# REMARKS.-TO THEREADER. 

The Signs of the Zodiac, \&c., \&e.

气 Libra, the Scales, tine reins;
II Scorpio, the Scorpion, the secrety:
7 Sagitarius, the Archer, the thighs:
is Capricornus, tho Goat, the knees;
\#. Aquarius, Waternan, the legs;
兴 Pisces, the Fishes, the feet;

And the man riding the moon; the pietures of sundry hearenly animals;said to govern the anatomy of man's body, according to the notions of the: ancients, and the idea of some famers and women, upon raising pigs and "hildren, are omitted, for the "tall" reason, that, as no one has been able to measure the distance to Aries, Taurus, or Virgo, fe.; they are equally unable to give any account of the influence of any of these "fixed stars," -or which of "the Gods," mentioned by l'aul, inhabits them.

As the supposed distance to Sirius, Virgo, or Taurus, may lee $40,000,-$ $1100,000,000,000$ miles, the influence from them, must travel swift if it started at the "begining" of this world, to reach the earth, by the elose of this century.

## Names and Characters of Tile planets, \&e.

EPACHS, OR MOON'S AGES FOR THE YEAR.
January 9 dars; February 11 do; March 10 do; April 11 do; May 12 du; fume 13 do; July 14 do; August 15 do; September 17 do; Oetober 17 do; Vorember 19 do; December 19 do.

## THE FOCR SEASONS.

Sprinǵ, begins March 20, 4h 34 mm . Summer begins June 21, 5 h 21 m m. Fall begins September 23, 6h 41 mm . Winter begins December 22, 8124 mm .

## ABREVLATIONS.

1l, days; h, hours; m, minutes; a, afternoon; m, morning; K. J.,King's .lester.
The moveable Feast days of the old fashioned churches, are omitted, its useless.

The "Sisth of April", answers for the crucifixion of Jesus Christ, and the re-organization of his church upon the earth for the last dispensation.

## ECLIPSES FOR 1852.

There will be six eclipses this year,-three of tho sun, and three of the moon.
1st. A total eclipse of the moon:--January 6, begins at Sh 54 m a.; [man's time; ] middle at 10 h 44 ma .; ends the 7 th, 0 h 34 m m. In lon. 50 W , and lat. 50 n , equal, \&c.
-d. Of the sun, January 21, 01 lm m . To us invisible. Seen in lon. 124 w, lat. 68 s.
3 d Of the sum, June $17,9 \mathrm{~h} 21 \mathrm{~m} \mathrm{~m}$. To us invisible. Seen in lon. 57 m , lat. 65s, just below Cape Horn.
fth. Of the moon, July $1,8 \mathrm{~h} 1 \mathrm{~m} \mathrm{~m}$. To us invisible. Total in New IIolland.
5 th. A total celipse of the sun, December 10 , middle 8 h 5 m a. Visible at Pekin and Nankin in China.
6th. Of the moon, Deecmber 26; begins at fh 7 m m; middle at 5 h 43 m m ; ends at 7h 5 mm .
of Yenus will be evening star for the year. [See table on another page.] \& Jupiter will be $^{2}$ morning itar till the Ist of May, then evening startill the $218 t$ November, thence morningstarto the year's end.

## (ERNERAL RULE TO CALCULATE BREAK OF DAY \& TWILIGHY.

The earth is 360 deg . in circumference, and "rolls on her wings," al,out a degree in four minutes-which is equal to 24 hours; and the sun's rays begin to cast a light 18 degrees before rising, and continue the same is degrees after setting. 184 is 1 h 12 m . This sum subtracted for daybreak, and added for twilight, gives the bogining and ending of twilight.

Example.-March 22d, sun rise comes at $6 \mathrm{~h} 2 \mathrm{~m}-1 \mathrm{~h} 12 \mathrm{n}-4 \mathrm{~h} 50 \mathrm{~m}$ is dathreak. The sun sets at Ch 12 m - 1 h 12 m -makes 7 h 24 m the end of twilight, the previous day.

## RULE FOR FINDING TIEE ROON'S SOUTHING.

Wultiply the moon's epach (age) ly 81; cut off two fignecs from the right hand of the product, the left hand figures will be the hours, the right liand fixures, multiplied by 60 , will be the minutes. For instance, May 1 , epach 14 by 81 and $60-3142 \mathrm{~m}$, which is within 3 or 4 minutes of the true time.

Tha Jomgtn of Dafs. - At Berlin and London, the lomecot diay has sixteen ant a half hours. At Stnckholm and Upisal, the longest day has eighfecn ami a hulf hours. At IIamburg. Dantzic, and Stettin, the longest day las surentem hours, and tho shortest seven. At St. Peterslurg and Tobolsk, the lonesat has nincteen, and the shortest five hours. At Tornea, in Finlan lothe longest day has twenty-one hours and a half, and the shoriost two anlaholf. At Wanderbus, in Norway, the diay lasts from the 2lst of Muy to the $22 a$ of July, without interruption; and at Spitzbergen, the 'ongest thee and a half months:
菭 185 D.$]$ Dannary begins on Thursday, and has 31 days. [Viniter.

## BIBLE ASTRONOMY.

The nearest "fixed star" must be Mount Paran, mentioned by Habakkuk, the fruitful world of glory where the "Holy One" came from; or rather Kolob, where our Father in the Ilearens resides in the midst of his glory and kingdoms.

The next nearest "fixed star," also mentioned by Habakkuk, must be Thamen, the world of perfection where God came from to do the works of his Father, spoken of by John the Revelator, [Rev.1.6,] which Father of God, and grand father of Jesus Christ, must now be living in one of the eternity of eternities-which closes the Lord's prayer in the Greek version, and is mentioned by John, [Rev.19-3 \&e.]

If, as Paul says, there are "Lords many, and Gods many," and each has the control of a renewed or resurrected world, which continually shines as a "fixed star;" Hearen must be a large blessed universe of intelligent worlds. What say the learned D.D's. on this head! Paul ascended to the third Heaven, and heard things unlawful to utter then, -but all things are to be revealed in the last days. - Open the windows of Heaven.

## 

1__Up! Deseretians! New Year's come! The old one's pass'd and goue,And Uncle Sam is very sickGo call the Doctor, John.

2-_There hangs his Continental IIat, Cockaded o'er his bed; His eyes are dim, his pulse are low, The old man's nearly dead.

3-In days when Britain troubled men, He saddled up "Old White," And gathered out a valient band, And said;-"I guess we'll fight."

4-_"No Stampt Act-Tea Act can be just, "To gather cash for Kings,-"So boys, we'll be-United States, "And try what valor brings."

5——The hills and mountains, far and near, All stood around in glee, As Uncle Sam rush'd forth to war, To make his children free.

G-_Old John Burgoyne, with all his host, Out-cop'd, surrender' $d$-then ; And Lord Cornwallis shell'd his corn, And left the cob,-amen.
i-_All right ; before a favor'd few, The foe-man had to flee, And Uncle Sam triumphant stood, With "honor bright," and jree!

8-The Asslum of Liberty Was grac'd with Washington, And Uncle Sam with all his sons, Then shouted,--"we are one!"
9.-The sun ne'er lit a better land, A "Union" burst to view, And God Almighty blest the realm As long as men were "true."

10_But when "Old IIick'ry" left the chair To little Matty Van, A chill came over Uncle Sam,-A-fever then began.

11—A State could mob; the truth was shun'd, And winking understood; And that good name of Uncle Sam, Was stain'd with human blood.

12-The lingering Nations of the world, Ey'd Uncle Sam, the brave,And said:-"He saved others,"-oh!"Himself he cannot save."

13_So God lead out the innocent, Laid judgment on the shelf, And let old Uncle Sam once try :"Physician heal thyself."-

14 _And now the old man's sick of life, For all his law is dead:
And slav'ry speaks like Balnam's Ass: For all his glory's fled.

15 _Jehovah copes with wicked men, And in their evil hour, He thrusts them down to hell in wrath, And then they learn his pow'r.

16_When wicked nations fall, therr's joy, And God doth sit and laugh; And angels have their sacred sport, To blow them off as chaff.

17——The wit of min; the gold of worlds, Can't save a sin-scorched soul:
The sweeper comes: and then, aha! The Devil takes the whole.

18-So Uncle goes to Potter's field ; To hide his freaks and flaws, That one lone slab may tell the spot, Where Uncle Sam once was.

THE AUTHOR, K. J.
(i. S. L. Citr, Oct. 20, 1851.

## OUR FATHER IN TILE HEAVENS.

1-When eternities began,
There were precepts made for man,
Knowing Lucifer deceives,-
For each Adam had his Eves,-
Like millions of millions his Father onee had blost;Or millions of millions in everlasting rest.

2--Then our Father in his youth, Camo from Teman full of truth,

Marcla begins on Monday, and has 31 days.

29 Answer a fool but once, Wer 30 Lest you catch his bimp.

## WHITEWASH.

Take one bushel of nice, unslacked lime, sack it in boiling water, keeping it covered to keep in the steam; strain the liquor through a fine scire; add a peck of clean salt, previously dissolved in water; three pounds of ground rice, or fine Hour, previously made into paste, and boiling hot; one pound of Spanish whiting; (perhaps San-Pete whiting will do) one pound of good glue, well dissolved. Add five gallons of hot water to the whole mixture, and let it stand three or four days well covered from dirt. It should be put on hot, with a brush at the rate of about one pint to a square yard. It will remain several years on out or inside walls, and retain its brilliancy.

## SCOTCH BREAD.

Take 3 lbs . flour, I lb. butter, I lb. beet sugar, or I pint of molasses, 4 eggs, milk enough to wet the compound, saleratus enough to raise it; scason with essence of lemon; bake quick.

Josepif Smith opened the last dispensation 1830 .

Cloth'd in flesh like you and I,
Sav'd his world, and went on high,
Like millions, \&c.
3_-Morning Stars together sang, Sweet the song on Kolob rang;
"There's another Kingdom Come;
"There's another God come home:"-
Like millions, \&c.
4-0 ! what glory fills each realm !
And what wisdom guides the helm!As a resurrected soul, Every God controls a whole: -

Like millions, \&c.
5 - What a mighty scope for thought, Where the spirits are begot?

- Born for Kingdoms yet to be, In a new eternity?

Like millions, \&c.
6-_There's the mansions; there's the means; There's the Kings, and there's the Qucens; There's the children ; there's the plan; There's the glory yet for man-

Like millions, \&c.
G. S. L. City, Sept. 30, 1851.

THE AU'THOR, K. J.

ALL SEEN IY THE MAN IN THE MOON.
1 _-Ere Eden eontained a bower, Or nightingales chanted a tune, The man and the woman, both naked, Were seen by the man in the moon.

2-And many a loving affair, Where faney has frolie'd too soon, And many a sweetly kiss'd maiden. Are seen by the man in the moon.

3-And many a villain that's artful, And many a sinning paltroon, And many a purpose of treason, Are seen by the man in the moon.

4-And many a coaxing cute endger, The really cunning old Coon, And many a glimpse of a dandv,

Are seen by the man in the moon.

## A Fable.

A poor musqueto came to a rich bee-hive, one cold morning, nearly starved, wishing charity, and offered to teach the whole bee family music upon the small terms of victuals and lodging. The bees, in rather a humble manner, rejected the proposil, observing that they were all bred to industry, and dryly asked, "what benefit is a science which has reduced its professor to beggary."

## MORAL.

He reasons in vain whose example destroys his own proposition. 0 What say tobacco chewers and drunkards to this logic. Satan says it makes them snuff.

## WEDDING CAKE.

Mix 1 pound butter, I pound sugar, 1 dozen eggs, with a pound of flour, previously prepared with a pound of raisins or currants, raised with $\frac{1}{2}$ a dram of saleratus, and scent with winter green or lemon essence. Bake slow; then coat it with loaf sugar prepared.

5_-And many a dreadful good parson, That's prey'd at the game-petti-loo-n, And gracionsly covered the secret,

Was seen by the man in the moon.
6 -This hint from the prophet's cute jester, Who acts as the 'Tempter's buffoon; For through the big key-hole of heaven, All's seen by the man in the moon.

December, 1851.

K. J.

## THE FOOL KILLER.

The Gold of California,-alas!
How many strange events
Have come to pass loy her
Almighty charms!
Fortunes made, -
And fortunes lost:-and lo! at once,-
How many widows, orphans, friends,Are drinking the bitter dregs
of woe! The fool killer's golden cup! There runs a black streak, 0 California! Thou slaughter house of quick desire! Thou spot on human happiness! Thou gilded threshhold of hell! What will nineteen hundred and fifty say of Thee? There's a tale for tale bearers. The fool-killer has been at work; Now Philosophers run and read The catalogue of fortune's fun:And then sav whether satan deceives, Or else acknowledge beat:-and then Return to reason, bv way of New Holland, And let the fool-killer catch you there. 0 what a brilliant day we live in! Fools make feasts and wise men dio By devouring them!

## AN OLD FABLE, (renewed.)

Once a lion invited a horse, an ox, and a ram to hunt with him, promising them an equal division of the game taken. They soon run down and killed a fine deer. After it was quartered, the three guests, looked on with much self calculation, while his majesty, the lion, as they supposed, would deliver each an equal portion. But the lion, in a growling tone, commencel, taking the first quarter, that belongs to me, as king; the second qarter, I claim because I am the strongest: the third I shall take for my trouble in getting up the hunt; and if anv of yon refuse me the fourih, I shall declare him my enemy; so the unfortunate companions of his majesty; lacking the power, went away hungry.

broad and 6 feet deep, there will be 316 bushels and 8 -10th of a bushel of shelled corn, or 633 and 6-10ths of a bushel of ear corn as,

The decimal 4 is used when the object is to find the quantity in shelled corn, because that decimal is half of the decimal 8, and it requires two bushels of ear corn to make one bushel of shelled corn or wheat. In using these rules a half a bushel may be added for every hundred; that amount of ears results from the substitution of the decimals.

## DISCOVERIES AND INVENTIONS.

Air-balloons invented in France, by Bricks first used in England by the Mongolfier. in I783; and introduced into England, 1784.
Air-guns invented, 1656.
Air-pumps invented, 1654.
Algebra first known in Enrope, I494.
Alum first discovered in mines in Tuscany, I460.
Anathema first used by the chureh, 387.

Apple-trees brought from Syria and Africa into Italy, 9 years before Christ.
Apothecaries first mentioned in history, 134.5.
Arithmetic introduced into Europe from Aralia, 991.
Arithmetic, decimal, invented 1402.
Astronomical olservations first made at Babylon, in the year of the world 2234.

Banks first began, 808-that of Venice, 1157; of Citnoa, 1345: of England, 1640; of America, I791. Romans.
Bullets of iron first mentioned as used instead of stone, 1550.
Burials first made in churchyards,758.
Calendar first regulated by pope Gregory, 1579.
Candles of tallow so great a luxury in England in 1300, that splinters of wood were commonly used for lights.
Chess, the game of; invented, в. с. 608.

Chimneys not known in Eng., 1200: not used except in kitchens or halls till 1300.
Cloth, coarse woolen, introduced into England, II9I; first made at Kendal, 1390 .
Coaches first used in England, 1580: an act passed to prevent men from riding in them, as effeminate, $\mathbf{I 6 0 1}$.
Coals discovered near Neweastle. 1234: first used, 1280.
Bark, virtue of, diseovered, 1500; first Coffee first brought into England from used in Europe, 1650.
Veer first introduced into England. 1492.

Books in the rresent form, invented by Attalus, king of Pergamos, 887.
Bork-kecping on the Italian method. first used in Ingland, 1569.
Bread first made with yeast by the Englieh, löjo.

Crete, 1641.
Compass, mariner's, invented in China, в. с. I21): said to have been used at Venice, I260; improved at Naples. 1302; i s variations noticed. 1500; its dipping, 1576.
Copper money first nsed in Scotland and Irelind, I399; in France, 1589 legally in England, I609.

UNITED STATES GOVERNMENT OFFICERS FOR THE TERRITORY

## OF UTAH.

BRIGHAM YOUNG, Governor, and Superintendent of Indian Affairs.
WILLARD RICHARDS, Secretary pro. tem., appointed by the Governor.
Z. SNOW, Associate Justice of the Supreme Court, and Judge of the First Judicial District.

## THE WIND.

The wind is air in motion, and varies in velocity in different degrees, stages, and countries, from 1 to 100 miles per hour. From 1 to 5 miles per hour embraces a soft, gentle breeze; from 5 to 10 a common gale; from 10 to 20 a brisk gale; from 20 to 30 a very brisk gale; from 30 to 40 high, or very high wind; from 40 to 50 a storm or tempest; from 50 to 60 a great storm; from 60 to 80 a hurricane; and from 80 to 100 miles, a tornado that carries all before it.

The wind generally carries the clouds about 2 miles high, over vallies and plains; but in this vicinity, where clouds are manufactured from the breath of the mountains, during fall and winter, they not unfrequently come within one or two thousand feet of the common level, and afford the spectator above them on the mountains a sublime view of the clouds, spread out as a pavilion orer the Valley, glittering in the mellow sunbeams.

The amount of water that may be contained, in a given dimension of cloud we know of no means of ascertaining. The upper deep is unexplored and undefined by man.

MEMBERS AND OFFICERS OF TIIE HOUSE OF REPRESENTATIVES OF THE LEGISLATIVE ASSEMBLY, 1851-2.
W. W. PHELPS, Speaker.

## HOME.

1_-I have traveled all over this fame spotted earth, To pick up the crumbles of innocent mirth, And gather the diamonds of wisdom and worth;

And lo! the best treasure,
The sincerest pleasure,
I found was at home.
2-I have been to the palace where kings sat in state, Surrounded with nobles, the great with the great, Where subjects were lingering to find out their fate:

And 0 ! how they trembled!
And each one dissembled!-
There's no place like home.
3-I have been to the cottage, when there sat the poor,
In want of the blessings that money procure;
Or were sick, for the doctor had fail'd them to cure;
And yet all their troubles,
Were transient as bubbles,
For they were at home.
4-I have been to the banquet, of feastings and glee, Where beauty and fashion were tete-a-tetee,-
As if fortune and friendship were ever to be:
And mid all this showment,
Each heart took a moment,
To sigh for its home.
5_I have ask'd the old sailor, that sail'd on the sea,-
I have talk'd with the soldier that fought to be free,--
To tell, if thev could, where contentment might be:-
Without an emotion,
Or separate notion
They said: ' 7 is at home!
6-I have dreamed of the Zion where God lives above,
Where perfection is basking in union and love
And spirits go down in the form of a dove:
So kindly to meet us:
And sweetly to greet us;
Go there:-There is home.
G. S. L. City, Jan. 10, 1851.
K. J.

Let not thy recreations be expensive, lest the pain of purchasing them ozeed the pleasure thou hast in their enjoyment.
Neither let prosperitr put out the eves of circumspection, nor abundance cut off the hands of frugality: He that too much indulgeth in the superfluities of life, shall live to lament the want of its necessaries.
The fool is not always unfortunate; nor the wise man always successful; ret never had a fool thorough enioyment-never was a wise man wholly unhappy.-[Economy of Human Life.

## THE MOON．

Erery one，perhaps，is not aware how the earth appears to the in－ habitants of the Moon．As more than three fifths of the earth is eovered with water，and being nearly 13 times larger than the moon， a full earth must be a grand sight！The earth light there must be suf－ ficient to read and work by．Again，as the moon always keeps the same side to the earth，those who live on the back side，must naturally enioy themselves in taking pleasure rides to the Frontiers，to view through their telescopes，and Urim and Thumims，the earth＇s gran－ deur，and glory，and some of the curiosities of their next worldly neighbors．

If revelation is as prevalent there as it was here in the days of Enoeh，there must be some joyful seasons，in preparing，like their friends the Mormons，for a ceneral jubilee of all the worlds，or rath－ er，all the sanctified resurrected creations of our Father＇s district of eternity．

It will considerably eclipse Queen Victoria＇s chrystal palace fair．

## AY ORDINANCE INCORPORATING THE UNIVERSITY OF THF, STATE OF DESERET.

PASSED BY TIIE GENERAL ASSE3BLT, FEB, $28,1850$.
Sec. 1. De it ordained by the General Assembly of the State of Deseret, that a University is hereby instituted and incorporated, located at Ereat Salt Lake City, by the name and title of the University of the Sitate of Deseret.

Sec. 2. The powers of the University shall be rested in a Chancellor and twelve Rogents; the number of which Regents may be increased when necessary, who shall be chosen by the joint vote of both Houses of the General Assembly, and shall hold their offec for the term of four years; and until their successors are qualified.

Sec. 3. The Chancellor shall be the Chief Executive officer of the University, and Chairman of the Board of Regents.

Sec. 4. The Chancellor and Board of Regents are a body corporate, to sue anl be sued; to act as Trustees of the University, to tromsact, or cause to be transacted, all business needful to the prosperity of the University, in adrancing all useful and tine arts and sciences; to select and procure land: ferect and purchase buildings, solicit donations; send agents abroud; receire subsciptions; purchase books, maps, charts, and all apparatus necessury for the most liberal endownent of any library, and scientiac lastitntion; employ professors and teachers; make by-laws, establish branches of the University throughout the State, and do all other things that fathers and guvidiams of the Institution ought to do.

Sec. 5. The Chancellor and Regents may appoint a Secretary, and define his daties.

Siec. 6. The Chancellor, Regents and Socretarr, before entering upon the duties of their respective offices, shall each take an oath of oiice, and file a bond in the office of the Secetary of State, with approved securities, in a sum of not less than ten thonsand dollars, conditioned for the laithful perform unce of their several duties; which sum may be increased at the discretion of the lixecutive of the State.

Sec. 7. There shall be a Treasurer of the Unirersity elected in the same mannsr, and for the same time, as the Chancellor and Regents; whose duty it shall be to receive and safely keep the funds of the University, or dispose of the same, as he shall be directed by the Board of Regents; and keep accurate records of all funds that may come into his possession; and keep his books open at all times for the inspection of the Chancellor and Regents, or any of them, and of the Executive and Secretary of State.

Sec.- 8 . The Treasurer, before entering upon the duties of his office, whall take an oath of offce, and file a bond, with approved security, in the office of the Secretary of State, in the sum of one hundred thonsand dollars; conditioned for the faithful performance of his duties; which sum may be increased at tho discretion of the Executive of the State.

SEc. 9. Should a vitcancy oceur in the lioard of Regents, or any office in the Institution, during the recess of the General Assembly, the Executive of the State may fill snch vacancy.

Sec. 10. It shall be the daty of the officers of the University to prepare, and open books, and be ready to receive subscriptions, donations and appropriations, on or hefore the Gth day of April next; and shall legibly enter upon their books, all subseriptions and donations to the University, with the names of the donors, time and place, and preserre the same.

1852.] November begins on Monday, and has 30 days. [Fall.

## L. 1 IW.

Lar, as pritetised in the learned world, is the square rule of "old say-so," to cause human beings to be honest when they cannot help it.
In brief it is far-fetched and dear boumht; in chumery it lasts forever and erer; that is the length of a bass-wood rail with a knot on it,-rarying its hues according to the surrounding objects, like the chamelion.

No case, according to the Constitution, which is the magna charta, (great charter) can admit of any new saiy so, for that would be ex post : facto, (from after the fact) and that would be judging matters upon their merits; therefore, instead of the matter of fact to create the act, every judge and lawyer should consume their lives and wisdom, to hant for the "needle lost in the king"s haymow;" to mark the place on the "ship's rail where Jack's marlinspike fell orerboard;" to make the flea that pesters the nation and hilles in the President's strawstack, chief justice, because a blade needs a handle; to reject the man-in-the moon's testimony, becanse he trarels through his Father's Big Field on Sunday, exclaiming, O tempora! Omores! But O ye saints! Be wisc, and keep out of the fire!

Sec. 11. The sum of five thousand dollars is hereby appropriated annually out of the State Treasury, for the use and benefit of said Univcrsity.
Sec. 12. The Board of Regents shall have a Seal, known as the Seal of the University; which may accompany all their official correspondence, and all other legal documents given under the hands of the Regency of the University.
Sec. 13. It shall be the duty of the Chancellor and Board of Regents, as soon as the funds arising from donations and otherwise may justify, to esłablish a free school Institution for the benefit of orphans, and other indigent and worthy persons.

Sec. 14. The Secretary and Treasurer shall each present a full and explicit report in writing, of the situation, funds and doings of the University in their several departments, on the first of December in each year, to the Secretary of State.

Afrioved, Feb. 28, 1850.

## LIST OF THE REGENCY

OF TIE UNIVERSITY OF DESERET,
As chosen by the Legislature.
ORSON SPENCER, Chancellor.
ALBERT CARRINGTON, W. W. PHELPS, WM. I. APPLEBY, ROBERT CAMPBELL, DANIEL SPENCER, ORSON PRATT, ORSON HYDE, DANIEL H. WELLS, WILF URD WoODRUFF, JOHN M. BERMHISEL,
JOHN TAYLOR,
GEORGE A. SMITH.
DAVID FULLMER, Treasurer.
ROBERT CAMPBELL, Secretary.
ELIAS SMITH, Superintendent of Common Schools.

## THE ATMOSPHERE.

By measurement the atmosphere is nearly 50 miles high, and grows thinner and lighter, from the earth to the top. By experiment, if we estimate the diameter of the earth at 7964 miles, the mean height of the barnmetcr at 29 I- 2 inches, and the weight of a cubic foot of mercury at 13 ,500 ounces, avoirdupois, the aggregate weight of the whole atmosphere, at 50 miles high, round the globe, will be $11,522,211,494,201,773,089 \mathrm{lbs}$, and its pressure upon the earth about $142-5$ lbs to the square inch. This will cause a common sized person to carry nearly 14 tons of air; but as it presses upon all sides, it is not felt materially only when ascending high mountains, or descending them.

The air, as an element, is a great curiosity; the weather has never been cold enough to freeze it, nor hot enough to melt it, and yet it is the grand medium of both. The atmosphere divided into parts, contains 98 9-10 air; 1 rapor, and 1-10 carbonic acid; but again chemically divided, there are 21 parts of vital air for breathing, and 79 poisonous; hence the want of fiesh air in tight rooms.

## THE ETERNAL MOTHER.

The 11 th ehapter and 7 th verse of Job, rightly rendered from the original IIcbrew. reads:-_'Who has searehod ont God? Canst thon find out the Etemal Mother? Canst thou find ont the perfection of the, -1mighty?"

All right: spiritually or temporally, there cannot be a fother without " molher, in truth, to continue the ai infinilum of lives, - except the sectarian got. who has neither body, parts, or passions; le has no wife, and, of eourse, he had no mother. "oh gracious!" inquires the philosophising granny, "where did he come from?" "Why," replics the King"s Jester, "may be he is one of the Misses Lucifer's come-by-chances:" Now hush, you,-slandering the Prince of this world's family. Hush!

## TIRGIL A MORMON.

Tircil, tho poet, who was born 70 years before Christ, and fourished and died before the birth of Jesus, represents the Great Apollo, speaking from the heavens, and addressing a youth thus:
"Macte nova virtute puer, sic itur al astra;
${ }^{6}$ Diis genite, et genilure Dcos."
lmitated in English thus:
Go on in virtue, boy; so is the way to the stars;
You were begotten by the gods, and gods by you must be begot.
Philosophers! there is no insurance on worlds.

A Table of The Dist-
ANCE of Longitude from the Equator to the pole.

|  |  |  |
| :---: | :---: | :---: |
| dec. | geograpt's miles. | ExGlisis miles. |
| 0 | 60 - | 69-10 |
| 1 | 59-99 | 69-09 |
| 5 | 59-77 | 68-84 |
| $10^{\circ}$ | 59-09 | 68-05 |
| 15 | 57-96 | 67-75 |
| 20 | 56-38 | 64-93 |
| 25 | $54-38$ | 62-63 |
| 30 | 51-96 | 59-84 |
| 05 | 49-15 | 56-60 |
| 40 | 45-96 | 52-93 |
| 45 | 42-43 | 48-85 |
| 50 | 38-57 | 44-42 |
| 55 | $3 \pm-41$ | 39-63 |
| 60 | 30-00 | 34-55 |
| 65 | 2j-36 | 29-20 |
| 70 | 20-52 | 23-63 |
| 75 | 15-53 | 17-38 |
| 89 | 10-42 | 12-00 |
| 8 | 5--23 | 6-02 |
| 90 | 0-00 | 0-00 |

The above is made out miles and decimals. For instance, 15 deg. is 57 geographical miles and 96 hundredths of a mile; and 67 English miles, and 75 hundredths, or $3-4$ of a mile.

## THE THREE GREAT WANTS.

The three great wants of human life-
"Tobaceo," "liquor," and a wife"... Are very tempting wants to some; They chew, they spew, they stew,-I rum.

The first, enjoyed, brings on the dreuls; The next, alas! makes wise men fools; The third, o dear! like wells with damps, Benumbs their bliss with home-made cramp.

Ye lakes of spit, and blotch'd fae'd coons:
Ye lank-jawed blades for honey moons,-
Is faith in all your outs and ins?
Be sure the Lord forgiveth sins.
Ye tea and coffee drinkers, think How cop'nant breakers wink; Quit drink? O yes! they ery, and lack her: But 0! what begging for tobaccur!

I say you, long-winded tobaceo cbugg lers; liquor gugglers, and honey fuggler: the day after judgment will show a great many unpaid accounts.

## RULES FOR MYSELF.

CALCULATED FOR THE HORIZON AND MERIDIAN OF MEN AND WOMRN: And will serve, without any essential variation, for children, Two weeks at a time.

First.-I will rise early, and pray to God daily.
Second.-I will live as if I were expecting to die soon.
Third.-I will treat all well that treat me so.
Fourth.-I will never try to be rich, but use means for comfort.
Fifih. -I will seek for the will of God, and live by it.
sixth.-I will keep, what I know to myself, save what belongs to the public.

Seuenth.-I will take good care of myself, others are not bound to.
Eighth.-I will help myself, for God helps such.
Ninth.-I will use my betters as they use me; better for better.
Tenth.-I will make Truth my fortune for time and eternity.
Elcventh.-I will hear the Lord when he speaks, without fail.
Tuelfth.-I will live, as far as I ean, by home produce.
Thirteenth.-I will make peace and union my friends.
Fourteenth.-I will save myself, and then I shall be saved.

## PHILOSOPHY OF TIIE HEAVENS.

In presenting the solar sjstem table, we wish to consider three things as doubtful, and unworthy of the confidence of saints:

First. The influence of signs, stars, \&c., according to the wisdom of the world.

Second. The conjectures of the Christian world upon the hearens abore and the regions "beyond the bounds of time and space."

And Third. The philosophy of attraction and repulsion; attraction and seavitation, or empty space.

For the gran l reason, that the earth and every planet or system in the feaven; is governel by law, and controlled by the power of Gou, or (iods; from whon proseds 'linht to fill the immensity of space;' for there is no space without a kingloin.

That evers worl, or sstem, is a living animal, whose life giving, or life moving power, is in itself, as much as the same powers are in man, animals, trees:-even all created-"whose seed is in i'self:"

Talk not to me of miversal laws, and attraction and repulsion, to gor$\because$ rathe bodies above, or below! What a confusion of worlds there would have been, in such a ease. when Joshua commanded the "sun and moon" to stand still, and the earth ceased to roll for at least a day!

Irain, what becomes of philosophical nonsense, when the earth is sucldealy josged back "ien deyices," as in the instance of Lezekiall? Only forty minntes slow oclock, at one instant's sudden back action!

No more mattru on the earth at one time than anoher! O fools! and sow of und witanlins! Did Enoch's eity and people weigh nothing: They left this errth. After the resurrection. Sesus took his body and went to his Father. That body was a part of this worl, but it is gone!

No mivewal luw, of men's' seeking. gorerns the works of (iod. Etery world "rolls on its wincs," and is controlled by a ciod, whose laws are executc: by cho ameds:as gardian ancels; as "anacels holding the
 erlastins rospel to preach,"--an. I, as quek as sight or thoucht, a look, a sign, or a hint to (iol in Kolob, Tamen, or any olorified kinglom, bringes assist:unce, that eurth and hell cannot demonstrate.
"Bewtre lest any man spoil you throush philosophy and rain deceit after the rudimenty of the worll, an 1 not after the doctrine of Christ."

Well. miv it bespict, "mon was ereated upright," but hehas sought out many foolish theories, aifled by Lucife; whose perigration from one world to another, farmish astronomers, philosophers, doctors and priests, with an oce in of worls and hrpothesis, which, like the spider's web, entangles slieg, but tho fow's of hearen fly through unimpeded!

## From the Economy of Human Life.

Tho noblest employment of the mind of man is the study of the works of the Creator.

Can the meanest fly create itself? or wert thou aught less than God, eouldst thou have fashioned it?

## SKETCH OF THE PRIESTHOOD OF MELCHISEDEK, THE KING

 OF RIGHTEOUSNESS.| Adam was ordained at the age of |  |  | year of the wor |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | ears. |
| Seth |  |  | 69 | '6 |
| Enos | " | ${ }^{6}$ | 134 | '6 |
| Cainan | " | " | 40 | * |
| Mahalaleel | '6 | '6 | 496 | '6 |
| Jared | " | '6 | 200 | ${ }^{6}$ |
| Enoch | " | " | 25 | '6 |
| Methusaleh | " | " | 100 | 6 |
| Lamech | " | '6 | 32 | '6 |
| Noah | ¢ | 6 | 10 | ، |

Adam, in Adam-ondi-Ahman, held a blessing meeting, and blessed his children-aged 997 years, three years previous to his death.

Shem (Melchisedek) ordained under the hand of Noah.
Abraham ordained under the hand of Shem.
Esaias, in the school of prophets, under the hand of the Lord, when Abraham blessed him.

| Gad ord | aned | he | Esaias. |
| :---: | :---: | :---: | :---: |
| Jeremy | '6 | '6 | Gad. |
| Elihu | ، | '6 | Jeremy. |
| Caleb | 6 | 6 | Elihu. |
| Jethro | '6 | 6 | Caleb. |
| Moses | " | " | Jethro. |
| The Is | elites |  | Moses |

And, in this channel, the Aaronio or lesser priesthood continued until John.

JESUS CHRIST, the Son of God, at the age of 30 (A. D.) restared the Molchisedek priesthood.

Peter held the keys in connection with the Twelve in Asia, \&c., which priesthood was lost about

Nephi was ordained and held the keys of the priesthood in connection with the Twelve, under the hand of Jesus Christ, upon the continent of America,

Which priesthood continued a little more than 400 ." To the death of Moroni.

The earth remained without the priesthood, according to the Bible,

،
JOSEPH SMITH ordained to the Melchisedek priesthood by Peter, James and John, (for John is not yet dead)

Which priesthood, under the direction of President Brigham Young and Counsel, is in full and successful operation in the four quarters of the world,

## DECLINATION TABLE. <br> For the Sun's North and South Latitude.

SILK.
Strongly impressed that the eulture of sille onght soon to attract the attention of Deseretians, as a part of home manufachure, a few words, in this year's Almanac, may not be a miss. The culture of silk in China, "an be traced back nearly 4450 years, which is as long aco almost as the flood. Suffice it to say, that silk, manufacturel from tho labors of the silk worm, fed upon Mulberry leaves, is, amone the first employment of kings and queens, not only in the east Indies, lut in varions portions of the habitable glole. Situated in about the same latitude of the Chinese, Mulberry trees, silk worms, and what else may be nceessary to nccomplish a complete sillary, are just as feasable: in these "fat vallies of Ephraim," as in the gaunt gardens of Japheth of the gentilcs. Who gets the first hundred dollars premium for the first silk dress manufactured firom Deseret materials?

> Says Father Time, O fools a gogue, You can't eall-me-back.-
> So read my daily eataloguoIn the Almanac.

alarm to put away these "India rubber bishops," and clothe my people with pure apparel! yea, wake up the people:-let every saint learn his duty! make him walk in the old paths! The great day of vengeance is at hand; the destruction deereed has begun; the floods in the western states bear witness, that the "hot drops," after the prophet and patriarch were martyred under the sanction of nimble jurisprudence, fell from God-and that pestilence, plague, fire, famine, and the sword, will continue to waste this uation, until the bloody register of martyrs, with all her gorgeous monuments of Phantasmagoria; and all gilded tombs over the dust of fallen greatuess: and all her unfaithful servants, buekramed in pseudo eclat and Anakimed fame, are known only by an epitaph written by the destroying angel in their ashes-TIS FINISHED! while all holy hosts of earth ard heaven will shout-amen! ames!! AMEN!!!

But to the text-pay your tithing, for the hands on the public works, as they had to thile raising the Temple at Nauvo live by eating:-and where is the saint that can swallow down his lexuries-his hutter-his cheese-his eggs-his chickens, and expeet God to bless him, while the voice of the mechanic, and common laborer, goes up-O Lord, our Father, we cannot lahor and live ou air! Beware! O ye greedr and covetous, lest you hear the servants of cod, or his angels, exclaiming, Wo unto you rich men: Wo unto ye worshippers of the ciod of this work, and wo unto ye selfish! It will be the end of your folly, to hear this sentence: "The harvest is over, the summer is past, and your souls are not saved!

And ye traders at the stores who help to swell the coffers of Japheth, two or three hundrod dollars per week, or two or three hundred thous'nd a year, what suppose re the Lord thinks of your righteousness? You need not wait thll the day of judgment to learn whether your "pearls are cast hefore swine:" - like lambs for the slaughter, you lick the hand that holds at knife to lix your iesh tor the market of Baal. Yes! yes! you forget your tithing and ouber sacrifice to Baal.

Aul ye good sisters what do ye for the Lord? Can ye sew, knit, and minister uno the heirs of salration? Can ye? then remember the "wid0 ow's mite.

And ye waing maids and matrons, did je ever marls this reselation: Behold the heitige of the Lood! Children are the wages or tidhing of thy fruit? And that the first-bom of man, (as well as lieast) belong to the Lord to minister in the holy 'Temple? It was so in Israel.
And 0 yestints, un, up and bring in your tithing, and oferings of the first fruits, the richet and hest, and clatim the promises and hessings, for now is the time. Tea, froclaim it to the en Is of the earth, that one tenth of erersthing, togecher with an offering of the first fruits, the richest and best, in 2 igh woumess, helongs to our Father in heaven, for the use of his materials, and tor the benefit of the holy priesthood. Therefore, with one heart and on :minal, let us tithe-let us sacrifice-ant let us ofer and please nur Father in the heavens: and when the Lion of the Lowd rours, let every arint heware and watch what the game is-and where it is--for will a lion roar when he hes found nothing? will he come up from the swelling of dordan, when there is no freshet? Let the game answer-let the deep utter his voice on high. God searches all hearts.

In conclusion, let mo say, if you want any part of the world saved-if you want the cospel promulgated to the forr çuarters of the earth-if you want the veil of dar'aness rent that covers the minds of all people-if you want peace and gool order to take the place of strif and confusionif you want Israel gathered from his loug dispersion-if you want houses
built wherein all the washings, anointings, and ordinances of the holy priesthood can be administered-if you want your dead friends to have a part in the first resurrection-if you want to find faror with Ciod-if you want to come into the presence of the chureh of the first born, to the spirits of just men made perfect, to an innumerahle company of angelsif you want the veil removed that now hides the heavenly hosts from our oyes-if you want to inherit the promises made to the fathers-if you want the earth to yield her increase-if you want visits from the holy ones of heaven to instruct you in the perfection of science-if you want to reign as kings and priests to dod-if you want to inherit the blessings of Abraham, lsaace and Jacob, thrones, principalities, powers, dominions, and oternal lives-if you want your endowments as a beginning of the multiplicity of blessings that come to the pure in heart-if you want to do as God did, in order to dwell in the eternity of eternitics-pay your tithingpay your tilhing! for Christ's sake: Amen.

> The first token, of God-The Rain bow.
> The second do " " The earth divided by oceans.
> The third do "، 6 The rocks rent after the crueifixion.
> The fourth do "6 "The book of Mormon, as truth springing out of the earth.
> The fifth and last do-When the rain bow disappears-
> Then look out for the clouds of heaven "in flaming flame."

Fire in the kitchen is a servant desirable, But fire on the mountain is a tyrant most terrible. Sweet-hearts and beanty by dandies are woo'd, But love and sincerity, is much sweeter food.

Speculation among the saints, is, especially in hunting gold, like the man who had a goose that laid a gold eqg;-he killed her and cut her open, and lo! he found nothing. So it is with the wildfired Mormons; they run to the diggings-cut the goose open-and oh! the empty gizzard! No begs.

## GOOD HITS.

When an old king was asked what youth should carn? he replied, what they nced when men.

Many are wise at the table, and learned at the glass, but when they como to business, are of no more use than a sun-dial in a vault.

Receire not the favors of a mercenary man, nor join in friendship with the wicked; they shall be snares unto thy virtue, and bring grief unto thy soul.

Death settles bills gratis, for priests, doctors and lawyors.

## PARENT SCHOOL.

THE PARENT SCHOOL of the University of Deseret, continues ite terms in the 13th Ward School House, where gn apportunity offers for persons to qualify themselves for teachers in common schools, or for improvement in the oducational branches which render manpers pleasing, or life delightful.
The present terms are, for common branches, per quarter, \$500 Half in adrance.
Astronomy, Mathematics, Algebra, \&e., will be taught by Prof. Pratt, when required.

In fine, whatever qualification that tends to promote truth and wisdom for good in this world, or the world to come, will find its professors in this university.

> ORSON SPENCER, Chancellor. W. W. PHELPS, Regent.
G. S. L. City, 1852.
C. Students from a distance can be aecommodated with good boarding houses in this city, on reasonable terms.

## WANTED,

FOIR NEXT YEAR'S ALMANAC-A List of the Sehools in each precinct, or ward in the Territory; the length of time a School has been kept ia eacin School District, and the number of ehildren, male and female, between the ages of four and twenty years;-to bo sent in to the author before the first day of September next.
