewives may now be engaged for part-time jobs, for a period of up to three full work shifts in a week, without Selective Service permit, according to a statement issued on February 6, by Arthur MacNamara, Director of National Selective Service.

Previously, Selective Service required permits wherever a housewife was being engaged for more than 24 hours employment in the week; the new rule permits employment with-

out permit, even where the three full shifts total more than 24 hours work for the week.

Also in future it will not be necessary for an employer engaging a housewife for not more than three work shifts in the week, to secure permission of National Selective Service to advertise for this type of employee.

The new ruling arises out of an interpretation of "part-time subsidiary employment," which is exempted under Selective Service Regulations from permit requirements.

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

Hudson's Bay Company (Vancouver, B.C.).
Steel Company of Canada, Limited, and
United Steelworkers of America, Local 1005
(Hamilton, Ont.).

The Builders' Exchange Inc., and Building
and Construction Trades Council of Montreal
and Vicinity.

Canadian Car and Foundry Company
(Brantford Plant), and United Automobile
Workers (C.I.O.), Local 397.

Oshawa Railway Company and Division 1255
of Amalgamated Association of Street Electric
Railway and Motor Coach Employees of
America.

General Steel Wares, Limited (Montreal),
and United Steelworkers of America, Local
2847.

Steel Company of Canada, Limited, and
United Steelworkers of America, Local 1005.

Barrymore Cloth Company, Limited
(Toronto, Ont.), and National Union of Textile
Workers, Local 15.

Maritime Steel and Foundries, Limited (New
Glasgow, N.S.), and United Steelworkers of
America, Local 3172.

Central Aircraft, Limited, and Canadian Air-
craft Workers' Association, Local No. 2.

Victory Textiles, Inc. (Montreal, P.Q.).

National Aniline and Chemical Company,
Limited (Toronto, Ont.).

Houde, Laroche and Company, Limited, and
Le Syndicat Catholique National du Vete-
ment de Ste. Croix de Lotbiniere, Inc.

Canadian Vickers, Limited (Aircraft Divi-
sion), Fairchild Aircraft, Limited, and Noor-
duyn Aviation, Limited, and Montreal Air-
craft Lodge 712 of the International Associa-
tion of Machinists.

Algoma Steel Corporation, Limited, and
International Association of Machinists, Lodge
485.

Citadel Brick, Limited (Boischatel, P.Q.) and
Brick Workers' Federal Union No. 103.

Small Arms, Limited (Long Branch, Ont.),
and Local 519, United Electrical, Radio and
Machine Workers of America.

Re: Hudson's Bay Company (Vancouver, B.C.)

Reasons for Decision

This is an appeal from a decision of the Regional War Labour Board for British Columbia, dated October 5, 1944 declining to approve an application for classification of the company's departmental managers in its retail store at Vancouver in a series of salary brackets based upon sales volume (junior, intermediate and senior) and the nature of the operations in each department (A—easy; B—average; C—difficult). A range of wages is proposed for each category of departmental managers.

The Regional Board refused its authorization on the ground volume of sales should not constitute a factor in determining wage rates.

It was stated in the company's original brief on this appeal that its "wage policy and wage scales have been in effect since 1st February, 1935".

It must be noted from the definition in section 13 (1) (p) in P.C. 9384 that "wage rate" means the basis of calculation of the wages paid to an employee. So that, if prior to November 15, 1941 an occupational classi-

fication was paid on the basis of volume of sales there is no prohibition against a continuation of the practice.

The first point to be determined in this case is whether all of the company's departmental managers in the Vancouver store are to be considered as belonging, for the purposes of wage control, to the same "occupational classification", that expression being defined in section 13 (1) (h) of the Order. A second question will then be to what extent the rates submitted were established prior to November 15, 1941.

Following a request for further material, we now have a detailed submission from the appellant which was not placed before the Regional Board.

We are of opinion that this further submission should be examined by the Regional Board in the light of the foregoing observations. Meanwhile, this appeal will stand dismissed, but without prejudicing in any way the appellant's position before the Board below.

January 26, 1945

Re: Steel Company of Canada, Limited, and United Steelworkers of America, Local 1005 (Hamilton, Ont.)

Reasons for Decision

This is an appeal by the Union from a Decision of the Ontario Board dated November 8, 1944, wherein the Regional Board denied an application for the establishment of an 8-hour day for all employees at the Hamilton and Ontario Works, not now on an 8-hour day, with compensatory adjustments in wage rates. Leave to appeal was granted under date of December 14, 1944.

The application affects some two hundred and fifteen employees engaged in that part of the Hamilton plant known as the "Ontario Works" and one hundred miscellaneous employees, such as janitors, clean-up men, scrap collectors, miscellaneous clerks, etcetera, employed at the main plant. There are approximately four thousand five hundred employees in all the Hamilton plants and within the past few years the Company has pursued the policy of reducing the hours of work to eight hours per day. In the main plant the operations are continuous and three 8-hour shifts are in use.

The Company readily concedes the desirability of having uniformity in hours of work throughout the plants (except possibly for a few miscellaneous cases where the work is not of a continuous nature) and would not object to the 8-hour day in the Ontario plant if one hundred and twenty additional men could be secured to provide for three shifts of eight hours each. Unquestionably, production would be increased thereby, but it is quite clear that with the existing manpower shortage the extra men cannot now be secured.

Since the outbreak of the war the Company has been engaged primarily in meeting wartime requirements and is producing a substan-

tial part of the total steel produced in Canada. The Department of Munitions and Supply is requesting increased production. This is one of the material circumstances which the Board is required to consider under Section 20 (c) of the Order.

In our opinion the application is an indirect method of requesting a wage increase. While the Union does not admit the impossibility of securing an additional one hundred and twenty men necessary to provide for three 8-hour shifts, it is undoubtedly a fact. If the present production is to be maintained the mill would have to continue to work for two shifts of ten and one-half hours (at present an average of 57.25 hours per week). If the application were granted, the Company following its policy in such change-over to an 8-hour day, would pay nine hours' wages for such eight hours and be obliged to pay time and one-half for the overtime. In the main plant there is, generally speaking, no overtime such as would be the case here.

No evidence was submitted to indicate any gross inequality or injustice in the hourly rates now being paid.

It is to be noted that following the coming into effect of the Hours of Work and Vacations with Pay Act in Ontario, the Company applied for and obtained exemption from the provisions of the Act requiring the institution of an 8-hour day. We are of the opinion also that the decision of the Ontario Regional Board, given after full consideration of all the facts and in the exercise of its discretion, should not be disturbed.

The appeal will, therefore, be dismissed and Finding and Direction will issue accordingly.

January 25, 1945.

Re: The Builders' Exchange Inc., and Building and Construction Trades Council of Montreal and Vicinity

Reasons for Decision

This is an appeal by the Council from a Decision of the Quebec Board, dated September 21, 1944, wherein the Board denied certain employees engaged in the Building and Construction Trades Council of Montreal and Vicinity, a thirty-five cent (35c.) per week cost of living bonus which was ordered by the National Board by its General Order dated November 8, 1943, but which was not made applicable by that Order to employees of employers engaged in the construction industry. Leave to appeal was granted on October 17, 1944.

Pursuant to the provisions of Section 46 of P.C. 5963, the National War Labour Board, by its Finding and Direction dated June 14, 1943, directed the employers, with effect from June 1, 1943, to pay a cost of living bonus of Two dollars and twenty-five cents (\$2.25) per week (calculated on the rise in the adjusted cost-of-living index number from the month of April 1941 to that of April 1943); the same to be maintained and continued in effect until May 15, 1944, "subject to such adjustment, if any, as pursuant to the terms of P.C. 5963, may be determined to be effective from that date" (May 15, 1944). It can be assumed that the Board contemplated that P.C. 5963 would then

be in effect and that further adjustments, if authorized under that Order, would then be made.

By its General Order of November 8, 1943, the Board, on the ground that the cost-of-living index number for October 1, 1943, had risen by 1.4 points over the index for July 2, 1942, directed that:

(1) Except as otherwise provided in Section 2, 3 and 5 of this General Order, every employer shall, effective from the first payroll period beginning on or after November 15, 1943, increase:

(a) the amount of the cost-of-living bonus payable to adult male employees and to other employees employed at weekly wage rates of \$25.00 or more by the amount of 35c per week.

By Section 5 of the same General Order it was provided as follows:

Nothing in this General Order shall affect the operation of the direction of the National War Labour Board, dated June 14, 1943, applicable to employers in the construction industry.

On December 9, 1943, P.C. 9384 replaced P.C. 5963. Section 15 (1) directed every employer to establish a single rate, or range, in the manner prescribed in Schedule "A", which provides for the incorporation into the rates previously paid (and effective from the first payroll period commencing on or after February 15, 1944), of the "previously authorized bonus", which term is defined by Section 13 (1) (i), as follows:

"previous authorized bonus" means a cost of living bonus authorized or required to be paid by an employer to his employees in any occupational classification by or pursuant to the Wartime Wages and Cost of Living Bonus Order (Order in Council P.C. 8253, dated October 24, 1941), or the Wartime Wages Control Order, or the Wartime Salaries Order or any Order in Council specially applying to the employer or by or pursuant to any declara-

tion, determination, direction, instruction, order or General Order made under the authority of the said Orders;

We are of the opinion that the definition is broad enough to entitle the employees to any cost-of-living bonus they would have been entitled to under P.C. 5963, in addition to that granted them by the Finding and Direction of June 14, 1943. The Builders' Exchange contend that when the five (5c) cent cost-of-living bonus was directed by the Regional War Labour Board for Quebec on September 9, 1942, that Board took into consideration possible future fluctuations in the index of the cost-of-living after September, 1943, and that appears to have been the case; but the General Order of this Board, applicable to the construction industry dated June 14, 1943, makes it quite clear that the rise in the adjusted cost-of-living index number between April 1941 and October 1943, warranted the cost-of-living bonus of two dollars and twenty-five (\$2.25) cents per week therein awarded; further, the rise in the adjusted cost-of-living index between April 1943 and October 1943 (on which the General Order of November 8, 1943, was based) indicates that under P.C. 5963 the payment of the additional thirty-five (35c) cents per week was warranted.

We, therefore, find that the provisions of the General Order of the Board, dated November 8, 1943, should be made applicable to the employees represented in this application and the appeal is, therefore, allowed. Notwithstanding the terms of the Finding and Direction of June 14, 1943, we are of the opinion that the effective date of the Order now made must be for the first payroll period commencing on or after February 15, 1944, and as provided in Section 15 (1), of the present Order—no exceptions being made therein.

Finding and Direction will issue accordingly.

January 26, 1945.

Re: Canadian Car and Foundry Company (Brantford Plant), and United Automobile Workers (C.I.O.), Local 397

Reasons for Decision

This is an appeal by the Company and a cross appeal by the Union from a decision of the Regional War Labour Board for Ontario, dated August 28, 1944, by which it refused the application of the Union for general wage increases with the exception of the classifications of "foundry labourers" and "shakeout men", for which classifications it directed the Company to establish and pay a wage rate of sixty-four (64c) cents per hour (inclusive of the former cost-of-living bonus) with effect from January 29, 1944. The exist-

ing rate for the classifications mentioned is sixty (60c) cents per hour, which includes cost-of-living bonus. The shakeout men, however, are all working on piece work and their average earnings are now one dollar and eighty (\$1.80) cents per hour. Foundry labourers (that is those actually working in the foundry part of the plant) have a basic rate of sixty (60c) cents per hour and in addition thereto are paid three (3c) cents per pot for carrying heat, thereby earning an average of about fifty (50c) cents per day extra. The Regional Board based its decision for the increase granted on the ground that foundry

labour is worth five (5c) cents per hour more than common labour in the area, which they found to be fifty-nine (59c) cents.

In view of the present earnings of the shakeout men and the supplement to the rates of the actual workers in the foundry shop, we are of the opinion that the increases granted by the Regional Board were not warranted and we, therefore, allow the Company appeal and direct that that part of the Regional Board's Order which granted increases to shakeout men and foundry labourers be set aside.

To provide for the various types of labour in the plant, the Company requests the establishment of a range of sixty (60c) cents to sixty-four (64c) cents per hour, and as this is the approximate range recently established by the Regional Board at the Galt Malleable Iron Company, Limited, plant (59c-64c per hour), we approve of the establishment of such a range for that classification.

In regard to the cross appeal of the Union relating to the other classifications, it is to be noted that a general increase was given to

the employees on December 1, 1942, and that the full cost of living bonus of four dollars and sixty (\$4.60) cents per week was paid. The appeal is based on the claim of the Union that the establishment of a sixty-four (64c) cent rate for foundry labourers (they asked for 65c plus cost of living bonus), constitutes a gross inequality and that, in any event, if the sixty-four (64c) cent rate were established without any upward revision in the other categories, it would create an unbalanced wage structure and that, therefore, the other rates should be increased in order to preserve existing differentials.

In view of our decision on the Company's appeal and that there appears to be no gross inequality or gross injustice in the existing rates for the remaining classifications, as compared with reasonably similar and comparable industries, we are of the opinion that the cross appeal of the Union should be dismissed.

Finding and direction will issue accordingly.

January 26, 1945.

Re: Oshawa Railway Company and Division 1255 of Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America

Reasons for Decision

This is an application on behalf of the bus drivers of the Oshawa Railway Company for an increase of 11c per hour in their wage rates. The present range of wage rates of 62c-69c per hour was directed following the decision of the National War Labour Board, rendered on the 30th of July, 1943. At that time an increase of 4c an hour was approved. On the hearing of that application the representatives of the employees urged that the wage rates payable to the employees of the Oshawa Railway Company were properly comparable to the wage rates of the employees of the Niagara, St. Catharines and Toronto Railway, whose application for increases in wage rates was also before this Board. Both of these Companies are subsidiaries of the Canadian National Railways, and at that time wage rates paid to the bus and street car operators were the same in each case. Subsequently, on the 24th day of September, 1943, the Niagara, St. Catharines and Toronto Railway was directed to increase the wage rates of its motormen, conductors and bus operators by 10c an hour. By Finding and Direction dated October 8, 1943, the other classifications of employees of the said Niagara, St. Catharines and Toronto Railway received substantial wage rate increases.

Pursuant to further representations by the employees of the Oshawa Railway Company, concurred in by the employer, the wage rates of the other classifications of employees of the said Oshawa Railway Company were increased to correspond with the increases previously granted to the Niagara, St. Catharines and Toronto Railway, after having made due allowance for the relationships arising from the fact that the said railway operated an interurban service, whereas the Oshawa Railway Company operates a local service only, although its freight service involved switching operations in connection with the transportation of freight from the plant of the General Motors Limited to the Canadian National Railways.

It should be observed further that the wage rates paid to the bus operators of the Oshawa Railway Company corresponded closely with the wage rates paid similar classifications of the Ottawa Electric Company and the Lake Erie and Northern Railway and the Grand River Railway.

Having regard, therefore, to all the representations made to this Board at the hearing of the application now under consideration, as well as in support of the applications above referred to, and having regard to the wage rates now being paid to the other occupa-

tional classifications of this Company, as well as to the wage rates paid the bus drivers and other classifications by the Ottawa Electric Company and the Lake Erie and Northern Railway and the Grand River Railway, this Board is of opinion that the wages of the bus drivers covered by this application should be increased by the amount of five (5c) cents per hour. This increase will be effective from the 1st day of November, 1944.

In the application there is sought in addition to wage increases the following:

- (a) Night differential of 5c per hour.
- (b) Time and one-half for all work performed on Sundays and statutory holidays.
- (c) A time allowance of fifteen minutes for the purpose of making out accident reports.
- (d) Vacation with pay plan providing for holidays ranging from 6-12 days, depending on the employee's length of service.

Re: General Steel Wares, Limited (Montreal), and United Steelworkers of America, Local 2847

Reasons for Decision

This is an appeal by the Company from decisions of the Regional War Labour Board for the Province of Quebec dated October 24, 1944 and December 11, 1944 increasing hourly rates for engineers (4th class) from 63 to 78 cents and for stove mounters from 58 to 73 cents, and introducing a "5 cent per hour premium for night shift".

Adopting the Toronto plant as a basis, as was done by the Quebec Board in the case respecting starting and machine shop rates between these parties (see *Reasons for Decision* below), we are of opinion that the engineer (4th class) rate should be 73 cents.

There should also be a finding and direction introducing the premium for night work in the general terms used in the case of the Toronto plant (L.G., 1944, p. 1101). We are confident that the Company's management and the

Re: General Steel Wares, Limited (Montreal) and United Steelworkers of America, Local 2847

Reasons for Decision

The Company appeals from a decision of the Regional War Labour Board for the Province of Quebec dated July 18, 1944, directing an increase in starting rates for men, women and boys with corresponding increases in the automatic progressive rates. The Regional Board's direction also increased the rates for certain classifications employed in the machine shop. Leave to appeal was granted by the Regional Board.

As to (a), this Board is not of opinion that the evidence justifies payment of a night differential.

As to (b), in accordance with the practice of street railway operation, this Board is of opinion that payment at the rate of time and one-half should be allowed for work performed on Sundays or on an assigned seventh day of rest, and six statutory holidays as enumerated in Order in Council 4671.

As to (c), it appears to the Board that this request of the employees is not in general accord with the practice of street railways in that regard, and is, therefore, denied.

As to (d), this Board sees no reason why the provisions of D.B. 17 should be departed from in this case, and, therefore, refuses the request of the employees for holidays with pay ranging from six to twelve days per year.

Finding and Direction will issue accordingly.

January 30, 1945.

Union will again be able to agree upon a practicable application of the direction.

The Company says that all of its stove mounting is done in its London plant and that there would appear to be only one employee who could possibly be classified as a stove mounter at Montreal, but that, in fact, he is a warehouseman and devotes only a small part of his time to work which could be said to belong to the classification for which the special rate is contended. On the evidence this Board is unable to see any justification for setting up a special classification for stove mounting in the Montreal plant. The individual involved may have a grievance and if he has, the grievance procedure of the collective agreement should be utilized.

There will be a finding and direction varying the Regional Board's decisions to the extent indicated.

January 31, 1945.

At the hearing, it was agreed by the parties that the rates for women and boys should remain as they were before the decision, now under appeal, was rendered.

It seems clear from the material and was practically common ground at the hearing that the Regional Board adopted the men's rates which were thought to be then prevailing in the Company's Toronto plant for the classifications here involved. Subsequently, on August 3, 1944, this Board, on an appeal by the Company, disallowed certain increases in

these starting rates in the Toronto plant which had been granted by the Regional Board for Ontario (L.G., 1944, p. 1101). The result is that the Montreal rates ordered by the Regional Board for Quebec are now higher than the Toronto rates.

The Quebec Board in this particular case thought that it would not be inconsistent with the provisions of section 20 (1) (a) of P.C. 9384 to direct the Toronto rates of this Company for its Montreal plant. On the evidence submitted, we are unable to say that the decision was erroneous in principle.

It was shown by the appellant that the rates ordered for the machine shop classifications were higher than those being paid in the Toronto plant. The Union, however, endeavoured to justify the new rates by comparing them with rates paid by other employers in the Montreal area, but we do not think that a proper basis on that ground was made out to justify the increases.

As a result, the Regional Board's finding and direction will be varied and the following rates will be effective from April 11, 1944:

Minimum rate for female employees and boys under age 18:

Starting36 cents
After 1 month40 "

Minimum rate for men:

Starting54 cents
After 1 month58 "

Machine Shop:

Toolmaker—1st class ..	\$1.08
Toolmaker—2nd class..	.98 cents
Machinists Class A.....	.93-.98 cents
Millwright88 cents
Millwright Helper.....	.78 cents

Finding and Direction will issue accordingly.

January 31, 1945.

Re: Steel Company of Canada, Limited, and United Steelworkers of America, Local 1005

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for Ontario dated August 9, 1944 whereby that Board declined to authorize or direct the Company to grant to the hourly-rated employees in the Hamilton Works two weeks' vacation with pay after five years of continuous employment. The Ontario Board granted leave to bring this appeal.

Prior to the war, the Company was granting one week's vacation with pay to employees with 5 years service and two weeks to employees with 25 years' service. During the month of March, 1944, the Union renewed the application which it had previously made for one week's vacation with pay to employees with one year's service and two weeks to employees with five years service. On July 27, 1944, the Regional Board authorized one week's vacation for employees with one year's service, and on August 9, 1944 issued the decision now under appeal.

The Company asserted that an extension of its present provisions for vacations with pay would curtail its schedules. It is engaged in the urgent production of basic and indispensable war materials having a relatively high content of direct labour and there is a shortage of labour for the type of work required to be performed. These are compelling circumstances to which a war labour board must have regard in exercising the discretion conferred by section 20 (1) (c) of the Order creating our

jurisdiction (P.C. 9384). We are not unaware of the merit of the appellant's argument for paid vacations to industrial workers from the point of view of improved production, but this is neither the time nor the case to give this consideration precedence over wartime requirements.

In view of the exhaustive argument of Counsel at the hearing it may be useful to note that this Board is still governing its policy as to vacations with pay, largely by the terms of decision bulletin 17 and the Board's view in the Division 4 case (L.G., 1943, p. 753):

In other words the granting or withholding of vacations with pay is a matter of consideration on the evidence of each case. Obviously there are a number of fundamental considerations. First of all a Board must keep in mind that it is exercising a judicial discretion and is not to deal with the matter as if it had the right to legislate arbitrarily an employer into granting vacations with pay. Secondly, a most important consideration is that there is a war on and uninterrupted production and services is the prime need in such a time. Consideration should also be given to the problem of manpower. Vacations with pay should not be granted where conditions are such that an industry will as a result lose too much important production or where to keep it up will make the cost unduly high. Another factor is of course the importance of the product in the war effort or the national interest. Then again there may be the question of ability to pay.

In some cases this Board has authorized two weeks' vacation with pay for employees

having five years' service, when it had been shown that special circumstances warranted the extension of a plan by an employer, but in no case have we directed an employer beyond the terms of D.B. 17.

We are of the opinion that the Regional Board took the proper and right view of this application and the appeal will have to be dismissed.

February 7, 1945.

Re: Barrymore Cloth Company, Limited (Toronto, Ont.) and National Union of Textile Workers, Local 15

Reasons for Decision

The Union appeals from a decision of the Regional Board for Ontario dated October 30, 1944, declining to grant the following three requests made by the Union:—

- (1) Payment of time and one-half for all extra time worked in any single day in a work week of 48 hours.
- (2) Payment of 5 cents an hour bonus to all employees working on shift work.
- (3) Two weeks' vacation with pay to all employees having five years' service with the company.

The Company opposed the application before the Regional Board on the ground, among others, that it was premature in view of the negotiations to be held under a proposed agreement.

Subsequent to the decision, on November 6, 1944, the parties did enter into an agreement containing the following clauses:—

Article 5

A. Work week shall consist of 48 hours subject to any directive received from the Industry and Labour Board of Ontario or other government body.

B. Any time worked in excess of the regular working hours in any single week shall be paid for at the rate of time and one-half the regular wages. (This is subject to review by an order of the Regional War Labour Board.)

Article 12—

The Government Regulations respecting vacations shall apply.

There does not appear to be in the agreement any clause dealing directly with the shift bonus.

With respect to the matter of payment for overtime, the Company contends that its present schedule of 52½ hours for the day shift and 55 hours for the night shift had been fixed by directive of the Industry and

Labour Board for Ontario. Upon examination of section 5 of the Hours of Work and Vacations with Pay Act, 1944 (Ontario), it appears that all that that Board could do was to suspend for this employer the effect of section 2 of that Act limiting the hours of work in industrial undertakings to 48 in the week. There was no directive which could be said to affect the subsequent agreement of the parties establishing a work week of 48 hours. Clause 5, however, requires the approval of the war labour board because of the prohibition contained in section 18 of the Wartime Wages Control Order, 1943 (P.C. 9384).

The original request for overtime pay was taken by the Regional Board to be on a daily basis only, and for that reason was refused. It appears, however, that the Board would have allowed the application had it been construed to operate within the framework of a standard work-week of 48 hours. The wording of article 5 of the agreement subsequently signed would indicate that such was the intention of the parties and in order to save time for all concerned, instead of returning the matter to the Regional Board, we shall allow the appeal on this point and the general rules issued by the Ontario Board for guidance in administering the provision should apply in this case.

We are of opinion, however, that the Regional Board's decision in the matter both of shift bonus and of vacations with pay should not be disturbed. We do not think a case was made out to warrant a direction of payment of a night work premium, nor shall we depart from the provisions of D.B. 17 which are now in effect in this plant.

Findings and directions accordingly.

February 8, 1945.

Re: Maritime Steel and Foundries, Limited (New Glasgow, N.S.), and United Steelworkers of America, Local 3172

Reasons for Decision

(Oral Decision)

The Board has considered the application for leave to appeal in this case. We are all definitely and emphatically of the opinion that an agreement having been signed in circumstances such as prevailed in this case, and that the application having been submitted to the

Regional Board, with the definite stipulation that the directions of that Regional Board would constitute the provisions as to wage rates, then this Board is not going to be the instrument to revise the agreement or the terms of the agreement on appeal.

The leave to appeal is therefore refused.

February 1, 1945.

Re: Central Aircraft, Limited, and Canadian Aircraft Workers' Association, Local No. 2

Reasons for Decision

In this matter certain wage increases were authorized by the Regional War Labour Board of Ontario in its decision of December 31, 1943, to be effective from the 1st day of June, 1943. Subsequently on the 24th of August, 1944, the said Regional War Labour Board directed the said Company to make the increases effective from June 1, 1943.

It appears from the evidence that the agreement between the employer and employees which became effective June 1, 1943, indicated that the wage schedule would become effective when approved by the "Regional

War Labour Board and the Director-General, Labour Relations Branch, Department of Munitions and Supply". The application, however, for the approval of the Regional War Labour Board was not made until October 7, 1943, and no reason was submitted to us to indicate why, in the circumstances of this particular case, the effective date should be earlier than the date of application. This Board, therefore, varies the Finding and Direction of the Regional War Labour Board to the extent that the increases directed by that Board will be effective as and from October 7, 1943.

February 13, 1945.

Re: Victory Textiles, Inc. (Montreal, P.Q.)

Reasons for Decision

This is an appeal from the Quebec Regional Board who by decision dated December 28, 1944, refused to approve wage rates for two employees. The appellant, since June 30, 1944, is said to have become independent from Textile Converters, Inc. of which it had been a subsidiary. The application, although expressed to be for an increase in wage rates, should have been an application for the establishment of rates under section 20 (1) (c) (ii) of P.C. 9384. The Regional Board dealt with the request under section 20 (1) (a) of the Order and refused it in its entirety.

However, there is a preliminary question to be determined, and that is whether the remuneration of these employees is governed by the Wages Order (P.C. 9384 as amended) or by the Salaries Order (P.C. 9298 as

amended). The rates requested are in excess of \$250 per month and there is a presumption created by the proviso to section 17 of P.C. 9384, that they are above the rank of foreman or comparable rank and subject to the provisions of the Wartime Salaries Order. These employees are respectively vice-president and secretary of the Company-appellant and we do not think the presumption has been removed. Consequently the application must be dealt with by the Department of National Revenue under the provisions of the Salaries Order.

We shall dismiss the appeal, but it should be understood that we are not adopting the Regional Board's decision on the merits so that the application may go unprejudiced to the proper authorities.

February 12, 1945.

Re: National Aniline and Chemical Company, Limited (Toronto, Ont.)

Reasons for Decision

An appeal, by leave granted below, from a decision of the Ontario Regional Board dated November 16, 1944, refusing permission to increase wage rates paid to two employees, a salesman-chemist and an office manager. Both employees receive salaries in excess of \$250 per month, but on the evidence presented the Board finds that "the nature of their duties and responsibilities to other employees indicate clearly that they are not above the (rank of foreman or comparable rank)", and as a consequence they are governed by the Wartime Wages Control Order, P.C. 9384.

The basis of the Company's appeal is that both employees have assumed duties and responsibilities which on November 15, 1941,

were performed by other classifications receiving wage rates considerably higher than those now applied for. In the case of the chemist, he is devoting at least 50 per cent of his time to sales activities and the rate paid to salesmen employed on November 15, 1941, was much greater than the monthly rate of \$333.33 now sought, while the office manager is doing some of the Branch manager's work during the latter's absence on selling trips.

In these circumstances, the application can be taken as being under section 20 (1) (c) (ii) for the establishment of rates for new occupational classifications and, in our opinion, should be approved. Rather than return the matter to the Regional Board, we shall allow the appeal.

February 12, 1945.

Re: Houde, Laroche and Company, Limited, and Le Syndicat Catholique National du vêtement de Ste. Croix de Lotbinière, Inc.

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for Quebec dated August 1, 1944, directing the Company "to increase all of its hourly and piece rates to yield 2½ cents per hour for male and female employees (office employees excepted)", and made effective from July 1, 1944.

The syndicate has asked for substantial increases in varying amounts but the Regional Board limited the increase to 2½ cents throughout and there is no cross-appeal.

Most of the employees are women and girls working at piece rates. Their average hourly earnings in 1944 were 26½ cents, while the average hourly earnings of the small number of men and boys was 38¼ cents. The appellant is engaged in the manufacture of work garments, which is naturally a low-wage industry. The evidence before us would indicate that the rates paid by this Company are not lower than those paid in two or three similar but smaller industries in the district.

However, in its consideration of this appeal the Board has in mind the decision in the case of The Continental Paper Products Limited (L.G., January, 1945, p. 30) where it said:—

In considering the appellant's argument it is necessary to keep in mind that the cases referred to were decided by means of the rule of comparability contained in section 25 of the then governing Order in Council (P.C. 5963), while the decision in this case was made under the "gross injustice and gross inequality" provision of section 20 (1) (a) of P.C. 9384. The present formula presents a severe condition, but in applying it a war labour board is not held necessarily to a test of comparison, either within an industry or within a section of an industry or even within a locality. It is evident from the Regional Board's finding and direction that in increasing the range of the rates here in question from 25-30 cents to 30-35½ cents, the Regional Board had come to the conclusion that this was a proper case for an application of the rule now in effect.

We are of the opinion that in the case now before us the decision of the Regional Board was properly made under the governing provision of the Order in Council.

The Company pleaded its inability to pay, but after examination of the evidence we are of opinion that the plea is not sufficiently established.

The appeal will, therefore, be dismissed and Finding and Direction will issue accordingly.

February 13, 1945.

Re: Canadian Vickers, Limited (Aircraft Division), Fairchild Aircraft, Limited, and Noorduynd Aviation, Limited, and Montreal Aircraft Lodge 712 of the International Association of Machinists

Reasons for Decision

This is an appeal by the Union from that part of the decision of the Regional War Labour Board for Quebec which refused the request of the Union for an increase in the minimum rates of all classifications of employees in these Companies. The application is dated the 14th day of July, 1944, and the decision of the Regional War Labour Board on the 16th day of August, 1944.

In the application, among other things, the Union sought increases in varying amounts for the minimum rates being paid to certain classifications of employees in these Companies. It should be noted that in substantially all of the classifications affected a range of rates had been established either by agreements between the parties or as the result of Findings and Directions of the Regional or National War Labour Board.

At the hearing of this appeal by the Regional War Labour Board, the Union endeavoured to establish that the said minimum rates were low as compared with

rates paid in the aircraft industries in other parts of Canada. The Company urged that inasmuch as less than 5 per cent of the employees in all classifications affected were paid the minimum rates of the proper classification in each case, and that because the average rate paid by them was higher than the average rate which was paid to similar classifications in other aircraft industries in Canada, no gross inequality or gross injustice had been shown. The number of employees receiving the minimum rates in each classification was admittedly small. The estimated number given by the employers was not disputed by the employees, and, while owing to the theoretical basis on which the average rate was estimated, we are not satisfied that the said Regional War Labour Board was entirely justified in the circumstances of this case in adopting the rate so estimated as an indication that no gross inequality or gross injustice existed, we are nevertheless of opinion that the mere fact that higher minimum wage rates exist in certain other

aircraft industries in Canada does not in itself constitute a gross inequality or gross injustice requiring rectification pursuant to P.C. 9384. On more than one occasion this Board has indicated that this Order does not of necessity require the equalization of wage rates in any particular industry. The purpose of the Order is the stabilization of wage rates. Therefore, although some criticism might be directed at the language used by the Regional

War Labour Board in reaching its conclusions, we are satisfied that the Regional War Labour Board gave careful consideration to all the facts submitted to it, and properly decided that the Union had not discharged the burden resting on it to show that the increase in the wage rates sought was necessary to rectify a gross inequality or gross injustice.

This appeal is, therefore, dismissed.

February 14, 1945.

Re: Algoma Steel Corporation, Limited and International Association of Machinists, Lodge 485

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for Ontario, dated August 9, 1944, directing that the Company shall:—

- (a) pay a premium rate of time and a half for all hours worked on Sundays, and, where Sunday is part of the regular work week of an employee affected by this application, then the Board directs such premium rate on the seventh consecutive day. In addition, the Board has directed that your Company shall not require an employee to lay off on another day to offset overtime work performed on his assigned day off;
- (b) pay a premium rate of time and a half for work performed on the following Statutory Holidays: New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day, and Christmas Day.

Where the nature of manufacturing processes requires maintenance of continuous operation it is reasonable that employees be given an assigned seventh day of rest during each weekly period and such assigned rest day should not be changed at the instance of the employer because the services of the employee may be required on his normal rest day to meet an emergency situation arising in the operation of the plant. This is a situation in which the premium overtime rate should be paid.

If any of the employees represented by this Union are required to work under conditions of continuous operation and a regularly assigned day of rest is provided on

any day of the week, other than Sunday, the premium rate should apply for work required to be performed by the employee on such assigned rest day. If these employees are not required to work under such conditions and their normal day of rest is Sunday, then if called upon to perform work on Sunday the premium rate should be paid.

To this extent the Finding and Direction of the Regional War Labour Board for Ontario is sustained.

The other point at issue is whether the employees represented by the respondent should receive pay at the punitive rate for work performed on three Statutory Holidays or six as directed by the Regional War Labour Board.

It has been the established practice of the Company to pay the punitive rate on three Statutory Holidays and this is likewise the practice of other companies in the industry. It does not seem reasonable that the employer should be required to establish for a minority group a working condition that does not apply to the majority of his force when the existing practice conforms to the prevailing practice in the industry. Therefore, the Finding and Direction of the Ontario Regional War Labour Board will be revised to provide for payment of the punitive rate for three Statutory Holidays, as applies to employees of the Company represented by Local 2251, United Steel Workers of America.

There will be Finding and Direction accordingly.

February 14, 1945.

Re: Citadel Brick, Limited (Boischatel, P.Q.) and Brick Workers' Federal Union No. 103

Reasons for Decision

This appeal is by the Union from a decision of the Quebec Regional Board dated October 13, 1944, whereby that Board refused to direct one week's vacation with pay for all employees and overtime at time and one-half for oven and kiln firemen after 60 hours. Leave to appeal was duly granted by the Regional Board.

Vacations with pay were authorized on August 16, 1944, but the ordering of them was later refused by the Regional Board because of a subsequent collective agreement between the Company and its employees and also on the plea of inability to pay the cost involved.

With respect to the first ground for the refusal, we find that that part of paragraph 15

of the agreement dated September 29, 1944, reading as follows:—

L'échelle des salaires qui existait lors de la signature des présentes restera en vigueur ainsi que les mêmes conditions de travail jusqu'à ce qu'il en ait été décidé autrement par l'autorité compétente,

contemplated that the Union would be free to seek an order from the competent authority for improved conditions of employment. In our opinion the agreement did not bar the Union's application nor the present appeal.

Upon a careful examination of the evidence presented by the Company to establish its plea of inability to pay, we come to the conclusion that it would be able to absorb in its current operations the cost of the Union's requests without having to seek an authorization from the Wartime Prices and Trade Board to increase the price of its product.

Having thus disposed of the grounds upon which the Regional Board's decision was rendered, we feel free to exercise the discretion conferred by the last paragraph of section 20 (1) (c) of P.C. 9384 as though the case were before us in first instance.

The improved working conditions sought by the employees in this case are quite fair and reasonable, and we think that the Company should be directed to put them into effect. The result of improved working conditions, given a proper spirit of labour-management co-operation, are sometimes surprising from the point of view of increased productivity and consequent employer earnings.

Vacations with pay will be governed by the provisions of D.B. 17 and the firemen's overtime pay will be effective from the date of the Regional Board's decision.

The appeal is allowed.

February 20, 1945.

Re: Small Arms, Limited (Long Branch, Ont.) and Local 519, United Electrical, Radio and Machine Workers of America

Reasons for Decision

This is an application by the Union for an increase in wage rates for certain classifications in one department of small Arms Limited. The Company (a Crown Company) has been in operation since 1941.

Sanders in this department are paid a basic rate of 75 cents per hour, plus an incentive bonus. The rate for the classifications covered by the application is 70 cents per hour, except for jointers, whose rate is 65 cents per hour in each case, plus the incentive bonus, which appears to be substantial. The purpose of the application is to bring the rate of the other classifications up to 75 cents so as to be on the same basis as the sanders, it being alleged that the nature and hazard of the

work and the skill required are equal to that of the sanders.

The evidence submitted by the Union to support its case as to the skill required and the hazard involved, relative to that of sanders, is denied by the Company. From the nature of the operations and on the whole evidence we are satisfied that the differentials presently existing seem to be proper. Moreover, it would appear that to grant the application would seriously affect the wage schedule worked out over a number of years, not only in this department but throughout the plant.

We are of the opinion that the Union has not established any gross inequality or gross injustice. The application will, therefore, be dismissed and Finding and Direction will issue accordingly.

February 23, 1945.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for five days during the month of February. During the month the Board received fourteen applications, held eight hearings, issued twenty-four certificates designating bargaining representatives, rejected two applications, allowed withdrawal of one application, ordered seven representation votes, five of which will be reported under "Certificates Issued" in the next issue, and gave decisions in six appeal cases.

At the end of the month a number of applications for certification were before the Board during its sittings on February 27 and 28, but certificates were not issued before the end of the month. They will be reported in the April issue of the *LABOUR GAZETTE*.

Certifications Issued

(1) *Western Canada Firebosses Association, No. 1 (T. & L. C.) and Crows Nest Pass Coal*

Company Limited, Fernie, Michel, Cold Creek and Elk River, B.C.; International Coal and Coke Company Limited, Coleman, Alberta; Western Canadian Collieries Limited, Blairmore, Bellevue and Byron Creek, Alberta; and Hillcrest Mohawk Collieries Limited, Bellevue, Alberta, (L.G. Aug. 1944, p. 968). Following a public hearing and an investigation of the application by an Officer of the Board, the Local Union and Messrs W. Patterson, J. McIsaac, A. Grant and J. T. Griffith were certified as bargaining representatives for the Firebosses employed by the employing Companies.

(2) *National Union of Firebosses, Local No. 1 (C.C.L.) and sixteen coal mining Companies in the Drumheller district and represented by the Drumheller Coal Operators Association, Drumheller, Alberta (L.G., Nov. 1944, p. 1338).* The Union and Messrs. James Conroy, John Young, Wm. B. Henry, Andrew Black, Jr., and

Frank Case were certified as bargaining representatives for the Firebosses employed by sixteen coal mining Companies in the Drumheller district and represented by the Drumheller Coal Operators Association, Drumheller, Alberta. Certification followed a public hearing and an investigation of the application by an Officer of the Board.

(3) *Brotherhood of Railroad Trainmen and Canadian National Railways and the Canadian Pacific Railway Co., Montreal, P.Q.* (L.G., Aug. 1944, p. 967). In this case representatives of the applicant Union and the Order of Railway Conductors, as intervener, appeared before the Board following which a vote was ordered by the Board of all regularly assigned conductors, those regularly assigned to conductor's spare Board as of April 5, 1944, and part time conductors who during the period April, 1943, to April, 1944, worked a preponderance of their time as conductors, in the employment of the two Companies. The applicant Union obtained the support of a majority of the eligible employees on the Eastern Lines of the Canadian Pacific Railway Company but failed to do so on the Western Lines of the Canadian Pacific Railway and on the Canadian National Railways system. The Board certified the applicant Union and Messrs. J. J. Hendrick, W. P. Kennedy, A. J. Kelly, and D. H. Gemmell as bargaining representatives for the road train conductors of the Eastern Lines of the Canadian Pacific Railway Company.

(4) *Deepsea and Inlandboatmen's Union of the Pacific, B.C. Division, (C.C.L.) and Park Steamships Limited, Vancouver, B.C.* The Union and Messrs. J. M. Fox and J. M. Smith were certified as bargaining representatives employed in the steward's, deck and engine room departments of dry cargo vessels of the Park Steamship Company Limited operated from the Pacific Coast. Certification followed an investigation of the application by an Officer of the Board and a representation vote in which the applicant Union obtained the support of a majority of the eligible employees.

(5) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and Canadian Pacific Railway Company (B.C. Lake and River Service, Kootenay, Arrow and Slochan Lakes), Nelson, B.C.* (L.G., Dec., 1944, p. 1481). Following a representation vote in which the applicant Union secured the votes of a majority of the eligible employees, the Board certified the Union and Messrs. J. L. Pateman and A. Mose as bargaining representatives for the unlicensed personnel employed by the Canadian Pacific Railway Company (B.C. Lake and River Service, Kootenay, Arrow and Slochan Lakes),

Nelson, B.C. Certificated personnel and the purser were excluded from the bargaining unit.

(6) *Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees and the Niagara, St. Catharines and Toronto Railway, Toronto, Ontario, (L.G., Dec., 1944, p. 1482).* The Union and Messrs. F. H. Hall and J. J. Ratcliffe were certified as bargaining representatives for employees of the Niagara, St. Catharines and Toronto Railway engaged as clerical, stenographic and switchboard employees in the office of the superintendent at St. Catharines (but excluding the Chief Clerk, accountant and superintendent's stenographer); the draughtsman and instrument man and the clerk-timekeeper in the office of the supervisor of Way and Power at St. Catharines; chief clerk, cashier, clerical employees and car checkers and watchmen in the freight office at St. Catharines; the chief clerk and clerical employees in the yard office, at St. Catharines; the clerk and timekeeper, clerical employees and night watchman in the car shops at St. Catharines; the chief clerk, clerical and stenographic employees, storemen and labourers in the Stores Department at St. Catharines; the timekeeper, ticket agent, ticket clerk, baggageman, groundskeeper and fireman, and the janitrix of the station at St. Catharines; the agent and ticket clerk at Thorold; agents at Fonthill and Welland; the agent, ticket clerk and clerk at Niagara Falls, Ontario; the summer agent, summer clerk and the winter agent at Port Dalhousie. Certification followed a public hearing and an investigation of the application by an Officer of the Board.

(7) *The Plant Employees Association of the Bell Telephone Company of Canada and the Bell Telephone Company of Canada, Montreal, P.Q.* (L.G., Dec., 1944, p. 1482.) Following a public hearing and an investigation of the application by an officer of the Board, the Board certified the Plant Employees Association of the Bell Telephone Company of Canada and Messrs. P. Leo Dolan, John H. Bowcott, Charles P. Barker, James O'D Armour, Andrew W. Sim and Selwyn Wilson as bargaining representatives for the employees of the Plant Department of the Eastern and Western Areas of the Bell Telephone Company of Canada doing skilled or unskilled manual, clerical or technical work. Foremen, supervisors, payroll and personnel clerks, senior plant clerks having access to personnel records, statistical clerks having access to confidential statistical records, and any engineer's assistants who are professional engineers were excluded from the bargaining unit.

(8) *Hotel and Restaurant Employees International Alliance and Bartenders International*

League of America, Local 884 and Whitehorse Inn, Whitehorse, Y.T. (L.G., Dec., 1944, p. 1482.) The union and Misses Pearl Chan and Audrey Collins and Messrs. Albert Ames, S. P. Taylor and G. P. Belanger were certified by the Board as bargaining representatives for the waitresses and counter girls, excluding the Head Waitress employed by the Whitehorse Inn, Whitehorse, Y.T. Certification followed an investigation of the application by an officer of the Board.

(9) *Hotel and Restaurant Employees International Alliance and Bartenders International League of America, Local 884, and the Whitehorse Social and Athletic Club Cafe, Whitehorse, Y.T.* (L.G., Dec., 1944, p. 1482.) Following an investigation of the application by an officer of the Board, the Board certified the union and Misses Pearl Chan and Audrey Collins and Messrs. Albert Ames, S. P. Taylor and George P. Belanger as bargaining representatives for the waitresses employed by the Whitehorse Social and Athletic Club Cafe, Whitehorse, Y.T.

(10) *Hotel and Restaurant Employees International Alliance and Bartenders International League of America, Local 884 and the Whitehorse Grill Limited, Whitehorse, Y.T.* (L.G., Dec., 1944, p. 1482.) The Union and Misses Pearl Chan and Audrey Collins and Messrs. Albert Ames, S. P. Taylor and George P. Belanger were certified by the Board as bargaining representatives for the waitresses and counter girls employed by the Whitehorse Grill Limited, Whitehorse, Y.T. Certification followed an investigation of the application by an officer of the Board.

(11) *International Brotherhood of Electrical Workers, Local 348 and the Alberta Nitrogen Products Limited, Calgary, Alberta.* (L.G., Jan., 1945, p. 35.) Following an investigation of the application by an officer of the Board, the Board certified the union and Mr. A. Park as bargaining representatives for the electricians and helpers employed by the Alberta Nitrogen Products Limited, Calgary, Alberta.

(12) *The British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers' International Union of North America and the Municipality of North Vancouver (Ferry Service) North Vancouver, B.C.,* (L.G., Jan., 1945, p. 36). Following an examination of the Union's membership records by an Officer of the Board, the Board certified the Union and Messrs. H. Murphy, J. Scotland, E. Markey, D. Joyce, S. Weir and R. M. Deeley as bargaining representatives for the unlicensed personnel in the deck and engine room departments of the Corporation of the city of North

Vancouver (Ferry Service), North Vancouver, B.C.

(13) *The National Union of Coal Dock Workers, Local No. 1, (C.C.L.) and Century Coal Company, Midland, Ontario,* (L.G., Jan., 1945, p. 36). The Union and Messrs. Wm. Girard, H. J. Bissette, T. R. MacLachlan were certified as bargaining representatives of the Midland Coal Dock Employees of the Century Coal Company, Midland, Ontario. Foremen and office staff were excluded from the bargaining unit. Certification followed an investigation of the application by an Officer of the Board.

(14) *Federal Labour Union, Local No. 23736 (A.F. of L.) and Goderich Elevator and Transit Company Limited, Goderich, Ontario,* (L.G., Feb., 1945, p. 154). Following an investigation of the application by an Officer of the Board, the Board certified the Union and Messrs. Harry Witmer, Thomas Chambers, Charles McCabe and Geoffrey Peachie as bargaining representatives for the employees of the Goderich Elevator and Transit Co., Limited, Goderich, Ontario. The office staff and licensed engineers were excluded from the bargaining unit.

(15) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Capital Division 270, and Canadian National Railways (Chateau Laurier Hotel), Ottawa, Ontario,* (L.G., Feb., 1945, p. 154). The Union and Messrs. A. R. Mosher, J. E. McGuire, J. A. Querido, Sylvio Lalonde, J. C. Lambe, and Aurele Seguin were certified as bargaining representatives for the employees of the Chateau Laurier, Canadian National Railways, Ottawa, Ontario. Excluded from the bargaining unit were the manager, manager's secretary, employees in the Accounting Department and barber shop, and chief engineer, carpenters, head chef, head bellman, head waiter in the Grill Room Department, catering manager, private service supervisor and banquet master in the private service department, head waiter in the Main Dining Room, chief steward, manageress of the cafeteria department, head housekeeper and first assistant housekeeper, laundry superintendent, superintendent of the swimming pool and turkish bath department, office manager, two assistant managers in charge of credit, night manager and house officer, beverage room manager, head porter, telephone supervisor, plumbers, associate chef, sous-chef, head night chef, cafeteria chef, associate head steward, kitchen food checkers, relief food checker, cafeteria food checkers, assistant cafeteria manager, head houseman, bell captains, head valet and timekeeper-watchman.

Certification followed a public hearing and an investigation of the application by an Officer of the Board.

(16) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 274, and Canadian Pacific Railway Company (Hotel Saskatchewan), Regina, Sask.*, (L.G., Jan., 1945, p. 36). Following a public hearing and investigation of the application by an Officer of the Board, the Board certified the Union and Mrs. V. E. McArter, Miss D. M. O'Byrne and Messrs. D. Dalgetty, E. G. Larson and S. F. Corless as bargaining representatives for the employees of the Hotel Saskatchewan. Canadian Pacific Railway Company, Regina, Sask. Excluded from the bargaining unit were the manager, assistant manager, chief steward, chief engineer, head waiter (Maitre d'Hotel), head housekeeper, laundry superintendent, accountant, chief clerk, house officers, chef, manager's private secretary, coffee shop manager, head porter, head bellman, head telephone operator, head elevator operator, head barman, assistant accountant, accountant's clerks, accountant's stenographer, receiving clerk and steward's clerk, timekeeper and steward's stenographer, night auditor and room clerk, assistant night auditor, relief clerk, assistant steward, kitchen steward, food controller, assistant chef, assistant head waiter, coffee shop cashier, and food checkers.

(17) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Garry Division No. 272, and Canadian National Railways (Fort Garry Hotel) Winnipeg, Man.*, (L.G., Dec., 1944, p. 1482). Following a public hearing and an investigation of the application by an Officer of the Board, the Board certified the Union and Messrs. H. A. Chappell, Samuel G. Hutton and Miss Edna Goss as bargaining representatives for the employees of the Fort Garry Hotel, Canadian National Railways, Winnipeg, Man. Excluded from the bargaining unit were the manager, assistant manager, chief steward, head waiter, (superintendent of service), housekeeper, laundry superintendent, accountant manager's secretary, chief engineer, head chef, head bellman, head porter, head barber, house officer, employees of engineers' Department for whom bargaining representatives were certified on October 26, 1944, chief cashier, clerk-stenographer, food checkers, relief food checker and timekeeper-watchmen.

(18) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Triumph Division No. 49, and Canadian National Railways (Prince Edward Hotel), Brandon, Manitoba*, (L.G., Jan., 1945, p. 36). The Union and Messrs. H. A. Chappell, Thomas Town and Stanley German were certified as bargaining

representatives for the employees of the Prince Edward Hotel, Canadian National Railways, Brandon, Manitoba. Excluded from the bargaining unit were the manager, assistant manager, chief steward, head waiter, accountant, housekeeper, the clerk-stenographer acting as secretary to the manager, head porter, head chef and house officer.

Certification followed a public hearing and an investigation of the application by an Officer of the Board.

(19) *Canadian Brotherhood of Railway Employees and Other Transport Workers, Lakehead Division No. 32, and Canadian National Railways (Prince Arthur Hotel), Port Arthur, Ontario* (L.G., Dec., 1944, p. 1482). Following a public hearing and an investigation of the application by an Officer of the Board, the Board certified the Union and Messrs. H. A. Chappell, Thos. Cecil Lambert and John Peter McFarlane as bargaining representatives for the employees of the Prince Arthur Hotel, Canadian National Railways, Port Arthur, Ontario. Excluded from the bargaining unit were the manager, chief steward, chef, housekeeper, head waitress, accountant, the clerk-stenographer acting as the manager's private secretary, laundry superintendent, employees on the mechanical staff and employees engaged in the beer parlour.

(20) *International Brotherhood of Blacksmiths, Dropforgers and Helpers, Sunshine Local No. 520, and Canadian Pacific Railway Co. (B.C. Coast Steamship Service, Maintenance Department), Victoria, B.C.*, (L.G., Dec., 1944, p. 1482). The Union and Messrs. Albert Young, George Hardy, Thomas Hammond, and J. T. Galloway were certified as bargaining representatives for the employees of the Maintenance Department of the Canadian Pacific Railway Co. (B.C. Coast Steamship Service), Victoria, B.C. Foremen were excluded from the bargaining unit. Certification followed an investigation of the application by an officer of the Board.

(21) *Deepsea and Inlandboatmen's Union, Pacific Coast District, Canadian Seamen's Union and the Union Oil Company of Canada Limited (M.V. Unacana), Vancouver, B.C.*, (L.G., Jan., 1945, p. 36). Following a representation vote in which the applicant union obtained the support of a majority of the eligible employees, the union and Messrs. J. M. Smith, George Bogard and Harry Sipes were certified as bargaining representatives for the unlicensed personnel of the steward's, engine room and deck departments of the M.V. *Unacana* owned and operated by the Union Oil Company of Canada Limited, Vancouver, B.C.

(22) *Canadian Navigators Federation, St. Lawrence Division, and Branch Lines Limited, Sorel, P.Q.*, (L.G., Oct., 1945, p. 1221). The Federation and Messrs. Cyriac Gauthier and Joseph E. Ouellette were certified as bargaining representatives for the employees designated as first and second officers of Branch Lines Limited, Sorel, P.Q. Certification followed an investigation of the application by an officer of the Board.

(23) *The International Longshoremen's and Warehousemen's Union, Local 501, and Great Northern Railway Company, Vancouver, B.C.* (L.G., Jan., 1945, p. 36). Following an investigation of the application by an Officer of the Board, the Board certified the Union and Messrs. Joseph Boyes, and Austin G. Smith as the bargaining representatives for the employees of the Great Northern Railway Company, employed at its dock, at the foot of Campbell Avenue, Vancouver, B.C., in the capacity of crane drivers, lift jitney drivers, truckers, car loaders, car bracers, dock equipment maintenance men, conditioners, and car cleaners, locker men, scow men and slingmen. Excluded from the bargaining unit were longshoremen, scow men and slingmen employed in the loading and unloading of coastwise vessels, scows or barges operated by members of the Shipping Federation of B.C. and also clerical and office employees, foremen and checkers.

(24) *The International Longshoremen's and Warehousemen's Union, Local 501, and Various Shipping Companies represented by the Shipping Federation of B.C., Vancouver, B.C.*, (L.G., Dec., 1944, p. 1482). Messrs. Rosco Craycraft, Steve Glunas, Austin Smith, Joseph Boyes, Peter Hughes, J. A. Taylor, W. H. Chawner, J. R. Burgess, S. R. MacKenzie, Tim Moody, D. Jacobson, Edward Upton, Frank Baker, Joe Jerome, Al Bates and Morris Smith of Local 501, International Longshoremen's and Warehousemen's Union were certified as the properly chosen bargaining representatives of the deepsea longshoremen employed on behalf of various shipping companies by the Shipping Federation of B.C., Vancouver, B.C., unloading and handling cargoes to and from deepsea vessels in the Vancouver area. Certification followed a public hearing and an investigation of the application by an Officer of the Board.

Applications for Certification Rejected

1. *British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers' International Union of North America and Park Steamship Company Limited* (L.G., Jan., 1945, p. 36). Following a representation vote ordered by the Board in which the applicant

union was not supported by a majority of the eligible employees, the Board rejected the application for certification of bargaining representatives.

2. *Mercantile Marine Officers' Guild of Canada and Keystone Transports Limited, Montreal, P.Q.* (L.G., Jan., 1945, p. 35). Following an investigation of the application by an officer of the Board, the Board rejected the application for the reason that it was not shown that the bargaining representatives named in the application had been regularly elected or appointed by the Guild.

Application for Certification Withdrawn

Canadian Brotherhood of Railway Employees and Other Transport Workers, Clerical Div. No. 137 and Canadian National Railways (Regional Treasurer's Office) Moncton, N.B. (see this issue, p. 290.) On the request of the General Chairman of the Canadian Brotherhood of Railway Employees and Other Transport Workers, the application for certification of bargaining representatives was withdrawn since the parties had agreed to negotiate without formal certification by the Board.

Representation Votes Ordered

1. *The British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers' International Union of North America and British Columbia Cement Company, Limited*, (L.G., Feb., 1945, p. 154). The eligible voters are the unlicensed personnel in deck, engine room and steward's departments on M.V. *Island King* of the B.C. Cement Company, Limited, Victoria, B.C.

2. *The British Columbia Seamen's Union, Vancouver Branch, Pacific District, Seafarers' International Union of North America and B.C. Packers Limited, Vancouver, B.C.* (L.G., Feb., 1945, p. 154). The eligible voters are the unlicensed personnel in deck, engine room and steward's departments on the vessels *Teco* and *P.W.* of the B.C. Packers Limited, Vancouver, B.C.

Applications for Certification under Investigation

(1) Brotherhood of Sleeping Car Porters on behalf of sleeping car porters on all types of sleeping cars and parlour cars of the Canadian Pacific Railway Co., Montreal, P.Q.

(2) Canadian Air Line Pilots' Association on behalf of all pilots in the employ of Trans-Canada Air Lines, Winnipeg, Man.

(3) Brotherhood of Railroad Trainmen on behalf of road train conductors employed on

the Canada Division (Michigan Central Railroad), New York Central Railroad Company, St. Thomas, Ontario.

(4) Brotherhood of Railroad Trainmen on behalf of road train conductors employed on the Buffalo Division of the Wabash Railroad Company (Lines east of Detroit), St. Thomas, Ontario.

(5) Brotherhood of Railroad Trainmen on behalf of road train conductors employed on the Canadian Division of the Pere Marquette Railway, St. Thomas, Ontario.

(6) Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of the clerical staff in the offices of the Canadian National Railways, Moncton, N.B.

(7) Hotel and Restaurant Employees' International Alliance and Bartenders' International League of America on behalf of certain employees of the Nova Scotian Hotel, Canadian National Railways, Halifax, N.S.

(8) Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of certain employees of the Palliser Hotel, Canadian Pacific Railway Company, Calgary, Alta.

(9) Canadian Brotherhood of Railway Employees and Other Transport Workers, Local Division 192 on behalf of all employees except superintendent, chief clerk, office staff and watchman of the Montreal Stock Yards, Canadian National Railways, Montreal, P.Q.

(10) International Longshoremen's and Warehousemen's Union, Local 503 on behalf of all longshoremen employed in the loading or unloading of cargo on vessels of the Empire Stevedoring Company at the port of Port Alberni, B.C.

(11) International Longshoremen's and Warehousemen's Union, Local 503 on behalf of all longshoremen employed in the loading or unloading of cargo on vessels of the Canadian Stevedoring Company, Vancouver, B.C., at the port of Port Alberni, B.C.

(12) Canadian Seamen's Union, Pacific Coast District, on behalf of the unlicensed employ-

ees in deck, engine room and steward's department on vessels of the Straits Towing and Salvage Company, Ltd., operating from Pacific Coast ports.

(13) Brotherhood of Railroad Trainmen on behalf of road train conductors employed by the Esquimalt and Nanaimo Railway, Victoria, B.C.

(14) Sentinel Steam Plant Workers' Union, on behalf of certain employees of the East Kootenay Power Company, Limited (steam turbine generator plant), Sentinel, B.C.

Decisions of Board in Appeal Cases

The Board issued Reasons for Judgment in the following cases:

International Union of Mine, Mill and Smelter Workers, Local 240, and Wright-Hargreaves Mines, Limited (Kirkland Lake), and Sylvanite Gold Mines, Limited (Kirkland Lake), respondents, and Independent Canadian Mine Workers' Union and Sylvanite Employees' Association, Interveners.

Western Canada Firebosses Association, District No. 1, applicant, and Crow's Nest Pass Coal Company, Fernie, B.C., International Coal and Coke Company, McGillivray Creek Coal and Coke Company, Limited, of Coleman, Alta., Western Canadian Collieries, Blaimore and Bellevue, Alta., Hillcrest-Mohawk Collieries, Bellevue, Alta., respondents, and between National Union of Firebosses, Local No. 1, applicant, and Brilliant Coal Company and fifteen other Coal Operators, members of Drumheller Coal Operators' Association, respondents.

Local 195 of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, respondent, and Canadian Automotive Trim Limited, appellant.

Local 195 of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, respondent, and Chrysler Corporation of Canada, Limited, appellant.

The text of the Board's Reasons for Judgment in the various cases appears below.

Between: International Union of Mine, Mill and Smelter Workers, Local 240, petitioner, and Wright-Hargreaves Mines, Limited, (Kirkland Lake), and Syvanite Gold Mines, Limited, (Kirkland Lake), respondents, and Independent Canadian Mine Workers' Union, and Sylvanite Employees' Association, interveners.

The Board consisted of the Chairman and all other members of the Board except the Vice-Chairman.

Reasons for Judgment

These are two appeals which were argued at the same time because they involve the

same issue. The Ontario Labour Relations Board directed a "run-off" vote of the employees of the respondent Companies and the appeals are taken from the direction of the Ontario Board in each case.

The Union elected or appointed bargaining representatives for the employees of Wright-

Hargreaves Mines on May 14, 1944, and applied to the Ontario Board to certify them on May 16, 1944. The Board heard the application on October 3, 1944, and on November 15, 1944, directed a vote of the employees in an effort to satisfy itself that the Union acted with the authority of the majority of the employees affected in electing or appointing bargaining representatives. The Ontario Board settled the ballot in the following form:—

Mark X Opposite Your Choice

In your dealings with Wright-Hargreaves Mines, Limited, do you desire to be represented for collective bargaining purposes by

International Union of Mine, Mill and Smelter Workers, Local 240?

Independent Canadian Mine Workers' Union?

The vote was held on August 15, 1944, and resulted as follows:—

International Union of Mine, Mill and Smelter Workers, Local 240	185
Independent Canadian Mine Workers' Union	161
Majority for International Union	24
Eligible votes	396

In the result, the International Union did not obtain a majority of those entitled to vote.

In the Sylvanite Gold Mines Limited, the Ontario Board settled the ballot in the following form:—

Mark X Opposite Your Choice

In your dealings with Sylvanite Gold Mines Limited, do you desire to be represented for collective bargaining purposes by

International Union of Mine, Mill and Smelter Workers, Local 240?

Sylvanite Employees Association?

The vote was held on August 15, 1944, and resulted as follows:—

International Union of Mine, Mill and Smelter Workers, Local 240	103
Sylvanite Employees' Association	92
Majority for International Union	11
Eligible votes	232

It will be noted that, here again, the International Union failed to get a majority of those entitled to vote.

The result of the vote did not satisfy the Ontario Board and as a result of a further application by the petitioners the Ontario Board, on November 15, 1944, directed a new vote of the employees affected and directed that voters should be asked to indicate whether or not they wished to bargain collectively with the respondent Companies through the petitioners, that is to say, the names of the Interveners were directed to be omitted from the new ballots.

The Ontario Board held that in view of the decision of this Board it could not, on the basis of the vote of August 15, 1944, certify the bargaining representatives designated

either by the petitioner or the intervener but, on the other hand, if it were to dismiss both petitions, it would be ignoring the highly significant fact that between 85 per cent and 88 per cent of the employees affected expressed a desire to bargain collectively with the employer and when confronted with the choice between two trade unions some voters expressed a preference for one and some for the other. The Ontario Board felt that it would be improper to assume that each voter was so committed to the union for which he voted that he would rather forego the privilege of collective bargaining than bargain through the other union.

In our opinion the proper purpose of the vote is not to ascertain whether each employee is so committed to the union of his choice that he would rather forego the privilege of collective bargaining than bargain through the other union. The purpose of the vote is set out in sections 7 and 5 of the Regulations—namely “the Board shall . . . satisfy itself . . . in the case of a trade union, that the trade union acted with the authority of the majority of the employees affected as prescribed by sub-section 2 of section 5” namely whether “the majority of the employees affected are members of *one trade union.*” “An employee shall be deemed to be a member of the trade union if he has in writing requested the trade union to elect or appoint bargaining representatives on his behalf”. The votes already taken show that the employees affected in each case are divided almost equally between the two unions and bargaining representatives cannot be certified unless and until a majority of the employees affected decide to join one union or the other or until the two unions join in electing bargaining representatives as provided by section 5 (5). The proposed run-off vote cannot prove that a majority of the employees affected are members of one trade union because the evidence establishes that is not the fact.

We allow the appeal, set aside the direction for a second vote, and reject the applications in each case.

We believe that future difficulties may be obviated if we set down shortly the procedure which it is proposed should be followed in dealing with applications by unions subject, of course, to any necessary modifications from time to time.

(1) Upon receipt of the application an investigating officer of the Board will examine the membership records of the applicant union and of any other union interested in the application. He will check the membership records with the Company's payroll, comparing the signatures in the union records with the

signatures in the employer's records, if necessary, and report to the Board.

(2) Unless the Board is prima facie satisfied that a majority of the employees affected are members of the applicant union, the Board will reject the application.

(3) If the Board finds that a substantial majority of the employees affected are regular members of the applicant union—that is, if they have joined in the regular way and have paid dues—the Board may certify bargaining representatives without directing any vote.

(4) If the Board finds that the majority of the employees affected who belong to the applicant union is not substantial or that an important section of the alleged majority consists of employees who are not regular members but who have signed requests for the applicant union to elect or appoint bargaining representatives on their behalf, the Board will in most cases, on the application of the employer, direct a vote.

(5) The Board will not include in the ballot the name of any intervening or competing union unless the Board is also prima facie satisfied that a majority of the employees affected are members of the competing or

intervening union. This will rarely happen and it can only happen if some of the employees affected belong to or sign authorizations for more than one union so that they may be deemed to be members of two or more unions.

(6) If the applicant union fails to secure a majority vote of the employees affected, this will leave it open for another organization to apply and seek a new vote on its application.

(7) When this procedure has been followed and an application is rejected, a new application by the same union should not be entertained until a period of at least six months has elapsed.

(Sgd.) G. B. O'CONNOR,
Chairman.

A. J. Slaght, Esq., K.C., and W. S. Walton, Esq., appeared for the Respondents; Bruce Williams, Esq., K.C., for the intervener, Independent Canadian Mine Workers Union; Mr. J. J. Robinette, for the intervener, Sylvanite Employees' Assn.; and Mr. J. L. Cohen, K.C., for the Petitioner.

February 28, 1945.

Between: Western Canada Firebosses Association, District No. 1, Applicant, and Crow's Nest Pass Coal Co., Fernie, B.C., International Coal and Coke Company, McGillivray Creek Coal & Coke Co., Ltd., of Coleman, Alta., Western Canadian Collieries, Blairmore and Bellevue, Alta., Hillcrest-Mohawk Collieries, Bellevue, Alta., respondents, and between National Union of Firebosses, Local No. 1, applicant, and Brilliant Coal Company and fifteen other Coal Operators, members of Drumheller Coal Operators' Association, respondents.

The Board consisted of Chairman O'Connor and Members Deschamps, Harmegnies, Hills, Molineux, Mosher and Taylor.

Reasons for Judgment

These are two applications for certification of bargaining representatives for 174 firebosses employed by the respondents who contend that certification should not be granted because firebosses are supervisory or confidential employees.

Firebosses or examiners have no authority to employ but they may "send a man home" and report to the mine manager who may dismiss the employee. They have statutory duties to secure the safety of the mines.

The Alberta Coal-mines Regulation Act (Ch. 7, 1930, Alberta) section 2 (*h*) defines "examiner" as follows:—

2. (*h*) "Examiner" means a competent person appointed to inspect the working places in a mine, the roadways and approaches thereto and other accessible parts of the mine and includes a fireboss;

Part V of the Statute provides for the appointment and qualification of managers, overmen and examiners or firebosses, and section 37 (4) provides:—

37. (4) The examiner shall not perform any other duties or work in a mine in addition to performing his duties as an examiner, if such other duties or work interfere with the due performance of the duties imposed upon him by this Act.

Further provision is made, by section 66 (3) that the mine inspector will, if necessary, settle any dispute as to whether other duties assigned to the examiner interfere with the due performance of duties imposed upon him under the Act.

In the result, the fireboss has a primary duty to safeguard the lives of coal miners and a secondary duty to his employer to perform any other duties which will not interfere with his duties as examiner. In practice the employer naturally endeavors to get the fireboss to perform as many other duties as possible. The fireboss may be called upon to report on the ability of a miner.

The applicant unions are chartered by the Trades and Labour Congress of Canada and the Canadian Congress of Labour respectively. This is in accordance with the British practice under which the Coal Mine Deputies, who correspond to firebosses, are organized as the Federation of Deputies Association which is affiliated with the British Trades Union Congress. Previously the firebosses in Alberta and British Columbia were not organized and they suffered the disadvantages of all employees who do not have the benefit of collective bargaining. Their rates of pay, working conditions and, indeed, their continued employment, were dependent solely on their ability to please and satisfy their employers.

The Commissioner appointed to conduct an inquiry into a disaster whereby 29 men lost their lives on October 31, 1941, in a coal mine known as No. 3 mine, owned and operated by Brazeau Collieries Limited at Nordegg, Alberta, reported that the cause of the disaster was an explosion resulting from a shot fired by a fireboss who neglected to make the necessary inspection before firing and that it was the general practice of the firebosses to fire shots without inspecting for gas.

In interpreting the Regulations, we must not lose sight of the purpose and object of them. There is no magic in certification of bargaining representatives. There is nothing in the Regulations to prevent the organization of firebosses in a union or to prevent such union from entering into an agreement with an employer. If firebosses are employees within the Regulations, they may not strike until 14 days after a conciliation board reports to the Minister of Labour for Canada that an attempt has been made to effect an agreement between the employer and the employees in question and the parties have failed to reach an agreement. On the other hand, if firebosses are not employees within the Regulations, then they may strike without any preliminary negotiation or conciliation.

The material provision in the Wartime Labour Relations Regulations, P.C. 1003, section 2 (1) (f) is as follows:—

2. (1) (f) "employee" means a person employed by an employer to do skilled or unskilled manual, clerical or technical work; but does not include

- (i) a person employed in a confidential capacity or having authority to employ or discharge employees; or
- (ii) a person employed in domestic service, agriculture, horticulture, hunting or trapping;

In addition to the definition of "employee" in the Regulations, section 25 gives the Board

final jurisdiction to determine whether "the unit of employees appropriate for collective bargaining is the employer unit, craft unit, plant unit, or a subdivision thereof". Section 25 does not authorize the Board to deny collective bargaining entirely. The definition of "employee" in section 2 (1) (f) may, of course, exclude the applicants.

It is contended that a fireboss is not employed to do skilled or unskilled manual, clerical or technical work. His statutory duties are set out in the Alberta Mines Act and the British Columbia Mines Act which make a clear distinction between the supervisory duties of managers, overmen, assistant overmen, cager, outside foreman, driver-boss, and banksman, on the one hand; and the duties of the examiner or fireboss, the shot-lighter, and the lampman, on the other hand, which are not supervisory.

The next contention is that a fireboss who can "send a man home" and recommend his dismissal has authority to discharge employees. Affidavits were filed by counsel for the Drumheller Coal Operators' Association to show the authority of a fireboss to discharge but, in most instances, the fireboss had merely sent the man home and reported to the mine manager who had either discharged or reinstated the employee. This shows that the fireboss had no authority to discharge.

The last contention is that a fireboss is employed in a confidential capacity. The National Labour Relations Board, U.S.A., in the matter of Creamery Package Manufacturing Company and S.W.O.C. 34 N.L.R.B. No. 15, defined confidential employees as those having confidential information as to labour relations. There is no evidence that firebosses have any such information.

In *United Automobile, Aircraft and Agricultural Implement Workers of America, Local 240 v. Ford Motor Company of Canada Limited*, (1944) O.W.R. 86, Registrar (J. Finkleman, Esq.) interprets the word "confidential" and said (p. 88): "In view of these considerations, it would appear that persons acting on behalf of their employer in a confidential capacity have been excluded from the benefits of the Ontario Collective Bargaining Act because they are under the special guidance and care of, and have an intimate relation with, management. Consequently, any test which might be applied in determining the eligibility of a person acting on behalf of an employer in a confidential capacity must take account of this circumstance". Applying this test, we do not find that firebosses are under the special guidance and care of, or have an intimate relation with, management.

As the applicants have complied with the Regulations, the applications should be granted and the bargaining representative should be certified.

G. B. O'CONNOR,
Chairman.

A. R. MOSHER
FRED MOLINEUX
RENE HARMEGNIES

Ottawa, February 1, 1945.

Dissenting Opinion

The dissenting opinion is written by Harry Taylor and concurred in by A. Deschamps and A. J. Hills.

The majority opinion of the Board holds that the firebosses involved are employees within the Wartime Labour Relations Regulations, P.C. 1003, and flowing from this the majority decides that the chosen bargaining representatives of the union involved are entitled to certification. The minority opinion of the Board disagrees with this decision on the basis that the firebosses involved are not employees and in consequence of this are not entitled to certification.

The main reasons for dissenting are that evidence was submitted to the Board and, or representations were made by the employing companies to the effect that:—

1. Firebosses have authority to discharge.
2. Firebosses have authority to suspend employees and evidence indicates that suspensions are confirmed.
3. Firebosses have authority to otherwise discipline employees. In fact in some cases it is the duty of firebosses to do so.
4. Firebosses are required to deal confidentially with some matters relating to staff, such as attitude, competence, etc.
5. Part of duties of firebosses is to measure work performed.
6. Firebosses are required to bargain on behalf of the company with the employees for wage rates in pulling a "room" which rates the employer is bound to pay.

On the statement of union representations:—

7. Firebosses are law enforcement officers and the policy of the Board has been to declare policemen who are likewise law enforcement officers as not being employees for purposes of the Regulations.

There are further reasons that occur to us viz. that:—

8. Firebosses could by their acts expose the employer to a charge of unfair practice.
9. Firebosses can and in some circumstances must institute prosecution proceedings and testify for infractions of the Mines Act.

The question of frequency with which firebosses use authority possessed by them cannot in any way change the status of the individual. Infrequent use of the authority in the matter of discipline may in some cases be a mark of good leadership.

It is generally understood that an employer is responsible for the actions and conduct of his supervisors and other agents, particularly in the matter of industrial relations. To rule otherwise would be not only to excuse the employer from this responsibility but to leave the supervisory forces and other agents free to commit unfair labour practices at will on behalf of the employers. By virtue of the authority possessed by firebosses they are in the position of agents of the employer and they are free to expose the employer to unfair practices as above indicated as well as in other ways. To permit individuals to have a dual status, namely "employee status" and "employer status", for purposes of collective bargaining is, we feel, illogical, impractical, unfair and in our opinion is inconsistent with the true purpose and intent of the Wartime Labour Relations Regulations, P.C. 1003.

The point raised by the union that The Mines Act of Alberta does not specifically grant firebosses the right to employ and discharge employees hardly requires comment. In no legislation has the Government taken upon itself the right to determine who shall employ and who shall discharge employees, other than the blanket provisions contained in the National Selective Service (Civilian) Regulations. In these Regulations, the prohibition applies to the entire company. It is not restricted to particular positions or classifications within the company.

Nothing in The Mines Act of Alberta prohibits an employer from assigning additional duties and responsibilities to firebosses over those provided for in the Act, as long as such additional duties do not interfere with the enforcement of the Act.

The Mines Act of Alberta sets out minimum standards of procedure apparently designed to prevent accidents. There is nothing in the Act which precludes an employer from instituting additional safeguards and procedures to insure safety of its employees and further, assigning the responsibility to the firebosses.

In order that firebosses may carry out the duties imposed by the Mines Act, it is obvious they must have considerable authority in directing the working forces and to be effective, the workers must be bound to conform to the direction of the firebosses. The direction of the working forces is clearly a management function.

Section 153 of The Mines Act of Alberta reads as follows:—

It shall be unlawful for any person, owning or operating any mine in the Province, or any officer, agent, representative, manager or overseer of the company or corporation or labour official of labour organization, to interfere or attempt to interfere with the fireboss or

examiner of any mine in the Province in the performance of his duties; or by any threat or threats or duress to intimidate or attempt to intimidate any fireboss or examiner in the performance of his duties; or by persuasion or promise or by extending hope of reward in any way, to influence any fireboss or examiner in the performance of his duties, or to attempt in any way to cause or induce such fireboss or examiner to fail or neglect to perform any duty required of him by this Act. 1939, c. 51, s. 153.

This section contains the strongest kind of prohibition with respect to firebosses joining any labour organization.

The question as to whether or not firebosses should be wholly independent of the employer is not a matter for this Board to decide. The Alberta Government in passing the Mines Act has decided otherwise and unless and until the Alberta Government changes the Act this Board we feel should accept the Act as it is. The Alberta Government has decided that fire-

bosses should be employed by, paid by, and directed by the employing companies. In consequence of this and by reason of their full duties they are agents of the employer not of the Government. They have "employer status" and not "employee status" for the purpose of the Regulations.

H. TAYLOR
A. DESCHAMPS
A. J. HILLS

Ottawa, February 14, 1945.

Messrs. P. R. Bengough and J. A. Sullivan appeared for Western Canada Firebosses; Mr. C. Stubbs for Western Canada Bituminous Coal Operators' Association; Mr. Pat Conroy for National Union of Firebosses; and Messrs. V. C. Cooney and H. W. Clark for Coal Companies, Drumheller, Alberta.

Between: Local 195 of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, respondent, and Canadian Automotive Trim Limited, appellant.

The Board consisted of the Chairman and all other members except the Vice-Chairman and Mr. W. L. Best.

Reasons for Judgment

(The judgment of the Board was delivered by the Chairman.)

This is an application for leave to appeal and an appeal by the employer company from a decision of the Ontario Labour Relations Board which, on October 28, 1944, established a grievance procedure for the employees of the employer company, the material words of which are as follows:—

"disputes concerning a grievance arising under the collective agreement between . . ."

On June 21, 1944, the Ontario Board established a grievance procedure for the employees of the Dominion Forge and Stamping Company, Limited, using the same words.

On appeal to this Board, on September 28, 1944, we struck out the words "concerning a grievance arising under" and substituted the words of section 18 (2) viz: "disputes concerning the interpretation or violation of the collective agreement".

It is convenient to deal separately with the reasons given by the Ontario Board for failing to follow the judgment of this Board.

1. The Ontario Board purports to follow the grievance procedure established by this Board for the employees of the Ford Motor Company of Canada on May 12, 1944, which uses

the words "disputes concerning a grievance arising under a collective agreement".

The Ford grievance procedure was established by this Board at the request of the union and the employer company, both of whom agreed to abide by the decision of this Board. Under these circumstances, we acted as an Arbitration Board and were not limited by the provisions of section 18 of the Regulations "concerning its interpretation or violation". In any event, the Ford grievance procedure was established on May 12, 1944, while the Dominion Forge grievance procedure was revised by this Board on October 28, 1944. We have no reason to think that the grievance procedure which we now establish will be satisfactory for all time.

2. The Ontario Board complains that we gave no Reasons for Judgment. We said "We find that the jurisdiction of the Ontario Board was limited by section 18 to establishing a procedure for final settlement of differences concerning the interpretation or violation of the collective agreement". Perhaps we should have said that the jurisdiction of all Labour Relations Boards to establish a grievance procedure was limited by the words of section 18.

3. The Ontario Board points out that the grievance procedure which we have established makes no provision for the possibility that the employer and the union will disagree as to whether the grievance concerns the interpretation or violation of the agreement, and predicts "It would mean that the parties to the collective agreement have

been put into a strait-jacket from which they can escape only by violently bursting their bonds”.

Without questioning the advisability of the proposed remedy for both employer and employee under proper circumstances, we think that the Ontario Board is not only unduly apprehensive but it appears to have overlooked the significance of the word “interpretation”. In the case of a dispute as to whether or not contract provisions have been violated, it must certainly be determined what the contract provisions are in order to decide whether the provisions have in fact been violated. It is for this purpose the Regulations provide for interpretation of the contract. This can, and in many cases will, be a separate arbitration and may or may not be related to a particular grievance, but may be brought about in some cases in order to avoid a grievance developing due to misunderstanding.

We settle the grievance procedure in this case by directing the parties to include in the collective agreement the following final step in the grievance procedure and the following arbitration procedure:—

“Where the union on behalf of an employee concerned alleges that there has been a misinterpretation or a violation of this agreement, the difference between the parties and any grievance involving such misinterpretation or violation shall within five regular work days (excluding Sundays and holidays or days observed therefor) from the date of the decision in the preceding step be referred to arbitration in a manner and under conditions set forth in this agreement under the heading of Arbitration.

Arbitration Procedure

“Upon the written request of the union on behalf of the employee concerned made to the company, or upon the written request of the company made to the union, any such grievance which has not been settled to the satisfaction of the parties concerned after being carried through the relevant steps of the grievance procedure of this agreement shall be referred to an umpire. Such umpire shall be chosen by mutual agreement of the parties involved, but failing such agreement within five regular work days (excluding Sundays and holidays or days observed therefor) from the date of the written request for arbitration the umpire shall be chosen by the Minister of Labour for the Province of Ontario.

“The company, and the union on behalf of the employee concerned, shall within three

regular work days (excluding Sundays and holidays or days observed therefor) from the date of the appointment of the umpire sign a joint stipulation of the dispute or the question which is to be arbitrated. Such stipulation shall contain a statement of the issue in dispute and in addition may include a brief statement of the position of the company as well as a brief statement of the position of the union on the question at issue although such statements are in conflict with respect to the positions of the parties.

“If the company, and the union on behalf of the employee concerned, fail to sign a joint stipulation as aforesaid, either party may apply to the Ontario Labour Relations Board to settle such stipulation.

“Unless otherwise mutually agreed by the parties, the arbitration hearings shall begin within five regular work days (excluding Sundays and holidays or days observed therefor) from the date of the filing of the stipulation with the umpire. Such hearings shall be held at a place mutually agreed upon by the parties or, failing agreement, as fixed by the umpire.

“The jurisdiction of the umpire shall be limited to a decision on the dispute or question set forth in the stipulation. In arriving at his decision, the umpire shall not change or disregard any of the provisions of the agreement nor shall he vary, reduce, or set aside any penalty imposed upon any employee or substitute a different penalty for one so imposed in connection with any alleged breach of discipline or infraction of the company's rules and regulations by such employee unless the umpire finds the company has violated or misinterpreted this agreement and/or such employee has not committed the alleged breach of discipline or infraction of rules and regulations.

“All decisions of the umpire arrived at in accordance with the provisions of this agreement shall be final and binding on the company and all persons concerned. The expenses, if any, of the umpire shall be divided equally between the company and the union and shall be paid by them.”

Leave to appeal will be granted and the appeal will be Allowed in accordance with the foregoing.

The Appellant was represented by Messrs. J. B. Aylesworth, K.C., and W. L. Webster; and the respondent union by Messrs. J. Eldon, Cyril Prince, O. Dupuis and Miss Florence Kent.

Between: Local 195 of the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, respondent, and Chrysler Corporation of Canada, Limited, appellant.

The Board consisted of the Chairman and all other members except the Vice-Chairman and Mr. W. L. Best.

Reasons for Judgment

The judgment of the Board was delivered by the Chairman.

This is an application for leave to appeal and an appeal by the employer company from a decision of the Ontario Labour Relations Board which, on October 31, 1944, established

a grievance procedure for the employees of the employer company, the material words of which are as follows:—

disputes concerning a grievance arising under the collective agreement between

We refer to our Reasons for Judgment in the appeal of the Canadian Automotive Trim Limited.

(The Board's judgment in this case was the same as in the case referred to.)

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiation for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdiction. A Conciliation Officer is then appointed to confer with the parties and endeavour to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During February reports were received from twelve Boards of Conciliation:—

Concerning Beardmore and Company, Limited, Acton, Ont., and Local No. 26, National Union of Shoe and Leather Workers.

Concerning Canadian Industries, Limited, Toronto, Ont., and Canadian Industrial Workers Union No. 1 (C.C.L.).

Concerning Ingersoll Machine and Tool Co., Ltd., Ingersoll, Ont., and Local 2918, United Steelworkers of America.

Concerning General Dry Batteries Limited of Canada, Toronto, Ont., and Local 512, United Electrical, Radio and Machine Workers of America.

Concerning Fowler's Canadian Company, Limited, Hamilton, Ont., and United Packing-house Workers of America.

Concerning Yarrows Limited, Esquimalt, B.C., and Local No. 1, Industrial Clerks Association.

Concerning Upper Canada Mines, Limited, Dobie, Ont., and Local 240, Kirkland Lake Mine and Mill Workers Union.

Concerning Senator Rouyn Mines, Limited, Rouyn, P.Q., and Local 688, Rouyn Mine, Mill and Smelter Workers Union.

Concerning Ontario Steel Products Company, Limited, Oshawa, Ont., and Local 222, United Automobile, Aircraft and Agricultural Implement Workers of America.

Concerning Ontario Steel Products Company, Limited, Chatham, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.).

Concerning Golden Manitou Mines, Limited, Val d'Or, P.Q., and Local 654, Val d'Or Mine and Mill Workers Union.

Concerning Steel Company of Canada, Limited (Gananoque Works), Gananoque, Ont., and Local 3208, United Steelworkers of America.

Boards Fully Constituted

During February twelve Boards of Conciliation were fully constituted:—

Seiberling Rubber Company of Canada, Limited, Toronto, Ont.—The Board of Conciliation established to deal with a dispute between Seiberling Rubber Company of Canada, Limited, Toronto, Ont., and Local 118, United Rubber Workers of America was fully constituted on February 14 with the appointment of His Honour Judge J. Parker of Toronto, as Chairman of the Board, on the nomination

of the other two members. Mr. James L. McLennan of Toronto, and Mr. Arthur Williams of Oshawa, were appointed on the nomination of the employer and employees respectively.

Peacock Brothers Limited, Ville La Salle, P.Q.—The Board of Conciliation established to deal with a dispute between Peacock Brothers Limited, Ville La Salle, P.Q., and Lodge 631, International Association of Machinists was fully constituted on February 2 with the appointment of the Honourable Mr. Justice Wilfrid Lazure of Montreal as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Mr. T. R. Ker and Mr. Alex Gauld of Montreal were appointed on the nomination of the employer and employees respectively.

National Electric Manufacturing Company, Toronto, Ont.—The Board of Conciliation established to deal with a dispute between National Electric Manufacturing Company, Toronto, Ont., and Local 512, United Electrical, Radio and Machine Workers of America was fully constituted on February 2 with the appointment of His Honour Judge W. T. Robb of Orangeville as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Messrs. B. H. L. Symms, and John Eldon of Toronto were appointed on the nomination of the employer and employees respectively.

Bush and Miller Company, Eburne, B.C.—The Board of Conciliation established to deal with a dispute between Bush and Miller Company, Eburne, B.C., and Local 1-217, International Woodworkers of America was fully constituted on February 7 with the appointment of Mr. A. R. MacDougall of Vancouver as Chairman, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Col. G. H. Kirkpatrick of Vancouver was appointed by the Minister on behalf of the employer in the absence of a nomination from the employer. Mr. G. S. Culhane of Vancouver was appointed on behalf of the employees concerned.

Genelco Limited, Peterborough, Ont.—The Board of Conciliation established to deal with a dispute between Genelco Limited, Peterborough, Ont., and Local 524, United Electrical Radio & Machine Workers of America was fully constituted on February 17 with the appointment of His Honour Judge W. T. Robb of Orangeville as Chairman, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two

members. Mr. J. S. D. Tory of Toronto and Mr. George Burt of Windsor were appointed on behalf of the employer and employees respectively.

Dairy Co-operative Marketing Association, Prince Albert, Sask.—The Board of Conciliation established to deal with a dispute between Dairy Co-operative Marketing Association, Prince Albert, Sask., and Local 241, United Packinghouse Workers of America was fully constituted on February 19 with the appointment of Mr. A. M. McIntyre, K.C., of Saskatoon as Chairman on the nomination of the other two members. Mr. George H. Carr, Prince Albert and Mr. A. C. Ellison, K.C., of Regina were appointed on behalf of the employer and employees respectively.

Empire Brass Company, Limited and Pumps & Softeners, Limited, London, Ont.—The Board of Conciliation established to deal with a dispute between Empire Brass Company, Limited and Pumps & Softeners, Limited, London, Ont., and Local 2699, United Steelworkers of America was fully constituted on February 8 with the appointment of His Honour Judge J. J. Coughlin of Sandwich, Ont., as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Mr. Maurice Crabtree, K.C., of Toronto and Mr. Oliver Hodges of London were appointed on behalf of the employer and employees respectively.

Campbells Soup Company, Limited, New Toronto, Ont.—The Board of Conciliation established to deal with a dispute between Campbells Soup Company, Limited, New Toronto, Ont., and United Packinghouse Workers of America was fully constituted on February 8 with the appointment of His Honour Judge T. H. Barton of Toronto as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. The Honourable Senator G. Peter Campbell of Toronto and Mr. Arthur Williams of Oshawa were appointed on behalf of the employer and employees respectively.

Andrews Wire Works of Canada, Limited, Waterford, Ont.—The Board of Conciliation established to deal with a dispute between Andrews Wire Works of Canada, Limited, Waterford, Ont., and Local 2, Federation of Industrial Workers Union was fully constituted on February 22 with the appointment of His Honour Judge J. J. Coughlin of Sandwich, Ont., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Messrs. G. E. Burnson

and Herbert Orloff of Toronto were appointed on the nomination of the employer and employees respectively.

American Can Company, Limited, Vancouver, B.C.—The Board of Conciliation established to deal with a dispute between the American Can Company, Limited, Vancouver, B.C., and Local 2821, United Steelworkers of America was fully constituted on February 14, with the appointment of Mr. J. Edwin Eades, Vancouver, as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members. Mr. R. H. Pooley, Victoria, and Mr. H. Gargrave, M.L.A., Vancouver, were appointed on the nomination of the employer and employees respectively.

Corbin Lock Company of Canada, Belleville, Ont.—The Board of Conciliation established to deal with a dispute between Corbin Lock Company of Canada, Belleville, Ont., and Local 426, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.) was fully constituted on February 24, with the appointment of Dr. Cecil A. Wright of Toronto, as Chairman of the Board, who was appointed on the nomination of the other two members. Mr. G. A. Gale was appointed on behalf of the company while Mr. Bora Laskin of Toronto was appointed on behalf of the employees concerned.

Canadian Westinghouse Company, Limited, Hamilton, Ont.—The Board of Conciliation established to deal with a dispute between Canadian Westinghouse Company, Limited, Hamilton, Ont., and Local 504, United Electrical, Radio and Machine Workers of America was fully constituted on February 28, with the appointment of Dr. Cecil A. Wright of Toronto as Chairman of the Board, on the nomination of the other two members. Messrs. J. J. Robinette and Bora Laskin of Toronto were appointed on behalf of the employer and employees respectively.

Boards Established

During February seven Boards of Conciliation were established but not fully constituted.

Concerning *Thompson Brothers Machinery Company, Limited, Liverpool, N.S.*, and Federated Council of Thompson Brothers Machinery Company, Limited.

Concerning *Motor Products Corporation, Windsor, Ont.*, and Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.).

Concerning *Moffats Limited, Weston, Ont.*, and Local 3129, United Steelworkers of America.

Concerning *Federal Wire and Cable Company, Limited, Guelph, Ont.*, and Local 3021, United Steelworkers of America.

Concerning *Anaconda American Brass Limited, New Toronto, Ont.*, and Local 811, New Toronto Brass and Copper Workers Union.

Concerning *Ford Motor Company of Canada Limited, Windsor, Ont.*, and Local 240, United Automobile, Aircraft and Agricultural Implement Workers of America.

Concerning eight glass companies: *Advance Glass and Mirror Company, Limited; Canadian Plate and Window Glass; Consolidated Plate Glass Company; Excelsior Plate Glass Company; Hobbs Glass Company; Robert McCausland Company; Pilkington Bros. (Canada) Limited; and Queen City Glass Company, Limited*; all of Toronto, Ont., and Glassworkers Local Union No. 1487, Brotherhood of Painters, Decorators and Paperhangers of America.

Agreements Facilitated by Conciliation Officers

In the following cases reports were received from conciliation officers indicating the successful conclusion of negotiations and the signing of an agreement:

Concerning *John T. Hepburn, Limited, Toronto, Ont.*, with Local No. 28, International Moulders and Foundry Workers Union of North America.—H. Perkins, Conciliation Officer.

Concerning *Gelber Investments, Limited, Toronto, Ont.*, and Local 204, Building Service Employees' International Union.—G. Fenwick, Conciliation Officer.

Concerning *Dominion Electric Power, Limited, Estevan, Sask.*, and Electric Utilities Employees Union.—R. H. Hooper, Conciliation Officer.

Concerning *Dominion Bridge Company, Limited, Toronto, Ont.*, and Local 2808, United Steelworkers of America.—J. P. Nicol, Sr., Conciliation Officer.

Concerning *Beatty Brothers (Spencer Division) Penetang, Ont.*, and Local 3425, United Steelworkers of America.—H. Perkins, Conciliation Officer.

Assignment of Conciliation Officers

Conciliation officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:

Concerning *Smith & Stone Company, Limited, Georgetown, Ont.*, and Local 526, United Electrical, Radio and Machine Workers of America.—H. Perkins, Conciliation Officer.

Concerning *William Russell and Sons, Windsor, Ont.*, and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America.—F. J. Ainsborough, Conciliation Officer.

Concerning *Roy and Huebert, Windsor, Ont.*, and Local 1494 Brotherhood of Painters,

Decorators and Paperhangers of America.—F. J. Ainsborough, Conciliation Officer.

Concerning *Nicholls and Nicholls, Windsor, Ont.*, and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America.—F. J. Ainsborough, Conciliation Officer.

Concerning *National Painting and Decorating Company, Windsor, Ont.*, and Local 1494, Brotherhood of Painters, Decorators and Paperhangers of America.—F. J. Ainsborough, Conciliation Officer.

Concerning *Hepworth Furniture Company, Southampton, Ont.*, and Local 2690, United Brotherhood of Carpenters and Joiners of America.—F. J. Ainsborough, Conciliation Officer.

Concerning *Midland Shipyards, Limited, Midland, Ont.*, and Local No. 9, Industrial Union of Marine and Shipbuilding Workers.—H. Perkins, Conciliation Officer.

Concerning *Gotfredson Limited, Windsor, Ont.*, and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.).—J. P. Nicol, Conciliation Officer. (In-

vestigation of Conciliation Officer postponed pending appeal proceedings.)

Concerning *Fitton and Parker Furniture Company, Southampton, Ont.*, and Local 2690, United Brotherhood of Carpenters and Joiners of America.—F. J. Ainsborough, Conciliation Officer.

Concerning *Canadian Ramapo Iron Works Limited, Niagara Falls, Ont.*, and Local 179, International Chemical Workers Union.—J. P. Nicol, Conciliation Officer.

Concerning *Chrysler Corporation of Canada, Limited, Chatham, Ont.*, and Local 127, International Union, United Automobile Aircraft and Agricultural Workers of America (U.A.W.-C.I.O.).—J. P. Nicol, Conciliation Officer. (Investigation of Conciliation Officer postponed pending appeal proceedings.)

Concerning *Canadian Bridge Company, Limited (Plant No. 3), Windsor, Ont.*, and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.).—J. P. Nicol, Conciliation Officer. (Investigation of Conciliation Officer postponed pending appeal proceedings.)

Report of Board in Dispute between Beardmore and Company, Limited, Acton, Ont., and Local No. 26, National Union of Shoe and Leather Workers

On February 1 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Beardmore and Company, Limited, Acton, Ont., and Local No. 26, National Union of Shoe and Leather Workers. A minority report was submitted by Mr. Norman L. Mathews.

The Board was under the chairmanship of Dr. Cecil A. Wright, Toronto, appointed by the Minister of Labour on the joint recommendation of the other two members of the Board, Messrs. Norman L. Mathews, K.C., Toronto, appointed on the nomination of the employing company; and Mr. Lewis Duncan, K.C., also of Toronto, appointed on the nomination of the employees concerned.

The text of the Board's report and of the minority report, follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and re Beardmore Company Limited, Acton, Ontario, and Local No. 26, National Union of Shoe and Leather Workers.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you pursuant to the provision of Section 13 of P.C. 1003 begs to submit the following report.

At a preliminary meeting of the Board held at Toronto on October 25th, at the request of both parties to the dispute, who were represented by counsel, further proceedings were adjourned to November 21st, on which date the Board held a public hearing in the Town Hall, Acton, Ontario. At this meeting the Company was represented by R. R. Parker, Assistant General Manager of the Company; W. J. Beatty, Secretary-Treasurer of the Company and J. J. Robinette as counsel. The Union was represented by Oliver Hodges, National Representative; Harry Arbie, Chairman of the Negotiating Committee and F. A. Brewin as counsel.

Following this meeting the Board held meetings in Toronto, in the course of which it was decided to approach the parties with a view to their reopening negotiations. This was done, and at a further meeting at which counsel for the parties attended on December 8th, the Company made a proposal to the Union as a basis of discussion and compromise. From time to time the Board was advised that negotiations were proceeding satisfactorily, and on January 17, 1945, a meeting was held at Toronto, at which the same parties (with the exception of Mr. Arbie) who had appeared before the Board at Acton, were present. As a result of the negotiations between the parties and before the Board, the point of difference between the parties

was, as will appear, brought almost to the vanishing point, and it was hoped that the Board might be in a position to state that an agreement between the parties had been reached. Unfortunately, on one very small point, the parties were unable to agree, and it therefore falls to the Board to make its recommendations.

Since both parties were negotiating on a basis of compromise, reserving their rights to revert to their original claims in the event that complete agreement was not reached, on one view it might be thought that this Board should ignore the extent to which negotiations had proceeded, and agreement been reached, and consider on the merits the original contentions of the parties unaffected by the course of negotiations. We do not believe this to be sound in light of the extent to which negotiations have progressed.

As the matters on which the parties had indicated their willingness to agree, as a matter of compromise, were substantial issues of principle between them, we feel that no useful purpose would be served in reviewing the relations of the parties prior to the proceedings taken before this Board. We propose merely to state the issues presented to the Board; the matters on which concessions were agreed upon; and to view the one matter still in dispute in light of the concessions which have been agreed upon. Both parties having pursued a commendable policy of compromise throughout we believe our only function is to recommend what we believe to be in accord with the general spirit of the matters already agreed upon.

THE ISSUES

Of the several matters presented to the Board as being clauses on which the parties could not agree, one concerned *Wages*. The clause as proposed by the Company provided that the Union agreed to accept the scale of wages now existing for the lifetime of the agreement. The Union was unwilling to accept this clause and wished to include a provision for an increase in basic rates on joint application to the Regional War Labour Board. At the hearing the Company and the Union agreed to withdraw their respective clauses on this matter and to omit the question of wages from the present agreement leaving the matter to be settled in accordance with the Wartime Wages Control Order.

A similar disposition was agreed upon between the parties with respect to clauses governing *Hours of Work and Overtime*. In both of these cases the situation will be, therefore, that the existing wage rates, standard working week, and overtime rates

will continue, but the Union or the Company or both will be at liberty to apply to the appropriate War Labour Board for whatever modification they may consider advisable.

Negotiations also broke down in connection with the clause on *Duration of Agreement*. Before this Board, however, having regard to P.C. 1003, Sections 15 and 16, the parties agreed to continue negotiating and indicated their ability to reach an agreement. This clause can, accordingly, be considered as withdrawn from the present dispute.

This left three main issues before the Board:—

- (1) A clause styled "Maintenance of Membership".
- (2) Collection of Union Dues, or Check-Off.
- (3) One clause in the grievance procedure in which the Company insisted on the right of the individual employee to carry his grievance from the foreman to the Plant Superintendent, and the Union insisted on the employee being accompanied by a Steward—or Union employee.

MAINTENANCE OF MEMBERSHIP AND CHECK-OFF

In the course of the negotiations following the first hearing, at which the Company strenuously opposed either "maintenance of membership" or "check-off" clauses, the parties had—looking to settlement of all differences, it is true—reached an agreement on these issues. The Union had provisionally indicated its willingness to withdraw its claim for "maintenance" in return for (amongst other things) a "check-off" clause, and the Company had ultimately manifested its willingness to this. Although differences as to the form of clause developed at the meeting on January 17th both parties had provisionally agreed to the following form of "check-off" clause.

The Company will, during the life of this Agreement, if and to the extent authorized by each employee, in the manner hereinafter set out, but not otherwise, deduct from the first pay cheque due to each employee in each calendar month while such authority is in effect, the sum of one dollar (\$1.00), and remit the same, prior to the tenth day of the month following the month in which the deduction is made, to the Financial Secretary of the Union. Any such authority to the Company shall be given in writing on the form set out in Schedule "A" hereto, shall be revocable at any time by notice in writing to the Company, and shall be signed in duplicate by the employee concerned in the presence of and shall be witnessed by the Company's paymaster or his assistant, who shall be available at the Company's pay office during office hours, and a representative of the Union may also be present at such time. The original shall be left with such officer and the duplicate forwarded to the Union Steward. Any such authority shall take effect on the fifteenth day following the date of its receipt by the Company.

The Company shall within three days of the receipt of any revocation notify the Financial Secretary of the Union and shall, at the time of making each payment to the Financial Secretary of the Union, name the employees from whose pay such payment has been deducted.

As the parties were, on these issues, able to compose their differences, on the understanding that an agreement could be reached on grievance procedure, on which a distinct difference of opinion on a matter of principle was originally involved, we can see no reason for failing to recommend that the parties carry out their agreement in this connection since we believe that the parties having advanced so far towards the settlement of grievance procedure, the comparatively small matter still in issue in that connection should not affect the matters agreed upon concerning check-off.

We therefore recommend that the check-off clause as agreed upon by both parties in the course of negotiations and as set out above be included in the agreement. The parties indicated that no difficulties were expected in connection with settling the form referred to as Schedule "A" in the above clause, and we, therefore, leave this matter to be worked out between them. We also recommend that in accordance with the arrangement tentatively arrived at the agreement do not contain a maintenance of membership clause.

GRIEVANCE PROCEDURE

The copy of the agreement on which the parties had been negotiating, as furnished us at the hearing by the Company, reads as follows:—

(a) any question which an employee wishes to take up with the Company shall first be taken up with his or her foreman, it being agreed that the Steward may be present at the discussion if requested by either party. Failing a satisfactory settlement, the matter shall be deemed to be a grievance; (b) any grievance shall be written in duplicate by the Steward or the employee and submitted by him or them to the Superintendent who will render his decision upon receipt of one copy of the written grievance or within three days if an immediate reply cannot be given; (c) any grievance not settled to the satisfaction of the employee or employees concerned will be taken up with the management by the negotiating committee. It is agreed that a representative of the National Union of Shoe and Leather Workers may be present at these meetings if requested by either party; (d) Unless a satisfactory agreement is agreed upon regarding the disposition of the grievance at the meeting between the management and the negotiating committee, the grievance may be submitted to arbitration; (e) when either party requests that the grievance be submitted to arbitration, such requests shall be made in writing addressed to the other party to this agreement and within five days

the matter shall be referred to a Board of Arbitration consisting of three persons, one named by the Company, one by the Union, and a third by mutual agreement of the two parties. In the event of failure to agree upon a third person, he will be appointed by the Dominion Minister of Labour. The decision of the Board so constituted shall be binding upon both parties to this agreement.

The controversy at the first hearing centred around the second stage in which a grievance went to the Superintendent. While the clause looks innocuous, it was apparent that a difference in principle existed between the parties with respect to it. The Company's position was quite definite that an individual employee should have an opportunity of presenting, discussing and settling his grievance with the Superintendent, completely apart from any notice to or participation by the Union. The Union insisted that to permit an employee to by-pass the bargaining representative was to ignore the group interest in collective bargaining. This matter had apparently been in issue between the parties with regard to the last stage of the grievance procedure and while the company had originally wished to preserve to the individual employee his right to carry through the final stage without Union intervention unless requested by him, from the clause given above it will be seen that the Union and the Company had reached an agreement by which in the final stage the Union was recognized as entitled to be present as of right.

As only three stages—(1) foreman, (2) Superintendent, and (3) Management, had ever been discussed between the parties, the Union's attack against individual treatment of grievances after the foreman stage centred on (2). The Union pointed out that it would lead to the suspicion among the employees that individual settlements with what they called management—since the Union maintained, and the Company denied, that the Superintendent, who was described as Assistant General Manager, was in all essentials management—was encouraged by the Company. Further, as indicated, the Union took a strong position that granted collective bargaining, individual bargaining concerning the settlement of grievances was as much opposed to the principle of collective bargaining as would be individual bargaining concerning working conditions. It was clear at the first hearing, that the Company was strongly opposed to recognizing this doctrine.

As a result of further negotiations following the first meeting of the Board, on January 17th, the Company presented the following clause (reproduced here with minor changes agreed on between the parties at the meeting on January 17th) as representing the extent to

which it would go to meet the Unions' claims:—

1. Any question which an employee wishes to take up with the Company shall first be taken up with his or her foreman, it being agreed that the Steward may be present at the discussion if requested by either party. (Stage 1.)

2. Any matter not settled by the employee and the foreman shall be taken by the employee to the Divisional Superintendent concerned, it being agreed that the Steward may be present at the discussion if requested by either party. (Stage 2.)

3. Any grievance shall be written in duplicate by the Steward or the employee and submitted by them to the Superintendent who will render his decision upon receipt of one copy of the written grievance or within three days if an immediate reply cannot be given. (Stage 3.)

4. Any grievance not settled to the satisfaction of the employee or employees concerned, will be taken up with the management by the negotiating committee. (Stage 4.)

5. Unless a satisfactory agreement is agreed upon regarding the disposition of the grievance at the meeting between the management and the negotiating committee, the grievance may be submitted to arbitration.

6. When either party requests that the grievance be submitted to arbitration, such requests shall be made in writing addressed to the other party to this agreement and within five days the matter shall be referred to a Board of Arbitration consisting of three persons, one named by the Company, one by the Union, and a third by mutual agreement of the two parties. In the event of failure to agree upon a third person, he will be appointed by the Dominion Minister of Labour. The decision of the Board so constituted shall be binding upon both parties to this agreement.

7. Nothing herein contained shall be deemed to deprive any employee of the right to settle any grievance directly with the company provided however that the Union shall be given notice of any discussion of a grievance during stage 3 and thereafter, and the Union shall be entitled to be represented at the discussion of any grievance during stage 3 or thereafter.

It will be seen that by this amended procedure the Company provisionally acceded to the principle that a Union should be entitled to be present at a discussion of grievances with the Superintendent, which was the sole point originally raised between the parties. The Company, however, inserted another stage in the grievance procedure which had not theretofore existed, namely, "Divisional Superintendents". In this new second stage the Company still insisted on the right of the individual to take his grievance alone or with a Steward, at the option of the employee, to such Divisional Superintendents. The Union again objected to the principle of an employee having the option to by-pass the Union after the preliminary discussion with his foreman.

It is the difference on this one point that present when a grievance was being discussed agreement.

While the issue is in an extremely small compass the two opposing principles remain clear: the Company still wished to give scope to an individual settling a grievance free from participation by the Union. The Union still maintained that, apart from the foreman stage, the Union should at least be entitled to be present when a grievance was being discussed or settled.

It is, we believe, an oversimplification to say that the Company having agreed to the Union's request concerning the right of the latter to present or participate in the discussion of grievances before management (i.e. the Superintendent) the Union should, as a matter of compromise, be willing to agree to the new stage of Divisional Superintendents where an individual might still appear alone. This ignores the substance of the original contention of the Union that no grievance could be deemed satisfactorily settled unless and until the Union and the Company agreed. Perhaps the proper operation of grievance procedure under collective bargaining should be that no grievance is settled until all three parties, individual, Union and the Company have agreed, as indicated in the unanimous report of a Conciliation Board in connection with Steel Company of Canada, Ltd. (Hamilton and Ontario Works).¹ At any rate the Union, while indicating throughout its opposition to the principle expressed in para. 4 in the procedure which the Company requested, namely, "any grievance not settled to the satisfaction of the employee or employees concerned" and para. 7, "nothing herein contained shall be deemed to deprive any employee of the right to settle any grievance directly with the Company", has been willing to negotiate on the basis put forward by the Company and asked merely that the Union be given the right to attend and be represented at any discussion of grievances past the foreman stage.

At the original hearing, the Company admitted that there was a feeling (however ill-founded it might be) among some of their employees that the Company was felt to favour non-union employees. Indeed the Company urged this feeling as one reason for opposing check-off since it argued that it did not wish to know who the Union employees were. We should have thought, in light of this, that the Company would have been willing to do anything to mitigate and not aggravate this feeling. Permission of a Union Steward at discussion of grievances would certainly mitigate any possible suspicion. In-

¹ L.G., Jan., 1945, p. 55.

sistence on a right of individual presentation at a new stage—having granted the original request for representation at the only stage on which negotiations to that time had been conducted—while retaining the right to settle a grievance at any time with an individual employee, might only serve to aggravate the feeling which existed when these negotiations began.

The Company urged before us that the new stage was designed only to screen out unsubstantial complaints before they reached the Superintendent. The Union might well have asked why such a stage, not considered necessary until the right of Union representation in the original second stage of grievance procedure was conceded—and as we believe, properly conceded—should, as a result of such concession, now be deemed essential. The Union, however, was willing, in order to effect a compromise, to accept the Company's reasons for the second stage, and in return asked only that the Union Steward be notified of the proceedings before such Divisional Superintendents and given the right to be present. This the Company refused.

With the Union's provisional concession of an employee's right to settle his grievance with the Company apart from Union concurrence, so long as the Union was represented at any discussion of a grievance after stage one, and with the Company's provisional concession of the right of the Union to attend discussions before the Superintendent, we are faced with the necessity of recommending a form of grievance procedure. We do not think it desirable, in view of the mutual concessions in this regard, to go back to the original position of the parties and make our own recommendations on the basis of the original contentions of the parties. We believe that in the interests of compromise, and to carry to a logical conclusion the concessions already made on both sides either one of two courses are advisable: (1) to retain the stage of discussions with the Divisional Superintendents but the Company, or such Superintendent to notify the Union Steward so that he may have a right to attend if he wishes, or (2) to eliminate this stage entirely, leaving the matter in the original compromise stage where the Union surrenders its right to insist that no grievance is settled until it is satisfied, in return for a right to attend discussions to alleviate any possible suspicion of things being said or done, unknown to the Union, which might be inimical to the Union.

Either of such methods would prevent reopening the whole matter of procedure on which the parties were at first so diametrically opposed. Either would afford a working compromise which we believe will foster,

rather than impede, future good relations. For the Company to insist on retaining the new stage regarding grievances before Divisional Superintendents without giving the Union the right to attend, may be a source of irritation which, in light of the mutual concessions so far made, seems unnecessary and undesirable.

In the event that the parties are unable to agree on one of these alternatives then we recommend that stage two (between foreman and Superintendent) be dropped.

While both parties may feel that such procedure is far from perfect, we feel, in view of the progress towards compromise which the parties have made, that either of the suggestions recommended is in keeping with the spirit of compromise which has actuated the present negotiations.

All of which is respectfully submitted.

Dated at Toronto this 30th day of January, 1945.

(Sgd.) CECIL ALLRIGHT,
Chairman.

I concur and have this to add. Concessions were made on both sides, but in view of the concessions made by the Union, concessions whose magnitude may be judged by what has been currently recommended and agreed to in other industries, it is regrettable that no agreement was arrived at. After weeks of long spun negotiations, the parties appeared to be close together, but the changes which were forwarded by the Company for the first time on January 17, 1945, were not, in my opinion, conducive to an early settlement.

(Sgd.) LEWIS DUNCAN,
Member.

Minority Report

In the matter of the Wartime Labour Relations Board and Beardmore and Co. Limited, Acton, Ontario, and Local No. 26, National Union of Shoe and Leather Workers.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa,
Ontario.

Finding myself unable to agree entirely with the report of the majority of the Board of Conciliation established herein, I beg to submit the following minority report.

On the occasion of the first sitting of the Board, the parties were at variance on a number of points, but, at the suggestion of the Board, both sides, following subsequent sittings and conferences with the parties, compromised on a number of points and the matters in dispute were eventually narrowed down to two points of issue, viz., Check-off

and Grievance Procedure. The grievance procedure proposed by the Company after lengthy negotiation with the Union was as follows:—

1. The employees will elect in each department their Union representative to be known as the steward for that department. The stewards shall together constitute the shop committee. When required, the stewards may appoint deputies, who are also members of the Union, to assist them in the discharge of their duties. Such deputies are not recognized by the Union as shop committee members.

2. A negotiating committee of four regularly elected by the members of the Union from among the officers and stewards shall meet and negotiate any grievance with the management at regular monthly or specially called meetings.

3. All decisions arrived at by agreement between the Company and the Union shall be final and binding on both parties.

4. The relations between the employees and the Company are to be conducted as follows:—

(a) Any question which an employee wishes to take up with the Company shall first be taken up with his or her foreman, it being agreed that the steward may be present at the discussion if requested by either party. Failing a satisfactory settlement, the matter shall be deemed to be a grievance.

(b) Any grievance shall be written in duplicate by the steward or the employee and submitted by him or them to the superintendent, who will render his decision upon receipt of one copy of the written grievance or within three days if an immediate reply cannot be given.

(c) Any grievance not settled to the satisfaction of the employee or the employees concerned will be taken up with the management by the negotiating committee. It is agreed that a representative of the National Union of Shoe and Leather Workers may be present at these meetings if requested by either party.

(d) Unless a satisfactory agreement is agreed upon regarding the disposition of the grievance at a meeting between the management and negotiating committee, the grievance may be submitted to arbitration.

(e) When either party requests that the grievance be submitted to arbitration, such request shall be made in writing addressed to the other party to this agreement and within five days the matter shall be referred to a board of arbitration consisting of three persons, one named by the Company, one by the Union and a third by mutual agreement of the two parties. In the event of failure to agree upon a third person, he will be appointed by the Dominion Minister of Labour. The decision of the board so constituted shall be binding upon both parties to this agreement.

5. In the case of grievances involving adjustments in wage rates, the date of putting into effect the wage adjustments will be the

beginning of the payroll period nearest to the date of the settlement of the grievance, except in the case where the settlement of the grievance itself calls for an adjustment in wage rates as of some previous date.

6. Specific times of meetings, not less frequently than once each month shall be agreed upon by the Company and the Union and at these times the negotiating committee and the management shall meet to settle any grievance which may have developed. It is understood however that matters of an urgent nature such as a case of discharge that constitute a grievance may be sufficient reason to arrange a special meeting as early as possible.

The Union objected to this on the ground that the Superintendent was looked upon as General Manager and on that account the Union contended that it should have the right to be represented at any negotiations between the Superintendent and an employee which had been carried to that stage. While the Company denied that the Superintendent was General Manager, yet, in order to overcome the objection of the Union and to arrive at an amicable agreement, the Company offered to compromise further by agreeing to a voluntary check-off and by amending the grievance procedure to read as follows:—

Stage 1

Any question which an employee wishes to take up with the Company shall first be taken up with his or her foreman, it being agreed that the Steward may be present at the discussion if requested by either party.

Stage 2

Any matter not settled by the employee and the foreman shall be taken by the employee to the Divisional Superintendent concerned, it being agreed that the Steward may be present at the discussion if requested by either party.

Stage 3

Any grievance shall be written in duplicate by the Steward or the employee and submitted by them to the Superintendent who will render his decision upon receipt of one copy of the written grievance or within three days if an immediate reply cannot be given.

Stage 4

Any grievance not settled to the satisfaction of the employee or employees concerned, will be taken up with the management by the negotiating committee.

Stage 5

Unless a satisfactory agreement is agreed upon regarding the disposition of the grievance

ance at the meeting between the management and the negotiating committee, the grievance may be submitted to arbitration.

Stage 6

When either party requests that the grievance be submitted to arbitration, such request shall be made in writing addressed to the other party to this agreement and within five days the matter shall be referred to a Board of Arbitration consisting of three persons, one named by the Company, one by the Union, and a third by mutual agreement of the two parties. In the event of a failure to agree upon a third person, he will be appointed by the Dominion Minister of Labour. The decision of the Board so constituted shall be binding upon both parties to this agreement.

Stage 7

Nothing herein contained shall be deemed to deprive any employee of the right to settle any grievance directly with the Company, provided, however, that the Union shall be given notice of any discussion of a grievance during Stage 3 and thereafter and the Union shall be entitled to be represented at the discussion of any grievance during Stage 3 or thereafter.

While agreeing to the Company's proposal for check-off, the Union refused to accept the form of grievance procedure proposed as a compromise by the Company and insisted that the Union have the right to be present at

any stage of the grievance procedure after it passed the foremen, regardless of the wishes of the employee concerned in the grievance.

In my opinion, the proposal of the Company was fair and reasonable, and I think the Union should have displayed the same spirit of compromise and have agreed to the compromise proposed by the Company. After due consideration, the Union has now advised the Board that it is unwilling to agree to this compromise, I regret that I am unable to share the views of the majority of the Board that the Company should be asked to go still further in an endeavour to satisfy the Union and I must recommend that the form of grievance procedure now proposed by the Company as above set forth be adopted by both parties as a fair means of settling any disputes that may arise. If the Company had not offered to grant the voluntary check-off as a gesture of good-will to the Union and in an effort to show the proper spirit of compromise, I would hesitate to recommend it, especially in a first agreement, as I feel it should be a matter strictly between the Union and its members, but I think the Company has shown the right attitude in doing so and should be commended for having gone as far as it has in attempting to bring about a completed agreement.

Dated at Toronto, this 29th day of January, 1945.

Member.

Report of Board in Dispute between Canadian Industries, Limited, Toronto, Ont., and Canadian Industrial Workers Union No. 1 (C.C.L.)

On January 31 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Canadian Industries, Limited, Toronto, Ont., and Canadian Industrial Workers Union No. 1 (C.C.L.). A minority report, submitted by Mr. Herbert Orloff, was received on February 13.

The Board was under the chairmanship of His Honour Judge T. H. Barton, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. Norman L. Mathews and Herbert Orloff, both of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report follows:—

Report of Board

In the Matter of the Wartime Labour Relations Regulations P.C. 1003 and of a Dispute between the Canadian Industries Limited, Toronto, Ontario (Employer) and the Canadian Industrial Workers' Union No. 1 (Employees).

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you to effect a conciliation of the above dispute held a preliminary meeting on January 3, 1945, and held a sitting on January 15, 1945, at Toronto, at which both parties were represented.

At the hearing, the Company was represented by Mr. E. G. Taylor, Assistant Industrial Relations Manager, and Mr. A. P. Austin, Works Manager, while the Union was represented by Mr. Jack Robinson, Organizer, and Mr. James Olsen, President of the Local.

A very complete brief was submitted by each of the parties and the points in dispute were thoroughly discussed. Following the hearing on January 15, the Board met again on January 18, and discussed the matters in dispute.

The Board feels that the following facts have been definitely established and in fact are admitted by both parties.

1. The agreement now being negotiated is a renewal of an agreement which was originally entered into between the parties hereto as of November 1, 1943.

2. Relations between the Company and the Union during the period of the collective bargaining agreement above referred to have been excellent and each of the parties agrees that the attitude of the other party has been one of co-operation and good will.

3. The proposed renewal is in the main similar to the first agreement. While certain minor changes have been proposed by both sides, these have all been agreed to with the exception of the two matters which have been referred to this Board.

The two points in dispute concern the request of the Union for the inclusion in the agreement of the following clauses:

(a) *Maintenance of Membership*

All employees coming within the scope of this Agreement who are now members of the Union shall continue to be members in good standing of the Union during the term of this Agreement. All present employees, together with all future employees, who may join the Union, shall remain members in good standing of the Union during the term of this Agreement.

(b) *Check-Off*

The Company agrees to deduct the sum of \$1.00 each month from the wages of each employee who voluntarily certifies in writing that they authorize such deduction, and the Company shall remit such deduction to the proper officer of the Union, such officer to be designated by the Union in writing.

After carefully considering the arguments submitted by the Union and the Company respectively with regard to these two points, the Board recommends that the Union abandon its request for the inclusion of the Maintenance of Membership clause in the proposed agreement. The Union points out that this clause imposes no obligation upon

any employee to become a member of the Union but that it does require every member of the Union to maintain his membership so long as the agreement is in effect. The Union further points out that this clause has come into widespread use in the United States and that many agreements recently entered into with Canadian companies also contain this clause. The Union contends that workers will frequently join a union and remain members until an agreement has been negotiated, after which they feel that nothing further can be obtained by continuing to belong to the union and that they thereupon fail to keep up their membership. The Company on the other hand points out that such has not been the case among the employees of this Company. At the time of the vote conducted by the Ontario Department of Labour in October, 1943, 58% of the employees in the bargaining unit voted for the Union, while the Union contends at the present time that its membership has increased considerably during the period since that date. There was no evidence submitted by the Union to indicate that it was losing its membership or that after the negotiation of the first agreement the members showed any inclination to withdraw from membership; but, on the other hand, the submissions of the Union show that the opposite is the case and that, after the negotiation of the first agreement, the membership in the Union has steadily increased. The Board feels therefore that Maintenance of Membership is not necessary in this case to protect the Union. It is also admitted that there has been no evidence whatever of hostility on the part of the Company but that on the contrary the best of relations have prevailed. For this reason also, the Board feels that a Maintenance of Membership clause is not necessary to protect the interests of the Union in this Plant.

While the Union contends that the Maintenance of Membership clause would not work any hardship on the employees, this Board feels that many circumstances could arise which would put both the Company and some of its employees in difficult positions. Without suggesting that there is any evidence that such possibilities would occur in the case of this Union and this Company, it must be recognized that, in considering the proposal for a Maintenance of Membership clause, a company must consider all the possibilities that can arise. Take the case of a worker who has been a highly efficient and valued employee of the Company for thirty years. He becomes a member of the Union in good faith and pays his dues regularly for three

months; then any one of several things can happen:

(a) Due to a disagreement with the Union over some personal matter, the Union Executive might decide to expel him. The Company must thereupon terminate his employment, regardless of his value to the Company.

(b) The Union policy or constitution might undergo a radical change and the member might find himself in complete disagreement with its new policy. If he resigns in protest or because the policy of the Union has changed from what it was when he joined it, he must be discharged by the Company in spite of his years of faithful service.

(c) After he had become a member, the Union might decide to align itself with some political party, carry on an intensive campaign and make substantial contributions to the campaign funds of that party. The member might find his political views diametrically opposed to those adopted by the Union and would naturally resent his dues being used to support a party or a candidate which was abhorrent to him. He might quite properly decide that, if the Union were going to use the money it collected from its members for such purposes, he would pay no more dues and would resign from membership. Should he be penalized for his political beliefs by being put out of a job to which he had given the best years of his life?

(d) The Union might call a strike—even though an illegal one. This employee might decide to obey the law and refuse to go out on strike. If the Union expelled him for his failure to strike, must the Company be compelled to reward his loyalty to the Company and to the laws of his country by discharging him?

These are but a few illustrations of the position in which a company could be placed by the inclusion of the proposed Maintenance of Membership clause.

While it is conceivable that there could be cases in which the advantages of such a clause would outweigh the disadvantages, such for instance, as when the company was undermining the Union and the Maintenance of Membership clause was necessary to preserve the entity of the Union, the Board feels that no such circumstances exist in this case and that the Maintenance of Membership clause should not be included in this agreement.

With regard to the request of the Union for a voluntary check-off, the Board feels that the situation is somewhat different. While we support the contention of the Company that no real necessity for a check-off has been shown in this case, we feel that a check-off does not involve the same element of coercion, and does not deprive the employees of freedom of choice. We feel further that, in view of the excellent relationship which has prevailed between the Company

and the Union, the Company might well extend this assistance to the Union in this second agreement. The inconvenience to the Company would be outweighed by the benefits the Union would receive and we feel it would be a splendid token of appreciation by the Company for the co-operation of the Union in maintaining production and would at the same time be an inducement to the Union to continue the harmonious relations which have existed in the plant. The Board therefore recommends the inclusion in the agreement of the following clause, feeling that neither the employees nor the Company will be prejudiced thereby and that the time thus saved the Union stewards in the collection of dues may be put to better advantages in bringing about even better relations between the Company and the employees to the mutual benefit of both:

The Company will, during the life of this Agreement, if and to the extent authorized by each employee, in the manner hereinafter set out, but not otherwise, deduct from the first pay cheque due to each employee in each calendar month while such authority is in effect, the sum of one dollar (\$1.00) and remit the same, prior to the tenth day of the month following the month in which the deduction is made, to the Financial Secretary of the Union. Any such authority to the Company shall be given in writing on the form set out in Schedule "B" hereto, shall be revocable at any time by notice to the Company, and shall be signed in duplicate by the employee concerned in the presence of and shall be witnessed by the Company's timekeeper and a Union Steward in the Employee's time office. The original shall be left with such timekeeper and the duplicate retained by such steward. Any such authority shall take effect on the fifteenth day following the date of its receipt by the Company.

The Company will, at the time of making each such payment to the Financial Secretary of the Union, name the employees from whose pay such payment has been deducted and those who have revoked their authorization to the Company since the last such payment was made.

In conclusion, the Board wishes to pay tribute to the efficient and considerate manner in which both parties presented their viewpoints to the Board and to the tolerance which each party displayed towards the other's submissions.

Dated at Toronto this 26th day of January, 1945.

Minority Report

In the matter of the Wartime Labour Relations Regulations P.C. 1003 and of a dispute between the Canadian Industries Limited, Toronto, Ontario (Employer); and the Canadian Industrial Workers' Union No. 1 (Employees)

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

With the preliminary statement of facts and with the recommendation of the majority members of the Board in favour of a voluntary check-off I agree. I disagree however with the recommendation of the majority members of the Board against the inclusion of a maintenance of membership clause in the proposed Agreement between the Company and the Union.

The two main arguments on which the majority members of the Board base their decision in respect to the exclusion of the maintenance of membership clause and my submission in respect to each, herewith follow:—

The first is that "there has been no evidence whatsoever of hostility on the part of the Company but that on the contrary the best of relations have prevailed," and that the membership of the Union has increased, not decreased during the past year, without the maintenance of membership clause.

It would give rise to a very anomalous situation indeed, if the effort of the Union to co-operate with the Company, to promote better industrial relationship, to increase efficiency by servicing the grievances of the employees, and thereby also not only maintain its current membership but increase it, was rewarded by the refusal of the Company to increase that co-operation on the ground that it was not necessary, that the degree of co-operation achieved satisfied it; and resulted in the Company taking the position that increased co-operation in the form of the inclusion of a maintenance of membership clause in the Agreement between Company and Union should be the reward, not of co-operation with the Company but of activities which gave rise to hostility between the Company and Union.

The "good" Union, that which desired to promote continuously improving industrial relationship is to be kept back, given no reward for its co-operation, is not to be allowed the goal of partnership in industry to strive for.

The "bad" Union, that which by its activities, promotes a spirit of hostility between employees and Company, refuses to co-operate with the Company, is to be rewarded by increased security for itself.

If this *were* the principle to be adopted, the trade union movement would find that out very quickly and would act accordingly: But fortunately for industrial relationship, that is not the correct principle, even though adopted here.

The correct principle would reward a Union for its efforts to improve industrial relationship and it is just because this Union has such a history of good relationship with the Company and has so admittedly done its best to co-operate with the Company, that the additional security of a maintenance of membership clause should be given it.

The other aspect of this problem and the other principle involved, namely, that of the obligation of a member to remain a member of the Union which he has chosen to enter into a collective bargaining agreement with the Company on his behalf, was so well covered and laid down in the majority report of the Board in the Ontario Malleable Iron Co. Ltd. of Oshawa, case,¹ that one might well just re-state it in the words of that report:—

"There is no sound reason why existing members of a Union which is negotiating for a new contract should not be compelled to carry out the obligations which they assumed as Union members in asking for Bargaining rights.

"If collective bargaining implies a recognition of the right of democratic self-government, it would seem not only proper but desirable from the point of view of the employer to insist that such a right carry with it corresponding duties to continue to support and participate in the decisions of the agency in order to emphasize individual responsibility in electing a bargaining agency and to insure full participation in the decision of the Local, by the employees of the plant. To bring home such duties to employees it would seem sound to hold them to the obligations which they undertook to the Union as a means of obtaining Union recognition. Apart, therefore, from any arguments in favour of the Union as such, we believe that the Company in the present case should be willing to compel existing union-employees to stand behind the Union of their choice for the term of the collective agreement by adding the sanction of loss of employment for failure to support their chosen union."

The second is that circumstances may arise wherein a member of the Union comes into conflict with the Union over some matter which does not arise out of his actual employment, and which causes his expulsion from the Union and thereby compels the Company to discharge an employee for a cause which has nothing to do with his employment and

¹ L.G., Sept. 1944, p. 1117.

regardless of how valuable or important that employee may be to the Company. The majority report cites a number of such possibilities.

The important thing to remember, however, is that these are only possibilities, not actualities. The Company did not, and could not, cite any instance of the expulsion of any member of the Union for any cause whatsoever at any time during the existence of this Union in the Company plant. To refuse this Union this additional security on the ground of some baseless fear of something which might happen but has not happened, because of conjectures of what might happen, which are purely theoretical, is not quite fair nor sound. If the Company tried the maintenance of membership clause and found that it caused it harm, that it acted as a detriment to

production, it would then have practical reasons for rejecting such a clause in its next agreement. I am positive, however, that if the Company did grant the maintenance of membership, its experience would be the reverse and it would find production increased and its relationship with the employees even happier than before. Certainly the Union, in consideration of its previous record of harmonious relationship and close co-operation, is entitled to have the opportunity to prove itself in this respect.

For the above reasons, I recommend the inclusion of the maintenance of membership provision in the Agreement between Company and Union.

Dated at Toronto, this 12th day of February, 1945.

Report of Board in Dispute between Ingersoll Machine and Tool Co., Ltd., Ingersoll, Ont., and Local 2918, United Steelworkers of America

On February 8 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between the Ingersoll Machine and Tool Co., Ltd., Ingersoll, Ont., and Local 2918, United Steelworkers of America.

The Board was under the chairmanship of Dr. Alexander Brady, Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members, Messrs. J. J. Robinette, also of Toronto, and Oliver Hodges of London, Ontario, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003 and the Ingersoll Machine and Tool Co. Ltd., Ingersoll, Ontario, and the United Steelworkers of America, Local 2918, Ingersoll, Ontario.

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you in this matter begs to submit its report.

The Board met representatives of the parties in Toronto and Hamilton and heard evidence on the requests of the Union and on the attitude adopted by the company towards such requests. The Company was represented at these meetings by Messrs. A. G. Warden and R. A. Wilson, and had as counsel Mr. Georges Burson. The Union was represented by Mr. Frank Quaife.

The dispute in this case centred upon two claims of the Union for the inclusion in a

proposed first agreement of a Union Shop clause and a clause insuring a check-off of Union dues. On other matters suitable for a contract there is agreement between the parties. The Company is opposed to a Union Shop because it would mean the coercion of old and faithful employees who have not become members of the Union. It is opposed to the check-off because of its belief that the check-off would involve aiding the Union in a manner contrary to the provisions of P.C. 1003, section 19 (1), and also because it would involve a coercive influence upon some employees.

The Board is here concerned simply with the practical problem of effecting conciliation between the parties and persuading them to accept what in its judgment would be a reasonable agreement in view of all the pertinent circumstances in contemporary industry. It would therefore recommend to the Union that it withdraw its request for a Union Shop, and that the Company on its part concede a voluntary check-off of Union dues, irrevocable during the life of the agreement, and applicable only in the case of those Union employees who personally sign authorization cards. The Board would urge the acceptance of these recommendations upon both parties.

All of which is respectfully submitted.

Dated at Toronto this 6th day of February, 1945.

(Sgd.) ALEXANDER BRADY,
Chairman.

**Report of Board in Dispute between General Dry Batteries of Canada,
Limited, Toronto, Ont., and Local 512, United Electrical,
Radio and Machine Workers of America**

On February 8 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between General Dry Batteries of Canada, Limited, Toronto, Ont., and Local 512, United Electrical, Radio and Machine Workers of America.

The Board was under the chairmanship of His Honour Judge James Parker, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Mr. John J. Robinette, Toronto, appointed on the nomination of the employer, and Miss Idele Wilson, also of Toronto, appointed on the nomination of the employees concerned.

The text of the Board's report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations, P.C. 1003, and United Electrical Radio and Machine Workers of America, Local 512, and General Dry Batteries of Canada Limited, Toronto, Ont.*

To:

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

Sir:

Under the provisions of P.C. 1003, His Honour Judge James Parker, as Chairman, John J. Robinette Esquire, K.C., (nominee of the Employer), and Miss Idele Wilson (nominee of the Employees), under date of the 14th day of January 1945, were appointed a Board of Conciliation in this matter.

Representatives of Employer and Employees had for some time past endeavoured to reach an Agreement on matters affecting them but were not successful. Subsequently Mr. H. Perkins was appointed a Conciliation Officer, who under date of the 7th of December, 1944, recommended the appointment of a Board of Conciliation to deal with the points in disagreement between the parties.

An agreement had been effected on all but three points, namely Articles VII, II and IX.

This Board recommends that the said several following articles be accepted and form part of the agreement:

(a) ARTICLE VII.

The Company and the Union agree that they will make every effort to decide on a

mutually acceptable schedule of job classifications, rates of pay and bonuses within ninety days after the signing of this Agreement. On all items of such schedule with respect to which an Agreement has been reached, the parties will, where necessary, submit a joint application to the Regional War Labour Board. With respect to any items of such schedule upon which the parties have been unable to reach an Agreement, after such negotiation, an application may be made to the Regional War Labour Board in accordance with the provisions of the Wartime Wages Control Order, 1943, and amendments thereto. All items of such schedule which have been settled in accordance with the foregoing arrangements when so settled, shall become part of this Agreement as Schedule "A" thereto.

(b) ARTICLE II

The Union agrees that during the term of this Agreement there will be no strikes, stoppages or slowdowns of work or other collective actions which will stop or interfere with production. And the Company agrees that it will not cause or direct any lockout of employees.

(c) ARTICLE IX

The decision of the Arbitration Board shall be final and binding on both parties hereto.

The above Article IX shall be subject to an understanding now had between the parties.

We understand the above recommendations are acceptable to both parties and that an Agreement with the above included will be executed by said parties without delay, if not already executed.

The Board should mention the excellent relations that have existed, and still exist between Employer and Employees and their representatives.

All of which is respectfully submitted.

Dated at Toronto this 5th day of February, 1945.

(Sgd.) J. PARKER,
Chairman.

(Sgd.) IDELE WILSON,
Employees' Nominee.

(Sgd.) JOHN J. ROBINETTE,
Company's Nominee.

Report of Board in Dispute between Fowler's Canadian Co., Ltd., Hamilton, Ont. (Division of Armour and Company), and the United Packinghouse Workers of America.

On February 22 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Fowler's Canadian Co., Ltd., Hamilton, Ont. (Division of Armour and Company) and the United Packinghouse Workers of America.

The Board was under the chairmanship of His Honour Judge Ian M. Macdonell, Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs Norman W. Byrne of Hamilton, and Arthur Williams of Oshawa, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

In the matter of Wartime Labour Regulations P.C. 1003, and of a dispute between Fowler's Canadian Company Limited (division of Armour and Company) (Employer) and United Packinghouse Workers of America (Employees).

To the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

The Board was appointed after conciliation efforts of Mr. Frank Ainsborough, delegated to that end, failed to effect complete agreement between the Employer and the Union in renegotiation of a contract first entered into under date August 17, 1942. It should be noted that this contract was voluntary after a vote conducted under departmental auspices and not as a result of certification.

Matters not concluded by Mr. Ainsborough were set forth in his letter of November 23, 1944. Some of these matters did not reach the discussion table, other matters not indicated were raised.

The Board convened in the Chambers of the Chairman, Monday, January 29, 1945 and again on Thursday of that week to hear the parties.

The Union presented a written brief in the matter which was replied to in writing by the Company. The verbal discussion remained within the subject matter of these briefs. No evidence was taken.

The Union consented to the Employer being represented by its solicitor. The Union went on record as being prepared to accept the recommendations of the Board as final. The Company elected to proceed in the prescribed manner.

The first matter was as to the description of the parties in the contract. The Union wished to add the designation of Armour and Company affiliation to the description and proposed to change the designation of the Union to United Packinghouse Workers of America on behalf of Local 188.

After hearing the arguments and representations the Board unanimously recommend that the parties to the new contract be described as in the contract of August 17, 1942 set out.

The second matter was a proposal of the Union to enlarge the scope of the collective bargaining unit to include Assistant Foremen, Engineers and Temperature men. There is no evidence that these men wish to be so included and it is significant that these categories were expressly barred from the unit in the voting under departmental auspices that preceded the first contract. The Board unanimously recommend that the unit for collective bargaining remain as in the contract of August 17, 1942 set out.

The third matter was as to the wording covering Employer prerogatives, discrimination and reservation of grievance procedure. The Union representatives conceded the use of the form suggested by the Employer.

The fourth matter was objection by the Union as to the wording of the discrimination clause in the form suggested by the Company. The parties agreed to delete the words "nor shall employment in the Company be conditional upon membership or non membership in any labor organization" from the Company proposal.

The fifth matter was the demand of the Union for a Union shop and a check-off and upon these items the chief disagreement centred.

The Company, terming same a gesture toward conciliation and not an acceptance of principle, agreed to honour requests of employees in the matter of deduction of Union fees but on a revocable basis termed by Mr. Nash "week to week or month to month or year to year but revocable any time at the request of the employee individually".

The Board commend the Employer on this measure of acquiescence and unanimously recommend its adoption.

On the question of a Union shop the parties remained adamant. Spirited argument was presented by both sides. The Board feel, however, that while Fowler's Canadian Company Limited is an entirely separate legal entity

(and recognition of that status has been given in disposition of the first matter referred to), the Company does in fact trade commercially on its connections with Armour and Company and is perhaps governed to a great extent by Armour and Company policy. For this reason and others the Board unanimously recommend that the Company and the Union agree upon a term of Union security such as was included in the Armour and Company contracts in the United States, at the direction of the Labour Board (and with its reservations to that end noted) to the extent—

All employees who 15 days after the signing of this agreement are members of the Union in good standing in accordance with the Constitution and By-laws of the Union, and those employees who thereafter become members, shall during the life of this agreement as a condition of employment remain members of the Union in good standing.

The sixth matter was a demand of the Union that wage scales be made a supplement and integral part of the agreement. After hearing both sides it would seem that owing to multiple duty jobs involving part or whole time on a wide category of skills and tasks that posting of rates would create rather than minimize grievances.

The Company has conceded that it will divulge to the Union negotiators as a confidential matter the wage scale of any employee believing that an inequality exists and the Board unanimously recommend that this measure be accepted and used by both parties to the contract in good faith and reasonably.

The seventh matter was a demand of the Union that hours of labour be fixed with a standard starting and quitting time established. Hours of labour, wages, and such matters are vested in authorities having direct jurisdiction, but there is unanimous opinion among the members of the Board that some standard schedule should be set up if for no other reason than to enable an employee to check his pay calculations.

The eighth matter related to seniority of service, the Union advocating one month as the probationary time and the Company three months. The Board unanimously recommend three months as the probationary time before seniority accrues to employment.

The ninth matter relates to loss of seniority through absence. The Company agreed to add "At the same time a notice is sent to the President of the Local Union or any member of the Grievance Committee". Adoption of same is unanimously recommended by the Board.

The tenth matter is as to grievance procedure and the chief difference in principle in the respective submissions of the Company and the Union is as to the first step.

Company form. The aggrieved employee shall present the grievance to the foreman of the department.

Union form. First between a Union Steward and the foreman of the department in which the employee works. (In the first (three) steps the aggrieved employee may be present or not as he chooses.)

The difference of opinion may be in distinguishing a grievance. It is only normal that an employee should approach his foreman on any matter of employee relations. It is when the employee has not received the adjustment or benefit that he believes he is entitled to that a grievance occurs.

When a grievance occurs the employee should feel free to press the matter home relying on his own resources or by calling in the Union representatives to present his claim.

The Board is unanimous in its recommendation that those principles should be incorporated into the Employer's form of grievance procedure.

The eleventh matter is as to continuance of local rules or custom of the plant. There would appear to be possible contention arise from the adoption of either the clause proposed by the Employer or the Union.

The Board is unanimous in its recommendation that neither clause be included in the contract.

Dated at Toronto, this 19th day of February, A.D. 1945.

IAN M. MACDONNELL,
Chairman.

ARTHUR WILLIAMS,

NORMAN W. BYRNE,

Members.

Report of Board in Dispute between Yarrows, Limited, Esquimalt, B.C., and Local No. 1, Industrial Clerks' Association

On February 1 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Yarrows, Limited, Esquimalt, B.C., and Local No. 1, Industrial Clerks' Association. Supplementary reports were submitted by Mr. D. R. Anderson and Prof. E. S. Farr.

The Board was under the chairmanship of Mr. James H. Beatty, Victoria, B.C., appointed by the Minister of Labour on the joint recommendation of the other two members of the Board, Messrs. D. R. Anderson, Victoria, B.C., and E. S. Farr, also of Victoria, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the supplementary reports, follows:—

Report of Board

In the Matter of the Wartime Labour Relations Regulations Act and in the Matter of Negotiations for a proposed collective agreement between Yarrows Limited and certain of its employees, members of the Industrial Clerks' Union, Local No. 1.

The Board was established as a result of a recommendation by Mr. R. D. Lemmax, Conciliation Officer, under date of October 25, 1944, and the appointment was made by The Honourable The Minister of Labour on December 16, 1944.

The Board, consisting of Mr. James H. Beatty, Chairman; Mr. D. R. Anderson, nominated by Yarrows Limited; and Professor E. S. Farr, nominated by the members of Local No. 1, Industrial Clerks' Union, was appointed by the Minister of Labour for the purpose of endeavouring to bring about a conciliation upon the working agreements proposed by both Parties.

The representatives of Industrial Clerks' Union, Local No. 1, were: Mr. A. R. Willis, President of the Local No. 1, Industrial Clerks' Union, and Mr. Samuel Dyson, the Secretary-Treasurer of Local No. 1, Industrial Clerks' Union, and Mr. Gerald Lake.

The representatives of the Company were: Mr. F. B. McConnell and Mr. Chas. R. Watson.

Both parties submitted drafts of a proposed agreement which were discussed clause by clause and an agreement was sought on each individual portion thereof. These agreements have been marked as exhibits and have been forwarded to the Minister.

The first objection of the Company was the admission of Fire Wardens or Fire Guards to the Industrial Clerks' Union. As they were in reality the local Fire Department and, as their duties were not in the nature of work which could be termed clerical, the Board was inclined to the opinion that this group was incorrectly classified. However, since they were included in the original certification and bargaining agreement, the Board could not eliminate them from this Union. The Company agreed to this point.

Other points of discussion between the Bargaining Agents were those in which the Union demanded "Closed Shop" and the "Check-off" systems; they also asked for an additional \$15 a month to compensate for having been denied the full Cost-of-Living bonus.

While the Board realized, of course, that they had no jurisdiction over wages, salaries and hours, they permitted discussion on these

subjects, as it was felt that certain misunderstandings in the minds of the appellants would probably be eradicated. It was stated by representatives for the Employees that they felt sure that they had never been given increases of pay as suggested in lieu of Cost-of-Living Bonus and stated that they had received only \$4.25 a month while the other employees received \$19 a month.

For the purpose of clarifying this, the Board made a complete check of the payrolls of the Office Staff of the Company from 1941 and, as a result of this audit, were satisfied that the Company had given increases in lieu of Cost-of-Living Bonus that were, in every case, as much or more than the amount required. Employees' Representatives expressed themselves as being satisfied with this finding.

The parties agreed to all points in the documents, with two exceptions, namely: the "Closed Shop" and "Check-off" systems. Finally the Union made a proposal to compromise by substituting the "Maintenance of Membership" system for the "Closed Shop" plan. This, however, was not acceptable to the Employers.

The Board asked both parties to give further consideration to these points and expressed willingness to meet and hear further arguments on January 15. However, no request was made by the Union so no agreement was consummated. The Union representatives expressed the thought that an agreement would be of no use to them without the "Maintenance of Membership" and "Check-off" systems.

Two public sittings of the Board were held, the first on December 28 and the second on January 12, at which evidence and arguments were heard. Four additional meetings of the Board were held for the purpose of examining the pay roll books of the Company, the membership records of the Union, meeting with the Minister, and in discussion of the evidence.

Messrs. Anderson and Farr, have, after hearing the evidence, submitted written opinions. These are enclosed herewith.

The decision of the majority of the Board was that the Employees should accept the agreements as proposed by Messrs. Yarrows, with inclusion of the Fire Guards.

Although the minds of both parties did not meet in complete agreement, all negotiations were carried on in the most cordial and friendly manner and the Members of your Board feel that both sides were sincere in their desire to bring about a conciliation.

(Sgd.) J. H. BEATTY,
Chairman;

(Sgd.) D. R. ANDERSON,
Member of Board;

(Sgd.) E. S. FARR,
Member of Board.

Supplementary Report

In association with the other members of this Board, I have given very careful consideration to the evidence submitted, to the arguments presented and to the supporting reasons adduced, all laid before us in respect of the different questions arising between Yarrows Limited and the Industrial Clerks' Association. I wish to thank the representatives of both parties for the eminently fair and reasonable manner in which they have submitted their respective cases and I feel that with a continuation of the co-operative spirit which they have both demonstrated, a satisfactory and equitable settlement can be reached and a working arrangement established.

A number of meetings took place between the two interested parties during the summer and early fall of last year with a view to attaining agreement and ultimately, these meetings having failed in their object, a Conciliation Officer of the Provincial Government was appointed. The recommendation of the latter to the Minister of Labour was that, to achieve harmony, it was his opinion that a Conciliation Board be selected, and along with the two other members I was nominated to act upon this Board. Professor Farr was chosen by the Union; the employer nominated myself, and Professor Farr and I mutually agreed that Mr. Beatty would be an acceptable and unprejudiced chairman. While I use the word "unprejudiced" particularly in referring to the Chairman, I can assure the disputants that my colleague, Professor Farr, and I have listened to you both with equally unbiased minds and I am sure that our findings and opinions are in no way influenced by any personal affiliations that we may have. I have been very happy in the association of both my colleagues on this Board and whether they disagree, jointly or individually, with my findings, I can assure both parties hereto that they can be confident of having received a disinterested hearing and the decision whether it be unanimous, or a majority opinion, will be one on which I hope you will both act.

It is not my intention to recite in detail the various phases which led up to the appointment of this Board, nor do I wish to reiterate the review made by the parties concerned of the several meetings that took place between them attempting to effect a reconciliation. I do this intentionally as I can see no useful purpose being served in studying the labour pains which gave birth to the twin agreements now before us—that of the Industrial Clerks' Association and that of the employer. Suffice it to say that those two propositions are now presented for our consideration and it is my duty only, to express an opinion on the points

of dissension between them, in the hope that this may assist both parties to a mutual and acceptable understanding. That does not mean that the records of the preliminary meetings have not been studied and have not served to illuminate these present proceedings; nor do I intend to ignore pertinent questions presented in the briefs, arguments and evidence of each party, that are the proper subjects for an expression of opinion by this body. These, however, will only be treated as collateral to the main issue and indicative of the intentions and wishes of the parties concerned.

I shall first deal with one such side issue which we followed up very closely, although it was a matter outside the jurisdiction of this body; that is, Clause D of Article 5 of the Association's proposed agreement which refers to Cost of Living Bonus. In this Clause it is suggested that "An additional fifteen dollars per month shall be paid on the present basic salaries shown in Article 5, Clause C having respect for the present prevailing salaries, to compensate for having been denied the full Cost of Living Bonus". As I have said, this is a matter for the National War Labour Board, but during the hearing it appeared to me that there was a feeling among the Union representatives that their members had been unfairly treated by the Company in this respect. The Board, therefore, heard evidence and argument in respect of this question and, as is shown in the transcript, I stressed very firmly that the employees should be permitted to develop their contention. My colleague, Professor Farr, also stressed that we should ascertain the facts in this regard so that it could be demonstrated whether or not clerical employees had been treated unfairly in the matter of Cost of Living Bonus, probably because of their being non-unionized.

It was mutually agreed that the Board should visit Yarrows Ltd. in order that an inspection of the Company's payrolls could be made with a view to determining whether a sufficient differential had been made in wages in the years 1941 and 1942 to discover whether, apart from other considerations for increase, the employees affected had been granted an upgrading of salary commensurate with the additional cost of living.

For our convenience a statement was prepared by the Company showing the changes in salaries for each employee concerned during the years 1941 and 1942. This was submitted on affidavit by the Secretary-Treasurer of Yarrows Ltd. and was examined in detail by my colleagues and myself. The study of this list of comparative salaries left no doubt in my mind that the employees had been fairly treated by the Company and that the increases

in salary in lieu of Cost of Living Bonus were consistent with the bonus being paid to those hired on an hourly basis. While this Board, of course, could not assent to the inclusion of Section D, Article 5 of the Association's proposed agreement, changes in rates of compensation being exclusively a matter for the National War Labour Board, I think that the time was well spent in investigating the employees' contention, and the result of our examination of the figures will, I hope, convince the Association representatives that the representation of inequitable treatment of clerical employees in the matter of payments in lieu of Cost of Living Bonus was mistakenly founded.

Another question over which considerable discussion took place, was the matter of the inclusion or exclusion of the Fire Guards as members of the Union. Subsequent to the first public session, the Board felt that in view of the certification of bargaining representatives by the Provincial Minister of Labour including Fire Wardens, it did not appear to be our function to decide for or against their status of membership. It appeared to us that we could not now properly express an opinion, even although it was a matter of submission to us and a point of contention between the parties, when the Minister of Labour in his certification dated June 10, 1944, had expressly designated the classification "Fire Wardens" as being included with the other prescribed departments as members of the body then formed for collective bargaining purposes. In order to clarify this situation, a meeting was arranged with the Minister, the Honourable George S. Pearson, and the Registrar, Mr. Gault, when a ruling could be obtained.

At this meeting the whole question was fully and frankly discussed terminating in the Minister's decision that it was not within the powers of this Board to exclude from any proposed agreement any group included in the certification. Representatives will thus understand that any agreement that may be mutually reached following this session must include Fire Wardens until such time as a new certification by the Minister is granted. It will then be in order for the Company, in my opinion, to take exception to their inclusion within the statutory time limitations.

As a matter of record I may say that I personally do not consider the Industrial Clerks' Association to be the appropriate Union for fire warden membership in view of the absence, so far as I can discern, of any community of interest between them and the purely clerical departments eligible for membership.

It is conceivable that the insertion of such a group, or a similar group whose function is

not primarily clerical, might have the ultimate effect of creating within the Union a body of interest which would not be sympathetic, and might well be antagonistic, to the requirements and wishes of those members for whom the Association is properly intended, that is, the clerical staff.

I commend this opinion to the particular attention of the employees' representatives for their careful consideration reminding them that the strength of their Union and its value in industry, both to employer and employee, depends not so much on its numerical strength but in its attracting, having, and holding in its ranks those whose craft, aspirations and interest are founded on a common base.

In common with all other callings the Fire Wardens are entitled to representation but the selection of their representatives should not be a matter of temporary expediency as it seems to me may have been so in this case. I may mention that, as a point of information the Board ascertained from the Labour Department that at the time of certification the necessary fifty-one percent was obtained in the various departments exclusive of the Fire Wardens.

During the hearing various views were expressed as to the scope of the phrase "in a confidential capacity". It is fortunate that the ultimate significance of these words need not be elaborated upon by this Board as both parties showed a spirit of reasonableness in determining the type of employee who could be considered as "Confidential". After all the question of who is or who is not employed in a confidential capacity is far better decided by those having intimate knowledge of an operation than by Act of Parliament or by Order in Council. Both parties have in this respect shown great goodwill and mutual understanding on which they should be congratulated and which I am confident will be continued in their future relations. The Company has shown marked restraint in the nomination of confidential personnel and the Union representatives have been equally co-operative in their acceptance of the Company nominees. We may therefore properly leave that question to the parties concerned.

It was requested by the Board that a statement of the members of the Union in good standing as at the date of the first public session be submitted. Such a statement, given us on an affidavit affirming its accuracy, was sworn to by Mr. Dyson. Coincident with this a detail of the clerical staff of Yarrows Ltd. was asked for and received; Mr. McConnell affirming its correctness.

The purpose of the Board in making these requests was to ascertain the present strength

of the Union in relation to Yarrows total staff. Remember, this information is only valuable to us insofar as it indicates the healthiness or otherwise of the Association, and as an aid to us in considering its representative bargaining capacity as it affects all interested parties, union or non-union. My recollection is that it was understood that the figures thus obtained would be treated as confidential and I shall avoid introducing them at this time.

From the information we have received there could be no question but that there has been a marked declension in the Association's membership since its inception and since the date of certification. That, of course, does not immediately concern the Board as we must deal with the questions before us on the representative status at the time of certification. So far as I am concerned, a marked falling off in the membership must, however, be taken as indicative of the trend and inclination of the employees most intimately concerned, and must thus be one of the determining factors in my consideration of the merits of the proposed agreements now before us.

A memorandum was submitted by Yarrows Ltd. directing the attention of the Board to various sections of the Industrial Conciliation and Arbitration Act of 1943, the Labour Relations Wartime Regulations Act of 1944 which more or less superseded the Act of 1943, and P.C. 1003 in relation to the validity of the bargaining representatives continuing beyond a six months' period when no collective agreement had been reached within that time. It was quite proper for the employer to raise this question and I believe that his only reason for doing so was to have a rather obscure point cleared up. I am sure it was not done with any intention of embarrassing these proceedings.

The Board, in consultation with the Department of Labour, gave full consideration to the employer's representation and it was found that the bargaining representatives will continue in office for the period stated in P.C. 1003 whether or not any agreement has been executed between the parties. A previous ruling has been made in this connection and it is referred to in the letter received by us from the Registrar which has been entered in the record of these proceedings.

I have dealt rather extensively with all these elements as preliminary to the consideration of the main agreements.

Some of the preceding questions form clauses of the proposed agreements and need not be dealt with again. Other points which I have discussed in this connection have been irritants to either one or the other party and I hope that we have succeeded in removing

doubts which previously existed merely through insufficient information. The chief function of the Board is conciliatory and I see no good reason why we should not now be in a position to achieve a signed agreement at the end of this session. I may mention at this point that the Fire Wardens' working conditions being so different from those of the clerical staff that there will have to be a special clause inserted for them or a separate agreement drawn up. There is no objection to the latter course if it should be thought more convenient so long as it coincides with the agreement we decide upon in all the other clauses.

A reference to the transcript will, I think, show very clearly that substantial agreement was reached between the representatives of both parties to most of the clauses in the proposed agreements, and, in fact, with a few minor and relatively unimportant adjustments, practically all these clauses are interchangeable between the employees' and the employer's proposals. Other clauses, such as the one dealing with returned soldiers, it was agreed to discard as it could not usefully be included; and the grievance procedure clauses in the employer's proposal was accepted by the Union representatives.

The Fire Warden matter having been disposed of, we have thus only two points of contention; these are, Clauses A and D of Article 2 in the Association's proposal. These sections propose a "closed shop" and the collection of Union dues by the Company through the medium of the payroll. The employer's representatives refuse to enter into any agreement which contains these clauses.

After very full consideration I agree with Yarrows Ltd. in this respect and I feel that it would be most unfortunate if we should fail to obtain any agreement at all because of the Union's insistence upon their inclusion. The Union representatives may say to me that the agreement may be avoided or postponed just as much by the employer's insistence upon their exclusion. It could be. But it is my duty to form an opinion as to whether these clauses being in the agreement are more beneficial to the community, the industry, the employer, and particularly to the Union itself, than by their being left out. From every angle it appears to me that it would be more advantageous in the long run to omit them. My reasons for reaching this conclusion are these:

The "closed shop" or its alternatives, the "union shop" and the "maintenance of membership" clauses, all having essentially the same result in application, cannot, I consider, be appropriately included in the agreement now being negotiated between the parties in this

case. It is unnecessary, I think, to recite the variations between those different clauses as the representatives of both parties are well acquainted with them and their several implications. I should, however, like to mention that this Board, after deciding to exclude a "closed shop" or "union shop" clause, dealt very fully with the possibility of inserting in the agreement for your mutual acceptance a "maintenance of membership" proviso. This clause, as you are aware, would read something like this: "The company agrees that any present employee, who, on the date of certification was a member of the union, or who has since become a member of the union, shall as a condition of continued employment maintain membership in good standing, and any employee who hereafter, during the life of this agreement, becomes a member, or is reinstated as a member of the Union, shall as a condition of continued employment maintain membership in good standing."

I am personally opposed to the inclusion of such a clause in the agreement we are now negotiating, particularly because it eliminates personal decision on the part of the employee and precludes him or her from changing his or her mind on pain of dismissal. It is quite within the bounds of possibility that with such a proviso in the agreement the Union might find itself with a dissatisfied membership, or at least a disgruntled section, who would activate against the best interests of both employer and employee, who after all, have a common interest which can best be developed and maintained by a harmonious relationship based on voluntary and unconditional membership of a properly representative association.

I would therefore, urge the Union representatives to assent to a collective agreement along the lines proposed by Yarrows Ltd. and elaborated in what I have said. It may be urged by these delegates that I am gilding the gingerbread and offering them the shadow instead of the substance. This is not so. I am asking them to accept an agreement, the acquisition of which is in itself a long forward step in your march towards unionization, keeping in mind your depleted membership since certification and that you represent the interest of non-members as well as members employed on Yarrows clerical staff; an agreement which is in my opinion, generous in its terms and establishes you on a sound basis and which, with the exercise of a reasonable attitude on the part of employer and employee, should operate to the advantage of both.

I have said nothing about the "check off" proposed in Clause D as I do not think it could

function effectively without Clause A being included. I may say, however, that I am opposed to it in principle.

I thank you, gentlemen, for the patience with which you have listened to me and I hope that you will carefully consider this opinion in the spirit in which it is offered,—that of conciliation and for what I believe to be best for both interested parties.

(Sgd.) D. R. ANDERSON

Supplementary Report

Mr. JAMES H. BEATTY,
Chairman,
Board of Conciliation,
Victoria, B.C.

Re Yarrows Limited and the Industrial Clerks' Association

DEAR SIR:—In the attempted conciliation between the aforementioned parties, Mr. D. R. Anderson, Commissioner, presented an extensive and eminently fair summary of the points at issue with a plea for the two parties to come to an amicable settlement. His able argument upheld by the Company's witnesses was to the effect that the Union had much to gain in accepting Yarrows' proposed agreement, and that from this start the Union could progress and on a good record secure further concessions from the Company. The Company's representatives for their part strongly contended that Yarrows had gone a long way during the negotiations in being ready to enter into an agreement with the Union.

The Union representatives on the other hand stated that the Union members believed that all that Yarrows were ready to concede was already given to the employees without an agreement in such government orders as Section 4 of P.C. 1003 of the Wartime Labour Relations Regulations.

The Union held for the principles of a closed shop and the check-off system. I pleaded with the Union representatives to surrender the closed shop position and to go as far as a modified maintenance of members clause, and to accept a check-off plan which would only apply at the request of the unionized employee. On both points the Union yielded, but the bargaining representatives from the Company would not accede or felt that they were without authority to go farther than the recognition of an open shop union without check-off support.

At our last meeting on January 12, the Commission made a last appeal for a settlement, and expressed readiness to meet again for further consideration should either party have any further reference or proposal to make. Failing word from either party, the Commission's duties ended on January 15.

May I add that the sessions and all negotiations were carried on in a friendly manner, and that all parties appeared to be in earnest in seeking a satisfactory conclusion to the conciliation efforts.

Respectfully yours,

(Sgd.) E. S. FARR.

Report of Board in Dispute between Upper Canada Mines, Limited, Dobie, Ont., and Local 240, Kirkland Lake Mine and Mill Workers Union

On February 6 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between Upper Canada Mines, Limited, Dobie, Ont., and Local 240, Kirkland Lake Mine and Mill Workers Union. A minority report was submitted by Senator J. J. Bench, K.C.

The Board was under the chairmanship of Dr. Cecil A. Wright of Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, the Hon. Senator J. J. Bench, K. C., of St. Catharines, Ont., and Mr. Drummond Wren of Toronto, appointed on the nomination of the employees concerned.

The text of the Board's report and of the minority report, follows:—

Report of Board

Re Wartime Labour Relations Regulations, P.C. 1003, and re Upper Canada Mines Limited, Dobie, Ontario, and Kirkland Lake Mine and Mill Workers Union (Local 240, International Union of Mine, Mill and Smelter Workers.)

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

At a sitting of the Board held in Toronto, on Monday January 8, the employees were represented by Thos. F. McGuire and Bernard Doherty, both being International Representatives of the International Mine, Mill and Smelter Workers; and the Company by R. J. Henry, Resident Manager of the Company and R. F. Wilson, K.C. as Counsel. Both written and oral representations were made to the Board.

THE FACTS AND ISSUES

The present Union was certified as the collective bargaining agency for the hourly rated employees of the defendant Company, excepting office staff, etc., by order of the Ontario Labour Court, under the provisions of the then existing Ontario Collective Bargaining Act on May 10, 1944. Such certification, made in proceedings contested by the

Company, followed a vote ordered on March 10, 1944, and taken on March 20, 1944. Of the 165 employees eligible to vote, 153 ballots were cast and of these 128 were in favour of the present union, 23 in favour of the Upper Canada Employees' Association, and one ballot rejected. At this time, therefore, more than 75 per cent of the employees supported the Union as its representative for collective bargaining. At the present time, the eligible employees number about 146, and of these the Union claims about 86 per cent as members in good standing, and at the hearing produced individually signed authorizations from over 120 employees (a sample copy of which is attached hereto) by which the individuals expressly authorized the Union to negotiate for a maintenance of membership clause and check off, and by which they purported to engage to remain a member of the Union in good standing for the duration of the agreement while an employee of the Company, and further "authorized" the Union to "authorize" the Company to deduct monthly Union dues from their wages. These authorizations, while purporting to be signed by the employees, were not witnessed nor proved in any fashion, although it is fair to say that they were turned over to the Company for examination and were not challenged as being anything other than they purported to be.

It is apparent, therefore, that the Union in the present case commands an overwhelming majority of employee support. Considerable emphasis was placed by the Company on the fact that there was a heavy labour turnover at the present plant running in some years from 80-100 per cent. If that be so, the Union is apparently attracting new members since the proportion of Union members to those eligible would appear to have increased. As both sides placed emphasis on the history of Company-Union relations leading up to the present demands, some brief reference to the salient factors which furnish the background for the present dispute seems necessary.

That background furnishes a picture of Company opposition and what might be called open hostility between the present Union and the gold mining companies—of which this is one

—operating in the Kirkland Lake—Larder Lake district.

In June of 1941, the present Union requested this and eleven other mines in the district to meet and negotiate a master agreement. This was refused by all twelve companies. Eventually conciliation proceedings were instituted and a Board of Conciliation was established to deal with the dispute in all twelve mines. A unanimous recommendation was made that Local 240 be recognized and negotiated with in all the mines. As the Company's brief in the present dispute states: "This recommendation the twelve mines refused to accept, because they considered this Union at that time to be Communistic in character, a disturbing element in the community, and that the C.I.O. was anti-British." Following this, strike votes were taken in all the mines, and of the producing mines a majority in favour of a strike was recorded in all save the present Company and one smaller mine. In the Upper Canada mine, the vote is stated to have been 95 against and 75 for a strike, out of 182 eligibles. Then followed a strike in the other mines which lasted for three months, from November 18, 1941 to February 19, 1942. Whether no strike took place at Upper Canada because, as the Company suggested, the Union did not command a majority there at the time, or for other reasons, is not necessary here to determine.

During 1942, an organization known as the Upper Canada Employees' Association was formed, and one can infer that it was organized to meet the growing influence of the present Union. In October of 1943, the present Union applied to the Ontario Labour Court for certification. On the Company's contestation, further proceedings were adjourned and no vote directed because of what the Court described as "vicious propaganda" of the Union at or about the time of the application. The vote of March and the subsequent proceedings ending in certification have already been mentioned.

Following upon the certification, collective bargaining was entered into, and as a result an agreement was signed September 18, 1944 (a copy of which is attached hereto) and under which the parties have been acting. At the time of the signing of the agreement, a Memorandum was signed (which appears at the beginning of the printed agreement) by which it was expressly stated that no agreement had been reached on four issues:

- (1) Maintenance of Membership.
- (2) Check-off.
- (3) Time and on-half over eight hours in any one day.
- (4) Time and one-half for the last of four named holidays.

It was further provided that "the signing of the attached articles shall not interfere with the right of the Union to have these issues dealt with further under P.C. 1003".

An agreement on these matters not having been reached between the parties, the present Board was established and the above four issues came before the Board as, to use the language of s. 13 (2) of P.C. 1003, "matters on which they have not agreed".

Before the Board, both parties agreed to withdraw consideration of items 3 and 4 relating to time and one-half over eight hours, and on holidays, as being matters not within the competence of this Board, on the understanding that they might be presented before whatever appropriate Board has jurisdiction to deal with them. This leaves for consideration only maintenance of membership and check-off.

Before proceeding to deal with these issues the salient facts from the foregoing may be noted:

(a) This is a first agreement between the parties;

(b) The employees of the present Company overwhelmingly support the present Union now and did so at the time of certification proceedings;

(c) The present Union has been organized in the present Company's plant since 1941, and a unanimous recommendation of a Conciliation Board of that year suggested that it be recognized by the twelve Kirkland Lake Mining Companies of which the present Company was one;

(d) This recommendation was not accepted by the present Company, nor by the other Companies, because of express hostility to the aims and objects of the Union and as a result a strike of three months' duration occurred in mines other than the present Company's;

(e) Although, following legislation which compelled the recognition and negotiations of certified bargaining representatives, the Company has carried out its legal obligation of negotiating with, and indeed, concluding a partial agreement with the Union, counsel for the Company was quite candid in stating to the Board that the Company did not "approve" of the present Union and, in fact, was opposed to doing anything that "will help the perpetuation of the Union".

In light of these facts it became evident to the Board that any attempt to conciliate the parties or to effect an agreement regarding the two issues was impossible. Under these circumstances the Board is faced with the problem of reporting its "recommendations to the Minister" as required under s. 13 (2) of P.C. 1003.

JURISDICTION OF BOARD RE RECOMMENDATIONS CONCERNING "UNION SECURITY" PROVISIONS

An argument of far-reaching importance was urged before the present Board to the effect that it was beyond the jurisdiction of the Board to make any recommendation on the two issues before it, both of which can be

loosely described as "union security" clauses. As we understand the argument it proceeds somewhat as follows. P.C. 1003 provides in s. 10 for compulsory collective bargaining with a view to concluding a "collective agreement". In the event of failure to agree, a Conciliation Board under s. 13 shall eventually attempt to effect an agreement and, on failure so to do, make recommendation to the Minister. "Collective agreement" is, by s. 2 (1) (d) defined as meaning an agreement containing provisions "with reference to rates of pay, hours of work or other working conditions". "Union security" clauses, such as in issue here are not, so it is argued, "other working conditions" and hence, there is no duty to negotiate concerning them, no duty on a Board to attempt to effect an agreement concerning them, and in particular not only no duty but no jurisdiction in a Board to make any recommendation concerning such matters which are completely outside the scope of P.C. 1003.

Such argument, (which concedes readily enough that parties *may* agree on these matters, and only insists that "union security" clauses are removed from the Regulations) places all the emphasis on the terms "other working conditions" which, it is urged, means terms having solely to do with the manner, method and physical conditions pertaining to the actual work performed by an employee for his employer. If this argument be sound it wipes the foundation for the making of recommendations from under the majority of Conciliation Boards which have been established under P.C. 1003. It must be noted that with the battle for Union recognition won and given legislative sanction, (a battle which was formerly the basis of most employer-employee disputes and was, as the history of events in the present case shows, bitterly contested before the Conciliation Boards established under the former Industrial Disputes Investigation Act) the present main source of industrial disputes undoubtedly is concerned with clauses concerning some phase of "union security". If the Company's argument be sound P.C. 1003 has by s. 48 suspended the operation of the Industrial Disputes Investigation Act which has, throughout the present war and before, embodied and extended the principle of conciliation boards dealing with industrial disputes and making recommendations for their settlement, and has provided nothing to take its place in dealing with the current source of labour disputes. In Regulations expressly made so that "the differences between employers and employees should be settled by peaceful means," and which by Ontario legislation have been extended to in-

dustries within the jurisdiction of the Province, we cannot believe that such is the purpose or intent of P.C. 1003.

From a reading of the Regulations alone, "working conditions" as used in s. 2 of P.C. 1003 seems to us to be a phrase capable of bearing the interpretation of any terms on which an employee wishes to work, or on which an employer wishes an employee to work. Certainly instances are not unknown in the past where an employer insisted on an employee joining an employees' association and contributing to benefit funds etc. as a condition of work or employment. To-day such matters are not to be left to the arbitrary control of the employer but are to be negotiated by joint conferences between the employer and the bargaining representatives and eventually, if ever, adopted by mutual agreement.

To confine "working conditions" to terms relating to actual physical "work" to be done by an employee would, as we see it, eliminate such common matters as grievance procedure. Further, such terms might, on a strict construction, relate to conditions during actual working hours only. This has, indeed, been suggested as following from the *ejusdem generis* rule, which would have the general words "working conditions" limited by the specific enumeration of the preceding words, "pay" and "hours of work". On the contrary, however, in a dissenting report made in the dispute concerning the Sun Publishing Co. Ltd. ((44 LAB. GAZ. 1943 at p. 1499) while "working conditions" was construed as to exclude "union security" provisions, it was, apparently, agreed that provisions concerning "lunch rooms" might be included. Admittedly this is not a term relating to actual work during working hours. It is, however, a term on which the employers and employees have agreed that the employees should work for their employers. So are grievance procedures, seniority rights, and many other commonplace provisions which are customarily included in collective agreements and which can scarcely be related to the actual manner in which physical "work" is performed. We do not understand anyone to have made or attempted a detailed or positive delimitation of what is or is not to be included in a phrase capable of such wide import. We do not believe such delimitation is possible nor that "working conditions" can be any narrower than the content of the employer-employee relationship itself,—a content whose boundaries it is not possible, at any given time, to confine within rigid limits.

It is significant that the only things which we have seen definitely challenged as not

falling within working conditions are the so-called "union security" clauses. Perhaps the chief difficulty in recognizing the wide scope which we believe should be given to the term "working conditions" arises from the attempt to describe such clauses as being matters of concern between the employee and the union as contrasted with matters of mutual concern to employer and employee. We do not believe that such a distinction is properly made. If the employees through their "representatives" wish to make it a term of employer-employee relation that some benefit be given to the union acting as their representative, we cannot see how the "security" resulting to the union from this employer-employee bargaining can be placed in any separate category different from, for example, a rise in wages, or a provision for sickness benefits to an employee's dependents. The rise in wages is for the benefit of the employee; the sickness benefit, for his family; the union security provisions for his bargaining representative. All are matters of employee concern and, when made a matter of negotiation as terms of a collective agreement on the basis of which employees wish to work, they become matters of mutual concern of employer and employee. This is not to say that any form of "union security" is approved or recommended by P.C. 1003. To suggest that because the latter requires an employer not only to negotiate in good faith, but to make "every reasonable effort to conclude a collective agreement" implies, if one includes "union security" clauses as "working conditions", an employer *should* accept "union security" provisions is, to our minds, to misread the Regulations. There is no such general approval any more than there is a general approval to a rise in wages or a limitation of working hours. All these things are subject to negotiation, and failing agreement, P.C. 1003, unlike the American National Labour Relations Act, provides for conciliation procedure of a resulting dispute. With wages and hours removed from collective bargaining at the time of enacting P.C. 1003, the company's argument would, if the *ejusdem generis* rule were applied strictly, limit and remove from collective bargaining, compulsory negotiation and conciliation many matters to which voluntary bargaining and conciliation had theretofore extended. We cannot believe such to have been the purport of Regulations designed to procure industrial peace by negotiation and conciliation.

Considerable argument was advanced that "closed shop", "union shop" or "maintenance of membership" clauses, would impede the free choice of organization guaranteed by P.C. 1003 and interfere with the right to choose new

bargaining representatives as provided in secs. 9 and 19. Such arguments would seem germane to an issue whether such clauses were even permissible or legal. We do not understand it to have been seriously questioned before us that employers *could* agree to such provision if they chose. We fail to appreciate the argument which recognizes the legality of such provisions but states that their operation is opposed to the right of freedom to organize and hence not withing "working conditions". The clauses are either legal or illegal as contrary to P.C. 1003. If legal, we do not know what they can be styled if not "working conditions" for the unit covered by the agreement. If "working conditions" they are proper subject matters for negotiation in good faith, and, if a dispute arises in such negotiations, are, as they have been here and in other cases, proper subjects for reference to, and failing conciliation, recommendation by a Conciliation Board.

We would have been content to rest our opinion on the impossibility of delimiting what is and what is not a "working condition" within the sphere of demands made by employees as a term or condition on which they choose or would like to work or by employers as to conditions of giving work. In view of the importance of the point, however, and the examination of authorities which both counsel for the company and the members of the Board have made, we believe we should give further expression to the views which lead us to hold against the Company's contention.

We were referred to the Wartime Wages Control Order, P.C. 5963 of July 10, 1942, and in particular s. 23, as indicating that a distinction was contemplated between "terms of employment" and "working conditions". That section did speak of altering a "*term of employment*" including any rule, regulation or practice governing the "*working conditions*" of employees which would have the effect of changing wage rates. From this, it is argued that "working conditions" was used as a phrase of different import, and not synonymously with, "terms of employment". We readily admit this possibility although it still does not furnish any definite guide as to the content of either phrase; and it is worthy of note that in secs. 18 and 20 of P.C. 9384 of December 9, 1943 (the successor to P.C. 5963) the reference to "working conditions" is eliminated and only the phrase "term of employment" continued. Whether the draftsman actually intended to change the law or to treat the two as synonymous is impossible to say, particularly as s. 29 (b) P.C. 9384, refers to "work or duties performed" and "terms of employment or working conditions". It is our opinion

that it was not the intention in any of this legislation to contrast different subject matters by the use of "or" (e.g. "work or duties") so much as to link what might be described as "convertible and equivalent synonyms". In any event the subject matter of Wage Control regulation is unrelated to collective bargaining or labour disputes arising in the course of negotiating collective agreements which admittedly constitute the subject matter presented to this Board.

We cannot ignore, either, the fact that many Boards have made recommendations concerning "union security" and that the Minister has established Boards where that was the sole issue for consideration by the Board. While these matters are not conclusive, they do indicate that P.C. 1003 has been considered both by Boards and the Minister responsible for its administration as embracing the situation before us. Indeed the printed form now in use by the Minister in establishing a Conciliation Board states that the Minister "is satisfied that the said dispute is one to which the provisions of the said Regulations apply." We do not say these matters are determinative, for if there be clearly no jurisdiction a succession of Boards established contrary to law or recommendations made without legal justification cannot create jurisdiction, but in the absence of clear authority to the contrary we believe that we can have regard to this practice as supporting the view which we have reached on the wording of the Regulations that subjects of dispute as to the terms of an agreement being negotiated between the representatives of the employees and the employer—and therefore terms on which existing employees will work and new employees be hired to work—come, in the absence of express indications to the contrary, within the term "working conditions".

It is impossible to construe P.C. 1003 save in the light of the history leading to its enactment and we might add, in light of other similar legislation which furnished the source for the present legislation. The method adopted by Dominion legislation for the settlement of labour disputes during the early years of the war was to extend to war industries the provisions of the Industrial Disputes Investigation Act. The underlying objects of that Act are well known. To the widely extended industries to which it applied during the early war years, if a dispute were not settled, provision was made for the establishment of a Conciliation Board to hear the parties, attempt a settlement, and, failing the latter, recommendations were made to the Minister. Strikes or lockouts until after the proceedings before a Board terminated were declared il-

legal. By this Act a "dispute" meant any difference "as to matters or things affecting or relating to work done or to be done. . . . or as to the privileges, rights and duties of employers or employees" and amongst an enumeration of topics, included "the mode, terms and conditions of employment."

It is clear that the procedure of this Act has furnished the basis for the provisions of the Act relating to Conciliation Boards under P.C. 1003 although the nature of the "dispute" has now changed. Under the old Act, it is common knowledge that one of the chief sources of disputes concerned the question of union recognition for purposes of collective bargaining. P.C. 2685 purported to indicate certain Governmental policy with regard to industrial relations or, in the language of the order "labour conditions." Amongst the "labour conditions" discussed occurred the clauses from which the present definition of a collective agreement in P.C. 1003 was undoubtedly taken. Clause 7 of P.C. 2685 spoke of the employees being free to negotiate through trade unions or other representatives "concerning rates of pay, hours of labour and other working conditions, with a view to the conclusion of a collective agreement."

Under the old Act, and the principles of P.C. 2685, the chief struggles before Boards of Conciliation in the period immediately preceding the passing of P.C. 1003 concerned "union recognition". Board after Board made recommendations on this question. Other, although fewer, Boards were beginning to face "union security" issues in cases where the employer had already recognized the union. Both of these issues came before Boards in an endeavour to settle disputes and both, apparently were deemed to concern either "mode, terms and conditions of employment", "labour conditions" or "working conditions". All these phrases were used indiscriminately and, we believe, without any attempt to distinguish between them. The chief concern was to settle labour disputes and no one can deny that both recognition and "union security" have been and are historic causes of labour disputes.

As many employers still refused to grant union recognition, and as recommendations of Boards were—as they are today—without any legal sanction the next step was towards a form of compulsory collective bargaining. In Ontario, this step was taken by the Collective Bargaining Act of 1943 which set up a procedure for certification of bargaining agencies and provided a duty to negotiate with such certified agency looking towards a "collective bargaining agreement" which was defined as one "setting forth terms and conditions of employment." This Act did not contain any

procedure for conciliating the differences which might arise during the negotiations.

Eventually P.C. 1003 was passed providing, like the Ontario Act, for compulsory collective bargaining with certified representatives, with the addition of procedure from the old Industrial Disputes Investigation Act, for the conciliation of differences that might arise during the bargaining process. By provincial legislation in Ontario P.C. 1003 also supplemented the Collective Bargaining Act there.

From this recital of facts it seems apparent that the question of industrial disputes and their peaceful settlement furnished the starting point for all the legislation. Further, it is apparent that throughout the various enactments, terms such as "working conditions", "labour conditions", "mode, terms and conditions of employment" are used interchangeably to cover the common ground of matters of concern between employers and employees which (a) might give rise to a dispute, and (b) might furnish the subject matter of a collective agreement and thus eliminate disputes. The net effect of the legislative history to date is to remove from Conciliation Boards the issue of recognition but to leave them, as we see it, in exactly the same position as they were in before with regard to disputes arising in the course of bargaining negotiations. Since compulsory settlement of disputes concerning the interpretation or violation of a collective agreement is expressly provided for in P.C. 1003, s. 18, one can understand why the wider scope of the Industrial Disputes Investigation Act was felt unnecessary and abrogated in favour of a collective agreement.

It is possible to argue that the Industrial Disputes Investigation Act contrasts "matters or things effecting or relating to work" on the one hand and "the privileges, rights, and duties of employers or employees", on the other; and to say that the former is equivalent to "working conditions", while the latter gives an extension of that phrase to other unrelated matters. It can then be said that P.C. 1003, in adopting "working conditions" as the subject matter of a "collective agreement", and consequently of matters forming a dispute in the negotiation of such agreement, consciously took the narrower view, and by rejecting the wider alternative limited matters of agreement—and matters of dispute to which Conciliation Boards were made applicable—to this narrower meaning. We understand this view to have found favour with one member of this Board. While this seems to us the most formidable argument against the wide interpretation which commends itself to us the manner in which "working conditions" has been used in the Dominion legislative enactment and regulations

already examined, and its use in American legislation to be referred to later, leads us to the conclusion that such a choice was not consciously made with any view to limiting with any precision terms of work or employment.

"Working conditions", in light of previous Dominion legislation seems to us to be a compendious phrase indicative of terms on which employers wish to employ or employees wish to work and which are deemed serious enough by either side to be included in an agreement or to give rise to such differences of opinion as to result in industrial warfare. That clauses concerning "union security" are of this kind we have ample evidence. To treat them as omitted from the Conciliation procedure which has been a feature of Dominion labour policy throughout the present war, would require something more explicit than the definition of a collective agreement in terms of "working conditions".

Our examination of American legislation and experience confirms us in our belief that "working conditions" can not be given the restrictive effect argued for by the Company. It is an accepted fact that the National Labor Relations Act of the United States furnished the basis of much of our compulsory collective bargaining legislation. It is not so well known, however, that the limited American Railway Labor Act of 1926 (as amended in 1934) not only was the precursor in a limited field of the general American Act later adopted, but in many respects, much more closely resembles the actual operation of our present Dominion legislation. It is also in the 1926 Act that the expression "working conditions" appear, so far as we have been able to discover, for the first time. That Act was passed *inter alia* "to provide for the prompt and orderly settlement of all disputes concerning rates of pay, rules or working conditions" (s. 2). Stone J. delivering the judgment of the United States Supreme Court in *Virginian Ry. Co. v. Federation* (1937) 300 U.S. 515 at p. 553 states succinctly the objects of the Act in language which might equally apply to our present legislation: "Its provisions were aimed at the settlement of industrial disputes by the promotion of collective bargaining between employers and the authorized representatives of their employees, and by mediation and arbitration when such bargaining does not result in agreement".

When the National Labor Relations Act (Wagner Act) established a general system for authorizing or certifying bargaining representatives and compelling the employer to negotiate in good faith (without, however, any conciliation procedure as in P.C. 1003) s. 9

used somewhat different language than that of s. 2 of the Railway Labour Act. It provided for collective bargaining "in respect to rates of pay, wages, hours of employment, or *other conditions of employment*". We believe that this last term is in no way different in kind from "working conditions", and this is shown in language of the N.L.R.B. which, shortly after the passing of the Act spoke of negotiating on "wages, hours and basic working conditions", (See Atlantic Refining Co., 1 N.L.R.B. 359 at 368.)

Counsel for the Company admitted in a supplementary memorandum supplied to the Board on this issue that if the words of s. 2 (1) (d) had been "other conditions of employment", as in the National Labor Relations Act it would be "doubtful" if the Company's argument could stand. As indicated no distinction between the terms seems to have been made in N.L.R.B. decisions, and the Company referred us to *St. Joseph Stockyards Co.* (1936) 2 N.L.R.B. 39 where the Board, speaking of a collective agreement said that "customarily (it) will have to do with wages, hours and *working conditions* The purpose has been to stabilize the *terms of employment*" This interchangeability of phrases supports the view that the American and Dominion phraseology was not consciously used for the purpose of drawing any such distinction as the Company maintains.

Further, Hughes C. J. in *N.L.R.B. v. Jones & Laughlin* (1936), 301 U.S. 1 at p. 44, after referring to the analogy between s. 2 of the Railway Labor Act and 3. 9 of the National Labor Relations Act, spoke of the latter as imposing a duty on the employer "of conferring and negotiating with the authorized representatives of its employees for the purpose of settling a labour dispute." This confirms the view which we reached above that any matter between employee and employer serious enough to constitute a dispute is a matter for bargaining and agreement. Further support for this view is afforded by *Stone J. in National Licorice Co. v. N.L.R.B.* (1940), 309 U.S. 350 to 360.

With the legislative policy of leaving disputes over such issues as "union security" to Conciliation Boards whose recommendations have no effective sanction and for whose guidance on such matters no governmental policy has been laid down, we are not concerned. Much the same situation prevailed at the time when Boards were left to settle disputes by recommending the recognition of unions as bargaining agencies, even though, after June, 1940 P.C. 2685 may be said to have furnished some guide in this connection. In such circumstances a Board can only act on what it

believes to be reasonable on the particular facts taking into account what it believes to be the broad—if vague—implications of compulsory collective bargaining legislation which was designed to prevent disputes ripening into more active industrial warfare.

For the reasons given therefore we believe that it is the mandatory duty of a Conciliation Board under c. 13, having failed to obtain agreement between the parties on matters of union security, to make what recommendations it deems proper as to the manner in which the dispute concerning such matters should be settled between the parties.

MAINTENANCE OF MEMBERSHIP

The first proposal put forward by the Union was to the following effect:

"The Company recognizing the desirability of all employees covered by this Agreement being members of the Union to insure efficient working of this Agreement, agree that it shall be a condition of employment with the Company that employees shall become and remain members of the Union in good standing during the life of this Agreement."

On the refusal by the Company, the Union submitted the following clause:

"The Company and the Union agree that, in the interests of the successful operation of all the provisions of this Agreement, that, all employees members of the Union at the time of the signing of this Agreement, shall remain members of the Union in good standing during the life of this Agreement. Further, that all new employees shall become members of the Union as a condition of employment and remain members of the Union in good standing during the life of this Agreement."

Such clauses are in reality "Union Shop" clauses: the first requires membership in the Union as a condition of employment of (1) all present Union member employees; (2) all present non-Union employees; (3) all future employees.

The second clause, a modified form of the first merely excludes class (2).

The arguments of the Company were, in the main, directed towards these clauses which would compel an individual employee to join the Union or lose his employment. Considering the fact that the present Union is negotiating a first contract after long and strongly expressed opposition the Board was unanimously of opinion that, regardless of whatever the merits or demerits of the "Union Shop" might be, it would not be in the interest of the Union, the employees, or the Company at this time to insist on these provisions and, therefore, this Board does not discuss in this connection the arguments of the Company

based on an invasion of the "democratic rights" of individual employees.

Before the Board, the Union agreed to modify its request and manifested its willingness to accept a maintenance of membership clause by which only employees who were or became members of the Union would, as a condition of employment, remain members in good standing for the duration of the agreement. This also the Company refused.

A refusal to agree to such a clause can scarcely be supported by any reference to infringement of individual "rights" since in such case the individual employees have, in effect, through their representative, and in this case by the individual authorizations presented to the Board, requested such a clause as a condition of their own employment. The arguments in favour of such a clause—that it will lead to a stabilization of union membership and free the union from necessity of carrying on organizational activities which are more relevant to a stage now passed, namely certification as the bargaining representative, thus permitting it to devote its full attention to the problems of administering a collective agreement in the interests of employees and company alike—have been well canvassed.

A denial of what are in reality the individual requests of employees for this form of clause is logically difficult to justify since it can be interpreted as an assertion by the employer of a claim to protect his employees from what he considers to be an improper Union. Indeed, in the present case, this is expressly made one of the chief objections of the Company to both this clause and the check-off. Reference is made in the Company's brief to the preamble to the Constitution of the Union, and to the Union's connection with political activities of which it disapproves, as indicating the "instability" of the Union—which we can only interpret as meaning the "unsuitability" of the Union in the Company's mind, to receive the co-operation from the Company which is implicit in collective bargaining.

Such an attitude seems to us completely contrary to the necessary implications of successful collective bargaining as contemplated by P.C. 1003. If the employees are to have an unrestricted choice of bargaining representatives—and this is compulsory under the Regulations—it must follow that an employer is denied any right to protect his employees from unions of which it does not approve. General economic or political aims of a union freely chosen by employees, provided they be not contrary to law, are no more the concern of the employer than are the economic or political views of the employer to the employees, or the economic and political

views of an individual employee to his employer. To bring political controversies into the field of employer-employee relations would not only kill industrial democracy but would place political democracy itself in grave peril.

It was because of this attitude on the part of employers that the strike over union recognition took place in this district in 1941-2. Recognition having now been forced upon the companies by legislative enactment, the re-appearance of an attitude which attempts to save the employees from themselves by refusing to stabilize the relations between Union and Company can not fail to be considered as a sign of hostility inimical to the peaceful operation of collective bargaining and might conceivably force the Union to keep on the defensive and to maintain an attitude of combativeness instead of fostering a co-operative endeavour of employer and employees which the legislative policy of P.C. 1003 envisages and, in part, requires.

Further, as the Company relied strongly on maintaining "democratic" rights, we fail to see how it can, in light of those arguments, consistently deny individuals the right to make support of their own Union a condition of employment. If, as the Company argued, and as we readily admit, democracy involves duties as well as rights, we know of no better way of bringing home to individuals a sense of responsibility than to compel them at their own request to remain loyal for the duration of an agreement to the Union of their choice.

While we are not, therefore, concerned with the Company's expressed opposition to the Union policies—a question which if relevant at all was a matter to be considered on certification proceedings—we are concerned with two other factors. It is clear that there is a manpower shortage in this district and in this "non-essential" industry. Even though the condition for discharge asked by the employees be self-imposed, it does add a possible additional ground for discharging employees which might conceivably deplete the Company's staff. Whether it would, in practice, have that effect or not, we are willing to recognize the Company's objection to the clause on that ground, particularly as this is a first agreement and the Company can properly say that it has no means of knowing what the Union may consider to amount to loss of "good standing" in the Union. On this ground, therefore, we recommend that the Union withdraw its request for a maintenance of membership clause.

CHECK-OFF

While recommending the withdrawal of the Union's request for maintenance, we feel that the employees have grounds for saying that there is sufficient expression of hostility by the employer to the present Union to warrant some action being taken to give the present Union the opportunity it is entitled to as a *certified* bargaining representative of conducting employees' affairs for the duration of the agreement in a constructive manner rather than having to devote its energies to the waging of a war for existence. It is with this in mind that we approach the Union's request for check-off.

It was urged that union security provisions, including check-off were not customary in gold mining companies in Ontario. This argument is not persuasive with us since we have no means of knowing the facts which govern situations other than that before us. We are not unmindful of the fact that a unanimous Board in connection with Lake Shore Mines Ltd.¹ reported against a check-off and that in the case of Noranda Mines Ltd.² the majority of the Board, refusing check-off relied on a statement of the Employees' nominee Prof. Bora Laskin, in the Lakeshore report to the effect that check-off should not be used as "the means of initiating union stability". We do not know what the facts were in the Noranda case but in the Lakeshore case, the unanimous report showed that out of 471 persons eligible to vote only 236 were in favour of the Union and that "no evidence was given that the situation had altered" at the time the Board made its report. It is in the light of these facts that the statement of Prof. Laskin must be read, and we must confess that so read it has no application to the present case. Where a Union has not won the confidence of the employees—to say nothing of the fact that it is arguable whether, according to the rulings under P.C. 1003, differing from those under the Ontario Collective Bargaining Act concerning "majority", it would to-day have been certified—we agree that a check-off or other form of union security should not, ordinarily, be given. A Board, on which two members of this Board sat (Steel Company of Canada Ltd., Hamilton Works)³ has recently, in effect, so held. In the present case a claim of 86 per cent membership, supported by a 75 per cent vote in certification proceedings, supported by individual authorizations presented to this Board, changes the entire picture. To ignore this request is further

evidence of the Company's unwillingness to co-operate in freeing the Union from organizational activities.

To the Union's claim for check-off the Company suggested that it was contrary to s. 19(1) of P.C. 1003 which forbids an employer contributing "financial or other support" to a union. This argument has been, in our opinion, satisfactorily dealt with in the report of a Board in Fittings Limited, Oshawa (*L.G.*, 1944 at pp. 1350-51) on which Board the present Chairman participated. We are of opinion that s. 19(1) was directed to an entirely different object and has no application to a clause for check-off inserted in a collective agreement by mutual consent between a company and a certified representative.

Another argument of the Company was to the effect that a check-off might be accepted "as a recommendation of the Union" by the Company. The latter again repeated its opposition to the general policies of the Union. We have indicated before our view that for collective bargaining purposes the political or economic views of a particular union are purely matters of employee concern. The idea that an employer "recommends" a Union lends support to the view that full co-operation in collective bargaining can only be obtained if the Union's views on matters of employee interest coincide with or support those of the employer. Were this view to be generally adopted it would completely nullify the principle of freedom of choice of bargaining representatives. An employer need not "approve or recommend" a certified union. It is precisely in cases where he does not that we believe a union is entitled to ask for some provision whereby disapproval is not allowed to operate or be thought likely to operate as a stumbling block to the co-operative endeavours which legislative policy contemplates as flowing from collective bargaining. It is because of this attitude on the part of the Company and the past history of labour relations in this district, that we believe the Company should, despite its known opposition to the Union as such, do something to assure its employees that it is willing to allow the Union of their choice an opportunity either of proving or discrediting itself. With a Union under pressure of organizational and collection duties it seems to us that the Company is inviting a display of "sales tactics" rather than constructive industrial relations.

Apart from this, however, some 86 per cent of the Company's employees have requested that the Company agree to some inconvenience in bookkeeping and some expense—although if the Company wishes, the Union has indicated its willingness to bear this expense—in order

¹ L.G., Nov., 1944, p. 1357.

² L.G., Feb., 1945, p. 163.

³ L.G., Jan., 1945, p. 55.

to convenience them and the Union of their choice. Apart altogether from the personal attitude of the Company towards the Union we do not see how a refusal of the Company to their own employees can be considered as other than a reflection on the intelligence of such employees and an indication that the Company, while compelled to recognize the Union elected by them, will do nothing to facilitate that Union's tasks. We do not believe that this can make for the peaceful settlement of differences contemplated by P.C. 1003.

While the Union requested in the first negotiations a form of compulsory check-off, it later agreed to a form of voluntary revocable check-off. In view of the fact that we are, for the reasons given, recommending against a maintenance of membership clause, we are of opinion that the Company should be willing to recognize and act upon a voluntary authorization from employees stated to be irrevocable for the duration of the agreement. Such a clause may achieve the same security, to which we believe this Union on the facts entitled, as a maintenance clause would provide, save that it does not force the employer to discharge an employee who ceases to remain in good standing. As we have said before we fail to see how an employer can object to employees dealing with themselves in this manner unless we are willing to recognize that an employer can still dictate what he thinks best for the employees so far as organization is concerned. Regardless of what our own views on this might be, the legislative history of collective bargaining in this country indicates that this attitude is contrary to the policy behind P.C. 1003.

In light of this history and with a view to the adoption of a provision which we believe will best insure peaceful industrial relations at this mine for the future, we therefore recommend that a clause somewhat similar to the following be inserted in the present collective agreement:

Upon presentation of an authorization signed by an employee to deduct \$1.00 each month from his wages, which authorization may be stated to be for the duration of the present agreement, the Company undertakes to honour such authorization according to its terms and to transmit by cheque the total amount so deducted to the Secretary of the Union before the 10th of the month in which it is deducted.

All of which is respectfully submitted.

Dated at Toronto this 29th day of January, 1945.

Minority Report

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and in the matter of Upper Canada Mines, Ltd., Dobie, Ont., (Employer); Kirkland Lake Mine and Mill Workers' Union, Kirkland Lake, Ont. (Employees).

To: the Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Canada.

I am unable to concur in the report and recommendations proposed to be submitted to you by my colleagues.

1. Jurisdiction of the Board

The jurisdiction of this Board to make any recommendation on the issues of "maintenance of membership" and "check-off", or either of them, is challenged. It is contended by the employer that provisions relating to matters of this kind are not within the meaning of "collective agreement" as defined by Section (2) (1) (d) of P.C. 1003, i.e. that the phrase "other working conditions" to be found in that definition is not so broad as to include matters which do not relate wholly and exclusively to the relationship of employer-employee. It was argued before us that an employer may adamantly refuse to negotiate on provisions of the character here involved without in any way offending against either the letter or spirit of the Wartime Labour Relations Regulations and that, as a consequence, a recommendation of a Board of Conciliation purporting to deal with such issues not only would be fruitless but a gratuitous expression of opinion made without any vestige of authority.

In common with the other Members of the Board, the point which thus has been raised I have made the subject of some anxious and considerable study. The resulting opinion which I have reached being different from that at which my colleagues have arrived, it is necessary for me to state the reasons supporting my view. The question probably could be disposed of by the simple application of well-known rules for the interpretation of statutes, these being that—(a) where words are in themselves precise and unambiguous no more is necessary than to give them their natural and ordinary sense; (b) general words following specific words are limited to things *ejusdem generis* with those before enumerated, and (c) statutory provisions giving jurisdiction to bodies created *ad hoc* must be strictly construed. Indeed, the difficulties which one encounters in attempting otherwise to interpret the meaning of the phrase "other working conditions", as used in P.C. 1003, well

emphasize the wisdom of the law in formulating such rules and the lack of wisdom of which one may be guilty in departing from their application. However, since it may be considered desirable to avoid disposing of the matter on grounds which may be regarded as too technical or narrow, and because one is desirous of approaching the problem from the viewpoint of giving the Order in Council as liberal a construction as possible, I have ventured to resolve the issue on broader considerations.

Little, if any, advantage has accrued to me from an attempt to determine the origin of the phrase "working conditions" or from an examination of various enactments dealing with labour relations in which the expression has been used. It would not seem that the term has acquired any definitive meaning in the course of its legislative history. The language as we find it in P.C. 1003 seems to have been taken largely from P.C. 2685 of June 19, 1940, which embodied the Government's "Declaration of Principles" governing the regulation of labour conditions during the war. In this last mentioned Order in Council, there is also found the term "labour conditions" and a reading of it as a whole leaves one with the impression that "labour conditions" is used in a broader sense than the phrase "working conditions". After P.C. 2685, the expression is next found in the Wartime Wages Control Order, P.C. 5963, of July 10, 1942. There it appears as a heading to paragraph 23, in that that paragraph itself, and also in paragraph 29. Clearly, as employed in the Wartime Wages Control Order, the term was never contemplated as embracing matters concerning the relationship between the employee and the union of which he might be a member; indeed, the National War Labour Board has so held in two cases: *In the matter of an application by District 26, United Mine Workers of America on behalf of employees of Dominion Coal Company Limited, et al, March 24, 1942*; and *in the Matter of Canadian Car Munitions Limited and Ammunition Workers Union of Cherrier, September 15, 1943**.

While some particular significance may be attached to the use of the term as it appears in P.C. 5963, I agree that this circumstance does not furnish any decisive clue as to its full meaning.

Merely to assert that it is legislative policy to leave questions of "union security" to Boards of Conciliation under P.C. 1003, and to support this statement by reference to such circumstances as the fact that many Boards have made recommendations concerning union security, to my mind is begging the question. The legislative policy supporting the Order in

Council must be found in its expressed intention as properly interpreted and not in the realm of conjecture. I think that the Governor in Council in adopting P.C. 1003, must have been fully cognizant of the causes of industrial unrest and if a limitation was placed by him on the types of dispute which should be made the subject of reference to Boards of Conciliation, this must have been done deliberately.

An examination of the legislative history leading to the enactment of P.C. 1003 persuades me against the view that the term "working conditions" has the unlimited meaning ascribed to it by my colleagues. The Industrial Disputes Investigation Act was the immediate forerunner of P.C. 1003 in the field of Dominion legislation designed to settle industrial disputes. The Order in Council contains a provision suspending the Act during the period in which the former is in force. The term "working conditions" is not found in the Industrial Disputes Investigation Act. However, in the light of the opinion which has been expressed by the other members of this Board, I think it useful to make reference to the definition of "dispute" which is contained in that Act. If the term "working conditions" was employed by the Governor in Council having regard to a long-standing legislative policy of referring to Boards of Conciliation *all* matters which might be "deemed serious enough—to be included in an agreement or to give rise to such differences of opinion as to result in industrial warfare", then it becomes increasingly important to compare the language used in the Industrial Disputes Investigation Act and in P.C. 1003. In the statute, "dispute" is generally defined as meaning any dispute or difference between an employer and one or more of his employees "as to matters or things affecting or relating to work done or to be done by him or them or as to the privilege, rights and duties of employers or employees . . .". The language thus employed in the formal enactment of Parliament makes it appear that the legislators there considered disputes arising out of "things affecting or relating to work done or to be done" and disputes arising out of matters affecting the "privileges, rights and duties of employers or employees" to be dissimilar causes of industrial unrest. It seems to me that real significance is to be attached to the circumstance that, in adopting P.C. 1003, the Governor in Council departed from the very broad provisions of the statute when he came to define the matters which should be made the subject of negotiations and agreement between employers and employees and, consequently, which might be made the subject of reference to Boards of Conciliation. If I were obliged to rest my opinion on this

* L.G., October, 1943, p. 1348.

consideration only, I would feel compelled to adopt the view that P.C. 1003 was intended to relate to "matters or things affecting or relating to work done or to be done" by the employee as distinguished from "privileges, rights and duties of the employees" which latter phraseology I regard as being more readily applicable to such matters as union recognition, assignment of union dues and other subjects related to union security. If one gives consideration to the language used in collective agreements when providing for matters of this kind, he does not find that the phrase "working conditions" is employed. Such things as "closed shop", "union shop" and "maintenance of membership" are required to be included in the agreement as "conditions of employment" and, indeed, the latter phrase is the one which is used by the applicant union in this case in its written submission before the Board. There are further numerous examples of this use of the phrase "conditions of employment" some of which, for purposes of quick reference, may be found in only the last two issues of the LABOUR GAZETTE for the months of November and December, 1944. See:—

Report of Board in dispute between *Fittings Limited and United Steel-Workers of America, L.G., 1944, p. 1343* esp. at pp. 1344, 1346, 1350;

Report of Board in dispute between *Canadian Oil Companies Limited and Its Employees, L.G., 1944, p. 1354*; . .

Report of Commissioner re *The United Packinghouse Workers of America and Canada Packers Limited et al, L.G., 1944, p. 1484* at 1485;

Report of Board in dispute between *The Sun Publishing Company Limited et al and Vancouver Newspaper Guild, L.G., 1944, p. 1493* at 1496.

In my opinion, therefore not only in their natural and ordinary sense do the words "working conditions" not extend to matters affecting the privileges, rights and duties of employees but they have never acquired such a meaning in the parlance of labour relations.

Apart from the considerations already mentioned, it seems to me that to give the phrase "working conditions" the wide meaning attributed to it by my colleagues of this Board is to disregard one of the broad principles underlying P.C. 1003, the right of freedom of organization by employees. Also, to give the term such unlimited scope, in my respectful view, is largely to negative the purpose and effect of secs. 9 and 19(2) of the Order in Council. To say that there is no restriction upon an employer including clauses relating to union security in a collective agreement, a proposition with which I am not expressing agreement, does not overcome the difficulty with which I think my colleagues'

interpretation is met by the provisions of secs. 9 and 19. S.9 provides that "at any time after the expiry of ten (10) months of a collective agreement whether entered into before or after the effective date of these regulations, the employees may elect new bargaining representatives in the manner provided in Section 5 and application may be made to the Board by or on behalf of such bargaining representatives for their certification". Obviously, a collective agreement containing a "closed shop" or even a "maintenance of membership" provision would put a clog upon the right of the employees to take advantage of s. 9. They would not be "free to organize" for the election of or appointment of new bargaining representatives during the currency of such a collective agreement as they would be running the very serious risk of discipline by the union holding the primary contract and as the result of which discipline they might be deprived of the very employment which the agreement was avowedly designed to protect. Section 19(2) expressly prohibits an employer from imposing "any condition in the contract of employment seeking to restrain an employee from exercising his rights under the regulations". There is no doubt in my mind that the inclusion of a "closed shop", "union shop" or "maintenance of membership" provision in a collective agreement does so operate as to restrain employees from exercising freely the rights given to them under s.9. What is contained in s.9 and s.19 seems to be wholly inconsistent with the view that an employer should be required to negotiate in good faith and make "every reasonable effort to conclude a collective agreement" containing provisions such as those in issue before this Board.

One or two other matters also should be considered. P.C. 1003 was adopted as a war-time measure. It was passed subsequent to National Selective Service Regulations which were designed to make available for the prosecution of the war the highest potential of our human resources and to facilitate the ready transfer and employment of this manpower in the manner best suited to the emergency. Keeping in mind that P.C. 1003 makes it compulsory for an employer to negotiate in good faith with his employees and "make every reasonable effort to conclude a collective agreement", I cannot think that it was the intention of the Governor-in-Council to require employers to "make every reasonable effort" to agree upon provisions for "closed shop", "union shop" or "maintenance of membership" all of which, to a greater or lesser degree are in conflict with the policy

and purpose of National Selective Service Regulations.

Finally, an employer who contravenes any of the Wartime Labour Relations Regulations may be prosecuted upon leave given by the Board. One needs only to ask himself whether the National or any Regional Board could so certainly interpret the words "working conditions" as to enable it to regard failure to negotiate upon union security matters as a violation of the regulations, to recognize that gravest doubt attends any attempt to give the term the broad meaning which it requires to have to include these subjects of possible dispute. I think it goes without saying that, even if a Board did give its consent to such a prosecution, no court could hold with certainty that the phrase "working conditions" includes matters or things having to do with union security and convict an employer for failure to negotiate in good faith and to make every reasonable effort to conclude a collective agreement on such topics.

For all of the reasons above mentioned, my conclusion is that questions of "maintenance of membership" and of "check-off" involved in this dispute are not matters in respect of which an employer is obliged to negotiate in good faith for the purpose of concluding a collective agreement as defined by s.2(1) (d) of P.C. 1003 and that this Board has no power or duty to make any recommendation respecting the same. We must interpret the regulations as they are. We have no right, in effect, to add words to them under the guise of explaining or interpreting them.

2. *The Merits*

Had one or more of my colleagues on the Board subscribed to my views on the matter of the Board's jurisdiction to make any recommendation on the two matters which were in dispute before us, there would have been no necessity for me to put forward any opinion as to the merits. However, the other members having held themselves empowered to make a recommendation, I am not sure that I would be fully discharging my responsibility without giving some expression to the views which I entertain on the conclusions which they have reached on the matters giving rise to the reference. Accordingly, I deem it advisable to say something with regard to these features, although I do so in the nature of "reporting" rather than "recommending".

Had I been of the opinion that the Board had any jurisdiction to entertain the questions involved, in the result I would have concurred in the recommendation which they have made to the effect that the union should withdraw

its demand for the maintenance of membership clause.

Had I considered the Board to have jurisdiction to deal with the matter, I would not have concurred in the recommendation made by my colleagues on the matter of check-off. The dispute which is here involved arises out of the negotiation of the first agreement to be entered into between the union and the Company. I am in agreement with the remarks of Dr. Wright and Professor Laskin in the dispute concerning Fittings Limited (L.G., 1944, p. 1343 at 1347) that, "... a collective bargaining agency should not lightly demand provisions for union security. Generally speaking, unless the union has had some considerable experience in the plant, and unless the particular union has demonstrated its ability to attract an overwhelming majority of members in that plant,.... it should (not) request the co-operation of an employer in maintaining its strength and membership". In the case before this Board, the union appears to have a substantial majority of members amongst the employees, but it has not had "considerable experience in the plant". It was certified only on May 10th, 1944, and the collective agreement under which it is now operating was not made until September 18th, 1944. Moreover, two other Boards of Conciliation dealing with disputes between this same union and other mining companies have declined to recommend either maintenance of membership or check-off in those cases. I refer to the unanimous report of the Board in the case dealing with Lake Shore Mines Limited and the majority report in the case of Noranda Mines Limited. I cannot agree that the unanimous recommendation in the Lake Shore case can be watered down by reference to the supplementary report of Professor Laskin to which neither of the other two members of the Board was a party. If it is desirable to attain and maintain uniformity in labour relations practices in an industry, then I would have regarded it as being preferable to follow the decisions in the two other mining cases which I have mentioned. It certainly does not seem to me that stability in labour relations is to be achieved by having one set of working conditions in one mine and a different set in another mine in the same area, both sets of rules having been devised, or at least recommended through the same Government agency.

All of which is respectfully submitted.

Dated at St. Catharines, Ontario, this 8th day of February, 1945.

(Sgd.) J. J. BENCH,

Member.

**Report of Board in Dispute between Senator Rouyn Mines, Limited,
Rouyn, P.Q., and Rouyn Mine, Mill and Smelter Workers'
Union, Local 688.**

On February 23 the Minister of Labour received the Report of the Board of Conciliation which dealt with a dispute between Senator Rouyn Mines, Limited, Rouyn, P.Q., and Rouyn Mine, Mill and Smelter Workers' Union, Local 688. A minority report was submitted by Major J. M. Eakins.

The Board was under the chairmanship of His Honour Judge Honore Achim, Hull, P.Q., appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; and Messrs. J. M. Eakins, Noranda, appointed on the nomination of the employing company, and Mr. Guy M. Desaulniers, Montreal, appointed on the nomination of the employees concerned.

The text of the Board's report and minority report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations P.C. 1003 and Senator Rouyn Ltd., Noranda, P.Q., and Local 688, International Union of Mine, Mill and Smelter Workers.*

To
The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

SIR:—The Board of Conciliation appointed herein, consisting of His Honour Judge Honore Achim, Chairman; Mr. Guy Merrill Desaulniers, representing the "Employees"; and Major J. M. Eakins, representing the "Employer"; after hearing the parties for the purpose of making its recommendations, begs to report as follows:

The "Employees" were represented by Mr. Thomas F. McGuire, Wm. Simpson, Oliver Bretton and Leo A. Behee and the "Employer" was represented by J. C. Houston and R. W. Taylor.

The Board unanimously wishes to take this opportunity of expressing its appreciation to all the parties who appeared before it, for the friendly and co-operative spirit which prevailed throughout and for the dignified and able manner in which both sides presented their case.

The matters referred to the Board to be dealt with were the following:

1. Strikes, Lockouts and Slowdowns;
2. Discharge cases;
3. Arbitration;
4. Check-off;
5. Maintenance of Membership.

Unanimous Findings

ARTICLE 10

STRIKES, LOCKOUTS AND SLOWDOWNS

The Board unanimously recommends that the following article concerning Strikes, Lockouts and Slowdowns be embodied in the agreement:—

Article 10

Strikes, Lockouts and Slowdowns

In view of the orderly procedure for settling grievances, it is agreed that there will be no lockout, strike, slowdown or restriction of output during the life of this agreement.

In case a strike, slowdown, work restriction or lockout should occur in violation of this agreement any or all people taking part in it or instigating it shall be subject to discipline as may be adjudicated by governmental action.

ARTICLE 9

DISCHARGE CASES

The Board unanimously recommends that Article 9—Discharge Cases—as proposed by the Union, be accepted, subject, however, to the replacement of the word "arbitrator" at the end of paragraph 2 by the word "arbitrators", and also to the replacement of the word "he" of subparagraph 3 of paragraph 2 by the word "they":

In the event that an hourly paid employee be discharged from his employment after the date hereof, and believes that his discharge is in violation of any of the provisions of this Agreement, such discharge shall constitute a matter to be dealt with under the provisions of this Agreement respecting adjustment of grievances. Any such matter may be presented at the second stage of the Grievance Procedure within seven (7) days after the date of notice of such discharge had been given.

In the event that it should be decided that the discharge of any such hourly paid employee is a violation by the company of any of the provisions of this Agreement, the company shall reinstate such hourly rated employees and pay full compensation at the hourly rated employee's regular basic rate for the time lost, after written complaint against such discharge has been received by the company, limited to his regular hourly week. Upon such reinstatement, it shall be deemed to have been no break in such hourly rated employee's continuous service. If said discharge case is taken to arbitration, the arbitrators may:

1. Sustain the discharge.
2. Reinstatement the employee with full pay for time lost with no loss of seniority.
3. Take any other action they deem just.

ARTICLE 8

ARBITRATION

Minority Report

The Board unanimously recommends that the following article concerning Arbitration be embodied in the agreement:—

*Article 8**Arbitration*

If the decision of the Mine Manager required under Article (7) does not satisfactorily dispose of the grievance the matter may, on written notice by either party concerned, be referred to Arbitration in the manner and in accordance with governmental regulations in regard to the formation of the Board of Arbitration or Board of Conciliation.

The decision of the Arbitrators, or of a majority of the three Arbitrators, shall be conclusive and binding on all parties and shall not be subject to appeal, but in no event shall the Arbitrators be authorized to alter, add to, modify or amend any part of this Agreement.

February 12, 1945.

(Sgd.) HONORE ACHIM,
Chairman;
(Sgd.) J. M. EAKINS,
Member of Board;
(Sgd.) GUY M. DESAULNIERS,
Member of Board.

Majority Report

MAINTENANCE OF MEMBERSHIP AND CHECK-OFF

The Majority of the Board, consisting of His Honour Honore Achim and Guy M. Desaulniers, are of the opinion that there should not be a Maintenance of Membership clause in the agreement, but recommends that the following check-off clause be embodied in the agreement:—

The company agrees to deduct from each employee's pay, upon proper authorization, Union dues in the amount of one (\$1.00) dollar each month and remit all such monies so deducted to the secretary of the Union, not later than the tenth day of each month following such deductions. Such deductions shall only be made when voluntarily authorized by such employee and may be revoked by employee on fifteen (15) days' written notice to the Company and the Union.

The Union agrees to pay all the cost of such a check-off system to the Company

February 12, 1945.

(Sgd.) HONORE ACHIM,
Chairman
(Sgd.) GUY M. DESAULNIERS,
Member of the Board.

Re: Wartime Labour Relations Regulations P.C. 1003 and Senator-Rouyn Ltd., Noranda, P.Q. and Local 688, International Union of Mine, Mill and Smelter Workers.

The Honourable HUMPHREY MITCHELL, M.P.
Minister of Labour,
Ottawa, Ontario.

Sir,

The majority of the Board comprising His Honour Judge Achim and Guy M. Desaulniers, are of the opinion that there should not be a "Maintenance of Membership" clause in the agreement, but that there should be embodied in the agreement a clause permitting of the voluntary check-off, with the Union agreeing to pay all costs to the Company for the collection of dues.

I am in agreement with the two other members of the Board as to refusal to grant the Maintenance of Membership clause and hold the opinion that the reasons or arguments that prompted such refusal apply with equal weight to the voluntary check-off.

The granting of the latter to the Union would constitute the Company as its fiscal agent with the authority or recognition implied therein. The legality of this procedure has been in question in recent negotiations. The necessity for it was not stressed during the hearing of the Board. No sound argument was advanced that the procedure would be of any advantage, whatsoever, to the employees. The sole gainers would be the officials of the Union, who would be relieved each month of the task of collection of dues.

In the years previous to the war, the gold mining industry had enjoyed an era of prosperity and expansion. The employees had shared in this prosperity. Average annual earnings were the highest of any large industry in the Dominion, being \$1676.00 per annum. This has been increased to over \$2000.00 in 1942. The industry is unique in that lay-offs and shut-downs have been unknown. Full time work throughout the years has been available to all employees. Betterment of living and working conditions has been a constant and sustained program with the mine managements, working in conjunction with committees of the employees. It is widely acknowledged that measures for medical supervision and remedial action have been far in advance of other industries. The profit making ratios of a large proportion of the mines have been due solely to skilled technical supervision and to the co-operative efficiency of the underground crews. This is applicable more particularly, to the large number of mines where the grade of

ore has been marginal or sub-marginal in metal content. These latter could not be operated profitably were it not for the efficiency of management and employees. This latter has been achieved and sustained by the practically universal adoption of base rate and bonus or contract policy of reimbursing the employees for their co-operative efficiency.

A mine cannot be operated as can an assembly line in the manufacturing industry. The working faces in stopes or development headings are so widespread and scattered and subject to constant change that direct supervision cannot be given more often than once or twice a shift. This factor is overcome by the bonus or contract policy of remuneration, being based on "tons per shift" or on footage advance. The industrious, experienced miner is reimbursed equitably for his skill and experience.

In reviewing the present and the future of the industry, I consider that the granting of the voluntary check-off would be premature and unjustified. The industry enjoyed amicable, harmonious relations between management and employees until the entry of the Union during the war years. Representatives of the Union have stated unequivocally, that the bonus system should be abolished. My direct knowledge of the mines throughout the North is the basis for the statement that such action would eventuate in the closure of a large number of mines, presently marginal as to profit ratio, but with potentialities in continuance of mine exploration and development.

This is in an unpredictable factor that is applicable to many of the presently profitable mines of the industry.

The operating gold mines of the Dominion had 26,000 employees at the outbreak of the war. This has receded to 15,000 as at the present. There have been in excess of 8,000 enlistments in the Armed Forces. Several thousand have been engaged in work in war industries. It is evident that the present working forces in the mines are far from representative of the employees, under normal operating conditions. The latter will be re-established after the cessation of hostilities, with the return of the men from the Armed Forces and from the war industries.

Most serious consideration should be given to the attitude of these returning thousands as to any radical change in their working conditions and representation. They are of the type who demand recognition for diversified skill and industry—incentive pay.

The officials of the International Union are comparatively new and young to the country and the industry. Until there is assurance of their more thorough cognizance and knowledge of the varied problems of the industry, it is to be questioned whether their position should be strengthened and perpetuated under the fluid and changing economic conditions now prevailing.

The above is respectfully submitted.

(Sgd.) J. M. EAKINS,
Member of the Board of Conciliation.

Report of Board in Dispute between Ontario Steel Products Company, Limited, Oshawa, Ont., and Local 222, International Union, United Automobile, Aircraft & Agricultural Implement Workers of America

On February 13 the Minister of Labour received the report of the Board of Conciliation which dealt with the dispute between the Ontario Steel Products Company, Limited, Oshawa, Ont., and Local 222, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

The Board was under the chairmanship of His Honour Judge Ian M. Macdonell of Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. John J. Robinette and Bora Laskin, both of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations, P.C. 1003, and Ontario Steel Products Limited, Oshawa, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, U.A.W.—C.I.O.*

To:

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

Sir:

The Board of Conciliation appointed by you to deal with the above dispute has completed its sittings, and now submits its report.

At all sittings the Union was represented by Mr. Drummond Wren, accompanied by Mr. James Smith, International Representative, Mr. Robert Townsley, Chairman of the Bargaining Committee, and Mr. Ernie Allen, member of the Bargaining Committee. Mr. Roy Brown also attended the sittings in view of the fact that the same Board was also dealing with a dispute in the Chatham plant of the same company concerning relations with a different local of the Union. Mr. J. R. Cartwright, K.C., acted as Counsel for the Company, which was represented by Mr. E. S. Byers, General Manager, and Mr. H. A. Washington, Manager of the Oshawa plant.

The Board is grateful to those representatives of the parties who came from out of town so that it was possible to hold all sittings in Toronto.

In addition to the main dispute concerning union security, the Board was advised that there was one other matter unsettled. After consultation with the parties, however, an agreement was reached, and both parties concurred that the following clause respecting arbitration should be inserted in the agreement:

In the event that the person chosen by the Union and the person chosen by the Company fail to choose a third person to act as Chairman of the Arbitration Board after five working days, the Minister of Labour shall be asked to nominate a third party who shall be a member of the Supreme Court of Ontario, or a Judge of a County or District Court of the Province, if available.

The Board then proceeded to deal with the principal matters in dispute, which consisted of the request of the union for union shop and check-off.

At the outset Counsel for the Company took the ground which has been taken before a number of other Boards, and contended that any form of union security involved coercion of employees and was contrary to the effect of Section 19 (2) and Section 20 (1) of P.C. 1003.

The Board points out that there are many precedents for the various forms of union security; closed and union shops are common throughout the continent. Many Boards have given recommendations involving various forms of union security. We feel that a Board of Conciliation is not a judicial body in the ordinary sense, as such Boards are often composed of laymen. We consider therefore that the precedents referred to should be followed until the question, which involves

technical legal principles concerning the construction of Statutes, has been dealt with by a constituted legal authority, and that we should proceed to deal with the dispute on its merits.

There is a long history of harmonious labor relations in this plant between the Union and the Company. The Union has been the bargaining agency for eight years, during most of which time an agreement has been in force between the Union and the Company. The current contract terminated in June 1944, but the parties continued to work under an informal arrangement until the dispute concerning the terms of union security should be settled.

It is obvious that conditions at this plant are unusual. There are 175 employees, all of whom belong to the Union. During the eight years referred to there has never been, so far as the Board has learned, one employee at the plant who was not a member of the Union. There are a number of employees Overseas, but these also belonged to the Union and are being maintained in their membership during their absence. There have been one or two minor stoppages of work for an hour or two, but these are not in the opinion of the Board of any importance.

It is unnecessary to remark that there is a contrast between conditions in this case and those in the Chatham plant of the same company, upon which a Board similarly constituted is reporting concurrently with this report.

Here again the Board does not think it necessary for it to outline the recognized arguments for and against union security, which are by now familiar to those concerned with labour relations.

Having considered the foregoing and other facts, the Board unanimously feels that this is a case in which a form of union security should be granted and recommends that the following clauses be inserted in the agreement:

It is agreed that all employees now members of Local 222, U.A.W.-C.I.O., or who during the currency of this agreement shall become members of the said Local, shall as a condition of employment remain members in good standing for the duration of this agreement, and that all employees hired during the life of this agreement shall become members of the Union within thirty days from the date on which they are hired.

Upon presentation of proper authorization from an employee, revocable during the currency of this agreement, the Company agrees

to deduct one dollar (\$1.00) each month from his earnings as Union dues, such moneys to be remitted monthly to Local 222, U.A.W.-C.I.O.

The Board is grateful for the balanced presentation of the case and the excellent assistance given by both parties, enabling it to arrive at the above decision.

All of which is respectfully submitted.

Dated this 7th day of February, 1945.

(Sgd.) IAN M. MACDONELL,
Chairman.

(Sgd.) BORA LASKIN,
Employees' Nominee.

(Sgd.) JOHN J. ROBINETTE,
Company's Nominee.

Report of Board in Dispute between the Ontario Steel Products Co., Limited, Chatham, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO)

On February 13 the Minister of Labour received the report of the Board of Conciliation which dealt with the dispute between the Ontario Steel Products Co., Limited, Chatham, Ont., and the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).

The Board was under the chairmanship of His Honour Judge Ian M. Macdonell, of Toronto, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. John J. Robinette and Bora Laskin, both of Toronto, appointed on the nomination of the employer and employees respectively.

The text of the Board's report follows:—

Report of Board

Re: *Wartime Labour Relations Regulations P.C. 1003, and Ontario Steel Products Limited, Chatham, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, U.A.W.-C.I.O.*

To:

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ontario.

Sir:

The Board of Conciliation appointed by you to deal with the above dispute has completed its sittings, and now submits its report.

At all sittings the Union was represented by Mr. Drummond Wren, accompanied by Mr. Roy Brown, International Representative, and Mr. Ross Perry, President of Local 127, and Chairman of the Plant Committee. Mr. J. A. McNiven, K.C., of Chatham, acted as Counsel for the Company, which was represented by Messrs. G. S. Byers, General Manager, O. D. Cowan, Manager of the Chatham plant, and Douglas Wilson, Plant Superintendent.

The Board is grateful to those representatives of the parties who came from out of town so that it was possible to hold all sittings in Toronto.

At the opening of sittings the Board was informed that all matters in dispute had been

settled with the exception of the request of the Union for union shop and check-off. Submissions and argument before the Board were confined to these subjects.

At the outset Counsel for the Company took the ground which has been taken before a number of other Boards, and contended that any form of union security involved coercion of employees and was contrary to the effect of Section 19 (2) and Section 20 (1) of P.C. 1003.

The Board points out that there are many precedents for the various forms of union security; closed and union shops are common throughout the continent. Many Boards have given recommendations involving various forms of union security. We feel that a Board of Conciliation is not a judicial body in the ordinary sense, as such Boards are often composed of laymen. We consider therefore that the precedents referred to should be followed until the question, which involves technical legal principles concerning the construction of Statutes, has been dealt with by a constituted legal authority, and that we should proceed to deal with the dispute on its merits.

Organization of the plant by the Union commenced in 1942. In that year there was a strike of three days' duration, which was caused by the failure of the Company to deal with the Union. Subsequently a Conciliation Board was appointed, and pursuant to its recommendations a collective agreement was settled, which granted to the Union sole bargaining rights for the plant. This agreement was terminated by notice from the Union on September 27, 1944. A new agreement was settled a few days later, with the exception of a change proposed by the Union in the grievance procedure. Unfortunately, as a result of disagreement on this point a stoppage of work, lasting about one and a half days, occurred on October 16. Subsequently the Company and the employees agreed upon the grievance procedure and consented to continue under the old agreement until such time as the dispute concerning the security provisions could be dealt with by a Conciliation Board.

It is not considered necessary to deal here with all the general arguments for and against union shop and check-off; they have often been fully set out in reports of Conciliation Boards and were thoroughly presented to this Board. The feeling of the Board is that in disputes of this nature all the surrounding circumstances must be taken into consideration. In particular it is felt that the length of time that the Union can demonstrate satisfactory conditions at the plant is of paramount importance. The Chairman and Mr. Robinette feel very strongly that the strike which occurred in October arose over what could not be considered a vital point and after many concessions by the management in collective bargaining. It is considered that matters may well develop satisfactorily in the future, but that much more is necessary than has been shown by the Union up to the present before a union shop should be forced upon the Company. It should also be pointed out that there are some ninety employees in the army who the Company desires to reinstate on their return, and it is feared that by reason of change-over to peace-time conditions it will not be possible to retain a large number of those presently employed. There is also a small percentage of the workers who appear to be unalterably opposed to joining the Union, some of these having been in the employ of the Company ten or twelve years.

Under the circumstances, the Board does not feel that this is a case in which they should recommend a union shop or maintenance of membership clause. In view of the fact, however, that over 80 per cent of the employees have signed cards in which they state they desire some form of union security, the Board recommends that the following clause be inserted in the agreement:

Report of Board in Dispute between Golden Manitou Mines, Limited, Val d'Or, P.Q., and the Val d'Or Mine and Mill Workers Union

On February 12 the Minister of Labour received the report of the Board of Conciliation which dealt with a dispute between the Golden Manitou Mines, Limited, Val d'Or, P.Q., and the Val d'Or Mine and Mill Workers Union. A minority report was submitted by Mr. John J. Robinette.

The Board was under the Chairmanship of Professor B. S. Keirstead, Montreal, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. John J. Robinette, Toronto, and Guy M. Desaulniers, Montreal, appointed on the nomination of the employer and employees concerned.

Upon presentation of proper authorization from the employee, revocable during the currency of the agreement, the Company agrees to deduct one dollar (\$1.00) each month from his earnings as union dues, such moneys to be remitted monthly to Local 127, U.A.W.-C.I.O.

Mr. Laskin, a member of the Board, was of the opinion that the Union was entitled, on the basis of its membership position and bargaining activities, to a greater measure of security, not being inclined to take so serious a view as his colleagues of the stoppage of October, 1944. However, having regard to the fact that the three members of this Board were also appointed to deal with a dispute as to union security in the Oshawa plant of the Company, and that an unanimous report is being submitted in that case concurrently herewith, Mr. Laskin, in the interest of unanimity in this case, joins in the recommendation favoured by the majority.

One of the arguments against some form of security advanced by the Company was that the same local union is the bargaining agent in nearly all the plants in Chatham. This argument does not commend itself to the Board, which feels that with improvement of relations in the plant between the Union and the management that some form of union security may well be possible in the future.

In conclusion, the Board wishes to express its appreciation of the assistance obtained from all parties and the able and interesting arguments presented.

All of which is respectfully submitted.

Dated this 7th day of February, 1945.
