SHOLES'
DIRECTORY

OF THE
CITY OF MACON,

SEPTEMBER 1st, 1888.

A. E. SHOLES, Compiler.

VOLUME III.

DON'T LEND YOUR DIRECTORY.

Your Neighbor is as well able to Purchase
one as you are.

Price, Five Dollars.

J. W. BURKE & Co., PRINTERS, MACON, GA.

PREFATORY.

IN presenting this volume of the MACON CITY DIRECTORY to its patrons and the public, it is not claimed that the work is perfect. The previous Directories of the City were of such a character that they afforded no assistance, while the change of numbers made it impossible to dispatch for names which might be overlooked in the canvass. Experienced agents have been employed, and the utmost carefulness urged upon them, yet as the best of men make mistakes, it is quite possible that some names have been omitted which should properly have place in these pages.

As the volume contains over one thousand white names more than ever appeared in any previous Directory of the City, it is believed that the work has been well done, and that the book will give reasonable satisfaction. The next issue, with the present volume as a guide, will be more nearly complete. This book contains 9,423 names—5,932 white and 3,491 colored.

The present population of the City and immediate suburbs, is 33,737, divided as follows: 19,773 white, 13,964 colored.

The thanks of the publishers are extended to those who have encouraged the work by their support, and it is hoped that many who have stood aloof this year, probably on account of the apologies for Directories which have been foisted upon the City in the past, will, in future, aid in maintaining this important enterprise, a good Directory.

Very respectfully,

A. E. SHOLES.

KIMBALL ORGANS.

THESE ARE BEYOND ALL QUESTION THE

◆BEST◆ORGANS◆

In the Market.

New and Elegant Designs.—In general design and quality of workmanship, solidity of construction and finish, we aim at perfection.

Preparation of Material.—Great care is exercised in selecting material, and the best known methods are used in preparing it to withstand the most trying influence of climate and temperature.

Improved Stop Action.—Complete in its mechanism, which renders the action of the keys very light and easy to the player, elastic in touch, and gives the quickest response possible. It is strong and durable, and not liable to get out of repair.

Lock Board.—Our Patent Revolving Lock Board cannot catch or bind, and always works smoothly and easily.

Music Desks.—The Music Desks incline at just the right angle, and when raised show a convenient receptacle, with shelves, for music and music books.

Lamp Stands.—Abundant provision is made for placing lamps in proper position to throw the light on the music without danger of being tipped off.

Mouse-Proof.—Every instrument is constructed so as to be absolutely mouse-proof.

Bellows Stock.—By gluing together three pieces of the Bellows Board, the grain of the middle piece running crosswise, and using the best of three-ply rubber cloth, the Bellows of the KIMBALL ORGAN is made so robust as never to be likely to lose its lung power.

We have sold more of these than any Organ we have ever handled.
