SUBJECT: Applications for Funds for Maintenance Work

TO: Chief  
Civil Affairs Section  
GHQ, SCAP  
APO 500

1. Herewith transmitted are five (5) applications from reparations plants in Shiga Prefecture requesting allocation of funds to perform maintenance work.

2. Facts learned from investigation of the applications are as follows:

a. Hikone 1st Works, 35-2, and Hikone 2nd Works, 35-3, of the Omi Industry Co. (Incl. No. 1)

(1) 37 items at 35-2 and 48 items at 35-3 require attention. Funds requested in the application are excessive. It is estimated that 42,000 yen will be adequate to attain minimum standards.

b. Matsushita Metal Co., 35-6 (Incl. No. 2)

(1) 33 items require maintenance as cited in the application. The 20,973 yen approved by the District Office is considered reasonable.

c. Chiyoda Sangyo Co., 35-7 (Incl. No. 3)

(1) 64 items require attention. It is estimated that 29,000 yen will be adequate to provide necessary cleaning and greasing.

d. Shoun Kosakusho Co., 35-8 (Incl. No. 4)

(1) Rust on bearing surfaces is prevalent. The

Hq Kinki Civil Affairs Region, APO 25  
Subj: Application for Funds for Maintenance Work

17 Feb 50

70,225 yen approved by the District Office, representing approximately 400 yen each for 175 items, is considered reasonable.

2. Toyo Rayon Co., 35-11 (Incl. No.5)

- (1) Corrosion was evident on bearing surfaces of the 49 items cited in the application. However, the money amount approved by the District Office is considered excessive. It is estimated that 24,500 yen, representing 500 yen per item, will be adequate to restore the equipment to acceptable condition.

3. Encumbrance of funds based on criteria cited in preceding paragraph is recommended.

Memo to Mr. Sussemann

From: Mr. Armstrong

1. Results of investigation for need of maintenance at reparation installations 35-2 and 35-3. These installations, are in the same area and equipment is stored in the same group of buildings.

2. At installation 35-2 there are 98 machine in storage and at installation 35-3 there are 106 machines in storage or a total of 204 machines. Inspection revealed some evidence of rust but nothing of serious nature. For the most part this machinery is of large heavy type consisting of presses, shears, pump etc., which require little maintenance. However, spot cleaning and greasing should be accomplished in the near future to prevent deterioration.

3. It is estimated that an average of Y350 per machines or a total of ~~Y~~<sup>41,400</sup> would be sufficient to cover cost instead of the Y71,122 requested in application. Dismantling for cleaning purpose is not recommended.
