

# *Wiki*

## *Technology and Community Culture*

*By Mingli Yuan*

*July, 2008*

*Released under GFDL*

# *Contents*

- Introduction
  - concept / history / jargons / a simple classification / organizations & companies / conferences
- Technology
  - implementations / features / principles / easy at first glance / syntax & parser / version control / wysiwyg / adventure of ideas
- Community Culture
  - openness & agf / npov / consensus / deletionism vs. inclusionism / controversy

# *Introduction – concept*

A wiki is

- web pages
- anyone who accesses it can contribute or modify content
- a simplified markup language

# *Introduction – history*

- World Wide
  - 1994:
    - Ward Cunningham, WikiWikiWeb
    - (1994?) Patrick Mueller, the first WikiWikiClone
  - 2000:
    - Sunir Shah, MeatballWiki
  - 2001:
    - January 15, Jimmy Wales, Wikipedia

# *Introduction – history cont.*

- Mainland China 
  - 2001-12-27:
    - Softme Studio / 索秘软件工作室
    - jWiki as a sub-project of WebPM
  - 2002 / 5:
    - 中蟒大杂院
  - 2002 / 10
    - Chinese Wikipedia
  - 2002 / 11
    - 贸大 Wiki
- Taiwan 
  - Schee / 徐子涵
  - hlb / 薛良斌
  - Newzilla
- Early Blogsphere 
  - Cnblog.org
  - Chinese Blogger Conference / 中文网志年会

# *Introduction – jargons*

- Basics
  - Sandbox
  - CamelCase
  - Wikify
  - RecentChanges
  - DocumentMode / TheadMode
  - Namespace: Article / Talk / User / Category
  - Signature
  - BackLinks
  - InterWiki
- Community
  - EditWar
  - AGF
  - NPOV
  - Consensus / Vote
  - Deletionist / Inclusionism
- Copyright / Copyleft
  - PD
  - GFDL / Free
  - CC family
  - Fair use

# *Introduction – a simple classification*

- Tech related sites
  - c2.com / wikiwikiweb
  - meatball / usemode
- Travel related sites
  - wikitravel
  - wikiMapia
- Other sites
  - wikiHow
  - etc. ...
- Wikimedia Family
  - wikiversity
  - wiktionary
  - wikibooks
  - wikinews
  - wikiquote
  - wikisource
  - wikispecies
  - commons

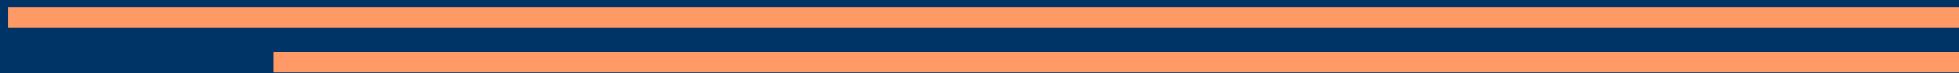

# *Introduction – a simple classification cont.*

- wiki farms
  - wikia.com
  - jotspot.com
  - pbwiki.com
  - wetpaint.com
  - wikidot.com
  - wikispace.com
- Personal wiki
  - connectedText
  - didiWiki
  - tiddlyWiki
  - tomboy
  - wikidPad
  - etc. ...

# *Introduction – organizations, companies*

- Organizations
  - Wikimedia Foundation
  - All Its Local Chapters
- Companies:
  - Wikia.com
  - Jotspot (Google)
  - SocialText
  - Etc. ...

# *Introduction – conferences*

- Wikimania
  - 2005 : Frankfurt, Germany
  - 2006 : Cambridge, Massachusetts, US
  - 2007 : Taipei, Taiwan
  - 2008 : Alexandria, Egypt
  - 2009 : Buenos Aires, Argentina
- WikiSym
  - 2005 : San Diego, CA, US
  - 2006 : Odense, Denmark
  - 2007 : Montreal, Canada
  - 2008 : Porto, Portugal
- RecentChangesCamp
  - 2006 : Portland, OR, US
  - 2007 : Portland, OR, US
  - 2008 : Palo Alto, CA, US

# *Technology – implementations*

- Java :
  - clearspace / confluence / jamwiki / jspwiki / snipsnap / xwiki
- Javascript :
  - tiddlywiki
- Perl :
  - ikiwiki / socialtext / twiki / usemod
- Php :
  - mediawiki / dokuwiki / wakkawiki / pmwiki
- Python :
  - moinmoin / trac
- Ruby :
  - instiki
- Smalltalk :
  - swiki

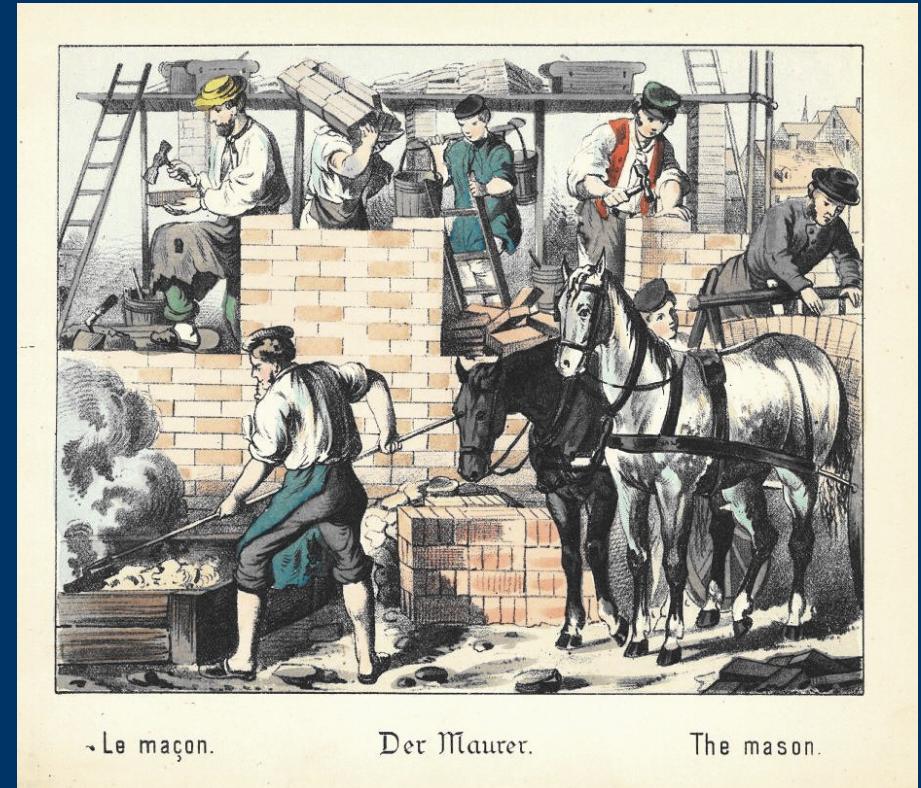

*Add your own implementation here .....*

# *Technology – features*

- Architectural choices :
  - Wiki syntax
  - Web-server
  - Data backend
  - Version control
- Basic features :
  - RecentChanges
  - BackLinks
  - Interwiki
  - Diff
  - Edit Conflict Resolution
- Other features :
  - Images / File uploading
  - Namespace
  - Category
  - Template
  - Page access control
  - Spam prevention
  - WYSIWYG editing
  - Extensibility
  - Etc. ...

# *Technology – principles*

- open: almost editable
  - just click “edit”
- generative
  - click red link on any page to create a new page
- self-organized
  - hyper links / category tree
- observable
  - time-based
  - space-based

# *Technology – easy at first glance*

- A unified and simple data model
  - page have links;
  - page have revisions;
  - no other structure above pages.
- Basic operations
  - view : raw to html
  - edit : load raw text
  - save : save raw text
  - delete

# *Technology – syntax & parser*

- Lightweight markup
  - Textile
  - Markdown
  - reStructuredText
  - Etc. ...
- Mediawiki markup
  - Powerful
  - Complex
  - Very hard to parse
- WikiCreole
  - WikiSym 2006
  - As an endeavor for markup standardization
- Wiki Model
  - Wiki Event Model
    - SAX-like
  - Wiki Object Model
    - DOM-like

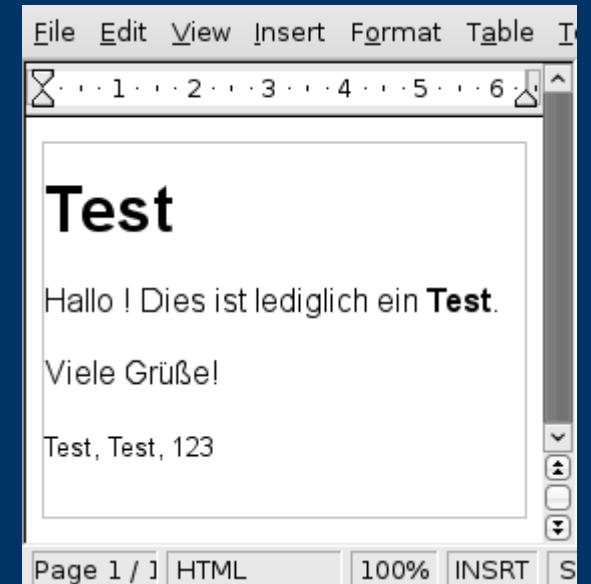

# *Technology – version control*

- Develop this feature :
  - Storage Model
  - Editing Conflict Resolution
  - Diff
  - Merge
- Leverage it
  - CVS
  - SVN
  - Mercury
  - Git

# *Technology – wysiwyg*

- Many small wiki implements this feature
- The Wysiwyg Editor for Mediawiki is still in vapour.
- Two approaches
  - Editor → Wikitext
  - Editor → HTML → Wikitext

# *Technology – adventure of ideas*

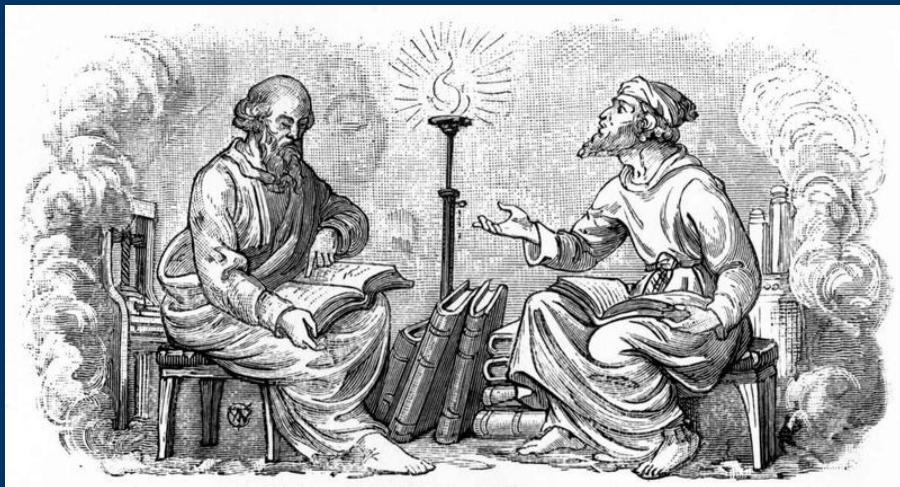

- Semantic Wiki
- Git Wiki / Mercury Wiki
- Jabber Wiki
- P2P Wiki
- Another wildest idea from you? Try it!
- Question
  - How people cooperate together?

# *Community culture – openness & assume good faith*

- Openness
  - Ability of anyone to edit articles without registering
- “It is impossible!”
  - The first reply when people get to know the idea of wiki
  - But the existence and growth of wikipedia prove that most people are in good faith.
- Conflict resolution
  - AGF is an good advice for both side
  - Humor: Assume the assumption of good faith

# *Community culture – npov*

- A nature question:
  - how to handle controversial topics?
    - Creation-evolution controversy
    - Abortion
- Neutral point of view
  - Multiple or conflicting perspectives exist within a topic each should be presented fairly.
  - Let the facts speak for themselves.
  - Describing points of view.
  - Freedom of expression.
- A dialog open for every parts which is never finished

# *Community culture – consensus*

- Wiki process
  - Before consensus
  - Loop: edit / revert / discuss
  - Reach consensus
- Consensus is Wikipedia's fundamental model for editorial decision-making.

# *Community culture – deletionism / inclusionism*

- Please keep a sense of humor
- Deletionism :
  - a philosophy held by some Wikipedians that favors clear and relatively rigorous standards for accepting articles to the encyclopedia.
- Inclusionism :
  - a philosophy that information should be liberally added and retained on Wikipedia.
- Notability criteria for articles to be accepted
- Examples :
  - Small villages
  - Books / Films / Songs

# *Community culture – controversy*

- 2007
  - Essjay controversy
  - Microsoft OOXML controversy
  - Wikiscanner
- All the controversy focus on creditability, trust, and neutrality.
- People should learn how to use Wikipedia and contribute to it properly.

*Thanks*
