MR. E. G. BREWER,
(Originally BARLOW & CO.)

Continues to obtain Patents for Inventions for Great Britain and other Countries, at moderate charges.

The Inventors' Manual, Gratis on application, or free by Post.

PRESERVATION OF TIMBER By Burnettizing or Creosoting

SIR W. BURNETT and Co., Creosote as well as Burnettize timber and sleepers at their river-side premises Millwall, London, where vessels can discharge and take in their cargoes.

SIR WM. BURNETT and Co., continue to prepare canvas, cotton, and woolen articles, by their patent process, for their preservation against mildew and rot, as well as timber, and also to supply their concentrated solution for the same objects: with licenses and instructions for its use.

Burnettized Sleepers and timber in bridges and viaducts have been in use many years on numerous railways in England, as well as in India, North and South America, Sweden, Norway, Italy, France and Belgium; and the whole of the sleepers and the timber materials of the Metropolitan (Underground) railway have been recently prepared at Burnett and Co's Works, Millwall.

Any further information may be obtained personally or by letter, addressed to Captain Jackson, R.N., Manager 18, Cannon Street, City, E.C. London.

Timber rendered uninflamable if desired.

SIR W. BURNETT'S DISINFECTING FLUID.—This concentrated fluid is the cheapest and best. Sold by all chemists at 5s. per Gallon, and in bottles at 2s. 1s., and 6d. being less than one farthing per gallon when diluted for use.

J. WILLIAMS,
General Printer,

is prepared to execute every variety of work in connection with each department of the Trade, promptly and at moderate prices.

PLACARDS

in any variety of Style, Color, and Size.

PRINTED AND PUBLISHED BY J. WILLIAMS, 23, VILLIERS STREET, STRAND.

Dir. Williams's

P R E F A C E.

IN issuing the First Edition of the MANUFACTURERS' DIRECTORY the Proprietor and Publisher presents to the Public a Work which has long been required. Those engaged in the IRON, METAL, HARDWARE, &c., Trades, have been hitherto compelled to purchase numerous Directories, in order to obtain information in connexion with their respective branches of Trades, which is now contained in one volume.

This Directory will be found to be a correct Hand-book, in the compilation of which, neither expense or pains have been spared to render it worthy of the position which the proprietor hopes it is destined to occupy in public estimation.

The original intention of the publisher was to have issued the Directory earlier in the year. The magnitude, however, of the undertaking, together with the numerous agencies required in the compilation, known only to those conversant with Directory labours, compelled him reluctantly to postpone it.

In order, however, to guard against any possible disappointment or allegation of breach of good faith, he carefully abstained from guaranteeing its publication at any definite date.

Since he commenced this elaborate compilation, the publishers of other Directories, by means of their paid emissaries, have fabricated and industriously circulated reports calculated to injure his reputation, and that of his Work. In addition, more than a dozen adventurers, seizing upon his ideas, have endeavoured to anticipate the appearance of his Directory.

Happily, however, misguided zeal outstretched discretion, and the result has been that, instead of inflicting injury upon him, they have only injured themselves. Many warm supporters and friends have extended their cordial co-operation, which he will endeavour to deserve and retain by every possible means.

Notwithstanding the boasting and mendacity of these adventurers, not one of the publications intended to forestall this Directory has been, or probably ever will be published, whilst the publisher has secured the leading manufacturing firms in England, &c., both as Subscribers and Advertisers, which can be proved by a reference to his advertising columns and the list of subscribers.

In order to facilitate the references to the information contained in the book, the several Counties are arranged alphabetically, together with their respective Towns, and the Trades, Banks, Public Companies, Railway Conveyances, Electric Telegraph Stations, &c., &c., follow in each consecutively.

The proprietor feels under great obligation to those Managers of Insurance Companies, Postmasters, &c., who have supplied him with the peculiar features of their respective establishments. He may be pardoned, however, in remarking, that notwithstanding directed envelopes have been forwarded to every office in England, with a respectful request that an enclosed form should be filled in, yet some few have not had the courtesy to return them, although bearing a stamp.

Arrangements are now in progress, whereby a Second Edition of the Directory will appear in 1865. The obstacles and difficulties experienced in editing the first issue of this Work, will in a great measure be obviated in the volume for the coming year.

In the mean time the publisher would gratefully acknowledge and adopt any suggestions for the improvement of the Work if found practicable.

Alterations, additions and subscriber's names for the 1865 Edition, are requested to be forwarded to the proprietor, 23, VILLIERS STREET, STRAND, LONDON.

J. WILLIAMS.

G. SPILL & CO.,

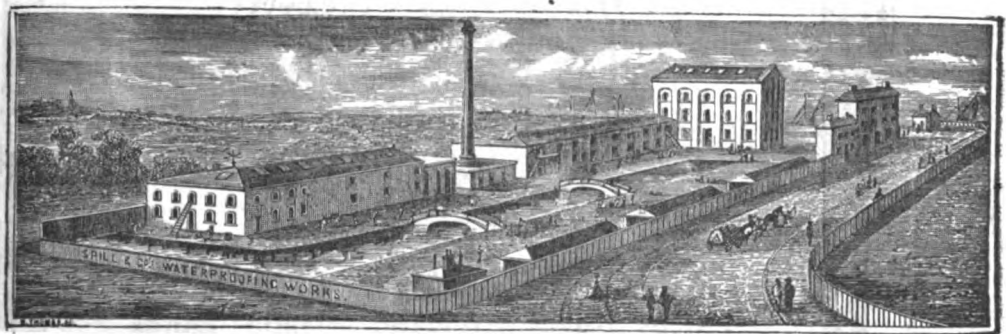

INDIA RUBBER

MANUFACTURERS,

AND

WATERPROOFERS,

Works,—Hackney Wick, N.E., London.

Depots—137, CHEAPSIDE, E.C., LONDON,
And 9, HIGH STREET, BRISTOL.

MANUFACTURERS OF

India Rubber Oiled and Vegetable
Leather Fabrics,
Patent Isomeric Leather (Machinery) Belting
India Rubber and Oiled Waterproof
Garments, South-Westerns, &c.

WATERPROOF COVERS OF EVERY DESCRIPTION.

ENAMELLED LEATHER CLOTHS:

VULCANIZED INDIA RUBBER

In every description of Suction and Delivery Hose, Gas Tubing, Steam
Packing, Valves, Clacks, Sheet, and Solid.

PERRY AND CO.'S

Patent Aluminium Bronze Pencils and Pens,

Bear such a close resemblance to Gold, as to be scarcely distinguishable from it. Pens 6d. per card
Pencils from 1s. 6d. each.

PERRY and Co.'s UNION GOLD PENS, 1s. each.

PERRY and Co.'s UNION GOLD PENS, 1s. 6d. each.

PERRY and Co.'s UNION GOLD PENS, 2s. 6d. each.

PERRY & Co.'s Orthodactylic Penholder.

The object of this Penholder is to make children hold the pen correctly, *i. e.*, to keep their fingers in a correct position, so as to prevent them from forming a habit of holding the pen in an improper manner, and permanently spoiling their handwriting. Price 1d., 2d., and 6d. each.

2 inch Cumberland Lead.

PERRY AND CO.'S

Patent Royal Aromatic Elastic Bands.

These Bands are not only perfectly free from the unpleasant smell of sulphur, which detracted so much from the value of the old Bands, but have, on the contrary, a very agreeable perfume. They are equal in elasticity and strength to the original, somewhat softer, and not liable to be affected by the climate; and are superior in every respect to anything yet introduced for placing round and securing papers and parcels of every description. Price from 6d. per Box, in assorted sizes.

SOLID INK.

PERRY & Co.'s PROPPELLING AND WITHDRAWING PENCILS can now be had, fitted with Red, Blue, and Black, Solid Ink, at 3d., 6d., and 1s. each, and upwards. Two inches of Solid Ink in each Pencil.

PERRY & CO.'S PENS

NEW STEEL PEN.

PERRY AND CO.'S "ALBERT" PEN.

Embraces the latest improvements in Steel Pens. Price, in patent boxes, 1s., 1s. 6d., and 2s. 6d. Samples per post for two stamps.

PERRY & CO.'S INDELIBLE MARKING INK, 8d. per Bottle, warranted not to run or burn, and will retain a good colour.

Sold by all Stationers; Wholesale, at 37, Red Lion Square, and 3, Cheapside, London.

Manufacturers of the well-known & celebrated Double Patent Perryian Pens.

WILLIAMS'S MANUFACTURERS' DIRECTORY, FOR LONDON,

DANIEL, H. & J. 67, Lord-st; manufactory 98, Georges-crescent, Castle-st. Chronometer 773 by Daniels from the ship "Enoch Traig," Capt. Rich, was returned to the Observatory after a voyage of 164 days; we calculated its performance and found no alteration from the rate given, consequently it would show the ship's true longitude during the whole voyage. The mean daily rate of Chronometer No. 3,859 of your make belonging to Capt. Gerrish, ship "Nicholas Biddle," when reported here, was gaining daily two seconds fifty-six hundredths. It has since been a voyage of 102 days and is now again rating. We have carefully calculated its performance, and found its mean daily rate during the voyage, to have been two seconds 54 hundredth parts of a second, or half-mile distance in longitude during the voyage of 102 days." There have been many other of your Chronometers here lately equally correct, but the above two are the most recent abstracted from the books of the Liverpool Observatory

covers, brewing coppers and stills,
baths, &c.

**CRUCIBLE MANUFACTURERS
AND SMELTING-POT MAKERS.**

SMAILE & Co. R. 6 Regent-st,
Forth-banks. Honourable men-
tion awarded to E. Smale & Co.,
deemed of the best quality after
several tests. Specimens exhib-
ited in the National Museums.
We have much pleasure in solicit-
ing the attention of consumers of
crucibles to our superior and well-
seasoned stock made of the best
materials, and used by the principal
firms in the north of England.

STOKOE, J. Dunston, near Gates-
head. The Crucibles manufac-
tured by J. S. can be confidently
recommended for durability and
price, and are not to be surpassed
by any firm in the north of Eng-
land, he having supplied some
of the largest firms in the neigh-
bourhood they can be referred to.

stock of really good furniture and
upholstery in the north of England
is always kept on hand at their
spacious Show Rooms. The mono-
coid writing cabinet and tables,
invented some years ago by Mr. T.
Sopwith, F.R.S., are always kept
on stock, and are much used for
libraries and offices. These are
all secured by means of an inge-
nious arrangement with a single
lock, and are made in all sizes.
Banks, offices, &c., fitted up with
counters, desks, &c., in the most
approved manner, and on the
shortest notice, consistent with
good workmanship.

MONRO'S CANNON BOILER.

PRICES.

20-inch Wrought Iron	£3	15	0
24-inch Wrought Iron	6	10	0
30-inch Wrought Iron	7	10	0
36-inch Wrought Iron	8	10	0
48-inch Wrought Iron	12	0	0
60-inch Wrought Iron	20	0	0
72-inch Wrought Iron	25	0	0

These Boilers are now acknowledged by all who have used them to be the best Boilers at present invented. They are both economical in their first cost, and also in the consumption of fuel. They require but little space to fix them in, and when set the total height of brickwork need not be more than 3½ feet, consequently they can be fixed in many places where it would be impossible to set an Upright Boiler. These Boilers are now made of various sizes, suitable to heat from 800 to 3,000 feet of four-inch pipe, and are kept in stock and sold only by

Begs leave to call the attention of White Lead, White Zinc, Color, and Ink Grinders to his improved GRANITE ROLLER MACHINE. These Machines have a decided advantage over the Old Surface Mill Stone, they require no dressing take but half the power of the ordinary Mill, and grind much finer, and will do twice the work with one fourth the amount of power; can be cleaned in two minutes, so that the parties who use them can grind a dozen different shades and colors in a day, with the same Machine, and not waste any portion of the material they may be grinding.—Also maker of Steam Engines, Perforating Machines for Metal and Paper, Bending Machines, Bending Rollers, Astrigal Machines, and all kinds of Tools connected with the Zinc and other Metal Trades.

BY ROYAL  LETTERS PATENT.
IMPROVED GAS APPARATUS
SUITABLE FOR
TOWNS & VILLAGES, MANSIONS, MANUFACTORIES, RAILWAY STATIONS, &c

The Superiority of this Apparatus for Mansions, etc., has been fully substantiated by the numbers now in operation. Without having hitherto been prominently brought before the Public at the International or any Exhibition, but, simply from the recommendations of those in use, its adoption has become more extensive than that of any other Gas Apparatus. The Manufacturers have pleasure in stating, that, since its first invention in 1855, several improvements have been made in it; and that they are justified in stating, that on comparison it will be found the most substantial, economical, and effective Gas Apparatus yet produced.

FOR EXPORTATION.

Apparatus on this principle are peculiarly adapted, as the "COMBINED, CONDENSING, CLEANSING, AND PURIFYING APPARATUS" is fitted together before sent out from the Works at Huddersfield, and only requires afterwards the inlet and outlet pipes attaching.

TOWNS, VILLAGES, AND MANUFACTORIES.

GAS WORKS are erected by W. C. HOLMES & CO. either with the "Combined Purifying Apparatus," with two or more purifiers, and with Centre Valve, so that the purifying material can be removed and replaced in any purifier without stoppage in gas manufacture; or with the Improved Annular Condensers, and with purifiers, valves, and other portions of the Apparatus on the ORDINARY PRINCIPLE.

WILL BE SENT ON APPLICATION:—

PLANS, SPECIFICATIONS, AND PRICES OF GAS APPARATUS.

PLANS, SPECIFICATIONS, AND ESTIMATES OF THE REQUISITE BUILDINGS FOR EACH SIZE OF APPARATUS.

DETAILED PLANS OF THE "COMBINED PURIFYING APPARATUS."

"IMPROVED ANNULAR CONDENSERS."

THE "COMPARATIVE COST OF GAS WITH OTHER ARTIFICIAL LIGHT."

Retorts, Condensers, Exhausters, Engines, Purifiers, Scrubbers, Station Meters, Governors, Valves, Lamp Columns and Brackets, Wrought Iron Service Pipes, Wet and Dry Meters, Gas Chandeliers, and all articles pertaining to Gas Manufacture and Distribution.

PROVINCIAL ADVERTISEMENTS.

**BROWN AND GREEN,
LUTON,**

MANUFACTURERS AND PATENTEES OF

KITCHEN RANGES, VENTILATING AND SUSPENSION STOVES.

B. & G's Prize Medal Range is the most complete and economical Kitchener, for all kinds of cooking; and is a certain cure for Smoky Chimneys.

From "THE MECHANICS' MAGAZINE."—There is one Kitchener in the present Exhibition which is deserving of notice, it is the largest and handsomest exhibited. The Range alluded to is by Messrs. Brown and Green. These Gentlemen have long been makers of Ranges, suited for all classes of the community, and have taken out no less than Five Patents for their improvements. They have however never before exhibited, otherwise their Prize Medal of 1863 would undoubtedly not be their first.

From "THE STANDARD."—One of the best Kitcheners is shown by Messrs. Brown and Green, who have well deserved the Prize Medal which has been awarded to them.

From "THE GLOBE."—For style, finish, and cleanly appearance, these Ranges, surpass anything of the kind we have yet seen.

From "THE MORNING HERALD."—This large Kitchener also combines all those valuable improvements which Messrs. Brown and Green have from time to time introduced into their Patent Ranges of all sizes. Among their results are the certain cure of smoky chimneys, the ventilation of the kitchen through the upper part of the Range, whereby are prevented that oppressive heat in the kitchen, and close smell of cooking, which are often sources of annoyance in other close Ranges; and the facility for roasting meat in front of the fire at the same time that the whole of the apparatus is kept going. Of the real taste displayed in the fitting up of this Range—and the exquisite finish of the work, it is impossible to speak too highly.

From "THE CIVIL ENGINEER AND ARCHITECT'S JOURNAL," September, 1st, 1862.—Kitchen Ranges in the International Exhibition, 1862.—The collection, although containing many examples which appear at first sight to embrace the necessary requisites to secure economy and efficiency, is yet, with very few exceptions, singularly deficient of examples exhibiting features of useful novelty. The kitchen range (No. 6,001, class 31), manufactured by Messrs. Brown and Green, of Luton, we have inspected in operation, and it appears to us completely to remedy the defects enumerated above; as yet it is the only one of which we can say so much. The apparatus exhibited is the largest and by far the handsomest Kitchener in the building; and in addition to the special merits of its arrangement and simplicity of action, reflects great credit upon the firm for the excellence of its workmanship and finish. The award of a medal in this instance we heartily approve.

From "THE BUILDING NEWS."—With but little variation the Kitcheners of 1862 are identical with those of 1851. The chief exception is the one produced by Messrs. Brown and Green, who did not exhibit in 1851, but have now worthily obtained the Prize Medal of this section of class 31. As regards both size and splendour this Range certainly, however, eclipses all others.

From "THE IRONMONGER" August 30th, 1862.—All who examine it must be struck with the fine workmanship of every part, and the remarkable excellence of the castings. An improved plan for roasting in front of the fire without checking the heat of the oven, is another remarkable feature in this beautiful range.

From "THE BUILDER," September 6th, 1862.—"Messrs. Brown and Green, of Luton, exhibit one of the best arrangements of the "Kitchener."

NOTE.—BROWN AND GREEN'S PATENT VENTILATING STOVES are universally approved and give the most unqualified satisfaction.—Price 50s., 60s., 70s., 90s., 120s., they are adapted for Halls, Shops, Warehouses, Churches, Chapels, &c. BROWN AND GREEN'S PATENT SUSPENSION STOVES are safe, simple, economical, and effective for Bedrooms, Offices, Small Greenhouses, Shops, &c.—Price: Plain 12s. 6d., 16s., 20s., 30s., 38s., Ornamental 16s.; 20s., 25s., and upwards.

PROVINCIAL ADVERTISEMENT.

To Her Majesty the Queen; and the late H. R. H. the Prince Consort; and their R. H. the Prince and Princess of Wales.

VENTILATORS,
FOR STABLES AND FARM BUILDINGS,

As applied to Windsor Castle; and the Royal Stables, at Windsor; and for Public and Private Buildings.

WATSON'S
SELF-ACTING SYPHON
VENTILATORS

For Churches, Chapels, Schools, Gentlemen's Houses, Shed Factories, Drying Rooms for Cloth and Wool, Workshops, Warehouses, Banks, Counting Houses, and to remove the smell of Cooking, and Heat and Steam,

Ventilation without violent draught. Nearly the whole of Windsor Castle is ventilated by these Ventilators, as were also the Chapels Royal, Saint James's, and Saint George's, for the Marriages of the Princess Royal and Prince of Wales. To be had only of

CHARLES WATSON F.R.S.A.

THE INVENTOR AND PATENTEE, AT HIS WORKS,

1, 2, & 3, Bond Street, Halifax, Yorkshire;

London Office.—1 Frideswide Place, Islip Street, Kentish Town, N.W.

About 43,000 of these ventilators have been successfully applied to Churches, Schools, Factories, Dwelling Houses, Steam Boats, Stables, Drying Stoves, Work shops, Warehouses, Farm-buildings, &c.

Testimonial for a 26 Stall Stable.

From C. GAPP, Esq., Great Western Royal Riding School, Gloucester Crescent, Hyde Park, London, June 23rd, 1862.

Dear Sir,—I have had your Ventilators in my Stables, for 26 horses, for more than 4 years; the Ventilators have saved me 2 and 3 horses yearly.

My horses used to suffer much from throat affections and inflammation before I used your Ventilators, but since you ventilated my stables and now, ~~my horses~~ have been quite free from these diseases, and have ever since been ready and able for their work at all times.

My Riding School, ventilated by you, is always free from stable smell, and smell of tan, and is as pleasant at all times as out of doors.

Having proved your Ventilators for more than 4 years, I can strongly recommend them for stables; the expense of the Ventilators was repaid to me within a year.

Testimonial for a Public Hall, for Public Meetings.

Port of Hull Society, and Sailors Orphan Institution, Sailors' Institute, Waterhorse Lane, Hull, 19th, April, 1864.

Dear Sir,—A New Town Hall is in course of erection here, and the Police Court in connection with it has been for some time completed; it was said to have been perfectly ventilated; it turns out, however in practice, that it might, as have well been without the appliances called Ventilators.

The Clerk to the Magistrates (J. H. Gresham, Esq.) has been down to the Sailors' Institute to inspect the Ventilators you supplied, he has called upon me and wishes for further information; will you kindly send me a copy of your pamphlet, with any remarks you wish to add in explanation of your system, and I will hand it to Mr. G.

Our Institute has been thoroughly tested, over and over again, having been crowded to the doors on many occasions since I last wrote to you, so that I am now enabled to speak with the most perfect confidence, and am happy to say that the Ventilation is so complete, and the temperature so entirely under control, that it leaves nothing to be desired.

You will remember that some members of our committee, when you had an interview with them were somewhat sceptical as to your success; they are now so thoroughly satisfied that they would be glad to extend your system as far as they may have the means of doing so.

I shall be glad to answer enquiries upon the subject if you should make any reference to me

C. WATSON, Esq.,
Halifax.

And am, dear Sir, Yours very truly,

(Signed) JOHN WRIGHT, Honorary Secretary

Patent Self-Acting Circular Saw Benches.

S. & Co. invite the attention of Agriculturalists, Shippers, Contractors, and others to their Patent Portable and Fixed Self-acting CIRCULAR SAW BENCHES, which are fitted with a new and simple apparatus for drawing Timber to and from the saw—the draft chain working in friction cams instead of passing round a cylinder a true cut is obtained, as the timber can only be drawn parallel to the saw. Any length of timber may be cut by adding to the draft chains and tramways. They are adapted to cut any description of wood; rough timber merely requiring to have each end chipped with an axe, to give it a steady bearing on the table and carriage. Both carriages are fitted with a lever roll, to enable the man who works the Bench to raise the timber on the carriage to carry it beyond the saw; they are also fitted with an improved guage, to cut either parallel or feather-edge boards; and for deal-cutting a spring roll is sent to press the deals against the guage, so that a true cut is obtained however uneven the surface.

Any of these Benches may be worked by Portable or Fixed Steam Engines from three-horse power upwards, as the speed for bringing the timber to and from the saw is regulated according to the power used; they are also fitted with a lever, so as to stop or reverse the motion of the timber instantaneously (a necessary precaution in case of accident).

Prices and Particulars forwarded on application.

JOHN STEWART,

MESSRS. TOMLINSON & JONES,
ENGINEERS MACHINISTS. &c.,

AND
CONICAL COP TUBE MANUFACTURERS,
BY PATENT MACHINERY,
ELM STREET, OLDHAM ROAD, MANCHESTER.

Tender their sincere thanks to the Cotton, Silk, and Woollen Trades generally, for the liberal support and unexampled success of their Patent Cop Tube. The increasing demand for which compels their removal from 130, Collyhurst, Street, to more extensive premises at the MILES PLATTING WORKS, Elm Street, Oldham Road, Manchester, where future orders will be punctually attended to

Messrs. TOMLINSON & JONES respectfully announce that in consequence of important improvements in their Machinery, and Repeal of the Paper Duty, the PATENT CONICAL COP TUBE, and all other descriptions of Tubes, can be abundantly supplied at greatly reduced prices

A number of the most flattering Testimonials have been received by Messrs. T. & J. from highly respectable firms, a few of which we beg leave to subjoin :-

- | | |
|--|--|
| Messrs. Tomlinson & Jones, | Stalybridge, November 7th, 1860. |
| GENTLEMEN,—We have used your Patent Tubes above two years, and we find a great advantage with them, and a great saving in waste | EDWARD SIDEBOTTOM & SONS |
| Messrs. Tomlinson & Jones, | Mossley, near Manchester, November 7th, 1860 |
| GENTLEMEN,—Having used your Paper Cop Tubes for about two years, we can bear testimony to their economy. We consider them a great saving over the gutta percha tubes | NATH. BUCKLEY & SONS |
| Messrs. Tomlinson & Jones, | Enfield Mill, near Accrington, April 4th, 1861 |
| GENTLEMEN,—We like your Cop Tubes exceedingly, and consider them the best in use. We confidently predict their general adoption, as the amount of waste in our weaving department has been reduced from 900lb. to 290lb. weekly. | FELIX LEACH & Co. |

IRON DOORS, COTTON CANS, IMPROVED OIL CANS, BOBBINS, &c., &c.

BARNARD, BISHOP, & BARNARDS' Patent Noiseless Lawn Mower.

This Machine differs from all other Lawn Mowers, in being constructed without either Gear-Wheels, Chains, or Levers, the power being transmitted to the cutters by a loose intermediate wheel with an India-rubber tyre, which is placed between a plain faced driving wheel and pinion; it is very certain in action, and at the same time so simple that it cannot be deranged.

When the Machine is drawn back, the intermediate wheel throws itself out of work, and the cutters cease to rotate. The cutters have steel on both sides and when blunt can be reversed, bringing the sharp edges forward. It is perfectly noiseless, both in its forward and backward action, and works with considerably less power than any other machine for the purpose yet introduced.

The India-rubber tyre will last from one to two seasons, and can be replaced at the cost of a few pence. An extra tyre is sent with each machine.

The Iron work of Grass-box is Galvanized, which prevents its being destroyed by rust, to which this part is so liable from its contact with damp grass.

The Miniature Lawn Mower, cuts 8 inches £2 10s.

Suitable for the very smallest grass plots or edgings; can be worked with ease by a child.

To out 10 inches. This size can be worked by a lady **£3 5s**

To out 12 inches. Can be worked by a lad **£4 10s**

The 12 inch and all larger sizes have the drum or roller divided in two parts, for the convenience of turning.

To out 14 inches. Suitable for one person... .. **£5 0s**

The 16 inch and all larger sizes have a driving wheel on each side of the machine, which gives great steadiness to the working.

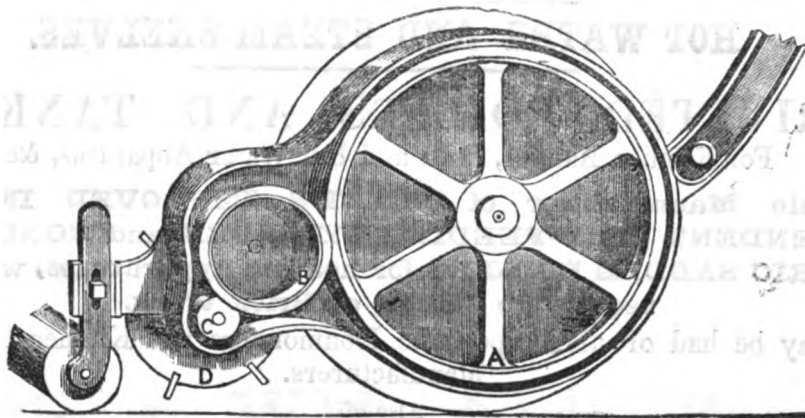

To out 16 inches. Suitable for one person **£6 0s**

To out 18 inches. Suitable for man and boy... .. **£6 10s**

To out 20 inches. Suitable for man and boy **£7 0s**

To out 22 inches. Suitable for two men **£7 10s**

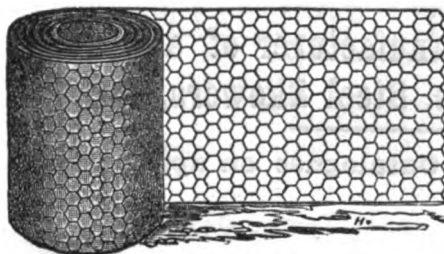

Packed and Delivered Carriage Free to the principal Railway Stations in England.

The above Engraving shows the arrangement of Wheels.

A, Plain-faced Driving Wheel. **B,** Intermediate Wheel with India-rubber Tyre. **C,** Pinion. **D,** Cutters.

BARNARD, BISHOP, & BARNARDS', IRON, WIRE, & GALVANIZING WORKS, NORWICH.

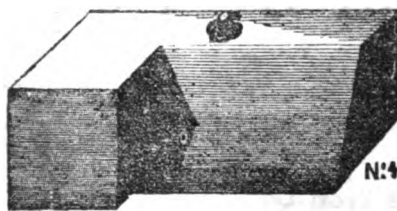

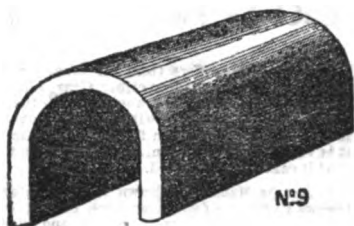

Manufacturers of Machine-made Galvanized Wire Netting for Game, Aviaries, Pheasantries, Sheep, etc., of every description, from 1/4 in. to 6 in. mesh.

ALL NETTINGS GALVANIZED AFTER MADE.

EGERTON WORKS, IRWELL STREET, SALFORD, MANCHESTER.

GREEN'S IMPROVED PATENT FUEL ECONOMIZER, FOR STEAM BOILERS.

This Apparatus, after having been applied to all sorts of Boilers, and subjected to every variety of trial, through a period of several years, still holds its position as the best and most efficient means of *Heating the Feed Water with the Waste or Residual Heat from Steam Boilers*, and thus effecting a positive saving of from 20 to 25 per cent. of the Fuel, besides considerably reducing the "wear and tear" in the working of the Boilers, by furnishing, as it does, a constant supply of *Feed Water* at a high and uniform Temperature.

The recent Improvements in the ECONOMIZER, especially in the *scraping or cleaning* Apparatus, render it still more worthy of general adoption.

N.B.—The ECONOMIZER is now in successful operation to above 500,000 Horse Power

All necessary Information may be obtained of the Patentees and Sole Makers.

London Agents: S. & E. RANSOME & CO., 31, Essex Street, Strand, W.C.

Upwards of 50,000 of these
**IMPROVED STEAM PRESSURE
AND VACUUM GAUGES**

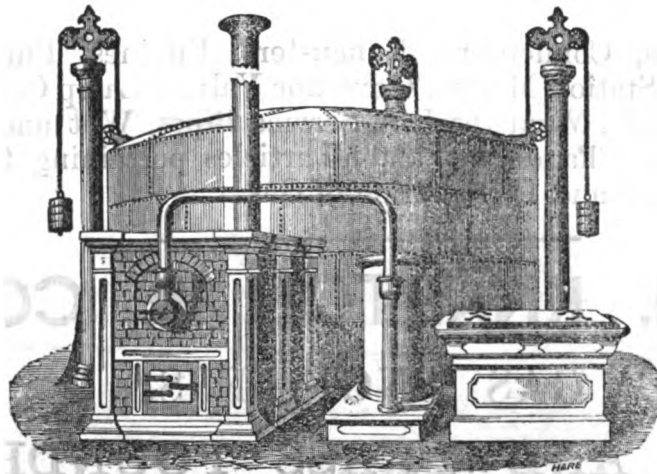

have already been manufactured and sold. Their superiority over all others hitherto known, on account of their durability, extreme susceptibility, and undeviating accuracy in indication of pressure, is sufficiently demonstrated by the increasing demand experienced for them.

**INTERNATIONAL EXHIBITION
of 1862,**

Vide Jurors' Report: Honorable Mention.

"1316. Schäffer & Budenberg.—Pressure and Vacuum Gauges, Engine Counters, Dynamometers, Winding Indicators, Steam Boilers, and Steam Engine Fittings." Respecting Pressure Vacuum Gauges, &c., it is stated—They have proved very effective in practice, and can be relied on for their accuracy.
