15. Remarks: If fut. coal available as at present, expects all to be gone by mid-Feb.
2) Ibaraki, Iwate & Fukushima, 85% from Iwate. Av. need per mo. is 5,500 kwh per mo for last 6 mos. But receipts are now 1/2 to 1/3 less than last summer due to no fut. coal shortage, Hokkaido pulp makers started buying pulp wood in Iwate. Also other purchasers, as well as occupation. Price, ~~July~~ for mining used to be half or less than prices pd. by other businesses. (Company deal.) Now miners pay ¥350-400. Transp. from Iwate, ~~more~~ better now due to snow so can haul by sled. Also, need cheaper lumber or Joban feels they should get priority for cheap lumber. Also, need cheaper power or else coal price will have to be increased. Want cheaper power or else to use timber from Nat'l forests, or pref. or city owned. JG has not listened to pleas of miners. Price ¥2.00 per M/T. now. Low grade here. Co. says no more pulp here Gov't checked price price under controlled power. Do not plan to raise price but reduce cost. Elec power + timber costs. If remain same will need price ¥200 per M/T.

14. Management's recommendations regarding operational difficulties, if any:
Arakawa Mining Co reorganized 1 August from Mitsubishi Mining Co. President, mine manager and majority of employees ~~was~~ formerly employed by Mitsubishi. This is the largest of the two tungsten mines in Japan and produces the highest grade ore. Reserves are estimated at 10 years. Current operating expenses are around 335,000 yen.
15. Remarks:

There is no electricity at this mine. However, new owners have made necessary arrangements and electrification will be completed by 15 October. Immediate result of electrification: production increase of 20 percent; operating cost decrease of 10 percent, with future production expected to be doubled. This appears quite possible, since all drilling, transporting within mine, sorting, washing, etc are presently accomplished by hand.

This has been the first inspection by KCAR personnel, although there was one previous visit by someone from NRS/SCAP. The Tokyo Mine Safety Bureau has never inspected this mine.
