

### Collection of Letters,

#### IN WHICH

The Imperfection of Learning, even among Christians, and a Remedy for it, are hinted.

The Usefulness of the Celtick is instanced, in illustrating the Antiquities of the British Isles, in pointing out the Errors of Mr. Innes, and the most ancient People and Language; some

Elements of which are fet down.

The Affinity betwixt the Language of the Americans of the Terra Firma, and these of the ancient Britains, is proved. The Scripture-Account of Things is confirm'd. An Objection against Revealed Religion, heretofore not fully answered, is removed. A Specimen of a Dictionary, English-Celtick, and Celtick-English, is given.

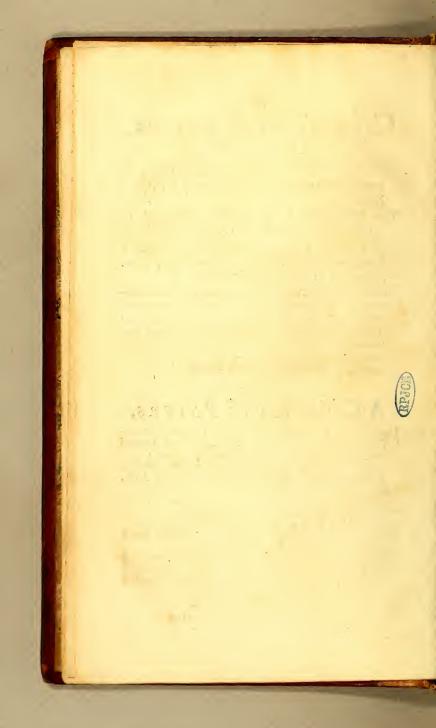

#### AS ALSO,

### A Collection of PAPERS,

In which the Proceedings of the Honourable Society of IMPROVERS, the Honourable and Learned Faculty of ADVOCATES, fome GENERAL ASSEMBLIES, their Commissions and Committees, and the Testimonies of some learned Men about this AFFAIR, are represented.

With boldest Sail I dare, thro' Seas of Night,
A North-West Passage try, to raise to Light
Things deeply hid. Of Lights Great Father hear;
My small, but enterprising, Vessel steer,
'Mong Gulfs and Shelves, 'gainst Storms and Currents, so,
That I may to my wish'd for Haven go,
And ay on thee, my gracious Guide, the highest Praise

## ENGLISH-IRISH DICTIONARY.

VE tia

VERY Man is naturally inclin'd to Partiality in Favour of his Country, and this Partiality is not only blameless, but even commendable, when it does not run into Excess, and make him unjust

to others. If some Nations have complained of their Neighbours in this Article, none have had more Reason than the Irish to do so, in regard of Injury done to their Language, which, without being understood, has been hitherto cry'd down, and ridiculed by the English in general, and even by some Gentlemen in particular, whose sine Sense and

good Manners, in other Respects, have deserved

Praise and Imitation.

OF all the dead or living Languages, none is more copious or elegant in the Expression, nor is any more harmonious in the Pronunciation, than the Irish, tho' it has been declining these five hundred years past, along with the declining Condition of our Country; whereas most of the modern Tongues of Europe, have been polishing and resining all that long Series of Time. This is a Circumstance in Favour of the Irish, which no other national Tongue can pretend to; and shews, that a Language which was so polite, when the English Arms first put a Stop to the Progress of it, would have been much more fo at present, had it had the like Opportunities of Improvement, that the others have met with: Nevertheless as it is, it will be found inferior to none. Our Authors affirm it to be the old Scythian Language, and upon that Account very well deserves to be rescued from Oblivion.

THAT a People fo naturally ambitious of Honour, and so universally covetous of Glory, as several generous British Historians have described the Irish to be, can so strangely neglect cultivating and improving a Language of Some thousand Years standing, may seem very surprising to all learned Foreigners, and I believe will do so to the Irish themselves, when they recover out of their Error, and take a little Time to Consider how much they deviate, in this Particular, from the Practice and Policy of their Ancestors, and how inexcuseable they are for neglecting so facred a Depositary of the Heroick Atchieve-

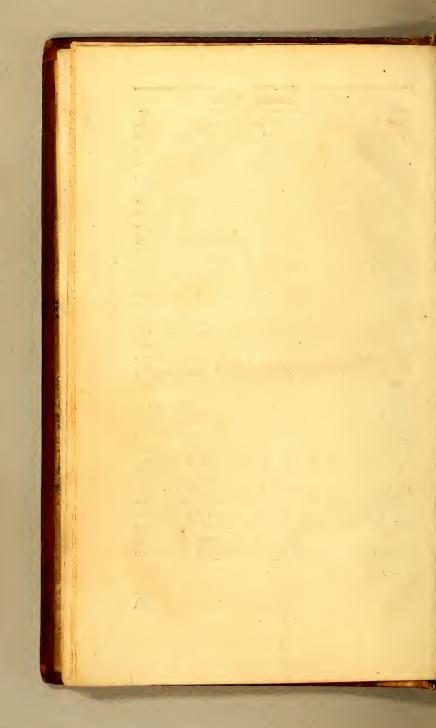

ments of their Country.

WHILE we were governed by our Monarchs of the Milesian Race, and particularly, in the Times of Paganism, there was not a Kingdom in Europe, where Learning was more honourable, or where Princes heaped greater Favours upon learned Men, than in

Ireland: Vast Estates and Revenues were settled upon publick Historians, Antiquaries and Poets; their Habitations were Sanctuaries, and their Persons were facred. Such distinguishing Marks of Royal Favour, continued through so long a Series of Ages, to the Professors of Learning, filled Ireland with an incredible Number of excellent Manuscripts, upon all Subjects; but the greatest Part of them have been fince destroyed by our Wars with the Danes and the English, as well as our own intestine Quarrels and fatal Diffensions: However there are still several valuable Pieces to be met with, not only in Dublin, but even in Oxford and other Places, some of which are mentiond by those truly generous and learned Authors, Sir James Ware, in his Account of the Writers in Ireland, and Doctor Nicolfon, Lord Bishop of Londonderry, in his excellent historical Library. The Irish Gentry have therefore Opportunities enough still left for recovering and preferving their Mother-Language; and confequently, are without the least Excuse, if they shamefully continue to neglect it.

A DICTIONARY in the English and Irish, I believe, is the first Undertaking of this Nature, that has e're been attempted; and in the Conduct of it, I have taken those laborious and accurate Authors, Boyer and Bailey for my Guides; I have followed them as close as my Design would permit; and have omitted nothing in the English Part which I thought material. In short, it is as compleat as I could possibly make it, without swelling it with supersuous Phrases and antiquated Words, which would have been but of very little Use, and only served to discourage the Sale of it, by making the Price too

high.

A

## SPECIMEN

OF AN

### English-Irish Dictionary.

BEI.

Being, S. Bith.

N God we live, move, and have our Being, An Dia ata ar mbeatha, ar luadhail, agas ar mbit; thus Begly.

O Domhnill thus, An Dia mhairmid, chorruighemid, agus atamoid, Acts xxvii.

Your being bound for him will be your Ruin, is e do beith anurrudhas air do fgriosfus tu.

Being that I promifed it, I will be as good as my Word, dobriogh gur gheallus e, biadhme comaith ram fhocal.

Arcluacra,

A Translation of the IRISH Preface, to Mr. Lhuyd's IRISH Dictionary.

To the GENTLEMEN and other Learned Persons of the Irish Nation, whether Irish, Scots, or other Foreigners, Long Health and Happiness.

T is but reasonable (Generous Gentlemen) that I here make an Apology for undertaking to write and publish a Dictionary in a different Language from my Native Tongue; and which I did not learn by Ear from any Person whose

Native Language it was.

FOR though, 'tis true, I travelled through Ireland, and the North-West of the Highlands of SCOT-LAND, partly to make Remarks on the Natural Curiosities, and partly to view the Old Monuments of those Nations; yet frequently meeting and conversing with those who spoke English, I learned but very little Irish in that Progress: And therefore it is from Books, for the most Part, that I have acquired the little Knowledge I have in that Language. Now the Motive that first engaged me in the Study of Irish was this.

Some Welsh and English Gentlemen laid their Commands on me to write something, beyond what has hitherto been published, concerning the Original Antiquity of the British Nation; and in A regard

regard the Old and Antient Languages are the Keys that open the Way to the Knowledge of Antiquity; I found it the more necessary to make myself as much Master as was possible of all the old obsolete Words of my own Native Language. For it was generally own'd and taken for granted, (whether true or false) that the British was the first and most antient Language in Great Britain.

As foon as I had made, by the Help of a certain Parchment-Manuscript, a tolerable Progress in the old British Language, I found my Knowledge therein not only imperfect and defective, as to the Meaning and Signification of the old Names of Persons and Places, but also that there were many more Words in the old Statutes, Histories and Poems, whose Significations still remained to me very dubious and obscure: Notwithstanding the great Benefit and Advantage we have from the Welsh and Latin Dictionary, compiled by the very learned and ingenious Dr. J. Davies, and printed at London in the Year 1632.

THIS Difficulty naturally led me to conjecture, that a little Skill in the old Irish Words would be very useful to me in explaining those antient British Words; and therefore I applied myself to read the Irish Bible, and the Chronological History of Ireland, written by the learned Antiquary, Dr. J. Keating, with a few other modern Books that occasionally fell into my Hands; and being perswaded, that making a Collection of the Words would very much affish my Memory, I therefore at first made a Dictionary for my own particular Use, which afterwards swell'd to the Bulk you now see it in the

following Impression.

I am very sensible, that this is a Work not only impersect and desective, but also in some Places erroneous; and that a Native of Ireland or Scotland might person it with less Labour, and more Accuracy and Judgment; However, thus much I venture

ture to affirm, in Behalf of this first Eslay, that it is more copious than the first Impression (usually) of a Dictionary of any Language now generally spoken throughout Europe. Rome, as they say, was not built in a Day; it is not the Work of any one Man, nor indeed the Product of an Age, to write a complete Dictionary of any Language whatever: And as for what is amiss here, I can fay no more of it, but humbly fubmit it to the Judgment and Correction of the gentle and ju-Had there been before this an dicious Reader. Irish Dictionary published by any Native of Ireland or Scotland, it would have been now very useful to me, and also to others before my Time; but as it has always been usual upon the like Occafions, I have Hopes that even this incomplete Performance will be kindly received, and taken in good Part: Because an half-formed impersect Dictionary is preferable to no Dictionary, and that, according to the common Proverb, It is better Late than Never. I made diligent Enquiry ( as many Irish and Scottish Gentlemen, who are now living in this Kingdom of England, do well know) for a Person well versed and learned in Irish Manuscripts, to correct and amend this Dictionary, before it went to the Press; but as it was very difficult to find fuch a Person (which I have not hitherto met with ) by whom these Sheets might be corrected, I could do no better than to fend three printed Copies of this Dictionary to Ireland, and three more to Scotland, with Letters to fome of my Acquaintance in each Kingdom, to correct and enlarge this Work: Two only of my Friends returned Answers, one from Ireland, and the other from Scotland; whose Corrections and Amendments are printed by way of Supplement or Appendix at the End of this Work, and distinguish'd sometimes with the Letters Ir. and Sc. for Ireland and Scotland, by reason I was not A 2

Mr. Ed. Lhuyd's Letter to

at Liberty to mention the Gentlemens Names without their own Approbation. The Words, which they found erroneously or imperfectly interpreted, are marked thus:; And if you please to fix the like Mark to the same Words in the Dictionary, it will not be amiss; but a Direction to you, which ought not to be forgotten, that such a Word was not justly interpreted. It is yet necessary to enlarge farther concerning this Dictionary in the following manner.

I know very well I have often inferted unneceffary Examples and Quotations; but I first collected them, when I was a young Beginner, to affist my Memory, and to acquire thereby more Knowledge and Satisfaction in many Words that were dubious, and whose Signification I could not well remember: And afterwards I printed them for the Benefit of the English Reader and other Foreigners; because I was conscious my single Authority was of no great Weight, being I was but a Foreigner myself. Another Motive I had for Printing, was to abridge sometimes Names and Words; which, though perhaps unnecessary to you, might nevertheless be convenient for Foreigners, who have a Desire to learn the Language.

II. EVERY Word, that is mark'd with the Letter K. (besides many other Words that are not mark'd

mark'd at all) is taken out of Dr. 7. Keating's Hiflory of Ireland. I omitted translating into English the historical Examples of this Author, by Reason the Knowledge of them was no Way useful, or of any Advantage to Strangers; and therefore it was an unnecessary Charge to print them. As for the Years in the Chronological Part, wherein he, and the learned and ingenious Gentleman, Mr. Rager O Flaherty, disagree, every judicious Reader must know, that this Dictionary is neither a Judge of, nor a Searcher into, the Chronicles of Ireland: However, I thought it more expedient to refer the Reader to the Year mention'd in Keating's Chronology, believing that to be a better Method, than to depend on directing him to the Page; because the Book was never printed; and therefore, 'tis almost impossible, that a Manuscript should be transcribed so exactly, and with so just an Agreement in the Pages, as would be necessary in referring the Reader to them. The few historical Remembrances you have here and there intermixed, are mentioned by Way of Amusement to those who are curious in the Irish and Scottish Antiquities. But, as touching what relates to the Stories of \* Tuathaibh Fiodhgha, and fuch like of the same Nature, they are published for the Sake of those that study Antiquity, to give them to understand, that every traditional Story, that is handed down from Age to Age to this Time, is not to be look'd upon as true and authentick; however ingenious, and perhaps learned, the Author, in his own Time, or those that transcribed after him, might justly be esteem'd. There are some Fables indeed, and romantick

<sup>\*</sup> Tuathaibh Fiodhgha, according to Dr. Keating, were fome British Gentlemen, so called, that used positioned Arms in Ireland in the Time of Herimon, whose Wounds were reckoned incurable. K. A. M. 2737.

romantick Stories, in the first Histories of all Nations; but, notwithstanding that, we may give Credit to Relations that are probably true, however old they be, and of long Standing; but we are not under any Necessity to take for granted that which is, in its own Nature, very improbable and unlikely: And therefore, in these two last Centuries, all learned Nations have expunged out of their true and genuine Histories, all those fabulous Relations that were apt to bring the Truth of the whole in Question: But I must not digress too far from the Work in Hand.

III. As for those Words that are marked thus t, they are more obsolete and unintelligible, beinglipartly borrowed in antient Times from the Latin or Greek, or some other Languages; and partly original Irish Words now grown obsolete, or preserved only in some particular Places, and disused and unintelligible in most others. At first I began to transcribe them out of an old Manufcript; but afterwards meeting with a larger Book, printed at Lovain by Michael O Clery, a Friar, under the Title of Seanasan Nuadh, (or a Glossary of old difficult Words) wherein was a Collection of all fuch obsolete Words: I inserted that Book entirely into mine, diftinguishing those Words with the Mark I have already mentioned, which the Printers commonly call a Dagger. My Design at first was, as may appear in the three first Leaves, to give, for the most part, the English Interpretation only of those Words, in order thereby to save the Expence of printing the Irish Explanation; but afterwards, when I found I was not able to carry my Defign through the whole Work, in the Manner I proposed, and that the whole Impression of Clery's Glossary was almost out, and also that the very Examples, which ought to be preserved, were grown obsolete; I was of Opinion, that to print

print both the Irish and English Interpretation of many words would be useful and acceptable to the Learners of the old Irish: I endeavoured likewise, with my utmost care, to print the Words correctly and alphabetically; whereas Michael O Clery did but transcribe as he found them immethodically collected in old Manuscripts; wherein the Interpretations and Examples are so obsolete, that a Man would require to be very well acquainted with the old Irish, to understand them perfectly; and there are likewise some entirely lost, and others so old as to be forgotten, and grown quite out of Use.

IV. THE Words that are distinguish'd with the Letters Pl. and sometimes with P. only, are taken out of the Latin-Irish Dictionary, compiled by the ingenious and Industrious Frier, Mr. Richard Plunket, and by him finished at Trim in Ireland, in the The Reader may fee a farther Ac-Year 1662. count of him in the English Preface. Now in regard I employed a Friend to affift me fometimes in transcribing out of his Book, that has Occasioned in a few particular Places fome Mistakes, being led into them by Homonymous Latin words: an instance of this, I tound the word Fobbthonnan, in the Transcript of the Latin Word Glis, and because I knew that Patheu, Fatheu, and Fatheuin, in the Wellh, fignified a Dormoufe, and confidering likewise that there is a considerable Number of obsolete words in the Irish, I concluded that Fobbt honnan and Feascarluch signified the same Thing, to wit, a Dormouse; whereas, the Author, by the word Fobbthonnan intended a Thiftle only, the Word Glis (Gen. Glissis) being used in that sense by the Roman Natural Historian (if we rightly understand him ) C. Plinius. I have hopes however that the Mistakes of this kind are not many, and they stand corrected amongst other Errors in the Supplement at the end of this Work: But,

But, if any Doubts of the like Nature arise to the Reader, he may probably fatisfy himself with looking over the Latin-Celtick Vocabulary in the second Title of this First Volume; wherein the Irish (befides the Words diftinguish'd with the Letter N.) is entirely copied with mine own Hand, out of the Hand-writing (as I take it) of the faid Mr. Richard Plunket. I hope my Reader will excuse me for using in that Vocabulary, and in the comparative Etymology in the first Title, the Orthography of the general Alphabet in Irish Words; when he considers the Characters I make Use of there, are more intelligible to Strangers, and no Way injurious, or disagreeable to the Natives of the Kingdom. There are a great many in the Queen's Dominions, and likewise amongst learned Foreigners throughout Europe, who have had a great Defire to compare the Irish and other Languages together; and, in order to promote that, the Reader may observe the general Alphabet in the second Page of the first Leaf, which is much easier and sooner learned than a strange Alphabet. What I first proposed to do was, (as may be seen in the Title of the comparative Vocabulary) to fet down fuch Irish Words, as best agreed with fome Dialect of the Welsh: But after I sent this Work to the Press, I considered (upon second Thoughts) that the more copious it was, the more infeful and acceptable; and therefore I improved it, as you fee, to a little Vocabulary.

As for the Abreviations in this following Dictionary, I need not Treat of them here; because they are set apart by themselves, together with the other Abbreviations at the end of this Work. My reason for putting the Verbs in the sirst Person of the Singular Number, and in the Present Tense of the Indicative Mood, is not only for its being the most regular Method that can be

constantly observ'd; but because it was the Method I saw used in an old Manuscript Vocabulary, and what was formerly practifed in our own Language, as may be feen in the Manuscript of Eutex; which I made Mention of in the Cornish Grammar \*. I usually, however, put the English in the infinitive Mode, to agree with the Method of explaining the Latin in an English, French, or Spanish Dictionary; and therefore, if this be an Error, I don't take it to be a material one: But as touching the other Mistakes in this Dictionary, of which I partly had some Doubts myself, and therein agreed with my Friends, to whom I shew d the printed Copies, I will make particular Mention of them here, because such a Memento may be useful to the curious Reader. 1. And first, the Letter b, (especially in the Words distinguish'd thus + ) is often omitted: As for Example, Sgioptaidh, Active, for Sgiopthaidh; Coblach (at the Word † Tascor) for Cophlach, a Navy, &c. But if such Mistakes in the Orthography don't happen here and there in some particular Words, I never of mit the b. Neither did O Clery omit it in the Book which he wrote. He transcrib'd them all entirely out of old Parchment Manuscripts: And, in antient Times, b was not used as an Auxiliary to any of the Letters which are varied, but only c and t: It is true, there are Points over very old Characters, but they were not all marked or pointed so, particularly b and m; these were left to the Judgment of the Reader when to pronounce them without that auxiliary Point, and when to read them as bh and mh. 2. The same Letter is sometimes unnecessarily inserted, as in the Word Do shluigh for Do shluig, he swallowed, from the Verb

<sup>\*</sup> P. 226. Coll. 1. This Book is about a thousand Years standing.

B Sluiging

Sluigim, to swallow; Fuighim for Fuigim I leave. 2. A double Consonant is put for a single one; and a fingle Confonant for a double one; as in the Word Treann for Trean, powerful; and Bin for Binn, sweet or musical. 4. The Words that ought to begin with a Vowel, are sometimes placed wrong after the Letters d or t, as in the Word Toireadh for Oireadh. a Ploughman, &c. 5. I find there are fome Words in the Irish Copies transcrib'd by O Clery out of an old Parchment Vocabulary, and some Words I transcrib d myself out of O Clery's Book, which are misplaced, and put out of their due Order, some of them by O Clery's Printer, (for I mark'd and corrected some of them myfelf, though others escaped my Notice) and some by my own Printer, infomuch that they fometimes make (as it often happens in a Language they don't understand) two Words of one, and again one Word of two. 6. As for the Words that are mark'd with a Dagger +, and explained by Irish Words, it is more expedient to rely on the Interpretation the learned Natives of the Kingdom have always, Time out of Mind, put upon fuch Words, than on the English Translation; wherein I might sometimes be liable to Mistakes. 7. In some Places the fame Thing is understood by a Word with diverse Variations, as the Word Ball, Ballach, and Bealach, the Way. 8. Sometimes you will find the fame Word inferted twice, as the Word Bann, explain'd by liathroid, (viz.) a Knob, and Bann Lat. Pila; the Reason of which Mistake is this, because the Latin Word Pila is taken in both Senses; to wit, for a Ball, or for any round Thing, as a Knob; and its being transcrib'd out of Plunket's Latin Dictionary, and no other Word join'd with it, to direct me to the true Sense, I was at a Loss to know whether I was right or wrong, in terming Bann Liathroid: But this will occasion no great Miltake in the Reader; and I have Hopes, that

that the other Errata, after these few Hints, will

not be very material.

As for the Obscurity of some Words left at my Door, or at O Clery's, it is rather to be imputed (as I have already shewn) to those antient Authors that first collected the words; and no doubt but future Ages, by rendring old Manuscripts more familiar to them, will understand them better than the present. As for passing any Cenfure on the Rule concerning broad and small Vowels, I chose rather to forbear making any Remark at all upon them, by Reason that old Men who formerly wrote Arget, (i. e.) Silver, instead of Airgiod, as we now write it, never used to change a Vowel but in declining of Words, &c. And I don't know that it was ever done in any other Language, unless by some particular Persons, who, through Mistake or Ignorance, were guilty of it.

And, having given the best Account I could of my own Inability and Desects, give me leave humbly to offer a sew Remarks to the Consideration of your Grammarians, concerning speaking and correctly writing the Irish, especially in such Books as are designed for the Press, where perhaps there are no Irish Characters; as particularly the Bible, and singing Psalms now used in Scotland, the Christian Doctrine written by Tobias Stapleton, and other Books. Here then to follow these Points, which occasioned some Doubts to arise in me, and which I desire to leave to your Consideration.

I. THAT you have lost the antient and true Pronunciation of the Letters dh, gh, and th; and that in former Times dh was pronounced as th in English, in these Words, thither, therefore, &c. and gh as ch, only so much softer (or weaker) as g is softer than c, and that th was usually pronounced as it is in English, in the Word Thing: And my Reason for

B 2

it is this, because we and the Armorick Britons do retain still some of the same Words in Use with you, (as appears in the comparative Vocabulary) and we pronounce them in that Manner; as for Example, Bodhar, deaf, and Bliadhuin, a Year, are pronounced by us in the same Manner, that Bothar and Blooithin (if there were any such Words) would be according to the English Pronunciation.

II. THIS Defect, or Suppression of the old Pronunciation, occasion'd Authors to be doubtful when to write db, and when gb, which put them under a Necessity of putting one Letter for another; by which Means both these Letters happened sometimes to be placed wrong, as was likewise tb; as in the Word Math for Magh, a Field, Gen. xxxiv. 7. And I venture to add this likewise, that, in my Opinion, it is unnecessary to write gb, in the middle of a Word, as it is ex. gr. in the Word Tighearna, Lord, which, without Doubt, is the same with the Greek and Latin Tyrannus; and therefore ought to be written Tiarna.

III. As concerning the mute Letters in the Beginning of Words, as ar mbeul our Mouths; ar gcoir, our Right; ar bbfearann, our Land; ar dtir, our Country: In Regard they are not used in any other Language, they must therefore be disagreeable to Strangers, who are, upon that Account, disposed to entertain a mean Opinion of the Irish, even at the Sight of an Irish Book; insomuch, that the Language (however full and copious in itself) is looked upon to be but wild and barbarous. I am not ignorant of the Reafon you give for this, to wit, to preserve the initial, or possessive Letter in writing, (in order to shew the Primitive, or Radix, of the Word) though its Sound be loft in the Pronunciation, To which I answer, That there is no Necessity for continuing the initial Letter in the Irifh, more

more than in the Welfh, Cornish, or Armorick, all which do vary their initial Pronunciation as you do; but, at the same Time, they change their initial Letter too, both in writing and in printing; neither do they preserve the possessive Letter, nor from thence apprehend any Inconvenience: And moreover it was not formerly practifed among the Irifh. as any one may fee that confults the old Parchment Manuscripts. Now, however justifiable it may be to introduce and preserve a Novelty that is useful and convenient, yet it is not allowed to introduce one that is unnecessary, superfluous and disagreeable. The old Manner of Orthography, which you formerly used in your Language, and we in ours, was, instead of changing or transposing Letters, to make one Letter, without any Variation, capable of different Sounds, as the English and French do now in many Letters: I confess indeed that it was not a good Method, because it rendred the Difficulty in reading greater; but it is more than probable, that the Method, now used in the modern Irish, will be found inexpedient and liable to the same Objection; but if the Exchange of Letters (as it is now used) be thought of so great Use, we ought rather in their Place to introduce Greek Characters, which may be always found in any confiderable Printing-House; as for Example, ar ueul, ar yoir, ar Bearan, ar Sir, &c. But as a great many will very probably look upon this in their own private Judgments to be superfluous and unnecessary, so I am perswaded still it were better to omit the possessive Letter.

IV. Another Cause of Dislike that Strangers have to the Irish, is to find the Auxiliary b made use of so often, which makes many of them speak of the Language with Contempt before they understand it, and ridicule such Words as these Neimhdblightheach (i. e.) unlawful, Neamhdhurachd, Negligence,

gence, Neimbmbiseach, sober, &c. Now, the Cause from whence this Inconvenience proceeds, is the small Number of Letters the Irish have, and their using many Consonants in compound Words, notwithstanding that Neavuintreavil, for Instance, and Neiviseach are as intelligible as Neimbmbuintreambuil and Neimbmbiseach; now, this Disagreeableness and Inconvenience might, in my Opinion, be remov'd by omitting, after the Example of others, those superfluous Letters, and by printing the Words exactly (as the French begin to do now) after the Manner we speak them, which may easily be done by making Use of an Alphabet, made up

of Latin and Irish Characters.

A, a Angl. e, aw, Angl. β. b; x, ch; d, d; d, db; e, e; f, f; g, g; sh, gb; ng, ng; i, ee, Angl. K, k; 1, l; M, m; N, n; O, o; P, p; r, r; s, or f,(h, Angl. t, t; th, th; u, 0,0; Angl. v, v; Y, i, Angl. in third, bird, &c. or ao in Irish. Moreover, if the Pronunciation be so great as to require distinct Letters, the Greek Letter & may be put in the Place of 11, and p for rr. I do not intend hereby to make any Alteration in the Irish Orthography, because that would render the old Manuscripts more difficult to be understood, and in Time more subject to wear out of Memory; all I defign by it is the Expediency of making Use of fuch an Alphabet in printing the Irish Language in fuch Places, where perhaps there are few or no Irish-Men: And as there are, without doubt, but few Printing-Houses where these Characters ? " and are to be found; it will therefore be convenient to use in their Places the Greek Characters, d, y, and e, and likewise, if there be Occasion for a farther Distinction, the Greek Letters A, for II, B

Note, the Letters mark'd thus \*, should be in Irish Characters, but none such are in the Kingdom.

and  $\mu$  for bh and mh, when b and m require to be changed: As for Instance, bean a Woman, when you change it into bhean, and mor great into mhor, &c. The Letter f may likewise be constantly us'd for ph, after the Manner of the Italians, who write filosofo, and not Philosopho; and the Italian Alphabet is very easy to be written, as all Nations do own: This Method would save some Expence, even in printing one Irish Book, as the Reader may observe in the following Specimen of the Articles of our

## CREED.

Reidim an Ia atair nan uile chuvach Krutaiteoin neive & talvan Agus an Iosa Krist & eunvaksan ar diarnaine, Noch do gavad on Spirad nijv, rugad te Muire Oig, do Utaig, an fais sa Fuigk Filaid do Krochad, do Keutad fuair, bas & do hadlaikead, do chuaid suas ar neav, agus ata anois na huid ar deis De Atair ne nuite chuvachd as sin tiocsas do vreit vreire ar veogaiv & ar varvaiv. Kreidim an sa spirad nijv an Eaglais nijoza chovchodchion kuman na nijv maiteamh na beakzad eiseirge chodlana marv agus an veata vatanach.

As concerning the promiscuous using of the Letters a, o, or u, and e, or i, for one another, (though it be now an approved Rule among Grammarians) yet formerly it was reckoned no correct Way of writing; and therefore, in my Opinion, there is no Necessity for continuing of it; if the different Dialects or Idioms of the Language (which, I own, is beyond my Capacity to judge of) do not require it; and if they should, it were but just to give Presence to some one Dialect as formerly was given among the Grecians to the People of Attica.

16 Mr. Ed. Lhuyd's Letter to

VI. I am perswaded that such an Irish Grammar would be very necessary and useful, that could shew at large every Variation (not only in the modern but old Irish ) of the Verbs and Nouns, and the Rules of Syntax; wherein Molloy's Grammar is defective, together with fuch an Account (till a better was given of the old Orthography) as I have publish'd in this Book concerning the Brit-tish Language, beginning at Page 225. If such a Grammar, with proper Rules and Instructions, was written by some able ingenious Irish or Scottish Gentleman, and farther recommended with a large Table of fuch old Irish Words as are not contain'd in this Dictionary, or erroneously, or at best not fully interpreted; fuch a Book (I fay) thus written and printed, either in London or Dublin, would, without doubt, fell, and go off admirably well.

AND now, that I have mention'd the Sale of Books, it is necessary and seasonable that I here make it my Request to you, not to give ear to those that pass their Judgment on this Book at fecond Hand; or that are unacquainted with the Irish or Welsh Languages. I made an Offer to several Stationers in London to print this Book, because I neither had Inclination nor Leisure to do it my felf, but when they rejected it, I fent it to the Press at my own Expence. Now, it is well known to many of you that live in London, that it is on Account of fuch Books as are not to be fold for their own Advantage, that the Booksellers are faid to be like the Dog in the Manger; for when they look on the Title-page of a Book, and find it not printed for the Benefit of one of their own Brethren, but at the Expence of the Author, it is usual with them to tell their Customers, that they have heard many Gentlemen of Learning and Judgment lessen that Book; though, very probably, they never heard it censured so, but perhaps the direct contrary. Again, a Gentleman coming to a CoffeeCoffee-house, or any such publick Place (not knowing their Cunning and Deceit) fays perhaps to his Friend, or the Company he is in, that such a Book is generally disapproved; and by this Means the Book (if it be not vindicated by some learned Man of Note and Character) is little thought of and cried down in most Cities. They have also another common Custom among them in that City; and that is, to give it out to their Customers and Country-Booksellers, that the whole Impression is fold off, when perhaps the Author has not, at that Time, disposed of the tenth Book. They have various other Methods, which very much obstruct the Progress and Improvement of Knowledge in England; but I have digressed too far; and therefore those Gentlemen, who have a Desire to buy this Book, may be pleased to communicate their Intentions to Mr. Feremiah Pepyat Bookseller in Dublin; or to myself here in this Town, which they may do by the Help of any Friend they have in England.

I know many will fay, that I ought to give a distinct and separate Account of these Languages by themselves, (viz.) the Irish, Welsh, Cornish and Armorick; I confess that would lessen the Price of each Part in its own peculiar Country, but then it would not be near so useful to Criticks and Men of Learning; for by this Method they get (especially by the Help of old Manuscripts) farther Light into many even of their own Words, from their Likeness and Analogy to other Words of a neighbouring Nation. There was this to be confidered besides, that, at least, one half of the Impression would be bought up by the English and by the Foreigners beyond Seas, who have an equal Inclination and Curiofity for each Language, and consequently a like Desire to have the whole print-

ed together.

AND now I would not detain you any longer upon this Subject, but that I think it necessary to address myself to those who ridicule and make a Jest of the Welsh and Irish Languages, and therefore do condemn (as vain and useless) the Labour of those who would endeavour to preserve them: But no wife or knowing Man ought to take Notice of fuch ridiculing Wits; for their Scoffs and Jests proceed either from Ignorance or Want of better Education; but I know, from my own Experience (and, without doubt, many of you are not ignorant of the same ) that though there are too many that give themselves great Liberty in talking after such a Manner; yet the most learned, and Men of the greatest Experience amongst the English, discover not only an Inclination to preserve our Languages and Manuscripts, but are also the most bountiful Patrons of Learning, and perhaps of the most extensive Capacities and Understandings in all Kinds of Literature and Sciences (take them one with another) of any People in Europe. I have no Reason to speak partially in this Affair; because I don't profess to be an Englishman, but an old Briton, and according to our British Genealogy, descended in the Male-Line from Heliodore Leathanuin, the Son of Mercian, the Son of Keneu, the Son of Coel Kilsheavick (alias Coel Godebog) in the Province of Reged in Scotland, in the Fourth Century, before the Saxons came into Great-Britain; but we are at a Loss now for the modern Name of that Country; and we have no other Account of its Situation, but that it is Cumbria, the Metropolis of which Country was Caer Alcluid, which, according to some, is now called Dunbarton, and, according to others, the City of Glascow.

I have already declared that it was through Ignorance that many Persons would have your Language and ours buried in Oblivion; and I have no

Reason

Reason upon any Account to recal my Words, but rather to make this additional Remark, that it argues so great a Want of Judgment, that any Man, who would pretend to Learning, ought to be ashamed of it.

I. IT is undoubtedly true, that they were the first Languages of the British Isles, under which Denomination, as Ireland was formerly included, so it was likewise called Eire; and it is as certain that they were the most antient and best preserv'd of any Languages in the West of Europe, and consequently to suffer these Languages to decline and perish, would be as great an Inconvenience to the Society of Knowledge and Literature, as the Loss of the old Celtick, Italian, and Spanish, is now found to be, and suture Ages will have Reason to be associated at the supine Ignorance, in this Point, of the two last Centuries, wherein so much Learning has, in other respects, slourished.

II. THESE therefore being the first and original Languages of the British Isles, it follows that it is necessary to acquire them in some Degree, to be able to explain and account for the Names of Persons and Places; and it is for that Reason, that these eminent Antiquaries, Cambden, Bochart, and Boxborn, and other learned Persons of that kind were of Opinion, that it was necessary to converse frequently with Welsh or Irishmen, or both, to be able to make any Judgment of their Languages; and withal, that they themselves did not write so fully and copiously as they would have done, if they had been Masters of those Languages.

III. THE famous and learned Nations of France, Italy, and Spain, will not be capable of giving an Account of those Languages which

<sup>(</sup>a) Distionaire etymologique de la langue François. Fol. à Paris. Anno 1694. et origini Italiani. (b) Del Origen y principio de la lengua Castellana o Romance.

the Aolick Dialect (c), and I beg Leave to add this withal, that I do not mean the old Roman Language only, which was called Lingua Prisca, and that of the twelve Tables, which was called Latina, but also the very Roman Language, as it was used by Nævius, Plautus, Ennius, Accius and Pacuvius; that it is therefore as antient as the Greek, if not older, from which alone I conclude, that it has been less subject to Alteration, and better preserved: And one Reason, among others, for my Opinion is this, that the Latins often begin these Words with the Letter S, which the Greeks begin with H. as Sal, ans; Semis, juiou; Similis, ομαλος; Sex, εξ; Septem, επτα; Somnus, υπνος, &c. (d, New, in Regard that the same Word in a second Position, or Variation of it, begins in your Language with an H, which, according to the Order and Method in the Dictionary began with an S, as Mo bac, Mo baighiod, Mo hal, Mo buil, when the Words, according to their first possessive Letters, are, Sac, Saighoid, Sal, Suil: 'Tis therefore probable, that those Greek Words are derived from the Words I have mentioned in that Language, which, in Process of Time, was called Latin, in the same Manner that the Latins themselves have changed, (as Feftus has long fince observed) Ferba, Fedus, Folus, Fostis and Fostia into Herba, Hædus, Holus, (afterwards Olus) Hoftis and Hoftia; or, as the Spaniards have changed the Latin Faba, Fabula, Fatum, Farcina, Ferrum, Februarius, into Haba, Habla, Hado, Harino, Hierro, Hebrero, &c. I am perswaded, that this Account will be deemed very uncertain and precarious, in the Opinion of some learned Criticks, who derive all LatinWords from the Greek: But such Persons as do never question their Authority can-

<sup>(</sup>c) J. Ger. Vossii Etymologicon linguæ Latinæ. Fol. Amst. 1659. (d) Vide S. H. p. 29. c. 3.

not make any new Discoveries, nor correct old Errors. And to what has been said, I will add this, that the Greeks being in Power and Authority long before the Romans, it is not therefore to be wondered at, that their Language began sooner to decline; inasmuch as we often find People of all Nations, after coming to a high Pitch of Grandeur and Power, thro' Pride and Vanity, dwindled and reduced to a low State, and at other Times, in order to chastise and amend them, their Language chang'd (e).

IV. THERE are no Languages now extant that are more useful and necessary for explaining the true Names of Rivers, Loughs, Mountains, Rocks, Plains, Countries, Cities, and the Towns throughout Italy, France, and a great Part of Spain, than these two Languages. It is likewise acknowledged, that the Language spoken by the Rhetii (or the Grisons) on the Top of the Alps, between Germany and Italy, and in the old Cantabria of Spain, would be very useful towards making a Vocabulary of that Kind. But, as I have not extended my Knowledge fo far, neither do I think that their Languages (especially the first I mentioned) can be so copious, or so well preserved as your Language and ours: And therefore, if it happened, at any Time, that a Gentleman of the Welsh or Irish Nation, would have Occasion to travel into those Parts, it is certain he would have much the Advantage of any other Country-man, in undertaking fuch a Work, and making a Collection of fuch-like Names in those Countries, especially in the mountainous Parts of them, and comparing them with the Names of his own Country; and certainly fuch a Gentleman might, with more Ease than

<sup>(</sup>e) Vide Page 35. Class. 10.

any other, write an Etymologicon of any of those Languages; and I believe every one of you will agree with me in that, if you please to be at the Trouble of reading the first Title of this Book, and the first and second Letter of Agidius Menagius, his Etymological Dictionary. It is far from my Thoughts to throw any Reflection on the Work of that learned, ingenious, and eloquent Author: It is neither my Custom, nor agreeable to my Inclination, to censure any well-meaning Writer, though he were ten Degrees inferior to that great Man; all I have to fay is this, that had he studied the British Language and yours, though he had been ignorant of any other, but what is spoken in his own Country, (viz. in Armorica or Bass-Bretagne) he would have acquired a confiderable Share of Glory above the learned Linguists of Europe, and consequently of that Honour he has so well merited for that excellent Piece which he wrote.

V. THE fifth Motive or Inducement for publishing Dictionaries of our Languages, is, that with their Help (after being corrected) Men of Learning and other Gentlemen might be the better able to read, for their Pleasure and Diversion, our Poetry, Histories and our Laws, which are still in Being; and which ought never to be loft, but preferved carefully to give some Light to learned Persons, and Knowledge to Antiquaries. I know it is a common and prevailing Opinion amongst you, as it is with many of our selves; that there is little or nothing in our old Manuscripts worth the reading: But to that I answer, That never did any Antiquaries or Criticks repine for spending some Part of their Time in this Study; and that the old Poetry and Romances, in each of these Languages, were as witty and pleasant, as those of any other Language, that were written at the same Time.

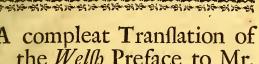

24 Mr. Ed. Lhuyd's Letter to

VI. THERE is a fixth Reason, and I think a very just one, for publishing Dictionaries and Grammars in these Languages; and it is this, That they may be very useful and helpful to those that have taken upon them the Care of Souls, and to those likewise who have any Office or Place of Trust over the common People; As concerning those who propose it were better to teach all Manner of Perfons in the three Kingdoms to speak English; I will readily agree with them in that, as being of universal Advantage in order to promote Trade and Commerce; but those Gentlemen do not inform us how that is to be accomplish'd. We have been now, for feveral hundred Years, subject to and conversant with the English and Scots in the Lowlands of Scotland; and yet how many thousands are there in each Kingdom that do not yet speak English? And therefore it was my whole defign, and what I have still at heart, that this Book may prove somewhat useful in this respect, as also in those I have already mentioned. Which if it be, I don't doubt but some other Gentlemen, more able and better qualify'd, will undertake to improve and make some Additions to this Work which I have begun; and I am not without hopes but that this my first Labour, and Product of this Kind, will, at your leifure Hours, be kindly received from the Hand of

Your bumble Servant,

From Oxford May 1. 1706.

Ed. LHUYD.

the Welsh Preface to Mr. Lhuyd's Glossography, or his Archeologia Britannica.

## TO THE WELSH.

N regard I have in this Book written to the Inhabitants of Cornwall in the ancient Cornist, and also to those of Ireland and the Highlands of Scotland in the Irish; I find myself oblig'd (not out of any Necessity, but as a

ue Respect) to address myself to the Welsh in ur own Mother Tongue, and to acknowledge, with the ancient Druids, That, after all Councies have been view'd, the Native Soil yields the left Prospect. But lest the unusual Letters, and his unaccustom'd Orthography should too much interrupt you, be pleas'd, before you proceed any arther, to observe the Pronunciation of the Letters, at this Mark (\*). And as I do not at all Assume

assume any Authority of teaching others their Alphabet, but leave all to their own Orthography so I desire but the same Liberty: And I hope not Men of Learning will think me rash or impruden for choosing my Alphabet. That's no greater Liberty than what every Welfb Author has taken who has written on the same Subject; and there' no other written Language, but has often changed either its Letters, or the Pronunciation of its Let

ters, or both.

You will read in the Beginning of the Book that 'twas not out of an Humour of finding Faul with the common Orthography of the Welfb, Irish &c. that a particular Alphabet has been us'd there in for the ancient Languages; but because the Words, when so written, are easier and more sa miliar to the English and other Strangers, that their learning the feveral Alphabets of the Welfk Armorick and Irish. For there are a great many learned Men throughout England, the Kingdon of France, and among the Germans and † Goths who may be defirous to know the Affinity of the Welfb with other Languages, tho' not so willing to learn (like School-boys) various Alphabets anew retaining constantly in Memory, the mutable Pronunciation of the Letters: So, altho' there be a necessary Reason for that Orthography in a Bool of this Nature, there is no Occasion at all of ufing it in a Book entirely Welfb, where each Writer may either retain the common Alphabet, or that of the learned Dr. David Dee of Hiradhig or any of those us'd by Dr. Griffith Roberts Dr

<sup>†</sup> The Well word Lbyxlyn comprehends Denmark, Norway and Sweden; as does also the Irifo Loxlyn.

to the WELSH.

. John David Rhys, Mr. Henry Salisbury, &c. for this present Orthography, my Reasons for oofing it are; First, The restoring of the Lets anciently us'd by the Britains, and thereby idering the oldest British Manuscripts, someat more familiar and legible to Posterity. adly, On account of affigning a proper and unerable Pronunciation to each Form of Letter or, aracter. Thirdly, For the Sake of writing arer to the Pronunciation of the Words, as is cessary and customary almost every Age, in each ner living Language. Fourthly, For taking off Objection made by the English and others, to doubling Initial Letters, and for coming nearer that Orthography which is most general. And, by, On account of alleviating the Expence in nting such Welfb Books as may hereafter be pushed in Oxford. [For which Reasons it were artily to be wished that all Welsh Writers would itate bim.]

First, The old Letters which are here restored; S, F, Z, I, (without a Point or Title) F, F; I; d u for w. And these I have often met with, not ly on Stones in diverse Places of Wales, but alin old Books, written on Goat-skin Parchment; I have shew'd more particularly in the Beginning the Cornist Grammar, and at the End of P. 221. It altho' these are the same Letters, yet they are tused here, but in one Pronunciation constantly; hereas in the old Books each of them have two three, or more, as you find made out by Expelse in the same Grammar. Secondly, By the oper and inseparable Sound of each Form or Five or Letter. My Meaning is, That there ught to be a distinct Character for every distinct

A 2

·Sound :

Mr. E. Lhuyd's LETTER

Sound; and that therefore the Alphabet of th Greeks, in that they have the Letters, x, q, s, an 6, is preferable to that of the Romans and other who instead thereof, use ch, ph, rh and th, be cause it is more congruous to say or write in Gran mar, that we change one Letter for another of the fame Class, as Kany, xany; Telyn, zelyn, & than that we change one Letter into two, by wr ting Chany and Thelyn. Thirdly, To write near the Pronunciation of the Words, is when we write (for Example) axe, (or axe) instead of achau dexre for dechrau; Krigmor for Crucmaur; Ka dualadar for Cadwaladr, &c. I am not ignora that some learned Men have writ against this Me thod; but feeing they have no other Argumen than the keeping up the common, and as they fur pose, old Manner of Writing, every one may as he thinks fit: For the common Orthography not that which was anciently us'd by the Br tains, which (as I have particularly shewn in the Cornish Grammar) has been variously alter' Neither would it be commendable, were it old, continue any Orthography very difagreeable to the received Pronunciation of the Words. And, for this Reason, the French have of late, tho' the had a long Time accustomed themselves to the old Orthography, found it more useful to write nearer to their Pronunciation; and the same ma be also said of the English, and several other Lar Fourthly, Neither is the doubling of l and u a very old Custom; and, because it is a Eye-fore to fuch as are unacquainted with or Language, I should think it more proper to write (according to the Method of Mr. Henry Salisbury distinct single Letters for each of them; using the Gree to the WELLURS

Freek a for II, in regard there was but one Soil of I in the old British and Latin: For where etters are wanting, nothing feems more natual, than to borrow out of that ancient Language hat is of the nearest Affinity; and I do not know hat the British and Irish come nearer any of the ld Languages, than they do to the Greek. hoose also to write u for w, according to the oldest Velsh and Scottish Alphabet; and also according the general Pronunciation of u Vowel in the Latin amongst all Foreigners. Fifthly, These old etters being already at the Oxford Printing-house, would be confiderably cheaper printing thus, nan with Letters of the same Magnitude, accoring to the common Orthography; every Sheet ontaining thus, a great many more Words. And nis is all I have to fay at present about the anci-

nt Letters of the Britains. "We having for feven or eight Ages difused these ancient Characters, and the English having of late printed some old Saxon Books in them, thor omitted they lay Claim to those Letters, and have given Translating, them the Name of Saxon. On the other Side, the Irish having in all Ages, even to this Day, to Mr. Humused them, do pretend that they were original- phry Wanley ly Irish Letters, and say that several religious and Dr. Hicks, Men of their Nation having been fent to preach his Death the Gospel to the Saxons, taught them to write translated into at the same Time. But no Person of either English, Nation has ever mentioned that the ancient Britains also used the same Letters till very lately. [Mr. Humphry Wanley] The Author of the Catalogue of Northern Books, in his Latin Preface, after having exchanged fome Letters with me on this Subject, and been in-" formed A 3

This Paragraph the Aufor Fear giving Offence but was fince

" nor the ancient Britains, but from Augustine " the Monk: Which is as much as to fay, That " the ancient Britains and Irish learn'd them o " the Saxons. And this the Gentleman affirms " (as if his Word were sufficient) without vouch-" fafing either to produce any ancient Authority or offer any Reasons of his own to prove it, ta-" king no Notice of what I had writ to him, that " those Letters are at this Day to be seen in St " Cadwallader's Church in Anglesey, on the "Tomb-stone of Cadvan King of North-Wales who fought against the Saxons and Augustine the " Monk, at the Battle of Bangor Is Coed. [Dr " Hicks the Author of the Thefaurus Linguaco rum Septentrionalium, has given an Instance of the like Ingenuity and Impartiality; where " he afferts, That the Manuscripts in the Bodleian "Library, which I mentioned in p. 226. of this 66 Book, are Saxons, tho' it is impossible but he must know them to be British by the interlineated Words; for tho' he understands neither Welsh nor Irish, yet he must know those Words to be neither Saxon, Gothic nor Norman. And in another Place of his Book he owns, That one of those Manuscripts formerly belonged to the " Church of Landaff. I have not mentioned this " in my English Preface, lest it should raise more "Indignation and Rage than such a petty Larceny was worth: But I have published to all, by " shewing the Marks to whom the Goods belong. The Person firstiabove-mentioned knew also ve-

tormed that I had faid, we had a better Right to those Letters than either the Saxons or Irish.
All that he has written there is, That the Saxons neither received these Letters from the Irish.

to the WELSH.

ry well that we and the Irish were Christians, not only some Ages before Augustine the Monk, but also before the coming of any Saxons into this Island, and that consequently we had Letters before that Time: Nor had he any Room to doubt but that the Britains used the Latin Letters before they embraced Christianity. He might have read in Juvenal, Gallia causidicos docuit facunda Britannos, and in Tacitus, in vitâ Agricolæ, Jam verò Principum filios liberalibus artibus erudire & ingenia Britannorum studiis Gallorum anteferre. That Agricola took Care that the Sons of the British Princes should be instructed in the liberal Arts, finding them better qualified for such an Education than the Gauls, and that in the Beginning of the fecond Century; whereas the Saxons did not arrive here till the End of the Fifth in the Time of Gurtheirn Gurthene. As to the Irish in Ireland, the Roman Arms never reached them; fo that it is evident, that of the three Nations we were the first that had a learned Education and civilized Manners; and whence ' should the other have them but from their Neighbours and Inhabitants of the same Country? I know the Irish will answer that Avergin the Son of Mil Espaine, who was the first of the Nation of the Scots that arrived in Ireland in the Time of Solomon, wrote the same Characters which are still in Use amongst them; but every Body knows it is impossible to be assured of that: And all learned Men agree that we have no cer-" tain Knowledge concerning the Inhabitants of " these Islands, nor of the other Barbarians of Europe, older than the Writings of the Greeks

Mr. E. Lbuyd's LETTER

" and Romans. As for the Saxons, none of them " that I know of has offered to prove that any " one of their Nation could read when they first arrived here. But, be that as it will, this must be granted by the Saxons and Irish, as well as " by us, That some Two of them received their Alphabet from the Third, because each of them not only retains the fame Letters, but the fame " Pronunciation of them; I say the same Letters, " because the Saxons did not write any of the " Letters K, Q and X, no more than we (as appears by the Gospels printed by Francis Junius, and feveral other Books) nor do the Irish " make Use of them to this Day: Besides, it is very improbable that we, who had the Use of " Letters from the Time of Tacitus, should leave our own Characters to use those of the Saxons. " So that either we taught the Saxons and Irifh, " or the Irish taught both them and us the Use of "them. If the Irish taught them, they must " have had Latin Letters before the coming of the " Romans into Britain; which it is impossible to prove (since they have no Writings, either on Parchment, Stone, Brass or Silver, older than "Two thirds of the Time to Julius Casar) and will never be believed, tho' ever so considently " afferted without Rule or Reason. As to the " Britains, we can easily prove, for it is plain Demonstration, That they had Letters before the "Time of Juvenal and Tacitus; for I have lately " feen a Coin of Berach, or Bericus, with his " Name upon it, in the Time of the Emperor " Claudius; and there are others also that bear " the Name of Caswallon Prince of the Britains, who fought against Julius Casar, besides seveto the WELSH.

al others; the Times of which cannot be determined: So that at present I see no Reason to doubt but that the Irish received this ancient Alphabet first from us (after we had, as is usual in Writing) altered a sew Letters; and that the Saxons, three or sour Ages later, learned them from us and the Irish. Had they received them from Augustine, they would have used Q and X as the Italians and French, and would have pronounced C either as S or CH, after E and I, which they did not till the Time of the Normans. And this is all I have to say at present about the ancient Letters of the Britains."]

The next Apology which probably will be ex-

Red from me, is that for the Tediousness of the me, since my first Journey into Wales, and yet no ok published, except one Latin Tract of Natu-

History in Odavo: I have but little to say herebut that 'tis common in all Countries, and at Times, to run down such as publickly engage emselves in any unusual Enterprise, unless they sish it with more than ordinary Expedition. And so, that sometimes even worthy Gentlemen judge hly, either thro' the wrong Suggession of others, for want of a due Notion of the Undertakingwas not my design, neither did I promise when began to travel, to traverse the Countries so rticularly as I have done, nor through all those was it then my Design or Promise to write a fork so large as this (with God's Assistance) is the to be when sinished; nor indeed to spend the ythe of the Pains I have taken with this Foun-

tion or first Volume.

Now,

Mr. E. Lhuyd's LETTER

Now, if I have spent more Time and Money in my Travels, for the Sake of more Experience and Knowledge; and if I have taken more Time and Pains to instruct myself in those Languages required, and to publish an Account of them for the Information of others, and Use of Posterity, than I promised; I was in Expectation, and am still, that if I had not the Thanks of the Gentry of Wales, I should not however have much of their Displeasure. As for the Time, whoever will look into the first Leaf of the Learned Dr. Davies's Di-Etionary, and reflect withal on what small Helps I could have from other Books, excepting his alone, towards this Work, he will acknowledge, I prefume, that I have had no great Time to be very idle, the first four Years after my Return from Lhydaw (or Bretagne) in the Kingdom of France. If the Printer has, fince that, been too tedious, because he had other Mens Works in Hand at the fame Time, that Fault cannot be laid at my Door, because I have no Authority over him. Their Cufrom is (without acknowledging what they have in Hand already) to undertake all they will be intrufled with, left Work or Money fail, left other Work-men be admitted into their Printing-house; and to neglect any Work where the Authors are the Undertakers, rather than that of the London Book-fellers, unless they are threatned by those who have Authority to turn them out of the Print-And, if others complain to those, they'll spare no Sort of Untruth to excuse themselves: And this is their Profit and Interest to be all in the same Story.

I am very fensible, that it had been less expenfive to the common People of Wales, Cornwall,

Ireland

reland and Scotland, if I had given an Account f these Languages in so many distinct Books, nd do also acknowledge that such a Work had een useful in each Country. But that would ave been one Piece of Service; and unless myelf and the Learned Gentlemen I have consulted ave been much mistaken, the collating of the riginal Languages of the Isle of Britain is anoher: For, by the placing together and comparing f the Words, we acquire often a clearer Notion f their Origin and Acceptation in the old Manucripts. And this Method is much nearer and reaier for the Use of any that may hereaster be dispoed to write a learned copious Dictionary of either f these Languages. Moreover, as you find by the Catalogue of their Names, this Book was never ntended for the Use of the common People; but vas written at the Command of some of the greatst Persons of Wales, and for no small Number of he learned Nobility and Gentlemen of England, who have a Curiofity of comparing with other Lanuages, the Irifb, Cornish and Armorick, as well s the Welfb.

As for the Inhabitants of Cornwall and Armorick Britain, altho' they live among English and French, heir Language shews, as you see plainly by this Book, that they were antiently Britains. But you will doubtless be at a Loss for that infinite Number of exotick Words, which (besides the British) you'll and in the Irish of Scotland and Ireland. There are for this, as seems to me, two Reasons: I say, as seems, because we have no Authority of Histories or bother Means, that may lead us into the Truth, but comparing of Languages. In the first place, I suppose that the antient Colonies of Ireland were two distinct

Mr. E. Lhuyd's LETTER

distinct Nations, co-inhabiting Guydhels and Scots: That the Guydhels were the old Inhabitants of this Island, and that the Scots came out of Spain. So far therefore as their Language agrees, either with us or the other Britains, the Words are, Guidhelian: And for the rest, they must be also either Guydelians, lost by our Ancestors, or else antient Scotisto. So the second Reason for their having fo many unknown Words, is, for that the Welsh, Carnish and Armorick Britains, have lost some Part of their old Language (in regard they were for the Space of almost 500 Years, viz. from the Time of Julias Casar to Valentinian III. under the Government of the People of Rome) as I have shew'd more particularly in the first Section of this Book. And thus 'tis impossible a great many of those Words which feem to us exotick, may be old British, though we do not know them; according to those Examples I have instanced in p. 7. c. 1. Nor was it only North-Britain that thefe Guydhelians have in the most antient Times inhabited; but also England and Wales: Whether before our Time, or Contemporary with us, or both, is what cannot be determin'd. But to me it feems most probable that they were here, before our coming into the Island; and that our Ancestors did, from Time to Time, force them Northward: And that from the Kintire (or Forland) of Scotland, where there is but four Leagues of Sea; and from the Country of Galloway, and the Isle of Man, they passed over into Ireland; as they have that Way returned, backward and foreward, often fince. Neither was their Progress into this Island, out of a more remote Country than Gaul; now better known by the Names of the Kingdom

of France, the Low-Countries, and the Low-Dutch.

HAVING now related what none have hitherto made mention of: viz. first, That the old Inhabitants of Ireland confifted of two Nations, Guydbelians and Scots. Secondly, That the Guydbelians descended from the most antient Britains, and the Scots from Spain. Thirdly, That the Guydhelians lived in the most antient Times, not only in North-Britain (where they still continue intermixed with Scots, Saxons and Danes) but also in England and Wales. And, Fourthly, That the said Guydhelians of England and Wales were Inhabitants of Gaul before they came into this Island. Having been fo bold, I say, as to write fuch Novelties; and yet at the same Time to acknowledge that I have no written Authority for them; I am obliged to produce what Reasons I have; and that, as the Extent of this Letter requires, in as few Words as may be.

I have already proved at large, in the first and second Sections of this Book, That our Language agrees with a very great Part of theirs; and in the Irish Grammar you'll also find that the Genius, or Nature of their Language in their changing the initial Letters in the same Manner, &c. is also agreeable to the Welsh. And as, by collating the Languages, I have found one Part of the Irish reconcilable to the Welfb; so by a diligent Perusal of the New Testament, and some Manuscript-papers I received from the learned Doctor Edward Brown, written in the Language of the Cantabrians, I have had a fatisfactory Knowledge as to the Affinity of the other Part with the old Spanish. For though a great deal of that Language be retained

Mr. E. Lbuyd's LETTER

tained in the present; yet much better preserved do we find it, amongst the Cantabrians. Now my Reason for calling the British-Irish, Guydhelians and those of Spain, Scots, is because the old British Manuscripts call the Picts, Fitchid-Guydhelians; and the Pists were Britons without Question, as appears not only by the Name of them in Latin and Irifb, but by the Names of the Mountains and Rivers in the Lowlands of Scotland where they inhabited. And there probably they are yet (tho' their Language be lost) intermix'd with Scots, Strat-clyd Britons, old Saxons, Danes and Normans. As for the entitling the Spanish Irifh, Scots, there wants no Authority; the Irifh Authors having constantly called the Spanish Colony, Kin Skuit, or the Scottish Nation. No more therefore need be faid to prove the Guydbelians, antient Britons. And as to the Scots, tis only necessary we should produce Examples of the Affinity of the old Spanish with the present Irish, which we have not Room to do here, but in these few Words following, where the Scottist-Irish Words lead, and the Cantabrian (which is the old Mountain or Pyrenaan-Spanish) are written after the English Interpretation.

A, acha, a Dike or Mound, a Bank; Acha, a Rock. Adhark, a Horn. Adarra, a Horn, also a Bough. Aghartha, Deaf; Gor Gothor. Aile, Shame; Ahal, ahalque. Airneis (aivrneis) Cattle. Avre, abrec. Othoits.

Much more might be added to these; not only nt of the Cantabrian, but also out of the present panish, notwithstanding the great Alteration of at Language by the Latin and Arabick. Seeg then 'tis fomewhat manifest, that the antient habitants confifted of two Nations, that the uydhelians were Britons, and that Ninnius and hers wrote many Ages fince an unquestionable ruth, when they afferted the Scottish Nation's ming out of Spain; the next Thing I have to ake out is, that that Part of them called Guydlians have once dwelt in England and Wales. here are none of the Irish themselves, that I now of, amongst all the Writings they have iblished about the History and Origin of their ation, that maintain they were possessed of Engnd and Wales; and yet whoever takes Notice of great many of the Names of the Rivers and Iountains throughout the Kingdom, will find no eason to doubt, but the Irish must have been the habitants when those Names were imposed upon em. There was no Name antiently more comon on Rivers than Uysk, which the Romans writ ca and Osca; and yet, as I have elsewhere obsered, retained in the English, in the several Names Ask, Esk, Usk, and Ex, Ax, Ox, &c. though there be a considerable River of that Jame in Wales, and another in Devon, yet the ignification of the Word is not understood either in ur Language or in the Cornish. Neither is it less ain Labour to look for it in the British of Wales, ornwal, or Armorick Britain, than twould be to fearch

18 Mr. E. Lbuyd's LETTER

fearch for Avon, which is a Name of some of the Rivers of England, in the English. The Signification of the Word in Irish is Water. And as the Words Coom, Dore, Stour, Taine, Dove, Avon, &c in England, confess that they are no other that the Welsh, Kûm, Dúr, Ysdúr, Tâv, Divi and A von, and thereby shew the Wellh to be their old Inhabitants: So do the Words Uisk, Aux, Kinuy Ban, Drim, Asxlia, and feveral others make i manifest, that the Irish were antiently possessed of those Places; forafmuch as in their Language th Signification of the Words are Water, Lake, a great River, a Mountain, a Back or Ridge, a grey Stone As for the Word 'Uisg (or Uisge) it is so we known, that they use no other Word at all so Water. And I have formerly suspected, that in regard there are so many Rivers of that Name throughout England, the Word might have bee antiently in our Language: But, having looke for it in vain in the old Loegrian British, fli retained in Cornwal and Bass-Bretagne, and re flecting that 'twas impossible, had it been once the British, that both they and we should lose Word of so common an Use, and of so necessary Signification; I could find no Place to doubt, bu that the Gwydhelians have formerly lived all over the Kingdom, and that our Ancestors had force the greatest Part of them to retire to the Nort and to Ireland, in the very same Manner that the Roman afterwards subdued us, and as the Barba rians of Germany and Denmark, upon the Downs of the Roman Power, have driven us one Age a ter another to our present Limits. We see the how necessary the Irish Language is to those wh shall undertake to write of the Antiquity of the fle of Britain; and, by reading the first Section f this Book, 'twill be also evident, that 'ris imoffible to be a complete Master of the antient British, without a competent Knowledge of the rish, besides the Languages of Cornwal and Bassretagne. Nor is it necessary for Satisfaction here-, to look farther than our common Names for Sheepfold and Milch-Cattle; for who should ver know the Reason of calling a Sheepfold Korin, although he knows aan the latter Syllable of ne Word fignifies a Yard or Fold, unless he also nows that the Irish call a Sheep Caor? Or why is that we call Milch-Cows Guartheg blithion, nless he knows that Blathuin in the same Lantage fignifies to milk: And fo for a great many Tords which we have neither Leisure nor Room to ke Notice of at present, nor indeed Occasion, in gard they are obvious to all Observers in the llowing Book. The next Thing to be proved , that those antient Gwydhelians were a Colony those Nations whom the Romans called Galli, or eltæ. And this willalso appear from a Comparison both their Languages. I have observ'd to you ow that may be done in the English Preface; and eve no Room to infert here but the few Examples llowing, where the leading Words are Celtick, ollected out of old Latin Books.

Ilobrox. A Stranger. Vet. Com. in Juv. Bruach is a Country, or Border of a Country, in the Irish; and Eile is other: So that Allobrox, was but Eil-bruach.

remorici, Maritime People; Armhuirich and

Armhoirich.

Ipes, Uplands, Mountainous Countries, Servius.

20 Mr. E. Lhuyd's LETTER

Q Whether 'twas for that Reason that the Irif have called Scotland, Alban, the western Part of that Kingdom appearing to them very Mountainous.

Auseij, The City of Auchs in Gasgoin, Casar. Q Whether from Water or a River of that Name

Axona, The River Aisne; Aisg [or Uysq] Water. Aisg, Aisgon, Aicson, Axona.

Cateia, a Dart, a Spear; Servius. Gath.

Celtæ, the Gauls, Cæss. Gædil, Cædil, or Keil and in the plural according to our Dialest Keiliet, or Keilt [now Guidhelod] Irishmen And the Word Keilt could not be otherwish written by the Romans, than Ceilte, or Celtæ Neither is there Room for a satisfactory Know ledge, whether 'twas not for this Reason that the more northern Part of this Island was called by us Kelidhon, and by the Romans Caledonia Or from Woods; Keliadh being of that Signification in the Scotish-Irish to this Day.

Crupellarius, a Soldier in a Coat of Mail, one o Cromwel's Lobsters; Q. Whether from Cruban

alias

alias Crubell, a Crab-fish in Scotish and old Welfs, ivitiacus, King of the Ædui, Duvtach, was a common Name, if it be not yet so amongst the Irish; and 'tis doubtless the same with Divodog in Ystrad Divodog, Glamorganshire.

ruidæ Wisemen, Augurs Sooth-sayers, Draoidhel unum, in the Names of Towns signified a Hill, as in the Uxellodunum, Mellodunum, Neodunum,

Vellanaudunum, Lugdunum, Virodunum.
unum, in the Gædhelian of Scotland, fignifies any
fortified Hill; and therefore a great many of
their Towns are fo denominated. Tin and Din
was the Word that answered to it among the
Britains; whence Tin Sylwy, and Tin Daethwy,
in Anglesey, and Dinorwick, in Carnarvonspire,

out of Din was made the Dinas for a City. oefus, a Champion. Servius. Gaifgeach. Guas in the British, is a Youth; and Gwas gwy $\chi$ , a stout Lad; a Champion.

cudus, a Sort of Ode among the Gauls; Verficulos dant Barbara carmina Leudos. Venant. Fort L. 7. C. 8. Laiodh: See Laoi in the Irish Dictionary. Tagus, in the Names of Towns, fignified a Field. As in Magetrobia, Duromagus, &c. Magh, is a Field in the Irish according to their conflant Orthography, though in the Anglicizing of the Names they have now changed it into Moy.

latisco, the Town of Vascon among the Ædui. Cass. Mathuisso, signifies good Water; also Field-Water, or standing Water.

alla, a Sort of Garment. Mart. Fallain, a Mantle: ercingetorix, a General of the Arverni. Cæs. Fear cean go tûrûs, signifies verbatim, the Head Man

of the Expedition.

ergafillaunus, another Commander of the Arverni.

B 2 Fear

Mr. E. Lbuyd's LETTER

Fear go Saelan, the Standard-Bearer. Another Signification is the King's Armour-Bearer. See Saegblan in the Irish Distionary.

Vergobretus, saith Cæsar, signified a Chief Magistrate in the Language of the Adui. Liscus qui summo Magistratui præerat, quem Vergobretum vocant Ædui, qui creatur annuus & vitæ necisque in suos potestatem habet. Cæs. de bello Gallico, l. 1. Now, Fear go breath fignifies A Judge; verbatim, The Man that judges: And twas by taking Notice of this Word, that I first suspected the Gwydhelians to be antient Gauls; a Thing I fee at present no Reason at all to doubt of. Seeing then we find by the antient Language of the Celtæ, and by a great Number of the old Gwydhelian Words that are still extant in the prefent French, that the Gwydhelians came originally out of France; some will wonder how it comes to pass, that we find so many Teutonick or German Words in the Irish: But the Reason for that was, that those People of the old Gaul called Belgae spoke the Teutonic, as they do yet, and befides the Celtæ that came hither, and passed some Ages afterwards into Ireland, some of the Belga came also; and those (as seems likewise probable to the learned Antiquary Mr. Roderick O Flaherty) were the very Men they called Firbolg, who came, according to their Tradition, into Ireland long before the Scots. Now, in regard that neither the Irish themselves, nor any one else that I know of, have taken Notice of the Northern Words in their Language; it feems not impertinent to collate some of them with the English, in regard itis one of the Teutonic Languages, tho' it has anciently

ently borrowed fome Words from the British, and the latter Ages a great Number from the Latin nd French. We have no Room for supposing inless it be in a very few Examples) that the Irish we borrowed these Words from the English, beuse they are extant in the old Irish MSS written efore the Union of the two Nations: And morever, they have feveral Teutonic Words that are ot at all in the English. In the following Exnples the leading Words are  $Irioldsymbol{p}$ , and the Enish those written in Italick. Ait [A Place] at; n allod, Of old; Aoidhe, Youth; As, is; tan [a Garland] Hat. Baiter, Water; Beim, To bear; Beit, both; Beithir, A Bear; uidhe [yellow] bay; Briar [a Prickle] Bryar; rok [a Badger] A Brock; Buidhean, A Band. eachter, either; Ceaddaoine, Wednesday; eart, Right; † Cing, King; Clet, Quill, Duillet; Knaib, Hemp; Belg. Kennep; Cnap, Knap [i. e. A Button] Coinne [A Woman] Queen; Colbtha, The Calf of the Leg; Craos, o carouse; Cruadh, hard; Cruth, Curd; uan, A Haven; Scil. Caven, chaven, haven; uivet, Cheat; Quin, When; Scil. Quen, uèn, huèn; Culaidh, Cloaths. Da, To; Dal, Dole; & Dailthe, dealt; Daer, dear; Dath Colour] A Dye; Deor, A Tear; Divrim, To rive; Dobam, To daub; Don, Dun; Dos, Distle, Thistle; Dorcha, dark; Dre, A Dray. afog, Weefel; Eadan [the Forehead] Head. aileog, Hillock; Folav, hollow; Failte, Health; Faol, Wolf; Feadan, Germ. Pfeif; Fovar, ovradh, Harveft; Foil, While; Fuil, Fuileadh, lood; For, before; Frag, Germ. Fraw [a Wonan] a Wife; Fuadh, Fuathradh, Hate, Hatred.

24 Mr. E. Lbuyd's LETTER Gavam, To go; Gavuin, Calf; Gearan, A Groan; Gonte, wounded; Gort, Hurt; + Gre, grey; Grodh iarain, An Iron Crow. I and iagh [an Island] Ey, as Bards-Ey; Iodars, towards; Is, is. Layim, laighim, To by, to lig; Leagh, A Leech [viz. a Physician] Loch, black; Log, A Pool or Pit, Germ, Loch, Dan. Lock; Luaidhe, Lead; Lumhan, a Lamb. Magadh, mocking. Meis a Mess. Min, Fine. Moid, Oath. Muirin, a burden. Nochduidhe, naked. Ocras, hunger. Oir, for. Olam, [to drink] Ale. Olan, Wool, Woollen. Pock, a Buck. Readan, a Reed. Readh, Ready. Sadal, Saiv, sweet Sar [exceedingly] Germ. a Saddle. Sehr. Skian, ys Knife. Sciev, shape. † Skib, a Ship. Seachan, shun. Seadha, a Saw. Seal, while. Seith, a Hyde. Siavraye, Fairies. Sioc, Ice. Sligean, a Shell. Sneachd and Sin, Snow. Smearadh, Besmearing. Soivskeal, Gospel. Sread, a Herd. Srang, string. Sreamh, stream. Tachailt, to dig. Tairisim, to tarry. Tairngtheoir, a Drawer. Tair-sigh, a Threshold. Teango, a Tongue. Tirm, dry. figh, a Threshold. Teango, a Tongue. Tirm, dry. Toirseach, tired. Tiugh, tough [thick.] Uvan, an Oven. Uaillyim, to Howl.

I have nothing else at present to say farther of the Language and Origin of the Irist. And in regard this much, as little as 'tis, offers several Notions never yet proposed, I have chosen to publish it first in Welst. If some of the learned Gentlemen of our Country shall approve of them; 'twill be no difficulty to write them more at large in a more general Language. As sor the Nation of the Britains, some better Knowledge than I have had of it hitherto would be requisite? and also more Room to trace it to its Springs, than the narrow Compass of this Epistle permits: But lest

to the WELSH.

come to the End of this Preface, without fayg any Thing at all of it, take what follows reing to one of the Dialects of the Kingdom of cance, on the Borders of Spain. Reading the riades of the Isle of Britain, which, according to r. Vaughan of Hengurt, were written about a ousand Years since, I could not but take Notice these Words, The third Silver-army of Britain nt off with Kasualon 'ab Beli and Gwenwynwin d Gwanar, the Sons of Mau ab Nuire, and Arirhod the Daughter of Beli. And those Men came m Erch and Heledh, and followed the Casarians th their Uncle Kasualon. The Place where the en now are, is Gasgoigne. Their Number was ne and twenty thousand. Of the other two Silvernies the Author had named before, the first went th Irp-Lyidog to Norway, in the Time of Gaidal, 1. Biri [an Legend. G. vab. Iri?] and the cond with Helen Lyedhog and Maxen [i. e. Maxias wledig to Bas Bretagne. And because that's own to have been about the Year 384, and that should therefore seem that the third Army went fill later, and confequently not very remote om the Time of the Author: I imagined he had ther mistaken the Name of the General, or that ere was another Caswalhon 'ab Beli besides the ince that engaged Julius Cafar. But, in rerd he calls the Romans Cæfarians, he might pofoly (tho' the Order be confused) mean Caswalbon b Belimaur, 'ab Minogan. Be that as it will, ice Part of his Relation is undoubtedly Ttuth; mely, That an Army of Britains went out of is Island into Britain Armorick, and since the asgoines use a mix'd Language of French and me other, I imagined 'twould prove neither wholMr. E. Lhuyd's Letter

ly lost labour, nor foreign to my Purpose to look a little into their Language. Some Welsh and Gwydbelian Words I found in it; but generally speaking, 'tis the Lingua Romana, or Roman Tongua antiently corrupted and intermix'd with Spanish and Gaulish. Of the many Welsh and British Words I took Notice of in it, these following seemed the most remarkable.

G. Ach, alas! W. Och. Acothere acu. Adouzilha to bore; Tylby, attylly, to pie ce again. Amagat Hid, Mugut: Mugut ir ieir, &c. Amuy, more muy. Aro, aron, Now, gruan Arriere, behind in the Gwydheian, Dorein, W. arol. ascla, to Cleeve; Gwydth. Scolt. Aigo (an olim Aifgo?) Water, Gwydh. Aisge, Oisge, Uisge. And 'tis high ly pr bable that from this Word came the Latin Aqua. Barga, to dress Hemp or Flax: Bragio Blutoire a meal Ceffer; Blaud. Meal. Bayfaduro del Pabiseau: Marque (says the French Interpreter qui est à coté du pain lors qu'il a esté pressé au four So that Pobiseau is the Pekez of the Cornish, o our Pobydh, a Baker. Bern (vern) an alder Tree uerrn; Guydth, Fern. Bernard pescaire, Beinard the Fisher. P. 1. Piscur, B. Bisgadur. 'Tis the Gasgoigne Name of a Hern. Berret, a Bonnet Guydh. Beired, from Bar, which in the Armorick, is the Head or Top; in the Cantabrian, Burua. Bigar, a Brieze, or Horse-flie; Pigur, any Thing that Pricks or Stings. Biou, an Ox, Cow Edc. Bey, Boy, byuch, buyh. Brama, to bellow Brevy, which, according to the old Orthography was Bremi, and Brema. Braffat, an armful; Breichiad: Briana, a Mite, a Hand-worm; Brivyn and Privyn, any little Worm. Budel, the Post to which

to the WELSH. ch Cattle are tied in a Cow-house; Bydel, or dhel. Cabirou, Rafters; Keibr, Corn, and n, Keibrou, Keibirow. Cadeno, a Chain; Cad-. Cagal Cagaillou; Sheeps-dung, &c. Cagal, leu; in the plural Number, according to the nish and Armorick Caglou. Caire. a border, . Cayffal (ys Cayfal, Scayfar) a Tusk, a Fang, . Skythyr. Caillhols: Nousem caillhols, we undone; ne yn golb oll, we are all lost. Cap. Head, Top, or Summit of any Thing, as in the Welsh: Cap d'an the End of the Year, i vluydhyn; and hence that Wallicism in unius, in Capite Anni, speaking of the Wood Loch-Neach. Carrado, a Drag-full; Carred. iu, chiu, the Noise of a Chick; Kiu, a Chick, , a Dog; Ki: In the Plural with the Armorick tish, faying Chichou and Chichet. Claba, to k; cloi (Cloiv, cloib.) Clapa, to beat; Clapio, anc, a Crab; Crane, Creze, to believe; Corn. z; W. Credy. Crida, to groan; Grydhvan. nh, before; Kyn, or Cun. Cura, to dress or pare, cueirio, alfo to beat, Kyro or Curo: Cura lugres, to beat one's Eyes; Curo i leged. Da-, away; ibant. according to some from the La-, ab ante. Darno, a Piece, Darn. Dibens (Divendres) Friday; as if we would say, uener instead of Dyo Guener. And so Dijaus, ursday, Diviau; Dimars, Tuesday; Dyumrth; Dimeres, Wednesday, Dyumerxer. Dom, Man; Dyn: Paure dom, a poor Fellow. (But chaps this may be only Dom for Dominus, by ay of Irony.) El, an Eye; Sel and Sil in the British, whence our Welsh Sily, and Armorick llat, to behold. In the Gwydhelian, the comon Word for an Eye is Súl: And as their Sul Mr. E. Lbuyd's Letter

is occasionally changed into Hul; so was doubtless our Sel and Sil into Hel and Hill. Estan, Tin Fay, a Beech-tree, Fay; as we find by the compound Word, Fawyd, i. e. Guyd-fay Beeches; for 'tis a vulgar Error to call Deal, Fawyd, as is usual in N. Wales. Fenno, a Woman i veniu. Flac, weak; lac. Flairou, a smell Fleirio, to smell offensively. Fu gairou, Game-fire so they call the Bonfires on Midsumer-Eve; a Custom as well known amongst them and the Armorick Britons, as in S. Wales: Tan Guare. Fourra to provoke a Dog when barking or baiting, &c Herra, Herio. Garro and Garrow, a Leg of Mutton, also a Leg of a Fowl, &c. Gar is a Leg in the Cornish and Armorick; but fignifies a Ham only in the Welsh. Gourgourial, excellent; Rhago ral: Gorgoral would also fignify the same Thing is the Welsh, from Gor, valde and Goral, optimus; but that 'tis not in Use. Gourret, a dilling Pig; Arm. Gudorot; in Cardiganshire, Cardid and Cardydwyn Vid. Pig. p. 283. Cous, a Bitch; Arm. Kies, W. gast. Grapos, to crawl, Kropio. Graupinnia. to scratch, Skrifinio. Grougnaut, the smalest Fry of Fish Guraziaut. Guerlhe, squint-ey'd; an q. d. Guyrlbyg, crooked fighted? Guigna, to wink Guinkio, D. whether from Guingo, to wag, or shake. Langousto, a Lobster; Corn. Legest. Laura, to labour to plough, Shavyro. Q. whether in most antient Times the Latin, Labor, Laboro, &c. might not come from Lhaur or Lar, which in the Celtick fignified the Earth, and whether we might not in after Ages, when subject to the Romans, borrow our Lhavyr from their Labor. Liri (and Listri, Listri) a Flag or Flower-de-Liz; Elestr. Louga, to hire; Lhogi and Logi, Lugras, the Eyes: es; Corn. Lagas. Manat, a handful; Minait. andro, a Fox; Madin and Madrin. In the Irish, adre ruadh (i. e. Red Dog) is a Fox; and in the ench, Madre is a subtil Fellow. Mano, a Sheep anchuyn, an q. Chudun man? Marra, a Ram; abaren. Meme, the bleating of a Lamb; fo in elsh, mé; and me bach, a little Lamb. Memé. Lamb or Mutton, so called by the Children; and in Wales, as also Be. Muda, to migrate or reve; Mudo, or Mydo. Mujol, Yellow; ap-'d only to the Yolk of an Egg; and for a Sort Yellow Mushroom. Pic, a Beak, Bill; Pig. g, Pitch; Pyg. Popou, a Bug-bear; Bubay. ui, a Field; Kae. Rascaud, Embers; Rysod. aftel, a Rack, Rhefel. Trexo, a Sow; Turx, a og. So the French, Truis and Truie, which is the same Word used for a Sow. Triga, to stay, dwell long; Trigo, bir-drigo. Trouneire, Thunr; Tranæ.

ONE other Affinity they have with the British, That the Infinitive Mood of their Verbs ends 1; as Barata, To betray; Barbexa, To shave; rrexa, To mix; after the Manner of the Corb who say Perna, To buy; where we say Pryand Krena, To shake; for Kryny. Owna, fear; for Ovni, &c. and not in r as in the ench. In an Heroic Poem written on an Expeion of the Nobility of that Country into Spain the 1365, some of the Names of the Men are o so very like those formerly used by the Welsh d other Britains, that there's little Room to ubt but that they are the very fame. Ex. gr. ouric, Meyric, and in South-Wales Moyric. Cen, Cynan. Talayran, Talhaiarn. Goyrans, Corn, erens; W. Gereint Ganelu, Kyndhelu and Kynbeku.

Mr. E. Lbuyd's LETTER 30 belu. G'leon [and Leon] Guallon. Guytrae Guerthydh, &c. Neither can Goudelyn, the mo celebrated Poet of those who have written in the Language, be any other than our Guydhelyn; the both are probably no other than the same with the Latin Vitellinus. But as to the Word Dab, which they commonly use in Compound proper Names, a Dab-Joan d'. Ambres, Dab-Gussclin, &c. In regar I am Ignorant of its Signification; I shall not infi on the Conjecture that 'tis the same with our 'a or Davydh 'ab .--- Such Readers as are better ac quainted with their Language and Manuscripts, ma foon fatisfy themselves therein. Moreover, no more remote are the Names of Men from those of our Nation, than are some Names of Places tha occur in the same Poem. As Chabanos, Kevn † Kebne; Garrigue, Karreg, Kerrig. Buel, Buall Vinnes, Uynedh [Dial. Corn. Uynez.] Blainace Blainiig. Montaudran, Minydh Aedbren. Mon tesquiu, Minydh Iskaw. Carabodas, Caer beda or Gaer vodach. And whoever would confult th Writings of their Monasteries and the Lives of their Saints, would doubtless meet with a great many more.

I have now but little to add, but that 'tis no ceffary to caution the Reader, that no Man is oblig'd to regard any Censure against this Book unless the Gentleman that offers it, understands besides English and Latin, either Welsh, Armorica British, Cornish or Irish. I offer'd it to several of the London Book-sellers in order to their publishing it, if they thought fit. But in regard they would not undertake it; I have printed it at my own Expence. Now all that have been conversant a London know very well, that a Book is constantly

rui

to the WELSH.

31

in down when it appears by the Title Page, that was printed for the Author himself, and not for y of the Book-fellers: Infomuch, that 'tis very mmon, not only in Book-fellers Shops, but also some Coffee-houses to hear Men disparage new ooks, tho' they neither understand the Nature r Use of them. None can be competent Judges this, but Gentlemen of Wales or the Highlands Scotland or of Ireland; and in the Censure of holars that are Natives of those Countries, proded that besides their Knowledge of other Lanages, they continue Masters of their own, I shall ways readily acquiesce. But for others that prend to find Fault themselves, or to offer the Obctions of absent Persons; all Lovers of Reason d Equity all acknowledge, that there is neither ecessity nor Occasion to regard them.

Ir may fave fome Expence of Time to such as all have frequent Occasions of perusing the Lan-Welsh Vocabulary, if they remember that 'tis ore copious after the Letter H. and that 'twill erefore be best where there are Synonimous Lan Words, to consult some Word that begins with y Letter thence sorward. As for the Desect in the preceeding Letters, you'll find how it hapn'd in the second Page of the English Presace.

IT. II.

READING over when 'twas too late, the Catague of the Names of the Gentry, before the neglify Preface, I find myfelf oblig'd before I include this Letter, to acknowledge that I have nitted the honoured Sir Griff. Will ams of Marl, art. and also the Names of the Seats of some Genemen in Anglesey, and Carnarvonshire, because not exitten in the Paper I receiv'd; but 'tis possible I

may have another Opportunity of supplying that Defect.

As for the Remainder of the Work, all I can fay, is, That 'tis my Defign (by God's Permission who has been pleas'd to vouchfafe the finishing this) to publish at least one other as large as it containing partly a Dictionary of the Histories of the Kings, Princes, antient Nobility; the Towns Caftles, Churches and Saints, and all other verremarkable Men and Places of the Britilh Nation mentioned in antient Records. But as for the Time I have been already fo often deceiv'd in the Printing-house; and also by wrong calculating m felf the Labour required in the Writing fuc Books, that I have learned, 'tis in vain to nam any Time for publishing. In the mean Time, who ever is pleased to favour my Endeavours, by giving Notice of any such old Inscriptions, as the shall suppose I have not seen already, or to com municate the Use of some old Welsh Manuscrip on Parchment (or copied from Parchment) con taining any Subject not mark'd with the Letter I in the Catalogue of the Wellh Manuscripts †, a he may do a publick Service by communicatin what may be fit to be preserved from Oblivion however he will at the least shew a Civility t be gratefully acknowledged, the Remainder of hi Days, by

Your faithful Servant,

E. L.

ACT of the Society of Improvers, &c.

Somerhall, Nov. 25. 1732,

A T the Meeting of the Society of Improvers, Mr. David Malcolme Minister of Dudding-floun represented, That he humbly conceived, that the Uiefulness of the antient Scottish Language was so great, that it would not be easily credited; and therefore he had subjoined to the Proposals, the Authority of some other learned Men, to give the

Thing the more Weight, and that he defigned to proceed in a Way as near that of the Mathematicians, as the Nature of the Thing would allow; he was to reprint the only printed Dictionary of that Language, published by Mr. Edward Lbuyd, to do Justice to the Memory of that excellent Person, to whom he acknowledges himself highly obliged, and was to add to this, Collections of his own, which he would generally give Vouchers for; that these would serve in place of Definitions; that he was also to add the Elements of the said Language, which would ferve instead of Axioms. and that he was to give fome Observations, as Foundations of some Postulata; and from these Mr. Malcolme intends to prove every Thing that he has to advance. And further represented, That he was loath to fpend the Time of the Society, in narrating all the feveral Steps that had led into this Enquiry, about the Usefulness of this Language, that he had first discover'd it in tracing the Latin Language to its Fountains; to which Purpose he had examined some of the Antiquities of Italy, and found more Satisfaction from this Language, than from the Accounts given otherwise by learned Men: He gave Instances of this, in explaining the Names of some Countries in Italy, and some Mountains, both greater and smaller, particularly the feven Hills upon which Rome was built, befides fome other Incidentals; and added that this Language preserves a great many simple Words, which are not to be found in the most ancient Monuments of other Languages in their fimple State, but are Ingre-

Ingredients in the primitive Words of other Languages, and are a great Help to illustrate them, The Gentlemen of the Society, especially these who best understood the Irish Language, testified their Satisfaction, particularly on Account that the Etymologies that Mr. Malcolme gave, were founded upon the very Nature of the Things themselves; and returned him their thankful Acknowledgements, for the great Care and Pains he had been at in making fuch useful Discoveries; and recommended to the feveral Members of the Society, to give Mr. Malcolme their Affistance in the Disposal of his Propofals, and give all due Encouragement to so good an Undertaking. And a Motion being then made, that Mr. Malcolme might be admitted an honorary Member of the Society, he was appointed to be recorded as fuch. Extracted from the Records of the Society by, GEO. HANDYSID S. S.

#### No. III.

To the Honourable the Dean, and the other Members of the Honourable Faculty of Advocates,

The MEMORIAL of David Malcolme, Minister of the Gospel at Duddingstoun,

Humbly Sheweth,

THAT he has for fome Years imployed his Thoughts about Ways for facilitating Learning and Religion.

That

[ 6 ]

That the Latin Language being one of the Keys of Learning in this Part of the World, he hath applied himself to trace it up to its Fountain, and he hopes it will not be unacceptable to any of this Honourable Faculty, while he declares that this Enquiry led up to the antient Language of our Country, which he found did very surprizingly and satisfyingly illustrate the Antiquities of Italy, and the Latin Language, in which so many useful Books, and particularly the Civil and Canon Law are mostly writ.

He hopes further, That it will not be unacceptable to this Honourable Faculty, that he afterwards found, that it illustrated the Antiquities of Greece, and the Greek Language, in which the

New Testament was first writ.

He afterwards observed the Usefulness of it, in illustrating other Branches of Learning, which, that he may not take up the Time of this Honourable Faculty, he will not now enumerate, especially seeing he hath hinted many of them in some Proposals which he hath caused print about a Dictionary, and Elements of this Language, which he has a-Mind to publish, if due Encouragement be given, as a Foundation for several other Things.

He particularly hopes, that it will not be unacceptable to this Honourable Faculty to represent, That it is in a special Manner useful to illustrate the Antiquities of our own Country, and this whole Island, and the adjacent Nations, and several Terms in our antient Laws; as also, the Names of Places, fuch as Cities, Towns, Villages, the Titles of our Nobles and Gentlemen, Rivers, Mountains, Names and Sirnames of Persons, &c.

With all Submiffion to this Honourable Faculty, may it please them to take this into Consideration, and to do therein as they see Cause.

### The ACT of the Honourable Faculty.

Remitted to the Sheriff of Argyle, Mr. John M'Leod, Mr. Kenneth M'Kenzie, to meet with Mr. Malcolme, and confider this Memorial, and report.

## REPORT of Mr. John McLeod Advocate.

In Obedience to a Remit, made by the Dean and Faculty of Advocates, to Mr. Archibald Campbel and me, I have frequently met with Mr. David " Malcolme Minister of the Gospel at Duddingstour, ' separately by myself, and in Presence of the said 'Mr. Archibald Campbel, and of several other Gentle-'men knowing in the Irish Language; and having ' discoursed him upon the Memorial presented to ' the Dean and Faculty, I am humbly of Opinion, 'That as the faid Mr. Malcolme has made a furpriz-'ing Proficiency in the Knowledge of the faid Irish ' and other Languages, as well as in the Histories and Antiquities of our own and foreign Countries, so he has thereby made himself very capable, so far as I can judge, of executing the Plan, and answering the ' Ends and Purposes contained in his Memorial and ' printed Proposals, and of consequence does well merit the Countenance and Affistance of the Faculty,

[ 8 ]

culty, in fuch Manner as they shall judge reasonable to grant the same. In Witness whereof, I have subscribed this Report at Edinburgh the Thirty first Day of July 1733 Years, by IO. M'LEOD.

Edinburgh, 31st July, 1733.

The Dean and Faculty having read the above Report, did recommend it to their Members to encourage the faid Mr. David Malcolme in the Profecution of his Defign,

REPORT of Mr. Archibald Campbell Sheriff

of Argyle.

'IN Obedience to a Remit from the Dean and Faculty of Advocates, to Mr. John M'Leod, Mr. M'Kenzie and me, upon a Memorial of Mr. David Malcolme, I have confidered his Memo-Frial, and frequently conversed with Mr. Malcolme concerning it, and his Proposals with regard to s the antient Language of Scotland, particularly in Presence of Mr. M'Leod, Mr. M'Kenzie, and other curious Gentlemen; and it is my humble Opinion, that Mr. Malcolme has made unexpected Proficiency in the Irish Language, and many ingenious Discoveries, which may in a great Meafure tend to the illustrating the History and Antiquities of Scotland and other Countries, and therefore deserves the Encouragement of the Faculty, in fuch Manner as they shall think proper to give " it.' Signed at Edinburgh this 24th Day of October 1733. Hard 1 200

ARCH. CAMPBELL.

#### No. IV.

A LETTER to the Very Reverend Mr. Alexander Anderson Moderator of the General Assembly
1735.

Reverend Sir.

SINCE the Affemblies of this Church have always had a particular Regard to the Advancement of Religion and Learning, I prefume to offer the following Proposals, to be communicated,

f you think fit.

I have employed some Thoughts about both. I have endeavoured to trace the Latin up to its Foundains, the common Language of the Learned of this and of some other Parts of the World, and in which great Numbers of valuable Books are either originally written, or into which they have come by Translation. Beside these commonly called the Classics, the Civil and Canon Law, the Works of some of the Fathers, most of the Resormers, many Systems of Divinity, Law and Physick, many useful Commentaries on Holy Writ, many good Histories, and other Monuments of Literature, the School Discourses of Professors of Divinity and Philosophy, &c. are in this Lanauage.

I have also endeavoured to follow up to its true Source the Greek Language, which, besides the Advantage of being the Channel in which the inspired Writings of the New Testament are conveyed, comprehends many Pieces of Christian and useful Heathen Learning: Moreover, I have

enquired

[ 10 ]

enquired into the Hebrew and Chaldee Languages in which the Books of the Old Testament were originally written; and I find that these may receive a great deal of Illustration from the ancient Languages of this Island, more especially the ancient Scotch or Irish: And I am willing this Matter

may undergo the strictest Trial,

These same Languages, I humbly conceive, will be found useful to rescue the Antiquities, both Ecclesiastical and Civil, of these Islands from the Fable they are but too much involved in, and to place them in a juster and fuller Light, and to vindicate the Honour of the Assemblies of this Church who in their publick Acts suppose and affert the Antiquity of the Nation, and of the Royal Line particularly the Act of Assembly, August 30. 1639 Sess. 23. and by this Means, I'm consident, the many Cavils against the Honour of the Nation and to the Prejudice of the Church, will be easily answered. I also humbly conceive, that it serve to consist the Accounts which the Holy Scripture give of Things, and to repel the Cavils of Desists.

I will not detain you by enumerating all the Discoveries which have cast up in my Enquiries especially seeing I have given a Hint of many of them in Proposals I printed some Time ago (which are not unknown to several Members of the Venerable Assembly) for publishing an Irish English Dictionary, with the Elements of the Irish, with some Observations on it, to enable to perceive its great Usefulness. This Work was delayed upon Notice, that an English-Irish, and Irish

Englis

chifb Dictionary, had been in the Preis at Paris, ch I thought might afford confiderable Affife; and accordingly I have procured from that the the first Part of that Work, viz. the English-7, which, in the Opinion of severals, may be de helpful to some valuable Purposes.

This Defign will be so far from hindering the ading of the English Language, that, on the trary, in my Way of managing it, it will conrably help to diffuse it, and will be found, contrary unto, but very plainly to fall in the valuable and laudable Designs, and Interest of the Society for propagating Christian orweledge, in several Respects, and (not to menothers) with these in their Records for 1727 are and August, and some other subsequent on the sand Years.

t is hoped, that it will be looked upon as some cuse for giving the Venerable Assembly this buble, that I have not ventured to lay this tter before them till it was examined and apved by two very honourable and learned Socies, viz. first that of the Honourable Noblemen Gentlemen Improvers, as appears by their Act wember 25th 1732, and afterwards by the learned bulty of Advocates, July 31.1733; so that I had use to think, that this Design, if carefully pursued, y be of real Use, and not of mere Curiosity.

Befides, As the Duties of my Station do cerlly restrict me from any Speculation or Study, wever innocent, that is not really in some Sort the Advancement of Religion or true Learning, which always may be made subservient it, so the favourable Judgment of the Venera Affembly, with Respect to this Design, will be be a Comfort and Reward to me, as to w Pains I have already been at, and an Encourage ment and Direction in Time coming.

It is therefore, Sir, my humble Defire, that Venerable Affembly may appoint fome to exam this Defign, and chiefly as to its Usefulness in ill trating the original Languages of Holy Writ; at least, that the Venerable Assembly will pleafed to remit this Matter to their Commission with fuch Instructions and Directions, as to the Wildom shall feem meet.

Edinburgh, May 15. 1735.

I am, &c.

No. V.

REPORT of the Committee of Ministers w understood the Highland Language.

Edinburgh, May 23. 1735. THE Committee appointed this Day by Commission of the General Assembly, hearing the Reverend Mr. David Malcolme Mi ster of the Gospel at Duddingston, upon his Prop fals for printing an Irish-English Dictionary, & did meet, where were present the Reverend I Dai [ 13 ]
Daniel M'Aulay Minister at Bracadale in Skey,
Ar. Æneas Sage at Lochcaron, Mr. Robert Kirk at
Dornock, Mr. John Sutherland at Goldspee, Mr. Daiel Beton at Roshean, Mr. Farquar Beton at Croy,
Ar. John Bayn at Dingwall, Mr. Thomas Inglis at
fullicut, Mr. James Campbell at Kilbranden in
Ar. Daniel Campbell at Mr. Dougal
campbell at Southend in Kintyre, Mr. Dougal Ballanme at Mr. Dougal Stuart at Rosheme Mr. Neil Campbell Principal of the University

Mr. Dougal Stuart at Rotheme at y, Mr. Neil Campbell Principal of the University t Glasgow, Minister of the Gospel; and the said Ir. Daniel M'Aulay being chosen Moderator of ne faid Meeting, Mr. David Malcolme presented nd read his Proposals, concerning his publishing an rish-English and English-Irish Dictionary; and also ave a Specimen of divers Words in different Lanuages, for illustrating thereof, shewing, That the ncient British-Irish has preserved simple Words, which tend to give Light to the Meaning of many Words in the learned Languages, and some of hese spoke in the Indies, particularly in Darien in America; and it appeared to the faid Committee, rom feveral Inflances which were offered and explained before them, with Relation to the Names of Places, Countries, Towns, Mountains, Rivers, Sc. The forefaid Committee having discoursed at ome Length on that Subject, are of Opinion, That he said Mr. David Malcolme has been at great Pains, in reading and collecting Materials for this Work; that the foresaid Dictionaries may be of good Use for promoting of Learning; and thereore that it should be encouraged. This in Name,

and by Appointment of the faid Committee figned by

DANIEL M'AULAY Moderat
NICOL SPENCE Clerk.

COPY of the Report of the Committee of Commission, within the Bounds or Presbytery Edinburgh anent Mr. Malcolme, recorded N vember 14th, 1735.

At Edinburgh, August 27. 173 HE Committee of the Commission wit the Bounds of the Presbytery of Edinburg appointed to meet with Mr. Malcolme, to discour with him upon his Project of illustrating some the learned Languages by the Irish, met with hi and there were present Mr. John Glen Modera of the Presbytery, Principal Smith, Mr. John Scha Mr. John Guthrie, Mr. John Walker, Mr. Geor Lindsay, Mr. Neil M'Vicar, and several oth Members of the Presbytery, before whom t faid Mr. David Malcolme explained the Agreeme and Affinity of feveral Greek Expressions in t New Testament, prescribed to him by the said Cor mittee, with the Irish Language; as also of for of the Words of the American Language, whi are preserved in Wafer's Account of the Ishm of Darien, with the Words of the Irish Langua in Sense and Sound; that he having at a form Meeting with the Committee, when Profess Goudie was present, explained and shewed the A

15 nity of several Hebrew and Greek Words, in Places rescribed to him, with the Irish Language; nd also having show'd to them, that there are seeral Words in the Irish Language that are merely nple, and carry the Derivation higher than the oots of the Hebrew and Greek Language answerg to them; with all which the Committee, acrding to the best of their Understanding, were tisfied. The Committee do, upon the whole, port, That it is their humble Opinion, r. Malcolme has been at great Pains to fearch to the Etymologies of many Words, which are et generally understood, and that the Irish Lanage, to those who throughly understand it, may of Use for the more clear Explication of many ords in the Original Languages, wherein the oly Scriptures are writ; and that therefore his efign deferves to be encouraged by all who are rious in these Matters: As also, the Committee lge themselves obliged in Justice to Mr. Malme, to acquaint the Reverend Commission, that represented to them, that if they would apint some of the Ministers of this Church, whom shall condescend upon, to confer with him upon Defign, which he conceives very proper for adncing the Interests both of Religion and Learng, he would lay before them several Things very nducive to that good End, which he cannot fo nveniently offer to any publick Meeting.

JOHN GLEN Moderator.

#### No. VII.

COPY of a Letter to the Very Reverend Mr Lauchlan M'Intosh, Moderator to the Genera Assembly 1736.

Very Reverend Sir,

TT is not unknown to you, and many Member of this Venerable Affembly, that there wer fome Reports given in to the Commission of th last Assembly by some Committees, appointed by them to converse with me about the Advance ment and facilitating of Learning and Religion and that befides other Things, they found two of the most improbable Things of my whole Scheme proven; As first, That our ancient Languages illustrate the original Languages of Sacrec Writ, the Import of which I leave to every one who fearches the Scriptures to judge. 2dly, Tha there is an Affinity between these and the Language of the Isthmus of America, which is of Use to refute a Cavil of the Deifts against the Scripture Account of Mankind.

These Committees also own, that I had been at great Pains to search into the Knowledge of Things not commonly understood, and that what I pro-

pose deserves Encouragement.

There was also another Committee named to confer further with me about these Things; but the Commission did not overtake their Report. May it therefore please this Venerable Assembly, o remit this Affair to their Commission, with uch Directions and Powers, as to their Wissom hall seem meet.

I am, Sir,

with great Respect,

Your affectionate Brother,

and humble Servant,

uddingston, May 15.

DAVID MALCOLME.

#### No. VIII.

OPY of a second Letter to Mr. MacIntosh Moderator of the General Assembly of the Church of Scotland, 1736.

## Very Reverend,

T is not unknown to you, that the Assembly 1735, appointed some Committees of the fitst Persons, to enquire into the Usefulness of the ceient British Languages, particularly to serve the most valuable Purposes of Religion and Learn-

g.
These Committees reported, That they had found
Affinity betwixt these and the Language of Aerica, particularly of its Isthmus, which confirms
e Scripture-scheme, that GOD has made of one

Blood.

Blood all Nations of Men; and answers an Objection of the Deists, so numerous in our Age at Island, and may also be improved as a Help dispel a Cloud that has long hung over a gree Part of Learning. This will, to intelligent Person probably appear the most improbable Part of t

whole I have advanced.

The same Committee also reported, That the had found they were useful to illustrate the learn Languages, and particularly these in which the H ly Scriptures were writ, which all Christians justly highly value; and that not only the Grebut even the Hebrew, which next to what is abow as also the most improbable Part of my Scher

These Ministers from the Highlands, who we present in the Assembly 1736, did also meet we me, and have signified their Opinion in a Let signed by them, that they are of use to clear seven Passages in our History of this Island, and to advant the Knowledge of the learned Languages, as we appear by their Letter itself herewith transmitted.

There was also another Committee appoint to commune further with me, whose Report of never yet taken in, which I now transmit; it signed by the Reverend Mr. Gaudie, Mr. J. Glen, and Mr. Matthew Wood, which were a could have ready Access to; I hope this Revere Commission will have all due Regard to their I port. It is therein mentioned, That I am of Mind, that our ancient Languages illustrate the oriental Tongues that are most studied by the Lead, and amongst others the Arabic.

[ 19 ]

The Arabic is one of the most universal and diffused Languages; it is not only valued by the Mahometans, who possess no small Part of the World, upon a religious Account, but is the Language both of Learning and Trade in the East; besides, of late, the Learned in the West look on it as a very great Help to understand the Hebrew, particularly some Professors in the most noted Protefant Universities now alive. The Reverend Mr. Peter Du Pont, Pastor of the French Church here, who is very justly valued for his great Learning, Integrity, Piety, and other Ministerial Qualities, is the only Person I have met with here who has studied it; I have also transmitted his Judgment on the Head. And if Need were, I could confirm it by the concurring Testimony of another, whom I met with in another Part of this Island, who is a Native of our Highlands, and feems to have made great Proficiency in the Arabic, and declares, that his Mother-tongue was a great Help to him to acquire it.

It is therefore hoped, that this Reverend Commission will give that Encouragement to this Defign, which the Committees jointly recommend; and if they please refer this Matter to a Committee of such to whom I may have the readiest Access.

Edinburgh, Nov. 11.

I am,
Very Reverend,
Your very affectionate
Brother, and very
bumble Servant,
DAVID MALCOLME.

#### No. IX.

LETTER to Mr. Handisyde, Secretary to the Society of Improvers.
Sir.

AST Time I had the Honour of being prefent at a Meeting of the Society, it was a pleasure to see there some Gentlemen, who understand our antient Language, which encouraged me to say some Things at that Time, in relation to my Proposals; for tho' any Person, even these who are unacquainted with it, if they will be at the pains to look to the Words in the Dictionaries, may perceive its Usefulness, in illustrating Antiquities and Languages; yet Mr. Lloyd's Book being a Folio, it can't easily be carried about; and I still think it an Advantage to have Gentlemen in Company who have Knowledge of that Language, especially Persons of Learning, Sense and Honour.

I acquainted the Society at that Time, that not long after I printed the Proposals, a Letter came from Paris, signifying, that there had been in the Press there a Dictionary English-Irish, and Irish-English; by an Irishman, in 4to, in Two Volumes. I made no doubt but such a Work would contain many Things in it, by which mine might be made more valuable and useful. I have done what I could, both by my self and Acquaintances, to procure that Book; and after all, I have only got the first Part of it, to wit, the English-Irish, sent from Paris some Months ago, but had not got certain

[ 21 ]

retain Notice whether the other Part, viz. the rish-English, be finished or not. I produced bere the Meeting the first Leaf of that Work, and fered some Thoughts upon it, such as, that the rish Part of it was in the Irish Character, which we now can read; that the Type was larger than needful or usual in Dictionaries, and that it contined many trifling Things in it, which might be langed for Things more useful, besides Desects and Wants which inseparably attend all human erformances, especially the first Attempts, in their inds; and that I conceived a Thing of that Nate might be done to better purpose, and for a sprice.

I also acquainted the Meeting, That the Affair d been before the Honourable and Learned Falty of Advocates, who had appointed some of eir Number, who understood that Language best, d who were moreover Gentlemen of extensive nowledge, to enquire into it, which Gentlemen ve accordingly done it, and made their Report.

But because these Gentlemen had not turned eir Thoughts much to the oriental Languages, which the most antient Parts of divine Revelation were originally writ, and I humbly conceived, at it was also of great Use in illustrating these, d was desirous, that this might be strictly entired into, the last Meeting of the Venerable Assume Trial of it in this, and some other Reacts mentioned in a Letter to their Reverend

Moderator, thought fit to refer it to their Commission.

The Commission made Choice of a Committee of their Number to canvass it, consisting of all the Ministers who understood this Language; as also of the Members from the Universities, and these from the Reverend Presbytery of Edinburgh; and because the Highland Ministers were then upor the Wing to leave the place, they were appointed to meet that very Afternoon, which they did, and made a Minute of what past: The authentick Ex-

tract of which I produced to the Society.

In the short Conversation I had with the High land Ministers, they were convinced, that their Language did ferve to illustrate the several learner Languages, as their Minute bears. And there wa one Thing particularly grateful, that they came to be easily convinced of an Affinity between the ar tient British Languages, and these of some parts of America, particularly that of the Isthmus of Darien as their Minute mentions. This serves some ver valuable purposes, such as to answer a Cavil of th Deifts against the Holy Scriptures, and the Account we have of the Origination of Mankind ther These pretend that the Languages of America have no Affinity to any of the Languages in Europ Aha, or Africa; and then infer, That therefore they must be a quite distinct Race of Mortals, ar not fprung from Adam and Eve. I, on the oth Hand contend, That the three Specimens of the Languages I have feen, have an Affinity to the British Languages, and particularly that of the Ifthmu 23

thmus of Darien, which we have in Wafer's Deription of it. I produced the Book, and spoke

that passage that relates to it.

I also added, That besides an Affinity in the anguage, there was, I humbly conceived, an Afnity in feveral Customs, some of which I mentined, but shall not now detain you, only faying, at the greater the Affinity appears, it more rongly repels the Deists, and confirms the Scripre-account of Things, and moreover paves a Vay to dispel a Cloud that has hung over nigh the hole Body of Learning these many Ages, the lathematicks chiefly excepted.

I ask you pardon that I have been fo long in nding you this, and I beg the favour of you to aw out your Minute as foon as you can. This

om,

Sir,

uddingston, July 24. 1735.

Your very humble Servant,

DAVID MALCOLME.

No. X.

REPORT of the Reverend Mr. John Gaudie Professor of Divinity in the College of Edinburgh, and withal, that of the Reverend Mr. Matthew Wood, and Mr. John Glen, Ministers of the said City.

Edinburgh, May 12. 1736. Have had frequently Conversation with Mr. David Malcolme Minister of the Gospel at Duddinstoun, dinstoun, and he tells me, That the old British Languages tend to illustrate the Hebrew, Syriac, Arabic, and Talmudico-Rabbinic, and have an Affinity with these Chinese Words he has met with: Also, that he has had his Thoughts about severa Things, that tend to facilitate Learning, and make it subservient to Religion. And as for Languages he thinks he could make them more easily acquired, and retained after acquired; and also more exactly understood than hitherto; which Things de serve the Countenance and Encouragement of thi Church.

John Gaudie

I do agree with what is above attested.

John Glen.

I do agree with the above Attestation.

MATTHEW WOOD

A LETTER from the Reverend Mr. John Mac-Innes, Mr. John Beaton, Mr. Æneas MacAulay, Mr. John MacPherson, with the Concurrence of the Reverend Mr. Walter Ross, Ministers in the Highlands of Scotland, to Mr. Malcolme.

R. D. B.

Edinburgh, June 1.

2 1 2736, 11 1.

A Fter our late Conversation with you, upon the Subject of your laudable Undertaking, of publishing an Irish Dictionary, and having confidered the several useful Discoveries you propose to make by that Work, we could not but by these Presents signify to you our Approbation of your Design, as judging it may contribute for clearing several Passages relating to the History of our Island, and for advancing the Knowledge of the learned Languages, heartily wishing that you, and all generous Undertakers in the Cause of Learning and Religion, may meet with all due Encouragement. We are,

R. D. B.

Your most affectionate Brethren, and very humble Servants,

John MacInnes.
John Beaton.
Æneas Macaulay.
John Macpherson.

I alfo

[ 26 ]

I also approve and recommend in the Terms of the above Letter.

WALTER Ross.

## No. XIII.

A second, or further, or additional REPORT from the Reverend Mr. Matthew Wood, and Mr. John Glen Ministers of Edinburgh.

E Undersubscribers, Members of the Committee, to whom the Affair of Mr. Malcolme was referred, do testify, that we have conversed several Times with him, and from our Knowledge of him, and what we have heard formerly from him, and from some later Conversations we have had with him, are of Opinion, That from what he promises to us, he appears capable of making the learning and retaining of Languages more easy, and likewise better understood.

We also are convinced, That besides the great Pains he has been at, the pursuing of this Design must necessarily have led him into much Expences and Charges, and the carrying it on will necessarily lead him into more; and the Tendency of the Whole being the facilitating and advancing Learning and Religion, and for the publick Good of Mankind, we would therefore most humbly propose to the Reverend Commission, that Mr. Malcolme might be supported and encouraged in his Undertaking, in such a Way as to them might appear most proper, since it is plain he will not be

able to carry on his laudable Defigns, unless e Church would be pleased to give him their listance.

JOHN GLEN.
MATTHEW WOOD.

#### No. XIV.

he TESTIMONY of the Reverend Mr. George Anderson in his Reinforcement of Reasons, proving the Stage an Unchristian Diversion, Page 50, 51.

A ND tho' you think, and feem to be positive, that Aristotle's Authority in the Case is of once Weight than an hundred modern Lexicopaphers, I, on the other Hand, am of Opinion, that the Moderns are much better Etymologists and the Ancients; and my ingenious Friend the everend Mr. David Malcolme a Minister of the resbytery of Edinburgh, knows more of the Origine of the Greek and Latin Languages than the Greeks and Romans themselves.

And Page 68, &c. I do think, Sir, that of all the Greek Derivations of the Word, you have chosen the worst, when you make Tragedy signify a Song of a Goat: For when Æschylus had introduced that pompous Sort of dramatical Entertainment upon the Athenian Theater, the People used to say, what Business had Bacchus with this? I can no more believe that Tragedy did originally signify a Song of a Goat, than that it signifies a Tale

[ 28 ]

Tale of a Tub; or that Comedy fignifies a Song of Village, than that it fignifies a Story of a Cock an a Bull. In this I give Mr. Malcolme Credit, wh makes Tragedy in the old Celtick Language, fignifia Song of Sorrow, and Comedy antithetically confidered, must fignify a Song of Mirth. If you winot take this upon my Word, you may conveniently enough converse with the Gentleman him felf, who can satisfy you as to this Particular And likewise in thousands of Instances can shew that there is a surprising Affinity betwixt the Celticand the Greek, and many other Languages.

Ten

( | 32

Ten of the Clock Forenoon, except when it falls to be on Friday or Saturday, and then the Meeting is to be on Monday next thereafter, with Power to adjourn themselves to such Times and Places as they shall find needful, and to keep a Correspondence with the Commission of this Assembly, and Society for propagating Christian Knowledge, and their Committee. And the General Assembly do hereby nominate and appoint Mr. William Grant Advocate, Procurator for the Church, to be Receiver of the foresaid Royal Bounty, and to pay out the same as he shall be directed and ordered by the foresaid Committee, and according to their Rules.

A LETTER to Archimedes the old Caledonian, the first Mathematician of the Age, about the remote Antiquities of Great Britain.

SIR,

OU were pleased, the other Day, to desire me to put in Writing some Things which you have heard me say about the remote Antiquities of the British Isles, and the Reasons I had for them. — In obedience to you— You'll please to remember, that I acknowledged I was of the Mind, that these listes received their first Inhabitants from the nighest Parts of the Main-land, accordingly, as these changed their Masters, so we received different Colonies from them.

It must be owned, that the remote Antiquities of most Nations are very much over-run with Fable. This is not to be wondred at in these Historians who wanted the Light of Revelation, but even these, who have had that Advantage, seem not to have adverted to some Things, and to have much mistaken some other Things, which might have been no small Helps to them in these Matters. The ordinary Bounds of a Letter will not allow me to enlarge upon these Things, which yet otherwise would throw Light into what I am to offer: I shall therefore wave these, and mention some Things which seem to me to assist us in tracing out our highest Antiquities; and first, I think,

it is not amiss to mind you of an Advice given by the illustrious Leibnitz in this Affair, as to Enquiries of this Nature, in his Collectan. Etymol. Vol. 1. p. 153. in these Words, Denique ad persiciendam, vel certè valdè promovendam, literaturam Celticam, diligentius lingua Hibernica studium adjungendum censeo, ut Lhuydius egregiè facere capit.—Ex Hibernicis, vetustiorum adhuc Celtarum Germanorumve, & ut generaliter dicam, accolarum oceani Britannici Cis-

marinorum antiquitates illustranturs

Et si ultra Hiberniam esset aliqua Insula Celtici sermonis, ejus filo in multo adhuc antiquiora duceres mur.—And, p. 147. he declares his own Purpose to apply himself to study that Language, a Dictionary of which was published about that Time in Lhuya's Archeologia Britannica, which he there speaks of. I shall not pretend to enter into the Spirit of this great Man's Reasoning in this Place; but only add, That he seems to have thought, that, by this Advice, he surnished us with a Clew to guide us in our Researches into manifold Antiquities.

As to these of our Isles, I know of no great Helps from the antient Greek Authors, their Knowledge of them seemed chiefly to flow, partly from the Phanicians and Carthaginians, partly from their own Colonies at Marseilles, both which considered these Isles chiefly in the Way of Trade; but, as far as I know, have not transmitted any Accounts about our various Colonies, nor pretend to have lest any great Numbers of their own Countrymen here; yet some Use may be made of the very Names they give to this Isle, which I may, perhaps, essewhere take notice of to be Isis rather than Welsh.

As to Roman Authors, Cafar feems to be the ancientest who has lest us any satisfying Accounts either

either of Gaule or Britain, He came hither to conquer and reduce the Isle to be a Province of the Empire, and has left us some Accounts, which seem to contain the best Scheme of our remote Antiquities, if they be carefully compared together.

To this Purpose it may be fit to consider what we meet with in his Comm. de bello Gall. Book 2. Ch. 4. where, speaking of the Inhabitants of the Gallia Belgica, or that Part of the Main-land nighest this Isle, he tells us, " That he had got this Information from the Rhemi, who bordered on the Belgæ, and were themselves Gauls or Celts, that the most of the Belgæ were descended from Germans, who had been of old brought over the Rhine, and had fettled themselves there, being induced to it by the Fruitfulness of the Soil, and had expelled the Gauls who inhabited there ' before." Plerosque Belgas esse ortos à Germanis, Rhenumque antiquitus transductos, propter loci fertiliatem ibi consedisse, Gallosque qui ea loca incolerent, xpulisse.

These Words plainly suppose, That that Country was inhabited by Gauls before the Belgæ came nto it, who expelled them; so that these Gauls and Opportunity to have sent Colonies into Britain before the Belgæ came among them; and seeing hese Belgæ expelled them, it is highly probable hat Numbers of them retreated into Britain, which was so night them, and where they might be safe or some Time from such troublesome Neighbours: But we shall find, that in process of Time, when hey themselves multiplied, they also made their nvasions upon this sile, and got, by Degrees, Footing in it; so that there came to be then two Kinds of People here, and this was the State in which

A 2 Casar

Cæsar found this Isle when he came into it. Thus

he lays, lib. 5. cap. 12 & 14.

Britannia pars interior ab iis incolitur, quos natos in insula ipsa memoria proditum dicunt: maritima pars ab iis, qui, prædæ ac belli inferendi causa, ex Belgio transierant: qui omnes ferè iis nominibus civitatum appellantur, quibus orti ex civitatibus eò pervenerunt, & bello illato ibi remanserunt, atque agros colere caperunt. Hominum est infinita multitudo, creberrimaque adificia ferè Gallicis confimilia: pecoris magnus numerus.—Nascitur ibi plumbum album in mediterraneis regionibus, &3c. It will not be amiss to consider also what we have, c. 14. Ex his omnibus longe funt humanissimi, qui Cantium incolunt : que regio est maritima omnis, neque multum à Gallica different consuetudine. Interiores plerique frumenta non serunt, sed latte & carne vivunt: pellibusque sunt vestiti. Omnes verd se Britanni vitro inficiunt, &c.

These Places speak plainly of two Sorts of People here, the one whom they fancied to be indigenæ, or nati in ipsa insula, as knowing no better, but could be no other than the Progeny of those who had come over so anciently, that they had no Tradition of it; the other was of these who had come over afterwards, prædæ aut belli inserendi caufa, &c. The first were the Descendents of the Inhabitants of Belgium, when posses by ancient Gauls, the second came from the same Country afterwards when posses by these German Belgæ, who had mostly expelled these ancient Gauls; the one the Ancesfors of the ancient Scots; the other of the Wells;

as I hope afterwards to show.

All this is both confirmed and illustrated from that Passage of Tacitus, in his Life of Agricola, In universum tomen assimanti, Gallos vicinum solum occu-

passe, credibile est. Eorum sacra deprehendas, superstitionum persuasione. Sermo haud multum diversus.—These Things compared with some other Things, will help us in our Enquiries into our Antiquities, and this Passage of Tacitus might be improved to confirm the Distinction betwixt the old Gauls and the German Gauls; to account for the Reason why many came from Gaul to Britain, to learn the Discipline of the Druids: But I must keep within the Bounds of a Letter.

You will probably enquire, whether the Language of the ancient *Gauls* was the fame with that of the ancient *Scots*? Whether their Customs were

the same? To which I answer,

1 ft, We shall find that the Language of the ancient Gauls, as distinct from the Belga, who were comparatively but new Incomers, was the fame (allowing for Distance of Time) with that of the ancient Scots. This appears in the Vergobretus of the Edui, the Vertifcus of the Remi, the Cingetorix of the Treviri, the Vercingetorix of the Arverni, who were all noted Gallick Nations, and in very many other proper Names of Persons and Places. Vergobreathus was the chief Judge of the Hedui, who had the potestas vitæ & necis. The Irish have Fear go breath, the Man of the Judgment; which is as near as their Letters will allow, for they want v Consonant. The Wellh have nothing nearer in that Sense, than Gur am brauth. Permit me to subjoin the Note which Godwin gives, who comments on this in usum Delphini, which is, Hodie magistratus Augustoduni, quod Heduorum est Caput, & in biennium eligitur, Vierg dicitur; quo nomine in tota Gallia nullus alius insignitur, ut antiqui nominis media pars remanfiffe videatur. Let this be a Sample of the rest. I could could confirm this by showing, that the Names of every Thing that is great in Gaule, such as their capital Rivers, these of their great Mountains, that I have considered, are mostly Irish, and not always

Wellh.

As a further Proof that the ancient Gauls peopled first all Britain in some Measure, before the German Gauls came over, (whom I consider as the Ancestors of the Welsh) the Names of every Thing that is great, almost from Kent to St. Kilda, is Irish, and the Welsh are frequently at a Loss to explain them. Kent or Cantium is the Irish Ceann, a Head being a Head-land, as Casar calls it, a Welshman would call it Pen; as in Penzanz in Cornwall, and Pembroke in Wales; the first means caput or Promontorium Sanstorum, the other caput terræ or resi-

onis, in their Language.

Mr. Edward Lbuyd, the Author of the Archaologia Britannica, tho' a Welfbman himself, yet owns this fairly and fully, that the Wellh are at most but a secondary Colony of this Island, and that the Ancestors of the Scots were their Predecessors even in South Britain. This he did first, in a Letter to the Wellh in their own Language, prefix'd to the Archæologia Britannica, but fince english'd and printed at the End of Bishop Nicolson's Irish historical Library, and gives Reasons for it, which I do not hear any Person has attempted to answer. Mr. Thomas Innes indeed, in his Critical Esfay, gives us another Scheme of our Antiquities, but never offers to answer Mr. Lbuyd's Arguments, even tho' he feems to have read that Letter. The faid Mr. Lbuyd owns the fame Thing in his Adversaria postbuma, de fluviorum, montium, urbium, &c. in Britannia nominibus, vid. p. 264, 265, 273. In the 264

(7)

de owns that the Rivers in South Britain named Asc, Isc, Ose, Usc, and varied by the Moderns into Ax, Ex, Ox, Ux, are nothing else at the Bottom, out the Highland or Irish Uisge or East, Water. The ame Thing is owned also in Bishop Nicolson's Scots Historical Library, and in William Baxter's Glossarium Antiquitatum Britannicarum, in more Places han one; and I remember, in another Place Lbuyd owns, That it was not a Word in any Dialect of he Well in that Sense. And p. 273, we have these Words, Ex fluviorum nominibus apud Cambro-Briannos, quedam sunt ipsis indigenis non intellecta, ut Havren, Sabrina, Dyvi, Toui, Tav, & plerague maorum fluminum nomina. Alia lingue Britannice perits acile interpretantur: Now our Highland Language specially explains the Names of every Thing that s great, particularly their great Rivers, as Sabrima, now the Severn, this fignifies a strong Sea, ab in Irish, as Lhuyd has it, is strong; Rian is one of the Words in his Dictionary, fignifying the Sea r Saobh is raging, furious, mad; Rian the Sea; ow well this agrees to the Severn, is known to hese who have either read of its Nature, or seen for the Space of one Day. Cambden mentions its aily Rage in his Account of it. Tamesis or Tamis, as to its later Part is Iss, the same with Uise r Ease, Water; Tam, the first Part of it, may, in ffect, be the same with Tamb, still, quiet, for which Qualities that River is remarkable; or if we shall educe it from Tame, the Name of another River, buyd has Taom in his Appendix for Ooze, which, t the Bottom, is but the same with Usge, Water; or I have long ago observed, that they have may Words which feem primarily to have fignified Fluid or Liquid, which, in time, they came to

appropriate some to one Sort of Fluids, some to a nother; such as to a Fountain, a River, the Sea, &c.

Ouse is the Name of the River that runs through York, and of many others in England, which I have partly feen; this fignifies nothing at all in Welfh, but is very obviously the same with Uisge, Water in Irifb, I shall not trouble you with more Instances of this Kind in this Letter. I shall now endeavour to reconcile this with the common Opinion, that our Ancestors came from Ireland, and that under Fergus our first King. I shall also ofter you some few Thoughts about the Picts, who made so great a Figure in this Isle pretty early. As to the first, as far as I remember, our Historians say, that the Scots. our Ancestors, were in Britain before Fergus I. but pretend they were not united under one fovereign Prince, but lived under different Chiftains, and being much vexed with fome neighbouring Nations. particularly the Britons or Welfb, they called over Fergus an Irish Prince to their Help; who did them fo many good Offices, that they chose him for their King. There is nothing in this inconfistent with the above Scheme. The first Colonies that came into this Isle, and which, I suppose, did in Time, people Ireland also, might multiply so much there, especially if they were strengthned by fome People that came to that Isle from other Places, as the Story of the Milesian Golony seems to infinuate, that they might be in a Capacity to fupport their Kinsmen here when distressed, and they again might stand in need of them, and call for their Help, which might occasion Fergus to come over to aid them, and them to requite him as they did And this might give the Rife to After-authors, who had had heard it, to fay that the Ancestors of the Scots

came first from Ireland.

We have an Instance of a like Mistake in some Roman and Greek Pagan Authors, in their Accounts of the Israelites or Jews. They generally speak of them as Egyptians originally; coming from that Country under Moses; whereas the divine Writings assure us they were originally from Chaldea; and were seated in Palestine for some time, from whence they went to Egypt, and, after some Stay there, were conducted back to Canaan by Moses and Joshua. These Pagan Authors had heard this later Part of their Story, but not the former, which made them write, that they were originally Egyptians, and added some other sabulous Things about them.

This Mistake about the Scots coming first from Ireland; might be confirmed from the Meaning of the Word Hibernia, which, in Wellb, feems to fignify a high or upper Country. The Romans converfing most with these who were their Provincials received that and some other Names from them. The Wellh feem to have primarily meant by Hibers nia; the Highlands in this greater Isle, and, when they learned that a Kindred-people inhabited the other Isles, particularly Ireland, they extended it to fignify that also: So that when some Authors came to speak of the Scoti coming ex Hibernia, and meant nothing but their own Highlands, some mistook, as if they ftill meant their coming from that Isle, which we now call fo. This, I believe, will account for some Passages in Bede and others.

As to the Pilts, from a Word of their Language mentioned by Bede, not far from the Beginning of his History, and from the Names of some Places

In the East-coast, especially of this Isle, I conceive their Language was more a-kin to the Welfb than the Irifb; and, from their penetrating so very far along the East-coast, I should guess they were among the foremost Tribes of the secondary Colonies, and so were here before Casar's Time. Since his Time we have more Assistance to the Knowledge of our Assairs, from the Roman and some Greek Authors which write of them. I shall not now dip into these, but beg leave to add, that I am,

SIR,

Your very humble,

and much obliged Servant,

à

ngigo ngigo

To the Right Honourable, &c.

My Lord,

A RCHIMEDES the old Caledonian, is a Person, for whom, I know, your Lordship has a great Esteem, as, indeed, all others who know him have. I both esteem and love him. He was ever ready to oblige me. I could not resust to give him in Writing, what I used to say to him and others, about the remote Antiquities of Great Britain, or the various Colonies that came to it be-

fore Julius Cafar and the Romans.

He did not keep it a Secret, he imparted it to some, and I have received Thanks from several Persons of distinguish'd Merit in their Way, and to whom I have been much bound, and I was told some Persons of Note were pleased to like it. Archimedes himself seems to be taken with the Love of Antiquity, to that Degree, that if he goes on as he has begun, he will be one of the foremost Antiquaries of the Age, as he is already, by some of the best Judges I know, reputed the first Machematician. He is now more and more sensible of an Advantage he had by his Birth that Way, and, without Doubt, he will go on to cultivate and improve it,

B 2

Some Acquaintances here defired to fee the fame Things in Print; among these is a very worthy Person, for whom, and his honourable Family, I have a very particular Deference, as having a great Friendship to all in whom I am nearly concerned, and being very remarkably ingenious. The Commission of the last General Assembly did also recommend the publishing a Specimen of the Usefulness of our ancient Languages, and allowed some Encouragement for it. Upon all these Considerations, I have, at last, resolved to let some few

Things go to the Press.

I may, perhaps, at another Time, confider the Neglect and Contempt with which these Languages are treated; in the mean Time I cannot but acknowledge, that I am of the Mind, that they are not altogether without their Use. I do not now meddle with them as living Languages, I may perhaps declare my Sentiments of them in that Respect afterwards; but, I hope, all or most will agree with me, that all the Books in that Language ought not to be destroyed, and, particularly, that the Bibles, Catechisms, Psalters, &c. ought not to be burnt; that those who find them necessary or beneficial, may be allowed to use them. I have both in Print, and upon all proper Occasions, declared, that I thought them useful for many valuable Purposes, none of which I see Reason to retract, and am willing to fubmit the most improbable to strict Examination.

The Letter to Archimedes contains several Hints which the ordinary Limits of a Thing of that Nature would not allow to be pursued at that Time and which, perhaps, it may not be fit to expand the work upon. There are not a few, who, very pro-

bably:

bably, may fay, supposing that Scheme of our Anriquities to be true which is there offered, what follows from it? Of what Use is it? I shall not answer this at this Time so fully as might be; I doubt not but all Lovers of Truth and Light, especially all impartial Lovers of Antiquity, will

have a Value for it.

But there is one Use of it, which I sometimes mentioned to your Lordship, and which your Lordship thought by no Means to be despised, but rather of very confiderable Importance, which is, That from this Scheme we may inter, that our old Language must be one of the Fountains of our now Mother-tongue, which is commonly spoken in many of the British Dominions, and covered by not a few Strangers of feveral Professions, both for Conversation with the Living and Dead; I mean, for understanding many excellent Books on all Subjects written therein. It is a Pity that this has been overlooked by all those who have written Dictionaries of this Language, some of which are both laborious, and otherwise learned, such as Skinner, Bailey, &c.

I gave your Lordships some Instances of this by Word, and a few by Writ, which yet I could place in a clearer and fuller Light than I did; I found that short Hints were better to your Lordship, than long Discourses with some others. A more thorough Understanding of our Mothertongue, I am persuaded, would be of very great Use, especially to these whose Business it is to explain Laws, whether divine or human, yea, or to

understand them to Purpose.

Some learned Gentlemen were appointed by the Honourable, the Dean and Faculty of Advocates,

to converse with me about our old Language. These took particular Care to propose some Terms, not only out of our own Municipal, but also out of the Civil Law. Their Judgment and Report I have caused print in a Collection of Papers, &c. p. 7, 8.

It is our great Advantage that we have the holy Scriptures in our Mother-tongue. This should be no small Argument with us, to endeavour to understand it more thoroughly than commonly we do, especially seeing it must be acknowledged, that very many are entire Strangers to some of the original Languages; yea, it must be owned, that what Knowledge we have had of them, is exceedingly imperfect; and that a right Understanding of our own ancient Language, would be a great Help in this, is acknowledged by Committees appointed by the Commission of the General Assembly, as is to be seen in the foresaid Collect. p. 14, 15, 8c.

It would be too long a Digression from the prefent Purpole, if I should explain my self at large about the Hebrew and Chaldee Languages: In themfelves they are exceedingly valuable, and they are the Channels by which the most ancient Pieces of divine Revelation are conveyed to us; but I may, perhaps, shew in another Place, that the Fews and Arabians, and the other oriental Grammarians, Dictionary-makers and Criticks, many of which have been Infidels, have very widely mistaken the right Way of treating these Languages, But this I must

not now dwell upon.

That Scheme of our Antiquities, which, I hope, I have in part already proved, and which I resolve afterwards to confirm, shows us very plainly, how far Men, most highly esteemed for Religion and

Learning,

Learning, may wander from the Truth; I mean, fuch as will not allow the Scots to have been in Britain before the Time of Fergus II. whereas, from what is above, we may fee, that their Ancestors were the very first who came to the South Parts of this Isle, from the neighbouring Gaul; and from whence they spread themselves through the Whole. Yet so very great Men, as Ulber, Camden, Stilling steet, Bishop Lhuyd, and almost all the English and Welfb, and Irish since the Conquest, are gone into this common Error, and, of late, our Country-man Mr. Thomas Innes seems rather to have made Things worse than better.

I am afraid that this is much owing, partly to national Emulation, partly to an Attachment to ome favorite Hypothesis, either in political or ecdefiatical Assairs; both the one and the other are

he Sources of many Mistakes.

Allow me to add, that a very learned and knowing Gentleman of my Acquaintance, is of the Opinion, that this Scheme is a great Argument against the Eternity of the World, and a Confirmation of that Account of Things which we have in

he holy Scriptures.

For if all the Colonies that came to this Isle beore Julius Casar's Time, may be classed under two
seeds, to wit, that of the ancient Gauls and the
selgick Gauls, it is a very great Proof, that the
World is not so exceeding old as some modern Indels pretend to believe, and far less can it be from
It Eternity. A Succession of innumerable Ages
would, no doubt, have brought about far more
changes in it. Now there is nothing in this Isle
which may not be accounted for by the foregoing
whene. The Irish explains every Thing that is
greatest,

greatest, and that, with the Welfb, those Things which are next to them. Yea, if the Laws of Nature, and the ordinary Course of Things be diligently attended to, we'll find it a great Confirmation of that Account of Things which we have in holy Writ I am hopeful, that ingenious Gentlemen, who are neither blinded with Prejudice, nor corrupted with Vice, will improve this Hint; for I know I need not enlarge upon it to your Lordship; and, I hope others will excuse me, if I now and then show how this Scheme is subservient to Religion, the most important, as well as the most excellent Thing in the World; and I acknowledge, that this i what I defire to have always in view, I mean, th Religion recommended in the Old and New Te staments. It is to me a very great Instance of th Corruption of the Age, that there should be so ve ry great Numbers of Perfons, especially in this Isle, which have enjoyed Advantages beyond most if not all Places of the World, so very insensible of their great Bleffings, and so unthankful for then as to disbelieve the divine Authority of the Ol and New Testaments, and to have Regard to th meerest Fables.

I hope it will be found some Service to Religion, to confirm these who are well disposed, in the Faith in its great Truths, and to answer the Cavils of its Enemies, especially those which cannot in the Nature of the Thing, be answered fully any other Way, as far as I see, than in the Way am now taking; for I own, I have especially in m View to answer that Objection against revealed Resigion, which is taken from the Americans, and their Language, and I shall endeavour to managother Things, so as, besides other valuable Purpo

fes, to make them subservient to that also; and that the rather, that I have not met with, nor heard, nor read, of any other Person who professes to be able to do this to any good Purpose, tho I have been very willing to satisfy any well disposed Person at

all Times upon this Head.

To pave the Way then to these Things, and withal to confirm all that is already said, let us remember what is lately told, to wit, that the Names of the greatest Things in South Britain are Celtick, or ancient Scottish or Irish, even in these Places where it is confessed the secondary Colonies did in time come, and seat themselves; for Example, Cumberland, which seems plainly to take its Name from the Cumri, the Name which the Welsh take to themselves.

In that County the highest Mountain is called Skiddaw, and the greatest River Darin or Darean, or, as they commonly write it, Derwent or Darwent. It receives a good many Rivers, and falls into the Sea at Wirckington. Its Course is not far from Skiddaw, and there is a great Collection of Waters there, which Bede calls stagnum pragrande. There is a vulgar Rhime also through England, and to be found in Cambden, Raie, and some others,

Skiddaw, Lauvellin, and Castigand, Are the highest Hills in all England.

At the Foot of this Hill is a Town named Keffwirk, famous for a Sort of black Lead found there, and, perhaps, no where else in the World. Now these Names are all Celtick or Irish, and, for ought I know, none of them Welsh.

Skiddaw is Se cead a, the first Mountain; se is the,

the, cead, first, and a, a Mountain. Darin or Darin, or Darean, as I heard the neighbouring Inhabitants always sound it, the great Water, Derwent is the same; dear is great, and ean, Water, and inn is a Wave, as is also bane; which seems to account for the other Way of writing it, to wit, Derbhene or Derwent. The Town at the Foot of the great Hill which is called Kesswick, as the English write it, seems plainly to be Casaigh; cas is, in the Albanian or Scottish Dialect, the Foot, and aigh, a Hill. None of these are accountable out of the Wess, as far as I know.

I particularly take notice of Darin or Darn, or Derwent-water, because we shall find a great River of the same Name in the Ishmus of America. I hope also to show a very great Affinity betwixt the Languages of Old Caledonia in Britain, and New Caledonia in that Country, and illustrate the Names of some other Rivers there, and explain the Names of some of the other Productions of that Country. But Ireland is in the Way to it, and

claims to be confidered. I am,

My Lord,

Your Lordship's most humble,

and much obliged Servant,

C.

To

# 

To the Right Honourable, &c.

My Lord,

RELAND, and the Irish Language, have been now frequently mentioned; it makes no mall Figure in History. It is not farther from Freat Britain, than Britain is from France; and ext to it is perhaps the most remarkable Island in his Part of the World. It has been already hintd, That, very probably, it received its first Inhaitants from Great Britain, and it is now subject to he same Crown. It may not be amiss to enquire lto into its Antiquities, especially seeing this will ead to some Things, which, I hope, will confirm he above Scheme in relation to Great Britain; as, gain, what is faid of Great Britain, will render that is to be faid of Ireland more probable, and elp to rescue its Antiquities from these unaccountble Fables in which they have been so much inolved.

To this End it will not be amiss to consider the reftimony of the illustrious Leibnitz a second rime, and in its full Length. In the Letter to Arbimedes, I had chiefly in view the Antiquities of the greater Island, and the Usefulness of the Irish anguage, in order to illustrate them, and cited

2

ng

no more than I thought needful to these Purposes. I was writing to a learned Person; he had defired me, and I had very great Reasons to obey him. I did not translate the Latin Passages, nor did I defign it for the Press; but, for the Reasons I have now hinted, I have, at last, given way to it; and, because there may be some desirous to know the Antiquities of their own Country, to whom the learned Languages may not be so easy or so familiar, I shall endeavour to give, at least, the Substance of many of them in time to come in our vulgar Language. I must beg the Favour of the Reader to excuse the Language, if it be not according to the Phraseology of the Southern Part of the Island; this I have not yet studied, tho' I have been at some Pains to consider the single

I shall also delay, as much as I can, the bringing in the Peculiarities of the Irifh Tongue, very few understand many of their Words, and not a few of these Gentlemen, who are born in these Places where our old Languages are vulgarly spoken, profess themselves no Criticks in them, tho' they be very well acquainted with the English and other Languages. I hope to show, that our old Languages are very great Helps to understand the modern and other Languages, more throughly than they have been hitherto.

To return to Leibnitz, his Testimony at full

Length runs thus,

Postremò ad persiciendam, vel certè valdè promovendam, literaturam Celticam, diligentiùs linguæ Hibernicæ studium adjungendum censeo, ut Lbuydius egregiè facere capit. Nam, uti alibi jam admonui, quemadmodum Angli fuere colonia Saxonum, & Britanni emillio missio veterum Celtarum, Gallorum, Cimbrorum; ita Hiberni sunt propago antiquiorum Britanniæ habitatorum, colonis Celticis Cimbricisque nonnullis, &, ut sic dicam, mediis anteriorum. Itaque ut ex Anglicis linguæ veterum Saxonum, & ex Cambricis veterum Gallorum; ita ex Hibernicis vetustiorum adhuc Celtarum Germanorumve, &, ut generaliter dicam, accolarum oceani Britannici Cismarinorum antiquitates illustrantur. Et si ultra Hiberniam esset aliqua insula Celtici sermonis, ejus silo in multò adhuc antiquiora duccremur.

# The Meaning of these Words is in Substance this.

" Lastly, If we would perfect, or at least great-" ly advance the Celtick Learning, I'm of the Opi-" nion, that we must also diligently study the Irish " Language, as Lhuyd has begun to do to excel-" lent Purpose: For as I have elsewhere already " admonished, as the English were a Colony of the " Saxons, and the British did spring from the anci-" ent Celta, Galli and Cimbri, so the Hiberni are the " Offspring of the yet more ancient Inhabitants of " Great Britain, who were there before some of " the Colonies of the Celtæ and Cimbri, viz, thefe " who arrived about the middle Times, between " the first and last; therefore as the History and " Language of the English illustrate the Antiquities and Language of the ancient Saxons, and " these of the Wellh illustrate the Antiquities and " Language of the ancient Gauls, fo these of the " Irish do illustrate the Antiquities of the yet more " ancient Celtæ and Germans, and, that I may com-" prehend all in a few Words, of all these Nati-" ons who live in the Neighbourhood of the Bri" tish Ocean upon the Main-land. And if there were any Island beyond Ireland, where the Coltick Language is in use, by the Help thereof we

6 should be guided, as by a Thread, to the Know-

" ledge of yet far more ancient Things."

I cite the whole Testimony, yet I do not think my self bound to adopt it in all Respects. It is no hard Matter to observe in it a little Byass to his own Country, a Thing very universal, and from which the greatest Men, yea, perhaps the best this World assorbs, are not perfectly free. This, at least, I may safely say, that the greatest of mere Men have distinguished themselves in an extraordinary Manner by their Love to their Country; with

ness Moses and the Apostle Paul.

I desire these Words may be particularly adverted to, viz. Britanni suere emissio veterum Celtarum, Gallorum, Cimbrorum, the Inhabitants of Britam were Colonies of the ancient Celtæ, Galli, Cimbri; as also these, which immediately follow, Hiberni sunt propago antiquiorum Britanniæ babitatorum, colonis Celticis Cimbricisque nonnullis, &, ut sic dicam, mediis anteriorum, the Irish are the Descendents of the more ancient Inhabitants of Britain, even of these who were in that Island before several of the Colonies of the Celtæ and Cimbri came over; or, if I may be allowed so to speak, before some of the middle Colonies arrived there.

The former of these two Expressions, to wit, That the Britans were Colonies of the ancient Celtæ, Galli, Cimbri, seems a plain Consirmation of the Scheme above advanced. I have in part already proved, and am willing surther to prove, that the ancient Scots speak the Language of the most

ancient

ancient Inhabitants of Gaul, which are reckoned to be the People whom Julius Cafar calls Celta.

The latter Sentence, That the Irish are the Descendents of the more ancient Britans, is an additional Confirmation of it; for I have already faid, that the first Colonies which came into the greater Isle, did, in time, people the leffer also, of which

Ireland is by far the chief.

It may not be amiss also to observe, that this Testimony of Leibnitz, is, at least in the main, agreeable to the ordinary Law and Course of Nature, and Affinity in Languages and Customs, and especially to the Situation of the Country, which, confess, has great Weight with me, particularly when I reflect upon the innumerable Missakes

which Authors feem to have fallen into.

There is one Thing I wish were adverted to which is here suggested by Leibnitz, to wit, That Il the Colonies, either of one Kind or another, which came to Britain, did not pass at once, but by Degrees, and at different Times, and in diffeent Bodies. A City is not built in a Day, nor are Nations born at once, far less are such large Counries, as either of the British Isles, filled with Inabitants in an Instant. This is according to the rdinary Law and Course of Things.

That Part of Leibnitz's Testimony which relates

Ireland, is confirmed by the Opinion of a very ngenious Gentleman, to wit, Sir William Petty, tho, in his Political Anatomy of Ireland, has a Pafge much to the same Purpose, it is to be found

"Without Recourse to the Authority of Story, but rather diligently observing the Law and Course of Nature, I conjecture, that whatever is "their first inhabiting of *Ireland*, that the Places near *Carrick-fergus* were first peopled, and tha with those who came from the Parts of *Scotland* opposite thereunto; for that *Ireland* was planted by some Body in *Cæsar*'s Time, is most certain That the Art of Navigation was not so well understood and practised before *Cæsar*'s Time, a to bring a Man from any other Part of the World thither, save from *Great Britain*. Tha

" from St. David's Head in South Wales, and from " Holy Head in North Wales, Ireland is not so " clearly at any Time discerned, nor often at all "That the Inhabitants of these two British Head " lands had neither Boats fit to pass that Sea, i " most probable; but that Carrick-fergus may b " always feen from Scotland, is well known; and "that a small Boat may row over it in three o " four Hours, is experienced. That the Language o " these Parts differ very little, that the Country " about Carrick-fergus is far better than that of " Scotland opposite, that the chief Bishop's Seat is " Ireland, and probably the first, is near thos " Parts, are all notorious Truths. From all which " it is more probable, that Ireland was first people " from Scotland, than all the other remote Part " afore mentioned." As to this Testimony of this very ingeniou Gentleman, I will not pretend that there is mathe matical Certainty for every Part of it; but the main Thread of his Reasoning seems to carry as mucl Probability, if not moral Certainty, as can be wel expected in a Case of this Nature, and of so remote Antiquity. What he mentions of the chief and first

Bishop's Seat being so near Scotland, wants not it

OWI

own Weight; and it would be a further Corrobofration of it, if that same Place were also found to be the Seat of the chief Druid, before Christianity became the received Religion of that Island. This is what a very knowing and sagacious Gentleman told me once; and one who has a very extensive Knowledge of the World; but he did not at that Time remember his Authority for it. This may be a Subject of Enquiry to the Curious; but we know, that, in other Parts of the World, the Christian Bishops came to value themselves upon the Account of these Places where their Seat was fixed, and according to the Figure they had made in the World

formerly:

But, waving this, the Testimony, in the main, seems to be of great Weight, being founded on a Regard to the Law and Course of Nature, and a diligent Observation thereof, and, consequently, agreeable to Scripture, which, I acknowledge, gives me more Satisfaction, than a great many Authorities from such Authors as are to be got on this Head; yea, I may fay, this is, with me, of more Weight than the Testimonies of these Historians and Geographers, (for these are the proper Authors who treat of fuch Affairs) who make the most shining Figure among the Greeks and Romans, Cæsar himself not excepted, nor Tacitus either. Tho' Can far's Authority goes far with many, and perhaps not without Reason in this Case, he affected Glory, not only from his Conquests, but from his Writings. Dez Prez, the Author of the Notes on Horace in usum Delphini, begins his Dedication thus, Ensem dextra, læva librum tenens Julius ille Divus quondam in numismate voluit effingi, cum hac epigraphe, Ex utroque Cæsar. " Julius Cæsar ordered his Essigies to be

"ftemped on a Coin, holding a Sword in his right Hand, and a Book in his left, with an Inseription that imported, He was Casar both by the one

" and the other."

My Lord, permit me to compare this to that Syftem of the World, which ingenious Men for the most Part now admit, and these other Schemes which passed current in some former Ages. In the one, Things are plain and uniform and regular, without the Entanglements of Epicycles, far less Epicycles upon Epicycles, as in the System of Ptolomy, at least commonly so called, or of Tycho Brahe. Nature commonly acts very simply, and goes on very directly, and plainly, and uprightly, whereas Art and Design has Recourse to Windings, Turnings, Disguise and Fable.

At the same time, it is not inconsistent with Sir William's Reasoning, to allow that People might pass over from some other Places of this Island, than that which was precisely the very nearest of all; which Place I will not take upon me to determine, tho' I have seen both; but the Interval of Time betwixt was so great, that I might mistake if I told my Thoughts; but I am periwaded the Odds is not very great betwixt the Distance from Portpatrick in Galloway, and the Mule of Cantire,

to Ireland.

Tho' what is above faid may, I hope, go very far to fatisfy reasonable Persons, about the first Way and Manner of the peopling of these British Islands; yet, I believe, it will be acknowledged, that it would be an Addition to this Evidence, if Great Britain was once joined to the Continent by an Isthmus, about that Place where now the Lands are most contiguous; concerning which there are Passages

Passages in the Transactions of the Royal Society, which render it highly probable. I shall not now mention the Arguments for it, seeing every curious Person may see them there, or in the Abridgments of them, which have been lately published.

Your Lordship knows well enough, that several Historians and Poets speak of Sicily being thus once oined to Italy, and broken off by a violent Irruption of the Sea; and, as a Confirmation of this, hey alledge that Rhegium in Italy has its Name

rom it, Payroun, frango.

I know not well, whether any of our Historians or Sea-faring Men, have ever alledged, that Ireard may have been of old Time joined to Great Britain; but the Face of Nature in that Part of the Vorld, renders it not altogether improbable. There are very strong Currents now to be met with there, and what these, in the Course of Time, might produce, it is hard to know; especially seeing, on the one Hand, they come from the vast Atlantick of the have happened very amazing Revolutions of old; yea, to this Day, if we may credit some accounts, there are great Changes by Inundations and Earthquakes.

It is obvious to any Person who sails betwixt ne South End of the Isle of Arran, and Plada an djacent Isle, or who shall view the one from the ther, and who shall take notice of the pointing of he Lands on both Isles, and how careful and eact Mariners must be to keep the right Course bewixt the two, when they sail between them, that I ime has been, when these two Isles have been bined, and that the lesser has been Part of the reater, which seems to be signified by the very

D 2 Name

Name Plada; for Bladh in Irish is a Part of a Thing, and bladham is, I break, Plada feeming to be broken off from the greater Isle. Some Things might be added from Lamlash, as also from our northern Coasts.

However, I do not urge these Things. The very Nearness of the Lands, and the Affinity in Language and Customs, both religious and civil, are also great Arguments that Ireland was first peopled from the nearest Parts of Great Britain, as Great Britain was also from the nearest Parts of the Main-land.

The fame Thing, I think, is confirmed from the Accounts which the *Irifb* give of their own Antiquities, which, perhaps, will not be fit now to be spoken of at large, especially seeing it partly depends upon some Knowledge of their Language.

Sir William seems to treat as Fable, what is said of the Phanicians, and Scythians, yea, and Biscayers: this would quite overturn the whole History of the Milesian Colony. I am unwilling now to enter upon a particular Enquiry into these Things. There is, no doubt, exceeding much Fable in the Accounts we have of these, not only as given by the Irish themselves, but even by these who are reputed first-rate Men of Learning in this Part of the World, and Stars of the very first Magnitude in the Commonwealth of Literature; but, at the same time, I acknowledge, that I have not attained fuch a thorough Knowledge of these Matters, as that I can condemn them in the Lump as wholly romantick, or be positive in affirming, that there are no Truths vailed under these Fables.

Allow me to add a Passage out of the English Translation of Mr. Lhuyd's Welsh Presace to his Glosso-

Glossography, or I Vol. of his Archaelegia Britan-

" Nor was it only North Britain that these "Guydbelians have, in the most ancient Times, in-" habited, but also England and Wales, whether " before our Time, or cotemporary with us, or " both, it cannot be determined; but to me it " feems most probable, that they were here before " our coming to the Island, and that our Ance-" flors did, from time to time, force them north-" wards. And that from the Kintire, or Fore-land " of Scotland, where there is but four Leagues of " Sea, and from the Country of Galloway and the "Isle of Man, they passed over into Ireland, as " they have that Way returned backward and for-" ward often fince. Neither was their Progress in-" to this Island out of a more remote Country than " Gaul, now better known by the Names of the " Kingdom of France, the Low-Countries, and Low-" dutch."

Such a Testimony, from a Gentleman of the Welsh Nation, is very much to be regarded. They are the only Rivals to be noticed in this Affair, and they pique themselves upon their being the most ancient Britains. Mr. Lhuyd indeed was a Person of singular Candour.

I protest I have no Prejudice against the Wellh,

but a very great Respect for them.

By Guyabelians Mr. Lhuyd and the Welfh mean, both our Highlanders in Scotland, and the old Natives of Ireland.

Beside these Testimonies of Mr. Edward Lhuyd's cited before, he declares the same Thing in a Letter to Mr. Rowlands, the Author of Mona antiqua restaurata, which may be seen near the End of that

Book,

Book, which any one that pleases may confult; there he acknowledges that there must have been another People in Wales before the Ancestors of the present Welfb, vide Mona antiqua, p. 342. "One "may, from the Names of Places in some Parts of "Wales, gather, that the Irish Nation once inhabited there, particularly in Brecknock-share and Cacremarthen-shire, where the Lakes are called Lhycha, and the high Mountains, Banna, as they commonly are throughout the Highlands of Scotland and Ireland."

These two Shires seem to be about the Middle of Wales, and at the greatest Distance from the Sea and the Severn; so that here we may again apply Casar's Words, "That the interior Parts of the Country were inhabited by the Indigenae, or these who were reputed the old Natives;" much in the same Way and Manner as it has happened in America, where the ancient Inhabitants have retired up the Country, and the European Strangers dwell upon the Sea-coasts, and along the Rivers, I am,

My LORD,

Your Lordship's most bumble,

and much obliged Servant,

AN

# ESSAY

On the Antiquities of

### Great Britain and Ireland:

Wherein they are

Placed in a clearer Light than hitherto.

DESIGNED

As an Introduction to a larger Work, especially an Attempt to shew an Affinity betwirt the Languages, &c. of the ancient Britains, and the Americans of the Ishmus of Darien.

n answer to an Objection against revealed Religion.

Quanta Caledonios attollet gloria campos!

have a great deal more Pleasure in enquiring into the Antiquities and Curiosities of my own Country, than of any other, eswen those of ancient Greece and Rome.

Rep. of Let. Feb. 1728. p. 119.

#### EDINBURGH,

rinted by T. and W. Ruddimans, and fold by Alexander Kincaid Bookfeller. MdccxxxvIII

To Mr.

Et si ultra Hiberniam sit aliqua insula Celtici sermonis, ejus filo in multo adbuc antiquiora duceremur.

SIR,

YOU are the Gentleman in the World of my Acquaintance, to whom I ought to inscribe Acquaintance, to whom I ought to inscribe any Thing that concerns the Island commonly called St. Kilda. I have not the Advantage of beng known to your Chief, who is the Proprietor of t, though I have of a long Time wished for it. That excellent Gentleman Mr. Alexander Macleod Advocate, whom you represent, was, to my certain Knowledge, a great Benefactor to it; he was particularly active in fending a Minister of the Gospel to it, as he was also in promoting the Defigns of the Society for propagating Christian Knowledge, especially in the Highlands and Isles. He was a great Bleffing to this Part of the World while he lived, and, I believe, every Person is convinced that he is now very well succeeded.

He was one of the greatest Masters of our old Language. Affoon as I came to be fenfible of the Usefulness of it, for illustrating the Antiquities and Languages of ancient Italy and Greece, &c. I applied to him chiefly for Advice about Helps to acquire it. He directed me to Lhuyd's Dictionary,

which

which had been all along my chief Affistance in all my Examinations and Enquiries. I remember once I asked him, whether he had observed the Usefulness of our old Language in illustrating some Parts of Learning. He answered, I think, to this Purpose, That it was his Mother-tongue; that he had contented himself with speaking and writing it as he had Occasion, and that he had not turned his Thoughts that Way: But he acknowledged that he believed then that it was useful for all these Purposes I spoke of to him, upon hearing me speak on it.

Sir, you your felf have given so many Testimonies of your Favour and Esteem, and so very far beyond what I deserve, and you have used me upon all Occasions with so much Goodness, that

I have frequently been ashamed of it.

This does not leffen, but rather increases my Obligations to you; no other Way now offers of acknowledging them as much as I can, but directing this to you. I must beg you will accept of it, or, at least, that, to the other Instances of your Goodness, you will add this of forgiving me;

And accept of my good Intentions to serve the Interests of Truth and Goodness, the most impor-

tant and valuable Things in the World.

The Island of St. Kilda is remarkable for many very uncommon Things, which I need not mention at present, and this among others, That it seems to me to have, or at least to have had not long ago, the most ancient Shape of Language in this western Part of the World, and which is of great Use to illustrate many Languages and Antiquities. Their Alphabet was very simple, and

contained but a few Sounds in the Year 1607, at which Time Mr. Martin made his Voyage to it, of which he gives an Account in a printed Treatise: At that Time he tells us, p. 72. the Inhabitants did not pronounce d, g, nor r; which, if true, makes it to agree very much with that of the Chinese, according to an Account which I had from an honourable Gentleman of our Country, who staid sometime at that Court, and who, I hope, is yet alive. He told me, that in China he was called Ca, whereas in Britain he is firnamed Garvan, their Language being Monofyllables; and when they called him Ca loi, they meant by it Lord, or Mr. Garvan; Loi or Lui is one of their Titles of Honour. He told me, they could not, or, at least, did not pronounce Ga, which are the two first Letters of his Name, but by that Sound which is most a-kin to it, Ca, c and g being both palate Letters. He also assured me, that they wanted either d or t, he was not politive which of the two; but I easily found that they had t, as we may see in several of their Words, and particularly in the Name of that Herb which we bring from them, and make so much Use of in this Part of the World, Tea; as also in the Name of the Supreme Being, which, I think, Webb, in his Essay to prove the Language of China the primitive Language, writes Xean tia, out of Texeira a Spanish Author; but, according to Pere du Halde, and the French Way of writing Chinese Words, is written Chan ti, and Tchan ti, which Sounds agree very near, though the Way of writing differ according to the different Genius of the French and Spavilh Languages.

I may very shortly shew, that these Chinese Words

Words are also Caledonian, both in Sound and in Sense, and particularly in the Kilda Dialect. I know there is some Difficulty to reconcile this to the Account which Pere du Halde, in his late History of China, gives us; but I acknowledge that I always did give Credit to what Mr. Garvan said of this Matter, and I see not sufficient Reason to alter my Judgment about it as yet; and perhaps some Things might be offered to bring these seemingly different Accounts nearer to one another, but I do not now dwell upon these Things.

If it be so then, that the Sounds, or, if we may call it so, the Alphabet, or Letters used by so very far distant Countries, as China and St. Kilda, come so near to one another, though the one be among the remotest Places toward the East, and the other toward the Northwest, in the old World, and before the Discovery of America; and if it be true, that the Alphabets, or Letters of both are so sew and simple; then we see one Reason to incline us to believe, that the simplest Shape of Language may be sound in the remotest Places from the Center of the Dispersion of Mankind, and perhaps not in that Center itself.

I know I may be charged with Impropriety of. Speech in mentioning the Alphabet of the Chinese, or perhaps that of St. Kilda, seeing the Way of writing of the first is so very widely different from that in this Part of the World, and may be deemed rather apainting of Things than of Sounds; which last seems to be the Design of ours, and which I may consider more particularly at another time: And as to St. Kilda, it may be alledged few or none can write there; but whether it be so or not,

what I mean is, that if a Chinese or Kilda Man

could write in our way, so as to express the Sounds they use, they would not have occasion for the Letters d, g, r, which I think is an Argument for the ancient Shape both of their Alphabet and Language, as, if need be, I shall enlarge a little upon at another Time.

In the next Place, this may encline us to believe that at least both the Chinese and the Kilda Men are of one common Origine, or that God has made of one Blood all Nations of Men from China to St. Kilda. Their Agreement in the Number of elementary Sounds, as I may call them, and I may say, their Agreement in several Words may dispose us to believe this. I may perhaps at another Time consider this at more length. In the mean time it may perhaps a little divert, if not instruct, to take notice of these Chinese Words above mentioned, which agree with these of St. Kilda, or at

least have their Reason in that Dialect.

Xean Tia then, as Texeira and the Spaniard and Webb write it, and Chan Ti or Tia or Tchan Ti, as the French, fignifies the supreme Emperor in the Chinese, or the Supreme Being. The Inhabitants of St. Kilda have Sean Tia, which Words they found Shan Tia, which agrees in Pronounciation with the other above mentioned, though they differ in the way of writing: They agree also in Sense; for Sean in the Caledonian Language, which they oftentimes found Shan, fignifies both Old and Great; and I could show, that in several Languages, the same Words signify both the one and the other, I mean both Old and Great. Sean as it fignifies Old is the Root of the Latin Senex, and all its Derivatives. Sean, as it fignifies great, is to be found especially in its Compounds and Derivas

rivatives in the Caledonian Language, fuch as Seanathair, a Grandfather, Seanmhathair, a Grandmother, Seanmor, very great, huge. Sine is a Variation of the same Word, and is to be found in Sineadh, a stretching, extending, or increasing, and in Sinim, to stretch, or increase, or extend, E3c. as also in the Compounds, fairfiang and fair-fing, wide, large, spacious; fairfinge, Plenty, fairfnighim, to encrease, to enlarge, to augment; which last Words, by the by, contain the Reason of the Word Parasanga, which we find in the Greek Authors, and is by learned Men generally called a Persian Word. In this Sense it is also found in the Word Shennorung, big, a great thing, in Wafer's little Vocabulary of the Ishmus of Darien, which I may afterwards have Occasion to confider.

But in what Sense soever we consider the Word Sean or Shan, whether as old or great, it seems very well to sit the Supreme Being, who is from everlasting to everlasting God, the Ancient of Days, &c. He is also great, and greatly to be praised, and

bis Greatness is unsearchable, &c.

Ti or Tia is the other Part of the Name of the Supreme Being among the Chinese, and Tia, is precisely the ordinary Word in the Dialect of St. Kilda; the other Caledonians and Irish have Dia, and it is obviously the same Word with the Latin Deus, the Greek Occo., the Italian, Dio and Iddio, French, Dieu, the Spanish, Dios, &c. It seems to me of Importance to know the true Reason of this Name; some very learned and reverend Persons have thought it worth their while to ask if the Caledonian Language could give any Reason of this Name; and its worth every Man's Pains to have

i right Understanding of it, and when I have told them that Di in that Language fignifies great; and a he; so that Dia fignifies the great he, they thought it far preferable to such Etymologies as  $\Theta = \omega$  curro, or, to fun, or  $\Theta = \omega$  can find the fees all

hings, though this last be true in itself.

The Kilda Shape of this is Tia, which agrees with the Chinese; Ti in this Dialect is great, and in he Vulgar Dialect di. V. magnus in the Comp. Vocab. Tea, or that Herb which is brought from China; and now so much used in Europe, and which is also variously written and pronounced, seems also to rave its Reason in our old Language, in which it ignifies bot, because it is commonly drunk hor and I have frequently heard a Gentleman, who, ecause he wants the vulgar Language of our Country, or at least does not ordinarily speak it, nvite others to drink Tea with him in Latin, use hese or the like Words, vis bibere calidum mecum, Domine, that is, Sir, Will you drink hot with me alidum the Latin Word for hot, he used to signify rea. I shall not now trouble you with more Chinese Words, for this would detain me too long rom what I have now particularly in View; but defire that the Simplicity of the Alphabet of t. Kilda may be taken notice of, and particularly heir wanting these Sounds D and G, as also R may e remembred; for this will be of Use in several Respects, to perceive the more readily the Afinity betwixt the Languages of the two Caledoniins, the one in Europe, the other in America; as lso to shew that our Ancestors did not borrow their Letters from the Romans, as Mr. Innes fo positively ffirms; and moreover, to answer an Objection arainst that Scheme I have given of our remote Ans tiquities

equities in some foregoing Letters. These things will also be of use to clear up several Things which have puzzled the most learned and ingenious Gentlemen. They will perhaps help to understand the true Meaning of the Name of that River, fo very much celebrated by the Poets in this Part of the World, to wit, the Tiber which runs through Rome, so long the Mistress of it in one Shape or other, concerning which we have for many Fables delivered by the Ancients. These I think, will also help to give a full Account of the Meaning of the Words Cantium, Cantia, or Acantium, by which Cafar, Bede, and Ptolemy. defign that great Headland of Britain which most approaches the Mainland. They will also help to perceive the Meaning of the Name of an high Mountain in the Isthmus of America, called Tapa counti, according to all these Europeans I have converfed with; as also the Reason of the Name of the highest Mountain in the Island of St. Kilda itfelf, according to a Native who pronounced in Truim-kel, or which another Caledonian would found Druim-geal; and as the same Person did fome Years after, when he had been longer in the Continent of Britain, we would think that his first Way of founding it had been Thum-kel. I add no more, but that I am,

SIR,

Your very bumble,

and much obliged Servant

To the Chevalier R-y.

SIR

Received the favour of yours; I thank you for what you are pleased to promise in Behalf of the Gentleman whom I recommended to you; give entire Credit to what you fay about the Leter I wrote to you, when the celebrated Universiy of Oxford conferred a Piece of extraordinary Respect upon you. I am obliged to you for the avourable Opinion you have about my Profitiency in Languages; which you'll perhaps hink the more strange, because you had Access o know that my Genius once led me to somehing very different: But Languages are in a great Measure the Keys of Knowledge; and I have ninted some of the Reasons that induced me to confider them in that Pamphlet which I fent you, and which you fay you read with so much Pleaure; I am glad that it seems to have excited in you so strong a Desire to see more of the like Naure; I believe I shall print more Copies of it. I have given forme of them away to these for whose riendship I have a particular Value.

I am glad you employ your Thoughts about hefe noble and extensive Subjects which you mention in your Letter, and I shall be more glad if I am any Way contribute to confirm you in what is

F tight,

right, or to caution you against Mistakes. From what you write I draw this Inference, That you feem to have escaped some Rocks which very great Numbers of Men, both learned and unlearned, have split upon: This seems to me to have chiefly slowed from their not sufficiently adverting to the Holy Scriptures, especially in their Originals, and in the Case, I mean, to the ancient Translations and Paraphrases both of the Eastern and Western Nations; they seem to have been misled, partly by some prevailing groundless Fables, and partly by

fome modern Translations.

The most learned Men, tho' of different Come munions, feem to me, by taking up fome common Opinions without fufficient Examination, to have ventured beyond the holy Scriptures, and fo have fallen into some great Mistakes, which have kept both themselves and the most part of the World in great Darkness as to many things. Bochart is generally reputed one of the most learned Men that ever the World produced, especially in the Oriental Languages and the Belles Lettres, yet I find him carried away by the Torrent of common Error; .I could fay the same thing of others who are had in the highest Reputation for their Learning of Piety, or both. I was particularly touched when I observed it in a very learned and ingenious Gentleman in the South Part of this Island, and who, as I am informed, has most worthily behaved himfelf in feveral eminent Posts, and particularly has been a grand Promoter of valuable Learning. This worthy Person I found took a Thing for granted which has been the Source of innumerable Mistakes in many Parts of Learning, the Mathematicks chiefly excepted. I hinted this in the PamFamplet I fent you, p. 23. I take all proper Occasions to convince these who allow me to speak freely to them, and who I think have a Regard to Holy Scripture, or sound Philosophy, of this Mistake, and, I can say, not without a deal of seeming Success. I had all the Inclination in the World to have reasoned with that valuable Gentleman upon the Head, but our Situation was such as made it at that Time unsit, and I have had no Opportunity since of seeing him.

I particularly observe, that many of the Publishers of Dictionaries have fallen into this Error, though it seems to be the Interest of Mankind that these had most carefully guarded against it, and, amongst others, Mr. Nicholas Bailey, whose Engish Dictionary has been frequently printed here.

Some learned Men, both here and abroad, are become in a good Measure sensible of this common Error, and accordingly have published some Things which tend to throw Light into a certain Portion of Holy Scripture, which, I conceive, has been generally misunderstood, viz. Gen. ii Chap. but some of these have advanced Hypotheses of their own, which, I am asraid, cannot be proven; yea, I have met with some who seem to be Masters of a great deal of good Sense, but make small Pretensions to Learning, who, by a little Reasoning, were easily brought to savour what I conceived to be Truth in this Matter.

As to what you recommend with Respect to the Royal Academy of Inscriptions and Belles Lettres, and particularly what you mention about Aspha-

lias, I shall endeavour to mind,

There is one Thing which especially pleases in your Letter, that you judge that great Variety of

Language that is in the World, to have proceeded from one original primitive Language; but I am not convinced that such a Language is now extant in its primitive Shape, and I could give Reasons why we are not to expect to find it any where in this imperfect State. Mr. Waser indeed, in the Testimony I cite from him, p. 2 of my Pamphlet, speaks of the Highland or Irish, as if it were the primitive Language, and Mr. Lhuyd's Testimony is much to the same Purpose; but I do not adopt the Whole of what they say, the only Sense in which I agree with them is, that it departs less from the primitive Language than many others, and that it is of very great Use to illustrate these.

The Testimony of Leibnitz, which I subjoin, seems to be sounded on very good Reasons. I did not meet with it till several Years after I had begun my Enquiries, and it was in a Manner the first Thing which gave me Considence to speak of them with some Courage; that illustrious Person makes so great a Figure in the learn'd World. The concluding Part of it seems peculiarly remarkable, Et st ultra Hiberniam set aliqua insula Celtici sermonis, ejus silo in multo adhuc antiquiora duceremur, "And it beyond Ireland there were any I-"sland where the Celtick Language were spoke, by the Help thereof, as by a Thread, we should be guided to the Knowledge of yet much more ancient Things."

After all the Enquiries I have made into Language, I can find no Place to which this will so well agree as St. Kilda: This Place, with Respect to Germany where Leibnitz lived, is indeed beyond Ireland, and the most remote of all these

clonging to Great Britain, to the Northwest, that is inhabited; it has a most simple Alphabet, and you know that these of the Greeks and Romans, he higher we ascend, still become the more simple. Irenaus says the same Thing of that of the Hebrews. An additional Number of Letters was he Work of Time, and Criticks pretend to tell the very Persons who introduced them. In armoral Bearings, the simplest are reckoned Marks of the greatest Antiquity. I have frequently admirated this Saying of Leibnitz, as also another of Scaliger, which is capable of being understood in a sublimer Sense than he himself seems to have intended, viz.

Imperii fuerat Romani Scotia limes, Romani eloquii Scotia finis erit.

Thus imitated and accomodated.

Scotia did once Rome's widest Conquests bound, Rome's Tongue's high Source in Scotia shall be found.

Justin, in the 18th Book of his History, tells something, which, if duly considered, may help us to enter into the Spirit of Leibnitz his Reasoning. I had rather you should find it out your felf, than be obliged to another for pointing it out to you.

You particularly defire to know how far my Scheme agrees with that of Father Fezron; As to which I own, that the Reading of Pezron's Book, I think, was the chief Reason of my Enquiries of this Kind, and my Scheme is an Improvement of his, and more free from an Exception, I think,

his, and more free from an Exception, I think, which his is liable to. His Antiquities of Nations, and particularly of the Celtæ or Gauls, con-

fifts chiefly of History and Philology; as to his historical Part, I cannot pretend to own it in all its Parts, it feems to me a Mixture of Truth and Fable. As to the philological Part of it, I always thought there was something very valuable at the Bottom of it, and it gave me the Hints which I have since followed out further than perhaps it is fit for me, as I am now situated, to attempt to explain. But I may perhaps be fuller upon this

afterwards.

The Exception to which his Scheme at least in part is liable, and from which this is more free, is, that the Romans were a long Time both in Bretagne in France, and among the Welfb in this Island, and this might be the Reason of the Affinity betwixt the two Languages. This, I fay, is a colourable Objection, and something of a plaufible Handle against him. I do not now give my Judgment of the Force of it, whereas I alledge, that the Language of that Part of the World, where it is not pretended the Romans ever were, is really the most ancient and simple, and most useful to illustrate not only the Roman, but several other valuable Languages mentioned in the Pamphlet I fent you, and which I need not here refume. It is generally acknowledged, that the Roman Armies never were in Ireland; but I think I may fay they never were in St. Kilda, with great Affurance; and yet the Language of that Island, I think the most useful of all to illustrate Languages, Antiquities, and History, and of this I may shortly give an Example.

Many indeed fay, that the Well and Irish are but different Dialects of the same Language; but those who have enquired into them, will easily

( 47 )

fee, that they differ more widely than the Dialects of the Greeks. Perhaps it may not be amiss to call them Sifter Languages, and to apply that of Ovid to them, Met. 2. Facies non omnibus una, Nec diversa tamen, qualem decet esse sororum. I may explain my felf more fully upon this Head afterwards, but I crave Leave to add, that the Caledonian or Irish, is, in my Opinion, the most genuine Offspring of that Language which Julius Cafar calls Celtic, for which I am willing to give Reasons. And, as I have said before, the Dialect of St. Kilda feems the most simple and ancient Shape of that renowned and uleful Language. Your Curiofity, in tracing Languages and Religion up to their highest Sources, where, I believe, you'll find them appear in the greatest Plainess and Simplicity, is in my Judgment, highly laudable, and the following them out in all their feveral Windings, Turnings, and Mazes, or in all their Alterations, Degradations and Corruptions, cannot but be very laborious. I shall be glad it I can any way contribute to your Help or Ease in these Things. I leave it to your felf to judge, whether the Confideration of that Account which Martin gives in his Voyage to St. Kilda, may not furnish Hints of both Kinds to a Person so curious and ingenious. I can affure you, that his Treatife, and perhaps fome Conversations with these of that Island he met with, awakned the Muse of a certain Person, who professes himself no Poet, to pen the following Lines, which touch upon the Etymology of the Names of this Isle, and the Language and Religion of the People, which, I hope, will not be altogether unacceptable to you who are a Poet.

Obscura occiduo procul innatat insula ponto;
Hanc Hirtam veteres nomine rite vocant;
Sæpe tamen Sancti nunc gaudet nomine Kildæ;
Floruit hic Kildas; sic vaga fama refert.
Hunc ego sed titulum traxisse à dulcibus undis
Suspicer; hoc res & pristina lingua monent.
His, ea finitimas non tantum vincere terras
Fertur, at immenso quicquid in orbe patet.
Kildice, cui purus sermo est, mens fraude doloque
Libera, & antiquæ simplicitatis amans;
Pergito, quod sanctum est sectari, æquumque, potabis
Vitai æternas ore beatus aquas:

Thus englished by the same Hand.

Far in the dark Northwest an Island stands;

Scarce feen, or feeing the most neighb'ring Lands: Hence, by the Ancients, Hirta fitly nam'd, 'Mong Moderns more by that of Kilda fam'd. Rumour this from a holy Hermit brings, I rather from her sweet and purett Springs: In these she far all neighb'ring Lands excels, And all that Fame of distant Regions tells. O may her Sons, for purest Speech renown'd, And candid Souls, and all that's ancient found, Of Piety and Justice run the Way:

Life's sweetest Waters they shall drink alway.

I am, SIR,

Your very humble,

and much obliged Serviant,

Some more

### PAPERS,

And some more Testimonies of the Learned.

No. 1. A Letter from Mr. John Horn of West-Hall Advocate.

Our Letter was most acceptable to me, fince I see you are not unmindful of your old Acquaintances. I inform my

elf of the Gentlemen that go from this to the Affembly how you are, and defire them to make ny Complements to you. I think, not only prirate Persons should encourage you, but likewise he Publick, fince you clear, better than any Man ormerly hath writ, the most obscure Antiquities of our Nation. I was delighted with your Definition of that Term so much used in our Law nd Charters, and fo was the haill Faculty, of Mercheta Mulierum, and fundry other Names of Places, of which we had no Notion till renewed by you: And I think it is of publick Concern or every Man's Satisfaction to have your Book. Make my Compliments to M. and S. And I m, with all Efteem,

Dear SIR,

Horn-Castle. 23 March 1739.

Your most Humble Servant

John Horns

The Judgment of a new Society at Edinburgh for improving Arts and Sciences, about two Letters from Mr. Malcolme, concerning the remote Antiquities of Britain and Ireland.

Edinburgh, March 7th 1738. In a Meeting of the Society for improving Arts and Sciences, a Letter was read from the Reverend Mr. Malcolme Minister at Didingston, to Mr. MacLaurin, containing some Observations on the remote Antiquities of this Island. It was argued, that the Knowledge of the Irish Language was of great Use in Inquiries concerning those Antiquities, and confirmed by the Authority of Mr. Leibnitz and others.

By examining the Celtic Words in Jul. Casarit was shewn, that the Language of the Celta in Gaul, in his Time, had a much nearer Affinity with the Irish than with the Welsh. Severa Arguments were offered, to show that the Irish was the Language of the oldest Inhabitants of the Island, as Mr. Lluyd acknowledges; that the Island was peopled from Gaul; that the chie Remains of this first Colony from Gaul are those who speak the Irish in Scotland, and its Isles that Ireland was first peopled from Britain; and that the Piets, and Britains, or Welsh, were of the second or latter Colonies that came into Britain.

April 4th 1738.

A fecond Letter from the Reverend Mr Malcolme was read, containing an Answer to some Objections, which had been made against his first Letter, read March 7th, concerning the remote AntiAntiquities of this Island, in which the Author offers some surther Illustrations and Arguments in Support of his Opinion.

Edinburgh, 7th March 1738.

No. 2. About an ancient Manuscript containing a most ancient Genealogy of our Kings.

Mr. MacLaurin presented to the Society from the Reverend Mr. Malcolme an old Irish Manuscript, which seems to have been writ in the Time of David, Son of Malcom Kanmore, that is, about 1140. The first Column contains the Genealogy of King David upwards till three Generations before Fergus I. It appears to be two Generations older than the Colbertine Manuscript that formerly belonged to Lord Burleigh, and begins from David's Grandson, which is commonly held to be the oldest extant. This Manuscript agrees better with the Colbertine, than the latter Accounts given by Boetius, and others, but differs from it in the Order of some of the Kings; sometimes it wants Kings mentioned in that Manuscript, and it has some the other wants. According to this Manuscript there were 51 Generations from David to Fergus I, and 33 from Fergus I. to Fergus II.

After the Genealogy of our Kings, are the Genealogies of some noted Clans, or Families, of which some seem to be *Irish*, as *Macguaire*, who

was King of Connaught.

Towards the latter End of the Manuscript are some Discourses, De Oratione, Confessione, Compunctione, Timore, &c.

1 2

No. 3. The Testimony of the Reverend Mr. Peter Du Pont, a Minister of the French Congregations at Edinburch

on at Edinburgh.

Legi, summa cum voluptate, varias literas a viro plurimum Reverendo, Domino Davide Malcolme, pastore villæ Diding ston, circa linguam Celticam exaratas; ubi, imprimis, sagacitas, judicium & eruditio ubique certant. Vir doctiffimus, in illis epistolis ad viros doctos, solidissime solvit difficultatem, sepissime, usque ad nauseam, propositam a Deiftis, aliifque religionis Chriftianæ hostibus. Optime probat vir ille doctus incolas infularum Americanarum oriundas esse ab incolis Europa, ex conformitate linguarum, tum Americana, tum Hibernica; ideoque hostes, Christianæ religionis non possunt aliquid solidi proserre contra hanc folutionem. Hoc est judicium nostrum circa opus reverendi viri & dilectissimi fratris. Spero illum semper fore utilem, tum Ecclesiæ Christianæ, tum reipublicæ literarum: modo Deus Optimus Maximus suo servo benedicere pergat, quod a Deo sæpissime rogo. Dabam in suburbio quod vocatur Bristo, prope Edinburgum, die Maii 21 mo 1739.

The Meaning of which is in Substance as follows. I have read, with a great deal of Pleasure, several Letters, writ by the Reverend Mr. David Malcolme Minister of the Gospel at Didingston, concerning the Celtic Language, in which Sagacity, Judgment and Learning do all contend which of them shall appear brightest. That most learned Person in his Letters to learned Men, most solidly answers that Objection which has been so often thrown up by the Deists, and other Enemies of the Christian Religion. And that,

Learned

Learned Person clearly proves, That the Inhabitants of the American Islands, are sprung from the

tants of the American Islands, are sprung from the Europeans, by the Affinity betwixt the American, and the Irish Language; and therefore the Enemies to the Christian Religion can advance nothing that's solid against this Answer. This is our Judgment concerning the Work of this Reverend Person, our beloved Brother. I hope he will be always useful, both to the Church of Christ, and the Common-wealth of Learning, if it shall please the most high God to continue to bless his Servant, which is my constant Prayer to God. This I write in Bristo, one of the Suburbs of Edinburgh, the 21st Day of May, 1739.

No. 4. A Letter to the very Reverend, the Moderator of the Assembly 1739, to be communicated.

V. R. S. The Committion of the Affembly, which fat March 1738, recommended to me to print a Specimen of the Ufefulness of our ancient Languages; I undertook to do it, upon the Affinity of the Language of the Terra firma, and Isthmus of America, to these of the ancient Britons, to answer a Cavil of the Deists against revealed Religion; and, because it seemed the most improbable Part of my whole Scheme, in managing this, I hope I have clear'd up the Antiquities of these Isles, so as to remove the Grounds of innumerable Quarrels and Disputes between the several Nations, and Churches in them, and to promote Benevolence and Concord. I have

(6)

also given Specimens of Dictionaries Celtic-English and English-Celtic, our old Language being indeed the Celtic in the Sense of Julius Coesar. I fend inclosed a Copy of the Title-Page of what is already printed, which will cost more than double of what was allowed for it. May it please the Venerable Assembly, if their own Time do not allow, to refer this Affair to their Commission, and to recommend to them, to enquire about it, and to appoint a Diet for that Purpose, and to hear me further upon it, having Things of great Concern as to Learning, and its Subserviency to Religion, to offer; and having already waited on Meetings of Assemblies, Commissions, and Committes about this Affair since 1735, I am with all Respect, Reverend Sir. your very humble and obedient Servant David Malcolme, May 22d Marked on the Back, 1739.

A Letter from Mr. David Malcolme read

in Affembly.

No. 5. Passages in a Letter from Mr. Macfarlane, a Gentleman born in the Highlands, and a great Proficient in the Arabic and other Orien-

tal Learning.

Not even the Example set by the Briton Lhuyd could animate one single Native, except O Cleri and Begly to endeavour the Cultivation of the Celtic. The Name of Lhuyd deservedly ought to be held in Veneration by the Sons of Ireland wherever sound, (and one may add, by the Highlanders in Great Britain, and the Welsh, &c.) and all Lovers of the Celtic Learning and Name.

He it was who despised the Fatigue of lear-

ning

(7)

ning their Language, and travelling wherever it was spoke, that he might attain its different Dialects. He composed an excellent Dictionary, considering it was the first of the Kind. In it he promised a natural History of the Minerals, Vegitables, Animals, &c. of the Highlands, Isles, and Ireland, with their ancient Irish Names, which, if judiciously performed, would prove a more valuable Work than ever graced Ireland: But envious Fate, by the Death of Lhuyd, deprived them of that.

He bore patiently the Denial of promifed Helps, and was basely deserted by his mean-spirited Subscribers to the Dictionary; yet, before his Death, the rude Materials for the History were all collected, but so contracted for Brevity that none else could fit them for the Press. And it was told here by the deceased Pepyat, Bookfeller late of Dublin, that they all perished some

Years ago.

Them (Words) he notes obsolete are more worthy of Use, than the modern beggarly or improving Way of borrowing from their Neighbours, when they have many fignificanter Terms of their own, if they knew how to chuse them. For it may be confidently faid, That there is not one obsolete Word in OCleri, Lhuyd or Begly but is in common use in one Part or other where - I faw Begly, and Irilb is spoke. could perceive hardly but tautological Phrases. Terms of Art are learnedly explained, by adding Irish Terminations to the mysterious Foreign Words, which might in as few Syllables be writ in pure Irish. His manner of interpreting Herbs, Ani-

(8)

Animals, &c. is so mean, that it scarce deserves Notice.

At least they may compose an Irish Dictionary that shall demonstrate the Celtic to be one of the most significant, fluent, nervous, copious, and least adulterated of any living Language, perhaps the Arabic not excepted, tho, they be related.

## No. 6. Part of a Letter from D. E. G. L. B. of L.

That which is new to me, is the Quotation from Wafer, whose Book I believe I might read when it first came out, and I also knew the Man himself; but I did not then attend to the Affinity between the Language of the ancient Irish and the Darien Indians; what you quote from him feems to refer chiefly to the Manner of Pronounciation, which is one Step towards the Proof of a Communication in Language: But, as the Attempt made by Scotland to fettle a Colony there, must have carried many of your Country men thither, who afterwards return'd, one would be glad to know whether those of them who understood the Highland Language, as Wafer did, observed any Similitude in the Body or Substance of the Language. I believe no body can affirm that Japan or California are Islands, and I have observed that Travellers take notice of a Similtude between the Shape and Manners of the Inhabitants of the most northerly Tartarians and the westerly Inhabitants towards America, which feems to be the most probable Account of peopling that Part of the World, and would almost be past Doubt if one could find an Affinity in Language.

#### No. IV.

LETTER to the Very Reverend Mr. Alexander Anderson Moderator of the General Assembly.

Reverend Sir.

INCE the Assemblies of this Church have always had a particular Regard to the Advancenent of Religion and Learning, I presume to ofr the following Proposals, to be communicated.

you think fit.

I have employed some Thoughts about both. I ave endeavoured to trace the Latin up to its ountains, the common Language of this and of me other Parts of the World, and in which great umbers of valuable Books are either originally ritten, or into which they have come by Tranation. Beside these commonly called the Classics. e Civil and Canon Law, the Works of some the Fathers, most of the Reformers, many Syems of Divinity, Law and Phylick, many uleful ommentaries on holyWrit, many good Histories nd other Monuments of Literature, the Schoolscourses of Professors of Divinity and Philosony, &. are in this Language.

I have also endeavoured to follow up to its ue Source the Greek Language, which, besides e Advantage of being the Channel, in which e inspired Writings of the New Testament are onveyed, comprehends many Pieces of Christian, nd useful Heathen Learning: Moreover, I have

 $\mathbf{B}$ 

[ 10 ]

enquired into the Hebrew and Chaldee Languages in which the Books of the Old Testament wer originally written; and I find that these may receive a great deal of Illustration from the ancier Languages of this Island, more especially the ancent Scotch or Irish: And I am willing this Ma

ter may undergo the strictest Tryal.

These same Languages, I humbly conceive, wi be found useful to rescue the Antiquities, both E clesiastical and Civil, of these Islands from the Fable they are but too much involved in, and place them in a juster and fuller Light, and to vind cate the Honour of the Assemblies of this Churc who in their publick Acts suppose and affert the Antiquity of the Nation, and of the Roy Line, particularly the Act of Assembly, August 3 1639, Seff. 23, and by this Means I'm confide the many Cavils against the Honour of the Nat on, and to the Prejudice of the Church, will I eafily answered. I also humbly conceive, that ferves to confirm the Accounts which the ho Scriptures give of Things, and to repel the Cavi of Deifts.

I will not detain you by enumerating all the Discoveries which have cast up in my Enquirie especially seeing I have given a Hint of many of them in Proposals I printed some Time ago (which are not unknown to several Members of the Venerable Assembly) for publishing an Irish English Distionary, with the Elements of the Irish, with some Observations on it, to enable the perceive its great Usefulness. This Work was despite the Distinction of the Irish work was despited to the Irish was despited to the Irish was despited to the Irish work was despited to the Irish work was despited to the Irish was de

laye

[ 11 ]

ayed upon Notice, that an English-Irish, and Irish-English Dictionary, had been in the Press at Paris, which I thought might afford considerable Assistance; and accordingly I have procured from that lace the first Part of that Work, viz. the Englishrish, which, in the Opinion of severals, may be

nade helpful to some valuable Purposes.

This Design will be so far from hindering the preading of the English Language, that, on the ontrary, in my Way of managing it, it will conderably help to diffuse it, and will be sound, not nly not contrary unto, but very plainly to fall in with the valuable and laudable Designs, and Intentions of the Society for propagating Christian Knowledge, its several Respects, and (not to menion others) with these in their Records for 1727 June and August, and some other subsequent Months and Years.

It is hoped, that it will be looked upon as some excuse for giving the Venerable Assembly this Frouble, that I have not ventured to lay this Matter before them till it was examined and approved by two very honourable and learned Societies, viz. first that of the honourable Noblemen and Gentlemen Improvers, as appears by their Act November 25. 1732, and afterwards by the learned Faculty of Advocates, July 31. 1733; so that I had Reason to think, that this Design, if carefully purued, may be of real Use, and not of mere Curiosity.

Besides, As the Duties of my Station do cerainly restrict me from any Speculation or Study, nowever innocent, that is not really in some Sort

B 2 for

for the Advancement of Religion or true Learn ing, which always may be made subservient t it, so the favourable Judgment of the Venerabl Assembly, with Respect to this Design, will bot be a Comfort and Reward to me, as to wha Pains I have already been at, and an Encourage ment and Direction in Time coming.

It is therefore, Sir, my humble Desire, that th Venerable Affembly may appoint some to examin this Design, and chiefly as to its Usefulness i illustrating the original Languages of Holy Writ or, at least, that the Venerable Assembly will t pleased to remit this Matter to their Commission with such Instructions and Directions, as to the

Wisdom shall seem meet.

I am, &cc.

Edinburgh May 15. 1735.

REPORT of the Committee of Ministers who u derstood the Highland Language.

Edinburgh May 23, 1735. HE Committee appointed this Day by the Commission of the General Assembly, f hearing the Reverend Mr. David Malcolme Min ster of the Gospel at Dudding ston, upon his Prop fals for printing an Irish-English Dictionary, & did meet, where were present the Reverend M Dan and while to allow

[ i3 ]

Daniel Mac Aulay Minister at Bracadale in Skey. Ir. Eneas Sage at Lochcaron, Mr. Robert Kirk at Dornock, Mr. John Sutherland at Goldspee, Mr. Daiel Beton at Roshean, Mr. Farquar Beton at Croy, Ar. John Bayn at Dingwall, Mr. Thomas Inglis at Sullicut, Mr. James Campbel at Kilbranden in Ar. Daniel Campbel at . Mr. Dougal Campbel at Southend in Kintyre, Mr. Dougal Ballan. , Mr. Dougal Steuart at Rotheyne at ay, Mr. Neil Campbel Principal of the University of Glasgow, Minister of the Gospel, and the said Mr. Daniel MucAulay being chosen Moderator of he said Meeting, Mr. David Malcolme presented nd read his Proposals, concerning his publishing an rish-English and English-Irish Dictionary; and also ave a Specimen of divers Words in different Lanuages, for illustrating thereof, shewing, That the incient British-Irish has preserved simple Words. which tend to give Light to the Meaning of many Words in the learned Languages, and some of these spoke in the Indies, particularly in Darien in America; and it appeared to the said Committee. from several Instances which were offered and explained before them, with Relation to the Names of Places, Countries, Towns, Mountains, Rivers, &c. The foresaid Committee having discoursed at some Length on that Subject, are of Opinion, That the faid Mr. David Malcolme has been at great Pains, in reading and collecting Materials for this Work; that the foresaid Dictionaries may be of good Use for promoting of Learning; and therefore that it should be encouraged. This in Name.

and

[ 14 ]

and by Appointment of the said Committee, is figned by

DANIEL M'AULAY Moderator NICOL Spence Clerk.

COPY of the Report of the Committee of the Commission, within the Bounds or Presbytery of Edit burgh anent Mr. Malcolme, recorded November 14th, 1735.

At Edinburgh, August 27. 1735.

HE Committee of the Commission within the Bounds of the Presbytery of Edinburg appointed to meet with Mr. Malcolme, to discours with him upon his Project of illustrating some of the learned Languages by the Irish, met with hin and there were present Mr. John Glen Moderato of the Presbytery, Principal Smith, Mr. John Schau Mr. John Guthrie, Mr. John Walker, Mr. Georg Lindsay, Mr. Neil M'Vicar, and several other Members of the Presbytery, before whom th faid Mr. David Malcolme explained the Agreemen and Affinity of several Greek Expressions in th New Testament, prescrib'd to him by the said Com mittee, with the Irifb Language; as also of som of the Words of the American Language, which are preserved in Wafer's Account of the Isthmu of Darien, of the Words of the Irifb Language in Sense and Sound; that he having at a forme Meeting with the Committee, when Professo Goudie was present, explained and shewed the Affinity [ 15 ]

inity of several Hebrew and Greek Words, in Places prescribed to him, with the Irish Language; nd also having show'd to them, that there are several Words in the Irish Language that are merely imple, and carry the Derivation higher than the Roots of the Hebrew and Greek Language answerng to them; with all which the Committee, acording to the best of their Understanding were atisfied. The Committee do, upon the whole, eport, That it is their humble Opinion, that Mr. Malcolme has been at great Pains to fearch nto the Etymologies of many Words which re not generally understood, and that the Iish Language, to those who throughly unlerstand it, may be of Use for the more clear Explication of many Words in the Original Lanuages, wherein the holy Scriptures are writ; and hat therefore his Design deserves to be encouraed by all who are curious in these Matters: As lo, the Committee judge themselves obliged in ustice to Mr. Malcolme, to acquaint the Reverend commission, that he represented to them, that if hey would appoint some of the Ministers of this Church, whom he shall condescend upon, to coner with him upon his Design, which he conceives ery proper for advancing the Interests both of Religion and Learning, he would lay before them everal Things very conducive to that good End, which he cannot so conveniently offer to any pubick Meeting.

JOHN GLEN Moderator.

GOPY of a Letter to the very Reverend Mr. Lauce lan MacIntosh, Moderator to the General A fembly.

Very Reverend Sir,

T is not unknown to you, and many Member of this Venerable Assembly, that there were some Reports given in to the Commission of the last Assembly by some Committees, appointed by them to converse with me about the Advancement and Facilitating of Learning and Religion and that besides other Things, they found two of the most improbable Things of my who Scheme proven; As sirst, That our antient Last guages illustrate the original Languages of sacre Writ, the Import of which I leave to every of who searches the Scriptures to judge. 2dly, The there is an Assimity between these and the Language of the Istomus of America, which is of Use to refute a Cavil of the Deists against the Scripture Acount of Mankind.

These Committees also own, that I had bee at great Pains to search into the Knowledge of Things not commonly understood, and that who

I propose deserves Encouragement.

There was also another Committee named to confer further with me about these Things; but the Commission did not overtake their Report May it therefore please this Venerable Assembly

[ 17 ]

o remit this Affair to their Commission, with uch Directions and Powers, as to their Wisdom hall seem meet.

I am;

Sir,

with great Respect,

Your affectionate Brother; and humble Servant

Duddistoun, May 15.

DAVID MALCOLME.

COPY of a second Letter to Mr. MacIntosh Mod derator of the General Assembly of the Church of Scotland 1736:

#### Very Reverend,

T is not unknown to you, that the Assembly 1735, appointed some Committees of the sixtest Persons, to enquire into the Usefulness of the ancient Britis Languages, particularly to serve the most valuable Purposes of Religion and Learning.

These Committees reported, that they had found an Affinity betwirt these and the Language of America, particularly of its Isthmus, which confirms the Scripture-scheme, that GOD has made of one Block

[ 18 ]

Blood all Nations of Men; and answers an Objection of the Deists, so numerous in our Age and Island, and may also be improved as a Help, to dispel a Cloud that has long hung over a great Part of Learning. This will to intelligent Persons probably appear the most improbable Part of the whole I have advanced.

The same Committee also reported, that the had found they were useful to illustrate the learne Languages, and particularly these in which the holy Scriptures were writ, which all Christians signstly highly value; and that not only the Green but even the Hebrew, which next to what is above was also the most improbable Part of my Scheme

These Ministers from the Highlands, who wer present in the Assembly 1736, did also meet wit me, and have signified their Opinion in a Lette signed by them, that they are of Use to clear severa Passages in our History of this Island, and to advance the Knowledge of the learned Languages, as wi appear by their Letter itself herewith transmitted.

There was also another Committee appointed to commune further with me, whose Report was no ver yet taken in, which I now transmit; it sligned by the Reverend Mr. Gaudie, Mr. Joh Glen, and Mr. Matthew Wood, which were all could have ready Access to; I hope this Reverent Commission will have all due Regard to their Report; it is therein mentioned, that I am of the Mind, that our ancient Languages illustrate these oriental Tongues that are most studied by the Learned, and amongst others the Arabic.

[ 19 ]

The Arabic is one of the most universal and diffused Languages; it is not only valued by the Mahometans, who possess no small Part of the World, upon a religious Account, but is the Language both of Learning and Trade in the East; besides, of late, the Learned in the West, look on it as a very great Help to understand the Hebrew, particularly some Professors in the most noted Protestant Universities, now alive. The Reverend Mr. Peter Du Pont, Pastor of the French Church here, who is very justly valued for his great Learning, Integrity, Piety, and other ministerial Qualities, is the only Person I have met with here who has studied it; I have also transmitted his Judgment on the Head. And if Need were, I could confirm it by the concurring Testimony of another, whom I met with in another Part of this Island, who is a Native of our Highlands: and seems to have made great Proficiency in the Arabic, and declares, that his Mother-tongue was a great Help to him to acquire it.

It is therefore hoped, that this Reverend Commission will give that Encouragement to this Defign, which the Committees jointly recommend; and if they please, refer this Matter to a Committee of such to whom I may have the readiest Access.

I am,

Edinb. Nov. 11.

Very Reverend,
Your very affectionate
Brother, and very
bumble Servant,
DAVID MALCOLME.

LETTER to Mr. Handisyde, Secretary to the Society of Improvers.

AST Time I had the Honour of being prefent at a Meeting of the Society, it was a Pleasure to see there some Gentlemen, who understand our antient Language, which encouraged me to say some Things at that Time, in relation to my Proposals; for tho' any Person, even these who are unacquainted with it, if they will be at the Pains to look to the Words in the Dictionaries may perceive its Usefulness, in illustrating Antiquities and Languages; yet Mr. Lloyd's Book being a Folio, it can't easily be carried about; and still think it an Advantage to have Gentlemen in Company who have Knowledge of that Language especially Persons of Learning, Sense and Honour.

I acquainted the Society at that Time, that not long after I printed the Proposals, a Letter came from Paris, signifying, that there had been in the Press there a Dictionary English Irish, and Irish English, by an Irish Man, in 4to, in two Volums I made no Doubt but such a Work would contain many Things in it, by which mine might be made more valuable and useful. I have done what I could, both by my self and Acquaintances to procure that Book; and after all, I have only got the first Part of it, to wit, the English Irish, sent from Paris some Months ago, but had not got certain

[ 21 ]

ertain Notice, whether the other Part, viz. the rish English, be finished or not. I produced beore the Meeting the first Leaf of that Work, and offered some Thoughts upon it, such as, that the rish Part of it was in the Irish Character, which we now can read, that the Type was larger than needful or usual in Dictionaries, and that it ontained many trissing Things in it, which might be changed for Things more useful, besides Decests and Wants which inseparably attend all human erformances, especially the first Attemps in their inds, and that I conceived a Thing of that Natre might be done to better Purpose, and for a service.

I also acquainted the Meeting, That the Affair ad been before the honourable and learned Failty of Advocates, who had appointed fome of eir Number who understood that Language best, nd who were moreover Gentlemen of extensive nowledge, to enquire into it, which Gentlemen ive accordingly done it, and made their Report. But because these Gentlemen had not turned eir Thoughts much to the oriental Languages, which the most antient Parts of divine Revelaon were originally writ, and I humbly conceived, at it was also of great Use in illustrating these, nd was desireous, that this might be strictly enaired into, the last Meeting of the Venerable As. mbly was pleased to consider it, and for the more ature Trial of it in this, and some other Reects mentioned in a Letter to their Reverend

Mode=

[ 22 ]

Moderator, thought fit to refer it to their Commission.

The Commission made Choice of a Committee of their Number to canvass it, consisting of all the Ministers who understood this Language, as all of the Members from the Universities, and the from the Reverend Presbytery of Edinburgh; and because the Highland Ministers were then upon the wing to leave the Place, they were appointed to meet that very Afternoon, which they did, and made a Minute of what past: The authentick Expression of their Number of the control of the

tract of which I produced to the Society.

In the short Conversation I had with the High land Ministers, they were convinced, that the Language did serve to illustrate the several learne Languages, as their Minute bears. And there wa one Thing particularly grateful, that they came t be easily convinced of an Affinity between the an tient British Languages, and these of some Part of America, particularly that of the Isthmus of Darian as their Minute mentions. This ferves some ver valuable Purposes, such as to answer a Cavil of th Deifts against the holy Scriptures, and the Accoun we have of the Origination of Mankind there These pretend that the Languages of America hav no Affinity to any of the Languages in Europe Asia, or Africa; and then infer, That therefor they must be a quite distinct Race of Mortals, and not sprung from Adam and Eve. I, on the othe Hand contend, That the three Specimens of their Languages I have seen, have an Affinity to the British Languages, and particularly that of the Isthmu [ 23 7

shmus of Darian, which we have in Wafer's Decription of it. I produced the Book, and spoke

n that Passage that relates to ir.

I also added, That besides an Affinity in the Language, there was, I humbly conceived, an Assinity in several Customs, some of which I mentioned, but shall not now detain you, only saying, that the greater the Affinity appears, it more trongly repels the Deilts, and confirms the Scripure-account of Things: And moreover paves a Way to dispel a Cloud that has hung over night he whole Body of Learning these many Ages, the Mathematicks chiefly excepted.

I ask you Pardon that I have been 6 long in ending you this, and I beg the Favour of you to raw out your Minute as soon as you can. This

rom,

Sir.

Your very bumble Servant.

Duddiston, July 24.

DAVID MALOLME.

REPORT of the Reverend Mr. John Gaudie, Professor of Divinity in the College of Edinburgh, and withal, that of the Reverend Mr. Matthew Wood, and Mr. John Glen, Ministers of the faid City.

Have had frequently Conversation with Mr. David Malcolme Minister of the Gospel at Duddinstoun,

[ 24 ]

dinftoun, and he tells me, That the old British Languages tend to illustrate the Hebrew, Syriac, Arabic, and Talmudico-Rabbinic, and has an Affinity with these Chinese Words he has met with Also, that he has had his Thoughts about several Things, that tend to facilitate Learning, and make it subservient to Religion. And as for Languages, he thinks he could make them more easily acquired, and retained after acquired; and also more exactly understood than hitherto; which Things deserve the Countenance and Encouragement of this Churchs

JOHN GAUDIE.

I do agree with what is above attefted.

JOHN GLEN.

I do agree with the above Attestation.

MATTHEW WOOD:

The TESTIMONY of the Reverend Mr. F ter Du Pont, one of the Ministers of the Frent Church at Edinburgh.

Go Petrus Loumeau Du Pont, Ecclesia Gallingum viro dostissimo atque reverendo, Dom. Malcom pastore villa Duddinston, circa linguam Hibernica vel Celticam, & illum ope istius lingua illustrasse vias significationes vocum, tum Hebraicurum tum rabicarum. Praterea, sape observavi in colloque

cum vino docto, sensum vocum lingua nostra Gallica falicissime ab eo explicari; eum Reipublica literaria fore utilem nullus dubito. Hoc testimonium in gratiam dilectissimi fratris in Christo, libenter do Edinburgi 19 Maii 1736.

A LETTER from the Reverend Mr. John Mac-Innes, Mr. John Beaton, Mr. Æneas MacAulay, Nr. John MacPherson, with the Concurrence of the Reverend Mr. Walter Ross, Ministers in the Highlands of Scotland, to Mr. Malcolme.

R. D. B.

Fter our late Conversation with you, upon the Subject of your laudable Undertaking of publishing an Irish Dictionary, and having onsidered the several useful Discoveries you proofe to make by that Work, we could not but by hese Presents signify to you our Approbation of our Design, as judging it may contribute for learing several Passages relating to the History of our Island, and for advancing the Knowledge of he learned Languages, heartily wishing that you, nd all generous Undertakers in the Cause of earning and Religion, may meet with all due Incouragement. We are,

R. D. B.

1736.

Your most affectionate Brethren, and very bumble Servants; JOH. MACINNES. JOHN BEATON. Edinburgh, Inne 1. ÆNEAS MACAULAY. JOHN MACPHERSON.

I alfo

I also approve and recommend in the Term of the above Letter.

WALTER Ross.

A second, or further, or additional REPORT fro the Reverend Mr. Matthew Wood, and M John Glen Ministers of Edinburgh.

E Undersubscribers, Members of the Committee, to whom the Affair of M Malcolme was referred, do testify, that we have conversed several Times with him, and from our Knowledge of him, and what we have hear formerly from him, and from some latter Conversations we have had with him, are of Opinion That from what he promises to us, he appears capable of making the learning and retaining to Languages more easy, and likewise better under stood.

We also are convinced, That besides the gree Pains he has been at, the pursuing of this Design must necessarily have led him into much Expende and Charges, and the carrying it on will necessarily lead him into more; and the Tendency of the Whole being the facilitating and advancing Learning and Religion, and for the publick Good of Mankind, we would therefore most humble propose to the Reverend Commission, that Malcolme might be supported and encouraged in his Undertaking, in such a Way as to them might appear most proper, since it is plain he will not be the proper of the respective to the might appear most proper, since it is plain he will not be the proper of the

[ 27 ]

e able to carry on his laudable Designs, unless he Church would be pleased to give him their Assistance.

John Glen. Matthew Wood.

The TESTIMONY of the Reverend Mr. George Anderson in his Reinforcement of Reasons, proving the Stage an Unchristian Diversion, Page 50, 51.

And the you think and seem to be positive, that Aristotle's Authority in the Case is of more Weight than an hundred modern Lexicographers, I, on the other Hand, am of Opinion, That the Moderns are much better Etymologists than the Ancients; and my ingenious Friend the Reverend Mr. David Malcolme a Minister of the Presbytery of Edinburgh, knows more of the Origine of the Greek and Latin Languages than the Greeks and Romans themselves.

And Page 68, &c. I do think, Sir, that of all the Greek Derivations of the Word, you have chosen the worst, when you make Tragedy signify a Song of a Goat: For when Æschylus had introduced that pompous Sort of dramatical Entertainment upon the Athenian Theater, the People used to say, what Business had Bacchus with this? I can no more believe that Tragedy did originally signify a Song of a Groat, than that it signifies a Tale of a Tub; or that Comedy signify a Song of a Village,

( 28 )

Village, than that it signifies a Story of a Cock and a Bull. In this I give Mr. Malcolme Credit, who makes Tragedy in the old Celtick Language, signify a song of Sorrow, and Comedy antithetically confidered, must signify a Song of Mirth. If you will not take this upon my Word, you may conveniently enough converse with the Gentleman himfelf, who can satisfy you as to this Particular: And thewise in thousands of Instances can shew, that there is a surprising Affinity betwixt the Celtick and the Greek, and many other Languages.

ACI of the General Affembly of the Church of Scotland, May 1737.

the Design of Mr David Malcolme Minifter at Duddingston, of printing an English and Irish
Dictionary, as tending to promote Learning, be
encouraged, the Assembly remit the same, with
the several former Reports made to the Commissions about the said Proposals, to the Consideration
of the Committe of this Assembly, to be named
for Reformation of the Highlands and Islands.

ommission to some Ministers and Ruling Elders for Reformation of the Highlands and Islands of Scotland, and for munaging His Majesty's Royal Bounty for that End.

Edinburgh, May 24th, 1737, Seff. ult.

HE General Assembly do hereby nomi-nate, commissionate and appoint the Reerend Mr. Niel Campbel Principal of the College f Glasgow their Moderator, Mr. Niel MacVicar t West-kirk, His Majesty's Almoner, Mr. John Saudie Professor of Divinity in the College of Einburgh, Mr. William Gusthart at Edinbugh, Mr. John Matthison there, Mr. Robert Bell at Crealline, Mr. John Lumisden Professor of Divinity in the King's College of Aberdeen, His Majesty's Chapains in Scotland; Messrs. Robert Petrie at Cairnee, Andrew Boyd at Twynholme, George Reid at St. Quivox, William Steel at Dalserf, James Stewart in n Arran, James Campbel at Kilbranden, Lauchlan MacIntosh at Errol, George Meek at Rogorton, James Fordon at Alloa, John Cleghorn at Wemys, Thomas llephan at Newtyl'd, John Bisset at Aberdeen, John Squyre at Forress, George Gordon at Alves, Walter Syme at Morlith, William Gordon at Glenmorison, Francis Robertson at Clyne, Samuel Semple at Libberon, James Walker at Canongate, George Logan at Edinbugh, John Walker at Canongate, Thomas Pitcairn at West-kirk, Robert Wallace at Eainburgh, James Lawrie at Langton, John Schow at South Leith, 7ames

( 30 )

Ludovick Grant younger of Grant Advocate, Si Robert Monro of Foulis Baronet, Sir Fames Cam pbell of Ardkinglass Baronet, Sir James Campbell o Aberuchill Baronet, Mr. Alexander Bruce of Ken net, Mr. Robert Dundas of Arnistoun Advocate George Drummond Esq; late Provost of Edinburgh Sir Shomas Gordon of Earlstoun Baronet, Archibale M' Aulay Lord Consorvator of the Scots Privilege at Campvere, Patrick Lindsay late Provost of E dinburgh, Mr. William Grant Advocate Procurato ( 31 )

for the Church, Thomas Dundas of Fingask, Mr. James Baillie of Hardinton, Mr. Alexander Gordon of Ardoch, Mr. Albert Monro of Coull, Mr. George Buchan of Cumladge, Mr. John Hay of Balbithan, Dr. John Riddel Physician, Mr. Thomas Rigg of Morton Advocate, Robert Montgomery City Treasurer of Edinburgh, John Clarkson Deacon Conveener of the Trades of Edinburgh, Hugh Hathorn late Baillie of Edinburgh, James Nimmo late Dean of Gild there, Alexander Mitchel of Mitchel, Mr. Robert Hepburn of Baads, Mr. James Davidson late Town Treasurer of Edinburgh, Mr. Alexander Nisbet of Northfield, John Paton Bookseller in Edinburgh, and and Nicol Spence Agent for the Church, Ruling Elders: To be a Committee of this Affembly for Reformation of the Highlands and Islands of Scotland, for promoting the Knowledge of true Religion, suppressing of Popery, Superstition and Profanity, and for Management of the Royal Sounty given for that End, according to, and in Terms of his Majesty's Grant to this Assembly, nd the 13th Act of the late General Assembly, nd whole Acts therein mentioned, and in forner Commissions to the late Committee, any seven of the foresaid Persons are declared to be a Quorum, whereof four to be Ministers, and the aid Committee to have their Meetings in the Iall of the Society in Scotland for propagatng Christian Knowledge, the last Thursday of evey Month, at Three Afternoon, and also the first awful Day after Adjournment of the four stated Diets of the Commission of this Assembly, at Ten

( 32 )

Ten of the Clock Forenoon, except when it falls to be on Friday or Saturday, and then the Meeting is to be on Monday next thereafter, with Power to adjourn themselves to such Times and Places as they shall find needful, and to keep a Correspondence with the Commission of this Assembly, and Society for propagating Christian Knowledge, and their Committee. And the General Assembly do hereby nominate and appoint Mr. William Grant Advocate, Procurator for the Church to be Receiver of the foresaid Royal Bounty, and to pay out the same as he shall be directed and ordered by the foresaid Committee, and according to their Rules.

## 

### To A. M. of D. E.

SIR,

HE Subject of this Letter leads me ftraight to you. You are one of the greatest Masters of the ancient Scottish Language I know, and withal, a great Friend to Christianity, and generally esteem'd for Justice, Honour, Generosity and

Bravery; and at the same Time well apprised of what I am now to write, viz. The Affinity between the most ancient Languages of these Islands, and that of the Terra Firma, or Isthmus of America; or Darien: The Subject is of Importance, not only as it may prove a Help to discover the Way and Manner of the peopling of that vast Country, and to folve the Questions that may be connected with it; but also as a Confirmation of revealed Religion, and to answer an Objection against that Account which we have of the Origination of Mankind in the holy Scriptures. The great Design of these is to promote Peace, Love, and Goodwill amongst the Children of Men, in Subserviency to Glory to GOD in the highest: To this End they tell us, that GOD has made of one Blood all Nations upon the Face of the Earth; that they are all sprung from one Male and one Female, and so are all Members of the same great Family, and ought to

be kindly affectionate one to another, which the Apostle of the Gentiles represents as a Thing of the last Importance. These who advance against Religion the Objection that follows, counteract this noble Defign, viz. when they tell us, that the Inhabitants of America, which is a Country of vast Extent, so great as to be reckoned not much less than all the rest of the inhabited Part of this terrestial Globe together, are not descended from the fame common Parents with the rest of Mankind, without pretending to account distinctly any other Way for it: The Reason which they give for it is this, say they, None of the Languages of this new World have any Affinity with these of the old World, which, fay they, they certainly would have, if the Inhabitants of both were descended from one common Original. As to this Objection, it may not be amiss to observe, That it labours under some Disadvantages, such as, first, that it is a negative Proposition, and so cannot easily, if at all, be proven. Secondly, These who make this Objection feem to be chargeable with not a little Pride and Arrogance; for it supposes a more extenfive Knowledge, than can be faid to fall to the Share of any one human Creature, viz. to have confidered, and attentively compared all the feveral Languages of both Worlds together, fo as to be able to pronounce what they do, especially in a Matter of such Consequence as Religion is, and of that Nature where very ingenious People may be mistaken, as I may show. Thirdly, The Inhabitants neither of the old, nor new World, are obliged to these Gentlemen. This Objection has a Tendency to weaken the Motives to the Duties of Humanity, on both Hands, which is a Thing of a very pernicious Tendency.

But, waving these Things, it may be said, that really there is an Assinity between the ancient Lan-

guages

[ 3 ]

guages of the British Islands, and that of the Terra firma of the new World, which is otherwise called the Ishmus of Darien, as also the Gulph of Uraba,

which, if found true, this Objection falls.

The Antiscripturists seem to have taken the Hint of this Objection from the Mistakes of some of the Christian Fathers, tho' otherwise well-meaning. I hope I shall not need to trouble you with a laborious Search into their voluminous Writings, to find out their mistaken Reasonings upon Things of this Nature, especially, seeing Salmon, in the 28th Volume of his modern History, which is his first concerning America, seems to give a tolerable Sum of them, it is in the Introduction P. 4th, and 5th.

"The Ancients generally imagin'd that the Heavens conflituted but one Hemisphere, and that the Earth was flat and round as a Table, ferving as a Basis or Foundation to support the

" fine vaulted Roof over their Heads."

cc Earth?

"Even the Fathers laughed at those few Philofophers, who believed the Earth to be globular,
and surrounded by the Heavens equally on every
Side, and nothing was more exploded by them
than the Notion of Antipodes. Is it possible, says
Lattantius, that any can be so credulous to believe there are a People or Nation walking with
their Feet upwards and their Heads downwards;
that Trees and Corn grow downwards, or that
Rain, Snow and Hail should ascend to the

"And St. Austin says, we are not to believe what some affirm, that there are Antipodes which inhabit that Part of the Earth under us, a Region where the Sun rises when it sets with us, and the Feet of the People are opposite to ours, or that the Earth is in the midst of the World, encompassed on all Parts, and covered equally with the Heavens." And speaking of the No-

A 2 tion

tion some entertain'd of another Continent, he fays, "It is not agreeable to Reason, or good "Sense, to assirm that Men may pass over so vast "an Ocean as the Atlantick, from this Continent to a new sound World, or that there are Inhabitants there, all Men being descended from the first Man Adam."

It is the Observation of the learned Lord Bacon, That the Heresies, which have sprung up in latter Times, are little else than the Revival of some Er-

rors of former Ages.

These unguarded Expressions, and crude undigested Notions of these pious Ancients, have surnish'd Hints, probably to some corrupt Minds, to such an Objection as we have now under Conside-

ration.

In order to answer it, it will be fit to take Notice of that Vocabulary itself, or rather Specimen, as it is given us by Wafer, so often mentioned, we find it in Page 186, 187, and 188 of his Book, named, his Description of the Ishmus of America,

where we meet with these Words.

My Knowledge of the Highland Language es made me the more capable of learning the Da-" rian Indians Language, when I was among them. For there is some Affinity, (observe what follows) not in the Signification of the Words of each Language, (in this, I hope, by comparing these Words themselves, to show that this Gentleman, tho se he seems to be very ingenious, yet is really mistaken, se and that we ought not to be rash in advancing Negase tives as the Objectors do. Then he goes on) but in " the Pronunciation, which I could easily imitate; 66 both being spoken pretty much in the Throat, with frequent Aspirates, and much the same If sharp or circumslex Tang or Cant." Which Words agree very well with what we have already faid. ff I learned

[ 3 ]

[ I learned (adds be) a great deal of the Darien Language in a Month's Conversation with them; for I was always asking what they called this and that? And Lacenta (their King) was continually stalking with me." And a little below fays, that fome Words he still remembred, which he sets down as a Specimen, to wit, writing them according to the Pronunciation of South Britain, but that of North Britain differs from it, as also that of most of the World. The Affinity between the American and the British will be the more obvious, if they be writ in this latter Way; and therefore, in speaking on the Words that follow, I have also fet them down that Way, and added the Pronunciation, as I learn'd it from some Gentlemen who were there.

#### WAFER's Specimen,

Tautah, Father.

Naunah, Mother.

Poonah, Woman.

Roopah, Brother.

Bidama soquah Roopoh? How do you Brother?

Neenah, a Girl.

Nee, the Moon.

Chaunah, Go.

Chaunah Weemacah; Make haste, run.

Shennorung; big, a great Thing.

Eechah, ugly.

Paeecha; toh! ugly!

Eechah Malooquah, (an Expression of great Dislike).

Cotchah, sleep.

Caupab, a Hammock.

Cotchab Caupab? Will you go fleep in the Hammock?

Pa

#### T 6 ]

Pa poonah ectab Caupah? Woman, have you got the Hammock? Doolah, Water. Doelah Copah? Will you drink Water? Chicha-Copah, Maiz-drink. Mamaubah, Fine. Cab, Pepper. Aupah eenah? What do you call this?

This is Mr. Wafer's Specimen. To this I could add fome few Words which I have pick'd up from Europeans, who have been in that Country, and with whom I have conversed; but it will be fit, first to confider these, and show their Affinity to the ancientest Languages of the British Isles, of these, there are two Sifters, the elder I take to be, as I have faid, the ancient Scottish, the Kilda Dialect I take to be its simplest Shape, the younger is the Welch. Of these American Words, some sew are most a-kin to the Welsh, but the greater Part to the ancient Scottish, some resemble both; besides, it is observable, that in this Specimen there are fingle Words, and also some Sentences, the Sentences generally are Interrogations, these last, all of them resemble the Welsh, and make Use of their interrogative Particles, the Welfh hath fome notable Daughters, the Cornish and the Armoric are two of them.

In this Letter I purpose chiefly to insist on the Affinity between the American Words and the ancient Scottish; as in another, I take Notice of a greater Assinity of some of them to the Wellh, but there is so great an Affinity of each to the other two, and fuch a Connexion among the Things I am now writing about, and fo great a Neceffity to make the Thing I am now advancing as fully evident, as I can, to the incredulous Objectors and others, that I beg to be excused, if I cannot avoid

repeating

#### [7]

repeating the fame, or like Things. The Matter is strange and new, and needs to be inculcated, and I could say much more on the Head.

Some OBSERVATIONS on the Words in Wafer's SPECIMEN.

Tautah, a Father; thus Wafer, who writes it after the Way of the South Britons; a North Briton, and the other Europeans, would write it Tatah; K. Tat.

Naunah, this another European would write Nanah, a Mother; for this the Irish have Naing in the same Sense, as also Nainn, so they say Nainn Mor, a Grandmother; both to be seen in

Lhuyd's Irish-English Dictionary.

Poonah, Woman, another European, at least a North Briton, would write it Punah; for this the Welsh have Bun in the same Sense, as may be seen in Davis's Welsh Dictionary, as also in Boxhornius his Lexicon Britannico-Latinum, annexed to his Origines Gallicæ. Lhuyd, in his comparative Vocabulary, in the Word Mulier, has Byn and Benyn; the Irish has Bean, their Diphthong ea is very often changed into u, when it passes into other Languages.

Neenah, a Girl; the ancient Scots and Irish sound it as if written Neenah, which is frequently to be heard in their common Discourse; so I have heard them, when speaking to a Girl, use a Sound which if a South Briton were to write, he would set it down Neenah, or Neenae Voye, that is, as the Scots

say, bonny Lass, or good Lass.

Nee, the Moon, seems a Compound of the Irish Article na the, and eig the Moon, which being incorporated, and the g asperated, both which they do Times without Number, would be sounded Nei', the Moon, and from the Word in this Sense we may derive Niv, to shine, as also Neiv, both to

be seen in Lhuyd's comparative Vocabulary, in the Word Splendeo, as also Neiv and Niavas, for Light of Brightness, to be seen in the Word Splendor, much like the Latin Mico, to shine, which seems to be best derived from the Celtic Mi, which I could prove did of old signify the Moon, tho' now it be vulgarly used for a Month, the Space of the Revo-

Iution of that Planet.

Chaunah, go; the Americans found it as if written Thaunah, or Thanah; for by conversing with these Gentlemen who have been in the Isthmus of Darien, and who remembred some of the Words of that Language, I found they pronounced so. It signifies go in the Imperative, or go away, begone, avoid; it seems to be the same with the Latin apage, as we learn from the Phrase that follows in Wafer, viz. Chaunah weemacah, make haste, run; the Celta, or antientest Britons, have Words that agree with these, both in Sound and Sense, tho' they write them differently.

And first as to Chaunah, or Tshanah, the Celtae have Seanadh, which they sound Shanah in the same Sense. See it in Begly's English-Irish Dictionary, in the Word avoid, in the Phrase to avoid the Kingdom, An Rioghachd do sheanadh. Mr. Lhuyd has also the Word in his Irish-English Dictionary, in Significa-

tions a-kin to this.

Chaunab in Sound and Sense, and at the Bottom

is the same with the English Word shun.

Seanadh, the Antient Scottish, to shun, is in the Imperative Sean, which they sound Shan, and their Diphthong ea very often passes into u in other Languages. The Affinity of the American to the Antient Scottish is a Thing of Importance; it will not be amiss to consirm it, by adducing another Witness of Honour and Credit, who I hear is now in this Country, and who was also a Witness to the Examination of my Proposals by very habile Judges. In the mean Time I am,

# To the H. S. A. M. of

SIR,

and Diffinction, of those who understand our most ancient Language, who became acquainted with the Difcovery I had made of its great Useful-

ness; you were then young, but were pleased to favour me as far as lay in your Way: And it is with Pleasure that I remember, that you were afterwards one of a pretty numerous Company of Persons of Note, many of whom were from the Highlands or Isles, who were present at a Meeting of the Society of Improvers, when they examined my Propofals, and testified your Satisfaction with the Etymologies I gave of the Names of some Countries and Places in Italy, (particularly the Hills on which Rome is built) as also in Britain, besides some other Incidentals which then were propofed; upon which that Society, of very eminent and learned Persons, were pleased to make me an honorary Member, as is taken Notice of in a Collection of Papers, &c.

I am confident you'll be yet more highly pleased, when you find, that this same Language serves a very noble Purpose, of desending revealed Religion against an Objection of the Anti-A scripturists,

fcripturists, which is mentioned in the preceding Letters: In Answer to which I have undertaken to show, that there is a plain Affinity between the Language of the Terra Firma of America, and the antientest Languages of Great Britain, the

Antient Scottish and Wellh.

As to the Wells, it has been my very good Fortune, to be known to one of Eminence and Honour, who, besides other excellent Qualities, is well acquainted with the History and Language of Waler, and who is so good as to be willing to attest what I say about them: But I have not heard of another here who has any great Know-

ledge of them both.

But we are not so scarce of intelligent Perfons of the Antient Scottish; and, hearing of your being come to this Country, I thought I could not find a better concurring Witness, being a Person highly esteemed for your Knowledge and Learning, great Honour and a very happy Temper, as well as for your high Rank. I beg then you'll forgive me for inscribing this to you: The Cause is noble, and accept of this as a Testimony of Respect from me.

In the Letter to A. M. of D. I have shown the Affinity of some of Wafer's Indian Words to the Antient Scottish: In this I proceed to others,

and first Weemacab.

The Word Weemacah is a-kin in its Signification to the Word Chaunah, and is very plainly an Irish Word, tho' they write it differently. See in Lhuyd's Irish Dictionary Imthighim, which they sound Eemighim, to go, or depart; see also several of its kindred Words in that same Place: So that here is a very plain Affinity both in Sense and Sound. The Irish Word indeed wants the German w, which the American Word, as written

by Wafer, begins with; but this is not an Irifly Letter.

The next Word is Seanorung, big, a great Thing; this I before observed has an Affinity to Sean, or Shean, big; and Ogh, great or whole, entire, and Roinn, a Part. Gb in Ogh is not heard.

Eechah, ugly; this they found as Eetsha. Antient Scots have Eti or Eiti, for ugly; and Sa or Sha is added very frequently to their Words, as might be shown; thus Etisha. Etseacht, which is sounded almost exactly as Eechab or Eetsha, fignifies Death, the ugliest of all Things, or the King of There are feveral Words a-kin to this.

Pa Eeccha, foh, ugly; Pa is the Interrogative in Welsh, and being prefixed to a Word, augments the Signification of it, as is to be seen in many

other Writers, facred and prophane.

Eecha Malooquab, (an Expression of great Dislike) fuch as, ugly, accurfed, &c. Malluighe in the antient Scottish is accurfed; Mallachd, a Curfe, Mallighim, to curle.

Cotcha, Sleep; of this elsewhere.

Caupa, a Hammock, is founded Capa. This, with very little Variation, is a most general Word for a Covering in very many Countries. Caba in the Antient Scottish is a Cloak. Now not only our Highlanders, but these in America, yea, in Africa, use their Cloaks, or Coverings by Day, for Beds by Night to fleep in. This fingle Word might furnish copious Matter for a Dissertation.

Pa poonah eetah Caupah? Woman, have you got the Hammock? Eetab is the only Word not spoken to, scil. to get. Ed in the Antient Scottish is to get, K. Et, the Affinity is obvious. This might

be also enlarged upon.

Doolah, Water, in the Antient Scottish; Tuil is a Deluge, or Flood of Water. Magis & minus non variant speciem.

Doolah A 2

Doolah copah? Will you drink Water? Ceobach, in the Antient Scottish, is Drunkenness; and Capa, Capan, Cuib, Cupa and Copan, is a Cup, all which are

relative to drinking.

Chicha Copah, Maiz Drink; this they found Theetsha. This is a Kind of artificial Drink, described by several Historians; and both the Word and Thing seem to have no small Affinity to the Greek Zvbos, the Latin Zythus, and our vulgar Swats, or new Ale. The Greeks have Zzw and Zva, ferves, in our vulgar to seethe, and all these seem Imitations of the Sound of sermented Liquor, when it is a working; of which Sort this is.

Mamaubah, fine, or very good; this some who were there say, they constantly pronounce Mamappah; this seems to be the Effect of their affecting so much the Letter P. The Word seems to be a doubling the Antient Scottish, Ma, good, and adding Ba, also good, changing it into Pa, as the Americans do; so that 'tis a tripling the Word good. Another Gentleman I have heard sound it mamauba, as if ma ma ba.

Cah, Pepper; I know no British Word a-kin in sound, which signifies Pepper, yea, nor any in the Languages of the old World. In the new World the Brasilians have Caim in the same Sense,

as Megiserus says.

Au pab Eenab has a plain Affinity to the Wellh,

and imports what Name is he, or it, of.

I know nothing now untouch'd but what is contained in that Phrase Bidama Soquah Roopah, which others, would read Bai da ma, &c. How do you do? &c. Bai may be reconciled to the Welsh Pa, and the Cornish, and Armoric Ba Interrogatives.

Da, is; has a plain Affinity to the Antient Scottish Ta, is; and ma my to the Antient Scottish mo, which also signifies my.

Soguah

Soquab Roopab are the only two remaining Words; these might furnish Matter of much Discourse; Roopab I touch'd elsewhere. Soquab has an Affinity to another American Word, which signifies to love, and to several Antient Scottish Words, which are Expressions of Endearment: So that this Sentence might be improved to show an Agreement, even in Phraseology, betwixt these Americans and the Antient Britons. An antient Scot, when he speaks of his Brother, very often adds the Epithet Dear, which these Americans it seems also do; for, I think, I could prove this to be meant by Soquab Roopah.

Bi da ma soquab roopab, seems, Word for Word, to signify, How is my beloved (or blythe) Brother? Soquab certainly is a Word that imports something good and kind; for of that Nature are the Epithets which Men use in speaking to so near

Relations.

Labortan, in his Dictionary of the Algorkin-American, has the Word Sakia, to love; the Word Soquab is a-kin to it in Sound, and by its Situation here we may infer it to be a-kin in Sense also, and both these seem to be a-kin to our English Word Sake, which we have Reason to think has antiently fignified Love; so we say to do such a Thing for the Sake of fuch a one, is to do it for the Love we bear to him. If it be alledged, that in that Phrase, Sake may fignify Cause; I anfwer, that Cais in the Antient Scottish fignifies alfo Love, and perhaps this may be the Meaning of it in that Way of speaking; so that the Phraseology of this American Sentence feems to be precifely the same with that of the Ancient Scots; for the Ancient Scots say, How do you, dear Brother? And the other says, How do you, beloved Brother?

The Indian Sequal may be also easily reconciled to the Antient Seottish Sogb, Prosperity, good Cheer, Dainties,

Dainties, and Soagh, or Suaigh, prosperous, successful, which are the same with Sona, prosperous, blessed, happy; whence comes the Antient Scottish Sonas, Prosperity, Happiness: Hence is our vulgar sonse, sonse, and these again seem to be a-kin to Son, Cause, Sake, Love. And it seems not improbable, that the literal Meaning of Bida ma Soquab Roopah, may be, How does my sonsy

little one, or Brother?

The Antient Scottish So, in Composition especially, and which I take to be the Contraction of Sogh, (for gh, Times without Number, is not sounded strongly, either in the English or Antient Scottish) seems to be much the same with sw in Greek, and bene in Latin, in Sense; (which last, by the By, seems to be easily reconcilable to the Ancient Scottish, bin, sweet) I say this so or sogh, in Compounds, signifies good, precious, or dear, which agrees to our present Purpose: So they say Soigheam, for a precious or dear Stone; the latter Part of the Word is the same with the Latin Gemma, the former is precious or good, for so Lhuyd explains it, Geam mbaith, or Cloch uasal mbaith, in Effect a dear Jewel, a Phrase often used with Respect to these whom we highly esseem and love.

I could enlarge much more on this, and both confirm what is above, and prepare for what is to follow, by attempting the Etymology of this Word, which may be very well from the Antient Scottish Og, young, with the Sibilus prefixed to it, or the Article se, which they do Times beyond Number, and then incorporate it with the Word; and Youth being disposed more strongly to Cheerfulness and Mirth, and it being natural for the elder (for Love descends) to wish well to the younger, the Words that are a-kin to it, may lignify cheerful, merry, prosperous, beloved, &c.

I could throw more Light into this Word out of other Words of the Antient Scottish, and into others of this American Vocabulary, but I must contract, and come to the other Word Roopah, which I have left to the last, because, if Need be, I could say very much about it. I tell in another Letter, that I conceive this to have an Affinity to an Antient Scottish Word, which fignifies very little, and to two Welfh Words which import the same: I also gave it as my Opinion, that this Word primarily denotes the younger Brother, and might be afterwards transferred to fignify a Brother, generally speaking. To confirm this I tell, that the American Brasilians have one Word to fignify the elder Brother, whom they call Request, and another to fignify the younger Brother, whom they call Rebure; the former feems to be compounded of Rae or Re, a superlative Article, and Ceid K. Ceit, the former, or first, which are sounded Keid and Keit, according to the Rules laid down before; and the Ancient Scots have no qu.

The latter Rebure is made up of the same Rae or Re, and bear in the antient Scottish, short, little. Their Diphthong ea, Times without Number, when it passes into other Languages, is changed into u. Now Rebure in Sense is the same as Roopab in the American, and Rubbag, very small, in Ancient Scottish, and Rhwybach in Welsh; nor does it differ much in Sound, the Letter r being much affected by some Nations. The second Part of it bure, is not far from the Latin Puer. I could alledge some Things to show, that the ratio of the two Latin Words Aba and ger-

manus did correspond to this.

The American Words end in a, which the British want; this was also the Way of the Saxons and old English, in Compare with our modern Pronunciation, as we see in Benson and Lhuyd.

T 8 ] .

The Affinity betwixt the Indian and British Words will appear the more easily, if we write the first as a North Briton, or other European would do the same Sounds, which I have done in the following Table, and placed the British Words opposite to them, which are a-kin in Sense.

N. B. That K. stands for the Kildan Dialect; W. for the Welsh, and A. Sc. for the Antient Scotish.

Tatab, Father. Nanah, Mother. Punah, Woman.

Rupab, Brother.

Bai or Pai, how. Da, is.

Ma, my. Soquab.

Neenah, a Girl. Nee, the Moon. Thanah, go.

Weemacah. Shannorung, big, a great Shean ogh roinn, A. Sc.

Thing. Eecha, or Eetsha, ugly. Pa, an Interrogative. Cotcha, or Cotscha, Sleep. Capa, a Hammock.

Eetab, get. Dulah, Water. Copab, Drink. Mamaba, fine.

A. Eenah, to call.

9.11

Tat. K. Tad. Taduys. W. Nainn and Naing, A. Sc. Bun, W. Bean, A.Sc. Rhwybach, very little, W. Rubbag and Robeag, A.Sc. Pa, W.

Ta, A. Sc. Mo, A. Sc. Sogh, A.Sc. Neenae, A.Sc. N'ei', A. Sc. Shan or Shean.

Eemig or Imthig. Great, big, Part.

Etisha, A. Sc. Pa, W.

Cwsg, W. Codladb, A. Sc. Caba, a Cloak, a Cover4

ing. Ed, A.Sc. Et, K. Tuil, a Flood, A.Sc. Ceobach, Drunkenness, A. Sc. Ma, ma, ba, good, good, good.

A. W. Interrogative. Enwi, W. to name.

FINIS.

#### 

## To H. E. J. G. E. G. of S. C.

SIR,

Have in some foregoing Letters shown the Affinity betwixt these Words of the Terra firma of America, which Mr. Wafer gives us in his Description of its Isthmus', and which Hubner and some other Authors represent as the first Province of that Terra firma; and these of the ancient Britons, I mean, the ancient Scots and Welsh. I might have attempted the same Thing as to some other Words which I have collected by conversing with these Gentlemen of our Country who were in the Darien Expedition about the End of the last Century. I have carefully fought out, and I believe found, all these of them who are in or near to this City, and frequently conversed with them, and vet continue to do upon Occasions. From these I have learned the Way how the Americans pronounce the Vocables in Wafer, which otherwise I might readily have mistaken, to wit, if I had founded them as other exotick Words which are written after the same or in a like Manner.

From these I have also learned some few Words more; and among them I have found one of the Roots of the Latin Language better, and more plainly preserved than I believe is to be found anywhere else; tho', when I come to speak of it, I hope to show that both the ancient Scots and Welfb have Words a-kin to it. It may probably feem very

5 5 5 **Atrange**  ftrange to some, that a lost Root, or (as learned Men call them) one of the Radices deperditæ of the Roman Tongue, should be preserved better at such a vast Distance than anywhere else: But I am consident, that you, whom I always sound ingenuous and candid, and open to Light and Conviction, and a great Favourer and Promoter of valuable Knowledge and Learning, will agree to it, when you hear it; yea, I hope to show, that that American Word is sounded upon Reason, as many other Words are; tho' this be a Thing which has been very little or not at all observed heretofore, as far as I know.

If I am not mistaken, you delight much in ingenious Discoveries of all Kinds; and there are not a few of these who have had the Advantage of liberal Education, who take Pleasure in judicious Criticisms even upon the Latin Language. Yet, seeing I am told, that, besides these whom I have already conversed with, there are some others of very good Families, and who have diftinguish'd themfelves in their feveral Spheres, who yet furvive in fome distant Places of the Country, and from whom, by what I have heard of them, and the small Acquaintance I myself had once with some of them, I may expect every Thing that's gentlemanly, and a Readiness to promote every Thing that tends to the Support of Religion and Learning, especially when connected with the Honour and Benefit of their Country: For this Reason, and in the Hopes I may augment my Stock of American Knowledge, I delay the Writing about these, and shall essay first to entertain you with some Things which to me feem more strange, to wit, the explaining proper

(3)

Names which we meet with in the Accounts of A-merica out of the ancient British Language. E. S.

I have already hinted at this, in that Passage taken out of the Turkish Spy cited in the Letter to the H. G. V. E.

It is true, there are some very general Mistakes (as I think) about that Book and Author, which perhaps I may afterwards set in a better Light: But

I referve these to their proper Place.

Seeing his Majesty hath chosen you to be Governor of one of his most considerable Provinces in his American Dominions, and you are in a short Time to sail thither, I embrace this Opportunity of testifying the grateful Sense I have of your manifold Civilities to me, and at the same Time I pursue my main Purpose of shewing more and more the Affinity betwixt the ancient Britons and Americans.

You were pleased to honour me, with the Concurrence of the other Magistrates of your Town, with the Burgesship of Linlithgow and some other Civilities, upon my presenting an Etymological Epigram upon that Place. You were pleased to testify very great Esteem and Friendship at London, particularly in the Meetings of that very Learned and Polite Body, the Society of the British Antiquaries, whom I have all the Reason in the World to remember with the greatest Honour and Respect. There you were pleased to give me Elogiums far above what I deserve, and which I had Reason to be ashamed of, as also in every other Place where I had the good Fortune to see you.

These are sufficient Reasons for me to inscribe this to you, in which I endeavour to show, that the Names of Places and Persons in America are significant, according to their Natures in the old British

(4)

Languages; I mean, these of the Terra sirma, and the adjacent Countries and Isles. This, I hope, will be the more acceptable and entertaining to you, that the whole of what I write tends to prove that the Americans are descended from the same common Parents with the Inha-

bitants of the old Continent.

But tho' my chief Purpose be to explain the proper Names in the Terra firma, yet, in the Way to this, I shall speak a little to these Places which Columbus and the Spaniards first discovered, which were these Islands which are called the Anvilles; a general Word, which in our large Maps comprehends all these Islands which we see beyond Bermudas towards the Gulf of Mexico, and may take in the Lucaian, the Bahama and the Caribee Isles. The Word Antilles is very suitable to them, signifying Water-lands: For An is Water, and Tealla Land, in the A. Sc. Tealls is the same with the Latin Tellus; and indeed the Word, which signifies an Island, in many Languages imports Water-land.

The particular Place where Columbus and the Spaniards first landed is called by Wytsleet in his Augmentum Ptolemaicæ, Descriptions or Supplement to Prolemy's Geography, p. m. 11. Cuanabi or Guanabani. Now, both these American Words figuisty the same Thing, to wit, a Bay or Harbour or Sea of Water; for Cuan is a Bay or Haven, and Ab is an old Scots Word for Cuar is a be met with in this Sense in Martin's Description of the Western Isles, as also in Doctor Irvine's Nomenclasura, in the Word Avus, which is the Name of a Water in Argyll Shire, as Abus signifies the Hum-

ber, that great River in England.

Gnanahani fignifies the fame Thing; for Gnan is the fame with Cnan, C and G being both Palate-Letters, and An, or with the Aspiration Han, is Water; or thus, Guannahan, the Bay of Water: The I at the

End feems to be the American Termination.

It is very obvious, that this was a very fit Name for a Place into which they put in with their Ships, and landed their Men: In the old World, there were many Names which imported the same Thing, such as characteristics.

thusag

hing elfe but Caladh Vi

thusa, which is nothing else but Caladh, Kild Calath, a Harbour, and Uise, Water.

a Harbour, and Uifg, Water.

I think I could in like Manner explain the Words Lucaian, Caribee and Bahama, each of which comprize a Clustre of Islands; but I must not now dwell upon these. But there is a Story related by the same Wytseet in the foresaid Book, which seems to deserve Notice, and can't but be somewhat entertaining to every true-hearted Briton, and especially to every Caledonian, and consequently to you who are so great a Lover of your Country; to wit, about Saint Andrew's Cross, which is said to be had in high Veneration among these American Islanders: It will be a little diverting in the Midst of Etymologies, which, tho' sought after by and agreeable to the Curious and Rational, yet to many others are but dry and insipid; which is one Reason why I intermingle some other Things frequently with them.

Take it in the Sense of Wytsleet, thus, p. m. 12. which in Substance amounts to this, &c. when the Spaniards were in the Magna Insula Indice Hayti.

"When the Bell rung for Evening-Prayers, the Spa-" niards, according to Custom, bowed their Knees, " and fign'd themselves with the Cross. The Indians " did imitate them with great Reverence, falling down " on their Knees, and joining their Hands together (rather, as I think, for Imitation than for any other " Reason) tho' there are severals who think, that the " Indians had the Cross in Veneration long before the " Arrival of Columbui. Gomara, Book 3. Chap. 32. " tells, That Saint Andrew's Cross, which is the same "with that of Burgundy, was in very great Venera-"tion among the Cumans, and that they fortified them-" felves with the Crofs against the Incursions of evil spirits, and were in use to put them upon new-born "Infants; which Thing very justly deserves Admira-"tion. Neither can it be conceived how such a Rite flould prevail among Savages, unless they have se learned this Adoration of the Cross from Mariners or strangers, who, being carried thither by the Violence of Tempests, have died or been buried there; which without all Doubt would have also happened to that Andalusan Pilot who died in the House of Columbus, unless he had been very skilful in Sea-affairs, and so had observed his Course when he was hurried away with the Force of the Storms: It is very credible, that many of these who are generally reckoned to have been foundered at Sea did really meet with Accidents of this Kind. But the Accusamilenses bring another Reason of adoring the Cross, and which seems nearer Truth, to wit, That they had received by Tradition from their Foresathers, that formerly a Man more glorious than the Sun had passed through these Countries, and suffered on a Cross."

Before I leave these Islands, it may not be amiss to take Notice of the Indian Name of Hispaniola, which is so famous in all the American Histories, and is very large in Compare with many of its neighbouring Isles; it is called Hayti, or, without the Aspiration, Ayti, as Wytsleet writes it. Now, I or Jagh is an Island; so I Columkill is the Isle of Columkill: This a South-Briton would sound as Ai or Ay; and Ti is great in the Kilda Dialect, and Di in the vulgar Shape: And I very well remember, that a certain Nobleman, whom I very much honour, told me, That he had a little before been reading an Account of the Antilles, and that he had observed that Di signified a great Man or a Lord among them.

And this perhaps is what is meant by the Dey of Al-

giers, &e. the Lord or great One of Algiers.

It may not be amiss to take Notice, that they gave to their Kings the Name of Cazique, which Authors oft write Cacique. This has a great Affinity in its Pronunciation to the ancient Scottist Gaisghe, Kild Caische, signifying valorous or valiant. Now, Words of this Signification were much used in the Designations of Princes in several Parts of the World: So Galgacus, the Name which Tacitus gives to the General or Prince of the Caledonians, signifies the same Thing. Vide Lhuyd's Dictionary. I could show that the other Words,

(7)

Words, which the *Indians* used to fignify their Princes, amounted to the same Thing: But I must not now dwell long upon these Islands. Let us now steer our Course towards the *Terra firma*: And first, to that Part of it which *Hubner* describes before the rest, and where our brave, tho unfortunate, *Caledonians* did first land, and where they beyond all Question did display the Saint *Andrew's* Cross in their Colours, as my Friend Captain *William Murray* assures me they did, who was himself their Standard-bearer, as others of them also have told me, during the whole Time he was there, and is indeed a Gentleman as brave as his Sword.

The first Part of that Country which offers itself to View is that high Mountain which I mentioned before, to wit, Tapaconnti, as our Europeans called it to me: This is overgrown with great and tall Trees up to the very Top, as Waser, and Mr. Borland a Scottish Minister who was in that Expedition, write of all the Hills there. Now, Taip in A. Sc. is a Mass or Heap, and in Welsh it is a Rock or Cliff. Conn or Connadh is in A. Sc. Wood, and Ti in the Kilda Dialect is Great, in the vulgar Di. Tap is also in A. Sc. the Top of a Mountain, as well as in vulgar Scottish, as I am told by a

very good Hand.

The next Thing we meet in the Way are some Islands scattered along the Coast, called by Waser and others, Sanbalas or Sanbalos. This seems compounded of three A. Sc. Words, Se An Bala: Se is The, An is Water, and Ball a Place, The Water-Places; which, how sit a Word it is to signify Islands, I leave to every Person to

judge.

The next Thing we may observe here is the great River of Darien, which is otherwise named the Gulf of Uraba, as we may see in Wysflees and Borland's Books and Maps. Now, I told in one of my former Letters, that Darien in the A. Sc. very fitly signifies a great Water; Dear is great, and Inn Water: And that it really is so, I appeal to all Authors, and particularly Waser, who, when he mentions it, still speaks of it as a great River.

And that this is the Benuine Meaning of the Word,

we may the more readily believe, that this is also the Signification of the other synonimous Word, The Gulph of Uraba, which last Word also signifies great Water. That Ab signifies Water we have already observed, in explaining the Word Cnanabi: Ur may also signify Great in A. Sc. Mr. Lbuyd has in his Dictionary Ur Noble, and Er Great, which are a-kin both in Sense and Sound. And Mr. Ray, in his Treatise of Quadrupeds, tells us, that Ur in the Teutonick did signify Great, which is also a Sister-Language. See p. 70. Urus Germ. Urocks vel Aurocks. Ur enim vel Sylvestrem, vel Magnum, & Vastum, & Maximarum Virium Germ. Antiquis significabat.

Cæsar de Bello Gallico, Lib. Qui Uri appellantur Magnitudine sunt Paulo infra Elephantos Specie, & Colore, & Figura Taurorum. Magna vis est eorum, & magna Velocitas, Amplitudo Cornuum, & Figura, & Species, multum a nostrorum Boum Cornibus differt. Mentzeli Epham. Germ. Dea. 2. Ann. 2. Obs. 7. Urus, vastum, Prægrande & Aspestu, Horrendum, Sylvestrium Boum Genus, Borussa, Livonie, &c. Incola. Non infrequens pugnantium cum Urss, Apris, &c. Regiomenti Borussorum exhibitum Spectaculum: Cum occiditur Cerebrum, Craniumque Mas-

chum penitus reddebet.

By this we may fee, that *Uraba* may very probably fignify the great Water, and fo it is fynonimous to the Name *Darien*: And without all Doubt it is a very great Argument of the Truth of an Etymology, when the feveral fynonimous Words fignify the fame Thing.

I could easily go on and explain the Names of other Rivers, and some Things else mentioned by the Describers of this Ishmus: But these may be the Subject of other Letters, especially if I also speak to the Affinity in Custom between these Americans and our ancient Britons. I am

T. E's very bumble and

very much obliged Servant;

# To the H. G. V. E.

SIR,

of other Learning, and of the World, your incomparable Sagacity, and a very extraordinary Measure of good Sense (an excellent Fund to build on) you are better acquainted,

not only with the History, but with the Language of Wales, than any I hear of in this Country: You are the most capable to judge of its Worth, and its Affinity to the learned and other Languages, particularly that of the Terra Firma of America. You have been so good as to hear me speak upon Wafer's Vocabulary of the Isthmus, and obliged me with your own judicious Remarks: You have also given me the Use of Books proper to affish me in my Enquiries: You have favoured me, oftner than I can pretend to deserve, with your very instructive and most agreeable Conversation.

Moreover, you have been otherwise so great and good a Friend to me and mine, that I think it both my Duty and Honour to own it to the World, and thank you for it; and, at the same Time, beg you'll forgive me for inscribing this Letter to you, seeing you are so good a Judge of the Subject.

matter of it.

I am pursuing one of the noblest Designs, which is, to desend the Account given by the holy Scriptures of the Origination of Mankind, and which is connected with the most important Truths of reveal'd Religion, against an Objection of its Adversaries, which, as far as I know, has not been very distinctly considered heretofore.

( 2 )

To be a Defender of the Faith, is a Title which the greatest Monarchs affect under one Shape or other: To be subservient to them, and to co-operate with them in so good a Work in any Measure, wants not its Degree of Honour. You have heretofore bravely desended it by your Sword; I hope you will not now be wanting to do it by your Word.

The Welf Language is little studied in North-Britain: This has been a mighty Loss to the Learned, especially the Antiquaries here. We have Difficulty to find out Helps needful to it; Davies's Dictionary was esteemed the best when I began my Enquiries. I could not find any one Copy of it here; nor could I hear of it in any of our Libraries, either private or publick. I informed the R—t H—le the E. of , who was so good as to procure a Copy at London, and send it hither. This I mention in Gratitude to that very great and noble Lord.

I have been at much Pains to meet with Gentlemen, particularly in the Army, who understood that Language to some Perfection; but never had that Satisfaction, till I had the good Fortune to be

known to you.

The Knowledge of the Welfb is highly necessary, and of very great Use to understand the high Antiquities of the Scots, as also these of the Pists, whose Language is more a-kin to the Welfb than that of the ancient Scots; and it is evident to any who reads Mr. Innes's Books, that it must be of great Use to understand what he writes of. That Gentleman seems plainly to have conceived Schemes in his Mind hurtful to the State and the several established Churches here: If we would defeat these, we must enquire into our most ancient Languages, of which the Welfb is one.

But

But this may be spoke of at another Time. At present it is necessary, at least helpful, to repel an Objection against Revelation, from the Case of the Americans, and to show an Affinity to their Language in some Words where the ancient Scottish falls short, at least comes not fully up to it.

This will appear if we advert to the very first Word in Wafer's List, as also to the last Sentence

of it, besides some intermediate ones.

The very first Word of his Specimen is Tautah, in the American signifying a Father. The Affinity of this to the vulgar Irish Dad is not so nigh as to the Welsh Tad or Taduys. The other Welsh Dialects are like this: The Armorick is Tat: The Cornish have both Tad and Taz, they and several others easily passing from the dental to the sibilating Letters.

To reconcile the ancient Scottist Dad to this, we must have Recourse to that great Rule, Litera ejustem organi facile commutantur, or, Like Letters are often used for one another. But the St. Kilda Dialect comes nearer, to wit, Tat; for they wanted D, and still substituted T for it. This is one Instance of the Usefulness of it beyond the

vulgar Irish.

This Word in one Shape or other is pretty universal in the Languages both of the old and new World; which is a very great Argument that the Inhabitants of both are descended from one common Father, as this Word Tata signifies. Gage, in his Survey of the West-indies, gives us a Pocoman Grammar, where we find Tat in this same Meaning in the Speech of Guatimala.

In the old Continent we find it in Italy, Tata; for which fee Latin Dictionaries, or Lhuyd in his Compar. Vocabul. In Egypt Dade, as Megiferus tells us in the Word Pater. The Greek Tetta is

(4)

but another Shape of it. By a little Train of Reasoning, I think, I could also shew it to have been used thro' several very extended Countries here: The vulgar Lowland Scots have Dad or Ded, and Daddy or Deddy. But I pass on to another, viz.

Poonah or Punah, Woman. The Affinity of this to the Welsh Bun, Famina, Virgo, as Davies has it, is more obvious than to the A. Sc. Bean

fignifying the fame Thing.

The English Word Puny I take to be derived from the Welsh Bun. The Words which fignify a Woman, in many Languages, feem to be relative to these which signify Little, which I could easily show; and the Reason is obvious, the Female ordinarily is the lesser of the Sexes. I am not sure how our English Etymologists account for this Word; but I am very sure, that our two ancientest Languages throw more Light into our Mother-Tongue than has been observed hitherto.

Cotcha, Sleep, is another American Word, which feems to have a nearer Affinity to the Welfe than to the ancient Scottife: They found it Cotfeha, which, taking away the American Termination, is not far from the Welfe Cwsg, Somnus or Sleep, as Davies has it. It is very easy by a little Reasoning to bring these very near to one another: And indeed they are very little farther distant than the Chaunah or Islandh, above spoken of, is from Shan; which, I hope, I have shown to be very much a-kin.

By a little further Reasoning I could reconcile this also to the ancient Scottish Codladh, Sleep, which they pronounce Caddil, and its Kindred Words: Yea, I could with no great Difficulty reconcile it with the Greek www, dormio, or, I sleep: Yea, I could show that it is a-kin to the latter Part of the Word Diacodium, which is a Potion for Sleep, being the Syrup of white Poppies; and, by the

(5)

the by, the Poppy being an Herb that causes Sleep, is called in the ancient Scottish Godlainan.

I could also reconcile both the American Cothfehah and the Welfh Cwsg, Sleep, to the Irish Coifg and Cosc, which signify to be silent, to quiet or pacify: Yea, I could easily show their Assinity to the Latin Quies and Quiesco, quiet and to be quiet.

These Things I mention for two Reasons: First, To dispose Men to lay aside a very universal and inveterate Mistake about Languages, and the Difficulty of acquiring them. 2dly, To show that our ancient Languages here either have an Affinity unto, or serve to illustrate some other Languages, the Greek and Latin not excepted. And confequently the ancient Scots and Welsh possess an Advantage which might be improved to render them the most knowing and learned, and so the most polite and civil, yea, the most virtuous and religious People in the World: And these Persons and Societies who would generously promote this, would purchase to themselves immortal Honour even in this World, besides the glorious Hopes of a Happiness in the World to come.

Aupah Eenah? What do you call it? is an American Sentence, which has the most plain and obvious Affinity to the Welsh, yea to a Welsh Phrase. Au or A is a Sound frequently set before Words, without changing their Signification, even in our vulgar Language: It is of the same Use in Welsh. Davies, in the very first Paragraph of his Dictionary, tells us, A est adverbium, seu particula verbis præposita, nihil significans; and gives Examples of it there. In the same Place he tells us it is ad-

verbium interrogandi.

It is capable of being taken either of these Ways here, for the Words are plainly an Interrogation or Question. Pab is obviously the same with the Welsh Pa

(6)

Pa their ordinary Interrogative, which is sometimes varied into Pwy or Puy: The Cornish use both Pa and Ba, and these of Bretagne in France Pe and Peth. I mention these, because I reckon we meet with it in one of these Shapes in another of Waser's Phrases; Bidama soqua Roopah? How do you Brother?

Eenah, the other Word, has a very obvious Affinity to the Welfh and Armorick Hena, a Name, and Henui, to name: These are also writ Enw and Enwi; these are all in Davies's Dictionary. Yea, Lhuyd has under the Word Nomino, Pe hanui, which I take to be Quomodo nominas? or, How do you name it? in Armorick. And, if I mistake not, I heard a Welfh Gentleman, whom I very much esteem, say, that Pa enw was used to signify, What Name is he of? And how nigh these are both in Sound and Sense to Pah eenah, I might refer to Momus him-

felf to judge.

Roopah, Brother, is a Word which might afford Matter of much Discourse, which I now incline to wave, and to offer these Things to be considered. The Americans, these of Brazil for Example, as Megiserus says, used one Word to signify the elder Brother, another to signify the younger: The former of these in its Meaning seems to correspond to the Import of the Latin Aba, tho' not in Sound; the latter seems to signify very short, or little. Now, in this last Sense, Roopah, allowing for the American P in Place of B, is easily reconcileable to the ancient Scottish Rubhag, very small, otherwise Robheay; as also to the Welsh Rhwy Bach, very small: And I suspect this primarily was the Import of the Latin Germanus, tho'now they have deviated a little from it.

To relieve you a little from these Severities of Criticism, forgive me if I add a Citation out of a diverting Book, the *Turkish Spy*, Vol. 8. P. m. 159. where, speaking of the King of *England*, he

has

(7)

has fome Things a-kin to what I am writing, tho' I cannot take upon me to answer for the Whole.

This Prince, as I have faid before, has feveral Nations under his Dominion; and 'tis thought he fearce knows the just Extent of his Territories in America. There is a Region in that Continent inhabited by a People whom they call Tascoraras and Doegs: Their Language is the same as is spoken by the British or Welsh; a Nation that formerly possessed all the Island of Great Britain, but were by Degrees driven out of it into a mountaneous Corner of the Island, where their Posterity remain to this Day.

to this Day.

Those Tuscoraras and Doegs of America are thought to descend from them, being the Posterity of fuch as followed the Fortune of one Madoc a British Prince; who, about Five or Six hundred Years ago, being discontented at home, resolv'd to feek Adventures abroad. Wherefore, being provided with Ships and all other Necessaries, he made a Voyage toward the West over the Atlantick Ocean, not knowing what would be the Event of his Undertaking. However, the Moon had scarce twice compleated her Voyage through the Zodiack. when an End was put to his on the Sea, by landing in America; where he planted a Colony of Britons, and then returned to his native Country: But foon after he put to Sea again, and failed directly to the fame Place. What became of him afterwards is not certainly known; but the Inhabitants of that Province have a Tradition, That he liv'd to a great Age, and saw his People multiplied to many Thousands before be died: For the second Voyage he carried over British Women with him, for the Sake of Posterity. They shew his Tomb to this Day; with Beads, Crucifixes and other Relicts.

Tis certain, that, when the Spaniards first con-

quered Mexico, they were surprised to hear the Inhabitants discourse of a strange People that formerly came thither in Corraughs, who taught them the Knowledge of God and of Immortality; instructed them also in Virtue and Morality, and prescribed holy Rites and Ceremonies of Religion. 'Tis remarkable also what an Indian King said to a Spamiard; viz. " That in foregoing Ages a strange " People arrived there by Sea, to whom his Ance-" ftors gave hospitable Entertainment, in regard " they found them Men of Wit and Courage, en-" dued also with many other Excellencies; but he " could give no Account of their Original or Name." And Montezuma, Emperor of Mexico, told Fernando Cortez, the Spanish King's Ambassador and General in those Parts, "That his own Ancestors 1 landed there as Strangers, being conducted by a certain great Man, who tarried there a While, and "then departed, having left a confiderable Number of his Followers behind him. After a Year, he " returned again with a greater Company; and " that from him the Emperors of Mexico derived " their Pedigree, and his Subjects from the rest." The British Language is so prevalent here, that the very Towns, Bridges, Beafts, Birds, Rivers, Hills, &c. are called by British or Welsh Names. And a certain Inhabitant of Virginia (a Place subject to the King of Great Britain) flraggling not long ago into the Wilderness, by Chance fell amongst a People, who, according to some Law or Custom of theirs, condemned him to Death; when he, in the Hearing of them, made his Prayer to God in the British Tongue, upon which he was released. I am,

With great Respect,

SIR,

Your very humble and much oblig

Your very humble and much obliged Servant, C.

### 

#### To W. M. E. of M.

SIR,

ONE of the ancient Languages of the British Islands was your Mother-Tongue; but you have, partly by Conversation, and very much by Reading, especially since I had the Honour

of your Acquaintance, so much improved yourself in the Knowledge of the ancient Scottish or Caledonian or Albanian, which is the Language of your Country, and indeed the most valuable of all the Celtick Dialects, and a-kin to the Irish, that I can't help thinking, that you are not inserior to any Person alive (without disparaging any other) both in discerning its great Beauties, and perceiving its great Usefulness: By this you have laid a more deep and a more folid Foundation for a larger and more glorious Superstructure of Learning, than is commonly done. It were to be wished that many others, according to their several Stations and Situations, would imitate the laudable Example.

You have already, according to your Years, built fo much upon it, that you far furpals in the folid Knowledge of much Learning, and especially of Antiquity, all your Cotemporaries, as far as I know. I hope you'll still go on to make a good Use of these noble Talents which Heaven has so liberally blessed you with, for the Honour of your Country, the Benefit of Mankind, and the Support and Desence of Religion: The Basis you have

laid

laid will bear up a magnificent and beautiful Fabrick.

I have of a long Time confidered you as one of the best Judges of every Thing which has a Connection with that Language: It has been all along a great Pleasure to me to find, that you approved my Schemes, and that you were a Champion for them against Ignorance, Pedantry, Envy and Avarice, the discovering themselves in very great Names.

It is Matter of very great Joy to me, that you express yourself so very well satisfied with these Things which are contained in these Letters which I have caused print; and I am very confident, you will be no less pleased with what I am now about

to do.

The Interests of our Country, of Learning and of Religion, are of all the most important without all Question. I have endeavoured to promote these; at least, these I have had in View in the whole that I have printed.

I have hinted fome Things which have a Tendency to rescue the Antiquities of the Břitish Isles from Fable, and to dispel some of these Clouds in which they have been involved, and to place them

in a clearer Light than heretofore.

I have touched upon some of the good Uses we may make of them, but I have not enlarged upon

either the one or the other.

No Person knows better the Importance of those Things than you do. These romantick Schemes of our Antiquities which have hitherto prevailed, among other Evils, contained in them the everlasting Seeds of unjust Quarrels, Wars and Disputes, between the several States, yea, and established

(3)

shed Churches in these Islands. Our Histories, both ancient and modern, are full of these Things: Witness particularly these which happened in the Thirteenth and Fourteenth Centuries, at which Time Sir Thomas Craig computes that no less than 300000 lost their Lives; which might very well be in the Space of fixty Years, during which these Confusions lasted. When this greater Island was in a Manner a Field of Blood, the Contagion did also reach to the lesser Isle, tho' it did not, as far as I know, make such proportionable Havock there; yet all these had their Rise from ambitious Claims, sounded on mere Fables: So great Power hath the Prince of Darkness over corrupt Mortals.

Some learned Doctors and other Gentlemen have thought fit to adopt these Fables so far, as to bring them in into our religious Debates about Churchgovernment; tho' others, even of the same Sentiments with them, have given them no Thanks for it, and considered them, not as Friends but rather as Enemies to their Cause, who would make the World believe it was connected with such Fi-

ctions.

And, tho' many of these learned Persons were in a special Manner obliged to the Royal Family, and professed a greater Regard to it than others, yet they did so far dishonour it, as rashly to dissown its Antiquity; tho' a Prince of that Line is expressly mentioned by Tacitus, the ancientest foreign Author who speaks with any tolerable Distinctness of the Northern Part of this Isle, into which no other Nation had before that Time penetrated that we know of.

The fame learned Gentlemen not only facrifice the Honour and Antiquity of the Royal Line to A 2 their their Hypotheses, but also that of this whole Nation, tho' these were indeed the very first Inhabitants of this Island, the first who came from France to the Southern Parts of it, from whence they spread themselves over the Whole: Yea, it may be faid further, that these are the Descendents of the first Colonies of Mankind, who took their Departure from these Eastern Countries where the Ark rested after the Flood, and journied towards the West, and brought along with them that ancient Language which then prevailed in the East, and have preserved it better than any others have done; which is apparent from its greater Simplicity, and its abounding more with guttural Sounds (which is acknowledged to be a Mark of the Antiquity of a Language) than others: To which we may add its great Usefulness in illustrating so many Antiquities and Languages; in which respect it excels all others known in this Part of the World.

So that in my Letters I have also done one of the most important Services to the Common-wealth of Learning, to wit, by pointing out so particularly a most ancient Shape of Language, and which is of so vast Use, to wit, that of St. Kilda, which is the most simple Dialect of the old Caledonian; which I have already in Part, and which afterwards I may more fully prove to be the Language of these People whom J. Casar calls Celta, or ancient

Gauls.

The Learned have been at very great Pains to discover the most ancient and simple Shape of Language, and are divided in their Opinions about it: Some declare for the Aramæan, which in the Sense of the Learned takes in the Chaldee, and Syriack which is a-kin to it, supposing it to be that of the Country

(5)

Country where Babel was built, and from whence Men were fcattered abroad over the Face of the whole Earth, and that in which some of the inspired

Parts of holy Writ are recorded.

This with very good Reason is judged to be the Language of Abraham and his Family before he came into Canaan, as also of Laban the Syrian, and so of Jacob's Wives, his Daughters and their Children at first. Long after this, some of the most ancient Paraphrases and Explications of the Old Testament were writ in it. And, in a more modern Shape, this is reckoned to be the Language which our blessed Redeemer spoke while on Earth, as also that of the most ancient Translation of the

New Testament now extant.

Others again declare for the Hebrew; which is the Chanel in which the most ancient Parts of Divine Revelation now extant are conveyed to us, and which, after Bochart and some other Learned, is now generally acknowledged to be the same or very near a-kin to that of the Phanicians and Canaanites. 'Tis a Pity this Language should be understood by so few among us: But I have allowed feveral ingenious Men, and more especially these Committees appointed by the Commissions of the General Assemblies to converse with me about these Affairs, to name what Passages of the Old Testament they pleased for Trial of this; and, after the most strict Examination they thought fit to take, they acknowledged, that I did show that our own old Languages were simpler in Sound and Sense (as is to be seen in the Collection of Papers in the Appendix) and did illustrate these Passages of the Old Testament. The Importance of this I leave to be confidered by all who have any Value for these inestimable

(6)

estimable Books; especially if they also remember, that I shewed the Usefulness of our old Languages in illustrating the Greek of the New Testament: And I take this Opportunity to add, that I am of the Mind, that this Language is a Help to illustrate some important Passages both of the Old and New Testaments, which have not been hitherto sufficiently understood; which

I shall be ready to show, if required.

In the last Age, a learned Gentleman published an Essay to prove the Language of China to be the primitive Speech of Mankind. The Arguments he uses are by no Means to be despised; but they are mostly taken from Things, as far as I remember, external to the Nature of that Language, and not from the Language itself; about which we could form a better Judgment if he had given the World a copious Vocabulary of the Words themselves, which he did not do in that Book nor any other, as far as I know. In the few Words mentioned by him, as also by some others, I did observe an Affinity to these of our old Languages here. I have of-late taken a curlory View of some Things in Pere Du Halde, where I see some Words differently writ from what I observed in some other Books, but which might be founded the fame Way; which I impute to the different Way in which the several European Nations describe the same Sounds. There are other Words also in which I perceived an Affinity to ours, but in others none at all. Upon the Whole, I apprehend the Chinese Language to be so widely different in its Genius from these of Europe, that I am afraid we shall find it will never equal our own in its Usefulness to us. Befides, to what Purpose should we travel to the remotest East, in Quest of a Thing which we may meet with in our own Neighbourhood, in the West? At least, this I can fay with some Confidence, that our ancient British Languages serve all these noble Purposes which are mentioned in my Proposals, besides others which I yet keep in Reserve till I perceive the World in a better Disposition to receive them.

(7)

In the penult Age, Goropius Becanus published his Book about the Antiquities of Antwerp, which at that Time was one of the most flourishing and wealthy Cities in this Part of the World. There he pleads much for the Antiquity and Usefulness of the Low Dutch. The Learned generally look on his Etymologies as very whimfical; in his Account of the Name of that City he mixes very much Fable. There is very much Reading, and not a little Genius in the Book; but I undertake to illustrate that Language out of our own ancient Speech, and particularly to explain the Name of Antwerp according to the Nature of the Thing, providing these concerned will encourage my Undertaking.

Not a few learned Men talk much of the ancient Scythian Language as the Mother of many others, and especially of the Teutonick, Greek and Latin; but most of thele feem not to understand distinctly what they mean, and to talk very loofly and undeterminedly (if I may so speak) both of that People and their Language. A very noble and learned Person of the Swedist Nation, George Stiernhelm, hath indeed determined it to be the Language of his own Country Swedland, and feems to have conceived in his Mind a Scheme of Things extremely ingenious; tho' perhaps every Part of it would not stand the Test of strict Examination, some Allowance ought to be made to his Partiality towards his own Country. A Synopsis or general Sketch of his Scheme. which he himself published, is given by Funccius, in Ch. 2d of his Treatise de Origine Latine Lingue, which feems to be very well worth the Confideration of the Curious; where the Death of that Nobleman, before the Publication of his Works, is very justly lamented as a great Loss to the World.

It were much to be wished that his Papers, such as he left them, may be preserved; I am consident that a great many excellent Things would be found in them, tho' probably mixed with many Instances of human Frailty: It is hoped that these learned Persons, who have such generous Allowance from the Publick in that Country

for promoting Learning, will take Care of them, and make good Use of them. It is Part of his Scheme. that the Words of the old Language of France and Spain are Scythian; and in so far he seems to be no Enemy to the Opinion of Wafer and Mr. Edward Lbuyd, which I have cited in my Proposals: The last of these favours the Celtick, which is a Word used by most of the Learned in a loose and undetermined Meaning; but the former of these seems to declare more particularly for what he calls the Highland or primitive Irish Language. I have already told how far I agree to these Words: However it appears, partly from what I have already writ, and I hope to make it appear more fully afterwards, that this is the Celtick of Julius Cesar, or, which is all one, the Language of the most ancient Gauls. The Dialect of St. Kilda I humbly conceive is the most simple Shape of that Language, for the Reasons above-alledged; and this I take to be determining this Affair as particularly as can be, that Isle being only about one Mile in Breadth and two in Length: But I desire to be understood as meaning this of the Language of that Island in the Year 1697, when Mr. Martin was there; for I am not fure what Changes may have happened in it fince. I am,

SIR,

With great Respect,

Your most humble Servant,

C.

## To the H. G. V.

SIR,

WGOU are better acquainted, not only with the History, but with the Language of Wales, than any I hear of in this Country: You are the most capable to judge of its Worth, and its Affinity to

the learned and other Languages, particularly that of the Terra Firma of America. You have been so good as to hear me speak upon Wafer's Vocabulary of the Isthmus, and obliged me with your own judicious Remarks: You have also given me the Use of Books proper to assist me in my Enquiries. You have favoured me, oftner than I can pretend to deserve, with your very instructive and most agreeable Conversation.

Moreover, you have been otherwise so great and good a Friend to me and mine, that I think it both my Duty and Honour to own it to the World, and thank you for it; and, at the same Time, beg you'll forgive me for inscribing this Letter to you, seeing you are so good a Judge of the Subject-matter of it.

I am pursuing one of the noblest Designs, which is, to defend the Account given by the Holy Scriptures of the Origination of Mankind; and which is connected with the most important Parts of reveal'd Religion, against an Objection of its Adverfaries, which, as far as I know, has not been very distinctly considered heretofore, if at all.

To be a Defender of the Faith, is a Title which the greatest Monarchs affect under one Shape or other: To be subservient to them, and to co-operate with them, in fo good a Work in any Measure,

wants not its Degree of Honour,

The

[ 2 ]

The Welfh Language is little studied in North-Britain: This has been a mighty Loss to the Learned, especially the Antiquaries here. We have Difficulty to find out Helps needful to it; Davies's Dictionary was esteemed the best when I began my Enquiries. I could not find any one Copy of it here; nor could I hear of it in any of our Libraries, either private or publick. I informed the R—t H—le the E. of I—, who was so good as to procure a Copy at London, and send it hither. This I mention in Gratitude to that very great and noble Lord.

I have been at much Pains to meet with Gentlemen, particularly in the Army, who understood that Language to some Perfection; but never had that Satisfaction, till I had the good Fortune to be

known to you.

The Knowledge of the Welsh is highly necessary, and of very great Use to understand the high Antiquities of the Scots, as also these of the Pitts, whose Language is more a-kin to the Welsh than that of the Ancient Scots; and it is evident to any who reads Mr. Innes's Books, that it must be of great Use to understand what he writes of. That Gentleman seems plainly to have conceived Schemes in his Mind hurtful to the State, and the several establish'd Churches here: If we would defeat these, we must enquire into our most ancient Languages, of which the Welsh is one.

But this may be spoke of at another Time. At present it is necessary, at least helpful, to repel an Objection against Revelation, from the Case of the Americans, and to show an Affinity to their Language in some Words where the Ancient Scottish falls short,

at least, comes not fully up to it.

This will appear, if we advert to the very first Word in *Wafer*'s List, as also to the last Sentence of it, besides some intermediate ones.

The

[ 3 ]

The very first Word of his Specimen is Tautah, in the American fignifying a Father. The Affinity of this to the vulgar Irish, Dad, is not so nigh as to the Welsh, Tad or Taduys. The other Welsh Dialects are like this: The Armorick is Tat: The Cornish have both Tad and Taz, they and several others eafily passing from the dental to the sibilating Letters.

To reconcile the Ancient Scottish Dad to this, we must have Recourse to that great Rule, Literæ ejusdem organi facile commutantar, or, like Letters, are often used for one another. But the St. Kilda Dialect comes nearer, to wit, Tat; for they wanted D, and fill fubfituted T for it. This is one Instance of the Usefulness of it beyond the vulgar

This Word, in one Shape or other, is pretty universal in the Languages both of the Old and New World; which is a very great Argument that the Inhabitants of both are descended from one common Father, as this Word Tata fignifies. Gage, in his Survey of the West-Indies, gives us a Poco-man Grammar, where we find Tat in this same

Meaning in the Speech of Guatimala.

In the old Continent we find it in Italy, Tata; for which see Latin Dictionaries, or Lhuyd in his Compar. Vocabul. in the Word Tata. In Egypt Dade, as Megiserus tells us in the Word Pater. The Greek Tetta is but another Shape of it. By a little Train. of Reasoning, I think, I could also shew it to have been used thro' several very extended Countries here in the old World: The vulgar Lowland Scots have Dad or Ded, and Daddy or Deddy. But I pass on to another, viz.

Poonah or Punah, Woman. The Affinity of this to the Welsh Bun, Famina, Virgo, as Davies has it, is more obvious than to the A. Sc. Bean fignifying the same

Thing.

The

[ 4 ]

The English Word Puny, I take to be derived from the Welsh Bum. The Words which fignify a Woman, in many Languages, seem to be relative to these which signify Little, which I could easily show; and the Reason is obvious, the Female ordinarily is the lesser of the Sexes I am not sure how our English Etymologists account for this Word; but I am very sure, that our two ancientest Languages throw more Light into our Mother-Tongue

than has been observed hitherto.

Cotcha, Sleep, is another American Word, which feems to have a nearer Affinity to the Welsh than to the Ancient Scottish: They found it Cotscha, which, taking away the American Termination, is not far from the Welsh Cwsg, Somnus or Sleep, as Davies has it. It is very easy, by a little Reasoning, to bring these very near to one another: And indeed they are very little farther distant than the Chaunah I shanah, above spoken of, is from Shan; which, I hope, I have shown to be very much a kin: And indeed many of our Scots Highlanders, (and for ought I know the Irish also) in speaking pronounce A in the End of Words, which is not sounded in the English Shape, as Manna, Man, Mulla, Mull, &c. the Names of two noted Isles.

By a little further Reasoning, I could reconcile this also to the Ancient Scottish Codladh, Sleep, which they pronounce Caddil, and its kindred Words, the last Syllable being but a Termination: Yea, I could with no great Difficulty reconcile it with the Greek words, dormio, or, I sleep; there being a real Affinity between the strong Aspiration in the Greek and the Letter C, both in Sound and Figure, if we observe them with some Attention. Yea, I could show that it is a-kin to the latter Part of the Word Diacodium, which is a Potion for Sleep, being the Syrup of white Poppies; and, by the By, the Poppy being an Herb that causes Sleep, is called in the streight Scottish, Codlaigant I could

[ 5 ]

I could also reconcile both the American Cothschah and the Welsh Cwsg, Sleep, to the Irish Coisg and Cose, which fignify to be filent, to quiet or pacify: Yea, I could easily show their Affinity to the Latin

Quies and Quiesco, quiet, and to be quiet.

These Things I mention for two Reasons: First, To dispose Men to lay aside a very universal and inveterate Mistake about Languages, and the Difficulty of acquiring them. 2dly. To show that our ancient Languages here either have an Affinity unto, or serve to illustrate some other Languages, the Greek and Latin not excepted. And confequently, the Ancient Scots and Welsh possess an Advantage, which might be improved to render them the most knowing and learned, and so the most polite and civil, yea, the most virtuous and religious People in the World: And these Persons and Societies who would generously promote this, would purchase to themselves immortal Honour even in this World, besides the glorious Hopes of a Happiness in the World to come.

Aupab Eenah? What do you call it? Is an American Sentence, which has the most plain and obvious Affinity to the Welsh, yea to a Welsh Phrase. Au or A is a Sound frequently set before Words, without changing their Signification, even in our vulgar Language: It is of the same Use in Welsh. Davies, in the very first Paragraph of his Dictionary, tells us, A est adverbium, seu particula verbis praposita, nihil significans; and gives Examples of it there. In the same Place he tells us it is ad-

verbium interrogandi.

It is capable of being taken either of these Ways here, for the Words are plainly an Interrogation or Question. Pab is obviously the same with the Welsh, Pa their ordinary Interrogative, which is sometimes varied into Pwy or Pwy: The Cornish use both Pa and Ba, and these of Bretagne in France Pe and Peta.

Peth. I mention these, because I reckon we meet with it in one of these Shapes in another of Waser's Phrases; Bidama soqua Roopah? How do you Brother? Eenah, the other Word, has a very obvious Assinity to the Welsh and Armorick Henu, a Name, and Henui, to name: These are also writ Enw and Enw; these are all in Davies's Dictionary. Yea, Lhuyd has under the Word Nomino, Pe hanui, which I take to be, Quomodo nominas? or, How do you name it? in Armorick. And, if I mistake not, I heard a Welsh Gentleman, whom I very much esteem, say, that Pa enw was used to signify, What Name is he of? And how nigh these are both in Sound and Sense to Pah eenah, I might refer to Momus himself to judge.

Rospah, Brother, is a Word which might afford Matter of much Discourse, which I now incline to wave, and to offer these Things to be considered. The Americans, these of Brazil for Example, as Megiserus says, used one Word to signify the elder Brother, another to fignify the younger: The former of these, in its Meaning, seems to correspond to the Import of the Latin Aba, tho' not in Sound; the latter feems to fignify very fhort, or little. Now, in this last Sense, Roopah, allowing for the American P in Place of B, is easily reconcileable to the Ancient Scottish Rubbag, very small or little, otherwise Robbeag; as also to the Welfh Rhwy Bach, very small: And I suspect this primarily was the Import of the Latin Germanus, tho' now they have deviated a little from it.

To relieve you a little from these Severities of Criticism, forgive me if I add a Citation out of a diverting Book, and which I have heard you say you got to read when you were very young, the Turkish Spy, Vol. 8. P. m. 159. where, speaking of the King of England, he has some Things a-kin to what I am writing, tho' I cannot take upon me to answer for the whole.

This Prince, (speaking of the King of England) ec as I have faid before, has several Nations under ce his Dominion; and 'tis thought he scarce knows ce the just Extent of his Territories in America. ce There is a Region in that Continent inhabited by a People whom they call Tuscoraras and Doegs: "Their Language is the same as is spoken by the cc British or Welsh; a Nation that formerly possessed all the Island of Great Britain, but were by Dece grees driven out of it into a mountainous Corner of the Island, where their Posterity remain

cc to this Day."

cc Those Tuscoraras and Doegs of America are thought to descend from them, being the Postece rity of such as followed the Fortune of one Madoc ce a British Prince; who, about Five or Six huncc dred Years ago, being discontented at home, rece folv'd to feek Adventures abroad. Wherefore, being provided with Ships and all other Necesce faries, he made a Voyage toward the West over the Atlantick Ocean, not knowing what would 66 be the Event of his Undertaking. However, the Moon had scarce twice compleated her Voyage through the Zodiack, when an End was put to ce his on the Sea, by landing in America; where he coplanted a Colony of Britons, and then returned to his native Country: But foon after he put to se Sea again, and failed directly to the same Place. What became of him afterwards is not certainly known; but the Inhabitants of that Province ce have a Tradition, That he liv'd to a great Age, cc and saw his People multiplied to many Thousands beco fore be died: For the second Voyage he carried over British Women with him, for the Sake of Pofterity. They shew his Tomb to this Day; with " Beads, Crucifixes and other Relicts." "Tis certain, that, when the Spaniards first con-

quered Mexico, they were surprised to hear the 66 Inhabitants

[ 8 ]

Inhabitans discourse of a strange People that for e merly came thither in Corraughs, who taught them the Knowledge of God and of Immortalice ty; instructed them also in Virtue and Morality, and prescribed holy Rites and Ceremonies of Rece ligion. 'Tis remarkable also what an Indian King ce faid to a Spaniard; viz. That in foregoing Ages a strange People arrived there by Sea, to whom his Ancestors gave hospitable Entertainment, in regard they found them Men of Wit and Courage, endued also with many other Excellencies; but he could give no Account of their Original or Name. And Montezuma, Emperor of Mexico, told Ferdinando Cortez, the Spanish Kings Ambassaof dor and General in those Parts, That his own Ancestors landed there as Strangers, being conducted by a certain great Man, who tarried there se for a While, and then departed, having left a confiderable Number of his Followers behind 66 him. After a Year, he returned again with a greater Company; and that from him the Emce perors of Mexico derived their Pedigree, and is his Subjects from the rest. The British Language is so prevalent here, that the very Towns, Bridges, Beasts, Birds, Rivers, Hills, &c. are called by & British or Welsh Names. And a certain Inhabitant of Virginia (a Place subject to the King of ce Great Britain) straggling not long ago into the Wilderness, by Chance fell amongst a People, who, according to some Law or Custom of theirs, condemned him to Death; when he, in the " Hearing of them, made his Prayer to God in " the British Tongue, upon which he was released." I am,

With great Respect,

SIR

Your very humble and much obliged Servant, C.

#### 

#### To W. M. E. of M.

SIR,

N the foregoing Letters I have attempted to throw fome Light into our Antiquities, and pav'd the Way to pull down the Scheme of Mr. Thomas Innes; yea, what I have faid may be improved to pull it up by the Roots, and to

overturn it from its very Foundations, which I look upon as a Piece of Service both to the Church and State: It is easy to see that Gentleman had no friendly Design with respect to the one or the other. He lays it down as a Foundation, That the Scots came first from Ireland; and I hinted before in what Sense this ought to be understood. How came the Caledonian or Albanian Celtick to be the first Language of France? And how comes it to pass, that the Names of great Promontories, Mountains and Rivers, besides not a few of lesser Things, even in the most Southern Parts of Britain, are accountable out of this ancient Scottish, and not out of the Wellh? which Mr. Edward Lbuyd, a most learned Welshman, yea, the Prince of the Antiquaries of his Time, acknowledges. Mr. Innes ought to have known this, yea, seems to have been apprised of it, but thinks not fit to answer it.

I could enlarge upon this, and, if this be encouraged, I resolve to do it at another Time; but, in the mean Time, I have in View the answering an Objection against the holy Scriptures from the Case of the Americans: You are the best Judge, I

ttt know,

know, of what I am to write, especially as far as the ancient Scottish comes to be concerned, and its Affinity to the Language of the Terra Firma of their Country. I must crave, that, as far as you see just Reason, you'll still go on to defend and justify me, now when I am engaged in so glorious a Cause: And, what I desire of yourself, I must also desire of your Relations and Allies; all of which have acted a very friendly Part to me, which no

doubt is very much owing to you.

In the preceeding Letter, I was tempted to take Notice of that strong Disposition in learned Men, and even in some who are reckoned eminently such, to take the most indirect Ways to run down the Endeavours of others to open the Eyes of Mankind, particularly in Things where they themselves may share in the Benesit: But it has been of a long Time a great Argument with me to esteem you and your Friends the more highly, that I never did perceive any of them tainted in the least with that invidious and mean Quality; but, on the other Hand, Favourers of every Thing that was ingenious, especially when it tended to the Glory of our Country or our Religion, and consequently to the Good of Mankind.

Here I am strongly tempted to enlarge, and to let the World, and especially these invidious and covetous Persons, know what a Friend I have in you; but I must restrain myself in that Particular, hoping I shall not want Opportunities afterwards to do it: However, I hope I shall not lose a kindly Remembrance of that Gentleman who occasioned our first Acquaintance; it is the Interest of the World, and especially the Learned and the Great, to know something of him for their Imitation.

He was a Person of the most solid and extensive Know(3)

Knowledge, both of Books and Men, as perhaps any in his Time; he was a very happy Instrument of advancing necessary and useful Learning in this Knowledge, as an inspired Writer fays, puffeth up: It often does so; but in him it was accompanied with that Charity which buildeth up or edifieth. I never observed in him the least Degree of that Pride and Envy which I have perceived in and abundantly felt from some others, and I am glad he is so well represented. It has been often Matter of Wonder to me, that some, who are under the strongest Obligations to promote, or, at least, to favour all Attempts to promote Truth or Goodness, are really the greatest Enemies to them, especially when they seem to thwart their covetous or ambitious Views.

If I had followed the kind Advices he gave me before this, the Proud and Invidious themselves

would have pretended Friendship.

I cannot easily forget the sincere Kindness of the Proprietor of Mount *Paraassus*, and the two able and charitable Physicians, who are so nearly con-

cerned in you.

The Friendship of these and some others, and particularly your own, are Comforts against the Whisperings and Backbitings of the Emulous and Covetous, which you have had Occasion to be well

apprised of.

Sir, You are the Male-heir of a very great and noble Family (I may call it so, seeing out of the same Stock all the Monarchs of Great Britain, yea, most of the Sovereigns in Europe, did arise, beside many others) yer this has not hindered, but, I hope, been a Spur to you, to render yourself yet nobler, by Knowledge, Learning, Virtue and Religion, for which several of your

Ancestors have been also remarkable; and I hope you'll still go on to follow the glorious Example. You have particularly so very much improved yourfels in the ancient Scottish, whose Usefulness I have before-hinted, that I know none who can better judge of its Serviceableness to Religion than you.

To confirm what I have before writ, and to prepare for what is to follow, and to be able to answer Objections, it will be fit to fay fomething concerning this Language; which I have delayed as long as I could, knowing well enough, that the Confideration of Languages is very infipid to many, tho' they really be the Keys of Knowledge; yea, an Enquiry into the very Letters or Elements is of very great Importance, for ex minimis maxima dependent.

Some Elements of the ancient Scottish or Caledonian Celtick, with some Observations.

In this Language there are at most Eighteen Letters, viz. a, b, c, d, e, f, g, h, i, l, m, n, o, p, r, s, t, u. I say, at most; for some of their noted Grammarians, such as Molloy, say only Seventeen, by leaving out the H, or the Aspiration; And Mr. Lhuyd, tho', in his Introduction to this Language, he says there are Eighteen, yet in his Dictionary he has not one Word beginning with H, but passes immediately from G to the Letter I; tho', in Pronunciation, perhaps no People in the World more abound in the Use of it.

Their Characters are not unlike the Greek, which perhaps might be improved to throw Light into a dark Passage in J. Cæsar's Commentaries.

Their Names are neither taken from the Greeks nor Latins, but out of their own Language, and almost all of them fignify Trees.

Obs. 1.

(5)

Obf. 1. The finall Number of their Letters argues the Antiquity of their Alphabet, as I have hinted above; and confequently, that they did not borrow their Letters from the Latin and all their Learning, as Mr. Innes confidently affirms: For, if they had, what would have hindered them to have taken their whole Alphabet, fince it may be faid they have all their Sounds? And, for their having no Learning at all till the Romans came among them, How will Mr. Innes reconcile it with what Greek and Latin Authors fay of their Druids, &c.?

Molloy, as many other Grammar-writers in feveral Languages, fays, That H is rather aspirative, or a Note of Aspiration, than a Letter; as some others also say, That S is rather a Sibilus or

Sibilation than a Letter.

As to H, I have no Inclination to imbark in the Grammatical Dispute about it: It is sufficient to observe, That the Presence or Absence of it is of no great Moment in several Languages. Examples of this can be easily found in the Latin and French, the Languages now most studied in this Part of the World: As to the Greeks, they have also had it anciently in the same Shape with the Latins, as may be seen in Dr. Lister's Journey to Paris, Tah. 1. Fig. 3. and in a Dissertation subjoined to Father Montfaucon's Palaiologia Græca; and in Chishull's Antiquitates Asiaticæ, particularly when he treats of the sam'd Sigæan Inscription. In some other Monuments this Letter is represented only as the Half of it, thus E.

The Reason that may be given why H is not a Letter, but an Aspiration, is, That it may be said, there is no other Difference between these Words and Syllables which have H, and these

which

which want it, than, that the one is pronounced with a stronger Effort, Push or Action of the Breath than the other. If this Reason hold good, then, whatever Way this is marked in any Language, the Rule is applicable. The modern Greeks have not a Letter corresponding to H precisely; but they have, besides their x or ch. which is one of their Letters, a Spiritus afper, or a strong Aspiration, as they call it, marked above the Vowel, to which they join it like a finall c, thus &, to be read ho, or as a strong H: They have also a Spiritus lenis, or a gentler Aspiration or H, which they mark with a small backward c or a above a Vowel, thus de, to be read hos, with a weaker Push of the Breath: but they do not own either the one or the other of these Aspirations as Letters of their Alphabet. The Hebrews have in their Alphabet Four, and some reckon them Five H's or Aspirations, to wit, & Aleph, in or He, in Cheth, y or Ain or Gnain, to which Bythner and others add Ch or J Caph. These are reckoned to point out the several Degrees of the Aspirations, much in the Order in which they are ranged in their Alphabet. y is judged to denote the strongest of these; and yet, when Words in which this Letter is found pass into the Characters of other Languages, it has often no Letter correspondent to it: So the Letter itself in the Hebrew Alphabet is by some Grammarians writ Ain, by others Hain, and often Gnain.

I know not if it be worth Pains to observe here, that, setting aside the H, as Molloy does, the Irish or ancient Scottish Alphabet is precisely the same with that of the ancient Romans, as given us by Buchanan in his Treatise & Prosodia, and others, which they sable to have been brought to Italy by Carmentis the Spouse of Evander, who has the Honour of being esteemed the Inventrix of the Latin Letters, as Cadmus is commonly said to be of the Greek ones. But this is consuted by the Tabula Duilliana, which is reckoned the ancientest authentick Monument of the Latin Language now extant, in which the Letter G is totally wanting, tho's several Words now written with it are in this Inscription, such as Macistratos Legio, &c. now writ Magistratus Legio, tho' that Table

was engraven but about 150 Years before Cicero, and so long after the supposed Age of Carmentis, if ever there was such a Lady. Yea, that Letter was introduced (at least it is generally alledged so) by the Grammarian Carvilius. This same Letter G was not sounded by the Islanders of Hirta or St. Killa in the Year 1697, when Mr. Martin, the Author of a Description of it, was there, as he attests, as neither was the Letter D; and it is a Question if the Letter R, at least he seems to leave it disputable: And it is observable, that the Green-landers, as Salmon says, want the Letter R; and that the Chinese, whose Language is of an ancient Shape, want it also, and in Place of it both pronounce L.

The simplest Alphabets, I humbly conceive, must be the most ancient Schemes of them, or these which confift of the fewest Letters. In Heraldry, in which I believe you excel all the World, the plainest Coats of Arms argue the greatest Antiquity; Additions are Marks of Cadency: So in Alphabets; they first confisted of fewer Letters, afterwards Time added to their Number. The Greek Alphabet now reckons up 24 in Number from Alpha to Omega, but it is acknowledged that it once confifted of fewer: And they pretend to give us the Names of these who were the Inventers of the additional Letters; such as, they tell us, Palamedes added fome about the Time of the Trojan War, and Simonides afterwards some others. Whether they they be right in these Particulars or not, I do not now determine: but all this implies an Acknowledgment, that the Greek Letters once were not so numerous as they are now. The fame Thing may be faid as to the Latin Alphabet: It now is reckoned to contain 22 or 23 Letters, according as H or the Aspiration is included or omitted; but they acknowledge that once it had not fo many, and that the Additions were made in the Course of Time. However, the Latin Alphabet, such as it now is, was compleated before the Time of Domitian, who was the first Roman Emperor who fent an Army to North-Britain in order to conquer it.

The ordinary ancient Scottiff Alphabet is fimpler, as we now have it; and Time was, when they wanted several Letters which they now have. We have already taken

Notice,

Notice, that these of Hirta wanted Two, if not Three, which the other have; and Mr. Lbuyd, and after him Mr. Baxter Author of a Glossorium Antiq. Britannic. observe, That Time was, when the ancient Scots wanted the Sound we now

give to the Letter P.

However, it is now certain, that our Scots Highlanders, at least, pronounce P as other European Nations; yea, they use it sometimes where they write B: So some of them say Peann Pi Alipan, when they write Beann Bi Alban. And this is a Thing not at all incredible, viz. that they once wanted the P, at least, as I conceive, that Sound which we now give it. The Hebrews seem to have wanted it; so their 2 in its plain State is sounded Phe.

"Tis certain the Arabians yet do; but the Americans very much affect it, as I shall have Occasion afterward to observe. And this very minute and trisling Observation, as it may seem to many, may be a Help to us in forming a Judgment of the Way and Manner in which this spacious Country might be first peopled.

Obs. 2. That the Names of their Letters are not borrowed from the Greeks and Latins, but significant mostly in their own Language, is a further Constitution of Mr. Innes: For, if they had learned them from these, what is the Reason they do not use their Names? It is a very great Argument, in my humble Opinion, that the Grammar-writers of the modern Languages took the Latins for their Patterns, that they borrow their Terms generally from them; and, seeing the ancient Scots do not, it is a great Proof of the contrary.

Obs. 3. The Names of their Letters mostly, if not all, signify Trees. This seems to be another Proof of the Antiquity of their Alphabet. This accounts for the Reason why the Words signifying a Letter in several Languages are relative to Trees.

Obf. 4. Their Names being from Trees, seems to hint what was the most ancient Way of writing. This is a Hint which may be improved to show, that there was a Rationale or Reason for the Shapes of Letters.

Obs. 5. They pronounce C constantly as we do K; so did the Romans, Saxons and Welsh, so that they needed not K. And G as we do in Give, Gift, or as the Greek Gamma.

Obs. 6. Dh and Gh are sounded very weakly, as the English

Gb, and are often used promiscuously.

Obs. 7. They delight in Aspirations and Sibilations, perhaps beyond all Nations. Britanni omnes sibilant. S is sounded often Sh.

F aspirated loses its Sound.

Obf. 8. Like Letters and like Things are often used for one another. The small and broad Vowels, and the several Sorts of Consonants. These called Lip Letters, B, F, M, P, V. The Pallat Letters, C, G, and the K and D in other Languages. The Teeth Letters, D and T, Th. The sibilating Letters, in many Languages, and the Teeth Letters are often used for one another. I am, &c. C.

## 

## To Mr. C. A. M. D. P. of S. in the C. of E. &c. &c.

SIR,

and you are so generally esteemed a sweet-blooded Gentleman, and are withal so great an Ornament to your Country and the Age, by your uncommon Attainments in the Business you profess (a Branch of Learning exceedingly valuable and delightful, and which owes much to the Natives of this Island, and is now advanced to a great Height) that I beg you'll accept of this small Testimony of my Respect and Gratitude, the inscribing this to you; especially seeing it seems to belong to you, by your furnishing the Occasion to it.

Upon my presenting the foregoing Letters to you, and your peruling them, you were pleased to testify your Approbation of them in the Main, but withal to observe two Things; 1st, That I laid too great a Stress upon the single Authority of Mr. Martin, in a Matter of such Consequence. 2 dly, You defiderated some Things contained in a short additional Scroll of mine, which you had heard read before a Society of learned Perfons; which you faid gave you much Satisfaction, and were a Confirmation of my whole Scheme. To these I gave such Answers at the Time as seemed in a great Measure to satisfy you: But, because other ingenious Men may make the same Observations, and either want the Opportunity to impart them them to me, or that Degree of Friendship which you did show in doing it, I shall consider them a little in this Letter; especially seeing not a sew, even of the eminently Learned, are abundantly disposed to take less generous Methods, that I may use no harder Words.

First, It may be alledged, That I lay too great a Stress upon the single Authority of Mr. Martin, in a Matter of such Consequence as is the most simple and ancient Shape of Language in this Part

of the World.

As to this I fay, That I do not disown the Importance of the Thing; but, at the same Time, it will be easy to observe, that I lay not the main Stress either upon the single Testimony of Mr. Martin or of that Boy which confirmed it, tho' I make Use of these as Adminicles in this Affair: I have a greater Regard to the remote Situation of the Place, and the difficult Access to it, its great Distance from the Centres from which Mankind were propagated and dispersed, and the little Intercourse they have with the rest of Mortals. All these, if maturely and judiciously considered, will be found to afford a pretty good Proof of the unmixed Simplicity of the Language, in Compare with others; especially if we also add the best Testimonies that can be had in an Affair of this Nature.

Perhaps it may not be yet proper Time to difplay the whole Force of the Reasoning about this Point; it may be partly observed in that Testimony of Leibnitz, which I have made so much Use of, and partly in the 18th Book of Justin's History, which seems to me to contain something analogous to it: These Things seem to require a little Thought, if not Penetration. But it may perhaps gratify the Curiosity of many, and it is level to the

Ca-

(3)

Capacity of most People of tolerable Education, when they are told (as one who is called an Inhabitant of this Island, in a Description printed at Edinburgh in the Year 1732, fays, out of Herman Moll's Map 1714) That St. Kilda is 57 Deg. 56 Min. North Latitude, and 10 Deg. 30 Min. Longitude from the Meridian of London, and lies 60 Miles West and by South from the Isle of Harries, 80 Miles from Lewis, 90 Miles from Sky, 220 Miles North North-West from the Mule of Cantire, 220 North from the North of Ireland, 150 Miles from the nearest Part of the Continent of Scotland. This much for its remote Situation. I know not if there be any Thing beyond it towards the North-West between and America, save a fmall uninhabited rocky Isle called Rocol.

The difficult Access to it is also evident both from Mr. Martin and this last Author, who, for ought I know, are the only two who have written with any tolerable Diffinctness concerning it. They in Effect tell us, "That the Inhabitants of this " little Isle or Common-wealth may live quiet and " fecure, even tho' an Enemy were defigned to " attack them; because Nature hath so senced " and furrounded them with one whole Face of a " Rock, that there can be no Access for any even " in a friendly Way to get to them (by all they " can do, yea, and with the Affistance of the In-" habitants also) except at some few particular " Times, and that under very favourable Weather " too, and but at one Place only, where the Inha-" bitants can eafily defend themselves from, and " greatly offend, any that shall attack them in a " hostile Way, and also defy their Landing against " their Will, tho' their Number does not ordina-" rily exceed Two hundred."

From

From these Things we may with great Probability inser, that the Language of these People must be more simple and less mixed than of these who have more Intercourse with other Men, even without having Recourse to the Testimonies or Authorities of particular Persons for Confirmation; yet I humbly conceive, that these which we have in this Case are by no Means to be despised, but perhaps as good as in Reason can be expected in this Affair, and deserve very well to be considered.

And, First, We have Mr. Martin's Testimony as to the Paucity of their Sounds or Letters, as I have above quoted it. Now, this being a Thing of so easy a Nature, that it could be perceptible by his Ear, we cannot dispute his Capacity to judge about it, seeing he had the Capacity to write such

ingenious Books.

And, as to his Candour and Ingenuity, it is very hard to imagine what could tempt him to impose upon Mankind in a Thing of that Nature, where it is not easy to perceive what Prosit, Pleasure or Honour he could draw from it; especially when, if what he says had not been true, it could be so easily disproved. That Author who publishes the other Description of St. Kilda (if it may be called another, for almost all that is valuable in it is borrowed from him) tho' he plainly shows himself to be his Rival, and abundantly disposed to differ from him; yet makes the most honourable Mention of him in several Places, which seems to me of no small Moment.

In the very first Paragraph of his Book, he refers to a Description of the Western Isles of Scotland by Mr. Martin Gentleman, printed London 1703; and Page 4th he again makes honourable Mention of his other Book, intituled, A Voyage to St. Kilda,

printed

(5)

printed London 1698, adding these Words; "We " choose this Author as a Witness to the Truth " of this Part of our Account of the People of " this Island, because all others who have wrote of " it have been very lame, and in fundry Things " mistaken, in any Relation they have given of it. "He was there, viz. in the Year 1697, and "knows this for his own Part by Experience: " And, to do that Gentleman Justice, what he re-" lates of it is generally good as they were then " circumstantiated, and so the best Description " any has given of this People and Island till now. " And adds, Because that Book is out of Print, " the Reader may take a few of his Remarks " anent this Place, which are still genuine." And he concludes his Book with these Words; "If the "Reader be curious to hear more of this remote " Isle, its Inhabitants and Commodities, he may " confult the above-cited Mr. Martin's two Books

" thereanent."

In feveral other Places he likewise cites him with Respect; yet it is very evident, that he wanted not Inclination to take Notice of any Escapes in him, as may be perceived by what is contained Page 38. in his correcting his Mistake about the Day of their anniversary Cavalcade, which Mr. Martin had faid to be upon the Feast of All Saints, whereas that Author tells us it was upon Michaelmas-day. This also may be feen more fully, Page 35. in his Remarks upon what Mr. Martin fays about their Religion, as also Page 37. Which Places abundantly show, that the Author wanted no Inclinations to expose the Failings in Mr. Martin's Account, and to recommend his own, tho' at his Cost. Notwithstanding of all which, he owns everywhere the great Use that he makes of his Books.

Books, and speaks favourably of himself in many Places; which, being the Testimony of a Rival,

ought to have great Weight.

It is true, on the other Hand, I am not to wonder at what you faid about his Authority, feeing I have heard several other Gentlemen, for whom I have great Regard, speak with Contempt of it: But it were heartily to be wished, that these who are well acquainted with the Subjects about which he writes, would publish to the World his alledged Mistakes, that he himself, if alive, might have an Opportunity to defend himself as far as he is in the right, or to acknowledge wherein he has been in the wrong; or, if not, to furnish others with Matter of Enquiry: For no other, that I know of, has given any Account of so large a Part of the British Dominions, as the Western Isles are, with any tolerable Accuracy either before or after him.

I have no particular Concern in that Gentleman, nor do I anyway make myself a Party in his Cause; but I must be excused, if I be somewhat slow in giving Credit to Accusations, or in regarding the Censures even which the Learned and Good pass upon the Works of others. I have, partly by Reading and Observation about others, and partly by what I myself have abundantly felt and experienced, had Occasion to know so much of the fatal Effects of Pride, Envy and Emulation among the Learned, that of a long Time I have confidered these as among the main Obstacles of the Advancement of valuable and useful Knowledge. hope I shall be pardoned if I add some Things to check them; I heartily wish they could be entirely

laid afide.

These were the first Evils that sprung up in the World, and they are the Roots and Sources of all other

(7)

other Evils; the Pride and Envy of one ambitious Spirit seems to have poisoned a great many others, and metamorphofed fo many Angels into Devils: Man came also to be infected; and accordingly these have produced many dismal Mischiefs in all Ranks of Mortals, the Learned themselves not ex-This seems to have moved Aristotle to cepted. destroy so many of the Writings of these Philosophers who wrote before him; which he might the more effectually do, when he had the Power and Interest of his Pupil Alexander, who was not himfelf quite free of the same Vice, to support him, and to promote his Design. Others in other Parts of the World, and particularly in this same Island, are faid to have acted the like Part; and, by fo doing, have deprived us of some valuable Monuments.

These have in a particular Manner been observable at fuch Times when Attempts have been made to reform either Religion or Learning: Then the Prince of Darkness seems to have roused his infernal Legions, to exert themselves with the utmost Vigour to obstruct both the one and the other, and to crush these who dare to make the noble and glorious Attempt; which we may easily see in the Histories even of these later Ages. In this they have made Use of Tools for their Purpose from amongst all Professions and Ranks of Men, and very frequently of these who were most highly esteemed by the several Parties. I could easily fill up a whole Volume with difmal Accounts of the woful Effects of Envy and Emulation among the Learned, but I must at present refrain myself.

I will not positively charge the Censurers of Mr. Martin with that high Degree of Envy which I have read of or observed in other Cases; but I am

fuspi-

(8)

fuspicious, that some of the Leaders have not been per-

fectly free from all Tincture of it.

There is one Thing which I have taken Notice of in the Criticisms passed upon him, which is, That in his Title-page he is designed a Gentleman, and that in some Passages of his Book he would make the Reader believe he was the Son of a Person of considerable Figure and Wealth; whereas, say they, it is very well known he

was of very low and poor Parentage.

As to this, I know nothing about it, and leave to every Person to judge as he thinks fit: But this I can say, That I have often observed, that, when Men have arrived at a high Degree of Wealth or Reputation, or both, they have been too ready to bear down, especially by indirect Ways, the laudable Endeavours of these whom they looked on as their Inferiors; fearing, as it feems, left they may equal or exect them in any one Particular: This I suppose will be most frequently found in Upstarts. How happy a Thing would it be, if the Learned would lay afide all Pride and Envy, which so much prompt them to pull down the Works of each other, and would harmoniously join in rearing up the Temple of Wisdom! Give me Leave to add a short Story; That one Evening seeking a Gentleman, to receive more full Information about the Language of the Terra Firma of America, I found him with some Brother-malons, where I heard two Lines which I believe I shall not easily forget.

And all the Dispute among Masons should be, Who the better shall work, who the better agree.

It is easy for the Learned to accommodate these to themfelves: They all pretend to join in building up that glorious Fabrick I have now spoke of; if they would do it to Purpose, and would avoid the Consusion of the Babelbuilders, they must lay asside Pride and Envy.

These thrice happy Days, Oh! when shall we see, When all the Dispute mong the Learned shall be, Who the better shall build, who the better agree? As to the Contents of the Scroll, which you say gave you so much Satisfaction, I now delay it. I am,

SIR, Your very humble and much obliged Servant, C.
