## N O T I C E.

In this Edition, the Day-Book and Invoice-Book in Single Entry are given with double, instead of single money-columns, as formerly, and the account for "Goods" bought and sold, referred to at page 72 of the former edition, is now introduced into the Ledger.

## N OTICE.

In the present Treatise, simplicity is the object chiefly aimed at, and all unnecessary technicalities in the phraseology and complexity in the system of keeping the accounts have been studiously avoided. The principles of Book-Keeping are exhibited, not by means of abstract rules, but by examples of the various transactions common in actual business.

The work embraces Book-Keeping by "Single and Double Entry." Another edition, containing Single Entry alone, is issued for the convenience of those who may not require a knowledge of the entire system.

An Appendix, containing Explanations of Mercantile Terms and Transactions, is subjoined, which will serve in some measure as a guide to the Counting-room.
W. I.

Edinburgh, August 1849.

## B00K-KEEPING.

Book-Keeping is the art of recording and classifying a merchant's or tradesman's daily transactions, and of keeping an account of his property and debts.

The property or capital of persons in business, may be comprised under the following heads:-
I. Stock in trade, including goods, warehouses, machinery, ships, or whatever species of stock is employed in the business.
II. Accounts, or debts owing to the merchant.
III. Bills,
"
93
IV. Cash.

A merchant's books ought to exhibit clearly the whole amount of his property, with the particulars of which it is composed ; and also the amount of his debts.

The following are the most important of the books used in BookKeeping :-

Day-Boor, for Goods sold on credit.
Invoice-Воок, "Goods bought on credit.
Cash-Bоок, ", Cash received and paid. Discount received and allowed.
Bill-Boor, "Bills receivable and payable.
Ledger, to contain an abstract of the other books.
Stoск-Book, ", contain an inventory of the stock on hand at the time of balancing the books.

The following subsidiary books are also in general use :-
Account-Book, to contain a list of accounts owing to, and owing by, the merchant.
Warehouse-Boor, ", contain an account of the quantities of goods received, sent out, and on hand.
Memorandum-Book, , contain temporary memorandums.
Letter-Book, ", contain copies of letters.
Various other books are required, according to the nature of the business.

## D A Y-BOOK.

The purpose of the Day-Book is to keep a daily account of all goods sold on credit.

When the goods are sold, the names and addresses of the persons to whom they are sold, with a description of the goods and their prices, are entered in the Day-Book, as shown in the following examples: any other charges are entered in a similar way. The particulars of the entries are filled into the inner money columns; the sums-total into the outer columns:-thus,

If, on January 1, you sell to George Innes, Liverpool, 20 yards of black silk @ 3s. 6d. per yard, 12 yards of velvet @ 11s., and 15 yards of linen @ 2s. 6d. ; and if, besides, you wish to make a charge for packing and commission,
The transaction will be entered in your Day-Book, as in the first of the following examples :-

$$
\text { January 1, } 1850 .
$$

[^0]
## INVOICE-BOOK.

This book is used for keeping an account of all goods bought on credit. It is so called because the entries made in it are copied from the invoices (see Appendix) usually sent along with the goods.

When the goods are bought, and have been received, the names and addresses of the persons from whom they are bought, with a description of the goods and their prices, are entered in the InvoiceBook, as below : any other charges are entered in the same way:thus,

If, on January 1, you receive from James Stewart \& Co., Leeds, 180 yards of black cloth @ 13s. 7d., 80 yards of brown cloth @ 14s. 5 d., 80 yards of olive cloth @ 14s. 10d., and 100 yards of black cloth @ 15s. 2d. ; and if a charge of 9 s .6 d . is made for packing, \&c.,
You make the entry in your Invoice-Book as in the first of the following examples, the entry being copied from the invoice which you have received from James Stewart \& Co.

Instead of copying the particulars of the invoices, it is often more convenient to copy the amount only, as shown in the entry of J. Miller, Jan. 20.

The invoices are preserved for future reference, if necessary. They may be kept either in a book made for the purpose, or tied up in parcels, having the name, date, and amount marked on each.

January 1, 1850.

## CASH-BOOK.

In the Cash-Book is kept an account of all cash received and paid, and of discount received and allowed.

Two pages are always required for the entries ; the left-hand page for entering the cash you receive, and the discount allowed by you; the right-hand page for the cash you pay, and the discount allowed to you.

Each page is ruled with double money columns; the inner columns being used for the discount, the outer for the cash.

When you receive payment of an account, enter on the received side
Cash Received.
1850.

Jan.
1 J. Adams-Cash at commencement... This is the sum with which you commenced business.

3 James Brown, George Street.........
Here James Brown settled his account, amounting to $£ 4,19 \mathrm{~s} .6 \mathrm{~d}$., by paying you $£ 4,15 \mathrm{~s}$. 0d. -4 s . 6d. having been allowed to him as discount.

5 Union Bank
This sum was received by you from the Bank.

## Goods-Cash Sales

This is an entry for goods which you have sold for ready money.

20 Bills Receivable, No. 1, discounted, $£ 172,11 \mathrm{~s}$.
This bill for £172, 11s. 0d., marked No. 1 in your Bill-Book under " Bills Receivable," was sent to the Bank to be discounted; $£ 172,3 \mathrm{~s}$. 6 d . was received for it in cash,〒s. 6d. being charged by the Bank for discounting it.

BALANCING THE CASH-BOOK. -To ascertain that the sums have been entered correctly, the Cash-Book requires to be balanced at stated times, as explained at page 44.
PETTY CASH-BOOK.-See Appendix.
CASH-BOOK, DOUBLE ENTRY.-Additional money columns are used in Double Entry: see pages 86 and 87.
the name of the person from whom you receive the money, and fill the amount of cash and discount into the cash and discount columns.

When you pay an account, enter on the paid side the name of the person to whom you pay it, and fill the sum and the discount into the cash and discount columns.

Various money transactions are shown in the following example. The nature of every transaction should be distinctly expressed, and the sums paid or received, filled into the money columns opposite each entry.
[It is usual to name the left-hand side the $D r$. side, and the right-hand the Cr, side, prefixing " To " and " By" to the entries; but these have been omitted for the sake of simplicity.]

Cash Paid.

## BILL-BOOK.

In this book is kept an account of all "Bills Receivable"-that is, bills of which you have to receive payment-and "Bills Pay-able"-that is, bills which you have to pay when they become due. (For an account of bills, see A ppendix.)

One portion of the book is kept for "Bills Receivable," and another for "Bills Payable." The names of the persons from whom you have received the bills, or to whom you have granted them, with the sums, dates, and other particulars, are entered as follows :

## Bills Receivable.

These bills were received by you on the dates marked, from G. Innes and J. Lindsay, in settlement of your accounts against them. When you discount the bills at the Bank, or receive payment of them when due, they are entered in the Cash-Book, and the dates of the entries are filled into the column in the Bill-Book, as above. Various other columns used in business, will be seen at pages 51 and 53.

Bills Payable.

| No. | When Accep. | To whom Granted.* | Amount. | Date. | Term | When Due. | Entered in Cash-Book |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $2$ | $\left\|\begin{array}{r} 1850 . \\ \text { Jan. } 4 \\ , 7 \\ 8 \end{array}\right\|$ | J. Stewart \& Co.,Leeds <br> R. Gray, Bradford..... <br> *or, By whom Drawn. | $\boldsymbol{E}$ $s$. $d$. <br> 300 0 0 <br> 250 0 0 | $\begin{array}{\|r} 1850 . \\ \text { Jan. } 4 \\ , \quad 8 \end{array}$ | $\left\|\begin{array}{ll} 1 & \mathrm{mo} \\ 10 & \mathrm{da} . \end{array}\right\|$ | $\left\|\begin{array}{c} 1850 . \\ \text { Feb. } 7 \end{array}\right\|$ $\text { Jan. } 21$ | 1850. <br> February 7 <br> January 21 |

These bills were granted by you to J. Stewart \& Co. and R. Gray, in settlement of their accounts against you. When you pay the bills, they are entered in the Cash-Book, and the dates of the entries are filled into the column in the Bill-Book, as above.

## THE LEDGER.

In the Ledger is contained an abstract of all the entries made in the other books.

The entries dispersed throughout the Day-Book, Invoice-Book, Cash-Book, and Bill-Book, are collected together in the Ledger, and arranged in the order of their dates, under the names of the various persons to whom they belong.

A page, or such portion of a page as is likely to be required, is assigned to every person's account; and each page being ruled with $D r$. and $C r$. columns, the amounts of all the $D r$. entries belonging to each person, are copied one by one into the $D r$. sides, and the amounts of all the $C r$. entries into the $C r$. sides, of the respective accounts in the Ledger.

The copying of these entries into the Ledger is termed posting.
Example.
James Brown, 75 George Street.
$D r$. $\quad$ r .

Thomas Thomson, London.
$D r$.
$C r$.

George Innes, Liverpool.

The entries of goods on the Dr. side are posted from the DayBook, and on the Cr. side from the Invoice-Book. The entries of cash and bills are posted from the Cash and Bill-Books.

## SINGLE ENTRY.

In Book-Keeping by Single Entry, each entry in the Day-Book, Invoice-Book, Cash-Book, and Bill-Book, is posted or entered once to some account in the Ledger; hence the term "Single Entry." In "Double Entry," each entry is posted to two different accounts.

Single Entry is used chiefly by retail dealers, as it is more simple, and occupies less time in posting than " Double Entry."

## POSTING THE DAY-BOOK.

The posting of the Day-Book into the Ledger, is conducted in the following manner:-

Write the name and address of the person first entered in the Day-Book, along the top of a page in the Ledger; then write below this, on the Dr. side, the date, the page of the Day-Book from which the entry is taken, and the amount* of goods to which he is Dr., using the words "To Goods;" next enter the person's name, and the page of the Ledger, into an Index to be kept of all the names that may be posted; and finally, mark the page of the Ledger, on the margin of the Day-Book, opposite the entry, to show that the entry has been posted.

The posting of the first entry being now finished, write, in another page of the Ledger, the name of the next person mentioned in the Day-Book, posting the entry as before; and so on with all the other entries in succession, each to the Dr. of the various accounts.

When you come to another entry against a person whose name has been already filled into the Ledger, write the second entry immediately below the first, using the words "To ditto," or " To do."

[^1]Example.
If the first entry in the Day-Book is-
January 1, 1850.

You write George Innes's name in a page of the Ledger, and post the entry as follows:-

George Innes, Liverpool.
Dr.

The figure 1 , at the margin of the entry in the Day-Book, indicates the page in the Ledger to which it is supposed to be posted.

## POSTING THE INVOICE-BOOK.

The Invoice-Book is posted in the same way as the Day-Bookeach entry to its proper account in the Ledger.

All the entries are posted to the $\boldsymbol{C r}$. of the different persons, using the words "By Goods." Thus, if the first entry in the In-voice-Book is-

$$
\text { January 1, } 1850 .
$$

An account is opened under the name of "James Stewart \& Co., Leeds," and the entry is posted as follows :-

James Stewart \& Co., Leeds.
Dr.
$\underline{l \mid}$

## POSTING THE CASH-BOOK.

The entries, on the Received side of the Cash-Book, are posted to the Cr. of the persons from whom, or the transactions on account of which, the cash has been received; and the entries, on the Paid

Cash Received.

side, to the $D r$. of the persons to whom, or the transactions on account of which, the cash has been paid.

The figures on the margin, indicate the pages in the Ledger to which the entries have been posted.

## Cash Paid.

## POSTING THE BILL-BOOK.

Bills Receivable.-Each entry of Bills Receivable is posted to the $C r$. of the person from whom the bill has been received. Thus, if the first entry is-

|  | No. | When Recd. | From whom Recd. | Am | ount. | Date. | Term | When Due. | Entered in Cash-Book |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | $\begin{array}{\|l\|} \hline 1850 . \\ \text { Jan. } 2 . \end{array}$ | G. Innes, Liverpool. | $\underset{100}{\underset{1}{f}}$ | $\begin{array}{\|c\|c\|} \hline s . & d . \\ 0 & 0 \\ \hline \end{array}$ | $\begin{aligned} & 1850 . \\ & \text { Jan. } 1 . \end{aligned}$ | 1 mo | $\begin{array}{r} 1850 . \\ \text { Feb. } 4 . \end{array}$ | $\begin{gathered} 1850 . \\ \text { Jan. } 10 . \end{gathered}$ |

The entry is posted to the $C r$. of George Innes, using the words, "By Bill due Feb. 4, £100." The page of the Ledger to which the entry is posted is marked on the margin.

Bills Payable.-Each entry of Bills Payable is posted to the Dr. of the person to whom the bill has been granted. Thus, if the first entry is-

|  | No. | When Accep. | To whom Granted. | Amo | unt. | Date. | Term | When Due. | $\begin{gathered} \text { Entered } \\ \text { in } \\ \text { Cash-Bk. } \end{gathered}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 8 | 1 | $\begin{array}{\|l\|} 1850 . \\ \text { Jan. } 4 . \end{array}$ | J.Stewart \& Co.,Leeds | $\begin{gathered} \underset{300}{ } \\ \hline \end{gathered}$ | $\left\|\begin{array}{c\|c} s . & d . \\ 0 & 0 \end{array}\right\|$ | $\begin{array}{\|c\|} \hline 1850 . \\ \text { Jan. } 4 . \end{array}$ | 1 mo | $\left\|\begin{array}{c} 1850 . \\ \text { Feb. } 7 . \end{array}\right\|$ | $\begin{aligned} & 1850 . \\ & \text { Feb. } 7 . \end{aligned}$ |

The entry is posted to the Dr. of J. Stewart \& Co., using the words, "To Bill due Feb. 7, £300."

## Miscellaneous Remarks as to Posting.

After all the books have been posted, or at any stated convenient time, each entry in the Ledger should be compared with the original entry in the book from which it was taken, to ascertain that it has been posted correctly.

When the page assigned to any account in the Ledger is filled up, add the money columns at the bottom, and transfer the sums to a new page, where the person's name must be written as before.

If a person who is owing an account becomes insolvent, and pays a composition, enter in the Cash-Book the sum he pays, as a composition of so much a pound, and after posting it to his credit; carry the balance still due, to an account to be opened under the head of "Bad Debts." To this account are also transferred all other "bad debts"-that is, accounts of which you are unable to obtain payment from the parties.

It is of little consequence in what order the accounts are posted into the Ledger; for convenience, however, it is desirable to keep the $D r$. accounts, being those posted from the Day-Book, in one portion of the Ledger, and the Cr . accounts, being those posted from the Invoice-Book, in another portion. When the Cr . accounts are numerous, they may be kept in a separate Ledger.

In extensive concerns, it is usual to have several Ledgers, for the different branches of the business, such as a Town Ledger, a Country Ledger, a Foreign Ledger, a Commission Ledger, \&c. \&c.

## BALANCING THE LEDGER.

To ascertain, at the end of the year, or at any other time that may be most convenient, what is the sum-total of the various accounts owing by you, and owing to you, it is necessary to add up both sides of all the accounts in the Ledger, and to mark how much is the Dr. or Cr. balance of each. This is termed "Balancing the Ledger."

When it is found that both sides of an account are equal, rule it off as settled. Accounts may also be ruled off as settled, at any time when entries are made which equalise the two sides.

## Example.

James Brown, 75 George Street.

When the $D r$. side of an account is the greater of the two, enter the difference on the Cr. side, using the words, "By Balance forward," then rule off the account as balanced, and enter below, on the $D r$. side, the $D r$. balance, using the words, "To Balance."

> Example.

Alexander Paterson, London.
Dr.

When the $C r$. side is the greater of the two, enter the difference on the Dr.side, using the words, "To Balance forward," then rule off the account as balanced, and enter below, on the $C r$. side, the $C r$. balance, using the words, "By Balance."

Example.
Thomas Thomson, London.

When there are entries on only one side of an account, balance it off, by carrying forward the sum-total to the $D r$. or $C r$. of the next account, as the case may be; or the account may be merely added up.

In actual business, it is unnecessary to balance off unsettled accounts in the way now stated. It is sufficient to add up the columns, and mark the $D r$. and $C r$. balances in a temporary way with a pencil ; ruling off the accounts only when they are actually settled.

After the accounts have been balanced off, the various balances should be carefully examined, to ascertain that they have been correctly brought forward.

It is common, in balancing, when there is a blank space on one side of the account, to draw a diagonal line across $i t$, in the manner shown at page 69.

## TAKING STOCK.

An Inventory of Stock in trade should be taken at least once a year, with the view of ascertaining the state of your affairs.

All the particulars of the goods on hand, for sale, are copied into a book kept for the purpose, termed "The Stock-Book." The goods are valued at cost price, or, when necessary, at a per centage below cost price, to allow for bad stock, or depreciation in value.

Stock of a more permanent nature - such as buildings, shopfurniture, \&c.-does not require to be entered in the Stock-Book, as its value is ascertained from the accounts opened in the Ledger under these heads, and is from thence entered into the Balance Sheet. In such accounts, a yearly deduction of 5 or 10 per cent. requires to be made from the original cost, to allow for deterioration, or tear and wear. See Shop Furniture, page 67.

## BALANCE SHEET.

To ascertain the state of affairs at the end of the year, or at any other convenient time, it is necessary to draw out a "Balance Sheet"-that is, a statement showing how much is owing to you, and by you; also the amount of cash, bills, and stock on hand, and what is the balance, if any, in your favour.

To do this, open an account in the Ledger, under the head of Balance Sheet, and make the following entries on the Dr. and Cr. sides :-

On the Dr. side.
The amount of accounts owing by you, as ascertained from the Ledger, deducting the probable amount of discount that will be allowed at settlement.
The bills owing by you, as ascertained from your Bill-Book.
On the $C r$. side.
The amount of goods on hand, as per inventory in Stock-Book.
The value of shop furniture, as per Ledger.
The amount of accounts owing to you, as per Ledger, deducting the discount to be allowed at settlement.
The amount of bills owing to you, as per Bill-Book.
The amount of cash on hand, and in Bank.
Then add up the two sides, and the difference between them will show the amount of your capital at the time of balancing.

This sum is filled into the Dr. side, as "Balance, nett capital," and the account is ruled off as balanced.

Example. Balance Sheet of John Adams.

## PROFIT.

To ascertain the profit, if any, that has been gained during the year, open an account under the head of "Profit," or "Profit and Loss," and enter as follows :-

On the Dr. side.
The amount of your capital at January 1, being the cash embarked by you in the business, as ascertained from your account in the Ledger-or from the previous Balance-Sheet.
Interest at 5 per cent. on the amount of capital.
The interest is charged, in order to show what is the profit, after allowing 5 per cent., on the capital. Profit, strictly speaking, being, not the total gain, but only what is gained over and above 5 per cent. on the capital.
On the $C r$. side.
The amount of your capital at December 31, as shown by the "Balance Sheet."
The amount of cash taken by you for your own use during the year, as ascertained from your account in the Ledger.
Then add up the two sides; and if the $C r$. amounts to more than the $D r$. side, the difference is the profit for the year, and is carried to the Cr. of your account as "Profit." The Interest is also carried to the Cr. of your account. If the Dr. side is the greater of the two, the difference is the loss, and is carried to the Dr. of your account as "Loss."

Example.
Profit (or, Profit and Loss).

The nett profit is shown above, after paying trade expenses, \&c. By adding to the nett profit the amount of expenses and bad debts, the gross profit will be ascertained; thus :-

[^2]
## PRIVATE ACCOUNT.

Your own private account for cash paid into, or drawn from, the business, is kept and balanced in the following manner :

On the $D r$. side are entered-
The various sums you draw from the business on your own personal account.
On the $C$ r. side are entered-
The sum or capital you embarked in the business at the commencement, and any sums you may pay into the business afterwards.
Interest 5 per cent. on your capital.
The Profit (if any) gained during the year or other given period.

The Interest and the Profit are brought from the "Profit and Loss" account at the end of the year, or at any other time, when you balance your affairs. The "Profit and Loss" account is balanced off when the transfer is made.
If, instead of a profit, there has been a loss during the year, the loss is carried to the Dr. of your account.

Example.
John Adams.

The Balance Sheet, the Profit and Loss Account, and the Private Account, are usually kept in a separate Ledger, termed "Private Ledger."

## ACCOUNT FOR GOODS BOUGHT AND SOLD.

This is an account which, strictly speaking, belongs not to Single, but to Double Entry. As it is desirable, however, in every business to know the amount of goods bought and sold during the year, or other given period, an account for "Goods" has been embodied in the following Single Entry Ledger, that any one who chooses, may be enabled to adopt it.

Double Entry to the extent required for this account is quite simple, and may be advantageously employed in any retail business with little additional trouble.

## Directions.

Day-Book.-Add up the sums-total in the outer columns, at the end of every month, as shown at page 28 , and post the amounts, being the total of goods sold on credit, to the Cr. of an account to be opened under the head of "Goods." See page 71.

Invoice-Book.-Add up the sums-total in the outer columns, at the end of every month, as shown at page 39 , and post the amounts, being the total of goods bought on credit, to the Dr. of the "Goods" account. See page 70.

Cash-Booh.-Add up on a piece of paper, at the end of every month, the entries for Cash Sales and Purchases, and post the amounts, being the sums-total for the month, to the $D r$. and $C r$. of the "Goods" account, as shown at pages 70 and 71.

The whole amount of goods sold during any given time is in this way ascertained.

Profit.-The Profit may be ascertained from this account as follows:-

Add up the discount columns on both sides of the Cash-Book, at the end of every month, and deduct the amount of discount on the Received side, from the Cr., and on the Paid side, from the Dr. of the "Goods" account, as shown at pages 70 and 71.

Deduct also, at the time of balancing your affairs, the estimated discount on unsettled accounts due to you, from the $C r$. side, and on those due by you, from the Dr. side of the "Goods" account, as shown at pages 70 and 71.

Enter on the Dr. side of the "Goods" account the amount of Trade Expenses and Bad Debts ; and on the Cr. side the amount of Goods on hand.

Then add up both sides of the account, and if the $C r$. side be the greater of the two, the difference is the Profit gained (including interest on capital). If the Dr. side is the greater of the two, the difference shows the Loss.

By ascertaining the profit in this way, the accuracy of the other account in the Ledger for Profit (page 68), and also the accuracy of the posting, will be tested, as the result of both accounts will be the same, if no errors have been committed.

ACCOUNT-BOOK, - ..... 72

## DIRECTIONS.

In writing the following course, the pupil should, as far as possible, proceed with the various books simultaneously, as if he were engaged in actual business. It would be inconvenient to do so to the full extent, by writing the entries of each day at a time in the different books: this is done in business, but it will be sufficient here to copy the entries of a month at a time.

The Day-Book, Invoice-Book, Cash-Book, and Bill-Book for January, should first be copied; all the entries in each book on Jan. 1, should then be posted into the Ledger, then those on Jan. 2, and so on with the entries of every succeeding day. The entries for February and March should be copied and posted successively in the same manner.

After the entries for a month have been posted, they should be compared with the corresponding entries in the Ledger, to ascertain that the posting is correct. This is usually done by two individuals. One person calls over, one by one, the entries of the book to be compared-for instance, the Day-Book-and the other turns up the Ledger, and makes a mark $\sqrt{ }$ at each entry there, on finding it correctly posted.

The mode of rectifying some of the errors apt to occur in posting will be seen in the accounts of J. Lindsay, page 57 ; D. Falconer and T. Murray, page 58.

In posting, the figures on the margin of the Day-Book, \&cc. should be written in a slanting position, as shown in the first page of the Day-Book.

Great care should be taken to enter correctly the original sums in the Day-Book, \&c., as errors made at first are of course perpetuated in the Ledger, and are not easily detected.

Two books of a foolscap size should be employed for writing out the following set:-
I. The first, consisting of about 36 pages, or 9 sheets, to contain-

The Day-Book........ 16 pages. |Bill-Book............. 4 pages. Invoice-Book.... 9 " Cash-Book...... 6 " Warehouse-Book $\}$ "
Each page to be ruled with about 36 lines across, exclusive of the head-line.
II. The other, consisting of about 20 pages, or 5 sheets, to containThe Ledger........... 19 pages. | Account-Book.... 1 page.
The first 12 pages of the Ledger should be ruled with $D r$. and Cr. columns, as in the printed pages, being the common form in business, and with about 36 lines across. If, for the sake of more space, the $D r$. and $C r$. sides of the accounts are placed in two opposite pages, like the accounts at page 68, the Ledger will occupy about 32 pages, or 8 sheets.

Any one who wishes to shorten the course, can easily do so by transcribing the amounts only, instead of the particulars, of as many of the entries in the Day-Book, \&c. as may be desired.

Cash Received.

Balancing the Cash-Book.-To ascertain that the sums have been entered correctly, the Cash-Book requires to be balanced at stated times. For this purpose, enter on the paid side the sum you have on hand at the time of balancing, then add up the cash columns on the received and paid sides: if there has been no error in the entries, the sums-total of the two sides will be equal to each other, and the columns may be ruled off as settled or balanced. The cash on hand is carried forward to the received side, to begin a new account next day. The Cash-Book may be balanced either daily, weekly, or monthly: the cash received and paid ought, however, to be balanced every day, and if the sum on hand is not marked in the Cash-Book itself till the end of the week or month, it must be noted every day in a Memorandum-Book for the purpose.

Cash Paid.

Note.-Instead of the dates being placed on the margin of the Cash-Воок, as above, it is usual in business to place them in the centre of the page, as in the Day-Book. The same dates require to be placed opposite each other on the Received and Paid sides. January 1 opposite January 1, January 2 opposite January 2, and so on.

For an example of this, and of a convenient method of balancing the CashBook daily, see Appendix, under the head of "Cash-Book."

Petty Cash-Book.-Besides a Cash-Book, a "Petty Cash-Book" is often used, for entering the various small sums received and paid daily. (See Appendix.)

Deduct $5 \%$ for Discount at settlement

When any of the Accounts are paid, the sums are entered in the outer money columns here left blank: it can thus be seen at a glance what accounts are settled.

## W AREHOUSE-BOOK.

This book is used for keeping an account of the quantities of goods received into, or sent out from the warehouse. It is suitable chiefly in those cases where goods are bought and sold in considerable quantities at a time.

By means of the Warehouse-Book, the quantity sold and on hand of any description of goods can be ascertained at once, on turning up the page where the account is kept. It is necessary to have an Index of the different accounts entered.

The mode of keeping the book varies according to the nature of the business. In the following specimen is shown a method adapted to ordinary cases.

The two accounts below are for the Sugar and Tea entered in the Invoice-Book as received from J. Ainslie \& Son, and A. Jardine \& Co., and which appear in the preceding Day-Book as sold to the various parties mentioned.

The quantities are supposed to be entered on the $D r$. side, as below, at the time of being received; and on the Cr. side when they are sold.

## D 0 UBLE ENTRY.

Book-Keeping by Double Entry is so called because all the entries in the Day-Book, Invoice-Book, Cash-Book, and Bill-Book, are posted twice into the Ledger.

The entries are first posted, as in Single Entry, to the Dr. or Cr. of their respective accounts, and then a second time to the $D r$. or $C r$. of some other account. The entries first posted to the Dr. side of the Ledger, are posted the second time to the Cr . side; and those first posted to the $C r$. side, are the second time posted to the $D r$. side.

The system pursued in Double Entry serves the following purposes to persons in business :-

1. To test the accuracy of the posting : the second posting being a check on the first, as will be seen at page 77.
2. To show the amount of goods bought and sold during the year, or for any other given time.
3. To show the profit or loss on the various departments of the business.
4. To keep distinct accounts, under their several heads, of the different branches of stock in trade, and other property.

Double Entry is used chiefly by wholesale merchants and others whose transactions are on a large scale, and who dispose of goods in considerable quantities at a time.

It is less suitable for retail trades, in which there are numerous small entries : it may, however, be used with advantage to a partial extent, by posting the Day-Book, Invoice-Book, and Cash-Book, in the manner described at page 22, under Single Entry.

Journal.-It is usual to employ in Double Entry what is termed a "Journal;" but this book, though useful or necessary in many cases, is not essential, and has been dispensed with in this system.

## POSTING THE DAY-BOOK.

The Day-Book may be posted in two ways -
I. The simplest method is the following, being the same as that employed in Single Entry :-

First Posting.
Post all the entries to the $D r$. of the various persons.

## Second Posting.

At the end of every month, add up the sum-totals that have been filled into the outer columns, and post the amount, being the total of goods sold, to the Cr. of an account to be opened in the Ledger under the head of "Goods," using the words, "By Credit Sales."
This mode of Double Entry is suitable for those cases where the merchant wishes to know merely the total amount of goods sold, of whatever kind, and the profit on the whole, without requiring separate accounts of the different kinds of goods, and the profit on each. It is the method already described under Single Entry, p. 22. Example.
January 1, 1850.

At the first posting, these entries will appear in the Ledger at the $D r$. of each person's account.

John Turner, 10 Charlotte Street.

James Edwards, 20 Princes Street.

Walter Forbes, George Street.

| Jan. <br> J50. <br> 27 To Goods.. |
| :--- |

At the second posting, the sum-total of these entries will appear at the $C r$. of the account opened under the head of "Goods."

Goods.

If the first and second posting be correct, on adding together the sums posted to the Dr. of the above accounts, they will be found equal in amount to the sum posted to the Cr . of the "Goods" account, it being the same sums that have in this way been posted to the two opposite sides of the Ledger. Hence, as formerly stated, the second posting is a check on the accuracy of the first.

The amount of goods sold on credit during the month, is shown by this entry on the Cr. side of the account for "Goods."

The amount of goods bought on credit is shown in the same way, by posting the monthly amount of the Invoice-Book to the $D r$. side of the " Goods" account.

The amount of goods bought and sold for cash, is shown by posting these items from the Cash-Book to the "Goods" account.

## POSTING THE DAY-BOOK.

II.-The following is another mode of posting the Day-Book, and is that which is used in the present system :-

In many wholesale concerns, it is necessary to keep separate accounts for the different kinds of goods sold, or at least for such as are sold in large quantities, as wine, sugar, coffee, \&cc. in order that the merchant may know how much is sold, and what is the profit on each article.

For this purpose, in entering goods into the Day-Book of which separate accounts are to be kept, the sum-total of each entry is marked in the inner columns, immediately below the particulars; and in entering goods, of which no special account is to be kept, but which are to be posted to a general account for "Goods," the sum-total of each entry is extended to the outer columns.

This distinction having been carefully attended to, the posting is conducted as follows :-

First Posting.
Post all the entries to the $D r$. of the various persons, the same as in Single Entry.

## Second Posting.

1. Post the entries for goods, of which separate accounts are to be kept (being those of which the sums-total are marked into the inner columns), to the Cr. of accounts to be opened under their respective heads, such as Paper, Tea, Sugar, Goods on commission, or whatever title the nature of the entry may require.
2. Add up at the end of every month the sums-total extended to the outer columns (being the goods of which no special account is to be kept), and post the amount to the Cr. of an account to be opened under the general title of "Goods."
The pages of the Ledger to which the entries have been posted the first time, are marked on the margin opposite the name of each person; and the pages of the second posting, below the others opposite the goods of each entry.

A mark $/$ is made against those entries that have been extended to the outer columns, in order to be posted monthly, to show that this has been done; and the page in the Ledger to which the sum-total at the end of the month has been posted, is marked on the margin opposite the addition.

As in the former case, if the posting is correct, the amounts posted to the $D r$. sides, will be equal to those posted to the $C r$. sides of the Ledger.

## Example.

January 1, 1850.

January 31, 1850.

## Brought over

4
$\sqrt{ }$
Robert Ireland, London.
To 10 Pieces Welsh Flannel, 206 yds. 2/1 " 7 " Twilled Cotton, 280 " 7 d .

This is posted in the same way as the entry to John Turner.

Alexander Gregory, Calcutta.
To Paper-100 Reams Demy ...... 17/6 " $100 \quad \begin{array}{r}\text { Royal ..... 21 21/6 } \\ \text { Shipping Charges, \&c. }\end{array}$
, Insurance on £220@45/, £4, 19s.-
„ Commission on £5, 14s..................

This entry is first posted in one sum to the Dr. of Alexander Gregory, using the words, "To Goods (or To Sundries), £203, 9s. 9d.," and then the separate sums for Paper, Insurance, Commission, to the Cr. of accounts to be opened under these several heads, as will be seen at page 82 .

Goods-Cr. By Credit Sales Policy and Duty 15/...
$\qquad$
This is the sum-total of those entries that have been extended to the outer columns, in order to be posted at the end of the month to the general account for " Goods."

At the first posting, these entries will appear in the Ledger at the $D r$. of the following accounts :-

James Arnold, London.

John Turner, Charlotte Street.

Walter Forbes, George Street.

Thomas Dundas, Manchester.

| Jan. <br> Jan0.$\|$ To Goods ... |
| :--- |

Robert Ireland, London.

Alexander Gregory, Calcutta.

At the second posting, the entries will appear at the $C r$. of the following accounts:-
goods (General Account).

PAPER.

| 1850. |  |  |  | 1850. | 11 |  | 1 | 92 197 | 10 | 0 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

INSURANCE.

| 1850. |  |  |  |  |  |  |  |  | Amount charged to A. Gregory | 3 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

COMMISSION.

## POSTING THE INVOICE-BOOK.

The Invoice-Book may be posted by either of the methods described at pages 76 and 78.
First Posting.
All the entries are posted to the $\boldsymbol{C r}$. of the various accounts.
Second Posting.
All the entries are posted to the $D r$. of the various accounts.

## Example.

The following entries are posted according to the method described at page 78; separate accounts being kept for Paper, Coffee, Insurance, and Commission.

January 1, 1850.

January 31, 1850.

## POSTING THE CASH-BOOK.

## First Posting.

All the entries on the Received side are posted to the $C r$. of the persons from whom, or the transactions on account of which, the cash has been received, the same as in Single Entry.

All the entries on the Paid side are posted to the Dr. of the persons to whom, or the transactions on account of which, the cash has been paid.
The entries on the Received side for "Cash Sales" and "Bills Receivable," and on the Paid side for "Cash Purchases," "Bills Payable," and "Trade Expenses," are not posted singly : to save room in the Ledger, the sums-total only of these items are posted at the end of each month, to their respective accounts, as shown at pages 86 to 89 .

Second Posting.
The sum-total of the Casi on the Received side is posted every month to the Dr. of an account to be opened under the head of "Cash," using the words, "To Amount Received from Sundries," or more briefly, "To Sundries."

The sum-total of the Cash on the Paid side is posted every month to the Cr. of the account for "Cash," using the words, "By Amount Paid to Sundries," or more briefly, "By Sundries."

The sum-total of the Discount on the Received side is posted every month to the Dr., and on the Paid side to the Cr., of an account to be opened under the head of "Discount," using the words, "To Amount allowed to Sundries," and "By Amount allowed by Sundries," or more briefly, "To" and "By Sundries."

POSTING
Cash Received.

## THE CASH-BOOK.

## Cash Paid.

## POSTING

Cash Received.

THE CASH-BOOK.
Cash Paid.

## POSTING THE BILL-BOOK.

## First Posting.

Bills Receivable are posted to the $C r$. of the person from whom they have been received, the same as in Single Entry.
Bills Payable to the Dr. of the persons to whom they have been granted.

## Second Posting.

Bills Receivable.-Add at the end of every month the amount of bills received, and post the sum-total to the Dr. of an account to be opened under the head of "Bills Receivable," using the words, "To Amount received from Sundries," or more briefly, "To Sundries."
Bills Payable.-Add at the end of every month the amount of bills granted, and post the sum-total to the Cr. of an account to be opened under the head of "Bills Payable," using the words, "By Amount granted to Sundries," or more briefly, "By Sundries."

Example.

## BALANCING THE LEDGER.

The Ledger is balanced, as in Single Entry, at the end of the year, or at any other time, when a view of your affairs is required.

Note.-After the books have been all posted, or at any stated convenient time, and previous to balancing the Ledger, each entry should be compared with that in the book from which ic was taken, to ascertain that it has been posted correctly.

The various personal accounts-that is, those for individualsare balanced in the same way as in Single Entry (see page 17); all the $D r$. balances being carried forward to the $D r$., and all the $C r$. balances to the Cr. of the next accounts.

The accounts for Trade Expenses and Bad Debts, and those peculiar to Double Entry, used for showing the profit or the loss on the various transactions-such as for "Goods," "Tea," "Paper," "Commission," \&c. are balanced by carrying the balances to the $D r$. or $C r$. of the Profit and Loss Account, as shown under their several accounts in the following Ledger, pages 138 to 145.

The accounts for Bills and Cash, also peculiar to Double Entry, are balanced in the way shown at pages 137 and 143.

After the accounts have been balanced, the operation should be carefully revised, to ascertain that it has been performed correctly.

Trial Balance.-As a check on the accuracy of the posting and the balancing, and preparatory to a final balance, all the accounts on the Dr . side of the Ledger are added together in one amount, and all those on the $C r$. side in another. If the entries are posted and the accounts balanced correctly, the two sums will be equal. This statement is termed a "Trial Balance." If the two sums do not agree, some error has been committed, which must be found out and rectified. The Trial Balance is made before balancing the accounts-for Bad Debts; Trade Expenses; those peculiar to Double Entry, used for ascertaining the profit or loss; the account for Profit and Loss; and the Private Account. See the Trial Balance of the following set of books, page 146.

## TAKING STOCK.

An inventory of goods or Stock on hand, as mentioned under Single Entry, should be taken at least once a year, with the view of ascertaining the state of your affairs.

The goods are valued either at cost price, or at a per-centage below it, to allow for bad stock or depreciation in value, according to the nature of the case. The inventory is written out in the "Stock-Book."

When the Balance Sheet is to be drawn out, the amounts of the various kinds of goods on hand are entered from the "StockBook," either to the general account opened in the Ledger for "Goods," or to the special accounts for "Sugar," "Coffee," "Paper," \&c. From thence the respective amounts are copied into the Balance Sheet. See the following Ledger, pages 138 to 141.

Stock of a more permanent nature-such as machinery, buildings, shop-furniture, \&c.-does not require to be entered in the Stock-Book, as its value is ascertained from the accounts opened in the Ledger under their respective heads, and is from thence entered into the Balance Sheet. In accounts for machinery, furniture, \&c. a yearly deduction of 5 or 10 per cent. requires to be made from the original cost, to allow for deterioration, or tear and wear.

Goods "on commission" are not entered along with the other goods, but in a separate list, as they belong to the parties who have sent them on sale. The amount on hand requires to be entered in the Ledger, to the $D r$. of the persons from whom they were got, in order to ascertain the balance due to them; and also to the Cr. of the account for Goods on Commission. See Ledger, pages 133 and 138.

## PROFIT AND LOSS.

The Profit, or the Loss, on the various transactions for the year, or any other given time, is ascertained from an account to be opened under the head of "Profit and Loss."

This account is formed by entering-
On the Dr. side-
The "Losses"- as Bad Debts, Trade Expenses, \&c.
On the $C r$. side-
The "Profits"- as profit on Goods, Sugar, Paper, Commission, \&ce.
These profits, or losses, are ascertained from the accounts under their respective heads in the Ledger, from which they are transferred. The accounts are balanced off when the transfer is_made.

The Profit and Loss account is balanced off by carrying the Profit, if any, to the Cr. (or the Loss to the Dr.) of the Private Account. See Profit and Loss Account, page 146.

It will be useful, as a check on the accuracy of this account, also to ascertain the Profit by the method described at page 20.

## BALANCESHEET.

The Balance Sheet is drawn out at the end of the year, or at any other time when you wish to ascertain the state of your affairs.

It is drawn out in the same way, and embraces the same particulars, as in Single Entry (see page 19).

On the Dr. side are entered-
Your liabilities, or the sums you are owing.
On the $C r$. side are entered-
Your assets-that is, the sums owing to you, and your property of every description.
The difference between the two sides shows the nett amount of your property or capital.

All the particulars in the Balance Sheet, are taken from the accounts under their respective heads, in the Ledger.

The Balance Sheet of Hamilton and Boyd, to whom the following books are supposed to belong, will be seen at page 148 .

## PRIVATE ACCOUNT.

This account is kept and balanced in the same manner as in Single Entry.

On the $D r$. side are entered-
The various sums you draw from the business on your own personal account.

On the $C r$. side are entered-
The sum or capital you embarked in the business at the commencement, and any sums you may pay into the business afterwards.
Interest 5 per cent. on your capital.
The Profit (if any) gained during the year or other given period.
The Interest and the Profit are brought from the "Profit and Loss" account at the end of the year, or at any other time, when you balance your affairs. The "Profit and Loss" account is balanced off when the transfer is made.

If, instead of a profit, there has been a loss during the year, the loss is carried to the $D r$. of your account.

The Private Accounts of James Hamilton and Robert Boyd will be seen at page 148.

## DOUBLE ENTRY.

## THE B O OKS

of

## H A MILTON AND BOYD,

 LONDON.

## DIRECTIONS.

In writing the following course, the pupil should proceed as far as possible with the various books simultaneously, as explained at page 24.

Great care should be taken to enter correctly the original sums in the Day-Book, \&cc., as errors made at first are of course perpetuated in the Ledger, and are not easily detected.

After the entries for a month or other stated period have been posted, they should be compared with the corresponding entries in the Ledger, to ascertain that the posting is correct. (See page 24.)

The mode of rectifying some of the errors apt to occur in posting, will be seen in the accounts of J. Arnold, and J. Edwards, page 128, and T. Dundas, page 129.

The Day-Book and Invoice-Book are posted according to the method described at pages 78 and 83 . Separate accounts are supposed to be kept by Hamilton and Boyd for Goods on Commission, Paper, Port Wine, Sugar, Tea, Coffee, Insurance, Interest, Commission; all such entries must, therefore, at the second posting, be posted individually to their several accounts. They have the posting marked thus $\frac{2}{6}$
The entries for all other goods are posted in one sum at the end of the month to the general account for "Goods." They have the posting marked thus $\sqrt[3]{ }$
Note.-If Hamilton and Boyd wished to know merely the amount of goods bought and sold without any separate accounts, the sums-total of all the entries would be extended to the outer columns, and the amounts of the whole posted monthly to the "Goods" account.

Two books of a foolscap size should be employed for the following set:-
I. The first, consisting of about 32 pages, or 8 sheets, to containThe Day-Book...... 13 pages. Invoice-Book... 7 " Cash-Book...... 6 "
Bill-Book........... 4 pages.
Warehouse-Book.. 1 "
Stock-Book........ 1 ",

Each page to be ruled across with about 36 lines, exclusive of the head-line.
II. The second, consisting of about 24 pages, or 6 sheets, to contain-
The Ledger......... 23 pages. | Account-Book....... 1 page.
The first 8 pages of the Ledger should be ruled with $D r$. and $C r$. columns, as in the printed pages, and with 36 lines across. The remaining pages, for the sake of more space, should have the $D r$. and $C r$. sides of the accounts placed on the two opposite pages. If the first 8 pages are made the same as these last, 8 additional pages will be required, or 8 sheets altogether.

## THEDAY-BOOK.*

London, January 1, 1850.

January 8, 1850.

January 17, 1850.

January 25, 1850.

Note-The following is the most convenient form of the Day-Book, when the breadth of the page will admit of its use. The word "To" at each entry may be left out:-

January 3, 1850.

February 1, 1850.

February 18, 1850.

February 27, 1850.

March 1, 1850.

March 9, 1850.

March 16, 1850.

March 26, 1850.

March 31, 1850.

## Brought over.

6 J. Wilson, London.
$\overline{13}$ To Commission, $10 \%$ on Sales (£30)...
This is the charge made against J. Wilson for selling his goods.

11 Tea-(from W. Black, Canton.)
To Interest, 3 months, on Cash paid
forduty, freight,\&c.(£277,19s.10d.)
" Commission, 5 per cent. on
Sales (£462, 13s. 11d.)......

Sugar-(from J. Cameron, Demerara.)
To Interest, 4 months, on Cash paid
for duty, freight, \&cc. (£695, 3s. 2d.)
" Commission, 5 per cent. on
Sales (£1421, 3s. 5d.) .......
The Tea and Sugar were received from W. Black and J. Cameron to sell on Commission; and when the accounts, showing how much has been sold, are to be made up and sent to them, the Interest and Commission require to be charged as above.

Goods-Cr. By Credit Sales.

## INVOICE-BOOK.*

London, January 1, 1850.

January 12, 1850.

January 25, 1850.

Note.-The following is the most convenient form of the Invoice-Book, when the breadth of the page will admit of its use. The word "By" at each entry may be left out:-

January 1, 1850.

February 1, 1850.

March 1, 1850.

Cash Received.

Cash Paid.

## Cash Received.

This page to be written out, with additional columns, in the same form as page 114.

Cash Paid.

These columns are used in business for entering blanks.

These columns are used for ascertaining readily the dates when the bills are due.
|

## WAREHOUSE-BOOK.

This book is used for keeping an account of the quantities of goods received into, or sent out from the warehouse. It is suitable chiefly in those cases where goods are bought and sold in considerable quantities at a time.

By means of the Warehouse-Book, the quantity sold_and on hand of any description of goods can be ascertained at once, on turning up the page where the account is kept. It is necessary to have an Index of the different accounts entered.

The mode of keeping the book varies according to the nature of the business. In the following specimen is shown a method adapted to ordinary cases.

The two accounts entered below are for the Sugar and Tea received on Commission from James Cameron and William Black, and which appear in the preceding Day-Book as sold to the various parties mentioned.

The quantities are supposed to be entered on the Dr. side, as below, at the time of being received; and on the $C r$. side when they are sold.

Sugar.

Tea.

## STOCK-BOOK.

Goods on Hand, March 31, 1850.

| 10 Pieces Superfine Black Cloth, 200 yards 14/6 | 145 | 0 |  |

## A PPENDIX.

## SPECIMENS OF ACCOUNTS, EXPLANATIONS OF

 MERCANTILE TERMS, TRANSACTIONS, \&c.Abbreviations.-The following contractions are in common use :-

| A/c, a/c, | Account. | Ult. | The last month. |
| :--- | :--- | :---: | :--- |
| Cr. | Creditor. | $\mathrm{d} / \mathrm{d}$ | Days after date. |
| Dr. | Debtor. | $\mathrm{d} / \mathrm{s}$ | Days after sight. |
| Ditto, do. | The same. | $\mathrm{m} / \mathrm{d}$ | Months after date. |
| E. E. | Errors excepted. | $\%$ | per cent. |
| I. O. U. | I owe you. | @ | at. |
| Inst | The present month. | qu | per. |
| Prox. | The next month. |  |  |

Account.-A statement showing the amount due by one person to another for goods, cash, \&c. Accounts are kept under their several titles in the Ledger, from which they are copied when required.

Examples.
Account copied from a Wholesale Ledger.
Mr George Knight, Birmingham.
To Hamiliton \& Boyd, London.

In rendering this account, it is unnecessary to give the particulars of the entries. When the goods were forwarded, invoices, containing the particulars, were either sent along with the goods, or separately by post; and in making out the account, only the dates and sums require to be stated. The above is copied from Hamilton \& Boyd's Ledger, page 132.

Account copied from a Retail Ledger.
Mr John Alison, Frederick Street.
To John Adams, Edinburgh.

| 1850 |  |  |  |
| :---: | :---: | :---: | :---: |
| Feb. 20 | 2 Pair Blankets...................................... 17/6 | 1 |  |
| " | 10 Yards Superfine Black Cloth........................ 18/6 |  |  |
|  | 5 , Doeskin.................................. 5/6 |  |  |
| Mar. 12 | 6 lbs . Green Tea.................................... 5/6 |  |  |
| " | ${ }^{8}$ \% Black do......................................... 41 |  |  |
| " | 6 " Loaf Sugar.................................... 8d. |  |  |
|  |  | 15 |  |

In copying this account, all the particulars require to be given, as no invoice or account of these was sent when the goods were got. This is taken from J. Adams's Ledger, page 60. The Ledger contains only the sums-total of each entry; the particulars are ascertained by referring to the Day-Book.

If a note of the account requires again to be sent to John Alison, it is written out in this way:-

## Mr John Alison, Frederick Street.

To John Adams, Edinburgh.

When wages or salaries are not paid in full to the parties at stated times, but by partial payments at irregular times, the sums are entered in the Cash-Book, not under the head of Trade Expenses, but under the names of the different persons who receive the salaries. The sums are then posted to their several accounts, and afterwards transferred to an account for Salaries. Thus-

James Brown.

## A. Smith.

[^6]
## Salaries.

Accounts are kept in the Ledger not only for individuals, but also for the various branches of a merchant's property. The details of such accounts vary according to the nature of the case, but the following will serve as specimens :-

## Warehouse Buildings.

-The warehouse is supposed to have cost $£ 1000$. This sum is entered in the Cash-Book when paid, and posted from thence to an account to be opened in the Ledger under whatever title will best describe the property. If the building becomes deteriorated in value from any cause, an entry requires to be made similar to that in the account for Machinery given in next page.

Interest 5 per cent. on the value requires to be charged to the "Trade Expenses," or to whatever department of the business it belongs, also any payments for repairs, \&c.

## Printing Machinery.

The machinery is supposed to cost $£ 1000$, and to undergo a yearly deterioration of 5 per cent. off the cost price. This deterioration (£50) is carried every year to the Dr. of the Printing-Office account, reducing the value of the machinery by this sum annually.

Printing-Office.

The Printing-Office requires to be charged yearly with the interest on the value of the machinery, and with the tear and wear.
Account Current.-An account in which is drawn out in Dr. and Cr. columns, a statement of the transtactions that have taken place between two partics during a certain time.

Example.
Dr. J. Black, Edinburgh, in account with T. Smith, London. Cr.

Account-Sales. - An account drawn out by a commission agent, showing the sales he has made of goods on account of another party. It contains a statement of the quantities sold, and the prices, also the charges for freight, commission, \&c.

## Example.

Account-Sales of 50 hhds. Sugar, per "The Jane," consigned by James Cameron, Demerara.

The above is taken from the account in the Ledger under Sugar, page 140: the amounts only are given in the Ledger, but the particulars of the entries will be found in the Day-Book and Cash-Book at the dates marked. A book termed an "Account Sales-Book" is generally used for entering sales of goods on commission such as the above.

The proceeds are stated to be due on April 20, being the supposed average of the various dates at which the sugar is payable. The letters E. E. mean "Errors Excepted."

Adventure.-A term applied to shipments of goods to or from some particular place. Thus if a merchant shipped a quantity of goods to Calcutta, the shipment might be termed "Adventure to Calcutta," and under this title an account would be kept in the Ledger of the proceeds and expenses, showing how much was gained or lost.

Affidavit.-An oath or declaration as to the truth of a fact. In cases of bankruptcy, or when a debtor dies, persons on lodging their claims or accounts require to send their affidavits along with them. Thus-

## ENGLISH FORM.

> In the Matter of Edward Lindsay, Silk Mercer, 139 Strand, London, $a$ Bankrupt.

John Douglas of the city of London, Silk Mercer, maketh oath and saith that the said Edward Lindsay, Silk Mercer, in 139 Strand, London, the person against whom a Fiat in Bankruptey hath been late awarded and issued, and is now in prosecution, was at and before the date and issuing forth of the said Fiat, and still is justly and truly indebted to this Deponent (or if there is a partner, and to his partner in trade, James Hamilton,) in the Sum of one hundred and twenty pounds, for goods sold and delivered by this deponent (and his said partner), in the months of $A u$ gust and September 1849, for which said sum or any part thereof, he this deponent, hath not (nor hath his said partner), nor any other person or persons by this deponent's order, or for his (or their) use to this Deponent's knowledge or belief, had or received any security or satisfaction whatsoever.

John Douglas.

## SCOTCH FORM.

At Edinburgh, the tenth day of January, Eighteen Hundred and fify, in presence of James Anderson, Esq., one of Her Majesty's Justices of the Peace for the city of Edinburgh, compeared John Adams (or if there are partners, John Adams of the firm of John and Thomas Adams), who being solemnly sworn and interrogated, Depones, That, George Brown, Draper, 12 George Street, Edinburgh, is justly indebted and resting owing to the Deponent (or, to the company of which Deponent is a partner) the sum of twenty pounds ten shillings, being the Amount of the annexed account. Depones that no part of said sum has been paid or compensated; nor does the Deponent (or his said partner) hold any other Person than the said George Brown bound for the Debt, or any security for the same. All which is truth, as the Deponent shall answer to God.

> John Adams. James Anderson, J. P.

The affidavit is usually a printed form filled up with writing. The words in Italics are those commonly written.

ASSETS.-A term used to denote the property of every description belonging to an individual.

Bankruptcy.-When a person becomes unable to pay his debts, he is said to be insolvent; and when his insolvency is legally announced, or gazetted, he is termed a Bankrupt. By the process of bankruptcy in the law of England, termed Fiat in Bankruptcy (similar to that of Sequestration in the law of Scotland), if the creditors to a certain amount concur in petitioning for a fiat, the causes of the insolvency are
investigated; and if there has been no fraud, the individual is relieved from all previous obligations, on giving up his entire property. It is only persons in trade that are entitled to the benefit of this process of bankruptcy, all others being excluded. In the event of persons not in trade becoming insolvent, they must submit to the ordinary laws respecting debtors. The persons to whom the realisation, management, and distribution of the estate of a bankrupt are committed, are termed his Assignees or Trustees. (See Insolvency.)

Bank Cheque. - An order on a banker to pay a certain sum of money when the order is presented, drawn out by a person who has money deposited with the banker. A bank cheque is usually a printed form filled up with writing.

## Examples.

No. 324.

Edinburgh, January 1, 1850.

Jan. 1, 1850.
G. Bruce.
$£ 100$.

To the Treasurer of the Bank of Scotland.
Pay to Mr George Bruce, - . - or Bearer, One hundred pounds - - - . - . Sterling. $£ 100$.

No. 171.

Jan. 1, 1850.

Jas. Russell.
$£ 100$.

- This part of the elieque is retained by the person who draws it out.

No. 171.

The London Joint Stock Bank, Princes Street, Mansion-House.

Pay to Mr James Russell, - - - or Bearer,

One hundred pounds - . . . . . . Sterling. $£ 100$.

John Anderson.
$\dagger$ The cheque is cut or torn through here when sent to the bank.
The words in italics are those usually in writing; the others are printed.

Bills.-A Bill, or more properly speaking, a Bill of Exchange, is an agreement written on stamped paper, in which a debtor agrees to pay to his creditor on a certain day a specified sum of money which he is owing to him.

Bills are used for the settlement of accounts or debts. They are drawn at various dates, but in trade the usual term is from two to nine months.

A Bill is termed an "Acceptance," or a " Promissory-Note," according to the form in which it is drawn out. The term bill is, however, sometimes applied more strictly to an "Acceptance."

## AN ACCEPTANCE.

Three months after date, pay to me or my order the sum of one hundred pounds, value received.

> To Mr Thomas Arnold, Merchant, Strand, London.

The bill being drawn by Mr Wilson in this form, Mr Arnold, on whom it is drawn, accepts it, by writing his name either below that of Mr Wilson, or across the face of the writing. Hence he is termed the acceptor of the bill. The bill, when accepted, will appear thus-
£100. due Nov. 8.

London, 5th August 1850.
Three months after date, pay to me or my order the sum of one hundred pounds, value received.

> To Mr Thomas Arnold, Merchant, Strand, London.

The banking-house at which the bill is payable is also sometimes stated by the acceptor.
If Mr Wilson, who is called the drawer of the bill, wishes to make use of it, he indorses the bill-that is, writes his name across the back of it-and thus it becomes negotiable paper. It may be paid away to a third party; and he indorsing it below Wilson's name, may pay it away to a fourth; who indorsing it in the same manner, may pay it away to a fifth; and so on. Thus the bill may pass from hand to hand, on each occasion liquidating a debt of $£ 100$, till the day of payment by the original acceptor arrives, when it is duly presented by the last holder.
Discounting Bills.-Instead of running this course, the bill may at any period be discounted by a bill-broker or banker. The discounting of a bill consists in giving the money for it, less a certain sum for interest. Five per cent. is the highest legal interest chargeable in the United Kingdom on all debts or loans in ordinary circumstances; but for discounting bills or promissory-notes, a larger per-centage may be legally taken. When a bill for $£ 100$ for three months (or fourth part of a year) is discounted at 5 per cent. interest, a charge equal to the fourth part of $£ 5$ is made by the discounter, and this is his profit for the loan of the money for that period.
Presentment for Acceptance.-"An Acceptance," to render it complete,
requires to be duly presented to the party on whom it is drawn, that he may accept of it. This is not necessary in a "Promissory-Note."

Presentment for Payment.-All bills require to be presented for payment on the exact day they become due-that is, on the last day of grace (see next page): if not presented, they cease to have the peculiar privileges of bills, and become mere evidences of debt.

Noting and Protesting. - When a bill is not duly paid on presentation, the holder applies to a notary-public, who again presents the bill. If not paid, he notes its non-payment, and afterwards draws out a formal protest on stamped paper, that legal steps may be taken for recovering the amount. The bill should be noted on the day it falls due: the protest may be written out afterwards. When the acceptor of a bill fails to pay the amount, the holder can fall back for payment on the drawer, or on any of the indorsers, provided he gives them the earliest notice possible of its non-payment. In England, the noting and protest are necessary only for foreign (including Scotch and Irish) bills: inland-that is, English bills-do not require to be protested, although it is common to note them. In Scotland, the noting and protest are indispensable in the case of all bills, foreign and inland. A bill may be protested for non-acceptance as well as for non-payment.

## A PROMISSORY-NOTE.

$£ 100$. due Nor. 8.

London, 5th August 1850.
Three months after date, I promise to pay to Mr James Brown, or order, the sum of one hundred pounds, value received. Robert Hamilton.
The banking-house at which the bill is payable is also sometimes stated. No signature is written across the front of the promissorynote; it is complete in itself, and only requires to be indorsed by the holder of it (in the above case, James Brown) when he wishes to make use of it, or to pay it away. Promissory-notes are in every respect liable to the same regulations as acceptances. Both promissory-notes and acceptances must be written on stamps of the proper price; if on stamps of an inferior value, they are not negotiable, and cannot be protested.

Bills are sometimes drawn at sight, or at so many days after sight; for example :-
£50.
London, 5th August 1850.
Ten days after sight, pay me or my order the sum of fifty pounds, value received.

John Thomson.

> To Mr Thomas Jones, Castle Street, Liverpool.

A bill of this kind is usually drawn by a person at a distance from his debtor; and on writing it out and indorsing it, he transmits it to an agent in the town in which the debtor resides. The agent sends it to the debtor to be sighted; which consists in the debtor-as, for instance, the above Mr Jones-accepting it by signing his name, and marking the day on which he has done so. The bill is now a negotiable instrument, and on the third day after the day specified it is presentable for payment.

It is common to draw foreign bills of exchange at so many days after sight. These bills are of precisely the same nature as inland or home bills of exchange; but for the sake of security in transmission, they are drawn in sets of three. The following is a common form:-

## FOREIGN BILL.

Exchange for $£ 100$ sterling.
Philadelphia, Jan. 1, 1850.
No. $479 . \quad$ Sixty days after sight of this First of Exchange (second and third of same tenor and date unpaid), pay to the order of John Robertson the sum of one hundred pounds sterling, value received.

James Anderson.

## To Messrs Brown \& Jones, Merchants, Liverpool.

This bill being indorsed by Mr Robertson, is transmitted to England (probably in liquidation of a debt of the same amount), and is presented to Messrs Brown and Jones to be sighted, or seen by them. When it becomes due, it is presented to them for payment accordingly. The agent or individual to whom it is sent, receives by the next packet the second bill of the same tenor. Should the first have been lost by shipwreck, this second is available, but otherwise it is of no use, and may be destroyed. The third bill of the same tenor is retained by the drawer till he learn whether the first or second has been received; if both have been lost, it is transmitted. Bills of this description are rarely sent by the actual drawer. They are usually paid away or sold on the spot to another party, who transmits them to a creditor of his own, and he negotiates the payment.

Days of Grace.-According to a practice of old standing, bills are not presentable for payment till the third day after that which is specified for them to fall due. The three days allowed are called the days of grace. Thus a bill drawn on the 5th of August, at three menths, is not legally due till noon of the 8 th of November. In some countries the period of grace is much longer than three days. If the day on which a bill falls due happens to be a Bank holiday or a Sunday, the bill is payable the day previous.

Bills of exchange serve three useful purposes in commerce. l. A bill puts a debt in a tangible form: for example, instead of leaving a debt of $£ 100$ to be paid at an indefinite period, so as to protract its settlement, if it be put in the shape of a promise to pay, the creditor possesses the power to compel payment at a certain and not very distant period. 2. A bill is a negotiable instrument. If the parties be trustworthy, it may be discounted for cash; and thus, while the creditor will receive his money, less a trifle for discount, the debtor is left unmolested till the final day of payment. 3. A bill is a convenient representative of money, which may be sent from place to place in a letter; and if accidentally lost, its payment may be stopped and a new bill forwarded to its destination.

Bill of Entry.-A list of goods entered at the Customhouse.
Bill of Lading.-A receipt on stamped paper (usually a printed form filled up with writing), given by the master of a vessel for goods that have been shipped with him. Three copies are usually drawn out-one for the use of the master, another to be retained by the
shipper of the goods, and the third to be sent to the party to whom the goods are forwarded. The shipper gives the party to whom he sends the bill the right to receive the goods. A bill of lading, like a bill of exchange, may be indorsed over to another person, who thus acquires the right to the goods. The following is a common form. The words in Italics are those usually written:-
$\bar{L}$ Shipped in good Order and well conditioned, by Messrs J. Brown, Humilton and Boyd, in and upon the good ship called the Ship Broker, "Wellington," whereof is master for this present Voyage, Wm. Birchin Lane Crosly, and now lying in the River Thames, and bound for Hilobart Town, Van Diemen's Land.

One Case of Printed Books, being marked and numbered

A. C.1 Case. as in the Margin, and are to be delivered in the like good Order and well conditioned at the aforesaid Port of Hobart Town, V. D. L. (the Act of God, the Queen's Enemies, Fire, and all and every other Dangers and Accidents of the Seas, Rivers, and Navigation, of whatever Nature or Kind soever, save risk of Boats so far as Ships are liable thereto, excepted) unto Mr Jones, or to his Assigns, Freight for the said Goods to be paid in london, Ship lost or not lost, with Primage and Average accustomed, In Witness whereof the Master or Purser of the said Ship hath affirmed to Three Bills of Lading, all of this Tenor and Date ; the one of which Bills being accomplished, the others to stand void.

Dated in London, the 25 th day of May 1850.
Contents unknown to

## W. Crosby.

Bill of Parcels.-A list or account of goods that have been sold, sent by the seller to the buyer. It is nearly the same as an invoice.

Bonded Goods.-Imported goods deposited in a government warehouse uritil the duty is paid.

Brokerage.-A charge of so much per cent. made by persons termed Brokers, for assisting merchants or others in buying or selling goods, or for transferring property from one person to another.

Capital.-The nett amount of property belonging to a merchant after deducting the debts that he is owing. This term is more strictly applied, either to the sum of money which he has embarked in his business at first, or to the available sum he may afterwards have at command for carrying it on.

Carriers.-Persons who undertake to convey goods from one place to another, whether by land or water, are carriers. "Carriers are bound to receive and carry the goods of all persons, for a reasonable hire or reward; to take proper care of them in their passage; to deliver them safely, and in the same condition as they were received (excepting only such losses as may arise from the act of God or the king's enemies): or in default thereof, to make compensation to the owner for whatever loss or damage the goods may have received while in their custody that might have been prevented. Hence a carrier is liable, though he be robbed of the goods, or they be taken from him by irresistible force. On the same principle, a carrier has been held accountable for goods accidentally consumed by fire while in his warehouse."- $M^{6}$ Culloch. Violent storms, tempests, and lightning, are considered to be "the act of God," or such as no human precaution could have averted, and no fraudulent intention could have produced.

Cash-Book. - The following example is given to show the form commonly used in business, the dates being placed in the centre of the page. In the preceding Cash-Books, pages 44 and 114, the dates are placed on the margin, as the form shown here would have

## Cash Received.

Cessio Bonorum.-A legal process in the law of Scotland, according to which, persons not engaged in trade who have become insolvent, or traders who have been refused a Sequestration, give up their whole property to their creditors. On doing so, they are released from prison, and left at liberty to pursue any line of industry : the property, however, which they may accumulate, is liable to be seized upon by their creditors, until their claims are settled in full.

Clearing a Vessel.-Entering her name and an account of her cargo in the Customhouse books, on her leaving port.

Commission.-A charge of so much per cent. made by an agent for selling goods on account of another.

Company.-Two or more individuals engaged in carrying on a business constitute a company or copartnery, each being termed a partner. Companies are of two kinds-private and public. A private company is formed by a private arrangement among the parties, each having certain duties to perform, and receiving such a share of the profits as may be agreed upon. In companies of this description no individual can leave the concern at his own pleasure. He can withdraw only after giving a reasonable warning, that time may be allowed to wind up the concern, or place it in a condition to pay him back the capital which he has risked, or the profits which are his due. No partner, however, can
been inconvenient, owing to the small number of entries on each day.

In this example is also shown a convenient method of balancing the Cash-Book daily.

Cash Paid.

transfer his share to another person, by which a new member would be introduced into the firm, without the consent of the partners. Whatever be the share which individual partners have in a concern, the whole are equally liable for the debts incurred by the company, because the public give credit only on the faith that the company generally is responsible. He who draws the smallest fraction of profit, failing the others, may be compelled to pay the whole debts. On this account every partner, on leaving a company, should be careful to advertise in the Gazette and newspapers that he no longer belongs to the firm of which he was a member; he is then responsible for no debts incurred subsequent to the announcement.

Public companies are very different: they consist of a large body of partners, or proprietors of shares, the aggregate amount of which forms a joint stock; hence such associations are called joint-stock companies. They are public, from being constituted of all persons who choose to purchase shares; and these shares or rights of partnership are also publicly saleable at any time without the consent of the company. Unless specially provided for in the deed of copartnery, every member of a joint-stock company is liable in his whole personal property or fortune for the debts of the concern. In some instances this liability is obviated by the provisions of an act of parliament, or parliamentary
charter, establishing the company. Joint-stock companies are managed by directors appointed by the shareholders.

Compostrion.-A payment of so much a pound by a bankrupt to his creditors, they agreeing to receive the sum as a composition for the full amount of the debts.

Consul.-A government officer, who resides in some foreign country in order to take charge of the commercial affairs of his nation.

Conversion of Money.-Every nation has its own peculiar money; that of the United Kingdom consisting of pounds, shillings, and pence, established at a certain standard value, known by the name sterling.

British Colonies.-In the British colonies it is usual to reckon money also by pounds, shillings, and pence ; but the value of these denominations of money fluctuates, and to distinguish it from sterling, it is called currency. In Canada, Nova Scotia, and other British colonies in America, one of the most common standards is that of Halifax, according to which the English sovereign or pound is considered equivalent to 25 shillings currency, and the English shilling equivalent to 1s. 3d. currency.

United States.-In the United States of North America, the standard money is dollars and cents. Each dollar contains 100 cents. The dollar is equal to about 4s. 2d. sterling, the cent to an English halfpenny. $\$$ is the sign of the dollar.

France.-In France, the standard money is francs and centimes. Each franc contains 100 centimes. The franc is usually reckoned to be equal to 10d. in English money; therefore, 10 centimes are equal to an English penny.

With respect to all foreign monies, there is usually a premium for or against, in making the exchange. Thus a person taking a sovereign to Paris, will in reality get 25 instead of 24 francs for it, or a premium of 1 franc. In purchasing bills in the colonies drawn on parties in England, a premium is generally exacted according to the demand for such bills; therefore, although $£ 125$ currency is equal to $£ 100$ sterling, it may happen that the purchaser of a $£ 100$ bill on England may have to pay for it $£ 130$ or $£ 135$. When no premium is exacted, the course of exchange is said to be at par.
Counting-House.-The office in which a merchant's correspondence, book-keeping, and other business is conducted.

Credir.-To give credit, or to sell on credit, is to sell goods on trust; that is, without requiring the person buying them to pay them at the time. In Book-keeping, to credit a person is to enter his name in your books as "Cr. By" the goods or cash you have received from him.

Creditor.-A person to whom another is in debt for money or goods. When you receive goods from a person without paying for them at the time, he is said to be your "Creditor" for the amount.

Customs-Excise.-The duties or taxes imposed upon goods entering or going out of the country are called customs, and those imposed upon goods at the period of their manufacture in the country are called excise duties.

Debenture.-The certificate given at the Customhouse to the exporter of goods, entitling him to receive payment of the drawback
allowed on goods being exported. It is usually a shipping agent who gets the certificate, and acts in the matter on behalf of the exporter.

The word "debenture" has another application: it signifies a certificate of mortgage or loan on railway or other public works. Debentures of this class are documents briefly and simply expressed, conveying authority to the holder to seize the property impledged, in the event of the obligations of the deed not being fulfilled. Along with these debentures are given a sheet of separate orders to receive payment of interest at appointed terms. These orders being cut off for presentation for payment, are called coupons.

Debit.-To debit a person, in Book-keeping, is to enter his name in your books as "Dr. To" the goods or cash he has received from you.

Debtor.-A person who is in debt to another for money or goods. When a person receives goods from you without paying for them at the time, he is said to be your debtor for the amount.

Discount.-An allowance made to bankers or others for advancing money upon bills before they become due. For an explanation of the discounting of bills, see "Bills."

This term is also applied to the allowance or deduction frequently made at the settlement of accounts. Thus a person who is owing an account of $£ 100$, on settling it, may receive an allowance of $2 \frac{1}{2}$ per cent.; he would therefore pay only $£ 97,10 \mathrm{~s} .0 \mathrm{~d}$, the remaining $£ 2,10 \mathrm{~s} .0 \mathrm{~d}$. being allowed as discount.

Dividend.-When a person becomes unable to pay his debts, and makes a composition with his creditors, he may agree to pay them 15 s . in the pound, in three equal instalments, at intervals of two or three months. Each of these payments is termed a dividend.

This term is also applied to the profits divided among the proprietors of joint-stock companies, \&c.

Drawback.-A term applied to those duties of Customs or Excise which are repaid by government after a certain period, when goods on which they have previously been levied, are exported. This repayment is made to enable the exporter to sell his goods in the foreign market unburdened with duties. Before the goods are packed, notice must be sent to the Excise officer of the district; he sees them weighed, and sends a note of the gross and nett weight and tare to the Excise Office at the port where the goods are to be shipped. After the goods are packed, the gross weight, the tare, and the nett weight of each box or package, require to be marked on the outside. The Excise officer requires twenty-four hours' notice.

FORM OF NOTICE.
Edinburgh, Jan. 1, 1850.
Notice to pack books for exportation, January 2, 12 noon, to be shipped from the port of Liverpool.

James Allan.
To the Officer of
the $3 d$ Division of Excise. $\}$

Dutch Auction.-In common auction, the highest bidder by competition is the purchaser; but according to the process of sale called Dutch Auction, the article is put up at a certain nominal price, which is gradually lowered; and the first who speaks, and offers the sum mentioned by the auctioneer, is at once knocked down as the purchaser.

Firm.-The term applied to the name or names under which persons carry on business.

Folio.-A word frequently used instead of page in mercantile books. The word page, however, being more easily understood, has been employed in the preceding sets of books.

Goods.-A general name for all kinds of merchandise.
Goods on Commission, Consignment, or, on Sale.-Goods sent by one party to another, to be sold on his account-a commission of so much per cent. being charged by the person to whom they are sent, for selling them.

Indorsation.-When a person in whose favour a bill has been drawn, writes his name on the back of it, he is said to indorse the bill, and his signature is termed the indorsation (see Bills).

Insolvency-Insolvent.-When a person becomes unable to pay his debts in full, he is said to be insolvent. If he has been engaged in business, his affairs, with a certain consent of creditors, are examined according to the process of Bankruptcy by the law of England, or Sequestration by the law of Scotland. If not engaged in. business, or, if a trader whose creditors have refused to concur in a Fiat of Bankruptey or a Sequestration, he may take the benefit of the Insolvent Act in England, or process of Cessio Bonorum in Scotland; by which, on giving up all his property for the benefit of his creditors, he is relieved from prison, and left at liberty to pursue any line of industry. Any property he may accumulate, however, is at all times liable to be seized upon by his creditors, until their claims are paid in full.

Insurance.-A contract by which certain persons or insurance offices engage to make good to the party insuring, any loss he may sustain of ships or their cargoes at sea, or of houses or goods by fire. The parties who take upon themselves the risk are called the insurers, or underwriters; the person protected is called the insured; the sum paid to the insurers is called the premium; and the paper on which the contract is written is called the policy of insurance.

Interest.-The sum charged by the person who lends money, to the party to whom he lends it. The interest charged is at the rate of so much per cent. on the sum lent. The sum lent is called the prineipal, and the allowance for lending it the interest. If $£ 100$ were lent for a year at the rate of 5 per cent., the interest at the end of the year would be $£ 5$.

Invoice.-A list or account of goods that have been sold or sent on a certain day by one person to another, stating all the particulars and the prices. The invoice is sent by the seller to the buyer, either along with the goods, or separately by post. In the case of inland transactions, when the invoice is not forwarded by post, the purchaser is not liable if the goods should be lost by the way. It is the seller in that case that must have recourse upon the earriers for the recovery of the loss (see Carriers).

An invoice has nearly the same signification as Bill of Parcels.
Examples.
Manchester, Janzary 1, 1850.
Mr John Adays, Edinburgh.

Terms $2 \frac{1}{2} \%$ discount for Cash, or Bill @3 3 months.

| 26 Pieces Printed Cotton, 825 yards. $\qquad$ 7 d. | 24 1 <br> 4 0 <br> 14 14 <br> 0 2 <br> 0  | 0 |
| :---: | :---: | :---: |
|  | 4217 | 9 |
| It is common to mark the terms on which the goods are sold, and the conveyance by which they are sent. The date may be placed either at the top of the invoice or on the margin, and the form used may be either " Bought of E. Johnston \& Co.," or, "To E. Johnston \& Co." |  |  |

Mr George Smith, Leeds.

To James Reid, 41 Strand, London.

Invoices of goods exported may also be drawn out as on the previous page; in extensive export transactions, however, they are commonly made out more formally. The following is an example:-

Invoice of six hogsheads of tobacco, shipped on board the "Triton," James Duncan, master, for Hamburg, on account and risk of James Green, merchant there.

Note. -The letters J. G. on the left of this invoice are the letters marked on the hogsheads. Merchants generally write errors exceptcd to every account which they subseribe, that they may not be precluded from the correction of errors afterwards, if any be discovered.

Lease or Tack.-An agreement for a specified time between two parties, in reference to the occupancy of houses, shops, land, \&c.
Ledger.-The following is a form of the Ledger often used by retail dealers, in which the $D r$. and Cr . money columns are placed together, instead of on the opposite sides of each page, as in a wholesale Ledger. The object of this is to give more space for writing the particulars of the entries :-

John Simpson, Esq. George Street. Dr. Cr.

Letter of Attorney, or Power of Attorney.-A legal document, by which one party is authorised to act on behalf of another in some matter of business.

Letter of Credit.-A letter or order sent by one banker to another, authorising him to pay the bearer of the letter a certain sum specified, in consideration of the same sum having been paid to the banker who grants the letter.

Lloyd's. - The name given to a set of rooms in London, used by the Society of Underwriters or Marine Insurers there as their office. Idoyd's is not only a centre point in the metropolis for all sea-insurance business, but is the place to which every species of intelligence respecting shipping is forwarded from all parts of the world; and this information is exhibited in one of the rooms for public inspection. The lists made up and exhibited at Lloyd's furnish authentic information for the use of merchants and shippers of goods all over the United Kingdom.

Manifest.-A document containing a specific description of a ship, with a list of the names of the passengers, and of the packages, \&.c. forming her cargo. It is signed by the master at the place of lading.

Orders.-An order is a request from one dealer to another to supply certain goods. An order, when in writing, should be plain and explicit, and ought to contain no more words than are necessary to convey the sense in a simple, courteous manner. Studied abbreviations should be avoided-such as " have just received" for "I have just received," "amt." for "amount," "reed." for "received," \&c.

Partnership.-When two or more individuals associate together to carry on a business, they are said to be in partnership. Each partner receives such a share of the profits as may be agreed upon, according to the nature of the partnership and the amount of capital that each has embarked in the business (see Company).

Per Cent.-A contraction of Per Centum, meaning per hundred, and is applied to rates of interest, discount, \&c. Thus interest at 5 per cent. means interest at five pounds for every hundred pounds. Per cent. is in business frequently written $\%$ as a contraction. Thus 5 per cent. would be written $5 \%$.

Permit.-A license given by the Excise Office to permit the removal of exciseable goods from one place to another.

Petty Cash-Book.-This book is often used for entering small sums received and paid, see page 45.

Example.

| Cash Received. |  |  |  | Cash Paid. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{aligned} & \overline{1850} \\ & \text { Jan. } \end{aligned}$ | $\left\|\begin{array}{r\|} 1 \\ 3 \\ 7 \\ 7 \\ 31 \end{array}\right\|$ | Sundries $\qquad$ <br> do. $\qquad$ <br> do. <br> do $\qquad$ | 0 4 6 <br> 0 7 6 <br> 0 8 8 <br> 0 9 3 | 1850. | 1 Carriage <br> 2 Washing Shop...... <br> 5 Twine $\qquad$ <br> 31 Coals. $\qquad$ | 0 1 <br> 0 1 <br> 0 1 <br> 0 12 <br> 0 12 | 6 <br> 0 |
|  |  | Goods-cash sales entered in Cash-Book.. | 18811 |  | Trade Expensesentered in Cash-Book.. | 018 |  |

The sums received and paid are transferred to the "Cash-Book," either daily, weekly, or monthly, according to circumstances.

Postage.-Inland letters are charged ld. if not above half an ounce, 2 d . if not above one ounce, 4 d . if not above 2 ounces, 6 d . if not above 3 ounces, and so on.

Post-Office Order.-An order granted at the Post-Office for sums not exceeding five pounds. A person wishing to transmit money to a distance pays the amount to the nearest Post-Office, and receives a Post-Office order, payable at the Post-Office where the person resides who is to receive the money. Orders are granted at the principal Post-Offices throughout the kingdom. The charge is 3 d . for sums not exceeding $£ 2$, and 6 d . for sums above $£ 2$.

Posting.-Copying or transferring into the Ledger the entries made in the Day-Book, Invoice-Book, Cash-Book, and Bill-Book.

Price Current.-The technical term for a list showing the market prices of commodities.

Principal.-The term applied to money when lent out at interest.
Protesting Bills.-See Bills.

Receipt.-An acknowledgment of a certain sum of money having been received. The following are common forms :-
£25 36.
Edinburgh, January 1, 1850.
Received from Mr John Brown, London, the sum of twenty-five pounds three shillings and sixpence, in payment of account rendered (or of annexed account).

James Wilson.

London, March 31, 1850. Received from Mr James Russell, the sum of seventy-five pounds eight shillings, in payment of account to this date.
$£ 7580$.

## Robert Thomson.

When the sum received is above five pounds, the receipt, in order to be legally valid, requires to be written on stamped paper. The price of the stamp varies according to the sum.

If a stamp is not required, an account may be marked as settled by the person who receives the money writing at the bottom of it "paid" or "received payment," and then subscribing his name, thus-

Mr W. Hunter.

> To John Adams, George Street, Edinburgh.
1850.

Mar. 31. Account rendered.....................................£10 162
May 2. Paid, John Adams.

When one person receives money on belalf of another, he signs thus:

> Paid, John Adams per Thomas Smith. $\quad$ - $\quad$ Paid, Thomas Smith

Salvage.-When a ship or its cargo has been saved from shipwreck or loss at sea by uninterested parties, the persons saving the vessel or goods are entitled to remuneration from the owners. The sum paid is termed the salvage.

Sequestration.-The term used in the law of Scotland to denote the form of process by which, if the creditors to a certain amount concur in petitioning for it, an insolvent's affairs are legally investigated, and his whole property officially taken possession of or sequestrated for behoof of his creditors. By the process of sequestration, if there has been no fraud, he is relieved from all his previous obligations. It is only persons in trade that are entitled to the benefit of this legal process. See Cessio Bonorum and Insolvency. Sequestration has nearly the same meaning as "Fiat in Bankruptcy" in the law of England.

Stamp Duties. -The following are the duties on bills and receipts:-

## Receipts

Terms.-The following are the terms for leases, \&c. :-

England and Ireland.

| Lady Day, - | March | 25 |
| :--- | :--- | :--- |
| Midsummer, | Candlemas, | - |
| - June | . | February |
| 24 | Whitsunday, |  |

Michaelmas Day, - September 29 Lammas, - - August 1
Christmas, - - December 25 Martinmas, - - November 11
Tariff, or Tarif.-The term applied to a table of the articles subject to Customhouse and Excise duties, with their respective rates.
Underwriter. - The name given to those who follow the profession of marine insurers: they undertake the risk of the insurance, and subscribe-that is, write their names under the policy or deed expressing this-hence the term underwriter.
Vendue.-A colonial phrase, used instead of public auction. To sell goods at vendue is to dispose of them at auction.
Voucher.-A document shown in proof of some payment having been made. Thus an account marked paid in the hands of a person, is a voucher that the sum mentioned in the account has been paid.

THIS BOOK IS DUE ON THE LAST DATE STAMPED BELOW

AN INITIAL FINE OF 25 CENTS WILL BE ASSESSED FOR FAILURE TO RETURN THIS BOOK ON THE DATE DUE. THE PENALTY WILL INCREASE TO 50 CENTS ON THE FOURTH DAY AND TO $\$ 1.00$ ON THE SEVENTH DAY overdue.

CYCLOPEDIA OF ENG
A Critical and Biographical History o
of literature ; illustrated by coy
Two Voly

[^0]:    In the Day-Book, instead of "Dr. To," which is the mercantile phrase in full, it is enough to write "To;" and in the Invoice-Book, instead of "Cr. By," it is enough to write "By."

[^1]:    * In the Ledger of wholesale merchants the amount only of goods is posted; but in Retail Ledgers it is more convenient to copy the particulars, except when they are numerous. For an Example of an Account in a Retail Ledger, see Appendix under " Ledger."

[^2]:    "Profit and Loss" is the title given to this account, when, as will be seen in Double Entry, the "Profit" is entered on one side of the account, and the "Loss"-that is, the expenses, bad debts, \&c.-are entered on the other side.

[^3]:    - For another form of the Day-Book, see page 37 .

[^4]:    +In basiness, it is unnecessary to balance off unsettled accounts in this way. It is sufficient merely to add up the columns, marking the Dr. or Cr. baiances in a temporary way with a pencil, and ruling off the accounts only when they are actually settled.

[^5]:    * These are the monthly sums-total of the Day-Book.
    $\dagger$ These are the monthly sums-total of the entries for "Cash Sales" in the CashBook: the particulars being noted on a piece of paper, and the amount then filled in here.
    $\ddagger$ These are the monthly sums-total of the Discount columns on the Received side of the Cash-Book, and are deducted from the amount of Goods, to show the nett sum.

[^6]:    A. Smith's salary amounts to $£ 15$; but as he has drawn only $£ 10$, the balance of $£ 5$ is carried forward to the Cr . of his account.
