# The First Principle of the Salaried Man Should be to Save

It is possible that luck may play an important part in the quick making of fortunes, but it has nothing to do with fortunes accumulated from the savings of labor.

A bank account, however, will be of assistance and the young man or woman who will take this method of saving from his or her salary will eventually reach the desired goal.

This bank welcomes the accounts of those people who are working on salary and have a desire to save a part of it.

Villain-A Bold, Bad, Wicked Solicitor.

Victim—A Glendale Housewife. Hero—Booth's Better Blend

In the year A. D. 1917 the Villain, a smooth-tongued solicitor, calls upon Mrs. Bright-eyes, a Glendale lady, and persuades her to buy some of his poor 10c coffee for 35c with a wonderful, cheap present given absolutely free, which is after-ward charged for and a bill left with the coffee. She can-not drink the coffee. It is left on the doorstep for the man to take back with the bait. She phones up the Hero, Booth, whom she had deserted for this stranger, for some of his 25c coffee, 2 lbs. for 45c, a regular out of town 40c price, and is now living contented and happy. Moral: "Don't you do it."

They All Come Back Booth is an expert on coffee and has forgotten more than a lot of those so-called coffee alers ever knew.

### THE FORMATION OF GOLD

The Indians have a theory concerning the formation of gold. It vas formed after the deluge. The deluge was about the time when the leaves of the trees were turning yel-The winds came before this flood and blew the leaves in all directions. Where the leaves lodged at the time of the deluge is where the gold is now found. The gold is found in two forms-in nuggets and leaf form. The nuggets were formed by the leaves blowing and whirling into small nuggets, as they are now found. Where the gold is found in leaf form are the places where the leaves were buried by the washing of sand and rock by the waters of the flood.
