During the winter the hills, especially the high mountainous country, is a forbidden place to the motorist. After the first snows come in the fall the gates of the high mountains are closed, and thus they remain until the warmth of summer clears the way for the wheels of the motor car.

But there is one place that throughout the winter months spreads its arms to the tourist—the desert country. Many sections of desert provide ideal touring conditions throughout the winter months. #### **GOOD HIGHWAYS EFFECT TRAVEL**

The United States operates 259,-000 miles of railways, almost 20,000 miles of interurban electric railroads, and 15,000 miles of inland waterways and canals. All of these transport facilities depend directly and entirely upon a certain mileage of good roads, without which they could not function.

The total good road mileage in the United States is about 300,000 miles. The total road mileage is nearly three million. If the three million were as good as the three hundred thousand, what would it mean to the other means of transportation?

First, it would mean a reduction of freight rates on steam lines, because the freight rate is a product of the short haul (which is expensive), and the long haul (which is profit making for the railroad.) Cut out the expensive short haul, and the profit making long haul could make the same profit at less cost. Second, it would mean a great-

use of waterways, hy increased use of waterways, which would force a new competition on the railroads, again decreasing freights.

The parts of the car.

Shift from third to second or racers whose speed, by the way, was not to be compared with that

Third, it would make for stability of traffic, because the release of thousands of freight cars from short hauls would mean a greater ease of getting cars for the seasonal demands; fruit, grain, coal.

Its gear when the car is running was not to be compared with that made by the little fellows.

"In the design of automobiles for everyday use we are following the same principles as in the development of speed chariots.

### STANDARD AUTO IS TURNED OUT

Car company takes to assure itself that every car it produces conforms exactly to Packard standards are a source of constant amazement to visitors at its plant.

Packard builds as much or more of its completed car, it is believed, than any other automobile com-pany. It does this that it may always be sure that the materials which enter into its cars are exactly what its scientists have learned. through years of tests, are the best known.

For example, it pours all its aluminum, cast iron and bronze. It makes all patterns used in casting the dozens of different parts from these materials. And its own labortory experts check over the materials used every day to make doubly sure that just the right quantities are joined into each part to result in giving the longest

No guess work is allowed to creep in at any stage of the Packard processes. And no detail of manufacturing, no matter how trivial, is too small to receive prompt and thorugh attention from the company's manufacturing de-

Packard metallurgists, in their exhaustive tests with iron, for instance, have found that certain portions of various chemicals mixed together and properly poured and heat treated will give the longest life to the cylinder block. They have found that the best material for this purpose can be obtained only by using a combination of irons found in several sections of the country. And they know exactly what quantity of each should be fused together to insure the proper hardness and the longest

life to the finished product.

Every shipment of iron that arrives at the foundry from each of these sections is therefore chemically analyzed as it is received to make certain what materials it contains and their percentages. The iron bars are then sorted in accordance with their composition and stored for use. When the proper time comes they are melted up along with other iron containing different percentages of various chemicals to insure the proper proportion of each in the finished

But this first checking does not appease the metallurgist or the metallurgist or the manufacturing department. Neither does the fact. that experts are in charge of the foundry operations—the making of molds, checking out of materials and their heating and pouring. Every day two samples of the fin-ished metal are taken to the metal-lurgist and analyzed to establish postively that the product obtained is just what it should be. Methods of heating and pouring can vary the quality of the finished metal, they point out, and it is therefore necesary to keep constant check if uniform quality is always to be gained.
These tests are made of all fin-

Come prepared to drive a car in which you can change speeds instantly and silently on the steepest hills or in the tightest traffic pocket.

There is nothing new to learn.

You will find the familiar gear lever at your right hand. You will make exactly the same hand and foot movements to effect a speed change.

There will be no "high pressure" sales solicitation. Our sole desire is to have every motorist appreciate, first, the possibilities of this new Chandler feature; and second, the performance mastery of the

#### Pikes Peak Motor

For the first time, a truly great power plant is available in a handsome, long-lived car of moderate price!

A powerful foot brake controls the rear wheels; an automatically equalized emergency operates through the propeller shaft; and the Traffic Transmission makes the braking effort of the engine instantly available by a split second change to a lower gear.

### **An Achievement**

The development of the Traffic Transmission, the Pikes Peak Motor, in fact, the entire 1924 car with its powerful brakes, indestructible rear axle, facile steering, up-to-date bodies by Fisher and low prices, was possible only to a great organization like The Chandler Motor Car Company.

Advanced manufacturing skill, advantageous plant location, complete factory equipment, strongly secured financial position, and permanent executive direction all had to be present in preeminent degree.

Remember! This is Traffic Transmission Week! Come in! Telephone! Make the test that tells all -drive the 1924 Chandler yourself!

### **OAKLAND STANDS** IN SIXTH PLACE

The Oakland Six is firmly enrenched in third place among six cylinder cars in the volume of sales, according to figures given out by the registration bureau for the month of November.

"Oakland's rise in popularity has been little short of sensational," sáys Thos. E. Ricketts. Glendale Oakland dealer, "coming up from an almost unknown car less than two years ago to third place among six cylinder cars in Southern California.

"But the Oakland popularity has not been merely sectional as is the case so often. Its increase in popular estimation has been na-tion wide. Figures computed by national organization show that it ranks seventh in sales among all cars made in sales from the fac-

"In vaulting into third place,"the Oakland had to overtake some of the best known cars in the field and it was due only to the fact that the Oakland has proven herself to be a real motor car value that this feat was possible. "The start of this rise was made

in May of 1922, when the Oakland made a sweeping victory of the Los Angeles to Yosemite Economy run and augmented this stride by stepping out and copping the San Diego to El Centro Economy by a wide margin, defeating every other can entered.

"These victories brought the Oakland up from 35th place to 21st place when in 1923 the Oakland again won these two great annual events, establishing what is recognized as world's records for economy by the A. A. A. By the re-peating of these double victories the Oakland won its right to the crown of the economy champion.'

Actions and consequences.

Life is an interrelated series of them. Consequences are inevitable upon actions. And actions bring inevitable and unavoid-

able consequences. It is well for us to know

that clearly. That there are fixed and immutable natural laws by which consequences are entailed upon actions.

Or forces. If you cut your finger it is an inevitable consequence that it shall pain and bleed. Not to visit any punish-

ment upon you. MIESW FOLEY Not to vindicate any higher authority.

Not to manifest any supernatural displeasure.

But because the consequence of pain and bleeding is inevitable upon the act of cutting your finger.

From the nature of your physical being pain follows an injury to the nerves. And bleeding follows the severing of a vein

or artery. So we have the act and the inevitable consequence.

What force is exerted in nature, of mind or body, there is an inevitable consequence. The force of desire brings the consequence

of greed. And the force of greed brings the consequence sometimes of war and bloodshed. The war is not the result of wrath divinely

For if it were not it would be visited only upon those who bring war about.

The consequence of greed in war is visited upon the just and the unjust.

Upon the guilty and the innocent.
Upon the child in the cradle as well as the man in the ranks.

Or the king on his throne. Consequence is inevitable and immutable. 4 4 4 Every act of life brings its consequence.

And acts and consequences make up life. One follows the other as the night follows the day.

Or as the earth follows about the sun. It is well for us to know the interrelation of act and consequence.

For then we shall ask, in any act, what shall be the consequence.

Whether it will be of good or ill.

Or happiness or sorrow. Or pleasure or pain.

And we shall be more careful of the act, for the consequence it may bring.

A stone dropped into the water will disturb the lake about the point where it is

dropped.

Little ripples will eddy from the point of

immersion. No power on earth can stop them. Because they flow as an immutable and inevitable law of nature.

There is nothing hateful in Nature.

There is nothing punitive. There is no desire to inflict pain. There is simply a positive inevitability in the operation of natural laws.

So my actions bring their consequences. And it is well to know that.

Because, pleasant or unpleasant may be the consequences, I shall have brought them upon myself.

The little one refuses to eat his breakfast, throws his spoon down, hurls his bowl after it, kicks his chair over if he can and if he can't kicks valiantly at it.

He is spanked or scolded or petted according to the temperament of his distressed guardian. After the storm is over he is smiling and cheerful as a blue sky after a spring shower and one is tempted to spank him all over again for being so onery when he might be so angelic.

#### BING HOWARD IN THRILLING FILM AT THE GLENDALE

Bing Howard, as William Russell is called in 'Alias the Night Wind," he newest William Fox offering which the Glendale theatre is presenting today, proves a veritable saviour angel to victims of stick-up men in that production.

Outlawed unjustly, Bing, in an attempt to exonerate himself, swoops down upon stickup -parties, rescues the victim and vanishes. Through the efforts of a girl detective, however, he is exonerated.

Jackie Coogan's first Metro pic ture, "Long Live the King," has arrived at the Glendale theatre. This unusually beautiful picture, plus Jackie's wonderful acting, lives up to all the advance praise for it all during the six months of its

production in Hollywood.

Suffice it to say that in "Long Live the King," Jackie does some of the greatest work of his short career. In "Long Live the King," Jackie is a royal princeling and he is constantly surrounded by royal splendor.

Beautiful sets abound in this production-sets said to have been built at great cost.

ered by Eugene O'Neil in selecting the characters to tell his story of 'Anna Christie," his great stage Thomas T. Ince followed the same plan in choosing the cast for his screen version of O'Neil's

drama which is coming to the T.
D. & L. theatre on Sunday.

The dodderingly pathetic, yet terrible old Swedish sea captain has been created inimitably by George Marion, who immortalized the same role on the New York and London stage. "Anna," the cynical Swedish waif who is regenerated by her love for a man and the influence of the sea has been por-trayed by Blanche Sweet as no other actress, other than Pauline Lord, who starred in the stage production, could have done.

William Russell, as the blustering young Irish lover, is "type" as well as "action" perfect. Eugenie Besserer plays "Marthy," the waterfront hag whose self-abnegation marks one of the striking phases of the picture. Comedy-relief situ-atons are handled capably by Chester Conklin, Fred Kohler, George Seigmann, Ralph Yearsley. and Victor Potel are all excellently cast as the "thick skin" peasant family on the Minnesota farm who play an important part in the life of "Anna Christie."

A SLEEPY SONG

Such a sleepy little song. I can close my eyes and hear
How it hums and hums along
When the time for bed is near. Such an old, old lullaby, Crooned and hummed, and sweet and low, Tired head and drowsy eye. And so long, so long ago.

That old-fashioned rocking chair, That old-fashioned mother too; Tangled curls of golden hair, Sleepy eyes of brown or blue.

And that lullaby that seems

To be whispering in my ear, How it sent us off to dreams When the time for bed was near,

When the time for play was done, When the day was almost gone, And the romping o'er and fun, And the dusk was coming on. Then that sleepy little song,
Then that nodding little head, And a little lad ere long Sound asleep and tucked in bed

It was long, so long ago, But the song falls on my ear. Often when the lights are low And the time for bed is near. And that voice with love so filled Has been silent, Ah, so long, But my troubled soul is stilled With that sleepy little song.

It was as reasonable to expect the dope trafficker as to employ airplanes. to do this as to employ airplanes. I have no doubt that pigeons are being used on both the northern and southern boundaries of the United States by smugglers."

Captain Hobson asserts that the fact of pigeons employed in smuggling is further proof that "law is inadequate to cope with the traffic in narcotics" and that the "only permanent remedy is education."

PHILADELPHIA, Dec. 8.—New light will be thrown on old Bib-lical tories when scientist com-plete deciphering the hieroglyphics on antique statues recently discovered in Palestine, according to Dr. George B. Gordon, director of the University of Pennsylvania Museum, who has returned from a tour to the sites of expeditions operating in Mesopotamia, Egypt and Palestine. During his trip Dr. Gordon arranged for the shipment of 100 tons of antique relics to Philadelphia. They are expected to arrive about January 1 and will be set up at the University

Among the relics being shipped from Egypt is the throne room of Meneptah, one of the Pharaohs. Jewelry, mummies and mummy cases also are included. From Palestine Dr. Gordon shipped a basalt tablet, a battle monument, which is expected to throw light on the story of Exodus; Roman glass, mosaic pavements, many small objects in bronze and a jar which was found filled with silver

In Egypt the expedition is digging in two places, at Memphis and at a site adjacent to that in which the late Lord Carnarvon discovered the tomb of Tutenk-

DOUBLE CHRISTENING "We don't expect to make any finds in Egypt as tremendously import as those by Lord Carnarvon," said Dr. Gordon. "However, the work we are doing at Ur, in Mesopotamia and at Beisan, in Palestine, is very important. We are digging up the Temple of the Moon in Ur.

"In Palestine we have stopped

digging for the present. We can dig at Beisan only during the dry season, which corresponds to summer in our climate. The only digging possible now is in Jerusalem However, the discoveries we have made in Palestine so far have been of the utmost importance. Among other finds we have two slabs of black basalt which may throw more light on the story of Exodus, and on the ancient Egyptian Pharaohs. One of these slabs Don't have anything to say when either case the leaves are a rich called upon.

If you attend a meeting find shining green from three inches to shining gree crossing Palestine, and these basalt slabs, with their hieroglyphic records, probably will show that Palestine was conquered by the Egyptians some time after the Hebrews left Egypt, but before they had reached Palestine."

The three expeditions began ex-cavations in 1920 and will continue for several years. The expense is being shared by the University of Pennsylvania and the British museums.

The report is sent out all over the United States; is used by all reputable concerns handling real estate and loans; shows reports from 222 American cities (good for Glendale that she gets in this Glendale that she gets in this CLASS); is statistical and correct and can be relied upon; otherwise would not be issued in pamphle form by the National Real Estate Boards whose head office is 220 South State street, Chicago.

Note: The report is very interesting. It shows to my mind what association of real estate boards is accomplishing; what it has meant for Glendale to have a real live organization whose association with the National board has meant, is meaning, and will, in the future, mean much to the progress of this city. Good organizations spell success. Glendale has a good one, and it is always in the vanguard looking towards the up-building and betterment of our be-

# SUNDAY, DECEMBER 9 BURTON HEIGHTS

Burton Heights is located in the heart of the La Crescenta Valley-the Section that is "going." So appealing are the homesites in this tract that it was almost half sold out in a single day, establishing a sales record for Southern California.

It is a part of the famous Toschke vineyard, on Pennsylvania avenue, near Michigan boulevard on the top of a mammoth knoll from which a wonderful view in all directions is secured. Each lot is covered with an excellent quality of grapes-the kind that this ranch has long been noted for.

Government statistics show La Crescenta valley the most healthful spot in the world-get that-IN THE WHOLE WORLD. And-get this, too-Burton Heights is right in the heart of this valley. Could more be desired?

If you love the mountains, this tract will appeal to you. If you delight in valley scenes, you will go wild over Burton Heights. If your heart yearns for the open spaces-to get away from artificial things-to experience the freedom that only the mountains and the valleys can give- to have a little cozy home of your own out where things are real-this wonder tract will grip your very soul.

The La Crescenta Valley is the section that John S. McGroarty selected for a home. All over Southern California this famous poet and writer rambled until he came to this valley-and there he settled down-the end of the rainbow had been found. "It's the garden spot of the world," says Mr. McGroarty. "God kissed this wonderful favored section. He carressed it with his unspeakable love. His smile bestowed upon it health-giving qualities, a peace that has come to abide, a quiet restfulness that cannot be surpassed.

Monday night at 6 o'clock the G. U. H. S. cafeteria will be the bril-League. About seventy-five football players are expected, including men who have helped at the gate and on the field and Doctor Hurt.

The menu for the dinner is being lanned by Miss Hanson of the domestic science department and romises to be very good but will be kept a total surprise. The dinner will cost each of those attending fifty cents.

Fifty Cents Will Be Charged

Gwen had hoped to give them a dinner free of cost but this would only enable about half as many players to attend and this was not considered fair when considering that the light weights, fleaweights and second team men have worked hard all year and lived under the match for any semi-pro aggregation strict training rules the same as the varsity players.

Decorations will be carried out in Christmas colors, with poinsettas featuring the flowers. Black and red will also be used to carry out the school colors along with the Christmas motive. Place cards will be in the shape of footballs decor-ated with holly. Decorations and favors are in charge of Katherine

Ronnie West, captain of the varsity team, will preside as toastmaster at the banquet and will probably call on several men of the teams for speeches. Mr. Ferguson will represent the faculty and will also Interesting talks are also expected from coaches Hayhurt, Butterfield and Wolfe. Members of the Girls' League ex-

ecutive board will serve and also several others. Those known so far to be serving are Gwen Warner, Frederica Marshall, Winona Neilson, Evelyn Curren, Catherine
Baird and Emily Torchia.

Although not definitely decided
football letters may be given out
that night. If not they will be given out in the auditorium of the new high school.

#### VENTURA BLVD.

You will find our tract so far superior in all these respects that it is in a category by itself.

Lest we forget another feature. The income from one of these lots, which are covered with peach and walnut trees, will in itself almost pay for the lot.

#### SEE IT BY DAYLIGHT if you can, if not SEE IT AT NIGHT

It's the "Great White Way" of Ventura Blvd., the entire tract being covered with thousands of electric lights.

### Modern Version of New Testament

By EDGAR J. GOODSPEED

THE GOSPEL ACCORDING TO MARK Take care that no one misleads you about this. Many will come under my name and say 'I am he,' and many will be misled by them. But when you hear of wars and rumon be misled by them. But when you hear of wars and rumors sential provision of this agreement; full capacity of said sewer has been of war, you must not be alarmed. They have to come, but provided however, that such pre-reached \* \* \* the said party of it is not yet the end. For nation will rise in arms against nation and kingdom against kingdom; there will be earthquakes here and there, there will be famines. This is only available under the terms of this sewer, the beginning of the sufferings. But you must be on your guard; they will hand you over to courts and you will be taken into synagogues and beaten, and you will be brought before governors and kings on my account, to testify to them. For before the end the good news must be preached to all the heathen. When they are taking you off to trial do not worry beforehand about what you ought to say, but say whatever is given you when the time comes, for it is not you that will speak, but the holy Spirit. Brother will give up brother to be put to death, and the father his child, and children will turn against their parents and have them put to death. You will be hated by everyone, because them put to death. You will be hated by everyone, because you bear my name. But he who holds out to the end will be saved. But as soon as you see the dreadful descration standing where he has no right to stand" (the reader must take note of this), "then those who are in Judea must fly to the hills; a man on the roof of his house must not go down or go into the house to get anything out of it, and a man in the field must not turn back to get his coat. Alas for women who are with child at that time, or who have babies! Pray that it may not be winter when it comes, for there will be that it may not be winter when it comes, for there will be such misery in those days as there has never been since the beginning of God's creation until now, and never will be again. If the Lord had not cut those days short, nobody captain and shortstop of the Chicago Cubs, who quit his team in ple he has cut the days short those days short, nobody ple he has cut the days short. If anyone says to you at that time, 'Look! Here is the Christ!' or 'Look! There he is!' do not believe it. For false Christs and false prophets will appear, and they will show signs and wonders to mislead God's chosen people if they can. But you must be on your guard; I have told you all about it beforehand. But in those days, when that misery is over, the sun will be darkened and the moon will not shed its light and the stars will fall from the sky and the forces in the sky will shake. Then they will see the Son of Man coming on the clouds with great power and glory, and then he will send out the angels and gather his chosen

> "Let the fig tree teach you the lesson. As soon as its branches grow soft and put forth leaves you know that summer is coming. So when you see these things happening, you must know that he is just at the door. I tell you, these things will all happen before the present age passes away. Earth and sky will pass away, but my words will not. But about that day or hour no one knows, not even the angels in heaven, nor the Son; only the Father. You must look out and be on the alert, for you do not know when it will be time; just as a man when he leaves home to go on a journey, and puts his slaves in charge, each with his duties, gives orders to the watchman to keep watch. So you must be on the watch, for you do not know when the master of the house is coming—in the evening or at midnight or toward daybreak or early in the morning-for fear he should come unexpectedly and find you asleep. # See It to-morrow!

OF GREAT BUSINESS CENTER, THE TOWN OF LA CANADA A GREAT PRE-OPENING. PRE-IMPROVEMENT . OFFERING A ROCK BOTTOM, GROUND FLOOR OPPOR-TUNITY. MAKE YOUR SE-LECTION BEFORE THE FORMAL OPENING PRICES

Just think, large lots with full-bearing orange, lemon and fruit trees, including first-class and elaborate street and other improvements, FOR A FEW HUNDRED DOLLARS.

We here predict, without qualifications, that La Canada is destined to become the most valuable residential property in all of Southern California, not even excepting Hollywood, Oak Knoll or any other established district. Within the past sixty days values, in some instances, have advanced from fifty to 100 per cent. Real estate operators by the score are taking options buying and otherwise acquiring all desirable properties. No better indication of tremendous profit possibilities. JUST MAKE A NOTE OF THIS STATEMENT.

### THINK OF SUCH LOTS FOR \$1600 AND ACT!

SALISBURY MANOR, THE HEART OF LA CANADA, stands forth the very center of the most entrancingly beautiful and magnificent natural scenic panorama in California and yet but thirty minutes from Los Angeles business.

Every lover of nature, every admirer of the picturesque, every person that is seeking a home, a real California home with real California atmosphere and environment, should visit Salisbury Manor. THERE IS NOTHING TO COMPARE WITH IT—THERE NEVER

The improvements comprise the widening of Michi-

gan avenue the entire length of the business section with sidewalks, curbs, gutters and an elaborate ornamental lighting system, the laying of gas and water mains and underground electric conduit system.

The residential district will have magnificent, broad avenues, picturesque drives and parkways, with flowers and ornamental trees all surrounding a beautiful park with lawns, trees, flowers and fountain.

To those who know La Canada and its wondrous picturesque beauty and unrivaled scenic charm, a description is unnecessary. You will surely find the lot and the opportunity you are looking for. Come early and get a good selection.

# CENTRAL SQUARE

### ONE-THIRD SOLD THE FIRST WECK

Burbank "The city of unlimited possibilities" has grown from 2900 people to over 10,000 in the past two years, where countless factories and payrolls are now located, with more coming. Two main line rail roads serve this city which means excellent shipping facilities to any point in the United States.

Central Square is right in the city of Burbank, only ten minutes walk to our new \$250,000 High School, commanding a wonderful view of the city, valley and mountains. Fronting both Buena Vista and Central Avenues each being 80 foot Boulevards. The paving of Central is to start at once and when completed will be the most prominent boulevard from Burbank to Hollywood by the way of Lankershim. Last week petitions were accepted for the paving of Buena Vista, which will mean another excellent boulevard to Los Angeles by the way of Riverside Drive. All the lots are large, you don't need two, to build your home on, with water, gas, electricity and

AUTO REPAIRING

#### Clutch Attachment for Chevrolet Cars

There is nothing so annoying or injurious as the constant grabbling of a clutch which has a tendency to loosen the mechanical parts from the radiator to the rear end and is extremely unpleasant to the ones riding in the car. After this grabbling has taken place for a short time there is a likilhood of its tearing the whole rear end out, which is an unnecessary expense if you will only realize the clutch of any car needs occasional attention. You will have a smooth, easy but positive action thereby saving yourself expensive repair bills and make riding a pleasure as the SO EASY makes a good clutch better.
