**SPIRITUS LUMBRICORUM, Liquor volatilis cornu cervi.**

**SPIRITUS MENTHÆ PIPERITÆ, Tinctura O'lei Menthæ Piperitæ, Sp. Menthæ piperitidis, A'qua Menthæ piperitidis spirituosæ, Spirit of Peppermint, Tincture of Oil of Peppermint, Essence of Mint, (F.) Esprit de Menthe poivrée. (Olei menth. pip. ℥viss, Alcohol. fort. Oivss, Aquæ q. s. Distil a gallon;—or, Ol. menth. piperit. f℥ij, Alcohol. Oj. Dissolve. Ph. U. S., 1851.)**

The *Spiritus Menthæ Piperitæ* (Ph. U. S., 1863) is a slightly modified form. (Ol. menth. pip. f℥j, *Menthæ piperit.* in pulv. crass. gr. exx, *Alcohol. fort.* ℥xv. Dissolve the foil in the alcohol; add the peppermint; macerate for 24 hours, and filter. Dose, gtt. v—xx, as a carminative.

**SPIRITUS MENTHÆ SATIVÆ, Spiritus menthæ viridis.**

**SPIRITUS MENTHÆ VIRIDIS, Tinctura O'lei Menthæ viridis, Spiritus menthæ sativæ, A'qua Menthæ vulgaris spirituosæ, Spirit of Spearmint, Tincture of Oil of Spearmint, Essence of Spearmint, (F.) Esprit de Menthe vert.**

The *Spiritus Menthæ Viridis* (Ph. U. S., 1863) is made like the *Spiritus menthæ piperitæ*, and has the same properties and dose.

**SPIRITUS MILLEPEDARUM, Liquor cornu cervi—s. Mindereri, Liquor Ammonia acetatis—s. Muriaticus æthereus, Spiritus Ætheris muriatici.**

**SPIRITUS MYR'CIÆ, Spirit of Myr'cia, Bay rum. A spirit obtained by distilling rum with the leaves of *Myr'cia acris*, *Engelmia* seu *Myrtus acris*, *M. Caryophyllata*, *Bay'berry Tree*. Order, Myrtaceæ, of the West Indies. Used externally like Cologne water, and in cases where whisky would be applied.**

**SPIRITUS MYRIS'TICÆ, Sp. Myr'sticæ Moschatæ seu Nucis Moschatæ, A'qua Nucis Moschatæ seu Nephrit'cia, Nutmeg Water, (F.) Esprit de Muscade. (Myrist. cont. ℥ij, Alcohol. dil. cong., Aquæ Oj. Distil a gallon.) Cordial and carminative. Dose, f℥j to f℥ij.**

**SPIRITUS MYRTI PIMENTÆ, Spiritus pimentæ—s. Nitri acidus, Nitric acid—s. Nitri dulcis, Spiritus ætheris nitrici—s. Nitri duplex, Nitric acid—s. Nitri fumans, Nitric acid—s. Nitri Glauberi, Nitric acid—s. Nitri simplex, see Nitric acid—s. Nitri vulgaris, see Nitric acid—s. Nucis moschatæ, Spiritus myr'sticæ—s. Olcosoaromaticus Sylvii, Spiritus ammoniæ aromaticus—s. Ophthalmicus Mindereri, Liquor ammoniæ acetatis.**

**SPIRITUS PIMENTÆ, Sp. Myr'ti Pimentæ seu Piment'o, A'qua Mirab'ilis, Spirit of Piment'o. (Ol. Piment. f℥ij, Alcohol. dilut. cong. Solve. Ph. U. S.) Cordial and carminative. Dose, f℥j, and more.**

**SPIRITUS PULE'GIJ, A'qua Pule'gij spirituosæ, Spirit of Pennyroyal, Spirituosus Pennyroyal Water, (F.) Esprit de Ponirot. (Olei pulegij ℥vij, Sp. rect. Oivss, Aquæ q. s. Distil a gallon.**

Ph. L.) Same as spirit of spearmint in properties and dose.

SPIRITUS PYROACETICUS, Acetone.

SPIRITUS PYROXYLICUS, *Pyroxylic spirit*, *Wood spirit*, *Wood alcohol*, *Pyroxylic alcohol*, *Methylic alcohol*, *Hydrated oxide of methyle*, *Bihydrate of Methylene*, (F.) *Espirit pyroxylique*, *Espirit de bois*. This substance is by some supposed to have been the article given in phthisis by Dr. Hastings, under the names *Naphtha* and *Wood Naphtha*. It was probably, however, the *Pyroacetic spirit*. See Acetone. When wood is subjected to destructive distillation, about one per cent. of an inflammable volatile liquid, along with other products, passes over, which, when separated and purified, constitutes pyroxylic spirit. It is given in the same cases and doses as Acetone.

SPIRITUS RAPHANI COMPOSITUS, *Spiritus aromaticus compositus*.

SPIRITUS RECTIFICATUS, *Sp. Vini rectificatus* seu *vinosus rectificatus*, *Enostagma*, *Enelc'm*, *Pyra'mus*, *Alcohol*, *A. Vini*, *Spirit of Wine*, (F.) *Espirit de Vin rectifié*. Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally, although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—S. g., according to the British Pharmacopœia, 0·838; according to that of Dublin, 0·840; of Edinburgh and United States, 0·835 (see Alcohol), and of Paris, 0·819 to 0·827.

SPIRITUS RECTOR, *Aroma*—s. *Roriferus*, *Gaz sanguinis*.

SPIRITUS ROSMARI'NI, *Sp. Rosmari'ni officinalis*, *Sp. Anthos*, *Aqua Hungarica* seu *Regi'ne Hungar'ie*, *Spir'it of Rose'mary*, *Hun'gary Water*, (F.) *Espirit de Romarin*. (*Ol. rosmarini* f 3iv, *Alcohol*, cong. Solve. Ph. U. S.) Stimulant. Dose, f ʒiv.

SPIRITUS SALIS ACIDUS seu FUMANS, *Muriaticum acidum*—s. *Salis ammoniaci*, *Spiritus ammoniaci*—s. *Salis ammoniaci aqueosus*, *Liquor ammoniaci*—s. *Salis ammoniaci lactescens seu lacteus*, *Spiritus ammoniaci succinatus*—s. *Salis ammoniaci sulphuratus*, *Ammoniaci sulphuretum*—s. *Salis dulcis*, *Spiritus ætheris muriatici*—s. *Salis Glauberi*, *Muriaticum acidum*—s. *Salis marini*, *Muriaticum acidum*—s. *Salis marini coagulatus*, *Potasse murias*—s. *Salis volatilis oleosus*, *Spiritus ammoniaci aromaticus*—s. *Sulphuricoæthereus camphoratus*, *Tinctura ætherea composita*—s. *Sulphuricoæthereus martialis*, *Tinctura seu Alcohol sulphuricoæthereus ferri*—s. *Sulphuris*, *Sulphuric acid*, *Sulphurous acid*—s. *Sulphuris per campanam*, *Sulphurous acid*—s. *Sulphuris volatilis*, *Ammoniaci sulphuretum*—s. *Sulphurous volatilis*, *Sulphurous acid*.

SPIRITUS TENUIOR, *Alcohol dilu'tum*, *Spir'itus vinosus tenuior*, *Proof Spirit*, (F.) *Espirit de vin délayé*. (Generally made for pharmaceutical purposes by mixing equal parts of *rectified spirit* and *distilled water*.) S. g. Ph. B., 0·920; Edinb., 0·935; U. S., 0·941. It is employed in the same cases as those in which alcohol is used:—chiefly, as a solvent of vegetable matters, in the form of tinctures.

SPIRITUS VENERIS, *Aceticum acidum*—s. *Vini Gallici*, *Brandy*—s. *Vini rectificatus*, *Spiritus rectificatus*—s. *Vinosus camphoratus*, *Spiritus camphoræ*—s. *Vinosus tenuior*, *Spiritus tenuior*—s. *Vitalis*, *Nervous fluid*—s. *Vitrioli*, *Sulphuric acid*—s. *Vitrioli acidus Vogleri*, *Sulphuricum acidum dilutum*—s. *Vitrioli coagulatus Mynsichti*, *Potasse sulphas*—s. *Vitrioli dulcis*, *Spiritus ætheris sulphurici*—s. *Vitrioli phlogisticatus*, *Sulphurous acid*—s. *Volatilis aromaticus*, *Spiritus ammoniaci aromaticus*—s. *Volatilis fetidus*, *Spiritus ammoniaci fetidus*.

SPIROCOLON, *Spyrocolon*, *Or'chida*, *Franzo*. A syphilitic affection, first known in Greece, during the war of freedom from 1820 to 1825.

SPIROID CANAL, (σπειρα, 'a winding,' and εὐδῶ, 'resemblance,') *Aquæductus Fallopii*.

SPIROM'ETER, *Pulmom'eter*, (*spiro*, 'I breathe,' and μετρον, 'a measure,') properly *Anapnom'eter*, *Pneom'eter*, *Pneusom'eter*, *Pneumom'eter*, *Pneumatom'eter*, *Pneumonom'eter*. Any instrument for measuring the quantity of air concerned in respiration, and consequently the capacity of the lungs. This mode of measurement has been called *Spirom'etry* and *Pneom'etry*, as it was formerly called *Pulmom'etry*. The term spirometer is now usually applied to a kind of gaseometer introduced by Dr. Hutchinson to estimate the quantity of air contained in, or, rather, expelled from the lungs under different circumstances.

SPIROPTERA HOMINIS, (σπειρα, 'a spire,' and πτερον, 'a wing,') see Worms.

SPISSANTIA, (*spissare*, 'to thicken,') *Incrassantia*.

SPIT, ([Sax.] sprætan, sprittan, 'to spit,') *Sputum*.

SPI TAL, *Hospital*.

SPI TAL, MIN'ERAL WA'TERS OF. The village of Spital is situated on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPI TH'AMA, (σπίδαμη, *Do'drans*. A measure of twelve fingers' breadth, or about nine inches.

SPITTING, (see Spit,) *Expuition*.

SPITTLE, *Hospital*; *Saliva*, ([Sax.] sprætl,)—s. *Sweet*, see *Salivation*.

SPLANCHNA, (σπλαγχνα, pl. of σπλαγχνος,) *Entails*.

SPLANCHNECTOP'IA, *Splanchnodias'tasis*, *Situs perver'sus* seu *anom'alus intestino'rum*, (*splanchna*, εκ, 'out of,' and τοπος, 'place,') *Misplacement* or *ectopia* of the intestines.

SPLANCHNELMINTHA, (*splanchna*, and ελμινος, gen. ελμινος, 'a worm,') *Worms*.

SPLANCHNEURYS'MA, (*splanchna*, and ευρυνω, 'I dilate,') *Morbid dilatation* of the intestines.

SPLANCHNIC, *Splanchnicus*, (σπλαγχνικός,) *Visceral*, (F.) *Splanchnique*, (from *splanchna*.) *Relating* or *belonging* to the viscera.

SPLANCHNIC CAVITIES are the three great cavities of the body;—those of the cranium, chest, and abdomen.

SPLANCHNIC NERVES belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. *The great splanchnic nerve*, (F.) *Grand splanchnal*, (Ch.) Its roots—four or five in number—come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. *The lesser splanchnic nerve*, *Re'nal nerve*, (F.) *Splanchnique accessoire* of Walther, *Petit splanchnal* (Ch.), is composed of two distinct nerves, proceeding from the 10th and 11th thoracic ganglia, which unite on the 12th dorsal vertebra into a cord that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

SPLANCHNICA. Medicines adapted to diseases of the bowels. Also, the 2d order of the class

*Cæliaca* of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, (*splanchna*, and *διαστασις*, 'displacement.') Splanchnectopia.

SPLANCHNODYNĒ, (*splanchna*, and *δύνη*, 'pain.')

Pain in the bowels.

SPLANCHNOGRAPHIA, Splanchnography.

SPLANCHNOGRAPHY, *Splanchnographi'a*, (*splanchna*, and *γραφη*, 'a description.')

The part of anatomy which treats of the viscera.

SPLANCHNOLITHIASIS, (*splanchna*, and *λίθος*, 'a stone.')

The formation of a calculous concretion in any viscus.

SPLANCHNOLOGY, *Splanchnologi'a*, (*splanchna*, and *λογία*, 'a discourse.')

A treatise on the viscera; also, Splanchnography.

SPLANCHNON, (*σπλαγχνον*), sing. of *Splanchna*.

SPLANCHNOPATHY'A, (*splanchna*, and *πάθος*, 'suffering.')

A disease of the intestines.

SPLANCHNOSCLEROSIS, (*splanchnon*, and *σκληρος*, 'hard.')

Induration of a viscus.

SPLANCHNOTOMY, *Splanchnotomi'a*, *Splanchnotomē*, (*splanchna*, and *τομή*, 'I cut.')

Dissection or anatomy of the viscera.

SPLATFOOT, see *Kyllosis*.

SPLAYFOOT, (from *splay*, 'spread.')

See *Kyllosis*.

SPLEEN, (*σπλην*), *Lien*, *He'par sinistrum* seu *adulteri'um*, *Fo'mes ventriculi*, *Milt*, (Sc.) *Melt*, (F.) *Rate*.

A soft, spongy, parenchymatous organ, of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is  $4\frac{1}{2}$  inches; its thickness 2; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations—*splenic corpuscles* or *Malpighian bodies* of the spleen. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations—*trabeculæ*. At its inner edge is a fissure—*Hilus* seu *Por'ta lie'nis*, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. The best opinion is, that it appertains to hæmatisis, and acts, also, as a diverticulum to the vascular system.

SPLEEN, Hypochondriasis—s. Malpighian, bodies of the, see Spleen—s. Supernumerary, *Lienculus*.

SPLEENWORT, *Asplenium*, *A. filix fœmina*, *Asplenium scolopendrium*—s. Bush, *Comptonia asplenifolia*.

SPLEN, gen. *Sple'nis*, (*σπλην*), *Splen*.

SPLENALGIA, *Neuralgia lie'nis*, *Sple'nicæ*, *Splenodyn'ia*, (*splen*, and *άλγος*, 'pain.')

Pain in the spleen.

SPLENALGIA BENGALENSIS, see *Cachexia splenic*—s. *Phlegmonoda*, *Splenitis*—s. *Subinflammatoria chronica*, *Splenoncus*.

SPLENATROPH'IA, *Atroph'ia Lie'nis*, (*splen*, and *ατροφία*, 'atrophy.')

Wasting or atrophy of the spleen.

SPLENAUXE, (*splen*, and *αυξη*, 'increase.')

*Splenoncus*.

SPLENECTAMA, gen. *Splenectam'atis*, *Splenoparectama*.

SPLENECTASIS, (*splen*, and *εκτασις*, 'dilatation.')

*Splenoparectama*.

SPLENECTOMY'A, *Splenc'tomē*, (*splen*, and *εκ*, 'out of; and *τομή*, 'I cut.')

Extirpation of the spleen.

SPLENECTOP'IA, *Dislocatio* seu *Ectop'ia lie'nis* seu *sple'nis*, *Anomosplēnotopie*, (*splen*, and

*εκτοπος*, (*εκ*, and *τοπος*,) 'out of place.')

Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAX'IS, *Splēnophrax'ia*, (*splen*, and *εμφρασσα*, 'I obstruct.')

Obstruction of the spleen. See *Splenoncus*.

SPLENES, (pl. of *splen*), *Hypochondriasis*.

SPLENETICUS, *Sple'nicus*, *Splēniticus*, *Lieno'sius*, (F.) *Rotelenæ*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLE'NIC, *Sple'nicus*, *Sple'nius*, (F.) *Splēnique*, (from *splen*.) That which relates to the spleen.

SPLENIC ARTERY. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

SPLENIC CACHEXIA, see *Cachexia splenicæ*—s. *Corpuscles*, see *Splen*.

SPLENIC PLEX'US is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

SPLENIC VEIN, *Vena sple'nicæ*, *V. lienal'is*, arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the *vasa brevia*, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENICA, *Splenalgia*. Also, medicines which affect the spleen.

SPLENICUS, (*σπληνικός*), *Splēneticus*, *Splenic*.

SPLENIFICATION, (*splen*, and *σίο*, 'to become,')

*Splēnization*.

SPLENIOLA, (dim. of *splen*), *Compress*.

SPLÉNIQUE, *Splenic*.

SPLENIS TUMOR, 'tumor of the spleen,'

*Ague cake*.

SPLÉNISATION, *Splēnization*.

SPLENISCUS, (*σπληνικός*), *Compress*.

SPLENISIS, (from *splen*), *Splēnization*.

SPLENITICUS, *Splenic*.

SPLENITIS, (*splen*, and *ίτις*), *Inflammation* of the spleen. *Empres'ma splēnitis*, *Inflamma'tio lie'nis*, *I. sple'nis*, *Splēn'gia phlegmono'dæ*, *Lienit'is*, (F.) *Splēnite*, *Inflammation of the Rate*. A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It generally affects the capsule—*Epiplēnit'is*, *Perisplēnit'is*—and must be treated like other inflammations.

SPLENIUM, (*σπληνιον*), *Compress*—s. *Corporis callosi*, see *Corpus callosum*—s. *Cruciatum*, *Crucic de Malte*.

SPLENIUS, *S. Cap'itis seu Col'li*, (F.) *Cervicodorso-mastoidien et dorso-trachelien*, *Cervico-mastoidien* (Ch.), *Posterior mastoid muscle*. So called from its resemblance to the spleen of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebrae; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebrae, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two parts, which they have called *Splēnius colli*, and *Splēnius cap'itis*. The splenius extends the head, inclines it, and

rotates it. If the splenii of each side act together, they turn the head.

**SPLENIZ'ATION**, *Spleniza'tio*, *Splenificatio*, *Splenificatio*, (F.) *Splénisation*, (from *splen*.) A term applied to the state of the lung in the first or second stage of pneumonia, in which its tissue resembles that of the spleen. To a conversion of the lung into a spleen-like substance in the yellow fever of Gibraltar, the term *splenisis*, (F.) *Splénis* was given by Louis and others.

**SPLENOCE'LE**, *Hernia liena'lis*, (*splen*, and *κηλη*, 'a tumour.') Hernia formed by the spleen.

**SPLENODES**, (*splen*, and *odes*.) Splenoid.

**SPLENODYNIA**, (*splen*, and *δύνη*, 'pain,') Splenalgia.

**SPLENOG'RAPHY**, *Splenog'raphia*, (*splen*, and *γραφη*, 'a description.') A description of the spleen.

**SPLENOHÆ'MIA**, (F.) *Splénohémie*, (*splen*, and *αίμα*, 'blood.') Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

**SPLENOID**, *Spleno'idés*, *Spleno'des*, (*σπληνοειδής*, from *splen*, and *εἶδος*, 'resemblance,') Spleenlike. Having the appearance of the spleen.

**SPLENOLOG'Y**, *Splenolog'ia*, (*splen*, and *λογος*, 'a discourse.') A treatise on the spleen.

**SPLENOMALA'CIA**, *Lienomala'cia*, (*splen*, and *μαλακος*, 'soft.') Morbid softening of the spleen.

**SPLENONCIE**, Splenoncus.

**SPLENON'CUS**, *Megalosple'nia*, *Hypertroph'ia* seu *Superunit'io sple'nis* seu *li'e'nis*, *Intumescentia* seu *Infarctus* seu *Phycos'nia li'e'nis*, *Splenal'gia subinflammata'ria chron'ica*, *Splenemphrax'is*, *Splénoc'ie*, *Hypersplenotroph'ia*, *L'eu in'genis*, (F.) *Splénocie*, *Hypertrophie de la Rate*, (*splen*, and *σκος*, 'a tumour,') Tumefaction of the spleen. See *Azue cake*.

**SPLENOPAREC'TAMA**, gen. *Sple'nioparectam'atis*, *Splene'ctama*, *Splenoparec'tasis*, *Splene'ctosis*, (*splen*, and *παρεταμα*, 'excessive volume,') Excessive enlargement of the spleen.

**SPLENOPAREXTASIS**, Splenoparectama.

**SPLENOPHRAXIA**, (*splen*, and *φρασσα*, 'to shut up,') Splenemphraxis.

**SPLENORRHAG'IA**, (*splen*, and *ῥαγη*, 'a bursting forth,') Hemorrhage from the spleen.

**SPLENOSCIR'RHUS**, (*splen*, and *σκιρῆσις*, 'hardness,') Scirrhus or cancer of the spleen.

**SPLENOT'OMY**, *Splenotom'ia*, *Splenot'omē*, (*splen*, and *τεμνω*, 'I cut,') Dissection of the spleen.

**SPLINT**, ([D.] Splinter, from *splijten*, 'to split,') *Hastel'la*, *Ass'ula*, *Asser'culum*, *Plat'igula*, *Nar'thes*, *Fer'ula*, (F.) *Attelle*, *Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

**SPLINTER**, (F.) *Esquille*, (same etymon.) This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation, until it is removed. — *Aculeus ligneus*, (F.) *Écharde*.

It is also applied to fragments that separate from a fractured or diseased bone.

**SPLIT'CLOTH**, *Lint'um scis'sim*. A bandage for the head, consisting of a central part, and six or eight tails. The single split cloth has four tails. It is regarded as the most convenient bandage for the head, face, and jaws.

**SPLITROCK**, *Heuchera cortusa*.

**SPOAT**, (like *spit*.) Saliva.

**SPODIUM GRÆCORUM** (*σποδίου*, 'dross,') *Album græcum*.

**SPOLIARUM**, (*spolio*, 'to deprive of covering,') *Apodyterium*.

**SPO'LIATIVE**, *Spoliat'iva*, (*spoliare*, *spoliatum*, 'to take away,') (F.) *Spoliatif*.

*Phlebotom'ia spoliati'va*, (F.) *Saignée spoliative*. Bloodletting, used for the purpose of diminishing the mass of blood.

**SPOLIATORIUM**, (*spolio*, 'to deprive of covering,') *Apodyterium*.

**SPONDLES**, (from *spondylus*.) Vertebrae.

**SPONDYLAL'GIA**, *Spondylodyni'ia*, (*spondylus*, and *αλγος*, 'pain,') Pain in the vertebrae. *Caecorrhachitis*. See *Vertebral Disease*.

**SPONDYLARTHITIS**, (*spondylus*, *arthron*, 'a joint, and *itis*.) Gouty or rheumatic inflammation of the spinal column.

**SPONDYLARTHROCA'CE**, (*spondylus*, *arthron*, 'a joint, and *κακος*, 'evil,') Vertebral disease.

**SPONDYLI**, (*σπονδυλοι*.) Vertebrae.

**SPONDYLITHE'SIS**, (*spondylus*, and *ολισθησις*, 'a slipping or sliding,') Dislocation of the vertebrae, as of the last lumbar vertebrae forwards on the sacrum.

**SPONDYLITIS**, *Inflamma'tio ver'tebrae*, (*spondylus*, and *itis*.) Inflammation of the vertebrae.

**SPONDYLIUM**, (*σπονδυλιον*.) *Heraclium spondylium*.

**SPONDYLOCA'CE**, (*spondylus*, and *κακος*, 'evil,') Vertebral disease.

**SPONDYLODYNIA**, (*spondylus*, and *δύνη*, 'pain,') Spondylalgia.

**SPONDYLOPATHIA**, (*spondylus*, and *παθος*, 'a disease,') A disease of the vertebral column.

**SPONDYLOPYOSIS**, (*spondylus*, and *πυωσις*, 'suppuration,') Vertebral disease.

**SPOND'YLUS**, (*σπονδυλος*.) A vertebra. Also, the vertex.

**SPONGE**, *Spongia*—s. *Bastard*, *Alcyonium*—s. *Prepared*, see *Spongia*—s. *Tent*, see *Spongia*.

**SPONGI**, (from *σπγγος*.) The tumefied glands of the neck.

**SPONG'IA**, (*σπγγια*), *S. officina'lis* seu *mari'na*, *Spon'gus*, *Sphon'gus*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the *Class* *Porifera*, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed and of thus increasing in size. It is employed in surgery for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Spongia cera'ta*, *Waxed*, *Cerated* or *Prepared Sponge* or *Sponge Tent*.

**SPONGIA ASSA**, *S. Usta*—s. *Cerata*, see *Spongia*—s. *Cynosbati*, *Bedegar*.

**SPONGIA US'TA**, *S. As'sa*, *Car'bo spon'giæ*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. (It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U.S.) Dose, ʒj to ʒiij.

**SPONGLE LA'PIS**. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

**SPONGIEUX**, see *Spongoid*.

**SPONGIFORM**, (*spongia*, and *forma*, 'form,') *Spongoid*.

**SPONGIODES**, *Spongoid*.

**SPONGIOLE** (F.), *Spongiolum*, *Spong'ola*, *Spongelet*, (from *σπγγιον*, 'a small sponge,') The soft succulent extremity of the fibrils or true roots

of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPON'GION, (σπογγιον.) Ancient name of an epithem made of goats' dung: and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.

SPON'GIOPILIN, *Spon'giopile*, (*spongia*, 'sponge,' and *pilus*, 'a hair.')

A fabric composed of sponge and wool, felted together in three layers, and coated, on one of its surfaces, with caoutchouc, which renders it impermeable. It is of great service as a cataplasm, fomentation, vehicle for lotions, liniments, &c.

SPONGIOSUM (OS), Ethmoid bone.

SPONGIOSUS, Spongioid.

SPONGODES, (*spongia*, and *odes*.) Spongioid.

SPONGOID, *Spongoi'des*, *Spongo'des*, (F.) *Spongoïde*, (σπογγοειδής, σπογγωδής, from *spongia*, and *oidēs*, 'resemblance.')

Resembling sponge. Of the nature of sponge, *spongy*, *spongio'us*, (F.) *Spongiens*.

SPONGOID INFLAMMATION, Hæmatodes fungus.

SPONGOID TISSUE, (F.) *Tissu Spongoïde*. An adventitious spongy tissue found in cases of rickets.

SPONGOS, (σπογγος,) Tonsil.

SPONGY, Spongioid—s. Tissue, see Bone.

SPONSA SOLIS, 'spouse of the sun,' Calendula officinalis.

SPONTA'NEOUS, *Sponta'neus*, (F.) *Spontanée*, (from *sponte*, 'voluntarily.')

That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Sponta'neous las'situde* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Sponta'neous Amputa'tion* is the separation of a limb from the fœtus in utero.

SPONTANEOUS EVOLUTION, see Evolution—s. Version, Evolution, spontaneous.

SPONTÉPARITÉ, (*sponte*, 'voluntarily,' and *pario*, 'to bring forth,')

Generation, spontaneous. SPOON, (from its hollowness,) Umbilicus.

SPOONWOOD, *Kalmia latifolia*, *Tilia Americana*.

SPORAD'IC, *Sporad'icus*, (F.) *Sporadique*, (σποραδικός, 'scattered,' from *σπέρω*, 'I sow.')

An epithet for diseases, *Spor'ades*, *Morbi sporad'ici*, *disper'si seu spar'si*, (F.) *Maladies sporadiques*, which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

SPORE, *Spor'ule*, *Spor'ulum*, *Sporus*, (σπορος, from *σπέρω*, 'I sow.')

The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

SPORID'IUM, (from *sporus*.) The reproductive body in algaceous plants, which resembles the spore of other plants.

SPORULE, Spore.

SPORUM, Spore.

SPORUS, Spore.

SPOT OF SÖMMERING, see Foramen centrale, &c.

SPOTS, CEREBRAL, see *Tache cérébrale*—s. Germinal, see *Molecule*—s. Meningitic, see *Tache cérébrale*.

SPOTS, RED, (F.) *Taches rouges*, *Rose spots*, *Rose'ole* seu *Pap'ulæ typho'sæ*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, Spots, red.

SPRAIN, (corrupted from *strain* [?]), *Subluxa'tio*, *Distor'tio*, *Dias'trophê*, *Diastrem'ma*, *Luxa'tio*

*imperfecta*, *Strem'ma*, *Thlas'ma Strem'ma*, *Wriech*, (Sc.) *Wramp*, (Prov.) *Wrick*, *Keuch*, *Keak*, (F.) *Détorse*, *Entorse*, *Foulure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured.

This affection, which has been regarded as incomplete luxation, occurs, particularly, in the giuglymoid joints;—as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support until the parts affected recover their due tone.

SPRAT, YELLOWBILLED, *Clupea thyrssa*.

SPRAYCURE. A variety of the *douche*, which consists in the application of water in the form of spray.

SPRUCE, (from Prussia [?],) see *Pinus abies*.

SPRUCE BEER, *White Spruce Beer*. A beer made as follows: To 10 gallons of water, add 8 pounds of sugar, and 4 oz. of essence of spruce. Add yeast; and bottle, when ready. It is grateful and antiscorbatic.

SPRUCE BEER. POW'DERS may be formed of white sugar, ʒj, and ʒij; *sodæ subcarb.*, gr. xxvj; *essence of spruce*, gr. x, in each blue paper; and acid of tartar, ʒss in each white paper. For half a pint of water.

SPUITIO, (*spuere*, *sputum*, 'to spit,')

Expuition.

SPUMA ARGENTI, 'froth of silver,' *Plumbi oxydum semivitreum*—s. *Cerevisiæ*, *Yest*—s. *Trium draconum*, *Antimonium muriatum*.

SPUMEUX, Frothy.

SPUMOSUS, (from *spuma*), Frothy.

SPUNK, (Gael. *spung*, 'tinder,')

*Boleus igniarius*.

SPUR, (Sax. *rpun*.) (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURBLIND, (Purblind,) Myopic.

SPURGE, CAPER, (*Épurge*, [old F.] *Espurge*, from *es*, and *purgare*, 'to purge,')

*Euphorbia lathyris*—s. *Cypress*, *Euphorbia Cyparissias*—s. *Flax*, *Daphne gnidium*—s. Flowering, large, *Euphorbia corollata*—s. Garden, *Euphorbia lathyris*—s. Greater, *Euphorbia palustris*—s. *Ipecacuanha*, *Euphorbia ipecacuanha*.

SPURGE LAUREL, *Daphne laureola*.

SPURGE MARSH, *Euphorbia palustris*.

SPURGE OLIVE, *Cneorum tricocum*, *Daphne mezereum*.

SPURGE, PETTY, *Euphorbia peplus*—s. Sea, *Euphorbia paralias*—s. Spotted, *Euphorbia maculata*—s. Sun, *Euphorbia helioscopia*—s. Wartwort, *Euphorbia helioscopia*.

SPUTA, PRUNE JUICE, (pl. of *sputum*,) see *Prune Juice*.

SPUTAMEN, (*sputare*, *sputatum*, 'to spit,')

Saliva, *Sputum*.

SPUTAMENTUM, Saliva, *Sputum*.

SPUTATIO, Expuition.

SPUTATION, Expuition.

SPUTATORIUS, Expectant.

S P U ' T U M, *Apochrem'ma*, *Anachremptum*, *Chrem'ma*, *Emptys'ma*, *Sputa'men*, *Pty'cton*, *Ptyis'ma*, *Pty's'ma*, *Spit*, (*spuere*, *sputum*, 'to spit.')

(F.) *Crachot*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and

often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *ern'ginous*, when of a greenishyellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mons-eous*, when covered with froth; *rubig'ginous*, (F.) *rubiginous* or *rouillés*, when of a reddishyellow; and *streaked*, (F.) *striés*, when mixed with lines of blood. Also, saliva.

SPUTUM CRUENTUM, Hæmoptysis—s. Dulce, Sæcharorrhœa pulmonalis—s. Oris, Salivation—s. Sæcharatum, Sæcharorrhœa pulmonalis—s. Sanguinis, Hæmoptysis.

SQUALLING, ([Sax.] *xiellan* or *gyllan*, 'to yell,') Vagitus.

SQUAMA, Scale, Squamous portion, Tabl.

SQUAMÆ, (pl. of *squama*), Scaly diseases.

SQUAMARIA, Plumbeo Europæa.

SQUAMEUX, Squamous.

SQUAMIFORMIS, (*squama*, 'a scale,' and *forma*, 'shape,') Squamous.

SQUAMOUS, *Squamous*, *Lepidoï'des*, *Lepidoï'des*, *Squamiformis*, *Squa'miform*, (F.) *Squamoux*, *Lépidoï'de*, *Scaly*, (from *squama*, 'a scale,') That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* or *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale. See Temporal Bone.

SQUAMOUS SUTURE, *Sut'ra squamo'sa* seu *mendo'sa* seu *lepidoi'des* seu *lepidoi'des* seu *cro'nii squamo'sa*, (F.) *Suture squameuse* or *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squamous*, (F.) *squamoux*. See Scale.

SQUARE STALK, *Monarda coccinea*.

SQUARRA TONDENS, (*squarra*, 'seurfulness,' and *tondere*, 'to shave,') *Porriigo decalvans*.

SQUASH, ROUND or PATTYPAN, see *Cucurbita pepo*—s. *Warted* or *longnecked*, see *Cucurbita pepo*.

SQUATTING PILLS, (from [Prov.] *squat*, (from *quietus*, [?]) 'quiet,') *Pilulæ opiatæ*.

SQUAWMINT, *Heleœma*.

SQUAWROOT, *Actæa racemosa*, Caulophyllum thalictroides, *Senecio aureus*.

SQUAWWEED, *Erigeron Philadelphicum*.

SQUEAMISHNESS, *Fastidium cibi*.

SQUEASINESS, *Nausea*.

SQUELETTE, *Skeleton*.

SQUELETTELOGIE, *Skeletonology*.

SQUILL, *Seilla*—s. *Vinegar of*, *Acetum seillæ*.

SQUILLA, *Seilla*.

SQUINANÇIE, *Cynanche*, *Cynanche tonsillar*.

SQUINANÇY, COMMON, *Cynanche tonsillar*.

SQUINANTHIA, *Cynanche tonsillar*.

SQUINANTHUS, (corr. from *schœnanthus* [?])

*Juncus odoratus*.

SQUINE, *Smilax China*.

SQUINSY, *Cynanche tonsillar*.

SQUINT, ([D.] *Schinnte*, 'a slope,') *Strabismus*.

SQUINTEYED, see *Strabismus*.

SQUINTER, see *Strabismus*.

SQUINTING, *Strabismus*.

SQUINZEY, *Cynanche tonsillar*.

SQUIRRE, *Scirrhus*—s. *en Uvërassè*, see *Lig-neous*.

SQUIRREL CORN, *Dicentra Canadensis*.

SQUIRREUX, *Scirrhous*.

SQUIRRHE, *Scirrhous*.

SQUIRROGASTRIE, *Scirrhogastria*.

SQUIRROSARQUE, *Induration of the areolar* or *cellular tissue*.

SQUIRRUS, *Scirrhous*.

SQUIRT, *Syringe*.

STACHELBERG, MINERAL WATERS OF. *Stachelberg Springs* are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS, (*σταχυς*, gen. *σταχυος*, 'a spike,') A surgical bandage to the lower belly. The Hypogastrum [?].

STACHYS FÆTIDA, (*σταχυς*,) *Galeopsis*.

STACTE, (*στακτη*,) *Myrrha*.

STADE, (from *stadium*,) *Stage*—s. *de la Chælen*, see *Intermittent fever*—s. *de Froid*, see *Intermittent fever*—s. *de Sneur*, see *Intermittent fever*.

STADIUM, (*σταδιον*,) *Period*, *Stage*.

STADIUM ACUMES seu STASEOS. The period of the height of a disease.

STADIUM ANNIHILATIO'NIS seu CONVALESCENT'ILE seu RECONVALESCENT'ILE. The period of recovery from disease.

STADIUM AUGMENTI seu INCREMENTI MORBI. The period or stage of increase of a disease.

STADIUM CALORIS, *Stage*, (hot)—s. *Convalescentiæ*, *S. annihilationis*.

STADIUM DECREMENTI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, *Stage*, (cold), see *Intermittent fever*—s. *Incrementi Morbi*, *S. Augmenti morbi*—s. *Latentis contagi*, *Prodromus*—s. *Opportunitatis*, *Prodromus*—s. *Prodromorum*, *Prodromus*—s. *Reconvalescentiæ*, *S. Annihilationis*.

STAFF, ([Sax.] *stæp*, *stæp*,) An instrument of great importance in lithotomy,—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, CLIMBING, *Celastrus scandens*.

STAFFA, *Stapes*.

STAG'S PIZZLE, see *Cervus*.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stade*. The period or degree of a disease; especially the period of an intermittent:—as the *cold stage*, *sto'dium fr'i'goris*—*hot stage*, &c.

STAGGERBUSH, *Andromeda mariana*.

STAGGERWEED, *Delphinium*.

STAGIUM. The sixth part of an ounce.

STAG'MA, gen. *Stag'motis*, (*σταγμα*, from *σταζω*, 'I distil,') *Stag'ma*. Any distilled liquid or liquor.

STAGMA, *Gutta*.

STAGNA'TION, *Stagna'tio*, (*stagnare*, *stagnatum*, 'to form a pond,') *stagnum*. Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, 'pond of the chyle,' *Receptaculum chyli*.

STAHLIAN. One who follows the doctrine of Stahl.

STAHLIANISM, see *Animist*.

STALAGMA, gen. *Stalay'matist*, (*σταλαγμα*,) *Stagma*.

STALAGMITIS CAMBOGIOI'DES, *S. Cambog'ia*, (from *σταλαγμος*, 'a drop'—the gum exuding by drops.) *Gamboge* was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by Murray to specimens of two distinct trees of different genera. See *Cambogia*.

STALAGMUS, (*σταλαγμος*,) *Distillation*.

STALE, *Urine*.

STALITICA, (*σταλτικα*,) *Repellents*.

STAMMERING, (from [Sax.] *stæmer*, 'to stammer,') *Balbuties*—s. of the *Fingers*, *Cramp*, *writers'*.

STAMP, ([F.] *estampe*,) *Cachet*—s. *Medicine*, *Cachet*—s. *Oculist*, *Cachet*.

STAMPING MILL, see *Pulverization*.

STANG, ([Sax.] *stingan*, 'to sting,') see *Throbbing*.

by organized bodies in contradistinction to the organic or vital. Also, of old, a restraining or astringent remedy.

**STATICA MEDICINA.** That part of medical observation, which consists in the daily weighing the human body, and the various ingesta and egesta. A title to *Essays of Sanctuarius and Keill*.

**STATICA SEPTI NARIUM.** *Appendix cutanea septi narium.* The cutaneous appendage to the septum narium.

**STATICAL, Static.**

**STATICE CAROLINIANA,** of the United States, (*στασις*, from *στατικός*, 'restraining,' owing to its astringency.) *American or Sea-side Thrift, Marsh Rose-mary, Marshroot, Inkroot, Sea Lavender, Ord. Plumbaginaceæ,* is considered to be a mere variety of the *Static limonium.* The root is *Static,* of the Ph. U. S.

**STATICE LIMOINIUM, S. Maritimum, Be'hen rubrum, Limo'niium, L. majus seu vulgare, Be'hen, Sea Lavender, Red Be'hen, Marsh Rose-mary, Lav'ender Thrift, (F.) Beheu rouge, Rosmarin des marais, Lavande triste ou de mer.** The roots have been esteemed astringent, tonic, and eminently antiseptic.

**STATICE MARITIMUM, S. limonium**—s. *Vulgare, S. limonium.*

**STATICS,** see *Static.*

**STATION, Sta'tio, Sta'tis, Sta'tus, (stare, statum, 'to stand.')** The act of standing.

**STATIONARY, Station'ary, (F.) Stationnaire.** A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

**STATISTICS, MEDICAL, Vital Statistics, Biostatistics, (status, 'a state,') (F.) Statistique médicale.** That part of medicine which relates to details—*medico-statistical*—connected with the mortality, salubrity, &c., of different states, countries and situations.

It has, also, been used in a wider sense to signify the same as *Numerical method, (F.) Méthode numérique;* which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

**STATISTICS, VITAL, Statistics, medical.**

**STATUTE, Statu'tra, Meg'ethos, Magnitudo corporis, (F.) Taille, (from stare, statum, 'to stand.')** The height of the human figure. The following table exhibits the mean height, in feet and decimals, of 1800 men, taken as they were entered upon the lists of recruits filed in the office of the Adjutant-General of the United States. The results are given for 100 men from each State; and no recruit under five feet five inches was received.

|                                    | Mean height.<br>Feet. | Six feet and<br>over. | Greatest height. |
|------------------------------------|-----------------------|-----------------------|------------------|
| Indiana.....                       | 5-7004                | 18                    | 6-41/2           |
| Kentucky.....                      | 5-7729                | 18                    | 6-33/2           |

| New Jersey and Delaware.....       | 5-6509                | 6                     | 6-1              |
| Maryland.....                      | 5-7130                | 9                     | 6-2              |
| Illinois.....                      | 5-7696                | 17                    | 6-3              |
| Missouri.....                      | 5-7162                | 8                     | 6-11/2           |

The minimum height for the American soldier is now five feet three inches; whilst the British

standard is five feet five inches, and the French five feet one inch and a half.

It would seem, from the researches of Professor S. H. Dickson, that the stature of Americans is decidedly superior to that of Europeans, and that the same applies, but to a less degree, to the weight.

The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

**STATUS, (stare, statum, 'to stand.)** Acme—s. *Cruditatis, Crudity*—s. *Erethiticus, Nervous diathesis*—s. *Gastricus, Embarras gastrique*—s. *Nervosus, Nervous diathesis*—s. *Parturiendi, Parturition*—s. *Sthenicus, Sthenia*—s. *Verminosus, Helminthiasis.*

**STAVESACRE, Delphinium staphisagria.**

**STAXIS, (from σταξω, 'to drop,') Apostax'ia.** A slight epistaxis or nasal hemorrhage.

**STEAMDOCTOR.** A term applied to one who treats all, or most, diseases by steam.

**STEAR, (steap, gen. steasos,)** see *Fat, Sebum.*

**STEARATÉ, Emplastrum.**

**STEARIN,** see *Fat.*

**STEARINUM CETACEUM, Cetaceum.**

**STEAROLÉ, (from stear,)** *Pomatum*—s. *Solide, Emplastrum.*

**STEAROSIS, (from stear, and osis,)** *Steatosis.*

**STEARRHŒA, Steatorrhœ'a, Seborrhœ'a, Seborrhag'ia, Smeqatorrhœ'a, Smeqorrhœ'a, Flux'us sebaceus, Sebaceus Flux, (stear, and fluo, 'I flow.')** Augmentation of secretion from the sebaceous follicles of the skin.

**STEARRHEA NI'GRICANS.** A term used by Dr. Neligan, of Dublin, for a black discoloration of the face, observed in young females affected with derangement of the catamenia, and which, in his opinion, is owing to a dark secretion from the cutaneous sebaceous glands.

**STEATITES, (from stear,)** *Polysarcia.*

**STEATOCELĒ, (stear, and κηλη, 'a tumour.')** A tumour formed by a collection of steatomatous matter in the scrotum.

**STEATOMA, gen. Steato'matis, Tu'mor lar'deus, (stear, and oma.)** *Seva'tio, Emphy'ma ency'stis steato'ma.* An encysted tumour, whose contents are similar to fat.

**STEATOPIY'GA, (stear, and πυγη, 'buttocks.')** *Buttock-hump, Fat buttocks;* such as exist in the Hottentot female.

**STEARRHŒA, Stearrhœa.**

**STEATO'SIS, Stear'osis, (from stear and osis,)**

Fatty degeneration of a part, or unusual deposition and accumulation of fat in its adipose tissue.

**STEATO'SIS COR'DIS, Dege'neratio adipo'sa cor'dis, Cardiet'holip'osis and Cardiolip'osis (Piorry), Fatty heart.** Unusual deposition of fat or the heart:—by some presumed to be occasionally

a true adipose degeneration of the substance of the heart.

STEATOSIS HEPATICA, Adiposis hepatica. STEATOZOON FOLLICULORUM, (*steat*, and ζωον, 'an animal,') Acarus Folliculorum.

STEEL, ([Sax.] *ῥυζίε*.) Chalybs. STEEP, Rennet. STEEPLEBUSH, *Spiræa tomentosa*. STEER'S OPODELDOCH, see Opoeldoch, Steer's.

STEGANOP'ODES, (*στεγανοπόδες*.) *Planip'edes*. They who have flat feet, or are webfooted, (from *στεγανος*, 'covered,' and *πους*, 'foot.')

STEGANUS, (*στεγανος*.) Constipated. STEGMONTH, see Parturient.

STEGNO'SIS, *Steno'sis*, *Constipatio*, *Stipatio*, *Condensatio*, *Obstructio*, (*στεγνωσις*, from *στεγνωω*, 'I constrict.')

STEGNOTICA, (*στεγνωτικά*.) Astringents. STEIOSIS, (*στειωσις*.) Sterilitas.

STEL'LA, 'a star,' *Fus'cia stella'ta*, (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRÆ, *Plantago coronopus*. STELLARIA MEDIA, (*stella*, 'a star,') *Alsine media*—*s. Scilla*, *Scilla*.

STELLATA RUPINA, (from *stella*.) *Centaurea calcitrapa*.

STELL'ULE VERHEYEN'II, (*stella*, 'a star,' *stel'lula*, 'a little star.')

STELCHITIS, *Osteocolla*.

STEMA, (*σθημα*.) Penis, (especially the glans.) STENAGMUS, (*στεναγμος*.) *Suspirium*.

STENAGMA, (*στεναγμα*.) *Suspirium*. STENO, (from *στενος*), in composition, Narrow.

STENO, DUCT OF, see Parotid. STENOBREGMATE, (*steno*, and *βρεγμα*, 'the top of the head,') see Cranium.

STENOCARDIA, (*steno*, and *καρδια*, 'heart,') *Angina pectoris*, *Cardiostenosis*.

STENOCHORIA, *Stenochori'asis*, (*steno*, and *χωρα*, 'space,') *Angustia*, *Narrowness*, *Stricture*. Employed by some for contraction of the vagina especially.

STENOCHORIA INTESTINI RECTI, *Stricture* of the rectum—*s. Œsophagi*, *Dysphagia constricta*.

STENOMYCTE'RIA, (*steno*, and *μυκτηρ*, 'nose,') *Contraction* of the nasal passages.

STENON or STENO, DUCT OF, see Parotid. STENOSIS, (*στενωσις*, *stenosis* and *osis*.) *Stegnosis*.

STENOSTEGNOSIS, (*steno*, and *stegnosis*.) *Stenostenosis*.

STENOSTENO'SIS, *Stenostegno'sis*, (*steno*, and *στενωσις*, 'contraction,') *Obstructio duct'us Stenoti'ni*. *Narrowness* or *contraction* of the duct of Steno.

STENOSTOM'IA, (*steno*, and *στομα*, 'mouth,') *Contraction* of the mouth.

STENOTHORAX, gen. *Stenothora'cis*, (*στενωθωραξ*, from *steno*, and *θωραξ*, gen. *θωρακος*, 'the chest,')

One who has a narrow chest. STENTOROPHONUS, (*Στενωρ*, *Stentor*, a Greek of powerful voice in the army before Troy; and *φωνη*, 'voice,')

One who has a strong voice. STEP, ([Sax.] *ῥεπε*.) *Pas'sus*, (F.) *Pas*. The step is produced by the separation of the two lower limbs, and includes that space plus the length of the foot.

STEPHANE, (*στέφανη*.) Crown.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Haales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000—about \$25,000.

STEPHENSIA ELONGATA, Matico. STEPMOTHER'S BLESSING, Hanganail.

STERCOLIN, (from *stercus*.) Serolin. STERCORACEOUS, *Stercora'rins*, *Diachoret'icus*, *Ster'coral*, (from *stercus*.) *Fe'cal*, *Fa'cal*, (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: à posteriori has been similarly used.

STERCORAIRE, Stercoraceous. STERCUS, gen. *Ster'coris*, Excrement, Fimus—*s. Anseris*, *Fimus anseris*—*s. Caninum album*, *Album Græcum*—*s. Diaboli*, *Asafoetida*—*s. Equi non castrati*, *Fimus*.

STERCUS HUMA'NUM, *Homerda*. Human excrement.

STERCUS LACERÆ, *Crocodilia*.

STEREOCYST'IS, (*stereus*, and *κυστις*, 'cyst,') A hard encysted tumour.

STEREOSCOPE, *Stereoscop'ium*, (*stereus*, and *σκοπεω*, 'I view,')

A physical instrument by means of which plane pictures of an object are made on each retina, and so blended as to appear as one in relief. Also, an instrument for detecting a calculus in the bladder, and foreign bodies in the soft parts. It resembles a common catheter, having an expanded free extremity.

STEREOTICA, (from *stereus*.) Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STEREUS, (*στερεος*.) Solid.

STERILE, *Ster'ilis*, *A'gonos*, *Aph'orus*, *Aphor'icus*, *Ablast'ea*, *Infecun'dus*, *Barren*, (F.) *Stérile*, (from *στέρος*, 'barren,')

Not producing fruit; infecund.

STERILIS, Sterile.

STERILITAS, *Agon'ia*, *Steiro'sis*, *Stiro'sis*, *Agenn'e'sia*, *Agenn'e'sis*, *Infecun'ditas*, *Steril'ity*, *Acy'e'sis*, *Bar'renness*, *Infecun'dity*, *Apho'ria*, *Atc'nia*, *Atoc'ia*, (F.) *Stérilité*. Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

STERNAD, see Sternal.

STERNAL, *Sterna'lis*, (from *sternum*.) Relating or appertaining to the sternum or breast bone.

STERNAL ASPECT. The aspect of the body where the sternum is situate.—(Barclay.) *Sternad* is used by the same writer adverbially to signify towards the sternal aspect.

STERNALGIA, *Sternodyn'ia*, (*sterno*, and *αλγος*, 'pain,')

Pain referred to the sternum. *Angina pectoris*.

STERNO, in composition, the sternum.

STERNOCLAVICULAR, *Sternoclavicula'ris*. That which relates to the sternum and clavicle.

STERNOCALVICULAR ARTICULA'TION is the union of the inner extremity of the clavicle with a round

facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two radiated *sternoclavicular*, (F.) *Sterno-claviculaires rayonnées*; one anterior, and one posterior—an *interclavicular ligament* extending between the two clavicles, and two synovial capsules, separated by an *interarticular fibrocartilage*. The costoclavicular ligament may also be considered to belong to this articulation.

**STERNOCLAVIOMASTOÏDIEN**, Sternocleidomastoideus—s. Cleidobrachialis, Pectoralis major—s. Cleidohyoideus, Sternohyoideus.

**STERNOCLEI'DOMASTOÏDE'US**, *Sternomastoïdeus*, *Clei'domastoïde'us*, *Mastoïde'us*, *M. anterior*, *Nuta'tor cap'itis*; (F.) *Sternoclavio-mastoïdien*, *Sternomastoïdien*; (*sterno*, κλις, 'the clavicle,' and *μασος*, 'the mastoid process.') A muscle situate at the anterior and lateral part of the neck. It is long and flattened; simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

**STERNOCOSTAL**, *Triangularis sterni*—s. *Costo-clavio-huméral*, *Pectoralis major*—s. *Huméral*, *Pectoralis major*.

**STERNOHYOÏDE'US**, *Sternocleidohyoïdeus*, *Sternohyoïdes*, *Hyoïdes pri'mus*; (from *σπρνον*, 'the sternum,' and *ὑοις*, 'the os hyoides.')

A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum;—at the posterior part of the sternoclavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

**STERNOMASTOÏDIEN**, *Sternocleidomastoïdeus*—s. *Pubien*, *Rectus abdominis*.

**STERNOTHYROÏDE'US**, *Sternothyroïdes*, *Bron'chius*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides by the medium of the thyrohyoid membrane.

**STERNODYNIA**, (*sterno*, and *δύνη*, 'pain,') *Sternalgia*—s. *Syncoptalis*, *Angina pectoris*—s. *Syncoptica* et *Palpitans*, *Angina pectoris*.

**STERNOÏMPHALODYMIA**, (*sterno*, *ομφαλος*, 'navel,' and *δύω*, 'to mingle,') see *Somatodymia*.

**STERNOPA'GIA**, (*sterno*, and *παγω*, 'I fasten.')

A monstrous union of fœtuses, in which they are attached at the sternum.

**STERN'UM**, *Ster'non*, (*σπρνον*, from *σπρπος*, 'solid,') *Pec'tus*, *Os as'ser* seu *pec'toris* seu *xiphoides* seu *gladi'oli* seu *ensifer'me*, *Scu'tum cor'dis* seu *pec'toris*, *Breastbone*, *He'mal Spine* of Owen. An azymous symmetrical bone, situate at the forepart of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage—the xiphoid. It has an anterior or cutaneous surface, a posterior or mediastinal—a superior or clavicular extremity, and an inferior or abdominal. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Héclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *lari sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4.

*Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *Ensi-sternal*.

**STERNUMENTUM**, (*sternuo*, *sternutum*, 'to sneeze,') *Sneezing*.

**STERNUTAMENTORIA**, (*sternuto*, *sternutum*, 'to sneeze,') *Achillea ptarmica*.

**STERNUTAMENTUM**, *Sneezing*.

**STERNUTATIO**, *Sneezing*.

**STERNUTATOIRE**, *Sternutatory*.

**STERNUTATORY**, *Sternutato'rius*, *Ster'nutatory*, *Sternutamen'tum*, *Errhi'num*, *Ptar'micium*, *Anarrhi'num*, (F.) *Sternutato'ire*. A substance which provokes sneezing; as tobacco, &c.—See *Errhine*.

**STERNUTORY**, *Sternutatory*.

**STERTEUR**, *Stertor*.

**STER'TOR**, *Ron'chus*, *Rhon'chus*, *Ren'chus*, *Rhen'chus*, (F.) *Stertenr*, *Ronflement*, (*stertere*, 'to snore,') The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *ster'torous*, (F.) *Stertoreux*; *Respira'tio stertuo'sa* seu *stertens* seu *stertoro'sa*.

**STERTOROUS**, see *Stertor*.

**STETHÆMIA**, *Hyperæ'mia Pulmo'num* seu *Pec'toris*, *Conges'tio Pulmo'num* seu *Pec'toris*, (F.) *Hypérémie* ou *Congestion des Pouxmons*; (from *stetho*, and *αίμα*, 'blood,') *Hyperæmia* of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

**STETHO**, (from *σθησος*, 'chest,') in composition, 'the chest.'

**STETHOCATHARSIS**, (*stetho*, and *καθαρσις*, 'a purging,') *Expectoration*.

**STETHOCHYSIS**, (*stetho*, and *χυνω*, 'to pour out,') *Hydrothorax*.

**STETHODESMIS**, (*stetho*, and *δεσμις*, 'a bandage,') *Corset*.

**STETHODESMIUM**, *Corset*.

**STETHODESMUS**, *Corset*.

**STETHOMETER**, (*stetho*, and *μετρον*, 'measure,') An instrument, proposed by Dr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

Under the name *Thoracom'eter*, Dr. Sibson has described an instrument of his invention, which is employed with a similar view as the stethometer of Dr. Quain.

**STETHOPARALYSIS**, *Paral'ysis nervo'rum thora'cis*, *phrenicorum*, &c.; (*stetho*, and *παράλυσις*, 'paralysis,') *Palsy* of the muscles of the chest.

**STETHORRHEUMA**, (*stetho*, and *ῥευμα*, 'effluxion, rheumatism,') *Pleurodynia*.

**STETHOSCOPE**, *Stethoscop'ium*, *Stethos'copum*, *Echoscop'ium*, *Psophom'eter*, *Thoracoscop'ium*, (*stetho*, and *σκοπεω*, 'I examine,') An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the

physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are now made in the plainest and lightest manner and without any plug. Double stethoscopes have, likewise, been invented to enable both ears to be used at the same time.

Stethoscopes are sometimes flexible, like the flexible eartrumpet.

This mode of examining affections of the chest, *Steth'oscopy*, *Stethoscopia*, &c., is what Laënnec terms *Auscultation médiate*, *Me'diate Auscultation*.

STETHOSCOPIA, see Auscultation, and Stethoscope.

STETHOSCOPI'IC, *Stethoscopiaeus*, (F.) *Stéthoscopique*. Furnished by stethoscopy or auscultation,—as a 'stethoscopic sign.'

STETHOSCOPY, see Stethoscope.

STETHUS, (σθηθος,) Thorax.

STEW, [old F.] *estwe*, [Sax.] *stēra*,) Stove.

STHENIA, *Sthen'ia*, *Diath'esis sthen'ica*, *St'atus sthen'icus*, *Vis aucta*, (σθένος, 'strength,' 'power,') Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians; as well as *Asthenia*, its antitheton. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, (from σθένος, 'strength,') Active.

STHÉNIQUE, see Active.

STHENOPYRA, (from σθένος, 'strength,' and πυρ, 'fever,') see Synocha.

STIAN, ([Sax.] *stizen*, from *stigan*, 'to ascend, to rise,') Hordeolum.

STIBI, (στίβι,) Antimonium.

STIBIALIS, Antimonium.

STIBIALISM, *Stibialis'mus*, (from *stodium*, 'antimony,') The aggregate phenomena produced by antimonials, when given in large quantities.—antimonial intoxication or poisoning.

STIBIATUS TARTRIS LIXIVLE, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum—s. Deutomurias sublimatus, Antimonium muriatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitando paratum, Algaroth—s. Oxodes album, Antimonium diaphoreticum—s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydi sulphurati hydrosulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum—s. Subhydrosulphas, Antimonii sulphuretum rubrum—s. Submuriatis præcipitando paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum—s. et Potassæ deutotartaras, Antimonium tartarizatum.

STIBIODERMIC, see Unguentum antimonii.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS (Stochas) ARABICA, *Lavandula stochas*.

STICKWORT, Agrimonia.

STICTA PULMONACEA, (from στικτος, 'spotted,') Lichen pulmonarius.

STIFF JOINT, MUSCULAR, *Contractura*

STIFF JOINTS, Milk sickness.

STIFFNECK, Tort'icollis.

STIGMA, (στίγμα, 'a small puncture,') *Cicatricula*.

STIG'MATA (pl. of *stigma*,) see *Nævus*. The breathing pores of insects are so called.

STIG'MATA OVARIO'RUM, *Cicatri'ces Ovario'rum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, gen. *Stilbo'matis*, (στίλβωμα, from *στίλβωω*, 'to make shining,') Cosmetic.

STILL, (from *stilla*,) Alembic.

STILET, (dim. of *stilus*,) Specillum.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, (*stillare*, *stillatum*, 'to drop,') Epistaxis.

STILL'BORN, *Na'tus Mor'tuus*, (F.) *Mort-né*. Born still or lifeless,—dead born; a stillborn child,—*Neeroto'cion*.

STILLICIDIUM, *Substil'lum*, (*stilla*, 'a drop,' and *cadere*, 'to fall,') This term is often used synonymously with *Straugury*. It means the flow of any fluid—particularly the urine—drop by drop. Also a kind of embrocation, *Stillicid'ium supra par'tem*, effected by dropping a liquid upon a part.

STILLICIDIUM LACRYMARUM, Epiphora—s. *Narium*, *Coryza*—s. *Sanguinis e naribus*, Epistaxis—s. *Supra partem*, see *Stillicidium*.

STILLIN'GIA, (after Dr. Benj. Stillingfleet, an English botanist.) *S. sylvat'ica*, *Queen's Root*, *Queen's delight*, *Yaw root*, *Mar'cory*, *Cockup hat*.

An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sec. Syst. Monocæia* Monadelphia. *Nat. Ord.* Euphorbiacæ. The root—*Stillingia*, Ph. U. S.—is said to be used in syphilis, obstinate cutaneous affections, &c., like sarsaparilla.

STILUS, Stylus.

STIMATO'SIS, *Stymato'sis*, *Hæmorrhag'ia Pe'nis*, *Stymatorrhag'ia*, *Phallorrhag'ia*, *Caulorrhag'ia*, (*stimul'ium*, *Irritans*, *Excitant*, *Inci'tant*, *Hyperth'en'ic*, *Pyretogen'ic*, (from *stimulare*, 'to goad,') A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *dijfusable*,—that is, have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimula'tion*, *Stimula'tio*, *Inci'tatio*.

The chief stimulants are the following: *Æther Sulphuricus*, *Ammonia*, *Asafetida*, *Brucea*, *Camphora*, *Capsicum*, *Castoreum*, *Cinnamomum*, *Co'paiba*, *Cubeba*, *Guaiaicum*, *Hydragryi Præparata*, *Iodinium*, *Nux Vomica*, *Ole' Essentialia*, *Opium* (in small dose), *Piper*, *Sinapis*, *Strychnia*, *Zingiber*,—*Alcohol*, *Caloric*, *Electricity*, *Mental Emotions*, (the *Impetuous*.)

STIM'ULUS, 'a goad.' *Inci'tamen'tum*, *Irrita'men'tum*, *Poten'tia Irritans*. Any thing which excites the animal economy.

STINE, Hordeolum.

STINK POKE, *Dracontium fœtidum*—s. *Weed*, *Chenopodium anthelminticum*, *Datura stramonium*, *Polanisia graveolens*.

STIPATIO, (*stipare*, *stipatum*, 'to stop up,') Stegnosis.

STIPATIO TELÆ CELLULO'SÆ INFANT'UM. Induration of the cellular tissue of children.

STIROSIS, (στειρωσις, from *στείρωσ*, 'sterile,' and *osis*.) Sterilitas.

STITCH, (same root as *stick*, Sax. *stican*, 'to pierce,') (Sc.) *Stound*, (Prov.) *Day*, (F.) *Point*

(L.) *Punctum*. An acute lancinating pain, like that produced by the puncture of a sharp needle.

STITCH, COMMON, Suture, common—s. Royal, see Suture—s. in the Side, Pleurodynia.

STIZOLOBIUM, (σπιζω, 'to prick,' and λοβιον, 'a small pod,') *Dolichos pruriens*.

STLENGIS, (σλεγγις.) *Strigil*.

STOBÆA RUBRICAULIS, (after D. Stobæus, of Sweden, a patron of Linnaeus.) A South African plant, *Nat. Ord.* Composite. A tincture of the bruised roots is diuretic, and of great service in gravel.

STOCK'ING, LA'CED, (F.) *Bas lassé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dogskin, admitting of being tightly laced anteriorly. It is made, also, of elastic gum cloth. It is employed in varices and ulcers of the legs.

STOCK'PORT, MINERAL WATERS OF, See New York, mineral waters of.

STECCHAS ARABICA, (στοιχας,) *Lavandula stoechas*.

STECHEIOL'OGY, *Stechiolog'ia*, (F.) *Stechiologie*; (στοιχεων, 'element,' and λογος, 'a discourse,') A treatise, or the theory, of elements; hence of the elementary parts of organized substances.

STOICHEION, (στοιχειον,) *Element*.

STOMA, gen. *Stomat'is*, (στομα, gen. στοματος,) *Mouth*.

STOMAC'ACĒ, (στομακακη,) *Stomatoc'acē*, *Stom'al'gia*, *Labrisul'cium*, *Cheiloc'acē*, *Uloc'acē*, *Cheilomal'd'cia*, *Stomaton'oma*, *Stomatonecro'sis*, *Cancer O'ris*, *Cancer*, (stoma, and κακος, 'evil,') *Fœtor of the mouth with a bloody discharge from the gums.* (F.) *Cancer aquaticus*; see *Cancer Aquaticus*. Also, *Senry*.

STOMACEE, *Porphyra nautica*—s. *Gangrænum*, *Cancer aquaticus*—s. *Universale*, *Purpura hæmorrhagica*.

STOMACHAL, *Stomachal*.

STOMACH, (στομαχος,) *Stom'achus*, *Ventric'ulus*, *Né'dys*, *Anoc'v'is*, *Gast'er*, *Gluttu'patens*, *Muc*, (of animals,) (Sc.) *Kyte*, *Pechan*, (F.) *Estomac*, (from stoma.) One of the principal organs of digestion. It is a musculomembranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is formed into chyme. When viewed externally, the stomach has, 1. An *anterior face*, which looks a little upwards. 2. An *inferior face*, directed downwards. 3. An *inferior or colic margin*, which is convex and extensive, and is called the *greater curvature*, *curvatur'a maj'or*, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A *superior or diaphragmatic margin*, which is shorter, concave, and is called the *lesser curvature*, *curvatur'a minor*, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left or œsophageal orifice*, called, also, the *cardia*, *Os ventriculi* or *upper orifice*. 6. A *right or intestinal or inferior orifice*, called the *pylorus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature—the *great tuberosity* or *great cul-de-sac* or *fundus of the stomach*; *fundus* seu *sacculus ventriculi*, and, 8. A less extensive dilatation, situate to the right of the greater curvature,—the *lesser tuberosity* or *lesser cul-de-sac*, *An'trium pylori* seu *pyloricum*, *Pars pylorica*. The inner surface of the stomach is of a reddishwhite colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The varieties of the stomach consist of three membranes in superposition. The outermost is serous,

and is an extension of the peritoneum. The middle coat is *muscular*,—some of its fibres running longitudinally; others, transversely, and others obliquely. The innermost membrane is of a mucous nature, *Cru'ta villosa ventriculi*, *Gastromyco'd'eria*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brun'ner*. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastroëpiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

STOMACH CELL, see *Favulus*—s. *Disease*, *Limosis*.

STOMACH, FIRST, *Ingluvies*.

STOMACH PUMP, *Gastrea'chyta*, *Antli'a gas'trica*, (F.) *Pompe pour l'estomac*. A useful instrument for conveying fluids to the stomach when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach tube must be attached to the nozzle, and passed down the throat,—the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

STOMACH, SECOND, *Proventriculus*—s. *Sick*, *Milk sickness*—s. *Third*, *Ventriculus callosus*.

STOMACH TUBE, see *Tube*, *œsophageal*.

STOMACHAL, *Stomach'ic*, *Stomach'ical*, *Cardi'acus*, (στομαχος,) *Stomach'icus*, *Stomach'al'is*, *Viscer'al'is*, (F.) *Stomacal*, *Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, (*stomach*, and *αλγος*, 'pain,') *Cardialgia*.

STOMACHI RESOLUTIO, 'weakness of stomach,' *Dyspepsia*.

STOMACHIC, *Stomachal*.

STOMACHICAL, *Stomachal*.

STOMACHIQUE, *Stomachal*.

STOMACHUS, (στομαχος, from stoma.) This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach (see *Cardia*), and for the stomach itself. Hippocrates calls the neck of the bladder *στομαχος κωτιως*; and the neck of the uterus *της μητρας στομαχος*.

STOMAL'GIA, *Stomatal'gia*, *Stomatodyn'ia*, (*stoma*, and *αλγος*, 'pain,') *Pain in the mouth*.

STOMAPYRA, (*stoma*, and *πυρ*, 'fire, fever,') *Aphthæ*—s. *Aphtha*, *Aphthæ*.

STOMATALGIA, (*stoma*, and *αλγος*, 'pain,') *Stomal'gia*.

STOMATEL'CIA, *Stomatelco'sis*, (*stoma*, and *εκος*, 'an ulcer,') *Ulceration of the mouth*.

STOMAT'IA, *Stomatopath'ia*, (from *stoma*.) *Disease of the mouth*.

STOMATIC, (στοματικός,) *Stomat'icus*, (F.) *Stomatique*. A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITE APHTHEUSE, Stomatitis, aphthous—s. *Charbonneuse*, Cancer aquaticus—s. *Couenneuse*, Stomatitis, pseudomembranous—s. *Crèmeuse pultacée*, Aphthæ—s. *Folliculeuse*, Stomatitis, aphthous—s. *Gangrèuseuse*, Cancer aquaticus—s. *Mercurielle*, see Salivation, mercurial—s. *Ulcéreuse*, Stomatitis, aphthous.

STOMATITIS, (stoma, and itis.) (F.) *Inflammation de la Bouche*. Inflammation of the mouth.

STOMATITIS, APH'THOUS, *S. follicular* or *ulcéreux*, *Em'phlysis Aph'tha*, *A. Adulto'rum*, (F.) *Stomatite*, *S. aphteuse* ou *folliculeuse* ou *ulcéreuse*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

STOMATITIS, ERYTHEMATOUS. Simple inflammation of the mouth.

STOMATITIS, EXSUDATIVA, Aphthæ—s. *Follicular*, *S. apthous*—s. *Gangrenous*, *Cancer aquaticus*—s. *Materna*, Stomatitis of nursing women.

STOMATITIS, MERCURIAL, *S. mercurialis*, *Hydrargyrostomat'is*, *Hydrargyrostomat'is*. Inflammation of the mouth induced by mercury.

STOMATITIS OF NURSING WOMEN, *S. Nutri'cum* seu *Mater'na*, appears to be a variety of *S. aphthous*.

STOMATITIS NUTRICUM, Stomatitis of nursing women.

STOMATITIS PSEUDOMEMBRANOUS, (F.) *Stomatite couenneuse*, *Diphthérite buccale*, *Pseudomembranous inflammation of the mouth*;—in its worst form, *Stomat'iphus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen extensively except in large foundling establishments.

STOMATITIS, ULCEROUS, *S. aphthous*—s. *Vesiculosa infantum*, Aphthæ.

STOMATOCACE, (stoma, and κακος, 'evil.') Stomacace.

STOMATODYNIA, (stoma, and δόνη, 'pain.') Stomalgia.

STOMATOGAS'TRIC, *Stom'atogas'tricus*, *Stomogas'tric*, *Stomogast'ricus*, (stoma, and γαστήρ, 'the stomach.') Appertaining to the mouth and stomach—as the *stomatogastric* ganglia of the lower animals. See Encephalon.

STOMATOMALACIA PUTRIDA, (stoma, and μαλακία, 'softness.') Cancer aquaticus.

STOMATONECROSIS, (stoma, and νεκρωσις, 'death.') Cancer aquaticus, Stomacace.

STOMATONOMA, (stoma, and νόμη, 'an eating ulcer.') Stomacace.

STOMATOPANUS, (stoma, and πανος, 'a glandular tumour.') *Stomatophy'ma glandulo'sum*, *Panus Fau'cium*. Tumefaction of the glands of the mouth.

STOMATOPHY'MA, gen. *Stomatophy'matis*, (stoma, and φυμα, 'a swelling.') A swelling of the mouth.

STOMATOPHY'MA GLANDULOSUM, Stomatopanus.

STOMATOPLAS'TIC, *Stomatoplas'ticus*, (stoma, and πλασσω, 'I form.') An epithet for the operation of forming a mouth where the aperture has been contracted from any cause; *Stomatoplas'ty*.

STOMATORRHAG'IA, *Stomatorrhæ'ia*, *Hæmorrhag'ia o'ris* seu *fau'cium*, *Su'g'uinis proflu'vium ex O'ri*, *Hæmorrhoides O'ris*, *Stomato'sis*, *Stomorrhag'ia*, (F.) *Hæmorrhagie buccale*, (stoma, and ἔρηγμα, 'I break out.') Hemorrhage from the mouth.

STOMATORRHAGIA ALVEOLORUM, Phatnorrhagia—s. *Gingivarum*, Ulorrhagia.

STOMATORRHŒA, (stoma, and ῥέω, 'to flow.') Stomatorrhagia.

STOMATOSCOPE, (stoma, and σκοπεω, 'I view.') Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum o'ris*.

STOMATOSEPSIS, (stoma, and σήψις, 'putrefaction.') Cancer aquaticus.

STOMATOSIS, (from stoma,) Stomatorrhagia.

STOMATOSPASMUS, (stoma, and spasmus,) Trismus.

STOMATYPHUS, (stoma, and τυφhus,) 'Stomatitis, pseudomembranous.

STOMENCEPHALUS, Stomoccephalus.

STOMOCEPH'ALUS, *Stomocceph'alus*, (F.) *Stomocéphale*, *Stomencephale*, (stoma, and κεφαλή, 'head.') A genus of monsters having two contiguous eyes, or a double eye occupying the median line; the nasal apparatus atrophied and forming a tube (*trompe*); the jaws rudimental; and the mouth imperfect or wanting.—(I. G. St. Hilaire.)

STOMOMANICON, (stoma, 'face,' and μανος, 'thin' [?].) *Platysma myoides*.

STOMORRHAGIA, Stomatorrhagia.

STONE BINDER, Osteocolla—s. In the Bladder, Calculi vesical—s. *Crop*, *Sedum*—s. *Crop*, *biting*, *Sedum*—s. *Mint*, *Cunila mariana*—s. *Moss*, *Tripe de roche*—s. *Pock*, *Acne*—s. *Root*, *Collinsovia Canadensis*—s. *Sweat*, see Hyraceum.

STONES, THE, Testes.

STOOL, ([Sax.] *rcol*), Dejection.

STOOLS, CALOMEL, see Calomel.

STOPPAGE, Stegnosis.

STOPPING, Filling, Stegnosis—s. of the Belly, Bowels, Guts, or Stomach; Constipation.

STORAX, Styraç—s. *Liquida*, *Liquidambar styraciflua*.

STO'REY'S WORM CAKES. An empirical preparation formed of *Calomel* ℞j, *Jalap* ℥j, *Zingib.* ℞ij, *Succch.* ℥j, *Cinnab. antim.* q. s. to colour them; *Syrup. simpl.* q. s. to make into cakes.

STORKBILL, *Geranium maculatum*.

STOUND, ([Icel.] *stunde*, 'to be in pain,') Stitch.

STOVE, *Æstua'rium*, *Stu'pha*, Old French, *Estuve*; a *Stew*, (F.) *Étuve*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case the *stew* or *store* is said to be *wet* or *humid*; in the opposite case it is said to be *dry*, (F.) *sèche*. The latter, which is used by the Turks, is the *Py'ria*, *Pyriate'rium*, *Lacon'icum*, *Calida'rium* or *Calda'rium*, *Suddatio concamera'ta*, *Turkish*, *Eastern*, or *Roman bath*. In the true Turkish bath, however, the air of the bathing apartment is densely charged with vapor, which the so-called Turkish bath, of recent introduction into England, is generally not. The former is their *Teptida'rium* or *Vapora'rium*, which see. These kinds of baths greatly excite the cutaneous transpiration, and are valuable agents in rheumatic and other affections.

STOY'S MEDICINE FOR HYDROPHOBIA, see Anagallis.

STRABI, (στραβοι,) see Strabismus.

STRABILISMUS, Strabismus.

STRABISM'US, (στραβισμος,) *Strabilis'mus*, *Parop'is Strabismus*, (from στραβος, 'twisted; one who squints,') *Strabos'itas*, *Loxophthal'mus*, *Distor'sic Lus'citas*, *P'ulos*, *Ilo'sis*, *Ilo'sis*, *Helo'sis*, *Squint'ing*, *Squint*, *Crosseye*, (F: v.) *Doyle*, *Glee'ing*, (Sc.) *Skel'tie*, *Skee'ly*, (F.) *Strabisme*, *Vue louche*, *Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; or on a convulsive state of one of

those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seems to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses provided with a piece of looking-glass on the side to which the eye is vitiously turned, so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If, owing to weakness, the organ must be strengthened by being exerted alone, and leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single*, or affect one eye only, or *double*, affecting both eyes, and it may be *convergent* or *divergent*, that is, with the ball drawn towards the nose, or away from it.

Those affected with Strabismus are called *Strab'i*, *Strabo'nes*, *Strabo'ni*, *Streb'li*, *Il'li*, *Ill'ides*, *Squin'ers*, *Squin'eyed*, (Sc.) *Gle'yed*, (F.) *Louchees*, *Bigles*. A slight deviation is generally called a *Cast in the Eye*, and, sometimes, a *Cock-eye*.

STRABISMUS, CONVERGENT, see Strabismus—s. Divergent, see Strabismus—s. Double, see Strabismus—s. Single, see Strabismus.

STRABONES, (στραβωνες,) see Strabismus.

STRABONI, see Strabismus.

STRABOSITAS, Strabismus.

STRABOTOMY, *Strabotom'ia*, (στραβος, 'one who squints,' and *τομή*, 'incision.') The operation for the removal of squinting by the division of the muscle or muscles that distort the eyeball. A *Strabotomist* is one who practises strabotomy.

STRAEDEATH, see Death.

STRAIN, (σπραγγειν, [L.] *stringere*, (F.) *estreindre*, 'to constrict or squeeze,') Sprain.

STRAIN, *Colure*, (F.) *conler*. To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, Nisus.

STRAITS OF THE PELVIS, see Pelvis.

STRAMOINE, *Datura stramonium*.

STRAMONIA, *Datura stramonium*.

STRAMONIUM, (compounded from *strychnos* and *μανικός*, 'maniacal,') *Datura stramonium*—s. *Fœtidum*, *Datura stramonium*—s. *Majus album*, *Datura stramonium*—s. *Spinosum*, *Datura stramonium*—s. *Vulgatum*, *Datura stramonium*.

STRAMONY, *Datura stramonium*.

STRANGALIDES, (σπραγγαλίδες,) pl. of *strangalis*, (from *σπραγγω*, 'I compress,') Small, hard tumours, which form as in the breast when the milk does not find issue.

STRANGALION, (σπραγγαλιον,) Tubercle.

STRANGALIS, (σπραγγαλις,) Tubercle.

STRANGALISMUS, (σπραγγαλισμος,) Strangulation.

STRANGERS' FEVER, see Fever, strangers'. STRANGULATIO, (σπραγγω, 'I compress,') Orthopnoea, Strangulation—s. Uterina, Angone—s. Vulvæ, Hysteria.

STRANGULATION, *Strangula'tio*, *Pnix*, *Pnix'is*, *Pnix'gos*, *Pnix'na*, *Strangalis'mus*, (F.) *Étranglement*, *Strangulation*. State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine seriously intercepts the continuity of the digestive canal. In *Legal Medi-*

*cine* it means the forcible obstruction of the vital passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lycopodes.

STRANGULLION, Strangury.

STRANGURIA, Strangury—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury—s. *Menstruelle*, *Dysmenorrhœa*.

STRANGURIOSUS. Affected with, or of the nature of, strangury.

STRANGURY, (σπραγγουρία,) *Strangu'ria*, *Paru'ria stillati'tia*, *Dysu'ria*, *Uri'næ Stillicid'ium* seu *Substit'ium*, *Strangu'llion*, *Strangu'llion*, (F.) *Strangurie*, (σπραγγειν, 'to squeeze, and ουρον, 'urine,') Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRANX, (σπραγγί,) Gutta.

STRAP'PING, ([Sax.] *Γεραππο*, 'a strap,') The dressing of ulcers by means of straps or strips of adhesive plaster, linen, &c. Also, the plaster thus applied.

STRAPPING, WATER, see Waterdressing—s. Wet, see Waterdressing.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Rossshire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulphohydric acid.

STRATIOTES, (στρατιωτης,) Achillea millefolium.

STRATUM BACILLATUM seu *bacillosum*, 'bacillary layer,' (from *sternere*, *stratum*, 'to spread out,') see *Tunica Jacobi*—s. *Corneum*, *Epidermis*—s. *Germinativum*, *Proliferous disc*, *Tache embryonnaire*—s. *Malpighii*, *Corpus mucosum*—s. *Pigmenti*, see *Choroid*—s. *Proligerum*, *Proliferous disc*.

STRAWBERRY, (strewberry,) *Fragaria*—s. *Bush*, *Euonymus Americanus*—s. *Shrubby*, *Rubus arcticus*—s. *Tree*, *Euonymus Americanus*—s. *Wild*, *Fragaria Virginiana*.

STREAK, PRIMITIVE, (from [Sax.] *Γρεπice*, 'a line,') Groove, primitive.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, (στρεβλοι,) see Strabismus.

STREBLOSIS, (στρεβλος, 'twisted,') Luxation.

STREMMMA, (στρεμμα,) Luxation, Sprain.

STREPITO'SUS MOR'BUS seu AFFEC'TUS, (F.) *Maladie bruyante*, 'noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS, (from *strepere*, *strepitum*, 'to make a noise,') *Bruit*—s. *Aurium*, 'noise of the ears,' *Tinnitus aurium*.

STRETCHING, ([Sax.] *Γρεπεccan*, 'to stretch,') Pandeulation.

STRİÆ, (pl. of *stria*, 'a furrow,') see *Vibices*—s. *Ciliares*, *Ciliary processes*—s. *Corneæ*, *Tænia semicircularis*—s. *Longitudinales Lancisii*, see *Corpus callosum*—s. *Medulles*, see *Processes teretes*—s. *Retinae subjectæ ligamento ciliari*, *Halo signatus*—s. *Semilunares*, *Tænia semicircularis*—s. *Terminales*, *Tænia semicircularis*—s. *Transversales Willisii*, see *Corpus callosum*.

STRIATED, *Stria'tus*, (F.) *Strié*, (from *stria*, 'a channel or groove,') Marked with small channels or grooves, or with lines of another colour.

STRIATED MUSCULAR FIBRE, see Muscular fibre.

STRIATUS, (*striare, striatum*, 'to make grooves or furrows,') *Cannelé*, Grooved, Striated; see *Corpora striata*.

STRIBILIGO, gen. *Stribiliginis*, Efflorescence.

STRICTURA, *Stricture*—s. Ani, *Stricture of the rectum*—s. Intestini recti, *Stricture of the rectum*—s. Intestini recti spasmodica, *Stricture of the rectum, spasmodic*—s. Œsophagi callosa, *Dysphagia constricta*—s. Œsophagi spasmodica, *Œsophagismus*—s. Pharyngis seu Œsophagi vera, *Dysphagia constricta*—s. Præputii, *Phimosis*—s. Urethrae, *Urethrostenosis*—s. Ventriculi, *Stricture of the stomach*.

STRICTURE, *Strictura*, (*stringere, strictum*, 'to draw tight,') *Coarctatio, Stenosis*, (F.) *Rétrécissement*. A diminution or contracted condition of some tube or duct, as the Œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, *Dysphagia constricta*—s. of the Pharynx, *Dysphagia constricta*.

STRICTURE OF THE RECTUM, *Strictura Ani* seu *Intestini Recti, Archostegoma, Rectostenosis, Euthyenterostenoma, Archostegno'sis, Archostenosis, Proctoencil'sis, Angustatio et Restrictio intestini recti* seu *Ani, Stenochoria intestini recti, Proctostenosis organica*, occurs organically, and is a very serious affection; being generally dependent upon scirrhus.

STRICTURE OF THE RECTUM, SPASMODIC, *Strictura Intestini Recti spasmodica, Obstructio Recti spasmodica*. An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

STRICTURE OF THE STOMACH, *Gastrostenosis, Coarctatio* seu *Strictura ventriculi*. See *Gastrostenosis cardiaca*, &c.

STRICTURE OF THE URETHRA, *Urethrostenosis*—s. of the Urinary bladder, *Cystostenochoria*—s. Vesicæ urinariæ, *Cystostenochoria*.

STRICTUROTOMY, *Urethrotomy*.

STRIDOR DENTIUM, 'grinding of the teeth,' *Brygma*.

STRIE, *Striated*.

STRIGA ('a furrow') *CARTILAGINOSA CORDIS*, Isthmus of the fossa ovalis.

STRIGIS, *Strigilis*, (from *stringere*, 'to touch lightly,') *Sten'gis, Stelen'gis*. A fleshbrush. Also, an instrument, anciently used in the baths, for scraping off the sweat. The process was called *Strigillatio, Strigillatio*.

STRIPED MUSCULAR FIBRE, see *Muscular fibre*.

STROBILITES, (*στροβιλίτης*, from *στροβίλος, strobilus*, 'a cone of the pine.')

STROEMIA, (after H. Stroem, a Norwegian naturalist,) *Cadaba*.

STROKE, APOPLECTIC, (from [Sax.] *aptri-can*, 'to strike.')

STROKE, BACK, OF THE HEART, *Impulse, diastolic*.

STROKE, PARALYTIC. A sudden attack of encephalospinal paralysis.

STROKE, WATER, see *Hydrocephalus internus*.

STROMA, gen. *Stromatis, Stragulum, Stramen'tum*, (*στρωμα*, 'a bed or couch,' from *σπρᾶνωω, σπρᾶνωμι*, 'to spread out; to cover.')

STROMA, of an organ,—as the stroma of the ovary. Applied, also, to the bed or base of any formation,—as the 'amorphous stroma' of serofulous formations.

STRONGLE, *Strongylus*—s. Géant, *Strongylus gigas*.

STRONGULLION, *Strangury*.

STRONGYLLUS, (from *στρογγυλος*, 'round,')

Hippocrates, and others, mean the *Ascaris lumbricoïdes* by this term. The *Strongylus Gigas, Eustrongylus gigas, Ascaris visceralis* seu *venalis, Fusc'ria visceralis* et *renal'is*, (F.) *Strongle, S. géant*, is, however, distinct. It has an obtuse, flat head; mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

STRONGYLLUS, (*στρογγυλος*,) *Terex*.

STROPHOS, (*στροφος*, from *στρεφω*, 'to twist,') *Tormina*.

STROPHOLE, *Strophulus*.

STROPHULUS, *Lichen'asis strophulus, Ebullit'io, Ecanth'ema* seu *Exor'mia strophulus, Red Gum, Gumrash, Red Gown, Tooth Rash*, (F.) *Strophule, Feux de dents*. It consists of an eruption of red, or sometimes whitish pimples, *White Gum, Milkspots*, occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seems at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateman reckon five species,—*Strophulus intertinctus, Red gum or gown; S. albidus, white gum; S. confertus, Rank red gum, Tooth rash; S. volat'ius* or *Eryth'ema volat'ium*, and *S. candidus*.

STROPHULUS SYLVESTRIS, *Ignis sylvaticus*—s. *Volaticus, Ignis sylvaticus*.

STROPHUS, (*στροφος*, from *στρεφω*, 'to twist,') *Tormina*.

STRUCTIO, (from *struere, structum*, 'to build,') *Structure*.

STRUCTURAL, *Structuralis*. Of, or belonging to, structure.

STRUCTURE, *Structura, Structio, Conformatio, Catascen'e*. The arrangement of the different tissues or organic elements of which animals and vegetables are composed. See *Tissue*.

STRUMA, gen. *Strumæ*, *Bronchocele, Serofula. Struma Adiposa, Obesitas colli*. Fatty neck. Prominence of the neck from obesity.

STRUMA FUNGOSA, *Encephaloid*.

STRUMES, *Serofula*.

STRUMEUX, *Serofulous*.

STRUMOSIS CEREBRI, *Encephalophymata*—s. *Pulmonum, Tubercles of the lungs*.

STRUMOSUS, *Serofulous*.

STRUMOUS, *Serofulous*.

STRUTHIOPHAGUS, (*στρουθιον*, 'a young ostrich,' and *φαγω*, 'I eat.')

Struthiophagous tribes still exist in some parts of Africa.

STRUTHIUM, (*στρουθιον*,) *Saponaria*.

STRUVE'S LOTION FOR HOOPING-COUGH, see *Lotion, Struve's*, for *hooping-cough*.

STRYCHNIA, (from *strychnos*,) *Strychnina, Strychnine, Strychnin, Strychninum, Strychnium, Tetanium, Vanquellin, Tetanin*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been found in *Strychnos nux vomica, S. Colubrina, S. Tienté, Igua'tia amara, Cerbera Thevetia*, and *C. Aholvai*. (*Nucis vomice* rasur. lbiv: *Calcei pulv. ʒvj; Acid. marii* t. ʒij; *Alcohol, Acid. sulphuric. dil., Liquor. anemonie, Carbon. animal. purif., Aqua, aa* q. s. Digest the nux vomica in two

gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours; then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes; frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors, and distil off the alcohol by means of a waterbath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S. 1851. A somewhat modified form is in Ph. U. S. 1863.) The action—therapeutical and toxic—of strychnia on man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like nux vomica. Dose, one-sixteenth to one-twelfth of a grain.

STRYCHNIA, ACETATE OF, *Strychniæ acetat*—s. Hydriodate of, *Strychniæ hydriodas*—s. Iodate of, *Strychniæ iodas*—s. Iodide of, *Strychniæ hydriodas*.

STRYCHNIA, I'ODIDE OF IODHY'DRATE OF, (F.) *Jodure d'Iodhydrate de Strychnine*, is made by pouring a solution of ioduretted iodide of potassium into a solution of a salt of strychnia; treating the precipitate with boiling alcohol, and crystallizing. Used in the same cases as strychnia. Dose, a tenth to a sixth of a grain.

STRYCHNIA, MURIATE OF, *Strychniæ murias*—s. Nitrate of, *Strychniæ nitras*—s. Sulphate of, *Strychniæ sulphas*.

STRYCHNIA AND ZINC, DOUBLE IODIDE OF, Zinc and Strychnia, double iodide of.

STRYCHNIE ACET'AS, *Strychnium* seu *Strychninum acetiam*, *Ac'etate* *strychni* seu *strychnicus*, *Ac'etate* of *Strychnia* or *Strychnine*. (This salt is formed by the direct combination of strychnia with acetic acid.) It is given in the same cases as pure strychnia.

STRYCHNIE HYDRI'ODAS, *S. Iodhy'dras*, *Strychnium hydroiodicum*, *Hydri'odas* seu *Iodhy'dras etrychnicus*, *Hydri'odate* or *I'odide* of *Strychnia*, is prepared by mixing a solution of iodide of potassium with a concentrated solution of acetate of strychnia.

STRYCHNIE I'ODAS, *Strychniæ I'odas*, *Strychnina I'odata*, *Strychnium* seu *Strychninum I'odatum*, *I'odas* *Strychni* seu *Strychniens*, *I'odate* of *Strychnia* or *Strychnine*. (This salt may be formed by adding a concentrated solution of iodide acid to strychnia; treating with boiling alcohol; filtering, and leaving it to spontaneous evaporation.)

STRYCHNIE MU'RIAS, *Mu'riate* of *Strychnia*. (The product of the union of muriatic acid and strychnia.) Used in the same cases as strychnia.

*Liquor Strychnia*, *Solutio* of *Strychnia* (Ph. B. 1864), is composed of *Strychnia*, gr. iv; Acid, hydrochlor. dil. ℥vj; Sp. rectif. ʒij; Aq. destillat. fʒvj. Dose, gtt iv—viij.

STRYCHNIE NI'TRAS, *Strychnium nitricum*, *Nitrate* of *Strychnia* or *Strychnine*, (F.) *Nitrate* or *Azotate* of *Strychnine*. (The product of the union of nitric acid and strychnia.) Used in the same cases as strychnia.

STRYCHNIE SUL'PHAS, *Strychnium sulphuricum*, *Sul'phate* of *Strychnia* or *Strychnine*. (The product of the union of strychnia and sulphuric acid is admitted into the Ph. U. S. for 1863.) Has the same properties.

STRYCHNINA, Strychnia.

STRYCHNINE, Strychnia—s. Azotate of Strychnie nitras.

STRYCHNINUM, Strychnia.

STRYCHNINUM, see *Strychnos nux vomica*.

STRYCHNIUM, Strychnia—s. Aceticum, *Strychniæ acetat*—s. Nitricum, *Strychniæ nitras*—s. Sulphuricum, *Strychniæ sulphas*.

STRYCHNOMANIA. With the ancients, the delirium caused by the *Strychnos* or *Atropa belladonna*.

STRYCHNOS, (στυχνος), *Atropa belladonna*, *Solanum dulcamara*—s. *Colubrina*, see *Strychnia*, and *S. Nux vomica*—s. *Guianensis*, see *Curare*—s. *Ignatii*, *Ignatia amara*.

STRYCHNOS NUX VOM'ICA, *Nux Vomica*, *Metella Caniram*, *Kooch'la tree*. Nat. Ord. *Loganiaceæ*. *Sex. Syst.* *Pentandria Monogynia*. (F.) *Vomiquier*. A tree of the family *Strychnoides*,

which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica*, *Vom'ic* or *Poison nut*, *Bachelor's buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but subsequently an alcoholic extract was prepared from them, which was administered in paralytic affections, in small doses. The dose of the ALCOHOLIC EXTRACT, *Extractum nucis vomicæ spirituosum* seu *nucis vomicæ resinosum* seu *nucis vomicæ alcoholicum* (Ph. U. S. 1863), (F.) *Extrait alcoolique de noix vomique*, is one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhoea and dysentery.

When taken to such an extent as to induce toxic phenomena—*Strychnism*—it causes, at first, or when given in a smaller dose, greatly augmented excitability of the spinal nervous system, with slight transient paroxysms or spasms of the limbs, and hurried respiration. In larger doses, the excitability is still more developed, with paroxysms of prolonged general tetanic convulsions, laryngismus or contraction of the glottis, violent efforts of respiration, and asphyxia.

The following is the formula for the preparation of the EXTRACTUM NUCIS VOMICÆ ALCOHOLICUM of the Pharm. U. S. Take of *Nux vomica*, ℥j; Alcohol, a sufficient quantity. Expose the *Nux Vomica* to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistency.

Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistency.

the fluid contains, to be deposited, it is supposed, by its albumen and casein.

STRYCHNOS PSEUDOQUINA, *Quina do Campo*, of Brazil, is used by the natives as a substitute for cinchona.

STRYCHNOS TIEUTÉ, see *Strychnia*, and *Upás*—*r.* Toxicaria seu Toxifera, see *Curare*.

STRYPHNA, Astringents.

STRYPHINOS, (στυφινος, 'sour, harsh,') *Acerb.*

STUDIOSUS MEDICINÆ, ('fond of medicine,') *Philiatros*.

STUDIUM INANE, 'empty study,' *Aphelxia otiosa*.

STUDY, BROWN, *Aphelxia otiosa*.

STUFF, ([D.] *stoffe*, [F.] *estoffe*, *étouffe*,) see *Medicament*, and *Falsifications*, table of.

STUFFING, *Cynanche trachealis*, *Filling*.

STULTITIA, *Fatuitas*.

STUMP, ([G.] *Stumpf*, [D.] *Stomp*,) (F.) *Μοignon*. The part remaining from which a limb or other part has been amputated or removed in any manner. Also, the portion of a tooth remaining in the alveolus, after the corona has been removed, (F.) *Chicot*.

STUMPFOOT, *Kyllosis*.

STUNNED. (Old French, *Estonné*, *Étonné*, [L.] *attonitus*, 'astonished,' [Sax.] *ƿrunian*, 'to stun,') An epithet applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, (στυπη,) *Stupha*, *Stuppa*, *Stupeion*. Tow, used in certain surgical apparatuses and dressings, (F.) *Étoupe*. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe*. The act of applying such stupe is called *stumping*.

STUPE, *Stupa*.

STUPEFACIENTIA, (*stupere*, 'to be benumbed,') and *facere*, 'to make,') *Narcotics*.

STUPEFACTIVS, *Narcotics*.

STUPEFACTIO, *Narcosis*.

STUPEFIANTS, *Narcotics*.

STUPEION, (στυπειον,) *Stupa*.

STUPEUR, *Stupor*.

STUPHA, *Stove*, *Stupa*.

STUPIA, *Tin*.

STUPIDITAS, (from *stupere*, 'to be benumbed,') *Idiotism*, *Imbecility*.

STUPING, see *Stupe*.

STUPOR, (*stupere*, 'to be benumbed,') *Ecplexia*, *Eplexia*, *Conterna'tio*, (Sc.) *Swarff*, *Swerf*, (F.) *Stupeur*. Diminished activity of the intellectual faculties, often amounting to lethargy. It occurs in many affections, especially in the neuroses.

STUPOR, *Narcosis*—*s.* *Artuum*, *Obdormitio*—*s.* *Dentium*, *Hæmodia*—*s.* *Formicans*, *Formicatio*—*s.* *Mentis*, *Fatuitas*—*s.* *Vigilans*, *Catalepsy*.

STUPPA, (στυπη,) *Stupa*.

STUPRATIO, *Stuprum*.

STUPRUM, *Rape*, *Stupra'tion*, (F.) *Défloration*, *Viol.* *Forcible* and *illicit* enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Défloration*, *Déflora'tio*, *Devirgina'tio*, *Vitiat'io*, *Apanthis'mus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine,—if signs of virginity no longer exist,—whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily

distinguished than that which has taken place some time.

STUTTERING, ([D.] *stotteren*, 'to stutter,') formed by onomatopœia, *Balbuties*.

STYAN, ([Sax.] *ƿtizen*, from *ƿtisan*, 'to ascend, to rise,') *Hordeolum*.

STYE, *Hordeolum*.

STYGMATES. M. J. Cloquet has proposed this word, or *Stigmates*, (from *στυγμα*, pl. *στυγματα*, 'a mark,') to designate the marks, in form of cicatrices, which remain on the peritonæum after the obliteration of the neck of a hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibrocartilaginous nature.

STYLET, (from *stylus*,) see *Specillum*.

STYLI, (pl. of *stylus*,) *Styloid process*.

STYLIENS (MUSCLES), see *Bouquet anatomique de Riouan*.

STYLIFORM, (*stylus*, and *forma*, 'shape,') *Styloid*.

STYLO, (from *στυλος*, 'a style,') in composition, the *styloid process* of the temporal bone.

STYLOCERATOHYOÏDEUS, *Stylohyoideus*—*s.* *Ceratoides*, *Stylohyoideus*.

STYLOCHONDROHYOÏDEUS. A name given by Douglas and Albinus, to a fleshy fasciculus which the *stylohyoid muscle* sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylohyoïdes novus*, *Stylohyoïdes alter*.

STYLOGLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the *styloid process* of the temporal bone, and to the *stylomaxillary ligament*; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLOHYOÏDEUS, *Styloceratohyoïdes*, *Styloceratoïdes*, *Stylohyoïdes major*, (F.) *Stylohyoïdien*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly: anteriorly, it opens to give passage to the tendon of the *digastricus*. It is attached to the *styloid process* of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

STYLOHYOID LIGAMENT is a fibrous flattened cord, which passes from the *styloid process* to the lesser cornu of the os hyoides.

STYLOHYOID NERVE is the second branch given off by the facial.

STYLOMASTOID, *Stylomastoïdes*. That which relates to the *styloid* and *mastoid processes*.

STYLOMASTOID ARTERY arises from the posterior auricular, and, in some subjects, from the occipital. It enters the *stylomastoid foramen*; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the *mastoid cells* and *semicircular canals*; and terminates by anastomosing with a branch of the *Arteria meningea media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylomastoid*—to the posterior auricular artery itself.

STYLOMASTOID FORAMEN, *Foramen Stylomastoïdenum* seu *Aqueductus Fallopii*, (F.) *Trou anonyme*, is situate at the inferior surface of the petrous portion of the temporal bone, between the *styloid* and *mastoid processes*. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLOMAXILLARY, *Stylomaxilla'rie*. That which relates to the *styloid processes* and the jaw.

The STYLOMAXILLARY LIGAMENT is a ligamentous, flat cord, extending between the *styloid process* and the angle of the jaw.

STYLOPHARYNGEUS, (F.) *Stylo-thyro-*

*pharyngien*. A muscle situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylopharyngeus, and palatopharyngeus.

**STYLOID**, *Styliformis*, (*στυλοειδής*.) *Styloïdes*, *Graphioïdes*, *Graphoïdes*, (*στυλοειδής*, *στυλοειδής*, *στυλοειδής*, *στυλοειδής*.) *Styloïdes*, *Graphioïdes*, *Belonoïdes*, (from *στυλος*, 'a style,' 'a peg,' 'a pin,' and *εὖρος*, 'shape.') Shaped like a peg or pin.

**STYLOID CORNUA**, see *Hyoides* os.

**STYLOID PHOCÆSSES**, *Pencil-like Procœsces*, *Processus Beloïdes* seu *Bellemoïdes* seu *Belonoïdes* seu *Graphioïdes* seu *Graphoïdes*, *Styli*, are, 1. A long and slender process of the temporal bone, to which are attached the styloglossus, stylopharyngeus, and stylohyoides muscles, and the stylohyoid and styloaxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

**STYLO-THYRO-PHARYNGIEN**, *Stylopharyngus*.

**STYLOPHORUM DIPHYLLUM**, (*στυλος*, 'a style,' and *φέρω*, 'to bear,') *Mecoporis diphylla*, *Chelidonium diphylum*, *Celandine* or *Hornpoppy*, *Brüseroot*. An indigenous plant, of the family *Papaveraceæ*, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel; and has been applied externally to contusions, &c.

**STYLOSTIXIS**, (*stylos*, 'a style,' and *στιξίς*, 'the act of puncturing,') *Acupuncture*.

**STYLUS**, (*στυλος*, 'a stake, a style,') *Stilus*, *Sound*.

**STYLUS EXCAVATUS**, *Specillum excavatum*. A hollow sound.

**STYMA**, gen. *Stymatis*, (*στυμα*, from *στυνω*, 'to stiffen,') *Erection*, *Priapismus*.

**STYMATOSIS**, (from *styma*, and *osis*), *Stimatosis*.

**STYMMATA**, (*στυμμα*, gen. *στυμματος*, 'that which constricts or thickens,') The most solid ointments. Also, the ingredients proper for increasing their consistence.

**STYPSIS**, (*στυψίς*), *Astriction*, *Constipation*.

**STYPTERIA**, (*στυπτήρια*), *Alumen*, *Styptics*.

**STYPTIC**, (*στυπτικός*), see *Styptics*.

**STYPTIC**, *BINELLI'S*, *Aqua Binellii* — s. *Brocchieri's*, *Aqua Brocchieri*.

**STYPTIC**, *E'ATON'S*. A name first given to *Helictius Styptic*, when introduced into Great Britain. It is now usually made of calcined green vitriol, ℥j; *proof spirit*, tinged with a little oak bark, Oij.

**STYPTIC**, *HELVETIUS'S*, see *Ferrum tartarizatum*, and *Styptic*, *Eaton's*.

**STYPTIC**, *PAGLIARI'S*, *Hæmostatic*, *Pagliari's*.

**STYPTIC**, *RUSPINI'S*, *Liquor Stypticus Ruspini*. A nostrum, said to consist of *Galic acid*, a small quantity of *Sulphate of zinc* and *Opium*, dissolved in a mixture of *Alcohol* and *Rosewater*, which has had much reputation as an internal and external astringent.

**STYPTICS**, *Contrahentia*, *Constrictiva Medicamenta*, *Constringentia*, *Anastaltica*, *Catastaltica*, *Stypteria*, (F.) *Styptiques*, (*στυπτικά*, from *στυψω*, 'I constrict,') Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hæmorrhage, — *Emmon*. A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessels, or by inducing a coagulum, *mechanically*, in it. A *chemical styptic*

is one which coagulates, *chymically*, the blood around a bleeding orifice.

**STYRAC'INUM O'LEUM**. Oil obtained by boiling storax in good olive oil.

**STY'RAX**, gen. *Styracis*, (*στυραξ*, gen. *στυρακος*.) A resin obtained from *Styrax officinalis*, and *S. calami'ta*. It is the *solid storax*; — *officinal storax*. There are two kinds of storax met with: 1. *Red Storax*, *Gum Storax*, *Thus Judæorum*, *Styrax rubra*, *Styracis balsamum*, *Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and perhaps from the *Liquidam'bar Orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax*, *Styrax calami'ta*. That which has been received in reeds or vessels, and has had sawdust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

**PURIFIED STORAX**, *S. calami'ta seu purificata*, *S. præparata*, *Extractum styracis*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence. — Ph. U. S. Dose, gr. x. to xxx.

**STYRAX ALBA**, see *Myroxylon Peruiferum* — s. *Benzoin*, see *Benjamin* — s. *Calamita*, see *Styrax* — s. *Liquida*, *Liquidambar styraciflua* — s. *Officialis*, see *Styrax*.

**STYSIS**, (*στυσις*), *Erection*, *Priapismus*.

**SUAVEOLENS**, (*suavis*, 'sweet,' and *oleus*, 'smelling,') *Beneolens*.

**SUB** (L.), in composition, 'beneath,' or 'a lower degree.' Before c it becomes *suc*; before f, *suf*; before g, *sub*; before p, *sup*; before r, *sur*; and before s, *sus*. In some words, however, it is *sub*, as in *subspiro*. The French *sous*, as a prefix, has the same signification.

**SUBACIDUS**, *Acidulous*.

**SUBACTIO**, *Chiro'sis*, *Chiro'sis*, (*subigo*, *subactum* (*sub*, and *ago*), 'to subject, to prepare,') The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

**SUBAFFECTIO**, *Hydrophathia*.

**SUBAGITATRIX**, (*sub*, and *agitare*, 'to agitate,') *Tribade*.

**SUBATLOIDE'US**, *Infraculoïdeus*, (F.) *Subatloïdien*. That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

**SUBAXOÏDE'US**, *Infracœxoïdeus*, (F.) *Subaxoïdien*. That which is below the axis or vertebra dentata. Chaussier has given this name to the third pair of cervical nerves.

**SUBAZOTAS BISMUTHICUS**, *Bismuth*, *subnitrate* of.

**SUBBORAS NATRICUM**, *Borax*.

**SUBCARTILAGINEUM**, (*sub*, and *cartilago*, 'cartilage,') *Hyochondre*.

**SUBCHLORIS CALCICUS**, *Calcis chloridum*.

**SUBCLA'VIAN**, *Subclavius*, *Subclavicularis*, (F.) *Sousclavier*, (*sub*, and *clavis*, 'clavicle,') That which is under the clavicle.

**SUBCLAVIAN ARTERIES**, (F.) *Artères sousclavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachiocephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scapular muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral* and *inferior thyroïdeal*. 2. *Downwards*, the *internal mammary* and *superior intercostal*. 3. *Out*

wards, the *transverse cervical* or *posterior scapular*, the *superior scapular*, and the *posterior cervical* or *profunda*.

**SUBCLAVIAN** or **SUBCLAVIUS MUSCLE**, *Subclaviarius*, (F.) *Costo-claviculaire* (Ch.), *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

**SUBCLAVIAN VEINS**, (F.) *Veines sous-clavières*, are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

**SUBCLAVICULA**, (*sub*, and *clavicula*, 'clavicle.')

The first rib.

**SUBCLAVICULARIS**, Subclavian.

**SUBCLAVIUS**, Subclavian muscle.

**SUBCREPITANT**, (*sub*, and *crepitant*), see

*Râle muqueux*.

**SUBCRUENTUS**, 'somewhat bloody;' (*sub*, and *cruentus*, 'bloody;') *Hyphæmos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

**SUBCRURÆL**, see *Cruræus*.

**SUBCUTANEOUS**, *Subcutaneus*, (*sub*, and *cutis*, 'the skin;') *Intercutaneus*, (F.) *Sous-cutané*. That which is placed immediately under the skin. See *Hypodermic*.

**SUBCUTANEOUS SECTION**, *Hypodermatomy*.

**SUBCUTANEOUS COLLI**, *Superficialis colli*—s. *Malæ* (Nervus), *Orbital nerve*.

**SUBDELIRIUM**, *Typhomania*.

**SUBDITA**, *Subditiva*, (*subdere*, (*sub*, and *dare*, 'to give,') 'to put under;') *Pros'theta*. Medicines introduced into some one of the natural apertures:—as suppositories, pessaries, &c.

**SUBDITIITA**, *Subdita*.

**SUBDUCTIO**, (*sub*, and *ducere*, *ductum*, 'to lead,') *Dejection*.

**SUBER**, gen. *Su'beris*, *Cork*:—the bark of *Quercus Su'ber* or *Corktree*, (F.) *Liège*. *Family*, *Amentacæ*. *Sex. Syst.* *Monœcia Polyandria*, *Cork*, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

**SUBETH**, *Coma*.

**SUBFRONTALIS SUTURA**, (*sub*, and *frons*, gen. *frontis*, 'the forehead.')

A suture resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

**SUBGRONDATION**, *Depression*.

**SUBHUMERATIO**, (*sub*, and *humerus*, 'the shoulder,') *Catomismus*.

**SUBIGITATRIX**, (*sub*, and *agitare*, 'to agitate,') *Tribas*.

**SUBINFLAMMATIO**, *Subinflammation*—s. *Hepatis*, *Hepatitis*, *chronic*.

**SUBINFLAMMATION**, *Subinflammatio*, (*sub*, and *inflammatio*,) *Inflammationcula*, *Hypophlegmasia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. *Broussais* understood by the term, an augmenta-

tion in the vital phenomena of the vessels that convey white blood. There are, however, no such vessels. Lymphatic engorgements, serofula, herpes, and cancer be considered *subinflammations*.

**SUBINTRANTES FEBRES**, (*sub*, and *intrare*, 'to enter.')

*Communicantes febres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.

**SUBJECT**, (*subjicere*, *subjectum*, (*sub*, and *jacere*,) 'to place under,')

*Cadaver*.

**SUBJECTIVE SENSATIONS**, see *Sensation*.

**SUBJEE**, *Bangue*.

**SUBLIGACULUM**, (*sub*, and *ligare*, *ligatum*, 'to bind,')

*Truss*.

**SUBLIGATURA**, *Truss*.

**SUBLIMATE**, *CORROSIVE*, *Hydrargyri oxyurias*.

**SUBLIMATIO**, *Enœorema*, *Sublimation*.

**SUBLIMATION**, *Sublimatio*, *Meteoris mus*, *Hypos'is*, (*sublimare*, *sublimatum*, 'to raise on high.')

An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sub'imate*, *Sublimatum*, (F.) *Sublime*.

**SUBLIMATUM CORROSIVUM**, *Hydrargyri oxyurias*.

**SUBLIMATUS CORROSIVUS**, *Hydrargyri oxyurias*.

**SUBLIME**, *Enœorema*.

**SUBLIME**, *Sublimis*.

**SUBLIME**, see *Sublimation*—s. *Corrosif*, *Hydrargyri oxyurias*.

**SUBLIMIS**, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term *respiration sublime* for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the alæ nasi at the time of inspiration.

**SUBLINGUA**, (*sub*, 'a lower degree,' and *lingua*, 'tongue,')

*Uvula*.

**SUBLINGUAL**, *Sublingualis*, (F.) *Souslingual*, (*sub*, and *lingua*, 'the tongue,')

That which is seated under the tongue.

**SUBLINGUAL ARTERY**, with some, is the *Lingual*. With others, it is a branch given off by the lingual opposite the genioglossus muscle, which is distributed particularly to the sublingual gland, to the mylohyoid, and genioglossus muscles, &c.

**SUBLINGUAL GLAND**, *Glandula sublingualis* seu *Bortholiniana* seu *Rivinianna*, is seated in the substance of the inferior paries of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts—*Ductus Rivinianni* seu *Waltherianni*—some of which open beneath the frænnum linguæ, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

**SUBLINGUIUM**, *Uvula*.

**SUBLINGUUM**, *Epiglottis*.

**SUBLOBULAR**, *Sublobularis*, (*sub*, and *lobulus*, 'a little lobe.')

That which is placed under a lobe.

**SUBLOBULAR VEINS OF THE LIVER**. The veins in which the intralobular veins terminate. By

their union, the sublobular veins form the hepatic veins.

**SUBLUXATIO**, (*sub*, and *luxare*, 'to dislocate,') *Subluxation*. An imperfect luxation of a bone, see Luxation. Not unfrequently, used for a sprain.

**SUBMAMMARY**, *Submammaris*, (F.) *Sous-mammaire*, (*sub*, and *mamma*, 'the breast,') Under the mamma or breast;—hence, 'submammary inflammation,' inflammation of the areolar tissue beneath the mamma.

**SUBMAXILLARY**, *Submaxillaris*, *Inframaxillaris*, (F.) *Sous-maxillaire*, (*sub*, and *maxilla*, 'the jaw,') That which is seated beneath the jaw.

**SUBMAXILLARY GANGLION** is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

**SUBMAXILLARY GLAND**, *Maxillary Gland*, *Hypogonathaden*, *Hypossialaden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum lingue, by a very small orifice. It is also called *Ductus inferior*.

**SUBMENTAL**, *Submentalis*, (F.) *Sousmental*, (*sub*, and *mentum*, 'the chin,') Situate under the chin.

**SUBMENTAL ARTERY** is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylohyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infrahyoid region.

**SUBMENTAL VEIN**, which accompanies the artery, opens into the labial.

**SUBMER'SION**, *Submersio*, (*sub*, and *mergere*, *mergere*, 'to plunge,') The act of plunging, or being entirely plunged, in a liquid.

*Asphyxia by submerston*, *A. Immerorium*, *Drowning*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

**SUBMISSIO**, (*sub*, and *mittere*, *missum*, 'to send,') Remission—s. Cordis, Systole.

**SUBMUCOUS**, *Submucosus*, (*sub*, and *mucosus*.) Under a mucous membrane,—as the 'submucous areolar tissue.'

**SUBMURIAS AMMONIACOHYDRARGYRICUS**, *Hydrargyrum præcipitatum*.

**SUBMUSCULAR**, *Submuscularis*, (*sub*, and *muscules*, 'a muscle,') Seated beneath muscles or a muscular layer.

**SUBOCCIPITAL**, *Suboccipitalis*, (F.) *Sous-occipital*, (*sub*, and *occiput*.) That which is situated under the occiput.

**SUBOCCIPITAL NERVE**, Occipital nerve.

**SUBORBITAR**, *Suborbitalis*, *Infraorbitalis*, *Infraorbitalis*, (F.) *Sous-orbitaire*, (*sub*, and *orbita*, 'the orbit,') That which is seated beneath the orbitar cavity.

**SUBORBITAR ARTERY**, *Infraorbitalis A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infraorbital canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infraorbitalum; and divides, in the fossa

canina, into a number of branches, which lose themselves in the neighbouring parts. The infraorbital vein follows the same course.

**SUBORBITAR CANAL**, *Infraorbital Canal*, (F.) *Canal ou Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen infraorbitalium*, (F.) *Trou sous-orbitaire*. The infraorbital artery and nerve pass along it.

**SUBORBITAR FIS'SURE**, *Infraorbital Fis'sure*, *Fis'sura infraorbitalis*, *Rima canalis orbitalis*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

**SUBORBITAR FOSSA**, Canine fossa.

**SUBORBITAR NERVES**, *Infraorbital Nerves*, seem to terminate the superior maxillary. They issue from the infraorbital canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into superior or palpebral filaments, inferior or labial, internal or nasal, and external or buccal.

**SUPERITONEAL**, *Superitonealis*, (*sub*, and *peritoneum*.) That which lies under the peritoneum.

**SUPERITONEAL APONEUROSIS**, Fascia, superitoneal—s. Ganglia, see Spermatic ganglion.

**SUBPLACENTA**, *Decidua membrana*.

**SUBPLEURAL**, *Subpleuralis*, (*sub*, and *pleura*.) Situate under the pleura.

**SUBPOPLITÆUS**, *Poplitæus* muscle.

**SUBPUBIC ARCH**, *Ar'cus subpubicus*, (*sub*, and *pubis*.) A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

**SUBPUBIC MEMBRANE**, Obturator membrane.

**SUBPUBIOFEMORALIS**, *Abductor brevis*—s. Prostaticus, Compressor prostate.

**SUBPUTRIS**, (*sub*, and *putris*, 'putrid,') Hyposaprus.

**SUBSCAPULAR**, *Subscapularis*, (F.) *Sous-scapulaire*, (*sub*, and *scapula*.) That which is beneath the scapula.

**SUBSCAPULAR FOS'SA**, *Fos'sa subscapularis*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

**SUBSCAPULAR MUS'CLE**, *Subscapularis Mus'cle*, *Immersus*, *Infrascapularis*, (F.) *Sous-scapulo-trichimien* (Ch.), *Porte-fenille*, *Muscle-sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

**SUBSCAPULAR NERVES** are two in number. One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

**SUBSEROUS**, *Subserosus*, (*sub*, and *serous*.) Under a serous membrane,—as the 'subserous areolar tissue.'

**SUBSIDENTIA**, (*sub*, and *sedere*, 'to settle,') Sediment.

**SUBSTANCE ÉMAILLÉE DES DENTS**, Enamel of the teeth—s. Horny, see Tooth.

**SUBSTANCE, HYALINE**, *Cytoplastema*—s. *Intercellular*, *Cytoplastema*—s. *Vitrée des dents*, Enamel of the teeth.

**SUBSTANCE, WHITE**, OF SCHWANN. A hollow cylinder within the tubular nervous fibre, which

differs in composition and refracting power from the matter that occupies the centre of the tube.

**SUBSTANTIA ADAMANTINA DENTIUM**, 'adamantine substance of the teeth,' Enamel.

**SUBSTANTIA COMPACTA**, see Bone.

**SUBSTANTIA FERRUGINÆA**, *Lo'eus cine'rens*. 'An ashecoloured substance produced by the existence of well-marked pigmentary matter in the floor of the fourth ventricle or *rhomboid fossa*.

**SUBSTANTIA FILAMENTOSA DENTIUM**, Enamel—s. *Grisea centralis*, see *Medulla spinalis*—s. *Hyalina*, *Cytoblastema*—s. *Nigra pedunculi*, see *Peduncles of the brain*—s. *Ossea dentium*, see *Tooth*—s. *Osteoidea*, see *Tooth*—s. *Perforata anterior*, *Locus perforatus anticus*.

**SUBSTANTIA PERFORATA MĒDIA**. When the pia mater has been removed from the space between the crura cerebri, termed the *intercentral* or *interpeduncular*, the surface appears cribriform, from the perforations of the numerous minute vessels which penetrate it. This is the *substantia perforata mēdia* of Vieq d'Azyr.

**SUBSTANTIA PERFORATA POSTERIOR**, see *Tarini pons*—s. *Pulposa dentis*, *Dental pulp*—s. *Radiata*, *Stellula Verheyenii*—s. *Rhomboidæa*, *Corpus dentatum*—s. *Spongiosa*, see *Bone*—s. *Spongiosa urethræ*, *Corpus spongiosum urethræ*—s. *Stellata serpentina*, *Stellula Verheyenii*—s. *Vitreæ*, *Cytoblastema*—s. *Vitreæ dentium*, Enamel.

**SUBSTANTIVE**, *Substantivus*, (*substare*, (*sub*, and *stare*), 'to stand under or subsist,') An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment; the condiment, as mustard, eaten with it, an *adjective* aliment.

**SUBSTILLUM**, (*sub*, and *stilla*, 'a drop,') *Stillicidium*.

**SUBSTITUTED PRESENTATION**, see *Presentation*.

**SUBSTITUTIVE**, *Substitutivus*, (*sub*, and *statuere*, 'to place,') That may be substituted or put in place of another. An agent is said to be 'substitutive,' which—as in the case of nitrate of silver applied to inflammation of a mucous membrane—substitutes a temporary irritation for one tending to be more permanent. Such a mode of treatment is termed *substitutive medication*, (F.) *Médication substitutive*.

**SUBSULTIO**, (*subsilio*, *subsultum*, (*sub*, and *salio*), 'to make short leaps,') *Palpitation*.

**SUBSULTUS TENDINUM**, *Salvus ten'dinum*, *Clonus subsultus*, *Subsultus*, *Carpholog'ia spasmod'ica*, *Myopal'mus*, *Twitch'ing of the Tendons*, (F.) *Soubresaut des tendons*. Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere, and is an evidence of great cerebral irritability and debility when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibilitas*, *Scleroty'bis febrilis*, and *Irritabilitas morbo'sa*.

**SUBSURDITAS**, (*sub*, and *surdus*, 'deaf,') *Deafness*.

**SUBUBERES**, (*sub*, and *ubera*, 'the breasts,') *Infantes suge'ates*, *Suck'ing chil'dren*. Infants at the breast, in contradistinction to *Exu'beres*, *αγαλακτοι*, or those which have been weaned.

**SUBUNGUAL**, *Subun'gual*, *Subun'gualis*, (F.) *Sous-ungu'eale*, (*sub*, and *unguis*, 'a nail,') Belonging to parts under the nail—as *subungual exostosis*, (F.) *Exostose sous-ungu'eale*, an exostosis under the nail of the great toe especially.

**SUBVERSIO STOMACHI**, (*sub*, and *vertere*, *versum*, 'to turn,') *Vomiturition*.

**SUBVERTEBRA**, (*sub*, and *vertebra*), *Sacrum*.

**SUBVERTEBRUM**, *Sacrum*.

**SUBVOLA**, (*sub*, and *vola*, 'the palm of the hand,') *Hypothenar*.

**SUC**, *Succus*—s. *de Citron*, see *Citrus medica*—s. *Gastrique*, *Gastric juice*—s. *de Kino*, *Kino*—s. *du Limon*, see *Citrus medica*—s. *Médullaire*, *Marrow*—s. *Nonr'cier*, *Liquor sanguinis*—s. *Pancrétique*, see *Pancreas*.

**SUC**, as a prefix, *Sub*.

**SUCCA'GO**, gen. *Succag'inis*, (from *succus*, 'juice,') The inspissated juice of plants, robs, jellies, &c.

**SUCCĒDANĒ**, *Succedaneum*.

**SUCCĒDANEUM**, *Succida'neum*, *Substitutum Antiballon'enium*, *Surroga'tum*, *Anteballon'enium*, *Quid pro quo*, (*succedere*, (*suc*, and *cedere*), 'to go under, to come in place of another,') (F.) *Succédané*. An epithet for medicines that may be substituted for others possessing similar properties. Also, used, in dentistry, for an amalgam for filling teeth.

**SUCCENTURIA'TUS**, (*succenturiare*, (*suc*, and *centuria*), 'to supply a soldier to fill a vacancy,') and hence, 'to substitute or put in the room of,') That which is a substitute for another—as *Reues succenturiati*, *Ventriculus succenturiatus*, &c.

**SUCCHAR**, *Saccharum*.

**SUCCIDANEUM**, *Succedaneum*.

**SUCCIN**, *Succinum*.

**SUCCINCTURA**, (*suc*, and *cingere*, *cinctum*, 'to gird,') *Diaphragm*.

**SUCCINCTUS**, *Diaphragm*.

**SUCCINI RESINA**, *Musk*, artificial.

**SUCCIN'IC** or **SUC'CINIC ACID**, *Ac'idum Suc'cini*, *A. Succin'icum*, *Ac'or Suc'cini'ens*, *Sat Suc'cini*, *Sat volat'ilis Suc'cini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

**SUC'CINUM**, *Suc'cinum*, *Elec'trum*, *Am'bra*, *Am'bram*, *Am'par*, *Bereni'ce*, *Am'ber*, *Yel'low Am'ber*, (F.) *Succin*, *Ambre jaune*, (from *succus*, 'juice,' because at one time supposed to exude from a tree.) This kind of fossil resin, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour; transparent, and has a shining lustre. S. g. 1.08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil, obtained by destructive distillation, —the *O'leum seu Bal'samum Suc'cini*, (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *O'leum Suc'cini rectificatum*, *Rectified Oil of Am'ber*, is made as follows:—*Oil of Amber*, Oj; *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in wellstopped bottles.—(Ph. U. S.)

The *White am'ber*, *Leuc'ec'trum*, (F.) *Ambre blanc*, is a variety.

**SUCCINUM CINEREUM**, *Ambergris*—s. *Griseum*, *Ambergris*.

**SUCCIO**, *Sucking*.

**SUCCISA**, (from *succidere*, *succisum*, 'to cut,') from its indented appearance.) *Scabiosa succisa*—s. *Pratensis*, *S. succisa*.

**SUCCOLLATA**, *Chocolate*.

**SUCCOLATA**, *Chocolate*.

**SUCCORY**, **WILD**, *Cichorium intybus*, *Chironia angularis*.

**SUC'COTASH**, *Suck'atash*. A term of Indian derivation. A favorite dish in New England, formed of *green Indian corn* and *beans* boiled together.

SUCCUBA, see Succubus.

SUC'CUBUS, (*suc*, and *cubare*, 'to lie.') Some authors have used this word synonymously with nightmare. Others mean by it, and by *Suc'cuba*, a female phantom, with which a man in his sleep may believe he has intercourse—as *In'cubus* has been applied to the male phantom, with which a female may dream she is similarly situate. See Incubus.

SUC'CUS, *Suc'cus*, *Chy'lus*, *O'pos*, *Opis'ma*, *Chy-lis'ma*, *Echylo'ma*, *Apothlin'ma*, *Juice*, (F.) *Suc*, *Jus*, (from *sugere*, *suctum*, 'to suck.') The fluid obtained by pressing plants, flesh, &c.; *Suc'cus expressus*; *Opolé* (official), *Opolide* (magistral), according to Chéreau. It is also applied to certain animal fluids, as *S. Gastricus*, &c.

SUCCUS ACACIÆ GERMANICÆ INSPISSATUS, see *Prunus spinosa*—*s. Acaciæ nostralis*, see *Prunus spinosa*—*s. Arborum*, *Sap*—*s. Aurantii*, see *Citrus aurantium*—*s. Cicutæ spissatus*, *Extractum conii*—*s. Cyrenæicus*, *Laserpitium*.

SUCCUS ENTERICUS, *S. Intestinalis*, *Liquor intestinalis* seu *entericus*, *Intestinal Juice*. The fluid copiously secreted from the lining membrane of the small intestines.

SUCCUS EXPRESSUS, *Apothlimma*—*s. Gastricus*, *Gastric Juice*—*s. Glycyrrhizæ*, *Extractum glycyrrhizæ*—*s. Hypocistidis*, see *Cytinus*—*s. Intestinalis*, *Succus entericus*—*s. Japonicus*, *Catechu*—*s. Limonis*, see *Citrus medica*—*s. Liquiritiæ*, *Extractum glycyrrhizæ*—*s. Nervæus*, *Nervous fluid*—*s. Nutritivus*, *Chyle*—*s. Orni concretus*, see *Fraxinus ornus*—*s. Pancreaticus*, see *Pancreas*—*s. Spissatus aconiti napelli*, *Extractum aconiti*—*s. Spissatus atropæ belladonnæ*, *Extractum belladonnæ*—*s. Spissatus conii maculati*, *Extractum cicutæ*—*s. Spissatus hyoseyami nigri*, *Extractum hyoseyami*—*s. Spissatus lactuæ sativæ*, *Extractum lactuæ*—*s. Thebaicus*, *Opium*.

SUCCUS'SION, *Succus'sio*, *Hippocratic Succus'sion*, (*succutio*, *succussum*, (*suc*, and *quatio*), 'I shake from beneath.') A mode of ascertaining the existence of a fluid in the thorax (*fluctuation by succussion*), by giving the body one or more slight shakes.

SUCCUSSION, *Ballottement*.

SUCHOR, *Saccharum*.

SUCINUM, *Succinum*.

SUCKATASH, *Succotash*.

SUCK'ING, *Suc'tio*, *Suc'tus*, *Bdal'sis*, *Myze'sis*, (F.) *Succion*, (from *sugere*, *suctum*, 'to suck.') The act of drawing liquid into the mouth by forming a vacuum with the tongue acting as a piston, during inspiration.

SUCKING BOTTLE. A bottle so formed that, when filled with milk, it can be sucked from instead of the breast.

SUCKING CHILD, *Lactens*. A suckling.

SUCKLE, *Lacta'ræ*, (F.) *Allaiter* ou *Allaiter*.

To give suck. To nurse.

SUCKLING, *Lactation*, *Lonicera periclymenum*, *Sucking child*.

SUCRE, *Saccharum*—*s. Candi*, *Saccharum candidum*—*s. du Foie*, see *Saccharum*—*s. de Lait*, *Sugar of milk*—*s. de Saturne*, *Plumbi superacetatis*—*s. Tors*, *Penidium*.

SUCTIO, (*sugere*, *suctum*, 'to suck,') *Exsuctio*, *Sucking*.

SUCTION POWER. The force presumed to be exerted on the blood in the veins by the active dilatation of the heart. See *Derivation*.

SUCTORIA, (*sugere*, *suctum*, 'to suck,') Animals provided with mouths for sucking. Also, organs for sucking or adhesion;—hence termed *suctorial*—as *suctorial oscula*.

SUCTORIAL, see *Suctoria*.

SUCTUS, *Sucking*.

SUCUS, *Succus*.

SUDAM'INA, pl. of *Suda'men*, *Hydro'ata*, *Hi'dro'ata*, *Pop'ulæ sudora'les*, *Suffera'n'ra*, *Alha'sef*,

*Plu'ta noc'tis*, *Bo'a*, (from *sudor*.) Small vesicles which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a miliary eruption. See *Miliary fever*.

SUDAMINA, *Desudatio*, *Échauboultures*, *Lichen tropicus*.

SUDARIUM, *Achiocolum*.

SUDATIO, *Ephidrosis*.

SUDATIUNCULA, (dim. of *sudatio*), *Ephidrosis*.

SUDATOIRE, *Sudatory*.

SUDATORIA, *Hidrosis*—*s. Maligna*, see *Sudor Anglicus*.

SUDATORIUM, *Achiocolum*.

SUDATORY, *Achiocolum*. As an adjective, (F.) *Sudatoire*, any thing that excites, or is accompanied by, sweating.

SUDOR, gen. *Sudo'ris*, *Hi'dros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

SUDOR, *Miliary fever*.

SUDOR AN'GLICUS, *S. Anglica'mus*, *Hidron'ous*, *Hidropy'ra*, *Hidropy'ctus*, *Fe'bris* seu *Milia'ris sudato'ria*, *Sudor milia'ris*, *Mor'bus sudatorius*, *Ephen'era maligna* seu *sudato'ria* seu *Britan'nica* seu *Ang'lica pestilens*, *Pest'is Britan'nica*, *Sudato'ria maligna*, *Sweat'ing Sick'ness*, *Sweat'ing Fe'ver*, (F.) *Suette*, *S. miliare*, *S. épidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486, and recurred at different times until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name *SUETTE DE PICARDIE*, *Suette des Picards*, *Fièvre suante*, *Milia'ris sudato'ria*, *Sudor Picard'icus*, to an epidemic disease, which has appeared several times in that province, the principal symptoms of which were profuse sweats and a miliary eruption. The disease recurred in 1821, and has been described at length by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues, and proposes to class it with variola, scarlatina, and measles.

A form of it in which the perspiration was of a black colour was called *Sudor An'glicus n'ger*, *Melanephidro'is*, *Black English Sweating sickness* or *fever*.

SUDOR COLLIQUATIVUS, *S. Profusus*.

SUDOR CRUES'TUS, *S. sanguin'cus*, *Hæmatidro'is*, *Hæmatidro'is*, *Ephidro'is cruent'a*, *Hæmor'rhag'ia per Cut'em*, (F.) *Hæmatidrose*, *Sueur de Sang*; *Sweating of blood*, *bloody sweat*, *Hem'orrhage from the skin*. Cutaneous perspiration intermixed with blood;—a very uncommon affection.

SUDOR DUL'CIS, *Saccharor'rho'a cuta'nea*, *Ephidro'is sacchara'ta*. A discharge of saccharine matter by perspiration.

SUDOR LOCALIS, *Meridrosis*—*s. Miliaris*, *Miliary fever*, *Sudor Anglicus*—*s. Partialis*, *Meridrosis*—*s. Picardicus*, see *Sudor Anglicus*.

SUDOR PROFUSUS, *S. Colliquativus*. A profuse or immoderate sweat.

SUDOR SANGINEUS, *Sudor cruentus*—*s. Universalis*, *Panhidrosis*.

SUDORIFER, *Sudoriferous*, *Sudorific*.

SUDORIFEROUS, *Sudor'ifer*, *Hydroph'orus*,

(*sutor*, and *fero*, 'I carry.') That which carries sweat—as the *sudoriferous* ducts or glands.

**SUDORIFIC**, *Hidrot'ic*, *Sudorificum*, *Sudorifer*, *Hidrot'icum*, *Hidrot'erium*, *Hidrotop'eum*, *Hidropoët'icum*, (F.) *Sudorifique*, *Hidrotique*, (*sutor*, and *facio*, 'I make.') A medicine which provokes sweating. See Diaphoretic.

FOUR SUDORIFIC WOODS, *Quat'or ligna sudorifica*, were, formerly, *guaiacum*, *perfumed cherry*, *sarsaparilla*, and *sassafras*.

**SUDORIPAROUS**, (*sutor*, and *pario*, 'to produce,') see Perspiration.

**SUDORIS NULLITAS**, 'nonexistence of sweat,' Anidrosis—s. Privatio, Anidrosis—s. Suppressio, Ischidrosis.

SUET, Sebum.

**SUETTE**, *Sudor Anglicus*—s. *Epidémique*, *Sudor Anglicus*—s. *Miltaire*, *Sudor Anglicus*—s. *de Picardie*, *Sudor picardicus*—s. *des Picards*, *Sudor picardicus*.

**SUEUR**, *Sudor*—s. *Anglaise*, *Sudor Anglicus*—s. *d'Expression*, *Expression*, sweat of—s. *de Sang*, *Diapedesis*, *Sudor cruentus*—s. *Urineuse*, *Uridrosis*.

SUF, as a prefix, Sub.

**SUF'FERING**, (F.) *Souffrance*, (*suf*, and *fero*, 'to bear,') Any painful feeling produced by a general or local pathological condition.

**SUFFERSURE**, (*suf*, and *fervere*, 'to be hot,') *Sudamina*.

**SUFFIMEN**, *Suffimentum*.

**SUFFIMENTUM**, *Hypocognis'ma*, *Suffi'men*, *Thyma'ma*, *Suffi'tus*, *Suffumiga'tio*, *Suffumiga'tion*, (F.) *Parfum*; (*suffio*, *suffigim*, 'I perfume,') A perfume; suffumige; fumigation.

**SUFFITIO**, *Fumigation*.

**SUFFITIO**, *Fumigation*, *Suffimentum*.

**SUFFLATIO**, (*suf*, and *flare*, *flatum*, 'to blow,') *Puffiness*.

**SUFFOCATIO**, *Suffocation*, *Orthopnoea*—s. *Hypochondriaca*, *Hypochondriasis*—s. *Hysterica*, *Angone*—s. *Mulierum*, *Hysteria*—s. *Stridula*, *Cyanche trachealis*—s. *Uterina*, *Angone*.

**SUFFOCATION**, *Suffocatio*, *Præfocatio*, *Apopiæ'is*, *Asphyxia*, *Melanæ'ma*, (*suffocare*, *suffocatum*, 'to stop the breath,' from *suf*, and *facies*, 'the jaws.' [?]) Death, or suspended animation from impeded respiration, whether caused by the inhalation of noxious gases, drowning, hanging, strangling, or smothering. The principal morbid appearances in such cases are:—the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

*Treatment of suspended animation by suffocation in general.* The patient must be conveyed into a room not too warm. Bloodletting must be used, if at all, with caution;—friction must be employed with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

For the treatment suggested by Dr. Marshall Hall, and by Dr. Silvester, see Ready Method, and Silvester's method.

**SUFFOCATION**, *Phigopho'bia*, (F.) *Étonnement*, is used, as *strangling is*, for threatened suffocation. It means the state of dyspnoea and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

**SUFFOCATION DE MATRICE**, *Hysteria*—s. *Utrine*, *Angone*, *Hysteria*.

**SUFFERAGO**, *Poples*.

**SUFFUMIGATION**, (*suf*, and *fumigare*, 'to produce smoke,') *Suffimentum*.

**SUFFUMIGE**, *Suffimentum*.

**SUFFUMIGIUM**, *Fumigation*.

**SUFFUMINATIO**, *Fumigation*.

**SUFFUSIO**, (*suf*, and *fundere*, *fusum*, 'to pour,') *Pseudoblepsia*—s. *Auriginosa*, *Icterus*—s. *Bilis*, *Icterus*—s. *Colorans*, *Chromopsia*—s. *Dimidians*, *Hemiopia*—s. *Exclarans*, *Oxyopia*—s. *Fellis*, *Icterus*—s. *Lentis crystallinae*, *Cataract*—s. *Metamorphopsis*, *Metamorphopsia*—s. *Multiplians*, see *Diplopa*—s. *Myodes*, *Metamorphopsia*—s. *Nigra*, *Amaurosis*—s. *Oculi*, *Cataract*, *Pseudoblepsia*—s. *Oculorum*, *Metamorphopsia*—s. *Radians*, *Scotasma*—s. *Sanguinis*, *Echymoma*.

SUG, as a prefix, Sub.

**SUGAR**, *Saccharum*—s. *Barley*, *Penidium*, *Saccharum hordeatum*—s. *Black*, *Extractum Glycyrrhizæ*.

**SUGAR CANDY**, *Saccharum candidum*—s. *Cane*, see *Saccharum*—s. *Cane*, *Chinese*, see *Saccharum*.

**SUGARCOATED**. Covered with a layer of refined sugar, generally mixed with starch. Sugarcoated pills are prepared like the sugarplums of the confectioners, and are much used in modern pharmacy, especially when they are composed of nauseous ingredients. See *Dragee*.

**SUGAR, DIABETIC, Glucose**—s. *Fruit*, *Glucose*—s. *Grape*, *Glucose*—s. *Hepatic*, see *Saccharum*—s. *Honey*, *Glucose*.

**SUGAR OF LEAD**, *Plumbi superacetatis*.

**SUGAR, LIVER**, see *Saccharum*.

**SUGAR, MAGNETIC**, *Saccharum Magnet'icum*. A quack preparation, said to be composed of sugar and cannabis. It is given in nervous cases.

**SUGAR, MAPLE**, *Saccharum acernum*, see *Acer saccharinum*.

**SUGAR OF MILK**, *Saccharum lact'is*, *Galactosaccharum*, *Lactose*, *Lactine* or *Lactin*, (F.) *Sucre de Lait*, *Sel de Lait*, is obtained from whey by evaporation and crystallization, s. g. 1.500. It possesses the demulcent properties of the sugars.

**SUGAR, MUSCLE**, *Inosite*.

**SUGAR PINE**, see *Arrowroot*.

**SUGAR, STARCH**, *Glucose*—s. *Urinary*, *Glucose*.

**SUGARS, VARIOUS**, see *Saccharum*.

**SUGARBERRY**, *Celtis occidentalis*.

**SUGILLATION**, *Sagillatio*, *Li'vor*, *Qædema cruentum*, *Sugillation*, *Bruise*; (*sugillare*, *sugillatum*, 'to beat black and blue,') By most authors used synonymously with *echymosis* and *echymoma*. It is, also, applied to the spots, or *echymoses* which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies; *Li'vor* seu *macula emortua'lis*. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises:—Whether the appearance has been induced before death or afterwards? Whether it is a case of *echymosis* or of *sugillation*? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

**SUGGRUNDIUM**, (*eng.* and *gradior*, 'to go,') The eave of a house.

**SUGGRUNDIUM OCULI**, *Superciliary arch*—s. *Superciliorum*, *Frontal protuberance*.

**SUICIDA**, *Suicide*.

**SUICIDAL INSANITY**, *Suicide*.

**SUICIDE**, *Suicidium*, (*sui cædes*, 'murder of one's self,') The act of killing one's self. *Autochiria*, *Autoctonia*, *Iliocctonia*, *Antophon'ia*. *Suicide* is very frequently the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to selfdestruction;—*Melancho'lia Suicidium* seu *autochiria*, *Suicidal In-*

*san'ity*. Also, one who commits selfmurder; *Suicida*, *Autochir*.

*SUIE*, (Gael. *suihe*.) Fuligo.

*SUIF*, Sevum.

*SUITES DE COUCHES*, 'sequels of labour,' Lochia.

*SULCATUS*, (from *sulcus*.) *Cannelé*, Grooved.

*SULCI*, plural of *Sulcus*.

*SULCI CILIARES*, Halo signatus.

*SULCULUS LABII SUPERIORIS*, (dim. of *Sulcus*.) *Laena Labii superioris*.

*SULCUS*, (akin to  $\delta\lambda\alpha\sigma$ , 'a furrow,') *Semicanal'is*, *Semicanal'iculus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs. See Anfractosity.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the vulva.

*SULCUS ANTEROPOSTERIOR JECORIS*, see Liver — *s. Labii superioris*, *Laena Labii superioris*.

*SULCUS LAT'ERAL, ANTE'RIOR, OF THE SPI'NAL MAR'ROW*. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

*SULCUS LAT'ERAL, POSTE'RIOR, OF THE SPI'RAL MAR'ROW*, corresponds with the attachment of the posterior roots of the spinal nerves.

*SULCUS RETROGLANDULARIS*, see Glans — *s. Sinus lateralis*, *Fossa sigmoidea* — *s. Transversalis*, see Liver — *s. Umbilicalis*, see Liver.

*SULFATE*, see Sulphuric Acid.

*SULFIDUM CARBONII*, Carbonis sulphuretum.

*SULFITE*, see Sulphurous acid.

*SULFUR*, Sulphur.

*SULFURATION*, see Vulcanite.

*SULFURE*, see Sulphur — *s. d'Antimoine*, see Antimonium — *s. de Carbon*, Carbonis sulphuretum.

*SULFUREUX*, Sulphureous.

*SULPHAS*, see Sulphuric acid — *s. Aluminaris*, Alumen — *s. Ammoniacæ Cupratus*, Cuprum ammoniacum — *s. Cadmicus*, Cadmii Sulphas — *s. Kali-coalumini-cum*, Alumen — *s. Natrius*, Soda, sulphate of — *s. Zincium*, Zinci sulphas.

*SULPHUR*, gen. *Sulphuris*, *Sul'fur*, *Scor'ith*, *The'lon*, *Thi'on*, *A'verich*, *Ter'ra folia'ta*, *Ful'mus cit'rinus*, *A'quila*, *Brim'stone*, (F.) *Soufre*. *Na'tive Sulphur* is called *Rock* and *Black Sulphur*, *Sul'phur vi'vum* seu *u'rum*. Sulphur, as we meet with it, is in *rolls*, *Sulphur in rot'ulis* seu *rotun'dum*, *Roll Brim'stone*. It is a volcanic production, and is obtained, in large quantities, from *Solfatara*, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly inodorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

When sulphur is combined with a simple body or a compound radical it forms a *sulphuret*, (F.) *Sulfure*.

*SULPHUR ANTIMONIATUM*, Antimonii sulphuretum precipitatum — *s. Caballinum*, see Sulphur sublimatum — *s. Carburet* of Carbonis sulphuretum — *s. Chloratum*, Sulphur, chloride of.

*SULPHUR, CHLO'RIDE OF, Sul'phuris Chlo'ridum seu Dichlo'ridum*, *Sulphur chlora'tum*, *Hypochlo'retum sulphuro'sum*, *Chlo'rum hypersulphura'tum*, *Dichlo'ride* or *Protochlo'ride* or *Hy'pochlo'ride* or *Subchlo'ride* of Sulphur, *Bisulph'uret* of *Chlo'rine*, is obtained by passing dry chlorine gas over washed and dried *flowers of sulphur*, until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other

chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

*SULPHUR, DICHLORIDE OF, Sulphur, chloride of* — *s. Hypochloride of Sulphur*, chloride of — *s. Iodatium*, Sulphuris iodidum — *s. Iodide of Sulphuris iodidum* — *s. Ioduret of Sulphuris iodidum* — *s. Liver of Potassæ sulphuretum*.

*SULPHUR LO'TUM, Sulphur sublima'tum lo'tum*, *Wash'ed Sulphur*, *Magiste'rium Sul'phuris*, *Sulphuris Flo'ris lo'ti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

*SULPHUR NIGRUM, Sulphur vivum*, see Sulphur sublimatum.

*SULPHUR PRECIPITA'TUM, Lac Sul'phuris, Milk of Sulphur*, *Precip'itated Sulphur*, (F.) *Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the protochlor.

*SULPHUR, PROTOCHLORIDE OF, Sulphur, chloride of* — *s. Subchloride of Sulphur, chloride of*.

*SULPHUR SUBLIMA'TUM*, (Ph. U. S. 1863.) *Sulphur, Subli'med Sulphur, Flow'ers of Sulphur*, (F.) *Soufre sublimé, Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific, and it is a valuable remedy in most cutaneous affections that are local. Dose,  $\mathfrak{ss}$  to  $\mathfrak{ij}$ .

The faces or legs, left in the purification or sublimation of sulphur, are called *Horse Brim'stone*, *Dregs of Sulphur vi'vum*, *Sulphur caballinum* seu *ricium*, *Sulphuris vi'ci recemen'ta*. They are very impure, and are only used externally.

*SULPHUR, VEGETABLE, Lycopodium* — *s. Wort*, *Penedanum*.

*SULPHURATUS*, Sulphureous, Sulphurated.

*SULPHUREOUS, Sulphuro'sus, Sulph'urus, Sulphura'tus, Sulph'uretted*, (F.) *Sulfureux*. Possessing the properties of, or relating to, or containing sulphur.

*SULPHURET*, see Sulphur.

*SULPHURETTED, Sulphureous* — *s. Hydrogen*, see Hydrogen, sulphuretted.

*SULPHURETUM AMMONIACÆ*, Ammoniacæ sulphuretum — *s. Ammoniacæ hydrogenatum*, Liqueur fumans Boyleii — *s. Calicum*, Potassæ sulphuretum — *s. Lixiviacæ*, Potassæ sulphuretum.

*SULPH'URIC OR SULPH'URIC ACID, Ac'cidum Sulphuricum* seu *Sulph'uricum*, *Oleum Vitri'oli*, *Spir'itus Vitri'oli* seu *vitri'oli for'tis*, *Ac'cidum vitriol'icum*, *A. Vitri'oli dephlogistica'tum*, *Oil of Vitriol*, *Spir'it of Vitriol*, *Vitriol'ic Ac'id*, *Ac'cor* seu *Spir'itus Sulphuris*, (F.) *Acide Sulphurique* ou *Sulfurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1.843, (Ph. U. S.) It is escharotic, stimulant, and rube-facient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections. United with bases it forms *sulphates*, (F.) *Sulfates*.

*SULPHURIC ACID, AROMAT'IC, Ac'cidum Sulphuricum Aromat'icum*, *A. vitriol'icum aromat'icum*, seu *vitriolicum alcoho'lè aromaticum*, *Elix'ir vitri'oli* seu *vitrioli aromaticum* seu *vitrioli Mynsicht'i* seu *vitrioli Edinburgen'sium* seu *vitrioli cum tinctu'ra aromati'ca* seu *vitrioli dulcè* seu *acido-aromat'icum*, *A. alcohol cum aromat'ibus sulphurica'tus*, *Tinctu'ra ac'idi sulphurici*, is formed of *Sulphuric acid*,  $\mathfrak{f}\mathfrak{ij}$ ss; *Ginger*, bruised,  $\mathfrak{ij}$ ; *Cinnamon*, bruised,  $\mathfrak{ij}$ ss; *Alcohol*, Oij. — (Ph. U. S. 1842.) In the last edition (1863), it is made of *Sulphuric acid*,  $\mathfrak{f}\mathfrak{v}$ j; *Ginger*, in coarse powder,  $\mathfrak{ij}$ ; *Cinnamon*, in coarse powder,  $\mathfrak{ij}$ ss; *Alcohol*, q. s. Mix the acid and alcohol, and allow them to cool. Mix the cinnamon and ginger and, in a percolator, pour alcohol gradually until a pint has passed. Then mix the diluted acid and the

tincture. Dose, gr. x to xxx. Its properties are like those of the next preparation, than which it is more frequently employed, being more agreeable.

**SULPHURIC ACID, DILUTED, Ac'idum Sulphuricum Dilutum, A. vitriolicum dilutum, Elix'ir vitrioli, Spiritus vitrioli ac'idus Vogle'ri, Elix'ir of Vitriol, (F.) Acide sulfurique délayé,** is formed, according to the Pharmacopœia of the United States, (1842,) by adding *Aq. destillat.* f ʒiij, to *Acid. sulph.* f ʒj. According to the last edition (1863), it consists of *Acid. sulphur.* ʒij; *Aque destillat.* q. s., to make together a pint. It is tonic, astringent, and refrigerant. Dose, gr. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ʒvj of water.

Very dilute sulphuric acid was formerly termed *Phlog'ia vitrioli*.

**SULPHURIS CARBURETUM, Carbonis sulphuretum.**

**SULPHURIS CHLORIDUM, Sulphur, chloride of —. Dichloridum, Sulphur, chloride of.**

**SULPHURIS IODIDUM, S. Ioduretum, Sulphur Iodatum, Iod'uret or Iodide of Sulphur, (F.) Soufre Ioduré, Iodure de Soufre.** It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin.* ʒiv; *Sulphur.* ʒj.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool; break it, and put the iodide into bottles, which are to be well stopped.

**SULPHURIUS, Sulphureous.**

**SULPHUROUS, Sulphureous.**

**SULPHUROUS, Sulphureous.**

**SULPHUROUS ACID, Ac'idum sulphurosum seu sulphuris volat'ile seu Sulphurosum seu Sulphurosum, Spiritus sulphuris seu sulphurosum volat'ile seu sulphuris per campanam seu vitrioli phlogistica'tus, Gas sulphuris, (F.) Acide Sulfureux, Air Acide Vitriolique.** (Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur.) *Acidum sulphurosum, Sulphureous acid* prepared by treating sulphuric acid with charcoal by means of heat; receiving the acid into distilled water, has been admitted into the Pharmacopœia U. S. for 1863. It is sometimes used in the gaseous, — at others, in the liquid, state. Sulphurous acid gas is used to disinfect clothes, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

United with bases, it forms *sulphites*, (F.) *Sulfites*.

**SULTZMALT, MINERAL WATERS OF.** Sultzalt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

**SUMAC, Rhus coriaria — s. des Corroyeurs, Rhus coriaria — s. Vénéneux, Rhus toxicodendron.**

**SUMACH, Rhus coriaria — s. Chinese, Ailanthus glandulosa — s. Mountain, Rhus copallina — s. Poison, Rhus venenata — s. Stag's horn, Rhus typhina.**

**SUMBUL.** The name of a root, *Sumbuli ra-*

*dix, Jintaman'si, Muskroot,* presumed to belong to the Umbelliferæ family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

**SUMBULI RADIX, Sumbul root.**

**SUMEN, (singinen, from *sugere*, 'to suck: ' formerly the breast.) Hypogastrium.**

**SUMMER COMPLAINT.** A popular name in the United States for diarrhœa occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

**SUMMER DISEASES, see Estival — s.** Plant winter worm, *Sphaeria Sinensis* — s. Rash, Lichen tropicus.

**SUPER (L.), in composition, 'above.'**

**SUPERBE, ([L.] *superbus*, 'proud,') Rectus superior oculi.**

**SUPERBUS, 'proud.' Rectus superior oculi.**

**SUPERCHLORIDUM FORMYLICUM, Chloroform.**

**SUPERCILIARIS, Corrugator supercillii, Superciliary.**

**SUPERCILIARY, Superciliaris, (from *supercilium*.)** That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier*.

**SUPERCILIARY ARCHES, Superciliary Ridges, Arcus superciliar'es, Superguidia oculorum, (F.) Arcades sourcilières,** are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosses*, and covered by the superciliaris muscle, to which they give attachment.

**SUPERCILIARY RIDGES, Superciliary arches.**

**SUPERCILIUM, Oph'rys, Oph'rya, Val'tum, (F.) Sourcil, (super, and cilium, 'the tarsal cartilage,') The eye'brows, (Sc.) Brees, (Prov.) Eye'breen,** are two arched eminences, — convex above, and more or less prominent, according to the individual, — which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *frons* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum, the frontalis, and superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

**SUPERCILIUM ACETAB'ULI.** The edge of the cotyloid cavity of the os innominatum.

**SUPERCONCEPTION, see Superfætation.**

**SUPEREVACUATIO, Hypercrisis.**

**SUPERFECUNDATIO, see Superfætation.**

**SUPERFÉTATION, Superfætation.**

SUPERFIBRINATION. Hyperinosis.

SUPERFICIALIS COLLI, (from *superficies*, 'surface,') *Subcutaneus Colli*. A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

SUPERFICIES ORBITALIS, (*super*, and *facies*, 'face,' 'the surface,') see Maxillary bone (superior)—s. *Plantaris Pedis*, Sole.

SUPERFECUNDATIO, Superfœtation.

SUPERFETATIO, Superfœtation.

SUPERFETATIO, *Superfœtatio*, *Epycye'lis*, *Hypercye'lis*, *Hypercye'ma*, *Superinpregnatio*, *Epi'gouë*, *Superfœcundatio*, *Superfœcundatio*, *Superinpregnatio*, (F.) *Superfœtation*, (*super*, and *fatere*, 'to breed,') Conception of a foetus—*epycye'ma*—in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception*.

SUPERGEMINALIS, (*super*, and *gemi*, 'the testicles,') Epididymis.

SUPERGENUALIS, (*super*, and *genu*, 'the knee,') Patella.

SUPERIUMERALE, (*super*, and *humerus*, 'the shoulder,') Epomis.

SUPERIMPRÆGNATIO, Superfœtation.

SUPERIOR AURIS, Attollens aurem—s. Rotundus clitoridis, Ischioavernosus.

SUPERLABIA, (*super*, and *labia*, 'the labia pudendi,') Clitoris.

SUPERLIGAMEN, (*super*, and *ligare*, 'to bind,') Epidesmus.

SUPERLIGULA, (*super*, and *ligula*, dim. of *lingua*, 'a tongue,') Epiglottis.

SUPERNUMERARY FINGER, (*super*, and *numerus*, 'a number,') *Digitus supernumerarius*.

SUPERNUTRITIO, (*super*, and *nutrire*, *nutritum*, 'to nourish,') Hypertrophy—s. *Lienis*, *Splenonecus*—s. *Splenis*, *Splenonecus*.

SUPERNUTRITION, Hypertrophy.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPOSITUS MEDICORUM, (*super*, and *positus*, 'placed,') Archiater.

SUPERPURGATIO, (*super*, and *purgare*, *purgatum*, 'to purge,') Hypercatharsis.

SUPERSCAPULARIS, (*super*, and *scapula*,) *Supraspinatus*—s. *Inferior*, *Infraspinatus*.

SUPERSEDENT, *Super'cedens*, (*super*, and *sedere*, 'to sit,') A term used by Professor George B. Wood for a medicine whose operation on any part or organ is to displace or prevent diseased action in that part or organ. An-anti-periodic is a supersedent.

SUPERVACUATIO, Hypercrisis.

SUPIER, Sambucus.

SUPINATEUR, *Supinator*—s. *Court* ou *petit*, *Supinator radii brevis*—s. *Grand* ou *long*, *Supinator radii longus*.

SUPINATION, *Supinatio*, (from *supinus*, 'lying on the back,') The movement in which the forearm and hand are carried outwards, so that the anterior surface of the latter becomes superior.

In Pathology, *Supination*, *Supinatio*, *Hyptias'ma*, *Hyptias'mus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINATOR, (F.) *Supinator*. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu MINOR, *Supinator radii brevis*—s. *Longus* seu *major*, *Supinator radii longus*.

SUPINATOR RADII BREVIS, *S. brevis* seu *minor*, (F.) *Épicondyléo-radial*, (Ch.) *Supinateur court*

ou *petit supinateur*. A muscle seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself in such a manner, that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Bra'chioradial'is*, (F.) *Huméro-radial*, (Ch.) *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, (*sup*, and *pes*, gen. *pedis*, 'foot,') *Hypopodia*.

SUPPLANTALIA, (*sup*, and *planta*, 'the sole of the foot,') *Hypopodia*.

SUPPLEMENTA EPIPOICA, (*sup*, and *pleo*, 'to fill,') *Appendiculae pinguedinosæ*.

SUPPLEMENTARY AIR, see Respiration.

SUPPORTER, ABDOMINAL, (*sup*, and *portare*, 'to carry,') Belt, Russian—s. *Uteroabdominal*, see Belt, Russian.

SUPPORTEUR ABDOMINAL, Belt, Russian.

SUPPOSITION DE PART, (*supponere*, *suppositum* (*sup*, and *ponere*, 'to put'), 'to counterfeit,') Pregnancy, pretended.

SUPPOSITOIRE, Suppositorium.

SUPPOSITORIUM, Suppository—s. *Uterinum*, *Pessary*.

SUPPOSITORY, *Supposito'rium*, *Hypoth'etou*, *Hypoth'etou*, *Bacil'lus*, *Bul'anus*, *Glands*, *G. subdidit'ia*, *Nod'ulus intestinal'is*, (*supponere*, *suppositum* (*sub*, and *ponere*, 'to put'), 'to put under,') (F.) *Suppositoire*. A solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum;—either for the purpose of favouring or of restraining evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloe, or any other irritating substance.

The vehicle commonly used for the active ingredients is cocoa-butter. It may require admixture with one eighth part of wax to give it the proper consistence. Tallow with the same proportion of wax is used at times.

*Supposito'ria Ac'id'i Tan'nici*, *Tan'ni* *Supposito'ries*, and *Supposito'ria Mor'phia*, *Mor'phia* *Supposito'ries*, are officinal (Ph. B., 1864). The application of a suppository is termed *Balanis'ans*.

SUPPRESSIO ALVI, (*sup*, and *ponere*, *pressum*, 'to press,') Constipation—s. *Lochiorum*, *Ischolochia*—s. *Lotii*, *Ischuria*—s. *Mensium*, *Amenorrhœa*—s. *Menstruationis*, *Amenorrhœa*—s. *Sudoris*, *Ischidrosis*.

SUPPRESSION DU FLUX MENSTRUËL, *Amenorrhœa*—s. *de Part*, see *Parturition*—s. *d'Urine*, *Ischuria*.

SUPPURANS, Suppurative.

SUPPURARE, Suppurate.

SUPPURATE, *Suppurat'æ*, *Matter*, *Beal*, (F.) *Suppuer*. To form or secrete pus.

SUPPURATIF, Suppurative.

SUPPURATION, *Suppuratio*, *Epycye'ma*, *Purulent'ia*, *Pyo'sis*, *Pye'sis*, *Diapye'ma*, *Diapye'sis*, *Pyogen'ia simplex*, *Pu'ulencia*, *Pu'ulency*, *Gath'ering*, *Beal'ing*, (F.) *Suppuration*, *Abontissement*. Formation or secretion of pus (see, also, *Pyogen'ia*), (from *sup*, and *pus*, gen. *puris*.) It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating,

becomes heavy; by a sense of weight in the part, and when the collection of pus can be easily felt, by fluctuation. When the collection of pus becomes prominent, the abscess is said to *point* or to *come to a head*. When pus is thus formed in the areolar membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

**SUPPURATIVE**, *Suppurans*, *Suppurativus*, *Diapye'ticus*, *Epye'ticus*, *Sup'purans*, (F.) *Suppuratif*, *Pyopœ'tique*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

**SUPPURER**, *Suppurate*.

**SUPRA** (L.), in composition, above.

**SUPRACOSTALES**, *Levato'ries Costa'rum*, (F.) *Surocostaux*, (from *supra*, and *costa*, 'a rib.')

A name given to twelve small, fleshy fasciuli, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebrae to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others, consider them to form part of the *intercostales externi*.

**SUPRAHEPATIC VEINS**, see Hepatic veins.

**SUPRAPHALODYMIA**, (*supra*, *ophthalos*, 'navel,' and *δωμ*, 'to mingle,') see Somatodymia.

**SUPRA ET INFRAOPHALODYMIA**, see Somatodymia.

**SUPRORBITAR**, *Supraorbita'lis*, *Supraorbita'rius*, (F.) *Surobitaire*, (*supra*, and *orbita*.) That which is situate above the orbit.

**SUPRORBITAR FORAMEN**, *F. Supraorbitarium seu orbitarium superius*, (F.) *Trou sus-orbitaire ou orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbitar arch. It gives passage to the *supraorbitar* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

**SUPRAPUBIAN**, *Suprapu'bic*, *Suprapubia'nius*, (*supra*, and *pubes*.) That which is seated above the pubis.

**SUPRAPUBIAN NERVE**, (F.) *Nerf mespubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

**SUPRARENAL**, *Suprarena'lis*, (F.) *Surrénal*, (*supra*, and *ren*, 'the kidney,') Seated above the kidney—as the *suprarenal capsule*.

**SUPRASCAPULAR**, *Suprascapula'ris*, (*supra*, and *scapula*.) Seated above the scapula;—as

**SUPRASCAPULAR NERVE**. This arises from the fifth cervical; passes through the suprascapular notch, and is distributed to the supraspinatus and infraspinatus muscles.

**SUPRASCAPULARIS**, *Suprascapularis*, and *Supraspinatus* muscle.

**SUPRASEMIORBITICULARIS**, *Orbicularis oris*.

**SUPRASPINAL**, *Supraspinatus*.

**SUPRASPINATUS**, *Supraspino'eus*, *Supraspina'lis*, *Supraspinal*, (F.) *Sur-épineux*, *Sus-épineux*, (*supra*, and *spina*.) That which is seated above a spine.

**SUPRASPINATA FOSSEA**, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

**SUPRASPINATUS MUSCLE**, *Superscapula'ris*, *Su*

*prascapularis*, (F.) *Sus-spino-scapulo-trochitérien*, *Petit sus-scapulo-trochitérien* (Ch.), is situated in the fossa supraspinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supraspinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

**SUPRASPINO'SA LIGAMENTA**, *Supraspinal ligaments*, are two in number. 1. The *Dorsolumbo-spiraspinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebrae from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical supraspinal ligament*, (F.) *Ligament sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

**SUR** (F.), (L.) *Supra*, in composition, 'above.'

**SURA**, *Gastrocnem'ë*, *Gastrocnem'ia*, *Gastrocnem'ium*; *Calf of the leg*, (F.) *Mollet*, *Gras de Jambe*. The projection, formed at the posterior part of the leg by the gastrocnemii muscle. Also, the fibula.

**SURAL**, *Sura'lis*, (from *sura*.) Appertaining or relating to the calf of the leg.

**SURCLIER**, (*sur*, and *cil*, 'the tarsal cartilage, an eyelash,') *Corrugator supercillii*, *Superciliary*.

**SURCOSTAUX**, (*sur*, and *costal*, 'belonging to the rib' [*costa*]), *Supracostales*.

**SURCULATION**, (from *surculus*;) see Generation.

**SURCULI FELLEI**, (pl. of *Surculus*;) *Pori biliarii*.

**SURCULUS**, 'a young branch,' *Ramusculus*.

**SURDENT** (F.), (*sur*, and *dent*, 'a tooth,') When a milktooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

**SURDI-MUTITÉ**, *Mutitas surdorum*.

**SURDITAS**, (from *surdus*;) *Cophosis*, *Deafness*.

**SURDITÉ**, *Cophosis*, *Deafness*.

**SURDOMUTITAS**, (*surdus*, and *mutus*, 'mute,') *Mutitas surdorum*.

**SURDUS**, *Deaf*.

**SUREAU COMMUN**, *Sambucus*.

**SURELLE**, ([Sax.] *rûp*, 'sour,') *Oxalis acetosella*, *Rumex acetosa*.

**SUR-ÉPINEUX**, (*sur*, and *épine*, 'a spine,') *Supraspinatus*.

**SUR-EXCITATION**, see Excitement, and Superexcitation.

**SURFEIT**, (*sur*, and *fait*, 'done,') *Acrasia*. *Colica crapulosa*.

**SUR'GEON**, *Chirur'geon*; *Chiro'nax*, *Chirur'gus*, *Vul'nerum medicus*, *Cheiria'ter*, *Chiroia'ter*, *Iâ'trus*, (F.) *Chirurgien*, old French, *Surgien*, (*χερ*, 'the hand,' and *εργον*, 'work,') One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and, although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

In the middle ages, the Universities of Italy and Spain sent out educated surgeons, as well as physicians, under the name *chirurgi physici*.

**SURGEON ACCOUCHEUR**, see Surgeon apothecary.

**SURGEONAPOTHECARY**. One who unites the practice of surgery with that of the apothecary. A general practitioner. He is the ordinary medical man for far'ly medical attendant in Eng-

considerable depression. If accompanied with a vocal sound, it constitutes a *groan*.

When the respiration, on auscultation, resembles sighing, it is called, by some, *Suspirious*, (F.) *Suspiriosæ*.

SUSPIRIUM CARDIACUM, Angina pectoris.

SUSTENTACULUM, (*sus*, and *teneo*, *tendam*, 'to hold,') Aliment.

SUSTENTATOR CLITORIDIS, Erector clitoridis—s. Penis, Erector penis.

SUSURRATION, (*susurrare*, *susurratum*, 'to murmur, to whisper,') Whispering.

SUSURRUS, 'a murmur,' *Bourdonnement*—s. Aurium, Tinnitus aurium.

SUTELA, (*suere*, *sutum*, 'to sow,') Suture.

SUTERBERRY, Xanthoxylum fraxineum.

SUTORIUS, (*sutor*, 'a shoemaker,') Sartorius.

SUTER, Saccharum.

SUTURA, gen. *Suturæ*, Suture—s. Abdominalis, Gastroraphy—s. Arcualis, Coronal suture—s.

Biparietalis, Sagittal suture—s. Clavata, Suture, quilled—s. Corporis callosi externa, see Raphe—s. Cranii squamosa, Squamous suture—s. Dentata, see Suture—s. Frontoparietalis, Coronal suture—

s. Interparietalis, Sagittal suture—s. Jugalis, Sagittal suture—s. Lambdoidalis, Lambdoid suture—s. Lepidoides, Squamous suture—s. Lumbosa, see Suture—s. Mendosa, Squamous suture—s.

Notha, see Suture—s. Obelæa, Sagittal suture—s. Ossium spuria, Harmony—s. Proræ, Lambdoid suture—s. Punctata, Suture, common—s.

Puppis, Coronal suture—s. Rhabdoïdes, Sagittal suture—s. Serrata, see Suture, Sagittal suture—s.

Spuria, see Suture—s. Squamosa, see Suture—s. Vera, see Suture.

SUTURAL, *Suturalis*; (same etymon as the next.) Relating to a suture.

SUTURE, *Suturæ*, *Sute'la*, *Ar'mê*, *Rha'phê*, (*suere*, *sutum*, 'to stitch,') *Dovetail joint*, (F.) *Engrenure*. A kind of immovable articulation,

in which the bones unite by means of serrated edges, which are, as it were, *dovetailed* into each other. The articulations of the greater part of

the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures*, *suturæ veræ*, the two temporal

are called *false sutures*, *suturæ nothæ* seu *epu'riæ* seu *squamosæ*.

A *dentated suture*—*Suturæ dentatæ*—is one in which the processes are long and dentiform,

as in the interparietal suture. In a *serrated suture*—*suturæ* seu *angulæ'is serratæ*—the indentations and processes are small and fine, like

the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *suturæ limbo'sa* there is, along with the dentated

margins, a degree of bevelling of one, so that one bone rests on the other, as in the occipitoparietal suture.

SUTURE, in *Surgery*, *Rha'phê*, is an operation which consists in stitching the lips of a wound

to procure their union. The suture was, at one time, largely employed; but, in modern times,

its use has been wisely restricted. There are few wounds in which the edges may not be brought

together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster

simply, has been absurdly termed *Suturæ sic'ca* or *dry suture*, in opposition to the *Suturæ cruen'ta*, (F.) *Suture Sauglante*, or *Suture* properly so

called. The suture is generally formed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*. 1. The INTERRUPTED SUTURE, (F.) *Suture à points séparés*, *Suture entrecoupe'e*,

is formed by passing a needle, armed with a ligature, through the lips of the wound previ-

ously brought into contact; and then tying the

extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The QUILLED SUTURE, *Suturæ clava'ta*, (F.) *Suture enchevillée* ou *emplurée* ou *empennée*, *Compound Suture*, is merely the interrupted suture, with this difference, that the liga-

tures are not tied over the face of the wound, but over two quills or rolls of plasters, or bongsies,

which are laid along the sides of the wound. It is used by some surgeons, on account of there

being less danger of the stitches tearing out. It is not much employed. The CLAMP SUTURE, used by Dr. Sims, of New York in the treatment

of vesicovaginal fistula, is a modification of this. It is formed by two cylinders of silver or lead,

perforated at several points for the passage of small pieces of fine silver wire, which are to

supply the places of thread, and are prevented from slipping by perforated shot carried down

upon them, pressed against the cylinders, and kept in place by being firmly pinched with pliers.

3. The GLOVER'S SUTURE, *Continued* or *Uninterrupted Suture*, (F.) *Suture de Pelletier*, ou *en surjet*, is executed by introducing the needle first

into one lip of the wound from within outwards, then into the other in the same way; and, in

this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of

the intestinal canal. It is now rarely employed except for stitching up dead bodies. The com-

mon stitch or suture, *Sutura punctatæ*, (F.) *Suture à points passés*, has been used in similar

cases. 4. The ROYAL STITCH or SUTURE is the name of an old operation for the cure of bubono-

cele. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and

then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus

excited. 5. The STAPLE SUTURE consists of a piece of steel wire, shaped like a staple, the

ends of which are ground to a triangular or glover's point. In using it, the points of the staple

are to be brought through both margins of the wound, and then bent back. 6. The TWISTED

SUTURE, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the

free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound,

so as to keep them accurately in contact. A piece of thread is then wound accurately around the

pin, from one side of the division to the other, in the form of the figure *z*. The number of pins

and sutures must, of course, correspond with the extent of the wound. This is the suture used

in cases of harelip. The BUTTON SUTURE of Dr. Bozeman, of Alabama, employed in vesicovaginal

fistula, is a modification of this. 7. The SUTURE A ANSE, of Le Dran, has only been employed

in cases of wounds of the intestines. For this purpose, the edges of the wound are brought

together, and as many needles, with unwaxed threads, used as there are to be stitches. Each

stitch is then made by passing a needle through the edges; and all the ligatures which belong to

one side of the wound are tied together, and twisted so as to form a thread, which is fixed

externally. 8. The IMPLANTED SUTURE, (F.) *Suture implantée*, is formed by pins arranged parallel to the edges of the wound, and implanted

in their substance. By means of threads, the needles are approximated so as to bring the edges

of the wound together. 9. The PLASTIC SUTURE, so called by Prof. Pancoast, of Philadelphia, its

proposer, is a suture by tongue and groove. The groove is made by an incision in the part, which

is to receive the flap. The tongue is made on the flap by bevelling off the two surfaces, cuticular

and adipose. The suture is made by passing a loop of thread, by two punctures, deep through

the wound, and then tying the

extremities of the thread.

The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The QUILLED SUTURE, *Suturæ clava'ta*, (F.) *Suture enchevillée* ou *emplurée* ou *empennée*, *Compound Suture*, is merely the interrupted suture, with this difference, that the liga-

tures are not tied over the face of the wound, but over two quills or rolls of plasters, or bongsies,

which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. The CLAMP SUTURE, used by Dr. Sims, of New York in the treatment of vesicovaginal fistula, is a modification of this. It is formed by two cylinders of silver or lead, perforated at several points for the passage of small pieces of fine silver wire, which are to supply the places of thread, and are prevented from slipping by perforated shot carried down upon them, pressed against the cylinders, and kept in place by being firmly pinched with pliers.

'the inner lip of the groove. The two needles are passed through the base of the tongue, and again through the outer lip of the groove. The two ends of the thread are then tied over a small roll of adhesive plaster, by which the tongue is, of necessity, forced deep into the groove. Four raw surfaces are thus firmly held in connection, making the union of parts, by this suture, a very certain process.

**SUTURE, BUTTON**, see Suture, (twisted) — s. Clamp, see Suture, (quilled) — s. Compound, Suture, quilled — s. Continued, Suture, glover's — s. *Écaillense*, Squamous suture — s. *Empennée*, Suture, quilled — s. *Emplumée*, Suture, quilled — s. *Enchevillée*, Suture, quilled — s. *Entortillée*, Suture, twisted — s. *Entrecoupée*, Suture, interrupted — s. Uninterrupted, see Suture, glover's.

**SWAB**, ([Sax.] *ƿebban*, 'to clean with a mop.') A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deep-seated parts. The process is termed *Swab'bing*.

**SWADDLING CLOTHES**, Swathing clothes.

**SWAGBELLY**, Physconia.

**SWALLOW**, *Hirundo* — s. Wort, *Asclepias vincetoxicum* — s. Wort, orange, *Asclepias tuberosa* — s. Wort, tuberousrooted, *Asclepias tuberosa* — s. Wort, white, *Asclepias vincetoxicum*.

**SWALLOW'S NEST**, *Nidus hirundinis*.

**SWALME**, ([Sax.] *ƿſam*, [G.] *Se h w a m m*.) Excrecence, Tumour.

**SWAMP CABBAGE**, *Dracontium foetidum* — s. Dogwood, *Petala trifoliata* — s. Sickness, Milk sickness — s. Wood, *Cephalanthus occidentalis*, *Dirca palustris*.

**SWAN ALLEY SORE**, see Phagedenic chancre.

**SWARFF**, Stupor, Syncope.

**SWATHING CLOTHES**, *Swad'ling Clothes*, *Incumbula*, *Fas'cia*, *Pan'ni*, ([Sax.] *ƿƿedan*, 'to bind.') (F.) *Maillet*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

**SWEAMISH**, see Syncope.

**SWEAT**, ([Sax.] *ƿƿar*.) Sudor — s. Bloody, Sudor cruentus — s. Glands, see Perspiration — s. Root, *Polemonium reptans* — s. Scab, *Crusta genu equine*.

**SWEATING**, *Ephidrosis* — s. Bath, *Achicolum* — s. of Blood, see *Diapedesis*, and *Sudor cruentus* — s. House, *Achicolum* — s. Plant, *Eupatorium perfoliatum* — s. Room, *Achicolum* — s. Sickness, Sudor Anglicus.

**SWEATING SICKNESS, MALWAH**. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah, in India.

**SWEBBING**, Syncope.

**SWEET**, (sway,) Vertigo.

**SWEEMING**, Syncope.

**SWEEMISH**, see Syncope.

**SWEET, BITTER**, *Solanum dulcamara*.

**SWEET BITTER**, *Triosteum* — s. Bread, *Pancreas*, *Thymus* — s. Bush, *Comptonia asplenifolia* — s. Fern, *Comptonia asplenifolia* — s. Flag, *Acorus calamus* — s. Pod, *Ceratonium siliqua* — s. Root, *Aralia nudicaulis*.

**SWELL'ING**, *Epanaste'ma*, *Exar'ma*, *Exæde'sis*, *Pre'sis*, *Pres'ma*, *On'cus*, *Extumefactio*, *Tu'mor*, *Tumefactio*, (Prov.) *Blaow'ing*, *Boist*, *Coul*, (Old Eng.) *Boche*, *Bol'lynge*, *Bol'ning*, (F.) *Enflure*, *Gonflement*, (from [Sax.] *ƿƿellan*, 'to swell.') Morbid increase of bulk in a part of the body. See Tumour.

**SWELLING, WHITE**, Hydrarthrus.

**SWELTING**, see Syncope.

**SWENSIE**, (quinsy,) Cynanche Tonsillaris.

**SWENYNG**, Somnium.

**SWERF**, Stupor, Syncope.

**SWERTIA CHIRAYITA**, (after Emanuel Swert, a Dutch botanist,) *Gentiana chirayita* — s. *Difformis*, see Calumba — s. *Fraseri*, see Calumba — s. *Lutea*, *Gentiana lutea*.

**SWEUIN**, Somnium.

**SWEVYNG**, Somnium.

**SWEVYNYNG**, Somnium.

**SWIETENIA FEBRIFUGA**, (after Van Swieten,) *S. Som'ida*, *Soy'm'ida* seu *Cedre'la febrif'uga*, *Feb'rifuge Swiete'nia*, (F.) *Mahogan febrifuge*. Ord. Meliacee. Ser. Sivist. Decandria Monogynia. The bark of this tree, which is a native of the East Indies, called there *Kohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ℞j to ℞ij of the powder.

**SWIETENIA MAHOG'ANI**, *Ced'rus Mahog'ani*, *Mahog'oni*, *Maag'oni*, *Mahog'any Tree*. grows in the West Indies and tropical America, and is possessed of similar properties.

**SWIETENIA SENEGALENS'IS**, *Khaya Senegalen'sis*. A common forest tree on the borders of the Gambia. The bark called *Cuil-cedra*, and *Karson Khayi*, is bitter and antiperiodic.

**SWIETENIA SOMIDA**, *S. Febrifuga*.

**SWIM**, Air bladder.

**SWIMBLADDER**, Air bladder.

**SWIMMING**, *Natation* — s. Bladder, Air bladder — s. of the Head, Vertigo.

**SWINACIE**, Cynanche tonsillaris.

**SWINEPOX**, see Varicella.

**SWINESAME**, Adeps.

**SWINETHISTLE**, *Sonchus*.

**SWINYNYNG**, Vertigo.

**SWOON**, (from [Sax.] *aƿpanan*, 'to languish,') Syncope.

**SWOONING**, Syncope.

**SWOUNDING**, Syncope.

**SY**, in composition, 'with,' 'together,' see Sym.

**SYALADENITIS**, see Sialadenitis.

**SYCAMINUS**, (*συκαμινος*.) *Morus nigra*.

**SYCAMINUM**, (*συκαμινος*.) see *Morus nigra*.

**SYCE**, (*συκη*.) *Ficus carica*.

**SYCEA**, (*συκη*.) *Ficus*.

**SYCEPH'ALUS**, (*sy*, for *συν*, and *κεφαλη*, 'head.') A monster having two heads united together.

**SY'CION**, (*συκιον*, from *syce*.) A decoction of dried figs.

**SY'CIOS ANGULA'TUS**, (*συκιος*, 'a gourd.') *One-seeded star cucumber*, *Wild Bry'ony*. The roots and seeds of this indigenous plant, Order Cucurbitacee, are bitter, purgative and diuretic. It is used in dropsy in the same cases as bryony.

**SYCITES**, (*συκιτης*, from *συκη*, 'a fig'.) Made of figs, see *Catarchites*.

**SYCOMA**, (*συκωμα*, from *syce*, and *ομα*.) *Ficus*.

**SYCO'SIS**, (*συκωσις*.) A tumor of the shape of a fig. Also, a fungous ulcer. A horny excrecence about the eyelids. Dr. Bateman defines it: — an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches: — *Phyma Sycosis*, *Rose'ola fig'aria*, *Ac'nē men'tagra*. Of this he has given two species: 1. *Sycosis Men'ti*, *S. bar'ba*, *Men'tagra*, *Ment'igo*, *Va'rus Men'tagra*,

*Mentagrophyta*, *Chin'wick*, *Chin'chelk*, *Bar'ber's Irish*, (F.) *Dartree pustulense mentage*: and, 2. *Sycosis Capilli*, *S. Cupillit'ii*. The treatment, in both cases, resembles that for porrigo favosa. See *Mentagrophyte*.

**SYCOSIS, Ficus.**

**SYCUM**, (συκον.) *Ficus*.

**SYDERATIO**, *Sideratio*.

**SYLLEPSIOLOG'IA**, *Syllepsio'ogy*, *Syllepsio'ogy*, (*syllepsis*, and *logos*, 'a description.') The doctrine of conception.

**SYLLEPSIS**, (συλληψις.) *Conception*.

**SYM. SYN.** (συν. 'with, together,') like the *cum*, *con*, *col*, *cor*, &c. of the Latins. A common prefix. Before *b*, *p*, *ph*, *ps*, and *m*—*sym*, or *xym*, is changed into *sym* or *xym*, (*com*;) before *c*, *ch*, *g*, *k*, and *x*, into *sym* or *xym*, *cy*, *zy*, (*con*;) before *l* into *syl* or *xyl*, (*col*;) before *r* into *sy* or *xyr* (*cor*;) and before *s* into *sy* or *zy*, and *ys*, (*co* and *cos*.)

**SYMBLEPHARON**, (*sym*, and *βλεφαρον*,) *Symb-lepharon*, see *Ankyloblepharon*.

**SYMBLEPHAROSIS**, *Symb-leph'aron*, (*sym*, and *βλεφαρον*, 'an eyelid,') *Conecretio palpebrarum cum bulbo oculi*. A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

**SYMBLEPHAROSIS**, *Ankyloblepharon*.

**SYM'BOL**, (συμβολον, 'a sign,') *Sym'bolum*, *Character*, (F.) *Caractère*. A sign or representation of something else.

The following are the symbols commonly used in prescriptions:

**R**, *Recipe*. See *R*.

**gr.**, *Granum*, a grain.

**ʒ**, *Scrupulus* seu *scrupulum*, a scruple.

**ʒ**, *Drachma*, a drachm.

**ʒ**, *Uncia*, an ounce.

**lb**, *Libra*, a pound.

**lb**, *Libra*, pounds.

**℥**, *Minimum*, a minim.

**fʒ**, *Fluidrachma*, a fluidrachm.

**fʒ**, *Fluiduncia*, a fluidounce.

**o**, *Octarius*, a pint.

**c**, *Congius*, a gallon. See *Abbreviations*, and *Weights and Measures*.

**SYMBOLE**, (συβολη, 'a bringing together,') from *sym*, and *βαλλω*, 'to throw,') *Commisure*.

**SYMBOLEUSIS**, (from *συβολη*, 'a bringing together,') *Consultation*.

**SYMBOLISMUS**, (from *symbolum*,) *Sympathy*.

**SYMBOLIZATIO**, *Sympathy*.

**SYMBOLICA**, (συμβολον, 'a sign,') and *logos*, 'a treatise,') *Symptomatology*.

**SYMBOLOLOGY**, (*symbolum*, and *logos*, 'a description,') *Symptomatology*.

**SYMBOLUM**, (*συμβολον*,) *Symbol*, *Sympathy*.

**SYMÉTRIE**, *Symmetry*.

**SYMÉTRIQUE**, *Symmetrical*.

**SYMMELES**, (*sym*, and *μελος*, 'a limb,') *Μον'ηρος*. A genus of monsters, with I. G. St. Hilaire, whose extremities are joined together: *Sivrens*.

**SYMMETRIA**, *Symmetry*.

**SYMMETRICAL**, *Symmet'ricus*, (F.) *Symétrique*. An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like, halves; or which—if situate, the one to the right, the other to the left of this line—have a similar conformation, and a perfectly analogous arrangement.

**SYMMETRICAL DISEASES**, see *Symmetry*.

**SYMMETRY**, (*συμμετρια*, from *sym*, and *μετρον*, 'to measure,') *Symmet'ria*, *Commensurum*, *Membro-rum Omnium Competen'tia*, *Propor'tio*, (F.) *Symétrie*. The regularity in form observed in many parts, situate on the median line; and, a so, the resemblance which exists between many organs

that are situate on each side of the median line; *Bilateral Symmetry*. Bichat first noticed that this symmetry was confined to the organs of animal life: as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed—and there is evidence in favour of the assertion—to be a law of the animal economy, that, owing to *symmetry of nutrition*, when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the corresponding parts of the two sides of the body. This has been called the *Symmetry of Diseases*; and the resulting diseases are said to be *symmet'ricol*.

**SYMMETRY OF DISEASES**, see *Symmetry*—s. of *Nutrition*, see *Symmetry*.

**SYMPARATERESIS**, (*sym*, and *παρητηρησις*, 'the act of observing,') *Observation*.

**SYMPASMA**, (συμπασμα, from *sym*, and *πασσω*, 'to sprinkle,') *Catapasma*.

**SYMPATHESIS**, (συμπαθησις.) *Sympathy*.

**SYMPATHET'IC**, *Sympath'icus*, *Sympathet'icus*, (F.) *Sympathique*, (from *sympathy*,) That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection*, produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to different nerves. See *Trisplanchnic*, *Pneumogastric*, and *Facial*.

**SYMPATHETIC, GREAT**, *Trisplanchnic nerve*—s. *Middle*, *Pneumogastric*—s. *Nerve*, *Trisplanchnic nerve*.

**SYMPATHETIC POWDER**, *Pul'vis sympathet'icus* or *Pow'der of Sympathy* of Sir Kenelme Digby, was composed of calcined sulphate of iron, prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

**SYMPATHETICUS MINOR**, *Facial nerve*.

**SYMPATHETISMUS**, *Sympathy*.

**SYMPATHIA**, *Sympathy*, *Consent of parts*.

**SYMPATHICUS**, *Sympathetic*.

**SYMPATHIQUE**, *Sympathetic*—s. *Nerf*, *Trisplanchnic nerve*.

**SYMPATHY**, (συμπαθεια, from *sym*, and *παθος*, 'suffering,') *Sympath'ia*, *Sympathe'sis*, *Compass'io*, *Consens'us*, *Sympathet'ismus*, *Xympath'ia*, *Conflux'io*, *Conspira'tio*, *Commercium*, *Consor'tium*, *Homoiopath'ia*, *Homoieth'nia*, *Adelphiz'is*, *Symbolis'mus*, *Symboliza'tio*, *Sym'bolum*.

The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between different organs throw light on the etiology of diseases, their seat, and the particular organs towards which our therapeutical means should be directed. See *Irritation*.

*Sympathy of Continuity* is seen in the case of a membrane that is continuous, as in the action of demulcents in catarrh; *Sympathy of Continuity* in the case of parts that are near, as in the action of aloes in amenorrhœa; and *Remote Sympathy* concerns organs that are at a distance from the part impressed, as in the case of tetanus from an injury.

**SYMPATHY, CURE BY**, *Medic'ina sympathet'ica*, *M. Magnet'ica*. A mode of treatment, at one time prevalent, which was based on the idea, that a mysterious consent exists between parts of the body and agents, for which there was no real

foundation. See Sympathetic powder, and Trial by Bier-right.

**SYMPEPSIS**, (*sym*, and *πέσις*, 'coction, digestion.') Coction.

**SYMPEXIONS**, see Sympexis.

**SYMPEXIS**, (*συμπέξις*.) Concretion. M. Robin has applied the term *Sympexions* to solid concretions found in the vesicles of the thyroid gland, spleen, lymphatic ganglion, in the small cysts of the glands of the neck and body of the uterus, and, almost always, in the liquid of the vesiculæ seminales. Little is known of their composition.

**SYMPHORA**, (*συμφορα*, from *sym*, and *φέρω*, 'to carry.') Congestion.

**SYMPHOREMA**, gen. *Symphore'matis*, (*συμφορημα*.) Congestion.

**SYMPHORESIS**, (*συμφορησις*.) Congestion.

**SYMPHORICARPUS RACEMOSUS**, *Snow-berry*, (*συμφορεω*, 'to bear together,' and *καρπος*, 'fruit,' owing to the clustered berries.) An indigenous plant, Order, Caprifoliaceæ, Tribe, Lonicereæ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

**SYMPHYA**, (*συμφυια*.) Symphysis.

**SYMPHYOCEPHALUS**, *Metop'ages*, *Cephalop'ages*, (from *συμφυσις*, (*sym*, and *φω*, 'to grow,') 'united together,' and *κεφαλη*, 'head.') A monstrosity, in which twins are united by the head.

**SYMPHYSE**, Symphysis.

**SYMPHYSEOTOMY**, *Symphysotomy*, *Synchondrotomy*, *Symphysiotomia*, *Symphysiotomy*, (from *συμφυσις*, and *τεμνω*, 'I cut.') The operation or section of the *Symphysis*, *Sigull'ian operation* or *section*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *désymphyser*, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphyseien*.

**SYMPHYSIA**, (from *συμφυω*, 'to grow together,') A malformation consisting in the union of parts that are usually divided.

**SYMPHYSIEN**, see Symphyseotomy.

**SYMPHYSIOTOMIA**, *Symphysiotomy*.

**SYMPHYSIS**, *Symphysia*, *Coalescentia*, *Coalitus*, *Coalit'io*, (F.) *Symphysie*, (*συμφυσις*, from *sym*, and *φω*, 'I grow,') A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name *symphysis*, (F.) *Symphysie*, has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacroiliac symphysis*, &c. See *Monster*.

**SYMPHYSIS**, *Coalescence*, *Commissure*, *Insertion* — s. *Cartilaginea*, *Synchondrosis* — s. *Ligamentosa*, *Syndesmosis* — s. *Menti*, see *Maxillary bone*, inferior — s. *Ossium muscularis*, *Syssarcosis* — s. *Pubis*, *Pubic articulation*.

**SYMPHYSODACTYLIA**, (*symphysis*, and *δάκτυλος*, 'a finger,') An abnormal union of the fingers.

**SYMPHYSOP'ZIA**, (*symphysis*, and *ωψ*, 'the eye,') A monstrous fusion of the two eyes into one.

**SYMPHYSOTOMY**, *Symphysiotomy*.

**SYMPHYTOS**, (*συμφυτος*, 'grown or produced with,') Hereditary.

**SYMPHYTUM**, (*συμφυτον*.) *Symphytum officinale* seu *album* seu *Bohemium*, *Consolidata major*, *Com'frey*, *Al'm*, *Al'nis*, (Prov.) *Knitback*, (F.) *Grande Consoude*, *Oreilles d'âne*. Ord. Bo-

raginaceæ. See *Syst*. Pentandria Monogynia. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhoea, &c.

**SYMPHYTUM**, *Solidago vigaurea* — s. *Album*, *Symphytum* — s. *Bohemium*, *Symphytum* — s. *Minium*, *Bellis* — s. *Minus*, *Prunella* — s. *Officinale*, *Symphytum*.

**SYMPHYTUM PETRÆ'UM**, *Co'ris Montpellier'nis*, *Montpel'lier Co'ris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, *Sanicula*.

**SYMPLOCARPUS ANGUSTISPATHA**, (from *συμπλοκη*, 'connection,' and *καρπος*, 'fruit,' from the coalescing ovaries,) *Dracontium angustispatha* — s. *Fœtidus*, *Dracontium fetidum*.

**SYMPOD'IA**, *Monopod'ia*, (*sym*, and *πους*, gen. *ποδος*, 'a foot,') A monstrosity in which there is coalescence of the lower extremities.

**SYMPTOM**, *Symptom'a*, *Semei'on*, *Ac'cidens*, *Ca'usa*, (F.) *Symptôme*, (*συμπτωμα*, from *sym*, and *πτωμα*, 'a fall,' from *πτωω*, 'I fall,') Any change, perceptible to the senses in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *Symptoms of Symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. *Symptom*, at one time, was generally used in the same sense as *sign*; but with many, perhaps most, of the present day, the former signifies a functional or vital phenomenon of disease, whilst the latter is applied to that which is more directly physical; and hence the expressions *functional* or *vital phenomena* or *symptoms*, in contradistinction to the *physical signs* afforded by auscultation, percussion, &c. See *Sign*.

**SYMPTOMA**, gen. *Sympto'matis*, *Symptom* — s. *Turpitudinis*, *Nymphomania*.

**SYMPTOMATIC**, (*συμπτωματος*.) *Symptomati'cus*, (F.) *Symptomatique*. That which is a symptom of some other affection. Thus, we speak of a symptomatic disease, in opposition to one that is idiopathic.

**SYMPTOMATOGRAPHY**, (*symptoma*, and *γραφη*, 'a description,') *Semeiography*.

**SYMPTOMATOLOG'Y**, *Symptomatolog'ia*, *Symbol'ogy*, *Symbolog'ica*, (*symptoma*, and *λογος*, 'a treatise,') The branch of pathology, the object of which is the observation (*phenomenoscopy*) and knowledge of symptoms.

**SYMPTO'SIS**, (*συμπτωσις*, from *sym*, and *πτωω*, 'I fall,') Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

**SYN**, as a prefix, *Sym*.

**SYNEREMA**, gen. *Synere'matis*, (*συναίρεμα*.) *Corrugation*.

**SYNETION**, (*συνατια*, from *syn*, and *ατια*, 'a cause,') *Concausa*.

**SYNANCHE**, *Cynanche*, *Cynanche tonsillar*.

**SYNAN'CHE**, *Cynanche*.

**SYNAPHYMENTITIS**, (*συναψηνη*, 'a conjunction,')

*θυμη*, 'a membrane,' and *ιτις*,) see *Ophthalmia*.

**SYNAPTASE**, (*syn*, and *απτανω*, 'to join,') with amygdalin it forms hydrocyanic acid,) see *Amygdalin*.

**SYNARTHRODIA**, *Synarthrosis*.

**SYNARTHRO'DIAL**, *Synarthrodia'lis*. That which belongs to synarthrosis; as *Synarthrodial articulation*.

**SYNARTHRO'SIS**, (*συναρθρωσις*, from *syn*, and *αρθρωσις*, 'articulation,') *Synarthro'dia*, *Abartien'latio*, *Charticulatio*. An immoveable articulation. Synarthrosis includes three species: *Suture*, *Harmomy*, and *Gomphosis*.

**SYNATHROISIS**, (*συναθροισις*, *syn*, and *αθροισις*, to collect.) Congestion.

**SYNATHROISMUS**, (*συναθροισμος*.) Congestion.

**SYNCAN THUS**, (*syn*, and *αυθος*, 'the corner of the eye.') A marked adhesion between the globe of the eye and the orbit.

**SYNCHITON**, (*syn*, and *χιτων*, 'a coat.') Conjunctiva membrana.

**SYNCHONDROISIS**, (*συναχονδροισις* seu *Cop'ula* seu *Connectio cartilaginea*, *Chondro-synchondrosi-sis*, (*syn*, *χωνδριος*, 'a cartilage,' and *οσις*.) Union or articulation of bones by means of cartilage; as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

**SYNCHONDROTOMY**, (*syn*, *χωνδριος*, 'cartilage,' and *τομη*, 'to cut,') Symphysectomy.

**SYNCHRONOUS**, (*συναχρονος*, *Synchronus*.)

**SYNCHRONOUS**, (*συναχρονος*, *Synchronus*.) *Isosch'ronous*, (*ισοσχρονος*, from *syn*, and *χρονος*, 'time,') That which occurs at the same time. Thus, the pulsations of an artery are said to be synchronous with those of the heart.

**SYNCHRONUS**, (*συναχρονος*.) Synchronous.

**SYNCHYSIS**, (*συναχυσις*, from *syn*, and *χυσις*, 'to pour,') Confusion—s. Sparkling, Confusion.

**SYNCIPUT**, *Sinciput*.

**SYNCLONESIS**, (*συνακλονησις*.) Synclonus.

**SYNCLO Nus**, (*συνακλονος*, *Synclonus*, (*syn*, and *κλονος*, 'I shake,') 'I shake together,') Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will; *Clonic unicev'rus*, *Clonus*, (Young.) Also, general spasm; *spasmi unicev'ri*. See Tremor, Chorea, &c.

**SYNCLO Nus BALLISMUS**, Paralysis agitans—s. Beriberia. Beriberi—s. Chorea. Chorea—s. Raphania. Raphania—s. Saltans, Chorea—s. Tremor, Tremor.

**SYNCOMIS TUS**, (*συνακομιστος*, from *συνακομις*, (*syn*, and *κομις*, 'to bring,') 'to bring together,') *Autopyros*. *Panis domestici*, *secundarius*, *cibarius*, *confusus*. Bread of the whole wheat, or of the unsifted meal. Household bread. Also, a cataplasm made of the same.

**SYNCOPAL**, *Syncope*'s. *Syncopticus*, *Syncopticus*, (from *syncope*.) Relating or appertaining to syncope; as *Syncoptic Fever*, *Febri-syncopticus*. A pernicious intermittent, characterized by repeated attacks of syncope.

**SYNCOPE**, (*συνακοπη*, from *συνακοπτω*, (*syn*, and *κοπτω*, 'to fall,') 'I fall down,') *Animi defectio* seu *deltiquium*, *Leipopychia*, *Lipopychia*, *Ap'ychia*, *Ap'ychia*, *Lip'is Animi*, *Ap'ychia*, *Apopychia*, *Lipothymia*, *Leipothymia*, *Lipoph'xia*, *Eclipsis*, *Subitus animi eavus*, *Anccephalalaxia*, *Ap'ychy*, *Swoon*, *Swoon'ing*, *Swoot'ing*, *Fainting*, *Faint'ing fit*, *Faint'ness*, *Exalt'ion*, (Sc.) *Droze*, *Duals*, *Searf*, *Swerf*, *Swarth*, (Prov.) *Foxer*, *Swoot'ing*, *Swoon'ing*, *Swoon'ing*, *Swoon*, (F.) *Évanouissement*, *Défaillance*, *Pâmoison*. Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed *faint'ness*; and the person is said to be *faint*; (old E. and Prov.) *Swoonish* or *Swoonish*.

**SYNCOPE ANGENS**, *Angina pectoris*—s. Angina. *Angina pectoris*.

**SYNCOPTICUS**, (*συνακοπτικος*.) Syncopeal.

**SYNCOPTUS**, *Syncopeal*.

**SYNCRITICA**, (from *συνακρω*, 'to put together,') *Condensantia*.

**SYNDACTYLUS**, (*syn*, and *δακτυλος*, 'a finger,') *Aschistodaetylus*.

**SYNDESMITIS**, see Ophthalmia. Also, inflammation of articular ligaments; *Inflammatio ligamentorum*, (from *syndeismus*, 'ligament,' and *itis*.)

**SYNDESMOG'RAPHY**, *Synde-smograph'ia*, (*syndeismus*, and *γραφω*, 'a description,') A description of the ligaments. The part of anatomy which describes the ligaments.

**SYNDESMOLOGY**, *Synde-smology'ia*, (*syndeismus*, and *λογος*, 'a treatise, discourse,') A treatise on the ligaments.

**SYNDESMOPHARYNGEUS**, A fasciculus of the constrictor pharyngis superior.

**SYNDESMOSIS**, *Synde-smosis*, *Synymen'sis*, *Connectio* seu *Syn'physis ligamentosa*, *Commis-sura ver'te'ra*, *Connectio*, *Colligatio*, (F.) *Syn'desmosis*, (from *syndeismus*, and *οσις*.) The articulation of two or more bones by means of ligament; as of the radius with the ulna.

**SYNDESMOT'OMY**, *Synde-smot'omy*, (*syndeismus*, and *τομη*, 'I cut or dissect,') Dissection of the ligaments.

**SYNDESMUS**, (*συνδεσμος*.) Bandage. Ligament.

**SYN DROME**, (*συνδρομη*, from *syn*, and *δρομη*, 'a course,') *Concur'sus*, *Con'course*. A name given by the Empirical Sect to the union of symptoms which takes place in diseases: *Syn'dromé plethorica*, for example, meant the aggregate of symptoms produced by plethora.

**SYNDYASMUS**, (*συνδυασμος*, from *syn*, and *δυο*, 'two,') Coition.

**SYNECHES**, (*συνεχεις*, 'continuous,') see Continued fever.

**SYNECHIA**, (*συνεχεια*, from *syn*, and *χειρ*, 'to have,' or 'to hold,') Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia anterior*; the latter, *S. posterior*.

**SYNERGIA**, *Synergy*.

**SYNERGIA**, *Synergy*.

**SYNERGIA**, *Synergy*.

**SYNERGY**, (*συνεργεια*, *Synergi'a*, *Synergia*, (F.) *Synergia*, from *syn*, and *εργω*, 'work,') A correlation or concurrence of action between different organs in health; and, according to some, in disease.

**SYNESIS**, (*συνεσις*.) Intellect.

**SYNEUROSI S**, (*συνευρωσις*, from *syn*, and *ευρος*, 'a sinew,') see Synde-smosis.

**SYNEZISIS**, *Synze-sis*, *Consident'ia*, (from *syn*, and *ζευνται*, 'to join,' or from *τιζω*, 'to sit down together,' from *syn*, and *τιζω*, 'to sit,') A falling together.

**SYNEZISIS PUPILL'Æ**, *Parop'sis Synze-sis*, *Colli-go à Synze-sis*, *Colli-go seu Imperforatio* seu *Phthisis pupill'æ*, *Chlo'mere* or *occlusion* or *obliteration of the Pupil*. This disease is sometimes a faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezisis are completely blind: the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. The operation is called the *operation for artificial pupil*.

**SYNGENES**, (*συνγενεις*, from *syn*, and *γενωω*, 'to beget,') Hereditary.

**SYNGENICUS**, (*συνγενικος*.) Congenital.

**SYNHYMENSIS**, *Synymensis*.

**SYNIMENSIS**, *Synymensis*.

**SYNIZESIS**, *Considentia*, see Synezisis.

**SYNEUROSI S**, (*συνευρωσις*, from *syn*, *ευρος*, 'a tendon,' and *οσις*.) Synde-smosis.

**SYNNEVROSE**, *Synde-smosis*.

**SYNOCHA**, (from *συναχω*, (*syn*, and *αχω*, 'to

have or hold,') ('I continue.') *Inflam'matory* or *Dynam'ic Fe'ver*, *Angiop'gra*, *Sthenop'gra*, *Fe'bris causo'des* seu *caumato'des* seu *deu'rens* seu *ar'deus* seu *cont'in'ia sanguin'ea* seu *cont'in'ua* uou *pu'tris* seu *acma'stica* seu *acu'ta* seu *acu'ta sanguin'ea* seu *cont'inens* seu *contineus* non *pu'trida* seu *angioten'ica* seu *sthen'ica* seu *sanguin'ea* seu *inflam'mato'ria*, *Homoi'ouos*, *Syn'ochus* (Vogel), *S. impu'tris* (Galen), *Ene'cia eui'ma* seu *ton'ica*, *Phlogop'gra*, *Cau'ma*, *Calcut'ia cont'in'ua* (F.) *Fièvre ardente* ou *contiente inflam'matoire* ou *sanguine* ou *irritative* ou *angeioténique* ou *inflam'matoire*, *Gastro-entérite intense*; *General inflam'mation*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine highcoloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute—s. *Vaccina*, *Vaccina*.

SYNOCHAL, *Synocha'lis*. Relating to, or having the characters of, synocha.

SYNOCHUS, (*συναχος*, 'continued,') *Ene'cia syn'ochus*, *Fe'bris len'ta*, (Linnæus). Continued fever, compounded of synocha and typhus:—in its commencement often resembling the former; in its progress, the latter: *Miz'ed fe'ver*, *Com'mon cont'inued fe'ver*, *Syn'ochoid fe'ver*. See *Acnasticus*. Continued fever, *Fever*, and *Typhus*.

SYNOCHUS, *Synocha*—s. *Biliosa*. *Fever*, *gastric*, *Fever*, *bilious*—s. *Catarrhalis*, *Influenza*—s. *Ictero-des*, *Fever*, *yellow*—s. *Impu'tris*, *Synocha*—s. *Miliaria*, *Miliary fever*—s. *Variella*, *Variella*.

SYNOLCE, (*συνολκη*, from *syn*, and *ελκω*, 'to draw,') *Spasm*.

SYNSTEOGRAPHY, *Synsteeogra'phia*, (*syn*, *οστειον*, 'a bone,' and *γραφω*, 'I describe,') The part of anatomy which describes the joints.

SYNSTEOL'OGY, *Synsteeolog'ia*, (*syn*, *οστειον*, 'a bone,' and *λογος*, 'a treatise,') *A treatise on the joints*.

SYNSTEO'SIS, *Synosto'sis*, (*syn*, *οστειον*, 'a bone,' and *οσις*,) *Union by means of bone*.

SYNSTEOT'OMY, *Synsteeotom'ia*, (*syn*, *οστειον*, 'a bone,' and *τεμνειν*, 'to cut,') *Dissection of the joints*.

SYNSTOSIS, *Synosteosis*.

SYNOTE, (*syn*, and *οτις*, *ωτις*, 'an ear,') *A genus of double monster of Is. G. St. Hilaire*, the second face of which is represented only by two ears close together, or a double median ear.

SYNOVIA, (*syn*, and *ων*, 'ovum, an egg,') *Mucila'go*, *Un'guen seu Unguentum* seu *Sme'gma articula'rè*, *Arum'gia articula'ris*, *Mucila'go articulo'rum* seu *unctura'rum*, *Hu'mor articula'ris*, *Hydrar'thrus*, *Hu'mor seu Hu'midum nati'vum* seu *Glu'ten articulo'rum*, *Arthrohydr'i'wè*, (F.) *Synovie*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNOVIAL, *Synovia'lis*. That which relates to the synovia.

SYNOVIAL CAPSULES, see *Membrane*.

SYNOVIAL GLANDS, *Hav'ers's Glands*, *Gland'ulæ articula'res* seu *Synovia'les* seu *Haversia'nes*, are the secretory fringes, which float in the interior of the synovial capsules (see *Capsules*.) They do not seem to be glandular. They have been called *Synovial fim'briae*, (F.) *Frangere synoviales*.

SYNOVIAL MEMBRANES, see *Membrane*.

SYNOVITIS, (*Synovia*, and *itis*.) *A term, badly compounded, applied at times to inflammation of the synovial membrane. arthrophlogo'sis synovia'lis*. When it affects the bursae, it is sometimes called *Burs'itie*

SYNOVITIS RHEUMATISMALIS, *Rheumatism*, (acute).

SYNTASIS, (*συντασις*, from *συντενω*, (*syn*, and *τεινω*, 'I stretch,') 'I strain,') *Tension of parts*: hence *συντασικα*, are medicines which render parts tense. *Syntex'is*, on the other hand, means *Colligatio*, or wasting of the body; from *συντηνω*, 'I melt together.'

SYNTAXIS, (*συνταξις*; from *syn*, and *τασσειν*, 'to put in order,') *Articulation*, *Reduction*, *Taxis*—s. *Serrata*, see *Suture*.

SYNTECOPYRA, (*syntexis*, and *πυρ*, 'fever,') *Hectic fever*.

SYNTECTYCOPYRA, *Hectic fever*.

SYTENOSIS, (*syn*, *τενω*, 'a tendon,' and *οσις*.) *A species of articulation in which two bones are joined by means of tendon*; as the scapoid bones with the toes, the rotula with the tibia, &c.

SYTERESIS, (*συντηρησις*, from *syn*, and *τερευω*, 'to keep,') *Prophylaxis*.

SYTERETICUS, (*συντηρητικος*), *Prophylactic*.

SYTEXIS, (*συντηξις*) *Colligation*, *Consumption*, see *Syntasis*.

SYTHENA. *A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina*.

SYNTHESIS, (*συνθεσις*,) *Reu'nio*, 'composition or putting together,' (from *syn*, and *τιθημι*, 'I place,') *A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. Reu'nio par'tium separata'rum, Syn'thesis of cont'inuity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Syn'thesis of cont'inuity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYNTHESIS, *Composition*.

SYNTHETISM'US. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counterextension, coaptation, and bandaging.

SYNTONIN, (*syn*, and *τωνος*, 'a muscle,') see *Fibrin*.

SYNTRIMMA, gen. *Syntrimm'atis*, (*συντριμμα*, from *syn*, and *τριβω*, 'to rub,') *Contritio*.

SYNTRIP'SIS, (*συντριψις*), *Contritio*.

SYNTROPHUS, (*συντροφος*, from *syn*, and *τροφω*, 'to nourish,') *Connutritus*.

SYNULOSIS, (*συνουλωσις*, from *syn*, *ουλωω*, 'to cicatrize,' and *οσις*), *Cicatrization*.

SYNULOTICA, (*συνουλωτικα*), *Cicatrissantia*.

SYNUSIA, (*συνουσις*), *Coition*.

SYNYMEN'SIS, *Synhymen'esis*, *Synimen'esis*, (*syn*, and *υμην*, 'a membrane,') *Union of bones by membrane, as in the case of the bones of the head in the fœtus. Syndesmosis*.

SYPIAC, *Peritonæum*.

SYPHILIDES, (F.) *Syphilides*, *Dermo-syphilides*, *Dermatosies véroleuses*. (From *syphilitis*.) The cutaneous eruptions that appertain to constitutional syphilis are so denominated by the French writers.

SYPHILIDIA'TER, *Syphilidia'trus*, (*syphilitis*, and *ιατρος*, 'a physician,') *A pox doctor. One who occupies himself in treating syphilis*.

SYPHILIDOGRAPHY, *Syphilography*.

SYPHILIDOLOGY, *Syphilology*.

SYPHILIDOMANIA, *Syphilomania*.

SYPHILIPHO'BIA, (*syphilitis*, and *φοβος*, 'dread,') *A morbid dread of syphilis, giving rise to fancied symptoms of the disease; a form of hypochondriasis*.

SYPHILIS, gen. *Syphil'idis*, *S. venerea* seu *maligna*, *Siphilis*, *Syphilis'mna*, *Cachex'ia* seu *Cachex'ia Venere'a*, *Mal'um venere'um*, *Puden'dagra*, *Me'm'ium*, *Lu'ës*, *L. venerea* seu *syphilitis*, *Mor'bus Gall'icus* seu *Ital'icus* seu *Hispan'ic'us* seu *Neapolita'nus* seu *Ind'icus* seu *aphrodis'ius*,

*Patur'ca, Basiliscus, Bo'ca, Sod'oma Gull'vinn; Vene'ral, Vene'real Disease', Poz, French Poz, French Crust, French Distemp'er, Font Disease, old cant term Grin'comes, (Prov.) Pip, (Sc.) Glengore, Gleugonr, Grandgore, (F.) Vérole ou Grosse Vérole, Maladie vénérienne, Mal de Naples, Mal Français, Maladie de Vénus.* (The etymology of syphilis is unknown. Some consider it to proceed from *σφς*, 'a hog,' and *φιλεω*, 'I love;' others, from *σφ*, 'with,' and *φιλεω*, 'I love;' and others, with more probability, from *σφιδος*,—formed, by contraction, from *σπαδος*,—'a reproach,' &c.) It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a *primary* symptom, and there are other symptoms which are *secondary* or *constitutional*. These are:—ulcers in the throat; coppercoloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed *tertiary* phenomena. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every anti-syphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks may be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered. The preparations of iodine have been much used in the revellent treatment of this disease.

SYPHILIS INDICA, Framboesia.

SYPHILIS PSEUDOSYPHILIS, *Lu'es Syphilo'id'es, Pseudosyphilis*. A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. *Sivens, Radesyge, &c.*, have been referred to this head.

SYPHILIS, SECONDARY, see Syphilis—s. Tertiary, see Syphilis.

SYPHILISATION, Syphilization.

SYPHILISMUS, Syphilis.

SYPHILITIC, *Syphiliticus*, (F.) *Syphilitique, Vérolique, Vérolé*. Belonging, or relating to, or affected with, syphilis; (F.) *Syphilité*.

SYPHILIZATION, *Syphilitisatio*, (F.) *Syphilisation*. Saturation of the system by inoculation with the matter of syphilis. It has been used as a curative procedure in syphilis, as well as a preventive of that disease; and for the cure of other cachexiæ, as cancer.

SYPHILODERM'A, gen. *Syphiloderm'atis*, (*syphilis*, and *δερμα*, 'skin,') A cutaneous eruption of a syphilitic character.

SYPHILOG'ENY, *Syphilogen'ia*, (*syphilis*, and *γεννω*, 'to generate,') The origin or generation of syphilis.

SYPHILOG'RAPHER, (*syphilis*, and *γραφω*, 'I describe,') A writer on syphilis.

SYPHILOG'RAPHY, *Syphilograph'ia*, *Syphilitidog'raphy*, *Syphilidograph'ia*, (*syphilis*, and *γραφω*, 'to describe,') A description of syphilis.

SYPHILOID, *Syphilo'id'es*, (*syphilis*, and *ειδω*,

'resemblance,') Resembling syphilis,—as 'a *syphilitoid* affection.'

SYPHILOLOG'Y, *Syphilolog'ia*, *Syphilitodol'ogy*, *Syphilitodolog'ia*, (*syphilis*, and *λογος*, 'a discourse,') The doctrine of syphilis and its management. A treatise on syphilis.

SYPHILO'MA, (*syphilis*, and *oma*.) A term given by Wagner to what he regards as a specific syphilitic new formation, having a definite structure of cells and nuclei; like as there is a specific carcinomatous new formation in cancer.

SYPHILOM'A'NIA, *Syphilidoma'nia*,—vulgarly, *Nod'dle Poz*. A mania, with which some persons are affected, so that they subject themselves to antiveneal treatment, under the erroneous impression that they are affected with syphilis.

SYPHITA, Somnambulism.

SYPHON, see Siphon.

SYRIGMOPHON'IA, (*σφρυγμος*, 'piping,' and *φωνη*, 'voice,') A piping state of the voice.

SYRIGMUS, (*σφρυγμος*,) Tinnitus aurium.

SYRINGA, (from *syrix*,) Eustachian Tube. Fistula, Syringe, Trachea—s. *Clysmatica*, Syringe (clyster.)

SYRINGA VULGARIS, *Li'lac vulg'aris*, *Com'mon Li'lac*. *Ord. Oleaceæ*. The leaves and fruit are bitter and somewhat acrid, and have been used as tonics and antiperiodics.

SYRINGE, *Syr'in'z*, *Syrin'ga*, *Si'pho*, *Siphun'culus*, *Squirr*, (F.) *Seringue*, (from *σφρυγ*, gen. *σφρυγος*, 'a pipe,') A familiar apparatus through which any liquor is injected.

Various forms of syringe are used in medicine and surgery.

SYRINGE, CLYSTER, *Syrin'ga clysmatica*, *Clystantium*, (F.) *Clysopompe*. A syringe for administering clysters.

SYRINGE, CUPPING, *Antlia sanguinea*.

SYRINGES AERIFERI, 'air tubes,' see Bronchia.

SYRINGICUS, (from *syrix*,) Fistulous.

SYRINGITIS EUSTACHIL, (*syringa*, and *itis*,) Inflammation of the Eustachian tube.

SYRINGMUS, (*σφρυγμος*,) Tinnitus aurium.

SYRINGODES, (*σφρυγγιδης*,) Fistulous.

SYRINGOTOME, *Syringotomis*, *Syringotomum*, (*syrix*, 'fistula,' and *τομειν*, 'to cut,') A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts.

SYRINGOTOMY, *Syringotomia*. The operation for fistula in ano by incision.

SYRIX, gen. *Syring'is*, (*σφρυγ*, gen. *σφρυγος*,) Eustachian tube, Fistula, Syringe, Trachea—s. *Hiera*, Vertebral column.

SYRMAISMUS, (from *σφραϊσω*, 'I evacuate,') A gentle evacuation by vomiting or stool.

SYROP, Syrup—s. *d'Ail*, Syrupus allii—s. *d'Armoie composé*, Syrupus aromaticus—s. *de Capillaire*, see *Adiantum Capillus veneris*—s. *de Chicorée composé*, Syrupus de echiorio compositus—s. *des Cinq racines*, Syrupus e quinque radicibus—s. *de Coqueleat*, Syrupus rhæad—s. *de Coralline*, see *Corallina Corsicana*—s. *de Cuisinier*, Syrupus de sarsaparilla et sennâ compositus—s. *d'Ether*, Syrupus cum æthere sulphurico paratus—s. *de Giugembre*, Syrupus zingiberis—s. *de Guimauve*, Syrupus althææ—s. *de Longue vie*, Mellitus de mercuriali compositum—s. *de Mercure*, Syrupus de mercurio mediante gummi—s. *de Non de veau*, see Syrupus zingiberis—s. *de Mûres*, Syrupus mori—s. *de Nerprun*, Syrupus rhamni—s. *de Pacots blancs*, Syrupus papaveris—s. *de Pommes composé*, see Syrupus sennæ—s.

de Quinquina avec le Vin, Syrupus de kinâ kinâ cum vino—s. de Roses pâles, Syrupus rosæ—s. de Roses rouges, Syrupus rosæ—s. Simple, Mel despumatum—s. Végétal de Velno, Syrup, vegetable, of Velno—s. de Vinaigre, S. aceti.

SYRUP, *Syr'up*, *Syr'upus* or *Syr'upus Scrap'um*, *Serape'um*, (F.) *Syrop*, *Sirap*, *Saccharolâ lique*, *Saccharhydrole*, (derived, according to some, from *cupo*, 'I draw,' and *oros*, 'juice,' but more probably, from the Arabic *Sirap*, *Sirab*, or *Scharab*, which signifies 'a potion.')

A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it was directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1.261 when boiling, and about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See Syrupus simplex.

SYRUP OF ALMONDS, Syrupus amygdalæ.

SYRUP, ANTISCORBUTIC, Syrupus antiscorbüticus—s. Balsamic, Syrupus toluatanus.

SYRUP OF BLACKBERRY ROOT, Syrupus Rubi—s. of Buckthorn, Syrupus rhamnii—s. of Calf's lungs, see Syrupus zingiberis—s. of Capillaire, common, Syrupus simplex—s. of Cinchona with wine, Syrupus de kinâ kinâ cum vino—s. of Cinchonia, Syrupus cinchonice—s. Citric acid, Syrupus acidi citrici—s. of Clove July flower, Syrupus caryophylli rubri—s. of Clove pinks, Syrupus caryophylli rubri—s. of Cochineal, Syrupus cocci—s. of Emetine, Syrupus emetine—s. of Ether, Syrupus cum æthere sulphurico paratus—s. of Five roots, Syrupus e quinque radicibus—s. of Garlic, Syrupus allii—s. of Ginger, Syrupus zingiberis—s. of Gum Arabic, Syrupus acaciæ.

SYRUP, HIVE, Syrupus seillæ compositus.

SYRUP OF HONEY, Mellitum simplex—s. of Iodide of iron, Liquor Ferri iodidi—s. of Ipecacuanha, Syrupus ipecacuanhæ—s. of Jalap, Syrupus jalapæ—s. of Lactucarium, Syrupus Lactucarii—s. of Lemon, Syrupus limonis—s. of Marshmallow, Syrupus althææ—s. of Meadow saffron, Syrupus colchici autumnalis—s. of acetate of Morphia, Syrupus morphiæ acetatis—s. of muriate of Morphia, Syrupus morphiæ muratis—s. of Mugwort, compound, Syrupus aromaticus—s. of Mulberries, Syrupus mori—s. of Orange flower, Syrupus Aurantii florum—s. of Orange juice, see Syrupus aurantii—s. of Orange peel, Syrupus aurantii—s. of Orgeat, Syrupus amygdalæ—s. of Phosphate of iron, see Ferri phosphas—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhœodæ—s. of Quinia, Syrupus quiniæ—s. of Rhatany, Syrupus kramerice—s. of Rhubarb, Syrupus rhei—s. of Rhubarb, aromatic, Syrupus rhei aromaticus—s. of Rhubarb, spiced, Syrupus rhei aromaticus—s. of Roses, Syrupus rosæ—s. of Roses, red, Syrupus rosæ gallicæ—s. of Saffron, Syrupus croci—s. of Sarsaparilla, Syrupus sarsaparillæ—s. of Sarsaparilla and senna, compound, Syrupus de sarsaparillâ et sennâ compositus—s. of Sarsaparilla, compound, see Syrupus de sarsaparillâ et sennâ compositus—s. of Sarsaparilla, Indian, Syrupus hemidesmi—s. of Scammony, Syrupus de scammonio—s. of Seneka, Syrupus senegæ—s. of Senna, Syrupus sennæ—s. Simple, Syrupus simplex—s. of Squill, Syrupus seillæ—s. of Squill, compound, Syrupus seillæ compositus—s. of Suceory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus toluatanus.

SYRUP, VEGETABLE, OF VELNO, (F.) *Sirap végétal de Velno*. (Made of roots of *birdock* and *dandelion*, leaves of *spearmint*, *senna*, *coriander*, *liquorice*, *sugar*, and *water*.) It has been prescribed as

a cutrophic, especially in syphilis; but, like the syrups of sarsaparilla, is, perhaps, mainly indebted for its efficacy to the sugar. The corrosive chloride of mercury is often added to it.

SYRUP OF VINEGAR, Syrupus aceti—s. of Violets, Syrupus violæ—s. of Wild cherry bark, Syrupus Pruni Virginianæ.

SYRUPUS, S. simplex.

SYRUPUS ACA'CIÆ, *Syr'up* of *Gum Arabic*, (*Acacia*,  $\xi$ ij, *Sacchar*,  $\xi$ xiv, *Aq.*  $f$   $\xi$ vij). Dissolve the gum in the water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose,  $f$   $\xi$ j to  $f$   $\xi$ ij.

SYRUPUS ACETI, *S. Ac'idi Aceto'si*, *Syr'up* of *Vinegar*, (F.) *Syrup* de *Vinaigre*. (*Aceti*,  $\text{O}i$ ss, *Sacch. purif.*  $\text{I}i$ ssij). Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose,  $f$   $\xi$ j to  $f$   $\xi$ ij.

SYRUPUS ACIDI ACETOSI, S. aceti.

SYRUPUS AC'IDI CITRICI, *Syr'up* of *Citric Acid*, (*Acid. citric. pulv.*  $\xi$ ij; *Ol. Limm.*  $\text{M}$ ij; *Syrup.*  $\text{O}i$ j). Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

SYRUPUS CUM ÆTHERE SULPHURICO PARATUS, *Syr'up* of *E'ther*, (F.) *Syrup* d'*ether*. (Very *Pure sugar*, 1000 p.; *Distilled water*, 500 p.; dissolve in the cold, and strain: add *Sulphuric ether*, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

SYRUPUS AL'II, *Syrup* of *Garlic*, (F.) *Syrup* d'*ail*. (*Allii* recent. concis.  $\xi$ vj, *Acet. destillat.*,  $\text{O}j$ , *Sacchar.*  $\text{I}i$ j). Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) *Use*, same as that of garlic. Dose,  $f$   $\xi$ j to  $f$   $\xi$ iv.

SYRUPUS ALTHÆ'Æ, *S. ex Althæâ seu de Althæâ* (seu *Althææ officinalis*, *Syr'up* of *Marsh-mallow*, (F.) *Syrup* de *Guismaue*. (*Althææ rad. recent.* cont.  $\text{I}i$ ss, *Sacch. pur.*  $\text{I}i$ j, *Aque*,  $\text{O}i$ v). Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose,  $f$   $\xi$ j to  $f$   $\xi$ ij.

SYRUPUS AMOMI ZINGIBERIS, S. zingiberis.

SYRUPUS AMYGDALÆ, *Syrup* of *Almonds*, S. of *Or'geat*, *Or'geat*. (*Amygdal. dulc.*  $\text{I}i$ j, *Amygdal. amar.*  $\xi$ iv, *Aque*,  $\text{O}i$ j, *Sacchar.*  $\text{I}i$ vj). Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluid-ounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles, which must be well stopp'd, and kept in a cool place. Ph. U. S.) Demulcent.

SYRUPUS ANTICASCORBUTICUS, see Antiscasiodic.

SYRUPUS ANTISCORBUTICUS, S. de *Armoracîâ compositus*, *Antiscorbütic* *Syr'up*. (*Leaves* of *Cochlearia*, *Buckbean*, *Water-cresses*, *Horse-radish* root and *Bitter oranges*, each  $\text{I}i$ j, *Cinnamon*,  $\xi$ iss. Cut, and pour on *White wine*,  $\text{I}i$ v. Macerate for two days; distil over  $\text{O}j$  in a sand-bath; add to this *Sugar*,  $\text{I}i$ j, and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add *Sugar*,  $\text{I}i$ j; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. Ph. P.) Antiscorbütic, alterative, tonic, stomachic, &c. Dose,  $f$   $\xi$ j to  $f$   $\xi$ ij.

SYRUPUS DE ARMORACÎA COMPOSITUS, S. antiscorbüticus.

**SYRUPUS AROMATICUS**, *S. de Artemisiâ compositus*, Compound Syrup of Mugwort, (F.) Syrup d'arceisois composé. (Tops of artemisia vulgaris, in flower, ℥ij, Inula root, Lignisticum levisticum, and Fennel, each ℥ss, Pennyroyal, Catmint, Sarine leaves, each ℥vj, Marjoram, Hyssop, Pyrethrum, Rue, Basil, each ℥ij, Aniseed and Cinnamon, each ℥ix; bruise and macerate in Hydromel, lbxvii; distil over Oss; add to this a pound of sugar. Again, take the liquid that remains in the cucurbit, strain it gently; and add Sugar, lbv. Then mix the two. Ph. P.) Tonic, emmenagogue, &c.

**SYRUPUS DE ARTEMISIÂ COMPOSITUS**, *S. anti-scorbuticus*—s. Asparagi, see Asparagus.

**SYRUPUS AURANTIÏ**, *S. Aurantiorum* seu *Citri Aurantii* seu *Cor'ticis Aurantii* seu *Aurantii* *Cor'ticis* (Ph. U. S.) seu *e Cortic'ib'ns Aurantiorum* seu *de Cor'tic'e Aurantiorum*, Syrup of Orange peel. (Aurant. cort. cont. ℥ij, Aq. ferr. Oj, Sacch. lbjss. Macerate the peel in the water for twelve hours. Add the sugar. Ph. U. S. A modified form is in Ph. U. S. 1863.) In the British Pharmacopœia, (1864.) it is made by mixing Tincture of orange peel, f℥ij with Syrup, f℥vij. Stomachic. Dose, f℥ij to f℥ij.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e suc'co Aurantiorum, may be made by adding white sugar, lbij to lbj of the juice of oranges, strained and clarified.

**SYRUPUS AURANTIÏ FLO'RUM**, Syrup of Orange Flowers, *S. Aurantii Floris* (Ph. B. 1864.) (Aq. Aurant. flor. f℥v; Sacchar. ℥xxxvj; Aq. destillat. f℥xxxv. Dissolve the sugar in the water and raise to the boiling point. When cold, mix with the orange flower water, and strain. Ph. U. S. 1863.)

**SYRUPUS BALSAMICUS**, *S. toluatanus*.

**SYRUPUS CARYOPHYLLI RÛ'BRI**, *S. Infusio'nis fo'r'm caryophyllo'rum*, *S. Dian'thi Caryophylli*, Syrup of Clove July flower or of Clove Pinks. (Petaltorum dianth., Caryoph. recent., unguibus resectis, lbj, Aquæ bull. Oiv, Sacch. purif. lbvij. Ph. E.) Aromatic.

**SYRUPUS CASSIÆ SENNÆ**, *S. sennæ*.

**SYRUPUS DE CICERO'RIO COMPOSITUS**, *S. de Rhe'o*, Compound Syrup of Suckcory, (F.) Syrup de chicorée composé. (Root of succory, ℥vj, Leaves of succory, ℥ix, Leaves of fennitry and scolopendrium, each ℥ij, Alkekenji berries, ℥ij. Boil in Water Oxij to Oxij; pass through cloth, and dissolve in it White sugar, lbv. Boil till it has the consistence of syrup. Again, take Water, Oviij, Rhubarb, ℥vj, Yellow saunders and Cinnamon, each ℥ss. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. Ph. P.) It is laxative and stomachic. Dose, f℥ij to f℥ss.

**SYRUPUS CINCHONÆ CUM VINO**, *S. de kinâ kinâ cum vino*.

**SYRUPUS CINCHO'NIÆ**, Syrup of Cincho'nia. (Simple syrup, one pound; Sulphate of cinchonia, nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermitent.

**SYRUPUS CITRI AURANTIÏ**, *S. aurantii*—s. Citri medicea, *S. Limonium*.

**SYRUPUS COCCÏ**, Syrup of Cochineal. (Cocc. cont. ℥iv, Aq. destillat. bullient. Oj (Imp. meas.), Sacchar. lbij, vel q. s. Sp. rectifcant. f℥ijss, vel q. s. Ph. L.) Chiefly used as a colouring agent.

**SYRUPUS COL'CHICI AUTUMNALIS**, *S. Colchici*, Syrup of Meadow Saffron. (Rad. colch. autumn. recent. ℥j, Acidi acetosi, f℥xvi, Sacch. pur. ℥xxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain with gentle expression. To the strained fluid add the sugar, and boil to a syrup. Ph. E.) Diuretic, antiarthritic. Dose, f℥ij to f℥ss, or more.

**SYRUPUS CORTICIS AURANTIÏ**, *S. aurantii*—s. e Succo citrorum, *S. limonium*.

**SYRUPUS CROCI**, Syrup of Saffron. (Croc

stigmat. ℥j, Aquæ fervent. Oj, Sacch. purif. lbjss. Ph. L.) Cardiac. Chiefly used for colouring.

**SYRUPUS DIACODION**, *Diacodium*—s. Dianthi caryophylli, *S. caryophylli rubri*.

**SYRUPUS EMETI'NÆ**, Syrup of Emetine. (Simple syrup, lbj, Emetine, 16 gr.) In small doses, expectorant; and in large, emetic.

**SYRUPUS EMPYREUMATICUS**, *Melasses*—s. Ferri iodidi, Liqueur Ferri iodidi—s. Ferri phosphatis, see Ferri phosphas—s. Fuscus, *Melasses*.

**SYRUPUS HEMIDESMI**, Syrup of In'dian Sarsaparilla. (Hemidesm. cont. ℥iv (avoirdup.), Aq. destillat. bullient. Oj (Imp. meas.), Sacchar. q. s. Ph. D.) A weak preparation of hemidesmus.

**SYRUPUS HYDRARGYRI**, Syrupus de mercurio mediante gummi—s. Infusionis florum caryophyllorum, Syrupus caryophylli rubri.

**SYRUPUS IPECACUAN'HÆ**, Syrup of Ipecacuan'ha. (Ipecac. in pulv. crass. ℥j, Alcohol. dilut. Oj, Sacchar. lbjss, Aquæ, q. s. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. In the Ph. U. S. 1863, it is directed to be made by mixing Ext. Ipecac. fluid. f℥ij with Syrup, f℥xxx.) It may also be made with displacement.

**SYRUPUS DE JALAP'Æ**, Syrup of Jal'ap. (Pulv. Jalape, ℥x, Sem. coriandr., Fœnicul. dulc. āā ℥ss; Aquæ, f℥xijss, Sacch. ℥xxv. Ph. P. Cathartic. Dose, f℥ij to f℥ss: for children.

**SYRUPUS DE KINÂ KINÂ CUM VINO**, *S. Cincho'næ cum vino*, Syrup of Cincho'na with wine, (F.) Syrup de quinquina avec le vin. (Cort. cincho'næ officinatis, ℥ij, Ext. cincho'næ, ℥vj, Vinu' albi (Vin. Lunel. seu cypriensis ei similis), Oj, Alcohol (s. g. '985 to '915.) f℥ij, Sacchar. alb. lbjss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. Ph. P.) Dose, f℥ss to f℥ij.

**SYRUPUS KRAMER'LE**, Syrup of Rhat'avy. (Ext. Kramer. ℥ij, Aquæ, Oj, Sacchar. lbjss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. Ph. U. S. It may also be made by displacement from Kramer. in pulv. crass. lbj, Sacchar. lbjss, Aq. q. s.) An adjunct to astringent mixtures; or given in diarrhœa, a teaspoonful to a child.

**SYRUPUS LACTUCA'RII**, Syrup of Lactuca'rium. (Lactuc. ℥j, Syrup, f℥xvij; Alcohol. dil. q. s. Rub the lactucarium with enough of diluted alcohol to give a syrupy consistence. Pass half a pint of tincture by percolation; evaporate, at a heat not above 160°, to f℥ij; mix with the syrup previously heated, and strain while hot. Ph. U. S. 1863.) Anodyne: but not of much efficacy.

**SYRUPUS LIMONIS**, *S. Limonium*—s. Succi limonis, *S. Limonium*.

**SYRUPUS LIMO'NUM**, *S. Limo'nis*, (Ph. U. S.) seu *citri medicæ* seu *e suc'co citrorum* seu *e suc'co limonium* seu *e suc'co limo'nis*, Syrup of Lemon, Lemon Syrup. (Limou. succ. colat. Oj, Sacchar. lbv, Aq. Oj.) Cooling and agreeable.

**SYRUPUS E MECONIO**, *S. papaveris*—s. de Melle, Mellitum simplex.

**SYRUPUS MERCURIO MEDIAN'TE GUMMI**, *S. Hydrargyri*, Mercur'ius gummosus Pleuch'ii, (F.) Syrup de mercure, Mercure gommeux de Pleuch. (Hydrargyri pur. ℥j, Gum. acaciæ, ℥ij, Syrup d'indoc. ℥ss. Rub together till the mercury is extinguished. Ph. P.) Possesses the properties of blue pill. Dose, gr. ij to viij, or more.

**SYRUPUS MORI**, *S. e suc'co mororum* seu *e suc'co mori*, Syrup of Mul'berries, (F.) Syrup de miris. (Mori succ. colat. Oj, Sacchar. purif. lbj. Ph. L.) Gratefully refrigerant.

SYRUPUS E SUCCO MORORUM, *S. mori*.

SYRUPUS MORPHIÆ ACETATIS, *Syrup of acetate of morphia*. (*Liq. morphia acet.* f ʒj; *Syrup*, f ʒxv. *Ph. D.*) Dose, f ʒss to f ʒi, as an opiate.

SYRUPUS MORPHIÆ MURIATIS, *Syrup of muriate of morphia*. (*Liq. morph. muriat.* f ʒj; *Syrup*, f ʒxvij. *M. Ph. D.*) Dose, f ʒss to f ʒj, as an opiate.

SYRUPUS MORPHIÆ SULPHATIS may be made in the same way.

SYRUPUS NIGER, *Melasses*.

SYRUPUS PAPAVERIS, *S. papaveris somniferi seu papaveris albi seu meconio seu de meconio, Diacodium, Syrup of poppies*, (*F.*) *Syrup de papotes blancs ou Diacode*. (*Papav. capsul. exsicc.* et contus. exemptis seminibus, ʒxiv, *Sacch. pur.* ʒij, *Aq. ferrent.* cong. ijs. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as to form a syrup. *Ph. L.*) One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, *S. rheados* — *s. de Pomis compositus*, see *S. sennæ* — *s. Proteæ*, see *Protea mellifera*.

SYRUPUS PRUNI VIRGINIANÆ, *Syrup of Wild cherry bark*. (*Pruni Virginian.* in pulv. crass. ʒv, *Sacchar.* xxvij, *Aquæ*, q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. *Ph. U. S.*) Dose, as a demulcent expectorant, f ʒj to f ʒij.

SYRUPUS PULMONIUS VITULINIS, see *Syrupus Zingiberis*.

SYRUPUS QUIÑIÆ, *Syrup of Quinia*. (*Simple syrup*, 2 pints, *Sulphate of quinia*, 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS E QUIÑQUÉ RADICIBUS, *Syrup of five roots*, (*F.*) *Syrup des cinq racines*. (*Rad. Apii, Foeniculi, Apii petroselinii*, āā ʒv. Infuse for 24 hours in boiling water, Oiss, and strain. *Rad. asparag.*, *Ruscii aculeati*, āā ʒv, *Aquæ*, Ovij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add *White sugar*, ʒvj. *Ph. P.*) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f ʒss to f ʒj, or more.

SYRUPUS RHAMNI, *S. Rhamni cathartici seu de Spinâ cervinâ seu spinâ cervinâ*, *Syrup of Buckthorn*, (*F.*) *Syrup de nerprun*. (*Rhamn. baccar. succ. recent.* Oiv. *Zingib. rad. concis.*, *Pimentæ bacc. contrit.*, āā ʒss, *Sacch. purif.* ʒiijss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. *Ph. L.*) Cathartic, but apt to gripe. Dose, f ʒij to f ʒij.

A factitious syrup has been made of aloes, dissolved in simple syrup.

SYRUPUS RHEI, *Syrup of Rhubarb*. (*Rhei*, in pulv. crass., ʒij; *Alcohol*, Oss; *Aquæ*, Oiss; *Sacchar.* ʒij. Mix the alcohol and water; pour f ʒiv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the alcohol and water. By means of a water-bath, evaporate to f ʒxij; add the sugar, and make a syrup. *Ph. U. S.* 1851.) In the *Ph. U. S.* for 1863, it is made by mixing *Ext. Rhei fluid.* f ʒij

with *Syrup*, f ʒxxix. Dose to a child, as a laxative, one or two teaspoonfuls.

SYRUPUS RHEI AROMATICUS, *Aromatic or Spiced Syrup of Rhubarb*. (*Rhei* cont. ʒiijss; *Caryophyl. cont.*, *Cinnam. cont.* āā ʒss; *Myrist.* cont. ʒij; *Alcohol. dilut.* Oij; *Syrup*, Ovij. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water-bath, evaporate the liquor to a pint, and while still hot, mix with the syrup previously heated. *Ph. U. S.*) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, f ʒj; to an adult, f ʒj.

SYRUPUS DE RHEO, *Syrupus de Cichorio compositus*.

SYRUPUS RHEADOS, *S. de papaverê erratico seu papaveris erratici, Syrup of Red Poppy*, (*F.*) *Syrup de coquelicot*. (*Rhead. petal. recent.* ʒij, *Aq. fervent.* f ʒxvij, *Sacch. purif.* ʒiijss. To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. *Ph. L.*) Chiefly used to give colour.

SYRUPUS ROSÆ, *S. rosarum solutivus seu e rosâ siccis seu rosâ centifoliæ seu rosâ cens solutivus, Syrup of Roses*, (*F.*) *Syrup de roses pâles*. (*Rosæ. centif. petal. exsic.* ʒvij, *Sacch. purif.* ʒvj, *Aq. fervent.* Oiv. Macerate the petals for 12 hours. Evaporate the strained liquor to ʒiijss. Add the sugar. *Ph. L.*) Gently laxative. Dose, f ʒij to f ʒiij, or more.

SYRUPUS ROSÆ GALLICÆ, *Syrup of Red Roses*, (*F.*) *Syrup de roses rouges*. (*Rosæ Gallic. petal. exsic.* ʒvij, *Aquæ bull.* Ov, *Sacch. purif.* ʒvj; prepared like the last. *Ph. E.*) In the *Ph. U. S.* for 1863, it is directed to be made by moistening *red rose*, in powder, with *diluted alcohol*, and, in a percolator, pouring on diluted alcohol until a certain portion of the tincture has passed; evaporating this to a certain point, and adding *water*; then, having added the sugar, dissolving it with a gentle heat. Mildly astringent. Added to stomachic infusions.

SYRUPUS RUBI, *Syrup of Blackberry Root*. (*Rubi*, in pulv. ʒvij, *Syrup.* Oiss. *Alcohol. dilut.* q. s. Moisten the powder with f ʒiv of the alcohol; and, in a percolator, pour on the alcohol until a pint and a half of the tincture has passed. Evaporate this to half a pint, and mix, while hot, with the syrup previously heated, and strain. *Ph. U. S.*, 1863.) Gently astringent, and used as an addition to prescriptions for diarrhoea of children.

SYRUPUS SACCHARI, *S. Simplex*.

SYRUPUS SARSÆ, *S. Sarsaparillæ*.

SYRUPUS SARSAPARILLÆ, *S. Sarsæ, S. Sarsæ, Syrup of Sarsaparilla*. (*Rad. Sarsaparillæ.* cont. ʒij, *Aquæ bullient.* cong., *Sacch. purif.* ʒij. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. *Ph. L.*) Used in the same cases as the root. Dose, f ʒj to f ʒij, and more.

SYRUPUS DE SARSAPARILLÆ ET SENNÆ COMPOSITUS, *Compound Syrup of Sarsaparilla and Senna*, (*F.*) *Syrup de Cuisinier*. (*Rad. Sarsaparillæ.* ʒij, *Infuse* for 24 hours in *Warm water Oxij*; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with *Flowers of borage*, *White roses*, *Senna leaves*, and *Aniseed*, each ʒij; reduce to half; pass, and add *Honey ʒij*. Boil to a syrup. *Ph. P.*) It is considered to be alterant, depurative, and sudorific. Dose, f ʒss to f ʒij. Corrosive chloride of mercury is sometimes added to it.

A similar syrup, under the name SYRUPUS SARSAPARILLÆ COMPOSITUS, *Compound Syrup of Sarsaparilla*, is directed in the *Pharmacopœia*

of the United States. (*Sarsaparill.* cont. ℥ij; *Lign. guaiac.* rasur. ℥ij; *Rosæ centifol.*, *Sennæ*, *Glycyrrhiz.* cont. āā ℥ij; *Ol. Sassafras*, *Ol. Anisi.* āā ℥v; *Ol. Gualtheriæ* m. iij; *Alcohol. dilut.* Oj; *Sacchar.* ℥viij. Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter; add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. Ph. U. S.)

It may also be made by the process of displacement.

SYRUPUS SARZÆ, S. Sarsaparilla.

SYRUPUS DE SCAMMO'NIO, *Syr'up of Scammony*, *'Pulv. Scammon.* ℥ss, *Sacch. alb.* ℥iv, *Alcohol.* s. g. 985 to 915) f℥viiij. Heat the mixture moderately: then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add *Syrup of Violets*, f℥iv. Ph. P.) ℥j contains 18 grains of scammony. Cathartic. Dose, f℥j to f℥ss.

SYRUPUS SCILLÆ, *S. scillit'icus seu scill'æ marit'ime*, *Syr'up of Squills.* (*Acet. scillæ*, Oj, *Sacch.* ℥ij. Ph. U. S.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOSITUS, *Mel Scill'æ Compositum*, *Compound Honey of Squill*, *Compound Syr'up of Squill*, *Hive Syrup.* (*Scillæ* cont.: *Senegæ* cont. āā ℥iv; *Antim.* et *Potassæ Tart.* gr. xlviij; *Aquæ Oiv*; *Sacchar.* ℥iiiss. Pour the water upon the squills and seneka, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa. It may also be made by the process of displacement. Ph. U. S.)

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

SYRUPUS SENEGÆ, *Syrup of Seneka.* (*Senegæ* cont. ℥iv; *Aquæ Oj*; *Sacchar.* ℥ij. Boil the water with the seneka to one half, and strain; then add the sugar, and form into syrup. Ph. U. S.)

It may also be formed by the process of displacement.

This is a favourite stimulant expectorant with many practitioners. Dose, f℥j or f℥ij.

SYRUPUS SENNÆ, *S. cast'isæ senn'æ*, *Syr'up of Senna.* (*Sennæ* ℥ij, *Sem. fenicul.* cont. ℥j, *Sacch. pur.* ℥xv, *Aquæ bullient.* Oj. Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain: add the sugar, and make into a syrup. Ph. U. S.) Cathartic. Dose, f℥ij to f℥iiss or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compositus*, (F.) *Syrop de pommes composé.* It contains, also, borage, bugloss, &c. Dose, f℥ss to f℥ij.

SYRUPUS SIMPLEX, *Syr'upus* (Ph. U. S.), *S. Sacchari*, *Saccharum clarificatum*, *Liquat'um*, *Simple Syr'up*, *Syr'up*, *Common syrup of capillaire.* (*Sacch. purif.* ℥iiiss, *Aquæ Oj.* Dissolve the sugar: set aside for 24 hours; remove the scum, and pour off the clear liquid. A modified form is given in the Ph. U. S. for 1863.) Used to cover nauseous tastes, &c.

SYRUPUS DE SPINÂ CERVINÂ, *Syrupus rhamni* —s. de Stœchade communis, see Lavandula.

SYRUPUS TOLUTANUS, *S. Tolutani seu toluif'eræ balsami seu balsam'icum*, *Balsamic syr'up*, *Syr'up of tolu.* (*Tinct. Tolut.* f℥iiss; *Aquæ Oj*; *Sacchar.* ℥iiiss. Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated;

pour the water upon it; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) Use—to give flavour.

SYRUPUS VIOLÆ, *S. violæ odoratæ*, *S. violæ-rum*, *S. e succo violæ-rum*, *Syr'up of Violets.* (*Flor. recent. Viol. odorat.* ℥ij, *Aq. bull.* Oviij, *Sacch. pur.* ℥bxx. Macerate in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. Ph. E.) Very gently laxative. Dose, f℥j to f℥ij.

SYRUPUS E SUCCO VIOLARUM, S. violæ.

SYRUPUS ZINGIBERIS, *S. amo'mi zingiberis*, *Syr'up of Gin'ger*, (F.) *Syrop de gingembre.* (*Tinct. Zingib.* f℥iv; *Aquæ Oiv*; *Sacchar.* ℥bxx. Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. To the strained liquor add the sugar, and form a syrup. Ph. U. S.) Ex-citant. Dose, f℥j to f℥ss. A modified form is contained in the Ph. U. S. (1863.)

N. B. The Parisian Codex contained a few other compound syrups besides those enumerated; amongst them was a *Syrup of calf's lungs*, *Syrupus e pulmonibus vitulinis*, (F.) *Syrop de mou de veau*, as an expectorant!

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYS, as a prefix, like *Sym.*

SYSOMIENS, (*sys*, and *σωμα*, 'body.') A family of double monsters, of Is. G. St. Hilaire, characterized by the union or fusion of two bodies surmounted by heads completely separate.

SYSPA'SIA, (*συσπαισις*, from *συσπαιω* (*sys*, and *παιω*, 'to draw'), 'to contract.') Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

SYSPASIA CONVULSIO, Convulsion.—s. Epilepsia, Epilepsy—s. Hysteria, Hysteria

SYSSARCO'SIS, (*sys*, *σάρξ*, gen. *σάρκος*, 'flesh,' and *osis*.) *Commissu'ra os'sium car'neæ*, *Symph'ysis os'sium muscula'ris*, *Comca'io os'sium carno'sa*, *Carna'tio*, *Concarnat'io*. Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTAL'SIS, Systole.

SYSTAL'TIC, (*συσταλτικός*.) *Systalt'icus*, *Peris-talt'ic*, (*συσταλτικός* (*sys*, and *σταλτικός*), 'I contract.') (F.) *Systalt'ique*. A *systaltic motion* in a part is one in which there is alternate contraction and dilatation. See Systole.

SYSTAT'ICA, (from *συστήμι* (*sys*, and *στημι*, 'to place'), 'to associate.') Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind;—the 4th order, class *Neurotica*, of Good.

SYSTEM, *Syste'ma*, (*συστημα*, from *sys*, and *στημι*, 'I place.') (F.) *Systēme*. This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of objects for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means—a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system*, *muscular system*, &c.

SYSTEMA, gen. *Syste'matis*, System—s. Vasorum, Vascular system.

SYS'TEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

SYSTEMATIST, see Systematism.

SYSTEMATOL'OGY, *Systematolog'ia*, (*syste-ma*, and *logos*, 'a discourse'.) The doctrine of, or a treatise on, systems.

SYS'TÈME, System — s. *Vasculaire à sang noir*, see Vascular — s. *Vasculaire à sang rouge*, see Vascular.

SYSTEM'IC or SYS'TEMIC. Belonging to

the general system — as 'systemic circulation' in contradistinction to the 'pulmonic.'

SYS'TOLÈ, (*συστολή*, from *sys*, and *στέλλω*, 'to contract'.) *Systal'sis*, *Constrictio*, *Contractio* seu *Angusta'tio* seu *Submissio* seu *Mic'tio cordis*. The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Dias-tole* of the organ.

SYSTOLIC or SYS'TOLIC, *Systolicus*, (F.) *Systolique*. Relating to the systole of the heart, — as 'systolic murmur.'

SYTHE, ([Sax.] *þican*, 'to sigh,') *Suspirium*.  
SYZYGIIUM NERVORUM, (*συσζυγος*, 'united,' from *sys*, and *ζυγος*, 'a yoke,') *Par nervorum*.

## T.

T BANDAGE, *T fas'cia*, *Fas'cia T form'is* seu *Heliodo'ri*, *Cru'ciat Band'age*. A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

T FASCIA, T Bandage.

TABAC, 'tobacco,' *Nicotiana tabacum* — t. *des Montagnes*, *Arnica montana* — t. *des Savoyards*, *Arnica montana* — t. *des Vosges*, *Arnica montana*.

TABACUM, 'tobacco,' *Nicotiana tabacum*.

TAB'ANUS, 'the horsefly.' A troublesome fly in the Hudson's Bay territory, called, by the *voyageurs*, *Bulldog*, which makes a perforation like a leechbite, from which it sucks the blood.

TABARDILLO (S.). A kind of highly adynamic fever, common in South America.

TABARZET, *Saccharum album*.

TAB'ASHEER, *Tab'aschir*, *Tab'axir*. A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The sweet juice of the bamboo stalks has also been called *Tabasheer*.

TABEFACI'ON, (*tabes*, and *facere*, 'to make,') Emaciation.

TABEFY, Emaciate.

TABEL'LA, *Tab'ula*, *Tabula'tum*, *Lozan'ga*, *Lozan'gia*, *Mor'sulus*, *Morsell'us*, *Loz'enge*, *Tes-sell'a*, (F.) *Tablette*, *Lozange*. A solid medicine, composed of a powder, sugar, and mucilage, *Electua'rium sol'idum*; and generally shaped like a disk. See *Pastil*, and *Troch*. The three comprise the *Saccharolés solides*.

TABELLA, (dim. of *tabula*, 'a table,') *Table*.

TABELLÆ ABSORBENTES, T. de *Magnesiâ*.

TABELLÆ AC'IDI OXAL'ICI, T. ad s'tem, *Loz-enges of Oxalic Ac'id*. (*Acid. oxalic*.  $\mathfrak{Zj}$ , *Sacch. alb.*  $\mathfrak{zss}$ , *Ol. limonis*, gtt. xviii seu gtt. xij. Make into lozenges with *Mucilage of gum tragacanth*. Ph. P.) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

TABELLÆ DE ALTHE'Â, *Loz'enges of Marsh-mallows*. (*Rad. althææ pulv.*,  $\mathfrak{ziss}$ , *Sacchar. alb.*

*pulv.*  $\mathfrak{zivss}$ ; f. *massa*. Ph. P.) Demulcent; expectorant.

TABELLÆ ANTIMONIA'LES KUNCKE'LII, T. de *stib'ii sulphureo*, *Loz'enges of Sulph'uret of Anti-mony*, *Mor'suli antimonial'es* seu *stib'ii seu stibiati*, *Trochisci stibiati*. (*Amygdal. dulc.*  $\mathfrak{Zj}$ , *Sacch. libss*, *Sem. cardam.*, *cinnam. pulv.*, *Sulph. antim. præpar.*,  $\mathfrak{aa}$   $\mathfrak{Zj}$ ; fiant *tabellæ*. Ph. P. Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

TABELLÆ AD ARDOREM VENTRICULI, *Trochisci carbonatis calcis* — t. *Cardialgice*, *Trochisci carbonatis calcis*.

TABELLÆ DE CAT'ECHU ET MAGNE'SIÂ, *Loz'enges of Cat'echu and Magne'sia*, (F.) *Tablettes de cachou et de magnésie*. (*P. catech.*  $\mathfrak{Zvj}$ , *P. magnes.*  $\mathfrak{Ziv}$ , *P. cinnam.*  $\mathfrak{Zij}$ , *Sacch. alb. libss*, *G. tragac.* gr. xij, *Aq. cinnam.* q. s. ut f. *massa*. Ph. P. Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

TABELLÆ CINCHO'NÆ, T. de *k'î'nâ k'î'nâ*, *Bark Loz'enges*. (*Ext. cinchon. sicc.*  $\mathfrak{zss}$ , *Sacch.*  $\mathfrak{Ziv}$ , *Cinnam.*  $\mathfrak{zss}$ , *Mucilag. g. trag.* q. s. ut f. *massa*. Ph. P.) Tonic.

TABELLÆ DE CITRO ET DIACARTHAMO, T. de *Scammonio* et *Sennâ*.

TABELLÆ DE FER'RO, *Steel loz'enges*, *Tab'ule martia'les* seu *instaurant'es* seu *antichlorot'ice*. (*Ferri limat. porphyriz.*  $\mathfrak{zss}$ , *P. cinnam.*  $\mathfrak{Zj}$ , *P. sacch.*  $\mathfrak{Zv}$ , *G. trag.* et *Aq. cinnam.* q. s., ut fiat *massa*. Each lozenge to weigh 12 gr. Ph. P.) Tonic, stomachic. Dose, v to x.

*Aromat'ic loz'enges of steel*. These consist of *sulphate of iron*, with a small proportion of the *Tincture of Cantharides*.

TABELLÆ DE KINÂ KINÂ, T. *cinchonæ*.

TABELLÆ DE MAGNE'SIA, T. *absorbent'es*, *Magne'sia loz'enges*. (*Magnes.*  $\mathfrak{Zj}$ , *Sacchar. alb.*  $\mathfrak{Ziv}$ , *Mueil. g. tragac.* q. s. Ph. P.) Absorbent and antacid.

TABELLÆ DE RHE'O, *Rhu'barb loz'enges*. (*P. rhej.*  $\mathfrak{zss}$ , *Sacch.*  $\mathfrak{Zv}$ , *Mucilag. gum. tragac.* q. s.; f. *massa*. Each to contain 12 grains. Ph. P.) Stomachic and laxative.

TABELLÆ DE SCAMMO'NIO ET SEN'NÂ COMPOS'ITE, T. de *c'itro et diacar'thamo*, *Compound loz'enges of scammony and senna*. (*Scammon.*  $\mathfrak{Zij}$ , *Sennæ*  $\mathfrak{Zivss}$ , *rhej.*  $\mathfrak{ziss}$ , *Caryoph.*  $\mathfrak{Zj}$ , *Corticis limon. confect.*  $\mathfrak{Zj}$ , *Sacch.*  $\mathfrak{Zvj}$ ; f. *massa*. Ph. P.) Purgative. Dose,  $\mathfrak{Zj}$  to  $\mathfrak{Zvj}$ , or more.

TABELLÆ AD SITEM, T. *acidi oxalici* — t. ad *Sodam*, *Trochisci carbonatis calcis* — t. de *Stibii sulphureto*, T. *antimoniales Kunckelii*.

TABELLÆ DE SULPH'URE SIM'PLICES, *Sim'plic*

*sulph'ur loz'enges.* (*Sulphur* lot.  $\frac{3}{8}$ ss, *Sacch.*  $\frac{3}{4}$ iv, *Muc. g. tragac.* cum aquâ rosâ præpar. q. s. *Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

**TABELLÆ DE SULPHURË COMPOS'ITÆ.** *Compositum sulph'ur loz'enges.* (*Sulph.* lot.  $\frac{3}{8}$ ij, *Acid. benzoic.* gr. xij, *Rad. irid.* p.  $\frac{5}{8}$ ss, *Ol. anisi,* gtt. viij, *Sacch.*  $\frac{3}{8}$ vss, *G. tray.* q. s. *Ph. P.*) Aperient, expectorant, and stimulant [?]. Dose,  $\frac{1}{4}$  a day.

**TABERNA MEDICA,** (*taberna,* 'a shop,') *Pharmacopolium.*

**TABERNEMONTANA UTILIS,** (after *Tabernemontanus,* a German botanist.) A tree of British Guiana, of the family *Apocynaceæ*, called, by the natives, *Hya-Hya*, the bark and pith of which yield a milk, which is used by the savages as a refreshing drink.

**TA'BES,** gen. *Ta'bis,* *Maras'mus Ta'bes,* (*tabere,* 'to decay,') *Te'kedon,* *Apotex'is,* *Atroph'ia,* *Tab'idness,* *Decline',* *Consumption,* *Wasting.* Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

**TABES,** *Atrophy,* *Phthisis*—t. *Coxaria,* *Ischiophthisis*—t. *Diabetica.* *Diabetes mellitus*—t. *Diuretica,* *Diabetes mellitus.*

**TABES DORSALIS,** *T. Dorsal'is,* *Maras'mus ta'bes dorsal'is,* *Phthi'sis not'ias dorsal'is* seu *sic'ca,* *Myelophthi'sis,* *Rhachiomyelophthi'sis,* *Myelatrophi'ia,* *Myelanol'osis,* *Ta'bes os'sis sa'cra.* A wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head,—caused, it has been conceived, by too early or too frequent addition to venery.

**TABES GLANDULARIS,** *T. mesenterica,* *Scrofula*—t. *Ischiadica,* *Ischiophthisis*—t. *Lactea,* *Atrophia lactantium,* see *Galactia.*

**TABES MESENTERICA,** *T. glandular'is* seu *scroful'osa,* *Atroph'ia mesenter'ica* seu *infant'um* seu *glandular'is* seu *infant'ilis* seu *dors'is,* *Parabys'ma mesenter'icum,* *Ma'cies Infant'um,* *Pedatroph'ia,* *Scrof'ula* seu *Rachial'gia* seu *Physoc'onia mesenter'ica,* *Myelophthi'sis sic'ca,* *Fe'bris hec'tica infant'um,* *Phthi'sis mesara'ica,* *Mesenterophthi'sis,* *Mesenter'ic Disease,* (F.) *Carreau,* *Chartre,* *Scrofulæ* ou *Écronelles mésentériques,* *Étisie* ou *Rachialgie* ou *Atrophie* ou *Physoconie mésentérique,* *Entéro-mésentérique,* *Tubercules des ganglions mésentériques,* *Phthisie mésentérique.* An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery,—as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhoea, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of supuration. The treatment is the same as in scrofulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

**TABES NUTRICUM,** *Atrophia lactantium,* see *Galactia*—t. *Ossis sacri,* *Tabes dorsalis*—t. *Pectorea,* *Rachitis*—t. *Pulmonalis,* *Phthisis pulmo-*

*nalis*—t. *Scrofulosa,* *T. mesenterica*—t. *Senum,* *Maras'mus senilis.*

**TABESCERE,** (*tabere,* 'to decay,') *Emaciate.*

**TAB'ID,** *Tab'idus,* (F.) *Tabide.* Relating or appertaining to tabes. Wasted by disease.

**TABIDNESS,** *Tabes.*

**TABIF'IC,** *Tabif'icus,* (F.) *Tubifique,* (*tabes,* and *facere,* 'to make,') That which causes consumption or phthisis.

**TA'BLE,** *Tab'ula,* *Tabell'a,* *Tabulac'tum,* *Lam'ina,* *Pa'ries,* *Squa'ma.* A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is *external;* the other *internal,* and called *Tab'ula vit'ea,* (F.) *Lame vit'ée,* on account of its brittleness.

**TABLES DE MORTALITÉ,** *Mortality,* bills of

**TABOURET,** *Thlaspis bursa.*

**TABULA,** *Tabella,* *Table*—t. *Vitrea,* see *Table.*

**TAB'ULA VOT'IVA,** *Votive tab'let.* A tablet, hung up as an offering—*anathe'ma*—in the ancient temples by the sick, descriptive of their diseases, and mode of cure; or by those who had been preserved from some calamity.

**TABULÆ ANTICHLOROTICÆ,** *Tabellæ de ferro*—t. *Instaurantes,* *Tabellæ de ferro*—t. *Martiales,* *Tabellæ de ferro.*

**TABULATUM,** (from *tabula,*) *Tabella,* *Table.*

**TABUM,** (allied to *tabes,*) *Ichor,* *Sanies,* *Plague.*

**TAC,** *Influenza.*

**TACAMAHACA,** *Fagara octandra*—t. *Caragna,* *Caranna.*

**TACCA** (Malay name) *OCEANICA,* see *Arrow-root,* (*Tahiti.*)

**TACHE** (F.), 'spot,' *Macula,* see *Taches.*

**TACHE CÉRÉBRALE,** *Tache méningitique.* A red mark or stain, observable, according to M. Trousseau, in a large number of hydrocephalic children, when pressure is made on the skin.

**TACHE EMBRYONNAIRE,** 'Embryonic spot;' *Cu'mulus,* *C. germinat'ivus* seu *proli'gerus,* *A'rea germinat'iva,* *Stratum germinat'ivum,* *Blastostro'ma,* *Nu'cleus cicatric'ule* seu *blastoderm'itis,* *Ger'minal cu'mulus.* A name given by M. Coste to a spot seen on the blastoderma about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer, (F.) *Fenillet*—the upper one the *serous* or *animal;* the lower, the *mucous* or *vegetative;* and between these is afterwards formed the *vascular layer.*

**TACHE GERMINATIVE,** 'germinal spot,' see *Molecule*—t. *Jaune,* see *Foramen centrale retinae*—t. *Mélanienne,* see *Nævus*—t. *Méningitique,* *Tache cérébrale*—t. *de Naissance,* *Nævus*—t. *Pigmentaire,* *Nævus*—t. *Sanguine,* see *Nævus.*

**TACHES** (pl. of *tache*) *HÉPATIQUES,* *Chloasma.*

**TACHES LAITEUSES,** *Plaques laitenses,* 'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

**TACHES ROUGES,** 'red spots,'—t. *æ Rosæseur,* *Ephelides.*

**TACHETÉ DE ROUSSEURS,** ('spotted with freckles,') see *Ephelides.*

**TACHYIATER,** (*ταχύς,* 'quick,' and *ιατρός,* 'a physician,') *Tachyiat'rus.* One who cures speedily.

TACHYIATRIA, (ταχυ, 'quick,' and ιατεια, 'healing.') The art of curing quickly.

TACHYTOMY, *Tachytomia*, (ταχυς, 'quick,' and τομη, 'incision.') The art of cutting or operating rapidly.

TACITURNITY, *Taciturnitas*, *Sigē*, (from *tacere*, *tacitum*, 'to be silent.') State of a person who does not speak. Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*, (from *tangere*, *tactum*, 'to touch.') A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive; Touch, active.

TACTILE, *Tactilis*. Relating or appertaining to tact or touch.

TACTION, Touch.

TACTUS, Tact, Touch — t. Dolorificus, Haptodysporia — t. Eruditus, see Palpation.

TAE, 'toe,' *Digitus pedis*.

TÆDA, *Te'da*, *Dæ's*, 'a torch.' A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆNIA, *Tæ'nia*, *Fas'cia*, (*τæνια*, 'a band, a fillet, a riband.') See Bandage. Also a genus of intestinal worms, — *Tapeworms* — characterized by an elongated, flattened, and articulated body, with suckorial oscula on the head. Of this genus, two only inhabit the human body — the *Tænia lata*, (see *Bothriocephalus latus*), and *Tænia solium*.

TÆNIA ACEPHALA, *Bothriocephalus latus* — t. à *Anneaux courts*, *Bothriocephalus latus* — t. à *Anneaux longs*, *Tænia solium* — t. *Articulos demittens*, *Tænia solium* — t. *Cucurbitina*, *Tænia solium* — t. *Dentata*, *Bothriocephalus latus* — t. *Grisea*, *Bothriocephalus latus* — t. *Hippocampi*, *Corpora fibriata* — t. *Humana armata*, *Tænia solium* — t. *Humana inermis*, *Bothriocephalus latus* — t. *Hydatigena*, *Hydatid* — t. *Lata*, *Bothriocephalus latus* — t. à *Longues articulations*, *Tænia solium* — t. *Membranacea*, *Bothriocephalus latus* — t. *Nervosa Halleri*, *Ganglion of Gasser* — t. *Non armé*, *Bothriocephalus latus* — t. *Osculis lateralibus geminis*, *Bothriocephalus latus* — t. *Osculis lateralibus solitariis*, *Bothriocephalus latus* — t. *Osculis marginalibus solitariis*, *Tænia solium* — t. *Osculis superficialibus*, *Bothriocephalus latus* — t. *Prima*, *Bothriocephalus latus* — t. *Sans épine*, *Tænia solium* — t. *Secunda*, *Tænia solium*.

TÆNIA SEMICIRCULARIS, *T. striata*, *Gem'inum centrum semicirculârè*, *Lim'bus post'erior cor'poris striat'i*, *Stri'æ cor'neæ seu semiln'ares seu termin'al'es*, *Fræ'nulum no'vum*, *Fas'cia semicirculâr'is*, (F.) *Bandelette des éminences pyriformes* (Ch.), *Bandelette*, *B. demicirculaire*, *Lame cornée*.

A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

TÆNIA SOLIUM, (from *solus*, 'alone,' because, at one time, supposed to be always alone.) *T. oscul'is marginal'ibus solitariis seu cucurbit'ina seu huma'na armata seu artic'ulos demittens seu secun'da*, *Hal'yis solium*, *Ver'mis cucurbit'inus*, *Lumbr'icus latus*, *Solium*, (F.) *Tænia sans épine* ou à *longues articulations* ou à *anneaux longs*, *Ver solitaire* ou *cucurbitin*, *Long Tapeworm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal foramina vaguely alternated. The *tænia solium* is commonly a few feet long: sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. *Brayera anthelmintica* ('koussou'), pumpkin seeds, male fern, pomegranate root, are amongst the best remedies.

TÆNIA STRIATA, *T. semicircularis* — t. *Tæniæ*, *Lamina cornea* — t. *Tænella*, *Bothriocephalus latus* — t. *Vulgaris*, *Bothriocephalus latus*.

TÆNIACIDE, (*tænia*, and *cædere*, 'to kill,') *Tæniacide*.

TÆNIE COLI, (pl. of *tænia*, 'a band,') see Colon — t. *Longitudinales*, see Colon — t. *Valsalvæ coli*, see Colon.

TÆNIAFUGE, *Tæ'nisfuge*, *Tæ'niacide*, *Tæ'nicide*, *Tæni'af'ugum*, (F.) *Téni'fuge*, (*tænia*, and *fugo*, 'I drive off,') A remedy calculated to expel or destroy *tænia*.

TÆNICIDE, (*tænia*, and *cædere*, 'to kill,') A destroyer of *tænia* or tapeworm.

TÆNIFUGE, *Tæni'afuge*.

TÆNIIN, see *Hægenia Abyssinica*.

TÆNI'OLA, *Bandelette*; (dim. of *Tænia*.) Used by Gerber for a simple, bandlike, or flat fibre, *Filum tæniiforme*, seen under the microscope.

TÆFFETAS AGGLUTINATIF, *Sparadrapum adhæsivum* — t. *d'Angleterre*, see *Sparadrapum adhæsivum* — t. *Épispastique*, *Sparadrapum vesicatorium* — t. *Gommé*, see *Sparadrapum adhæsivum* — t. *Vésicant*, *Sparadrapum vesicatorium*.

TAFIA, Rum.

TAGLIAOZZI, *Opération de*, (after G. Tagliacozzi, of Bologna, died 1599,) see *Rhinoplasty*.

TALIE, (from *tegere*, 'to cover,') see *Caligo*.

TAILLADE, (from *tailler*, 'to cut,') *Incision*, see *Entaille*.

TAILLE, (from *tailler*, 'to cut,') *Lithotomy*, *Stature* — t. *Hypogastrique*, *Hypogastric operation of lithotomy*, see *Lithotomy* — t. *Postérieure*, see *Lithotomy* — t. *Recto-vésicale*, see *Lithotomy* — t. *par le Rectum*, see *Lithotomy* — t. *Sus-pubiènne*, see *Lithotomy*.

TAKAMAHAKA, *Fagara octandra*.

TAKE, *Attack*.

TAKEN DOWN, see *Attack*.

TAKING, see *Contagious*.

TAL, A word formerly employed for alkali. It also meant the dung of the peacock.

TALC EARTH, *Magnesia*.

TALCUM NEPHRITICUM, *Nephreticus lapis*.

TALENTUM, (*ταλαντον*.) An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains, *Poids de Marc*. See *Weights and Measures*.

TALLOLUS, (dim. of *talus*), *Malleolus*.

TALIACOTIAN OPERATION, (after *Taliacotus* or *Tagliacozzi*, see *Tagliacozzi*), *Rhinoplasty*.

TALINUM UMBELLATUM, see *Mistura*.

TALIPES, (*talipèdo*, 'to be weak in the foot,') *Kyllosis* (*Clubfoot*) — t. *Calcaneus*, see *Kyllosis* — t. *Equinus*, see *Kyllosis* — t. *Valgus*, see *Kyllosis* — t. *Varus*, see *Kyllosis*.

TALLAHATTA SPRINGS, see *Alabama*, mineral waters of.

TALLOW, *Bayberry*, see *Wax*, *myrtle*.

TALON, (from *talus*), see *Calcaneum*.

TAL'PA, 'a mole,' *Topinaria*, *Topinaria*, *Tal'patria*, *Testudo*, (F.) *Tanpe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALPARIA, *Talpa*.

TALUS, *Astragalus*, *Malleolus*, see *Calcaneum*. *Pessary*.

TAMARA CONGA, *Averrhoa carambola*.

TAMARÆA ZECLA, *Tamarindus*.

TAMARIN, *Tamarindus*.

TAMARIN'DI PUL'PA, *Pulp of Tamarinds*. (*Tamarindi*, q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OF, *Tamarindi pulpa*.

TAMARINDUS, (from [Arab.] *tamar kandi*,

'Indian date.) *T. Indica*, *Thamarindus*, *Oryphe'nicon*, *Sil'iqua Arab'ica*, *Balampul'i*, *Tamar'æ'a zee'lu*, *Oxyphœu'cia*, *Acacia Ind'ica*, *Tam'arind tree*, (F.) *Tamarin*. *Ord.* Leguminosæ. *Sex. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous soft strings, *Tamarindus* (Ph. U. S.), is exported from the West Indies, preserved in syrup. It is refrigerant and laxative. *Tamarind whey* is made by boiling ʒij of the pulp with ʒiiss of milk. When strained, it is used as a diluent in fever.

**TAMARISCUS**, (from *Tamaris*, now *Tambro*, on the borders of the Pyrenees.) *Tamarix Gallica*.

**TAMARIX**, gen. *Tamaric'is*, *T. Gallica* seu *Pentandra*, *Tamarisc'us*. The *Tamarisk tree*. *Ord.* Tamariscinæ. *Sex. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally;—the former for its aperient and corroborant virtues in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

**TAMBOUR**, *CAVITÉ DU*, 'drum, cavity of the,' *Tympanum*.

**TAMNUS COMMUNIS**, *Tamus communis*.

**TAMPA BAY**, see Saint Augustine.

**TAMPAN**. An insect belonging to the group of Acaridæ or Ticks, well known in South Africa, and described by Dr. Livingstone as dreaded by the inhabitants for its bite and the consequences.

**TAMPON**, ([F.] 'a bung, a plug,') see *Plugging*.

**TAMPONNEMENT**, *Plugging*.

**TAMUS seu TAMNUS COMMUNIS**, *Am'pelos melæ'na* (Dioscorides), *Chiro'nia*, *Gynæcan'thôn* seu *Apro'nia* (Pliny), *Bryo'nia ni'gra*, *Com'mon Black Bry'ony*. The root is diuretic, and has been given as an antilithic. In the herbshops of Europe it is sold as a topical application for removing bruise marks, and in France is called *Herbe aux femmes battues*, 'herb for beaten or bruised women.'

**TANACETUM**, *T. vulgare*, *Tansy*, *Athana'sia*, *Parthen'um nas*, *Hindheel*, *Tan'sy*, (F.) *Tanaic'e vulgair'e*, *Herbe aux vers*, *Coq des Jardins*. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy, and the whole herb—*Tanacetum* (Ph. U. S.)—have a peculiar, strong odour, and warm bitter taste. They are tonic, 'deobstruent' and anthelmintic. Dose, ʒss to ʒj. The infusion is usually drunk as tea.

**TANACETUM BALSAMITA**, *T. hortens'æ*, *Balsam'ita mas* seu *vulgare'is* seu *suave'oleus* seu *ma'ior*, *Cos'tus hortorum*, *Men'tha Roma'na* seu *Saraceni'ca*, *Cos'tmary*, *A'lecost*, *Cockmint*, (F.) *Menthe cog*, *Herbe au cog*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

**TANACETUM HORTENSE**, *T. balsamita*.

**TANACETUM MULTIFLORUM**. A South African plant, which is used as a tonic, antispasmodic, and anthelmintic. It is given in flatulency, gout, amenorrhæa, and dropsy; but is especially prescribed in cases of ascariæ lumbricoides and other entozoa. It is administered in the form of powder or infusion; the latter acting also as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

**TANASIE VULGAIRE**, *Tanacetum*.

**TANASIA**, *Tanacetum*.

**TAN'GÈ**, (ἄγγη, 'rancidity,') A putrescent tumour.

**TANGHINIA**, (Madagascar tanghin,) *Cerbera tanghin*.

**TANGLES**, *BIG*, *Pila marina*—t. Blue, *Gaylussacia dumosa*.

**TANINUM**, *Tanninum*.

**TANNE**, see *Acne*.

**TANNIC ACID**, *Tannin*.

**TANNICUM PURUM**, *Tannin*.

**TANNIN**, (F.) *tanner*, 'to tan,') *Tan'nicum pu'rum*, *Tann'num*, *Tan'num*, *Princip'ium Ad'strin'gens* seu *Scytodep'sicum* seu *Byrsodep'sicum* seu *Cori'dæum*, *Scytodep'sicum*, *Mat'e'ria Scyto-deph'ica*, *Ac'idum Tan'nicum* seu *Scytodeph'icum* seu *Quercitan'nicum*, *Tan'nic acid*, (F.) *Acide tan'nique*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of *tanning*. Pure tannin, obtained from *galls*, by the action of *ether* (Ph. U. S.), has been employed as an excellent and powerful astringent. Dose, two grains, repeated several times a day.

**TANSY**, *Tanacetum*—t. Wild, *Potentilla anserina*.

**TAPER**, *HIGH*, *Verbascum nigrum*.

**TAPES**, (ἄπη, 'a carpet,') *Tapetum*.

**TAPETUM**, *Ta'pes*, *Tap'e'te*, (F.) *Tapis*, 'tapestry, a carpet,') see *Corpus Callosum*.

**TAPETUM CHOROÏDÆ**. A shining spot on the outside of the optic nerve in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruy-schiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

**TAPETUM ALVEOLI**, *Membr'na exter'na den'tium*. The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

**TAPEWORM**, *Tænia*—t. Broad, *Bothriocephalus latus*—t. Long, *Tænia solium*.

**TAPIOCA**, see *Jatropha manihot*—t. Pearl, see *Jatropha manihot*.

**TAPIS**, (from *tapes*, 'a carpet,') *Tapetum*.

**TAPPING**, (from [Sax.] *tæppan*, 'to broach,') as a cask, *Paracentesis*.

**TAPSARIA**, *Decoctum hordei*.

**TAPUS BARBATUS**, *Verbascum nigrum*.

**TAR**, ([Sax.] *tape*,) see *Pinus sylvestris*—t. Barbadoes, *Petroleum*,

**TAR BEER**, see *Pinus sylvestris*.

**TAR**, *MINERAL*, *Pissasphaltum*.

**TAR WATER**, see *Pinus sylvestris*—t. Wile, see *Pinus sylvestris*.

**TARA**. An epidemicocontagious disease seen by Gmelin in Siberia, in the town of Tara, which appears to have resembled somewhat the Button Scurvy of Ireland.

**TAR'ACHÈ**, (ἄραχη,) *Tarax'is*, *Tarag'ma*, *Tarag'mus*, 'disorder.' A disorder of sight which arises from a blow, compression of the eye, or the action of dust, smoke, or other external cause. By some it is understood to signify mild or incipient ophthalmia.

*ἄραχη τῆς κοιλίας*, 'disturbance of the belly,' *Diarrhœa*.

**TARAGMA**, gen. *Tarag'matis*, (ἄραγμα,) *Tarache*.

**TARAGMUS**, (ἄραγμα,) *Tarache*.

**TARAGON**, *Artemisia dracunculus*.

**TARAHO**, *Peltandra Virginica*.

**TARANTISM'US**, *Tarentis'mus*, *Tarantalis'mus*, *Dinom'nia*, *Chore'a Sane'ti Valenti'ni*, *Taren'tulism*, *Tar'antism*, (from *Tarentum* or *Taranto*, where it was observed.) A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing to the sound of instruments, and which was ascribed by the vulgar to the bite of the tarantula. A sort of tarantismus, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentis'mus Tangita'mus*, *Janon-tarentis'mus*.

**TARANTULA**, (same etymon.) *Taren'tula*, (F.) *Tarentule*. A species of spider—the *Ara'cea Taren'tula* of Linnæus, *Lyc'o'sa Tarentula* of La-

treille—whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arrière, France. They contain iron and carbonic acid.

TARAXACUM, (from *ταρασσειν*, 'to disturb or disorder,') *Leontodon taraxacum*—*t. Dens leonis*, *Leontodon taraxacum*.

TARAXIS, (*ταραξις*.) Tarach, see Ophthalmia. TARCHON SYLVESTRIS, Achillea ptarmica.

TARENTISMUS, Tarantismus—*t. Tangitanus*, *Tarantismus*.

TARENTULA, Tarantula.

TARENTULISM, Tarantismus.

TARGAR, Juniper communis.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jugre*. It was once used as a tonic.

TARINI PONS, (after the anatomist Tarin,) (F.) *Pont de Tarin*. A ciceritious substance, between the corpora albicantia, which unites the crura, and assists in forming the bottom of the third ventricle. The fossa, at the bottom of which it is placed, is called *Lo'cus perforatus posticus*, *Posterior perforated space*, *Substantia seu Lamina perforata posterior*.

TARO, Arum esculentum.

TARSAL, *Tarsalia*, *Tarsæus*, (from *tarsus*,) (F.) *Tarsien*. That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TARSAL CARTILAGES, see Tarsus.

TARSEA LA'TA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which he thought they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, Tarsal.

TARSIEN, Tarsal.

TARSOMETATAR'SAL, *Tarsometatar'seus*. That which relates to tarsus and metatarsus.

TARSOMETARSAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarsometatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal*, and others *plantar*.

TARSO-MÉTATARSIPHALANGIEN DU POUCE, Adductor pollicis pedis—*t. Phalangien du pouce*, Flexor brevis pollicis pedis—*t. Sous-phalangien du petit orteil*, Flexor minimi digiti pedis—*t. Sous-phalangien du premier orteil*, Flexor brevis pollicis pedis.

TARSOPHY'MA, gen. *Tarsophy'matis*, (*tarsus*, and *φύμα*, 'a tumour,') A swelling of the tarsus.

TARSORRHAPHY, *Tarsorrhaph'ia*, (*tarsus*, and *ράφη*, 'suture,') An operation for diminishing the size of the opening between the eyelids when it is enlarged by surrounding cicatrices.

TARSOTOMY, *Tarsotom'ia*, (*tarsus*, and *τομή*, 'incision,') The section or removal of the tarsal cartilages.

TAR'SUS, (*ταρσος*), *Plan'ta pri'ma seu Rasse'ta seu Rasse'ta pe'dis*, *Pe'dium*, *Clovis'ulæ pe'dis no'tans*. 1. The posterior part of the foot. The tarsus consists of 7 bones arranged transversely in two rows, between which amputation is sometimes performed. The first or *Tib'ial row*. (F.) *Première rangée*, *R. jambière*, consists of the astragalus and os calcis; the second or *metatarsal*, (F.) *Seconde rangée*, *R. métatarsienne*, of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tar'si*, *Tar'sal cartilages*, *Tar'sal fibrocartilages*, *Or'choi*, *Crepid'ines seu Coro'næ seu Che'lx seu Un'guis Palpebra'rum*, *Tar'si*, *Cl'ia*, are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is

larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, (from *tart*, 'acid,' [?]) Antimonium tartarizatum (improperly), Potassæ supertartaras impurus—*t. Calcareous*, Potassæ subcarbonas—*t. Crystals of*, Potassæ supertartaras.

TARTAR EMETIC, Antimonium tartarizatum.

TARTAR, SALT OF, see Potash, and Potassæ subcarbonas—*t. Soluble*, Potassæ tartras, see Potash.

TARTAR OF THE TEETH, Odontolithus.

TARTA'REI MOR'BI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, Potassæ supertartaras.

TARTAR'IC ACID, *Ac'idum tartar'icum seu tartaro'sum seu tar'tari essential'e*, *A'cor tartar'icus*, *Sal tar'tari essential'e*, *Tartar'icus ac'id*, (F.) *Acide tartrique*. (Potassæ bitart. Biiss, *Aq. destillat. ferr.*, cong. iij, *Crete ppt. ℞j*, *Acidi sulph. ℞j*. Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid, and wash the tartrate of lime with distilled water until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter, and evaporate it to crystallize. *Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, Potassæ supertartaras impurus—*t. Solubile*, Potassæ tartras—*t. Vitriolatum*, Potassæ sulphas.

TARTARUS AMMONIÆ, Ammoniaë tartras—*t. Chalybeatus*, Ferrum tartarizatum—*t. Crudus*, Potassæ supertartaras impurus—*t. Dentium*, Odontolithus—*t. Emeticus*, Antimonium tartarizatum—*t. Kalicoferricus*, Ferrum tartarizatum—*t. Kalinus*, Potassæ tartras—*t. Lixivia*, Potassæ tartras—*t. Martialis*, Ferrum tartarizatum—*t. Potassæ ferruginosus*, Ferrum tartarizatum—*t. Stibiatus*, Antimonium tartarizatum—*t. Subpotassicus*, Potassæ supertartaras—*t. Superpotassicus*, Potassæ supertartaras—*t. Tartarizatus*, Potassæ tartras.

TARTON-RAIRE, Passerina tartonraira.

TARTRATE D'AMMONIAQUE, Ammoniaë tartras.

TARTRE BRUT, 'crude tartar,' Potassæ supertartaras impurus—*t. Cru*, Potassæ supertartaras impurus—*t. des Dents*, Odontolithus—*t. Émétique*, Antimonium tartarizatum—*t. Stibié*, Antimonium tartarizatum.

TASIS, (*τασις*.) Extension, Tension.

TASTE, (from [F.] *tâter*, [Old F.] *taster*, 'to taste, feel,' [G.] *tasten*, 'to feel,') *Gust'us*, *Gent'sis*, *Gent'ma*, *Gent'nis*, (F.) *Goût*. One of the five external senses which instructs us of the savours of bodies, and of which the tongue is the principal organ.

*Gustation*, *Gustatio*, is the exercise of this faculty. In disease the taste frequently becomes variously vitiated. The nerves of taste are probably the glossopharyngeal, and, perhaps, also, the lingual branch of the fifth pair.

TASTE, SAVOUR.

TATTOUAGE, Tattooing.

TATTOO'ING, (F.) *Tatonage*. A practice with the South Sea Islanders of puncturing the skin, and forcing colouring matters into the punctures. Sailors in all countries are in the custom of practising it by rubbing or forcing gunpowder into the punctures. The figures thus formed remain through life.

**TATZÉ.** The fruit of *Myrsina Africa'na*, a native of Abyssinia, the Cape of Good Hope, the Azores, and Algeria, which is used as a tænia-fuge.

**TAUPE,** Talpa.

**TAUROCOL'LA,** (*ταυρος*, 'a bull,' and *κόλλα*, 'glue,') Glue made of the ears and genitals of the bull. It was formerly much esteemed.

**TAURUS,** (*ταυρος*,) Penis, Perineum. Of old, the lower part of the male organ with the rhaps extending to the anus.

**TAX'IS,** (*τάξις*, 'arrangement,' from *τάσσω*, 'I order,' 'I arrange,') *Reposit'io*, *Reduct'io*, *Syntaxis*. A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in hernia that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by bloodletting *ad deliquium*; the warm bath; warm fomentations; tobacco; emollient glysters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

**TAXÓDIUM DIS'TICHUM,** (*taxis*, and *εἶδος*, 'resemblance,') *Cupressus disticha*, *Schnbertia disticha*, *Cypressus Americ'na* or *Bald Cypress*; indigenous. *Nat. Ord.* Coniferæ. A balsam, obtained from it, is applied to cuts and wounds. The resin from the cones is diuretic and carminative.

**TAXONOMY,** (*τάξις*, 'order,' and *νόμος*, 'law,') Biotaxy.

**TAX'US BACCA'TA,** (*τάξος*,) The *Yew tree*, *Sui'lar*, (F.) *If. Family*, Coniferæ. *Sec. Syst.* Diœcia Monadelphia. The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

**TAXUS CANADEN'SIS,** *Americ'na Yew*, *Ground Hem'lock*; indigenous. The leaves are said to be sedative. [?]

**TAXWAX,** see Nucha.

**TAYE,** (from [L.] *tego*, 'to cover,') Caligo.

**TAYLOR'S REMEDY FOR DEAFNESS,** see Allium.

**TEA,** Thea—t. Apple, see Apple tea—t. Bahama, Lantana camara—t. Beef, see Beef tea—t. Berried, Gaultheria.

**TEA BERRY,** Gaultheria.

**TEA, BLANKENHEIM,** see Galeopsis grandiflora—t. Brazil, Lantana pseudothea—t. Bushman's, Methystophyllum glaucum—t. Caffre, Helichrysum nudifolium—t. Chicken, see Chicken tea—t. Flaxseed, Infusum Lini compositum—t. Ginger, Infusum Zingiberis—t. Hottentot's, Helichrysum serpyllifolium.

**TEAK,** Paronychia.

**TEAR,** (Sax. *tear*,) *Lachryma*, *Lach'ryma*, *Lac'rima*, *Lac'ryma*, *Da'cry*, *Dac'ryma*, *Dac'ryon*, *Hu'mor lacrymal'is*, *Eye'drop*, *Weepingtear*, (F.) *Larme*. An excrementitious humour, secreted by the lachrymal gland, and poured through the globe of the eye, and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base; phosphates of lime and soda, and albumen, and a special organic matter called *Lac'ryvine* and *Theremine*.

**TEAR PUNCTA,** Lachrymal puncta.

**TEARS, DEERS'**, Bezoar of the deer.

**TEASEL, CULTIVATED,** *Dipsacus sylvestris*.

**TEASICK,** (*phthisic*,) Phthisis pulmonalis.

**TEAT,** (*τιθήνη*, [Sax.] *titc*,) Nipple.

**TEAZEL,** ([Sax.] *tæjel*,) *Eupatorium perfoliatum*.

**TECEDON,** (*τηκεδών*,) Phthisis.

**TECNOCTONIA,** (*τεκνοκτονια*, from *τεκνον*, 'a child,' and *κτενειν*, 'to kill,') Infanticide.

**TECNOLOGY,** *Tecology*, *Tecnolog'ia*, *Tecolog'ia*, (*τεκνον*, and *τεκος*, 'a child,' and *λογος*, 'a discourse,') A treatise on children.

**TECOLITHOS,** (*τηκω*, 'to dissolve,' and *λιθος*, 'a stone,') *Judæus* (lapis.)

**TECOLOGY,** (*τεκος*, 'a child,' and *λογος*, 'a discourse,') *Tecology*.

**TECOMA RADICANS,** *Bignonia radicans*, *Trum'pet flower*, *Trum'pet creep'er*, *Virgini'ia creep'er*. Indigenous; the orange and scarlet flowers appearing in July. *Order*, Bignoniaceæ. The leaves are acrid.

**TECTARIA CALAHUALA,** see Calaguala radix—t. Ferruginea, see Galaguala radix.

**TEDA,** Tæda.

**TEETH,** see Tooth—t. Artificial, see Artificial—t. Barred, *Barrées* (*Dents*.)

**TEETH, BLOCK.** In dentistry, two or more artificial teeth carved from a piece of ivory, or formed from porcelain paste, afterwards baked and finished.

**TEETH, EYE,** Canine teeth—t. Incorruptible, see Artificial—t. Jaw, Molar teeth—t. Milk, see Dentition—t. Mineral, see Artificial—t. Neck of the, Collum dentium—t. Plate, Porrigo decalvans—t. Porcelain, see Artificial—t. Shedding of the, see Dentition—t. Vitreous substance of the, Enamel of the teeth—t. Vitrescent, see Artificial—t. Wisdom, see Dentition—t. Wit, see Dentition.

**TEETHING,** Dentition.

**TEGENERA MEDICINALIS,** Cantharis.

**TEGIMEN,** (*tegere*, *tectum*, 'to cover,') Integument.

**TEGMENT, Integument.**

**TEGULA HIBERNICA,** 'a tile,' *Hibernicus lapis*.

**TEGUMEN,** gen. *Tegu'miniis*, (*tegere*, *tectum*, 'to cover,') Integument.

**TÉGUMENT,** Integument.

**TEGUMENT'ARY,** *Tegumenta'rius*, (F.) *Tégu-mentaire*. Relating or appertaining to the integument.

**TEGUMENTUM,** Integument—t. *Auris*, see Tympanum—t. *Ventriculorum cerebri*, Centre, oval, of the brain.

**TEIGNE,** (*tiuca*,) Pityriasis, Porrigo, Porrigo lupinosa—t. *Annulata*, Porrigo scutulata—t. *en Anneau*, Porrigo scutulata—t. *Favose*, Porrigo favosa—t. *Furfuracée*, Porrigo furfurans—t. *Non-muldaire*, Porrigo scutulata—t. *Felnde*, Porrigo decalvans—t. *Tmudante*, Porrigo decalvans—t. *Tousurante*, Porrigo decalvans.

**TEINESMUS,** (*τεϊνεσμος*,) Tensesmus.

TEINODYN'IA, (τείνειν, 'to extend, and ὄδυν, 'pain,') Pain of the sinews or tendons.

TEINOPHLOGO'SIS, (τείνειν, 'to extend,' and φλογωσις, 'inflammation,') Inflammation of the sinews or tendons.

TEINTURE, Tincture—t. Ἐθέριε, see Ætheral—t. Rubéfiante, Tinctura cantharidis.

TEKEDON, (τηκεδόν,) Tabes.

TELA, 'a web,' Texture, Tissue—t. Accidentalibus Medullaris, Encephaloid—t. Caverosa, Caverosa texture—t. Cellulosa, Cellular tissue—t. Choroidea, Choroidea tela—t. Cornua, Corneous tissue—t. Emplastica, Sparadrupum—t. Erectilis, Erectile tissue—t. Fibrosa, see Fibrous—t. Galteri, Sparadrupum Galteri—t. Hippocraticis cribrosa, Cellular tissue—t. Hymenochondrodes, Tissue, cartilaginous—t. Hymenochondroides, Tissue, cartilaginous—t. Ichthyocollæ glutinans, see Sparadrupum adhesivum—t. Inodularis, Tissue, inodular—t. Mucosa, Cellular tissue—t. Organica, Histos—t. Vesicatoria, Sparadrupum vesicatorium.

TELAMON, (τελαμών,) Habena.

TELAMO'NES, (τελαμώνες, 'bandages,') Charpie, used for wounds; or linen employed for bandages.

TELANGECTASIS, Telangiectasia.

TELANGIECTA'SIA, *Telangiect'asia, Telangiect'asis, Angiecteact'asia, Hæmatotelangi'osis, Hæmotelangi'osis, Angiect'asia, Anastom'osis aneurysmat'ica*, (τηλε, 'far,' αγγειον, 'vessel,' and εκτασις, 'dilatation,') Dilatation of far or capillary vessels. Nævus maternus. Aneurism by anastomosis. According to some, fungus hæmatodes. See Hæmatodes fungus.

TELANGIECTASIA OCULI, Cirsophthalmus.

TELEORGANIC, (τελος, 'end or object,') see Organic.

TELEPH'UUM, (after Τηλεφος, *Telephus*, son of Hercules,) *Ulex telephium, Achille'um*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, Sedum telephium.

TELLU'RIMUM, (F.) *Tellure*, (from *tellus*, gen. *telluris*, 'the earth,') A metal first met with in the gold mines of Transylvania. It is of a bluish white colour, very volatilizable; specific gravity 6.15; and oxidizable in the air and by heat.

The salts of tellurium occasion the exhalation of so disagreeable an alliaceous odour from the body, that they have not been much experimented with as therapeutical agents.

TELORASIS, (τηλε, 'far,' and ὄραω, 'to view,') Presbytia.

TELUM, 'a dart,' Penis.

TEMPE, Temple.

TEMPERAMENT, *Temperamentum, Temperati'ra, Temperati'o, Temp'eries*, (from *temperare*, 'to moderate,' originally from *tempus*, gen. *temporis*, 'time,' the great *temperer*;) *Complex'io, Cra'sis, Eucra'sia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabillis, or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine, lymphatic, choleric, or atrabillous or melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly, and still is, generally understood, although there can be no

question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEMPERANCE, *Temperanti'a, Sophros'ynê, Nephali'otes, Sobri'etas, Sobri'ety*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPERANTS, (from *temperare*, 'to mitigate,') Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPESTAS, (from *tempus*, 'time,') Season.

TEMPLE, *Tem'pus, Re'gio Tempora'lis, Crot'aphus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. (The word is said to be from the Latin *tempus*, 'time,' because in this part the hair first begins to turn white, and to indicate age.)

TEMPORAL, *Tempora'lis*, (from *tempus*.) That which relates to the temples.

TEMPORAL APONEUROSIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

TEMPORAL ARTERIES, *Crot'aphite Ar'teries*, are several:—I. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. tempora'lis fronta'lis* seu *inter'na* seu *ante'rior*; the other posterior—the *A. tempora'lis occipita'lis* seu *exter'na* seu *superior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; and to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *trans'verse artery of the face*. 3. The *mid'dle temporal*, which arises beneath the cheekbones, and traverses the temporal aponeurosis immediately beneath that bone. II. The *Deepseated Temporals*—*A. tempora'les profundi'e*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *ante'rior* and *posterior*. They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os tempora'ris* seu *tempora'lê* seu *arcua'lê* seu *arcua'lê* seu *parieta'lê inf'erioris* seu *crot'aphum* seu *menen'to'ri* seu *men'do'rum* seu *crotaphit'icium* seu *lapido'sum*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions—1. The *squamo'sa, Pars squamo'sa, Squa'ma, Lepis'na, Os lepidoi'des* seu *squamo'sum* seu *squamifor'mê*, (F.) *Portion écailleuse ou squameuse*. 2. The *mast'oid portion*, and, 3. The *Petrous portion, Petrous Proc'ess, Pyl'amis trig'o'na, Os lapide'um* seu *lapido'sum* seu *sax'e'um* seu *petro'sum* seu *lithoi'des* seu *du'rum* seu *præcip'ite ru'pi assimila'tum* seu *nerua'lê, Pars petro'sa, P. pyramida'lis os'sis tempora'ris*, (F.) *Portion pierreuse, Rocher, Os pétreuz, Apophyse pyramidale, A. pétrée*.

It has, 1. an *auricular* or *external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaser*; the *meatus audito-*

*rius externus*; the *mastoid process*; the *digestive groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylomastoid foramen*, &c. 2. A *cerebral* or *internal surface*, which corresponds to the cavity of the cranium, and on which is the *Pars petrosa*, the *hiatus Fallopii*, the *meatus auditorius internus*, the *fissure of the aqueductus vestibuli*, a *portion of the gutter for the lateral sinus*, &c. 3. A circumference, on which are observed the orifice of the *bony portion of the Eustachian tube*, the *aqueductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOS'SA, *Fos'sa temporalis*, is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the zygomatic fossa; and completed, before, by the cheek-bone.

TEMPORAL MUSCLE, *Temporalis*, *Crotaphites*, (F.) *Arcadi-temporo maxillaire*, *Temporo-maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundæ*,—*anterior* and *posterior*—furnished by the same nerve at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

TEMPORAL VEINS were formerly called *Aëtioi Phleb'es*, *Aquilæ Venæ*.

TEMPORALIS, Temporal.

TEMPORO, (*tempus*, gen. *tem'poris*, 'templc,') in composition, the temple.

TEMPOROÄURICULAIRE, Attollens aurem.

TEM'POROFA'CIAL, *Tem'porofacialis*. Belonging to the temple and face.

TEMPOROFA'CIAL NERVE, *Nervus temporofacialis*. A branch of the facial nerve distributed to the face and temple.

TEMPOROMAXILLAIRE, Temporomaxillary. see TEMPORAL.

TEMPOROMAX'ILLARY, *Temp'poromaxillaris*, (F.) *Temporomaxillaire*. That which belongs to the temporal bone and lower jaw.

TEMPOROMAXILLARY ARTICULA'TION or joint of the lower jaw is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process, and the portion of the glenoid cavity anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an interarticular fibrocartilage, two synovial capsules, and two lateral ligaments:—the one internal, and the other external.

TEMPOROMAXILLARY NERVES of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, gen. *Tem'poris*, 'time,' Temple—t. Intercalare. Apyrexia, Intermis.

TEM'ULENCE, *Ebri'etas*, *Ebriof'itas*, *Methys'mus*, *Meth'ysis*, *Temulentia*, *Tem'ulency*, *Inebri'ation*, *Intoxica'tion*, *Drunk'eness*:—from wine, *Ærophyl'gia*, *Ærophyl'xis*, *Vinolen'tia*, *Vino-*

*lence*; (F.) *Ivresse*; (from *tem'e'lum*, 'wine, any intoxicating drink,') Plater gave wine to delirium; Ettmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplex'ia Temulenta* or dead drunkenness. Commonly *Temulentia* is used synonymously with drunkenness, *Me'thê*; and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania* or *Temulentia* is the same as *Delirium Tremens*. The French use the term *Ivresse* for drunkenness, *Ivroquerie* for habitual drunkenness.

TEMULENTIA, Temulence.

TENACULA. (pl. of *Tenaculum*,) Bonenippers—t. Volsella, Forceps (lithotomy).

TENAC'ULUM, (*tenax*, *ten'cis*, 'holding fast,' from *teneo*, 'I hold.')

A kind of fine hook attached to a handle which is thrust through the parietes of a bloodvessel to draw it out and enable it to be tied.

TENACULUM, ASSALI'NI'S. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

TENAILLE INCISIVE, (from *tenacula*,) Bonenippers.

TÊNALGIE CRÉPITANTE, Ai.

TENASMUS, Tenesmus.

TENDINES CORONARIÆ, Coronary tendons.

TEN'DINOUS, *Tendino'sus*, *Tendin'eus*, *Sin'eus*, (F.) *Tendineux*, (*tendo*, gen. *ten'dinis*, 'a tendon,') Relating or appertaining to, or having the nature of tendons.

TENDO, gen. *Ten'dinis*, Tendon—t. Achillis, Achillis tendo—t. Cordis venosus, Circulus callosus Halleri—t. Oculi, Ligament of Zinn.

TEN'DON, *Ten'do*, *Provervatio*, *Ten'on*, (from *teno*, 'to stretch,') *Sin'eus*, *Thew*, *Leader*, (Prov.) *Guider*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends:—as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, Achillis tendo.

TENDON, CORDIFORM, OF THE DIAPHRAGM, Centre, phrenic—t. of Zinn, Ligament of Zinn.

TENDONS, TWITCHING OF THE, Subsul-tus tendinum.

TENEOTOMIA, Tenotomy.

TÊNESME, Tenesmus—t. de l'Œsophage, Cf. so phagismus—t. Vésical, Bradysuria.

TENESMUS, *Tenes'mus*, (*τεναςμος*,) *Tenas'mus* *Tines'mus*, (from *teno*, 'I stretch,') *Proctica* seu *Obstipa'tio Tenesmus*, *Proctospas'mus*, *Tinag'mus*, (F.) *Tênesme*, *Épreintes*. Frequent, vain and painful desires to evacuate;—one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

Used at times, also, for forcing down pains of the uterus and bladder.

TENESMUS VESICÆ, Bradysuria—t. Vesicæ mucosus, Cystirrhœa.

TENETTE, (from (F.) *tenir*, [L.] *teneo*, 'to hold,') see Forceps.

TÊNIA, Tænia.

TÊNIFUGE, Tæniafuge.

TENNESSEE, MINERAL WATERS OF. On the waters of the French Broad River, in this State, is a large, clear, thermal spring. The heat

is so great that, on first going into the water, it is almost insupportable.

TENON. (τενον, gen. τενοντος,) Tendon.

TENONT'AGRA, (tenon, and ἀγρα, 'seizure.')

A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

TENONTOTOMIA, Tenotomy.

TENONTOTRO'TI, (tenon, and τρωσκω, 'I wound.')

They who are wounded in the tendons.

TÉNOPHYTE, (tenon, and φύειν, 'to grow.')

A growth of an osseous or cartilaginous nature on a tendon.

TENOR'RHAPHY, *Tenorraphy*'s, (τενον, 'a tendon,' and ῥαφή, 'a suture.')

Union of a tendon by suture after it has been divided.

TENOSYNI'TIS, *Tenosynovitis* [?], (F.) *Tenosynite*.

An imperfectly formed term. (tenon, *syn*, and *itis*.)

Inflammation of the synovial sheath of a tendon. See *Ai*.

TÉNOTOME, *Tenotomus*, (from tenon, and τμήν, 'incision.')

An instrument for dividing tendons, especially by the subcutaneous method.

TENOT'OMY, *Tenotomia*, *Tenotom'ia*, *Tenotom'ia*, *Sec'tio seu Dissec'tio ten'dinum*, (F.) *Tenotomie*.

The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints—as in club-foot.

TENSEUR, Tensor — *t. de l'Aponeurose fémo-rale*, *Fascia lata muscle*.

TEN'SION, *Ten'sio*, *Ten'sura*, *Tu'sis*, *Diat'asis*, *Eton'tia*, (*Eton'tia* is, also used for overtension.)

*Conten'sio*, *Disten'sio*, (from *tendere*, *tensum*, 'to stretch.')

State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TEN'SIVE, *Ten'sivus*, *Tono'des*, (F.) *Tensif*.

Accompanied by tension or by a feeling of tension—as a 'tensive pain.'

TEN'SOR, (F.) *Tenseur*. That which stretches or renders tense.

TENSOR CHOROIDEÆ, Ciliary muscle.—*t. Palati*, *Circumflexus musculus*.

TENSOR TAR'SI, *Lachrymal Muscle*. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner*.

It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the punctum lacrymale, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYM'PANI, *Inter'nus Au'ris*, *Internus Mal'lei*, (F.) *Salpingo-malleus*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR VAGINÆ FEMORIS, *Fascia lata muscle*.

TENSURA, (*tendere*, *tensum*, 'to stretch.')

Tension.

TENSUS, (*tendere*, *tensum*, 'to stretch.')

Penis.

TENT, *Ten'ta*, *Turun'da*, and its dim. *Turun'dula*, *Penic'ulus*, *Penic'ilus*, *Penic'ilum*, *Mo'tos*, *Lemnis'cus*, *Licin'ium*, (F.) *Tente*, *Mèche*, (*tendere*, *tensum* or *tentum*, 'to stretch.')

In surgery, tents are small rolls of lint, of a cylindrical or pyramidal

shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, slippery elm, &c., &c. They are not so much used as they formerly were.

TENT, SPONGE, see *Spongia*.

TENTACULARIA, *Filaria hominis bronchialis*.

TENTACULUM CEREBELLI, (from *tendere*, *tensum* or *tentum*, 'to stretch.')

Tentorium.

TENTA'MEN MED'ICUM. 'A medical trial,' (from *tentare*, 'to try.')

An examination in medicine, in the Prussian universities, which is conducted both in writing and *visà voce* before the Dean of the Medical Faculty.

TENTE, Tent—*t. du Cervelet*, *Tentorium*.

TENTIGO, gen. *Tentig'ivis*, (from *tendere*, *tensum* or *tentum*, 'to stretch.')

Priapism.—*Veneræa*, *Nymphomania*—*t. Veretri*, *Satyrriasis*.

TENTIPEL'LUM, (*tendere*, *tensum* or *tentum*, 'to stretch,' and *pellis*, 'the skin.')

Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTORIUM, *T. cerebelli superextensum*, *T. cerebelli*, *Tentaculum cerebelli*, *Septum encephali*, *Diaphragma cerebri*, *Interseptum horizontalia Pacchioni*, *Processus transversus duræ matris*.

*Lateral Processes of the Dura mater*, *Transverse septum*, (F.) *Tente du cerevet*, *Plancher du Cerveau*, *Septum transverse* (Ch.), (*tendere*, *tensum* or *tentum*, 'to stretch.')

A process of the dura mater, which separates the cerebrum from the cerebellum.

It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, *Tentorium*.

TENTUM, (from *tendere*, *tensum* or *tentum*, 'to stretch.')

Penis.

TENTWORT, *Asplenium ruta muraria*.

TENUIS MATER, *Pia mater*.

TENUITAS AQUOSA, 'watery thinness,' *Prædominium aquæ*.

TEPHROSIA APOLLINE'A, (τεφρος, 'ash coloured, gray,')

*Gale'ga Apolline'a* of Egypt and Nubia. Order, Leguminosæ. The leaves are often mixed with senna.

TEPHROSIA PURPUREA, *Gale'ga purpurea* of the coast of Coromandel. The root is bitter, and a decoction of it is prescribed by the native doctors in dysentery, hientery, and tympanites.

TEPHROSIA SENNA. The leaves are used for senna by the people of Popayan.

TEPHROSIA TOXICARIA, *Gale'ga toxicaria* of Cayenne. The leaves are used for poisoning fish. It has been suggested as a substitute for digitalis.

TEPHROSIA VIRGINIANA, *Galega Virginiana*.

TEPIDARIUM, (*tepidus*, 'moderately warm,')

see *Stove*.

TEPLITZ, *Töplitz*.

TERAS, gen. *Ter'atis*, (τερας, gen. τερας,) *Monster*.

TERATOGEN'ENY, *Teratogen'ia*, (*teras*, and γενεα, 'generation.')

The formation of monsters.

TERATOLOG'ICAL, *Teratolog'ic'us*, (F.) *Teratologique*. Same etymon as the next. Relating or appertaining to Teratology.

TERATOL'OGY, *Teratolog'ia*, (τερατολογία, from *teras*, and λογος, 'a discourse.')

A treatise on monsters.

TERATOSIS, see *Monster*.

TERCERON, (from [F.] *terce*, [L.] *tertius*, 'third.')

see *Mulatto* — *t. Black*, see *Mulatto*.

TEREBELLA, (from τερεω, 'to bore,')

*Trepan*.

TEREBELLUM. A name given by Dugès to a perforator, *Perce-crâne*, of his invention.

TÉRÉBINTHINE, *Terebinthina* — *t. de Bordeaux*, see *Pinus sylvestris* — *t. de Chio*, see *Pis-*

taeia terebinthus — *t. Commune*, see *Pinus sylvestris* — *t. de Copahu*, Copaiba — *t. d'Égypte*, see *Amyris opobalsamum* — *t. du Grand Cœvre*, see *Amyris opobalsamum* — *t. de Judée*, see *Amyris opobalsamum* — *t. de Mèlèze*, see *Pinus larix* — *t. de Vénise*, see *Pinus larix*.

TÉRÉBINTHINÉ, Terebinthineate.

TÉRÉBINTHINA, (from *τερεβινθος*, 'the turpentine tree.') *Turpentine*, *Bo'tin*, *Al'botin*, *Alt'il'ibat*, *Bruti'no*, (F.) *Térébintbine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See *Turpentine*, *Pinus palustris* and *Pinus sylvestris*. All the turpentineæ are stimulant, diuretic, and cathartic. *Terebinthina*, (Ph. U. S.), is the concrete juice of *Pinus palustris* and other species of *Pinus*.

TÉRÉBINTHINA ARGENTORATENSIS, see *Pinus picea* — *t. Balsamea*, see *Pinus balsamea* — *t. Canadensis*, see *Pinus balsamea* — *t. Chia*, see *Pistacia terebinthus* — *t. Communis*, see *Pinus sylvestris* — *t. Cypria*, see *Pistacia terebinthus* — *t. Empyreumatica*, see *Pinus sylvestris* — *t. Laricina*, see *Pinus larix* — *t. Veneta*, see *Pinus larix* — *t. Vera*, see *Pistacia terebinthus* — *t. Vulgaris*, see *Pinus sylvestris*.

TÉRÉBINTHINATE, *Terebinthinateus*, (F.) *Térébintiné*, *Abiétique*. Having the qualities of or impregnated with turpentine.

TÉRÉBINTHUS, (*τερεβινθος*) *Terminthus* — *t. Gummifera*, *Bursera gummifera* — *t. Lentiscus*, *Pistacia lentiscus* — *t. Vulgaris*, *Pistacia terebinthus*.

TÉRÉBRA, (*τερεω*, 'to bore,') 'a borer,' *Trepan*.

TÉRÉBRANT, see *Tercratio*.

TÉRÉBRATIO, (from *terebrare*, *terebratum*, 'to bore,') *Trepanning*. The French use the term *Térébration* for the puncturing of a bone by any instrument, and a pain is said to be *térébrant*, when it seems as if the part was penetrated or bored.

TÉRÉBRATION, see *Tercratio*.

TÉREDO OSSIUM, (*τερεω*, 'to bore,') *Caries*, *Spina ventosa*.

TER'ES, gen. *Ter'etis*, ('long and round,' from *tero*, 'to rub;' as if 'rubbed smooth or rounded,') *Strou'gylus*, *Cylindroi'des*. An epithet given to many organs, the fibres of which are collected into round fasciuli.

TERES LIGAMENTUM, (F.) *Ligament rond*. This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

TERES MA'JOR, (F.) *Anguli-scapulo-huméral*, *Scapulo-huméral*, (Ch.) *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MI'NOR, *No'nus hu'meri P'lacenti'ni*, (F.) *Le plus petit sus-scapulo-trochitérien* (Ch.), *Petit rond*, *Margini-sus-scapulo-trochitérien*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below,

in its inner half; and, from before to behind, in the outer. It is attached, on the one hand, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, (*τηρησις*,) *Observation*.

TÉRETRUM, (*τερετραν*, from *τερεω*, 'to bore,') *Trepan*.

TÉRETRON, (*τερετρον*,) *Trepan*.

TERGAL, (from *tergum*, 'the back,') *Dorsal*.

TERGEMINI, *Trigemini*.

TERGUM, *Dorsum*, *Vertebral column*.

TERMINAL CAVITIES, see *Pulmo*.

TERMINALIA, see *Myrobalanus*.

TERMINOLOGY, (*termen*, gen. *term'inis*, 'a term,' and *λογος*, 'a discourse,') *Nomenclature*.

TERMIN'THUS, *Terebin'thus*, (*τερεβινθος*, 'the turpentine tree,') *Phy'ma Anthracæ*, *Termin'thus*, *Ber'ry* or *Fun'gous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMIN'THUS, *Pistacia terebinthus*.

TERMINUS ('limit') SUPERIOR ASPERÆ ARTERIÆ, *Larynx*.

TERMONOLOGY, (*termo*, gen. *termo'nis*, 'a term,' and *λογος*, 'a discourse,') *Nomenclature*.

TERMS, (periods,) *Menses*.

TERRA ABSORBENS MINERALIS, 'absorbent mineral earth,' *Magnesia carbonas* — *t. Aluminis*, *Argilla pura* — *t. Amara aërata*, *Magnesia carbonas* — *t. Amara sulphurica*, *Magnesia sulphas* — *t. Argillacea hydrata*, *Argilla pura* — *t. Argillacea pura*, *Argilla pura* — *t. Bolaris*, *Argilla pura* — *t. Foliata*, *Sulphur* — *t. Foliata mineralis*, *Soda acetata* — *t. Foliata tartari*, *Potassæ acetas* — *t. Fornacum*, see *Bricks* — *t. Fulonica*, *Cimolia purpurescens* — *t. Japonica*, *Catechu*, *Nauclea gambir*.

TERRA LEM'NIA, *Lemp'nias*, *Argilla bo'lus flava*, *Lem'nian Earth*. A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the Baobab, an Africa tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

TERRA LIVONICA. A terra sigilla'ta or sealed earth from Livonia, redder than that from Silesia, and very astringent.

TERRA MARITA, *Curcuma longa*.

TERRA NOCERIA'NA. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

TERRA ORLEA'NA, *Pignen'tum ur'uca*, *Uru'ca*, (F.) *Rocon*, *Roucon*, *Bichet*. A pigmental matter obtained from the seeds of *Bic'a Orlea'na* sea *Orella'na* seu *America'na*, *Orella'na*, *Orlea'na*. In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag*, *Koll*, or *Egg Annotto*.

Span'ish Annot'to, *Bic'a*, is in small, oblong cakes. It is chiefly employed as a colouring matter.

TERRA OS'SEA, *Mate'ria os'sea*. Bony matter. The earthy portion of bones.

TERRA PONDEROSA, *Baryta* — *t. Ponderosa muriata*, *Baryta*, *muriate* of — *t. Ponderosa salita*, *Baryta*, *muriate* of.

TERRA PORTUGALICA, *Bar'vos*, *Bucaros*. A reddish, astringent, styptic earth, obtained from Portugal.

TERRA SAPONARIA, *Cimolia purpurescens*.

TERRA SIGILLA'TA, (*sigillatus*, furnished with little figures — *sigilla*,) *Seal'ed Earth*. A bolc or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seigneur. To these

belong the *Terra Silesiaca*, *Terra Lemnia*, *T. Turcica*. See Bole, and Bolus alba.

**TERRA SILESIACA**, see *Terra sigillata*—*t. Talcosa oxyanthracodes*, *Magnesiæ carbonas*—*t. Turcica*, see *Terra sigillata*.

**TERRA URINÆ**. The earthy deposit in the urine.

**TERRA VITRIOLI DULCIS**, *Coleothar*.

**TERRAPIN**, *Emys palustris*.

**TERRE BOLAIRE**, 'bolar earth,' Bolus—*t. Magnésienne*, *Magnesiæ carbonas*—*t. Noir*, *Bunium bulbocastanum*—*t. Pesante*, *Baryta*—*t. Sigillée*, see Bole.

**TERRETTE**, *Glechoma hederacea*.

**TERRITORY**, *CELL*, see *Cell*.

**TERTIAN FEVER**, *Febris tertiana*, *Anctus tertianus*, *Tritæus*, *Tertian* or *Third Day Ague*, *Third Day Fe'ver*, (F.) *Fièvre tierce*, (from *tertius*, 'the third.') An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general rule, it is the most manageable form of ague.

A *double tertian*, (F.) *Double tier* (F.) (*Fièvre*), has a paroxysm every day,—the paroxysms of alternate days being associated.

**TERTIANARIA**, (from its virtues in tertian fever,) *Scutellaria galericulata*.

**TESSARA**, (*τεσσαρα*, 'four,') Cuboid.

**TESSELLA**, (dim. of *tessera*, 'a small quadrangular stone for paving,' &c.,) *Tabella*.

**TESSELLATED**, (*Tessellatus*, ('furnished with small quadrangular stones,') Having a quadrangular arrangement, like a pavement. See Epithelium.

**TESSERA**, 'a quadrangular stone, wood,' &c. Cuboid.

**TEST**, **DANIEL'S**, (from *testis*, 'a witness,') see *Docimasia pulmonum*—*t. Hydrostatic*, see *Docimasia pulmonum*—*t. Static*, see *Docimasia pulmonum*.

**TESTA**, 'a shell,' see *Ostrea*—*t. Ovi*, see *Membrana putaminis*.

**TESTA PREPARATA**, *Prepa'rad Oystershell*. Oystershell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as *Creta preparata*.

**TESTACEOUS**, *Testaceus*, (F.) *Testacé*, (from *testa*.) A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See *Creta*.

**TESTÆ FURNACEÆ**, (*forax*, gen. *foracis*, 'a furnace,') Bricks—*t. Ostrea*, see *Ostrea*.

**TESTES**, (pl. of *testis*, 'a witness,') The Testicles, see *Testicle*. Vulgarly, the *Stones*, *Ballocks*. A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates*.

**TESTES CEREBRI**, see *Quadrigemina tubercula*.

**TESTICLE**, *Testis*, *T. virilis*, *Testiculus*, *Orchis*, *Po'mum amoris*, *Didymus*, *Androarrium*, *Her'nia*, *Gemini* (pl.), *Gemelli* (pl.), *O'vum*, *Codling*, (F.) *Testicle*, (dim. of *testis*, because the testicles are 'witnesses' of virility.) The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. The substance of the testicle consists of numerous conical, flattened lobules—*lobuli testis*—whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tubuli* seu *Canales* *seminiferi* seu *seminales*, *Vasa seminalia*, *Vas'cula serpenti'na*, folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,203 feet. All these canals, uniting in their course, pass through the corpus

Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tunica Albuginea*, or, simply, *Albuginea*, *Peritætis*, (F.) *Pérididyme*, of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

**TESTICLE**, SWELLED, *Hernia humoralis*.

**TESTICONDUS**, (*testis*, and *condere*, 'to hide,') *Crypsorchis*.

**TESTICULAR**, *Testicularis*, (F.) *Testiculaire*.

Belonging or relating to the testicle.

**TESTICULE**, *Testicle*.

**TESTICULUS**, *Testicle*—*t. Accessorius*, *Epididymis*—*t. Caninus*, *Orchis mascula*.

**TESTIMONIUM MATURETATIS**. 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

**TESTIS**, *Testicle*—*t. Feminæ*, *Ovary*—*t. Irritabile*, *Orchidalgia*—*t. Minor*, *Prostate*—*t. Mulobris*, *Ovary*—*t. Virilis*, *Testicle*.

**TESTITIS**, (from *testis*, and *itis*), *Hernia humoralis*.

**TESTUDINATIO CRANII**, 'arched like the back of a tortoise,' (from *testudo*), *Camaros*.

**TESTUDO**, gen. *Testudinis*, (from *testa*, 'a shell,') *Chelonæ*, (F.) *Tortue*. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a testudo; *Emphy'ma encystis ganglion*. See *Talpa*.

**TESTUDO CEREBRI**, *Fornix*—*t. Scapulae*, see *Scapula*.

**TETE**, (*teat*), *Nipple*.

**TETANIC**, *Tetanicum*, *Spas'ticum*, *Convulsivum*, *Convulsivæ*, (F.) *Tétanique*, (from *tetanus*.) A remedy which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica*, *Strychnia*, *Brucia*, *Arnicæ*, and *Toxicodendron*.

Also, an epithet for a tonic convulsion.

**TETANIN**, *Strychnia*.

**TETANIUM**, *Strychnia*.

**TETANIZATION**, *Tetanisation*. The production or condition of tetanic spasms, in which the patient is said to be *tetanized*.

**TETANOMATA**, (*τετανώματα*) *Tetanothra*.

**TÉTANOS**, *Tetanus*.

**TETANOTHRA**, (*τετανώθρα*) *Tetanom'ata*, *Erigato'ria*, (from *τεταω*, 'stretched, free from wrinkles,') *Medicines* which remove wrinkles.

**TETANUS**, (*τεταω*, 'stretched,' from *τεταω*, 'to stretch,') *Spasm with rigidity*, *Convulsio Indica*, *Holoton'ia*, *Holoton'icus*, *Holotet'anus*, *Tet'anus universalis*, *Ri'gor nervosus* seu *nervorum*, *Erten'sio* seu *Disten'sio*, *Euta'ria tet'anus*, *Cat'ochus corv'anus* seu *holoton'icus*, (F.) *Tétanos*, *Mal de cerf*. A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthotonus*), sometimes backwards (*Opisthotonus*), and sometimes to one side (*Pleurorhotonus*). When tetanus is confined to the muscles of the jaws, it is called *Trismus*. It is a most formidable affection. The means of treatment are:—copious and repeated blood-letting; bathing, cold and warm; powerful doses of opium, and anæsthetics. In *Traumatic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course,

be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, Emprosthotonus—t. Dolorificus, Cramp—t. Dorsalis, Opisthotonus—t. Lateralis, Pleurothotonus—t. Maxilla inferioris, Trismus—t. Posterganeus, Opisthotonus—t. Posticus, Opisthotonus—t. Universalis, see Tétanus.

TETARTEÛS, (τεταρτος, 'occurring on the fourth day,' from τεταρτος, 'the fourth,') Quartan.

TETARTOPHUIA, (τεταρτος, 'the fourth,' and φωω, 'I arise,') *Quartanus remittens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, (from [L.] *testa*, 'the skull,') Caput, Head—t. de Veau, Elephantiasis of the Greeks.

TETRA, (τετρα, 'four,') in composition, four.

TETRADRACHMON, (τετραδραχμον, from *tetra*, and δραχμη, 'a drachm,') A weight of four drachms or half an ounce.

TETRAGONUS, (τετραγωνος, from *tetra*, and γωνια, 'an angle,') *Platysma myoides*.

TETRAHIT LONGIFLORUM, *Galeopsis grandiflora*.

TETRAMASTHUS, (*tetra*, and μασθος, 'a breast,') *Quadrimummatus*.

TETRAMYRON, (τετραμυρον, from *tetra*, and μυρον, 'an ointment,') An ointment of four ingredients.

TETRANGURIA, (*tetra*, and anguria,) *Cucurbita citrullus*.

TETRANTHERA PICHURIM, (*tetra*, and αυθηρα, 'anther,') *Pichurim* beans.

TETRAO COTURNIX, (after τετραξ, *Coturnix*, the Quail, (F.) *Caille*: *Class*, Aves; *Ord*, Gallinaceæ. The quail is an esteemed article of diet. The Greek name is ορνιξ, gen. ορνιγγος; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHARMACUM, (*tetra*, and φαρμακον, 'a medicine,') A medicine consisting of four ingredients.

TETRASCÆLUS, (*tetra*, and σκελος, 'leg,') A monster having four legs.

TETROBOLON, (τετροβολον, from τετρα, and οβολος, *obolus*.) The weight of four oboli or two scruples.

TETOROS, (τετρορος,) *Astragalus*.

TETTER, ([Sax.] τετερη, *Herpes*—t. Crusted, Impetigo—t. Honeycomb, Porrigo favosa—t. Humid, Eczema impetigo—t. Milky, Porrigo larvalis—t. Pustular, Impetigo—t. Running, Impetigo—t. Scaly, Psoriasis.

TETTERWORT, *Chelidonium majus*.

TEUCRIUM ÆGYPTIACUM, (τευκριον, after Teucer, T. capitatum—t. Bellium, T. capitatum.

TEUCRICUM CAPITATUM, T. Bellium seu *Ægyptiacum*, *Polyium Capitatum*, *Poley Mountain of Montpellier*, *Ord*, Labiata, is, generally, substituted for T. chamædrys. The common *Poley Mountain* is the *Teucrium montanum*; and the *Golden Poley Mountain*, the *Teucrium Polium*, *Polyion*.

TEUCRIUM CHAMÆDRYS, T. officinale, *Chamædrys*, C. minor seu *peplus* seu *vulgaris*, *Quer'cula minor* seu *Calamandrina*, *Trissago*, *Chamædrops*, *Trixa'go*, *Com'mon*, *Creeping* or *Small German'der*, *English Treacle*, (F.) *Petit chène*, *Chênète*, *Germandrée officinale*. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ℥ss to ℥j.

TEUCRIUM CHAMÆPITYS, *Chamæpitys*, *Arthetica*, *Arthetica*, *Aju'gu*, A. seu *Bulgula Chamæpitys*, *Ab'gia*, *Chamæmorus*, *Pva arthritica*, *Holoc'yon*, *Ion'ia*, *Sideritis*, *Com'mon Ground'pine*, (F.) *Petite Icette*. Properties like the last. The tops and leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRETICUM, T. *hyssopifolium* seu *Rosmarinifolium*, *Rosmarinus ste'chadis fa'ciæ*, *Poley-mountain of Candy*, *Polyium Creticum*. The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to T. chamædrys.

TEUCRIUM HYSSOPIFOLIUM, T. Creticum.

TEUCRIUM I'VA, *Chamæpitys moschata*, *I'va*, I. *moschata* *Monspelien'sium*, *Chamæpitys anthyllus*, *French Ground'pine*, (F.) *Icette musquée*. It has similar virtues to T. Chamæpitys, but is weaker.

TEUCRIUM MARITIMUM, T. Marum.

TEUCRIUM MARUM, T. maritimum, *Marum Syriacum* seu *Creticum* seu *ve'rum* seu *Cortu'si*, *Majora'na* *Syri'aca*, *Chamædrys inca'na maritima* seu *marum*, *Orig'anum Syri'acum*, *Marum german'der*, *Syri'ian herb mas'tich*, *Cat thyme*, (F.) *Marum* ou *Germandrée maritime*, *Herbe aux chats*. A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM OFFICINALE, T. chamædrys—t. Palustre, T. scordium—t. Pyramidale, *Ajuga*—t. *Rosmarinifolium*, T. Creticum.

TEUCRIUM SCORDIUM, T. palustrè, *Scor'dium*, *Trissago palustris*, *Chamædrys palustris* seu *scor'dium*, *Allium red'olens*, *Wa'ter German'der*, (F.) *Germandrée scorodone*, *Sauge des bois*, *Germandrée aquatique*. The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucra.

TEXTUM INTERLOBULARE, (texere, textum, 'to weave,') Interlobular tissue.

TEXTURA, Texture—t. Organica, Histos.

TEXTURAL, *Texturalis*. Relating or appertaining to a texture.

TEXTURE, *Textura*, *Textus*, (from texere, textum, 'to weave,') *T'ella*, *Hy'pha*, *Hy'phæ*. The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue—t. Cellulosus, Cellular tissue—t. Desmosus, Desmoid tissue—t. Eretilis, Erectile texture—t. Nervorum, Plexus nervorum—t. Organicus, Cellular tissue—t. Papillaris, Corpus papillare—t. Parenchymalis, Cellular tissue.

THÆLIA (Θηρ, 'a wild animal,') Radzyge.

THALAMUS, pl. *Thalamis*, (θαλαμος,) (F.) *Couche*. 'A room or chamber; a bed.' The place in which a nerve originates, or has been considered to originate.

THALAMI NERVORUM OPTICORUM seu OPTICI, *Eminentis mag'næ cer'ebr'i*, *Gan'glia cer'ebr'i post'ica*, *Cru'ra medullæ oblongatæ* (of some,) *Striata corpora super'na poster'iora*, *Coll'iculi nervorum opticorum*, *Optic thalamis*, *Posterior cerebral ganglion*, (F.) *Couches des nerfs oculaires* (Ch.), *C. des nerfs optiques*, *C. optiques*. Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly from the corpora quadrigemina or optic lobes; and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur*. They are, also, called *Posterior ganglion of the cerebrum*. From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of

the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici*.

THALAMUS REGALIS, Pericardium.

THALASSOLUTRUM, (Θαλασσα, 'sea,' and λουτρον, 'a bath,') Bath, sea.

THALASSOM'ELI, (Θαλασσα, 'sea,' and μελι, 'honey,') A cathartic medicine, composed of equal parts of sea water, honey, and rain water, exposed to the sun during the dog days in a pitched vessel.

THALICTRON, (Θαλικτρον,) *Thalictrum*, *T. majus* seu *flavum* seu *flaves'centis* seu *pratense* seu *nigrificans* seu *rugosum* seu *raginatum*, *Rhabar'barum purpureum*, *Mead'ow rne*, *Poor Man's Rhubarb*, (F.) *Pigamon jowâtre*, *Rue des prés*, *Fausse-Rhabarbe*, *Rhabarbe des pauvres*. Ord. Ranunculacæ. *Sex. Syst.* Polyandria Polygynia. The root resembles rhubarb in its properties.

THALICTRUM ANEMONOÏDES, *Mead'ow Rue*, *Rue-leaved Anem'ony*; an indigenous plant, flowering in April and May.

THALLIUM, (from Θαλλος, [L.] *thallos*, 'a green bud or shoot,') A metal discovered in 1861 by spectrum analysis in which it gives a very brilliant green ray. It is found in certain seleniferous and telluriferous deposits, in the native sulphur of Lipari, &c., and resembles lead physically, in its aspect, colour, density, &c., as well as its toxic action on the economy.

The salts of thallium, especially the nitrate, are very soluble.

THAMARINDUS, Tamarindus.

THAME, (thumb,) Pollex.

THANASIMUS, (Θανασιμος, from Θανατος, 'death,') Mortal.

THANAT'ICUS, (from *thanatus*.) Relating or appertaining to death. *Thanat'ici* (morbi) of Dr. Wm. Farr are fatal affections from violence.

THANATODES, (Θανατωδης,) Mortal.

THAN'ATOID, *Thanatoïdes*, (*thanatus*, and εϊδος, 'resemblance,') Resembling death. Apparently dead.

THANATOL'OGY, *Thanatolog'ia*, *Thnescolog'ia*, (*thanatus*, and λογος, 'a discourse,') A treatise on, or the doctrine of, death.

THANATUS, (Θανατος,) Death.

THAP'SIA, (from the island Thapsus.) The *deadly car'rot*, *Thap'sia ascle'piæ*. Family, Umbellifera. *Sex. Syst.* Pentandria Digynia. The bark of the root operates violently, both upwards and downwards. It is not used.

THAPSIA SILPH'UM, A North African plant, has similar properties. Six to ten grains of the powder produce several alvine evacuations.

THAPSIUM ACTÆIFOLIUM, (after the isle of Thapsus,) *Ligusticum actæifolium*.

THAPSIUM ATROPURPUREUM, *Th. cordatum*, *Roundheart*. Order, Umbellifera. The flowers, which appear in June, are of a dark purple.

THAPSIUM BARBINOÏDE, *Mead'ow Par'snep*. An indigenous plant, of the Northern and Western States, which flowers in June. Flowers, yellow.

Both these plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THAPSIUM CORDATUM, *T. atropurpureum*.

THAPSIUM BARBATUM, *Verbascum nigrum*.

THARSI, see Tarsus.

THE, Thigh.

THÉ, *Thea*—*t. des Apalaches*, *Ilex vomitoria*—*t. du Canada*, *Gaultheria*—*t. d'Europe*, *Salvia veronica*—*t. de France*, *Salvia*—*t. de Jersey*, *Celastrus*—*t. de la Mer du Sud*, *Ilex vomitoria*—*t. du Mexique*, *Chenopodium ambrosioides*—*t. de Simon Pauli*, *Myrica gale*—*t. Suisse*, *Falltrank*.

THE'A, (Chinese tcha,) *Cha'a*, *Tea*, (F.) *Thé*

There are two principal varieties of teaplant; *Thea Sinen'sis*, the *Thea Bohe'a*; and *Thea vir'idis*; the *black tea*, and the *green*. Ord. Camellieæ. *Sex. Syst.* Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Teadrinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncrasies, entirely harmless. It is not unfrequently adulterated. See Falsifications, table of.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea*, *Mint tea*, &c.

THEA GERMANICA, Veronica.

THEBE'SIUS, VEINS OF. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foram'ina Thebe'sii*. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Val'vula Thebe'sii*, *V. Guiffartia'na*, *V. ve'ne magnæ*.

THECA, (Θηκη,) Case, Vagina, Sheath—*t. Cerebri*, Cranium—*t. Cordis*, Pericardium—*t. Folliculi*, see Folliculi Graafiani—*t. Vertebralis*, see Vertebral canal.

THE'CAL, *Theca'lis*, (from *theca*, 'a sheath,') Relating or appertaining to a sheath,—as of a tendon.

THEC'TIS, (*theca*, and *itis*.) A term, of hybrid formation, signifying inflammation of the sheaths of tendons.

THEIN, (from *theca*.) see Coffea Arabica.

THEION, (Θειον,) Sulphur.

THEIOPEGÆ, (*theion*, and πηγη, 'a spring,') Waters, mineral (sulphureous.)

THEIOTHERMÆ, (*theion*, and θερμη, 'heat,') Waters, mineral (sulphureous.)

THEL'ASIS, (Θελαζω, 'to give suck,') Lactation.

THELASMUS, (Θηλασμος,) Lactation.

THELASTRIA, (Θηλαστρια,) Nurse.

THELE, (Θηλη,) Mamma, Nipple.

THEL'TIS, (F.) *Thélite*, (*thele*, and *itis*.) Inflammation of the nipple.

THELONCUS, (*thele*, and ογκος, 'a swelling,') Mastoncus.

THELORRHAG'IA, (*thele*, and ρυγη, 'a rupture,') Hemorrhage from the nipple.

THELYGON'IA, (Θηλυς, 'female,' and γονη, 'generation,') The part taken by the female in the act of generation. The procreation of female children. Also, nymphomania.

THELYGONOM, (Θηλυς, 'female,' and γονη, 'sperm,') Sperm (of the female.)

THELYPTERIS, (Θηλυς, 'female,' and pteris,) *Pteris aquilina*.

THENAD, Thenal.

THE'NAL, *The'nar*, (from *thenar*.) Relating or appertaining to the thenar.

THENAL AS'PECT. An aspect towards the side on which the thenar is situated.—(Barclay.) *Thenad* is used adverbially, by the same writer, to signify 'towards the thenal aspect.'

THE'NAR, (Θεναρ, from θενω, 'I strike,') 'I push.' The palm of the hand, or sole of the foot.

THENAR, Flexor brevis pollicis manus, Palm.

THENAR or THENAL EM'INENCE is the projection at the anterior and outer part of the hand formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR or THENAL MUSCLE. Riolan and Winslow give this name to the fleshy mass formed of the abductor brevis, opponens pollicis, and the interior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, (Θεός, 'God,' and βρωμα, 'food,') Cacao.

THEOMANIA, (Θεομανια, from Θεός, 'God,' and μανια.) Demonomania.

THEOPLEGIA, (Θεός, 'God,' and πληγη, 'a stroke,') Apoplexy.

THEOPLEXIA, (Θεός, 'God,' and πλσσω, 'to strike,') Apoplexy.

THEORETICAL, (θεωρητικός,) *Theoreticus*, *Theoricus*, (θεωρω, 'I contemplate,') (F.) *Théorétique*, *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, (θεωρια,) *Theory*.

THEORIQUE, *Theoretical*.

THEORY, (θεωρια,) *Theoria*, (F.) *Théorie*. The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. *Theory* regards nature as it is, and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

THEORY OF MEDICINE, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some they are considered to include General Pathology and General Therapeutics.

THERAPEIA, (θεραπεια,) *Curation*, *Therapeutics*.

THERAPEUSIS, *Therapeutics*.

THERAPEUTA, (θεραπευτης,) *Therapeutist*.

THERAPEUTER, (θεραπευτηρ,) *Therapeutist*.

THERAPEUTES, (θεραπευτης,) *Therapeutist*.

THERAPEUTICAL, *Therapeutical*. Relating or appertaining to Therapeutics.

THERAPEUTICE, (θεραπευτικη, [τεχνη,]) *Therapeutics*.

THERAPEUTICS, *Therapeutice*, *Therapeutica*, *Therapēsia*, *Introtechnicē*, *Therapeia*, *Therapēa*, *Curatoria* *Methodus*, *Methodus Medendi*, *Practice of Physic*, (F.) *Thérapeutique*, *Thérapie*, (from θεραπευω, 'I wait upon, I alleviate, I attend upon the sick,') That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THERAPEUTICUS, *Therapeutical*.

THERAPEUTIQUE, *Therapeutics*.

THERAPEUTIST, *Therapeutia*, *Therapeutēs*, *Therapeuter*. One who practices therapeutics. A practitioner of medicine. To be a good therapeutist, a man must be well versed in every department of medicine, and capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practice well unless he is both. Hence, the comparatively small number of good therapeutists.

THERAPIA, (θεραπεια,) *Therapeutics*.

THÉRAPIE, *Therapeutics*.

THERIA, (θηρ, 'a wild animal,') *Radzige*.

THERIAC, *Theriaca*—t. of Antipater, Antipatri theriaca.

THERIACA, (θηριακα,) *The'riac*, (from θηρ, 'a ferocious or venomous animal,') *Tre'acle*, *Melastees*. (F.) *Thériaque*. Also, a medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *The'riac* and *The'riacal* have been used adjectively for medicinal.

THERIACA ANDROM'ACHI, *Venice Treacle*, is an ancient alexipharmic electuary; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, long held its place in their Codex, with even an additional number of ingredients. The *Electuarium Opium polypharmacum* of the Codex has contained acid ingredients, 5; astringent, 5; bitter, 22; indigenous aromatics, 10; umbelliferous aromatics, 7; balsams and resinous substances, 8; fetid ingredients, 6; narcotics, 1; earthy substances, 1; gummy or amylaceous, 4; saccharine, 3; total, 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA ARTICULORUM, *Colechicum*—t. *Celestis*, *Tinctura opii*—t. *Communis*, *Melasses*—t. *Edinensis*, *Confectio opii*.

THERIACA GERMANO'RUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINENS'IS, *Catoplasma Cymini*. A cataplasm of cumin seed, bay berries, germanander, snakeroot, cloves, honey, and sometimes opium, or syrup of poppies.

THERIACA RUSTICORUM, *Allium*.

THERIAKI. In Turkey, *opium-eater*, or they who indulge largely in the use of opium, are so called.

THÉRIAQUE, *Theriaca*.

THERIATRICA, (θηρ, 'an animal,' and ιατρικη, 'medicine,') *Veterinary art*.

THERIODES, (θηριωδης, from θηρ, 'a venomous animal,' and οδες,) *Ferine*.

THERIOMA, gen. *Theriovatis*, *The'riom*, (θηριωμα, from θηρ, 'a venomous animal,' and ομια.) Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, (θηριον,) *Therioma*.

THERIOTOMY. (θηρ, 'an animal,' and τομην, 'to cut,') *Zootomy*.

THERMA, (θερμη,) *Heat*—t. *Emphytum*, *Animal heat*.

THERMÆ, pl. of *therma*, (θερμα,) *Warm baths* or springs. See *Waters* (mineral).

THERMÆ FABARÆ, *Pfeffers*, *Mineral Waters* of—t. *Piperinæ*, *Pfeffers*, *Mineral Waters* of—t. *Plumbariæ*, *Plombières*, *Mineral Waters* of.

THERMAL, *Therma'lis*, (from *therma*.) Relating or appertaining to heat. Hot, warm,—as 'a thermal mineral water.'

THERMANTICA, (θερμαντικα,) *Calefacients*.

THERMASMA, gen. *Thermasmatis*, (θερμασμα,) *Fomentation*.

THERMOLUSIA, (*therma*, and λωω, 'to wash,') *Bath*, *warm*.

THERMOMETER, (*therma*, and μετρον, 'measure,') see *Heat*.

THERMOTHERAPEIA, (*therma*, and *therapeia*, 'treatment of disease,') *Treatment* by means of heat, and especially of hot air.

THERMUM EMPHYTUM, (*therma*, and εμφυτος, 'innate,') *Animal heat*, *Biolychnium*.

THE'SIS, (*θεσις*, 'a proposition,' from *τιθημι*, 'to put.')

THE'SIS, (*θεσις*, 'a position or proposition.' *Disputatio inauguralis*, *Inaugural Dissertation*. The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smeillic, and Stoll, have published collections of these. In many universities, of Germany especially, the *Disputatio inauguralis* is the public dissertation; whilst the *Theses* are questions put to the candidate, and answered in writing, in the Latin language.

THEVE'TIA AHOUI, (after Andrew Thevet, a French monk, who travelled in Brazil in the 16th century.) *Ahoui*. The kernels of the nut of this Brazilian tree are said to be a violent poison. In the Antilles its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THEW, ([Sax.] *þeor*), Tendon.

THEY, Thigh.

THICKLISTED, Pury.

THIGH, ([Sax.] *þech*), *Femur*, *Femur*, *Cruis*, *Me'rus*, *Me'rium*, (Sax.) *The*, *They*, (F.) *Cuisse*. (Of old, *Femur* meant the thigh generally, and especially the outer part,—*Femur*, the inner.) The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above*, it is bounded, *anteriorly*, by the groin; *externally*, by the hip; *behind*, by the fold of the nates; and *within*, by the perineal region. *Below*, it is bounded, *anteriorly*, by the prominence of the knee; *posteriorly*, by the ham. It is formed of a considerable number of muscles, bloodvessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, Collum femoris.

THIMBLEWEED, *Rudbeckia laciniata*.

THION, (*θειον*), Sulphur.

THIRST, ([Sax.] *þyrre*), *Si'tis*, *Dip'sa*, *Potio'nis deside'rium*, (F.) *Soif*. A simple desire for, or absolute want of liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papille of the mouth and fauces from suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation*,—an *instinctive want*,—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia—t. Morbid, Dipsosis.

THIRSTY, Dipsodes.

THISTLE, BLESSED, ([Sax.] *þistel*), *Centaurea benedicta*—t. Cotton, *Onopordium acanthium*—t. Globe, *Echinops*—t. Holy, *Centaurea benedicta*—t. Ladies', *Carduus Marianus*—t. Milk, common, *Carduus Marianus*—t. Pine, *Arctylus gummifera*—t. Sow, *Sonchus oleraceus*—t. Star, *Centaurea calcitrapa*—t. Yellow, *Argemone Mexicana*.

THLADIAS, (*θλαΐας*, from *θλαω*, 'to crush.')

Eunuch.

THLASIAS, (*θλασις*), Eunuch.

THLASIS, (*θλασις*), Contusion—t. Depression, Depression.

THLASMA, gen. *Thlasm'atis*, (*θλασμα*), Contu-

sion—t. Concussio, Concussion—t. Stemma, Sprain.

THLAS'PI, (*θλασις*), *Pen'nycross*. Ord. Cruciferae. *Sec. Syst.* Tetradynamia Siliculosa. Two species of thlaspi are found in some pharmacopoeias for medical use:—*Thlaspi arven'se* or *Tr'eacle mus'tard*; and *Thlaspi campest're* seu *hirsutium* seu *vulga'tius*, *Lepid'ium campest're*, *Lep'ia* seu *Ibe'ris campest'ris*, *Mith'ridate mus'tard*. The pharmaceutical properties of both kinds resemble those of common mustard.

THLASPI BUR'SA, *Th. bursa'tum*, *Thlaspi* seu *Capsell'a* seu *Ibe'ris* seu *Nasturtium* seu *Rod'schied'ia bur'sa pasto'ris*, *Bur'sa pasto'ris*, *Shepherd's purse*, *Co'covert*, *St. James's weat*, *Poor man's Parnacit'y*, (F.) *Fleur de St. Jacques*, *Bourse à berger* ou *à paster*, *Tabouret*. A common European plant, introduced into this country. It is slightly astringent, but is little used.

THLASPI BURSATUM, *Thlaspi bursa*—t. *Nasturtium*, *Lepidium sativum*—t. *Sativum*, *Lepidium sativum*.

THLIBIAS, (*θλιβιας*, from *θλιβω*, 'to crush,')

Eunuch.

THLIPSENCEPHALIA, see *Derecephalia*.

THLIPSENCEPHALUS, (*θλιψις*, 'compression,' and *εγκεφαλος*, 'the encephalon.')

A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital region, a distinct fontanelle not existing.

THLIP'SIS, (*θλιψις*), *Compres'sio*. Compression, and especially constriction of vessels by an external cause. Oppression.

THNESCOLOGIA, (*θνησκω*, 'to die,' and *λογος*, 'a discourse,')

Thanatology.

THNETOBLASTE, (*θνητος*, 'mortal,' and *βλαστος*, 'germ.')

A term proposed by M. Robin for the heteromorphous and anatomical element of the different tumours called 'cancerous.'

THNETOBLASTIQUE, Cancerous.

THOLUS, (*θολος*, 'a vaulted chamber,')

Achicou—t. Diocleus, Scapha.

THOMSONIAN. One who practises or believes in Thomsonianism.

THOMSONIANISM, *Thom'sonism*. A fanciful doctrine, of which a person of the name of Thomson, of New England, is the founder. One of its leading principles is, that the human body is composed of four elements [?], earth, air, fire, and water; and one of its apothegms, that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thomsonians are Botanical Doctors. See *Herb doctor*.

THORACENTESIS, *Thoracocentesis*.

THORACHIQUE, Thoracic.

THORAC'IC, *Thorac'icus*, (from *thorax*), (F.) *Thoracique* ou *Thorachique*. That which relates or belongs to the chest—as *Thoracic vis'cera*, &c.

THORACIC INFERIOR ARTERY, *Arte'ria Thorac'ica Exter'na Infe'rior* seu *Lon'ga* seu *Mamma'ria externa* seu *Thorac'ica infe'rior*, (F.) *Deuxi'eme des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the latter part of the thorax, and the serratus major anticus. It afterwards bends inwards, becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

THORACIC SUPERIOR ARTERY, *Arte'ria Thorac'ica Exter'na Super'ior*, (F.) *Artere thoracique supe'rieure*, *Premiere des Thoraciques* (Ch.), arises from the axillary artery or from the acromial, and descends forwards between the Pectoralis major

and P. minor, to which it distributes itself by a great number of branches. In some subjects there are two or three *Arteriae thoracicae externae superiores*.

**THORACIC DUCT, Ductus thoracicus** seu *thoracicus posterior* seu *vertebralis* seu *chyli* seu *lacteus* seu *rostrifer* seu *Pecqueti* seu *Pecquetianus*, *Vena alba thoracica*, *Alveus ampullaceus*, *Distributus*—*lactea thoracica*, *Gallæia*, *Duct* of *Pecquet*, *Alimentary Duct*, (F.) *Canal* ou *Conduit Thoracique* ou *de Pecquet*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli*, which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

**THORACIC LIMBS** are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

**THORACIC, LONG OR INFERIOR, Mammary inferior external artery.**

**THORACIC NERVES.** The *short* or *anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch; the former distributed to the pectoralis major muscle, the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thoracic nerve, Posterior thoracic, External respiratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

**THORACIC REGIONS** are the different regions of the chest. Thus we say, *anterior, lateral, and superior thoracic*, &c.

**THORACICA, (from thorax,) Pectorals.**

**THORACICS, FIRST OF THE, Mammary superior external artery.**

**THORACTIQUE, Thoracic.**

**THORACO, (from thorax.)** In composition, the thorax or chest.

**THORACOCENTE/SIS, Thoracente/sis, Thoracotomy, (thoraco, and κεντρεω, 'puncture.') Paracente/sis thoracica.** Perforation of the chest to evacuate contained fluid—as in empyema.

**THORACOCYSTIS, Thoracystis.**

**THORACODID'YMUS, (thoraco, and διδυμος, 'a twin.') A monstrosity in which twins are united by the thorax.**

**THORACODYNE, (thoraco, and οδυνη, 'pain,') Pleurodynia.**

**THORACODYNIA, Pleurodynia.**

**THORACOFACIAL, Platysma myoides.**

**THOR'ACOGASTRODID'YMUS, Did'ymus symphyothoracogostrius, Xiphodid'ymus, (thoraco, γαστηρ, 'the belly,' and διδυμος, 'a twin.') A monstrosity in which twins are united by the chest and abdomen.**

**THORACO-MAXILLO-FACIAL, Platysma myoides.**

**THORACOMETER, (thoraco, and μετρον, 'measure,') Stethometer.**

**THORACOMYODYNIA, (thoraco, and μυοδυνια,) Pleurodynia.**

**THORACOPATHIA, (thoraco, and παθος, 'disease,') Disease or suffering in the chest.**

**THORACOSCOPIA, (thoraco, and σκοπεω, 'to inspect,') see Auscultation.**

**THORACOSCOPIUM, Stethoscope.**

**THORACOTOMY, (thoraco, and τομω, 'to cut,') Thoracocentesis.**

**THORACYST'IS, Thoracocyst'is, (thorax, and κυστις, 'a bladder,') Encysted dropsy of the chest. Hydatis in the chest.**

**THOR'AX, gen. Thorac'is, (θωραξ, gen. θωρακος, 'a cuirass, a coat of mail,') Cith'arus, Ven'ter me'dius, Pec'tus, Ste'thus, Scutu'm pec'toris, Bir, Che'lys, Cas'sa, the Breast, the Chest, (F.) Poi'trine.** One of the splanchnic cavities, *Ca'vum thorac'is*, bounded, posteriorly, by the vertebrae; laterally, by the ribs and scapula; anteriorly, by the sternum; and above, by the clavie; and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation,—the lungs and the heart

**THORAX, Corset.**

**THORE, (Σπρ.) Sperm.**

**THORN APPLE, Datura stramonium—t. Red, Datura Sanguinea.**

**THOROUGHSTEM, Eupatorium perfoliatum.**

**THOROUGHWAX, Eupatorium perfoliatum.**

**THOROUGHWORT, Eupatorium perfoliatum.**

**THOROW-WAX, Bupleurum rotundifolium.**

**THORULUS STRAMINEUS, 'a straw pad,' Fanon.**

**THRÆNINE, ([G.] Thräne, 'a tear,') see Tears.**

**THREADWORM, Draunculus—t. Long, Trichocephalus.**

**THREPSIS, (Σρεψις, from τρεφω, 'to nourish,') Assimilation, Nutrition.**

**THREPSOL'OGY, Threpsolog'ia, (threpsis, and λογος, 'a description,') The doctrine of, or a treatise on, the nutrition of organized bodies.**

**THRIDACE, (from thridox,) Lactuearium.**

**THRIDACINE, (Σριδακη,) Lactuca.**

**THRIDAX, gen. Thri'dacis, (Σριδαξ, gen. Σριδακος,) Lactuca.**

**THRIFT, AMERICAN, Statice Caroliniana—t. Lavender, Statice limonium—t. Sea Side, Statice Caroliniana.**

**THRIN, (Σριξ, gen. θρικος,) Capillus, Hair.**

**THROAT, (θροτε, θροτα,) Jugulum interstit'ium, Jugula'rë, Gut'ter, Spha'gë, (Prov.) Choker, Droat, House, Hose, (Sc.) Halse, Haase, Witter. The anterior part of the neck. (F.) Gorge. Also, the pharynx.**

**THROATROOT, Geum Virginianum, Liatri.**

**THROATWORT, Campanula trachelium.**

**THROB'BING, Pulsati'vus, Sphyg'micus, Sphygmo'des, Pul'satory, (F.) Pulsatif. A throbbing pain, (Prov.) Stang, (F.) Douleur pulsative, is a kind of pain which is, or seems to be, caused or augmented by the pulsation of arteries.**

**THROE, (from [Sax.] θροopian, 'to suffer,') Agony, Pains, labour.**

**THROMBI LACTEI, (pl. of thrombus,) Infarctus mammae lacteus.**

**THROMBOCYST'IS, (thrombus, and κυστις, 'a cyst,') The cyst occasionally surrounding a clot of blood—as in encephalic hemorrhage.**

**THROMBOSIS, (θρομβωσις, from thrombus, and οσις,) Coagulation. Applied especially to coagulation of blood in a blood-vessel.**

**THROMBUS, (θρομβος, 'a clot,') Hæmato'ma.** A small, hard, round, bluish tumour, formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-letting. The thrombus is most commonly owing to the opening of the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Com-

presses, dipped in salt water, camphorated spirit, and slight compression, usually disperse it. See Blood.

THROMBUS NEONATORUM, Cephalæmatoma.

THROPILL, Trachea.

THROPPLE, Trachea.

THROTTLE, (dim. of *throat*), Trachea.

THROW, (from [Sax.] *þrōþian*, 'to suffer,') Agony, Pains, labour.

THROWORT, Leonurus cardiaca.

THRUSH, Aphthæ — t. Milk, Aphthæ — t. White, Aphthæ.

THRUSTY, Dipsodes.

THRYPSIS, (*θρυψις*, from *θρυπω*, 'to break in pieces,') Communion.

THUJA OCCIDENTALIS, *Thuja occidentalis*.

THUMB, ([Sax.] *þuma*), Pollex.

THUREA, (from *thus*), *Juniperus lycia* — t. *Virga Juniperus lycia*.

THUS, gen. *Thuris*, (from *θω*, 'to burn perfumes,') see *Pinus abies* — t. *Fœcinium*, see *Pinus abies* — t. *Judeorum*, *Croton cascarilla*, *Styrax*, *Thymiana* — t. *Libanotos*, *Juniperus lycia* — t. *Masculum*, *Juniperus lycia* — t. *Verum*, *Juniperus lycia* — t. *Vulgare*, see *Pinus abies*.

THUYA APHYLLA, (*θυσ*, 'incense,') see *Sandarac*.

THUYA (*θυσ*, from *θυσ*, 'incense') seu *THYJA OCCIDENTALIS*, *T. obtusa*, *Cupressus Arbor Vitæ*, *American Arbor Vitæ*, *Tree of Life*. *Ord. Coniferæ*. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYLACIÏTIS, (*θυλακίου*, 'a small sac, and *itis*), *Gutta rosea*.

THYM, *Thymus*.

THYMA, gen. *Thymatis*, *Ecthyma*, *Thymion*.

THYMASTHMA, gen. *Thymasth'matis*, *Asthma thymicum*.

THYMBRA, (*θυμβρα*), *Satureia hortensis* — t. *Hispanica*, *Thymus mastichina*.

THYME, *Thymus* — t. *Cat*, *Teucrium Marum* — t. *Common*, *Thymus* — t. *Garden*, *Thymus* — t. *Lemon*, see *Thymus serpyllum* — t. *Mother of Thymus serpyllum* — t. *Virginia*, *Pycnanthemum limifolium* — t. *Wild*, *Thymus serpyllum*.

THYMELEA, (*θυσ*, 'thyme, and *ελαια*, 'the olive tree,') *Daphne gnidium* — t. *Laureola*, *Daphne laureola* — t. *Mezerium*, *Daphne mezereum* — t. *Monspeliana*, *Daphne gnidium*.

THYMELCO'SIS, (*thymus*, and *ελκος*, 'an ulcer,') *Ulceration of the thymus gland*.

THYMIAMA, gen. *Thymia'matis*, (*θυμαμα*, from *θω*, 'to burn perfumes,') 'a perfume,') *Thus Judæorum*, *Muskeod*, (F.) *Narcaphthe*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax. See *Lacaphthon*, and *Narcaphthon*.

THYMIAMA, *Fumigation*, *Suffimentum*.

THYMIASIOTECHNIA, (*thymiasis*, and *τεχνη*, 'art,') *Thymiatechny*.

THYMIASIS, (*θυμιασις*), *Fumigation*.

THYMIATECH'NY, *Thymiatechnia*, *Thymiasiotekhnia*, *Classe fumigato'ria*, (*θυμαμα*, 'a perfume, and *τεχνη*, 'art,') The art of employing perfumes in medicine.

THYMIC, *Thymicus*, (F.) *Thymique*. Having relation to the thymus, as "thymic asthma."

THYMION, (*θυμιον*), *Thy'ma*, *Thy'mus*, *Por'rus*, *Por'rus*, *Verru'ca rhagō'lea*, *Verru'ca mi'nor*, (from *θυσ*, 'thyme,') A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, (from *thymion*), *Framboesia* — t. *Indica*, *Framboesia*.

THYMIQUE, *Thymic*.

THYMITES, (*θυμιτης*), Wine impregnated with thyme.

THYMITIS, (*θυμος*, 'thymus, and *itis*), *Inflammation of the thymus gland*.

THYMOPATHIA, *Psychopathia*, (*θυμος*, 'the mind, and *παθος*, 'affection,') A disease of the mind.

THYMOS, (*θυμος*), *Rage*, *Thymus*,

THYMOXAL'ME, (*θυμος*, 'thyme, *οξυς*, 'acid, and *αλς*, 'salt,') A compound of thyme, vinegar, and salt.

THYMUM, *Thymus*.

THYMUS, (*θυμος*), *Gland'ula Thy'mus*, *Cor'pus Thymia'num* seu *Thy'micum*, *Gland'idium*, *Thy'mus gland*, *Cor'pus incomprehensib'il'e* of Joseph Frank, — *Sweet'bread* of the butcher. An organ, concerned in hæmatisis, which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fetus, it is very large, and contains in a central cavity — *reservoir of the thymus* — a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thy'mic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, (*θυμος*), *Thy'mum*, *T. vulga'ris* seu *tenuifolius* seu *horten'sis*, *Common or Garden Thyme*, (F.) *Thym*, *T. ordinaire*, *Parigoue*. *Ord. Labiatae*. *Sec. Syst. Didynamia Gymnosperma*. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used. The volatile oil, *O'leum Thy'mi*, *Oil of Thyme*, is official in the Pharmacopœia of the United States.

THYMUS, (*θυμος*), *Psyche*, *Satureia capitata*, *Thymion* — t. *Calaminthus*, *Melissa calamintha* — t. *Capitata*, *Satureia capitata* — t. *Ciliatus*, *T. mastichina* — t. *Creticus*, *Satureia crepitata* — t. *Hortensis*, *Thymus* — t. *Includens*, *T. serpyllum*.

THYMUS MASTICH'NA, *T. Ciliatus*, *Ma'rum vulga're*, *Olinopod'ia*, *Mastich'na Gallo'rum*, *Thym'bra Hispan'ica*, *Ja'ca In'dica*, *Common herb Mastich*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*, but it is said to be less powerful.

THYMUS MULTIFLORUS, *Melissa nepeta* — t. *Nepeta*, *Melissa nepeta*.

THYMUS, RESERVOIR OF THE, see *Thymus*.

THYMUS SERPYLLUM, *T. includens*, *Heryp'los*, *Heryp'los*, *Serpyllum*, *Serpillum*, *Serpillum*, *Gila'rum*, *Serpyllum vulga're mi'nus*, *Moth'er of Thyme*, *Wild Thyme*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder and rather more grateful flavour. *Lem'on Thyme*, *Serpyllum citra'dum*, is merely a variety of *Thymus Serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVATICUS, *Clinopodium vulgare* — t. *Sylvestris*, *Satureia capitata* — t. *Tenuifolius*, *Thymus* — t. *Vulgaris*, *Thymus*.

THYREMPHRAXIS, (*thyreo*, and *ἀφραξις*, 'obstruction,') *Bronchocele*.

THYREO, *Thyro*, (from *θυρεος*, 'a shield,') in composition, the thyroid cartilage or gland.

THYREOÄDENTIS, *Thyreitis*.

THYREOÄRYTENOID, *Thyroärytenoideus*, or *Thyroärytenoides*. That which relates to the thyroid and arytenoid cartilages.

THYREOÄRYTENOID LIG'AMENTS, *Infe'rior Lig'aments of the Lar'ynx*, *Lips of the Glottis*, *Vocal*

**Cords**, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

**THYREOÄRYTENOID MUSCLES**, *Thyreoärytenoïdes*, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreöarytenoïdeus obliquus* to a portion of the *arytenoïdeus* muscle.

**THYREOCELE**, (*thyreo*, and *κηλη*, 'a tumor,') Bronchocele.

**THYREOËPIGLOT'TIC**, *Thyreöepiglottide'us*, *Thyrepiplot'ticus*. Sabatier and Santorini have given this name to the outer portion of the thyroarytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

**THYREOHY'OID**, *Thyreohyoïde'us*, *Thyrohyoïdes*, *Thyrohy'oïd*, *Hyoëthyroë'des*. That which belongs or relates to the thyroid cartilage and os hyoides.

**THYREOHYOID**, **THYROHYOID**, or **HYOTHYROID MEMBRANE** is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage. The *lateral thyrohyoid ligaments* may be considered as the margins of the thyrohyoid membrane. They pass between the superior cornua of the thyroid cartilage to the extremities of the greater cornua of the os hyoides. A small cartilaginous or bony nodule—*cartila'go tritic'e'a*—is sometimes found in each.

**THYREOHYOÏDE'US** or *Hyothyroïde'us* Muscle is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage: to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx; or, it can depress the os hyoides.

**THYREOID**, *Thyroid*.

**THYREOÏDEUS**, *Thyroïdeal*.

**THYREOÏDIEN**, *Thyroïdeal*.

**THYREOÏTIS**, *Thyreöideni'tis*, *Thyreöidi'tis*, *Augi'na thyreöide'a*, (*thyreo*, and *itis*.) Inflammation of the thyroid gland.

**THYREONCUS**, (*thyreo*, and *σκος*, 'a tumor,') Bronchocele.

**THYREOPHARYNGEUS**, *Thyropharyngeus*.

**THYREOPHRAXIA**, (*thyreo*, and *φρασσα*, 'to obstruct,') Bronchocele.

**THYREPIGLOTTICUS**, *Thyreöepiglottic*.

**THYRO**, in composition, see *Thyreo*.

**THYROÄRYTENOID**, *Thyreöarytenoid*.

**THYROCELE**, (*thyro*, and *κηλη*, 'a tumour,') Bronchocele.

**THYROCICOPHARYNGEUS**, see *Cricopharyngeal*.

**THYROHYOID**, *Thyreohyoïd*.

**THYROPHARYNGOSTAPHYLINUS**, *Palatopharyngeus*.

**THYROID**, *Thyroid*, *Thyroïdes*, (*θυροειδης*, from *θυρα*, 'a gate or folding-door,' or from *θυρακος*, 'a shield,' and *ειδης*, 'form.')

That which has the shape of a folding-door.

**THYROID ARTERIES**, *Thyroïdeal arteries*—*t. Artery of Neubauer*, see *Thyroïdal arteries*.

**THYROID CARTILAGE**, *Cartila'go Scutiformis* seu *Scutalis* seu *Clypealis*, *Coöperto'rium*, *C. Pelta'lis* seu *pelta'tus*, *Scutum*, *Ada'mi Mor'sūs Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage*, *cornu superius seu longum*; and, below, by a less prominent eminence, the *lesser cornu*, *Cornu inferius seu brevè*; which is articulated with the cricoid.

**THYROID GLAND**, *Cor'pus Thyroïde'um*, *Glandula Thyroïdea*, (*F.*) *Gland* or *Cor'pus Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. They are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroïdeal*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

**THYROID'EAL** or *Thyroïde'al*, *Thyroïde'us*, *Thyroïde'us*, (*F.*) *Thyroïdien*, *Thyreödien*. That which concerns the thyroid gland or cartilage.

**THYROID'EAL**, or **THYROID ARTERIES** are two on each side. 1. The *superior Thyroïdeal*, *superior larynge'al*, *superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *cricothyroid*. 2. The *inferior Thyroïdeal*, *inferior guttural*, much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis uscendens*. The inferior thyroïdeal artery is occasionally replaced by the *Thyroid artery of Neubauer*, *Artery of Neubauer*, which arises directly from the curvature of the aorta.

**THYROID'EAL VEINS** are 1. A *superior thyroïdeal*, and several *middle thyroïdeal*, which open into the internal jugular vein. 2. An *inferior thyroïdeal*, much larger than the preceding, whose branches form—by anastomosing with those of the opposite side, in front of the trachea—a very remarkable venous plexus, which J. Cloquet calls the *inferiathyroïdeal plexus*. The inferior thyroïdeal veins open,—the left into the corresponding subclavian,—the right, into the vena cava superior.

**THYROIDIEN**, *Thyroïdeal*.

**THYROPHARYNGE'US**, *Thyropharynge'us*, *Valsalva*, *Morgagni*, *Santorini*, and *Winslow* have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilages.

**THYROPHARYNGEUS**, *Constrictor pharyngis*, see *Cricopharyngeal*.

**THYROPHRAXIA**, (*thyro*, and *φρασσα*, 'to obstruct,') Bronchocele.

**THYSUS**, (*θυρος*,) *Penis*.

**THYSSELINUM**, *Peucedanum palustre*—*t. Palustre*, *Peucedanum palustre*.

TIARELLA CORDIFOLIA, (dim. of *tiara*, *tiara*, 'the turban of the Persian sovereigns; from the form of the capsules,) *Coolcott*. A tonic and diuretic.

**TIBI-PÉRONÉO-TARSIEN**, *Peronæus* longus.

**TIBIA**, 'a flute or pipe,' *Cne'mè*, *Procnemium*, *Fo'cèle ma'jus*, *Arun'do cru Can'ua ma'jor*, *Can'ua ma'jor* seu *domestica eru'ris*, *Shin'bone*. The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior* or *fem'oral extrem'ity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities* of the *Tibia*, or *Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia*, which are articulated with the condyles of the *Os femoris*. 2. An *inferior* or *tar'sal extrem'ity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine* or *crest* of the *tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

**TIBIA MINIMA**, Fibula.

**TIBIAD**, see *Tibial aspect*.

**TIBIÆUS**, Tibial.

**TIBIAL**, *Tibial'is*, *Tibiæ'us*, (F.) *Tib'ial*, *Jambier*. (From *tibia*.) That which relates to the tibia or to the leg.

**TIBIAL APONEUROSIS**, (F.) *Aponévrose Jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

**TIBIAL ARTERIES** are two in number. 1. *Arteria Tibialis Antica*, which arises from the popliteal, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tar'si*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished—the *Tibialis recurvens*, *A. malleolaris interna*, and *A. malleolaris externa*. 2. *A. Tibialis postica*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches—the *Plantar arteries*.

**TIBIAL ASPECT**. An aspect towards the side on which the tibia is situated.—(Barclay.) *Tibiad* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

**TIBIAL NERVES** are two in number. 1. The *anterior tibial nerve*, *Prétibio-sus-plantaire*, (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria

tibialis antica. 2. The *posterior tibial nerve*, *Branche tibiale du nerf fémoro-poplitée* (Ch.), is the internal popliteal.

**TIBIAL VEINS**, ANTERIOR AND POSTERIOR, have the same arrangement as the arteries which they accompany.

**TIBIALIS ANTI'CUS**, *Cate'næ musculus*, (F.) *Tibio-sus-métatarsien*, *Tibio-sus-tarsien* (Ch.), *Jambier antérieur*. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its points inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

**TIBIALIS GRACILIS**, Plantar muscle.

**TIBIALIS POSTI'CUS**, (F.) *Tibio-tarsien*, *Tibio-sus-tarsien* (Ch.), *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

**TIBIO-CALCANIEN**, Soleus—*t. Phalangetien*, *Flexor longus digitorum pedis profundus perforans*—*t. Sous-tarsien*, *Tibialis anticus*—*t. Sus-métatarsien*, *Tibialis anticus*—*t. Sus-tarsien*, *Tibialis anticus*.

**TIBIOTARSAL**, *Tibiotar'seus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

**TIBIOTARSAL ARTICULATION** is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

**TIBIO-TARSIEN**, *Tibialis posticus*.

**TIC**, (from [Sax.] *teogan*, [G.] *ziehen*, 'to draw,') *Twitch'ing*, *Vellic'tion*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called *Tic convulsif* or *Tic non douloureux*, *Histronic Spasm of the Face*, *Spasmes facia'lis*, to distinguish it from *Tic douloureux* or *neur'al'gia fac'iei*, and has been termed a *par'tial chore'a* or form of *chron'ic chore'a*, *Chore'a fac'iei*.

**TIC DOULEUREUX**, 'painful tic,' Neuralgia, facial—*t. non douloureux*, see *Tic*.

**TICK**, ([F.] *Tique*, [G.] *Z e c k e*), *Ixodes ricinus*—*t. Wood*, *Ixodes ricinus*.

**TICKLE WEED**, *Veratrum viride*.

**TICK'LING**, ([L.] *titillare*, [Sax.] *rinklan*, 'to tickle,') (Sc.) *Kit'tling*, *Kit'tling*, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titilla'tio*, *titilla'tion*;) at others, the sensation produced by this action (*pruri'tus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypochondriac regions.

**TICKSEED SUNFLOWER**, *Coreopsis trichosperma*.

**TICKWEED**, *Hedeoma*—*t. Sunflower*, *Coreopsis trichosperma*.

**TICOREA FEBRIFUGA**; a Brazilian plant,

*Order*, Rutaceæ, the bark of which is intensely bitter, astringent and antiperiodic.

**TICOREA JASMINIFLORA.** A decoction of the leaves is said to be drunk by the Brazilians as a cure for frambœsia.

**TIDAL AIR**, (from *tide*), see Respiration.

**TIERCE**, ([L.] *tertius*, 'third,') see Tertian.

**TIGALA**, Saccharum.

**TIGE** ('a stalk') **PITUITAIRE**, Infundibulum of the brain — *t. Sus-sphœnoïdale*, Infundibulum of the brain.

**TIGLIA** SEU **TIGLII GRANA**, see Croton Tiglium.

**TIGRETIER**, see Mania, dancing.

**TIKIMMA**, *Caconcia coccinea*.

**TILBURY**, MINERAL WATERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

**TILIA**, *T. Europœa* seu *grandiflora* seu *cordifolia* seu *pauciflora* seu *plataphylla*, (akin to *πτελέα*, 'the elm tree,') *Phyl. yra*. The *Lime*, *Lind*, or *Linden tree*, (F.) *Tilleul*. *Ord.* Tiliacæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

**TILIA AMERICANA.** *T. glabra* seu *Canadensis*, *Linden*, *Linn*, *Bass'wood*, *White'wood*, *Spoon'wood*. A mucilage prepared by macerating the inner bark in cold water, has been applied to burns. It may be made into a cataplasm by thickening it with bran.

**TILIA CANADENSIS**, *T. Americana* — *t. Glabra*, *T. Americana*.

**TILLEUL**, *Tilia*.

**TILLICHERRY CORTEX**, *Nerium* antidy-sentericum.

**TILMA**, gen. *Til'matis*, (*τίλμα*, from *τίλλω*, 'to pluck,') Lintum.

**TILMUS**, (*τίλλμος*), *Carphologia*, *Evlusion*.

**TILY**, OF THE INDIANS, *Viburnum* dentatum.

**TIMAC**. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

**TIMBRE** (F.), 'the sound of a bell, (*τυμβαων*, from *τυπώω*, 'to strike' [?].) The quality of sound by which one voice, or one instrument, can be distinguished from another when producing the same note.

**TIMIDUS**, *Rectus inferior oculi*.

**TIN**, ([Sax.] *tin*), *Stannum*, *Cassiterus*, *Cattiterius*, *Jupiter*, *Stu'piter*, *La'os*, *Plum'bum al'bum* seu *can'didum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291; giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose,  $\mathfrak{zj}$  of the *Pulvis Stanni*, *Stannum granulat'um* or *Granular tin*, in molasses. (This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.)

**TIN**, BUTTER OF, Tin, muriate of — *t. Chloruret* of, Tin, muriate of — *t. Deutohydrochlorate* of, *T. muriate* of.

**TINFOIL**, *Stannum foliat'um*, *Stanni'olum*, is used for plugging carious teeth, &c.

**TIN GLASS**, Bismuth.

**TIN**, GRANULAR, see Tin — *t. Muriate* of, superoxygenated, *T. muriate* of.

**TIN**, MURIATE OF, *Fu'ming liq'or of Liba'vius*, *Mul'rias Stanni* seu *Oryd'uli Stanni*, *Stanni chloridum*, *Stannum chlorat'um* seu *muriat'icum*, *Salt of Tin*, *Butter*, *Chloride* or *Deutohydrochlorate* or *Superoxygenated Muriate of Tin*, (F.) *Sel d'Étain*. (This is formed of tin, one part; concentrated muriatic acid, three parts. To be crystallized by the aid of heat.) A violent cathartic. Dose, gr. ij or iij.

**TIN**, SALT OF, Tin, Muriate of.

**TIN**, SULPHURET OF, *Aurum musivum*.

**TINAGMUS**, (*τυναγμος*), *Concussio*.

**TINASMUS**, *Tenesmus*.

**TINCTU'RA**, (from *tingere*, *tinctum*, 'to dye,')

*Tincture*, *Essen'tia*, (F.) *Teinture Alcoolique*, *Alcoolé*, *Alcohol*, *Alcoolature*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence*, in one of its old significations; and with the *Alcoolat'um* of the *Code'x* of Paris. It is not unusual, however, to speak of *a'queous tincture*, *ethe'ral tincture* (*Éthérolature*, Béral), &c. Tinctures are usually made either with pure alcohol or proof spirit. The former are precipitated by water; and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.

**TINCTURA ABSINTHII COMPOSITA**, *Essen'tia absinthii compos'ita* seu *ama'ra*, *Con'found Tincture* of *worm'wood*. (*Absinth.*, *Artem. pontic.*, *Caryoph.*  $\mathfrak{aa}$   $\mathfrak{zss}$ . *Sacch.*  $\mathfrak{zij}$ , *Alcohol*. *Oss.* Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose,  $\mathfrak{fzj}$  to  $\mathfrak{fzss}$ .

**TINCTURA ACACIE CATECHU**, *T. catechu* — *t. Acetatis ferri cum alcohole*, see *T. ferri acetatis* — *t. Acidi sulphurici*, *Sulphuricum acidum aromaticum*.

**TINCTURA ACONITI**, (Ph. U. S. 1842.) *Tinctura Aconiti foliorum*, (Ph. U. S. 1851.) *T. A. Folii*, (Ph. U. S. 1863.) *Tincture of Aconite*, (*Aconit. folior.*  $\mathfrak{ziv}$ , *Alcohol. dilut.* *Oij.* Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose,  $\mathfrak{gtt. xx}$  or  $\mathfrak{xxx}$ . It is rubbed on the seat of neuralgia.

**TINCTURA ACONITI RADICIS**, *Tincture of Aconite root*, (*Aconit. radicis contus.*  $\mathfrak{ij}$ , *Alcohol. Oij.* Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

**TINCTURA ÆTHÆREA CAMPHORATA**, *Solutio cam'phoræ æthæ'rae*, *Liquor uerri'nus Bang'ii*, *Spiritus sulphurico-æthericus camphorat'us*, *Naph'tha vitri'oli camphorata*. (*Cum'phor.* p. i. *Æther sulphuric.* p. ii.) Stimulant in atonic diseases, arthritic cardialgia, and spasm. Dose, 20 to 30 drops in white wine.

**TINCTURA ÆTHÆREA FERRI**, *Alcohol* (seu *Tinctura*) *sulphurico-æthericus ferri* — *t. Alcoholicæ Chinæ composita*, *T. cinchonæ composita* — *t. Alcoholicæ corticum aurantiorum Whyttii*, *Tinctura cinchonæ amara* — *t. Alexipharmaca Huxhami*, *Tinctura cinchonæ composita*.

**TINCTURA AL'OEÏS**, *T. Al'oëis Sacotori'næ*, *Essen'tia Aloes*, *Al'cohol cum Al'oë perfoliatâ*, *Tincture of Aloes*. (*Aloes*, pulv.  $\mathfrak{zj}$ . *Ext. glycyrrh.*  $\mathfrak{zij}$ , *Aque Oiss*, *Alcohol. Oss.* Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloes. Dose,  $\mathfrak{fzss}$  to  $\mathfrak{fziss}$ .

**TINCTURA AL'OEÏS ÆTHÆ'RAE**, *T. Aloës vitriolata*, *Æthé'ral Tincture of Aloes*. (*Aloes Sacot.*, *Myrrh.*,  $\mathfrak{aa}$   $\mathfrak{ziss}$ , *Croci*  $\mathfrak{zj}$ , *Sp. ætheric sulph. Oj.* Digest the myrrh in the ether for 4 days; then

add the aloes and saffron. *Ph. E.*) Stimulant and cathartic. Dose, fʒi to fʒij.

TINCTURA AL'ŒS COMPOSITA, *Elix'ir Proprietas'is seu Proprietas'is Paracel'si seu aperitivum seu Al'œs, Tinctura Al'œs cum Myrr'hâ seu Aloës et Myrr'hæ* (Ph. U. S.) seu *Al'œs et Myrr'hæ crocata, Elix'ir of long-life, Compound Tincture of Al'œs, (F.) Elix'ir de longue vie, Baume de vie de Lelivère, (Aloës, in pulv., ʒij, Croci, ʒi, Tinct. Myrr'hæ, Oij. Macerate for 14 days, and filter.)* Purgative and stomachic. Dose, fʒj to fʒij.

*Bær'haare's Elix'ir* consisted of aloes, myrrh, saffron, and tartre of potassa, digested in alcohol and water.

*Rad'cliffe's Elix'ir* is formed of *Aloes socotr. ʒvj, Cort. cinnam., Rad. zedoar. ʒā ʒss, Rad. rhei ʒij, cocciell. ʒss, Syrup. rhamni ʒij, Sp. tenuior. Oj. Aqua puræ fʒv.*

TINCTURA ALOES ET MYRRHÆ, T. aloes composita — t. Aloes et myrrhæ crocata, T. A. composita — t. Aloes vitriolata, T. A. ætherea — t. Amara, T. gentianæ composita — t. Ammoniac composita, Spiritus ammoniac succinatus — t. Amomi repentis, T. cardamomi — t. Amomi zingiberis, T. zingiberis.

TINCTURA ANGSTURÆ, *T. Cuspariæ, Tincture of Angustura. (Cort. cuspar. in pulv. crass. redact. ʒij, Sp. vin. teu. Oij. Digest. Ph. D.)* Dose, fʒj to fʒij.

TINCTURA ANTIFEBRILIS WARBURGI, see Bebeereu.

TINCTURA ANTIODONTALGICA, *Tooth'ach Tincture, (Tannin. ʒj, Mustich. gr. v. Ether. ʒij. M.)* To be applied on cotton wool to the tooth previously dried.

TINCTURA ARISTOLOCHÆ SERPENTARIÆ, T. serpentariæ.

TINCTURA AR'NICÆ, *Tincture of Ar'nica. (Arnica. ʒvj; Alcohol. Oiss; Aq. Oss; Alcohol. dilut. q. s. Mix the alcohol and water, and bruise the arnica, slightly moistened with the mixture, thoroughly in a mortar; pack it firmly in a percolator and pour on first the remainder of the mixture, and then sufficient Diluted Alcohol to measure two pints. Ph. U. S. 1863.)* Dose, gtt. v. to x. Applied, diluted with an equal proportion of water, by means of lint, as an excitant to bruises, and in cases of neuralgia. *Tinctura Arnicæ* of the British Pharmacopœia (1864), made by percolation, from the root — the U. S. preparation, being from the flowers — is much weaker.

TINCTURA AROMATICA, T. cinnamomi composita — t. Aromatica ammoniata, Spiritus ammoniac aromaticus.

TINCTURA ASSAFETIDÆ, *T. Ferulæ Assafetide, T. fetida seu assafetide, Tincture of Assafetida. (Assafetid. ʒiv, Alcohol. Oij. Macerate for 14 days and filter. Ph. D.)* Dose, gtt. xv to fʒj.

TINCTURA ASSAFETIDÆ AMMONIATA, Spiritus Ammoniac foetilis.

TINCTURA ACRAX'TIL, *T. Cor'ticis Aurantii, Tincture of Or'ange Peel. (Aurant. cort. recent. ʒij, Sp. rect. Oij. Digest for 14 days.)* Stomachic. Used as an adjunct to stomachic draughts. Dose, fʒss to fʒij.

TINCTURA AUREA, Alcohol (seu tinctura) sulphureoæthereus ferri.

TINCTURA BELLADONNÆ, *Tincture of Belladonna. (Belladonnæ, ʒiv, Alcohol. dilut. Oij. Macerate for 14 days; express, and filter through paper. It may, also, be prepared by displacement. Ph. U. S.)* Dose, gtt. xv to xxx.

*Tinctura Belladonnæ* of the British Pharmacopœia (1864), made by percolation, is half the strength of the above.

TINCTURA BENZOINI COMPOSITA, *T. Benzoi's composita, Balsamum Catholicum seu Per'sicum seu traumaticum, Elix'ir traumaticum, Balsamum Commendato'ris, Compound Tincture of Benzoin,*

*Friar's or Ver'vain's Bal'sam, Wade's or Jes'uit's drops, Commander's or Wound Balsam, Balsam for Cuts. (Benzoin. ʒij, Styroc. purif. ʒij, Balsam. tolu. ʒj, Aloes, in pulv. ʒss, Alcohol. Oij. Macerate for 14 days and filter. Ph. U. S.)* Stimulant. Used chiefly to wounds and ulcers.

The basis of *Tur'lington's Bal'sam of Life, Tur'lington's Bal'sam*, is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy: — *Alcohol. Ovij, Benzoin. ʒxij, Styroc. liquid. ʒiv, Aloes Socotrin. ʒj, Balsam. Peruvic. ʒij, Myrrhæ. ʒj, Rad. Angelic. ʒss, Balsam. Tolut., Ext. Glycyrrh. ʒā ʒiv. Digest for 10 days, and strain.*

The *Ess'ence of Colts'foot* consists of equal parts of the Compound Tincture of Benzoin and Balsam of Tolu, to which is added double the quantity of Rectified Spirit of Wine. It is sold as a pectoral.

TINCTURA BUCH'N, *T. Buchu, T. Bucco, Tincture of Buchu. (Buchu. ʒv, Alcohol dilut. Oij. (Imp. meas.))* Digest for seven days and filter. It may be made, also, by percolation. *Ph. E.*) Dose, fʒj to fʒiv. See Diosma.

TINCTURA BECKE, Tinctura Buchu.

TINCTURA CALUM'BE, (Ph. U. S. 1863.) *T. Colum'be seu Colum'be (Ph. U. S. 1851), Tincture of Colum'bo, Colum'bo Bitter, (Calumb. rad. cont. ʒiv, Alcohol. dilut. Oij. Macerate for 14 days; express, and filter. Ph. U. S.)* Dose, fʒss to fʒiv. It may, also, be made by displacement.

TINCTURA CAMPHORÆ, Spiritus camphoræ.

TINCTURA CAMPHORÆ COMPOSITA, *T. Opii Camphorata (Ph. U. S.), T. Camphoræ cum o'pio, Compound Tincture of Camphorated Tincture of O'pium, Elix'ir Paregoric'um, Paregoric' Elix'ir (Opii, in pulv., Acid. Benzoiæ. ʒā ʒi, Ol. anisi, fʒj, Mellis despumat. ʒij, Camphor. ʒij, Alcohol. dilut. Oij. Macerate for 14 days, and filter through paper. Ph. U. S.)* One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, fʒj to fʒij.

*Squire's Elix'ir*, an empirical carminative preparation, is thus made, according to one formula. (*Opii. ʒiv, Camphor. ʒj, Cocciell. ʒj, Femicul. dulc. ʒij, Tinct. serpent. Oj, Sp. anisi. cong. ij, Aquæ, Oij, Auri musci. ʒvj.*)

TINCTURA CAN'NABIS INDICÆ, *Tincture of Indian Hemp. (Ext. Cannab. purif. ʒvj; Alcohol. Oj. Dissolve. Ph. U. S.)* Dose, about 40 drops.

TINCTURA CANTHAR'IDIS, *T. C. Vesicato'ris, T. Ly'tæ seu Mel'œs vesicato'ris, Tincture of Canthar'idies, Tincture of Blister'ing Flies, T. of Span'ish Flies, (F.) Tincture rubéscante. (Cantharid. pulv. ʒj, Alcohol. dilut. Oij. Macerate for 14 days; express, and filter. It may also, be prepared by displacement. Ph. U. S.)* Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x—xx.

*Matthews's Injec'tion*, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute Tincture of Cantharides.

TINCTURA CAP'SICÆ, *Tincture of Capsicum or Cayenne' Pepp'er. (Capsic. ʒj, Alcohol. dil. Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement. Ph. U. S.)* Stimulant. Dose, fʒss to fʒj.

TINCTURA CARDAMO'MI, *T. Amomi repentis, Tincture of Cardamoms. (Cardam. cont. ʒiv, Alcohol. dilut. Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement. Ph. U. S.)* Use, the same as the seeds. Dose, fʒj to fʒiv.

*Sol'omon's Balm of Gil'ead*, an empirical preparation, seems to be an aromatic tincture, — of which Cardamoms form a leading ingredient, — made with brandy. Some affirm that it contains cantharides.

TINCTURA CARDAMO'MI COMPOSITA, *Tinctura Stomach'ica, Compound Tincture of Cardamoms,*

*Stomach Tincture.* *Carduum.* cont. ʒvj. *Card.* cont. ʒv. *Cardum.* cont. ʒv. *Uva passu* de mptis acinis. ʒv. *Card.* cont. ʒv. *Alcohol. dilut.* Ojss. Macerate for 14 days; express and filter. Ph. U. S. Prepared, also, by displacement.) Stomachic and carminative. Dose, fʒj to fʒiv.

TINCTURA CARMINATIVA SYL VII. *Almondatum Carminativum Sylicum.* *Carminativa* *Elizir* of *Syl'vium.* (*Rod. anglic.* 4 p., *Rod. imperator.* *Galang.* 22 6 p., *Fol. cammaria.* *Majoran.* *Ruta.* *Basilic.* 22 48 p., *Buccar. laur. nobil.* 12 p., *Sena. angelic.* *Liquat. limet.* *Anis.* 22 16 p., *Zingib.* *Nuc. moschat.* 22 6 p., *Cinnamon.* 12 p., *Caryoph.* *Co. l. limon.* 22 4 p. Add *Alcohol.* 1200 p. Macerate and distil, 1200 p. Ph. L.) A warm stomachic, carminative, &c. Dose, fʒss to fʒss.

TINCTURA CASCARILLÆ. *T. Croc'ni Eleutheria.* *Alcohol* cum *Croc'ni* *Cascarilla.* *Tincture* of *Cascarilla.* (*Cascarill.* cont. cont. ʒiv, *Sp. ten.* Oj. Ph. L.) Dose, fʒj to fʒv.

TINCTURA CASTOREI. *T. Castorei Ros'ici* seu *Castorei Cassia'nis.* *Essentia* *Castorei.* *Alcohol* *castoreum.* *Tincture* of *Castor.* (*Castor.* cont. ʒij. *Alcohol.* Oj. Macerate for 7 days, express, and filter. Ph. U. S.) Tonic and antispasmodic. Dose, gr. xx to fʒj, or more.

TINCTURA CASTOREI COMPOSITA. *T. C. ammoniata.* *Compound Tincture* of *Castor.* (*Cast.* ʒij. *Amofrid.* ʒss. *Alcohol.* ammoniat. Oj. Ph. E.) Antispasmodic. Dose, fʒj to fʒiv. Called, also, *Elizir fixidum.* *Tinctura castorei fixatida* seu *fixida ammoniata.*

TINCTURA CAT'ECHE. *Tinctura* *Japonica* seu *Mimosa* *Catechu* seu *Acacia* *Catechu.* *Tincture* of *Catechu.* (*Carob.* ʒij. *Cinnamon.* contas. ʒij. *Alcohol.* dilut. Oj. Macerate for 14 days, express and filter. Ph. U. S. Prepared also by displacement.) Astringent. Dose, fʒj to fʒij.

The *Compound Solution of Char coal*, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CHIRETIÆ. *T. Chirata* (Ph. B. 1864). *Tincture* of *Chiretia.* (*Chireti.* cont. ʒv. *Avioid.* *Alcohol.* dilut. Oj. (Imp. meas.) Macerate for 14 days. Ph. D.) Dose, fʒj, or fʒij, as a tonic.

TINCTURA CUCULÆ. *T. conii maculati.*

TINCTURA CINCHONÆ. *T. Corticis Peruviana* *Simplex* seu *Cort. Peruviana.* *Tincture* of *Cinchona* or of *Bark.* (*Cinchon. flor.* in pulv. ʒvj. *Alcohol.* dilut. Oj. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. Ph. U. S.) Dose, fʒj to fʒiv, or more.

TINCTURA CINCHONÆ ÆTHËREA COMPOSITA. *T. K'na* *K'na* *arbores* *composita.* *Elizirium* *Antisepticum* *Ductoria* *Chauvier.* *Chauvier's* *Antiseptic* *Elizir.* (*Cinchon. officin.* ʒij. *Cascarill.* ʒss. *Cinnamon.* ʒij. *Croc.* ʒss. *Sacch.* alb. ʒxxxvij. Put these bruised into a matrass, and add *Vin. alb. Hispanic.* vel *Vin. muscat.* *Alcohol.* 22 Oj. Macerate for two days, and add *Sulphuric ether.* fʒss. Ph. P.) Tonic, stimulant, and antiseptic. Dose, fʒss to fʒij.

TINCTURA CINCHONÆ AMA'RA seu *alcoholica corticum aurantiarum* *Wag'itii* seu *Kinb'na* *amar.* *Elizir* *antihypochondriacum* seu *rod'iana* *Wag'itii* seu *Wag'itii* seu *stomachicum* *spirituum.* *Essentia* *Corticis* *Peruviana* *Composita.* (*Cinch.* p. vij. *Gentian.* *Rod.* *Cort. Aurant.* p. iij. *Alcohol.* 1200) 96 p. Digest. Dose, one or two teaspoonfuls.

TINCTURA CINCHONÆ AMMONIATA. *T. Corticis* *Peruviana* *relatilis.* *Ammoniated* or *Foliatile* *Tincture* of *Bark.* (*Cinchon. lancifol.* cont. cont. ʒiv, *Sp. amma.* aromat. Oj. Ph. L.) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHONÆ COMPOSITA. *T. Corticis* *Peruviana* *Composita* seu *felix* *fero* *Ductoria* *Huzku'ni* seu *Alexipharmaco* *Huzku'ni* seu *Alcoholica* *Ch'na* *Composita.* *Essentia* *Ch'na* seu

*Corticis* *Peruviana* *Alexipharmaco* *Huzku'ni* seu *antisepticum* *Huzku'ni.* *Compound Tincture* of *Cinchona* or *Bark.* *Hugham's* *Tincture* of *Bark.* (*Cinchon. rubr.* pulv. ʒiv, *Aurant. amar.* cont. cont. ʒij. *Serpent.* *medl.* ʒij. *Croc.* *Santal.* 22 ʒij. *Alcohol.* dilut. fʒxx. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be made by displacement. More grateful than the simple tincture. Dose, fʒj to fʒij.

TINCTURA CINNAMOMI. *T. Lou'ri* *Cinnamonomi.* *Essentia* *Cinnamonomi.* *Tincture* of *Cinnamon.* (*Cinnamon.* cont. ʒij. *Alcohol.* dilut. Oj. Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. Ph. U. S.) Stomachic. Dose, fʒj to fʒij.

TINCTURA CINNAMOMI COMPOSITA. *T. seu* *Essentia* *Aromatica.* *Alcohol* cum *Aromaticibus* *Compositus.* *Compound Tincture* of *Cinnamon.* (*F. Eau de* *Bouferme* *ou d'Armagnac.* (*Cinnamon.* cont. ʒij. *Cardam.* cont. ʒss. *Zingib.* cont. ʒij. *Alcohol.* dilut. Oj. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement.) Use, same as the last. Dose, fʒj to fʒij.

TINCTURA COCCI CAC'II. *T. Coc'ei.* *Tincture* of *Cochineal.* (*Cocci* pulv. ʒij *Avioid.*) *Alcohol.* dilut. Oj. (Imp. meas.) Ph. D.) Chiefly a colouring ingredient. At times, given in nervous affections. Dose, gr. xij to fʒj.

TINCTURA DE COCHLEARIIS. *Alcoholatum* *de* *Cochleariis* seu *antiscorb'iticum.* (*Fol. cochlear.* recent. 2500 p., *Rod. armenacia.* 250 p., *Alcohol.* 220 to 320 *Beaumé*) 3000 p., *litol* of 2000 p. Ph. P.) Antiscorbatic. Dose, fʒj to fʒij.

TINCTURA COLCHICI. (Ph. U. S. 1863.) *T. C. Sem'ina.* (Ph. U. S. 1851). *Tincture* of *Colchicum* *Seed.* (*Colchic. sem.* cont. ʒiv, *Alcohol.* dilut. Oj. Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. Ph. U. S.) Dose, ten to sixty drops.

TINCTURA COLCHICI COMPOSITA. *Spiritus* *colchici* *ammoniatu*—*t. Colchici* *seminis.* *T. colchici* —*t. Columba.* *T. Columba.*

TINCTURA CONII. *T. C. Maculati.* *T. Conii.* *Tincture* of *Henlock.* (*Conii* fol. ʒiv. *Alcohol.* dil. Oj. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Use—the same as that of the leaves. Dose ℥xx to fʒj. A *Tincture* of *Henlock* *Fruit.* *Tinctura* *Conii* *fructus.* formed of *Henlock* *fruit* or seeds, bruised. ʒss. to *Powd' spirit.* Oj. made by percolation, is official in the British Pharmacopœia 54 1864. Dose, gr. xxx.

TINCTURA CONII MACULATI. *T. conii* —*t. Convolvuli* *Jalape.* *T. jalapii* —*t. Corticis* *aurantii.* *T. aurantii* —*t. Corticis* *Peruviana* *composita.* *T. cinchonæ* comp. —*t. Corticis* *Peruviana* *simplex.* *T. cinchonæ* —*t. Corticis* *Peruviana* *relatilis.* *T. cinchonæ* *ammoniatu.*

TINCTURA CROCI SATIVI. *T. Croci.* *Tincture* of *Saffron.* (*Croc.* *Angl.* cont. ʒj. *Alcohol.* dilut. ʒv. Ph. E.) Slightly stomachic [?]. Dose, fʒj to fʒij.

TINCTURA DE CRO'CO COMPOSITA. *Elizirium* *de* *Gaura.* *Alcoholatum* *de* *Cro'co* *Compositum.* *Compound Tincture* of *Saffron.* *Elizir* of *Gaura.* (*Albes* *Socotr.* 220 p., *Myrrh.* 64 p., *Croc.* 52 p., *Cinnamon.* *Nuc.* *moschat.* *Caryoph.* 22, 16 p., *Alcohol.* 1200 p., *Aq. flor. aurant.* 5000 p. Digest for two days; distil 4000 p. and add *Syrup* of *capillaire.* 5000 p. Ph. P.) Aromatic, cordial, stomachic. It is also called *Elizir cordium* et *stomachicum*, and *E. aticalicum crescentum.*

TINCTURA CROTONIS. *Tincture* of *Croton.* Under this name Mr. E. Wilson recommends a most valuable cutaneous stimulant, made by adding four fluidounces of *Alcohol* to one ounce of the bruised seeds of *Croton tiglium.*

TINCTURA CROTONIS ELEUTHERIÆ. *T. cascariilæ.*

TINCTURA CUREBÆ, *Tincture of Cn'bebs.* (*Cn'bebs.* cont.  $\frac{3}{iv}$ , Alcohol, dilut. Oij.) Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Dose, one or two fluidrachms.

TINCTURA CUSPARIÆ, *Tinctura Augusturæ.*

TINCTURA DIGITALIS, *T. Digitalis purpureæ, Tincture of Digitalis.* (*Digitalis.*  $\frac{3}{iv}$ , Alcohol, dilut. Oij.) Macerate for 14 days, express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Use, same as that of the leaves. Dose, gtt. x.

TINCTURA ERGOTÆ, *Tincture of Ergot.* (*Ergot.* in pulv. crass.  $\frac{3}{vii}$  (avoid.), *Sp. tenuior.* Oij, (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, f $\frac{3}{j}$  to f $\frac{3}{ij}$ .

The formula for the Tincture of the British Pharmacopœia (1864), made by percolation, is *Ergot.*  $\frac{3}{v}$ , to *Proof spirit*, Oj. Dose,  $\mathcal{M}x$  to xxx.

TINCTURA ERGOTÆ ÆTHÆRÆ, *Ethæreal Tincture of Ergot.* (*Ergot.* contus.  $\frac{3}{xv}$ , *Æther.* Oij, (Imp. meas.) Macerate for 7 days, express, and filter. *Ph. L.*) Dose, 60 to 90 minims.

TINCTURA FERBIFUGA DOCTORIS HUXHAMI, *T. cinchonæ composita.*

TINCTURA FERRI ACETATIS, *Tincture of Acetate of Iron.* (*Potass. acetat.*  $\frac{3}{ij}$ , *Sulph. ferri.*  $\frac{3}{j}$ , *Sp. rectif.* Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose, gtt. xx to f $\frac{3}{j}$ . The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoholæ*, which differs from the other, in having half the quantity, only, of the Acetate of Potassa.

TINCTURA FERRI AMMONIATÆ, *T. Ferri Ammoniacalis seu Florum martialis seu Martis Mynsichti, Tincture of Ammoniated Iron.* (*Ferri ammon.*  $\frac{3}{iv}$ , *Sp. ten.* Oj. *Ph. L.*) Use—same as that of the ammoniated iron. Dose, f $\frac{3}{ss}$  to f $\frac{3}{ij}$ .

TINCTURA FERRI AMMONIOCHLORIDI, *Tincture of Ammoniochloride of Iron.* (*Ferri ammoniochlorid.*  $\frac{3}{iv}$ , Alcohol, dilut., *Aquæ destillat.*  $\mathcal{A}a$  Oj, (Imp. meas.) Dissolve and filter. *Ph. L.*) Dose, gtt. x to xx.

TINCTURA FERRI CHLORIDI, *T. ferri muriatis.*

TINCTURA FERRI MURIATIS, *T. Ferri chloridi, (Ph. U. S.) seu sesquichloridi seu Martis in Spiritu Sulis seu Martis cum Spiritu Sulis seu Ferri Muriati, Liq'or Ferri Muriatis, Tincture of Muriate of Iron, Tincture of Steel, Alcohol ferratus.* (*Ferri subcarb.*  $\mathcal{H}ss$ , *Acid. muriat.* Oj, Alcohol, Oij. Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. Another form is given in the *Ph. U. S.*, 1863, in which iron, in the form of wire, is used in place of the subcarbonate. S. g. 0990.) Tonic and styptic. It has been given, also, with advantage in erysipelas and scarlatina in the dose of  $\mathcal{M}x$  to  $\mathcal{M}xx$  every two or three hours.

TINCTURA FERRI PERCHLORIDI, *Tincture of Perchloride of Iron*, of the British Pharmacopœia, is made of *Solution of perchloride of iron* f $\frac{3}{v}$ , and *rectified spirit* f $\frac{3}{xv}$ . S. g. 0992.

*Bestucheff's Tincture* or *Kla'proth's Tincture* is an ethereal tincture of chloride of iron. It is composed of dry perchloride of iron, one part; *Hoffmann's anodyne liquor*, seven parts.

The *Antivenereal Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

TINCTURA FERRI SESQUICHLORIDI, *T. Ferri muriatis—t. Ferulæ Assafetidæ, T. Assafetidæ—t. Florum martialium, T. ferri ammoniata—t. Fœtida, T. assafetidæ—t. Fœtida ammoniata, T. castorei composita—t. Fuliginis, seu Fuligo.*

TINCTURA GAL'BANI, *Tincture of Gal'banum.* (*Galb.*  $\frac{3}{ij}$ , *Sp. tenuior.* Oij. *Ph. D.*) Stimulant and antispasmodic. Dose, f $\frac{3}{j}$  to f $\frac{3}{ij}$ .

TINCTURA GALLARUM, *T. Gallæ, (Ph. U. S.) Tincture of Gallæ.* (*Gall.* contus.  $\frac{3}{iv}$ , Alcohol, dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Astringent. Dose, f $\frac{3}{j}$  to f $\frac{3}{ij}$ .

TINCTURA GENTIANÆ COMPOSITA, *Tinct. Amara, Elix'ir Stomachicum, Compound Tincture of Gentian, Spirit'it Bit'ters.* (*Gent. concis.*  $\frac{3}{ij}$ , *Aurant. cort.*  $\frac{3}{j}$ , *Cardam.* cont.  $\frac{3}{ss}$ , Alcohol, dilut. Oij. Macerate for 14 days, express, and filter. It may likewise be prepared by displacement. *Ph. U. S.*) Tonic and stomachic. Dose, f $\frac{3}{j}$  to f $\frac{3}{ij}$ .

*Brodum's Nervous Cordial* consists of the *Tinctures of Gentian, Columba, Cardamom, and Bark*, with the *Compound Spirit of Lavender and Wine of Iron.*

*Stoughton's Elix'ir* is a compound tincture of gentian. The *Elix'irium Doct'oris Stoughton* seu *Tinctura Amara* of the Parisian Codex is prepared as follows:—*Absinth. summit.* exsiccat., *Teneri chamædrys, Rad. gentian., Cort. aurant.,*  $\mathcal{A}a$   $\frac{3}{ij}$ , *Cascarillæ*  $\frac{3}{j}$ , *Rhei*  $\frac{3}{ss}$ , *Aloës socotr.*  $\frac{3}{j}$ , Alcohol, Oij. Digest. Dose, f $\frac{3}{j}$  to f $\frac{3}{ij}$ .

The *Elix'ir Viscerale Hoffmanni* does not differ essentially from these preparations.

TINCTURA GUA'IACI, *T. Gua'iaci Officina'lis, Tincture of Gua'iacum.* (*Gua'iac.*  $\frac{3}{vj}$ , Alcohol, Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock.*

TINCTURA GUA'IACI AMMONIATÆ, *T. Gua'iacina Volat'ilis, T. Gua'iaci, Elix'ir Gua'iaci Volat'ilis, Alcohol cum Gua'iaci officina'le ammoniatum, A. ammoniatæ et Gua'iaci, Ammoniated Tincture of Gua'iacum, Volatile Tincture of Gua'iacum.* (*Gua'iac. pulv.*  $\frac{3}{vj}$ , *Sp. ammon. arom.* Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Properties same as the last. Dose, f $\frac{3}{j}$  to f $\frac{3}{ij}$ .

*Hutfield's Tincture*—a nostrum—consists of *Gua'iacum* and *Soap*,  $\mathcal{A}a$   $\frac{3}{ij}$ , *rectified spirit*, Oiss.

TINCTURA HELLEBORI, *T. Hellebori Nigri, T. Melampodii, Tincture of Black Hellebore.* (*Hellebor. nigr.* cont.  $\frac{3}{iv}$ , Alcohol, dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, f $\frac{3}{ss}$  to f $\frac{3}{j}$ .

TINCTURA HIERA, Vinum aloes.

TINCTURA HUMULI, *T. Lu'puli, Tincture of Hops.* (*Humuli*  $\frac{3}{v}$ , Alcohol, dilut. Oij. Prepared also by displacement.) Tonic and sedative. Dose, f $\frac{3}{ss}$  to f $\frac{3}{ij}$ .

TINCTURA HYOSCY'AMI, *T. Hyoscy'ami nigri, Tincture of Henbane.* (*Hyoscyum. fol.*  $\frac{3}{iv}$ , Alcohol, dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Narcotic, anodyne. Dose, gtt. xx to f $\frac{3}{j}$ .

TINCTURA IODINI (*Ph. U. S.*, 1842), *T. Iodini* (*Ph. U. S.* 1851), *Alcohol Iodii, Tincture of Iodine.* (*Iodin.*  $\frac{3}{j}$ , Alcohol, Oj. Dissolve. *Ph. U. S.*) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops three times a day.

*Tinctura Iodii* (*Ph. B.*, 1864), is made of *Iodine*  $\frac{3}{ss}$ , *Iodide of potassium*  $\frac{3}{j}$ , *Rectified spirit* Oj. Dose,  $\mathcal{M}x$  to xxx.

An ethereal and a chloroform tincture of iodine have been used, to affect the system with iodine by inhalation.

TINCTURA IODINI COMPOSITA (*Ph. U. S.*, 1842), *T. Iodini Composita* (*Ph. U. S.*, 1851), *Compound Tincture of Iodine.* (*Iodin.*  $\frac{3}{ss}$ , *Potassi iodid.*  $\frac{3}{j}$ , Alcohol, Oj. Dissolve. *Ph. U. S.*) Dose, 10 to 30 drops.

TINCTURA JALAP'II, *T. Jalap'ie* (*Ph. U. S.*) seu *Convolvuli Jalapæ, Val'igæ, Tincture of Jalap.* (*Jalap. pulv.*  $\frac{3}{vi}$ , Alcohol, dilut. Oij. Macerate

for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Cathartic. Dose, fʒj to fʒiv.

TINCTURA JALAP'II COMPOSITA, *Elix'ir Jalap'æ Compos'itum* seu pur'gans seu anthelminticum *Sœco'rum*, *Essent'ia cathol'ica pur'gans Roth'ii*, (F.) *Elix' de vie Allemaude*. (Jalap. lbss, Scammon. ʒj, Alcohol. (22°) Ovj. Macerate for eight days. *Ph. P.*) Dose, 60 to 100 drops.

TINCTURA JAPONICA, Tinctura catechu—t. Kinæ kinæ ætherica composita, Tinctura cinchonæ ætherica composita—t. Kinkinæ amara, Tinctura cinchonæ amara.

TINCTURA KI'NO, *Tincture of Ki'no*. (Kino, in pulv. ʒvj, Alcohol. dilut. q. s. Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until fʒviij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely-stopped bottles. *Ph. U. S.*) Astringent. Dose, fʒj to fʒij.

TINCTURA KRAME'RIE, *Tincture of Rhat'omy*. (Kramer. in pulv. ʒvj, Alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, fʒj to fʒij.

TINCTURA LACTU'CA'RII, *Tincture of Lactuca'rium*. (Lactucar. in pulv. ʒiv, Sp. tenuior. Oij. (Imp. meas.) Best prepared by percolation. *Ph. E.*) Dose, 30 minims to fʒj.

TINCTURA LAURI CINNAMOMI, Tinctura cinnamomi—t. Lavandulæ composita, Spiritus lavand. comp.

TINCTURA LIMO'NIS, *Tincture of Lem'on peel*. (Limon. cort. ʒiiiss, Sp. tenuior. Oij. (Imp. meas.) Macerate for 7 days, express, and filter. *Ph. D.*) Dose, fʒj to fʒij.

TINCTURA LOBE'LLÆ, *Tincture of Lobe'lia*. (Lobel. ʒiv, Alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, fʒj to fʒij.

TINCTURA LOBE'LLÆ ÆTHE'RIÆ, *Ethe'rial Tincture of Lobe'lia*. (Lobel. pulv. ʒv, Sp. ather. sulph. Oij. (Imp. meas.) *Ph. E. L. and B.*) Dose, same as the last.

TINCTURA LUPULI, Tinctura Humuli, T. Lupulinæ.

TINCTURA LUPULI'NÆ, T. Lu'pulin. (*Ph. E.*) *Tincture of Lu'pulin*. (Lupulin. ʒiv, Alcohol. Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Dose, fʒj to fʒij.

TINCTURA LYTLE, Tinctura cantharidis—t. Martis Glauberi, see Ferrum tartarizatum—t. Martis Mynsichti, Tinctura ferri ammoniata—t. Martis in Spiritu salis, Tinctura ferri muriatis—t. Martis vinosæ, Vinum ferri.

TINCTURA MATI'CO, *Tincture of Mati'co*. (Matico in pulv. crass. ʒviij (avoird.), Sp. tenuior. Oij. (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, fʒj to fʒij.

TINCTURA MELAMPODII, Tinctura hellebori nigri—t. Meloc. vesicatorii, Tinctura cantharidis—t. Metallorum, Liliun Paracelsi—t. Mimosæ catechu, Tinctura catechu.

TINCTURA MOS'CHI, *Tincture or Es'sence of Musk*. (Mosc. in pulv. redact. ʒij, Sp. vini rect. Oj.) Dose, fʒj to fʒiv.

TINCTURA MYR'RHÆ, *Tincture of Myrrh*, *Simple Tincture of Myrrh*. (Myrrhæ contusæ ʒiij, Alcohol Oij. Macerate for 14 days, and filter. Prepared also by displacement. *Ph. U. S.*) Tonic, 'deobstruent,' antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

Hud'son's Preser'vative for the Teeth and Gums consists of Tinct. myrrh., Tinct. cinch., Ag. cinnam. ʒā ʒiij, Eau d'urquebuse ʒj, -ulv. gum. Arb. ʒss. M.

TINCTURA NERVINA BESTUCHEFFII, Tinctura

(seu alcohol) sulphuricoætherica ferri—t. Nervina Halensis, Tinctura (seu alcohol) sulphuricoætherica ferri—t. Nervinotonica, Lamotte's, Alcohol (seu Tinctura) sulphuricoæthericus ferri.

TINCTURA NUCIS VOMI'CÆ, *Tincture of Nux Vom'ica*. (Alcohol. s. g. 837, fʒj, Dry Extract of Nux Vom'ica, 3 gr.) Dose, gtt. v to xxx, in cases where the nux vomica is indicated.

It is directed in the *Ph. U. S.* (1851) to be prepared as follows:—(Nucis vomice rasur. ʒviij, Alcohol Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement.) Dose, gtt. v to xx.

TINCTURA OLEI MENTHÆ PIPERITÆ, Spiritus menthæ piperitæ.

TINCTURA OLEI MENTHÆ VIRIDIS, Spiritus menthæ viridis.

TINCTURA O'PII, T. Theba'ica seu Sedat'iva, Theri'aca celestis, Alcohol cum O'pio, *Tincture of O'pium*, *Liquid Laudanum*. (Op'ii pulv. ʒijss, Alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Prepared also by displacement. *Ph. U. S.*) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gtt. xx to lx, and more. By macerating the dregs remaining after making the Tinctura Op'ii in a solution of Tartaric Acid, a solution is obtained which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Li'quor Op'ii Sclati'vus*.

TINCTURA O'PII ACETA'TA, *Ac'etated Tincture of O'pium*. (Op'ii ʒij, aceti fʒxij, Alcohol. Oss. Rub the opium with the vinegar, add the alcohol, and having macerated for 14 days, express, and filter. *Ph. U. S.*) Twenty drops are equivalent to a grain of opium.

TINCTURA O'PII AMMONIATA, *Am'oniated Tincture of O'pium*, *Ed'inburgh Paregor'ic Elix'ir*. (Flor. benz., croci, ʒā ʒiij, O'pii ʒij, Ol. anisi ʒss, Alcohol. ammoniat. fʒxxv. Digest. *Ph. E.*) fʒj contains one grain of opium. Used like the Tinctura Camphoræ Composita.

TINCTURA OPII CAMPHORATA, Tinctura camphoræ composita—t. Plumbosæ, Liquor Plumbi subacetatis dilutus.

TINCTURA O'PII DEODORATA, *Deodorized Tincture of O'pium*. (A solution of opium, ʒiiiss, in water, shaken with ether; and, the ethereal solution having been poured off, evaporating until all traces of ether have disappeared; mixing with water, and filtering; and adding water through the filter sufficient to make the liquid a pint and a half; adding, lastly, half a pint of alcohol, and mixing. *Ph. U. S.*, 1863.) By treating the opium with water in place of alcohol, the resinous and odorous principles are sparingly taken up. Its strength is that of Tinctura Op'ii.

TINCTURA QUAS'SIÆ, T. Quas'siæ excel'ssæ, *Tincture of Quas'sia*. (Quassia rasur. ʒij, Alcohol dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Tonic. Dose, fʒj to fʒij.

TINCTURA QUAS'SIÆ COMPOSITA, *Compound Tincture of Quas'sia*. (Cardam. scm. contus., Cucci contus. ʒā ʒss, Cinnam., Quassie, ʒā ʒvj, Uvar. passur. ʒviij, Sp. tenuior. Oij. (Imp. meas.) Digest for 7 days, express, and filter. May be prepared also by percolation. *Ph. E.*) Dose, as a tonic, fʒj or fʒij.

TINCTURÆ QUI'NÆ COMPOSITA, *Compound Tincture of Qui'na*. (Quinæ sulph. ʒv and ʒj, Tinct. anarantii, Oij, (Imp. meas.) Digest for 7 days, and filter. *Ph. L.*) fʒj contains a grain of the sulphate.

TINCTURA QUI'NÆ SULPHATIS, *Tincture of Sulphate of Qui'na*. (Sulphate of Quinia gr. vj, Alcohol (847) fʒj. M.) Dose, fʒj to fʒiv, in the day.

*Tinctura Cinchoſiæ Sulphatis* may be made in a ſimilar manner.

TINCTURA RHABBARARI, *Tinctura rhei*—*t. Rhabbarbari composita*, *Tinctura rhei composita*—*t. Rhabbarbari viſoſa*, *Vinum rhei palmati*.

TINCTURA RHEI, *T. Rhabbarbari* ſeu *Rhabbarbari ſpirituosa* ſeu *Rhei* ſeu *Rhei palmati*, *Tincture of Rhu'barb.* (*Rhei contus.* ℥ij, *Cardam.* cont. ℥ss, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. It may alſo be prepared by diſplacement. *Ph. U. S.*) *Stomachic* or *purgative*, according to the doſe employed—*f℥j* to *℥ij* as a *ſtomachic*; *f℥iv* to *℥j* as a *purgative*.

TINCTURA RHEI COMPOSITA, *T. Rhabbarbari composita*, *Compound Tincture of Rhu'barb.* (*Rhei rad. concis.* ℥ij, *Glycyrrhiz. rad.* cont. ℥ss, *Zingib. rad. concis.*, *Croci stigmat.* aa ℥ij, *Aque f℥xij*, *Sp. ten.* Oj. *Ph. L.*) Properties ſame as the laſt.

TINCTURA RHEI ET AL'OEÏS, *Elix'ir sacrum*, *Tincture of Rhu'barb and Aloes.* (*Rhei concis.* ℥x, *Aloes pulv.* ℥vj, *Cardam.* cont. ℥ss, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. *Ph. U. S.*) Properties like the laſt.

*Rymer's Cardiac Tincture* conſiſts of an infusion of *Capsicum*, *Camphor*, *Cardamom ſeeds*, *Rhubarb*, *Aloes*, and *Castor* in *Proof Spirit*, with a very ſmall quantity of *Sulphuric Acid*.

TINCTURA RHEI ET GENTIANÆ, *Tinctura Rhei Amara*, *Tincture of Rhu'barb with Gentiana.* (*Rhei cont.* ℥ij, *Gentiana.* cont. ℥ss, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. *Ph. U. S.* It may alſo be prepared by diſplacement.) Properties ſame as the laſt.

TINCTURA RHEI ET SEN'NÆ, *Tincture of Rhu'barb and Sen'na*, *Warner's Gout Cordial.* (*Rhei cont.* ℥j, *Sennæ* ℥ij, *Coriandr. cont.*, *Fenicul. cont.* aa ℥j, *Santal. rasur.* ℥ij, *Croci, Ext. glycyrrhiz. rad.* aa ℥ss, *Uvar. passar.* acinis exemptis, ℥ss, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. *Ph. U. S.*) Doſe, *f℥ss* to *f℥ij*.

TINCTURA RHÆI, *Tinctura rhei*—*t. Rhœi amara*, *Tinctura rhei et gentianæ*—*t. Sacra*, *Vinum aloes*.

TINCTURA SABI'NÆ, *Tincture of Sav'ine.* (*Sav'ine*, dried and bruised, ℥iiss, *Proof ſpirit* Oj. Made by percolation. *Ph. B.*, 1864.) Doſe, ℥xv to xxx.

TINCTURA SANGUINARIÆ, *Tincture of Blood-root.* (*Sanguinar. cont.* ℥iv, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. It may alſo be prepared by diſplacement. *Ph. U. S.*) Doſe, 30 to 60 drops.

TINCTURA SAPONIS CAMPHORATA, *Linimentum saponis camphoratum*—*t. Saponis et opii*, *Linimentum saponis et opii*.

TINCTURA SCIL'LÆ, *Tincture of Squill.* (*Scille* ℥iv, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. It may alſo be made by diſplacement. *Ph. U. S.*) Doſe, gtt xv to lx.

TINCTURA SEDATIVA, *Tinctura opii*.

TINCTURA SEN'NÆ, *T. Sen'na Composita*, *Elix'ir Sabina*, *Daf'ly's Elix'ir*, *Tincture of Sen'na.* (*Sennæ fol.* ℥ij, *Carui sem.* cont. ℥ij, *Cardam. sem.* cont. ℥j, *Uvarum passarum deuptis acinis*, ℥iv, *Sp. ten.* Oij. *Ph. L. & D.*) *Stomachic*, *carminative* and *cathartic*. Doſe, *f℥ij* to *f℥j*.

TINCTURÆ SEN'NÆ ET JALAP'Æ, *Tincture of Sen'na and Jalap.* (*Sennæ* ℥ij, *Jalap. pulv.* ℥j, *Carindr. cont.*, *Carui cont.*, aa ℥ss, *Cardam. cont.* ℥ij, *Sacch.* ℥iv, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. *Ph. U. S.* It may alſo be prepared by diſplacement.) Doſe, *f℥j* to *f℥j*.

TINCTURA SERPENTARIÆ, *T. Serpentariæ* ſeu *Virginia'næ* ſeu *Aristolochiæ Serpentariæ*, *Tincture of Snake-root.* (*Rad. serpent.* ℥iv, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and

filter. It may alſo be prepared by diſplacement. *Ph. U. S.*) *Tonic.* Doſe, *f℥ss* to *f℥j*.

TINCTURA STOMACHICA, *Tinctura cardamomi composita*.

TINCTURA STRAMO'NII, *Tincture of Stramo'nium.* (*Stramon. sem.* cont. ℥iv, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and filter. It may alſo be prepared by diſplacement. *Ph. U. S.*) Doſe, ten to twenty minims.

TINCTURA STRYCH'NIÆ, *Tincture of Strych'nia.* (*Alcohol. s. g.* 837, Oj, *Strychniæ, gr. iij.*) Doſe, 6 drops to 24. Properties, thoſe of *strychnia*.

TINCTURA (SEU AL'COHOL) SULPHURICOÆTH'EREA FER'RI, *Gul'tæ nervinæ*, *Liquor Anodynus Martialis*, *Alcohol æthereus ferratus*, *Naphtha Vitrioli Martialis*, *Solutio Murialis ferriæ æthereæ*, *Spiritus sulphuricoæthereus martialis*, *Tinctura nervina Halensis* ſeu *Toniconervina Halensis* ſeu *auræa* ſeu *nervina Bestucheffi* ſeu *nervinotonica* (*Lamotte's*) ſeu *æthere ferri*, *Æther Martialis*, *De La Motte's Golden Drops*, *Bestucheff's Nervous Tincture*, (*F.*) *Elixir d'Or de M. le Général De La Motte.* (An ethereal ſolution of chloride of iron.) It is much uſed in *gout*, *hypochondriasis*, &c.

TINCTURA SULPHURIS VOLATILIS, *Liquor fumans Boylii*—*t. Thebaica*, *Tinctura opii*, *Vinum opii*.

TINCTURA TOLUIF'ERÆ BAL'SAMI, *T. Balsami Tolutani*, *T. Tolutani* (*Ph. U. S.*, 1842.), *T. Tolutana* (*Ph. U. S.*, 1851 and 1863), *Tincture of Balsam of Tolu'*, (*Bals. Tolutan.* ℥ij, *Alcohol.* Oij.) Reputed to be *expectorant* and *corroborant*. Doſe, *f℥ss* to *f℥j*, or more.

TINCTURA TONICA NERVINA HALENSIS, *Tinctura* (ſeu *Alcohol*) *sulphuricoætherea ferri*.

TINCTURA VALERIANÆ, *Tincture of Valerian.* (*Valerian. cont.* ℥iv, *Alcohol dilut.* Oij. Macerate for 14 days, expreſs, and ſtrain. It may alſo be prepared by diſplacement. *Ph. U. S.*) *Stimulant* and *antispasmodic*. Doſe, *f℥ss* to *f℥j*.

TINCTURA VALERIANÆ AMMONIAT'Æ, *T. Valerianæ Volatilis*, *Ammoniated or Volatile Tincture of Valerian.* (*Valerianæ cont.* ℥iv, *Sp. ammon. arom.* Oij. Macerate for ſeven days, expreſs, and filter. It may alſo be made by diſplacement. *Ph. U. S.*) Like the former. Doſe, *f℥ss* to *f℥j*.

TINCTURA VERA'TRI, *T. Veratri albi*, *Tincture of White Hel'lebores.* (*Rad. veratri alb.* cont. ℥vii, *Alcohol dilut.* Oijss. *Ph. E.*) *Emetic* and *cathartic*; but not very manageable. Doſe, gtt. v to x.

TINCTURA VERA'TRI VIR'IDIS, *Tincture of American Hel'lebores.* (*Veratr. virid. pulv.* ℥xvj, *Alcohol. q. s.* to produce by percolation two pints. *Ph. U. S.* 1863.) *Sedative*. Doſe, gtt. vij, every three hours until the pulſe is reduced.

TINCTURA ZINGIB'ERIS, *T. Amo'mi Zingiberis*, *Tincture of Gin'ger.* (*Zingib. cont.* ℥vii, *Alcohol.* Oij. Macerate for 14 days, expreſs, and filter. It may alſo be made by diſplacement. *Ph. U. S.*) *Stimulant* and *carminative*. Doſe, *f℥ss* to *f℥j*.

TINCTURÆ, *Tinctura*—*t. of Aconite*, *Tinctura aconiti*—*t. of Aconite root*, *Tinctura aconiti radiceis*—*t. of Aloes*, *Tinctura aloes*—*t. of Aloes*, *compound*, *Tinctura aloes composita*—*t. of Aloes*, *etheral*, *Tinctura aloes æthereæ*—*t. of Ammonia*, *compound*, *Spiritus ammoniæ succinatus*—*t. of Angustura*, *Tinctura angusturæ*—*t. of Arnica*, *Tinctura arnicæ*—*t. of Assafetida*, *Tinctura assafetidæ*—*t. of Balsam of Tolu*, *Tinctura toluiferæ balsami*—*t. of Bark*, *Tinctura cinchonæ*—*t. of Bark*, *ammoniated*, *Tinctura cinchonæ ammoniata*—*t. of Bark*, *compound*, *Tinctura cinchonæ composita*—*t. of Bark*, *Huxham's*, *Tinctura cinchonæ composita*—*t. of Bark*, *volatile*, *Tinctura cinchonæ ammoniata*—*t. of Belladonna*, *Tinctura belladonnæ*—*t. of Benzoin*, *compound*, *Tinctura benzoini composita*—*t. **TINEÆ**, pl. of *Tinea*, Worms.

**TINESMUS**, Tenesmus.

**TING'LING**, (*tinnire*, 'to jingle,') (Sc.) *Dirling*. A sharp, purring or thrilling sensation, not always painful.

**TINKER'S WEED**, *Triosteum*.

**TINKLING, METALLIC**, (like tingling,) *Tintement métallique*.

**TINNIMENTUM METALLICUM**, (from *tinnio*, 'to tinkle,') *Tintement métallique*.

**TINNIUS AU'RIMUM**, (from *tinnio*, *tinnitum*, 'to tinkle,') 'ringing of the ears.' *Fluctuatio seu Sussur'rus seu Sib'ulus seu Strept'itus seu Sibilus'us aurium*, *Paracus'is imaginaria*, *Ote'chus*, *Syryg'mus*, *Syryng'us*, *Sib'ulus clang'onus*, *E'chos*, *Eneche'ma*, *Bon'bus*, *Bombatio*, *Mur'nur*, (F.) *Tintement*, *T. d'Oreille*, *Tintouin*, *Bon'donnement*, *Bruissement*. An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

**TINTEMENT**, *Tinnitus aurium*—t. *Bullaire*, *T. métallique*.

**TINTEMENT MÉTALLIQUE** (F), *Cliquetis métallique*, *Tintement bullaire*, *Tinnimentum metallicum*, *Ca'nor stethoscop'icus*, *Metal'lic Respiration*, *Metal'lic Voice*, *Metal'lic Tink'ling*. A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuffbox. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metal'lic res'onance*. The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax*.

**TINTEMENT D'OREILLE**, *Tinnitus aurium*.

**TINTINNABULUM**, 'a bell,' (from *tintinnio*, 'to ring,') *Uvula*.

**TINTOUIN**, *Tinnitus aurium*.

**TIPFOOT**, see *Kyllosis*.

**TIPSARIA**, *Decoctum hordei*.

**TIQUE** (F), (G.) *Zeecke*, *Ixodes ricinus*.

**TIRE-BALLE**, (*tirer*, 'to draw,' and *balle*, 'ball,') *Forceps (bullet)*.

**TIRE-FOND** (F.), (*tirer*, 'to draw,' and *fond*, 'bottom.') A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

**TIRE-PUS**, Pyulcon.

**TIRE-TÊTE** (F.), (*tirer*, 'to draw,' and *tête*, 'head,') *Tractor*. A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crochet is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

**TIRES**, Milk sickness.

**TIRETOIR** (F.), *Tirtoir*, (from *tirer*, 'to draw,') An instrument used by dentists for extracting the incisors of the lower jaw.

**TISANE** (F.), *Ptisana* or *Ptis'ana*, *Ptisân*, from *πτισανη*, 'pearl barley,' itself from *πτισσω*, 'I decorticate.' (F.) *Hydrolé*. A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley.

**TISANE COMMUNE**, Decoction hordei.

**TISANE DE FELTZ**. A celebrated antisyphilitic, formed of *sarsaparilla*, *isinglass*, *sulphuret of antimony* and *water*, boiled together. According to some, bichloride of mercury; and, to others, arsenic enters into its composition. M. Rayer, supposing that it acts by the arsenic it contains, proposes to replace it by arseniate of potassa; and Guibourt, who is of the same opinion, by arsenious acid, in order to ensure certainty of action.

**TISIC**, Phthisis.

**TISICAL**, Phthisic.

**TISSICK**, see Phthisic.

**TISSU**, (from *texere*, *textum*, 'to weave,') *Tissue*—*t. Accidental*, see *Accidental*, and *Tissue*, *accidental*—*t. Aréolaire*, Cellular tissue—*t. Cavernaux*, Cavernous texture—*t. Cellulaire*, Cellular tissue—*t. Celluleux des os*, Cancelli—*t. Conjonctif*, Cellular tissue—*t. Cribleux*, Cellular tissue—*t. Inodulaire*, *Tissue*, *inodular*—*t. Jaune*, see *Fibrous*—*t. Lamineux*, Cellular tissue—*t. Lardacé*, see *Lardaceous*—*t. Muqueux*, Cellular tissue—*t. Poreux*, Cellular tissue—*t. Réticulé*, Cellular tissue—*t. Spongoïde*, Spongy tissue—*t. Unitif*, Cellular tissue.

**TISSUE**, *Tex'tus*, *Te'la*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see *Fibre*. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed; but every division is imperfect and liable to objection.

**TISSUE, ACCIDENTAL OR ADVENTITIOUS**, consists of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the interior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those that resemble others in the animal economy, or *anal'ogous accidental tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterol'ogous* or *heteroclitic accidental tissues*. To the first class belong, ossifications; accidental fibrous, fibrocartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

**TISSUE, AREOLAR**, Cellular tissue.

**TISSUE, CARTILAGINOUS**, *Hymenochondro'id'æ*—*seu Hymenochondro'id'æ* (*Textu'ra seu Te'la*.)

**TISSUE, CELLULAR**, Cellular tissue—*t. Connective*, Cellular tissue—*t. Cribiform*, Cellular tissue—*t. Fibrous*, see *Fibrous*—*t. Filamentous*, Cellular tissue.

**TISSUE FORMATION**, Histogeny.

**TISSUE, INODULAR**, *Te'la inodularis*, (F.) *Inodule*, *Tissu inodulaire*. A name given by Delpech to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulofibrous layer; but soon loses its vascularity; and its fibres, which pass, in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

**TISSUE, LAMINATED**, Cellular tissue—*t. Ligamentous*, Desmoid tissue—*t. Mucous*, Cellular tissue—*t. Porous*, Cellular tissue—*t. Reticulated*, Cellular tissue.

**TIT**, (τῆθ, [Sax.] τῆτ, Nipple.

**TITHENE**, (τῆθην,) Nurse.

**TITHYMALUS CYPARISSIAS**, (τῆθυμάλος,) *Euphorbia cyparissias*—*t. Lathyrus*, *Euphorbia lathyrus*—*t. Latifolius*, *Euphorbia lathyrus*—*t. Palustris*, *Euphorbia palustris*—*t. Paralias*, *Euphorbia paralias*.

**TITILLAMENTUM**, Gargarism.

**TITILLATION**, (*titillare*, *titillatum*, 'to tickle,') Tickling.

**TITTHE**, (τῆθην,) Mamma, Nipple.

**TITTHION**, (τῆθιον, dim. of *titheos*,) Nipple.

**TITTHIS**, (τῆθῆς,) Mamma, Nipple.

**TITTHOS**, (τῆθός,) Mamma, Nipple.

**TITTY**, Mamma, Nipple.

**TITUBANTIA**, 'a staggering,' *Bredouillement*.

**TITUBATIO**, (*titubare*, *titubatum*, 'to stagger or totter,') Fidgets, Vacillatio—*t. Linguae*, Balbuties.

**TJETTEK**, Upas tiuté.

**TMETICA**, (τμητικα, from *τεμνω*, 'to cut,') Incidentia.

**TO-AND-FRO-SOUND**, *Bruit de frottement*.

**TOADFLAX**, *Antirrhinum linaria*—*t. Bastard*, *Comandra umbellata*.

**TOASTWATER**, *A'qua tost'æ pan'is*, (F.) *Eau panée*. (Toast well half a slice of a stale quarter loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread.) It is a common drink in febrile affections.

**TOBACCO**, (from *tabacos*, the Caribbean name for the pipe in which it was smoked [?]), *Nicotiana tabacum*—*t. English*, *Nicotiana rustica*—*t. Indian*, *Lobelia inflata*—*t. Poison*, *Hyoscyamus niger*.

**TOBACCO ROOT**, see *Valeriana*.

**TOBACCO, WILD**, *Lobelia inflata*, *Nicotiana rustica*.

**TOCETUS**, (τοκετος,) Parturition.

**TOCODYMYCOPHORITIS MALIGNA VAGINALIS**, (*tocus*, *μυκος*, 'mucus,' *ώγα*, 'skin,' and *itis*,) Colpocæe puerperarum.

**TOCOLOGY**, (*tocus*, and *λογος*, 'a discourse,') Obstetrics.

**TOCUS**, (τοκος,) Parturition.

**TODDY**. A name given, by the English, to sweet, delicious and refreshing liquors procured in India by wounding the *spathæ* of certain palms. The best is obtained from the *Cocos nucifera*.

It is obtained in large quantities from *Saguë'rus sac'charifer* *seu Rum'phii*, *Pal'ma Ind'ica vi'naria secun'da*, *Saguë'rus* *seu Gomu'tus Gomu'to*, *Aren'ga saccharif'era*, *Gomu'to palm*. It is called, also, *Ne'ra*, and, by boiling, yields a coarse kind

of sugar, called *Jog'gery*. The inhabitants of the Moluccas used, in their wars, a liquor obtained by macerating the fruit, which the Dutch called *Hell water*, *A'qua infernalis*.

*Toddy* is, also, the common name for a mixture of spirit and water sweetened, and usually spiced with nutmeg.

TODDY TREE, Mamei.

TOE, ([Sax.] *ta*.) *Digitus pedis*—t. Supernumerary, see *Monster*.

TOEPLITZ, see *Töplitz*.

TOFUS, *Tophus*.

TOILE D'ARAIGNEE, 'spider's web,' *Aranea tela*—t. *Choroidienne*, see *Choroid*—t. *de Gautier*, *Sparadrupum Galteri*.

TOKAS, (*tokas*, gen. *tokados*.) *Puerpera*.

TOKEN, PLAGUE, see *Plague token*.

TOKOLOGY, (*tocus*, and *logos*, 'a discourse,') *Obstetrics*.

TOLA, *Tonsil*.

TOLERANCE, *Tolerantia*, (*tolerare*, 'to bear.')

The power of bearing. A word used by the Italian school of *Rasori*, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See *Contra-stimulus*.

TOLES, *Tonsil*.

TOLIUM, *Tonsil*.

TOLLES, *Tonsil*.

TOLLUM, *Tonsil*.

TOLU, (from *Tolu* in South America,) see *Toluifera balsamum*.

TOLUIFERA BALSAMUM, (*tolu*, and *ferre*, 'to bear,') *Myroxylon seu Myrospermum Toluiferum*. *Ord. Leguminosæ. Sex. Syst. Decandria Monogynia*. The name of the tree which affords the *Tolu*, *Bal'sam of Tolu*, *Bal'samum Tolutanum*, (Ph. U. S.), *Tolutanum*, *Toluiferæ Bal'sami Bal'samum*, *Goac'onaz*, *Red Bal'sam of Peru*, (F.) *Baume de Tolu*, *B. de Carthagène ou d'Amérique ou de Saint Thomas*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddishyellow colour. It is stimulant and expectorant (?), and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see *Toluifera balsamum*.

TOM OF BEDLAM, see *Abraham man*.

TOMACINUM, (*τομη*, 'a cutting up,') *Isicium*.

TOMACLUM, (same etymon,) *Isicium*.

TOMACULUM, (same etymon,) *Isicium*.

TOMATA, (Indian,) *Solanum lycopersicum*.

TOMATO, *Solanum lycopersicum*.

TOMÉ, *To'mus*, (*τομη*, *τομος*, 'incision,') A common suffix, as in *Lithotomy*, *Bronchotomy*, &c.

TOMÉ, *Cut*, *Incision*.

TOMEION, (*τομειον*.) *Knife*.

TOMENTUM CEREBRI, (*tomentum*, 'a flock of wool,') The infinite number of small vessels which pass between the *pia mater* and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, (*τομευς*.) *Knife*.

TOMIS, (*τομης*.) *Scissors*.

TOMOTOCIA, (*τομη*, 'section,' and *τοκος*, 'parturition,') *Cæsarean section*.

TOM TOE, *Pollux*, see *Digitus pedis*.

TOÑE, *To'nus*, (*τονος*, from *τονωω*, 'I brace or give vigour,') The state of tension or firmness proper to each organic tissue. It is the effect of tonicities.

TOÑE, see *Elasticity*.

TONGA, see *Datura sanguinea*.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate containing carbonates of iron and magnesia.

TONGUE, (Sax. *tung*, [D.] *Tong*.) *Ling'ua*, *Gloss'a*, *Glot'ta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ: situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and expiration. It has the shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its upper surface, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea mediana*; at the posterior extremity of which is the *fora'men ca'enum* or *Fora'men of Morgagni*. The inferior surface is free, and covered by the mucous membrane on its anterior third and sides: but behind and in the middle it is attached to the lower jaw by means of the *genio-glossus*; and to the hyoides by the *hyoglossus*. Its margins are rounded; thick behind, thinner anteriorly. Its tip, or point, or dental extremity is rounded and free:—the root, base, or hyoid extremity, *Rad'ix lin'gue*, is continuous with the epiglottis and velum palati. It is very thick at the *foramen cæcum*; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane—*Periglottis*, *Invol'crum lin'gue*, *Membrana seu Tun'ica vagina'lis seu Cu'tis seu Epider'mis seu Tun'ica seu Invol'crum mucosum seu Crus'ta villosa lin'gue*—which forms also the frænum beneath the tongue. On this membrane are seen the different papillæ. The nerves of the organ proceed from the inferior maxillary, glossopharyngeal and hypoglossal. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the *glossopharyngeal* to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis lin'gue*, *rari'na*, *lingualis*, and *submentalis*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the *hyoglossi* muscles.

TONGUE, BLACK. A fever which prevailed in the Western States in the winter of 1842-3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, *Glossocèle*.

TONGUE HOLDER, *Glossocatochus*.

TONGUE, INFLAMMATION OF THE, *Glossitis*—t. *Red*, fever, see *Typhus*.

TONGUE SCRAPER, *Cure-langue*—t. *Tie*, see *Ankyloglossum*.

TONIC, (*τονος*.) *Ton'icus*, (F.) *Tonique*. Relating to tone.

*Tonic*, *Ton'icus*, *Ton'iticus*, *Antasthen'icus*, (F.) *Tonique*, *Fortifiant*, in Therapeutics, means a medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortantia*, *Comfortativa*, *Carroborantia*, *Confirmantia*, *Roborantia*, &c.

The following are the chief Tonics:—*Acidum Arseniosum*, *Acidum Nitricum*, *Acidum Sulphuricum*, *Argentum Nitras*, *Bismuthi Subnitras*, *Carbo Ligni*, *Cascarilla*, *Cinchona*, *Cinchonia*, *Colombia*, *Cornus Florida*, *Cupri Acetas*, *Cupri Sulphas*, *Cuprum ammoniatum*, *Cusparia*, *Eupatorium perfoliatum*, *Ferri Præparata*, *Gentiana*, *Liriodendron*, *Lupulina*, *Piperina*, *Prunus Virginiana*, *Quassia*, *Quinia*, *Salix*, *Salicina*, *Serpentaria*, *Zinci*

præparata: Aquæ minerales acidulæ et ferruginæ; and Mental Tonics, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.

TONIC SPASM, *Spasmus tonicus*, *Convulsio tonica*, *Conductio*, *Spasiticus*, *Tonus*, *Entonia*, *Entastis*, *Eutasia*. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONICITY, *Tonicitas*. The faculty that determines the general tone of the solids. Excessive tonicities causes *erethism* or *crispness*; deficient tonicities, *atony* or *weakness*. *Tonicity* has been used in the same sense as irritability.

TONIQUE, Tonic.

TONKA BEAN, *Dipterix odorata*.

TONODES, (τονόδης,) Tensive.

TONOTICUS, (τονωτικός,) Tonic.

TONSIL, *Tonsilla*, *Amygdala*, *Paristh'mia*, *Paristh'mium*, *Amphibranchium*, *Glandula colli*, *Tolla*, *Toll'es*, *To'les*, *To'lium*, *Tol'lum*, *Spong'os*, *An'tias*, pl. *Anti'ades*, *Almonds of the ear*, *Almonds or Bulbs of the throat*, (F.) *Amygdale*, *Tonsille*, (Prov.) *Earkecker*. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSIL-GULLLOTINE, *Amygdalotome*.

TONSILLA, pl. *Tonsille*, *Tonsil*.

TONSILLÆ PESTILENTES, *Cynanche maligna*.

TON'SILLAR, *Tonsillar's*, (F.) *Tonsillaire*. Appertaining or relating to the tonsils.

TONSILLARUM GANGRÆNA, *Cynanche maligna*.

TONSILLE, *Tonsil*.

TONSILLIA, *Cynanche tonsillaris*.

TONSILLITIC, *Tonsilliticus*, (better *Tonsillar*.) Belonging or relating to the tonsils; as the 'tonsillitic branches of the glossopharyngeal nerve.'

TONSILLITIS, (*tonsilla*, and *itis*.) *Cynanche tonsillaris*.

TONSILLITOME, (*tonsilla*, and *τεμνω*, 'to cut.')

*Amygdalotome*.

TONSORIUS CUTLER, (*tonsor*, 'a barber,' and *cutler*, 'a knife,')

Razor.

TONUS, (τῶνος,) Tonic spasm—t. Trismus, Trismus.

TOODLE, Tooth.

TOOTH, (Sax. *toð*,) *Dens*, *Mor'dex*, *O'dous*, (Prov.) *Tootle*, (F.) *Dent*. The teeth, *Den'tes*, *Mord'ices*, are small, hard bodies fixed in the alveoli of each jaw, and serving to seize, and to cut, tear, and triturate, alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *coron* or *corona*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, *Odon'torrh'iza*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 incisors, 2 canine, 4 bicuspidati, and 6 molares. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cavi'tas Pul'pæ*, *Ca'vum Den'tis*, *An'trum den-*

*ta'le*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el*. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See Dentition. Researches by Retzius, Müller and others, have led them to believe that the ivory of the tooth, *Den'tine* or *Dentin*, *E'bur*, *Substantia os'sea* of Malpighi, *pro'per tooth sub'stance*, *bone of the tooth*, *os'seous sub'stance of tooth*, *toothbone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called, by Professor Owen, *calcij'erosus cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crus'ta petro'sa*, *cæmentum*, *cementum* or *cortical sub'stance*, commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the *cavitas pulpæ*. They gave it the name *Substantia ost'odea*. It is the *ma'teria tart'area* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horn'y sub'stance* of Blumenbach, the *osteedent'ine* of Owen, and the *sec'ondary dent'ine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTHACHE, Odontalgia—t. Bush, *Xanthoxylum fraxineum*—t. Tree, *Aralia spinosa*, *Xanthoxylum clava Herculis*.

TOOTHBONE, see Tooth—t. Edge. *Agacement des dents*, *Hæmodia*—t. Paste, *Dentifricium*—t. Rake, *Denticulapium*—t. Rash, *Strophulum*—t. Shell, dog-like, *Dentalium*.

TOPHACEOUS, *Tophaceus*, (F.) *Tophacé*; (from *tophus*.) Relating or belonging to tophus, —as 'a tophaceous concretion.'

TOPHACEOUS CONCRETION, *Tophus*.

TOPHUS, (τῶφος,) *To'phus*, 'a porous or friable stone.' *Osteo'tophus*, *Tophaceus Concre'tion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout, *Arthro'tophus*, (see *Calculi*, *arthritic*.) and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel, and chazaza.

TOPIC, *Top'icus*, (from *τοπος*, *locus*, 'a place.')

A local application; (F.) *Topique*. See Local.

TOPICUS, (τοπίκος,) Local, Topic.

TOPINARIA, *Talpa*.

TOPIQUE, Topic.

TÖP'LITZ or TEP'LITZ, MINERAL WATERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium; carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fah. Season, from the 1st of June to the 15th of September.

TOPOGRAPHICAL ANATOMY, (τοπος, 'a place or region,' and *γραφω*, 'to describe,') see Anatomy.

TOQUE, (a kind of hat,) *Scutellaria galericulata*.

TORCULAR, (from *torqueo*, 'to twist,')

*Tourniquet*. A press for wine, oil, or cider.

TORCULAR HEROPH'ILL, *Press of Herop'hillus*,

*Lecheion*, *Le'nos*, *Le'nium*, *Fourth Sinus*, (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it:—one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, (from *torqueo*, 'to twist,') Tourniquet.

TORDYL'IUM, (τορδύλιον.) *T. Officinale*, *Tordyl'ium*, (τορδύλιον,) *Seseli Cre'ticum seu Montanum*, (F.) *Séseli de Crète*. Family, Umbelliferae. Ser. Syst. Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TORE'NIA ASIAT'ICA, (after Olaf Toren, of Gothenburg, a pupil of Linnæus,) *Cala-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, *Geranium maculatum*, *Tormentilla*.

TORMENTIL'LA, (from *tormina*, for which it was used,) *T. erecta* seu *sylvestris* seu *officina'lis* seu *tuberosa*, *Fragaria tormentil'la officina'lis*, *Potentilla tormentil'la*, *Heptaphyllum*, *Consolida v'bra*, *Com'mon Tormentil*, *Up'right Sept'foil*, (F.) *Tormentille*. Ord. Rosaceæ. Ser. Syst. Icosandria Polygynia. The root, *Tormentilla* (Ph. U. S.), has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ʒj.

TORMENTUM, 'pain, suffering,' (from *torqueo*, 'to twist,') *Ileus*, *Intussusceptio*.

TORMINA, pl. of *Tormen*, *Strophus*, *Cœli'algia*, *Encœli'algia*, *Anile'ma*, *Anile'sis*, *Gripes*, *Mulligrubs*, *Fretting*, (F.) *Tranchées*, (from *torqueo*, 'I twist,') Acute colicky pains. Dysentery.

TORMINA CELSI, Dysentery — t. *Parturientium*, Pains, labour—t. *Post partum*, see Pains, labour.

TORNACULUM, (from *torquere*, 'to twist,') Tourniquet.

TOROS'ITAS, (from *torosus*, 'brawny,')—*torus*, 'brawn,') *Corpulentia carnos'a*, *Hab'itus athlet'icns*. Muscular strength.

TOROSUS, Muscular.

TORPEDO, (*torpeo*, 'to be torpid,') Narcosis.

TORPEFACTIO UNIVERSALIS, (*torpeo*, 'to be torpid,' and *facere*, 'to make,') *Holonarcosis*.

TORPEUR, Torpor.

TORPID, *Torpidus*, (F.) *Torpidè*, *Engourdi*, (from *torpeo*, 'to be sluggish,') Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, Torpor.

TORPIDUS, Narcotized, Torpid.

TORPOR, gen. *Torporis*, *Torpid'itas*, *Noth'otes*, *Parap'isis ex'pers*, *Torpid'ity*, (F.) *Engourissement*. State of a part which becomes numb, and almost incapable of motion. *Torpor*, *Torpid'ity*, *Torpid'ness*, *Torpid'itude* are also applied to a debilitated, sluggish condition of a part, or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

TORPOR, Narcosis — t. of the Colon, see Colon, torpor of the — t. *Intestinorum*, *Constipation* — t. *Soporificus*, *Nocar*.

TORQUAY, (pron. *Tork'ee*.) A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleak winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Tor'sio*, (from *torquere*, *tortum*, 'to twist,') The act of twisting. Torsion of the ex-

tremities of bleeding vessels — *Angios'trophè* — until the blood ceases to flow, is sometimes used to arrest hemorrhage.

TORSK, see *Oleum jecoris aselli*.

TORTE'LLA, *Erysimum*.

TORTICOL'IS, (*torquere*, *tortum*, 'to twist,' and *collum*, 'the neck,') *Torticol'is*, *Caput seu Collum obstip'um*, *Obstipa cerv'icis*, *Obstip'itas cap'itis* seu *Coll'i*, *Trachel'agra*, *Enta'sia Lor'is*, *Lor'is*, *Ce'phalalor'ia*, *Aneylod'erè*, *Aneylod'eris*, *Rhabocra'nia*, *Rhaban'chen*, *Rhabod'erè*, *Auchenorrh'euma*, *Rheumatis'mus coll'i* seu *cerv'icis*, *Stiff-neck*, *Wry'neck*, (Prov.) *Slab*, (F.) *Obstipité*. A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, (*torquere*, *tortum*, 'to twist, to wind,') *Hydraspis expansa*.

TORTUE, 'tortoise,' *Testudo*.

TORTURA ORIS, (from *torqueo*, 'to twist,') Canine laugh, *Neuralgia faciei*—t. *Oris* paralytica *Linnaei*, *Paralysis*, *Bell's*.

TOR'ULA CEREVIS'IAE, (from *torus*, 'a knot,') *T. Ace'ti*, *Suechironomyces* seu *Mycoderma cerevis'is*, *Cryptococcus fermentum* seu *cerevis'is*, (F.) *Champignon du ferment*, *Yeast plant*. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in fæces.

TORULUS GLANDIS, (dim. of *torus*, 'a fleshy part,') *Crown of the glands*.

TORUS, 'a fleshy part,' *Muscle* — t. *Manûs*, *Metacarpus*.

TOTA BONA, 'all good,' *Chenopodium bonum*, *Henricus*.

TOTSU KASO, *Sphæria Sinensis*.

TOTTY, *Vertiginosus*.

TO TUM CARNOSUM, 'all fleshy,' *Pancreas*.

TOUCH, *Tactus*, *Tactio*, *Ha'phè*, *Hap'sis*, *Tactio*, *Palpation*, (F.) *Toucher*, (from [L.] *to cere*, 'to touch,') One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active. See *Esaphe*, and *Palpation*.

To touch the mouth with mercury is to produce the constitutional effects of that agent, as evinced by the falling away of the gums, &c.

TOUCH-ME-NOT, *Impatiens fulva*.

TOUCH, ROYAL. It was at one time almost universally believed, in England, that the royal touch would remove *Serofula* or *King's Evil* (as it was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil. Medals of gold or silver were often suspended around the necks of the persons touched. These were called *touching* or *healing pieces*.

TOUCHE'ER, 'touch,' *Esaphe*, *Touch* — t. *Vaginal*, *Esaphe*.

TOUCHING PIECE, see *Touch*, royal.

TOUCHWOOD, *Boletus igniarius*.

TOULOUCOUNIN, see *Curapa touloucouna*.

TOUR DE MAÎTRE, 'a master turn or feat,' *Coup de maître*.

TOURBILLON VASCULAIRE, (from *tourbo*, gen. *tourbillon*, 'a whirlpool,') *Vasa vasorum*.

TOURNESOL, ([F.] *turner*, 'to turn,')

**sol**, 'the sun.'—a translation of ἡλιοτροπιον, *heliotropium*.) *Heliotropium Europæum*.

**TOURNIOLE**, (from *tourner*, 'to turn,' like *Rundwandl*.) *Paronychia*.

**TOURNIQUET**, (Prov. *toorniket* or *turniket*.) *Torcular*. *Torculum*, *Tornaculum*, *Proalum*, *Prælinum*, *Prælinum* seu *Prælinum arterialem*, *Verticillium*, *Fascia tortilis*, (from [F.] *turner*, 'to turn.') A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hæmorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

**TOUS-LES-MOIS**, 'every month.' *Am'ylum canna'cum*, *Conna* (Ph. U. S.), *Canna Starch*. A fecula obtained from the root of *Canna edulis*, which flowers every month. It resembles potato starch, and may be substituted for arrowroot. It is obtained from St. Kitts.

**TOUT**, Nates.

**TOUTE BONNE**, 'all good,' *Salvia selarica*.

**TOUTE ÉPICE**, 'all spice,' see *Myrtus pimenta*—*t. Sainte*, *Sanicula*.

**TOUX**, Tussis—*t. Bleue*, *Pertussis*—*t. Bronchique*, *Bronchial cough*, *Cough*, *tubal*—*t. Cavernense*, see *Cavernous respiration*—*t. Courtoise*, *Pertussis*—*t. Quintense*, *Pertussis*—*t. Tabaire*, *Bronchial cough*, *Cough*, *tubal*.

**TOW**, ([Sax.] *τορ*), *Stupa*.

**TOXÆMIA**, *Toxicohæmia*.

**TOXÆMIC**, *Toxicohæmic*, *Toxicæmic*, *Hæmatot'ic*, *Hæmatot'ic*, *Hæmotot'ic*, *Toxæmicus*, *Toxicohæmicus*, *Toxæmicus*, *Hæmatot'icus*, *Hæmotot'icus*, *Hæmatot'icus*. Relating or appertaining to a poisoned state of the blood.

**TOXÉMIE**, *Toxicohæmia*.

**TOXICÆMIA**, *Toxicohæmia*.

**TOXICARIA MACASSARIENSIS**, see *Upas*.

**TOXICAL**, *Poisonous*.

**TOXICATIO**, (from *toxicum*.) *Poisoning*.

**TOXICÉMIE**, *Toxicohæmia*.

**TOXICODENDRON**, (*toxicum*, and *δένδρον*, 'a tree,') *Rhus toxicodendron*.

**TOXICOHÆMIA**, *Toxicæmia*, *Toxæmia*, (F.) *Toxicohæmie*, *Toxicémie*, *Toxæmie*, (*toxicum*, and *αἷμα*, 'blood,') *Poisoning of the blood*.

**TOXICOHÉMIE**, *Toxicohæmia*.

**TOXICOID**, *Toxicoides*, (*toxicum*, and *εἶδος*, 'resemblance,') *Resembling poison*.

**TOXICOL'OGY**, *Toxicolog'ia*, (*toxicum*, and *λογος*, 'a description,') *A treatise on poisons*.

**TOXICOSES**, (G.) *Toxikosen*, (from *toxicum*, 'an arrow,' originally 'arrow poison,' and *οἷος*.) *A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system*.

**TOXICUM**, (*τοξικον*, from *τοξον*.) *Poison*, *Venom*.

**TOXIQUE**, *Poisonous*.

**TRABECULA**, (dim. of *trabs*, gen. *trabis*, 'a beam,') (F.) *Trabécule*, 'a small beam.' Applied to prolongations of fibrous membrane, for example, which form septa, as in the corpora cavernosa; to the medullary fibres, which form the commissures; and to the fleshy projections, which form the columnæ carneæ, &c.

**TRABECULA CEREBRI**, *Corpus callosum*.

**TRABECULÆ CARNEÆ**, *Columnæ carneæ*—*t. Cordis*, *Columnæ carneæ*—*t. Corporum cavernosorum*, see *Cavernous bodies*—*t. Splenis*, see *Spleen*—*t. Willisii*, *Chordæ Willisii*.

**TRABES CORDIS**, (pl. of *trabs*.) *Columnæ carneæ*.

**TRABS**, 'a beam,' *Penis*—*t. Cerebri*, *Corpus callosum*—*t. Medullaris*, *Corpus callosum*.

**TRACE**, *PRIMITIVE*, *Groove*, *primitive*.

**TRACHÆA**, (*τραχεια*, fem. of *τραχὺς*, 'rough,' *ατραχία*, 'understood,') (generally, however, accented *Trachæa*;) *Trachæa* seu *Trachæa arteria* (*τραχεια ατραχια*), *Trachæus*, *Bronchus*, *Aspera arteria*, *Fistula spiritalis* seu *pulmonalis*, *Cun'na*, *Syrin'ga*, *Syrinx*; the *Wind'pipe*, *Wo'sen*, *Weas'and*, *Wison*, *Wee'sel*, *Thro'tic*, (Sc.) *Thro'p'ill*, (Prov.) *Keel'corn*, *Ke'cker*, *Thro'p'le*, (F.) *Trachée*, *Trachée artère*; (composed of *αἶρ*, 'air,' and *τραχὺς*, 'to keep,') The trachea is a cylindrical, fibrocartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia*, which separate, one to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *An'nuli cartilagines*, *Segmenta cartilaginea*, *Orbes cartilaginei*, incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroideal; and 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

The breathing tubes of insects are termed *Trachææ*.

**TRACHEA ARTERIA**, *Trachea*.

**TRACHEE**, see *Trachea*.

**TRACHEAL**, *Trachæalis*, (F.) *Trachéal*. Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

**TRACHEAL GLANDS**. Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

**TRACHEALIA**, (from *trachea*.) *Cynanche trachealis*.

**TRACHEALIS**. The fibres of unstriped muscle, which pass from one portion of each of the tracheal cartilages to the other, at the posterior part of the trachea, have been so called by some anatomists. When they contract, they approximate the extremities of the cartilage; diminish the calibre of the trachea; and thus increase the velocity of the air forced through it, as in coughing; and facilitate the removal of any irritating substance in contact with the lining membrane.

**TRACHÉE**, *Trachea*—*t. Artère*, *Trachea*.

**TRACHEITIS**, (*trachea* and *itis*.) *Cynanche trachealis*.

**TRACHELAGRA**, *Torticollis*, (*τραχηλος*, 'neck,' and *αγρα*, 'seizure,') Also, *gout in the neck*.

**TRACHELIAN**, (from *trachelus*.) *Cervical*.

**TRACHELISM'US**, (from *trachelus*.) *A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head*.

**TRACHELITIS**, (*trachelus*, and *itis*.) *Cynanche trachealis*.

**TRACHELIUM AMERICANUM**, (from *trachelus*, having been used in throat affections,) *Lobelia cardinalis*.

**TRACHÉLO-ATLOÏDO-BASILAIRES**, *Rectus capitis lateralis*—*t. Atloïdo-occipitalis*, *Obliquus superior capitis*—*t. Basilaire*, *Rectus capitis in-*

ternus major—*t. Basilaire, petit*, Rectus capitis internus minor.

TRACHE'LODIAPHRAGMATIC, *Trachelo-diaphragmaticus*. The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises.

TRACHELODYN'IA, (*trachelus*, and *ὄδυνη*, 'pain,') Pain in the neck.

TRACHÉLO-MASTOÏDIEN, Complexus minor—*t. Occipital*, Complexus—*t. Scapulaire*, Levator scapulae.

TRACHELUS, Collum, Trachea.

TRACHE'OBRONCHITIS. Inflammation of the trachea and bronchia.

TRACHEOCELE, (*trachea*, and *κηλη*, 'a tumor,') Bronchocele.

TRACHEOPHONY, (*trachea*, and *φωνη*, 'voice,') Laryngophony.

TRACHEOPHTHISIS, see Phthisis laryngea.

TRACHEOPHYMA, (*trachea*, and *φύμα*, 'a swelling,') Bronchocele.

TRACHEOPYRA, (*trachea*, and *πυρ*, 'fever,') Cyananche trachealis.

TRACHEORRHAG'IA, *Hæmoptoë* seu *Hæmoptysis laryngea et trachealis*, (*trachea*, and *ῥήγνυμι*, 'to break forth,') Hæmorrhage from the trachea.

TRACHEOSTENO'SIS, (*trachea*, and *στενωσις*, 'contraction,') Contraction or narrowness of the trachea.

TRACH'EOTOME, (*trachea*, and *τεμνω*, 'to cut,') An instrument of the trocar kind, for opening the trachea.

TRACHEOTOMY, see Bronchotomy.

TRACHITIS, (*trachea*, and *ίτις*,) Cyananche trachealis.

TRACHOMA, gen. *Tracho'matis*, (from *τραχυς*, 'rough,') *Aspre'do*, *Aspritu'do*, *Pladar'otes*, *Asperin'do*, *Scabrit'ies*, *Gran'ular conjuncti'va*, *Gran'ular eye'lid*, (F.) *Aspérité des Paupières*. A roughness of the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated:—*T. sabulo'sum*, from sand, &c., getting between the eyelids; *T. carunculo'sum*, *Pladar'otes*, *Pladaro'sis*, *Morum pal'pebræ inter'næ*, from fleshy excrescences; and *T. herpet'icum*, from hard pustules on the inner surface of the eyelids. This last is, also, called *Fico'sis*, and *Pal'pebra fico'sa*.

TRACHYPHONIA, (*τραχυς*, 'rough, and *φωνη*, 'voice,') Roughness of the voice.

TRACT, *Trac'tus*, (from *trahere*, *tractum*, 'to draw out lengthwise,') A track or course; a region.

TRACT, OPTIC, see Optic nerves—*t. Respiratory*, see Respiratory tract.

TRACTATIO MANUARIA, (*tractare*, *tractatum*, 'to handle,') Diachirismus, Surgery.

TRACTORATION, (*trahere*, *tractum*, 'to attract, influence,') Perkinism, see Tractors, metallic.

TRACTATOIRES, (*tractare*, *tractatum*, 'to handle,') see Shampooing.

TRACTOR, (*trahere*, *tractum*, 'to draw,') Lever, *Tire-tête*.

TRACTORS, METAL'LIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractor'ation*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS, Tract—*t. Intestinalum*, Intestinal Tube—*t. Opticus*, see Optic nerves—*t. Respiratorius*, Respiratory tract.

TRACTUS SPIR'ALIS FORAMINULENTUS. Minute openings at the base of the modiolus, arranged

in a spiral manner, which transmit the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Ta'bulus central'is mod'oli*.

TRADESCANTIA VIRGIN'ICA, (after John Tradescant, gardener to Charles I.) *Spider'wort*; indigenous; Order, Commelinaceæ; flowering from May to August. The roots are demulcent.

TRAGACANTHIA, (*τραγος*, 'a goat, and *κανθα*, 'a thorn,') owing to its hirsute boughs.) *Gummi Tragacanthæ* seu *Astragal'ali Tragacanthæ*, *Gum Tragacanth*, *Gum Drag'on*. The concrete juice of *Astragal'us Tragacanthæ* or *Astragalus Ve'rus*, a native of Persia. Ord. Leguminosæ. *Sex. Syst.* Diadelphia Decandria. (F.) *Gomme Adragant*, *Adragant*, *Adragante*, *Adraganthe*. This gum is inodorous; nearly insipid; of a whitish colour; semitransparent and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA, *Tragea*—*t. Aromatica*, Pulvis cinnamomi compositus.

TRAGE'MA, gen. *Trage'mata*, (*τραγμα*, 'a sweetmeat,') Of old, in the plural, — *Trage'mata*, — it meant a dessert. Afterwards, like *Tragea*, it meant an aromatic powder, containing much sugar.

TRAG'ICUS, *Tragien* (Ch.), (from *Tragus*.) A small, flat, triangular muscle, which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, *Tragiens*.

TRAGOMASCHA'LIA, *Tragomas'chalê*, (*τραγος*, 'a goat, and *μαχαλη*, 'axilla,') The strong, unpleasant odour of the armpits.

TRAGOPHONIA, (*τραγος*, 'a goat, and *φωνη*, 'voice,') Egophony.

TRAGOPO'GON, *Ba'ba hir'ci*, (*τραγος*, 'a goat, and *πωγων*, 'beard,') A genus of plants; Ord. Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc*; of which the roots of the *Tragopo'gon porrifolium*, *Sal'sifi*, *Sal'sify*, *Sal'sify*, *Oysterplant*, *Oysterroot*, *Veg'etable oyster*, (F.) *Salsifis* on *Cercifis*; and the young shoots of the *T. pratens*, *Mead'ow Sal'sifi*, *Com'mon Goat's Beard*, (F.) *Salsifis des prés*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, (*τραγος*, 'a goat, and *σελινον*, 'parsley,') *Pimpinella saxifraga*—*t. Angelica*. *Ligusticum podagraria*—*t. Magnus*, *Pimpinella magna*—*t. Majus*, *Pimpinella magna*—*t. Saxifraga*, *Pimpinella magna*.

TRAGUS, (*τραγος*, 'a goat,') from its being furnished, in some persons, with hair, like the beard of a goat.) *Hir'cus*, *Hir'quus*. A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goatlike smell of the axillæ.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINASSE, (from *trainer*, 'to trail,') Polygonum aviculare.

TRAINING, ([F.] *trainer*, from *trahere*, 'to draw,') (F.) *Entraînement*. A system of treating man and animals, so as to develop their full physical powers. It is practised especially as regards the prize-fighter and the race-horse, and appertains to what have been termed by the French *Organoplasties*.

TRAITEMENT, ([L.] *tractare*, [F.] *traiter*, 'to treat,') Curatio—*t. Pa'ntif*, see Palliation.

TRAME, (*τραμη*), Perinæum.

TRAMIS, (*τραμς*), Perinæum.

TRANCE, Catalepsy, Ecstasis—*t. Death*, see Asphyxia.

TRANCHÉES, (from *transcindere*, 'to cut across,') *Tormina*—*t. Uterines*. Pains, after.

TRANS, .n composition, through, across, over, or beyond.

TRANSFIGURATIO, (*trans*, and *figurare*, *figuratum*, 'to form,') Transformation.

TRANSFORMATIO, *Transforma'tio*, *Transfigura'tio*, *Transmuta'tio*, *Metabolē*, (*trans*, and *forma*, 'form,') Change of form.

TRANSFORMATIONS DE TISSU (F.). The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFUSION, *Transfu'sio*, *Metach'ysis*, (from *transfundere* (*trans*, and *fundere*, *fusus*, 'to pour,') To pour from one vessel into another.

TRANSFUSION OF BLOOD, *Transfusio Sanguinis*, *Cu'ra Medea'na*, *Methuachym'ia*, *Hematometach'ysis*, *Hemometach'ysis*, *Diach'ysis*, *Transplanta'tio medica no'ra*, *Chirur'gia transfusio'ria*, *Ectochamato'sis*. The act of passing the blood of one animal into the veins of another: an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

TRANSLATION, (*trans*, and *ferre*, *latum*, 'to carry,') Metastasis.

TRANSMISSIBILITY, (*trans*, and *mittere*, *missum*, 'to send,') see Sensibility.

TRANSMUTATIO, (*trans*, and *mutare*, *mutatum*, 'to change,') Transformation.

TRANSPIRATIO, (*trans*, and *spirare*, *spiratum*, 'to breathe,') Perspiration—t. Unilatera, Hemidiaphoresis.

TRANSPIRATOIRE, Perspiratory.

TRANSPANTATIO, (*trans*, and *plantare*, *plantatum*, 'to plant,') *Metaphyte'ia*. A pretended method of curing diseases, devised by Paracelsus—by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, Morioplastic.

TRANSPLANTA'TIO DENT'IS, *Insi'tio dentis*. The act of transplanting a tooth from one person to another.

TRANSPLANTATIO MEDICA NOVA, Transfusion.

TRANSPORT, (*trans*, and *portare*, 'to carry,') Delirium.

TRANSPOSITIO, (*trans*, and *ponere*, *positum*, 'to place,') Metathesis, Transposition.

TRANSPOSIT'ION, *Transposit'io*, *Metath'e'is*. Change of situation.

TRANSPOSITION OF THE VIS'ERA, *Polype'ria promiscua translati'va*, *Intus in'er'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, (*trans*, and *sudare*, *sudatum*, 'to sweat,') Diapedesis, Transudation.

TRANSUDATION, *Transuda'tio*, (F.) *Trans-udation*. The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exosmose.

TRANSVERSAIRE, Transverse—t. *Épineux*, *Transversalis dorsi*—t. *Épineux du cou*, *Semispinalis colli*—t. *Épineux du dos*, *Semispinatus dorsi*—t. *Grêle*, see Sacrolumbalis.

TRANSVERSAL DE LA CONQUE, *Transversalis auris*—t. *du Nez*, *Compressor nasi*—t. *des Orteils*, *Transversus pedis*.

TRANSVERSALIS, (from *transverse*,) Transverse.

TRANSVERSALIS ABDOM'INIS, (F.) *Lombo-abdominal*, (Ch.) *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before

than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebrae; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTIQUS PRIMUS, *Rectus capitis lateralis*—t. *Collateralis colli*, see *Sacrolumbalis*.

TRANSVERSALIS COL'LI, *Transversalis Ma'ior colli*, *Portion of the Sacrospinal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebrae of the neck; and to those of the four or five first dorsal. It extends the vertebrae of the neck, and inclines them to its side. See *Semispinalis colli*.

TRANSVERSALIS DORSI, *Transversospinal'is*, *Multif'idus Spi'næ*, *Lumbocervical portion of the Spinal* (Ch.), (*Transverso-spinal'is Lumborum*, *Transverso-spinal'is Dors'i*, *Transverso-spinal'is Col'li*), *Musculus sac'cer*, *Spina'les et transversales lumborum*, *Semispinal'is inter'na* sive *Transverso-spinal'is col'li pars inter'na* (Winslow), *Lombodorsi-spinal*, &c., (F.) *Transversaire épineux*. This muscle, usually called, by English anatomists, *Multif'idus spi'næ*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, *Compressor naris*.

TRANSVERSARIUS, *Transverse*.

TRANSVERSE, *Transver'sus*, *Transversa'lis*, *Transversarius*, (F.) *Transverse*, *Transversaire*, (from *trans*, 'across,' and *vertere*, *versum*, 'to turn,') That which runs across: also, that which relates to the transverse processes of the vertebrae.

TRANSVERSE ARTERY OF THE FACE, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE FISSURE, see Liver—t. *Fossa*, see Liver—t. *Ligament of the Atlas*, *Annular ligament*.

TRANSVERSE PERINEAL ARTERY, *Ure'throbulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the *transversus perinæi* muscles, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

TRANSVERSE PROC'ESSES OF THE VERTEBRÆ, *Diapoph'yses of Owen*, (F.) *Apophy'as transversæ des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebrae.

TRANSVERSE SUTURE, *Sut'ura transversa'lis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE, Transverse—t. *de l'Abdomen*, *Transversalis abdominis*—t. *de l'Oricule*, *Transversus auris*—t. *du Périnée*, *Transversus perinæi*.

TRANSVERSOSPINAL, *Semispinalis colli*, *Semispinalis dorsi*—t. *Spinalis*, *Transversalis*

dorsi—t. Spinalis colli, Semispinalis colli—t. Spinalis dorsi, Semispinalis dorsi.

TRANSVERSUS, Transverse.

TRANSVERSUS AURIS, *Transversus Auriculæ*, (F.) *Transverse de l'Oriclé*, (Ch.) *Transversal de la Cinque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PE'DIS, *Scandula'rius*, (F.) *Transversal des Orteils*, *Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

TRANSVERSUS PERINE'I, *Levator A'ni parvus*, (F.) *Ischio-périnéal*, (Ch.), *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbocavernosus. The use of this muscle is, — to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle, Santorini has given the name *Ure'thræ Elevator* seu *Ejculator*.

TRANSVERSUS PERINE'I ALTER, *Prostat'icus inferior*. A small muscle which occasionally accompanies the last.

TRAPA NA'TANS, *Trib'alis*, (F.) *Macre flottante*, *Noix ou Châtaigne d'Eau*. Ord. Onagraceæ. See *Syst. Tetrandria Monogynia*. The plant which affords the *Noces Aquaticæ*, *Trib'uli aquatici*, *Caltrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhoea from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPEZA, (*τραπέζα*), Mensa.

TRAPÈZE, Trapezium, Trapezus.

TRAPEZIUM OS, (*τραπέζιον*, 'a trapezium.') So called from its shape. *Os multan'gulum* seu *polygonum majus*, (F.) *Os trapèze*. The first bone of the second row of the carpus. It is articulated above with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPEZIUS, *Cuculla'ris*, (F.) *Dorso-scapulien*, (Ch.), *Trapèze*, *Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebra; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAPEZOID, (*τραπέζιον*, 'a trapezium,' and *eidos*, 'shape or resemblance,') Trapezoides.

TRAPEZOID LIGAMENT, *Ligamentum trapezoid'es*. The anterior part of the coracoclavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely between the acromion process and clavicle.

TRAPEZOÏDES OS, *Os multan'gulum* seu *polygonum minus* seu *pyramida'le carpi*. The second bone of the second row of the carpus — so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRUBENKUR, Grape cure.

TRULISMUS, (*τραυλισμος*), see Balbuties, and Blæsitas.

TRULOTES, (*τραυλότης*), see Blæsitas.

TRAUMA, gen. *Traumat'is*, (*τραυμα*, gen. *τραυματος*.) Wound.

TRAUMAT'IC, *Traumat'icus*, *Vulnera'rius*, *Vulnerary*, (F.) *Traumatique*, (*τραυματικός*, from *trauma*.) Anything relating to a wound.

TRAUMATICA, Detergents, Vulneraries.

TRAUMATICINE, (from *trauma*.) Liquor Guttapercheæ.

TRAUMATICUS, Traumatic, Vulnerary.

TRAUMATISM, *Traumat'ismus*. The condition of the organism occasioned by a grave wound.

TRAUMATOCOMIUM, (*trauma*, and *κομω*, 'I take care of.') An hospital for the reception of the wounded.

TRAUMATOPYRA, *Febris traum'ica*, (*trauma*, and *πυρ*, 'fever.') A wound fever, or fever consecutive to a wound.

TRAVAIL, ([F.] *travailler*, 'to labor,') Parturition.

TRAVAIL D'ENFANT, 'child labor,' Parturition.

TRAVELLER'S JOY, Clematis vitalba.

TREACLE, (from *θρακία*.) (F.) *Thériaque*, (old E.) *Triacle*, Melasses, Theriaca—t. English, Teucrium chamædryes—t. Venice, Theriaca.

TREAD, Cicatricula—t. of the Cock, Mole-cule.

TREATMENT, (from [L] *tractare*, [F.] *traiter*, 'to treat,') Curatio.

TREATMENT, DRY. One in which the patient is almost wholly, if not wholly, restricted from the alimentary use of fluids: a valuable *modus medendi* in inflammatory and hemorrhagic conditions.

TREE, ELK, *Andromeda arborea*—t. of Heaven, *Ailanthus glandulosa*—t. of Life, *Thuya occidentalis*—t. Sour, *Andromeda arborea*.

TRÉFLE DE CASTOR, (from [L.] *trifolium*, from *tri*, and *folium*, 'a leaf,') *Menyanthes trifoliata*—t. d'Eau, *Menyanthes trifoliata*—t. des Marais, *Menyanthes trifoliata*.

TREFOIL, *Hepatica triloba*—t. Bean, stinking, *Anagyris*—t. Marsh, *Menyanthes verna*—t. Shrubby, *Ptelea trifoliata*—t. Sour, *Oxalis acetosella*—t. Water, *Menyanthes trifoliata*.

TREMA, (*τρημα*), Foramen, Vulva.

TREMBLEMENT, Tremor—t. *Métallique*, see Tremor.

TREMBLES, Milksickness.

TREMBLING, Tremor—t. Fevers, Intermittent fever.

TREMELLA AURICULA JUDÆ, (from *tremere*, 'to tremble,') *Peziza auricula*.

TRE'MOR, *Trepidat'io*, *Syn'clonus Tre'mor*, *Tro'mospas'mus*, *Tro'mus*, *Tren'bling*, (F.) *Tremblement*, (from *tremere*, 'to tremble,') Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement*

*métallique; Tremor metallicus.* Tremor seems to resemble paralysis more than convulsion. See Paralysis agitans, and Pavitatio.

**TREMOR CORDIS, Hippus, Palpitation**—t. Metallicus, see Tremor—t. Potatorum, see Delirium tremens—t. Purring, *Frémissement catinaire.*

**TREPAN', Trepanum, (τρῆπανον, Trép'anon, Trip'anon, Terebell'a, Pereter'ium, Peretor'ium, Sarp'ra versat'ilis, Chaen'icis, Chanic'ion, Ter'ebru, Ter'etron, Tere'trium, Vertib'ulum, (F.) Trépan, (from τρεπω, 'to turn,' or from τρηπω, 'to perforate,') A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trepan* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits,—as the crown, the *Trépan perforatif* or *Perite'ron*, the *T. exfoliatif* or *Desquamato'rium trepanum*, and the *T. abruptis'ta.* 'To *trepan*' is to use the trepan.**

In Great Britain and the United States this instrument has been superseded by the trephine, which is more manageable.

**TREPANATIO, Trepanning.**

**TRÉPANATION, Trepanning.**

**TREPANG, Biche de Mer.**

**TREPAN'NING, Terebra'tio, Anatre'sis, Cephalotryp'e'sis, Craniotryp'e'sis, Trepana'tio, Tryp'e'sis, Tre'sis, Pri'sis, Pris'mus, Fora'tio, (F.) Trépanation.** The methodical application of the trepan.

**TREPANUM, Trepan.**

**TREPHINE', (from τρεπω, 'to turn,') The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centrepin.* The centrepin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw. See Trepan. 'To *trephine*' is to use the trephine.**

**TREPIDATIO, (trepidare, trepidatum, 'to be agitated,') Tremor**—t. Cordis, Cardiotorum.

**TRÉPIED (tripod), CÉLIAQUE, see Cœliac artery**—t. Vital, Tripod, vital.

**TREPON'DO, (tres, 'three,' and pondus, 'a pound,') A weight of three pounds.**

**TRE'SIS, (τρῆσις, from τρεω, 'I bore,') Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.**

**TRESIS, Trepanning, Wound**—t. Causis, Burn—t. Punctura, Puncture—t. Vulnus, Wound—t. Vulnus laceratum, see Laceration—t. Vulnus simplex, Cut.

**TRESSAILLEMENT, (trans, 'beyond,' and salio, 'to leap,') Shuddering.**

**TRESSO'RIA, (low Latin.) Epsi'sion.** A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

**TRI, (τρι, in composition, three.**

**TRIACLE (old E.), Melasses.**

**TRIAL BY BIER'RIGHT.** An ordeal, founded on a superstition formerly prevalent, that the wounds of a murdered person would bleed afresh if the body were touched ever so lightly, in any part, by the murderer.

**TRIANGLE MÉDULLAIRE, (tri, and angulus, 'an angle,') Fornix.**

**TRIANGLE, VESTICAL, see U'tinary Bladder.**

**TRIANGLES, CERVICAL, see Cervical.**

**TRIANGULAR, Trig'nos, Triangula'ris, (F.) Triangula'ire.** That which has three angles.

**TRIANGULAR or INFRAPI'BIAN LIG'AMENT, Ligament'um triangula'ris seu infra'pubia'num, is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens. Also, a ligament extending from the coracoid to the acromial process of the scapula.**

**TRIANGULARIS, Depressor anguli oris**—t. Coeeygis, Coccygeus—t. Nasi, Compressor naris.

**TRIANGULA'RI'S STER'NI, Sternocostal, (Ch.), Pectora'lis inter'na.** A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

**TRIBALUS, (τριβαλος, Trapa natans.**

**TRIBAS, gen. Tri'badis, (τριβας, (F.) Tribade, (from τριβω, 'I rub,') Fric'trix, Fric'trix, Futa'trix, Mas'enla, Subogita'trix, Subigita'trix, Etaris'tria.** A female whose clitoris is so large as to cause her to be regarded as a hermaphrodite. One who acts as a male with another female.

**TRIBASIC, (from tri, and basis, see Salt.**

**TRIBULI AQUATICI, (pl. of tribulus, from τριβαλος, see Trapa natans.**

**TRIBUTUM LUNARE, 'lunar or monthly tribute,' Menses**—t. Menstruum, Menses.

**TRICE, (from τριξ, gen. τριξος, 'a hair,') Plica**—t. Incuborum, Plica—t. Scroforum, Plica.

**TRICAGO, Teucrium chamaedrys.**

**TRICAUDALIS, (tri, and cauda, 'a tail,') Retrahens auris.**

**TRICEPH'ALUS, (tri, and κεφαλη, 'head,') A monster with three heads.**

**TRICEPS, gen. Tricip'itis, (tri, and caput, 'head,') A name given to muscles that have three fleshy bundles at one of their extremities.**

**TRICEPS ADDUC'TOR FEM'ORIS.** Under this appellation are comprehended three distinct muscles; *Adductor brevis, A. longus, and A. magnus.*

**TRICEPS AURIS, Retrahens auris**—t. Brachialis, Triceps extensor cubiti.

**TRICEPS CRURAL, Triceps cruris.**

**TRICEPS CRU'RI'S, Femora'lis, (F.) Trifémoro-rotulien, (Ch.) Crural, Trifémoro-tibi-rotulien, Triceps crural ou de la cuisse, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz.: 1. A middle fasciculus (the *crura'lis* of most anatomists). 2. An external fasciculus (the *vastus externus*); and 3. An inner fasciculus (the *vastus internus*). It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.**

**TRICEPS DE LA CUISSE, Triceps cruris.**

**TRICEPS EXTEN'SOR CU'BITI, Tri'ceps brachia'lis, (F.) Scapulo-huméro-olecranién, (Ch.) Triceps brachial.** This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—long head of the *biceps externus* of Douglas, *Ancone'us major* of Winslow,—arises from the anterior extremity of the inferior costa of the

scapula, near its neck, and below the origin of the teres minor. The second head, or short head of the *biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head.—*Brachialis externus* of Douglas, *Anconeus intermus* of Winslow.—the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, Adductor magnus—t. Minor, Adductor longus femoris—t. Secundus, Adductor brevis.

TRICHÆ INCUBORUM, (Σφιζ, gen. τριχας, 'a hair,' and *incubi*, 'the Fauns.' [?]) Plica.

TRICHANGIA, (*tricho*, and *αγγια*, 'vessels,') Capillary vessels.

TRICHANGIECTASIA, *Angiectasia*, *Trichocystis*, (*tricho*, *αγγια*, 'a vessel,' and *εκτασις*, 'dilatation,') Morbid dilatation of the capillary vessels.

TRICHAUXË, (*tricho*, and *αυξη*, 'increase,') Increase in the quantity and size of the hair, without change of texture.

TRICHERA ARVENSIS, (from Σφιζ, gen. τριχας, 'hair,') Scabiosa.

TRICHIA, (from Σφιζ, gen. τριχας, 'hair,') Entropion.

TRICHIASIS, *Trichiasis*, *Trichiasis*, (from Σφιζ, gen. τριχας, 'hair,') *Morbus pilla'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pili'nic'io*. It must be regarded as a variety of *Catur'rhœus vesic'æ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty: a disease attributed, by Aristotle, to a hair swallowed by accident, and carried to the breasts through the circulation; and 3dly, To inversion of the eyelashes. See Entropion.

TRICHIASIS LACTEA, Infarctus mammae lacteus.

TRICHILIA EMETICA, *Elcoja*. A tree, Order, Meliaceæ, common on the mountains of Yemen and in Senegal. The fruit is used by the Arabs as an emetic. The ripe seeds are formed with sesamum oil into an ointment for the itch.

TRICHILIA TRIPOLI'YA, a bush of Curaçoa, a decoction of the roots of which is used to promote abortion.

TRICHINA SPIRALIS, (from Σφιζ, gen. τριχας, 'hair,' from its small size,) *Pseudalius trich'ina*. A small species of entozoa, Fam. Nematodea, discovered in the muscles of voluntary motion. Trichinæ consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. Küchenmeister regarded them as the primitive state of *Trichocephalus dispar*; but this has not been confirmed. When taken with the food, they multiply in the intestines and then migrate to the muscles. No symptoms have, as yet, been observed to be pathognomonic of their presence in the muscles. It would appear, however, that they may be the cause of the morbid phenomena caused by eating the flesh of animals in which they existed, and may be the cause of sausage poisoning, see *Allantotoxium*, and of the poisoning produced by eating pork and ham. The disease thus induced has been called *Trichin'iasis* or *Trich'ina disease*.

TRICHINIASIS, see *Trichina spiralis*.

TRICHIOSIS, (from Σφιζ, gen. τριχας, 'hair,') Trichiasis—t. Distrix, Distrix.

TRICHIS MUS, *Capilla'tio*, *Fissu'ra pilla'ris*. A capillary fracture, fissure, or crack.

TRICHIURIA, (*tricho*, and *ουρα*, 'tail,') *Trichocephalus*.

TRICHO, (Σφιζ, gen. τριχας, 'a hair,') in composition, hair.

TRICHOCEPHALE DE L'HOMME, *Trichocephalus*.

TRICHOCEPHALUS, *Trichocephalus dispar*, (*tricho*, and *κεφαλη*, 'head,') *Trichu'ris*, *T. vulga'ris* seu *intestina'lis*, *As'caris trichu'ria*, *Trichu'ria*, *Trichocephalus* seu *Mastigo'des hom'inis*, *Long thread-worm*, (F.) *Trichocephale de l'homme*. A worm, from an inch and a half to two inches long; the head acute: the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICHOCIRCUS, (*tricho*, and *κυκλος*, 'a dilated vessel,') *Triehangiectasia*.

TRICHOG'ENOUS, (*tricho*, and *γενος*, 'I generate,') Hair-forming: as a '*trichogenous* remedy,—one that promotes the growth of hair.

TRICHOLOBIS, (*τριχολαβις*, from *tricho*, and *λαβωω*, 'to seize hold of,') *Madisterium*.

TRICHOLOBIUM, (*τριχολαβιον*,) *Madisterium*.

TRICHOLOGIA, (*tricho*, and *λογος*, 'I collect or pluck,') *Carphologia*. See *Trichology*.

TRICHOLOGY, *Tricholog'ia*, (*tricho*, and *λογος*, 'a description,') A treatise on the hair.

TRICHOMA, gen. *Trichom'atis*, (from Σφιζ, gen. τριχας, 'hair,') *Capillamentum*, *Plica*.

TRICHOMANES, (*tricho*, and *ματος*, 'thin,') *Asplenium trichomanoides*—t. *Crenata*, *Asplenium trichomanoides*.

TRICHOMAPHYTE, *Trichomoph'yton*, (*trichoma*, 'plica,' and *φυτον*, 'a vegetable,') A cryptogamous growth, found in plica, and said, by some, to be its cause. *Myco'derma plicæ*.

TRICHOMATION, (*τριχωματισον*,) *Capillamentum*.

TRICHOMATOSE HAIR, (from *trichoma*,) *Plica*.

TRICHOM'ONAS, *Trichom'onad*, (*tricho*, and *monad*,) An animalcule found by M. Donné in the mucus of the vagina, where cleanliness had not been attended to, and to which he has given the name *Trichom'onas vagina'lis*. By some it is considered to be nothing more than ciliated epithelium separated from the uterus.

TRICHOMYCES DECALVANS, (*tricho*, and *μυκης*, 'fungus,') see *Porrigo decalvans*—t. *Tonsurans*, see *Porrigo decalvans*.

TRICHONOSIS, *Porrigo*—t. *Furfuracea*, *Porrigo decalvans*—t. *Plica*, *Plica*—t. *Poliosis*, *Poliosis*.

TRICHON'OSUS, (*tricho*, and *νοσος*, 'disease,') A disease of the hair.

TRICHOPHY'IA, *Trichophyt'ica*, (*tricho*, and *φυειν*, 'to grow,') Remedies that promote the growth of the hair.

TRICHOPHYTON, (*tricho*, and *φυτον*, 'a vegetable,') see *Plica*—t. *Decalvans*, see *Porrigo decalvans*—t. *Sporuloides*, see *Fungus*—t. *Tonsurans*, see *Fungus*, and *Porrigo decalvans*.

TRICHOSANTHES AMARA, (*tricho*, and *ανθη*, 'a flower,' from the ciliated corolla,) Order, Cucurbitaceæ; a plant of India; the seeds are bitter and astringent, sometimes emetic. In Jamaica, it is considered to be a poison, and is used for killing rats.

TRICHOSANTHES CORDA'YA. The root is used by the natives of India as a substitute for *Calumba* root.

TRICHOSANTHES OCCURER'INA. The fruit is considered in India to be anthelmintic.

TRICHOSANTHES INCISA, *Gashed Trichosanthos*, of the forests of India. The fruit is esteemed to be poisonous. Pounded and intimately blended with cocoa nut oil, it is issued in India as an application to offensive sores of the ears, and to oæna.

TRICHOSANTHES VILLO'SA, of Java. The fruit acts like colocynth.

TRICHOSCHISIS, (*tricho*, and σχίζω, 'to split,') Schizotrichia.

TRICHO'SIS, *Pila'ræ ma'lum*, (from Σριξ, gen. τριχως, 'hair,' and *osis*.) Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHOSIS, Entropion, Trichiasis.—t. Area, Por-rigo decalvans —t. Athrix, Alopecia —t. Distrix, Distrix—t. Furfuracea, Porrigo furfurans—t. Hirsuties, Hirsuties—t. Plica, Plica—t. Poliosis, Poliosis—t. Setosa, Hyst-trichiasis.

TRICHOTON, (*τριχωτος*, 'covered with hair,') Scalp.

TRICHURIS, (*tricho*, and *ουρα*, 'a tail,') Trichocephalus.

TRICLISPERMA GRANDIFLORA, (*Σριξ*, 'hair,' and *σπέρμα*, 'seed,') *Polygala paucifolia*.

TRICUSPID, *Tricus'pis*, *Tricus'pida'lis*, *Tricus'pida'tus*, (*tri*, and *cuspidis*, gen. *cuspidis*, 'a cusp, a point,') That which has three points.

TRICUSPID VALVES, *Val'vulæ Tricus'pides* seu *triglo'chines* seu *trisol'cæ*, are three triangular valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendinæ, which set out from the columnæ carnæe of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRICUSPIS, gen. *Tricus'pides*, Tricuspid.

TRIENCEPHALUS, *Triocéph'alus*, (F.) *Trien-céphale*, *Triocéphale*, (*tri*, and *εγκεφαλος*, 'the encephalon,') A monster wanting three cephalic organs of sense,—smell, hearing, and vision.

TRIENS, *Un'ciæ quat'vor*. (From *tri*, 'three,') The third part of a pound. Four ounces, Troy.

TRIFACIAL, Trigemini.

TRIFÉMORO-ROTULIEN, *Triceps eruris*—t. *Tibi-rotulien*, *Triceps cruris*.

TRIFOLIUM ACETOSUM, (*tri*, and *folium*, 'a leaf,') *Oxalis acetosella*—t. *Aquaticum*, *Menyanthes trifoliata*—t. *Aureum*, *Hepatica triloba*—t. *Corvinum*, *Empatorium cannabinum*—t. *Fibrinum*, *Menyanthes trifoliata*—t. *Hepaticum*, *Hepatica triloba*.

TRIFOLIUM MELILO'TUS OFFICINA'LIS, *T. offic'i-nal'is* seu *odora'tum* seu *caball'num*; (from *tri*, and *folium*, 'a leaf,') *Melilotus*, *Melilotus cit'rina*, *Lot'us sylv'es'tris*, *Ser'tula Camp'ana*, *Coro'na re'gia*, *Common mel'ilot*, (F.) *Métilot*. Ord. Leguminosæ. *Sec. Syst. Diadelphia Decandria*. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, gylsters, &c.

TRIFOLIUM OFFICINALE, *T. melilotus officinalis*—t. *Paludosum*, *Menyanthes trifoliata*—t. *Palustre*, *Menyanthes trifoliata*.

TRIGASTRIC, *Trigas'tricus*, *Triven'ter*, (*tri*, and *γαστρ*, 'belly,') That which has three bellies. An epithet for muscles so circumstanced.

TRIGEMINI, *Tergem'ini*, (*tri*, and *gem'inus*, 'double,' 'threefold,' 'triplets,') The *fifth pair of nerves*, *Ner'vi divi'si* seu *gustato'rii*, *Ner'vus quin'tus* seu *tremel'tus* seu *mix'tus* seu *sympathet'icus* *me'dius* seu *sympath'ic'us* *me'dius* seu *anon'y-mus* seu *inno'mina'tus*, *Par'trigem'inus* seu *quin'tum* *ner'orum* *cer'bra'lium* seu *tri'um* *funiculo'rum*, *Trifa'cial*, (F.) *Nerf gustatif inno'miné*, *Nerf*

*à trois cordes*, *Nerf trij'mneau*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion—the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first* or *ophthalmic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third—the *ma'nducatory* or *mas'ticatory*—is wholly motoriferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, (*τριγωνον*, 'a triangle,') Fornix—t. *Vésical*, see Urinary Bladder.

TRIGONELLA FENUM, *T. Fœ'nium Gra'cum*, (dim. of *τριγωνον*, 'a triangle, from the shape of its flower.) *Fœ'ngreek*, *Fœ'ngreek*, *Fœ'niu. Gra'cum*, *Bu'ceras*, *B. Fœ'num Gra'cum*, *Car'phos*, *Ægoc'eras*, (F.) *Fœ'ngrec*, *Sénégrain*. Ord. Leguminosæ. *Sec. Syst. Diadelphia Decandria*. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONOS, (*τριγωνος*,) Triangular.

TRIGONUM OLFACTORIUM, 'olfactory triangle,' see Mamillary eminence.

TRIGONUM VESICÆ, see Urinary bladder.

TRIGONUS LIENTAUDI, (*τριγωνον*,) see Urinary bladder—t. *Vesicæ*, see Urinary bladder.

TRIJUMEAUX, (*tri*, and *jumeau*, 'a twin,') Trigemini.

TRILLIUM LATIFOLIUM, (from *trilix*, 'triple,' its parts being chiefly in threes.) *Broad-leaf Bethroot*, *Beth'root*, *Rattlesnake root*, *Wake'Robin*, *Cough'root*, *Ind'ian Balm*, *Ground Lily*, *Jews' Harp*, *Ind'ian Sham'rock*, *Pariswort*, *True-love*. Ord. Trilliaceæ. *Sec. Syst. Hexandria Trigynia*. A plant peculiar to North America, which blossoms in the spring. The root is asstringent.

There are many species of Trillium, all of which possess the same properties.

TRINTANELLE MALHERBE, *Passerina tartonraira*.

TRIOCÉPHALE, Tricephalus.

TRIOCEPHALIA, Aprosofia, see Triencephalus.

TRIOCEPHALUS, Triencephalus.

TRIOR'CHIS, (*tri*, and *ορχις*, 'a testicle,') One who has three testicles.

TRIOSTESPERMUM, Triosteum.

TRIOSTEUM, *T. Perfolia'tum* seu *ma'jus*, (*tri*, and *στέρον*, 'a bone,' in allusion to the three bony nuts;) *Triosteospermum*, *Bas'tard Ipecacuan'ha*, *Fœ'ver Root*, *Fœ'ver'wort*, *Tink'er's weed*, *Horse gin'seng* or *gen'tian*, *Ip'ecac.*, *Wild Cof'fee*, *White gin'seng*, *Gen'tian*, *White Gen'tian*, *Sweet Bit'ter*. Indigenous; Ord. Caprifoliaceæ. In very large doses, *Triosteum* (Ph. U. S.) proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

TRIOSTEUM AUGUSTIFOLIUM, *T. micus*, has similar virtues.

TRIPLE DE ROCHE, 'rock tripe.' Different lichens—*Rock li'chens*, *Stone moss*—of the species

Gyrophora, inhabiting the Arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHARMACUM, (τρεφαρμακον, from *tri*, and φαρμακον, 'a medicine.') A medicine composed of three ingredients.

TRIPLET, (*triplex*, 'triple.')

One of three children born at the same accouchement or gestation. Also, relating to triplets—as a 'triple conception.'

TRIPLET MONSTERS, *Mon'stra triplicia* seu *tripem'ina*, are such as have parts of the body tripled. They are rare.

TRIPPOD, VITAL, (τριπος, from *tri*, and ποσ, gen. ποδs, 'foot.')

(F.) *Trépied vital*. The heart, lungs, and brain have been so called, as their united action is necessary for the maintenance of life.

TRIPSIS, (τριψις,) Contusio, Trituration.

TRIPUDIATIO SPASTICA, (*tripudiare*, *tripudiatum*, 'to leap, to dance.')

Chorea.

TRIPUS, ('tripod,') CELLIACUS seu HALLERI, see *Cœliac artery*.

TRIQUE-MADAME, *Sedum album*.

TRIQUETRA OSSA, (*triquetrus*, 'three cornered.')

Wormiana ossa.

TRIQUESTRUM, (OS,) Cuneiform (bone.)

TRISMUS, (τρισμα, from τριζω, 'I gnash.')

*Enta'sia* seu *To'nus Trismus*, *Capis'trum*, *Mas'ticatory spasm of the face*, *Lock'ed Jaw*, *Spas'mus* seu *Ri'gor* seu *Tet'anus maxill'æ inferio'ris*, *Gnathospas'mus*, *Stomatospas'mus*, (F.) *Mal de Malchoire*. Spastic closure of the under jaw, a partial tetanus, arising from erethism of the masticatory or motor branch of the fifth pair of nerves. Cullen makes two varieties—*T. nascentium* seu *neonatorum*, *Nineday fits*, (F.) *Sarrête*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

In the West Indies and in South America, *Trismus nascentium* is called *Seven days' disease*, (F.) *M. de sept Jours*.

TRISMUS CAPISTRATUS, *Bré'di'ssue*—t. *Catarrhalis maxillaris*, *Neuralgia maxillaris*—t. *Clonicus*, *Neuralgia faciei*—t. *Cynicus*, see *Canine laugh*—t. *Dianstrophe Sauvagesii*, *Paralysis*, *Bell's*—t. *Dolorificus*, *Neuralgia faciei*—t. *Maxillaris*, *Neuralgia faciei*—t. *Nascentium*, see *Trismus*—t. *Neonatorum*, see *Trismus*—t. *Sardonicus*, *Risus sardonicus*.

TRISPERMUM, (*tri*, and σπέρμα, 'a grain or seed.')

An ancient cataplasm, consisting of three seeds.—*cumin*, *bay*, and *smallage*.

TRISPLANCHNIA, (*tri*, and σπλαγχνον, 'viscus.')

Cholera.

TRISPLANCHNIC, *Trisplanch'nicus*, (F.) *Trisplanchnique*. That which relates to the viscera of the great cavities.

TRISPLANCHNIC NERVE, *Ner'vus trisplanch'nicus* seu *sympatheticus mag'nus* seu *sympatheticus* seu *ganglion'icus* seu *vasomotorius*, (F.) *Nerf sympathique* ou *grand sympathique*, *Great sympathetic*, *Intercostal*, *Ganglion'ic* or *Vertebral nerve*, *Nerve of organic life*;—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *ner'vous sys'tem of the automat'ic functions*. It has also been called the *ganglion'ic ner'vous sys'tem*. It is termed *Trisplanch'nic* because it distributes its branches to the organs in the three great splanchnic cavities—the chest, abdomen, and pelvis. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary func-

tions. At its upper part it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck—the *superior*, *middle*, (*thy'roid ganglion*), and *inferior*, (*vertebral ganglion*); 12 in the back—the *thorac'ic*; 5 in the loins—the *lum'bar*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccyge'al*, *gan'gion im'par*, *az'ygonus gan'gion*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which is the *semilunar* and *solar plexuses*. 2. The *external ganglions*, *limitrophes* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either. Its special functions are not yet, however, well understood, and are the subject—as they have always been—of much interesting investigation.

TRISPLANCHNITIS, (*trisplanchnic*, and *itis*.) Cholera (spasmodic).

TRISSAGO, gen. *Trissag'inis*, *Teucrium chamaedrys*—t. *Palustris*, *Teucrium scordium*.

TRISTEMANIA, (*tristis*, 'sad,' and *mania*.) Melancholy.

TRISTERN'AL, Bécлар has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTITIA, (from *tristis*, 'sad,')

Athymia, Mœror.

TRITÆOPHYA AMERICANA, Fever, yellow.

TRITÆOPHYES, *Tritæoph'ya*, (τριταωφους, from *tritæus*, and φων, 'form.')

A fever whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratialisv'ensis* to an epidemic which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITÆUS, (τριταωσ,) Tertian fever.

TRITICUM ÆSTIVUM, (from *terere*, *tritum*, 'to thrash,')

*T. cereal'è* seu *Ceuallos* seu *compactum* seu *erina'ceum* seu *Gaertnerianum* seu *Linnæanum* seu *pruin'osum*, *Summercheat*; and *TRITICUM HYBERSUM* seu *glan'ceum* seu *Multicernum* seu *Sic'olum*, *Win'tercheat*, (F.) *Fruent*. *Ord. Gramineæ*. *Sex. Syst.* Triandria Digynia. From these plants our wheat flour is obtained, by grinding the seeds—Wheat, *Pyrus*, *Fruentum*—and to them we are indebted for our bread and pastry. The nutritive properties of wheat flour are so well known as not to need comment.

Bread, *Pa'nis*, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread*, *M'œx pa'nis*, are a common excipient for pills and boluses.

TRITICUM ARVENSE, T. repens—t. *Cereale*. T. æstivum—t. *Ceuallos*, T. æstivum—t. *Compactum*, T. æstivum—t. *Erinaceum*, *Triticum æstivum*—t. *Faginum*, *Polygonum fagopyrum*—t. *Gaertnerianum*, T. æstivum—t. *Glaucum*, T. *hybernium*, and T. repens—t. *Hybernium*, see T. æstivum—t. *Linnæanum*, T. æstivum—t. *Muticum*, T. *hybernium*—t. *Pruinosum*, T. æstivum.

TRITICUM REPENS, T. *arven'se* seu *glan'cinn*, *Agropyrum lævis'simum*, *Brom'us gl'aber*, *Gra'men* seu *Gra'men can'num* seu *Dioscor'idis* seu *rep'ens*, *Lolio'ceum rad'icè repen'te*, *Grass*, *Dog'grass*, *Cum'br'grass*, *Quick'ens*, *Tritch'grass*, (Sc.) *Ronwachs*, (F.) *Chiendent*. The roots are sweet, and

possess aperient properties. They are said also to be diuretic.

TRITICUM SICULUM, *T. hybernum*.

TRITIO, (*terere, tritum*, 'to rub, to grind,') Contritio, Trituration.

TRITON PALUSTRIS, (from *Τριτων*, 'the sea deity,') see *Ectozoa*.

TRITORIUM, (from *terere, tritum*, 'to wear away,') *Infundibulum*.

TRITURA, Contritio, Trituration.

TRITURATIO, *Trituratio, Tritura, Tritus, Tritio, Trip'sis*, (*terere, tritum*, 'to rub, to grind,') The act of reducing a substance to powder. See Contritio.

TRITUS, gen. *Tritus*, Contritio, Trituration.

TRIVENTER, (*tri*, and *venter*, 'belly,') *Tri-gastrie*.

TROCAR, *Trochar, A'cus paracent'ica seu paracent'ica seu triquetra vulgari, Paracent'icium, Paracentet'icium*. (Corrupted from the (F.) *Troisquarts* or *Trocart*, 'three quarters,') so called from the triangular shape of the point—*Triquetrum*. An instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a canula, which is so adapted to the perforator, that when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the canula remains in the wound, and affords the fluid a ready passage outwards.

TROCART, *Trocar*.

TROCH. (from *τροχος*, 'a wheel,') *Trochiscus*.

TROCHAN'TER, gen. *Trochant'ria, Trokan'ter, Rota'tor*, (from *τροχων*, 'to run or roll,') Anatomists have given the names *great* and *little trochanter* to two processes at the upper extremity of the femur. The great *trochanter, glutus*, is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. *Chaussier*, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

TROCHANTER'IAN, *Trochanteria'nis, Trokanter'ian*. That which belongs or relates to the great trochanter.

TROCHANTIN'IAN, *Trochantin'ian, Trochantinia'nis*. That which belongs or relates to the trochantin or less trochanter.

TROCHAR, *Trocar*.

TROCHES (pl. of troch) OF CARBONATE OF LIME, *Trochisci carbonatis calcis*—*t.* of Chalk, *Trochisci carbonatis calcis*—*t.* of Cubebs, *Trochisci cubebæ*—*t.* Escharotic, *Trochisci escharotici*—*t.* of Ginger, *Trochisci zingiberis*—*t.* Gum, *Trochisci gummosi*—*t.* of Gum Arabic, *Trochisci acaciæ*—*t.* of Ipecacuanha, *Trochisci ipecacuanhæ*—*t.* of Subcarbonate of Iron, *Trochisci Ferri subcarbonatis*—*t.* of Lactucarium, *Trochisci lactucarii*—*t.* Liquorice, *Trochisci glycyrrhizæ*—*t.* Liquorice with opium, *Trochisci glycyrrhizæ cum opio*—*t.* of Magnesia, *Trochisci magnesiæ*—*t.* of Morphina, *Trochisci morphiæ*—*t.* of Morphina and ipecacuanha, *Trochisci morphiæ et ipecacuanhæ*—*t.* Nitre, *Trochisci nitratis potassæ*—*t.* of Peppermint, *Trochisci menthæ piperitæ*—*t.* of Tartaric acid, *Trochisci acidi tartarici*.

TROCHIA, (*τροχια*, 'the rut of a wheel,') *Orbit*.

TROCHILIA, (*τροχίλια*,) *Trochlea*.

TROCHIN, (from *τροχων*, 'to turn,') *Chaussier* has given this name to the smaller of the os humeri; because it gives attachment to one of the rotator muscles of the arm.—the *subscapularis*.

TROCHIN'IAN, *Trochin'iana*. That which belongs or relates to the trochin.

TROCHIS'CUS, (*τροχισκος*,) *Phthois, Artis'cus, Col'ix, Col'ix, Phthois'cus, Rot'ula, Cyclis'mus*, (dim of *τροχος*, 'a wheel,' 'any thing circular,') *A trochæ* or round table, (F.) *Trochisque*. See *Pas-*

*til*, and *Tabella*. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette*,—the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

TROCHISCI ACA'CIÆ, *Troches of Gum Arabic*. (*Acac. ʒiv; Amyli, ʒj; Sacchar. lbj*. Make into a mass with *rose water*, and form lozenges.—Ph. E.) To allay cough.

TROCHISCI AC'IDI TAN'SICI, *Tan'nin Loz'enges*. (*Acid. tannic. gr. cccx; Tinct. tolu. fʒss; Sacchar. purif. ʒxxv; Acaciæ pulv. ʒi; Mucilag. Acaciæ, fʒij; Aq. destillat. bullient. fʒj*. To be divided into 720 lozenges. *Mix. Ph. B., 1864.*) Each lozenge contains half a grain of tannic acid.

TROCHISCI AC'IDI TARTAR'ICI, *Troches of Tartar'ic Acid*. (*Acid. Tartar. ʒij; Sacchar. ʒviij; Ol. Limon. ℥x*. Form into troches with mucilage.—Ph. E.) Refrigerant and demulcent.

TROCHISCI BECHICI NIGRI, *T. glycyrrhizæ glabrae*.

TROCHISCI BISMU'THI, *Bis'muth Loz'enges*. (*Bismuth. alb. gr. 1440; Magnes. carb. ʒiv; Calcis carb. præcip. ʒvj; Sacchar. purif. ʒxxx; Acaciæ pulv. ʒj; Aq. destillat. fʒvj; Ol. Cimam. fʒss*. *Mix.* To be divided into 720 lozenges. *Ph. B., 1864.*)

TROCHISCI CARBONA'TIS CAL'CI. *T. e Cre'tæ, T. Cre'tæ* (Ph. U. S.), *Troches of Car'bonate of lime or chalk, Loz'enges for the heartburn, Tabel'æ ad ardo'rem ventriculi seu cardia'gicæ seu ad so'dam*. (*Cre't. ppt. ʒiv; Acaciæ, in pulv. ʒj; Myrist. in pulv. ʒj; Sacch. in pulv. ʒvj. M.* Form into troches with *water*.) Antacid and absorbent.

TROCHISCI CAT'ECU, *Cat'echu Loz'enges*. (*Cat'echu, in pulv. ʒij; Sacchar. purif. lbj; Acaciæ pulv. ʒj; Tinct. capsic. fʒss; Aq. destillat. q. s.* *Mix.* and divide into 720 lozenges. *Ph. B., 1864.*)

TROCHISCI E CRE'TÆ, *T. carbonatis calcis*—*t. Cre'tæ, T. carbonatis calcis*.

TROCHISCI CUBE'BÆ, *Troches of Cu'bebs*. (*Oleoresin. cubeb. fʒj; Ol. assaf. fʒj; Glycyrrhiz. pulv., Acaciæ pulv., Sacchar. pulv. āā ʒij; Syrrup. Tolutan. q. s.* To be divided into troches, each weighing ten grains. *Ph. U. S., 1863.*) Excitant; in relaxed sore throat, &c.

TROCHISCI SEU PASTIL'LI EMETI'NÆ PECTORA'LES, *Pectoral Loz'enges of Emet'ine*. (*Sugar, ʒiv; Emetine, ʒ2* grains. Form into lozenges of nine grains each.) One is a dose.

TROCHISCI ESCHAROT'ICI, *Escharot'ic Troches*. (*Hydragr. oxyzur. p. 8; Amyli, p. 16; Mucilag. g. tragac. q. s.* Make into troches, to which a few drops of laudanum may be added.—Ph. P.) Used in foul ulcers, to remove excrescences, &c.

TROCHISCI ESCHAROT'ICI DE MIN'IO, (*Oxyd. plumbi. rubr. p. 16; Hydragr. oxyzur. p. 32; Mic. panis, p. 128; Aq. rosæ, q. s.*—Ph. P.) Used like the last.

TROCHISCI FER'RI SUBCARBONA'TIS, *Troches of Subcar'bonate of Iron*. (*Ferri subcarb. ʒv; Vanill. gr. lx; Sacch. in pulv. ʒxv; Mucilag. tragac. q. s.* To be divided into troches, each weighing 20 grains. *Ph. U. S., 1863.*) Tonic.

TROCHISCI GLYCYRRHIZ'Æ, *T. G. Glab'rae seu Be'chici nig'ri, Liq'norice troches, Black pectoral loz'enges*. (*Ext. glyc. glabr., Gum. acac. āā p. j; Sacch. purif. p. ij.* Dissolve in warm water; strain; evaporate, and form into troches.—Ph. E.) Demulcent. To allay cough.

TROCHISCI GLYCYRRHIZ'Æ CUM O'PIO, *T. G. et o'pii* (Ph. U. S.) *seu Theba'ici seu sedati'vobalsam'ici seu pectorales re'gii Dan'o'rum, Liq'norice Troches with O'pium, Wis'tar's Loz'enges*. (*Opii,*

in pulv.  $\mathfrak{z}$ ss; *Glycyrrhiz.* in pulv., *Sacchar.* in pulv., *Acacie*, in pulv.,  $\text{āā } \mathfrak{z}\text{x}$ ; *Ol. anisi*,  $\mathfrak{f}\mathfrak{z}\mathfrak{j}$ . Make into troches, each weighing six grains.—Ph. U. S.) Demulcent and anodyne. An analogous formula is given in the British Pharmacopœia (1864), under the name *Trochisci o'pii*, Opium Lozenges.

*Spit'ia's Lozenges* for coryza, hoarseness, and sore-throat, are composed as follows:—(*Cubeb.* recent. in pulv.  $\mathfrak{z}\mathfrak{i}$ ; *Extract. glycyrrhiz.*  $\mathfrak{z}\mathfrak{j}$ ; *Myrrorib.*  $\mathfrak{z}\mathfrak{j}$ ; *Acacie*,  $\mathfrak{z}\mathfrak{i}$ ; *Syrup.* q. s. Make into troches of ten grains each.)

TROCHISCI GUMMO'SI, *Gum Troches.* (*G. acac.* p. v; *Awyli*, p. i; *Sacch.* pur. p. xij. Make up the troches with rose-water.—Ph. E.) Demulcent.

TROCHISCI IPECACUAN'HÆ, *Troches of Ipecacuan'ha.* (*Ipecacuanh.* in pulv.  $\mathfrak{z}$ ss; *Sacchar.* in pulv.  $\mathfrak{z}\mathfrak{x}\mathfrak{i}\mathfrak{v}$ ; *Marante*, in pulv.  $\mathfrak{z}\mathfrak{i}\mathfrak{v}$ ; *Mucilag. tragacanth.* q. s. Make into troches, each weighing ten grains.—Ph. U. S.)

TROCHISCI LACTUCARI, *Troches of Lactuca'rium.* (Prepared with *Lactucarium* in the same proportion and manner as the opium lozenges.—Ph. E.) Each lozenge contains between the fifth and sixth of a grain of lactucarium.

TROCHISCI MAGNE'SIÆ, *Troches of Magne'sia.* (*Magne.*  $\mathfrak{z}\mathfrak{i}\mathfrak{v}$ ; *Sacchar.*  $\mathfrak{h}\mathfrak{j}$ ; *Myrist.* pulv.  $\mathfrak{z}\mathfrak{j}$ ; *Mucilag. tragacanth.* q. s. Make into troches, each weighing ten grains.—Ph. U. S.) Useful in acidity of the stomach, with constipation.

TROCHISCI MENTHÆ PIPERITÆ, *Troches of Peppermint.* (*Ol. menth. piperit.*  $\mathfrak{f}\mathfrak{z}\mathfrak{j}$ ; *Sacchar.* in pulv.  $\mathfrak{h}\mathfrak{j}$ ; *Mucilag. tragacanth.* q. s. Make into troches, each weighing ten grains.—Ph. U. S.) Used as a carminative.

TROCHISCI MORPHIÆ, *Troches of Morphia.* (*Morph. Muriat.*  $\mathfrak{h}\mathfrak{j}$ ; *Tinct. Tolut.*  $\mathfrak{z}$ ss; *Sacchar.*  $\mathfrak{z}\mathfrak{x}\mathfrak{x}\mathfrak{v}$ . Make into lozenges, with mucilage, weighing fifteen grains each.—Ph. E.) Each lozenge contains about one-fortieth of a grain of morphia of muriate of morphia. Used to allay cough.

TROCHISCI MORPHIÆ ET IPECACUAN'HÆ, *Troches of Morphia and Ipecacuan'ha.* (*Morph. mur.*  $\mathfrak{h}\mathfrak{j}$ ; *Ipecac.* pulv.  $\mathfrak{z}\mathfrak{j}$ ; *Tinct. Tolut.*  $\mathfrak{f}\mathfrak{z}\mathfrak{ss}$ ; *Sacchar.*  $\mathfrak{z}\mathfrak{x}\mathfrak{x}\mathfrak{v}$ . Make into a mass with mucilage, and form lozenges, fifteen grains each.—Ph. E.) Each lozenge contains about one-fortieth of a grain of the muriate. Used to allay cough.

TROCHISCI NITRA'TIS POTAS'SÆ, *Nit're Troches.* (*Potasse nitrat.* p. j; *Sacch.* pur. p. iij. Make into troches with mucilage of tragacanth.—Ph. E.) In slight inflammatory sorethroat and fever.

TROCHISCI OPII, see T. *Glycyrrhizæ cum opio.*

TROCHISCI PECTORALES REGIS DANORUM, T. *glycyrrhizæ cum opio* — t. *Sedativobalsamica*, T. *glycyrrhizæ cum opio.*

TROCHISCI SO'DÆ BICARBONA'TIS, *Troches of Bicarbonate of So'da.* (*Sodæ bicarb.*  $\mathfrak{z}\mathfrak{i}\mathfrak{v}$ ; *Sacchar.* in pulv.  $\mathfrak{h}\mathfrak{j}$ ; *Mucilag. tragacanth.* q. s. To be divided into troches, each weighing ten grains.—Ph. U. S.) Antacid.

The *Pastilles de Vichy*, *Pastilles digestives d'Hunterive-Vichy*, *Pastilli digestivi Darcel'ii*, composed of Bicarbonate of soda, Oil of peppermint, and Sugar, are much used in France, like the Vichy waters, in cardialgia, gout, and lithiasis.

TROCHISCI STIBIATI, *Tabellæ antimoniales Kunkelli*—t. *Thebaici*, T. *glycyrrhizæ cum opio.*

TROCHISCI ZINGIB'ERIS, *Troches of Gin'ger.* (*Tinct. Zingib.*  $\mathfrak{f}\mathfrak{z}\mathfrak{i}$ ; *Tragac.* pulv. gr. cxx; *Sacchar.*  $\mathfrak{z}\mathfrak{x}\mathfrak{i}\mathfrak{j}$ ; *Syrup.* *Zingib.* q. s. Make into troches, each weighing twenty grains.)

TROCHISQUE, *Trochiscus.*

TROCHITE'R, gen. *Trochite'ris*, (from *τροχαιου*, 'to turn.') The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles.

TROCHITE'RIAN, in the language of Chaus-

sier, means any thing belonging or relating to the trochiter.

TROCHLEA, (*τροχλια*.) *Trochil'ia*, (F.) *Trochilée* on *Trochlée*. (*A pulley*; (from *τροχαιου*, 'to turn.')—for example, the articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the forearm. Also, the cartilaginous pulley over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit. Pulleys are needed as mechanical powers in the reduction of dislocations where much force is required.

TROCHLEA LABYRINTHI, *Cochlea.*  
TROCHLEARIS, *Obliquus superior oculi.*  
TROCHLÉATEUR, *GRAND*, *Obliquus superior oculi*—t. *Petit*, *Obliquus superior oculi.*

TROCHLÉE, *Trochlea.*

TRO'CHOLD, (*τροχολδης*, from *τροχος*, 'a wheel,' and *εως*, 'resemblance.') *Trochoi'des*, *Ax'ea commissura*. An articulation, in which one bone turns upon another, like a wheel upon its axle; as the *Altoïdoïxoid* articulation. See *Axa commissura*.

TROËNE, *Ligustrum vulgare.*  
TROISQUARTS, (*trois*, 'three,' and *quarts*, pl. of *quart*, 'a fourth.') Trocar.

TROKANTER, *Trochanter.*

TROKANTERIAN, *Trochanterian.*

TROKANTINIAN, *Trochantinian.*

TROKLLÉE, *Trochlea.*

TROLLIUS LAX'US, *T. America'nus*, *Globe flower*; *Order*, *Ranunculaceæ*; indigenous; has the same medical properties as the *Ranunculus*.

TROMOMANIA, (*tromus*, and *mania*.) *Delirium tremens.*

TROMOPARANŒA, (*tromus*, and *paranœa*.) *Delirium tremens.*

TROMOS, (*τρομος*.) *Paralysis agitans*, *Tremor.*

TROMOSPASMUS, (*tromus*, and *spasmus*.) *Tremor.*

TROMPE, 'a trumpet,' *Tuba*—t. *d'Eustache*, *Eustachian tube*—t. *de Fallope*, *Tuba Fallopiana*

—t. *Uterine*, *Tuba Fallopiana.*

TROMUS, (*τρομος*.) *Paralysis agitans*, *Tremor.*

TROMYLE, (*τρομος*, 'trembling,' and *ελη*, 'matter,') see *Cilia.*

TRONC, *Trunk*—t. *Basilaire*, *Basiliary artery*

—t. *Brachial*, *Brachial artery.*

TROPE'OLUM MA'JUS, (from *τροπαιον*, 'a trophy,' the leaves resembling a buckler,') *Nasturtium Ind'icum* seu *Peruvia'num*, *Acriv'ola*, *Flos sanguineus monar'di*, *Cardami'nium minus*, *Indian Cress.* *Ord.* *Geraniaceæ*. *Sex. Syst.* *Oc-tandria Monogynia.* (F.) *Cresson des Indes*, *Cresson du Mexique*, *Carpucine*. An antiscorbatic.

TROPÆOLUM TUBERO'SUM, *Ulluco*. A tuberous plant, cultivated in the Sierra, Peru. It is smaller than the potato.

TROPHALIS, (from *τροφη*, 'nourishment,') *Colostrum.*

TROPHE, (*τροφη*.) *Aliment*, *Cibatio*, *Pabulum.*

TROPHI, (from *τροφη*, 'nourishment.') In insects, the parts of the mouth that are employed in receiving and preparing the food.

TROPHICAL, *Troph'icus*, (from *trophe*,) (F.) *Trophique*. Relating to nourishment or nutrition.

TROPICAL NERVES. The organic nerves or nerves of the sympathetic system have been so termed, from the belief that they are concerned in nutrition.

TROPHIMUS, (*τροφιμος*.) *Nutrition.*

TROPHODES, (*τροφωδης*, from *τροφη*, 'nourishment,') and *odes*,) *Nutritious.*

TROPHONEURO'SES, (*τροφη*, 'nourishment,' and *neurosis*.) *Morbid conditions of the process of nutrition, owing to modified nervous influence.*

TR'OPHONOSI, *Trophonosi*, (*τροφης*, 'nourishment,' and *νοσος*, 'a disease.') *Diseases of nutrition.*

TROPHY, *Troph'io*, (τροφή, a suffix denoting 'nourishment or nutrition;') as in *hypertrophy*, 'excess of nourishment or nutrition.'

TROPONU'SI, *Morbi trop'ici*, (τροπή, 'the solstitial or tropical point where the sun turns or alters its course,' and νόσος, 'a disease.') Diseases that prevail in the tropics.

TROSTER, ([G.] 'a comforter,') see Spirit.

TROU, Foramen—*t. Anonyme*, Foramen stylo-mastoideum — *t. Aevngle* ou *Borgue*, Cæcum foramen — *t. Borgue* of the Medulla oblongata, Foramen cæcum of the medulla oblongata — *t. de Botal*, Botal foramen, Ovale foramen — *t. Déchiré antérieur*, Lacerum anterius foramen — *t. Déchiré postérieur*, Lacerum posterius foramen — *t. Épineux*, Spinale foramen — *t. de Goliien*, Botal foramen — *t. Mentonnier*, Mental foramen — *t. Optique*, Foramen opticum — *t. Orbitaire supérieur*, Orbital foramen superior — *t. Ovale*, Ovale foramen — *t. Rond*, petit, Spinale foramen — *t. Sous-orbitaire*, see Suborbital canal — *t. Sous-pubien*, Obturatorium foramen — *t. Sphéno-épineux*, Spinale foramen — *t. Sus-orbitaire*, Foramen supraorbitalium.

TROUS (pl. of trou) CAROTIDIENS, Carotica foramina—*t. Condyloïdiens*, Condyloidea foramina—*t. de Conjugaison*, Conjugationis foramina, see Vertebrae—*t. Olfactifs*, Olfactory foramina—*t. Rachidiens*, Spinal foramina.

TROUSSE, Case (pocket).

TROUSSE-GALANT, (*trousser*, 'to despatch,' and *galant*, 'a gallant,') Cholera morbus.

TROUSSEAU, 'a bundle,' Fasciculus.

TROUSSEAUX ARRIÈRE-MÉSÉNTÉRIQUES (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUCK, see Medicament.

TRUCULENTUS, (from *trux*, gen. *trucis*, 'ferocious,') Homicidal.

TRUDGEBACKED, see Hump.

TRUELOVE, Paris, Trillium latifolium.

TRUFFE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber—*t. Hart's*, Elaphomyces granulatus.

TRUMPET CREEPER, Tecoma radicans — *t. Flower*, Tecoma radicans — *t. Weed*, Eupatorium purpureum.

TRUNCUS, Trunk.

TRUNK, *Trunc'us*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts:—*a superior*, the head; *a middle*, the thorax, and *an inferior*, the pelvis. These three regions contain the great splanchnic cavities. They are united by a common stalk—the vertebral column. To the middle are articulated the superior extremities; and, to the inferior, the lower extremities.

The trunk of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, ([F.] *trousser*, 'to tie up,') *Brachérium*, *Brachérium*, *Brachi'le*, *Brachi'rotum*, *Brachériolum*, *Ani'ma*, *Honi'ma*, *Subligac'ntum*, *Subligat'ra*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac, and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *ressort*. It embraces the body on the side affected; extends

from beyond the spine, and terminates, opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex pad, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, (τρυγώδης, from τρυξ, gen. τρυγός, 'lees,' and οδός,) Feulent.

TRYPANON, (τρυπανόν,) Trepan.

TRYPESIS, (τρύπησις, from τρυπῶ, 'to bore,') Trepanning.

TRYPANS, (τρύω, 'to rub,') Friction.

TSCHERBET, Sherbet.

TSETSE, Glossina morsitans.

TSHETTIK, Upas tieuté.

TSIANA, Costus.

TSITLA. A South African root of the Araceæ family, which contains a very large quantity of sweet tasted starch. According to Dr. Livingstone, when dried, pounded into meal, and allowed to ferment, it is not an unpleasant article for food.

TSJAMPACA, Michelia champaca.

TUBA, 'a trumpet,' Tube—*t. Aristotelica*, Eustachian tube — *t. Cæca*, Tuba Fallopiiana — *t. Uterina*, Tuba Fallopiiana—*t. Vocalis*, Tube, vocal.

TUBAGE, see Catheterismus.

TUBAIRE, Tubal.

TUBAL, *Tub'aris*, (F.) *Tubaire*, (from *tuba*, and *tubus*.) Relating to a tube or tubes, and especially to the Fallopiian.

TUBAL PREGNANCY, see Pregnancy, tubal — *t. Respiration*, see Murmur, respiratory.

TUBE. A name given to some parts which are hollow, and which have, at times, the shape of a trumpet. *Tu'ba*, *Tu'bus*, *Sal'pinx*, (F.) *Trompé*, *Tube*.

TUBE, ALIMENTARY, Canal, alimentary.

TUBE CASTS. A term applied to the casts or moulds of the uriniferous tubes of the kidney, observed in the urine by the microscope in diseases of those organs. The casts are fatty, desquamative, hyaline, granular, &c., and are observed especially in Bright's disease.

TUBE, EUSTACHIAN, Eustachian tube.

TUBE, FALLOPIAN, *Tu'ba Fallopi'ana* seu *Fallo'pii* seu *uteri'na* seu *cæ'ca*, *Me'trosal'pinx*, *Hysterosal'pinx*, *Oviductus muli'ebri*, *Vas def'erens muli'eri*, *Ductus vario'sus* seu *Processus lateralis* seu *Meatus semina'lis* seu *Meatus semina'rius uteri*, *Oviduct*, *Vector canal*, (F.) *Trompe* de *Fallope* ou *uté'rine*, is a canal floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fin'briated extremity*; called, also, *Folia'ceum ornamen'tum*, *Morsus diab'oli*, *Infundibulum* seu *Digitatio'nes* seu *Fin'brizæ* seu *Vexill'æ* seu *Lacin'iæ tubarum Fallo'pii*, (F.) *Morceau franç'is*, *Pavillon* de la *trompe*, *Morceau ou Morsme du diable*. Within, the tubes are hollow and lined by a mucons membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopiian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the uterus, the abdominal termination being termed *Ostium abdomina'le*; the uterine *Ostium*

*uteri num.* When the tube embraces the ovary, a funnel-shaped cavity—*Corolla infundibuliformis*—is formed at its extremity, into which the ovule passes.

TUBE, INTESTINAL, Canal, alimentary.

TUBE, ŒSOPHAGE'AL, *Stomach Tube.* A long elastic gum tube, capable of being passed into the œsophagus or stomach.

TUBE, POLLEN, see Pollen.

TUBE, RECTAL, *Defecation tube.* An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enmata to be thrown up into it.

TUBE, STOMACH, see Tube, œsophageal.

TUBE, VO'CAL, *Tu'ba vocalis.* The part of the air passages above the inferior ligaments of the larynx, including the passages through the nose and mouth,

TUBER, ([L.], 'a bump, a protuberance,') Hump, Lycoperdon tuber, Tubercle—t. Annulare, Pons varolii — t. *Atloïdo-occipital*, Rectus capitis posticus minor — t. Cervinum, Elaphomyces granulatus — t. Cibarium, Lycoperdon tuber.

TUBER CINE'REUM, *T. C. cum Infundib'ulo.* A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER CORPORIS CALLOSI, see Corpus callosum.

TUBER FRONTALE, Frontal protuberance — t. Gulosorum, Lycoperdon tuber — t. Gutturorum, Bronchocele — t. Ischii, see Ischiatic — t. *Ischiotrochantérien*, Quadratus femoris — t. Nigrum, Lycoperdon tuber — t. Parietale, see Parietal Bones — t. Pellagra, Pellagra — t. Tympani, Promontory of the tympanum.

TUBERA TERRÆ, Lycoperdon tuber.

TUBERCLE, *Tuber'culum*, (dim. of *tuber*,) *Tu'ber*, *Strangal'ion*, *Stran'galis*, *Tuber'culous deposit*, (vulg.) a *Ker'nel*, a *Knot*, (F.) *Tubercule*. A tumour in the substance of organs, from the production of new matter; — sensation null; growth sluggish. In *Pathological Anatomy*, the term is generally given to a species of degeneration which consists of an opaque matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophy'mata*, *Tuber'cula Pulmo'num*, (F.) *Tubercules pulmonaires*, characterize *Tuber'cular Phthi'sis*. *Mesenteric tubercles* are often met with in the same affection, but particularly in *Tabes Mesenterica*. Laënnec classes tubercles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a serofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculation*, is termed *Tuberulo'sis*, *Morbus tuberculo'sus*, *Strumo'sis* seu *Phymato'sis pulmo'num*, and *Dyscrasia tuberculo'sa*. Tubercles are seen of various forms,—to wit, in fine points, (F.) *Poussière tuberculeuse*, gray and yellow granulations, miliary tubercles; and gray and yellow tubercular masses, softened, and cretaceous.

TUBERCLE, BLACK, Melanosis — t. Painful subcutaneous, see Neuroma.

TUBERCLES OF THE AREOLA, see Mamma — t. Cretaceous, see Cretaceous — t. Miliary, see Granulation, and Tubercle.

TUBERCLES, PEARLY, *T. sebaceous miliary*, *Follicular elevations*. Small collections of sebaceous matter in the sebaceous glands or ducts, often seen in the thin skin of the lower eyelids, where they sometimes attain an inconvenient size.

TUBERCLES, SEBACEOUS MILIARY, T. pearly.

TUBERCULA (pl. of *tuberculum*) ARAN'TII, *Cor'pora* seu *Corpus'cula Aran'tii*, *Tubercles of Aran'tius* or *Aran'zi*. Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

TUBERCULA ARTHRITICA, Calculi, arthritic — t. Cerebri, Encephalophymata — t. Gonorrhœica, Gonorrhœica impura — t. Gummata, see Gumma — t. Hepatis, *Hépatostromosie* — t. Intestinatorum, Enterophymata — t. Nervorum nodosa, Ganglions, nervos — t. Parva dura matris, Glandulæ Pæchionii — t. Peritonei, Cœliophymata — t. Pulmonum, see Tubercles (of the lungs) — t. Quadrigenina, Quadrigenina Tubercula.

TUBERCULAR, *Tuber'culous*, *Tuberculo'sus*, *Tuber'culate*, *Tuber'culated*, (F.) *Tuberculeux*, *Tuberculé*. That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR OR TUBERCULOUS CONSTITUTION or DIATHESIS, *Phthi'sio'sis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachex'ia*, *Tuberculo'sis*, *Morbus tuberculo'sus*, *Dyscrasia tuberculo'sa*, is the constitutional condition of one affected with tubercles.

TUBERCULAR MATTER. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pulaceous, semifluid, and curdy. See Tubercle.

TUBERCULAR PHTHISIS is that produced by the development of tubercles in the lungs.

TUBERCULAR SORE THROAT, Pharyngitis, follicular.

TUBERCULATE, Tubercular.

TUBERCULATE SARCO'MA of AB'ERNETHY, *Emp'hy'ma Sarco'ma tuberculo'sum*, *Tu'mor tuberculo'sus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED, Tubercular — t. Liver, Cirrhosis.

TUBERCULE, Tubercle.

TUBERCULÉ, Tubercular.

TUBERCULES BIJUMEAUX, Quadrigenina tubercula — t. *Crétacés*, see Cretaceous — t. *du Foie*, *Hépatostromosie* — t. *des Ganglions Mésentériques*, *Tabes mesenterica* — t. *des Glandes lymphatiques*, *Scrofula* — t. of the Larynx and Fauces, Pharyngitis, follicular — t. Miliary, see Granulation — t. *Pisiformes*, Mamillary tubercles — t. *Pulmonaires*, see Tubercle — t. *Quadrigenaux*, Quadrigenina corpora.

TUBERCULEUX, Tubercular.

TUBERCULITIS, (*tubercle*, and *itis*.) Inflammation of a tubercle or of tubercular masses. TUBERCULIZATION, see Tubercle.

TUBERCULOSIS, see Tubercle, and Tubercular Cachexia — t. Laryngis et Tracheæ, Phthisis laryngea — t. Pulmonum, Phthisis pulmonalis — t. Vertebrarum, Vertebral disease.

TUBERCULOSUS, Tubercular.

TUBERCULOUS, Tubercular — t. Deposit, Tu-

bercle—t. Disease of the Lungs, Phthisis pulmonalis—t. Dust, *Poussière tuberculeuse*.

TUBERCULUM, (dim. of *tuber*), Tubercle.

TUBERCULUM CINE'RIUM. *Fasciola cine'ria*. A mass of ciceritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of ciceritious substance in the cord, and on the sides with the corpus restiforme.

TUBERCULUM LACRYMALE, see Lachrymal puncta—t. Lower, Lower, tubercle of.

TUBEROSITAS, Tuberosity—t. Tympani, Promontory of the tympanum.

TUBÉROSITÉ BICIPITALE, Bicipital tubercle—t. *Sciaticque*, see Ischiatic.

TUBEROSITY, *Taberos'itus*, (F.) *Tubérosité*, (from *tuber*, 'a bump or protuberance.')

Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBES OF FERREIN, see Uriniferous Tubes.

TUBI MEMBRANACEI, (pl. of *tubus*, 'a tube,') see Villous membranes.

TUBULAR, *Tubularis*, *Tubulo'sus*, (F.) *Tubuleux*, *Tubulaire*, (from *tubule*.) Relating to or having the form of a small tube. An epithet applied to glands—*Glandulæ tubulo'sæ*, which, like those of the stomach, have the shape of small tubes.

TUBULAR BLOWING SOUND, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tu'bulus*, (dim. of *tubus*, 'a tube.')

A small tube or tubelet.

TUBULEUX, Tubular.

TUBULI (pl. of *tubulus*) BELLINI, Uriniferous tubes—t. Contorti, see Uriniferous tubes—t. Duræ matris, Sinuses of the dura mater—t. Ferreini, see Uriniferous tubes—t. Nervei, Nerve fibres—t. Pelvis renum, see Calix—t. Recti, see Rete testis and Uriniferous tubes—t. Seminales, see Testicle—t. Seminiferi, see Testicle—t. Seminiferi recti, see Rete testis—t. Uriniferi Bellini, Uriniferous tubes.

TUBULOSUS, Tubular.

TUBULUS, (dim. of *tubus*, 'a tube,') Canula, Tubule—t. Centralis Modioli, see Tractus spiralis foraminulentus.

TUBUS, Tube—t. Acusticus, Ear trumpet—t. Alimentarius, Canal, alimentary—t. Intestinalis, Canal, alimentary—t. Nervorum, Nerve, Vermicularis cæci, Appendix vermiformis cæci.

TUCKAHO, Lycopodon tubi.

TUE-CHIEN, 'kill dog,' *Chicium autumnale*, *Veratrum album*—t. *Loup*, 'kill wolf,' *Acunium napellus*.

TULBAG'HIA ALLIACEA, (after Tulbagh, a Dutch governor of the Cape of Good Hope.) A South African plant, *Nat. Ord.* Asphodelæ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

*Tulbaghia cepa'cea* and *T. viola'cea*, serve the same purpose.

TULIP, CAPE, *Homeria collina*—t. *Trec*, *Liriodendron*.

TULPIER, *Liriodendron*.

TULPIFERA LIRIODENDRON, (*tulipa*, 'tulip,' and *ferre*, 'to bear,') *Liriodendron tulipifera*.

TUMEFACIO, (*tumere*, 'to swell,' and *facere*, 'to make,')

Swelling—t. Mollis, Puffiness.

TUMESCENCIA PITUITOSA, (from *tumescere*, 'to swell,')

Leucophlegmatia.

TUMEUR, Tumour—t. *Anomale*, see *Hæmatodes fungus*—t. *Blanche*, *Hydrarthrus*—t. *Cavernæuse*, see *Hæmatodes fungus*—t. *Encéphaloïde*, *Encéphaloïde*—t. *Érectile*, see *Hæmatodes fungus*

—t. *Fongoïde*, *Encéphaloïde*—t. *Fongueuse*, *Encéphaloïde*—t. *Gommeuse*, *Gumma*—t. *Hémorrhagiale circonscrite*, see *Aneurism*—t. *Lymphatique des articulations*, *Hydrarthrus*—t. *Ossière*, *Encéphaloïde*—t. *Pulpeuse*, *Encéphaloïde*—t. *Spléniforme*, *Encéphaloïde*—t. *Spongieuse*, *Encéphaloïde*—t. *Variqueuse*, see *Hæmatodes fungus*.

TUMOUR, (gen. *Tumouris*, (from *tumere*, 'to swell,')

Swelling, Tumour—t. *Albus*, *Hydrarthrus*—t. *Anomalus*, *Hæmatodes fungus*—t. *Artium*, *Obdormitio*—t. *Capitis Sanguineus*, *Cephalæmatoma*—t. *Carnæus*, *Sarcoma*—t. *Cysticus*, *Encystis*—t. *Cysticus serosus*, *Hygroma*—t. *Desmoides*, *Tumour*, *fibrosus*—t. *Fibrosus*, *Tumour*, *fibrosus*—t. *Ficosus*, *Ficus*—t. *Flatulentus*, *Emphysema*—t. *Fugax*, see *Fugacious*—t. *Fungosus articuli*, *Spina ventosa*—t. *Fungosus sanguineus*, *Hæmatodes fungus*—t. *Gangliiformis*, *Ganglion*, *nervous*—t. *Genarum*, *Meloneus*—t. *Genu albus*, *Genoecæ*—t. *Glandulæ parotidæ*, *Parotidoneus*—t. *Gummatosus*, *Gumma*—t. *Lactæus*, *Galactocele*—t. *Lardeus*, *Steatoma*—t. *Malarum*, *Meloneus*—t. *Ovarii*, *Oarioncus*—t. *Parotidis*, *Parotidoneus*—t. *Prostata*, *Prostatoneus*—t. *Renalis*, *Nephroncus*—t. *Sanguineus*, *Hæmatoma*—t. *Squamiformis carnosus*, *Lepidosarcoma*—t. *Tubereulosus*, *Tuberculate sarcoma*—t. *Tunicatus*, *Encystis*—t. *Uteri*, *Hysteroneus*.

TUMOUR, (*tumere*, 'to swell,')

*Tu'mor*, *On'cos*, *On'cus*, *Epar'ma*, *Epar'sis*, *Emphy'ma*, *Excre'scencia* (Sauvages), *Ephy'ma*, (Sc.) *Sicula*. (F.) *Tu'meur*. A rising or prominence, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *excre'scences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling*;—see *Hydrarthrus*. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous, or of the soft, parts about the joint.

Scrofula is the most common cause of these affections.

TUMOUR, CELLULOFIBROUS, Tumour fibrocellular—t. Epithelial, see Epithelial.

TUMOUR, ERECTILE. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See *Erectile*.

TUMOUR, FIBROCELLULAR, *Cell'ulofib'rous tu'mour*. A soft and elastic form of fibrous tumour, a variety of the *gelatinous sarcoma* of Rokitsansky of which the softer kind of polypus of the nose is an example.

TUMOUR, FIBROPLASTIC, Sarcoma.

TUMOUR, FIBROUS, *Fib'rous growth*, *Fibro'ma*, *Fib'roid*, *Inc'ma*, *Tu'mor fib'rous seu desmoid'es*, *Inohylo'ma*. A tumour or growth formed of fibrous tissue.

TUMOUR, LAMINATED NACREOUS FATTY, Cholesteatoma—t. Milklike, *Encéphaloïde*—t. Phantom, see *Fantom*.

TUMOUR, VARICOSE, *Tu'mor varico'sus*. A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

TUMOUR, VASCULAR, see *Hæmorrhoids* and *Nævus*.

TUNAS, see *Cactus opuntia*.

TUNBELLY, *Physconia*.

TUN'BRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, *Conjunctiva membrana*.

TUNDUS CORDIS, *Muero cordis*.

TUN'IC, *Tu'nica, Chi'ton, Coat, (F.) Tunique*. An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA, *Tunic*—*t. Acinialis, Uvea*—*t. Aciniformis, Uvea*—*t. Acinosa, Uvea*—*t. Adnata, Conjunctiva*—*t. Adventitia, see Artery*—*t. Agnata, Conjunctiva*—*t. Alba oculi, Sclerotic*—*t. Albuginea, Albuginea, see Kidney*—*t. Albuginea oculi, Sclerotic*—*t. Allantoidea, Allantois*—*t. Arachnoides, Arachnoid membrane*—*t. Aranea, Arachnoid membrane*—*t. Caduca, Decidua*—*t. Candida oculi, Sclerotic*—*t. Carnosa, Panniculus carnosus*—*t. Cellularis, see Artery*—*t. Conjunctiva, Conjunctiva*—*t. Costalis, Pleura*—*t. Crassa, Decidua*—*t. Crystallina, Arachnoid membrane*—*t. Dartos, see Dartos*—*t. Dura oculi, Sclerotic*—*t. Durior et crassa, Sclerotic*—*t. Elastica, see Artery*—*t. Elytroides, Vaginal coat*—*t. Erythroides, Cremaster*—*t. Exterior ovi, Decidua*—*t. Externa, see Artery*—*t. Extima oculi, Sclerotic*—*t. Farcinialis, Allantois*—*t. Fibrosa, see Folliculi Graafiani*—*t. Filamentosa, Decidua*—*t. Glabra, see Artery*.

TUNICA GRANULO'SA, 'granular coat.' An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

TUNICA HORTENSIS, *Dianthus caryophyllus*—*t. Innominata oculi, Sclerotic*—*t. Interna oculi, Retina*—*t. Intima, see Artery*—*t. Intima oculi, Retina*.

TUNICA JACO'BI, *Membrana Jacobi, Ja'col's coat or mem'brane*. A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staff-shaped bodies, *Bacilli*,—hence called *Stratum bacillosum* seu *bacillatum, Bac'illar layer of the retina*,—which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum, and are continued into the more internal layers of the retina, by means of thin processes—the *filaments or fibres of Müller*.

TUNICA MEDIA, 'middle coat,' see *Artery*—*t. Muscularis, Dartos*—*t. Nervea oculi, Retina*—*t. Nervorum, Neurilemma*—*t. Perforata, Uvea*—*t. Prætensa abdominis, Peritonæum*—*t. Propria, see Kidney*—*t. Reticularis, Retina*—*t. Retiformis, Retina*—*t. Rhagoides, Choroidæ tunica, Uvea*—*t. Rubicunda seroti, Dartos*—*t. Rubra, Dianthus caryophyllus*—*t. Ruyschiana, see Choroid*—*t. Subcostalis, Pleura*—*t. Thoracis, Corset*—*t. Uvulis, Uvea*—*t. Uvea, Uvea*—*t. Uviformis, Uvea*—*t. Vaginalis, see Vaginal*—*t. Vaginalis linguæ, see Tongue*—*t. Vaginalis propria, Vaginal coat of the Testicle*—*t. Vaginalis reflexa, Vaginal coat of the Testicle*—*t. Vaginalis testis, see Testicle*—*t. Vasculosa oculi, Choroid, see Eye*.

TUNICA VASCULO'SA TESTIS, 'vascular coat of the testis,' *Pi'a m'ater testis*. An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situate immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia

mater is reflected between the convolutions of the brain.

TUNICA VITREA, *Hyaloid membrane*.

TUNICULA, (dim. of *tunica*.) *Tu'nicle, (F.) Tunicule*. A fine membrane, coat, or skin. *Cli-toris*.

TUNIQUE, *Tunic*—*t. Albuginée, Albuginea*—*t. Commune de Bichat, Endangium*.

TUN'NELLING. A term, sometimes employed for the treatment of stricture of the urethra, by making pressure upon it from within so as to promote its removal by absorption.

TUNNYFISH, SALTED, *Omota'chos*.

TUPHLOËNTERITIS, *Typhloënteritis*.

TUPHUS, *Typhus*.

TUPINARIA, *Talpa*.

TURBA HEMORRHOIDALIS, 'hemorrhoidal disorder,' see *Hæmorrhoids*.

TURBATIONES ANIMI, (*turbare, turbatum, 'to disorder,')* Affections of the mind.

TUR'BINATED BONES, *Ossa turbina'ta*.

Bones shaped like a top; (from *turba*, gen. *turbinis* or *turben*, 'a top,') *Os'sa spongio'sa, O. ter'tia maxillæ superio'ris, Cor'na, Con'chæ na'rium* seu *vent'ris, Tur'binæ na'si* seu *na'rium, Conchyl'um, Buccin'a, Lam'inæ spongio'sæ na'si, (F.) Cornets*. Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossa. 1. *Os spongio'sum supe'rius* or *Cornet de Morgagni*;—the highest. 2. *Os spongio'sum me'dium, the middle corn'u* of French anatomists,—the *ethmoid'al corn'u* or *Os spongio'sum supe'rius* seu *turbina'tum*, of English anatomists, *Os convolu'tum supe'rius, Con'cha, C. na'rium supe'rius* seu *Morgagni'na, (F.) Cornet moyen*. This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3.

*Os spongio'sum seu turbina'tum infe'rius, Con'cha infe'rior, Convolutum infe'rius os, Os sous-ethmoid'al (Ch.)*, projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoid'al corn'u*.

All the turbinated bones extend the olfactory surface.

TURBINES NASI SEU NARIUM, (pl. of *turbo*, gen. *tur'binis*, 'a top,') Turbinated bones.

TURBITH BLANC, *Globularia alypum*—*t. Mineral, Hydrargyrum vitriolatum*—*t. Montpellier, Globularia alypum*—*t. Noir, see Hydrargyri oxydum cinereum*—*t. Plant, Convolvulus turpe-thum*.

TURBO CEREBRI, *Pineal gland*.

TURGENTIA, *Turgescence*.

TURGES'CENTE, *Turges'cence, Turgid'ity, Tur'giduess, Turgescen'tia, Turgen'tia, Orgas'mus*, (from *turgescere*, 'to begin to swell, turgere, 'to swell,') Superabundance of humours in a part. The term *Turges'cence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility—*Turgor vitalis*—has been presumed to exist in the capillaries of certain organs, and in erectile tissues; but the generality of physiologists do not admit it.

TURGESCENTIA, *Turgescence*.

TURGESCENTIA VESICULÆ FELLEÆ, *Ascites Hep'atocysticus, Physco'nia* seu *Cystocel'le bilio'sa, Hepatal'gia Petiti'na, Hydrocholecyst'is, Hy'drops vesic'æ fell'æ, (F.) Hydropisie de la Vésicule du Fiel, Distension de la Vésicule du Fiel, Cholécystictasie*. Distension of the gall-bladder by bile.

TURGIDITY, *Turgescence*.

TURGIDNESS, *Turgescence*.

TURGOR VITALIS, see *Turgescence*.

TURMERIC, *Curcuma longa*, *Sanguinaria Canadensis*.

TURN OF LIFE, see *Menses*.

TURN'ING, *Ver'sio*, (from [F.] *tourner*, 'to turn.') (F.) *Versio*.

TURNING OF THE FÆTUS, *Ver'sio Fætus*. Generally, the operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts. This has been termed *podalic version*, in contradistinction to *cephalic version*, which consists in bringing the head down,—in shoulder-presentations, for example.

TURNIP, (*turn*, and [Sax.] *næpe*, 'navew,') *Brassica rapa*—t. Dragon, *Arum triphyllum*—t. Indian, *Arum triphyllum*, *Psoralea esculenta*—t. Pepper, *Arum triphyllum*—t. Prairie, *Camassia esculenta*.

TURNS, *Menses*.

TURPENTINE, *Terebinthina*—t. Bordeaux, see *Pinus sylvestris*—t. Briançon, see *Pinus cembra*—t. Chio, see *Pistacia terebinthus*—t. Common, see *Pinus sylvestris*—t. Common, American, see *Pinus sylvestris*—t. Cyprus, see *Pistacia terebinthus*—t. Damarra, see *Pinus damarra*—t. Dombeya, see *Dombeya excelsa*—t. Horse, see *Pinus sylvestris*—t. Strasburg, see *Pinus picea*.

TURPENTINE TREE, *Pistacia terebinthus*.

TURPENTINE, VENICE, see *Pinus larix*—t. Venice, true, see *Pistacia terebinthus*—t. White, see *Pinus sylvestris*.

TURPETHUM, *Convolvulus turpethum*—t. Minerale, *Hydrargyrum vitriolatus*—t. Nigrum, *Hydrargyri oxydum cinereum*.

TURQUETTE, (from Turkey,) *Herniaria glabra*.

TURQUOISE, (from (I.) *turchino*, 'greenish-blue.') This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health: a superstitious notion.

TURTLE BLOOM, *Chelone glabra*—t. Green, *Chelonia mydas*—t. Head, *Chelone glabra*.

TURTUR, gen. *Turturis*, *Penis*.

TURUNDA, *Tent*.

TURUN'DÆ ITALICÆ. Pastes made of the finest and most glutinous wheat—known under the names of *Macaroni*, *Vermicelli* and *Italian* or *Cagliari paste*. Similar preparations, made in Pennsylvania of flour and eggs, are called *noodles*, from the German *Nudel* n, 'pastry.'

TURUNDULA, (dim. of *turnnda*), *Tent*.

TUS, see *Pinus abies*.

TUSCARORA ACID SPRING, see *Canada*, mineral waters of.

TUSSACA RETICULATA, (after G. R. De Tussac, a French botanist,) *Goodyera pubescens*.

TUSSEDO, *Tussis*.

TUSSICULA, see *Tussis*.

TUSSICULAR, *Tussiculat'ris*, *Tussiculo'sus*, (from *tussicula*.) Relating to a cough, or a slight cough.

TUSSICULOSUS, *Tussicular*.

TUSSILA'GO, gen. *Tussilag'inis*, *T. Far'fara* seu *vulga'ris*, (from *tussis*, which it relieves;) *Belchium*, *Belchion*, *Cal'ceum equ'num*, *Chamælen'ce*, *Chamægel'ron*, *Fil'ius ant'ë pa'trem*, *Farfarell'a*, *Gallionar'chus*, *Far'fara*, *F. Belchium*, *Un'gula caball'na*, *Colts'foot*, *Foal'foot*, (F.) *Pas d'âne*, *Herbe de Saint-Quirin*. *Ord. Compositæ. Sec. Syst. Syngenesia Polygamia Superflua*. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

TUSSILAGO FARFARA, *Tussilago*—t. *Hybrida*, *T* petasites.

TUSSILAGO PETASITES, *T. hybrida* seu *petasites* seu *hermaphrodita*, *Petasites*, *P. major* seu *ris'bens* seu *officinal'is* seu *hybrida* seu *vulga'ris*, *But'terbur*, *Pest'ilenticoort*, (F.) *Pétasite*, *Herbe aux*

*teigueux*, *Chapelière*. The roots of this plant have been recommended as aperient and alexipharmic. They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

TUSSILAGO PETASITES HERMAPHRODITA, *T. petasites*—t. *Vulgaris*, *Tussilago*.

TUSSIS; dim. *Tussic'ula*; *Beg'ma*, *Bex*, *Tuss'edo*, *Bex'is*, *Tuss'is nervo'sa*, *Catar'chus*, *Puen'is* *Tuss'is*, *Cough*, *Cough'ing*, *Haust*, *Hoast*, (Prov.) *Conf.* (Sc.) *Host*, *Hoist*, (F.) *Toux*. A violent, sonorous, frequent, and short expiration, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry*, when unaccompanied by expectoration. It is symptomatic of many diseases. See *Bronchitis*.

TUSSIS AMPHEMERINA, *Pertussis*—t. *Asinina*, *Pertussis*—t. *Bronchica*, *Cough*, *tubal*, see *Bronchitis*—t. *Canina*, *Pertussis*—t. *Catarrhalis Simplex*, *Catarrh*—t. *Clamosa*, *Pertussis*—t. *Clangosa*, *Pertussis*—t. *Convulsiva*, *Pertussis*—t. *Delassans*, *Pertussis*—t. *Ferina*, *Pertussis*—t. *Pueros strangulans*, *Pertussis*—t. *Quinta*, *Pertussis*—t. *Senilis*, *Bronchitis* (chronic)—t. *Spasmodica*, *Pertussis*—t. *Stomachalis*, *Pertussis*—t. *Suffocans*, *Pertussis*—t. *Suffocativa*, *Pertussis*—t. *Tussiculosa*, *Pertussis*.

TUSSIVE, *Tussiv'us*, (from *tussis*.) Belonging or relating to cough:—as *tussive* vibration; the vibration of the parietes of the chest, caused by coughing.

TUTAMINA, pl. of *tuta'men*, 'a defence,' 'a protection,' (from *tutare*, 'to defend.') Parts are so called which defend or protect others.

TUTAMINA CER'EBRI are the scalp, pericranium, bones of the skull, and the meninges.

TUTAMINA OC'ULI are the eyebrows, eyelids, and lachrymal apparatus.

TUTENAG, *Zincum*.

TUTHIA, *Tutia*.

TUTIA, *Pom'pholyx*, *Cadmia*, *Alfasa*, *Mesera*, *Capn'itis*, *Tu'thia*, *Oxydum zin'ci impu'rum*, *Tutty*. The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

TUTTERING, *Stuttering*.

TUTTY, *Tutia*.

TWIGG'S HAIR DYE, see *Hair dye*.

TWIN, ([Sax.] *twra*, *twri*, 'two,') *Gemellus*.

TWINGE, (from [D.] *dringen*, 'to force,') see *Pain*.

TWINKLING OF THE EYE, *Nictation*.

TWINLEAF, COMMON, *Jeffersonia Bartoni*.

TWINROOT, *Orchis*.

TWINS, SIAMESE'. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrum of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They have lived in North Carolina, are married, and have children. See *Xiphogages*.

TWITCHGRASS, *Triticum repens*.

TWITCHING, (from [Sax.] *twiccan*, 'to wrest,') *Tie*.

TYCH'ICA, (from *τυχη*, 'accident,') Fortuitous lesions or deformities. The 7th class of Good's *Nosology*.

TYLE, (*τυλη*), *Callosity*.

TYLOMA, (*τυλωμα*, from *tylus*, and *oma*), *Callosity*.

TYLOPH'ORA ASTHMATICA, (*tylus*, and *φραειν*, 'to bear,' from the fleshiness of the leaflets of the corolla.) *Asclepias asthmatica*, *Cyanan'chem Ipecacuan'ha* seu *vomito'rum* seu *viridiflorum* seu *tomento'sum*, *Ipecacuan'ha* of the *Isle*

of France. (F.) *Ipeacacuanha blanc de l'Île de France*. Order, Asclepiadaceæ. A native of various parts of the East Indies, both of the continent and islands. The root is acrid, and is used on the coast of Coromandel as a substitute for ipeacacuanha. In large doses, it is emetic; in smaller, often repeated, it is cathartic. It is recommended, also, as a diaphoretic, and especially in humeral asthma.

TYLOSIS, (τυλωσις, from *tylus*, and *osis*), Callosity.

TYLUS, (τυλος), Callosity.

TYMMA, gen. *Tymmatiss*, (τυμμα.) Wound.

ΤΥΜΠΑΝ, Tympanum—t. *Membrane du*, see Tympanum.

TYMPANAL, Tympanic.

ΤΥΜΠΑΝΑΛ, *Cadre du tympan*.

TYMPANIA, Tympanites.

TYMPANIAS, Tympanites.

TYMPANIC or TYMPANIC, *Tympanicus*, *Tympanal*, (F.) *Tympanique*, (from *tympanum*.) Relating to the tympanum, as 'tympanic canal.'

TYMPANIC NERVE, see Petros ganglion.

TYMPANIQUE, Tympanic.

TYMPANISM, *Tympanismus*, (from *tympanum*.) State of parts affected with tympanites.

TYMPANITA, Tympanites.

TYMPANITE, Tympanites.

TYMPANITES, (τυμπανιτις,) *Emphysema seu Pneumatosis Abdominis*, *Hydrops Tympanites*, *Affectio tympanitica*, *Ectympanosis*, *Hydrops abdominis æthereus*, *Æroësis*, *Æroëterectasis*, *Æreterectasis*, *Enterærectasis*, *Physocælia*, *Tympanosis*, *Physema*, *Physema*, *Hydrops siccus et flatulentus*, *Tympania*, *Tympanias*, *Tympanitia*, *Tympanitis*, *Emphysema Tympanites*, *Ectympaniticum*, *Meteorismus*, *Tympany*, *Meteorism*. *Drum belly*, *Wind drop'sy*, (F.) *Tympanite*, *Pneumatose péritonéale*, *Ballonnement*, (from *τυπανον*, 'a drum,' so called because the abdomen is distended with wind, and sounds like a drum when struck.) A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from decomposition of substances contained in it: the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection, in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm. Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympanites abdominalis*, *Æroëperitonie* of some:—the accumulation in the intestines being called *Tympanites intestinalis*.

TYMPANITES, UTERINE, *Physometra*.

TYMPANITIS, *Inflammatio tympani*, (*tympanum*, and *itis*.) Inflammation of the lining membrane of the middle ear. Also, tympanites.

TYMPANOSIS, Tympanites.

TYMPANUM, (τυπανον, 'a drum.') The *Drum* or *barrel of the ear*, *Ear drum*. The names *Cavity of the Tympanum* or of the *Drum*, *Cavitas seu Cavum Tympani*, *Autrum seu cavitas autrosa Auris*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour* ou du *Tympan*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situat in the pars petrosa of the temporal bone, between the meatus audit-

rius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Membrane of the Drum*, *Membrana tympani*, *Diaphragma seu Mediastinum* seu *Tegumentum auris*, *Myringa*, *Myringa*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenes'tra ovalis*, *Promontory*, and *Foramen rotundum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior*, on which are the *Processus cochleariformis* and the inner orifice of the *Eustachian tube*. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Ossicles of the Ear*, and are the malleus, incus, os orbicular, and stapes.

For the nervous plexus of the tympanum, see Petrosal Ganglion, and Otic Ganglion.

TYMPANUM MIXTUM, see Fenestra—t. *Secundarium*, see Fenestra.

TYMPANY, Tympanites—t. of the Womb, *Physometra*.

TYPE, *Ty'pus*, *Peri'odus mor'bi*, (τυπος, 'a stamp,' itself from τυπτω, 'I strike.') The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA, (τυφη.) has the same properties as

TYPHA AROMATICA, *Acorus calamus*, and

TYPHA LATIFOLIA, *Cattail*, *Reedmace*, *Greater Reedmace*, *Bullsegg*, (F.) *Mussette*, *Musse* ou *Quenouille d'Eau*. A plant common in marshes and ponds, in this country and Europe. Ord. Typhaceæ. *Sex. Syst.* Monœcia triandria. Its roots have been used in dysentery and hemorrhagia. The young shoots, before they reach the surface of the water, when boiled, taste like asparagus.

The down, (F.) *Aigrette*, *Poils*, which accompanies the flowers, has been applied like cotton to burns.

TYPHICUS, (from *typhus*.) Typhoid.

TYPHIQUE, Typhoid, Typhus.

TYPHLITIS, (from *typhlo*, and *itis*.) Typhloenteritis.

TYPHLO, (from τυφλος, *cæcus*, 'blind,') in composition, the cæcum.

TYPHLODICLIDITIS, (*typhlo*, *δωκς*, gen. *δωκός*, 'a double door, a valve,' and *itis*.) Inflammation of the ilicœcal valve.

TYPHLOËNTERITIS, *Typhloenteritis*, *Typhlitis*, *Inflammatio Cæci*, *Phlegmonous Inflammation of the Cæcum*, (F.) *Inflammation du Cæcum*, *Cæcite* (Piory); (*typhlo*, and *enteritis*, 'inflammation of the intestines,') Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, (*typhlo*, and *εντερον*, 'intestine,') Cæcum.

TYPHLOPS, (*typhlo*, and *ωψ*, 'eye,') Cæcum.

TYPHLOSIS, (τυφλωσις.) Cæcitas.

TYPHLOTERTIS, (*typhloterum*, and *itis*), Typhloenteritis.

TYPHLOTERUM, Cæcum.

TYPHLOTES, (τυφλωσις.) Cæcitas.

TYPHO, (from τυφος, 'stupor,') in composition, typhus.

TYPHODES, (τυφώδης, affected with τυφος, 'stupor,') Typhoë.

TYPHOËMIE, Typhoëmia—t. *Entérique*, see Typhus.

TYPHOEMIA, (*typhus*, and *αἷμα*, 'blood,') see Putrefaction.

TYPHOID, *Typhoïdes*, (τῦφῶδης, 'stupefied,') *Typhicous*, *Typhoidous*, *Lactica*, (F.) *Typhique*, *Typhoïde*, (*typho*, and *εἶδος*, 'resemblance,') Appertaining to or resembling typhus; as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *Phlogoses*; of this family, *Stomococce*, *Pharyngococce*, and *Pneumococce* are examples.

TYPHOID AFFECTION, see Typhus—t. Fever of India. Cholera.

TYPHOMANIA, (τῦφομανία, from *typho*, and *μανία*, 'delirium,') *Delirium* with stupor, *Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, Coma vigil, Insomnia.

TYPHONIA, (from *typhus*,) Coma vigil.

TYPHOSEPTES, Typhoseptoses.

TYPHOSEPTOSES, *Typhosep'ses*, (*typho*, and *επιση*, 'putrefaction,') Typhous affections.

TYPHOSIS, (*typhus*, and *osis*,) The typhous condition or diathesis.

TYPHOSUS, (from *typhus*,) Typhoid, Typhous.

TYPHOUS, *Typhous*, (F.) *Typhique*, *Typhode*. Belonging or relating to typhus.

TYPHOUS DEPOSIT. A peculiar substance of new formation found in the areolar membrane, between the mucous and muscular coats of the patches of Peyer in typhoid fever.

TYPHOUS FEVER, see Typhoid.

TYPHUS, *Semipes'tis*, *Typhus*, *Febris Typhoides* seu *asthen'ica* seu *adynam'ica*, *Athenopy'ra*, *Enc'cia typhus*, (F.) *Fievre adynamique* ou *ataxique* ou *adynamique ataxique*, *Typhus d'Europe*; (from τῦφος, 'stupor,') A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being generally from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease was formerly divided into two varieties—*Typhus mitior* and *Typhus gravior*.

TYPHUS MITIOR seu *simp'ler* seu *nervosus* seu *comatosus*, *Febris lent'a nervosa* seu *pu'trida nervosa* seu *hect'ica maligna nervosa*, *Blethropy'ra*, *Neuropy'ra*, *Neuropy'etnis*, *Nervous Fever*, (F.) *Fievre nerveuse*, is characterized by slight shiverings; heavy, vertiginous headach; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium.

TYPHUS GRAVIOR seu *car'cerum* seu *castren'sis* seu *anthropophthor'acus* seu *contagio'sus* *exanthemat'icus* seu *nost'ras* seu *Europ'us* seu *commun'is* seu *bell'icus* seu *exanthemat'icus* seu *Hiber'nicus* seu *petechial'is*, *Febris nervosa epidem'ica* seu *nervosa exanthemat'ica* seu *maligna* *enm* *sopore* seu *typhoides* seu *nervosa petechial'is* seu *pestilential'is* *Euro'pe* seu *puncticular'is* seu *sapropy'ra* seu *car'cerum* et *nosocomio'rum* seu *pu'trida* seu *cont'inens* *pu'trida* seu *cont'inu'a* *pu'trida* seu *pestilens* *maligna* seu *naut'ica* *pestilential'is* seu *petechial'is*, *Septopy'ra*, *Porphyroty'phus*, *Sapropy'phus*, *Pulicula'ris* *mor'bus*, *Pest'is bell'ica*, *Trine* or *Exanthemat'ic* or *cont'agious typhus*, *Nervous fever* with *exanthematous eruption*. *Pu'trid*, *Jail*, *Hospital* or *Ship Fever*, (F.) *Fievre des Camps*, *F. nautique*, *F. d'hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, *Typhus contagieux*, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; a 'mulberry rash,' appearing on the fifth to the seventh day of the disease, and lasting till the end; delirium succeeded by stupor, signs of insipient putrescence,—as true petechiæ, vibices,

hemorrhages, &c., *Pete'chial*, *Mac'ulated* or *Spotted Fever*, *Febris maculo'sa*. Typhus, under particular circumstances, seems to be communicable; but if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablution or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuations; the latter cannot.

It is now maintained that there is an essential difference between the two varieties, typhoid fever and typhus; that the former is essentially an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the follicles or glands of Peyer; hence it has received the names *Fievre mésentérique*, *F. typhoïde*, *Maladie* ou *Affection typhoïde*, *F. catéro-mésentérique*, *Entérite typho-hémique*, *Typhoémie entérique*, *Entéro-mésentérite typhoïde*, *Exanthème intestinale*, *Dothinentérite*, *Dothinentérite*, &c., *Neodideldite*, *Typhodideldite*, *Entérite folliculeuse*, *Gastro-entérite* with nervous affection of the brain, *Follicular gastroenteritis*, *F. enteritis*, *Enteritis folliculo'sa*, *Typhus abdominalis*, *T. intestinalis*, *T. Sporadicus*, *Enterotyphus*, *T. ganglionaris abdominalis*, *Febris intestinalis ulcero'sa*, *F. nervosa gastrica*, *F. nervosa enterica*, *F. enterica*, *F. nervosa mesenterica*, *Enterhelcosis nervosa*, *Typhus entericus*, *Neopy'ra*, *Neoty'phus*, *Typhoid affection*, *Entericfever*, *Pythogenicfever*. Accompanying this form of fever there is generally pain or gurgling or pressing the right iliac fossa, over the seat of the intestinal lesion; with more or less diarrhœa, and a typhoid eruption, consisting of rose-red papulæ, (see Spots, red,) which appears mostly on the abdomen in the second week of the disease. They are distinct from true petechiæ, as they can be removed by pressure; and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever or synochus of Great Britain, and of this country, belongs to this variety, and the *Red Tongue Fever* of Kentucky was considered by Professor Bartlett to be typhoid fever.

Certain modern French writers have considered the Typhus of the European continent, *Typhus of Europe*, *pestilential fever*, *cont'agious typhus*, *Hungary fever*, *Hospital fever*, *camp fever*, *jail fever*, *lenticular petechial fever*, (F.) *Peste d'Europe*, &c., to be identical with the typhoid affection. They admit but one fever on the European continent—the typhoid. Typhus, they maintain—but by no means establish the position—to be peculiar to England.

TYPHIC, *Typical*, *Typ'icus*, (τυπικός,) (F.) *Typ'hia*, 'atrophy.' Shrinkage of the gums; falling away of the gums.

TYPOSES, (from *typos*,) see Periodicity.

TYPUS, (τυπος,) Type.  
 TYRANNUS, 'a tyrant,' see Critical days.  
 TYRBASIA, (τυρβασία,) Agitation.  
 TYRBE, (τυρβη,) Agitation.  
 TYREMESIS, *Tyrotent'esis*, (*tyros*, and *εμεσις*, 'vomiting;') *Tyro'sis*, *Tyreu'sis*. Vomiting of curdy matter, in infants especially.  
 TYREUSIS, (τυρευσις, 'cheese-making,') Tyremesis, Tyrosis.  
 TYRIA, Porrigo decalvans.  
 TYRIASIS, Elephantiasis Arabica.  
 TYRINE, (from *tyrus*,) Casein.  
 TYRODES, (τυροδης, from *tyrus* and *odes*,) Cheesy.  
 TYROMA, gen. *Tyro'matis*, Porrigo decalvans.  
 TYRUS, (τυρος,) Cheese.  
 TYROSIS, (from *tyrus*, and *osis*,) Tyremesis. Also, the curdling of milk in the stomach; *Ty'reu'sis*.  
 TYROTEMESIS, (τυροτος, 'made into cheese,' and *εμεσις*, 'vomiting,') Tyremesis.

U.

UBER, see Mamma.  
 UBERIS APEX, 'apex of the breast,' Nipple, Papilla.

UDDER, (Sax. *uber*,) see Mamma.

ULDA, (ουλα, from *ουλος*, 'solid,') Gingiva.

ULEMORRHAGIA, Ulorrhagia.

ULATROPHIA, (ουλον, 'the gum,') and *atrophia*, 'atrophy.' Shrinkage of the gums; falling away of the gums.

ULCER, (έλκος,) *Ulcus*, *Hel'cos*, *Elco'sis*, *Elco'ma*, *Hel'cus*, *Helco'ma*, a *Sore*, (Sc.) *Sair*, (Prov.) *Kile*, (F.) *Ulcère*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is perverted nutrition; the formative cells losing their plastic power. Ulcers have been variously divided, according to their nature;—into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *sphilitic*, *cancerous*, *scirrhous*, *epithelial*, *encephaloid*, *invertebrate*, *scrofulous*, *phagedenic*, *virulent*, *cacoëthic*, *sordid*, *curious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

ULCERATED, *Ulceratus*, *Esculceratus*, *Helco'des*, (F.) *Ulcéré*; (*ulcerare*, *ulceratum*, 'to make

*sore*, from *ulcus*.) In the state of an ulcer. Affected with ulcers.

ULCERATIO, Ulceration—u. Intestinalis, Enterocolicis—u. Ventriculi, Gastrocolicis.

ULCERATION, *Ulceratio*, *Esculceratio*, *Pyrogen'ia corrosiva*. A superficial ulcer. The formation of an ulcer—*Esculco'sis*, *Elco'sis*, and *Helco'sis*.

ULCERATIVE, *Ulcerativus*, (F.) *Ulcératif*. Relating to ulceration,—as an '*ulcerative process*.'

ULCÈRE, Ulcer—u. *du Larynx*, Phthisis laryngea.

ULCÉREUX, Ulcerous.

ULCEROUS, *Ulcerosus*, *Helco'des*, *Helcoi'des*, (from *ulcus*,) (F.) *Ulcéreux*. Having the character of an ulcer. Affected with ulcers.

ULCERS, EGYPTIAN, *Ægyptia ulcera*.

ULCUS, gen. *Ulc'is*, (έλκος,) Ulcer—u. Atonicum, Rupia—u. Cacoëthes, see Cacoëthes—u. Cancerosum, Cancer, Chancre—u. Dacryodes, see Dacryodes—u. Depascens, Phagedenic ulcer—u. Ferinum, Phagedenic ulcer—u. Fistulosum, Hypophora—u. Hypulum, see Hypulum—u. Narium foetens, Ozena—u. Obambulans, Phagedenic ulcer—u. Pulmonum, Phthisis pulmonalis—u. Sinuosum, Hypophora—u. Syriacum, Cynanche maligna—u. Telephium, Telephium—u. Tuberculosum, Lupus—u. Uteri, Hysterecolicis, Leucorrhœa.

ULCUSCULA PRÆPUTII, (pl. of *ulcusculum*,) Herpes præputii.

ULCUSCULUM, (dim. of *ulcus*,) Ulcer—u. Cancerosum, Chancre.

ULE. (υλη,) Cicatrix.

ULETICUS, (from *ulon*,) Gingivalis.

ULICUS, Gingivalis.

ULITIS, (*ulon*, and *itis*,) *Oul'itis*, *Inflammati' gingivæ*, *Periodonti'tis gingival'rum*, (F.) *Ulite*, *Gingivite*, *Inflammation des gencives*. Inflammation of the gums.

ULITIS SEPTICA, Cancer aquaticus.

ULLUCO, *Tropæolum tuberosum*.

ULMAIRE, *Spiræa ulmaria*.

ULMARIA, (from *ulmus*,) *Spiræa ulmaria*—u. Palustris, *Spiræa ulmaria*.

ULM'US, *U. campestris* seu *glabra* seu *montana* seu *indica* seu *sativa* seu *scabra*, *Pte'lea*, *Com'mou Elm*, (F.) *Orme*, *Ormeau*, *Orme pyramidal* ou *champêtre*. *Ord. Ulmaceæ*. *Sex. Syst.* Pentandria Digynia. The inner, rough bark—*Ulmus*, (Ph. B.)—of this tree is inodorous; and has a

bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALATA, *Lymn Wahoo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

ULMUS AMERICANA, *U. fulva* seu *rubra*, *Rough-leaved, Red, or Slippery Elm*. The inner bark—*Ulmus fulva*, (Ph. U. S. 1863),—is highly mucilaginous, and is used in coughs, diarrhoeas, and dysenteries; and, as a poultice for tumours, lacerated and contused wounds, &c. It may be employed, also, as a tent for dilating openings or passages.

ULMUS CAMPESTRIS, Ulmus—*u. Fulva*, *U. Americana*, *U. rubra*—*u. Glabra*, Ulmus—*u. Montana*, Ulmus—*u. Nuda*, Ulmus—*u. Sativa*, Ulmus—*u. Scabra*, Ulmus.

UL'NA, (ὀλυνή,) *O'leuē*, *Foc'itē infērius* seu *ma'jus*, *Caui'na Bra'chii*, *Os cu'biti infērius*, *Os pro'cubitalē*, *Cu'bitus*, *Arui'do bra'chii ma'jor*, *Cu'bit*. Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sig'moid* or *semilun'ar fos'sa* or *olecrano'id cavity*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the *les'ser sig'moid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibrocartilage which separates it from the os cuneiforme; and a pointed process called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification. Also the elbow.

ULNAD, see Ulnar aspect.

ULNAIRE, Ulnar.

ULNAR, Cubital.

UL'NAR AS'PECT. An aspect towards the side on which the ulna is situated.—(Barclay.) *Ulnad* is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, (from *ulna*), Cubital—*u. Externus*, see Cubital muscles—*u. Gracilis*, *Palmaris longus*—*u. Internus*, see Cubital muscles.

ULOCACE, (*ulon*, and *κακος*, 'evil,') Cancer aequatus, Stomacace.

ULON, (ὀλον,) Gingiva.

ULON'CUS, (F.) *Uloncis*, (*ulon*, and *γκως*, 'tumour,') Swelling of the gums; epulis.

ULORRHAG'IA, *Ulororrhag'ia*, *Onlorrhag'ia*, *Stomatorrhag'ia*, *Hæmorrhag'ia gingiværum*, *Ulorrhæ'a*, (*ulon*, and *ρήγνυμι*, 'I break forth,') Bleeding from the gums.

ULORRHŒA, (*ulon*, and *ῥεω*, 'to flow,') Ulorrhagia.

ULOSIS, (*ule*, and the suffix *osis*,) Cicatrization.

ULOTICA, (from *ule*,) Cicatrifiantia.

UL'TIMISTERNAL. Professor Bécларd gave this appellation to the sixth or last bony portion of the sternum. He calls it also *Ensistern'al*.

UL'TIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which die last.

ULUM, (ὀλου,) Gingiva.

ULVA CRISPA, Fucus crispus.

UL'VA LATIS'SIMA, *Broad Green La'ver*, *Green Stöcke*, *Oyster green*; *Order*, Algæ; is used at

table cooked in the same way as the next, to which it is greatly inferior.

ULVA UMBILICALIS, *Por'phyra lacinia'ta* seu *umbilical'is*, *Lacinia'ted Purple La'ver*, abundant on the shores of Great Britain, is pickled with salt and sold in London as *La'ver*. It is eaten at table, stewed with pepper, butter or oil and lemonjuice or vinegar. It has been suggested, also, as an antiscorbatic.

UMBEL, YELLOW, *Cypripedium luteum*.

UMBILIC, Umbilical, Umbilicus.

UMBILICAL, *Um'bilic*, *Umbilical'is*, (F.) *Ombilical*, (from *umbilicus*.) That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamentum rotundum* of the liver.

UMBILICAL CORD, Funiculus umbilicalis.

UMBILICAL RE'GION, *Re'gio umbilical'is* seu *gas'trica* seu *me'sogas'trica*, *Mesogastrium*, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'ulus umbilical'is*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESICLE, *Vesicula umbilicalis*.

UMBILICAL VES'SELS, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATED, *Umbilica'tus*, (F.) *Ombiliqué*. Depressed in the centre like the umbilicus,—as an 'umbilicated pustule.'

UMBILIC'US, *Um'bilic'um*, *Um'bo*, *Om'phalos*, *Ra'dix* seu *Me'dium ven'tris*, *Mesomphalium*, *Mesom'phalum*, *Protme'sis* (navel of a newborn child); the *um'bilic*, *na'vel*, (Prov.) *Spoon*; (from *umbo*, 'the button or prominence in the middle of a buckler,' or from *ὀμφαλος*, or rather *ομφαλος*, which signifies the same, as well as the navel;) (F.) *Ombilic*, *Nombri'l*. A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

UMBILICUS MARI'NUS, *Cotyle'don mari'na*, *Andro'sacé*, *Acetabulum mari'num*, *Andro'sacé Mat'hé'olt*, *Fungus petræ'us mari'nus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, (dim. of *umbra*, 'a shade,') *Magnolia tripetala*.

UMSCHLAG, ([G.] *um*, 'around,' and *schlagen*, 'to throw,') see *Compress*.

UNBOWELING, Exenterisimus.

UNCARIA GAMBIR, *Nauclea Gambir*.

UNCAS, INDIAN, *Veratrum viride*.

UNCIA, (ὀγγυα,) Ounce.

UN'CIFORM, *Uncifor'mis*, *Uncina'tus*, (*uncus*,

and *forma*, 'shape.') That which has the shape of a hook.

**UNCIFORM BONE**, *Os unciform'e seu hamatum seu uncinatum*, (F.) *Os crocha*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

**UNCIFORM EMINENCE**, *Hippocampus minor*.

**UNCIFORM PROC'ESS**, *Processus uncinatus seu Blumenbach'ii*, *Great Proc'ess of the Eth'moid*. The most considerable of the thin irregularly twisted laminae on the inferior surface of the ethmoid bone, which narrow the opening of the maxillary sinuses.

**UNCINATUS**, (from *uncinus*,) *Unciform*.

**UNCINUS**, *Hook*.

**UNCTION**, (*ungere, unctum*, 'to anoint,') *Inunction*, *Unguentum*, *Unguentum hydrargyri*.

**UNC'TOR**, (same etymon as *Ungtion*.) The anointer in ancient bathing establishments.

**UNCTORIUM**, *Elæothesion*.

**UNCTUARIUM**, *Elæothesion*.

**UNCUS**, *gen. Ucti, Hook*.

**UNDER'CLIFFE, ISLE OF WIGHT**, (*CLIMATE OF*.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

**UNDIM'IA**. A name given by Paracelsus to a tumour filled with a gelatinous matter, like the white of egg.

**UNDOSUS**, (from *unda*, 'a wave,') *Cynatodes*.

**UNDULATIO**, (from *unda*, 'a wave,') *Fluctuation*.

**UNEDO**, *gen. Unedo'sus, Arbutus unedo*—*u. Papyracea, Arbutus unedo*.

**UN'GUEAL**, *Unquæ'lis, Un'qual, Ungna'lis*, (from *unguis*, 'a nail,') Belonging or relating to the nails of the hands or feet.

**UNQUEAL MATRIX**, *see Nail*.

**UNGUEN**, (from *ungere, unctum*, 'to anoint,') *Unguentum*—*u. Articulare, Synovia*.

**UNGUEN, ARMATORY**, *Hoplochrysa*.

**UNGUENTARIA**, *see Myrsinica Moschata*.

**UNGUENTA'RIOUS**, *Myrep'sus, Myropæ'us, Myropo'les, Myropo'lus, Pigmenta'rius*, (from *unguentum*. One who makes and sells ointments. A perfumer.

**UNGUENTUM**, *Un'guen, Diachrysm'a, My'ron, Unc'tion, Salve*, (F.) *Onguent*, (from *ungere, unctum*, 'to anoint,') *Ointment*. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used chiefly as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment shall be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately. *See Pomatum*, (F.) *Pommade*.

**UNGUENTUM AC'IDI NITRO'SI**, *Ointment of Nitrous Acid*, *Pomatum seu Unguentum Nitricum seu Oxygenatum*, (F.) *Pommade oxygénée, Graisse oxygénée, Pommade d'Alyon*. (*Adip. suilli*, ℞j; *Acid nitros*. ℞vj. Melt the fat, and rub in the acid gradually, till cold. *Ph. E.*) *Stimulant*. Used in itch and other cutaneous eruptions, and in local ulcers.

**UNGUENTUM AC'IDI TAN'SINICI**, *Ointment of Tan-*

*nic Acid*. (*Acid. Tannic*. gr. xxx; *Aq. f* ℞j; *Adipis*. ℞j. Rub the acid with the water, and mix with the lard. *Ph. U. S.*, 1863.) Used like *Unguentum Gallæ*.

**UNGUENTUM ACONIT'LE**, *Ointment of Aconit'ia*. (*Aconitine*, gr. viij; *Sp. rectif*, f ℞ss; *Adipis præparat*. ℞j M.) In neuralgic pains.

**UNGUENTUM ADIPIS**, *U. Ceræ*.

**UNGUENTUM ADIPOCERE CETORUM**, *Ceratum cetacei*—*u. Ægyptiacum, Linimentum æruginis*—*u. Ægyptium album, Crinomyron*—*u. Æruginis, U. subacetatis cupri*—*u. Album, Unguentum cetacei*—*u. Album Resolvens, Linimentum ammoniæ fortius*.

**UNGUENTUM DE ALTHÆ'Â**, *U. de Terebinthinâ et cetrâ seu citr'iumum seu resinæ pi'ni sylvestris compositum seu resumptivum seu lenitivum, Ceratum de Althæ'a, Emplastrum mucilaginosum seu emolliens seu citr'iumum seu flavum seu de Althæ'â, Unguentum flavum, Marshmallow Ointment*, (F.) *Onguent de guimave, O. d'althéa*. (*Olei de mucilagibus*, 1000 p., *Ceræ flavæ*, 250 p., *Resinæ, Terebinthin*, āā 125 p. Liquefy; strain and stir till cold. *Ph. P.*) *Common Olive Oil* might be substituted for the *Oil of Mucilages*.

**UNGUENTUM AMMONIACALE GONDRETI**, *Pommade de Gondret*—*u. Amygdalinum, Ceratum Galeni*.

**UNGUENTUM ANTIMONI'**, *U. Antimonia'lè, U. A. Tartarizati, U. A. Potassiotartratis, U. tartari emet'ici, Ointment of tartarized antimony, Antimonia'l Ointment, Tartar emetic ointment*.

(*Antimon. et potass. tartrat. in pulv. subtiliss*. ℞ij, *Adipis*. ℞j. *Ph. U. S.*) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counterirritant. This preparation is also called *Ung. Tartari stibiat'i seu emet'ici, Ung. e Tartaro stibiat'o, A'deps Tartarè stib'i'i medicat'us, Ung. Tartar'is Potass'æ stibiat'i*, (F.) *Pommade d'Antenrieth, Pommade stibée*. This method of employing the tartrate of antimony and potassa, as a revellent, is, at times, called *stib'iodermic*, (F.) *La méthode stibio-dermique*.

**UNGUENTUM ANTIMONII POTASSIOTARTRATIS**, *Unguentum antimonii*—*u. Antimonii tartarizati, U. antimoni—u. Antipernium, see Antipernium—u. Antipersorium Werlhofii, Unguentum hydrargyri præcipitati albi*.

**UNGUENTUM A'QUE RO'SÆ**, *Ointment of Rose water*, *Cold Cream*. (*Aq. Rosæ*, f ℞ij; *Ol. amygdal.* ℞iiiss; *Cetacei*, ℞i; *Ceræ albe*, ℞j. Melt together, in a water bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. *Ph. U. S.*) *Cooling to irritated surfaces*.

**UNGUENTUM ARMARII**, *Hoplochrysa*—*u. Arthanite*, *see Arthanita*—*u. Articulare, Synovia*.

**UNGUENTUM ATROP'LE**, *Ointment of Atrop'ia*. (*Atropiæ*, gr. viij; *Spir. rectif*. f ℞ss; *Adipis præparat*. ℞j M. *Ph. B.*, 1864.) *Smeared around the eye to dilate the pupil*.

**UNGUENTUM BASILICON FLATUM**, *Ceratum resinæ*—*u. Basilicon nigrum, Unguentum resinæ nigre*—*u. Basilicon viride, Unguentum subac-tatis cupri*.

**UNGUENTUM BELLADON'NE**, *Ointment of Belladonna*. (*Ext. belladonnæ*, ℞j; *Aq. f* ℞ss; *Adipis*, ℞j; *M. Ph. U. S.*) An anodyne application to irritable ulcers, &c.

**UNGUENTUM BENZO'INI**, *Ointment of Benzoin*, *Benzozated Lard*. (*Benzoin*. ℞j; *Adipis*, ℞xvj. Heat them together; strain without pressing, and stir while cooling. *Ph. U. S.*, 1863.) A substitute for lard in seasons when the latter may become rancid.

**UNGUENTUM CALOMEL'ANOS**, *Ointment of Cal'omel*. (*Calomel*, gr. lxxx; *Prepared Lard*, ℞j. *Ph. B.*, 1864.) In chronic cutaneous affections

**UNGUENTUM CALOMELANOS COMPOSITUM**, *Com' pound Ointment of Cal'omel, Ban'yer's Ointment*

(*Calomel*,  $\mathfrak{Z}\text{ij}$ ; *Burnt alum*,  $\mathfrak{Z}\text{iv}$ ; *Carbonate of lead*,  $\mathfrak{Z}\text{iv}$ ; *Venice turpentine*,  $\mathfrak{Z}\text{vj}$ ; *Spermaceti ointment*,  $\mathfrak{Z}\text{iss}$ .) In scalled head and other chronic cutaneous affections.

UNGUENTUM CANTHARIDIS, Unguentum lyttæ.

UNGUENTUM CERÆ (*al'be vel fl'a'wæ*), *Unguentum simplex* (*Ph. U. S.*, 1851), *Unguentum ad'ipis*, *Linimentum simplex*, *War Ointment*, *Ointment of Lard, Oil and Bees' wax*, (*F.*) *Onguent de cire*. (*Ceræ*,  $\mathfrak{Z}\text{ij}$ ; *Adipis*,  $\mathfrak{Z}\text{viii}$  [*Ph. U. S.*]:—or—*Ceræ*,  $\mathfrak{Z}\text{ij}$ , *Ol. oliv.*  $\mathfrak{Z}\text{v}$ .) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratum Galeni*—*u.* *Cerussæ*, *Unguentum oxidi plumbi albi*, *Unguentum plumbi subcarbonatis*—*u.* *Cerussæ acetatis*, *Ceratum plumbi superacetatis*, *U. plumbi superacetatis*.

UNGUENTUM CETA'CEI, *U. Sper'matis Ceti seu al'bum*, *Linimentum al'bum*, *Spermace'ti oint'ment*, (*F.*) *Onguent de blanc de baleine*. (*Cetacci*,  $\mathfrak{Z}\text{vj}$ , *Ceræ albe*,  $\mathfrak{Z}\text{iv}$ , *Ol. oliv.*  $\mathfrak{Z}\text{ij}$ .) *Ph. L.*) The ordinary dressing for blisters and excoriations. See *Ceratum cetacci*.

UNGUENTUM CITRINUM, *U. de althæa*, *U. hydrargyri nitratiss*.

UNGUENTUM COC'CVLI, *Oint'ment of Coc'culus Ind'icus*. (Take any quantity of *Cocculus Indicus*; separate and preserve the kernels; beat them well in a mortar, first alone, and then with a little *lard*; then add *lard* till it amounts altogether to five times the weight of the kernels. *Ph. E.*) Used to destroy vermin, and to cure scabies, and ringworm of the scalp.

UNGUENTUM CONI'I, *Ointment of Hem'lock*. (*Conii fol.* recent.; *Adipis*,  $\mathfrak{aa}$   $\mathfrak{ij}$ .) Boil the hemlock in the *lard* till it becomes crisp, and express through linen. *Ph. L.*) Used to irritable tumours and ulcers.

UNGUENTUM CONTRA SCABIEM WERLHOFFI, Unguentum hydrargyri præcipitati albi.

UNGUENTUM CREASOTI, *Oint'ment of Cre'asote*. (*Creasot.*  $\mathfrak{f}\mathfrak{ss}$ ; *Adipis*,  $\mathfrak{Z}\text{j}$ .) Add the creasote to the *lard* previously melted by a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

It is double the strength in the *Ph. B.*, 1864.

UNGUENTUM CUPRI SUBACETATIS, Unguentum subacetatis cupri—*u.* *Diapompholygos*, Unguentum oxidi zinci impuri.

UNGUENTUM DIGESTIVUM SIM'PLEX, *U. Terebinthinæ et ovorum vitelli*, *Simple digestive oint'ment*, (*F.*) *Onguent digestif simple*. (*Terebinthin. pur.* 64 p. *Vitell. ovorum*, No. 2, vel 32 p. *Mix.* for a long time, in a glass mortar, and add, gradually, enough of the *Oil of Hypericum* (*Mil'lepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by adding a little of the *Acetate of copper*.

UNGUENTUM EL'EMI, *Oint'ment of El'emi*. (*Elemi*,  $\mathfrak{Z}\text{ij}$ ; *Simple ointment*,  $\mathfrak{Z}\text{j}$ .) Melt, strain through flannel, and stir until the ointment solidifies. *Ph. B.*, 1864.) Uses, the same as the next.

UNGUENTUM EL'EMI COMPOSITUM, *Unguentum e gum'mi el'emi seu de terebinthinæ et adip'ibus seu El'emi*, *Linimentum seu Balsamum Arcæ'i*, *Compound Oint'ment of El'emi*, *Balsam of Arcæ'us*, (*F.*) *Baume d'Arcæus*. (*Elemi*,  $\mathfrak{ij}$ , *Terebinthinæ vulgaris*,  $\mathfrak{Z}\text{ss}$ , *Sevi præparati*  $\mathfrak{ij}$ , *Olivæ olei*,  $\mathfrak{f}\mathfrak{Z}\text{ij}$ .) Melt the elemi with the *suet*; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.*) Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPASTICUM DE DAPH'NE Gnid'io, *A'deps Cort'icæ daph'n'icæ gnid'ii medicat'us*, (*F.*) *Pommade de Garon*. (*Adip. præpar.* 320 p., *ceræ*, 32 p., *Cort. daphn.* *gnid.* 128 p.) Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated; then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c. See Unguentum Mezerei.

UNGUENTUM EPISPASTICUM FORTIUS, *Ceræte of cantharides*—*u.* *Epispasticum mitius*, *Unguentum lyttæ*—*u.* *Epispasticum viride*, *Unguentum lyttæ medicatum*—*u.* *Flavum*, *Unguentum de althæa*.

UNGUENTUM GAL'LÆ, *Oint'ment of Galls*, (*Gallæ in pulv.*  $\mathfrak{Z}\text{ij}$ ; *Adipis*,  $\mathfrak{Z}\text{vij}$ . *M. Ph. U. S.*) As an astringent in piles, indolent ulcers, &c.

UNGUENTUM GAL'LÆ COMPOSITUM, *U. Gallæ et O'pii*, *U. Gallæ cum O'pio*, *Compound Oint'ment of Galls*. (*Gall. in pulv. subtil.*  $\mathfrak{Z}\text{vj}$ , *Adipis*,  $\mathfrak{Z}\text{vj}$ , *Opii pulv.*  $\mathfrak{Z}\text{ss}$ . *M. Ph. L.*) Used in painful hemorrhoids.  $\mathfrak{Z}\text{ss}$  or  $\mathfrak{Z}\text{ij}$  of camphor is sometimes added.

UNGUENTUM E GUMMI ELEMI, Unguentum compositum—*u.* *Hellebori albi*, Unguentum veratri.

UNGUENTUM HYDRARGYRI, *U. cærn'lem* seu *Neapolitanum seu mercuria'le*, *Ceratum mercuria'le*, *A'deps Hydrargyri medicat'us*, *Mercurial Oint'ment*, *Blue oint'ment*, *Unguentum*, (*F.*) *Onguent mercuriel ou Napolitain*.

The Strong Mercurial Oint'ment, *Unguentum Hydrargyri fortius* of the London Pharmacopœia, *U. Hydrargyri* (*Ph. U. S.*), is thus made—*Hydrarg.*  $\mathfrak{Z}\text{xxiv}$ , *Adipis*, *Sevi*,  $\mathfrak{aa}$   $\mathfrak{Z}\text{xij}$ . Rub till the globules entirely disappear.

The Milder Mercurial Oint'ment, *U. Hydrargyri Mit'ius*, is made by adding, to one pound of the strong, two pounds of *lard*.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The stronger ointment is used for this purpose. The weaker is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI AMMONIATI, Unguentum hydrargyri præcipitati albi—*u.* *Hydrargyri calcis albæ*, *Unguentum hydrargyri præcipitati albi*—*u.* *Hydrargyri compositum*, *Unguentum hydrargyri nitratiss*—*u.* *Hydrargyri deutoxydi nitratiss*, *Unguentum hydrargyri nitricooxydi*.

UNGUENTUM HYDRARGYRI IO'DIDI, *Oint'ment of Iodide of Mercury*. (*Hydrarg. Iodid.*  $\mathfrak{Z}\text{j}$ , *Ceræ alb.*  $\mathfrak{Z}\text{ij}$ , *Adipis*  $\mathfrak{Z}\text{vj}$ . *Ph. L.*)

UNGUENTUM HYDRARGYRI IO'DIDI RU'BRI, *Oint'ment of Red Iodide of Mercury*. (*Hydrarg. Iodid. Rubr.*  $\mathfrak{Z}\text{j}$ , *Ung. ceræ albæ*  $\mathfrak{Z}\text{vij}$ . *Ph. D.*) Both these ointments may be applied to scrofulous and indolent ulcers.

UNGUENTUM EX HYDRARGYRO MITIUS DICTUM CINEREUM, Unguentum oxidi hydrargyri cinereum.

UNGUENTUM HYDRARGYRI NITRATIS, *U. hydrargyri nitra'tis seu supernitrat'is hydrar'gyri seu hydrar'gyri compositum seu mercuria'le citrinum seu citrinum ad sca'biem*, *Bal'samum mercuria'le*, *A'deps nitra'te hydrar'gyri medicat'us*, *Oint'ment of Nitrate of Mercury*, *Citrine Oint'ment*, (*F.*) *Onguent de nitrate de mercure*, *O. citrin contre la gale*. (*Hydrarg.*  $\mathfrak{Z}\text{iss}$ , *Acid. nitric.*  $\mathfrak{Z}\text{iiiss}$ , *Olei bubuli*  $\mathfrak{Z}\text{xij}$ , *Adipis*  $\mathfrak{Z}\text{ivss}$ .) Dissolve the mercury in the acid; and, while hot, add the oil (for which butter might be substituted) and melted *lard*. *Ph. U. S.*

A milder ointment, *Ung. nitratiss Hydrar'gyri mit'ius*, is made with triple the quantity of oil and *lard*. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

UNGUENTUM HYDRARGYRI NITRICOOX'YDI, *U. subnitrat'is hydrar'gyri seu Ox'ydii Hydrar'gyri rub'ri*, *U. H. ox'idi rub'ri* (*Ph. U. S.*), *U. deutoxydi hydrarg.* nitra'tis seu *Hydrargyri rub'ri seu ex Hydrar'gyro oxyda'to rub'ro seu mercurii rubrum seu ophthalmicum rubrum seu subnitrat'is hydrargyriaci*, *Bal'samum ophthalmicum rubrum*, *Oint'ment of Nitric Ox'yd of Mercury*, *Red Precipitate Oint'ment*, *Gold'en Oint'ment*, *Sin'gleton's Eye Salve*. (*Hydrarg. oxid. rubr.* in pulv.

subtiliss. ℥j; *Ung. adipis* ℥j. Add the oxyd, reduced to a fine powder, to the melted ointment. *Ph. U. S.*) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

*Belleville's Ce'rate*, which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows:—*Plumbi acet.* ℥j; *Hydrarg. oëid. rubr.* ℥ss; *Hyd. chlorid. nit.* ℥ij; *Ceræ albæ* ℥iv; *Ol. oliv.* ℥vj. Melt the last two, and add the others in fine powder.

UNGUENTUM HYDRARGYRI OXIDI RUBRI, Unguentum hydrargyri nitricooxydi—u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitricooxydi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, *U. Hydrargyri ammoniati* (*Ph. U. S.*) seu *submuriatis hydrargyri ammoniati* seu *antipsoficum Werlhofii* seu *ad scabiem Zelleri* seu *mercuriale album seu mundificans Zelleri* seu *mercurio præcipitato* seu *calcis hydrargyri albæ, Ointment of white precipitate.* (*Hyd. ammon.* ℥j, *Ung. simpl.* ℥iss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

UNGUENTUM HYDRARGYRI RUBRI, *U. Hydrargyri nitricooxydi*—u. *Hydrargyri submuriatis ammoniati*, *U. Hydrargyri præcipitati albi*—u. *Hydrargyri subnitratis*, *U. Hydrargyri nitricooxydi*—u. *Hydrargyri supernitratis*, *U. Hydrargyri nitratis*—u. *Hydrargyri subnitratis*, *U. Hydrargyri nitricooxydi*—u. *Infusi meloes vesicatorii, U. lyttæ.*

UNGUENTUM IODINI, *U. Iodin'ii, Ointment of Podine.* (*Iodin.* ℥j; *Potass. iodid.* gr. iv; *Aquæ Mvi*; *Adipis.* ℥j. Rub the iodine and iodide first with the water until liquefied, and then with the lard until mixed. *Ph. U. S.*) Used as a local application to goitrous and other swellings.

UNGUENTUM IODINI COMPOSITUM, *U. Iodin'ii compositum, U. Iodii compositum, Compound Ointment of Podine.* (*Iodin.* gr. xv; *Potassii iodid.* gr. xxx; *Aq. M* xxx; *Adipis* ℥j. Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. *Ph. U. S.*)

UNGUENTUM IRRITANS, *U. lyttæ.*

UNGUENTUM LAURINIUM, *O'leum laurinum, A'deps lauro medicatus, Bay Ointment,* (*F.*) *Onguent ou Huile de laurier.* (*Fol. lauri,* 500 p., *Adip. suilli,* 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add *Bay berries*, in powder, 500 p. Digest and pass through linen. *Ph. P.*) Reputed to be corroborant and nerve. It is simply emollient.

UNGUENTUM LENITIVUM, *U. de althæa*—u. *Liliacum, Crinomyron.*

UNGUENTUM LYTTÆ, *Ung. cantharidis* seu *vesicatorium* seu *irritans* seu *ad vesicata* seu *infusi mel'oës vesicatorii* seu *epispasticum mit'tus, Blist'ering Salve, Ointment of Span'ish Flies, Ointment of Infusion of Span'ish Flies, Mild'er blist'ering Ointment.* (*Cantharid.* in pulv. ℥ij; *Aquæ destillat.* Oss; *Cerat. resin.* ℥viij. Boil down the water with the Spanish flies to one half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. *Ph. U. S.*) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

UNGUENTUM LYTTÆ MEDICATUM, *A'deps cantharidibus medicatus, Pomatum* seu *Unguentum epispasticum vir'idè stimulans ac'ribus, Green blist'ering Ointment,* (*F.*) *Pommade épispastique verte.* (*Pomati* seu *unguenti cantharid.* 64 p., *Unguent populei* 168 p., *Ceræ albæ* 256 p., *Cnprri acetat.*, *Est. opii*, 24 p. Melt the unguentum populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. *Ph. P.*) Use, same as the last.

UNGUENTUM LYTTÆ MEDICATUM ALIUD, *A'deps cantharidibus medicatus alius, Pomatum epispasticum flavum et mit'tus, Yellow Blist'ering Ointment,* (*F.*) *Pommade épispastique jaune.* (*Pulv. cantharid.* 120 p., *Adip. præp.* 1680 p., *Aquæ* 250 p. Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered *Turmeric*, 8 p. Let it cool till the superfluous liquid separates; pour off and add *Yellow wax*, 250 p., *Oil of Lemou*, 8 p. *Ph. P.*) A complete preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by *Dr. Physick*, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce of powdered *Cantharides* in two ounces of *Rosewater*, and evaporating until onehalf of the fluid is driven off, having previously added 15 grains of *Tartar emetic.* The decoction is to be strained, and three ounces of *Olive oil*, an ounce and a half of *White wax*, and one ounce of *Spermaceti* added to it, and the mixture then boiled till all the water is evaporated.

UNGUENTUM MELANICUM CAUSTICUM, *Causticum Æthiopicum.*

UNGUENTUM MERCURIALE, Unguentum hydrargyri—u. *Mercuriale album, Unguentum hydrargyri præcipitati albi*—u. *Mercuriale citrinum, Unguentum hydrargyri nitratis*—u. *e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi*—u. *Mercurii rubrum, Unguentum hydrargyri nitricooxidi.*

UNGUENTUM MEZE'REI, *Ointment of Meze'reou.* (*Mezer. incis. transversim,* ℥iv; *Adipis,* ℥xiv; *Ceræ albæ,* ℥ij; moisten the meze'reon with a little alcohol, and beat in an iron mortar, until it is reduced to a fibrous mass; then digest it with the lard, in a saltwater bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold. *Ph. U. S.*) To keep open blisters, issues, &c.

UNGUENTUM MUNDIFICANS ZELLERI, Unguentum hydrargyri præcipitati albi.

UNGUENTUM MURIA'TIS HYDRARGYRI OXYGENATO MEDICATUM, *A'deps muria'te hydrargyri oxygenato medicatus, Cyrillo's Ointment,* (*F.*) *Pommade de Cyrillo.* (*Hydrar. oxymur.* 4 p.; *Adipis suilli præp.* 32 p.—*Ph. P.*) Antivenereal and alterative. Used in friction, ℥ss at a time.

UNGUENTUM NARDINUM, see *Nardus Indica*—u. *Neapolitanum, Unguentum hydrargyri*—u. *Nervinum, Unguentum Sambuci*—u. *Nitricum* seu *oxygenatum, Unguentum aceti nitrosi*—u. *Nutritum, Unguentum plumbi superacetatis.*

UNGUENTUM OPHTHALMICUM, *A'deps o'ido hydrargyri rub'ro et plum'bi acetate medicatus, Re'gent's Pommade ophthalmique,* (*F.*) *Pommade ophthalmique.* (*Butyr. recent. Aq. rosar. lavat.* p. 68; *Camphor.* p. 0.3; *Oxyd. hydrarg. rubr., Acetatis plumbi,* 24 p. 4. Mix intimately.—*Ph. P.*) In chronic inflammation of the conjunctiva or tarsi.

UNGUENTUM OPHTHALMICUM, Unguentum oxidi zinci impuri—u. *Ophthalmicum rubrum, Unguentum hydrargyri nitricooxydi.*

UNGUENTUM OPII, *Ointment of Opium.* (*Opii pulv.* ℥j; *Adipis* ℥j; *M.*—*Ph. L.*) To be used where the local application of opium by inunction is needed.

UNGUENTUM OXIDI HYDRARGYRI CINE'REI, *A'deps seu Unguentum ex hydrargyro mit'tus dictum cine'reum, Ointment of gray oxide of mercur.* (*F.*) *Onguent gris.* (*Oxyd. hydrarg. ciner.* p. j; *Adipis suilli,* p. iij.—*Ph. E.*) *Proprietes*

like the mercurial ointment. It is not much used.

UNGUENTUM OX'IDI PLUM'BI AL'BI, *U. cerus'se seu al'bum, Ointment of white oxide of lead, White ointment.* (*Ung. simplicis*, p. v.; *Oxyd. plumb. alb.* p. j.—Ph. E. and P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

UNGUENTUM OX'IDI PLUMBI CARBONATI, *U. Plumbi subcarbonatis*—u. Oxidi zinci, Unguentum zinci.

UNGUENTUM OX'IDI ZIN'CI IMP'URI, *U. tūt'ie seu ophthalmicum seu diopompholygos, A'deps ox'idi zin'ci medica'tus, Eyesalve, Tut'ty ointment, Ointment of impure oxide of zinc.* (*Linim. simpl.* p. v.; *Oxyd. zinc. impur. præp.* p. j.—Ph. E.) Generally used in ophthalmia tarsi and atonic ophthalmia.

UNGUENTUM PI'ICIS LIQ'UIDÆ, *U. Pi'icis seu e Pi'cæ, Tar Ointment.* (*Picis liquid., Scvi*, sing. f*ij.* Melt, and stir till cold.—Ph. U. S.) Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

UNGUENTUM PICIS NIGRÆ, Unguentum resinæ nigrae—u. Plumbi acetatis, Ceratum plumbi superacetatis—u. Plumbi carbonatis, Unguentum plumbi subcarbonatis.

UNGUENTUM PLUM'BI COMPOS'ITUM, *Compound Ointment of Lead.* (*Emp. Plumbi*, f*ijij*; *Ol. olive.* f*ʒ* xvij; *Cre't. præp.* ʒvj; *Acid. acet. dil.* f*ʒ* vj. Dissolve the plaster in the oil with a slow fire; then add the chalk, and afterwards the acid, constantly stirring until they become cold.—Ph. L.) Used as a dressing to flabby, indolent ulcers.

UNGUENTUM PLUM'BI IO'DIDI, *Ointment of Iodide of Lead.* (*Plumb. iodid.* ʒj; *Adipis*, ʒvij; *M.*—Ph. L.) Used as a eutrophic in chronic, glandular, and other swellings.

UNGUENTUM PLUMBI OXYDI CARBONATI, Unguentum plumbi subcarbonatis.

UNGUENTUM PLUMBI SUBCARBONA'TIS, *U. plum'bi carbonatis* (Ph. U. S.) seu *al'bum seu al'bum simp'plex seu carbonatis plum'bici seu cerus'se seu ox'idi plum'bi carbonati, Cera'tum de cerus'sa.* (F.) *Onguent blanc de Rhazes, O. de cerasse, O. de Tornamira.* (*Plumbi carbonat. in pulv. subtiliss.* gr. lxxx, *Unguent. simpl.* ʒj.) Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—Ph. U. S.) Chiefly used as a dressing for burns.

UNGUENTUM PLUM'BI SUPERACETA'TIS, *U. acetatis plum'bi seu saturninum seu nutritum seu cerus'se acetate, Balsamum universale, Ointment of sugar of lead, Saturnine ointment.* (*Olive oil*, f*ss*; *White wax*, ʒiiss; *Superacetate of lead*, ʒij.) Cooling, desiccative. Called, also, *Balsamum saturninum, Buty'rum satur'ni, Linimen'tum plumbatum, Poma'tum satur'ni, Ung. triphar'macum.*

UNGUENTUM PLUMBICI CARBONATIS, Unguentum plumbi subcarbonatis.

UNGUENTUM POPULE'UM, *A'deps papav'erè, hyosc'yamo, et belladon'nâ medica'tus.* (Fresh buds of the *Populus nigra*, 500 p., macerated in *Adeps suillus præp.* melted, 1500 p., for 24 hours. Preserve this. Take *Black poppy leaves, Belladonna, Hyoscyamus, Black nightshade*, aā 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain.—Ph. P.) Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

UNGUENTUM POPULE'UM, seu Populus.

UNGUENTUM POTASSÆ HYDRIODA'TIS, *U. potass'ii io'didi* (Ph. U. S.), *Ointment of hydriodate of potass.* (*Potass. iodid. in pulv. subtil.* ʒj; *Aq. fʒj*; *Adipis*, ʒj. Dissolve the iodide in the water, and mix the solution with the lard.—Ph. C. S.) Half a drachm of this ointment is rubbed on scrofulous glands, goitre, &c.

UNGUENTUM POTASSII IODIDI, Unguentum Po-

tassæ Hydriodatis—u. *Pulcris meloes vesicatorii, Cerate of cantharides*—u. *Resinæ flavæ, Ceratum resinæ flavæ.*

UNGUENTUM RESINÆ NIGRÆ, *U. resinæ nigrum seu basilicon nigrum seu Pi'icis nigrae seu Pi'icis tetrapharm'acum, Black basilicon, Black resin ointment, Ointment of pitch, Ointment of black pitch.* (*Resin nigra, Cere flavæ, Resinæ flavæ* aā ʒix; *Olei olive*, Oj.—Ph. L.) Uses, the same as those of *Ceratum resinæ* or *Yellow basilicon.*

UNGUENTUM RESINÆ PINI SYLVESTRIS COMPOSITUM, Unguentum de Althæa—u. *Resinosum, Ceratum resinæ flavæ*—u. *Resumptivum, Unguentum de althæa.*

UNGUENTUM SABINÆ, Ceratum Sabinæ.

UNGUENTUM SAMBU'CI, *U. sambucinum seu nervinum, Green ointment, Elder ointment.* (F.) *Onguent de sureau.* (*Sambuci flor.* f*ij*; *Adipis præp.* f*ij.* Boil.—Ph. L.) Emollient.

UNGUENTUM SATURNINUM, Unguentum plumbi superacetatis—u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum ceræ—u. Solidum de cicuta, Emplastrum cicutæ—u. *Spermatice ceti, Unguentum cetacei.*

UNGUENTUM STRAMO'NII, *Ointment of Stramonium.* (*Ext. stramon. fol.* ʒj; *Aq. fʒss*; *Adipis*, ʒj. Rub the extract with a little water until uniformly soft, and then with the lard.—Ph. U. S.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.

UNGUENTUM SUBACETA'TIS CU'PRI, *U. cupri subacetatis* (Ph. U. S.) seu *detergens seu basilicon vir'idè seu æruginis, Balsamum seu Cera'tum seu Unguentum vir'idè, Ointment of subacetate of copper, Verdigris ointment.* (*Cu'pri subacet. in pulv. subtiliss.* ʒj; *Ung. simpl.* ʒxv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.—Ph. U. S.) Detergent and escharotic.

UNGUENTUM SULPHURA'TUM AD SCA'BIEM, *A'deps sulphurè et ammo'niæ muria'tè medica'tus.* (*Adipis*, 120 p.; *Sulph. lot.* 60 p.; *Ammonie muriat.*, *Aluminae sulphat.* aā 4 p.; fiat unguentum.—Ph. P.) Antipsofic.

*Buil'cy's Itch Ointment* is composed of *olive oil, lard, nitre, alum, sulphate of zinc, and cinnamon*; scented with *oil of aniseed, oil of origanum, and oil of spike*, and coloured with *alkanet root.*

UNGUENTUM SULPHURA'TUM ALCALI'NUM AD SCA'BIEM, *A'deps sulphurè et carbonatè potassæ medica'tus, Helmerich's Al'caline Sulphurated Itch Ointment, Pommade antipsofique de Helmerich, Pommade de Helmerich.* (*Adip. præp.* 800 p.; *Sulphur. lot.* 200 p.; *Carbonat. potass. pur.* 100 p.; fiat ung.—Ph. P.) Use, same as the last.

*Bate'man's Itch Ointment* resembles this. It is coloured with *cinnamon*, and scented with *essence of bergamot.*

UNGUENTUM SULPHURIS, *U. e sulphurè, Sulphur ointment.* (*Sulph.* ʒi; *Adip.* ʒij.—Ph. U. S.) In Ph. B. (1864) *sulphur*, ʒj; *lard*, ʒiv. Used chiefly in itch, and some herpetic affections.

UNGUENTUM SULPHURIS COMPOSITUM, *U. Antipsoficum, Compound Sulphur Ointment, Itch Ointment, Jack'son's Itch Ointment.* (F.) *Pommade Antipsofique de Jasser.* (*Sulph. sublim.* f*ss*; *Vetrotri rad. contus.* ʒij; *Potassæ nitrat.* ʒj; *Saponis mollis*, f*ss*; *Adipis*, f*ss*; *Ol. bergamot.* ℥xxx.—Ph. L.) THE UNGUENTUM SULPHURIS COMPOSITUM of the Pharm. U. S. is made as follows:—*Sulphur.* ʒj; *Hydrargyri ammoniat.*, *Acid. benzoic.* aā ʒj; *Ol. bergamot.*, *Acid. Sulphuric.* aā fʒj; *Potassæ nitrat.* ʒij; *Adipis*, f*ss*. To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.

UNGUENTUM SULPHURIS IO'DIDI, *Ointment of Iodide of Sulphur.* (*Sulphur. iodid.* ʒss; *Adipis*, ʒj. Rub the iodide with a little of the lard add

the remainder, and mix.—Ph. U. S.) An excellent application in chronic cutaneous affections.

UNGUENTUM SUSINUM, Crinomyron.

UNGUENTUM TABACI, *Tobacco Ointment*. (*Tabac. recent.*, concis.  $\mathfrak{J}$ j; *Adipis*, ℥ij. Boil the tobacco in the lard, over a gentle fire, till it becomes friable; then strain through linen.—Ph. U. S. 1851.) In the Ph. U. S. 1863, it is directed to be made as follows, (*Tabac.* in pulv.  $\mathfrak{Z}$ ss; *Adipis*,  $\mathfrak{V}$ viii; *Aq. q. s.* Moisten the tobacco with water, and, by percolation, pass water through it until four fluidounces are obtained. Evaporate to the consistence of a soft extract, and mix with the lard.) Applied to irritable ulcers, tinea capitis, &c.

UNGUENTUM TARTARI EMETICI, U. antimonii—u. Tartari stibiati, U. antimonii—u. e Tartaro potassæ stibiati, U. antimonii—u. Tratratis potassæ stibiati, U. antimonii.

UNGUENTUM TEREBINTHINE, *Ointment of Turpentine*. (*Oil of Turpentine*, ℥ $\mathfrak{J}$ j; *Resin*, in coarse powder, gr. lx; *Yellow wax*,  $\mathfrak{Z}$ ss; *Prepared lard*,  $\mathfrak{Z}$ ss. Melt together. Ph. B. 1864.) Uses, the same as *Ceratum Resinæ* or *Yellow Basilicon*.

UNGUENTUM DE TEREBINTHINÆ ET ADIPIBUS, U. elemi compositum—u. de Terebinthinâ et cerâ, U. de althæâ—u. Terebinthinæ et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigræ—u. Tripharmacum, U. plumbi superacetatis—u. Tutia, U. oxidi zinci impuri.

UNGUENTUM VERA'TRI, U. *Vera'tri al'bi* (Ph. U. S.) seu *helleb'ori al'bi*, *White hellebore ointment*. (*Veratr. pulv.*  $\mathfrak{J}$ ij; *Adipis*,  $\mathfrak{V}$ vii; *Olei limon.* ℥xx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the EDINBURGH OINTMENT are *white hellebore* and *muriate of ammonia*.

UNGUENTUM VERA'TRIÆ, *Ointment of Veratria*, (*Veratr.* gr. xx; *Adipis*,  $\mathfrak{Z}$ j. Mix. Ph. U. S. 1863.) In the British Pharmacopœia (1864) it is directed to be made of *Veratria*, gr. viii; *Prepared lard*,  $\mathfrak{Z}$ j; *Olive oil*, ℥ $\mathfrak{Z}$ ss; well mixed together. To be rubbed on the part in neuralgic and other pains.

UNGUENTUM AD VESICATA, U. lyttæ—u. ad Vesicatoria, Cerate of cantharides—u. Vesicatorium, Unguentum lyttæ—u. Viride, Unguentum subacetatis cupri.

UNGUENTUM ZINCI, U. *ox'idi zinci* seu *zinc'ici ox'idi* (Ph. U. S.), *Zinc ointment*. (*Zinci oxid.* gr. lxxx; *Adipis*,  $\mathfrak{Z}$ i.) Use, the same as that of the *Unguentum tuziæ*.

UNGUENTUM ZINCI OXIDI, U. zinci.

UNGUIS, 'a nail,' Hippocampus minor, Nail, Onyx, Pterygion—u. Avis, Hippocampus minor—u. Halleri, Hippocampus minor—u. Odoratus, Blatta Byzantia.

UNGUIS OS, *Os lacrymal'e*, *Lach'rymal bone*. A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human nail, and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single punctum ossificationis.

UNGULA CABALLINA, 'horse's hoof,' Tus-silago.

UNGULÆ PALPEBRARUM, 'hoofs of the eyelids,' see Tarsus.

UNHEALTHY, Sickly.

UNICORN ROOT, Chamælerium luteum.

UNILOCULAR, *Unilocularis*, (*unus*, 'one,' and *locus*, (diminutive of *locus*), 'a cell.')

Having one cell or cavity; as *biloc'ular* means having two cells or cavities; *multiloc'ular*, having many.

UNIO, gen. *Unio'nis*, Pearl.

UNIOCLUSUS, (*unus*, 'one,' and *oculus*, 'eye,') Cyclops, Monoculus.

UNION BY THE FIRST AND SECOND INTENTIONS, see Intention.

UNIPARIENS, Uniparous.

UNIP'AROUS, *Unipa'rient*, *Unipa'riens*, (*unus*, 'one,' and *pario*, 'I bring forth.')

Producing one at a birth.

UNIPOLAR, (*unus*, 'one,' and *polus*, 'pole,') see Neurine.

UNISE'MA DELTIPO'LIA, (*unus*, 'one,' and *semen*, 'seed' [?], *Ponteder'ia corda'ta*, *Shorel Pick'erehweed*, *Pond Shorel*, *Shovelleaf*, *Water Plantain*. An indigenous plant, *Ord. Pontederiacæ*, *Sex. Syst. Hexandria Monogynia*, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNITAIRES (MONSTRES) (F.), (from *unitas*, 'oneness.')

A class of monsters in which are found only the complete or incomplete elements of a single individual; in contradistinction to *Compound monsters*, (F.) *Monstres composés*, in which there are the complete or incomplete elements of more than one.

UNITING BAN'DAGE, (from *unire*, *unitum*, (*unus*, 'one,') 'to join into one,') (F.) *Bandage unissant*. A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

UNIVOCAL GENERATION, (*unus*, 'one,' and *vox*, gen. *voxis*, 'voice,') see Generation.

UNOCULUS, (*unus*, 'one,' and *oculus*, 'eye,') *Borgne*, Cyclops, Monoculus.

UNORGANIZED, Inorganic.

UNSTRIPED MUSCULAR FIBRE, see Muscular fibre.

UNWELL, see Indisposition. 'To be unwell,'—and, in Scotland, 'to alter,'—is, popularly, to menstruate.

UP'PAS. A word used in the Archipelagos of Molucca and Sunda, and signifying *Veg'etable Poi'son*; *Ipo*, *Bo'hon*, *Po'hon*, or *Boa* or *Bo'on Up'pas*, *Po'hon Antiar*, *Ants'jar*. A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antiar'is* seu *Ipo Toxicaria*, *Toxicaria Macassarien'sis*. Another species of upas, *U. Tienté*, *Tahetik* or *Tjették*, is the produce of a *Strychnos*, *S. Tienté*. *Upas antiar*, like corvoal and rao, the South American arrow poisons, appears to kill by paralyzing the heart; whilst *U. tienté* causes the most violent convulsions. Many idle stories are told regarding the upas tree, most of which are fabulous.

URACHUS, *U'raeus*, *Urinac'ulum*, (*uron*, and *exu*, 'to contain,') (F.) *Ouraque*. The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois*. According to Sabatier, this is the arrangement of the urachus in the human fetus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

URACRATIA, (*uron*, a priv., and *κρα'σις*, 'power,') Enuresis.

URACUS, Urachus.

URÆMIA, *Uræ'mia*, (F.) *Urémie*, *Uroémie*, (*uron*, and *α'μα*, 'blood,')

A condition of the blood in which it contains, or is presumed to contain, urea, and to give rise to sundry morbid phenomena implicating the nervous centres more especially.

URÆMIC, *Uræ'micus*, (F.) *Urémique*. Relating or appertaining to uræmia

URALI, Curare.

URANA, (from *uron*.) Ureter.

URANE, (*ουρανν*.) Urinal.

URANISCONITIS, (*uraniscus*, and *itis*.) Palatit'is, (F.) Palatite. Inflammation of the palate.

URANIS'COPLASTY, *Uraniscoplasti'cō*, (*uraniscus*, and *πλαστικός*, 'forming.') The operation of engrafting in case of deficiency of the soft palate.

URANISCORRHAPHIA, (*uraniscus*, and *ῥαφή*, 'a suture,') Staphylorrhaphy.

URANISCUS, (*ουρανικός*, 'a round ceiling or canopy,') Palate.

URANOPLASTY, Staphyloplasty.

URANORRHAPHIA, Staphylorrhaphy.

URANUS, (*ουρανός*, 'heaven,') Palate.

URAPOSTEMA, gen. *Urapostematis*, *Αβσcessus urino'sus*, *Uraedema*, (*uron*, and *αποστημα*, 'an abscess,') A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

URATE, *U'ras*, *Lith'ate*, *Li'thas*, (from *uron*.)

A generic name for salts, formed by the combination of uric or lithic acid with different bases. *U'rate* or *Lith'ate* of *So'da*, for example, is found in arthritic and certain urinary concretions:—*U'rate* or *Lith'ate* of *Ammo'nia* in certain urinary deposits.

URE'A, or U'REA, *Ure'um*, *U'ren*, *Ure'u'ium*, *U'ricum*, *Mate'ria urino'sa*, *Principi'um seu Sal urino'sum*, *Neph'rin*, (F.) *Urée*, (from *uron*.) A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ℥j. Nitrate of urea has been used in like cases, in doses of 2 to 10 grains in the day, in solution or in pill.

URE'AL or U'REAL, *Urea'tis*. Relating or appertaining to urea.

UREC'CHYSIS, *Urech'ysis*, (*uron*, and *εχχυσις*, 'effusion,') Effusion of urine into the areolar membrane.

UREDO, gen. *Ure'dinis*, (*urere*, 'to burn,') Urticaria.

URE'E, Urea.

UREMA, gen. *Ure'matis*, (*ουρημα*.) Urine.

URE'MIE, Uraemia.

UREMIQUE, Uraemic.

UREN, Urea.

URENIUM, Urea.

URENS, (from *urere*, 'to burn,') Caustic.

UREORRHŒA, (*uron*, and *ῥεω*, 'to flow,') Diabetaes.

URESLESTHESIS, (*uresis*, and *αισθησις*, 'feeling,') Diuresiæsthesia.

URESIS, (*ουρησις*.) Micturition.

URE'TER, (*ουρητην*.) *U'ra*, *Ve'na al'ba re'num*, *Canal'is ner'veus fistulo'sus re'num*, *Duct'us seu Duc'tor Uri'næ*, *Vas urina'rium*, (F.) *Uré'tère*. A long, excretory canal—membranous, and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas-fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vésical*. The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, (*ureter*, and *αλγος*, 'pain,') Pain in the course of the ureter, — as from calculus, *Ureteral'gia calculo'sa*.

URETERALGIA CALCULOSA, see Ureter'algia—u. Inflammatoria, Ureteritis.

URE'TÈRE, Ureter.

URETER'ICUS, (from *ureter*.) An epithet for ischury, &c., arising from an affection of the ureter.

URETERITIS, *Ureteral'gia inflammato'ria*, *Ureterophlegma'sia*, (*ureter*, and *itis*.) Inflammation of the ureter: generally caused by calculus.

URETEROLITH'ICUS, (*ureter*, and *λίθος*, 'a stone,') An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROL'ITHUS. Calculus in the ureter.

URETEROPHLEGMASIA, (*ureter* and *phlegmasia*, 'inflammation,') Ureteritis.

URETEROPHLEGMAT'ICUS, (*ureter*, and *φλεγμα*, 'phlegm or mucus,') Any affection caused by mucus accumulated in the ureter.

URETEROPY'ICUS, (*ureter*, and *πυον*, 'pus,') An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG'IA, (*ureter*, and *ῥαγή*, 'rupture,') Hemorrhage from the ureter.

URETEROSTOMAT'ICUS, (*ureter*, and *στομα*, 'orifice,') That which is dependent upon obstruction of the orifice of the ureter.

URETEROTHROMBOÏ'DES, (*ureter*, *θρομβος*, 'grumous blood, and *εὐβος*, 'resemblance,') Ischury from grumous blood in the ureter.

URE'THRA, (*ουρηθρα*, from *ουρη*, 'to pass the urine,') *Canal'is seu Meatus seu Duc'tus urina'rius*, *U'rias*, *Ure'tra*, *Fistula urina'ria*, *Pter urina'rium seu Uri'næ*; (F.) *Uré'thre*, *Uré'tre*. The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder, *os'tium vesica'le*, to the extremity of the penis, in which its external aperture, *os'tium cutaneum*, is situate. In the male urethra, three portions are distinguished:—1. A *prostatic portion*, near the bladder, about an inch and a quarter in length, which traverses the prostate gland: 2. A *membranous portion*, *Isth'mus ure'thræ*, *Pars ure'thræ membrana'cea*, from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only:—3. A *spongy portion*, which expands, anteriorly, to form the glands, and which commences at the *bulb of the urethra*. Before opening externally the canal has a dilatation, called the *Fos'sa seu Fo'vea seu Fossic'ula navicular'is seu Morgagni'i*. On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum*; and at the surface of this, the *ejaculatory ducts*, and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacunæ* or *S'inusæ of Morgagni'i*, (F.) *Lacunæ de Morgagni*, proceeding from or constituting the *Glands of Morgagni* or of *Littre*, (F.) *Glandes de Morgagni* ou de *Littre*, *Glandule Littria'næ*. At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacuna Magna*. The arteries of the urethra are numerous, and proceed from the internal pudic, — the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the female, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *meatus urina'rius*, *os'tium vagina'le ure'thræ*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see Cæcus—u. Mucous lacunæ of the, see Cæcus.

URETHRAL or U'RETHRAL, *Urethra'lis*, *Ur'thricus*. Relating to the urethra.

URETHRAL'GIA, (*urethra*, and *algos*, 'pain.') Pain in the urethra. Gonorrhœa.

URETHRE, Urethra.

URETHREMPHRAXIS, Urethrophraxis.

URETHRITIS, (*urethra*, and *itis*.) Inflammation of the urethra. Gonorrhœa.

URETHROBLENNORRHŒA, (*urethra*, *βλωνα*, 'mucus,' and *ῥεω*, 'I flow.') Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, (*urethra*, *cystauchen*, 'neck of the bladder,' and *τεμνειν*, 'to cut,') see Lithotomy.

URETHROCYSTEOANEURYSMATOTOMIA, (*urethra*, *κυστις*, 'the bladder,' *aneurysma*, 'dilatation,' and *τεμνειν*, 'to cut,') see Lithotomy.

URETHROCYSOTEOTRACHELOTOMIA, (*urethra*, *κυστις*, 'the bladder,' *τραχηλος*, 'neck,' and *τεμνειν*, 'to cut,') see Lithotomy.

URETHROILEMORRHAGIA, (*urethra*, *ἄμα*, 'blood,' and *ῥηγνυμι*, 'to break forth,') Urethrorrhagia.

URETHROPHRAX'IS, *Urethremphrax'is* (*urethra*, and *φρασσα*, 'I obstruct.') Obstruction of the urethra.

URETHROPLAS'TIC, *Urethroplast'icus*, (*urethra*, and *πλασσω*, 'I form.') An epithet given to the operation, *U'rethroplasty*, which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORAPHY, Urethrorrhaphy.

URETHRORRHA'GIA, *Urethrorrhœmorrhag'ia*, *Caulorrhag'ia* seu *Hæmatu'ria stillati'ia*, (*urethra*, and *ῥηγνυμι*, 'I break out,') Hemorrhage from the urethra.

URETHRORRHAPHY, *Urethrorrhap'h'ia*, *Urethroraphy*, (*urethra*, and *ῥαφη*, 'a suture,') 'suture of the urethra.' The operation of closing a urethral fistula by suture.

URETHRORRHO'E'A, (*urethra*, and *ῥεω*, 'I flow,') A discharge of any kind from the urethra.

URETHROSCOPE, *Urethrosco'pium*, (*urethra*, and *σκοπεω*, 'I examine,') An instrument on the principle of the ophthalmoscope, laryngoscope, &c., for inspecting the interior of the urethra.

URETHROSTENO'SIS, *Strictu'ra*, *urethre*, *Urostenosis*, *Urethrosten'ia*, (F.) *Uréthrosténie*, *Rétrécissement de l'Urèthre*, (*urethra*, and *στενωσις*, 'narrowness,') Stricture of the urethra.

URETHROTOME, *Urethrot'omus*, (F.) *Uréthrotome*, (*urethra*, and *τεμνω*, 'I cut,') An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROTOMY, *Urethrotom'ia*, *Stricturot'omy*. An operation, which consists in opening the urethra with the *Urethrotome*, for the removal of stricture. See *Boutonnière*.

URETHRYMENO'DES, (*urethra*, *ἕμν*, 'a membrane,' and *odes*.) That which is caused by a membrane formed in the urethra.

URETICUS, (*ουρητικός*.) Diuretic, Urinary.

URETRA, Urethra.

URÈTRE, Urethra.

URETRIS, (*ουρητις*.) Urinal.

UREUM, Urea.

URGINEA SCILLA, Scilla.

URHÆMIA, Uræmia.

URIAE, MIN'ERAL WA'TERS OF. Simple sulphurous springs in the department of Isère, France, which are visited from the 15th of May to the 15th of September.

URIAS, gen. *Ur'adis*, (from *uron*.) Fistula (urinary), Urethra.

URIASIS, (from *uron*.) Lithia, Uresis.

URIC ACID, *Ac'idum uricum* seu *urolith'icum* seu *lith'icum*, *Lith'ic*, *Uryl'ic*, *Cal'culous*,

*Bezoâr'dic*, *Lithia'sic* or *Lithen'ic Acid*, (F.) *Acide urique* ou *lithique* ou *lithénique* ou *lithiasique* ou *de l'urine*. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is very sparingly soluble, and often deposited in combination from the urine in health. See *Calculi*, urinary.

URIC OX'IDE, *Oe'idum uricum*, *Xan'th'ic ox'ide*, *Xan'thine*, *U'rons ac'id*. A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URICUS, (from *uron*.) Urinary.

URIDRO'SIS, (*uron*, and *ῥίψω*, 'sweat,') Urinous sweating; (F.) *Sueur urineuse*.

URINA, Urine—u. Cerebella, see *Cerebella*—u. Chyli, see *Urine*—u. Cibi, see *Urine*—u. Diabetica, Urine, diabetic—u. Febrilis, Urine, febrile—u. Furfuracea, see *Furfuraceus*—u. Galactodes, see *Galactodes*—u. Genitalis, Sperm—u. Jumentosa seu Jumentaria, Urine, jumentous—u. Mucosa, Cystirrhœa—u. Nephelodes, see *Nepheloid*—u. Oroboides seu Oroboides, see *Oroboides*—u. Pericardii, see *Pericardium*—u. Potūs, see *Urine*—u. Sanguinis, see *Urine*—u. Vaccæ, Urine, cows'.

URINACULUM, Urachus, Urinal.

URINÆ PRÓFLUVIUM, 'a flux of urine,' Diabetes—u. Stillicidium, Strangury—u. Substillum, Strangury—u. Suppressio, Ischuria.

URINAIRE, Urinary.

URINAL, *Urinato'rium*, *Chernib'ium*, *U'rand*, *Ure'tris*, *Urinac'ulum*, *Urodochi'um*, *Urod'oché*, *Urodoche'um*, *Matra'cium*, *Mat'ula*, *Matel'la*, (from *urina*.) A name given, 1. To certain vessels used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINALIS, Diuretic, Urinary.

URINARIA, *Antirhinum linaria*, *Leontodon taraxacum*.

URINARY, *Urina'rins*, *Urina'lis*, *Urinu'sus*, *U'ricus*, *Uret'icus*, (F.) *Urinaire*, (from *urina*.) That which relates to the urine.

URINARY APPARATUS, Urinary organs.

URINARY BLAD'DER. The *Blad'der*, *Vesi'ca Urina'ria*, *Cys'tis*, *Urocy'stis*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculae seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bus-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibrocellular expansion called the *anterior ligament*. The *posterior ligaments* or *rectoves'ical folds*—*pli'ce semiluna'res*—are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peritoneum;—of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface by a mucous membrane, which is sometimes raised up, here and there, in long promi-

nences or columns by the muscular fibres beneath. To this condition, the French anatomists give the term—*vesiæ à colonnes*. In the *bus fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Trigone vésical* or *Vésical triangle*, *Trigonus seu Trigonom vésicæ seu Lieutaud'i*, *Corpus trigonum*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Vésical uvula*, *Uvula vésicæ*, (F.) *Luetite vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexus; and its lymphatic vessels pass into the hypogastric ganglia.

**URINARY CALCULI.** The calculi which form in the urinary passages. See Calculi, urinary.

**URINARY ORGANS, Urinary apparatus, Or'gana uropœit'ica, Apparatus uropœit'icus.** The organs concerned in the formation of urine—the kidneys. The common acceptance includes, also, the urinary passages.

**URINARY PASSESAGES, (F.) Voies urinaires.** The aggregate of canals and cavities intended to contain the urine and convey it externally. These *voies* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

**URINATION, (from *urina*), Micturition.** M. Béraud elaborately defines it after Ch. Robin,—a function, the result of which is the expulsion of matters principally solid, but held in solution, which have become improper for nutrition.

**URINATORIUM, (from *urina*), Urinal.**

**URINE, *Urin'a*, (ουρον), *U'ron, Ure'ma, Lot-tium, Lot, La'pis au'reus, Omich'ma, Recremen'ta seu Retrimen'ta vésicæ, A'qua pe'dum, A'qua, Water*, (Old Eng.) *Stale, Lee, Chamber-lic*, (Prov.) *Herrin, Netting, Saag*. An excremential fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *gut-tatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Urin'a potûs*, (F.) *Urine de la Boisson ou des Boissons, Urine of drink*—the latter *Urin'a sanguinis*, (F.) *Urine de la digestion, Urine de la coction, Urine cuite ou du Chyle, Coc'ted u'rine, Urine of digestion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*, That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1.003 to 1.009—*Urin'a potûs*. *Secondly*, That secreted after the digestion of a full meal; s. g. 1.020 to 1.028, or even 1.030—*Urin'a chyli seu cibi*. *Thirdly*, That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine—*Urin'a sanguinis*.**

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin; red colouring matter of the urine, (uroerythrin; carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 30 to 70 and upwards. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers:

|   | Berzelius. | Lehmann. | Simon. | Marchand. |
|---|------------|----------|--------|-----------|
| Urea,   | 45.10      | 49.68    | 33.80  | 48.91     |
| Uric Acid,  | 1.50       | 1.61     | 1.40   | 1.59      |
| Extractive matter, Ammonia Salts, and Chloride of Sodium. | 36.30      | 28.95    | 42.60  | 32.49     |
| Alkaline Sulphates,                                       | 10.30      | 11.58    | 8.14   | 10.18     |
| Alkaline Phosphates,                                      | 6.88       | 5.96     | 6.50   | 4.57      |
| Phosphates of lime and magnesia.                          | 1.50       | 1.97     | 1.59   | 1.81      |

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average, it may amount to two pounds and a half.

Dr. Golding Bird obtained the following results on examining 1000 parts of urine passed in health after 10 hours' fasting; and after dinner in the evening.

|   | Urina sanguinis. | Urina cibi |
|---|------------------|------------|
| Specific gravity . . . . .  | 1.016            | 1.030      |
| Water, . . . . .  | 962.72           | 930.10     |
| Solids, . . . . .   | 37.28            | 69.90      |
| Urea, . . . . .   | 14.30            | 24.40      |
| Uric acid, . . . . .  | 0.23             | 1.33       |
| Fixed salts, chiefly chlorides, sulphates, and phosphates.                | 5.10             | 9.90       |
| Organic matter, creatin, creatinin, colouring matter, and volatile salts. | 17.80            | 34.27      |

The urine, when first passed, is generally acid, and this has been ascribed to uric acid, hippuric acid or lactic acid. It is, doubtless, however, owing to the phosphatic supersalts, and especially perhaps to the superphosphate or biphosphate of soda.

Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydruria*, (ὕδωρ, 'water;') by a deficiency of urea, *Anazoturia*, (αζο, privative, and *azote*;) by a superabundance of urea, *Azoturia*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithuria*; and that in which the deposit consists of the earthy and earthy alkaline phosphates, *Phosphuria*, *Ceramuria*, (κεραμ, 'potters' earth,') &c. &c. At times, a *pellicle* forms on the surface (*Cremor urinae*) which consists of mucus and some salts; at others, there is a *cloud*, (*Nubecula, Nubes*), towards its upper part, which is called *Enworema* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypostasis, Sedimentum*, &c., have been given. (See these various words.) The urine is deserving of attention in disease; but it has often been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of disease by simply inspecting it. See *Uroscopy*.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cows' urine, *Urin'a vacæ*,

*All flower wa'ter*, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c.;—for example:—

URINE, ANÆMIC, *Urina anæmica*. A term used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.

URINE ARDENTE, Ardent urine—u. Bloody, Hæmaturia—u. *de la Boisson*, Urine, hysterical, see Urine—u. *Briqueté*, see Lateritious—u. *de la Coction*, see Urine.

URINE, CRUDE, (F.) *Urine crue*. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

URINE CRUE, Urine, crude—u. *Cuite*, see Urine.

URINE, CYSTIN'IC, *Cystinuria*. Urine containing cystine or cystic oxide in solution, or as a deposit.

URINE, DIABET'IC, *Urina diabetica*. Urine passed in *Diabetes mellitus*, *Melituria*, *Saccharine urine*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

URINE DE LA DIGESTION, see Urine.

URINE, DROP'SICAL, is an ammoniacal urine, often containing much albumen and scarcely any urea.

URINE, DYSPEP'TIC, has been found to precipitate tannin abundantly, and to putrefy soon.

URINE ÉPAISSE, Urine, mucilaginous.

URINE, FE'BRILE, *Urina febrilis*. Urine discharged in inflammation and inflammatory fever.

URINE, FILAMENTOUS, see Filamentous.

URINE, FLOC'ULENT, (F.) *Urine floconneuse*, is when it is troubled by flocculi suspended in it.

URINE FLOCONNEUSE, Urine, flocculent—u. *des Goutteurs*, Urine, gouty—u. Furfuraceous, see Furfuraceous.

URINE, GOUT'Y, (F.) *Urine des Goutteurs*, contains much phosphate of lime, and after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

URINE HUILEUSE, Urine, oily.

URINE, HYSTERICAL, is clear, colourless, and similar to the *Urine de la Boisson*.

URINE, ICTER'ICAL, contains bile.

URINE, INCONTINENT, of, Enuresis.

URINE OF INFLAM'MATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE, INVOLUNTARY DISCHARGE OF, Enuresis.

URINE, JUMEN'TOUS, *Urina jumento'sa* seu *jumentaria*, (F.) *Urine Jumentouse*. A term sometimes used for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

URINE LACTESCENTE, U. milky—u. *Laitouse*, Urine, milky.

URINE, MIL'KY, (F.) *Urine lactescente* ou *laitouse*. White and troubled urine.

URINE, MUCILAG'INOUS, (F.) *Urine épaisse*. Urine containing much mucus.

URINE, NER'VOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NER'VOUS FE'VERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

URINE, OIL'Y, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

URINE, OXAL'IC, *Oxaluria*. Urine containing a salt of the oxalic acid.

URINE, PHOSPHORES'CENT, *Phosphoruria*, *Phos-*

*phuria*. Urine which is luminous or phosphorescent.

URINE, PURPURIC, see Porphyria.

URINE, RICK'ETY, contains much phosphate of lime.

URINE, SACCHARINE, Urine, diabetic—u. Sandy, *Arenosa urina*—u. Stoppage of, *Ischuria*—u. *Ténue*, Urine, thin.

URINE, THIN, (F.) *Urine ténue*. Urine that is transparent, slightly coloured, and but little dense.

URINEUX, Urinous.

URINIF'EROUS, *Urinifer*, (F.) *Urinifère*, (from *urina*, and *fero*, 'I carry.') That which carries urine.

URINIFEROUS SUBSTANCE OF THE KIDNEY, see kidney.

URINIFEROUS TUBES OR DUCTS OF BELLINI, *Tubuli seu ductus uriniferi Bellini*, vel *Bellini*, vel *Bellini*, *Tubuli Bellini* seu *rec'ti*, *Bellini*, *ductus*, *Bellini*, *uæ* *Fistulæ*. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ. The tortuous uriniferous ducts are called *Tubes of Ferrein*, *Tubuli contorti* seu *Ferreini*.

URINIP'AROUS, (F.) *Urinipare*, (*urina*, and *parere*, 'to produce.') An epithet for tubes in the cortical portion of the kidney, which prepare the urine.

URINODES, (from *urina*, and *odes*,) Urinous.

URINOM'ETER, (from *urina*, and *μετρον*, 'measure.') A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

URINOUS, *Urinous*, *Urinodes*, (F.) *Urineux*, (from *urina*.) Having the character of urine. Similar to urine.

URINOVAGINAL, Vesicovaginal.

UROCE'LE, *Æde'ma scroti urino'sum*, *Urochecele*, *lè*, *Oschecele*, *lè* *urina'lis*, (*uron*, and *κληη*, 'a rupture.') A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Urochesia*, (*uron*, and *χελεω*, 'to go to stool'.) A discharge of urine by the bowels.

UROCRIS'IA, (*uron*, and *κρινω*, 'I judge'.) *Urocriterion*. A judgment formed either of the urine, or of disease after inspecting the urine. Also, the crisis of a disease by uresis. *Urocriterion* is the symptom by which such judgment is formed.

UROCRITERION, (*uron*, and *κριτηριον*, 'criterion'.) see Urocrisia.

UROCYSTITIS, (*uron*, and *κυστις*, 'a bladder'.) Urinary bladder.

UROCYSTITIS, (*urocystis*, and *itis*.) Cystitis.

UROCYSTOCATARRHIUS, Cystirrhœa.

URODIAL'YSIS, (*uron*, and *διαλυσις*, 'dissolution, loss of strength'.) A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodialysis Neonatorum*; in the aged, *Urodialysis Senum*.

URODOCIUM, (*ουροδοχιον*, *ουροδοχιον*, from *urine*, and *δοχηαι*, 'to receive'.) Urinal.

URODYN'IA, (*uron*, and *δυνη*, 'pain'.) Pain during the excretion of the urine.

URŒDEMA, gen. *Urædematis*, (uron, and ὑδῆμα, 'a swelling,') Urapostema.

UROËMIE, Uremia.

UROËRYTHRIN, (uron, and ερυθρός, 'red,') see Porphyria.

UROGENITAL, *Urogenitalis*, *Gen'itoïri-nary*, *Gen'itoïrina'rius*. Relating or appertaining to the urinary and genital apparatus—as the 'urogenital organs,' *Organa urogenitalia*.

UROGENITAL SİNUS, *Sinus urogenitalis*. A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the efferent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urinaria* and a *pars genitalis*. The former, extending towards the urachus, is converted into the urinary bladder; whilst from the latter are formed the *vesiculæ seminales* in the male, and the middle portion of the uterus in the female.

UROGLAUCIN, (uron, and γλαυκός, 'blue,') see Uroanthin.

UROHÆMATIN, Hæmaphæin.

UROLITHI, (uron, and λίθος, 'a stone,') Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG'IA, (uron, λίθος, 'a stone,' and λογος, 'a description,') A description of, or treatise on, ordinary calculi.

UROLITHOTOMIA, Lithotomy.

UROLOGY, Urology.

UROMANCY, *Uromanti'a*, (from uron, and μαντεία, 'divination,') The art of divining diseases by simple inspection of the urine; *Uroscop'ia*, *Uroscopy*, *Onroscop'ia*, *Ouroscopy*. One professing to be able to do this is called *Uromantes*. Vulgarly, a *water-doctor*, *water-caster*.

UROMELES, (F.) *Uromèle*, (ουρα, 'a tail,' and μέλος, 'a limb,') A genus of monsters in which the two lower limbs are united, very incomplete, and terminated by a single foot, which is almost always imperfect, and the sole of which is turned forwards.

UROMP'ALUS, (uron, and ομφαλός, 'navel,') *Her'nia Uracli*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, (ουρον,) Urine.

URON'CUS, (uron, and ογκος, 'a swelling,') A urinary swelling.

URONOL'OGY, *Uronolog'ia*, *Ourolog'ia*, *Ourology*, *Urol'ogy*, *Urolog'ia*, (uron, and λογος, 'a discourse,') The part of medicine which treats of the urine.

UROPTHISIS, (uron, and φθίσις,) Diabetes mellitus.

UROPLA'NIA, (uron, and πλάνη, 'wandering,') The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropoësis*, (uron, and ποιέω, 'I make,') *Secre'tio urinae* seu *lot'ii*. The secretion of urine by the kidney.

UROPOËT'IC, *Uropoëticus*, (F.) *Uropoëtique*. Concerning or favouring the production of urine.

UROPOIESIS, Uropoesis.

UROPYGION, (ουρα, 'tail,' and πύγη, 'rump,') Coccyx.

UROPYGIUM, *Croupion*.

URORRHAGIA, (uron, and ῥαγή, 'a breaking forth,') Diabetes.

URORRHODIN, (uron, and ῥόδον, 'a rose,') see Porphyria.

URORRHŒA, (uron, and ῥέω, 'to flow,') Eneurrosis, Diabetes.

UROSACIN, (uro-, and rosa,) see Porphyria.

UROSCHEOCELE, (uron, σσχών, 'scrotum,' and κήλη, 'rupture,') Urocele.

UROSCOPY and UROSCOPIA, (uron, and σκοπέω, 'I examine,') see Uromantia.

URO'SSES, (from uron, and οσία,) Diseases of the urinary organs.

UROSTÆALITH, *Urostealithus*, (uron, στέαρ, 'suet,' and λίθος, 'stone,') A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

UROUS ACID, Uric oxide.

UROXAN'THIN, *Uroxanthine*, (uron, and ξανθός, 'yellow,') A yellow colouring matter found in the urine by Heller, which is decomposable into a red colouring matter, *ur'rhodine*, and a blue, *uroglau'cin*,—the former having the same composition as *indigo red*; the latter as *indigo blue*.

UROZEMIA (uron, and ζημία, 'loss,') Diabetes—u. Albuminosa, Kidney, Bright's disease of the—u. Mellita, Diabetes mellitus.

URRHODIN, (uron, and ῥόδον, 'rose,') see Porphyria.

URROSACIN, (uron, and rosa, 'rose,') see Porphyria.

URTICA, (from urere, 'to burn,') *U. Dioica* seu *ma'jor seu his'pida*, *Cni'de*, *Py'ethrum*, *Ad'icé*, *Com'mon sting'ing net'tle*, (Prov.) *Er'tle*, (F.) *Ortie*. Ord. Urticaceæ. Sec. Syst. Monocœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbatic properties. The pain produced by its sting is well known, but it is not to be compared to the torture occasioned by *Urtica stim'ulans*, and *U. crenulata* of India; and, still less, to *Urtica urentis'ima* of Timor, which is called by the natives *Daoum Setan*, '*Devil's leaf*;' on account of the persistence and severity of the pain.

URTICA BALEARICA, *U. pilulifera*—u. *Crenulata*, see *Urtica*—u. *Dioica*, *Urtica*—u. *Hispidata*, *Urtica*—u. *Iners magna fetidissima*, *Galeopsis*—u. *Major*, *U. dioica*—u. *Minor*, *U. urens*—u. *Mortua*, *Lamium album*.

URTICA PILULIF'ERA, *U. Pilulo'sa* seu *Roma'na* seu *Balea'rica*, *Pillbearing Net'tle*, (F.) *Ortie Romaine*. The seed was formerly given in diseases of the chest.

URTICA PILULOSA, *U. pilulifera*—u. *Romana*, *U. pilulifera*—u. *Stimulans*, see *Urtica*.

URTICA U'RENS, *U. mi'nor*, *Dwarf net'tle*, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

URTICA URENTISSIMA, see *Urtica*.

Nettles have been used as stimulants to paralytic limbs.

URTICAIRE, Urticaria.

URTICARIA, *Enanthe'sis urtica'ria*, *Ure'do*, *Scarlat'ina seu Fe'bris seu Pur'pura urtica'ta*, *Cnido'sis*, *Urtica'ria porcel'iana*, *Eranthe'ma urtica'tum*, *Epinyct'is prurigin'o'sa*, *Fe'bris ru'bra prurigin'o'sa*, *Sall'ians ro'sa*, (F.) *Urticaire*, *Fidère Ortie*, *Porcelaine*, *Nettlerash*, (Prov.) *Nettlesprings*; vulgarly *Hives*, *Eld Hives*; (from *urtica*, because the eruption resembles that produced by the stings of a nettle.) A disease distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettlerash is induced by shellfish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint:—*Urtica'ria febril'is*, *U. evan'ida*, *U.*

*per'stans*, *U. confer'ta*, *U. subcuta'nea*, and *U. tabero'na*.

URTICARIA PORCELLANA, Essera, Urticaria. URTICARIA COIDO'SIS, *Urtica'tion*, (from *urtica*.) A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, Terra Orleana.

URYLIC ACID, Uric acid.

USNEA CRANII HUMANI, Lichen saxatilis—*u. Florida hirta*, Lichen plicatus—*u. Hirta*, Lichen plicatus—*u. Plicata*, Lichen plicatus.

USSACU, Hura Brasiliensis.

USQUEBAUGH, Whisky, see Spirit.

USTILAGO, (same etymon as *ustio*.) Ergot.

USTILAGINOUS, *Ustilagin'ea*, (F.) *Ustilagin'eu*. Relating or belonging to ergot, as *Gan-gra-na ustilaginea*; see Ergotism.

USTIO, (*ure*, *ustum*, 'to burn,') Burn, Ustion.

USTION, *Us'tio*, *Cous'is*. The act of burning or of applying the actual cautery. Also, the effect of cauterization; a burn.

USTULATIO, *Ustula'tion*, (dim. of *ustio*.) A pharmaceutical operation by which a substance is dried by heat. It is often restricted to the roasting of ores to drive off the volatile matters, as in the case of arsenic.

USUALIA, (pl. of *usualia*, 'usual, ordinary,' from *usus*, 'use,') Officials.

USURE DES DENTS, ('wearing out of the teeth' from use,) Odontotripsis.

USUS, 'use,' Habit.

UTER, gen. *U'tris*, 'a leather bottle,' Uterus.

UTERAL'GIA, A hybrid word, (from *uterus*, and *algos*, 'pain,') Metralgia.

UTERI ADSCENSUS, Hysteria—*u. Antever-sio*, Hysteroloxia anterior—*u. Carcinoma*, Metrocarcinoma—*u. Convulsivus morbus*, Lorind matricis—*u. Coryza*, Leucorrhœa—*u. Exulceratio*, Hystereloxia—*u. Flexio*, Hysteroloxia—*u. Inclina-tio*, Hysteroloxia—*u. Obliquitas*, Hysteroloxia—*u. Pronatio*, Hysteroloxia anterior—*u. Pruri-tus*, Nymphomania—*u. Reflexio completa*, Hys-teroloxia posterior—*u. Retroversio*, Hysteroloxia posterior—*u. Rheuma*, Leucorrhœa—*u. Ulcus*, Hystereloxia—*u. Versio incompleta*, Hysteroloxia.

UTERINE. *Uteri'nus*, (F.) *U'térin*, (from *ute-rus*.) That which belongs or relates to the womb.

UTERINE ARTERY, *Ar'teria uteri'na hypogas-trica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE BOUQIE, Sound, uterine.

UTERINE BROTHER, *Uteri'nus fra'ter*. One born of the same mother, but of a different father.

UTERINE ELEVATOR, see Pessary, intrauterine—*u. Glands*, Utricular glands—*u. Murmur*, *Bruit placentaire*.

UTERINE MUS'CLE OF RUYSCHE consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERINE RUSH, *Bruit placentaire*—*u. Sound*, Sound, uterine.

UTERINUS FRATER, Uterine brother.

UTEROABDOMINAL SUPPORTER. See Belt, Russian.

UTEROGESTATION, (*uterus*, and *gestare*, 'to carry,') Pregnancy.

UTEROMANIA, Nymphomania.

UTEROOVARIAN ARTERY, see Spermatic artery.

UTERUS, (*borrea*), *Uter*, *Utric'ulus*, *Vul'va*, *Lo'ci*, *L. mult'ebres*, *Ven'ter*, *Vis'cera*, *Concep-tac'ulum*, *Ma'trix*, *Ar'cum* seu *A'ger natu'ra*, *Hys'tera*, *Me'tra*, *Engi'um*, *Engi'on*, *An'gus*, *Del-phys*, *Al'vus*, *Epompha'lion*, *Gas'ter*, *Ma'ter*, *Me'ter*, *Ne'dys*, the Womb, (Sc. and Prov.) *Wayme*, *Wame*, *Weam*, *Wem*, (F.) *Matrice*, *Sein*. The uterus, destined to lodge the fœtus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cer'vix* or *neck*, to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os uteri*, *Os tin'æ*, *Os n'teri extern'um*, *Orific'ium vagi-na'le*. At the point where the body of the uterus is continuous, below, with the neck, the cavity is slightly constricted, forming what is sometimes named the *inter'nal orifice*, *Os uteri intern'um*, *Os intern'um*, *Isth'mus seu ostium uteri*, *Orific'ium uteri-num*. Between these is the *Canalis cer-vic'is*.

The cavity of the uterus is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. These folds of the peritoneum are sometimes called, respectively, the *anterior*, and the *posterior*, liga-ments. The former are also named the *vesico-uterine*, and the latter the *recto-uterine* folds or *pli'æ semilunares*, (F.) *Plis de Douglas*,—the *pouch*, thus formed, being termed *Douglas's cul-de-sac*. It forms, also, the *broad ligaments of the uterus*, *Ligamenta la'ta*, *A'lx resperitio'nis*, *Re'tia U'teri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *Uterine Si'nuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gesta-tion, and after delivery, are very numerous and important to be known. They regard its situa-tion, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen—*u. Anteversion of the Hysteroloxia anterior*.

UTERUS BIFIDUS, 'a bifid uterus.' A double uterus. One separated into two cavities.

UTERUS DUPLEX, 'a double uterus,' Dihysteria—u. Hourglass contraction of the, *Chaton*—u. *Inclinatus*, *Hysteroloxia*.

UTERUS, INVERSION OF THE, *Inversio Uteri*, *Metranastrophè*, *Ædoptosis Uteri inversa*, (F.) *Inversion ou Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

UTERUS, IRRITABLE, *Neuralgia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure, *Metryperæthésis*; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See *Hysteralgia*.

UTERUS MASCULINUS, see Ejaculatory ducts—u. *Obliquus*, *Hysteroloxia*—u. *Retroversion of the*, *Hysteroloxia posterior*.

UTERUS, RUPTURE OF THE, *Metrorrhæxis*, *Hysterorrhæxis*, *Ruptura seu Perforatio Uteri*, *Laceration of the Womb*, (F.) *Rupture ou Déchirure de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, *Utriculus*, (dim. of *uter*, gen. *utris*), 'a small bag or bottle,' see Ejaculatory ducts, Semicircular canals, Uterus.

UTRICLE, PRIMORDIAL, *Utriculus primordialis*. A delicate membrane, of protein composition, which lines the cell wall of vegetable structures, and from the exterior of which the layer of cellulose is secreted.

UTRICULAR, *Utricularis*. Relating to or resembling a small bag or bottle.

UTRICULAR GLANDS, *Glandule utriculares* seu *uterinæ*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, Utricle, see Ejaculatory ducts, Semicircular canals, Uterus—u. *Communis*, see Semicircular canals—u. *Lacteus*, *Receptaculum chyli*—u. *Primordialis*, Utricle, primordial—u. *Prostaticus*, see Ejaculatory ducts.

UVA, 'a grape, or a bunch of grapes,' *Uvula*, see *Vitis vinifera*—u. *Inversa*, *Paris*—u. *Lupina*, *Paris*—u. *Passa*, see *Vitis vinifera*—u. *Ursi*, see *Arbutus uva ursi*—u. *Vulpina*, *Paris*.

UVÆ CORINTHIACÆ, see *Vitis Corinthiaca*.

UVÆ PAS'SÆ, 'Dried Grapes,' *Rha'ges*, *Raisins*, see *Vitis vinifera*.

UVÆ PASSÆ MAJORES, see *Vitis vinifera*—u. *Passæ minores*, see *Vitis Corinthiaca*—u. *Passæ sole siccata*, see *Vitis vinifera*.

UVARIA TRILOBA, (from *uva*, 'a grape,') see *Carica papaya*.

UVATIO, (from *uva*, 'a grape,') *Ceratocele*, *Staphyloma*.

U'VEA, (from *uva*, 'a grape,') *Tu'nica acinosa* seu *aciniformis* seu *uvælis* seu *acinulicis* seu *uviformis* seu *rhagoïdes* seu *u'væ* seu *perforata*, *Membra'na u'væ*, *Rhagoïdes*, *Rhor*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it. See *Iris*.

UVEA, COMMISSURE OF THE, Ciliary ligament.

UVÉE, Uvea.

UVEITIS, (F.) *Uvélite*, (*uvea*, and *itis*), properly, *Rhagoïdeï'tis*. Inflammation of the uvea. See *Iritis*.

UVIGENA, *Uvula*.

UVIGERA, *Uvula*.

UVULA, (dim. of *uva*, 'a grape,') *Pinnaculum fornicis gutturælis*, *U'væ*, *Staphylè*, *Tintinnabulum*, *Columella*, *C'ion*, *C'ionis*, *Garga'reon*, *Colum'na o'ris*, *Gurgu'tio*, *Interseptum*, *Processus* seu *Cartilago Uvifer*, *Uvig'ena*, *Uvig'era*, *H'mas*, *Plectrum*, *Sublin'gua*, *Sublin'guum*, *Pap of the Throat*, (Sc.) *Pap of the Hass*, (F.) *Luette*. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains within it the azygos uvulæ muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle, *U'vula cerebelli*. It is on the median line, and behind the nodulus.

UVULA, see Vermiform process inferior—u. *Cerebelli*, see *Uvula*—u. *Decidua*, *Staphylœdema*—u. *Relaxata*, *Staphylœdema*—u. *Vesicæ*, see *Urinary bladder*—u. *Vesical*, see *Urinary bladder*.

UVULAR, *Uvularis*, (F.) *Uvulaire*, (from *uvula*.) That which belongs to the uvula.

UVULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, (so called from the flowers hanging like the uvula, [?]) *Ruscus hypoglossum*.

UVULARIA PERFOLIATA, *Smaller Bellwort*; indigenous; *Order*, *Melanthaceæ*; flowering in May and June. The root, when fresh, is subacid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

UVULARIA GRANDIFLORA and *U. sessilifolia* have similar properties.

UVULITIS, (*uvula*, and *itis*), *Angi'na uvularis*, *Staphylit'is*, *Cioni'tis*, *Inflamma'tio u'vulæ*, (F.) *Inflam'mation de la Luette*, *Falling down of the Palate*. Inflammation of the uvula. When to a slight degree, *Hypostaphylit'is*.

## V.

VACCIN, see Vaccina.

VACCINA, *V. primigena* seu *vaccinato'ria* seu *antivariolo'sa*, *Vaccin'ia*, *Vari'ola vaccina'ia*, *V. vaccini'ca* seu *tuto'ria* seu *tu'trice*, *Ecanthe'ma vacci'na* seu *antivariolo'sum*, *Syn'ocha vacci'na*, *Em'phyl'sis vacci'na inser'ta*, *Vacci'ola*, *V. sentel'la'ta*, *V. re'ra*, *Vari'olæ tuto'rie*, *Cowpox*, *Cow-pock*, *Kine Pock*, *Inoc'ulated Cowpox*, (from *vacca*, 'a cow,') (F.) *Vaccinæ*. The cowpox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from smallpox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for smallpox in Gloucestershire in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through smallpox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow; which they had taken by milking the animal; and which eruption they called *Cowpox*. This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus*, *Virus Vaccin'um*, (F.) *Vaccin*, the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated that it is perhaps as efficacious when obtained from the human vesicle. The characteristic of cowpox eruption is:—a semitransparent, pearcoloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cowpox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cowpox*. If the eruption runs speedily to a height, has an areola too early, is irregular at its edges, and contains pus instead of a limpid fluid, it cannot at all be depended upon.

Smallpox occurs, occasionally, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be smallpox; and, accordingly, they gave it the name Varioloid. It is unquestionably smallpox, but modified, and greatly divested of its terrors by previous vaccination; and it is

said to happen less frequently after vaccination than after *smallpox inoculation*. Vaccination is now practised everywhere, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection *revaccination* may be occasionally necessary.

VACCINA ANTIVARIOLOSA, Vaccina—v. Primi-gena, Vaccina—v. Tutoria, Vaccina—v. Tutrix, Vaccina—v. Vaccinatoria, Vaccina.

VACCINAL, Vaccinæ.

VACCINATION, *Vaccinatio*, (from *vacca*, 'a cow;') *Cowpox inoculation*, *Jenne'rian inocula-tion*. An operation which consists in inserting the vaccine virus under the cuticle, so that it may enter into the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cowpox vesicle*, for vaccination, is about the 7th or 8th day, before the appearance of the areola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence, it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VACCINATOR, *Vaccinist*. One who inoculates for the cowpox.

VACCINE, *Vaccinus*, *Vaccina'lis*, (F.) *Vaccinal*; (same etymon as Vaccination.) Relating or appertaining to vaccination, as the 'vaccine vesicle,' 'a vaccine physician.'

VACCINE, Vaccina.

VACCINELLA, (dim. of *vaccina*.) A term employed by some to designate spurious cowpox. *Vaccin'o's*, *Vacci'ola spu'ria* seu *lepro'sa*, (F.) *Vaccinelle*, *Vaccinoïde*.

VACCINIA, Vaccina—v. Palustris, Vaccinium oxycoccus.

VACCINIST, Vaccinator.

VACCINIUM MACROCARPON, see *V. oxycoccus*.

VACCINIUM MYRTILLUS, (either corrupted from *hyacinthus*, or, and more probably, from *vaccin-ium*; from *baccæ*, 'berries,' in allusion to its fruit.) *Vitis idæa myrtill'us*, *Vaccin'ia myrtill'us*, *Vaccin'ium nig'rum*, *Myrt'leber'ry*, *Bl'berry*, *Black-berry*, *Whor'tleberry*, *Black Whorts*, (Sc.) *Blac'-berry*, (Prov.) *Hur'tleberry*, *Whim'berry*, (F.) *Air-elle Anguleuse*, *Raisin de Bois*. Ord. Vaccinacæ. *Sex. Syst.* Octandria Monogynia. The berries—*Baccæ Myrtill'o'rum*—are esteemed to be anti-scorbutic, when prepared with vinegar. They are also said to possess antiseptic and subastrigent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, *V. myrtillus*.

VACCINIUM OXYCOC'COS, *Oxyco'cos*, *O. palus-tris*, *Schollera oxycoc'cos*, *Vaccin'ia palus'tria*, *Vitis Idæa palus'tris*, *Moor'berry*, *Cran'berry*, *Moss'-berry*, *Sicamp Red'berry*, *Sour'berry*, (F.) *Coune-berge*. The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American Cranberry is from *Vaccin'ium macrocarpon*, *Oxycoccus macrocarpum*

VACCINIUM PENNSYLVANICUM, *Low Blueberry*. The leaves and bark of the root are astringent.

VACCINIUM PUNCTATUM, *V. vitis idæa*—*v. Resinosum*, *Gaylussacia resinosa*.

VACCINIUM STAMINÆUM, *Buckberry*, *Squaw Hackleberry*, *Deerberry*. The leaves of these plants are astringent.

VACCINIUM VITIS IDÆA, *V. punctatum*, *Vitis Idæa punctata*, *Am'pelo Idæa*, *Red Bilberry*, (Sc.) *Bracon's*, *Al'pine Cranberry*, *Whor'tleberry*, *Cow'berry*, (F.) *Aivelle* ou *Canneberge punctée*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of *Vaccinium*.

VACCINOÏDE, (*vaccina*, and εἶδος, 'resemblance.') *Vaccinella*.

VACCINOIS, *Vaccinella*.

VACCINUS, *Vaccine*.

VACCIOLOA, *Vaccina*—*v. Leprosa*, *Vaccinella*—*v. Scutellata*, *Vaccina*—*v. Spuria*, *Vaccinella*—*v. Vera*, *Vaccina*.

VACILLATIO, *Titubatio*, (from *vacillare*, *vacillatum*, 'to waver.') *Staggering*; *waddling*—*claudicatio anatica*.

VACILLATIO DENTIUM, *Odontoseisis*.

VACUOLE, (dim. of (L.) *vacuus*, 'empty,') *Areola*.

VAGINA, *Vagina*.

VAGINA, 'a sheath,' *V. muli'ebri's* seu *uteri'na* seu *Uteri* seu *Pe'nis*, *Sit'nis muli'ebri's* seu *Pud'oris* seu *Puden'di*, *Co'leus*, *Pe'ris*, *Pe'rin*, *Colpus*, *Vulvoit'eri'ne canal*, (F.) *Vagin*, *Conduit* ou *Canal de la pudeur*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Aul'us* seu *Intro'itus*, with the vulva; by the other, *For'nix* seu *Fun'dus*, with the womb, the *Parv* seu *Por'tio vagin'al'is u'teri*, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculae myrtiformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a cellulovascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also enter into the composition of the organ.

The tercia *Vagina* or *Sheath*, *The'ca*, (F.) *Gaîne*, is extended to many parts, which serve as envelopes to others. Thus, it is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the bloodvessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA CORDIS, *Pericardium*—*v. Femoris*, *Fascia lata aponeu'rosis*—*v. Funiculi umbilicalis*, see *Funiculus umbilicalis*—*v. Glissonii*, *Capsule of Glisson*—*v. Malleolaris externa*, *Retinaeculum tendinum perine'orum*—*v. Muliebris*, *Vagina*—*v. Muscularis*, *Perimysium*—*v. Nervorum*, *Neurilemma*—*v. Penis*, *Vagina*—*v. Pili*, see *Hair*—*v. Portæ*, *Capsule of Glisson*—*v. Uterina*, *Vagina*.

VAGINA OF THE VE'NA POR'TA, *Sheath of the Vena Porta*, (F.) *Gaîne de la Veine-porte*, is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, 'synovial sheaths,' *Bursæ mucosæ*.

VAG'INAL, or VAG'NAL, *Vagin'al'is*, (from *vagina*, 'a sheath.') *Relating* or *pertaining* to a sheath.

VAGINAL ARTERY. This exists, as a matter of course, only in the female. It arises from the hypogastric, or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches,

first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

VAGINAL BIL'IARY PLEX'US. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

VAGINAL BRANCH'ES OF THE VE'NA POR'TA are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form the *vaginal plex'us*. There are, also, *vaginal branches*, and a *vaginal plexus* formed by the hepatic artery.

VAGINAL COAT OF THE EYE, see *Eye*.

VAGINAL COAT OF THE TESTICLE, *Tu'nica Vagina'tis* seu *Elytroi'des* seu *Elytro'des*, is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tu'nica vagina'tis pro'pria* and *Tu'nica vagina'tis reflex'a*. Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

Inflammation of the tunica vaginalis has been called *Vagin'al'itis*, (F.) *Vaginalite*.

VAGINAL GANGLIA, see *Spermatic ganglion*—*v. Plexus*, see *Vaginal branches of the vena porta*.

VAGINAL PROC'ESS OF THE TEMPORAL BONE, (F.) *Apophyse vaginale* ou *engainante*, *Gaîne de l'apophyse styloïde*, *Chaton*, is a bony crista, which embraces the base of the styloid process.

VAGINAL PULSE, *Pulse*, *vaginal*.

VAGINALITIS, see *Vaginal coat of the testicle*.

VAGINISM'US. A name given by Dr. J. Marion Sims to spasm of the sphincter muscle of the vagina, with hyperæsthesia of the surrounding parts, and altered structure, which requires division by the knife.

VAGINITIS, (*vagina*, and *itis*.) *Inflammation of the vagina*, see *Leucorrhœa (vaginal)*.

VAGINODYNIA, (*vagina*, and ὄδυς, 'pain,') *Colalgia*.

VAGINOVESICAL, *Vesicovaginal*.

VAGISSEMENT, (from *vagitus*.) *Cry*, *Vagitus*.

VAGITUS, (*vagire*, *vagitum*, 'to cry,') (F.) *Vagissement*. The cry of the newborn child. *Squalling*.

VAGITUS UTERI'NUS. The cry of the child in utero.

VAGUS (NERVUS), 'wandering (nerve,)' *Pneumogastric*.

VAI'RON (F.), (from *varius*, 'of different colours,') *Dispar ocul'us*. One who has eyes of different colors. It also means a *wall-eyed animal*, or one whose iris is surrounded by a whitish circle.

VASSEAU, (from *vas*, dim. *vasculum*,) *Vessel*—*v. Sanguin*, *Bloodvessel*.

VASSEAUX (pl. of *vaisseau*) *CAPILLAIRES*, *Capillary vessels*—*v. Chylifères*, *Chyliferous vessels*—*v. Courts*, *Brevia vasa*—*v. Droits*, see *Rete testis*—*v. Efférens*, see *Efferent*—*v. Lactés*, *Chyliferous vessels*—*v. Lactifères*, *Lactiferous vessels*—*v. Omphaliques*, *Umbilical vessels*—*v. Tourbillonnés*, *Vasa vorticosa*—*v. des Vaisseaux*, *Vasa vasorum*.

VALANIDA, *Fagus sylvatica*.

VALANTIA APARINE, (after S. Vaillant, a French botanist,) *Galium aparine*.

VALENTINIAN VESICLES, (after Valentin, the German physiologist,) see *Molecule*.

VALERIAN, AMERICAN, (from *valere*, 'to have efficacy' [?]), *Cypripedium luteum*, *Valeriana pauciflora*—*v. Garden*, *Valeriana plu*—*v. Greek*, *Polemonium reptans*—*v. Official*, *Valeriana*—*v. Wild*, *Senecio aureus*, *Valeriana*, *V. pauciflora*.

VALERIANA, *V. officinalis* seu *minor*, *Leucolach'anum*, *Wild* or *Officinal Valerian*. *Ord.* Valerianaceae. *Sex. Syst.* Triandria Monogynia. The root, *Valeriana* (Ph. U. S.), has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol. The distilled oil is officinal in the Pharmacopœia of the United States.

The *Kooyah* root or *Kooyahs* of the Indians in Oregon, used by them for making a bread called *Supale*, is said to be that of *Valeriana officinalis* or *Valeriana edulis*, probably the same as that sometimes written *Kous*. It is frequently called *Tobacco* root. It has to be buried in the ground for two days to deprive it of its noxious properties. The bread has an offensive taste to those not accustomed to it.

VALERIANA CAPENSIS, a South African species, has similar virtues.

VALERIANA CELTICA, *V. Saxatilis*, *Spica Celtica* seu *Celtica Dioscoridis* seu *Alpina*, *Nardus Celtica*, *Salvica*, *Nardum Gallicum*, *Celtic Nard*, (F.) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative, and diuretic. It has a moderately strong smell, and a warm, bitterish, subacid taste.

VALERIANA DENTATA, *V. locus'ia*, *Corn Sal'ad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA EDULIS, see Valeriana—*v.* Locusta, *V. dentata*—*v.* Major, *V. plu*—*v.* Minor, *Valeriana*—*v.* Officinalis, *Valeriana*.

VALERIANA PAUCIFLORA, *American* or *Wild Valerian*, and *V. sylvatica*, have the properties of the other Valerians.

VALERIANA PHU, *V. major*, *Gar'den Valerian*. (F.) *Grande Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

VALERIANA SAXATILIS, *V. celtica*—*v.* Spica, *Nardus Indica*—*v.* Sylvatica, see *V. pauciflora*.

VALÉRIANE, GRANDE, *Valeriana phu*.

VALET À PATIN (F.), *Volsel'ta Patini*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALETUDINAIRE, Valetudinary.

VALETUDINARIUM, (from *valetudo*,) Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETUDINARY, *Valetudinarian*, *Valetudinarius*, *Inval'idus*, (F.) *Valétudinaire*. One of delicate health. One subject to frequent diseases. An *Inval'id*.

VALETUDO, gen. *Valetudinis*, 'health, whether good or bad,' Sanitas—*v.* Adversa, Disease—*v.* Bona, Sanitas—*v.* Commoda, Sanitas—*v.* Secunda, Sanitas.

VALGUS, 'bowlegged,' see Cnemosciosis and Kylosis.

VALIGA, Tinctura jalapii.

VALITUDO, gen. *Valitudinis*, Sanitas.

VALLECULA, (dim. of *vallis*), Valley—*v.* Unguis, see Nail.

VALLEY, *Vallis*, dim. *Vallec'ula*, *V. Reil'ii*, (F.) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLIS, Valley—*v.* Alarum, 'valley of the armpits,' Axilla—*v.* Femorum, Vulva.

VALLUM, 'a palsaded rampart.' The eyebrow or supercilium. Also, a species of bandage.

VALS, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron and alum. They are employed in passive hemorrhages, leucorrhœa, &c. Season, from the 1st of June to the 15th of September.

VALVA, Valve.

VALVE, *Valva*, dim. *Valvula*, *Di'ctis*, (F.) *Valvule*, (*valvæ*, 'folding-doors,' itself from *volvo*, 'to fold up.')

A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ileocecal valve*, &c.

VALVE OF FALLOPIUS, Bauhin, valve of—*v.* Ileocecal, Bauhin, valve of—*v.* Tulpian, Bauhin, valve of—*v.* of Varolius, Bauhin, valve of.

VALVES, KERKRINGIAN, *Valvulæ conniventes*—*v.* Semilunar, Sigmoid valves.

VALVULA, pl. *valvulæ*, (dim. of *valva*), Valve—*v.* Cæci, Bauhin, valve of—*v.* Cerebelli, *Valvula Viuessenii*—*v.* Coli, Bauhin, valve of—*v.* Foraminis ovalis, *Ovalis fossa*—*v.* Guiffartiana, see Thebesius, veins of—*v.* Ilei, Bauhin, valve of—*v.* Magna cerebri, *V. Viuessenii*.

VALVULA SEMILUNARIS, *Pli'ca Semilunaris* seu *luna'ta*, *Membrana semilunaris conjunctivæ*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membrana nictitans* seu *Palpebra tertia*.

VALVULA TARINI, Velum medullare posterius—*v.* Thebesii, see Thebesius, veins of—*v.* Tulpian, Bauhin, valve of—*v.* Vaginæ, Hymen—*v.* Venæ magnæ, see Thebesius, valve of.

VALVULA VIUSSIENII, *V. cerebelli* seu *Willisia'na* seu *magna cerebri*, *Velum Viuessenii* seu *interjectum cerebelli*, *V. apophysi vermiformi obtentum*, *V. medullarè* seu *medullarè ant'um* seu *anterius*, *Lacunar ventriculi quartisuperior*, (F.) *Valvule de Viuessens*, *Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the Aqueductus Sylvii and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Processus ad Testes*, *Columnæ Valvulæ Viuessenii* or *Oblique intercerebralis Commissuræ*.

VALVULA WILLISIANA, *Valvula Viuessenii*.

VALVULÆ, pl. of *Valvula*—*v.* Bicuspidales, Mitral valves.

VALVULÆ CONNIVENTES, 'self-closing valves,' *V. C. Kerkringii*, *Pli'cæ conniventes*, *Kerkringian valves*. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be, to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyloferous vessels.

VALVULÆ CORDIS, *Ostiola cordis*—*v.* Cordis mitræ, Mitral valves—*v.* Semilunares, Sigmoid valves—*v.* Triglochinæ, Tricuspid valves—*v.* Trisulcæ, Tricuspid valves.

VALVULE, Valve—*v.* *d'Eustache*, Eustachian valve—*v.* *de Pyloræ*, see Pylorus—*v.* *de Viuessens*, *Valvula Viuessenii*.

VALVULES ÉPISCOPALES, Mitral valves—*v.* *Sigmoides* ou *Semilunares*, Sigmoid valves.

VANDELLIA DIFFUSA, (after *Vandelli*, professor of botany at Coimbra.) A native of Brazil, Guiana and Isle of France; *Order*, Scrophulariaceæ; is used there as an antibilious emetic and

antiperiodic; and is regarded as an efficacious remedy in malignant fever and dysentery, especially in cases connected with a disordered state of the liver.

VANELLOE, Vanilla.

VANILLA, *Bani'la*, *Bani'as*, *Bani'loes*, *Bani'la*, *Benzo'enil*, *Ar'acens aromati'cus*, (F.) *Vanille*, *Baume de Vanille*, ([S.] *vainilla*, dim. of *vaina*, 'a sheath, a pod.') The *Vanell'oe—Sil'vina* *vanill'e* seu *Banill'e* seu *Vanigli'e* seu *vanill'ie* seu *Ar'aci aromati'ci*—is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epide'drum Vanil'la*, *Vanil'la aromati'ca* seu *Mexi'cana*, and other species. Family, Orchidaceæ. Sec. Syst. Gynandria Monandria. Vanilloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VANILLA AROMATI'CA, see Vanilla.

VAO, see Curare.

VAPOURS, 'vapors,' Hypochondriasis, Hysteria—*v. de Rate*, Hypochondriasis.

VAPOR SANGUINIS, 'vapour of the blood,' Gaz sanguinis.

VAPORARIUM, *Atmist'e'ri'on*, *Atmolu'tron*, *Lac'on'icum*, *Bal'neum vapo'ris*, *Vapour bath*, (F.) *Bain de vapeur*, (from *vapor*, 'steam.') A remedy in rheumatic and cutaneous affections; and wherever it is important to impress the cutaneous surface. In the *Russian Va'pour Bath*, the vapour is produced in Russia by throwing water over hot stones, and the bather passes, at once, from the heated condition to cool or cold water, not only with impunity, but with positive pleasure. Its temperature is from 122° to 145°.

VAPORARIUM, Hypocaustum, see Stove.

VAPORATIO, (*vaporare*, *vaporatum*, 'to emit steam or vapour,') Evaporation.

VAPORES UTERINI, Hysteria.

VAPORS, Hypochondriasis, Hysteria.

VAPOUR, Flatulence—*v. Bath*, Vaporarium.

VAPOURISH, Hypochondriac, Hysterical.

VAPUROUS, Windy.

VAPOURY, Hypochondriacal, Hysterical.

VARA, *Barre*.

VARAIRE, *Veratrum album*.

VAREC, 'wrack,' Kelp—*v. Vésiculeux*, *Fucus vesiculosus*.

VARENI, Ambulofatulentus, Gout, (wandering.)

VARICE, Varix.

VARICEL'LA, (dim. of *Variola*), *Em'phlysis* seu *E'xanth'e'ma* seu *Syn'ochus varicell'la*, *Vari'ola lymphati'ca* seu *spu'ria* seu *sylic'e'tria*, *Vari'ole no'the* seu *illegiti'mæ* seu *volut'icæ* seu *pucell'æ*, *Pseudovar'iolæ*, *Æol'tion*, *Æol'tium*, *Chick'empox*, (F.) *Varicelle*, *Péte vérole volante*, *Véroléte*, *Vérette*, *Fausse variole*. A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and concrete into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiform'es* or *lentic'ular chick'empox*, which are irregular circular, and flattened on the top; the fluid being at first whitish, and afterward straw-coloured. This is the common *chickenpox*. 2. The *Varicella conifor'mis*, *Pen'phigus variolo'des*, *Vari'ola lymphati'ca*, *Hydrach'mis*, *Conoid'al Chick'empox*, *Sain'epox*, *Waterpox*, *Waterjags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and, 3. The *Varicell'a globu'laris* or *H'ives*, in which the vesicles are globular and larger, the fluid being, at first, whey-coloured,

and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

*Horripox* is a popular variety of varicella.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Varicella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required. See Varioloid.

VARICELLA VARIOLOIDEA, Varioloid.

VARICELLAR FEVER, see Varioloid.

VARICIFOR'MES PARAS'TATÆ, (*varix*, pl. *varices*, and *forma*, 'form.')

With some authors, the ducts of the epididymis, because they seem knotty and varicose.

VARICOBLEPH'ARON, (*varix*, and *βλεφαρον*, 'eyelid.')

A varicose tumour of the eyelid.

VARICOCE'LE, (*varix*, and *κηλη*, 'a tumour;') *Osc'heoce'le varico'sa*, *Her'nia varico'sa*, *Ra'mæx varico'sus*, *Spermatoce'le*, *Cirsoce'le*. A varicose dilatation of the veins of the scrotum and spermatic cord; usually, by English and American writers, restricted to the latter, like Cirsocele. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the serotum, so as to render the remainder of the serotum a natural bandage. This plan has been found effectual.

VARICOM'PHALUS, (*varix*, and *ομφαλος*, 'the umbilicus.')

Varicose tumour of the umbilicus; cirsiomphalus.

VARICOSE, *Varico'sus*, *Var'icous*, (F.) *Variqueux*, (from *varix*.) Affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*; a *varicose ulcer*, one kept up by *varices*.

VARICOSITAS, see Varix—*v. Conjunctivæ*, *Cirsophthalmia*.

VARICOSITY, see Varix.

VARIC'ULA, dim. of *Varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.

VARI'OLA, *Vari'olæ*, *V. ve'ræ*, *Vari'oli*, *Em'pye'sis* *Vari'ola*, *Pes'tis* seu *Fe'bris variolo'sa*, *Æolec'thyma*, *Smallpox*, *Pox* (North of England); (from *varius*, 'spotted,' or from *vari*, 'pimples;') (F.) *Variolæ*, *Petite Vérole*, *Picote*. A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this inoculated *smallpox*—*Vari'ola inser'ta*—communicates the disease as readily through the air as the natural *smallpox*, or that received without inoculation.

Smallpox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In *VARIOLA DISCRE'TA*, *Em'pye'sis vari'ola discre'ta*, *Va-*

*variola discreta benigna*, *Variolæ regulares* seu *discretae*, *Distincti Smallpox*, the pustules are usually of the size of peas; distinct, distended, and circular: the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In *VARIOLA CONFLUENS*, *Empyësis variolæ confluens*, *Variolæ regulares confluentes*, *Vesiculæ D'væ Barbæ*, *Vesiculae de Sainte-Barbe*, *Confluent Smallpox*, the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhœa, and, in adults, ptyalism, with swelling of the hands and feet, generally appear, towards the period of the *secundary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches being, however, separated by intervals of unaffected skin; it constitutes the clustered, coherent, or corymbose variety—*Variolæ corymbosa*.

*VARIOLA AMBOINENSIS*, *Frambœsia*—v. *Corymbosa*, see *Variola*—v. *Inserta*, *Variola* (by inoculation)—v. *Lymphatica*, *Variella*—v. *Mitigata*, *Varioloid*—v. *Spuria*, *Varicella*—v. *Vaccina*, *Vaccina*—v. *Vaccinatorum*, *Varioloid*.

*VARIOLA sine VARIOLIS*, *Variolous Fever*. These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

*VARIOLÆ*, *Variola*—v. *Equinae*, see *Grease*—v. *Illegitima*, *Variella*—v. *Modificata*, *Varioloid*—v. *Nothæ*, *Varicella*—v. *Pucellæ*, *Varicella*—v. *Sylvestris*, *Varicella*—v. *Tutoriæ*, *Vaccina*—v. *Vervæ*, *Variola*—v. *Volaticæ*, *Varicella*.

*VARIOLATION*, *Inoculation* (*Smallpox*.)

*VARIOLE*, *Variola*.

*VARIOLEUX*, *Variolous*.

*VARIOLI*, *Variola*.

*VARIOLIC*, *Variolous*.

*VARIOLIQUE*, *Variolous*.

*VARIOLOID*, *Varioloides*, *Varioloides*, *Variolæ modificata* seu *mitigata* seu *raccinatorum* *Varicella* (of some), *Varicella Varioloides*, (*variola*, 'smallpox,' and *væ*, 'form,')—resembling smallpox. This is, really, smallpox, modified by previous inoculation or vaccination; and hence it has been properly called *modified smallpox*. That it is smallpox is proved by the fact, that matter, taken from a varioloid pustule, will communicate smallpox to one who has never been vaccinated. It is, almost always, a milder disease than smallpox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

Occasionally, when varioloid is epidemic, *varioloid* or *varicellar fever* occurs without the eruption. This is the *varicellæ sine varicellis* of Mr. Erasmus Wilson, who calls varioloid, *varicella*.

*VARIOLOID FEVER*, see *Varioloid*.

*VARIOLOIS*, *Varioloid*.

*VARIOLOUS*, *Variolous*, *Variolic*, (F.) *Variolens*, *Variolique*. Relating or belonging to variola.

*VARIQUEUX*, (from *varix*.) *Varicose*.

*VARIX*, gen. *Varicis*, *Phlebeury'sma*, *Phlebeutasis*, *Her'nia* seu *Ectasia venarum*, *Angiectasia venosa*, *Iz'ia*, *Cir'sus*, *Ced'ma*, *Varicose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist,'—on account of the sinuosities of varicose veins. Dilatation of a vein; *Varicositas*, *Varicosity*. Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein or ligature. The second course is apt to be followed by phlebitis.

*VAROLI*, *BRIDGE OF*, *Pons Varolii*.

*VARUS*, (*varius*, 'spotted,') A spot or pimple on the face; *Acne*, *Ionthus*. Also, *Entogonyancan* and *Kylosis*, (from *varus*, 'having the legs bent,')

*VARUS MENTAGRA*, *Sycosis*—v. *Punctatus*, see *Acne*.

*VAS*, gen. *Vasis*, *Vessel*, *Penis*—v. *Aberrans* *Halleri*, *Vasculum aberrans*—v. *Deferens*, see *Deferens*—v. *Deferens mulieris*, *Tuba Fallopiana*—*Urinarum*, *Ureter*.

*VASA* (pl. of *Vas*) *ABERRANTIA*. Pectiliar ramifications of the biliary duct in the liver are so called by E. H. Weber.

*VASA ABSORBENTIA*, *Absorbent vessels*—v. *Afferentia*, see *Afferent and Efferent*—v. *Brevia*, see *Brevia vasa*—v. *Capillaria*, *Capillary vessels*—v. *Chylifera* seu *Chylifera*, *Chyliferous vessels*. *VASA CHYLOPOËTICA URINIFERA*. Blood-vessels, which, according to Lippi, convey drinks from the chyliferous vessels to the renal veins.

*VASA EFFERENTIA*, see *Efferent*—v. *Exhalantia*, *Exhalant vessels*—v. *Graafiana*, see *Efferent*—v. *Hydragoga*, *Lymphatic vessels*—v. *Inferentia*, see *Afferent and Efferent*—v. *Lactea*, *Chyliferous vessels*, *Lactiferous vessels*—v. *Lymphatica*, *Lymphatic vessels*—v. *Meningea*, *Meningeal vessels*—v. *Nutrientia*, *Vasa vasorum*—v. *Nutritia*, *Vasa vasorum*—v. *Recta*, see *Rete testis*—v. *Resorbentia*, *Absorbent vessels*, *Lymphatic vessels*—v. *Sedalia*, *Hæmorrhoidal vessels*—v. *Serosa*, see *Capillary vessels*.

*VASA VASORUM*, 'vessels of vessels,' *V. nutritiva* seu *nutrientia*, (F.) *Vaisseaux des vaisseaux*. Small vessels that supply larger with blood for their nutrition. The cardiac or coronary arteries and veins may be regarded as the vasa vasorum of the heart. However minutely a vessel is traced, its parietes will be found supplied with blood for their nutrition by a smaller vessel.

*VASA VORTICOSA*, (*vortex*, 'a whirlpool,') (F.) *Vaisseaux tourbillonnés*, *Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye: ciliary veins.

*VASCOA AMPLEXICAULIS*, (after *Vasco de Gama*.) A South African shrub, *Nat. Ord. Leguminosæ*, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phthisis, and are a good substitute for liquorice.

*VASCULA SERPENTINA*, see *Testicle*.

*VASCULAR*, *Vascularis*, *Vasculous*, *Angi'al*, (F.) *Vasculaire*, *Vasculeux*, (fr. *vais*, 'a ves-

sel,' *vasculum*, 'a little vessel.') That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Full of vessels. Bichat gave the name *Vascular system*, *Système vasorum*, *Hæmatologica*, to the blood-vessels, and of this he made two divisions. 1. The *Arterial system*, or *System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart, and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system* or *Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR GLANDS, see Ganglion—v. Layer, see *Tache embryonnaire*—v. Radicles, Radical vessels—v. Substance of the Kidney, see Kidney—v. System, see Vascular—v. System, intermediate, Capillary system—v. System, peripheral, Capillary system—v. Tumour, see Hæmorrhoids.

VASCULARITY, *Vascularitas*, (F.) *Vascularité*. The state of being vascular, or largely supplied with vessels.

VASCULEUX, Vascular.

VASCULOMOTOR, Vasomotor.

VASCULUM, (dim. of *vas*, 'a vessel,') Penis, Vessel.

VASCULUM ABERRANS, (*aberrare*, 'to wander from,') *Vas aberrans Halleri*, *Appendix to the Epididymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, 'bleeding vessel,' Cup.

VASOMOTOR, *Vasculomotor*, (F.) *Vasomotor*, *Vasculo-moteur*, (from *vas*, 'vessel,' and *motor*, 'mover,') That which causes movement in the vessels. Fibres of the great sympathetic are 'vasomotor.'

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and VASTUS INTERNUS are two considerable, fleshy masses, which form part of the *Triceps cruris*.

VASUM, Vessel.

VATER, AMPULLA OF, (F.) *Ampoule de Vater*, (called after Vater, a German anatomist.) An ampulla formed by the orifice of the pancreatic duct in the duodenum.

VATER, CORPUSCLES OF, Corpuscles, Pacinian.

VATERIA INDICA, (after Abraham Vater, a physician and botanist of Wittenberg,) see Copal.

VATICINIUM CHIROMANTICUM, (*vaticinor*, 'to foretell,') Chiromancy.

VAULT, (old F. *Voulte*, 'a round or turn; from *volvere*, *volutum*, 'to turn;') *For'nix*, *Cam'era*, (F.) *Vôte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium* or the upper part of the skull,—the *Palantine vault* or *roof of the mouth*, &c. &c.

VAUQUELINE, (after Vauquelin, the French chemist,) *Strychnia*.

VEAL TEA. This may be made in the same manner as beef tea, by using a pound of fillet of veal, free from fat and sliced, and a pint and a half of *boiling water*; and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

VECORDIA, 'want of reason,' Idiocy.

VECTIS, (*vehere*, *vectum*, 'to carry,') Lever—

v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VECTOR CANAL, (*vehere*, *vectum*, 'to carry,') Tube, Fallopiun.

VEGETABLE, *Vegetabilis*, (F.) *Végétal*, (from *vegetus*, 'lively,' and *vegeo* or *vigeo*, 'I flourish,') Appertaining or relating to plants. A vegetable, *Phyton*, (*φύτον*), is an organized being devoid of sensation and voluntary motion, which receives its nutriment, essentially, by the roots. The study of vegetables is *Phytology*, *Phytologia*.

VEGETAL, Vegetable.

VEGETALITY, *Vegetalitas*, (F.) *Végétalité*, (from *vegeo* or *vigeo*, 'to be active,') The aggregate of physiological phenomena, which exist alone in the vegetable, but are common to both plants and animals. See Animality.

VEGETARIAN, see Vegetarianism.

VEGETARIANISM. Same etymon as Vegetation. A modern term, employed to designate the view, that man, for his full mental and corporeal development, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian*.

VEGETATIF, Vegetative.

VEGETATION, *Vegetatio*, 'growing like a plant,' (from *vegeo*, or *vigeo*, 'to be active,') A morbid production, which rises as an excrescence on an organ or part, as on the valves of the heart. The term is also applied to the fleshy granulations or *Hypersarcosis*, which sometimes arises at the surfaces of wounds or ulcers.

VEGETATIVE, *Vegetativus*, *Phytions*, (F.) *Végétatif*. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVE LAYER, see *Tache embryonnaire*.

VEGETATIVUS, Vegetative.

VEHICLE, *Vehiculum*, 'a carriage,' *Oche'ma*, *Constituens*, (F.) *Véhicule*, (from *vehere*, 'to carry,') Anything which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VEHICULE, Vehicle.

VEILED PUFF, see *Cavernous respiration*.

VEIN, *Ve'na*, dim. *Ve'nula*, *Phlebs*, *Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of blood from every part of the body to the heart. They are found wherever there are arteries, and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the cava and the coronary vein. 2. The *Abdominal venous system*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Ve'na Porta* or the *Portal System*. See *Porta*. The veins form two sets, one *deep-seated*, *Ve'næ satel'ites*, *V. concom'ites*, which accompany the arteries; the other *superficial* or *subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of three coats; the outermost, of dense areolar tissue; the middle coat elastic, with parallel, longitudinal fibres—the *proper membrane*; the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments,—*vasomotor*,—are from the great sympathetic.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

- |                                     |  |   |                            |
|-------------------------------------|--|---|----------------------------|
| 1. Subclavians.                     | Receive the<br>1. Axillary which   | 1. Receives the   | 1. Posterior ulnar.        |
|                                     |  | 1. Basilic, formed of the                                   | 2. Anterior ulnar.         |
|                                     |  | 2. Cephalic, forming the                                    | 3. Median basilic.         |
| 2. External Jugular.                | Receive the  | 1. Internal maxillary, composed of the                      | 1. Superficial radial.     |
|                                     |  | 2. Superficial Temporal, composed of the                    | 2. Median cephalic.        |
|                                     |  | 3. Posterior Auricular.                                     |                            |
| 3. Internal Jugular.                | Receive the  | 1. Superior Cerebral Veins.                                 | 1. Pterygoid.              |
|                                     |  | 2. Veins of the Corpus Striatum.                            | 2. Sphenopalatine.         |
|                                     |  | 3. Veins of the Choroid plexus.                             | 3. Alveolar.               |
| 4. Cervical cutaneous.              | The trunk then takes the name of External Jugular, and in its course along the neck, receives— | 4. Superior Cerebellar Veins.                               | 4. Infraorbital.           |
|                                     |  | 5. Inferior Cerebellar Veins.                               | 5. Mental.                 |
|                                     |  | 6. Lateral and inferior Cerebral Veins.                     | 6. Inferior dental.        |
| 7. Ophthalmic Vein, composed of the | Receives   | 7. Palpebral, and   | 7. Deep temporal.          |
|                                     |  | 8. Facial vein, called angular, near the eye, receiving the | 1. Middle temporal.        |
|                                     |  | 9. Lingual and Pharyngeal Veins.                            | 2. Anterior auriculars.    |
| 10. Superior thyroid.               | Receives   | 10. Occipital, and  | 3. Transverse of the face. |
|                                     |  | 11. Veins of the Diploë.                                    |                            |
|                                     |  |   |                            |

2. Right Internal Mammary Vein.
3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.
4. Vena Azygos, which receives the

VEINES ARTÉRIELLES, Arterial veins—v. Ciliaires, Ciliary veins—v. Sous-clavières, Subclavian veins—v. Sus-hépatiques, Hepatic veins.

VEINEUX, Venous.

VEINSTONE Phlebolite.

VEINULE, (dim. of *veine*.) Venula.

VELUCO DE MAVACURE, see Curare.

VELAMEN ('a covering') NATIVUM, Integument.

VELAMENTA (pl. of *velamentum*, 'a covering') BOMBYCINA, Villous membranes—v. Cerebralia, Meninges—v. Infantis, Membranes of the foetus.

VELAMENTUM ('a covering') ABDOMINALE, Peritonæum—v. Corporis commune, Integument—v. Linguae, Glossoëpiglottic ligament—v. Nativum, Integument.

VELAR, Erysimum.

VELLICATION, (*vellicare*, *vellicatum*, 'to twitch,') Tic.

VELOSYNTHESIS, (*velum*, and *συνθεσις*, 'a putting together,') Staphylorrhaphy.

VELUM, 'a veil, a cover,' Velum pendulum palati—v. Apophysi vermiformi obtentum, Valvula Viuessenii—v. Interjectum cerebelli, Valvula Viuessenii—v. Medullare anticum, Valvula Viuessenii.

VELUM MEDULLARE INFANTIS, (F.) *Voile mû-*

*dulloire inférieur.* A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM MEDULLA'RE POSTERUS seu POSTICUS seu SEMILUNA'RE, *Val'vula Tari'ni.* The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.

VELUM PALATI, Velum pendulum palati—v. Palatinum, Velum pendulum palati.

VELUM PENDULUM PALA'TI, 'pendulous veil of the palate.' *Velum, V. Palati'num* seu *Palati'um* seu *Pendulum* seu *Staphyli'num*, *Palatum pendulum* seu *mol'le* seu *mob'ile*, *Pen'dulum* seu *Claust'rum Palati'*, *Palat'um Mol'le*, *Soft Pal'ate*, (F.) *Septum Staphylin* (Ch.), *Voile du Palais.* A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its anterior surface corresponds to the mouth; the posterior to the pharynx. Its superior edge is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle—the *uvula*. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars*; the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscules, the glossostaphylini, the pharyngostaphylini and the palatostaphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glossopharyngeal nerve, likewise, sends it some filaments.

VELUM PUPILLÆ, Pupillary membrane—v. Staphylinum, Velum pendulum palati—v. Vieussenii, Valvula Vieussenii.

VELVET LEAF, *Abutilon Avicennæ*, *Pareira*.

VENA, Vein, Penis, — v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct—v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena, Pulmonary artery—v. Capitis, Cephalic vein—v. Cava, Cava vena—v. Cubiti interior, Basilic vein—v. Demiazygos, see Azygos—v. Diploetica, see Diploic—v. Falcis cerebri, Sinus longitudinalis inferior—v. Galeni, see Cardiac veins, and Choroideæ venæ—v. Hemiazyga, see Azygos vein—v. Lactea, Porta vena—v. Lienalis, Splenic vein—v. Magna, Porta vena—v. Medina Arabum, Dracunculus—v. Medinensis, Dracunculus—v. Ostiaria, Porta vena—v. Pari carens, Azygos, (vena)—v. sine Pari, Azygos, (vena)—v. Portalis, Porta vena—v. Portarum, Porta vena—v. ad Portas, Porta vena—v. quæ ad Portas est, Porta vena—v. Præparata, Facial vein—v. Ramalis, Porta vena—v. Splenica, Splenic vein—v. Stelechiæa, Porta vena—v. Subalaris, Vena axillaris—v. Terminalis, Circulus venosus.

VENÆ, pl. of Vena—v. Apoplecticæ, Jugular veins—v. Cavæ hepatis, Hepatic veins—v. Centrales, Intralobular veins—v. Concomites, see Vein—v. Galeni, Choroid, (veins)—v. Innominatæ, see Innominatum—v. Intralobulares, Intralobular veins—v. Lactææ, Chyliferous vessels—v. Lymphaticæ, Lymphatic vessels—v. Micantes, (arteries) see Artery—v. Pulsatiles, (arteries,) see Artery—v. Satellites, see Vein—v. Soporales, Jugular veins—v. Spermaticæ, Spermatic veins—v. Sphagitides, Jugular veins.

VENÆ VORTICO'SÆ. The veins which principally form the external or venous layer of the choroid coat of the eye; so called from their peculiar arrangement; (from *vertex* seu *vortex*, 'a whirlpool.')

VENÆSECTIO, (*vena*, 'a vein,' and *secare*, *sectum*, 'to cut,') see Bloodletting—v. Revulsoria, see Bloodletting.

VENAL, Venous.

VENEFICICIUM, (*venenum*, and *facere*, 'to make,') Poisoning.

VENENATION, (from *venenum*,) Poison, Poisoning, Venom.

VENENATUS, Venomous.

VÉNÉNEUX, Poisonous.

VENENOSE, Venomous.

VENENUM, Poison, Venom.

VENE'REAL, *Vene'reus*, *Aphrodisi'acus Vene'rean*, (F.) *Vénérien*, (from *Venus*, gen. *Ven'eris*, 'the goddess of pleasure,') That which relates to the pleasures of love. In a more restricted sense, the word *vene'real*—as well as *aphroditic*—is synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases which are produced by excess in venery should be called *vene'real*; and that *syphilitic* should be limited to those which are the result of impure connexion. It is, also, used in the same sense as *aphrodisiac*,—adapted to excite venereal desire.

VENEREAL DESIRE, Libido—v. Diseases, Syphilis.

VÉNÉRIEN, Venereal. Also, one labouring under syphilis; as *Hôpital des vénériens*.

VENERIVAGUS, (*venus*, gen. *ven'eriæ*, 'the pleasures of love,' and *vagare*, 'to wander,') Libidinous.

VEN'ERY, (from *venus*, gen. *ven'eris*.) The pleasures of love. Sexual communication. Coition.

VENESECTIO, (*vena*, 'a vein,' and *secare*, *sectum*, 'to cut,') see Bloodletting.

VENIMEUX, Venomous.

VENIN, (from *venenum*.) Venom.

VENO BENO, see Falsification, table of.

VEN'OM, *Vene'num*, *Tox'icum*, *Venena'tion*, (F.) *Venin*. A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus*, as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

VENOM, QUICKENING, Sperm—v. Vital, Sperm.

VEN'OMOUS, *Venend'us*, *Ven'ense*, (F.) *Venimeux*. An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., as well as to the venom itself; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. Virus is more commonly used in this case.

VENOSITAS, (from *vena*, 'a vein,') Venosity—v. Sanguinis, Prædominium sanguinis venosi.

VENOS'ITY, *Venos'itas*, *Ven'ousness*, *Ven'ous state* or *cachex'ia*, *Melan'e'mia*, *Melano'sis un'iversal'is*, (F.) *Mélanémie*, (from *vena*, 'a vein,') A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c. In general, it signifies abundance of veins in a part; afflux of blood into the veins.

VEN'OUS, *Venal*, *Veno'sus*, (F.) *Veineux*, (from *vena*, 'a vein,') Appertaining to a vein, or to the blood of the veins; as *venous cachexia*, *venous pulse*.

VENOUS CACHEXIA, Venosity—v. Hum, *Bruit de Diable*—v. State, Venosity—v. System, see Vascular—v. System, abdominal, Porta vena.

VEN'OUS SYS'TEM of JA'COBSON. A system of vessels in the three classes of vertebrated ani-

mals other than the mammalia, which forms a communication between the vena porta and the vena cava.

VENOUSNESS, Venosity.

VENT, ([L.] *ventus*.) Wind.

VENTER, gen. *Ventris*, Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as 'by the first venter.' 'A died seized, leaving two infant daughters by different venters.'

VENTER IMUS, 'lowest belly,' Abdomen, Hypogastrium—v. Inferius, Abdomen—v. Infimus, Abdomen—v. Magnus, Inguivies—v. Medius, Thorax—v. Musculi, see Muscle—v. Parvus, Hypogastrium—v. Propendens, Hysteroloxia anterior—v. Renum, Pelvis of the kidney—v. Supremum, Cavum cranii.

VENTEUX, (from *ventus*, 'wind,') Windy.

VENTILATION, *Ventilatio*, (from *ventilare*, *ventilatio*, 'to fan;') (F.) *Ventilation*, *Aérage*, *Aération*. The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities, and where numbers are crowded together, a large amount of zymotic or fermentable matter is exhaled from the lungs, and taken in again during respiration. This is, indeed, a great cause of the mortality which occurs in camps and cities, and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air, and various arrangements have been made for this purpose in hospitals and similar establishments. They are almost all, however, based on the renewal of air by suction, forcing, or both.

Ventilation is one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOSITY, (from *ventus*, 'wind,') Flatulence.

VENTOUSES SCARIFIÉES, (from *ventosus*, 'full of wind,') Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping dry.

VENTRAL, (from *venter*, 'the belly,') Abdominal.

VENTRAL HERNIA, *Her'nia ventralis*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, 'a belly band,' Belt (Russian.)

VENTRALÉ CUTA'NEUM, 'cutaneous apron.' (F.) *Tablier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, (from *venter*, 'the belly,') Abdomen—v. *Inférieur*, Abdomen—v. *Relâché*, see *Diarrhœa*—v. *Resserré*, Constipation.

VENTRE INSPICIENDO DE, see *De ventre inspicendo*.

VENTRICLE, *Ventriculus*, (dim. of *venter*, 'a belly,') (F.) *Ventricule*. Literally, a little belly. A name given, in anatomy, to various parts.

VENTRICLE OF ARAN'TIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventriculi seu Cavitates seu Sinus Cerebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral*

*ventricles*, *middle ventricle*, *fourth ventricle* or *ventricle of the cerebellum*, and *fifth ventricle*. The *middle ventricle* or *third ventricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lateral ventricles*, *Ventriculi laterales seu magni seu majores seu priores seu superiores seu tricornes*, (F.) *Ventricules latéraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tænia semicircularis*: — their inferior portion contains the *corpus fimbria'tum*, *cornu Ammonis*, &c. Each of the ventricles has a *body* or *centre* — *cella media* — and *horn*, cornua. The *Fourth ventricle*, *Ventriculus cerebelli seu quartus seu Arantii*, *Sinus rhomboideus*, (F.) *Quatrième ventricule*, is situate beneath the aqueduct of Sylvius, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ventricle*, *Ventriculus septi pellucidi*, *Inceura septi*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminae of the septum lucidum; called, also, *Sinus of the septum lucidum*, *S. of the median septum* (Ch.).

VENTRICLES OF THE HEART, *Ventriculi cordis*, *Spæcus cordis*, (F.) *Ventricules du cœur*, are two in number. The *Right ventricle*, *Pulmonary ventricle*, *Ventriculus anterior seu primus seu pulmonalis*, (F.) *Ventricule droit ou pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columna carnea* and *Corde tendinea*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ventricle*, *Ventriculus aorticus seu posterior seu secundus*, (F.) *Ventricule gauche ou aortique*, is situate at the posterior and left part of the heart. Its parietes are thrice thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columna carnea* and *Corde tendinea* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest bloodvessel of the body — the aorta.

VENTRICLES OF THE LARYNX, *Ventriculi seu Sacculi laryngis*, *Ventriculi Morgagnii*, *Sinuses of the larynx*, (F.) *Ventricules ou Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

VENTRICOUS, *Ventricosus*, (F.) *Ventru*. Bellied. Having a large belly.

VENTRICULAR, *Ventricularis*, (F.) *Ventriculaire*. Relating to a ventricle.

VENTRICULE, Ventricle.

VENTRICULE AORTIQUE, Ventricle, left—*v. Cinqième*, Ventricle, fifth—*v. Droit*, Ventricle, right—*v. Gauche*, Ventricle, left—*v. Moyen du Cerveau*, Ventricle, middle, of the brain—*v. Pulmonaire*, Ventricle, right—*v. Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain—*v. du Cœur*, Ventricles of the heart—*v. Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, (pl. of *ventriculus*), Ventricles of the heart—*v. Dilatatio*, Gastrectasis—*v. Dissolutio*, Gastromalacia—*v. Duræ matris*, Sinuses of the dura mater—*v. Emollitio*, Gastromalacia—*v. Exulceratio*, Gastræcosis—*v. Fluxus*, Gastrorrhœa—*v. Inflammatio*, Gastritis—*v. Laryngei*, Ventricles of the larynx—*v. Laterales*, see Ventricles, lateral, of the brain—*v. Magni*, Ventricles, lateral, of the brain—*v. Majores*, Ventricles, lateral—*v. Metamorphosis gelatiniformis*, Gastromalacia—*v. Morgagnii*, Ventricles of the larynx—*v. Perforatio*, Gastrobroisis—*v. Priores*, Ventricles, lateral—*v. Pseudophlogosis resolutiva et colligativa*, Gastromalacia—*v. Superiores*, Ventricles, lateral—*v. Tricornes*, Ventricles, lateral—*v. Ulceratio*, Gastræcosis.

VENTRICULUS, (dim. of *venter*, 'belly,') Stomach, Ventricle—*v. Anterior*, Ventricle, right—*v. Aorticus*, Ventricle, left—*v. Arantii*, see Ventricles of the brain.

VENTRICULUS CALLO'SUS, 'callous stomach.' The gizzard or third stomach of the gallinaceous bird. (F.) *Gésier*. It consists of a doublebellied or digastric muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS CEREBELLI, see Ventricles of the brain—*v. Intestinalis*, Abomasus—*v. Posterior*, Ventricle, left—*v. Primus*, Ventricle, right—*v. Pulmonalis*, Ventricle, right—*v. Quartus*, see Ventricles of the brain—*v. Secundus*, Ventricle, left—*v. Septi Pellucidi*, see Ventricles of the brain—*v. Succenturiatus*, Duodenum; see *Ventriculus Callosus*.

VENTRIÈRE, (from *venter*, 'belly, uterus,') Midwife.

VENTRILOQUE, (*venter*, 'belly,' and *loquor*, 'to speak,') Engastrimythus.

VENTRILOQUISM, see Engastrimyth.

VENTRILOQUIST, Engastrimyth.

VENTRILOQUY, see Engastrimyth.

VENTRIOSUS, (from *venter*,) Abdominous.

VENTRIPOTENT, (*venter*, and *potens*, 'powerful,') Abdominous.

VENTROSITAS, (from *venter*,) Physconia.

VENTROSUS, Abdominous.

VENTS, (pl. of *vent*, [L.] *ventus*, 'wind,') Flatulence.

VENTUS, Wind.

VENULA, (dim. of *vena*,) *Phleb'ion*. See *Vein*. (F.) *Veinule*, *Vénule*. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENULE CENTRALES, Intralobular veins—*v. Intralobulares*, Interlobular veins.

VÉNULE, Venula.

VENUS, gen. *Veneris*, 'the goddess of love,' Clitoris, Coition, Cuprum, Vener'y—*v. Crystals of*, *Cupri subacetatis*—*v. Crystaux de*, *Cupri subacetatis*.

VER, (from *vermis*,) Worm—*v. Cucurbitin*, Tœnia solium—*v. Cutané*, Dracunculus—*v. Filaire*, Dracunculus—*v. de Guinée*, Dracunculus—*v. Luisant*, Cicindela—*v. de Médine*, Dracunculus—*v. Sanguin*, Hæmatozoon—*v. Solitaire*, Bothriocephalus latus, Tœnia solium.

VÉRAIRE BLANC, Veratrum album.

VERÂTRE BLANC, Veratrum album.

VERATRIA, Veratrina.

VERATRINA, *Verat'ria*, *Verat'rinum*, *Ver'atrin*, *Ver'atrine*, (from *veratrum*.) A vegetable alkali, found in the seeds of *Veratrum sabadilla*, *V. officinale*, *Helonias officinale*, and *Asagæa officinale*, which are known in commerce under the names *Cebadilla*, *Cevadilla*, and *Sabadilla*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shrivelled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and odorless; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances,—*Sabadillin*, *Ver'atrin*, gum resin of the sabadilla, and black greasy matter. It is extremely poisonous, and but little used internally in medicine. Magendie gave it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endermically, (from gr. v to xx to ʒj of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States:—Take of *Cevadilla*, ℥ij; *Alcohol*, 2 gallons; *Sulphuric acid*, *Solution of ammonia*, *Purified animal charcoal*, and *Magnesia*, each a sufficient quantity. Boil the cevadilla in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the cevadilla, mix and strain the liquors, and, by means of a waterbath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for fifteen minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the veratria. Lastly, separate and dry the precipitate.

An analogous form is given in the British Pharmacopœia for 1864.

VERATRINE, Veratrina.

VERATRINE OF VERATRIA, SULPHATE OF, *Verat'rie sulphas*, (F.) *Sulfate de Véatrine*, possesses the same virtues as veratrine. A solution of one grain in two ounces of distilled water has been suggested as a substitute for the *Eau médicamente d'Husson*—a celebrated gout remedy—in the dose of f ʒj to f ʒij.

VERATRINUM, Veratrina.

VERATRUM ALBUM, (*verè atrum*, 'truly black,' from the colour of the roots [?]). *Helleb'orus albus*, *Elleb'orum albus*, *Elleb'orus albus*,

*Cher'bachem, White hell'ebore, Lang'wort, (F.) Vérate blanc, Hellébore ou Ellébore blanc, Véraire blanc, Vuraire, Tue-chien. Sec. Syst. Polygamia Monœcia. Nat. Ord. Melanthaceæ (Lindley).* The root or rhizoma of this common European plant is indebted to the veratrine for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an itch ointment. See Unguentum Veratri.

VERATRUM LUTEUM, Chamælorium luteum.

VERATRUM SABADIL'LA, *Sabadil'la, Sabadilla, Cal'nis Interfec'tor, Caus'ticum America'num, Cevadil'la Hispano'rum, Sevadil'la, Hor'deum caus'ticum, (F.) Cévadille.* The seed—dried fruit—of this plant, *Subadil'la, Cevadil'la, (Ph. U. S. and Ph. B.)* have been used mostly as anthelmintics. Dose, gr. ij to a child four years old. It possesses the same general properties as the veratrum album.

VERATRUM VIR'IDÈ, *Americ'an Hell'ebore, Sneap'p hell'ebore, Indian poke, Indian Un'cas, Poke'weed, Bear'weed, Itch'weed, Tickleweed, Earth'gall, Dev'ilbit, Wolf'bane, Pupp'et root,* is indigenous in the swampy districts of almost every part of the United States. The properties of the rhizoma are like those of the genus. It has been brought forward, however, in recent times, in the Southern States, as a powerful sedative in inflammatory diseases. Dose, eight drops of a saturated tincture, every three hours, until its sedative effects are induced.

VERBASCULUM, *Primula veris.*

VERBASCUM ALATUM, (supposed to be a corruption from *barbasicum*, 'bearded,' owing to its hairy coat; *barba*, 'a beard,' [?]) *V. thapsus—v. Album, V. thapsus—v. Collinum, V. thapsus—v. Crassifolium, V. thapsus—v. Elongatum, V. thapsus—v. Lychnitis, V. thapsus—v. Montanum, V. thapsus.*

VERBASCUM NIGRUM, *Cande'la re'gia, Thap'sus barba'tus, Tap'sus barba'tus, Cundela'ria, Lanna'ria, Black Mul'lein;* and VERBASCUM THAPSUS, *V. thapsoides seu alatum seu collinum seu album seu crassifolium seu elongatum seu lychnitis seu montanum seu simplex, Phlog'mus, Phlo'mus, Phlox, Great broadleaved or yellow Mul'lein, High Ta'per, Cow's Lung'wort, (F.) Molène, Bouillon blanc, Bonhomme, Cierge de notre dame, Herbe Saint-Fiacre. Ord. Scrophulariaceæ, Sec. Syst. Pentandria Monogynia,*—especially the latter,—have been used as emollients, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM SIMPLEX, *V. thapsus—v. Thapsoides, V. thapsus—v. Thapsus, see V. nigrum.*

VERBENA HAS'TATA, *V. paniculata, Blue ver'vain, Sim'pler's Joy,* an American species, is more bitter than the European, and said to be emetic.

VERBENA OFFICINA'LIS, *Verbena, Dichro'mus, Verbena'na, Perist'rium, Hierobo'anè, Her'ba sa'cra, Ver'vain, Pur'vain, (Prov.) Ber'bine, Juno's Tears, (F.) Verveine, Herbe à tous les maux. Ord. Verbenaceæ. Sec. Syst. Diandria Monogynia.* A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

VERBENA PANICULATA, *V. hastata.*

VERBENA URTICIFO'LIA, an indigenous spe-

cies, has been used in poisoning from *Rhus Toxicodendron.*

VERBENACA, *Verbena officinalis.*

VERBESINA ACME'LLA, (changed from *verbeua, (?) Spilanthus* *Acemella.*

VERBESINA VIRGIN'ICA, *Crown Beard.* Indigenous. *Order, Composite.* A decoction of the roots is used by the Indians as a diaphoretic and depurative.

VERCOQUIN, (*ver, 'a worm,' and coquin, 'a rascal,' Phren'tis vermino'sa.* A form of phrenitis, attributed to the presence of a worm in the brain!

VERDE'T, (from *verd, [L.] viridis, 'green,'* Cupri subacetas.

VERDIGRIS, (from [*F.] verd, [L.] viridis, 'green,' and gris, 'gray,'*) Cupri subacetas.

VERENDA, (from *vereor, 'to reverence,'*) Genital organs.

VERETUM, (from *vereor, [?] Penis.*

VÉRÉTTE, Variella.

VERGE, (from [*L.] virga, 'a rod,'*) Penis—*v. d'Or, Solidago vigaurea.*

VERGETTE DE PHILADELPHIE, *Erigeron Philadelphicum.*

VERGETTURES, (from *virga, 'a rod,'*) Vibices.

VERJUICE, *Om'phacè, Ompha'cion, Ompha'cium, (F.) Verjus, Verdjus, (verd, 'green,' and jus, 'juice.')* 'The juice of green fruits.' A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crabapples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis vinifera.*

VERJUS, Verjuice.

VERMES, (pl. of *vermis,*) Worms—*v. Cerebri, Choroid plexus—v. Intestini, see Worms.*

VERMICELLI (I), (from [*L.] vermiculus, dim. of vermis, 'a worm,'* and from its resemblance,) see *Turundæ Italicæ.*

VERMICULAIRE BRÛLANTE, *Sedum.*

VERMICULAR, (dim. of *vermis, 'a worm,'*) Vermiform. Also, wormlike; as the *vermicular* or wormlike motion of peristole.

VERMICULARIS, *Lumbricalis, Sedum.*

VERMICULI SPERMATICI, (pl. of *vermiculus, dim. of vermis, 'a worm,'*) Spermatozoa.

VERMICULUM, *Vermey'illum.* An elixir; a tincture, according to Ruland and Johnson.

VERMICULUS CAPILLARIS, 'hair worm,' *Draucunculus.*

VERMIFORM, *Vermic'ular, Vermicula'ris, Vermifor'mis, (F.) Vermiculaire, Vermiforme, (vermis, 'a worm,' and forma, 'form.')* That which resembles a worm.

VERMIFORM PROC'ESSES, *Proces'sus seu Protuberan'tia seu append'ices vermifor'mes, Vermiformis, Monticuli cerebelli, Worms, (F.) Eminences vermiformes du cerebel,* are two medullary projections at the surface of the cerebellum. The superior vermiform proc'ess, *Vermis superior cerebelli,* is an elongated projection at the anterior and middle part of the superior surface of the cerebellum; and the inferior vermiform proc'ess, *Vermis inferior cerebelli, Pyramid of Malacarne,* is a somewhat larger projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions,—the pyramid, the uvula, and the nodulus. The anterior portion of the superior vermiform process is elevated, and termed *Monticulus.*

VERMIFUGE, (*vermis, 'a worm,' and fugare, 'to drive away,')* Anthelmintic.

VERMIFUGE, MATHIEU'S. This consisted of two distinct electuaries; the one for killing, the other for expelling tapeworm. The former is

made of an ounce of *tin filings*, and six drachms of *fern root*.

VERMIFUGUS, (Vermifuge,) Anthelminthic.

VERMILION, (from *ver*, 'a worm,' the colour being like that from the cochineal insect. It also means cochineal,) Hydrargyri sulphuretum rubrum.

VERMILLO DE PROVENCE, Antimonii sulphuretum rubrum.

VERMINATIO, (from *vermis*, 'a worm,') Helminthiasis, Vermination.

VERMINATION, Helminthiasis — v. Cutaneous, Malis.

VERMINEUX, Verminous.

VERMINOUS, *Verminois*, (F.) *Vermineux*, (from *vermis*, 'a worm,') That which is caused by worms; as 'a *verminous affection*.'

VERMIS, (from *verte*, 'to wind about,' [?] see Vermiform processes — v. Bombycinus, Cornu ammonis — v. Cerebelli, Vermiform process — v. Cerebri, Fever, Hungary — v. Cucurbitinus, Tænia solium — v. Digni, Paronychia.

VERMITIO, (from *vermis*, 'a worm,') Helminthiasis.

VERNIX CASEOSA, 'cheesy varnish,' (F.) *Vernis Caséux*. The fatty varnish, or deposit, often found on the fetus, which is secreted by the sebaceous follicles of the skin.

VERNIX SICCA, 'dry varnish,' Sandarac.

VERNONIA ANTHELMINTICA, (after William Vernon, an English botanical traveller in North America,) *Ascaricida anthelmintica*, *Calag'rah*, *Calag'ri*. A plant which is indigenous in India. *Ord. Compositæ. Sex. Syst. Syngenesia Polygamia superflua*. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic in cases of ascarides and lumbrici in children.

VERNONIA NOVEBORACENSIS, *Iron weed*, *Flat top*; an indigenous plant, whose purple flowers appear in August and September, is reported to possess cathartic properties.

VÉROLE, (from *varius*, 'spotted,' [?]) Syphilis — v. *Grande*, Syphilis — v. *Grosse*, Syphilis — v. *Petite*, Variola — v. *Petite volante*, Varicella.

VÉROLÉ, Syphilitic.

VÉROLETTE, (dim. of *vérole*,) Variocella.

VÉROLIQUE, Syphilitic.

VERONICA OR VERONICA, after St. Veronica, *V. officinalis* seu *Tournefortii* seu *mas*, *Thea Germanica*, *Betonica Pauli*, *Chamædryas*, *Male Veronica*, *Fluel'lin*, *Offic'inal Speed'well*, *Eye'bright*, *Paul's Bet'ony*, (F.) *Véronique*, *Thé d'Europe*, *Herbe aux ladres*. *Ord. Scrophulariaceæ. Sex. Syst. Diantria Monogynia*. This plant was once used as a pectoral.

VERONICA AQUATICA, *V. beccabunga*.

VERONICA BECCABUNGA, *Beccabunga*, *Anagal'lis* seu *Veronica aquatica*, *La'ver Germanicum*, *Ceps'a*, *Wa'ter Pim'pernel*, *Brook'time*, *Brook'time Speed'well*, *Wa'ter Speed'well*, *Neck'weed*, *Wa'ter Pur'slain*, (Sc.) *Wa'terpu'pie*, (F.) *Véronique cressonnée*. This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous, and has been long banished from practice.

VERONICA MAS, Veronica — v. *Officinalis*, Veronica.

VERONICA PEREGRINA, *Neck'weed*, *Pur'slain*, *Speed'well*; indigenous; flowering from April to June, has been given internally in scrofulosis, and is applied as a wash to scrofulous tumours.

VERONICA PURPUREA, *Betonica officinalis* — v. *Tournefortii*, Veronica — v. *Virginica*, *Leptandra Virginica*.

VÉRONIQUE, Veronica — v. *Cresson'je*, *Veronica beccabunga*.

VERPA, Penis.

VERPUS, Circumcisis, *Medius digitus*.

VERRE, Vitrum — v. *d'Antimoine*, *Actimonii vitrum*.

VERRUCA, dim. *Verrucula*, *Ecphy'ma verrucosa*, *Phymatosis verrucosa*, an *Excrescence*, a *Wart*, (Prov.) *Wret*, (F.) *Verrue*, *Poireau*. A small, hard, mamillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA CARNOSA, *Condyloma* — v. *Formicaria*, *Formica*.

VERRUCA MINOR, *Thymion* — v. *Palpebrarum*, see *Hydatid* — v. *Pensilis*, *Acrochordon* — v. *Rhagoidea*, *Thymion*.

VERRUCA NECROGENICA. A name proposed for productions of morbid epithelium, caused, in dissecting, by the acrid fluids of the dead body.

VERRUCARIA, (from *verruca*,) *Calendula officinalis*, *Heliotropium Europæum*.

VERRUCOSE, *Warty*.

VERRUCOUS, *Warty*.

VERRUCULA, (dim. of) *Verruca*.

VERRUE, *Verruca*.

VERUQUEUX, *Warty*.

VERS, pl. of *Ver*, *Worms*.

VERSE CHARMS, see *Charm*.

VERSIO, (*vertere*, *versum*, 'to turn,') Turning — v. *Fœtus*, Turning — v. *Spontanea*, *Evolution*, *spontaneous* — v. *Uteri*, *Hysteroloxia*.

VERSION, Turning — v. *Cephalic*, see *Turning* — v. *Podalic*, see *Turning*.

VERT-DE-GRIS, ([F.] *vert*, 'green,' and *gris*, 'gray,') *Cupri subacetas*.

VERTEBRA DENTATA, 'toothed vertebra,' *Axis* — v. *Dorsi Prima*, *Lophia* — v. *Lumborum Prima*, *Asphaltites* — v. *Magna*, *Sacrum* — v. *Prœminens*, see *Vertebra*.

VERTEBRÆ, pl. of *Vertebra*, *Spon'dyl'i*, *Spondiles*, *Whel'ebones*, (F.) *Vértèbres*, (from *verte*, 'to turn,') This name has been given to the bones which by their union form the vertebral or spinal column. The vertebrae are short, thick, very angular bones, twenty-four in number, and situate one above another. The *body—centrum*, of Owen — of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibrocartilage, with the contiguous vertebrae. The *Proc'esses*, (F.) *Masses apophysaires*, of each vertebra are:—1. The *spinous proc'esses*, situate behind, and in the median line. 2. The two *transverse proc'esses*, standing off from each side. 3. The four *articular or oblique proc'esses—zygapophyses*, of Owen—two *superior*, and two *inferior*—which serve to unite the vertebrae with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of *ring* of the lateral and posterior parts of the vertebra; and the foramen within this,—that is, between the body and processes, *foramen vertebræ rachi'dium*,—concurs in forming the vertebral canal. The *arch* or *lam'ina* of a vertebra, *neurapoph'ysis*, is the part from which the several

processes project. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cer'vical*, twelve *dors'al*, and five *lum'bar*. The first cervical is called *at'l'as*; the second, *ax'is* or *vertebra den'ta'ta*; and the seventh, *vertebra pro'm'i'nens*. The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs by their articulating surfaces—*parapoph'y'ses*. The first or atlas is articulated with the occipital bone; and the last lumbar vertebra of the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

**VER'TEBRAL**, *Vertebra'lis*. That which relates or belongs to the vertebræ.

**VERTEBRAL ARTERY**, *Poste'rior cer'ebral ar'tery* (Ch.), is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Bas'ilary ar'tery*. Besides the branches sent to the neck, the vertebral artery gives off the *ante'rior* and *poste'rior spi'nal ar'teries*, and the *infe'rior cerebel'lous*, in the cavity of the cranium.

**VERTEBRAL CANAL**, see *Vertebral column*.

**VERTEBRAL COLUMN**, *Rac'his, Rho'chis, No'tus, Ane's'tis, Cari'na, C. hom'in'is, Spi'na, S. dor'si* seu *vertebra'lis, Colum'na sp'ina'lis* seu *vertebra'lis* seu *dor'si, Dor'sum, Ter'gum, Compa'ges Vertebrarum, Acan'tha, Sa'cra fistula, Hi'era Sy'rinx, Spine, Col'bone*, (Sc.) *Backsprent*, (F.) *Colonne vertébrale, Épine du dos, Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid, and hollowed by a canal called *vertebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also in the dorsal region a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *ante'rior* or *prespi'nal* surface; a *poste'rior* or *spi'nal*; two *lat'eral*; a *bas'e*; and an *a'pex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trache'lian*; in the back, *predor'sal*; and in the loins, *prelum'bar*. The dorsal surface has at its middle the spinous processes; and at its sides the *vertebral gut'ters*, (F.) *Gouttières vertébrales*, formed by the union of the *vertebral plates*, (F.) *Lames vertébrales*, which, by their junction, constitute the spinous processes. These are filled by the sacrospinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral not'ches*, (F.) *Échancrures vertébrales*. These are called *vertebral foram'ina*, (F.) *Trous de conjugaison*, and give passage to the *vertebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum, and forms with it an angle called *sacrovertebral an'gle* or *prom'on'tory*. The *a'pex* or top of the vertebral column is articulated with the occipital bone. Sometimes the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Sp'inal* or *Rachid'ian Canal*, *So'len, Cana'lis vertebra'lis* seu *medull'æ Sp'ina'lis, Spe'cus pro medull'a Sp'ina'li* seu *vertebra'lis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous,

above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *The'ca vertebra'lis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

**VERTEBRAL DISEASE**, *Rachial'gia* (of some), *Ca'ries* of the *Vertebræ, Spondylarthroc'acé, Spondyloc'acé, Kypho'sis inflammato'ria* seu *paraly'ica, Gibbos'itas cario'sa, Ca'ries vertebra'rurum, Spondylal'gia, Spondylopyo'sis, Tuberculo'sis Vertebrarum*. The spinal column is liable to distortion (see *Hump*), at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and hence it has been called by the French, *Maladie de Pott, Malum* seu *Gibbus Pott'ii, Pott's disease* or *cur'vature*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counterirritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open, and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

**VERTEBRAL LIGAMENTS**, (F.) *Ligaments vertébraux, Surtouts ligamenteux de la colonne vertébrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

**VERTEBRAL NERVE**, *Trisplanchnic*.

**VERTEBRAL NERVES**, *Sp'inal Nerves*, (F.) *Nerfs rachidiens*, spring successively from the spinal marrow, from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *ante'rior*, from the *ante'rior* or *ante'rolateral column* of the spinal marrow, and the other *poste'rior*, from the *poste'rior* or *post'rolateral column*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See *Nerves*.

**VER'TEBRATED**, *Vertebra'tus*, (F.) *Vertébré*. Provided with vertebræ.

**VERTÈBRES**, *Vertebrae*.

**VERTEBRODYMIA**, (*vertebra*, and *dy'm*, 'to mingle,') see *Somatodymia*.

**VERTEBROÏLIAC LIGAMENT**, *Ileolumbar ligament*.

**VERTEX**, gen. *Verticis, Cor'yphê, Corys, Acron'i'a, Spon'dylus*. The top or highest part or crown of the head, (F.) *Sommet*; (Sc.) *Can'tel, Now, Pal'lat, Pal'ad*. See *Sinciput*.

**VERTEX CORDIS**, *Mucro Cordis*—v. *Cubiti Oleranon*—v. *Palpitans, Fontanella*.

**VERTIBULUM**, (from *vertere*, 'to turn,') The rounded head of a bone; a joint; trepan,

VERTICULA, (from *vertere*, 'to turn,') Articulation.

VERTICULUM, Articulation.

VERTICULUS, Articulation.

VERTIGE, Vertigo.

VERTIG'INOUS, *Vertigino'sus*, (Old Eng. and Prov.) *Totty*, (F.) *Vertigineux*. Relating or pertaining to vertigo; *Gid'dy*, *Diz'zy*.

VERTIGO, gen. *Vertig'inis*, (from *vertere*, 'to turn,') *Di'nos*, *Ilin'gos*, *Di'nus* seu *Hallucina'tio* seu *Autal'gia verti'go*, *Circumgyra'tio*, *Gid'di'ness*, *Diz'ziness*, *Swim'ming of the head*, (Prov.) *Swee*, *Swim'ming*, (F.) *Vertige*, *Etourdissement*. A state in which it seems that all objects are turning round, or that the individual himself is performing a movement of gyration. Two varieties have been designated—*swim'ple verti'go*, where the objects are seen; and *scotodyn'ia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain as affected by the circulation, and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOZA, Scotodynia.

VERUGAS, (S.) (from *verruca*, 'a wart,') A peculiar disease, affecting certain localities of Peru, which manifests itself by sorethroat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of Surea, called *Aqua de Veruga*.

VERU MONTANUM, 'a mountain spit,' Gallinaginis caput.

VERVAIN, *Verbena officinalis*—v. Blue, *Verbena hastata*.

VERVEINE, *Verbena officinalis*.

VESA'NIA, *Vesania*, (from *ve*, negative, and *sanus*, 'sound,') 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term, under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and some even hydrophobia. See Nosology.

VESANIA MANIA, Mania.

VESANLE, Insanity, *Vesania*.

VESICA, 'a bladder,' Urinary bladder—v. Biliaria, Gallbladder—v. Cordis, see Pericardium—v. Felleæ, Gallbladder—v. Intestinalis, Vesicula umbilicalis—v. Natatoria, Airbladder—v. Prostatica, see Ejaculatory ducts—v. Saccata, Cystostenochochia—v. Urinaria, Urinary bladder.

VESICÆ IRRITABILITAS, Cysterethismus—v. Unguinose tendinum, *Bursæ mucosæ*.

VESICAL, *Vesical'is*, (F.) *Vésical*, (from *vesica*.) That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesicoprostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL GLANDIA, see Spermatic Ganglion—v. Ligaments, see Urinary bladder—v. Oxyd, Oxyd, cystic—v. Triangle, see Urinary bladder.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, (from *vesica*.) Blister.

VESICARIUM, Ovarium.

VESICA'TION, *Vesica'tio*, (from *vesica*.) The action of a vesicant. The formation of blisters

VÉSICATION VOLANTE (F.), 'a flying vesication.' A temporary vesication produced by art.

VÉSICATOIRE, Blister—v. *Magistral*, Blister, *magistral*—v. *Volant*, see Blister.

VESICATORIUM, Blister.

VESICLE, (dim. of *vesica*.) Vesicula—v. Allantoid, Allantois—v. Blastodermic, see Molecule—v. Cowpox, see Vaccination.

VESICLE OF BAER, *Vesicula Baerii*, (F.) *Vésicule de Baer*. The ovule in the follicle of De Graaf; which was well described by Baer in 1827.

VESICLE OF DEVELOPMENT, *V. of Evolution*. A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, *V. of Development*—v. Germinal, see Molecule—v. Purkinjean, see Molecule—v. Umbilical, Vesicula umbilicalis—v. Valentinian, see Molecule—v. Wagner's, see Molecule.

VESICLES, ASCHERSO'NIAN. When fluid fat and fluid albumen are shaken together, the resulting fat globules become surrounded by an albuminous layer. The vesicles, thus formed, are called after Ascheron, their describer.

VESICLES OF DE GRAAF, Folliculi Graafiani—v. Lung, see Pulmo—v. Malpighian, Cellule, bronchic, see Pulmo—v. Seminal, Vesiculae seminales.

VESICOCE'LE, (*vesica*, 'a bladder, and κηλη, 'a rupture,') Cystocèle.

VESICOPROSTATIC, see Vesical.

VESICOÛRACHAL, *Vesi'coûracha'lis*. Relating or appertaining to the bladder and urachus, —as a 'vesicoûrachal fistula.'

VESICOÛTERINE, *Vesi'coûteri'nus*. Appertaining, or relating, to the bladder and uterus.

VESICOÛTERINE FOLDS, see Uterus.

VESICOVAG'INAL, *Vesi'coragina'lis*, *Vag'linoves'ical*, *Ûrinovag'inal*. Relating to the bladder and the vagina; as *vesicovaginal fistula*.

VESIC'ULA, *Cyst'inx*, *Ves'icle*, *Blis'ter*, (F.) *Vésicule*, (dim. of *vesica*.) A small bladder or cyst.

VESICULA, *Ves'icle*, *Ec'phlyis*, *Cyst'inx*, *Pomphus*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearlecoloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ENIGMATOSA, Vesicula umbilicalis—v. Alba, Vesicula umbilicalis—v. Bilis, Gall bladder—v. Blastodermatica, see Molecule—v. Blastodermica, see Molecule—v. Chyli, Receptaculum chyli—v. Erythroidea, Erythroid vesicle—v. Fellis, Gallbladder—v. Gangranescens, see Anthrax—v. Germinativa, see Molecule—v. Omphalomesenterica, Vesicula umbilicalis—v. Ovalis, Vesicula umbilicalis—v. Prolifera, see Molecule—v. Prostatica, see Ejaculatory ducts.

VESICULA UMBILICA'LIS, *V. alba* seu *om'phalomesenter'ica* seu *œnigmat'osa* seu *oval'is*, *Ves'ica intestinal'is*, *Vitellic'ulus*, *Umbilic'al or Intestinal Ves'icle*, *Vit'elline Pouch*, *Vitel'licle*, (F.) *Vésicule ombilicale*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vit'elline ped'icle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow,—*Ductus om'phalomesenter'icus* seu *vitellointestinal'is* seu *vitellar'ius*, *Vit'elline Duct*. Its arteries are the omphalomesenteric. The Vit'

*ellinc fluid*, contained in the vesicle—in the *Vitelline* or *Yolk membrane*—has been compared, from analogy, to the *vitel'lus* or *yolk* of birds; and, like it, is an oleaginous and albuminous substance, which is inservient to the nutrition of the embryo.

VESIC'ULÆ, pl. of *vesicula*, constitute the 6th order of Bateman's classification of *Cutaneous Diseases*.

VESICULÆ, see Villous membranes, *Vesiculæ aereæ*, *Cellules*, *bronchicæ*—v. *Bronchicæ*, *Cellules*, *bronchicæ*—v. *Divæ* *Barbaræ*, *Variola* *confluens*—v. *Gingivarum*, *Aphthæ*—v. *Graafiana*, *Folliculi* *Graafiani*—v. *Malpighianæ*, *Cellules*, *bronchicæ*—v. *Pulmonales*, *Cellules*, *bronchicæ*—v. *Rotundæ* *cervicis* *uteri*, *Nabothi* *glandulæ*—v. *Sanguinis*, *Globules* of the blood.

VESICULÆ SEMINA'LES, V. *Semina'riæ* seu *spermat'icæ*, *Cap'sulæ* *seminal'es*, *Conceptac'ula* *seminal'ia*, *Gonocyst'ides*, *Spermatocyst'ides*, *Seminal' ves'icles*, (F.) *Vésicules séminales*, *Gardouches*, *Greniers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with it. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their posterior extremity or fundus terminates by a round cul-de-sac. Their anterior extremity or neck is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESICULÆ SEMINALES MULIERUM, *Nabothi glandulæ*—v. *Spermat'icæ*, *Vesiculæ* *seminales*.

VESIC'ULAR, *Vesicularis*, (F.) *Vésiculaire*. Of or belonging to a vesicle:—full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular*. See *Cortex cerebri* and *Neurine*.

VESICULAR FEVER, *Pemphigus*.

VESICULE, *Vesicula*—v. *Biliare*, *Gallbladder*—v. *du Fiel*, *Gallbladder*—v. *Germinative*, see *Molecule*—v. *Ombilicæ*, *Vesicula* *umbilicalis*—v. *Ovulifère*, see *Folliculi* *Graafiani*.

VESICULÆ DE DE GRAAF, *Folliculi* *Graafiani*—v. *de Naboth*, *Nabothi* *glandulæ*—v. *de Sainte Barbe*, *Variola* *confluens*—v. *Séminales*, *Vesiculæ* *seminales*.

VESIC'ULOUS, *Vesiculo'sus*, (F.) *Vésiculéux*, (from *vesica*.) Shaped like, or characterized by, vesicles.

VESIC'ULOTYMPANIT'IC, *Vesiculotympanit'icus*. An epithet for a sound or resonance heard on percussion, which consists of the vesicular and tympanitic sounds combined. It occurs, according to Dr. Flint, when the parenchyma of the lungs is incompletely solidified.

VESPA, *Wasp*.

VESSEL, *Vas*, *Vasum*, dim. *Vasculum*; *Ang'ion*, *Ang'us*, *Conceptaculum* ([L.] *vas*, *vasculum*.) (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery*, *Vein*, and *Lymphatic*. See, also, *Vascular*.

VESSELOUP, 'wolf fizzle,' *Lycoperdon*.

VESSIE, (from *vesica*, 'a bladder,') *Urinary bladder*—v. *Col de la*, *Collum* *vesicæ*—v. *Nataivoie*, *Airbladder*.

VESSIE A COLONNES, see *Urinary bladder*.

VESIB'ULAR, *Vesibularis*, (F.) *Vesibulaire*. Relating or appertaining to a vestibule.

VESIBULAR NERVE, see *Auditory nerve*.

VES'TIBULE, *Vestibulum*, 'from *vestio*, 'to

clothe or cover.')

The porch or entrance to a house.  
VESTIBULE, *Vestibulum*, V. *Vag'inae*, *Prona'us*, *A'trium* *Vag'inae*, *Am'bitus* *genital'is* *mul'iebris*, is a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages—to the urethra above, and to the vagina below.

VESTIBULE OF THE EAR, *Vestibulum*, V. *labyrinthi*, (F.) *Vestibule*. A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined by a particular membrane, and contains the liquor of Cotunnus and branches of the auditory nerve. There is also another membrane, constituting the membranous vestibule, but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other—the *sacculus* *vestibuli*, and the *sacculus*. There are three contiguous cavities in the vestibule; one of which, the *semi'val*, is situate above; another, the *hemispher'ical*, below; and the third, or *sulciform*, which is the orifice of the aquæductus vestibuli, behind.

VESTIBULUM LABYRINTHI, *Vestibule* of the ear—v. *Vaginae*, *Vestibule*.

VESTIGE (F.) *Vestig'ium*, 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestigies* of what they are in certain animals.

VESTIGIUM, *Sole*, *Vestige*—v. *Foraminis ovalis*, *Ovalis fossa*—v. *Pedis*, *Metatarsus*.

VESTIMENTUM, *Vestitus*.

VESTITUS, *Vestimentum*, *Esthe'na*, *Esthe'sia*, *Res* *vestia'ria*, *Vest'ment*, *Clo'thing*, *Dress*, *Ves'ture*, (F.) *Vêtement*, (from *vestire*, *vestitum*, 'to clothe.')

Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded—the darkest hues transmitting solar heat most readily through them. It has been found that the same rule applies to odours—the darker colours retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bedclothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

VESTMENT, *Vestitus*.

VESTURE, *Vestitus*.

VETA, *Puna*.

VÊTEMENT, ([L.] *Vestimentum*.) *Vestitus*.

VETERANA, *Rubeola*.

VETERINARIUS, see *Hippiater* and *Veterinary*.

VET'ERINARY, *Veterinari'us*, (F.) *Vété'rinaire*, (from *veterinus*, 'that which bears burdens;' itself, perhaps, from *vehiterinus*, from *vehere*, 'to carry.')

That which appertains to beasts of burden: hence, *veterinary surgeon*, (see *Farrier*.) *veterinary college*, *veterinary medicine*, &c.

VETERINARY ANATOMY, see *Anatomy*.

VETERINARY ART, *Ars* seu *Medici'na* *veterinari'a*, *Zoö'iasis*, *Zoiatri'a*, *Theriat'rica*, *M'lonedici'na*, *Zoötherapi'a*, *Zoötherapeut'icæ*, *Ars* *zoiat'*

*vica, Farriery.* The art of treating the diseases, &c., of cattle.

**VETERNOSITAS**, (from *veternus*, 'aged;,' because old persons are subject to somnolency,) *Coma vigil*.

**VETERNUS**, *Coma vigil*.

**VÉTIVER**, *Andropogon muricatus*.

**VETIVERIA ODORATA**. *Andropogon muricatus*.

**VETTIVERT**, *Andropogon muricatus*.

**VETTONICA**, (after the *Vettones* of Spain,) *Betonica officinalis*.

**VETULA**, *Sacrum*.

**VETYVER**, *Andropogon muricatus*.

**VEXILLA** (pl. of *vexillum*) **TUBARUM FALLOPII**, see *Tube*, *Fallopian*.

**VEXILLUM**, 'a flag,' *Drapeau*.

**VIA**, Way — *v. Curandi*, *Ratio medendi* — *v. Stomachi et ventris*, *Œsophagus*.

**VIABILITY**, see *Viable*.

**VIABLE**, *Viables*, (from *vita*, [F.] *vie*, 'life,' and *habilis*, 'able,') A word introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable*. Anencephali have lived ten or twelve days, yet they are not *viable*. The older the fœtus, the more *viable* is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is *viable*.

**VIE** (pl. of *via*) **CHYLIFERÆ**, *Chyliferous vessels*.

**VIE CLANDESTINÆ**, *Clandestine Passages*. Supposititious secret ways or passages or 'royal roads,' to account, for example, for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

**VIE EXTRAORDINARIÆ LACTIS**, *Galactoptania* — *v. Lacrymales*, *Lachrymal passages* — *v. Primæ*, *Ways, digestive* — *v. Secundæ*, *Ways, second*.

**VIAL**, *Phiala*.

**VIANDES FAISANDÈES**, ([L.] *vivenda*, from *vivere*, 'to live,') see *Hyposaprus*.

**VIBICES**, (pl. of *vibex*, 'the mark of a stripe,') *Mol'opos*, *Stri'is*, (F.) *Vergettures*. Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

**VIBRAMEN**, (*vibrare*, 'to quiver,') *Oscillation*.

**VIBRANS**, *Vibratory*.

**VIBRATILE**, (from *vibrare*, *vibratum*, 'to quiver,') *Vibratory*.

**VIBRATILITY**, *Vibratilitéas*, (F.) *Vibratilitéé*. Capability of being thrown into vibration.

**VIBRATIO**, *Oscillation*, *Vibration* — *v. Cardiacæ*, *Palpitation* — *v. Cordis*, *Palpitation*.

**VIBRATION**, *Vibratio* — *v. Pectoral*, see *Frenitus* — *v. Tactile*, see *Frenitus* — *v. Tussive*, see *Tussive*.

**VIBRATIONS OF SOUND**, see *Sound*.

**VIBRATOR**, *Deferens vas*.

**VIBRATORY**, *Vibrans*, *Vibrative*, (F.) *Vibratile*, *Vibratoire*. An epithet applied to the pain that accompanies some neuralgic, which seems to the patient to vibrate among the nerves.

**VIBRATORY MOTION**, see *Cilia*.

**VIBRATUS**, *Oscillation*.

**VIBRIO**, gen. *Vibrio'nis*, (from *vibrare*, 'to quiver,') A genus of infusory animalcules, of which different species are met with, — for example, *Vibrio prolifer* in almost all putrescent fluids containing protein, and in the pus of chan-

res; in which last the *V. line'ola* has likewise been found.

**VIBRIS'Æ**, (from *vibrare*, 'to quiver,') The hairs which grow at the entrance of the nostrils and of other apertures. In the feline tribe, the whiskers.

**VIBURNUM ACERIFOLIUM**, *Ma'ple-leaved Ar'rowwood*, (from *viere*, 'to bind;,' several species having long flexible twigs.) *Dockmackie*; *Ord. Caprifoliaceæ*. A plant used by the Indians, and afterwards by the Dutch, as an external application to tumours.

**VIBURNUM CASSINOIDES**, *Ilex Paraguensis*.

**VIBURNUM DENTA'TUM**, *Ar'row Wood*, *Meal'y Tree*, *Tily* of the Indians. *Ord. Caprifoliaceæ*. A high indigenous shrub, of the same family as *V. lentago*; the bark of which has been used by the Indians as a diuretic.

**VIBURNUM EDU'LE** flourishes in the Hudson's Bay territory. The fruit has an orange colour, and is less acid, more fleshy, and more agreeable to the taste than the cranberry.

**VIBURNUM LÆVICATUM**, *Ilex Paraguensis*.

**VIBURNUM LENTA'GO**, *Sweet Vibur'num*, *Nann'y-berry*. A handsome indigenous tree, which flowers in May and June. It has been used as an antiperiodic.

**VIBURNUM PRUNIFOLIUM**, *Black How*, *Sloe-leaved Viburnum*, *Sloe*. Indigenous: flowering in May. The leaves have been used as tea.

**VIBURNUM**, *SLOWLEAVED*, *V. prunifolium* — *v. Sweet*, *V. lentago*.

**VIC-LE-COMPTÉ**, **MIN'ERAL WATERS OF**. *Vic-le-Compte* is a small village in the department of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

**VICARIOUS**, *Vica'rius*, (from *vicis*, 'change,') Taking the place of another: — as 'vicarious secretion,' *Secre'tio vica'ria*; a secretion which takes place in one part instead of another.

**VICAR'S BRAY**, **MIN'ERAL WATERS OF**. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone. The water is one of the strongest chalybeates known.

**VICE**, (*vitium*, 'a defect,' 'a fault,') *Cacosis* — *v. Secret*, *Masturbation*.

**VICE DE CONFORMATION**. Faulty formation of a part of the body.

**VICHY**, **MIN'ERAL WATERS OF**. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c. The season is from the 15th of May to the 15th of September.

**VICHY WATER**, **FACTIT'IOUS**, *A'qua Vicien'sis*, (F.) *Eau de Vichy*, is made of simple *Acidulous water*, impregnated with twice its bulk of *Carbonic acid*,  $\frac{3}{4}$ xxss; *Subcarbonate of soda*, gr. xxxij; *Sulphate of soda*, gr. xvj; *Chloride of sodium*, gr. iv; *Subcarbonate of magnesia*, gr. ss; *Chloride of iron*, gr.  $\frac{1}{2}$ . *Mix. Ph. P.*

A **VICHY WATER POWDER**, (F.) *Poudre pour Eau de Vichy*, is made as follows:—*Sodæ bicarb.* 5 gram.; *Sodii chlorid.* 20 centigram.; *Sodæ sulph.* 50 centigram.; *Magnes. sulph.* 15 centigram.; *Ferri sulph.* 1 centigram.; *Aquæ*, 625 gram. *Mix.* To render it gaseous, add *Acid. citric*, 3 gram.

**VICIA ERVILIA**, *Ervum*.

VIC'IA FA'BA, Fa'ba, F. ma'jor seu vulga'ris, Or'obus fa'ba, Com'mon Gar'denbean, (F.) Fève ou Fève des marais. Ord. Leguminosæ. Ser. Syst. Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINIRACTUS, (vicinus, 'near,' and trahere, tractum, 'to draw,') Erysipelas.

VICINITRAHA, Erysipelas.

VICIS'SITU'DE, Vicissitu'do, (from vicis, 'change,') Constant change. The vicissitudes of the atmosphere, as regards its barometric, thermometric, and hygrometric condition, have to be guarded against by the delicate; and yet, by the new impressions they produce, they are probably a cause of the greater mental and corporeal activity of the inhabitants of the temperate regions of the globe.

VICTORIALIS FEMINEA, Gladiolus vulgaris—v. Longa, Allium victorale—v. Rotunda, Gladiolus vulgaris.

VICTUS RATIO, 'order of victuals,' (from vivere, victum, 'to live,') Dietary.

VIDANGES, (from rider, 'to empty,') Lochia.

VIDIAN CANAL, (after Vidus Vidius,) Pterygoid canal—v. Nerve, Pterygoid nerve.

VIE, (from vita,) Life—v. Durée de la, see Longevity—v. Moyenne, see Longevity.

VIEILLE'SSE, (from [L.] vetulus, 'an old person,') Senectus.

VIELLOTE, Colchicum autumnale.

VIENNA PASTE AND POWDER, see Powder, Vienna.

VIERGE, ([L.] virgo,) Virgin.

VIF ARGENT, 'quicksilver,' Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, (from vigil, 'on the watch,') Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILLE, Egregorsis—v. Nimix, Coma vigil.

VIGILIUM, Egregorsis.

VIGNE, ([L.] vinea,) Vitis vinifera—v. Blanche, Bryonia alba—v. de Judée, Solanum dulcamara—v. du Nord, Humulus lupulus—v. Tierge, Bryonia alba.

VIGNETTE, (dim. of vigne,) Spiræa ulmaria.

VIGNOLE, ([L.] vinea, 'vine,') Mercurialis.

VIGOR, 'activity, force,' Acme.

VIL'LA FRANCA, CLI'MATE OF. This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and northwest winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, (pl. of villus, 'a tuft of hair,') see Villous membranes.

VILLOSITÉS, see Villous membranes.

VILLOUS, Villo'sus, (F.) Villeux, (from villus, 'a tuft of hair,') Furnished with villi.

VILLOUS MEMBRANES OR COATS, Velamen'ta Bombyc'ina, (F.) Membranes villosæ, Membranes veloutés, are such as are covered with fine delicate prolongations, Papillæ or Vil'li, Flocc'i, Flocc'uli, Vesic'ulæ, Cylin'dri, Tu'bi Membrana'cei, (F.) Villosités, constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name simp'le vil'loous mem'branes to the serous membranes; and that of com'plicated or follic'ular vil'loous mem'branes to the mucous membranes.

VIN, ([L.] vinum,) Wine—v. de Bordeaux, Claret—v. de Poulet, see Poulet—v. de Quinquina composé, Vinum de kinâ kinâ compositum—v. Rouge d'Oporto, Vinum Portugallicum—v. Sec, Sack.

VINAIGRE, (vin, 'wine,' and aigre, 'sharp or sour,') Acetum, see Aceticum acidum—v. Aromatique, Acetum aromaticum—v. de Bois, Pyrologneous acid—v. Distillé, Aceticum acidum dilutum—v. de Quatre couleurs, Acetum aromaticum—v. Scillitique, Acetum scillæ.

VINAIGRES MÉDICINAUX, Acetia.

VIN'CA MI'NOR, F. pervin'ca, (from vincio, 'I bind,' because of its usefulness in making bands [?].) Clem'atis daphnoi'des ma'jor, Les'ser per'vein'kle, (F.) Pervenche, Violette des Sorciers. It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, (vincere, 'to overcome,' and toxicum, 'poison,') Asclepias vincetoxicum.

VINCTURA, (vincire, vinctum, 'to bind,') Fascia.

VINCULA (pl. of vinculum) ACCESSORIA. On the theæ of the fingers several small tendinous fasciuli are seen, which pass between the phalanges and the edges of the tendons, and are so called.

VINCULUM, (vincire, vinctum, 'to bind,') Bandage, Fascia, Lien—v. Caninum, Frænum penis—v. Lingua, Frænum linguæ—v. Præputii, Frænum penis—v. Umbilicale, Funiculus umbilicalis.

VINE, ([L.] vinea,) Vitis vinifera—v. Grape, Vitis vinifera—v. Poison, Rhus radicans—v. Wild, Pareira.

VIN'GAR, (F.) Vinaigre, (itself from vin, [L.] vinum, 'wine,' and aigre, [L.] acris, 'sharp or sour,') Acetum—v. Aromatic spirit of, see Aceticum acidum.

VINEGAR OF CANTHARIDES, Acetum cantharidis.

VINEGAR, COMMON, Acetum—v. Distilled, see Aceticum acidum—v. Estragon, see Artemisia dracunculæ—v. Marseilles, Acetum aromaticum.

VINEGAR OF MEADOW SAFFRON, Acetum colchici—v. of Opium, Gutta nigra.

VINEGAR, RADICAL, Aceticum acidum.

VINEGAR OF SQUILLS, Acetum scillæ—v. of the Four Thieves, Acetum aromaticum.

VINEGAR, THIEVES', (so called, because, under its use, four thieves—it was said—plundered, with impunity, the bodies of those dead of the plague in London [?],) Acetum aromaticum—v. Whey, see Acetum.

VINEGAR OF WOOD, see Aceticum acidum.

VINETTE, Rumex acetosa.

VINETTIER, Oxyacantha Galeni.

VINEUX, Vinous.

VINOLENTA, (from vinum,) see Temulentia

VINOLENTIA, Temulentia.

VINOSUS, Vinous.

VINOUS, Vino'sus, Œnoï'des, (F.) Vineux, (from vinum,) Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, (vino's,) Wine, Sherry wine. See Wine. A medicinal wine, (F.) Vin médicinal, Onolè, Onolatire.

VINUM ABSINTH'ITES, Wine of Worm'wood. (Fol. absinth. exsic., Absinth. Pontic., āā ʒvj, Vini adbi Oiv. Macerate for 24 hours, and strain. Ph. P.) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADESTUM, Brandy—v. Album, Sherry wine (Ph. U. S. 1851), see Wine—v. Album Hispanicum, see Wine—v. Album, Montanum, see Wine.

VINUM ALOËS, V. aloës Socotori'næ seu aloët'icum seu aro'moalôët'icum, Tinctu'ra h'era, Tinctu'ra sa'era, Wine of Aloës. (Aloës in pulv. ʒj, Cardam. cont., Zingib. cont., āā ʒj; Vini alb. Oj. Macerate for 14 days, and filter. Ph. U. S.) Pur-

gative and stomatic, according to the dose. Dose, fʒj to fʒij.

VINUM AMARUM, V. Gentianæ comp.—v. Amarum scillicetum, &c., v. diureticum amarum—v. Amarum cum spiritu vini, v. gentianæ compositum—v. Antimoniale, v. antimonii tartarizati—v. Antimoniatum Huxhami, v. antimonii tartarizati—v. Antimonii potassio-tartratis, v. antimonii tartarizati.

VINUM ANTIMONII, V. antimonii tartarizati seu tartaricis antimonii seu antimonii potassio-tartratis seu benedictum seu stibiatum seu stibiatum Huxhami seu antimoniatum seu antimoniatum Huxhami seu antimoniatum seu emeticum, *Essentia antimonii seu stibii, Aque benedicta Rulandi, Solution of tartarized antimony, Antimonial wine, (Ant. et Potass. tart. gr. xxxij, Aq. destillat. bullient. fʒij, Vini albi, q. s. Dissolve the tartarized antimony in the distilled water, and while hot add the wine to make a pint. Ph. U. S. 1863.)* Each fluidounce contains two grains of the tartar.

The ordinary *Antimonial wine* was formerly made with *Glass of antimony*, ʒj, *Sherry*, Oiss.

*Ward's Red Drop* consists of a strong vinous solution of tartarized antimony.

VINUM ANTISCORBUTICUM, *Antiscorbutic wine. (Rad. armoracis recent, ʒj, Fol. cochlearis recent, Nasturtii aquaticæ, Trifol. aquaticæ, Semin. sinap., āā ʒss, Ammoniac muriat. ʒij, Vin. albi Oij. Macerate for 36 hours; filter, and add Tincturæ cochlear. ʒss. Ph. P.)* Stimulant and tonic. Dose, fʒss to fʒij.

VINUM AROMATICUM, *Aromatic wine. (Species aromaticæ, ʒiv, Vin. rubr. Oij. Macerate for 6 days and filter. Ph. P.)* Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMALOETICUM, V. aloes—v. Benedictum, v. antimonii tartarizati.

VINUM CAMPAÑUM, V. *Campanæcum*. Champagne wine. A well-known sparkling wine of France. See Wine.

VINUM CANARINUM, see Wine—v. Chalybeatum, v. ferri—v. Cinchonæ compositum, v. de kinâ kinâ comp.

VINUM COLCHICI, V. *Colchici Radicis, Wine of Colchicum, Want's Eau d'Huison. (Colchic. rad. bene contus. lbj, Vini albi. Oij. Macerate for 24 days, with occasional agitation, and then express strongly, and filter. It may also be prepared by displacement. Ph. U. S.)* Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gt. 40 to fʒj.

*Reynold's Specific* for gout and rheumatism consisted of the fresh bulb of *Colchicum*, ʒviiij, *Sherry wine*, fʒxvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with *Syrup of poppies*, and flavoured with *Rum*. Reynolds is said to have killed himself by taking an over-dose of it.

VINUM COLCHICI RADICIS, V. colchici.

VINUM COLCHICI SEMINIS, *Wine of Colchicum seed. (Colchic. sem. cont. ʒiv; Vini albi. Oij. Macerate for 14 days, with occasional agitation, then express and filter. Ph. U. S.)* Dose, fʒj to fʒij.

VINUM CREMATUM, Brandy.

VINUM DIURETICUM AMARUM, V. amarum scillicetum compositum in Charitatis Nosocomio usurpatum, *Bi'ter diuretic wine. (Cort. cinchon., C. Winteran., Limon., āā ʒij, Rhi toxicodendr., Scillæ Cæmin., Angelicæ, āā ʒss, Fol. absinth., Melissa, āā ʒj, Baccor. junip., Macis, āā ʒss, Vin. albi. Ovij. Macerate and filter. Ph. P.)* Stimulant, tonic, and diuretic. Dose, fʒss to fʒiss.

VINUM EMETICUM, V. antimonii tartarizati.

VINUM ERGOTE, *Wine of Ergot. (Ergote cont., ʒiv; Vini albi. Oij. Macerate for 14 days, with occasional agitation; then express and filter. It may be prepared, also, by displacement. Ph. U.*

*S.)* Dose, ℥xx to fʒj to produce the peculiar effects of ergot.

VINUM FERRATUM, V. Ferri.

VINUM FERRI, V. *Chalybeatum seu ferratum seu Martiatum seu Martis, Tinctura Martis vino'sa seu Martis cum vino, Steel wine, Wine of Iron. (Iron wire, ʒj; Sherry wine, Oij (Imp. meas.). Digest for thirty days and filter. Ph. L.)* Tonic. Dose, fʒj to fʒiv.

It is sometimes made by adding two pints of Wine to two ounces of Iron filings; macerating and filtering.

VINUM GENTIANÆ, V. G. *Compositum seu Amarum seu Amarum cum spiritu Vini, Infusum amarum vino'sum. Compound wine of gentian, Wine bit'ters. (Rad. gentian. luteæ, ʒss, Cort. cinchon. offic. ʒj, Cort. aurant. ʒij, Canellæ alb. ʒj. Alcohol. dilut. fʒiv, Vini albi. Hispanicæ. Oijss. Ph. E.)* Dose, fʒj to fʒjv.

VINUM HIPPOCRATICUM, Claret—v. Hispanicum, Vinum, see Wine—v. Hordeaccum, Cerevisia—v. Hydatodes, see Hydatoid.

VINUM IPECACUANÆ, *Ipecacuanha wine. (Ipecacuan. cont. ʒij, Vini albi. Oij.)* Macerate for 14 days, express, and filter. It may be prepared, also, by displacement. Ph. U. S.) Emetic and diaphoretic. Dose, as an emetic, fʒiv to fʒx.

VINUM DE KINĀ KINĀ COMPOSITUM, V. *Cinchonæ compositum, Compound bark wine, (F.) Vin de quinquina composé, (Cort. cinchon. pulv. lbss, Quassia, Cort. Winteran., Cort. aurant. sic. āā ʒss, Alcohol. (12° to 22° Beaumé) Oj. Macerate for 24 hours; and add Vini albi, Oij. Macerate for four days, and filter. Ph. P.)* Tonic, febrifuge, and stomatic. Dose, fʒss to fʒij.

VINUM MARTIATUM, V. Ferri—v. Martis, V. ferri—v. Medicatum, see Claret.

VINUM MEDICINALE, *Medicated Wine. Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicines employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures, but old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines. See Vinum.*

VINUM MERMURACERATUM—v. Nicotianæ tabaci, V. tabaci—v. Opiatum fermentatione paratum, *Laudanum abbatii Rousseau.*

VINUM OPII, V. de Opio compositum, *Laudanum liquidum Sydenhami seu Hoffmani, Tinctura Thebaïca, Wine of Opium, Syd'enhams Laudanum, Ford's laudanum, (Opii in pulv. ʒij; Cinnam. cont., Caryophyll. cont. āā ʒj, Vini albi, Oj. Macerate for 14 days; express and filter. It may be made, also, by displacement. Ph. U. S.)* Narcotic. Dose, gt. xv to fʒj.

VINUM DE OPIO COMPOSITUM, V. opii—v. Picatum, *Pissites.*

VINUM PORTUGALICUM, V. rubrum, (Ph. U. S. 1851.) V. *Porten'se*, (Ph. U. S. 1863.) (F.) *Vin rouge d'Oporto.* Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States, but greatly used in England.

VINUM QUINIE, *Wine of Quinia. (Wine, lbij, Sulphate of quinia, gr. x. Mix.)* Dose, fʒiss or more; according as it is used as a stomatic, or to arrest ague. A *Vinum Cinchoniz* may be made in the same way.

VINUM RHABARBARI, V. rhei palmati.

VINUM RHEI, V. R. palmati, V. *Rhabarbari, Tinctura Rhabarbari Vinosâ, Elix'ir Rhei dulcè, E. R. Compositum, Rhu'barb Wine. (Rhei cont. ʒij, Canellæ cont. ʒj, Alcohol. dilut. fʒij, Vini albi, ʒxiv. Macerate for 14 days; express, and filter. It may be made, also, by displacement.*

*Ph. U. S.*) Laxative and stimulant. Dose, fʒiv to fʒiiss.

VINUM RHEI PALMATI, V. Rhei—v. Rhenanum, see Wine—v. Rubrum, V. Portugallicum—v. Rubrum Portugallicum, see Wine—v. Stibiatum, V. Antimonii.

VINUM TABACI, *Vinum Nicotiana Tabaci, Tobacco Wine.* (*Tabac. incisi*, ʒj, *Vini albi*, Oj. Macerate for 14 days; express and filter. *Ph. U. S.*) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not much used. Dose, gtt. xx to xxxvj.

VINUM VERATRI, V. V. *albi*, *Wine of White Hellebore.* (*Veratri cont.* ʒiv; *Vini albi*, Oj. Macerate for 14 days, express and filter.—*Ph. U. S.*) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALBI, V. Veratri—v. Xericum, see Vinum.

VIOLA, (from *violare*, 'to defile,') Stuprum.

VIOLA, (after *Ion, ων*, 'the violet,') *V'iola odora'ta seu mar'tia, P'on, M'atrona'lis, Viola'ria, Sweet V'iolet, (F.) Violette à bouquets, V. odorante.* Ord. Violacæ. The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANINA, V. *sylvestris, Dog V'iolet.* The root of this plant is emetic and cathartic. Dose, ʒj.

VIOLA IPECACUANHA, see Ipecacuanha—v. Lutea, Cheiranthus cheiri—v. Martia, Viola—v. Odorata, Viola—v. Palustris, Pinguicula vulgaris.

VIOLA PEDA'TA, *V'iola (Ph. U. S.)* This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA SYLVESTRIS, V. Canina.

VIOLA TRICOLOR, *Jac'e'a tri'color, Her'ba seu Flos Triu'italis, Heart's ease, Paw'sy, Pen'sy, Paw'sies, Johnny Jumper, (Prov.) Beedy's eyes, Bid-dy's eyes, (F.) Pensée, P. sauvage.* A decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, Viola.

VIOLET, Viola—v. Dog, Viola canina—v. Dog's Tooth, Erythronium Americanum.

VIOLET BLOOM, Solanum dulcamara.

VIOLET, SWEET, Viola.

VIOLETTE À BOUQUETS, Viola—v. *Odorante, Viola—v. des Sorciers, Vinca minor.*

VIOLIER JAUNE, Cheiranthus cheiri.

VIORNA, Clematis vitalba.

VIPER, EGYPTIAN, (see Vipera,) Asp. — v. Ten inch long, Echidna ocellata.

VIPER GRASS, Scorzonera.

VIPERA, ([L.] *vipe'ra*, for *vivip'ara*, from *vivus*, 'alive,' and *pario*, 'to bring forth,') Coluber berus.

VIPERARIA, (from *vipera*,) Aristolochia serpentaria, Scorzonera.

VIPERINA VIRGINIANA, (from *vipera*,) Aristolochia serpentaria.

VIPÉRINE DE VIRGINIE, Aristolochia serpentaria.

VIPER'S DANCE, Chorea.

VIR, gen. *V'iris*, 'a man,' Aner, Penis—v. Ef-fœminatus, Gynœcaner.

VIRA, Woman.

VIRAGO, (from *vir*, 'a man,') see Pogoniasis.

VIREUX, Virous.

VIRGA, 'a rod,' Penis—v. Cereæ, *Bougie*—v. Cerebri, Pineal gland.

VIRGILIA, (after the poet Virgil,) Cladrastis tinctoria.

VIR'GIN, *Vir'go*, gen. *Vir'ginis, Par'thenus, Ex'pers nuptia'rum, (F.) Vierge, Pucelle.* A female who has never had sexual intercourse. Ap-

plied, also, occasionally to the male so circum-stanced.

VIRGIN MARY THISTLE, *Centaurea benedicta.*

VIR'GINAL, (from *virgo*.) The external genital organs, of the virgin especially.

VIRGINAL MEMBRANE, Hymen.

VIRGINALE CLAUSTRUM, 'a virginal fence,' Hymen.

VIRGIN'IA, MIN'ERAL WA'TERS OF. There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two Thermal springs are in Bath county. The Warm Spring, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The Hot Spring is a few miles from the warm. Its temperature is 107°. They are both slightly sulphureous. The Sweet Springs are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The White Sulphur, as well as the Red Sulphur, and Salt Sulphur Springs, are also much visited. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. Prof. W. B. Rogers analyzed the water of the White Sulphur, and found it to be composed as follows:—Gaseous contents in a wine gallon; Sulphuretted hydrogen, 2.5 cubic inches, carbonic acid, 2; oxygen, 1.448; nitrogen, 3.552.—Total, 9.5. Solid contents in a pint; sulphate of magnesia, 5.588 grains; sulphate of lime, 7.744; carbonate of lime, 1.150; chloride of calcium, 0.204; chloride of sodium, 0.180; oxide of iron, a trace; loss, 0.410. Total, 15.276 grains.

The Rock'bridge Alum Springs are situated 17 miles west of Lexington, and are in much favour. Their solid constituents are said to be,—sulphate of potassa, 1.765 gr.; sulphate of lime, 3.263; sulphate of magnesia, 1.763; protoxide of iron, 4.863; alumina, 17.905; cretate of ammonia, 0.700; chloride of sodium, 1.008; silicic acid, 2.840; free sulphuric acid, 15.224; free carbonic acid, 7.536—water 58315.133. They are used in dyspepsia, serofula, chronic diarrhoea, and cutaneous affections. The Bath Alum Springs are about 17 miles west of the Rockbridge Springs, in Bath county. They consist of free sulphuric acid, 7.878 grains; carbonic acid, 3.846; sulphate of potassa, 0.258; magnesia, 1.282; lime, 2.539; protoxide of iron, 21.776; alumina, 12.293; cretate of ammonia, 1.776; silicate of soda, 3.150; water, 58317.202. They are more chalybeate than the last.

About 15 miles from Staunton are *Strib'ling's Springs*—a sulphuretted water; and near *Warrenton*, in *Fauquier county*, there is a sulphureous water, called *Lee's Springs*, which is much frequented. *Berkley or Bath*, and *Ca'pon Springs* are likewise celebrated.

VIRGINIS VIITIATIO, 'violation of a virgin,' Defloratio.

VIRGIN'ITY, *Virgini'tas, Parthen'e'a, Integ'ritas, Maid'enhood, Maid'enhead, (F.) Virginité, Pucelage, (from virgo.)* The state of one who has never had carnal commerce.

VIRGIN'S BOWER, COMMON, Clematis vitalba, Clematis virginica—v. Bower, upright, Clematis recta—v. Sweet-scented, Clematis flammula.

VIRGIN'S MILK, *Lac Vir'ginis seu Virginal'e seu Virgineum, (F.) Lait virginal.* A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, subacetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS, Virginity—v. Deflorata. Deflo-ratio.

VIRGO, gen. *Vir'ginis*, Virgin—v. Aurea, Solidago virgaurea.

VIRGULA, (dim. of *virga*, 'a rod,') Penis.

VIRIDE ÆRIS, 'green of brass,' Cupri subæretas—v. Montanum, Cuprum.

VIRILE, (from *vir*, 'a man,') Penis.

VIR'ILE, *Vir'ilis*, (from *vir*, 'a man,') Relating or appertaining to the adult age.

VIRILE AGE, see Age.

VIRILES'CENTE, (from *virilis* (*vir*, 'a man'), 'manly,') The state of the aged female in which she assumes certain of the characteristics of the male.

VIRILIA, (from *vir*, 'a man,') Pudibilia.

VIRILITAS, Adult age, see Age.

VIRILITY, Adult age, see Age.

VIROSE, Virous.

VIROUS, *Vi'rose*, *Vir'ous*, (F.) *Viroux*, (from *virus*,) Possessed of noxious properties. Also, substances having a peculiar nauseous taste and odour.

VIROSUS, Virous.

VIRTUE, Faculty.

VIRTUS, 'power,' (allied to *vir*, 'a man,') Faculty, Property—v. Formatrix, Plastic force—v. Plastica, Plastic force.

VIR'ULENT, *Virulentus*, (from *virus*,) That which is of the nature of a virus or which is caused by a virus. Highly noxious.

VIRUS. A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic*, the *vaccine*, and the *syphilitic viruses*. *Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process,—a *morbid poison*.

VIRUS, Ichor, Poison, Sanies—v. Vaccine, see Vaccina—v. Vitale, Sperm.

VIS, gen. *Vi'ris*, (allied to *vir*, 'a man,') Force—v. Adhesionis, Cohesion (force of)—v. Attractionis, Cohesion (force of)—v. Aucta, Sthenia—v. Cohærens, Cohesion (force of)—v. Conservatrix, V. medicatrix nature—v. Elastica, Elasticity—v. Essentialis, Plastic force.

VIS EXPUL'TRIX. The organic force by which, it was supposed, the useless and effete was removed from the body.

VIS FORMATIVA, Plastic force.

VIS A FRON'TE, 'force from the front.' An action which is exerted from before; as that of the capillaries in the circulation of the blood.

VIS GENERATRIX, Potentia generandi—v. Imminuta, Asthenia—v. Insita, Irritability—v. Irritabilis, Irritability.

VIS MEDICA'TRIX NAT'URE, V. *conserva'trix*, *Autocra'tia*, *Autonomia*, *Autoerato'ria*, *Authy-gian'sis*, *Autotherape'ia*, *Physiat'rice*, *Physioauto'erati'a*, *Physi'autoerati'a*, *Physi'autotherape'ia*, (F.) *Force medicatrice*. A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS METABOLICA, Metabolic force.

VIS MOR'TUA. Under this name Haller included the mechanical properties of membrane.—flexibility, extensibility, elasticity, &c.—which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS MUSCULARIS, Myodynamia—v. Nervorum, Nervous power—v. Nervosa, Nervous power—v.

Plastica, Plastic force—v. Reproductiva, Plastic force.

VIS A TER'GO, 'force from behind.' An action of impulsion or propulsion, as that of the heart in the circulation of the blood.

VIS VITÆ, Irritability.

VIS VITA'LIS, *Vis Vi'tæ*, *Vis seu Fac'ultas Zo'tica*, (F.) *Force vitale*. The vital force—B'rod of Von Reichenbach—which distinguishes living matter from the dead. Also, Irritability.

VIS ZOTICA, Vis vitalis.

VISAGE, (from [L.] *cidere*, *visum*, 'to see,') Countenance.

VISCAGO BEHEN, (*viscum*, 'birdlime,') Cucubalus behen.

VISCERA, (pl. of *viscus*, 'an internal organ,') Entrails, Uterus.

VISCERAL, Splanchnic.

VISCERALIS, Splanchnic, Stomachal.

VISCERATION, Exenterismus.

VISCERES, ([L.] *viscera*,) Entrails.

VISCERINA, Physocina.

VIS'CUM ALBUM, *Ix'us*, *Ix'ia*, *Da'bach*, *Mis'tletoe*, (F.) *Gui*, *Gui de Chêne*, *Gillon*. A parasitic plant, which grows on a number of trees. Order, Loranthaceæ. Ser. Syst. Diœcia Tetrandria. That of the oak—*Viscum quercinum*—has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves being given in powder, in the dose of ʒss or ʒi. The berries, also called *Pommes hémorrhoidales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

VIS'CUM CAPEN'SE. A South African parasitic shrub, which grows on the stems of several species of Rhus and Euclea.

VIS'CUM FLAVES'CENS, V. *verticillatum*, *Yel'low* or *Yel'lowish Mis'tletoe*, indigenous, has been given in similar cases as the *Viscum album*.

VIS'CUM VERTICILLATUM, V. *flavescens*.

VISCUS, gen. *Vis'ceris*. Any internal organ of the body.

VISIO, Pupil, Vision.

VIS'ION, *Sight*, *Vis'io*, *Vi'sus*, (from *videre*, *visum*, 'to see,') *Op'sis*, *Om'ma*, (F.) *Vue*. The action of seeing. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays *traverse*, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections, which might otherwise occur, the anterior of the eye is lined by a membrane—the choroid—which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, BINOCULAR, see Binocular—v. Coloured, Chromopsia—v. Double, Diplopia—v. Iridescent, Chromopsia—v. Manifold, Polyopsia—v. Multiple, Polyopsia—v. Phantasmatum, Metamorphopsia—v. Single, see Binocular.

**VISNOMY**, Physiognomy.

**VISORIUM ORGANUM**, (from *videre*, *visum*, 'to see.') Eye.

**VISORIUS**, Visual.

**VISUAL**, *Visua'lis*, *Viso'rius*, (F.) *Visuel*. That which concerns the sight or belongs to vision.

**VISUAL ANGLE** is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

**VISUEL**, Visual.

**VISUS**, (from *videre*, *visum*, 'to see,') Vision—*v. Acrior*, Nyctalopia—*v. Acris*, Oxydercia—*v. Coloratus*, Chromopsia—*v. Debilitas*, Asthenopia—*v. Decolor*, Achromatopsia—*v. Defiguratus*, Metamorphopsia—*v. Dimidiatus*, Hemipopia—*v. Diurnus*, Hemeralopia—*v. Duplicatus*, Diplopia—*v. Hebetudo*, Amblyopia—*v. Juvenum*, Myopia—*v. Lucidus*, Photopsia—*v. Muscarum*, see Metamorphopsia—*v. Nebulosus*, Nebula—*v. Nocturnus*, Nyctalopia—*v. Senilis*, Presbytia.

**VITA**, Life—*v. Propria*, Irritability.

**VITAL**, *Vita'lis*, *Bio'tic*, *Bio'ticus*, (F.) *Vital*, (from *vita*.) Relating or appertaining to life.

**VITAL CAPAC'ITY**, *Pulmon'ic* or *Lung capae'ity*.

A term employed by Dr. Hutchinson to designate the number of cubic inches of air, which a person can forcibly expire after a full inspiration. He found, that for every inch of height—from five feet to six—eight additional cubic inches of air can be given out by a forced expiration. The quantity, however, is influenced, also, by weight and age. See Respiration.

**VITAL CENTRE**, *Centrum vitale*—*v. Dynamics*, see Dynamic—*v. Force*, *Vis vitalis*—*v. Point*, see *Centrum vitale*.

**VITAL PRIN'CIPLE**, *Flam'mula seu Au'ra vita'lis*, *Microcosme'tor*, (F.) *Flamme vitale*, *Vital Flame*. The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except as a force in connexion with organization.

**VITAL PROPERTIES**, see Properties, vital—*v. Statistics*, Statistics, medical.

**VITALBA**, (*vitis*, 'vine,' and *albus*, 'white,') Clematis vitalba.

**VITALISM**, *Vitalismus*, (from *vita*.) The doctrine of the *vitalist*—*vitalis'ta*—who ascribes every function of the organism to the direct agency of a vital principle or force.

**VITALIST**, see Vitalism.

**VITALITY**, *Vital'itas*, (F.) *Vitalité*. The vital principle; also, used in the sense of vital action or movement.

**VITALIZE**, To endow with life.

**VITALS**, *Vita'lia*. Parts that are necessary for life—the heart, lungs, and nervous centres more especially.

**VITAROB'ORANT**, PALM'ER'S, (*vita*, and *robore*, 'to strengthen,') A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to Revalenta.

**VITELLARY**, Vitelline—*v. Membrane*, *Zona pellucida*.

**VITELLINE**, *Zona pellucida*.

**VIT'ELLINE**, *Vitel'linus*, *Vit'ellary*, *Lecitho'des*, (from *vitellus*, 'the yolk of an egg,') Appertaining to or resembling the vitellus or yolk. Also, the yolk membrane. See *Vesicula umbilicalis*.

**VITELLINE DISC**, Proliferous Disc—*v. Fluid*, see *Vesicula umbilicalis*.

**VITELLINE PED'ICLE** or **APOPH'YSIS** is the pedi-

cle which attaches the umbilical vesicle to the embryo. See *Vesicula umbilicalis*.

**VITELLINE POUCH**, *Vesicula umbilicalis*—*v. Vessels*, *Omphalomesenteric*.

**VITELLOMESENTERIC**, *Omphalomesenteric*. **VITELLUM OVI**, 'the yolk of an egg,' see *Ovum*.

**VITELLUS OVI**, see *Ovum*.

**VITEX**, gen. *Viticeis*, (from *vico*, 'I bind' [?]) *V. Agnus castus* seu *verticilla'tus*, (F.) *Guttilier*, *Petit Poivre*, *Poivre de mûne* ou *sauvage*. *Ord.* *Verbenaceæ*. *Sex. Syst.* *Didynamia Angiosperma*. The *Chaste Tree*. The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as *ants phrodisiacs*.

**VITI SALTUS**, 'Vitus's dance,' *Chorea*.

**VITIA** (pl. of *vitium*) **PRIME CONFORMATIONIS**, see *Monster*.

**VITIATIO**, (*vitiare*, *vitiatum*, 'to violate,') *Stuprum*.

**VITILIGINES**, *Ephelides*.

**VITILIGO**, gen. *Vitilig'inis*, (from *vitulus*, 'a calf;' hence 'calfskin,') *Achroma*, *Herpes exedens*, *Lepra*, *Porrigo decalvans*—*v. Albus*, *Lepra alpehoides*—*v. Melas*, *Lepra nigricans*—*v. Nigra*, *Lepra nigricans*.

**VITILIGOÏDEA**, (*vitiligo*, and *eûos*, 'resemblance,') A disease of the skin, so called from its resembling the vitiligo of Willan. It appears under two forms; either as tubercles—*V. tuberculo'sa*—varying from the size of a pin's head to that of a large pea, isolated or confluent; or as yellow patches of irregular outline, slightly elevated, and with but little hardness—*V. pla'na*.

**VITIS ALBA SYLVESTRIS**, (*vico*, 'to bind,') from its numerous tendrils.) *Bryonia alba*—*v. Apyrena*, see *V. Corinthiaca*.

**VITIS CORINTH'ACA**. *Ord.* *Vitaceæ*. *Sex. Syst.* *Pentandria Monogynia*. This plant affords the *U'va Corinthi'aca pas'sæ mino'res*, *Pas'sæ Corinthi'acæ*, *Pas'sæ ulæ mino'res*, *Corinthi'acæ*, *Cur'rautis*, (Prov.) *Curr'berries*, (F.) *Raisins de Corinthe*: which are the dried fruit of the *Vitis Corinthi'acæ* or *Vitis apyr'na*; and are similar, in their properties, to the raisin.

**VITIS IDÆA MYRTILLUS**, *Vaccinium myrtillus*—*v. Idæa palustris*, *Vaccinium oxycoccos*—*v. Idæa punctata*, *Vaccinium vitis idæa*—*v. Sativa*, *V. vinifera*.

**VITIS VINIF'ERA**, *V. sativ'a*, *Ampel'os*, *A. Enoph'oros*, *Gropevine*, *Vine*, (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lacryma*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Ver'juice*. The *Grape*, *U'va*, *Botry's*, *Staph'y'z*, *Rhaz.* (F.) *Raisin*, when ripe, is a wholesome, delicious fruit; and, when dried, forms the *U'va pas'sæ mino'res*, *Pas'sæ ulæ mino'res*, *U'va pas'sæ so'le sicca'ta*, *U'va pas'sa* (Ph. U. S.) *Zibebæ*, *Raisins*. These are inodorous; and to the taste, subacidulous, sweet, and mucilaginous. They are demulcent and nutritive.

**VITIUM**, Disease—*v. Caducum*, *Epilepsy*.

**VITIUM CONFORMA'TIONIS**, A disease or fault of conformation.

**VITIUM DIVINUM**, *Epilepsy*—*v. Hereuleum*, *Epilepsy*—*v. Scrophulosum*, *Scrofula*.

**VITRARIA**, *Parietaria*.

**VITRÉ**, (from *vitrum*.) *Hyaline*.

**VITREOCAPSULITIS**, (*vitreo*, 'appertaining to the vitreous humor,' and *capsulitis*, 'inflammation of a capsule,') *Hyalitis*.

**VITREOUS**, (from *vitrum*.) *Hyaline*—*v. Humour*, *Corpus vitreum*—*v. Humour of the ear*, *Vitrine auditive*.

**VITREUS**, *Hyaline*.

**VITREUX**, *Hyaline*.

VITRINA OCULARIS, Corpus vitreum.

VITRINE AUDITIVE (F.). *Humeur vitrée*, (from vitrum.) *Aqu'ula vit'ea audit'iva*, *Endolymph'a*, *End'olymph*, *Liqu'or* or *Flu'id* of *Scar'pa*, *Vit'reous Hum'our* of the *Ear*. The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous* humour of the eye.

VITRIOL, (from vitrum, 'glass,') Ferri sulphas — v. Blue, Cupri sulphas — v. Green, Ferri sulphas — v. Roman, Cupri sulphas — v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas — v. Ammoniacale, Ammonie sulphas — v. Cæruleum, Cupri sulphas — v. Cupri, Cupri sulphas — v. Cyprum, Cupri sulphas — v. Ferri, Ferri sulphas — v. Goslariense, Zinci sulphas — v. Martis, Ferri sulphas — v. Romanum, Cupri sulphas — v. Veneris, Cupri sulphas — v. Viride, Ferri sulphas — v. Zinci, Zinci sulphas.

VITRUM, *Hy'alos*, *Glass*, *Bran'cia*, (F.) *Verre*. Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in toothpowders. It is called *Sau'diver*, *Sel de verre*, *Glass Gall*, *Fel vit'ri*, &c.

VITRUM ANTIMONI, see Antimonii vitrum — v. Hypoclepticum, Separatorium — v. Oculare, see Spectacles — v. Sublimatorium, Aludel.

VITTA, *Bandelette*, *Caul*.

VITTARIA CETERACH, (*vitta*, 'a band, a fillet,') *Asplenium ceterach*.

VITTE VAYR, *Andropogon muricatus*.

VIVACE, (from vivax, gen. *viva'cis*, (from vivere, 'to live,') 'living long, tenacious of life.' An epithet given by Levret to uterine polyp, which he considers to be, commonly, vegetations of some ulcer in the interior of the uterus, and incurable.

VIVÆSECTIO, (*vivus*, 'alive,' and *secare*, *sectum*, 'to cut,') *Vivisection*.

VIVERRA CIVETTA, see Civetta.

VIVIPARE, *Viviparus*.

VIVIPARITÉ, see Viviparus.

VIVIPAROUS, (F.) *Vivipare*, (*vivus*, 'alive,' and *pario*, 'to bring forth,') An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*. The condition may be termed *Viviparousness*, (F.) *Viviparité*. See Generation.

VIVIPAROUSNESS, see Viviparus.

VIVISECTION, *Vivisectio*, *Vivisectio*, *Biotom'ia*, (*vivus*, 'alive,' and *secare*, *sectum*, 'to cut,') The act of opening or dissecting living animals. One who performs vivisections is a *Vivisector*.

VOCAL, (from vox,) Oral — v. Cords, see Cords, vocal — v. Ligaments, see Cords, vocal — v. Tube, see Tube, vocal.

VOCALIS, *Vowel*.

VOCE DI PETTO, 'chest voice,' see Voice — v. *di Testa*, 'head voice,' see Voice.

VOICE, *Vox*, *Au'dē*, *Pho'nē*, (F.) *Voix*, (from vocare, 'to name, to call,') An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phona'tion*. It is a function of *animal* life; and, in animals, is limited to the production of the *simple* or *instinctive* voice, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated, — an evidence of his intellectual superiority.

VOICE, ARTICULATED, *Speech*, *Loque'la*, *Glos'sa*, *Glott'a*, *La'lia*, *Phra'sis*, (F.) *Parole*, *Voix articulée*, is the voice as produced by the glottis, modi-

fied by the motions of the tongue, lip, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyroarytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*, or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarinet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supralarynge'al*, or *notes of the second register*. They constitute the *pharynge'al voice*, *falsetto* or *fancette voice* or *voce di testa* (I.), *Voix de tête*, *Voix de fausset* (F.). The *larynge'al voice* or *voice of the first register*, *Chest voice*, is the *Voce di Petto* (I.), *Voix de Poitrine* (F.). The laryngeal voice, which is always more elevated, by an octave, in the female than in the male, furnishes the types called *Sopra'no*, *Al'to* or *Contra'to*, *Tenore* and *Basso*. The first two belong to the female voice; the last two to the male. The *Bar'itone* is between the bass and tenor.

VOICE, BLEATING, *Egophony* — v. *Cavernous*, *Pectoriloquy* — v. *Chest*, see Voice, articulated.

VOICE, CHOLERIC, *Vox Choleric'a*, *Cholero-pho'nē*, *Cholero-pho'nia*. The peculiar husky voice of those affected with cholera.

VOICE, CONVULSIVE, *Vox convulsiva*, (F.) *Voix convulsive*. A neurosis of the voice, consisting in the production of discordant sounds — acute and grave — which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, FALSETTO, see Voice — v. *Goat's*, *Egophony* — v. *Laryngeal*, *Laryngophony*, see Voice — v. *Pharyngeal*, see Voice — v. *Tracheal*, *Laryngophony*.

VOIE, ([L.] *via*,) *Way*.

VOIES DIGESTIVES, *Ways*, *digestive* — v. *Lacrymales*, *Lachrymal passages* — v. *Premières*, *Ways*, *digestive* — v. *Secondes*, *Ways*, *second* — v. *Urinaires*, *Urinary passages*.

VOILE ([L.] *velum*) *DU PALAIS*, *Velum pendulum palati* — v. *Médullaire inférieure*, *Velum medullare inferius* — v. *Médullaire supérieure*, *Valvula Viuesenii*.

VOIX, ([L.] *Vox*,) *Voice* — v. *Aigre*, see *Acid* — v. *Articulée*, *Voice*, *articulated*, *Pectoriloquy* — v. *Bourdonnant*, see *Resonance* — v. *Bronchique*, *Resonance* — v. *Caverneuse*, *Pectoriloquy* — v. *Ché-vrotante*, *Egophony* — v. *Égophonique*, *Egophony* — v. *de Fausset*, see *Voice*, *articulated* — v. *de Poitrine*, see *Voice*, *articulated* — v. *de Polichinelle*, *Egophony* — v. *Sénile*, *Egophony* — v. *de Tête*, see *Voice*, *articulated* — v. *Tubaire*, see *Resonance*.

VOLA, *Palm* — v. *Mands*, *Palm* — v. *Pedis*, *Sole*.

VOLANT D'EAU, *Nymphaea alba*.

VOLATICA, (*volare*, 'to fly,') *Lichen*.

VOLATILIZATIO, *Volatilisa'tio*, *Volatilisatio*, (from *volare*, 'to fly,') The operation of reducing volatizable substances into gas or vapour.

VOLATISATIO, (*volare*, 'to fly,') *Volatilization*.

VOLCANISATION, see *Vulcanite*.

VOLITIO, *Volit'io*, (from *volo*, 'to will,') The act of willing. Hence:

VOLITIO, *Relating to volition*. Thus

the muscles may be moved by a *volitional* or by an *emotional* impulse.

**VOLNUS**, Wound.

**VOLONTAIRE**, Voluntary.

**VOLONTÉ**, Voluntas.

**VOLSELLA**, (*vellere*, 'to pluck,') *Acanthabobus*, Forceps, Madisterium—*v. Patini*, *Valet à Patin*.

**VOLTAISM**, (after Volta,) Galvanism.

**VOLTUS**, Countenance, Face.

**VOLUMETRIC**, *Volumetricus*, (F.) *Volumétrique*, (from *volume*, and *meter*.) Relating to the measurement of volumes; as the *volumetric* method of analysis for the urine, the principle of which consists in adding to a known quantity of urine the exact amount of a test liquid required to precipitate the whole of any one ingredient contained in it.

It is usually employed only for the determination of the chlorine, urea, phosphoric and sulphuric acids, and sugar, of the urine.

**VOLUNTARY**, *Hecusius*, *Voluntarius*, (F.) *Volontaire*, (from *voluntas*, 'will,') Relating to the will; as 'voluntary muscles'; muscles which act in obedience to the will.

**VOLUNTAS**, gen. *Voluntatis*, *Volentia*, *Arbitrium*, *Cupiditas*, *Boule'sis*, *Bule'sis*, *Thele'ma*, (F.) *Volonté*, (from *volo*, 'to will,') Will or desire.

**VOLUNTAS** seu **CUPIDITAS** **DESEDENDI**, *Lubido intestinali*. Desire to go to stool.

**VOLVA**, Vulva.

**VOLVULUS**, (from *volvare*, 'to roll,') *Ileus*—*v. Intestinorum*, *Intussusceptio*.

**VOMENDI CONAMEN INANE**, 'vain effort at vomiting,' *Vomiturition*.

**VOMER**, gen. *Vo'meris*, 'a ploughshare;' *Os vo'meris*, *Os maxillæ superioris undecimūm*, *Ara'trum*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

**VOMICÆ**, gen. *Vom'icæ*, *Pycocystis*, (from *vomere*, 'to vomit,' 'to cast up,') (F.) *Vomique*, *Crachement de pus*. A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. It is commonly, however, restricted to a purulent collection in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicæ are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

**VOMICINE**, *Brucine*.

**VOMIQUE**, *Vomica*.

**VOMIQUIER**, *Strychnos nux vomica*.

**VOMISSEMENT**, (from *vomir*, [L.] *vomere*, 'to vomit,') Vomiting—*v. de Sang*, *Hæmatemesis*.

**VOMIT**, (*vomere*, *vomitum*, 'to vomit,') *Emetic*—*v. Black*, *Fever*, *yellow*, *Melana*.

**VOMIT DRY**, OF **MAR'RIOTT**. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

**VOMITIF**, *Emetic*.

**VOMITINE**, *Emetine*.

**VOMITING**, *Vomitus*, *Vomit'io*, *Vomit'ium*, *Vom'itum*, *Eeom'it'io*, *Ana'tropé*, *Em'esis*, *Em'etus*, *Pal'nus vom'itus*, *Ægritudo ventriculi*, *Spew'ing*, *Puk'ing*, *Sick'ness of the Stom'ach*, (Old Eng.)

*Par'breaking*, (Sc.) *Bok'king*, *Bock'ing*, *Bra'king*, *Brocht*, (Prov.) *Hull'uping*, (vulg.) *Casca'ding*, *Cast'ing*, (F.) *Vomissement*. The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, snapisms, or blisters to the epigastric region, &c.

**VOMITING AT PLEASURE**, *Regurgitation*—*v. of Blood*, *Hæmatemesis*—*v. Stercoraceous*, *Copremesis*.

**VOMITIO**, Vomiting—*v. Sanguinis*, *Hæmatemesis*.

**VOMITIUM**, Vomiting.

**VOMITO NEGRO**, 'black vomit,' *Fever*, *yellow*—*v. Prieto*, *Fever*, *yellow*.

**VOMITORIUM**, *Emetic*.

**VOMITORY**, *Emetic*.

**VOMITUM**, Vomiting.

**VOMITURIT'ION**, *Vomiturit'io*, *En'sia*, *Dyssemes'ia*, *Subver'io stom'achi*; ineffectual efforts to vomit; *Vomen'di cona'men ina'ntiæ*, *Retch'ing*, *Reach'ing*, *Heav'ing*, (Old Eng.) *Bolke*, (Sc.) *Bok*, *Bock*, *Braking*. Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptation is the most general.

**VOMITUS**, (from *vomere*, *vomitum*, 'to vomit,') Vomiting—*v. Cruentus*, *Hæmatemesis*—*v. Fæculentus*, *Copremesis*—*v. Marinus*, *Nausea marina*—*v. Navigantium*, *Nausea marina*—*v. Niger*, *Feyer*, *yellow*—*v. Pituosus*, *Blennemesis*—*v. Profusus*, *Hyperemesis*—*v. Purulentus*, *Pymesis*—*v. Sanguinis*, *Hæmatemesis*—*v. Stercoris*, *Copremesis*.

**VOORARA**, *Curare*.

**VOTIVE TABLET**, (from *votum*, 'a vow,') *Tabula votiva*.

**VOUACAPOUA AMERICANA**, *Geoffræa inermis*.

**VOUSSURE PRÉCORDIALE**, (*vouter*, 'to arch,' from [L.] *volvare*, *volutum*, 'to curve,') 'præcordial arching or prominence.' The elevation or arching of the parietes of the thorax, witnessed in certain thoracic affections, as in hypertrophy of the heart.

**VOÛTE**, (from [L.] *volvare*, *volutum*, 'to curve,') Vault—*v. Médullaire*, *Corpus callosum*—*v. à Trois Piliers*, *Fornix*.

**VOWEL**, *Voca'lis*, (from *vox*, gen. *vo'cis*, 'the voice,') (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis, but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a*, *e*, *i*, *o*, *u*, *u*, and *y*, are vowels.

**VOX**, gen. *Vo'cis*, *Voice*—*v. Cholericæ*, *Voice*, *cholericæ*—*v. Clandestina*, *Whispering*—*v. Clangosa*, *Oxyphonia*—*v. Convulsiva*, *Voix Convulsive*—*v. Nasalis*, *Rhinophonia*—*v. Rauca*, *Raucedo*, *Raucous voice*—*v. Rauceisona*, *Raucous voice*.

**VOYELLE**, *Vowel*.

**VUE**, (*voir*, 'to see,' *vu*, 'seen,') *Vision*—*v. Basse*, *Myopia*—*v. Courte*, *Myopia*—*v. Diurne*, *Hemeralopia*—*v. Faible*, *Amblyopia*—*v. Longue*, *Presbyopia*—*v. Louche*, *Strabismus*—*v. Nocturne*, *Nyctalopia*.

**VULCANITE, DENTAL**, (from *Vulcanus, Vulcan*, 'the god of fire.') A compound of caoutchouc and sulphur or sulphur compounds, used in the formation of plates for artificial teeth, &c. The formation of vulcanite is termed *Vulcanisation*, (F.) *Vulcanisation, Sulfuration*.

**VULGA**, *Vulva*.

**VULNERA SCLOPETARIA**, (pl. of *vulnus*, and *sclopetum*, 'a gun,') see *Sclopetarius* and *Wound*—v. *Sclopetica*, see *Sclopetarius* and *Wound*—v. a *Sclopetis*, see *Sclopetarius* and *Wound*.

**VULNÉRAIRE**, *Vulnerary*—v. *Suisse*, see *Falltrank*.

**VULNERARIUS**, *Traumatic*.

**VULNERARY**, *Vulnerarius, Traumaticus, Traumatic*, (from *vulnus*, gen. *vulneris*, 'a wound,') (F.) *Vulnéraire*. A name applied by the ancients to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

**VULNERATIO NERVI**, (*vulnerare, vulneratum*, 'to wound,') *Neurotrosis*.

**VULNERUM VINCTURA**, 'binding of wounds,' *Deligation*.

**VULNUS**, gen. *Vulneris*, (from *vellere*, 'to pluck or tear,') *Wound*—v. *Laceratum*, see *Laceration*—v. *Sclopetarium*, *Wound*, *gun-shot*—v. *Simplex*, *Cut*.

**VULNUSCULUM**, (dim. of *vulnus*,) *Wound*.

**VULPIS MORBUS**, 'disease of the fox,' *Alpecia*.

**VULTUEUX**, (F.) *Vultuosus*, 'full of expression,' (from *vultus*.) *Corvisart* has used the expression, *Face vultueuse, Face vultuosae*, for the face when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to *Corvisart*, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

**VULTUS**, *Countenance, Face*—v. *Tetricus* et *Mestus*, *Seythropasmus*.

**VULVA**, (from *volvere*, 'to enfold,' or from *valve*, 'so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

**WAKEROBIN**, *Arum maculatum, Trillium*, *atifolium*.

**VULVA**, *Volva, Hor'tus, Cuv'nus, Pudend'um mulieb're, Pudenda mulieb'ria, Si'nus pud'o'ris, Le'tar, Charus, A'tinum, Buc'ca, Bul'ga, Cadur'cus, Cus'tos, Fe'meu, An'nulus, Fe'mur sum'mum, Follic'ulus, Fun'dus, Gre'nium, Hia'tus, Lam'vium, Nav'is, Oppid'ulum, Spe'cus, Vulga, Cym'ba, Cys'thus, Sal'tus, Clitor'ium, Os'tium, Sul'cus, Con'cha, Por'tus, Por'ta, Fores* (of virgins), *Interfemin'eum, Mul'eb'ria, Fossa magna mulieb'ris, Epise'ion, Es'chara, Tre'ma, Hor'tulus cupid'inis, Byssos, Ca'ra, Caver'na, Del'phys, Del'ta, Fo'vea, Gynece'rium, Seces'sus, Vallis fem'orum, Eng'ium, Eng'ion, Lo'ci mulieb'ris, Fe'male pudend'um, Fe'male or'gans of generation, Fe'male parts, Shape*, (F.) *Vulve*. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female:—mons veneris; labia majora, and the left or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncula myrtiliformis, fossa navicularis and fourchette.

**VULVA**, *Fore'men commu'nē ante'rinu, It'er seu Ad'itus ad infundib'ulum, I. seu Ad'itus ad tertium ventric'ulum, Ri'ma ad infundib'ulum, Aper'tura anterior cereb'uli tertii cereb'ri*. An opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

**VULVAIRE**, *Chenopodium vulvaria, Vulvar*.

**VULVAR**, *Vulvaris*, (F.) *Vulvaire*, (from *vulva*.) That which relates to the vulva. *Chausier* gives this name to the external pudic arteries, because they are distributed to the vulva.

**VULVARIA**, (from its use in diseases of the vulva [?]), *Chenopodium vulvaria*.

**VULVE**, *Vulva*.

**VULVITIS**, (*vulva* and *itis*.) *Inflammation of the vulva*.

**VULVOÛTERINE**, *Vulvoûteri'nus*, (F.) *Vulvoûterin*. Relating or appertaining to the vulva and uterus.

**VULVOÛTERINE CANAL**, *Vagina*.

**VULVOVAGINAL**, *Vulvovagina'lis*. Relating or appertaining to the vulva and vagina.

**VULVOVAGINAL GLANDS**, *Cowper's glands* in the female.

## W.

**WABRAN** or **WAYBREAD**, ([Sax.] *wæg-bræde*.) *Plantago*.

**WAD**, ([Sax.] *wad*.) *Graphites*.

**WAFERTREE**, *Ptelea trifoliata*.

**WAGNER, CORPUSCLES OF**, *Corpuscula tactilis*—w. *Vesicles of, see Molecule*.

**WAGNERIAN SPOT**, see *Molecule*.

**WAHOO**, see *Euonymus*.

**WAIR**, see *Pila marina*.

**WAIST'COAT, STRAIT**, *Indu'cula*, (F.) *Camisole, Gilet de force*. A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

**WAKEROBIN**, *Arum maculatum, Trillium*, *atifolium*.

**WALE**, ([Sax.] *walan*, 'marks of stripes,') *Wheat*.

**WALK'ING**, *Gres'sus, Inces'sus, Deambula'tio, Ambula'tio, Bad'isis*, (F.) *La Marche, Progression*. ([Sax.] *walcan*, 'to walk,') The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thighbones, the extent of which is regulated by volition, under the guidance of vision.

**WALLACHIA, MINERAL WATERS OF**. There are many excellent sulphureous springs in this country, especially those at *Bobotsch, Finceschi, Sibitschiudi Suz, Bräsa, Otsehin, Serbo neschte, Kimpalungi, Kosia, and Oloneschi*. *Chalybeate* and saline springs have, also, been found at *Sibitschiudi Suz*.

**WALL EYED**, (of uncertain etymology.) Applied to a horse—not perfectly white or cream-coloured—which has a white iris. (Prov.) Having eyes with too much white. In the north of England persons having the white of the eye very large and to one side, are so called. Applied, also, to an eye with little or no sight, “all white like a plastered wall.”

**WALLFLOWER**, (probably *Gaulflower*), *Cheiranthus cheiri*.

**WALLRUE**, *Asplenium ruta muraria*.

**WALLTEETH**, Molar teeth.

**WALNUT**, (probably *Gaulnut*), *Juglans regia*—w. Black, *Juglans regia*—w. White, *Juglans cinerea*.

**WALTHER**, DUCT OF, see Bilingual gland.

**WALTHERIA DOURADINHA**, (after A. F. Walther, medical professor at Leipsic.) A plant of Brazil, Order, Sterculiaceæ, which is used there in diseases of the chest, and in venereal affections. It is a demulcent.

**WALTON**, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

**WAME**, (womb.) Belly, Uterus.

**WAMPEE**, *Peltandra Virginica*.

**WANG**, ([Sax. *þang*, *þeng*, ‘the cheek,’) Gena.

**WANG TEETH**, Molar teeth.

**WANT**, (from past participle of Sax. *Danian*, ‘to wane,’ ‘to fall away;’) ‘need of that which is necessary.’ (F.) *Besoin*. This word is sometimes used to express the imperious necessity which impels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinctive desires* and *internal sensations* or *stimuli*. Such are the desires or wants to eat, drink, void the urine, breathe (*besoin de respirer*), &c.

**WANT**, in the sense of indigence, (L.) *Egestas*, *Indigentia*, is the cause of a number of diseases.

**WAPS**, Wasp.

**WARBURG'S FEVER DROPS**, see Bebeeru.

**WARD'S ESSENCE FOR THE HEADACH**, Linimentum camphoræ compositum—w. White Drops, see Hydrargyri nitras.

**WARE**, see Pila marina.

**WARK**, ([Sax.] *þærpe*), Pain.

**WARMBRUNN**, MINERAL WATERS OF. Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

**WARM SPRINGS**, see Georgia, Mineral waters of, and Virginia, Mineral waters of.

**WARNERA CANADENSIS**, (after Mr. Richard Warner, of Woodford, England,) *Hydrastis Canadensis*.

**WARRENTON SPRINGS**, see Virginia, mineral waters of.

**WART**, (Sax. *þeart*.) *Verruca*—w. Corneous, Cornu—w. Moist, *Aerthymion*.

**WARTY**, *Verrucosa*, *Verrucosus*, *Verrucosus*, (F.) *Verruqueux*. Full of warts. Resembling, relating, or belonging to warts.

**WARTY TUMOUR OF CICATRICES**. A name given by Mr. Howship to the tumour, which sometimes appears on an old scar, many years, perhaps, after the injury that caused it. The ulcer, formed under such circumstances, has been called the *warty ulcer of Morjolin*—having been well described by that surgeon.

**WASH, BLACK**, see Hydrargyri submurias—w. Phagedenic, see Hydrargyri submurias—w. Preventive, Lotion, Hannay's—w. Red, Lotion rubra, and Lotion, camphorated, of Bates—w. White, Liqueur plumbi subacetatis dilutus—w. Yellow, see Hydrargyri oxymurias.

**WASHERWOMAN'S SCALL**, Psoriasis diffusa.

**WASHITAW SPRINGS**, see Arkansas, mineral waters of.

**WASP**, *Waps*, ([Sax.] *þæpp*, *þæpp*.) (Prov) *Whamp*, *Ves'pa*, *Sphæx*, (F.) *Guêpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, Table of.) The best application is the sp. ammoniæ aromaticus, or some preparation of ammonia.

**WASSERBURG**, MINERAL WATERS OF. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Munich. The water, called, also, *Aqua Agatii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

**WASSERKUR** (G.), ‘water cure,’ Hydro-sudotherapeia.

**WASTING**, ([Sax.] *þerþan*, ‘to waste,’) Consumption, Tabes.

**WASSERSCHLAG** (G.), ‘water stroke,’ see Hydrocephalus internus.

**WATER**, ([Sax.] *þæter*, [G.] *Wasser*.) *Aqua*, *Hy'dor*, (F.) *Eau*, *Protoxide of hydrogen*. Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212° of Fahrenheit; and is taken as the unit in all tables of specific gravity of solid and liquid substances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in seawater and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, “*Aqua levisissima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hec ex nive, aut glacie; gravior his ex lacu; gravissima ex palude.*” Pure water—*Aqua pura*—is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

**WATER, URINE**—w. of Aix-la-Chapelle, see Aix-la-Chapelle—w. Allflower, Urine, cows'—w. Alum, Bates's, Liqueur aluminis compositus—w. of Ammonia, stronger, see Liqueur ammoniæ—w. of carbonate of Ammonia, Liqueur ammoniæ subcarbonatis—w. Angel, Angel water—w. Anise, see Pimpinella anisum—w. Apple, Apple tree—w. Barley, Decoctum hordei—w. Bath, see Bath, water.

**WATER BED**, *Hydrostatic bed*. A bed, contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

**WATER, BINELLI**, *Aqua Binellii*.

**WATER OF BITTER ALMONDS**, *Aqua Amygdalorum concentrata*.

**WATER BLEBS**, Pemphigus—w. Brash, Pyrosis.

**WATER, BROCCIERI**, *Aqua Broccierii*—w. Camphor, *Mistura Camphoræ*.

**WATER CANKER**, Cancer aquaticus.

**WATER, CARAWAY**, see Carum carui—w. Caraway, strong, *Spiritus carui*—w. Carmelita, see Melissa—w. of Cassia, see *Laurus Cassia*.

WATER CASTER, see Uromantia.

WATER, CHERRY LAUREL, see Prunus lauro-cerasus — w. Chicken, Chickentea — w. Chlorine, see Chlorine — w. Cinnamon, Aqua cinnamomi — w. Cinnamon, strong, Spiritus cinnamomi — w. Cologne, Eau de Cologne.

WATER, CREASOTE, see Creasote.

WATER CRESS, Sisymbrium nasturtium — w. Cure, Hydrosudotherapia.

WATER, DILL, see Anethum graveolens.

WATER, DISTIL'LED, *A'qua destilla'ta*, Ho'ly Water, (F.) *Eau distillée*, *Hydrolat*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; — the water, containing any saline impregnation — hard water, for example — decomposing certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States, it is directed to be made as follows: — Take of water, ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

*Distil'led wa'ters*, (F.) *Hydrolats*, consist of common water, charged by distillation with the volatile principles of medicinal agents. See Aqua destillata.

WATERDOCTOR, see Uromantia.

WATERDRESS'ING. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part: — the whole being covered with oiled silk, elastic gum, or spongopiline. *Wa'ter strap'ping* or *wet strap'ping* means the treatment of ulcers, and certain cutaneous affections of the extremities, &c., with strips of linen or cotton saturated with water.

WATER, ELDER, see Sambucus — w. Epileptic, of Langius, Langii aqua epileptica — w. Fennel, Aqua feniculi.

WATER FLAG, YELLOW, Iris pseudacorus.

WATER, FLOR'IDA, — a celebrated perfume, — may be made of *Ol. Bergami*, fʒiv; *Tinct. benzoin. comp.* fʒij; *Alcohol. cong.*

WATERFRIGHT, Hydrophobia.

WATER, GOULARD, Liqueur plumbi subacetatis dilutus.

WATER GRUEL, see Avena, and Grits.

WATER, HARD. Common water, which decomposes and curdles soap; in contradistinction to *soft water*, which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

WATER IN THE HEAD, Hydrocephalus — w. Hell, see Toddy.

WATER, HOLY, Water, distilled — w. Honey, see Mel.

WATER, HUNGARY, Spiritus rosmarini.

WATER JAGS, see Variicella.

WATER, LAKE, *A'qua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

WATER, LAUREL, see Prunus laurocerasus — w. Lavender, Spiritus lavandulæ — w. Lead, Liqueur plumbi subacetatis dilutus — w. Lemonpeel, see Lemonpeel Tea — w. Lime, Liqueur calcis — w. Lime, compound, Liqueur calcis compositus — w. Magnesia, aerated, Magnesia, fluid — w. Magnesia, carbonated, Magnesia, fluid.

WATER, MARSH, *A'qua paludo'sa*, (F.) *Eau de Morais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

WATER, MEDICATED, see Aquæ medicatæ.

WATER, MIN'ERAL, *A'qua minera'lis* seu *salu'bris* seu *medica'ta* seu *sote'ria*, *Fons saluta'ris* seu *medica'tus* seu *sote'rius*, (F.) *Eau minérale* ou *médicinale naturelle*. Water, holding in solution different saline and gaseous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Various mineral waters are referred to under their appropriate heads; and a table of the fixed constituents, which enter into the composition of some of the more celebrated springs abroad, is given by Dr. Pereira, in his "Elements of Materia Medica and Therapeutics." There is, also, a "Table of some of the principal Mineral Waters," at home and abroad, in the "Author's General Therapeutics and Materia Medica," Vol. 2, p. 460, 6th edit., Philadelphia, 1857.

Mineral waters may be divided into four classes: — 1. *Gal'zeous* or *Acid'u'ous*. 2. *Chalybe'ate*. 3. *Saline'*. 4. *Sulphu'reous*. These may be *ther'mal*, or *cold*, — *nat'ural*, or *artifici'ial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to others.

1. *Gal'zeous, Acid'u'ous* or *Carbonated Mineral Waters, So'da* or *Beer Springs, A'que minera'les acid'ulæ*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters, are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeae, Seltzer, Schlangenbad, Sultzmatt, Pymont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybe'ate* or *Ferruginous Mineral Waters, A'que minera'les ferrugine'æ* seu *Chalybeatæ* seu *Martia'les* seu *Ferro'sæ, Chalybe'atæ, Chalybokre'atæ, Siderope'gæ, Siderokre'atæ*, (F.) *Eaux minérales ferrugineuses*, contain iron — sulphate, chloride or carbonate, generally the latter — held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are about one hundred; more than sixty of these being saline, and forty sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pymont, Passy, Provins, and Vals.

3. *Saline' Mineral Waters, A'que minera'les salinæ*, *Am'na alcaliza'ta* (Paracelsus), *Hydrul'mæ*, (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts con-

tained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sellitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphureous Mineral Waters*, *Aquæ mineral'es sulphur'ææ*; when warm, termed *Theiother'mæ*, *Theiope'gæ*, *Thiother'mæ*, *Fon'tes sulphu'rei cal'idi*, (F.) *Eaux minérales sulfureuses ou sulfurées ou sulfureuses ou hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognised by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Baréges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-chapelle, Enghien, Harrowgate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

WATER, MINERAL, Acidulous water, simple.

WATERS, MINERAL, ARTIFICIAL, (F.) *Eaux minérales artificielles ou factices*. These are imitations of the natural; and some of them—as the factitious Cheltenham water, and Sedlitz water—answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

WATER, NUTMEG, Spiritus myristicæ—w. Orange flower, see Citrus aurantium—w. Oxygenated, Hydrogen, peroxide of.

WATER PANG, Pyrosis—w. Parsnep, creeping, Sium.

WATER, PENNYROYAL, SPIRITUOUS, Spiritus pulegii—w. Peppermint, Aqua menthæ piperitæ—w. Pimento, see Myrtus pimenta.

WATER POX, see Variella.

WATER, PROTOXIDE OF NITROGEN, Aqua nitrogenii protoxydi.

WATER PURPHE, Veronica beccabunga—w. Qualm, Pyrosis.

WATER, RAIN, *Aqua pluvia'lis seu plu'via seu im'brium*, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

WATER, RICE, see Oryza.

WATER, RIVER, *Aqua fluvial'itis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

WATER, ROSE, Aqua rosæ.

WATER, SEA, *Aqua Mari'na*, *Alma*, *Hu'mor Do'ridis*, (F.) *Eau de Mer*, *Eau salée*. This contains chlorides of sodium, magnesium, and calcium, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an

excellent tonic bath; superior in most cases—especially in scrofula—to the fresh-water bath.

WATER, SEARLE'S PATENT OXYGENOUS AERATED, Aqua Nitrogenii protoxydi—w. Seydsebütz, Sellitz water.

WATER SHIELD, *Brasenia hypopeltis*.

WATER, SNOW, *Aqua nie'ra*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

WATER, SODA, Acidulous water, simple—w. Soft, see Water, hard—w. Spearmint, Aqua menthæ viridis.

WATER, SPRING, *Aqua font'a'na*, *Hydrope'gæ*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

WATER STRAPPING, see Water dressing—w. Stroke, see Hydrocephalus internus.

WATER, SYTTIC, SYDENHAM'S, Solutio sulphatis cupri composita—w. Tar, see Pinus sylvestris.

WATER TARGET, *Brasenia hypopeltis*.

WATER, TOAST, see Toast water.

WATER, WELL, *Aqua putea'lis seu putea'na seu ex pu'teo*, (F.) *Eau de puit ou de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

WATERS, THE, Liquor Amnii—w. Bag of, see Liquor Amnii—w. Discharged or broken, Profusio aquæ—w. Distilled, Aquæ destillatæ—w. First, Primitiæ—w. Green, see Lochia.

WATTWEILER, MINERAL WATERS OF. Wattweiler is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda, chloride of sodium, and free carbonic acid.

WAX, ([Sax.] *Œæx*,) Cera—w. Ear, Cerumen.

WAX, JAPAN. Obtained from *Rhus succedanea* of Japan. It is of a medium quality between beeswax and the ordinary vegetable tallow.

WAX, MYRTLE, *Bayberry tallow*. A wax obtained from the fruit of *Myrica cerifera*, *Wax myrtle*, *Candleberry myrtle*; an indigenous plant, which yields the *bayberry bark*, possessing tonic, stimulant and astringent properties. It has been prescribed in dysentery.

WAX, YELLOW AND WHITE, Cera flava et alba.

WAXING KERNELS, *Wax'enkernels*, *Croissances*, (F.) *Croissances*. *Croissants*, *Glandes de croissance*. A popular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children particularly. They have been looked upon as connected with the growth of the body,—hence their name.

WAY, ([Sax.] *Œæg*,) *O'dos*, *W'ia*, *Passage*, (F.) *Voie*. A name given to different canals.

WAYBREAD, ([Sax.] *Œæg bræde*,) *Plantago major*.

WAYME, Womb, Belly, Uterus.

WAYS, DIGESTIVE, *Digestive Passages*, *Pr'imæ Vi'æ*, (F.) *Voies digestives*, *Premières voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

WAYS, SECOND, *Second Passages*, *Secundæ vi'æ*, (F.) *Secondes voies*, comprise the chyliferous, lymphatic and blood-vessels.

WEAKSIGHTEDNESS, Asthenopia.

WEAL, ([Sax.] *palan*, 'marks of stripes,') *Ubel*.

WEAM, (Womb,) Belly, Uterus.

WEAM ILL, Colic.

WEANING, (from [Saxon] *wenan*, 'to wean;') *Ab lactatio*, *Apogalactismus*, (Prov.) *Spa'ning*, (F.) *Sériage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

WEANING BRASH, see Brash, weaning.

WEASAND, ([Sax.] *wæpanð*), Trachea.

WEARING, (from [Sax.] *wēpan*, 'to wear,') Consumption.

WEATHERCOCKS, Impatiens.

WEB, ([Sax.] *wēb*), Caligo, Pterygium—w. Muscular, Panniculus carnosus.

WEBEYE, Caligo, Pterygium.

WEBBED FINGERS, Dactylon.

WEBERIAN CORPUSCLES, (after Weber, a German anatomist,) see Ejaculatory Ducts—w. Organ, see Ejaculatory Ducts.

WEDGED, ([Sax.] *wæcg*, 'a wedge,') *Inclivus*, *Inclivens*, (F.) *Enclavé*. The head of the foetus is said to be *wedged*, *locked* or *impacted* in the pelvis, when it remains fixed, notwithstanding the uterine efforts.

The condition is called *Inclivatio* seu *Inclavatio foetus*, *Spheno'sis*, (F.) *Enclavement*. See Paramphosis.

WEEBO, Senecio Jacobæa.

WEED, (from [Sax.] *wēan*, 'to rage,') see Mastitis.

WEED, ARROW, ([Sax.] *wēow*), *Sagittaria variabilis*—w. Beetle, *Galaxaphylla*—w. Breast, *Saurus cernuus*—w. in the Breast, see Mastitis—w. Butter, *Erigeron Canadense*—w. Cancer, *Goodyera pubescens*—w. Dyer's, *Reseda luteola*—w. Field, *Anthemis cotula*—w. Horse, *Erigeron Canadense*—w. Horsefly, *Sophora tinctoria*—w. Milk, *Apocynum androsaemifolium*—w. Phthisis, *Ludwigia palustris*—w. Pride, *Erigeron Canadense*—w. Red, *Phytolacca decandra*—w. Silver, *Potentilla anserina*—w. Soldiers', *Matico*—w. Thimble, *Rudbeckia laciniata*—w. Wind, *Asclepias tuberosa*.

WEEPING, (from [Sax.] *wēopan*, 'to weep,') *Fletus*—w. Tear, Tear.

WEESEL, Trachea.

WEID, (Weed,) see Mastitis.

WEIGHT, (from [Sax.] *wægan*, 'to weigh;') (F.) *Pesanteur*, see Stature. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.

WEIGHTS AND MEASURES, *Pondera et Mensuræ*, (F.) *Poids et Mesures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not yet generally adopted. The greatest diversity, indeed, prevails in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

WEIGHTS.

Troy Weights, as used by the British Apothecaries, —*Pondus pharmaceuticum seu medicinale*.

|             |     |            |              |
|-------------|-----|------------|--------------|
| The pound   | lb  | } contains | 12 ounces.   |
| The ounce   | ʒ   |            | 8 drachms.   |
| The drachm  | ʒ   |            | 3 scruples.  |
| The scruple | ʒ   |            | } 20 grains. |
| The grain   | gr. |            |              |

These, and the signs by which they are denoted,

have been the same in all the British Pharmacopœias, as well as in the American.

|     |      |          |          |        |
|-----|------|----------|----------|--------|
| lb. | Oz.  | Drachms. | Scruple. | Gr.    |
| 1   | = 12 | = 96     | = 288    | = 5760 |
|     | 1    | = 8      | = 24     | = 480  |
|     |      | 1        | = 3      | = 60   |
|     |      |          | 1        | = 20   |

Poids de Marc.

|             |            |              |
|-------------|------------|--------------|
| The pound   | } contains | 16 ounces.   |
| The ounce   |            | 8 drachms.   |
| The drachm  |            | 3 scruples.  |
| The scruple |            | } 24 grains. |
| The grain   |            |              |

Avoirdupois.

|        |         |          |              |
|--------|---------|----------|--------------|
| Pound. | Ounces. | Drachms. | Troy grains. |
| lb. 1. | = 16    | = 256    | = 7000       |
|        | 1       | = 16     | = 437.5      |
|        |         | 1        | = 27.34375   |

The avoirdupois drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains avoirdupois=7000 grains troy, and hence 1 grain troy = .97 grain avoirdupois.

The *Poids de Marc* is that employed by the French Pharmacians, when the new weights are not. The Avoirdupois has been used by the Dublin College.

To avoid the danger of mistakes by confounding the troy and the avoirdupois pounds, the term *pound* has been discontinued in the formulæ of the Ph. U. S. 1863—the desired weight being expressed in ounces, each containing 480 grains. The ounce is always written *trounce*; and the *drachm* and *scruple* are disused, their equivalents being expressed in grains. On the other hand, the General Medical Council of Great Britain resolved (1863) that "the weights used in the British Pharmacopœia shall be the Imperial or avoirdupois pound, ounce, and grain; and that the terms *drachm* and *scruple*, as designating specific weights, shall be discontinued." The following are the weights and measures of that Pharmacopœia with their symbols.

WEIGHTS.

|                       |          |              |
|-----------------------|----------|--------------|
| The Avoirdupois pound | = 16 oz. | = 7000 grs.  |
|                       | 1 oz.    | = 437.5 grs. |
|                       | 1 gr.    | = 1 gr.      |

MEASURES.

|                        |                   |                     |
|------------------------|-------------------|---------------------|
| C. 1 gallon            | = 8 pints         | weighing 10 pounds. |
| O. 1 pint              | = 20 fluid ounces | " 1 1/4 "           |
| fi. oz. 1 fluid ounce  | = 8 fluid drachms | " 437.5 grs.        |
| fi. dr. 1 fluid drachm | = 60 minims       | " 54.65 "           |
| ℥. 1 minim             |                   | " .91 "             |

The gallon holds 10lb avoirdupois of distilled water, at a temperature of 60° Fahrenheit.

The measures in the Ph. U. S., 1863, have the same names as in the British; but their value is different; the pint weighing 16 oz. 291.2 grs. avoirdupois, and the fluidounce 455.7 grs. In the formulæ, the Acids and the Oils are ordered by weight; other liquids by measure. The gallon is not used, that measure being always expressed in pints. In Continental Europe all medicines are weighed, and the gramme is becoming universal in use.

The following tables exhibit the relative value of the old French and English weights:

|                        |                  |                |                  |
|------------------------|------------------|----------------|------------------|
| <i>Poids de Marc.</i>  | <i>Troy. Wt.</i> | <i>Avoird.</i> | <i>Troy grs.</i> |
| 1 pd. ( <i>livre</i> ) | = 1.31268lb      | = 1.080143lb   | = 7561           |
| 1 oz. ( <i>once</i> )  | = .984504oz      | = 1.080143oz   | = 472.5625       |
| 1 dr. ( <i>gros</i> ). | = .954504dr      | =              | = 59.0703125     |
| 1 gr.                  | =                | =              | = .820421        |

|                     |                       |                       |
|---------------------|-----------------------|-----------------------|
| <i>Troy.</i>        | <i>Poids de Marc.</i> | <i>French grains.</i> |
| 1 pound =           | 0.76180 lb. =         | 7561                  |
| 1 ounce =           | 1.01574 once =        | 585.083               |
| 1 drachm =          | 1.01574 gros =        | 73.135                |
| 1 grain             |                       | 1.219                 |
| <i>Avoirdupois.</i> | <i>Poids de Marc.</i> | <i>French grains.</i> |
| 1 pound =           | 0.925803 lb. =        | 8532.3                |
| 1 ounce =           | 0.925803 once =       | 533.27                |

VALUES OF THE GRECIAN, ROMAN, AND ARABIAN WEIGHTS AND MEASURES IN POIDS DE MARC.

1. *Weights of the Ancient Greeks.*

|                              | lbs. | oz. | dr. | gr. |
|------------------------------|------|-----|-----|-----|
| The talent (ταλαντον).....   | 54   | 2   | 5   | 24  |
| The mina (μνᾶ).....          | 14   | 3   | 40  |     |
| The drachm (δραχμη).....     |      |     | 1   | 11  |
| The obolus (οβολος).....     |      |     |     | 13  |
| The ceration (κερατιον)..... |      |     |     | 4   |
| The chalcus (χαλκος).....    |      |     |     | 2   |
| The septim (σιπτον).....     |      |     |     | 1/8 |

2. *Weights of the Ancient Romans.*

|   | oz. | dr. | gr.  |
|---|-----|-----|------|
| The pound (libra).....                      | 10  | 6   | 48   |
| The ounce (uncia).....                      |     | 7   | 16   |
| The duella.....                             |     |     | 2 29 |
| The sicilius.....                           |     |     | 1 58 |
| The sextula.....                            |     |     | 1 14 |
| The consular denier, denarius.....          |     |     | 1 2  |
| The imperial denier or drachm, drachma..... |     |     | 65   |
| The victoriatum.....                        |     |     | 37   |
| The scriptulum or scrupule.....             |     |     | 21   |
| The obolus.....                             |     |     | 11   |
| The siliqua.....                            |     |     | 4    |

The Greeks divided their obolus into *chalcæ* and *lepta*; some divided it into 6 *chalcæ*, and each *chalcus* into 7 *lepta*; others into 8 *chaici*, and every *chalcus* into 8 *lepta* or *minuta*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

|                           | Urna. | Libra.  | Uncia.   | Denarius. | Scrupulus. | Sextans. | Chalcus. | Grana.   |

| Chalcus.....              |       | = 1     | = 11     | = 11      | = 11       | = 11     | = 11     | = 11 3/4 |

He gives also the following 'Carmen Mnemonicum,' which exhibits the analogies of the Roman and British imperial weights.

Το το the congius and gallon, each, ten pounds allow,  
 On the bushel and amphora eighty bestow;  
 Rome's pound, as in Troy weight, twelve ounces obtains,  
 But her ounce is Abordupois, strictly, in grains:  
 Denarii drams, scruples scrupli define,  
 Septarius answers to our bottle of wine,  
 And the mina's a sport pint—fourteen ounces in fine.

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii. p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

- A *glassful* or *cupful*, ([F.] *Verre*), is reckoned to contain 4 or 5 fluidounces.
- A *wineglassful*, 1½ ounce or two fluidounces.
- A *tablespoonful*, ([F.] *Cuiller à bouche*), about half a fluidounce.
- A *coffee* or *dessertspoonful*, about 3 fluidrachms.
- A *teaspoonful*, a fluidrachm.
- A *handful*, *manipulus*, ([F.] *Poignée*), as much as can be held in the hand.
- The *Pugillus* ([F.] *Pincée*) is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

|  | French. | oz. | dr. |
|--|---------|-----|-----|
| A <i>Manipulus</i> of barley weighs..... | 3       | 2½  |     |
| “ linseed .....                          | 1       | 4   |     |
| “ linseed meal.....                      | 3       | 3   |     |
| “ dried mallow leaves.....               | 1       | 3   |     |
| “ dried cichory leaves.....              | 1       | 0   |     |
| “ flowers of the tilia.....              | 1       | 2½  |     |

|  | dr. | gr. |
|--|-----|-----|
| A <i>Pugillus</i> of chamomile flowers weighs..... | 2   |     |
| “ arnica .....                                     | 1   | 48  |
| “ marshmallow.....                                 | 1   | 24  |
| “ mallow.....                                      |     | 50  |
| “ fennel seeds.....                                | 1   | 60  |
| “ anised.....                                      | 1   | 12  |

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WEILBACH, MINERAL WATERS OF. The village of Weilbach is in the plain between the Maine and the southern extremity of the Taunus hills. It has in its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

WEINTRAUBENKUR, Grape cure.

WELCOME TO OUR HOUSE, Euphorbia cyparissias.

WELD, *Reseda luteola*.

WELK, *Wheik*, (like *Wheal*.) An inequality; a protuberance; a cutaneous eruption of this character. *Aene*.

WELTER'S BITTER, Acid, carbazotic.

WEM, (Womb,) Belly, Uterus.

WEM'DING, MINERAL WATERS OF.

These waters are situate about four leagues from Donauwörth, in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, ([Sax.] *pen*.) *Lu'pia*, (F.) *Loup*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocœle.

WESTERN ISLANDS, Azores.

WEST INDIES, CLIMATE OF. The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WEST'S SPRING, see South Carolina, mineral waters of.

WET STRAPPING, see Water dressing.

WHAHOO, see Eponymus.

WHAMP, Wasp.

WHARTON'S DUCT, (after Dr. Thomas Wharton, an English anatomist,) Ductus salivaris inferior.

WHEAL, ([Sax.] *Palan*, 'marks of stripes,') *Weal*, *Wale*, *Pom'phus*. A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

WHEAT, ([Sax.] *hƿæte*.) *Triticum*—w. Indian, *Zea mays*—w. Turkey, *Zea mays*.

WHEEZE, ([Sax.] *hƿeoƿan*.) (Prov.) *Rez'zle*, (formed probably, like *whiz* and *whisper*, from the sound it expresses.) To breathe with difficulty and noise, as in asthma.

WHELK, (like *wheal*), *Acne*, *Welk*—w. Chin, *Sycosis*—w. Rosy, *Gutta rosea*.

WHETLEBONES, *Vertebræ*.

WHEY, ([Sax.] *hƿæg*.) *Serum lactis*.

WHEY CURE, (G.) *Molkenkur*, (F.) *Cure de petit lait*. In the Kursaal of many of the German watering places, a space is set apart for whey drinkers. The whey is a pleasant diluent, and the saccharine matter it contains may act as a eutrophic; but the main effect on the valetudinarian is probably produced by the new impressions made upon him by his visit to the watering place.

WHEY, MUSTARD, see *Sinapis*—w. Rennet, see *Serum lactis*—w. Sack, *Winewhewy*—w. Tamarind, see *Tamarindus*—w. Vinegar, see *Acetum*—w. Wine, *Winewhewy*.

WHICKFLAW, *Whitlow*.

WHIFFING MURMUR, see *Murmur*, respiratory.

WHIG, ([Sax.] *hƿæg*.) *Buttermilk*, *Serum lactis*.

WHIMBERRY *Vaccinium myrtillus*.

WHIRLING CHAIR, see *Chair*.

WHISKY, see *Spirit*.

WHISKY LIVER, *Liver*, *nutmeg*.

WHISPER, CAVERNOUS, see *Cavernous*.

WHIS'PERING, *Vox clandest'na*, (from [Sax.] *hƿǣppian*, 'to whisper,') An example of onomatopœia. *Susurra'tio*, *Susurra'tion*. Articulation of the air sent through the vocal tube without any action of the glottis.

WHISPERING SOUFFLE, see *Souffle*.

WHISTLING, (a case of onomatopœia, from [Sax.] *hƿǣflan*, 'to whistle,') *Sifflement*, see *Râle sibilant*.

WHITE BALL, *Cephalanthus occidentalis*—w. Blisters, *Rupia escharotica*.

WHITE, FLAKE, *Plumbi subcarbonas*.

WHITE LEAF, *Pyrola maculata*, *Spiræa tomentosâ*—w. Leg, *Phlegmatia dolens*—w. Matter of the brain, see *Cerebrum*—w. Root, *Angelica lucida*, *Asclepias tuberosa*, *Ligusticum actæifolium*.

WHITE, SPANISH, *Bismuth*, *subnitrate of*.

WHITE SUBSTANCE OF SCHWANN, see *Nerve fibre*—w. Sulphur, see *Virginia*, *mineral waters of*—w. Swelling, *Hydrarthrus*—w. Swelling of

lying-in women, Phlegmatia dolens—w. Weed, Chrysanthemum leucanthemum—w. Wood, Liriodendron, Tilia Americana.

WHITENESS OF COMPLEXION, Paleness.

WHITES, THE, Leucorrhœa.

WHITLEYA STRAMONIFOLIA, (after Whitley, an English botanist,) Anisodus luridus.

WHITLOW, ([Sax.] hþit, 'white,' and low, 'a flame,') Paronychia.

WHOOPINGCOUGH, (from the attendant whoop,) Pertussis.

WHORLYWORT, Leptandria purpurea.

WHORTLEBERRY, Vaccinium myrtillus, Vaccinium vitis idæa—w. Bears', Arbutus uva ursi.

WHORTS, BLACK, Vaccinium myrtillus.

WHYTT'S DISEASE, (after Dr. Robt. Whytt, of Edinburgh,) Hydrocephalus internus.

WIDOWWAIL, Cneorum tricoccum, Daphne Alpina.

WIESBADEN, MINERAL WATERS OF, see Wiesbaden.

WIESSAU, MINERAL WATERS OF. These waters are situate about four leagues from the convent of Waldsassen in Bavaria. They contain carbonic acid, carbonates of lime and magnesia, chlorides of calcium, magnesium, and aluminium, carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, ([Sax.] wilb.) An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong mental emotion;—a *wild look*, (F.) *Physiognomie égarée*.

WILDBAD, MINERAL WATERS OF. Wildbad is a small town of Wurtemberg, three German miles from Baden-Baden. It is much frequented as a watering-place. The water is thermal, from 95° to 100° of Fah., and is much employed in cases in which thermal waters are indicated. It is used internally, a pint not containing more than a grain of solid ingredients, which consist of salts of soda and lime. The proportion of carbonic acid gas is very small.

WILDFIRE, Erysipelas.

WILDFIRE RASH, Ignis sylvaticus.

WILDUNGEN, MINERAL WATERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighborhood are several mineral springs, the chief of which, according to Stucke, contain a bituminous matter, chloride of sodium and sulphate of soda, carbonate and sulphate of lime, &c. They are used chiefly as refrigerants.

WILL, ([Sax.] willa,) Voluntas.

WILLAN, Salix.

WILLOW, ([Sax.] wileg,) Salix—w. Bedford, Salix fragilis—w. Broadleaved, Salix latifolia—w. Crack, Salix fragilis—w. Great roundleaved, Salix caprea—w. Herb, common, Lythrum salicaria—w. Herb, great, Epilobium angustifolium—w. Herb, purple, Lythrum salicaria—w. Herb, purple veined, Epilobium coloratum.

WILLOW, LOW BUSH, Salix humilis—w. Red, Cornus sericea—w. Rose, Cornus sericea—w. Speckled, Salix humilis—w. Sweet, Myrica gale—w. White, Salix alba.

WIND, ([Sax.] wind,) (an example of onomatopœia—*ooid*.) *Ventus*, *An'emos*, (F.) *Vent*. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness, and by the emanations of different kinds which they transport to greater or less distances. The winds which blow over a considerable extent of country are dry and serene: those which come from the ocean are moist and chilly.

WIND, Breath, see Flatulence.

WIND OF A BALL OR SHOT. A term applied to

the compression of air, supposed to be produced by the passage of a ball near a part of the body, so as to occasion what has been called a *wind contusion*.

WIND CONTUSION, see Wind of a Ball—w. Dropsy, Emphysema, Tympanites—w. Flower, Anemone—w. Pipe, Trachea—w. Root, Asclepias tuberosa—w. Weed, Asclepias tuberosa.

WINDINESS, Flatulence.

WIND'Y, *Flatulentus*, *Flat'ulent*, *Va'porous*, (F.) *Venteux*, *Flatueux*. That which causes wind or flatulence; also, that which is caused by wind or flatulence; as *windy food*, *windy colic*, &c. Also, one affected with flatulence, or who is 'troubled with the wind.'

WINE, ([Sax.] win, [G.] Wein, originally, perhaps, from *ovos*.) *C'nos*, *Vinum*, *Meth'u*, (F.) *Vin*. A name given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape, or of fruits, the product of whose fermentation resembles, in almost all respects, that of the juice of the grape. Wine is composed of alcohol, ænanthic ether, saccharine matter, malic acid, tartaric acid, bitartrate of potassa, acetic acid, an extractive colouring matter more or less bitter and partly resinous, and of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation. In all wines, too, there is more or less of an odorous principle, partly derived directly from the grape, and partly formed during fermentation, which has the characters of an essential oil, constitutes the perfume or *bouquet* of the wine, and is said not to exceed the forty-thousandth part of the wine. It is regarded as a true ether—a combination of oxide of ethyle with ænanthic acid.

The following table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more branded or "reinforced" than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked that some of the wines analyzed by Mr. Brande were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

PROPORTION OF ALCOHOL, S. G. 0.825, IN ONE HUNDRED PARTS BY MEASURE OF THE FOLLOWING WINES, AND MALT AND SPIRITUOUS LIQUORS.

The only wine recommended in some pharmacopias is *Sher'ry*, *Vinum*, *V. al'bum*, *V. al'bum Hispan'icum*, *V. Xer'icum*, *Leuce'nus*. It is a *dry wine*; and least variable in its properties, and agrees best with the dyspeptic. The *brown sherries* differ from the *pale* in the addition of a colouring liquid to the former, termed *Arrope*, which

(c) 14-50 H.

(d) 12-91 H.

is prepared by boiling sherry down to a syrup; but they frequently owe their hue to burnt sugar or caramel. Other wines used officially are,—*Canary* or *Sack wine*, *Vinum Canari'num*; *Mountain wine*, *Vinum al'bum montanum*; *Tent wine*, *Vinum tinto*; *Rhen'ish wine*, *Vinum Rhena'num*; and *Port wine*, *Vinum ru'brum*, *V. rubrum Portugall'icum*, *V. Porten'se*.

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

*Mulled Wine* is made as follows:—Take of bruised *Cinnamon* ℥i, half a *Nutmeg*, grated, and ten bruised *Cloves*. Infuse in *boiling Water* Oss for an hour; strain, and add *Sugar* ℥j. Pour the whole into a pint of hot *Port* or *Sherry*. Useful in adynamic conditions.

WINE, AMINEAN, Aminæum vinum.

WINE OF ALOES, Vinum aloes.

WINE, ANTIMONIAL, Vinum antimonii—w. Antiscorbutic, Vinum antiscorbuticum—w. Aromatic, Vinum aromaticum—w. Bark, compound, Vinum de kinâ kinâ compositum—w. Barley, Cerevisia—w. Bitter, diuretic, Vinum diureticum amarum.

WINE BITTERS, *Vinum genti'asæ compositum*. The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentian.* ℞ij, *Cort. aurant.* ℥x, *Sem. cardam.* cont. ℥iv, *Cinam.* cort. ℥iv, *Wine*, foreign or domestic, three gallons and a half.) Tonic and stomachic.

WINE, CEDAR, Cedrinum vinum—w. Champagne, Vinum campanum—w. Chian, Chium vinum.

WINE OF COLCHICUM, Vinum colchici—w. of Colchicum seed, Vinum colchici seminis—w. of Ergot, Vinum ergotæ—w. of Gentian, compound, Vinum gentianæ compositum—w. of Hellebore, white, Vinum veratri.

WINE, IPECACUANHA, Vinum Ipecacuanhæ.

WINE OF IRON, Vinum ferri.

WINE, MEDICATED, Vinum medicinale—w. Mulled, see Wine.

WINE OF OPIUM, Vinum opii.

WINE, PORT, Vinum Portugall'icum—w. Pullet, *Poulet, vin de*.

WINE OF QUINIA, Vinum quiniæ.

WINE, RHUBARB, Vinum rhei—w. Sherry, Vinum—w. Steel, Vinum ferri—w. Tar, see Pinus sylvestris—w. Tobacco, Vinum tabaci.

WINE WHEY, *White wine whey*, (Prov.) *Sack'whey*. Take of good *milk* two-thirds of a pint, and add *water* to make a pint. Take of *sherry*, or any other good white *wine*, two glasses, and of *sugar* a dessertspoonful. Place the milk and water in a deep pan on the fire, and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

WINE, WHITE, see Wine.

WINE OF WORMWOOD, Vinum absinthites.

WINGSEED, *Ptelea trifoliata*.

WINKERS, Cilia.

WINKING, ([Sax.] *wincian*, 'to wink,') *Nictation*, *Scardamygmus*.

WINTER BERRY, SMOOTH, *Prinos lævigatus*—w. Berry, Virginia, *Prinos*—w. Berry

whorled, Prinos—w. Bloom, Hamamelis Virginiana—w. Cough, Bronchitis, chronic—w. Green, Gaultheria—w. Green, roundleaved, Pyrola—w. Green, spotted, Pyrola maculata.

WINTER'S BARK TREE, Wintera aromatica.

WINTERA, (after Captain Winter, who first carried it to Europe), see Wintera aromatica.

WINTERA AROMATICA, *Drymys Winteri*, *Wintera'na aromatica*, *Winter's bark Tree*; Ord. Magnoliaceae. The bark, *Wintera* (Ph. U. S.), *Cortex Wintera'nis* seu *Wintera'nis Magellan'icus*, *C. Magellan'icus*, *Cinnamo'mum Magellan'icum*, (F.) *Écorce de Winter*, *Canelle poivrée*, is very much allied in its properties to *Canella alba*.

WINTERANA AROMATICA, Wintera aromatica.

WIRSUNG'S DUCT, see Pancreas.

WIRTSPRINGS, Hangnails.

WISBADEN, MINERAL WATERS OF.

Wisbaden is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfurt. It has been long celebrated for its hot springs, and is much frequented. There are numerous cold and thermal springs:—the former containing sulphuric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fah.

WISMUTHUM, Bismuth.

WITCHEN, Sorbus aucuparia.

WITCHHAZEL, Hamamelis Virginiana, Sorbus aucuparia.

WITCHMEAL, Lycopodium.

WITCHWOOD, Sorbus aucuparia.

WIT TEETH, see Dentition.

WITTER, (corr. from *guttur*), Throat.

WIZEN, (Weasand), Trachea.

WOAD, ([Sax.] *ðaðo*), Isatis tinctoria.

WOD, ([Sax.] *þoð*), Insane.

WODNES, Insanity, Mania.

WOLFBANE, Veratrum viride.

WOLFSBANE, Aconitum—w. Wholesome, Aconitum anthora.

WOLFSCLAW, Lycopodium.

WOLFSJAW, see Harelip.

WOMAN, pl. *Women*, *Gy'nē*, *Mul'ier*, *Fœ'mina*, *Vī'ra*, (F.) *Femme*, (Sax. *Dy'man*, 'wife-man,' 'woofman.') The adult female of the human race.

WOMANHOOD, Mulieritas.

WOMB, ([Sax.] *wamb*), Uterus—w. Falling down of the, Prolapsus uteri.

WOMB GRAIN, Ergot.

WOMB, LACERATION OF THE, Uterus, rupture of the—w. Tympany of the, Physometra.

WONGE, ([Sax.] *wænge*), Cheek.

WOOD, BRAZIL, *Cæsalpinia echinata*—w. Elk, *Andromeda arborea*.

WOOD LICE, *Oniscus aselli*—w. March, *Sanicle*.

WOOD, NICARAGUA, see *Cæsalpinia*—w. Peach, see *Cæsalpinia*—w. Pernambuco, *Cæsalpinia echinata*—w. Sappan, *Cæsalpinia sappan*—w. Sappan, *Cæsalpinia sappan*.

WOOD SORREL, *Oxalis acetosella*—w. Sorrel, yellow, *Oxalis stricta*.

WOOD, SOUR, *Andromeda arborea*—w. Waxen, *Genista tinctoria*—w. Witch, *Sorbus aucuparia*.

WOODBINE, COMMON, *Lonicera periclymenum*.

WOODROOF, SWEETSCENTED, *Asperula odorata*.

WOODWEX, *Genista tinctoria*.

WOODS, SUDORIFIC, (F.) *Bois sudorifiques*.

This term is applied, collectively, to guaiacum, sassafras, china, and sarsaparilla, which are often used together to form the sudorific decoction.

WOORALI, Curare.

WOORARA, Curare.

WORM, see *Alembic*, Vermiform process and Worms—w. Bark tree, *Geoffraea inermis*—w. Cakes, Story's, see Cakes, worm, Story's—w. Disease, Helminthiasis—w. Goosefoot, *Chenopodium anthelminticum*—w. Grass, perennial, *Spigelia Marilandica*.

WORM, GUINEA, *Draucunculus*.

WORM, LOZ'ENGES, CHING'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges*. (*Saffron*,  $\frac{3}{4}$ ss, *Water*, Oj; boil, and strain; and add of *White panacea of mercury*, (calomel washed in spirit of wine,) ℥ij, *White sugar*, 28 lbs, *Mucilage of gum tragacanth* q. s. to make a mass. Divide, so that each lozenge may contain a grain of the panacea.) The *Brown Lozenges*. (*Panacea*  $\frac{3}{4}$ vij, *Resin of Jalap* ℥iijss, *White sugar* ℥ix, *Mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

SHER'MAN'S WORM LOZENGES, are said to be composed of *calomel*, *gamboge*, and *sugar*.

*Peters's Worm Lozenges* are said to be composed in a similar manner.

WORM ROOT, *Spigelia Marilandica*—w. Seed, *Artemisia santonica*, *Chenopodium anthelminticum*—w. Seed, goosefoot, *Chenopodium anthelminticum*—w. Weed, Corsican, *Corallina Corsicana*, *Polanisia graveolens*—w. Weed, white, *Corallina*—w. Wood, biennial, *Artemisia biennis*—w. Wood, Canada, *Artemisia canadensis*—w. Wood, common, *Artemisia absinthium*—w. Wood, creeping, *Artemisia rupestris*—w. Wood, lesser, *Artemisia Pontica*—w. Wood, Roman, *Artemisia Pontica*—w. Wood, sea, *Artemisia maritima*—w. Wood, silky, *Artemisia glacialis*.

WORMIA'NA OSSA SEU OSSIC'ULA, *O. epact'alia* seu *raphogeminan'tia* seu *triq'uetra* seu *triangula'ria* *Blasii* seu *sutura'rum*, *Claves calva'ris*, *Worm'ian bones*, (F.) *Oss Wormiens* ou *épactaux* ou *surnuméraires* (Ch.) ou *intercalés* ou *triangulaires* ou *Clefs du crâne*. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They are called *Wormia'na*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The *Ossa Wormiana* exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMIT, *Artemisia absinthium*.

WORMS, originally from (L.) *Vermes*; (F.) *Vers*; *Entozoa*, *Entozoa'ria*, *Enterozo'a*, *Endozo'a*, *Entelmint'h'a*, *Euthelmint'h'es*, *Tin'æe*, *Helminth'i*, *Entoparasites*, (F.) *Entozoaires*. Animals whose common character is that of existing only in other animals; (hence their name *entozoa*, from *εντος*, 'within,' and *ζωον*, 'animal.')

They are met with, not only in the natural cavities, but even in the tissue of the organs, but chiefly in the intestines—*Ver'mes intesti'ni*, *Helminthia alvi* seu *pod'icia*, *Splanchnelminth'ia*, *Intestinal worms*, (F.) *Vers intestinaux*, *Angiobromelminthie* of Piorry. Cuvier, Rudolphi, Brera, Bremser, Lænnec, Küchenmeister, and others, have endeavoured to classify them,—some according to their shape; others, according to their anatomical characters.

Worms form the second class of the first group of Animal Parasites according to the classification of Küchenmeister. They are subdivided by him as follows:

VERMES, HELMINTHA.

A. *Platyelmia*, Flat worms, (*πλατυς*, 'flat,' and '*ελμυς*, 'a worm,')

*First Subclass*.—Cestoidea, cestode or tape worms, (*κεστος*, 'a band or girdle,' and *αιωσ*, 'resemblance,')

- First Order—Bothriocephali.
- Bothriocephalus latus.
- Second Order—Tæniæ.

I. Tæniæ, which occur in the mature state.

- 1. Tænia solium.
- 2. Tænia mediocancellata.
- 3. Tænia nana.

II. Immature Tæniæ.

- 1. Cysticercus cellulosæ.
- 2. Cysticercus tenuicollis.
- 3. Echinococci.

Appendix.—Acephalocysts.

- 4. Cysticercus vesicæ hominis.

*Second Subclass*.—Trematoda, (*trema*, and *odes*.)

Family I. Monostoma.

- 1. Monostoma lentis.

Family II. Distoma.

- 1. Distoma hepaticum.
- 2. Distoma lanceolatum.
- 3. Distomum heterophyes.
- 4. Distomum hæmatobium.
- 5. Distomum ophthalmobium.

B. *Nematelmia*, Round or thread worms, (*νημα*, 'a thread,' and '*ελμυς*, 'a worm,')

- 1. Tricocephalus dispar.  
Trichina spiralis.
- 2. Oxyuris vermicularis.
- 3. Strongylus gigas.
- 4. S. longevaginatius.
- 5. Ancylostomum duodenale.
- 6. Ascaris lumbricoides.

The following table exhibits most of the entozoa which have been met with in the human body, and their usual habitats:—

| <i>Entozoa.</i>            | <i>Where found.</i>   |
|----------------------------|-----------------------|
| Trichoceph'alus dispar,    | } Intestines.         |
| Oxyu'ris vermicula'ris,    |                       |
| As'caris ala'ta,           |                       |
| As'caris lumbricoi'des,    |                       |
| Ancylos'toma duodenale,    |                       |
| Bothrioceph'alus latus,    |                       |
| Tæ'nia so'lium,            | } " and Liver.        |
| Pentas'toma constrictum,   |                       |
| Tæ'nia nana,               | } Intestines and Ve-  |
| Distoma hæmato'bium,       |                       |
| Ditrachy'eras rudis, (?)   | } Intestines.         |
| Diplos'oma crena'tum,      |                       |
| Spirop'tera hom'inis,      | } Urinary bladder.    |
| Dactyl'ius aculea'tus,     |                       |
| Dis'toma hepat'icum,       | } Gall bladder.       |
| Dis'toma lanceola'tum,     |                       |
| Stron'gylus gigas,         | } Hepatic duct.       |
| Tetras'toma rena'te,       |                       |
| Fila'ria oc'uli,           | } Eye.                |
| Monos'toma lentis,         |                       |
| Dis'toma oc'uli huma'ni,   | } Capsule of crystal- |
| Acephalocyst'is endog'ena, |                       |
| Echinococ'cus hom'inis,    | } Liver, Spleen, and  |
| Polys'toma pinguic'ola,    |                       |
| Hexathyrid'ium pinguic'ola | } Ovary.              |
| Polys'toma vena'rum seu    |                       |
| sanguic'ola,               | } Veins.              |
| Hexathyrid'ium venarum,    |                       |

|                             |                     |
|-----------------------------|---------------------|
| Fila'ria bronchia'lis,      | } Bronchial glands. |
| Trich'ina spira'lis,        |                     |
| Cysticer'cus cellulo'sæ,    |                     |
| Acephalocyst'is multifi'da, |                     |
| Fila'ria medinen'sis,       | } Muscles.          |
|                             |                     |
|                             | } Brain.            |
|                             |                     |
|                             | } Areolar texture.  |
|                             |                     |

The most common of these are:—the Oxyuris vermicularis, Ascaris lumbricoides, and Tæniæ, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptoms, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes. See Anthelmintics.

WORMS, Acne punctata.

WORSUM, (from [Sax.] *wǽrn*, 'pus,') Pus.

WORT, *Mustum*, *Infusum By'nes* seu *By'd'sii* seu *Malt'i*, (F.) *Moté de la Bière*. An infusion of malt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WORT, (Sax. *wǽrt*.) Herb.

WORTWALE, Hangnail.

WOSEN, (Weasand,) Trachea.

WOUND, (Sax. *wund*.) *Vul'nus*, (diminutive *Vulnus'culum*), *Vol'nus*, *Pla'ga*, *Trauma*, *Tro'ma*, *Tre'sis*, *Tre'sis Vul'nus*, *Bl'a'bè*, *Tym'ma*, (F.) *Plaie*, *Blessure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure*, *Incision*, when made by a cutting instrument;—*punctured*, *Nygg'ma*, (F.) *Piqure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned*, *Celtitli'tis venena'ta*, *Necro'sia*, (F.) *Plaie évenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gun'shot wounds*, *Sclopetopla'ge*, *Vul'nera sclopetaria* seu *sclopetis* seu *Sclopet'ica*, (F.) *Plaies d'armes à feu* ou *d'arquebuse* ou *d'arquebuse*, *Coup de feu*, belong to the last division.

WOURAL, Curare.

WOURARI, Curare.

WOURARU, Curare.

WOURSUM, ([Sc.] from [Sax.] *wǽrn*, 'pus,') Pus.

WRACK BLADDER, YELLOW, (F.) *Varce*, *Fucus vesiculosus*—w. Sea, *Fucus vesiculosus*, *Pila marina*.

WRAMP, Sprain.

WRAPPING UP, (of the hydropathists,) *Enveloppement*.

WRACK, Nouns.

WRENCH, (from [Sax.] *wringan*, 'to wring,') Sprain.

WRET, 'Wart,' *Verruca*.

WRETWEED, *Euphorbia palustris*.

WRICK, Sprain.

WRIGHTIA ANTIDYSENTERICA, (after Dr. Wright, a physician and botanist of Jamaica,) Nerium antidysentericum.

WRINK'LE, (Sax. *Wrinkle*.) *Ru'ga*, *Rhy'tis*, *Ry'tis*, *Rha'cus*, *Rha'chus*, *Rha'gus*, *Rhy'sse'ma*, *Corru'ga tio cul'tis*, *Ruelles*, (Sc.) *Ru'n'kle*, *Ru'n'kill*, (Prov.) *Crin'kleerun'kle*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See *Corrugation*.

WRINKLED, *Rugo'sus*, *Ru'gous*, *Ru'gose*, (F.) *Ridé*. Full of wrinkles.

WRIST, ([Sax. *Wrist*, from *Wristan*, 'to wrest,') *Carpus*.

WRISTDROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITER'S SPASM, see *Spasm*, writers'.

WRONG HEIB, *Cancellus*.

WURALI, *Curare*.

WURSTGIFT, 'sausage poison,' Allontoxicum.

WRYNECK, *Torticollis*.

## X.

X LEG, *Entogonyancon*.

XALAPPA, *Convolvulus jalapa*.

XANTHIC OXIDE, *Uric oxide*

XANTHINE, *Uric oxide*.

XANTHIUM, *X. Strumarium* seu *Orientalé*, seu *Vulga'rè*, *Barda'na mi'nor*, *Lap'pa mi'nor*, *Les'ser Bur'dock*, *Bur'weed*, *Bur'this'tle*, *Clo'tbur*, *Cockle'bur*, (F.) *Lampourde*, *Petit Glouteron*, *Petite Bardane*, (from *xanthos*, because of the colour the plant yields.) This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHIURIA, *Xanthuria*.

XANTHOPIGRIN and XANTHOPICRITE, (*ακρος*, 'bitter,') see *Xanthoxylum clava Herculis*.

XANTHOP'SIA, (from *xanthos*, and *οψις*, 'vision,') Yellow vision, — as sometimes occurs in jaundice.

XANTHORRHIZA, (*xanthos*, and *ρίζα*, 'root,') *Xanthorrhiza apiifolia*.

XANTHORRHIZA APIFO'LIA, *Xanthorrhiza*, *X. simplicis'sima* seu *Marbo'ica*, *Xanthorrhiza tinctoria*, *Yel'lowroot*, *Par'sley-lea'ved Yel'lowroot*, *Yel'lowroot*, *Shrub yel'lowroot*. The root of this American plant — *Xanthorrhiza*, (Ph. U. S.) — is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHORRHE'A, (*xanthos*, and *ρῆμα*, 'to flow,') from its yellow resin, *Grasstree*. A genus of trees in Australia, *Nat. Order*, *Liliaceae*, of which there are several species. Two resins are obtained from them; one the *yel'low res'in of Xanthorrhæa* or of *New Hol'land*, *Res'ina lu'tea No'vi Bel'gii*, *Bot'any Bay res'in* or gum, *Ac'aroid res'in* or gum, *Res'ina vel Gum'mi acaroid'es*, which probably resembles *tolu* and *storax* in medicinal properties; the other the *red resin of Xanthorrhæa*, *Blackboy gum*.

XANTHOS, (*ξανθος*,) Yellow.

XANTHOSIS, *Xanthose*, (from *xanthos*, and *οσις*,) A term applied to the yellow discoloration often observed in cancerous tumours — especially in encephaloid of the testicle.

XANTHOXYLIN, see *Xanthoxylum clava Herculis*.

XANTHOXYLUM, (*xanthos*, and *ξύλον*, 'wood,') *X. Fraxin'eum*, *X. America'num*, *X. fraxinifolium*, *X. ramiflorum*, *X. tricar'pum*, *Prick'ly ash*, *Shrub'by prick'ly ash*, *Tooth'ache bush*, *Tooth'ache tree*, *Pell'itory*, *Yel'lowwood*, *Su'terberry*. *Ord.* *Xanthoxylaceæ*. A spirituous infusion of the bark — *Xanthoxylum* — Ph. U. S. — has been highly recommended in cases of violent *o'lic*. The fresh juice, expressed from the root of *xanthoxylum*, is said to afford relief in

the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHOXYLUM CAROLINIA'NUM has similar properties; but is more acrid.

XANTHOXYLUM CLA'VA HER'CVLIS of the West Indies, (F.) *Clavaler à feuilles de frêne*, *Frêne épineux*, is a very strong stimulant and powerful sialogogue; and has been given internally in rheumatism. A neutral, very bitter, and astringent substance has been obtained from it, called *Xanthop'erin*, *Xanthop'erite*, and *Xanthox'ylin*.

XANTHOXYLUM FRAXINEUM, *Xanthoxylum* — *x. Fraxinifolium*, *Xanthoxylum*.

XANTHOXYLUM OCTANDRA, *Fagara octandra* — *x. Piperitum*, *Fagara piperita* — *x. Ramiflorum*, *Xanthoxylum* — *x. Tricar'pum*, *Xanthoxylum*.

XANTHURIA, *Xanthuria*, (from *xanthos*, and *ουρον*, 'urine,') A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTOLINA, *Artemisia santonica*.

XENODOCEUM, (*ξενόδοceον*, from *ξενος*, 'a stranger,' and *δοceμαι*, 'to receive,') *Hospital*.

XENODOCHEUM, (*ξενόδοceον*,) *Hospital*.

XERANSIS, (*ξηρανσις*, from *ξηρος*, 'dry,') *Arefaction*, *Drying*.

XERANTIA, (from *ξηρος*, 'dry,') *Siccantia*.

XERA'SIA, (from *ξηρος*, 'dry,') A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.

XERION, (from *ξηρος*, 'dry,') *Catapasma*.

XERO, (from *ξηρος*, 'dry,') in composition, dry.

XEROCOLLYRIUM, (*xero*, and *κολλυριον*, 'a collyrium,') *Colly'rium sic'cum*. A dry collyrium.

XERODER'MA, gen. *Xeroder'matis*, (*xero*, and *δερμα*, 'skin,') Diminution of secretion of the sebaceous glands.

XEROMA, gen. *Xero'matis*, (*xero*, and *ομα*,) *Xerophthalmia* — *x. Conjunctival*, *Xerophthalmia*.

XEROMA, LACH'RYMAL. Suppression of the lachrymal secretion. See *Xerophthalmia*.

XEROMYCTER, *Xeromycteria*.

XEROMYCTE'RIA, *Xeromycter*, (*xero*, and *μυκτηρ*, 'the nose,') *Dryness of the nose*.

XEROMYRON, *Unguentum sic'cum*, (from *xero*, and *μυρον*, 'an ointment,') A dry ointment.

XEROPHAG'IA, (*xero*, and *φαγω*, 'I eat,') Excessive use of dry aliment. A kind of regimen to which the ancient athletes subjected themselves, with the view of increasing their strength.

XEROPHTHALM'IA, *Ophthalmia sic'ca*, *Ophthalmoxero'sis*, *Xero'ma*, (*xero*, and *οφθαλμια*, 'inflammation of the eye,') An inflammation of the eye, without discharge. The term — as well as *Conjunctival* and *Lach'rymal Xero'ma*, and *Cat'icular Conjunctiva* — has been given to cases

lu which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lippitudo.

XEROTRIBIA, (*xero*, and *τριβω*, 'to rub,') see Friction.

XEROTRIPSIS, Friction, dry.

XIPHISTERNUM, (*xipho*, and *sternum*,) Xiphoid.

XIPHO, (from *ξίφος*, 'a sword,') in composition, the ensiform cartilage.

XIPHODES, Xiphoid.

XIPHODYMUS, (*xipho*, and *δυνω*, 'to mingle,') Thoracogastrodium.

XIPHOID, *Xiphoides*, *Xiphodes*, *Eusiformis*, *xipho*, and *εἰός*, 'shape,') *Cartilago Xiphoides* seu *Xiphoides* seu *Scutalis* seu *Eusiformis* seu *Peltalis* seu *Peltatus*, *Furcula inferior*, *Mucronatum* os, *Mucronata Cartilago*, *Chondrus*, *Processus ciphosteroidis* seu *xiphoides* seu *Sterni xiphoides*, *Xiphisternum*, *Eusiform cartilage*, (F.) *Appendice ou cartilage xiphode*, *C. Mucroné*, *Appendice sous-sternale*, *Palette*. The name of the appendix which terminates the sternum beneath.

XIPHOID LIGAMENT, *Costoxiphoid L.* (F.) *Ligament xiphoidien ou costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib

to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOPAGES, *Didymus Symplyphoepigas-trius*, (*xipho*, and *πηγομη*, 'I fix,') A monstrosity, in which twins are united by the epigastric, as in the case of the Siamese twins.

XYLOALOES, (*ξύλον*, 'wood,' and *aloes*,) *Agaloechum*—x. *Balsamum*, see *Amyris opobalsamum*—x. *Cassia*, *Laurus cassia*—x. *Cinnamcum*, *Laurus cinnamomum*.

XYMPATHIA, Sympathy.

XYRIS, (from *ξύρον*, 'a razor,' from the shape of its leaves,) *Iris foetidissima*.

XYRIS BULBO'SA, *X. Indica* seu *Caroliniana*, *Yellow-eyed Grass*; indigenous; *Order*, *Xyridaceæ*; flowering from July to September. The roots and leaves are said to be used by the Hindoos in lepra, and chronic cutaneous diseases in general.

XYRUM, (*ξύρον*,) *Novacula*.

XYRUS, (*ξύρος*,) *Novacula*.

XYSMA, (*ξύσμα*,) *Linteam*, *Rasura*, *Scobs*.

XYSMUS, (from *ξύω*, 'to scrape,') *Rasura*.

XYSTER, (*ξύστης*,) *Raspatorium*.

XYSTOS, (*ξύστος*, 'scraped,') *Linteam*.

XYSTRUM, (*ξύστρον*,) *Raspatorium*—x. *Ophthalmicum*, *Ophthalmoxyster*.

## Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea*,—*alata bulbifera*, and *sativa*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like that of the potato.

YAM ROOT, WILD, *Dioscorea villosa*.

YARD, ([Sax.] *γάρδ*), *Penis*.

YARROW, COMMON, ([Sax.] *gearpe*), *Achillea millefolium*.

YAUPON, *Ilex vomitoria*.

YAVA SKIN, *Elephantiasis Arabum*.

YAWN'ING, (from [Sax.] *geonan*, 'to yawn,') *Chas'mé*, *Chas'mus*, *Hiat'us*, *Ric'tus*, *Osc'edo*, *Oscitatio*, *Clo'nus pandiculatio maxilla'rum*, *Ga'ping*, (F.) *Baillenent*. Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *enuni*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency and obstinacy, become a true disease.

YAW ROOT, *Stillingia*.

YAWS, *Frambæsia*.

YEAST, *Yest*—y. *Plant*, *Torula cerevisiæ*.

YEBLE, (from *Ebulus*,) *Sambucus ebulus*.

YECKE, (*Yuke*,) *Psora*.

YELK, ([Sax.] *gealep*, 'yellow,') see *Ovum*.

YELLOW, (*Yellow*,) *Icterus*.

YELLOW, ([Sax.] *gealep*,) *Fla'vus*, *Lut'eus*, *Xan'thus*, (from past participle of Sax. *gealan*, 'to burn,') One of the seven primitive colours.

YELLOW ASH, *Cladrastis tinctoria*—y. *Berry*, *Podophyllum montanum*—y. *Fever*, see *Fever*,

yellow—y. *Fever*, mild, see *Relapse*—y. *Jack*, *Fever*, yellow.

YELLOW LIGAMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the vertebral plates, from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAINT, *Hydrastis Canadensis*—y. *Root*, *Jeffersonia Bartoni*—y. *Root*, *parsley-leaved*, *Xanthorrhiza apiifolia*—y. *Root*, *shrub*, *Xanthorrhiza apiifolia*.

YELLOW SPRING, see *Ohio*, mineral waters of.

YELLOW SPRINGS. These are in Chester county, Pennsylvania. The temperature of the chief spring is 52° Fah. The water contains no impregnation.

YELLOW STAR, *Helenium autumnale*—y. *Weed*, *Ranunculus acris*—y. *Wood*, *Xanthoxylum fraxineum*—y. *Wort*, *parsley-leaved*, *Xanthorrhiza apiifolia*.

YELLOWS, *Cypripedium luteum*, *Icterus*, see *Leucorrhœa*, *Ranunculus acris*.

YEMEN ULCER, see *Berberi*.

YERBA DEL SOLDADA, 'soldier's herb,' *Matico*—y. *de Haaca*, *Datura sanguinea*.

YERNIN, *Rennet*.

YEST, *Yeast*, ([Sax.] *geȳt*, from *ȳrt*, 'a storm,' *ȳrtig*, 'stormy,') *Cerevisiæ Fermentum*, *Sputum Cerevisiæ*, *Barm*, (F.) *Levûre*, *Levûre de la Bière*. A peculiar product which collects on the surface of beer whilst fermenting. *Yest* is antiseptic and tonic. It has been much extolled in putrid fevers,—a tablespoonful being given as a dose, in porter, wine, &c. It is also applied in the form of cataplasm to foul ulcers. In all these cases it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, *Ardent eyes*—y. *d'Écresse*, *Cancerum chelæ*.

YEW TREE, ([Sax.] *ip*,) *Taxus baccata*—y. *American*, *Taxus Canadensis*.

YEWER, see Mamma.  
 YEX, (by onomatopœia.) Singultus.  
 YLECH, Ilech  
 YLIATER, Ilecn.  
 YOKE, (by onomatopœia.) Singultus.  
 YOLK, (Yelk,) see Ovum, and Vesicula umbilicalis—y. Membrane, see Vesicula umbilicalis.  
 YOPON, Ilex vomitoria.  
 YORK SPRINGS. These are in Adams county, Pennsylvania. One of them—a saline, containing sulphates of magnesia and lime, and chloride of sodium—is a mild cathartic and diuretic; the other is a strong chalybeate.  
 Y O U K, ([G.] jucken, 'to itch,') Itching, Psora.  
 YOUNG, Mr. JAMES, DISINFECTANT OF, see Manganese, sulphate of.

YOUTH, ([Sax. *yoorgu*.) Adolescence.  
 YPSELOGLOSSUS, Basioglossus.  
 YRIDES, Orpiment.  
 YSAM'BRA, *Pedigan'bra*. An ancient Spanish poison, of which hellebore formed the greatest part.  
 YSOPE, Hyssopus.  
 YUCCA, (Peruvian name,) *Jatropha manihot*.  
 YUCCA FILAMENTO'SA, *Bear's grass*, *Silkgrass*, indigenous. A tincture of the root has been used in gonorrhœa.  
 Y U K E, ([G.] jucken, 'to itch,') Itching, Psora.  
 YUX, (by onomatopœia.) Singultus.  
 Y-WER-A, see Spirit.

## Z.

ZACCHARUM, Saccharum.  
 ZAEL, Borosail.  
 ZAFFRAN, Crocus.  
 ZAFFRE, Smalt.  
 ZAMBO, see Mulatto, and Sambo.  
 ZAMIA INTEGRIFOLIA, see Arrowroot—z. Pumila, see Arrowroot.  
 ZAN'NA. A kind of Armenian bole, used by the ancients as a desiccative. It was also called *Zarnacha*.  
 ZANTHORRHIZA APIIFOLIA, *Xanthorrhiza apiifolia*.  
 ZANTHOXYLUM, *Xanthoxylum*.  
 ZAPPANIA NODIFLORA, (after P. A. Zappa, an Italian botanist.) *Anacoluppa*.  
 ZARNACHA, Zanna.  
 ZARSA, *Smilax sarsaparilla*.  
 ZARZAPARILLA, *Smilax sarsaparilla*.  
 ZEA MAYS, (*zea* or *zea*, was the ancient name of a sort of corn, from *zaw*, 'to live,') *Z. vulgaris*, *Mays*, *M. ze'a* seu *America'na*, *A'dor*, *In'dian Corn*, *Corn*, *Turk'ey* or *In'dian Wheat*, *Maize*, *Mayz*, (F.) *Mais*, *Graine de Turquie*, *Blé d'Inde* ou *d'Espagne* ou *d'Italie* ou *de Turquie*. Ord. Gramineæ. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread. The fecula or starch—*corn starch*, *maize'na*—makes an agreeable aliment; four tablespoonfuls of the starch to a quart of milk; boiled for a few minutes. It may be sweetened and flavoured, and eaten like *Wanemanger*.  
 ZÉDOAIRE ROND, *Kæmpferia rotunda*.  
 ZEDOARIA, *Kæmpferia rotunda*—z. Longa, see *Kæmpferia*—z. Rotunda, see *Kæmpferia*.  
 ZEDOARY, *Kæmpferia rotunda*.  
 ZELOSIS, (*ζηλωσις*.) *Zelotypia*.  
 ZELOTYP'IA, (from *ze'los*, 'love,' and *τυπος*, 'form,' 'model,') *Zelo'sis*. It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection;—melancholy, mania, &c.  
 ZEMA, gen. *Zem'atis*, (*ζεμα*.) Decoction.  
 ZEN'ICON, (*ζενικον*.) Ancient name of a Keltic poison, used for poisoning arrows.  
 ZEOCRITON DISTICHUM, (*ζεα*, 'corn,' and *τριση*, 'barley,') *Hordeum distichon*.  
 ZEPHACH, *Peritonæum*.  
 ZERMA, Zerna.  
 ZER'NA, *Zerna*. Amongst the barbarous

Latin writers it signified ulcerated impetigo, *Impeti'go ulcera'ta*.  
 ZERUMBET, Cassumuniar.  
 ZESIS, (*ζεσις*.) Effervescence, Decoction.  
 ZEST, see Citrus medica.  
 ZESTOLUSIA, (*ζεστολουσια*, from *ζεστος*, 'hot,' and *λουω*, 'to wash,') Bath, hot.  
 ZIBEBÆ, see *Vitis vinifera*.  
 ZIBETHUM, Civetta.  
 ZIGNITES, Zingrites.  
 ZINC, *Zink*, *Zin'cum*, *Zin'kum*, *Spel'trum*, *Spean'ter*, *Tin'tenag*, *Zin'chum*, *Zint*, *Stan'num Indicum*. (Perhaps formed etymologically from (G.) *Zin*, 'tin,') A metal obtained from calamine and blende. Its colour is bluishwhite; lustre of the fresh surface considerable, but soon dulled; from the facility with which it oxidates; hard; texture striated. S. g. 7.190. Melts at 700° Fah., burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.  
 ZINC, ACÉTATE DE, *Zinci acetas*—z. Butter of, *Zinci chloridum*—z. Chloride of, *Zinci chloridum*—z. *Chlorure de*, *Zinci chloridum*—z. *Cyanure de*, *Zinci cyanuretum*—z. Ferrohýdrocyanate of, *Zinci cyanuretum*—z. Flowers of, *Zinci oxydum*—z. Hydrocyanate of, *Zinci cyanuretum*—z. Iodide of, *Zinci Iodidum*—z. Ioduret of, *Zinci Iodidum*.  
 ZINC AND MORPH'IA, DOUBLE I'ODIDE OF, (F.) *Iodure double de Zinc et de Morphine*. (This salt is prepared by boiling iodide of iodhydrate of morphia with water and zinc, after they have acted on each other for some days; filtering and crystallizing.) It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.  
 ZINC, OXIDE DE, *Zinci oxydum*—z. Oxyd of, *Zinci oxydum*.  
 ZINC AND STRYCH'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, iodide of iodhydrate of strychnia and zinc; filtering and crystallizing. It has been proposed in the same cases as strychnia.  
 ZINC, SULFATE DE, *Zinci sulphas*—z. Sulphate of, *Zinci sulphas*—z. Valerianate of, *Zinci Valerianus*.  
 ZINCUM, *Zincum*.  
 ZIN'CI ACE'TAS, *Ac'etate of Zinc*, (F.) *Acetate de Zinc*. (*Plumbi acet. liq*), *Zinc. granul. Sij*, *Aquæ destillat. Oij*. Dissolve the acetate

of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquor yields no precipitate with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and, having heated the solution, drop into it, while hot, recently prepared carbonate of zinc until a little of the liquid, on being filtered, passes colourless; then filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, Calamina.

ZINCI CARBONAS PRÆCIPITATUS seu PRÆCIPITATA (Ph. U. S., 1863), *Precipitated carbonate of Zinc.* (Zinci sulphat., Sodæ carbonat.  $\text{aa}$   $\text{℥j}$ ; Aq. bullient. cong. Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat.—*Ph. U. S.*) Used to prepare the Zinc oxidum.

ZINCI CARBONAS PRÆPARATUS, Calamina præparata—z. Chloridi liquor, see Burnett's Disinfecting Liquid—z. Chloretum, zinci chloridum.

ZINCI CHLORIDUM, *Z. chloruræ tum seu Chloræ tum, Zinci cum chlorat'um seu murat'icum, Chloride or Chloruret of Zinc.* (F.) *Chlorure de Zinc.* (Zinc. in frustulis,  $\text{ʒijss}$ ; Acid. nitric., C. etæ præparat.  $\text{aa}$   $\text{ʒj}$ ; Acid. muriat., Aquæ q. s. To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc, Butyrum Zinci.*

Chloride of zinc is a powerful escharotic, and has been lately employed as an effective antiseptic. See Burnett's Disinfecting Liquid.

ZINCI CHLORURETUM, Z. chloridum.

ZINCI CYANURETUM, *Z. cyan'idum seu Hydrocyanas seu Prus'sias, Zinci cum Cyanogenat'um seu Borussicum seu Zoöl'icum, Hydrocyanate of Zinc.* (F.) *Cyanure de Zinc.* (This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium.) It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCYANAS, *Zinci ferrocyanuretum, Cyanuretum Ferrozincicum, Zinci cum Ferrohydrocyanicum, Ferrocyanate of Zinc.* (Made by the mutual decomposition of boiling-hot solutions of sulphate of zinc and ferrocyanate of potassa.) It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, Zinci cyanuretum.

ZINCI IODIDUM, *Z. Ioduræ tum, Zinci cum Iodatum, Iodetum Zinci seu Zinci cum, Protoioduretum Zinci, Iodide or Ioduret of Zinc.* (F.) *Iodure de Zinc.* (This salt is made by boiling together iodine and zinc to dryness, and subliming.) An

ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

ZINCI IODURETUM, Z. iodidum—z. Nix, Zinci oxydum.

ZINCI OXYDUM seu OXYDUM, *Zinci cum calcinat'um, Nilhil Album, Lat'na Philosophorum seu Philosophica, Nix Zinci, Nilhil Griseum, Pompholyx, Ox'yd of Zinc, Flow'ers of Zinc.* (F.) *Oxide ou Blanc de Zinc.* (Procured by burning zinc in a long, deep crucible, placed so as to collect the sublimate. Also, by exposing precipitated carbonate of zinc to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.*) It is said to be tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. Usual dose, gr. ij to x; but it is probably inert. For its external use, see Ung. Zinci.

ZINCI OXYDUM IMPURUM, Tutia—z. Prussias, Zinci cyanuretum.

ZINCI SULPHAS, *Sulphate of Zinc, Zinci cum Vitriolat'um, Vitriolum Album seu Goslarien'se seu Zinci, Sulphas Zinci cum, Gil'la Vitrioli seu Theophrasti, Sol Vitrioli seu Vomitorium Vitrioli, Chalcanthum Album, White Vitriol, White Cop'peras.* (F.) *Sulfate de Zinc, Couperose blanc.* (Zinc. in frustulis,  $\text{ʒiv}$ ; Acid. sulphuric.  $\text{ʒvj}$ ; Aquæ destillat. Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) Sulphate of zinc is inodorous; taste, styptic. It is in white, semitransparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertussis*, and, as its title imports, given in whoopingcough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to  $\text{ʒss}$ ; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water f $\text{ʒj}$ . A solution of the salt, to which a little sulphate of copper has been added, is said to constitute the *Disinfecting Liquid of Larnaudés.*

ZINCI VALERIANAS, *Zinci cum valerianicum, Valerianate of Zinc.* (A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc, or by the double decomposition of valerianate of soda and sulphate of zinc.—*Ph. U. S.*, 1863, and *Ph. B.*, 1864.) It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day. It is official in the Dublin Pharmacopœia.

ZINCUM, Zinc—z. Borussicum, Zinci cyanuretum—z. Calcinatum, Zinci oxydum—z. Chloratum, Zinci chloridum—z. Cyanogenatum, Zinci cyanuretum—z. Ferrohydrocyanicum, Zinci ferrocyanas—z. Iodat, Zinci iodidum—z. Muriaticum, Zinci chloridum—z. Valerianicum, Zinci valerianas—z. Vitriolatum, Zinci sulphas—z. Zooticum, Zinci cyanuretum.

ZINGIBER, gen. *Zingiberis*, ( $\text{ʒγγβερ}$ ), Amomum zingiber—z. Cassumuniar, see Cassumuniar—z. Germanicum, Arum maculatum—z. Officinale, Amomum zingiber—z. Purpureum, see Cassumuniar—z. Spurium, see Cassumuniar—z. Zerumbet, see Cassumuniar.

ZINGIBERIN, Piperoid.

ZINGRITES, *Zigni'tes.* A stone, resembling glass; to which the ancients attributed marvelous properties.

ZINK, Zinc.

ZINKUM, Zinc.

ZINT, Zincum.

ZINZIBER, ( $\text{ʒγγβερ}$ ), Amomum zingiber.

ZIPHAC, Peritonæum.

**ZIRBUS**, Epiploon—z. Adipinus, Epiploon, gastrocoelic.

**ZIZANIA AQUATICA**, (*Zizanon* was the ancient name of some wild grain,) *Wild Rice*, *Cantada Rice*, *Water Oats*. Ord. Gramineæ; called by the Indians, *Meuomene*, grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages and the Canadian traders and hunters with their annual supplies of grain.

**ZIZYPHUM**, (Arab.), Jujube.

**ZIZYPHUS JUJUBA**, see Jujube—z. Nitida, see Jujube.

**ZIZYPHUS ÆNOP'LIA**, *Z. Nape'ca*; Ord. Rhamnaceæ; common all over India. The fruit is eaten by the natives. It is of a pleasant acid taste. A decoction of the bark of the fresh root is used to promote the healing of fresh wounds.

**ZIZYPHUS SATIVA**, see Jujube—z. Sylvestris, see Jujube.

**ZOA'GRIA**, (*ζωη*, 'life,' and *αγρω*, 'I catch up,') The saving and preservation of life. *Zoô'sis*. A reward for preserving life; *Sos'trum*. A votive offering hung up in the temples for a life saved.

**ZOANTHRO'PIA**, *Melanchol'ia zoânthro'pia*, (*zoon*, and *ανθρωπος*, 'a man,') A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and Cynanthropia belong to this species of monomania.

**ZOARA**, Insomnia.

**ZOE**, (*ζωη*,) Life.

**ZOGRAPHIA**, Zoographia.

**ZOIATRIA**, (*zoon*, and *ιατρεία*, 'medical treatment,') Veterinary art.

**ZOIATRUS**, (*zoon*, and *ιατρος*, 'a physician,') Hippiaater.

**ZOISMUS**, (from *zoon*,) Animality.

**ZOMIDIUM**, (*ζωμίδιον*, dim. of *ζωμος*,) Jus.

**ZOMOS**, (*ζωμος*,) *Consoumme*, Jus. See Broth.

**ZONA**, (*ζώνη*, 'a girdle,') Herpes zoster—z. Castitatis, Hymen—z. Ciliaris, Ciliary zone—z. Ignea, Herpes zoster.

**ZONA PELLU'CIDA**, *Oolem'ma pellucidum*, *Vitellary membrane*, *Chor'ion* (of some), (F.) *Vitelline*, *Membrane vitelline*. The membrane that surrounds the yolk in the mammalia is so called on account of its breadth and peculiar transparency.

**ZONA SERPIGINOSA**, Herpes zoster.

**ZONA TENDINO'SA**. The whitish circle around each auriculoventricular orifice of the heart, see *Circulus callosus Halleri*.

**ZONA VIRGINITATIS**, Hymen.

**ZONE**, Cingulum.

**ZONULA CILIARIS**, (dim. of *zoua*,) see Ciliary, and Ciliary zone—z. Cochleæ, see *Lamina spiralis*—z. Hildani, Cingulum Hildani—z. Zinnii, see Ciliary zone.

**ZOOBIOLOGIA**, (*zoon*, *βίος*, 'life,' and *λογος*, 'a treatise,') see Physiology.

**ZOÏCHEMIA**, Chymistry, animal.

**ZOÏCHEM'ICAL**, *Zoôchym'ical*, *Zoïchem'icus*, *Zoôchym'icus*. Appertaining or having relation to animal chymistry.

**ZOÏCHEMY**, Chymistry, animal.

**ZOÏCHYMY**, Chymistry, animal.

**ZOOGÉNIES**, see Zoögeny. Bouchut has applied the term *Zoogénies* to animal parasites infesting the body.

**ZOODES**, (*ζωοδής*, from *zoon*, and *odes*,) Animal.

**ZOÏG'ENY**, *Zoôgen'ia*, *Zoôgen'esis*, (*zoon*, and *γεννω*, 'to beget,') The doctrine of animal formation.

**ZOÏG'RAPHY**, *Zoôgra'phia*, *Zogra'phia*, (*zoon*, and *γραφη*, 'a description,') A description of animals. The natural history of animals.

**ZOÏHEMATINE**, *Hæmatine*.

**ZOÏHYLAS**, (*zoon*, and *ύλη*, 'matter,') Animal matter.

**ZOÏHYLICA CONCREMEN'TA**. Concretions formed of animal matter.

**ZOÏIASIS**, (*zoon*, and *ιασις*, 'curation,') Veterinary art.

**ZO'OID**, *Zoô'id'es*, (*ζωοειδής*, from *zoon*, and *ειδός*, 'resemblance,') Resembling or belonging to an animal. Every living cell may be regarded as a Zooid.

**ZOÏLOG'ICAL**, *Zoôlog'icus*, (F.) *Zoologique*, (*zoon*, and *λογος*, 'a description,') Relating or appertaining to the natural history of animals.

**ZOÏL'OGIST**, *Zoôlogis'ta*, *Zoô'logus*. One skilled in the natural history of animals.

**ZOÏL'OGY**, *Zoôlog'ia*. The natural history of animals.

**ZOÏMAGNETISMUS**, Magnetism, animal.

**ZOÏMYCUS**, (*zoon*, and *μυκος*, 'mucus,') Mucus.

**ZOÏMYXA**, (*zoon*, and *μυξα*, 'mucus,') Mucus.

**ZOÏN**, (*ζωον*,) Animal.

**ZOÏNOM'IA**, *Organozoônom'ia*, *Zoôn'omy*, (*zoon*, and *νομος*, 'law,') The law which governs the organic actions of animals in general;—*Animal Physiolog'y*, *Zoophysiolog'ia*.

**ZOÏNOSOLOGY**, *Zoônosolog'ia*, (*zoon*, *νοσος*, 'a disease,' and *λογος*, 'a description,') The nosology of animals.

**ZOÏPATHOL'OGY**, *Zoôpatholog'ia*, (*zoon*, *παθος*, 'a disease,' and *λογος*, 'a description,') The pathology of animals.

**ZOÏPH'AGOUS**, *Zoôph'agus*, (F.) *Zoôphage*, (*ζωοφαγος*, from *zoon*, and *φαγω*, 'I eat,') Feeding on animals. Carnivorous.

**ZOÏPHTHALMUS**, (*ζωοφθαλμος*,) Hydrophthalmia.

**ZOÏPHYSIOLOGY**, *Zoôphysiolog'ia*, (*zoon*, and *physiologia*,) Physiology, animal, Zoonomia.

**ZOÏPHYTE**, *Zoôph'ytum*, (*zoon*, and *φυτον*, 'a plant,') *Phytozo'ön*, (F.) *Phytozoaire*, *Animal plant*. A name given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.

**ZOÏSIS**, (from *zoon*,) Animation, Zoagria.

**ZOÏSPERMATA**, Spermatozoa.

**ZOÏSPERMES**, Spermatozoa.

**ZOÏTHAP'SIS**, (*ζωη*, 'life,' and *θαπτω*, 'I inter,') Burial alive. Premature interment.

**ZOÏT'OMIST**, *Zoôtom'icus*, (*zoon*, and *τεμνω*, 'I cut,') One who dissects animals.

**ZOÏT'OMY**, *Zoôtom'ia*, *Anatom'ia animal'ia* seu *comparati'ua seu comparati'va*, *Theriot'omy*, *Comparati'ua Anat'omy*. The anatomy of animals. Animal anatomy.

**ZOPISSA**, (*ζωπισσα*, from *ζωος*, 'living,' and *πισσα*, 'pitch,') see *Pinus sylvestris*.

**ZOPYRON**, (*ζωπυρον*, from *ζωω*, 'to be alive,' and *πυρ*, 'fire,') Fomites.

**ZOSTER**, (*ζωστήρ*, 'a girth,') Herpes zoster.

**ZOSTERA MARINA**, *Pila marina*—z. *Martima*, *Pila marina*.

**ZOSTÈRE**, *Pila marina*.

**ZOUZINETTE**, *Narcissus pseudonarcissus*.

**ZOZAR**, Saccharum.

**ZUCARO**, Saccharum.

**ZUCCARUM**, Saccharum.

**ZUCHAR**, Saccharum.

**ZUCHARUM**, Saccharum.

ZUCHRA, Saccharum.

ZYLAPIUM, Julep.

ZYGAPOPHYSES, (ζυγῶν, 'a yoke,' and *apophysis*,) see Vertebrae.

ZYGOMA, (ζυγωμα, from ζυγον, 'a yoke,')

Malæ os, see Zygomatic process.

ZYGOMATIC, *Zygomaticus*, *Jugal's*, *Ju'gal*, (F.) *Zygomatique*. That which relates to the *zygoma* or cheekbone.

ZYGOMATIC ARCH, see Zygomatic process — z. Bone, Malæ os.

ZYGOMATIC FOS'SA is the space included between the posterior margin of the outer ala of the pterygoid process and the crista which descends from the malar tuberosity to the superior alveolar margin.

ZYGOMATIC MUS'LES are two in number. 1. *Zygomaticus major*, *Distort'or O'ris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomaticus minor*, (F.) *Petit Zygomato-labial*, (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

ZYGOMATIC PROC'ESS, *Processus zygomaticus*, *Apophysis Zygomatica*, *Malar* or *Ju'gal proc'ess*, (F.) *Apophyse Zygomatique*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, (Ch.,) and the other longitudinal: between them is the glenoid cavity. The process passes for-

wards, and is articulated with the posterior angle of the os male, with which it forms a bony bridge, called the *Zygomatic arch*, *Ar'cus* sen *Pons zygomaticus*, (F.) *Arcade zygomatique*. The cavity beneath the bridge is sometimes called *Zygo'ma*.

ZYGOMATIC SU'TURE is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

ZYGOMATIQUE, Zygomatic — z. *Grand*, *Zygomat'icus major* — z. *Petit*, *Zygomat'icus minor*.

ZYGOMATO-AURICULAIRE, Anterior auris — z. *Labial*, *Zygomat'icus major* — z. *Labial*, *petit*, *Zygomat'icus major* — z. *Maxillaire*, *Masseter* — z. *Orientalre*, Anterior auris.

ZYGOPHYLLUM FABAGO, (ζυγος, 'yoke, a pair,' and φύλλον, 'a leaf,') (F.) *Fabogelle*. Ord. *Zygophyllaceæ*. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygophyllum simplex*, is capable of removing specks from the cornea.

ZYMA, (ζυμη,) Ferment.

ZYMOMA, gen. *Zymo'matis*, (ζυμομα,) Ferment. ZYMOSIS, (ζυμωσις, from *zyma*, and *osis*,) Fermentation, see Zymotic.

ZYMOTIC, *Zymot'icus*, (F.) *Zymotique*, (from *zyma*.) Relating or appertaining to fermentation. A *zymotic disease* is any epidemic, endemic, contagious or sporadic affection, which is produced by some morbid principle acting on the organism similar to a ferment — as the major exanthemata. *Zymoses* has been used by some to signify such affections.

# HENRY C. LEA'S

(LATE LEA & BLANCHARD'S)

## CLASSIFIED CATALOGUE OF MEDICAL AND SURGICAL PUBLICATIONS.

In asking the attention of the profession to the works contained in the following pages, the publisher would state that no pains are spared to secure a continuance of the confidence earned for the publications of the house by their careful selection and accuracy and finish of execution.

The printed prices are those at which books can generally be supplied by booksellers throughout the United States, who can readily procure for their customers any works not kept in stock. Where access to bookstores is not convenient, books will be sent by mail post-paid on receipt of the price, but no risks are assumed either on the money or the books, and no publications but my own are supplied. Gentlemen will therefore in most cases find it more convenient to deal with the nearest bookseller.

An ILLUSTRATED CATALOGUE, of 64 octavo pages, handsomely printed, will be forwarded by mail, postpaid, on receipt of ten cents.

HENRY C. LEA.

Nos. 706 and 708 SANSON ST., PHILADELPHIA, Sept. 1870.

ADDITIONAL INDUCEMENT FOR SUBSCRIBERS TO

## THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES.

THREE MEDICAL JOURNALS, containing over 2000 LARGE PAGES,

Free of Postage, for SIX DOLLARS Per Annum.

TERMS FOR 1870:

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, and } Five Dollars per annum,  
THE MEDICAL NEWS AND LIBRARY, both free of postage, } in advance.

OR,

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, published quarterly (1150 pages per annum), with } Six Dollars  
THE MEDICAL NEWS AND LIBRARY, monthly (384 pp. per annum), and } per annum  
THE HALF-YEARLY ABSTRACT OF THE MEDICAL SCIENCES, published } in advance.  
Feb. and August (600 pages per annum), all free of postage.

SEPARATE SUBSCRIPTIONS TO

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, subject to postage when not paid for in advance, Five Dollars.

THE MEDICAL NEWS AND LIBRARY, free of postage, in advance, One Dollar.

THE HALF-YEARLY ABSTRACT, Two Dollars and a Half per annum in advance. Single numbers One Dollar and a Half.

It is manifest that only a very wide circulation can enable so vast an amount of valuable practical matter to be supplied at a price so unprecedentedly low. The publisher, therefore, has much gratification in stating that the rapid and steady increase in the subscription list promises to render the enterprise a permanent one, and it is

with especial pleasure that he acknowledges the valuable assistance spontaneously rendered by so many of the old subscribers to the "JOURNAL," who have kindly made known among their friends the advantages thus offered and have induced them to subscribe. Relying upon a continuance of these friendly exertions, he hopes to be able to maintain the unexampled rates at which these works are now supplied, and to succeed in his endeavor to place upon the table of every reading practitioner in the United States a monthly, a quarterly, and a half-yearly periodical at the comparatively trifling cost of SIX DOLLARS *per annum*.

These periodicals are universally known for their high professional standing in their several spheres.

## I.

## THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES,

EDITED BY ISAAC HAYS, M. D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains nearly three hundred large octavo pages, appropriately illustrated, wherever necessary. It has now been issued regularly for over FORTY years, during nearly the whole of which time it has been under the control of the present editor. Throughout this long period, it has maintained its position in the highest rank of medical periodicals both at home and abroad, and has received the cordial support of the entire profession in this country. Among its Collaborators will be found a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

## ORIGINAL COMMUNICATIONS

full of varied and important matter, of great interest to all practitioners. Thus, during 1869, articles have appeared in its pages from one hundred and fifteen gentlemen of the highest standing in the profession throughout the United States.\*

Following this is the "REVIEW DEPARTMENT," containing extended and impartial reviews of all important new works, together with numerous elaborate "ANALYTICAL AND BIBLIOGRAPHICAL NOTICES" of nearly all the medical publications of the day.

This is followed by the "QUARTERLY SUMMARY OF IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES," classified and arranged under different heads, presenting a very complete digest of all that is new and interesting to the physician, abroad as well as at home.

Thus, during the year 1869, the "JOURNAL" furnished to its subscribers One Hundred and Forty-seven Original Communications, Eighty-eight Reviews and Bibliographical Notices, and Two Hundred and Eighty-seven articles in the Quarterly Summaries, making a total of over FIVE HUNDRED articles emanating from the best professional minds in America and Europe.

To old subscribers, many of whom have been on the list for twenty or thirty years, the publisher feels that no promises for the future are necessary; but gentlemen who may now propose for the first time to subscribe may rest assured that no exertion will be spared to maintain the "JOURNAL" in the high position which it has so long occupied ("one of the best of its kind,"—*London Lancet*, Aug. 20, 1870), as a national exponent of scientific medicine, and as a medium of intercommunication between the profession of Europe and America—in the words of the "*London Medical Times*" (Sept. 5th, 1868) "almost the only one that circulates everywhere, all over the Union and in Europe"—to render it, in fact, necessary to every practitioner who desires to keep on a level with the progress of his science.

The subscription price of the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES" has never been raised, during its long career. It is still FIVE DOLLARS *per annum*; and when paid for in advance, the subscriber receives in addition the "MEDICAL NEWS AND LIBRARY," making in all about 1500 large octavo pages *per annum*, free of postage.

## II.

## THE MEDICAL NEWS AND LIBRARY

is a monthly periodical of Thirty-two large octavo pages, making 384 pages *per annum*. Its "NEWS DEPARTMENT" presents the current information of the day, with Clinical Lectures and Hospital Gleanings; while the "LIBRARY DEPARTMENT" is devoted to publishing standard works on the various branches of medical science, paged

\* Communications are invited from gentlemen in all parts of the country. Elaborate articles inserted by the Editor are paid for by the Publisher.

separately, so that they can be removed and bound on completion. In this manner subscribers have received, without expense, such works as "WATSON'S PRACTICE," "TODD AND BOWMAN'S PHYSIOLOGY," "WEST ON CHILDREN," "MALGAGNE'S SURGERY," &c. &c. And with January, 1870, is commenced a series of monographs on Diseases of the Spinal Column and of the Nerves from "REYNOLDS'S SYSTEM OF MEDICINE," rendering this a very eligible period for the commencement of new subscriptions.

As stated above, the subscription price of the "MEDICAL NEWS AND LIBRARY" is ONE DOLLAR per annum in advance; and it is furnished without charge to all advance paying subscribers to the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES."

### III.

## THE HALF-YEARLY ABSTRACT OF THE MEDICAL SCIENCES

is issued in half-yearly volumes, which will be delivered to subscribers about the first of February, and first of August. Each volume contains about 300 closely printed octavo pages, making about six hundred pages per annum.

"RANKING'S ABSTRACT" has now been published in England regularly for more than twenty years, and has acquired the highest reputation for the ability and industry with which the essence of medical literature is condensed into its pages. It purports to be "*A Digest of British and Continental Medicine, and of the Progress of Medicine and the Collateral Sciences,*" and it is even more than this, for America is largely represented in its pages. It draws its material not only from all the leading American, British, and Continental journals, but also from the medical works and treatises issued during the preceding six months, thus giving a complete digest of medical progress. Each article is carefully condensed, so as to present its substance in the smallest possible compass, thus affording space for the very large amount of information laid before its readers. The volumes of 1869, for instance, have contained

THIRTY-FOUR ARTICLES ON GENERAL QUESTIONS IN MEDICINE.  
 ONE HUNDRED AND ELEVEN ARTICLES ON SPECIAL QUESTIONS IN MEDICINE.  
 NINETEEN ARTICLES ON FORENSIC MEDICINE.  
 NINETY-NINE ARTICLES ON THERAPEUTICS.  
 THIRTY-SEVEN ARTICLES ON GENERAL QUESTIONS IN SURGERY.  
 ONE HUNDRED AND SIXTY-SEVEN ARTICLES ON SPECIAL QUESTIONS IN SURGERY.  
 NINETY-FIVE ARTICLES ON MIDWIFERY AND DISEASES OF WOMEN AND CHILDREN.

Making in all over five hundred and fifty articles in a single year. Each volume, moreover, is systematically arranged, with an elaborate Table of Contents and a very full Index, thus facilitating the researches of the reader in pursuit of particular subjects, and enabling him to refer without loss of time to the vast amount of information contained in its pages.

The subscription price of the "ABSTRACT," mailed free of postage, is Two DOLLARS AND A HALF per annum, payable in advance. Single volumes, \$1 50 each.

As stated above, however, it will be supplied in conjunction with the "AMERICAN JOURNAL OF THE MEDICAL SCIENCES" and the "MEDICAL NEWS AND LIBRARY," the whole *free of postage*, for SIX DOLLARS PER ANNUM IN ADVANCE.

For this small sum the subscriber will therefore receive three periodicals costing separately Eight Dollars and a Half, each of them enjoying the highest reputation in its class, containing in all over two THOUSAND PAGES of the choicest reading, and presenting a complete view of medical progress throughout both hemispheres.

In this effort to bring so large an amount of practical information within the reach of every member of the profession, the publisher confidently anticipates the friendly aid of all who are interested in the dissemination of sound medical literature. He trusts, especially, that the subscribers to the "AMERICAN MEDICAL JOURNAL" will call the attention of their acquaintances to the advantages thus offered, and that he will be sustained in the endeavor to permanently establish medical periodical literature on a footing of cheapness never heretofore attempted.

\* \* \* Gentlemen desiring to avail themselves of the advantages thus offered will do well to forward their subscriptions at an early day, in order to insure the receipt of complete sets for the year 1870, as the constant increase in the subscription list almost always exhausts the quantity printed shortly after publication.

☞ The safest mode of remittance is by postal money order, drawn to the order of the undersigned. Where money order post-offices are not accessible, remittances for the "JOURNAL" may be made at the risk of the publisher, by forwarding in REGISTERED letters. Address,

HENRY C. LEA,  
 Nos. 706 and 708 Sansom St., PHILADELPHIA, PA.

**DUNGLISON (ROBLEY), M. D.,***Professor of Institutes of Medicine in Jefferson Medical College, Philadelphia.*

**MEDICAL LEXICON; A DICTIONARY OF MEDICAL SCIENCE:** Containing a concise explanation of the various Subjects and Terms of Anatomy, Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Pharmacy, Surgery, Obstetrics, Medical Jurisprudence, and Dentistry. Notices of Climate and of Mineral Waters; Formulæ for Official, Empirical, and Dietetic Preparations; with the Accentuation and Etymology of the Terms, and the French and other Synonymes; so as to constitute a French as well as English Medical Lexicon. Thoroughly Revised, and very greatly Modified and Augmented. In one very large and handsome royal octavo volume of 1048 double-columned pages, in small type; strongly done up in extra cloth, \$6 00; leather, raised bands, \$6 75.

The object of the author from the outset has not been to make the work a mere lexicon or dictionary of terms, but to afford, under each, a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of medical science. Starting with this view, the immense demand which has existed for the work has enabled him, in repeated revisions, to augment its completeness and usefulness, until at length it has attained the position of a recognized and standard authority wherever the language is spoken. The mechanical execution of this edition will be found greatly superior to that of previous impressions. By enlarging the size of the volume to a royal octavo, and by the employment of a small but clear type, on extra fine paper, the additions have been incorporated without materially increasing the bulk of the volume, and the matter of two or three ordinary octavos has been compressed into the space of one not unhandy for consultation and reference.

It would be a work of supererogation to bestow a word of praise upon this Lexicon. We can only wonder at the labor expended, for whenever we refer to its pages for information we are seldom disappointed in finding all we desire, whether it be in accentuation, etymology, or definition of terms.—*New York Medical Journal*, November, 1865.

It would be mere waste of words in us to express our admiration of a work which is so universally and deservedly appreciated. The most admirable work of its kind in the English language. As a book of reference it is invaluable to the medical practitioner, and in every instance that we have turned over its pages for information we have been charmed by the clearness of language and the accuracy of detail with which each abounds. We can most cordially and confidently commend it to our readers.—*Glasgow Medical Journal*, January, 1866.

A work to which there is no equal in the English language.—*Edinburgh Medical Journal*.

It is something more than a dictionary, and something less than an encyclopædia. This edition of the well-known work is a great improvement on its predecessors. The book is one of the very few of which it may be said with truth that every medical man should possess it.—*London Medical Times*, Aug. 26, 1865.

Few works of the class exhibit a grander monument of patient research and of scientific lore. The extent of the sale of this lexicon is sufficient to testify to its usefulness, and to the great service conferred by Dr. Robley Dunglison on the profession, and indeed on others, by its issue.—*London Lancet*, May 13, 1865.

The old edition, which is now superseded by the new, has been universally looked upon by the medical profession as a work of immense research and great value. The new has increased usefulness; for medicine, in all its branches, has been making such progress that many new terms and subjects have recently been introduced: all of which may be found fully defined in the present edition. We know of no other dictionary in the English language that can bear a comparison with it in point of completeness of subjects and accuracy of statement.—*N. Y. Druggists' Circular*, 1865.

For many years Dunglison's Dictionary has been the standard book of reference with most practitioners in this country, and we can certainly commend this work to the renewed confidence and regard of our readers.—*Cincinnati Lancet*, April, 1865.

It is undoubtedly the most complete and useful medical dictionary hitherto published in this country.—*Chicago Med. Examiner*, February, 1865.

What we take to be decidedly the best medical dictionary in the English language. The present edition is brought fully up to the advanced state of science. For many a long year "Dunglison" has been at our elbow, a constant companion and friend, and we greet him in his replenished and improved form with especial satisfaction.—*Pacific Med. and Surg. Journal*, June 27, 1865.

This is, perhaps, the book of all others which the physician or surgeon should have on his shelves. It is more needed at the present day than a few years back.—*Canada Med. Journal*, July, 1865.

It deservedly stands at the head, and cannot be surpassed in excellence.—*Buffalo Med. and Surg. Journal*, April, 1865.

We can sincerely commend Dr. Dunglison's work as most thorough, scientific, and accurate. We have tested it by searching its pages for new terms, which have abounded so much of late in medical nomenclature, and our search has been successful in every instance. We have been particularly struck with the fulness of the synonymy and the accuracy of the derivation of words. It is as necessary a work to every enlightened physician as Worcester's English Dictionary is to every one who would keep up his knowledge of the English tongue to the standard of the present day. It is, to our mind, the most complete work of the kind with which we are acquainted.—*Boston Med. and Surg. Journal*, June 22, 1865.

We are free to confess that we know of no medical dictionary more complete; no one better, if so well adapted for the use of the student; no one that may be consulted with more satisfaction by the medical practitioner.—*Am. Jour. Med. Sciences*, April, 1865.

The value of the present edition has been greatly enhanced by the introduction of new subjects and terms, and a more complete etymology and accentuation, which renders the work not only satisfactory and desirable, but indispensable to the physician.—*Chicago Med. Journal*, April, 1865.

No intelligent member of the profession can or will be without it.—*St. Louis Med. and Surg. Journal*, April, 1865.

It has the rare merit that it certainly has no rival in the English language for accuracy and extent of references.—*London Medical Gazette*.

**HOBLYN (RICHARD D.), M. D.**

**A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES.** A new American edition, revised, with numerous additions, by ISAAC HAYS, M. D., Editor of the "American Journal of the Medical Sciences." In one large royal 12mo. volume of over 500 double-columned pages; extra cloth, \$1 50; leather, \$2 00.

It is the best book of definitions we have, and ought always to be upon the student's table.—*Southern Med. and Surg. Journal*.

**NEILL (JOHN), M. D., and SMITH (FRANCIS G.), M. D.,**  
*Prof of the Institutes of Medicine in the Univ. of Penna.*

**AN ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE;** for the Use and Examination of Students. A new edition, revised and improved. In one very large and handsomely printed royal 12mo. volume, of about one thousand pages, with 374 wood cuts, extra cloth, \$4; strongly bound in leather, with raised bands, \$4 75.

The Compend of Drs. Neill and Smith is incomparably the most valuable work of its class ever published in this country. Attempts have been made in various quarters to squeeze Anatomy, Physiology, Surgery, the Practice of Medicine, Obstetrics, Materia Medica, and Chemistry into a single manual; but the operation has signally failed in the hands of all up to the advent of "Neill and Smith's" volume, which is quite a miracle of success. The outlines of the whole are admirably drawn and illustrated, and the authors are eminently entitled to the grateful consideration of the student of every class.—*N. O. Med. and Surg. Journal.*

There are but few students or practitioners of medicine unacquainted with the former editions of this unassuming though highly instructive work. The whole science of medicine appears to have been sifted, as the gold-bearing sands of El Dorado, and the pre-

vious facts treasured up in this little volume. A complete portable library so condensed that the student may make it his constant pocket companion.—*Western Lancet.*

In the rapid course of lectures, where work for the students is heavy, and review necessary for an examination, a compend is not only valuable, but it is almost a *sine qua non*. The one before us is, in most of the divisions, the most unexceptionable of all books of the kind that we know of. Of course it is useless for us to recommend it to all last course students, but there is a class to whom we very sincerely commend this cheap book as worth its weight in silver—that class is the graduates in medicine of more than ten years' standing, who have not studied medicine since. They will perhaps find out from it that the science is not exactly now what it was when they left it off.—*The Stethoscope.*

**HARTSHORNE (HENRY), M. D.,**  
*Professor of Hygiene in the University of Pennsylvania.*

**A CONSPECTUS OF THE MEDICAL SCIENCES;** containing Handbooks on Anatomy, Physiology, Chemistry, Materia Medica, Practical Medicine, Surgery, and Obstetrics. In one large royal 12mo. volume of 1000 closely printed pages, with over 300 illustrations on wood, extra cloth, \$4 50; leather, raised bands, \$5 25. (*Now Ready.*)

The ability of the author, and his practical skill in condensation, give assurance that this work will prove valuable not only to the student preparing for examination, but also to the practitioner desirous of obtaining within a moderate compass, a view of the existing condition of the various departments of science connected with medicine.

This work is a remarkably complete one in its way, and comes nearer to our idea of what a Conspectus should be than any we have yet seen. Prof. Hartshorne, with a commendable forethought, intrusted the preparation of many of the chapters on special subjects to experts, reserving only anatomy, physiology, and practice of medicine to himself. As a result we have every department worked up to the latest date and in a refreshingly concise and lucid manner. There are an immense amount of illustrations scattered throughout the work, and although they have often been seen before in the various works upon general and special subjects, yet they will be none the

less valuable to the beginner. Every medical student who desires a reliable refresher to his memory when the pressure of lectures and other college work crowds to prevent him from having an opportunity to drink deeper in the larger works, will find this one of the greatest utility. It is thoroughly trustworthy from beginning to end; and as we have before intimated, a remarkably truthful outline sketch of the present state of medical science. We could hardly expect it should be otherwise, however, under the charge of such a thorough medical scholar as the author has already proved himself to be.—*N. York Med. Record, March 15, 1869.*

**LUDLOW (J. L.), M. D.,**

**A MANUAL OF EXAMINATIONS** upon Anatomy, Physiology, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Chemistry, Pharmacy, and Therapeutics. To which is added a Medical Formulary. Third edition, thoroughly revised and greatly extended and enlarged. With 370 illustrations. In one handsome royal 12mo. volume of 816 large pages, extra cloth, \$3 25; leather, \$3 75.

The arrangement of this volume in the form of question and answer renders it especially suitable for the office examination of students, and for those preparing for graduation.

**TANNER (THOMAS HAWKES), M. D., &c.**

**A MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS.** Third American from the Second London Edition. Revised and Enlarged by TILBURY FOX, M. D., Physician to the Skin Department in University College Hospital, &c. In one neat volume small 12mo., of about 375 pages, extra cloth. \$1 50. (*Now Ready.*)

This favorite little work has remained out of print for some years in consequence of the pressing engagements which have prevented the author from giving it the thorough revision which it required. The great advance which has taken place of late in the means and appliances for observation and diagnosis has necessitated a very considerable enlargement of the work, so that it now contains about one-half more matter than the last edition. The Laryngoscope, Ophthalmoscope, Sphygmograph, and Thermometer have received special attention. The chapter on the diagnostic indications afforded by the Urine has been much enlarged, and a section has been inserted on the administration of Chloroform. Special attention has been given to the medical anatomy of regions and organs, and much has been introduced relative to pericardial, endocardial, abdominal, and cerebro-spinal diseases. On every subject coming within its scope such additions have been made as seemed essential to bring the book on a level with the most advanced condition of medical knowledge; and it is hoped that it will continue to merit the very great favor with which it has hitherto been received.

**GRAY (HENRY), F. R. S.,**

*Lecturer on Anatomy at St. George's Hospital, London*

**ANATOMY, DESCRIPTIVE AND SURGICAL.** The Drawings by H. V. CARTER, M. D., late Demonstrator on Anatomy at St. George's Hospital; the Dissections jointly by the AUTHOR and DR. CARTER. A new American, from the fifth enlarged and improved London edition. In one magnificent imperial octavo volume, of nearly 900 pages, with 465 large and elaborate engravings on wood. Price in extra cloth, \$6 00; leather, raised bands, \$7 00. (*Just Ready.*)

The author has endeavored in this work to cover a more extended range of subjects than is customary in the ordinary text-books, by giving not only the details necessary for the student, but also the application of those details in the practice of medicine and surgery, thus rendering it both a guide for the learner, and an admirable work of reference for the active practitioner. The engravings form a special feature in the work, many of them being the size of nature, nearly all original, and having the names of the various parts printed on the body of the cut, in place of figures of reference, with descriptions at the foot. They thus form a complete and splendid series, which will greatly assist the student in obtaining a clear idea of Anatomy, and will also serve to refresh the memory of those who may find in the exigencies of practice the necessity of recalling the details of the dissecting room; while combining, as it does, a complete Atlas of Anatomy, with a thorough treatise on systematic, descriptive, and applied Anatomy, the work will be found of essential use to all physicians who receive students in their offices, relieving both preceptor and pupil of much labor in laying the groundwork of a thorough medical education.

Notwithstanding its exceedingly low price, the work will be found, in every detail of mechanical execution, one of the handsomest that has yet been offered to the American profession; while the careful scrutiny of a competent anatomist has relieved it of whatever typographical errors existed in the English edition. A few notices of previous editions are subjoined.

This it is that book after book makes the labor of the student easier than before, and since we have seen Blanchard & Lea's new edition of Gray's Anatomy, certainly the finest work of the kind now extant, we would fain hope that the bugbear of medical students will lose half its horrors, and this necessary foundation of physiological science will be much facilitated and advanced.—*N. O. Med. News.*

The various points illustrated are marked directly on the structure; that is, whether it be muscle, process, artery, nerve, valve, etc. etc.—we say each point is distinctly marked by lettered engravings, so that the student perceives at once each point described as readily as if pointed out on the subject by the demonstrator. Most of the illustrations are thus rendered exceedingly satisfactory, and to the physician they serve to refresh the memory with great readiness

and with scarce a reference to the printed text. The surgical application of the various regions is also presented with force and clearness, impressing upon the student at each step of his research all the important relations of the structure demonstrated.—*Cincinnati Lancet.*

This is, we believe, the handsomest book on Anatomy as yet published in our language, and bids fair to become in a short time THE standard text-book of our colleges and studies. Students and practitioners will alike appreciate this book. We predict for it a bright career, and are fully prepared to endorse the statement of the *London Lancet*, that "We are not acquainted with any work in any language which can take equal rank with the one before us." Paper, printing, binding, all are excellent, and we feel that a grateful profession will not allow the publishers to go unrewarded.—*Nashville Med. and Surg. Journal.*

**SMITH (HENRY H.), M.D., and HORNER (WILLIAM E.), M.D.,**  
*Prof. of Surgery in the Univ. of Penna., &c. Late Prof. of Anatomy in the Univ. of Penna., &c.*

**AN ANATOMICAL ATLAS,** illustrative of the Structure of the Human Body. In one volume, large imperial octavo, extra cloth, with about six hundred and fifty beautiful figures. \$4 50.

The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistic execution, have been already pointed out. We must congratulate the student upon the completion of this Atlas, as it is the most convenient work of

the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up," is so creditable to the country as to be flattering to our national pride.—*American Medical Journal.*

**HARTSHORNE (HENRY), M. D.,**  
*Professor of Hygiene, etc., in the University of Pennsylvania.*

**A HANDBOOK OF HUMAN ANATOMY AND PHYSIOLOGY,** for the use of Students, with 176 illustrations. In one volume, royal 12mo. of 312 pages; extra cloth, \$1 75. (*Now Ready.*)

**SHARPEY (WILLIAM), M.D., and QUAIN (JONES & RICHARD).**

**HUMAN ANATOMY.** Revised, with Notes and Additions, by JOSEPH LEIDY, M.D., Professor of Anatomy in the University of Pennsylvania. Complete in two large octavo volumes, of about 1300 pages, with 511 illustrations; extra cloth, \$6 00.

The very low price of this standard work, and its completeness in all departments of the subject, should command for it a place in the library of all anatomical students.

**ALLEN (J. M.), M.D.**

**THE PRACTICAL ANATOMIST; OR, THE STUDENT'S GUIDE IN THE DISSECTING ROOM.** With 266 illustrations. In one very handsome royal 12mo volume, of over 600 pages; extra cloth, \$2 00.

One of the most useful works upon the subject ever written.—*Medical Examiner.*

**WILSON (ERASMUS), F. R. S.**

**A SYSTEM OF HUMAN ANATOMY, General and Special.** A new and revised American, from the last and enlarged English edition. Edited by W. H. GOBRECHT, M. D., Professor of General and Surgical Anatomy in the Medical College of Ohio. Illustrated with three hundred and ninety-seven engravings on wood. In one large and handsome octavo volume, of over 600 large pages; extra cloth, \$4 00; leather, \$5 00.

The publisher trusts that the well-earned reputation of this long-established favorite will be more than maintained by the present edition. Besides a very thorough revision by the author, it has been most carefully examined by the editor, and the efforts of both have been directed to introducing everything which increased experience in its use has suggested as desirable to render it a complete text-book for those seeking to obtain or to renew an acquaintance with Human Anatomy. The amount of additions which it has thus received may be estimated from the fact that the present edition contains over one-fourth more matter than the last, rendering a smaller type and an enlarged page requisite to keep the volume within a convenient size. The author has not only thus added largely to the work, but he has also made alterations throughout, wherever there appeared the opportunity of improving the arrangement or style, so as to present every fact in its most appropriate manner, and to render the whole as clear and intelligible as possible. The editor has exercised the utmost caution to obtain entire accuracy in the text, and has largely increased the number of illustrations, of which there are about one hundred and fifty more in this edition than in the last, thus bringing distinctly before the eye of the student everything of interest or importance.

**BY THE SAME AUTHOR.**

**THE DISSECTOR'S MANUAL; OR, PRACTICAL AND SURGICAL ANATOMY.** Third American, from the last revised and enlarged English edition. Modified and rearranged by WILLIAM HUNT, M. D., late Demonstrator of Anatomy in the University of Pennsylvania. In one large and handsome royal 12mo. volume, of 582 pages, with 154 illustrations; extra cloth, \$2 00.

**HEATH (CHRISTOPHER), F. R. C. S.,**  
*Teacher of Operative Surgery in University College, London.*

**PRACTICAL ANATOMY: A Manual of Dissections.** From the Second revised and improved London edition. Edited, with additions, by W. W. KEEN, M. D., Lecturer on Pathological Anatomy in the Jefferson Medical College, Philadelphia. In one handsome volume, with over 200 illustrations. (*In Press.*)

**HODGES, (RICHARD M.), M. D.,**  
*Late Demonstrator of Anatomy in the Medical Department of Harvard University.*

**PRACTICAL DISSECTIONS.** Second Edition, thoroughly revised. In one neat royal 12mo. volume, half-bound, \$2 00. (*Just Issued.*)

The object of this work is to present to the anatomical student a clear and concise description of that which he is expected to observe in an ordinary course of dissections. The author has endeavored to omit unnecessary details, and to present the subject in the form which many years' experience has shown him to be the most convenient and intelligible to the student. In the revision of the present edition, he has sedulously labored to render the volume more worthy of the favor with which it has heretofore been received.

**MACLISE (JOSEPH).**

**SURGICAL ANATOMY.** By JOSEPH MACLISE, Surgeon. In one volume, very large imperial quarto; with 68 large and splendid plates, drawn in the best style and beautifully colored, containing 190 figures, many of them the size of life; together with copious explanatory letter-press. Strongly and handsomely bound in extra cloth. Price \$14 00.

As no complete work of the kind has heretofore been published in the English language, the present volume will supply a want long felt in this country of an accurate and comprehensive Atlas of Surgical Anatomy, to which the student and practitioner can at all times refer to ascertain the exact relative positions of the various portions of the human frame towards each other and to the surface, as well as their abnormal deviations. Notwithstanding the large size, beauty and finish of the very numerous illustrations, it will be observed that the price is so low as to place it within the reach of all members of the profession.

We know of no work on surgical anatomy which can compete with it.—*Lancet.*

The work of Maclise on surgical anatomy is of the highest value. In some respects it is the best publication of its kind we have seen, and is worthy of a place in the library of any medical man, while the student could scarcely make a better investment than this.—*The Western Journal of Medicine and Surgery.*

No such lithographic illustrations of surgical regions have hitherto, we think, been given. While the operator is shown every vessel and nerve where an operation is contemplated, the exact anatomist is

refreshed by those clear and distinct dissections, which every one must appreciate who has a particle of enthusiasm. The English medical press has quite exhausted the words of praise, in recommending this admirable treatise. Those who have any curiosity to gratify, in reference to the perfectibility of the lithographic art in delineating the complex mechanism of the human body, are invited to examine our specimen copy. If anything will induce surgeons and students to patronize a book of such rare value and everyday importance to them, it will be a survey of the artistic skill exhibited in these fac-similes of nature.—*Boston Med. and Surg. Journal.*

**HORNER'S SPECIAL ANATOMY AND HISTOLOGY.** Eighth edition, extensively revised and modified.

In 2 vols. 8vo., of over 1000 pages, with more than 300 wood-cuts; extra cloth, \$6 00.

**MARSHALL (JOHN), F. R. S.**  
*Professor of Surgery in University College, London, &c.*

**OUTLINES OF PHYSIOLOGY, HUMAN AND COMPARATIVE.**

With Additions by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the University of Pennsylvania, &c. With numerous illustrations. In one large and handsome octavo volume, of 1026 pages, extra cloth, \$6 50; leather, raised bands \$7 50. (*Just Issued.*)

In fact, in every respect, Mr. Marshall has presented us with a most complete, reliable, and scientific work, and we feel that it is worthy our warmest commendation.—*St. Louis Med. Reporter*, Jan. 1869.

This is an elaborate and carefully prepared digest of human and comparative physiology, designed for the use of general readers, but more especially serviceable to the student of medicine. Its style is concise, clear, and scholarly; its order perspicuous and exact, and its range of topics extended. The author and his American editor have been careful to bring to the illustration of the subject the important discoveries of modern science in the various cognate departments of investigation. This is especially visible in the variety of interesting information derived from the departments of chemistry and physics. The great amount and variety of matter contained in the work is strikingly illustrated by turning over the copious index, covering twenty-four closely printed pages in double columns.—*Silliman's Journal*, Jan. 1869.

We doubt if there is in the English language any compend of physiology more useful to the student than this work.—*St. Louis Med. and Surg. Journal*, Jan. 1869.

It quite fulfils, in our opinion, the author's design of making it truly *educational* in its character—which is, perhaps, the highest commendation that can be asked.—*Am. Journ. Med. Sciences*, Jan. 1869.

We may now congratulate him on having completed the latest as well as the best summary of mod-

ern physiological science, both human and comparative, with which we are acquainted. To speak of this work in the terms ordinarily used on such occasions would not be agreeable to ourselves, and would fail to do justice to its author. To write such a book requires a varied and wide range of knowledge, considerable power of analysis, correct judgment, skill in arrangement, and conscientious spirit. It must have entailed great labor, but now that the task has been fulfilled, the book will prove not only invaluable to the student of medicine and surgery, but serviceable to all candidates in natural science examinations, to teachers in schools, and to the lover of nature generally. In conclusion, we can only express the conviction that the merits of the work will command for it that success which the ability and vast labor displayed in its production so well deserve.—*London Lancet*, Feb. 22, 1863.

If the possession of knowledge, and peculiar aptitude and skill in expounding it, qualify a man to write an educational work, Mr. Marshall's treatise might be reviewed favorably without even opening the covers. There are few, if any, more accomplished anatomists and physiologists than the distinguished professor of surgery at University College; and he has long enjoyed the highest reputation as a teacher of physiology, possessing remarkable powers of clear exposition and graphic illustration. We have rarely the pleasure of being able to recommend a text-book so unreservedly as this.—*British Med. Journal*, Jan. 23, 1863.

**CARPENTER (WILLIAM B.), M. D., F. R. S.**  
*Examiner in Physiology and Comparative Anatomy in the University of London.*

**PRINCIPLES OF HUMAN PHYSIOLOGY; with their chief applications to Psychology, Pathology, Therapeutics, Hygiene and Forensic Medicine.** A new American from the last and revised London edition. With nearly three hundred illustrations. Edited, with additions, by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the University of Pennsylvania, &c. In one very large and beautiful octavo volume, of about 900 large pages, handsomely printed; extra cloth, \$5 50; leather, raised bands, \$6 50.

With Dr. Smith, we confidently believe "that the present will more than sustain the enviable reputation already attained by former editions, of being one of the fullest and most complete treatises on the subject in the English language." We know of none from the pages of which a satisfactory knowledge of the physiology of the human organism can be as well obtained, none better adapted for the use of such as take up the study of physiology in its reference to the institutes and practice of medicine.—*Am. Journ. Med. Sciences*.

We doubt not it is destined to retain a strong hold on public favor, and remain the favorite text-book in our colleges.—*Virginia Medical Journal*.

The above is the title of what is emphatically the great work on physiology; and we are conscious that it would be a useless effort to attempt to add anything to the reputation of this invaluable work, and can only say to all with whom our opinion has any influence, that it is our *authority*.—*Atlanta Med. Journal*.

**BY THE SAME AUTHOR.**

**PRINCIPLES OF COMPARATIVE PHYSIOLOGY.** New American, from the Fourth and Revised London Edition. In one large and handsome octavo volume, with over three hundred beautiful illustrations. Pp. 752. Extra cloth, \$5 00.

As a complete and condensed treatise on its extended and important subject, this work becomes a necessity to students of natural science, while the very low price at which it is offered places it within the reach of all.

**KIRKES (WILLIAM SENHOUSE), M. D.,**  
**A MANUAL OF PHYSIOLOGY.** A new American from the third and improved London edition. With two hundred illustrations. In one large and handsome royal 12mo. volume. Pp. 586. Extra cloth, \$2 25; leather, \$2 75.

It is at once convenient in size, comprehensive in design, and concise in statement, and altogether well adapted for the purpose designed.—*St. Louis Med. and Surg. Journal*.

It is a most excellent guide in the study of physiology in its most advanced and perfect form. The author has shown himself capable of giving details sufficiently ample in a condensed and concentrated shape, on a science in which it is necessary at once to be correct and not lengthened.—*Edinburgh Med. and Surg. Journal*.

The physiological reader will find it a most excel-

**DALTON (J. C.), M. D.,***Professor of Physiology in the College of Physicians and Surgeons, New York, &c.*

**A TREATISE ON HUMAN PHYSIOLOGY.** Designed for the use of Students and Practitioners of Medicine. Fourth edition, revised, with nearly three hundred illustrations on wood. In one very beautiful octavo volume, of about 700 pages, extra cloth, \$5 25; leather, \$6 25. (*Just Issued.*)

*From the Preface to the New Edition.*

"The progress made by Physiology and the kindred Sciences during the last few years has required, for the present edition of this work, a thorough and extensive revision. This progress has not consisted in any very striking single discoveries, nor in a decided revolution in any of the departments of Physiology; but it has been marked by great activity of investigation in a multitude of different directions, the combined results of which have not failed to impress a new character on many of the features of physiological knowledge. . . . In the revision and correction of the present edition, the author has endeavored to incorporate all such improvements in physiological knowledge with the mass of the text in such a manner as not essentially to alter the structure and plan of the work, so far as they have been found adapted to the wants and convenience of the reader. . . . Several new illustrations are introduced, some of them as additions, others as improvements or corrections of the old. Although all parts of the book have received more or less complete revision, the greatest number of additions and changes were required in the Second Section, on the Physiology of the Nervous System."

The advent of the first edition of Prof. Dalton's Physiology, about eight years ago, marked a new era in the study of physiology to the American student. Under Dalton's skillful management, physiological science threw off the long, loose, ungainly garments of probability and surmise, in which it had been arrayed by most artists, and came among us smiling and attractive, in the beautifully tinted and closely fitting dress of a demonstrated science. It was a stroke of genius, as well as a result of erudition and talent, that led Prof. Dalton to present to the world a work on physiology at once brief, pointed, and comprehensive, and which exhibited plainly in letter and drawings the basis upon which the conclusions arrived at rested. It is no disparagement of the many excellent works on physiology, published prior to that of Dalton, to say that none of them, either in plan of arrangement or clearness of execution, could be compared with his for the use of students or general practitioners of medicine. For this purpose his book has no equal in the English language.—*Western Journal of Medicine*, Nov. 1867.

A capital text-book in every way. We are, therefore, glad to see it in its fourth edition. It has already been examined at full length in these columns, so that we need not now further advert to it beyond remarking that both revision and enlargement have been most judicious.—*London Med. Times and Gazette*, Oct. 19, 1867.

No better proof of the value of this admirable work could be produced than the fact that it has already reached a fourth edition in the short space of eight years. Possessing in an eminent degree the

merits of clearness and condensation, and being fully brought up to the present level of Physiology, it is undoubtedly one of the most reliable text-books upon this science that could be placed in the hands of the medical student.—*Am. Journal Med. Sciences*, Oct. 1867.

Prof. Dalton's work has such a well-established reputation that it does not stand in need of any recommendation. Ever since its first appearance it has become the highest authority in the English language; and that it is able to maintain the enviable position which it has taken, the rapid exhaustion of the different successive editions is sufficient evidence. The present edition, which is the fourth, has been thoroughly revised, and enlarged by the incorporation of all the many important advances which have lately been made in this rapidly progressing science.—*N. Y. Med. Record*, Oct. 15, 1867.

As it stands, we esteem it the very best of the physiological text-books for the student, and the most concise reference and guide-book for the practitioner.—*N. Y. Med. Journal*, Oct. 1867.

The present edition of this now standard work fully sustains the high reputation of its accomplished author. It is not merely a reprint, but has been faithfully revised, and enriched by such additions as the progress of physiology has rendered desirable. Taken as a whole, it is unquestionably the most reliable and useful treatise on the subject that has been issued from the American press.—*Chicago Med. Journal*, Sept. 1867.

**DUNGLISON (ROBLEY), M. D.,***Professor of Institutes of Medicine in Jefferson Medical College, Philadelphia.*

**HUMAN PHYSIOLOGY.** Eighth edition. Thoroughly revised and extensively modified and enlarged, with five hundred and thirty-two illustrations. In two large and handsomely printed octavo volumes of about 1500 pages, extra cloth. \$7 00.

**LEHMANN (C. G.)**

**PHYSIOLOGICAL CHEMISTRY.** Translated from the second edition by GEORGE E. DAY, M. D., F. R. S., &c., edited by R. E. ROGERS, M. D., Professor of Chemistry in the Medical Department of the University of Pennsylvania, with illustrations selected from Funke's Atlas of Physiological Chemistry, and an Appendix of plates. Complete in two large and handsome octavo volumes, containing 1200 pages, with nearly two hundred illustrations, extra cloth. \$6 00.

**BY THE SAME AUTHOR.**

**MANUAL OF CHEMICAL PHYSIOLOGY.** Translated from the German, with Notes and Additions, by J. CHESTON MORRIS, M. D., with an Introductory Essay on Vital Force, by Professor SAMUEL JACKSON, M. D., of the University of Pennsylvania. With illustrations on wood. In one very handsome octavo volume of 336 pages extra cloth. \$2 25.

**TODD (ROBERT B.), M. D. F. R. S., and BOWMAN (W.), F. R. S.**

**THE PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.** With about three hundred large and beautiful illustrations on wood. Complete in one large octavo volume of 950 pages, extra cloth. Price \$4 75.

**BRANDE (WM. T.), D. C. L., and TAYLOR (ALFRED S.), M. D., F. R. S.**

**CHEMISTRY.** Second American edition, thoroughly revised by Dr. TAYLOR. In one handsome 8vo. volume of 764 pages, extra cloth, \$5 00; leather, \$6 00. (*Lately Issued.*)

FROM DR. TAYLOR'S PREFACE.

"The revision of the second edition, in consequence of the death of my lamented colleague, has devolved entirely upon myself. Every chapter, and indeed every page, has been revised, and numerous additions made in all parts of the volume. These additions have been restricted chiefly to subjects having some practical interest, and they have been made as concise as possible, in order to keep the book within those limits which may retain for it the character of a Student's Manual"—*London*, June 29, 1867.

A book that has already so established a reputation, as has Brande and Taylor's Chemistry, can hardly need a notice, save to mention the additions and improvements of the edition. Doubtless the work will long remain a favorite text-book in the schools, as well as a convenient book of reference for all.—*N. Y. Medical Gazette*, Oct. 12, 1867.

For this reason we hail with delight the republication, in a form which will meet with general approval and command public attention, of this really valuable standard work on chemistry—more particularly as it has been adapted with such care to the wants of the general public. The well known scholarship of its authors, and their extensive researches for many years in experimental chemistry, have been long appreciated in the scientific world, but in this work they have been careful to give the largest possible amount of information with the most sparing use of technical terms and phraseology, so as to furnish the reader, "whether a student of medicine, or a man of the world, with a plain introduction to the science and practice of chemistry."—*Journal of Applied Chemistry*, Oct. 1867.

This second American edition of an excellent treatise on chemical science is not a mere republication from the English press, but is a revision and enlargement of the original, under the supervision of the surviving author, Dr. Taylor. The favorable opinion expressed on the publication of the former edition of this work is fully sustained by the present revision, in which Dr. T. has increased the size of the volume, by an addition of sixty-eight pages.—*Am. Journ. Med. Sciences*, Oct. 1867.

**THE HANDBOOK IN CHEMISTRY OF THE STUDENT.**—For clearness of language, accuracy of description, extent of information, and freedom from pedantry and mysticism, no other text-book comes into competition with it.—*The Lancet*.

The authors set out with the definite purpose of writing a book which shall be intelligible to any educated man. Thus conceived, and worked out in the most sturdy, common-sense method, this book gives in the clearest and most summary method possible all the facts and doctrines of chemistry.—*Medical Times*.

**ODLING (WILLIAM),**

*Lecturer on Chemistry, at St. Bartholomew's Hospital, &c.*

**A COURSE OF PRACTICAL CHEMISTRY,** arranged for the Use of Medical Students. With Illustrations. From the Fourth and Revised London Edition. In one neat royal 12mo. volume, extra cloth. \$2. (*Just Issued.*)

As a work for the practitioner it cannot be excelled. It is written plainly and concisely, and gives in a very small compass the information required by the busy practitioner. It is essentially a work for the physician, and no one who purchases it will ever regret the outlay. In addition to all that is usually given in connection with inorganic chemistry, there are most valuable contributions to toxicology, animal and or-

ganic chemistry, etc. The portions devoted to a discussion of these subjects are very excellent. In no work can the physician find more that is valuable and reliable in regard to urine, bile, milk, bone, urinary calculi, tissue composition, etc. The work is small, reasonable in price, and well published.—*Richmond and Louisville Med. Journal*, Dec. 1869.

**BOWMAN (JOHN E.), M. D.**

**PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY.** Edited by C. L. BLOXAM, Professor of Practical Chemistry in King's College, London. Fifth American, from the fourth and revised English Edition. In one neat volume, royal 12mo., pp. 351, with numerous illustrations, extra cloth. \$2 25. (*Now Ready.*)

The fourth edition of this invaluable text-book of Medical Chemistry was published in England in October of the last year. The Editor has brought down the Handbook to that date, introducing, as far as was compatible with the necessary conciseness of such a work, all the valuable discoveries in the science

which have come to light since the previous edition was printed. The work is indispensable to every student of medicine or enlightened practitioner. It is printed in clear type, and the illustrations are numerous and intelligible.—*Boston Med. and Surg. Journal*.

BY THE SAME AUTHOR.

**INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS.** Fifth American, from the fifth and revised London edition. With numerous illustrations. In one neat vol., royal 12mo., extra cloth. \$2 25. (*Now Ready.*)

One of the most complete manuals that has for a long time been given to the medical student.—*Athenæum*.

We regard it as realizing almost everything to be desired in an introduction to Practical Chemistry.

It is by far the best adapted for the Chemical student of any that has yet fallen in our way.—*British and Foreign Medico-Chirurgical Review*.

The best introductory work on the subject with which we are acquainted.—*Edinburgh Monthly Jour.*

**GRAHAM (THOMAS), F. R. S.**

**THE ELEMENTS OF INORGANIC CHEMISTRY,** including the Applications of the Science in the Arts. New and much enlarged edition, by HENRY WATTS and ROBERT BRIDGES, M. D. Complete in one large and handsome octavo volume, of over 800 very large pages, with two hundred and thirty-two wood-cuts, extra cloth. \$5 50.

**KNAPP'S TECHNOLOGY;** or Chemistry Applied to the Arts, and to Manufactures. With American additions, by Prof. WALTER R. JOHNSON. In two

very handsome octavo volumes, with 500 wood engravings, extra cloth, \$6 00.

**FOWNES (GEORGE), Ph. D.**

**A MANUAL OF ELEMENTARY CHEMISTRY; Theoretical and**

**Practical.** With one hundred and ninety-seven illustrations. A new American, from the tenth and revised London edition. Edited by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of about 850 pp., extra cloth, \$2 75; leather, \$3 25. (*Just Issued.*)

Some years having elapsed since the appearance of the last American edition, and several revisions having been made of the work in England during the interval, it will be found very greatly altered, and enlarged by about two hundred and fifty pages, containing nearly one half more matter than before. The editors, Mr. Watts and Dr. Bence Jones, have labored sedulously to render it worthy in all respects of the very remarkable favor which it has thus far enjoyed, by incorporating in it all the most recent investigations and discoveries, in so far as is compatible with its design as an elementary text-book. While its distinguishing characteristics have been preserved, various portions have been rewritten, and especial pains have been taken with the department of Organic Chemistry in which late researches have accumulated so many new facts and have enabled the subject to be systematized and rendered intelligible in a manner formerly impossible. As only a few months have elapsed since the work thus passed through the hands of Mr. Watts and Dr. Bence Jones, but little has remained to be done by the American editor. Such additions as seemed advisable have however been made, and especial care has been taken to secure, by the closest scrutiny, the accuracy so essential in a work of this nature.

Thus fully brought up to a level with the latest advances of science, and presented at a price within the reach of all, it is hoped that the work will maintain its position as the favorite text-book of the medical student.

This work is so well known that it seems almost superfluous for us to speak about it. It has been a favorite text-book with medical students for years, and its popularity has in no respect diminished. Whenever we have been consulted by medical students, as has frequently occurred, what treatise on chemistry they should procure, we have always recommended Fownes', for we regarded it as the best. There is no work that combines so many excellences. It is of convenient size, not prolix, of plain perspicuous diction, contains all the most recent discoveries, and is of moderate price.—*Cincinnati Med. Repertory*, Aug. 1869.

Large additions have been made, especially in the department of organic chemistry, and we know of no other work that has greater claims on the physician, pharmacist, or student, than this. We cheerfully recommend it as the best text-book on elementary chemistry, and bespeak for it the careful attention of students of pharmacy.—*Chicago Pharmacist*, Aug. 1869.

The American reprint of the tenth revised and corrected English edition is now issued, and represents the present condition of the science. No comments are necessary to insure it a favorable reception at the hands of practitioners and students.—*Boston Med. and Surg. Journal*, Aug. 12, 1869.

It will continue, as heretofore, to hold the first rank as a text-book for students of medicine.—*Chicago Med. Examiner*, Aug. 1869.

This work, long the recognized Manual of Chemistry, appears as a tenth edition, under the able editorship of Bence Jones and Henry Watts. The chapter on

the General Principles of Chemical Philosophy, and the greater part of the organic chemistry, have been rewritten, and the whole work revised in accordance with the recent advances in chemical knowledge. It remains the standard text-book of chemistry.—*Dublin Quarterly Journal*, Feb. 1869.

There is probably not a student of chemistry in this country to whom the admirable manual of the late Professor Fownes is unknown. It has achieved a success which we believe is entirely without a parallel among scientific text-books in our language. This success has arisen from the fact that there is no English work on chemistry which combines so many excellences. Of convenient size, of attractive form, clear and concise in diction, well illustrated, and of moderate price, it would seem that every requisite for a student's hand-book has been attained. The ninth edition was published under the joint editorship of Dr. Bence Jones and Dr. Hofmann; the new one has been superintended through the press by Dr. Bence Jones and Mr. Henry Watts. It is not too much to say that it could not possibly have been in better hands. There is no one in England who can compare with Mr. Watts in experience as a compiler in chemical literature, and we have much pleasure in recording the fact that his reputation is well sustained by this, his last undertaking.—*The Chemical News*, Feb. 1869.

Here is a new edition which has been long watched for by eager teachers of chemistry. In its new garb, and under the editorship of Mr. Watts, it has resumed its old place as the most successful of text-books.—*Indian Medical Gazette*, Jan. 1, 1869.

**ATTFIELD (JOHN), Ph. D.**

*Professor of Practical Chemistry to the Pharmaceutical Society of Great Britain, &c.*

**CHEMISTRY, GENERAL, MEDICAL, AND PHARMACEUTICAL;**

**Including the Chemistry of the British Pharmacopœia. Adapted to the Requirements of American Practice of Medicine and Pharmacy. In one handsome volume. (*Preparing.*)**

It contains a most admirable digest of what is specially needed by the medical student in all that relates to practical chemistry, and constitutes for him a sound and useful text-book on the subject. . . . We commend it to the notice of every medical, as well as pharmaceutical, student. We only regret that we had not the book to depend upon in working up the subject of practical and pharmaceutical chemistry for the University of London, for which it seems to us that it is exactly adapted. This is paying the book a high compliment.—*The Lancet*.

Dr. Attfield's book is written in a clear and able manner; it is a work *sui generis* and without a rival; it will be welcomed, we think, by every reader of the 'Pharmacopœia,' and is quite as well suited for the medical student as for the pharmacist.—*The Chemical News*.

A valuable guide to practical medical chemistry, and an admirable companion to the "British Pharmacopœia." It is rare to find so many qualities combined, and quite curious to note how much valuable information finds a mutual interdependence.—*Medical Times and Gazette*.

It is almost the only book from which the medical student can work up the pharmacopœial chemistry required at his examinations.—*The Pharmaceutical Journal*

At page 350 of the current volume of this journal, we remarked that "there is a sad dearth of [medical] students' text-books in chemistry." Dr. Attfield's volume, just published, is rather a new book than a second edition of his previous work, and more nearly realizes our ideal than any book we have before seen on the subject.—*The British Medical Journal*.

The introduction of new matter has not destroyed the original character of the work, as a treatise on pharmaceutical and medical chemistry, but has simply extended the foundations of these special departments of the science.—*The Chemist and Druggist*.

We believe that this manual has been already adopted as the class-book by many of the professors in the public schools throughout the United Kingdom. . . . In pharmaceutical chemistry applied to the pharmacopœia, we know of no rival. It is, therefore, particularly suited to the medical student.—*The Medical Press and Circular*.

**PARRISH (EDWARD),***Professor of Materia Medica in the Philadelphia College of Pharmacy.*

**A TREATISE ON PHARMACY.** Designed as a Text-Book for the Student, and as a Guide for the Physician and Pharmacist. With many Formulæ and Prescriptions. Third Edition, greatly improved. In one handsome octavo volume, of 850 pages, with several hundred illustrations, extra cloth. \$5 00.

The immense amount of practical information condensed in this volume may be estimated from the fact that the Index contains about 4700 items. Under the head of Acids there are 312 references; under Emplastrum, 36; Extracts, 159; Lozenges, 25; Mixtures, 55; Pills, 56; Syrups, 131; Tinctures, 138; Unguentum, 57, &c.

We have examined this large volume with a good deal of care, and find that the author has completely exhausted the subject upon which he treats; a more complete work, we think, it would be impossible to find. To the student of pharmacy the work is indispensable; indeed, so far as we know, it is the only one of its kind in existence, and even to the physician or medical student who can spare five dollars to purchase it, we feel sure the practical information he will obtain will more than compensate him for the outlay.—*Canada Med. Journal*, Nov. 1864.

The medical student and the practising physician will find the volume of inestimable worth for study and reference.—*San Francisco Med. Press*, July, 1864.

When we say that this book is in some respects the best which has been published on the subject in the English language for a great many years, we do

not wish it to be understood as very extravagant praise. In truth, it is not so much the best as the only book.—*The London Chemical News*.

An attempt to furnish anything like an analysis of Parrish's very valuable and elaborate *Treatise on Practical Pharmacy* would require more space than we have at our disposal. This, however, is not so much a matter of regret, inasmuch as it would be difficult to think of any point, however minute and apparently trivial, connected with the manipulation of pharmaceutical substances or appliances which has not been clearly and carefully discussed in this volume. Want of space prevents our enlarging further on this valuable work, and we must conclude by a simple expression of our hearty appreciation of its merits.—*Dublin Quarterly Jour. of Medical Science*, August, 1864.

**STILLÉ (ALFRED), M.D.,***Professor of Theory and Practice of Medicine in the University of Penna.*

**THERAPEUTICS AND MATERIA MEDICA;** a Systematic Treatise on the Action and Uses of Medicinal Agents, including their Description and History. Third edition, revised and enlarged. In two large and handsome octavo volumes of about 1700 pages, extra cloth, \$10; leather, \$12. (*Just Issued.*)

Dr. Stillé's splendid work on therapeutics and materia medica.—*London Med. Times*, April 8, 1865.

Dr. Stillé stands to-day one of the best and most honored representatives at home and abroad, of American medicine; and these volumes, a library in themselves, a treasure-house for every studious physician, assure his fame even had he done nothing more.—*The Western Journal of Medicine*, Dec. 1865.

We regard this work as the best one on Materia Medica in the English language, and as such it deserves the favor it has received.—*Am. Journ. Medical Sciences*, July 1868.

We need not dwell on the merits of the third edition of this magnificently conceived work. It is the work on Materia Medica, in which Therapeutics are primarily considered—the mere natural history of drugs being briefly disposed of. To medical practitioners this is a very valuable conception. It is wonderful how much of the riches of the literature of Materia Medica has been condensed into this book. The references alone would make it worth possessing. But it is not a mere compilation. The writer exercises a good judgment of his own on the great doctrines and points of Therapeutics. For purposes of practice, Stillé's book is almost unique as a repertory of information, empirical and scientific, on the actions and uses of medicines.—*London Lancet*, Oct. 31, 1865.

Through the former editions, the professional world is well acquainted with this work. At home and

abroad its reputation as a standard treatise on Materia Medica is securely established. It is second to no work on the subject in the English tongue, and, indeed, is decidedly superior, in some respects, to any other.—*Pacific Med. and Surg. Journal*, July, 1865.

Stillé's Therapeutics is incomparably the best work on the subject.—*N. Y. Med. Gazette*, Sept. 26, 1865.

Dr. Stillé's work is becoming the best known of any of our treatises on Materia Medica. . . . One of the most valuable works in the language on the subjects of which it treats.—*N. Y. Med. Journal*, Oct. 1868.

The rapid exhaustion of two editions of Prof. Stillé's scholarly work, and the consequent necessity for a third edition, is sufficient evidence of the high estimate placed upon it by the profession. It is no exaggeration to say that there is no superior work upon the subject in the English language. The present edition is fully up to the most recent advance in the science and art of therapeutics.—*Leavenworth Medical Herald*, Aug. 1868.

The work of Prof. Stillé has rapidly taken a high place in professional esteem, and to say that a third edition is demanded and now appears before us, sufficiently attests the firm position this treatise has made for itself. As a work of great research, and scholarship, it is safe to say we have nothing superior. It is exceedingly full, and the busy practitioner will find ample suggestions upon almost every important point of therapeutics.—*Cincinnati Lancet*, Aug. 1868.

**GRIFFITH (ROBERT E.), M.D.**

**A UNIVERSAL FORMULARY,** Containing the Methods of Preparing and Administering Official and other Medicines. The whole adapted to Physicians and Pharmacists. Second edition, thoroughly revised, with numerous additions, by ROBERT P. THOMAS, M.D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one large and handsome octavo volume of 650 pages, double-columns. Extra cloth, \$4 00; leather, \$5 00.

Three complete and extended indexes render the work especially adapted for immediate consultation. One, of DISEASES and THEIR REMEDIES, presents under the head of each disease the remedial agents which have been usefully exhibited in it, with reference to the formulæ containing them—while another of PHARMACEUTICAL and BOTANICAL NAMES, and a very thorough GENERAL INDEX afford the means of obtaining at once any information desired. The Formulary itself is arranged alphabetically, under the heads of the leading constituents of the prescriptions.

We know of none in our language, or any other, so comprehensive in its details.—*London Lancet*.

One of the most complete works of the kind in any language.—*Edinburgh Med. Journal*.

We are not cognizant of the existence of a parallel work.—*London Med. Gazette*.

**P**EREIRA (JONATHAN), M.D., F.R.S. and L.S.

**MATERIA MEDICA AND THERAPEUTICS;** being an Abridgment of the late Dr. Pereira's Elements of Materia Medica, arranged in conformity with the British Pharmacopœia, and adapted to the use of Medical Practitioners, Chemists and Druggists, Medical and Pharmaceutical Students, &c. By F. J. FARRE, M.D., Senior Physician to St. Bartholomew's Hospital, and London Editor of the British Pharmacopœia; assisted by ROBERT BENTLEY, M.R.C.S., Professor of Materia Medica and Botany to the Pharmaceutical Society of Great Britain; and by ROBERT WARINGTON, F.R.S., Chemical Operator to the Society of Apothecaries. With numerous additions and references to the United States Pharmacopœia, by HORATIO C. WOOD, M.D., Professor of Botany in the University of Pennsylvania. In one large and handsome octavo volume of 1040 closely printed pages, with 236 illustrations, extra cloth, \$7 00; leather, raised bands, \$8 00. (Lately Published.)

The task of the American editor has evidently been no sinecure, for not only has he given to us all that is contained in the abridgment useful for our purposes, but by a careful and judicious embodiment of over a hundred new remedies has increased the size of the former work fully one-third, besides adding many new illustrations, some of which are original. We unhesitatingly say that by so doing he has proportionately increased the value, not only of the condensed edition, but has extended the applicability of the great original, and has placed his medical countrymen under lasting obligations to him. The American physician now has all that is needed in the shape of a complete treatise on materia medica, and the medical student has a text-book which, for practical utility and intrinsic worth, stands unparalleled. Although of considerable size, it is none too large for the purposes for which it has been intended, and every medical man should, in justice to himself, spare a place for it upon his book-shelf, resting assured that the more he consults it the better he will be satisfied of its excellence.—*N. Y. Med. Record*, Nov. 15, 1866.

It will fill a place which no other work can occupy in the library of the physician, student, and apothecary.—*Boston Med. and Surg. Journal*, Nov. 8, 1866.

Of the many works on Materia Medica which have appeared since the issuing of the British Pharmacopœia, none will be more acceptable to the student and practitioner than the present. Pereira's Materia Medica had long ago asserted for itself the position of being the most complete work on the subject in the English language. But its very completeness stood in the way of its success. Except in the way of reference, or to those who made a special study of Materia Medica, Dr. Pereira's work was too full, and its perusal required an amount of time which few had at their disposal. Dr. Farre has very judiciously availed himself of the opportunity of the publication of the new Pharmacopœia, by bringing out an abridged edition of the great work. This edition of Pereira is by no means a mere abridged re-issue, but contains many improvements, both in the descriptive and therapeutical departments. We can recommend it as a very excellent and reliable text-book.—*Edinburgh Med. Journal*, February, 1866.

The reader cannot fail to be impressed, at a glance, with the exceeding value of this work as a compend of nearly all useful knowledge on the materia medica. We are greatly indebted to Professor Wood for his adaptation of it to our meridian. Without his emendations and additions it would lose much of its value to the American student. With them it is an American book.—*Pacific Medical and Surgical Journal*, December, 1866.

It will fill a place which no other work can occupy in the library of the physician, student, and apothecary.—*Boston Med. and Surg. Journal*, Nov. 8, 1866.

**E**LLIS (BENJAMIN), M.D.

**THE MEDICAL FORMULARY:** being a Collection of Prescriptions derived from the writings and practice of many of the most eminent physicians of America and Europe. Together with the usual Dietetic Preparations and Antidotes for Poisons. The whole accompanied with a few brief Pharmaceutic and Medical Observations. Twelfth edition, carefully revised and much improved by ALBERT H. SMITH, M.D. In one volume 8vo. of 376 pages, extra cloth, \$3 00. (Now Ready.)

This work has remained for some time out of print, owing to the anxious care with which the Editor has sought to render the present edition worthy a continuance of the very remarkable favor which has carried the volume to the unusual honor of a TWELFTH EDITION. He has sedulously endeavored to introduce in it all new preparations and combinations deserving of confidence, besides adding two new classes, Antemetics and Disinfectants, with brief references to the inhalation of atomized fluids, the nasal douche of Thudichum, suggestions upon the method of hypodermic injection, the administration of anæsthetics, &c. &c. To accommodate these numerous additions, he has omitted much which the advance of science has rendered obsolete or of minor importance, notwithstanding which the volume has been increased by more than thirty pages. A new feature will be found in a copious Index of Diseases and their remedies, which cannot but increase the value of the work as a suggestive book of reference for the working practitioner. Every precaution has been taken to secure the typographical accuracy so necessary in a work of this nature, and it is hoped that the new edition will fully maintain the position which "ELLIS' FORMULARY" has long occupied.

**C**ARSON (JOSEPH), M.D.,

Professor of Materia Medica and Pharmacy in the University of Pennsylvania, &c.

**SYNOPSIS OF THE COURSE OF LECTURES ON MATERIA MEDICA AND PHARMACY,** delivered in the University of Pennsylvania. With three Lectures on the Modus Operandi of Medicines. Fourth and revised edition, extra cloth, \$3 00. (Just Issued.)

DUNGLISON'S NEW REMEDIES, WITH FORMULÆ FOR THEIR PREPARATION AND ADMINISTRATION. Seventh edition, with extensive additions. One vol. 8vo., pp. 770; extra cloth. \$4 00.

ROYLE'S MATERIA MEDICA AND THERAPEUTICS. Edited by JOSEPH CARSON, M.D. With ninety-eight illustrations. 1 vol. 8vo., pp. 700, extra cloth. \$3 00.

CHRISTISON'S DISPENSATORY. With copious additions, and 213 large wood-engravings. By R. EGLESFELD GRIFFITH, M.D. One vol. 8vo., pp. 1000; extra cloth. \$4 00.

CARPENTER'S PRIZE ESSAY ON THE USE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE. New edition, with a Preface by D. F. CONDIE, M.D., and explanations of scientific words. In one neat 12mo. volume, pp. 178, extra cloth. 60 cents.

DE JONGH ON THE THREE KINDS OF COD-LIVER OIL, with their Chemical and Therapeutic Properties. 1 vol. 12mo., cloth. 75 cents.

MAYNE'S DISPENSATORY AND THERAPEUTICAL REMEMBRANCER. By R. E. GRIFFITH, M.D. In one 12mo. volume, 300 pp., extra cloth. 75 cents.

**GROSS (SAMUEL D.), M. D.,**  
*Professor of Surgery in the Jefferson Medical College of Philadelphia.*

**ELEMENTS OF PATHOLOGICAL ANATOMY.** Third edition, thoroughly revised and greatly improved. In one large and very handsome octavo volume of nearly 800 pages, with about three hundred and fifty beautiful illustrations, of which a large number are from original drawings; extra cloth. \$4 00.

The very beautiful execution of this valuable work, and the exceedingly low price at which it is offered, should command for it a place in the library of every practitioner.

To the student of medicine we would say that we know of no work which we can more heartily commend than Gross's Pathological Anatomy.—*Southern Med. and Surg. Journal.*

The volume commends itself to the medical student; it will repay a careful perusal, and should be upon

the book-shelf of every American physician.—*Charleston Med. Journal.*

It contains much new matter, and brings down our knowledge of pathology to the latest period.—*London Lancet.*

**JONES (C. HANDFIELD), F. R. S., and SIEVEKING (ED. H.), M. D.,**  
*Assistant Physicians and Lecturers in St. Mary's Hospital.*

**A MANUAL OF PATHOLOGICAL ANATOMY.** First American edition, revised. With three hundred and ninetyseven handsome wood engravings. In one large and beautifully printed octavo volume of nearly 750 pages, extra cloth, \$3 50.

Our limited space alone restrains us from noticing more at length the various subjects treated of in this interesting work; presenting, as it does, an excellent summary of the existing state of knowledge in relation to pathological anatomy, we cannot too strongly urge upon the student the necessity of a thorough acquaintance with its contents.—*Medical Examiner.*

We have long had need of a hand-book of pathological anatomy which should thoroughly reflect the present state of that science. In the treatise before us this desideratum is supplied. Within the limits of a moderate octavo, we have the outlines of this great department of medical science accurately defined,

and the most recent investigations presented in sufficient detail for the student of pathology. We cannot at this time undertake a formal analysis of this treatise, as it would involve a separate and lengthy consideration of nearly every subject discussed; nor would such analysis be advantageous to the medical reader. The work is of such a character that every physician ought to obtain it, both for reference and study.—*N. Y. Journal of Medicine.*

Its importance to the physician cannot be too highly estimated, and we would recommend our readers to add it to their library as soon as they conveniently can.—*Montreal Med. Chronicle.*

**GLUGE'S ATLAS OF PATHOLOGICAL HISTOLOGY.**

Translated, with Notes and Additions, by JOSEPH LEIDY, M. D. In one volume, very large imperial quarto, with 320 copper-plate figures, plain and colored, extra cloth. \$4 00.

**SIMON'S GENERAL PATHOLOGY,** as conducive to the Establishment of Rational Principles for the Prevention and Cure of Disease. In one octavo volume of 212 pages, extra cloth. \$1 25.

**WILLIAMS (CHARLES J. B.), M. D.,**  
*Professor of Clinical Medicine in University College, London.*

**PRINCIPLES OF MEDICINE.** An Elementary View of the Causes, Nature, Treatment, Diagnosis, and Prognosis of Disease; with brief remarks on Hygienics, or the preservation of health. A new American, from the third and revised London edition. In one octavo volume of about 500 pages, extra cloth. \$3 50.

No work has ever achieved or maintained a more deserved reputation.—*Virginia Med. and Surg. Journal.*

There is no work in medical literature which can fill the place of this one. It is the *Primer* of the young practitioner, the *Koran* of the scientific one.—*Stethoscope.*

A text-book to which no other in our language is comparable.—*Charleston Med. Journal.*

The absolute necessity of such a work must be evident to all who pretend to more than mere empiricism. We must conclude by again expressing our high sense of the immense benefit which Dr. Williams has conferred on medicine by the publication of this work. We are certain that in the present state of our knowledge his Principles of Medicine could not possibly be surpassed.—*London Jour. of Medicine.*

**HARRISON'S ESSAY TOWARDS A CORRECT THEORY OF THE NERVOUS SYSTEM.** In one octavo volume of 292 pp. \$1 50.

**SOLLY ON THE HUMAN BRAIN;** its Structure, Physiology, and Diseases. From the Second and much enlarged London edition. In one octavo volume of 500 pages, with 120 wood-cuts; extra cloth. \$2 50.

**LA ROCHE ON YELLOW FEVER,** considered in its Historical, Pathological, Etiological, and Therapeutical Relations. In two large and handsome octavo volumes, of nearly 1500 pages, extra cloth, \$7 00.

**LA ROCHE ON PNEUMONIA;** its Supposed Connection, Pathological, and Etiological, with Autumnal

Fevers, including an Inquiry into the Existence and Morbid Agency of Malaria. In one handsome octavo volume, extra cloth, of 500 pages. Price \$3 00.

**BUCKLER ON FIBRO-BRONCHITIS AND RHEUMATIC PNEUMONIA.** In one octavo vol., extra cloth, pp. 150. \$1 25.

**FISKE FUND PRIZE ESSAYS.—LEE ON THE EFFECTS OF CLIMATE ON TUBERCULOUS DISEASE, AND WARREN ON THE INFLUENCE OF PREGNANCY ON THE DEVELOPMENT OF TUBERCLES.** Together in one neat octavo volume extra cloth, \$1 00.

**BARCLAY (A. W.), M. D.**

**A MANUAL OF MEDICAL DIAGNOSIS;** being an Analysis of the Signs and Symptoms of Disease. Third American from the second and revised London edition. In one neat octavo volume of 451 pages, extra cloth. \$3 50.

A work of immense practical utility.—*London Med. Times and Gazette.*

The book should be in the hands of every practical man.—*Dublin Med. Press.*

**FLINT (AUSTIN), M. D.,**

*Professor of the Principles and Practice of Medicine in Bellevue Med. College, N. Y.*

**A TREATISE ON THE PRINCIPLES AND PRACTICE OF MEDICINE;** designed for the use of Students and Practitioners of Medicine. Third edition, revised and enlarged. In one large and closely printed octavo volume of 1002 pages; handsome extra cloth, \$6 00; or strongly bound in leather, with raised bands, \$7 00. (*Just Issued.*)

*From the Preface to the Third Edition.*

Since the publication, in December, 1866, of the second edition of this treatise, much time has been devoted to its revision. Recognizing in the favor with which it has been received a proportionate obligation to strive constantly to increase its worthiness, the author has introduced in the present edition additions, derived from his clinical studies, and from the latest contributions in medical literature, which, it is believed, will enhance considerably the practical utility of the work. A slight modification in the typographical arrangement has accommodated these additions without materially increasing the bulk of the volume.

NEW YORK, October, 1868.

At the very low price affixed, the profession will find this to be one of the cheapest volumes within their reach.

This work, which stands pre-eminently as the advance standard of medical science up to the present time in the practice of medicine, has for its author one who is well and widely known as one of the leading practitioners of this continent. In fact, it is seldom that any work is ever issued from the press more deserving of universal recommendation.—*Dominion Med Journal*, May, 1869.

The third edition of this most excellent book scarcely needs any commendation from us. The volume, as it stands now, is really a marvel: first of all, it is excellently printed and bound—and we encounter that luxury of America, the ready-cut pages, which the Yankees are 'cute enough to insist upon—not are these by any means trifles; but the contents of the book are astonishing. Not only is it wonderful that any one man can have grasped in his mind the whole scope of medicine with that vigor which Dr. Flint shows, but the condensed yet clear way in which this is done is a perfect literary triumph. Dr. Flint is pre-eminently one of the strong men, whose right to do this kind of thing is well admitted; and we say no more than the truth when we affirm that he is very nearly the only living man that could do it with such results as the volume before us.—*The London Practitioner*, March, 1869.

This is in some respects the best text-book of medicine in our language, and it is highly appreciated on the other side of the Atlantic, inasmuch as the first edition was exhausted in a few months. The second edition was little more than a reprint, but the present has, as the author says, been thoroughly revised. Much valuable matter has been added, and by making the type smaller, the bulk of the volume is not much increased. The weak point in many American works is pathology, but Dr. Flint has taken peculiar pains on this point, greatly to the value of the book.—*London Med. Times and Gazette*, Feb. 6, 1869.

Published in 1866, this valuable book of Dr. Flint's has in two years exhausted two editions, and now we gladly announce a third. We say we gladly announce it, because we are proud of it as a national representative work of not only American, but of

cosmopolitan medicine. In it the practice of medicine is young and philosophical, based on reason and common sense, and as such, we hope it will be at the right hand of every practitioner of this vast continent.—*California Medical Gazette*, March, 1869.

Considering the large number of valuable works in the practice of medicine, already before the profession, the marked favor with which this has been received, necessitating a third edition in the short space of two years, indicates unmistakably that it is a work of more than ordinary excellence, and must be accepted as evidence that it has largely fulfilled the object for which the author intended it. A marked feature in the work, and one which particularly adapts it for the use of students as a text-book, and certainly renders it none the less valuable to the busy practitioner as a work of reference, is brevity and simplicity. The present edition has been thoroughly revised, and much new matter incorporated, derived, as the author informs us, both from his own clinical studies, and from the latest contributions to medical literature, thus bringing it fully up with the most recent advances of the science, and greatly enhancing its practical utility; while, by a slight modification of its typographical arrangement, the additions have been accommodated without materially increasing its bulk.—*St. Louis Med. Archives*, Feb. 1869.

If there be among our readers any who are not familiar with the treatise before us, we shall do them a service in persuading them to repair their omission forthwith. Combining to a rare degree the highest scientific attainments with the most practical common sense, and the closest habits of observation, the author has given us a volume which not only sets forth the results of the latest investigations of other laborers, but contains more original views than any other single work upon this well-worn theme within our knowledge.—*N. Y. Med. Gazette*, Feb. 27, 1869.

Practical medicine was at sea when this book appeared above the horizon as a safe and capacious harbor. It came opportunely and was greeted with pleasurable emotions throughout the land.—*Nashville Med. and Surg. Journal*, May, 1869.

**DUNGLISON, FORBES, TWEEDIE, AND CONOLLY.**

**THE CYCLOPEDIA OF PRACTICAL MEDICINE:** comprising Treatises on the Nature and Treatment of Diseases, Materia Medica and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c. In four large super-royal octavo volumes, of 13254 double-columned pages, strongly and handsomely bound in leather, \$15; extra cloth, \$11.

\* \* \* This work contains no less than four hundred and eighteen distinct treatises, contributed by sixty-eight distinguished physicians.

The most complete work on practical medicine extant, or at least in our language.—*Buffalo Medical and Surgical Journal*.

For reference, it is above all price to every practitioner.—*Western Lancet*.

One of the most valuable medical publications of

the day. As a work of reference it is invaluable.—*Western Journal of Medicine and Surgery*.

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner*.

**BARLOW'S MANUAL OF THE PRACTICE OF MEDICINE.** With Additions by D. F. CONDIE, M. D. 1 vol. 8vo., pp. 600, cloth. \$2 50.

**HOLLAND'S MEDICAL NOTES AND REFLECTIONS.** From the third and enlarged English edition. In one handsome octavo volume of about 500 pages, extra cloth. \$3 50.

**HARTSHORNE (HENRY), M. D.,**  
*Professor of Hygiene in the University of Pennsylvania.*

**ESSENTIALS OF THE PRINCIPLES AND PRACTICE OF MEDICINE.**

A handy-book for Students and Practitioners. Second edition, revised and improved. In one handsome royal 12mo. volume of 450 pages, clearly printed on small type, cloth, \$2 38; half bound, \$2 63. (*Just Issued.*)

The very cordial reception with which this work has met shows that the author has fully succeeded in his attempt to condense within a convenient compass the essential points of scientific and practical medicine, so as to meet the wants not only of the student, but also of the practitioner who desires to acquaint himself with the results of recent advances in medical science.

As a strikingly terse, full, and comprehensive embodiment in a condensed form of the essentials in medical science and art, we hazard nothing in saying that it is incomparably in advance of any work of the kind of the past, and will stand long in the future without a rival. A mere glance will, we think, impress others with the correctness of our estimate. Nor do we believe there will be found many who, after the most cursory examination, will fail to possess it. How one could be able to crowd so much that is valuable, especially to the student and young practitioner, within the limits of so small a book, and yet embrace and present all that is important in a well-arranged, clear form, convenient, satisfactory for reference, with so full a table of contents, and extended general index, with nearly three hundred formulas and recipes, is a marvel.—*Western Journal of Medicine*, Aug. 1867.

The little book before us has this quality, and we can therefore say that all students will find it an invaluable guide in their pursuit of clinical medicine. Dr. Hartshorne speaks of it as "an unambitious effort to make useful the experience of twenty years of private and hospital medical practice, with its attendant study and reflection." That the effort will prove successful we have no doubt, and in his study, and at the bedside, the student will find Dr. Hartshorne a

safe and accomplished companion. We speak thus highly of the volume, because it approaches more nearly than any similar manual lately before us the standard at which all such books should aim—of teaching much, and suggesting more. To the student we can heartily recommend the work of our transatlantic colleague, and the busy practitioner, we are sure, will find in it the means of solving many a doubt, and will rise from the perusal of its pages, having gained clearer views to guide him in his daily struggle with disease.—*Dub. Med. Press*, Oct. 2, 1867.

This work of Dr. Hartshorne must not be confounded with the medical manuals so generally to be found in the hands of students, serving them at best but as blind guides, better adapted to lead them astray than to any useful and reliable knowledge. The work before us presents a careful synopsis of the essential elements of the theory of diseased action, its causes, phenomena, and results, and of the art of healing, as recognized by the most authoritative of our professional writers and teachers. A very careful and candid examination of the volume has convinced us that it will be generally recognized as one of the best manuals for the use of the student that has yet appeared.—*American Journal Med. Sciences*, Oct. 1867.

**WATSON (THOMAS), M. D., &c.**

**LECTURES ON THE PRINCIPLES AND PRACTICE OF**

**PHYSIC.** Delivered at King's College, London. A new American, from the last revised and enlarged English edition, with Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children," &c. With one hundred and eighty-five illustrations on wood. In one very large and handsome volume, imperial octavo, of over 1200 closely printed pages in small type; extra cloth, \$6 50; strongly bound in leather, with raised bands, \$7 50.

Believing this to be a work which should lie on the table of every physician, and be in the hands of every student, every effort has been made to condense the vast amount of matter which it contains within a convenient compass, and at a very reasonable price, to place it within reach of all. In its present enlarged form, the work contains the matter of at least three ordinary octavos, rendering it one of the cheapest works now offered to the American profession, while its mechanical execution makes it an exceedingly attractive volume.

**DICKSON'S ELEMENTS OF MEDICINE;** a Compendious View of Pathology and Therapeutics, or the History and Treatment of Diseases. Second edition, revised. 1 vol. 8vo. of 750 pages, extra cloth. \$4 00.

**WHAT TO OBSERVE AT THE BEDSIDE AND AFTER DEATH IN MEDICAL CASES.** Published under the authority of the London Society for Medical Obser-

vation. From the second London edition. 1 vol. royal 12mo., extra cloth. \$1 00.

**LAYCOCK'S LECTURES ON THE PRINCIPLES AND METHODS OF MEDICAL OBSERVATION AND RESEARCH.** For the use of advanced students and junior practitioners. In one very neat royal 12mo. volume, extra cloth. \$1 00.

**FULLER (HENRY WILLIAM), M. D.,**

*Physician to St. George's Hospital, London.*

**ON DISEASES OF THE LUNGS AND AIR-PASSAGES.**

Their Pathology, Physical Diagnosis, Symptoms, and Treatment. From the second and revised English edition. In one handsome octavo volume of about 500 pages, extra cloth, \$3 50. (*Just Issued.*)

Dr. Fuller's work on diseases of the chest was so favorably received, that to many who did not know the extent of his engagements, it was a matter of wonder that it should be allowed to remain three years out of print. Determined, however, to improve it, Dr. Fuller would not consent to a mere reprint, and

accordingly we have what might be with perfect justice styled an entirely new work from his pen, the portion of the work treating of the heart and great vessels being excluded. Nevertheless, this volume is of almost equal size with the first.—*London Medical Times and Gazette*, July 26, 1867.

**BRINTON (WILLIAM), M. D., F. R. S.**

**LECTURES ON THE DISEASES OF THE STOMACH;**

with an Introduction on its Anatomy and Physiology. From the second and enlarged London edition. With illustrations on wood. In one handsome octavo volume of about 300 pages, extra cloth. \$3 25. (*Just issued.*)

Nowhere can be found a more full, accurate, plain, and instructive history of these diseases, or more rational views respecting their pathology and therapeutics.—*Am. Journ. of the Med. Sciences*, April, 1865.

The most complete work in our language upon the diagnosis and treatment of these puzzling and important diseases.—*Boston Med. and Surg. Journal*, Nov. 1865.

**FLINT (AUSTIN), M. D.,**

*Professor of the Principles and Practice of Medicine in Bellevue Hospital Med. College, N. Y.*

**A PRACTICAL TREATISE ON THE DIAGNOSIS, PATHOLOGY, AND TREATMENT OF DISEASES OF THE HEART.** Second revised and enlarged edition. In one octavo volume of 550 pages, with a plate, extra cloth, \$4. (*Now Ready.*)

The author has sedulously improved the opportunity afforded him of revising this work. Portions of it have been rewritten, and the whole brought up to a level with the most advanced condition of science. It must therefore continue to maintain its position as the standard treatise on the subject.

Dr. Flint chose a difficult subject for his researches, and has shown remarkable powers of observation and reflection, as well as great industry, in his treatment of it. His book must be considered the fullest and clearest practical treatise on those subjects, and should be in the hands of all practitioners and students. It is a credit to American medical literature. —*Amer. Journ. of the Med. Sciences*, July, 1860.

We question the fact of any recent American author in our profession being more extensively known, or more deservedly esteemed in this country than Dr. Flint. We willingly acknowledge his success, more particularly in the volume on diseases of the heart, in making an extended personal clinical study avail-

able for purposes of illustration, in connection with cases which have been reported by other trustworthy observers.—*Brit. and For. Med.-Chirurg. Review*.

In regard to the merits of the work, we have no hesitation in pronouncing it full, accurate, and judicious. Considering the present state of science, such a work was much needed. It should be in the hands of every practitioner.—*Chicago Med. Journ.*

With more than pleasure do we hail the advent of this work, for it fills a wide gap on the list of textbooks for our schools, and is, for the practitioner, the most valuable practical work of its kind.—*N. O. Med. News*.

**BY THE SAME AUTHOR.** (*Just Issued.*)

**A PRACTICAL TREATISE ON THE PHYSICAL EXPLORATION OF THE CHEST AND THE DIAGNOSIS OF DISEASES AFFECTING THE RESPIRATORY ORGANS.** Second and revised edition. In one handsome octavo volume of 595 pages, extra cloth, \$4 50.

Premising this observation of the necessity of each student and practitioner making himself acquainted with auscultation and percussion, we may state our honest opinion that Dr. Flint's treatise is one of the most trustworthy guides which he can consult. The style is clear and distinct, and is also concise, being free from that tendency to over-refinement and unnecessary minuteness which characterizes many works on the same subject.—*Dublin Medical Press*, Feb. 6, 1867.

In the invaluable work before us, we have a book of facts of nearly 600 pages, admirably arranged, clear, thorough, and lucid on all points, without prolixity; exhausting every point and topic touched; a monument of patient and long-continued observation, which does credit to its author, and reflects honor on

American medicine.—*Atlanta Med. and Surg. Journal*, Feb. 1867.

The chapter on Phthisis is replete with interest; and his remarks on the diagnosis, especially in the early stages, are remarkable for their acumen and great practical value. Dr. Flint's style is clear and elegant, and the tone of freshness and originality which pervades his whole work lead an additional force to its thoroughly practical character, which cannot fail to obtain for it a place as a standard work on diseases of the respiratory system.—*London Lancet*, Jan. 19, 1867.

This is an admirable book. Excellent in detail and execution, nothing better could be desired by the practitioner. Dr. Flint enriches his subject with much solid and not a little original observation.—*Ranking's Abstract*, Jan. 1867.

**PAVY (F. W.), M. D., F. R. S.**

*Senior Asst. Physician to and Lecturer on Physiology, at Guy's Hospital, &c.*

**A TREATISE ON THE FUNCTION OF DIGESTION; its Disorders and their Treatment.** From the second London edition. In one handsome volume, small octavo, extra cloth, \$2 00. (*Just Ready.*)

The work before us is one which deserves a wide circulation. We know of no better guide to the study of digestion and its disorders.—*St. Louis Med. and Surg. Journal*, July 10, 1869.

A thoroughly good book, being a careful systematic

treatise, and sufficiently exhaustive for all practical purposes.—*Leavenworth Med. Herald*, July, 1869.

A very valuable work on the subject of which it treats. Small, yet it is full of valuable information.—*Cincinnati Med. Repertory*, June, 1869.

**CHAMBERS (T. K.), M. D.,**

*Consulting Physician to St. Mary's Hospital, London, &c.*

**THE INDIGESTIONS; or, Diseases of the Digestive Organs Functionally Treated.** Third and revised Edition. In one handsome octavo volume of 333 pages, extra cloth. \$3 00. (*Now Ready.*)

**AUTHOR'S PREFACE.**

Since publishing my first edition, I have inserted upwards of ten dozen cases, and have rearranged, indeed in part rewritten, the commentary upon them. A third edition is not yet required in England, so I send the MS. for publication to America. I have faith in the kindly feeling with which it will be received there.

LONDON, December, 1869.

We look upon this chapter as a most valuable guide to physicians, and warning to patients concerning transgressions against the established physiological conduct of life. The advice as to medical treatment proper, is also most serviceable. It should be read by every medical man in the country, and he should read his lessons to his patients from out its pages. We

only regret that we have no room for a more thorough analysis of its contents.—*N. Y. Medical Journal*, March, 1868.

The work should be in the hands of every practicing physician.—*Boston Med. and Surg. Journal*, Nov. 21, 1867.

**HABERSHON ON DISEASES OF THE ALIMENTARY CANAL, ŒSOPHAGUS, STOMACH, CÆCUM, AND INTESTINES.** With illustrations on wood. One vol. 8vo., 312 pages, extra cloth. \$2 50.

**CLYMER ON FEVERS; THEIR DIAGNOSIS PA-**

**THOLOGY AND TREATMENT.** In one octavo volume of 600 pages, leather. \$1 75.

**TODD'S CLINICAL LECTURES ON CERTAIN ACUTE DISEASES.** In one neat octavo volume, of 320 pages, extra cloth. \$2 50.

**ROBERTS (WILLIAM), M. D.,**  
*Lecturer on Medicine in the Manchester School of Medicine, &c.*

**A PRACTICAL TREATISE ON URINARY AND RENAL DISEASES,** including Urinary Deposits. Illustrated by numerous cases and engravings. In one very handsome octavo volume of 516 pp., extra cloth. \$4 50. (*Just Issued.*)

In carrying out this design, he has not only made good use of his own practical knowledge, but has brought together from various sources a vast amount of information, some of which is not generally possessed by the profession in this country. We must now bring our notice of this book to a close, regretting only that we are obliged to resist the temptation of giving further extracts from it. Dr. Roberts has already on several occasions placed before the profession the results of researches made by him on various points connected with the urine, and had thus led us to expect from him something good—in which expectation we have been by no means disappointed. The book is, beyond question, the most comprehensive

work on urinary and renal diseases, considered in their strictly practical aspect, that we possess in the English language.—*British Medical Journal*, Dec. 9, 1865.

We have read this book with much satisfaction. It will take its place beside the best treatises in our language upon urinary pathology and therapeutics. Not the least of its merits is that the author, unlike some other book-makers, is contented to withhold much that he is well qualified to discuss in order to impart to his volume such a strictly practical character as cannot fail to render it popular among British readers.—*London Med. Times and Gazette*, March 17, 1866.

**BASHAM (W. R.), M. D.,**  
*Senior Physician to the Westminster Hospital, &c.*

**RENAL DISEASES: a Clinical Guide to their Diagnosis and Treatment.** With illustrations. In one neat royal 12mo. volume of 304 pages. \$2 00. (*Just Ready.*)

It is with the view of promoting a practical and clinical knowledge of a class of diseases which are not without their difficulties in diagnosis that the present work has been prepared, with the hope that both student and young practitioner may by it be assisted in their clinical observations.—*Author's Preface.*

**MORLAND ON RETENTION IN THE BLOOD OF THE ELEMENTS OF THE URINARY SECRETION.** 1 vol. 8vo., extra cloth. 75 cents.

**JONES (C. HANDFIELD), M. D.,**  
*Physician to St. Mary's Hospital, &c.*

**CLINICAL OBSERVATIONS ON FUNCTIONAL NERVOUS DISORDERS.** Second American Edition. In one handsome octavo volume of 348 pages, extra cloth, \$3 25. (*Just Issued.*)

Taken as a whole, the work before us furnishes a short but reliable account of the pathology and treatment of a class of very common but certainly highly obscure disorders. The advanced student will find it a rich mine of valuable facts, while the medical practitioner will derive from it many a suggestive hint to aid him in the diagnosis of "nervous cases," and in determining the true indications for their amelioration or cure.—*Amer. Journ. Med. Sci.*, Jan. 1867.

We must cordially recommend it to the profession of this country as supplying, in a great measure, a deficiency which exists in the medical literature of the English language.—*New York Med. Journ.*, April, 1867.

The volume is a most admirable one—full of hints and practical suggestions.—*Canada Med. Journal*, April, 1867.

**SLADE (D. D.), M. D.**

**DIPHTHERIA; its Nature and Treatment,** with an account of the History of its Prevalence in various Countries. Second and revised edition. In one neat royal 12mo. volume, extra cloth. \$1 25. (*Just issued.*)

**SMITH ON CONSUMPTION; ITS EARLY AND REMEDIABLE STAGES.** In one neat octavo volume of 254 pages, extra cloth. \$2 25.

**SALTER ON ASTHMA; its Pathology, Causes, Consequences, and Treatment.** In one volume octavo, extra cloth. \$2 50.

**WALSHE'S PRACTICAL TREATISE ON THE DISEASES OF THE HEART AND GREAT VESSELS.** Third American, from the third revised and much enlarged London edition. In one handsome octavo volume of 420 pages, extra cloth. \$3 00.

**HUDSON (A.), M. D., M. R. I. A.,**  
*Physician to the Meath Hospital.*

**LECTURES ON THE STUDY OF FEVER.** In one vol. 8vo., extra Cloth, \$2 50. (*Just Issued.*)

As an admirable summary of the present state of our knowledge concerning fever, the work will be as welcome to the medical man in active practice as to the student. To the hard-worked practitioner who wishes to refresh his notions concerning fever, the book will prove most valuable. . . . We heartily commend his excellent volume to students and the profession at large.—*London Lancet*, June 22, 1867.

The truly philosophical lectures of Dr. Hudson add

much to our previous knowledge, all of which they, moreover, analyze and condense. This well-conceived task has been admirably executed in the lectures, illustrative cases and quotations being arranged in an appendix to each. We regret that space forbids our quotation from the lectures on treatment, which are, in regard to research and judgment, most masterly, and evidently the result of extended and mature experience.—*British Medical Journal*, Feb. 22, 1868.

**LYONS (ROBERT D.), K. C. C.**

**A TREATISE ON FEVER; or, Selections from a Course of Lectures on Fever.** Being part of a Course of Theory and Practice of Medicine. In one neat octavo volume, of 362 pages, extra cloth. \$2 25.

**BUMSTEAD (FREEMAN J.), M. D.,***Professor of Venereal Diseases at the Col. of Phys. and Surg., New York, &c.***THE PATHOLOGY AND TREATMENT OF VENEREAL DISEASES.** Including the results of recent investigations upon the subject. Third edition, revised and enlarged, with illustrations. In one large and handsome octavo volume of over 700 pages, extra cloth. (*Nearly Ready.*)Well known as one of the best authorities of the present day on the subject.—*British and For. Med.-Chirurg. Review*, April, 1866.A regular store-house of special information.—*London Lancet*, Feb. 24, 1866.A remarkably clear and full systematic treatise on the whole subject.—*Lond. Med. Times and Gazette*.The best, completest, fullest monograph on this subject in our language.—*British American Journal*.Indispensable in a medical library.—*Pacific Med. and Surg. Journal*.

We have no doubt that it will supersede in America

every other treatise on Venereal.—*San Francisco Med. Press*, Oct. 1864.A perfect compilation of all that is worth knowing on venereal diseases in general. It fills up a gap which has long been felt in English medical literature.—*Brit. and Foreign Med.-Chirurg. Review*, Jan., '65.We have not met with any which so highly merits our approval and praise as the second edition of Dr. Bumstead's work.—*Glasgow Med. Journal*, Oct. 1864.We know of no treatise in any language which is its equal in point of completeness and practical simplicity.—*Boston Medical and Surgical Journal*, Jan. 30, 1864.**CULLERIER (A.), and***Surgeon to the Hôpital du Midi.***BUMSTEAD (FREEMAN J.),***Professor of Venereal Diseases in the College of Physicians and Surgeons, N. Y.***AN ATLAS OF VENEREAL DISEASES.** Translated and Edited by FREEMAN J. BUMSTEAD. In one large imperial 4to. volume of 328 pages, double-columns, with 26 plates, containing about 150 figures, beautifully colored, many of them the size of life; strongly bound in extra cloth, \$17 00; also, in five parts, stout wrappers for mailing, at \$3 per part. (*Just Ready.*)

Anticipating a very large sale for this work, it is offered at the very low price of THREE DOLLARS a Part, thus placing it within the reach of all who are interested in this department of practice. Gentlemen desiring early impressions of the plates would do well to order it without delay.

A specimen of the plates and text sent free by mail, on receipt of 25 cents.

We wish for once that our province was not restricted to methods of treatment, that we might say something of the exquisite colored plates in this volume.—*London Practitioner*, May, 1869.As a whole, it teaches all that can be taught by means of plates and print.—*London Lancet*, March 13, 1869.Superior to anything of the kind ever before issued on this continent.—*Canada Med. Journal*, March, '69.The practitioner who desires to understand this branch of medicine thoroughly should obtain this, the most complete and best work ever published.—*Dominion Med. Journal*, May, 1869.This is a work of master hands on both sides. M. Cullerier is scarcely second to, we think we may truly say is a peer of the illustrious and venerable Ricord, while in this country we do not hesitate to say that Dr. Bumstead, as an authority, is without a rival. Assuring our readers that these illustrations tell the whole history of venereal disease, from its inception to its end, we do not know a single medical work, which for its kind is more necessary for them to have.—*California Med. Gazette*, March, 1869.The most splendidly illustrated work in the language, and in our opinion far more useful than the French original.—*Am. Journ. Med. Sciences*, Jan. '69.The fifth and concluding number of this magnificent work has reached us, and we have no hesitation in saying that its illustrations surpass those of previous numbers.—*Boston Med. and Surg. Journal*, Jan. 14, 1869.Other writers besides M. Cullerier have given us a good account of the diseases of which he treats, but no one has furnished us with such a complete series of illustrations of the venereal diseases. There is, however, an additional interest and value possessed by the volume before us; for it is an American reprint and translation of M. Cullerier's work, with incidental remarks by one of the most eminent American syphilographers, Mr. Bumstead. The letter-press is chiefly M. Cullerier's, but every here and there a few lines or sentences are introduced by Mr. Bumstead; and, as M. Cullerier is a unicist, while Mr. Bumstead is a dualist, this method of treating the subject adds very much to its interest. By this means a liveliness is imparted to the volume which many other treatises sorely lack. It is like reading the report of a conversation or debate; for Mr. Bumstead often finds occasion to question M. Cullerier's statements or inferences, and this he does in a short and forcible way which helps to keep up the attention, and to make the book a very readable one.—*Brit. and For. Medico-Chir. Review*, July, 1869.**HILL (BERKELEY),***Surgeon to the Lock Hospital, London.***ON SYPHILIS AND LOCAL CONTAGIOUS DISORDERS.** In one handsome octavo volume; extra cloth, \$3 25. (*Just Issued.*)Bringing, as it does, the entire literature of the disease down to the present day, and giving with great ability the results of modern research, it is in every respect a most desirable work, and one which should find a place in the library of every surgeon.—*California Med. Gazette*, June, 1869.Considering the scope of the book and the careful attention to the manifold aspects and details of its subject, it is wonderfully concise. All these qualities render it an especially valuable book to the beginner, to whom we would most earnestly recommend its study; while it is no less useful to the practitioner.—*St. Louis Med. and Surg. Journal*, May, 1869.The author, from a vast amount of material, with all of which he was perfectly familiar, has undertaken to construct a new book, and has really succeeded in producing a capital volume upon this subject.—*Nashville Med. and Surg. Journal*, May, 1869.The most convenient and ready book of reference we have met with.—*N. Y. Med. Record*, May 1, 1869.Most admirably arranged for both student and practitioner, no other work on the subject equals it; it is more simple, more easily studied.—*Buffalo Med. and Surg. Journal*, March, 1869.**LALLEMAND AND WILSON.****A PRACTICAL TREATISE ON THE CAUSES, SYMPTOMS, AND TREATMENT OF SPERMATORRHOEA.** By M. LALLEMAND. Fifth American edition. To which is added—ON DISEASES OF THE VESICULÆ SEMINALES. By MARRIS WILSON, M. D. In one neat octavo volume, of about 400 pp., extra cloth, \$2 75.

**WILSON (ERASMUS), F. R. S.**

**ON DISEASES OF THE SKIN.** With Illustrations on wood. Seventh American, from the sixth and enlarged English edition. In one large octavo volume of over 800 pages, \$5. (*Just Issued.*)

**A SERIES OF PLATES ILLUSTRATING "WILSON ON DISEASES OF THE SKIN;"** consisting of twenty beautifully executed plates, of which thirteen are exquisitely colored, presenting the Normal Anatomy and Pathology of the Skin, and embracing accurate representations of about one hundred varieties of disease, most of them the size of nature. Price, in extra cloth, \$5 50.

Also, the Text and Plates, bound in one handsome volume. Extra cloth, \$10.

*From the Preface to the Sixth English Edition.*

The present edition has been carefully revised, in many parts rewritten, and our attention has been specially directed to the practical application and improvements of treatment. And, in conclusion, we venture to remark that if an acute and friendly critic should discover any difference between our present opinions and those announced in former editions, we have only to observe that science and knowledge are progressive, and that we have done our best to move onward with the times.

The industry and care with which the author has revised the present edition are shown by the fact that the volume has been enlarged by more than a hundred pages. In its present improved form it will therefore doubtless retain the position which it has acquired as a standard and classical authority, while at the same time it has additional claims on the attention of the profession as the latest and most complete work on the subject in the English language.

Such a work as the one before us is a most capital and acceptable help. Mr. Wilson has long been held as high authority in this department of medicine, and his book on diseases of the skin has long been regarded as one of the best text-books extant on the subject. The present edition is carefully prepared, and brought up in its revision to the present time. In this edition we have also included the beautiful series of plates illustrative of the text, and in the last edition published separately. There are twenty of these plates, nearly all of them colored to nature, and exhibiting with great fidelity the various groups of diseases treated of in the body of the work.—*Cincinnati Lancet*, June, 1863.

No one treating skin diseases should be without a copy of this standard work.—*Canada Lancet*, August, 1863.

We can safely recommend it to the profession as the best work on the subject now in existence in the English language.—*Medical Times and Gazette*.

Mr. Wilson's volume is an excellent digest of the actual amount of knowledge of cutaneous diseases; it includes almost every fact or opinion of importance connected with the anatomy and pathology of the skin.—*British and Foreign Medical Review*.

These plates are very accurate, and are executed with an elegance and taste which are highly credited to the artistic skill of the American artist who executed them.—*St. Louis Med. Journal*.

The drawings are very perfect, and the finish and coloring artistic and correct; the volume is an indispensable companion to the book it illustrates and completes.—*Charleston Medical Journal*.

**BY THE SAME AUTHOR.**

**THE STUDENT'S BOOK OF CUTANEOUS MEDICINE and DISEASES OF THE SKIN.** In one very handsome royal 12mo. volume. \$3 50. (*Lately Issued.*)

**NELIGAN (J. MOORE), M. D., M. R. I. A.**

**A PRACTICAL TREATISE ON DISEASES OF THE SKIN.**

Fifth American, from the second and enlarged Dublin edition by T. W. Belcher, M. D. In one neat royal 12mo. volume of 462 pages, extra cloth. \$2 25. (*Just Issued.*)

Fully equal to all the requirements of students and young practitioners. It is a work that has stood its ground, that was worthy the reputation of the author, and the high position of which has been maintained by its learned editor.—*Dublin Med. Press and Circular*, Nov. 17, 1869.

Of the remainder of the work we have nothing beyond unqualified commendation to offer. It is so far the most complete one of its size that has appeared, and for the student there can be none which can compare with it in practical value. All the late discoveries in Dermatology have been duly noticed, and their value justly estimated; in a word, the work is

fully up to the times, and is thoroughly stocked with most valuable information.—*New York Med. Record*, Jan. 15, 1867.

This instructive little volume appears more. Since the death of its distinguished author, the study of skin diseases has been considerably advanced, and the results of these investigations have been added by the present editor to the original work of Dr. Neligan. This, however, has not so far increased its bulk as to destroy its reputation as the most convenient manual of diseases of the skin that can be procured by the student.—*Chicago Med. Journal*, Dec. 1866.

**BY THE SAME AUTHOR.**

**ATLAS OF CUTANEOUS DISEASES.** In one beautiful quarto volume, with exquisitely colored plates, &c., presenting about one hundred varieties of disease. Extra cloth, \$5 50.

The diagnosis of eruptive disease, however, under all circumstances, is very difficult. Nevertheless, Dr. Neligan has certainly, "as far as possible," given a faithful and accurate representation of this class of diseases, and there can be no doubt that these plates will be of great use to the student and practitioner in drawing a diagnosis as to the class, order, and species to which the particular case may belong. While looking over the "Atlas" we have been induced to examine also the "Practical Treatise," and we are

inclined to consider it a very superior work, combining accurate verbal description with sound views of the pathology and treatment of eruptive diseases.—*Glasgow Med. Journal*.

A compend which will very much aid the practitioner in this difficult branch of diagnosis. Taken with the beautiful plates of the Atlas, which are remarkable for their accuracy and beauty of coloring, it constitutes a very valuable addition to the library of a practical man.—*Buffalo Med. Journal*.

**HILLIER (THOMAS), M. D.,**

*Physician to the Skin Department of University College Hospital, &c.*

**HAND-BOOK OF SKIN DISEASES, for Students and Practitioners.**

Second American Edition. In one royal 12mo. volume of 358 pp. With Illustrations. Extra cloth, \$2 25. (*Now Ready.*)

**SMITH (J. LEWIS), M. D.,**  
*Professor of Morbid Anatomy in the Bellevue Hospital Med. College, N. Y.*

**A COMPLETE PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.** In one handsome octavo volume of 620 pages, extra cloth, \$4 75; leather, \$5 75. (*Just Issued.*)

We have no work upon the Diseases of Infancy and Childhood which can compare with it.—*Buffalo Med. and Surg. Journal*, March, 1869.

The description of the pathology, symptoms, and treatment of the different diseases is excellent.—*Am. Med. Journal*, April, 1869.

So full, satisfactory, and complete is the information to be derived from this work, that at no time have we examined the pages of any book with more pleasure. The diseases incident to childhood are treated with a clearness, precision, and understanding that is not often met with, and which must call forth the approval of all who consult its pages.—*Cincinnati Med. Repository*, May, 1869.

The author of this volume is well known as a valued contributor to the literature of his specialty. The faithful manner in which he has worked in the public institutions with which he has been connected, the conscientious regard for truth which has for years characterized all his researches, the great amount of experience which he has been enabled to acquire in the treatment of infantile diseases, and the care which he has accustomed himself to take in the study of the significant facts relating to the pathological anatomy

of the diseases of childhood, eminently fit him for the task which he has taken upon himself. The remarkable faculty of bringing out salient points and stating concisely other less important facts, enables him to crowd within a small compass a vast amount of practical information. The attention given to the treatment of the various maladies, as well as the presentation of all the recently accepted pathological views, make it one of the most valuable treatises, within its present compass, that can be placed in the hands of any seeker after truth. The volume as a whole will still further establish for the writer a permanent and enviable reputation as a careful observer, an impartial interpreter, a safe and trustworthy adviser, and a modest and untiring student.—*N. Y. Med. Record*, March 15, 1869.

We have perused Dr. Smith's book with not a little satisfaction; it is indeed an excellent work; well and correctly written; thoroughly up to the modern ideas; concise, yet complete in its material. We cannot help welcoming a work which will be worthy of reliance as a text-book for medical students and younger physicians in their investigation of disease in children.—*Boston Med. and Surg. Journal*, March 4, 1869.

**CONDIE (D. FRANCIS), M. D.**

**A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN.**

Sixth edition, revised and augmented. In one large octavo volume of nearly 800 closely-printed pages, extra cloth, \$5 25; leather, \$6 25. (*Lately Issued.*)

Dr. Condie has been one of those who have performed such a service satisfactorily, and, as a result, his popular, comprehensive, and practical work has received that high compliment of approval on the part of his brethren, which several editions incontestably set forth. The present edition, which is the sixth, is fully up to the times in the discussion of all those points in the pathology and treatment of infantile diseases which have been brought forward by the German and French teachers. As a whole, however, the work is the best American one that we have, and in its special adaptation to American practitioners it certainly has no equal.—*New York Med. Record*, March 2, 1868.

No other treatise on this subject is better adapted to the American physician. Dr. Condie has long stood

before his countrymen as one peculiarly pre-eminent in this department of medicine. His work has been so long a standard for practitioners and medical students that we do no more now than refer to the fact that it has reached its sixth edition. We are glad once more to refresh the impressions of our earlier days by wandering through its pages, and at the same time to be able to recommend it to the youngest members of the profession, as well as to those who have the older editions on their shelves.—*St. Louis Med. Reporter*, Feb. 15, 1868.

We pronounced the first edition to be the best work on the diseases of children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner*.

**WEST (CHARLES), M. D.,**

*Physician to the Hospital for Sick Children, &c.*

**LECTURES ON THE DISEASES OF INFANCY AND CHILD-**

**HOOD.** Fourth American from the fifth revised and enlarged English edition. In one large and handsome octavo volume of 656 closely-printed pages. Extra cloth, \$4 50; leather, \$5 50. (*Lately issued.*)

Of all the English writers on the diseases of children, there is no one so entirely satisfactory to us as Dr. West. For years we have held his opinion as judicial, and have regarded him as one of the highest living authorities in the difficult department of medical science in which he is most widely known.—*Boston Med. and Surg. Journal*, April 26, 1866.

Dr. West's volume is, in our opinion, incomparably the best authority upon the maladies of children that the practitioner can consult.—*Cincinnati Jour. of Medicine*, March, 1866.

We have long regarded it as the most scientific and practical book on diseases of children which has yet appeared in this country.—*Buffalo Medical Journal*.

**SMITH (EUSTACE), M. D.,**

*Physician to the Northwest London Free Dispensary for Sick Children.*

**A PRACTICAL TREATISE ON THE WASTING DISEASES OF INFANCY AND CHILDHOOD.** 1 vol. 8vo. Second and revised edition. (*Preparing.*)

In this brief treatise, the author has made one of the most valuable contributions to medical literature that has been given to our profession for many years. To supply the want of information on this subject is the task which Dr. Smith has set himself, and admirably has he performed it. Keeping steadily in view

a purpose of clinical usefulness, he has succeeded in producing a treatise on the causes of chronic wasting so complete that but little could be added, and yet so concise that it would be almost impossible to give a synopsis of his views in fewer words than the book itself contains.—*N. Y. Med. Gazette*, April 2, 1870.

**DEWEES (WILLIAM P.), M. D.**

**A TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN.** Eleventh edition, with the author's last improvements and corrections. In one octavo volume of 548 pages. \$2 80.

**THOMAS (T. GAILLARD), M. D.**

*Professor of Obstetrics, &c. in the College of Physicians and Surgeons, N. Y., &c.*

**A PRACTICAL TREATISE ON THE DISEASES OF WOMEN.** Second edition, revised and improved. In one large and handsome octavo volume of 650 pages, with 225 illustrations, extra cloth, \$5; leather, \$6. (Now Ready.)

*From the Preface to the Second Edition.*

In a science so rapidly progressive as that of medicine, the profession has a right to expect that, when its approbation of a work is manifested by a call for a new edition, the author should respond by giving to his book whatever of additional value may be derivable from more extended experience, maturer thought, and the opportunity for correction. Fully sensible of this, the author of the present volume has sought by a careful revision of the whole, and by the addition of a chapter on Chlorosis, to render his work more worthy of the favor with which it has been received.—NEW YORK, March, 1869.

If the excellence of a work is to be judged by its rapid sale, this one must take precedence of all others upon the same, or kindred subjects, as evidenced in the short time from its first appearance, in which a new edition is called for, resulting, as we are informed, from the exhaustion of the previous large edition. We deem it scarcely necessary to recommend this work to physicians as it is now widely known, and most of them already possess it, or will certainly do so. To students we unhesitatingly recommend it as the best text-book on diseases of females extant.—*St. Louis Med. Reporter*, June, 1869.

Of all the army of books that have appeared of late years, on the diseases of the uterus and its appendages, we know of none that is so clear, comprehensive, and practical as this of Dr. Thomas', or one that we should more emphatically recommend to the young practitioner, as his guide.—*California Med. Gazette*, June, 1869.

If not the best work extant on the subject of which it treats, it is certainly second to none other. So short a time has elapsed since the medical press teemed with commendatory notices of the first edition, that it would be superfluous to give an extended review of what is now firmly established as the American text-book of Gynecology.—*N. Y. Med. Gazette*, July 17, 1869.

This is a new and revised edition of a work which we recently noticed at some length, and earnestly commended to the favorable attention of our readers. The fact that, in the short space of one year, this second edition makes its appearance, shows that the general judgment of the profession has largely confirmed the opinion we gave at that time.—*Cincinnati Lancet*, Aug. 1869.

It is so short a time since we gave a full review of the first edition of this book, that we deem it only necessary now to call attention to the second appearance of the work. Its success has been remarkable, and we can only congratulate the author on the brilliant reception his book has received.—*N. Y. Med. Journal*, April, 1869.

We regard this treatise as the one best adapted to serve as a text-book on gynecology.—*St. Louis Med. and Surg. Journal*, May 10, 1869.

The whole work as it now stands is an absolute indispensable to any physician aspiring to treat the diseases of females with success, and according to the most fully accepted views of their etiology and pathology.—*Leavenworth Medical Herald*, May, 1869.

We have seldom read a medical book in which we found so much to praise, and so little—we can hardly say to object to—to mention with qualified commendation. We had proposed a somewhat extended review with copious extracts, but we hardly know where we should have space for it. We therefore content ourselves with expressing the belief that every practitioner of medicine would do well to possess himself of the work.—*Boston Med. and Surg. Journal*, April 29, 1869.

The number of works published on diseases of women is large, not a few of which are very valuable. But of those which are the most valuable we do not regard the work of Dr. Thomas as second to any. Without being prolix, it treats of the disorders to which it is devoted fully, perspicuously, and satisfactorily. It will be found a treasury of knowledge to every physician who turns to its pages. We would like to make a number of quotations from the work of a practical bearing, but our space will not permit. The work should find a place in the libraries of all physicians.—*Cincinnati Med. Repository*, May, 1869.

No one will be surprised to learn that the valuable, readable, and thoroughly practical book of Professor Thomas has so soon advanced to a second edition. Although very little time has necessarily been allowed our author for revision and improvement of the work, he has performed it exceedingly well. Aside from the numerous corrections which he has found necessary to make, he has added an admirable chapter on chlorosis, which of itself is worth the cost of the volumes.—*N. Y. Med. Record*, May 15, 1869.

**CHURCHILL (FLEETWOOD), M. D., M. R. I. A.**

**ON THE DISEASES OF WOMEN;** including those of Pregnancy and Childbed. A new American edition, revised by the Author. With Notes and Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children." With numerous illustrations. In one large and handsome octavo volume of 768 pages, extra cloth, \$4 00; leather, \$5 00.

*BY THE SAME AUTHOR.*

**ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN.** Selected from the writings of British Authors previous to the close of the Eighteenth Century. In one neat octavo volume of about 450 pages, extra cloth. \$2 50.

**ASHWELL (SAMUEL), M. D.**

*Late Obstetric Physician and Lecturer at Guy's Hospital.*

**A PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN.** Illustrated by Cases derived from Hospital and Private Practice. Third American, from the Third and revised London edition. In one octavo volume, extra cloth, of 528 pages. \$3 50.

**BROWN ON SOME DISEASES OF WOMEN ADMITTING OF SURGICAL TREATMENT.** With handsome illustrations. One volume 8vo., extra cloth, pp. 276. \$1 60.

**DEWEES'S TREATISE ON THE DISEASES OF FEMALES.** With illustrations. Eleventh Edition,

with the Author's last improvements and corrections. In one octavo volume of 536 pages, with plates, extra cloth, \$3 00

**RIGBY ON THE CONSTITUTIONAL TREATMENT OF FEMALE DISEASES.** In one neat royal 12mo. volume, extra cloth, of about 250 pages. \$1 00.

**HODGE (HUGH L.), M.D.,**

*Emeritus Professor of Obstetrics, &c., in the University of Pennsylvania.*

**ON DISEASES PECULIAR TO WOMEN; including Displacements of the Uterus.** With original illustrations. Second edition, revised and enlarged. In one beautifully printed octavo volume of 531 pages, extra cloth. \$4 50. (*Just Issued.*)

In the preparation of this edition the author has spared no pains to improve it with the results of his observation and study during the interval which has elapsed since the first appearance of the work. Considerable additions have thus been made to it, which have been partially accommodated by an enlargement in the size of the page, to avoid increasing unduly the bulk of the volume.

From *PROF. W. H. BYFORD, of the Rush Medical College, Chicago.*

The book bears the impress of a master hand, and must, as its predecessor, prove acceptable to the profession. In diseases of women Dr. Hodge has established a school of treatment that has become world-wide in fame.

Professor Hodge's work is truly an original one from beginning to end, consequently no one can peruse its pages without learning something new. The book, which is by no means a large one, is divided into two grand sections, so to speak: first, that treating of the nervous sympathies of the uterus, and, secondly, that which speaks of the mechanical treatment of displacements of that organ. He is disposed, as a non-believer in the frequency of inflammations of the

uterus, to take strong ground against many of the highest authorities in this branch of medicine, and the arguments which he offers in support of his position are, to say the least, well put. Numerous woodcuts adorn this portion of the work, and add incalculably to the proper appreciation of the variously shaped instruments referred to by our author. As a contribution to the study of women's diseases, it is of great value, and is abundantly able to stand on its own merits.—*N. Y. Medical Record*, Sept. 13, 1868.

In this point of view, the treatise of Professor Hodge will be indispensable to every student in its department. The large, fair type and general perfection of workmanship will render it doubly welcome.—*Pacific Med. and Surg. Journal*, Oct. 1868.

**WEST (CHARLES), M.D.**

**LECTURES ON THE DISEASES OF WOMEN.** Third American, from the Third London edition. In one neat octavo volume of about 550 pages, extra cloth. \$3 75; leather, \$4 75. (*Just Issued.*)

The reputation which this volume has acquired as a standard book of reference in its department, renders it only necessary to say that the present edition has received a careful revision at the hands of the author, resulting in a considerable increase of size. A few notices of previous editions are subjoined.

The manner of the author is excellent, his descriptions graphic and perspicuous, and his treatment up to the level of the time—clear, precise, definite, and marked by strong common sense.—*Chicago Med. Journal*, Dec. 1861.

We cannot too highly recommend this, the second edition of Dr. West's excellent lectures on the diseases of females. We know of no other book on this subject from which we have derived as much pleasure and instruction. Every page gives evidence of the honest, earnest, and diligent searcher after truth. He is not the mere compiler of other men's ideas, but his lectures are the result of ten years' patient investigation in one of the widest fields for women's diseases—St. Bartholomew's Hospital. As a teacher, Dr. West is simple and earnest in his language, clear and comprehensive in his perceptions, and logical in his deductions.—*Cincinnati Lancet*, Jan. 1862.

We return the author our grateful thanks for the vast amount of instruction he has afforded us. His valuable treatise needs no eulogy on our part. His graphic diction and truthful pictures of disease all speak for themselves.—*Medico-Chirurg. Review*.

Most justly esteemed a standard work. . . . It bears evidence of having been carefully revised, and is well worthy of the fame it has already obtained.—*Dub. Med. Quar. Jour.*

**SIMPSON (SIR JAMES Y.), M.D.**

**CLINICAL LECTURES ON THE DISEASES OF WOMEN.** With numerous illustrations. In one octavo volume of over 500 pages. Second edition, *preparing.*

**HODGE (HUGH L.), M. D.,**

*Emeritus Professor of Midwifery, &c. in the University of Pennsylvania, &c.*

**THE PRINCIPLES AND PRACTICE OF OBSTETRICS.** Illustrated with large lithographic plates containing one hundred and fifty-nine figures from original photographs, and with numerous wood-cuts. In one large and beautifully printed quarto volume of 550 double-columned pages, strongly bound in extra cloth, \$14. (*Lately published.*)

The work of Dr. Hodge is something more than a simple presentation of his particular views in the department of Obstetrics; it is something more than an ordinary treatise on midwifery; it is, in fact, a cyclopædia of midwifery. He has aimed to embody in a single volume the whole science and art of Obstetrics. An elaborate text is combined with accurate and varied pictorial illustrations, so that no fact or principle is left un stated or unexplained.—*Am. Med. Times*, Sept. 3, 1864.

We should like to analyze the remainder of this excellent work, but already has this review extended beyond our limited space. We cannot conclude this notice without referring to the excellent finish of the work. In typography it is not to be excelled; the paper is superior to what is usually afforded by our American consins, quite equal to the best of English books. The engravings and lithographs are most beautifully executed. The work recommends itself for its originality, and is in every way a most valuable addition to those on the subject of obstetrics.—*Canada Med. Journal*, Oct. 1864.

It is very large, profusely and elegantly illustrated, and is fitted to take its place near the works of great obstetricians. Of the American works on the subject it is decidedly the best.—*Edinb. Med. Jour.*, Dec. '64.

\*\*\* Specimens of the plates and letter-press will be forwarded to any address, free by mail, on receipt of six cents in postage stamps.

**TANNER (THOMAS H.), M. D.**

**ON THE SIGNS AND DISEASES OF PREGNANCY.** First American from the Second and Enlarged English Edition. With four colored plates and illustrations on wood. In one handsome octavo volume of about 500 pages, extra cloth, \$4 25. (*Just Issued.*)

The very thorough revision the work has undergone has added greatly to its practical value, and increased materially its efficiency as a guide to the student and to the young practitioner.—*Am. Jour. Med. Sci.*, April, 1868.

With the immense variety of subjects treated of and the ground which they are made to cover, the impossibility of giving an extended review of this truly remarkable work must be apparent. We have not a single fault to find with it, and most heartily commend it to the careful study of every physician who would not only always be sure of his diagnosis of pregnancy, but always ready to treat all the numerous ailments that are, unfortunately for the civilized women of to-day, so commonly associated with the function.—*N. Y. Med. Record*, March 16, 1868.

We have much pleasure in calling the attention of our readers to the volume produced by Dr. Tanner, the second edition of a work that was, in its original

We have examined Professor Hodge's work with great satisfaction; every topic is elaborated most fully. The views of the author are comprehensive, and concisely stated. The rules of practice are judicious, and will enable the practitioner to meet every emergency of obstetric complication with confidence.—*Chicago Med. Journal*, Aug. 1864.

More time than we have had at our disposal since we received the great work of Dr. Hodge is necessary to do it justice. It is undoubtedly by far the most original, complete, and carefully composed treatise on the principles and practice of Obstetrics which has ever been issued from the American press.—*Pacific Med. and Surg. Journal*, July, 1864.

We have read Dr. Hodge's book with great pleasure, and have much satisfaction in expressing our commendation of it as a whole. It is certainly highly instructive, and in the main, we believe, correct. The great attention which the author has devoted to the mechanism of parturition, taken along with the conclusions at which he has arrived, point, we think, conclusively to the fact that, in Britain at least, the doctrines of Naegele have been too blindly received.—*Glasgow Med. Journal*, Oct. 1864.

state even, acceptable to the profession. We recommend obstetrical students, young and old, to have this volume in their collections. It contains not only a fair statement of the signs, symptoms, and diseases of pregnancy, but comprises in addition much interesting relative matter that is not to be found in any other work that we can name.—*Edinburgh Med. Journal*, Jan. 1868.

In its treatment of the signs and diseases of pregnancy it is the most complete book we know of, abounding on every page with matter valuable to the general practitioner.—*Cincinnati Med. Repository*, March, 1868.

This is a most excellent work, and should be on the table or in the library of every practitioner.—*Humboldt Med. Archives*, Feb. 1868.

A valuable compendium, enriched by his own labors, of all that is known on the signs and diseases of pregnancy.—*St. Louis Med. Reporter*, Feb. 15, 1868.

**MONTGOMERY (W. F.), M. D.,**

*Professor of Midwifery in the King's and Queen's College of Physicians in Ireland.*

**AN EXPOSITION OF THE SIGNS AND SYMPTOMS OF PREGNANCY.** With some other Papers on Subjects connected with Midwifery. From the second and enlarged English edition. With two exquisite colored plates, and numerous wood-cuts. In one very handsome octavo volume of nearly 600 pages, extra cloth. \$3 75.

**MILLER (HENRY), M. D.,**

*Professor of Obstetrics and Diseases of Women and Children in the University of Louisville.*

**PRINCIPLES AND PRACTICE OF OBSTETRICS, &c.;** including the Treatment of Chronic Inflammation of the Cervix and Body of the Uterus considered as a frequent cause of Abortion. With about one hundred illustrations on wood. In one very handsome octavo volume of over 600 pages, extra cloth. \$3 75.

**RIGBY'S SYSTEM OF MIDWIFERY.** With Notes and Additional Illustrations. Second American edition. One volume octavo, extra cloth, 422 pages. \$2 50.

**DEWEE'S COMPREHENSIVE SYSTEM OF MIDWIFERY.** Twelfth edition, with the author's last improvements and corrections. In one octavo volume, extra cloth, of 600 pages. \$3 50.

**MEIGS (CHARLES D.), M. D.,**

*Lately Professor of Obstetrics, &c., in the Jefferson Medical College, Philadelphia.*

**OBSTETRICS: THE SCIENCE AND THE ART.** Fifth edition, revised. With one hundred and thirty illustrations. In one beautifully printed octavo volume of 760 large pages. Extra cloth, \$5 50; leather, \$6 50. (Just Issued.)

The original edition is already so extensively and favorably known to the profession that no recommendation is necessary; it is sufficient to say, the present edition is very much extended, improved, and perfected. Whilst the great practical talents and unlimited experience of the author render it a most valuable acquisition to the practitioner, it is so condensed as to constitute a most eligible and excellent text-book for the student.—*Southern Med. and Surg. Journal*, July, 1867.

It is to the student that our author has more particularly addressed himself; but to the practitioner we believe it would be equally serviceable as a book of reference. No work that we have met with so thoroughly details everything that falls to the lot of the accoucheur to perform. Every detail, no matter

how minute or how trivial, has found a place.—*Canada Medical Journal*, July, 1867.

This very excellent work on the science and art of obstetrics should be in the hands of every student and practitioner. The rapidity with which the very large editions have been exhausted is the best test of its true merit. Besides, it is the production of an American who has probably had more experience in this branch than any other living practitioner of the country.—*St. Louis Med. and Surg. Journal*, Sept. 1867.

He has also carefully endeavored to be minute and clear in his details, with as little reiteration as possible, and beautifully combines the relations of science to art, as far as the different classifications will admit.—*Detroit Review of Med. and Pharm.*, Aug. 1867.

**RAMSBOTHAM (FRANCIS H.), M. D.**

**THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY,** in reference to the Process of Parturition. A new and enlarged edition, thoroughly revised by the author. With additions by W. V. KEATING, M. D., Professor of Obstetrics, &c., in the Jefferson Medical College, Philadelphia. In one large and handsome imperial octavo volume of 650 pages, strongly bound in leather, with raised bands; with sixty-four beautiful plates, and numerous wood-cuts in the text, containing in all nearly 200 large and beautiful figures. \$7 00.

We will only add that the student will learn from it all he need to know, and the practitioner will find it, as a book of reference, surpassed by none other.—*Stethoscope*.

The character and merits of Dr. Ramsbotham's work are so well known and thoroughly established, that comment is unnecessary and praise superfluous. The illustrations, which are numerous and accurate, are executed in the highest style of art. We cannot too highly recommend the work to our readers.—*St. Louis Med. and Surg. Journal*.

To the physician's library it is indispensable, while to the student, as a text-book, from which to extract the material for laying the foundation of an education on obstetrical science, it has no superior.—*Ohio Med. and Surg. Journal*.

When we call to mind the toil we underwent in acquiring a knowledge of this subject, we cannot but envy the student of the present day the aid which this work will afford him.—*Am. Jour. of the Med. Sciences*.

**CHURCHILL (FLEETWOOD), M. D., M. R. I. A.**

**ON THE THEORY AND PRACTICE OF MIDWIFERY.** A new American from the fourth revised and enlarged London edition. With notes and additions by D. FRANCIS CONNIE, M. D., author of a "Practical Treatise on the Diseases of Children," &c. With one hundred and ninety-four illustrations. In one very handsome octavo volume of nearly 700 large pages. Extra cloth, \$4 00; leather, \$5 00.

In adapting this standard favorite to the wants of the profession in the United States, the editor has endeavored to insert everything that his experience has shown him would be desirable for the American student, including a large number of illustrations. With the sanction of the author, he has added, in the form of an appendix, some chapters from a little "Manual for Midwives and Nurses," recently issued by Dr. Churchill, believing that the details there presented can hardly fail to prove of advantage to the junior practitioner. The result of all these additions is that the work now contains fully one-half more matter than the last American edition, with nearly one-half more illustrations; so that, notwithstanding the use of a smaller type, the volume contains almost two hundred pages more than before.

These additions render the work still more complete and acceptable than ever; and with the excellent style in which the publishers have presented this edition of Churchill, we can commend it to the profession with great cordiality and pleasure.—*Cincinnati Lancet*.

Few works on this branch of medical science are equal to it, certainly none excel it, whether in regard to theory or practice, and in one respect it is superior to all others, viz., in its statistical information, and therefore, on these grounds a most valuable work for the physician, student, or lecturer, all of whom will find in it the information which they are seeking.—*Brit. Am. Journal*.

The present treatise is very much enlarged and amplified beyond the previous editions but nothing

has been added which could be well dispensed with. An examination of the table of contents shows how thoroughly the author has gone over the ground, and the care he has taken in the text to present the subjects in all their bearings, will render this new edition even more necessary to the obstetric student than were either of the former editions at the date of their appearance. No treatise on obstetrics with which we are acquainted can compare favorably with this, in respect to the amount of material which has been gathered from every source.—*Boston Med. and Surg. Journal*.

There is no better text-book for students, or work of reference and study for the practising physician than this. It should adorn and enrich every medical library.—*Chicago Med. Journal*.

**SWAYNE (JOSEPH GRIFFITHS), M. D.,**

*Physician-Accoucheur to the British General Hospital, &c.*

**OBSTETRIC APHORISMS FOR THE USE OF STUDENTS COMMENCING MIDWIFERY PRACTICE.** From the Fourth and Revised London Edition, with Additions by E. R. HUTCHINS, M. D. With Illustrations. In one neat 12mo. volume. Extra cloth, \$1 25. (Just Ready.)

GROSS (SAMUEL D.), M.D.,

Professor of Surgery in the Jefferson Medical College of Philadelphia.

**A SYSTEM OF SURGERY: Pathological, Diagnostic, Therapeutic, and Operative.** Illustrated by upwards of Thirteen Hundred Engravings. Fourth edition, carefully revised, and improved. In two large and beautifully printed royal octavo volumes of 2200 pages, strongly bound in leather, with raised bands. \$15 00.

The continued favor, shown by the exhaustion of successive large editions of this great work, proves that it has successfully supplied a want felt by American practitioners and students. Though but little over six years have elapsed since its first publication, it has already reached its fourth edition, while the care of the author in its revision and correction has kept it in a constantly improved shape. By the use of a close, though very legible type, an unusually large amount of matter is condensed in its pages, the two volumes containing as much as four or five ordinary octavos. This, combined with the most careful mechanical execution, and its very durable binding, renders it one of the cheapest works accessible to the profession. Every subject properly belonging to the domain of surgery is treated in detail, so that the student who possesses this work may be said to have in it a surgical library.

It must long remain the most comprehensive work on this important part of medicine.—*Boston Medical and Surgical Journal*, March 23, 1865.

We have compared it with most of our standard works, such as those of Erichsen, Miller, Ferguson, Syme, and others, and we must, in justice to our author, award it the pre-eminence. As a work, complete in almost every detail, no matter how minute or trifling, and embracing every subject known in the principles and practice of surgery, we believe it stands without a rival. Dr. Gross, in his preface, remarks "my aim has been to embrace the whole domain of surgery, and to allot to every subject its legitimate claim to notice;" and, we assure our readers, he has kept his word. It is a work which we can most confidently recommend to our brethren, for its utility is becoming the more evident the longer it is upon the shelves of our library.—*Canada Medical Journal*, September, 1865.

The first two editions of Professor Gross's System of Surgery are so well known to the profession, and so highly prized, that it would be idle for us to speak in praise of this work.—*Chicago Medical Journal*, September, 1865.

We gladly endorse the favorable recommendation of the work, both as regards matter and style, which we made when noticing its first appearance.—*British and Foreign Medico-Chirurgical Review*, Oct. 1865.

The most complete work that has yet issued from the press on the science and practice of surgery.—*London Lancet*.

This system of surgery is, we predict, destined to take a commanding position in our surgical literature, and be the crowning glory of the author's well earned fame. As an authority on general surgical subjects, this work is long to occupy a pre-eminent place, not only at home, but abroad. We have no hesitation in pronouncing it without a rival in our language, and equal to the best systems of surgery in any language.—*N. Y. Med. Journal*.

Not only by far the best text-book on the subject, as a whole, within the reach of American students, but one which will be much more than ever likely to be resorted to and regarded as a high authority abroad.—*Am. Journal Med. Sciences*, Jan. 1865.

The work contains everything, minor and major, operative and diagnostic, including mensuration and examination, venereal diseases, and uterine manipulations and operations. It is a complete Thesaurus of modern surgery, where the student and practi-

BY THE SAME AUTHOR.

**A PRACTICAL TREATISE ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE URINARY BLADDER, THE PROSTATE GLAND, AND THE URETHRA.** Second edition, revised and much enlarged, with one hundred and eighty-four illustrations. In one large and very handsome octavo volume of over nine hundred pages, extra cloth. \$4 00.

BY THE SAME AUTHOR.

**A PRACTICAL TREATISE ON FOREIGN BODIES IN THE AIR-PASSAGES.** In one handsome octavo volume, extra cloth, with illustrations. pp. 468. \$2 75.

**MALGAIN'S OPERATIVE SURGERY.** With numerous illustrations on wood. In one handsome octavo volume, extra cloth, of nearly 600 pp. \$2 50.

tioner shall not seek in vain for what they desire.—*San Francisco Med. Press*, Jan. 1865.

Open it where we may, we find sound practical information conveyed in plain language. This book is no mere provincial or even national system of surgery, but a work which, while very largely indebted to the past, has a strong claim on the gratitude of the future of surgical science.—*Edinburgh Med. Journal*, Jan. 1865.

A glance at the work is sufficient to show that the author and publisher have spared no labor in making it the most complete "System of Surgery" ever published in any country.—*St. Louis Med. and Surg. Journal*, April, 1865.

The third opportunity is now offered during our editorial life to review, or rather to indorse and recommend this great American work on Surgery. Upon this last edition a great amount of labor has been expended, though to all others except the author the work was regarded in its previous editions as so full and complete as to be hardly capable of improvement. Every chapter has been revised; the text augmented by nearly two hundred pages, and a considerable number of wood-cuts have been introduced. Many portions have been entirely re-written, and the additions made to the text are principally of a practical character. This comprehensive treatise upon surgery has undergone revisions and enlargements, keeping pace with the progress of the art and science of surgery, so that whoever is in possession of this work may consult its pages upon any topic embraced within the scope of its department, and rest satisfied that its teaching is fully up to the present standard of surgical knowledge. It is also so comprehensive that it may truthfully be said to embrace all that is actually known, that is really of any value in the diagnosis and treatment of surgical diseases and accidents. Wherever illustration will add clearness to the subject, or make better or more lasting impression, it is not wanting; in this respect the work is eminently superior.—*Buffalo Med. Journal*, Dec. 1864.

A system of surgery which we think unrivalled in our language, and which will indelibly associate his name with surgical science. And what, in our opinion, enhances the value of the work is that, while the practising surgeon will find all that he requires in it, it is at the same time one of the most valuable treatises which can be put into the hands of the student seeking to know the principles and practice of this branch of the profession which he designs subsequently to follow.—*The Brit. Am. Journ., Montreal*.

**SKEY'S OPERATIVE SURGERY.** In one very handsome octavo volume, extra cloth, of over 650 pages with about 100 wood-cuts. \$3 25.

**ERICHSEN (JOHN),***Senior Surgeon to University College Hospital.*

**THE SCIENCE AND ART OF SURGERY;** being a Treatise on Surgical Injuries, Diseases, and Operations. From the Fifth enlarged and carefully revised London Edition. With Additions by JOHN ASHHURST, JR., M. D., Surgeon to the Episcopal Hospital, &c. Illustrated by over six hundred Engravings on wood. In one very large and beautifully printed imperial octavo volume, containing over twelve hundred closely printed pages: cloth, \$7 50; leather, raised bands, \$8 50. (*Just Issued.*)

This volume having enjoyed repeated revisions at the hands of the author has been greatly enlarged, and the present edition will thus be found to contain at least one-half more matter than the last American impression. On the latest London edition, just issued, especial care has been bestowed. Besides the most minute attention on the part of the author to bring every portion of it thoroughly on a level with the existing condition of science, he called to his aid gentlemen of distinction in special departments. Thus a chapter on the Surgery of the Eye and its Appendages has been contributed by Mr. Streatfeild; the section devoted to Syphilis has been rearranged under the supervision of Mr. Berkeley Hill; the subjects of General Surgical Diseases, including Pyæmia, Scrofula, and Tumors, have been revised by Mr. Alexander Bruce; and other professional men of eminence have assisted in other branches. The work may thus be regarded as embodying a complete and comprehensive view of the most advanced condition of British surgery; while such omissions of practical details in American surgery as were found have been supplied by the editor, Dr. Ashhurst.

Thus complete in every respect, thoroughly illustrated, and containing in one beautifully printed volume the matter of two or three ordinary octavos, it is presented at a price which renders it one of the cheapest works now accessible to the profession. A continuance of the very remarkable favor which it has thus far enjoyed is therefore confidently expected.

The high position which Mr. Erichsen's Science and Art of Surgery has for some time attained, not only in this country, but on the Continent and in America, almost limits the task of the reviewer, on the appearance of a new edition, to the mere announcement. Elaborate analysis and criticism would be out of place; and nothing remains to be done except to state in general terms that the author has bestowed on it that labor which such a work required in order to be made a representative of the existing state of surgical science and practice. Of the merits of the book as a guide to the "Science and Art of Surgery" it is not necessary for us to say much. Mr. Erichsen is one of

those enlightened surgeons of the present day, who regard an acquaintance with the manual part of surgery as only a portion of that knowledge which a surgeon should possess.—*British Medical Journal*, Jan. 2, 1869.

Thus the work bears in every feature a stamp of novelty and freshness which will commend it to those who are making its acquaintance for the first time, whilst those who have found it a safe guide and friend in former years will be able to refer to the new edition for the latest information upon any point of surgical controversy.—*London Lancet*, Jan. 23, 1869.

**BY THE SAME AUTHOR.** (*Just Issued.*)

**ON RAILWAY, AND OTHER INJURIES OF THE NERVOUS SYSTEM.** In small octavo volume. Extra cloth, \$1 00.

**MILLER (JAMES),***Late Professor of Surgery in the University of Edinburgh, &c.*

**PRINCIPLES OF SURGERY.** Fourth American, from the third and revised Edinburgh edition. In one large and very beautiful volume of 700 pages, with two hundred and forty illustrations on wood, extra cloth. \$3 75.

**BY THE SAME AUTHOR.**

**THE PRACTICE OF SURGERY.** Fourth American, from the last Edinburgh edition. Revised by the American editor. Illustrated by three hundred and sixty-four engravings on wood. In one large octavo volume of nearly 700 pages, extra cloth. \$3 75.

It is seldom that two volumes have ever made so profound an impression in so short a time as the "Principles" and the "Practice" of Surgery by Mr. Miller, or so richly merited the reputation they have

acquired. The author is an eminently sensible, practical, and well-informed man, who knows exactly what he is talking about and exactly how to talk it.—*Kentucky Medical Recorder.*

**PIRRIE (WILLIAM), F. R. S. E.,***Professor of Surgery in the University of Aberdeen.*

**THE PRINCIPLES AND PRACTICE OF SURGERY.** Edited by JOHN NEILL, M. D., Professor of Surgery in the Penna. Medical College, Surgeon to the Pennsylvania Hospital, &c. In one very handsome octavo volume of 780 pages, with 316 illustrations, extra cloth. \$3 75.

**SARGENT (F. W.), M. D.**

**ON BANDAGING AND OTHER OPERATIONS OF MINOR SURGERY.** New edition, with an additional chapter on Military Surgery. One handsome royal 12mo. volume, of nearly 400 pages, with 184 wood-cuts. Extra cloth, \$1 75.

Exceedingly convenient and valuable to all members of the profession.—*Chicago Medical Examiner*, May, 1862.

The very best manual of Minor Surgery we have seen.—*Buffalo Medical Journal.*

We cordially commend this volume as one which the medical student should most closely study; and to the surgeon in practice it must prove itself instructive on many points which he may have forgotten.—*Brit. Am. Journal*, May, 1862.

**DRUITT (ROBERT), M. R. C. S., &c.**

**THE PRINCIPLES AND PRACTICE OF MODERN SURGERY.**

A new and revised American, from the eighth enlarged and improved London edition. Illustrated with four hundred and thirty-two wood-engravings. In one very handsome octavo volume, of nearly 700 large and closely printed pages. Extra cloth, \$4 00; leather, \$5 00.

All that the surgical student or practitioner could desire.—*Dublin Quarterly Journal*.

It is a most admirable book. We do not know when we have examined one with more pleasure.—*Boston Med. and Surg. Journal*.

In Mr. Drnitt's book, though containing only some seven hundred pages, both the principles and the practice of surgery are treated, and so clearly and perspicuously, as to elucidate every important topic. The fact that twelve editions have already been called for, in these days of active competition, would of itself show it to possess marked superiority. We have examined the book most thoroughly, and can say that this success is well merited. His book, moreover, possesses the inestimable advantages of having the subjects perfectly well arranged and classified, and of being written in a style at once clear and succinct.—*Am. Journal of Med. Sciences*.

Whether we view Drnitt's Surgery as a guide to operative procedures, or as representing the latest

theoretical surgical opinions, no work that we are at present acquainted with can at all compare with it. It is a compendium of surgical theory (if we may use the word) and practice in itself, and well deserves the estimate placed upon it.—*Brit. Am. Journal*.

Thus enlarged and improved, it will continue to rank among our best text-books on elementary surgery.—*Columbus Rev. of Med. and Surg.*

We must close this brief notice of an admirable work by recommending it to the earnest attention of every medical student.—*Charleston Medical Journal and Review*.

A text-book which the general voice of the profession in both England and America has commended as one of the most admirable "mannals," or, "vade mecum," as its English title runs, which can be placed in the hands of the student. The merits of Drnitt's Surgery are too well known to every one to need any further eulogium from us.—*Nashville Med. Journal*.

**HAMILTON (FRANK H.), M. D.,**

*Professor of Fractures and Dislocations, &c. in Bellevue Hosp. Med. College, New York.*

**A PRACTICAL TREATISE ON FRACTURES AND DISLOCATIONS.**

Third edition, thoroughly revised. In one large and handsome octavo volume of 777 pages, with 294 illustrations, extra cloth, \$5 75. (Just Issued.)

In fulness of detail, simplicity of arrangement, and accuracy of description, this work stands unrivalled. So far as we know, no other work on the subject in the English language can be compared with it. While congratulating our trans-Atlantic brethren on the European reputation which Dr. Hamilton, along with many other American surgeons, has attained, we also may be proud that, in the *mother tongue*, a classical work has been produced which need not fear comparison with the standard treatises of any other nation.—*Edinburgh Med. Journal*, Dec. 1866.

The credit of giving to the profession the only complete practical treatise on fractures and dislocations in our language during the present century, belongs to the author of the work before us, a distinguished

American professor of surgery; and his book adds one more to the list of excellent practical works which have emanated from his country, notices of which have appeared from time to time in our columns during the last few months.—*London Lancet*, Dec. 15, 1866.

These additions make the work much more valuable, and it must be accepted as the most complete monograph on the subject, certainly in our own, if not even in any other language.—*American Journal Med. Sciences*, Jan. 1867.

This is the most complete treatise on the subject in the English language.—*Ranking's Abstract*, Jan. 1867.

A mirror of all that is valuable in modern surgery.—*Richmond Med. Journal*, Nov. 1866.

**CURLING (T. B.), F. R. S.,**

*Surgeon to the London Hospital, President of the Hunterian Society, &c.*

**A PRACTICAL TREATISE ON DISEASES OF THE TESTIS,**

**SPERMATIC CORD, AND SCROTUM.** Second American, from the second and enlarged English edition. In one handsome octavo volume, extra cloth, with numerous illustrations. pp. 420. \$2 00.

BRODIE'S CLINICAL LECTURES ON SURGERY. 1 vol. 8vo., 350 pp.; cloth, \$1 25.

COOPER'S LECTURES ON THE PRINCIPLES AND PRACTICE OF SURGERY. In one very large octavo volume, extra cloth, of 750 pages. \$2 00.

GIBSON'S INSTITUTES AND PRACTICE OF SURGERY. Eighth edition, improved and altered. With thirty-four plates. In two handsome octavo volumes, about 1000 pp., leather, raised bands. \$6 50.

MACKENZIE ON DISEASES AND INJURIES OF THE EYE. 1 vol. 8vo., 1027 pp., extra cloth. \$6.

**ASHTON (T. J.).**

**ON THE DISEASES, INJURIES, AND MALFORMATIONS OF**

**THE RECTUM AND ANUS; with remarks on Habitual Constipation.** Second American, from the fourth and enlarged London edition. With handsome illustrations. In one very beautifully printed octavo volume of about 300 pages. \$3 25. (Just Issued.)

We can recommend this volume of Mr. Ashton's in the strongest terms, as containing all the latest details of the pathology and treatment of diseases connected with the rectum.—*Canada Med. Journ.*, March, 1866.

One of the most valuable special treatises that the physician and surgeon can have in his library.—*Chicago Medical Examiner*, Jan. 1866.

The short period which has elapsed since the appearance of the former American reprint, and the numerous editions published in England, are the best arguments we can offer of the merits, and of the usefulness of any commendation on our part of a book already so favorably known to our readers.—*Boston Med. and Surg. Journal*, Jan. 25, 1866.

**MORLAND (W. W.), M. D.**

**DISEASES OF THE URINARY ORGANS; a Compendium of their Diagnosis, Pathology, and Treatment.** With illustrations. In one large and handsome octavo volume of about 600 pages, extra cloth. \$3 50.

**WELLS (J. SOELBERG),***Professor of Ophthalmology in King's College Hospital, &c.*

**A TREATISE ON DISEASES OF THE EYE.** First American Edition, with additions; illustrated with 216 engravings on wood, and six colored plates. Together with selections from the Test-types of Jaeger and Snellen. In one large and very handsome octavo volume of about 750 pages: extra cloth, \$5 00; leather, \$6 00. (Just Ready.)

A work has long been wanting which should represent adequately and completely the present aspect of British Ophthalmology, and this want it has been the aim of Mr. Wells to supply. The favorable reception of his volume by the medical press is a guarantee that he has succeeded in his undertaking, and in reproducing the work in this country every effort has been made to render it in every way suited to the wants of the American practitioner. Such additions as seemed desirable have been introduced by the editor, Dr. I. Minis Hays, and the number of illustrations has been more than doubled. The importance of test-types as an aid to diagnosis is so universally acknowledged at the present day that it seemed essential to the completeness of the work that they should be added, and as the author recommends the use of those both of Jaeger and of Snellen for different purposes, selections have been made from each, so that the practitioner may have at command all the assistance necessary. The work is thus presented as in every way fitted to merit the confidence of the American profession.

His chapters are eminently readable. His style is clear and flowing. He can be short without over-condensing, and accurate without hair splitting. These merits appear in a remarkable degree when he comes to treat of the more abstruse departments of his subject, and contrast favorably with the labored obscurity which mars the writings of some greater authorities in the same line. We congratulate Mr. Wells upon the success with which he has fulfilled his ideal, as

represented in the preface, in producing "an English treatise on the diseases of the eye, which should embrace the modern doctrines and practice of the British and Foreign Schools of Ophthalmology." The new school of Ophthalmology may also be congratulated in having found an exponent who is neither a bigoted partisan of everything new, nor a scoffer at everything old.—*Glasgow Med. Journal*, May, 1869.

**TOYNBEE (JOSEPH), F. R. S.,***Aural Surgeon to and Lecturer on Surgery at St. Mary's Hospital.*

**THE DISEASES OF THE EAR: their Nature, Diagnosis, and Treatment.** With one hundred engravings on wood. Second American edition. In one very handsomely printed octavo volume of 440 pages; extra cloth, \$4.

The appearance of a volume of Mr. Toynbee's, therefore, in which the subject of aural disease is treated in the most scientific manner, and our knowledge in respect to it placed fully on a par with that which we possess respecting most other organs of the body, is a matter for sincere congratulation. We may reasonably hope that henceforth the subject of this treatise will cease to be among the *apropria* of medical science.—*London Medical Review*.

The work, as was stated at the outset of our notice, is a model of its kind, and every page and paragraph of it are worthy of the most thorough study. Considered all in all—as an original work, well written, philosophically elaborated, and happily illustrated with cases and drawings—it is by far the ablest monograph that has ever appeared on the anatomy and diseases of the ear, and one of the most valuable contributions to the art and science of surgery in the nineteenth century.—*N. Am. Med.-Chirurg. Review*.

**LAURENCE (JOHN Z.), F. R. C. S.,***Editor of the Ophthalmic Review, &c.*

**A HANDY-BOOK OF OPHTHALMIC SURGERY,** for the use of Practitioners. Second Edition, revised and enlarged. With numerous illustrations. In one very handsome octavo volume, extra cloth, \$3 00. (Now Ready.)

No book on ophthalmic surgery was more needed. Designed, as it is, for the wants of the busy practitioner, it is the *ne plus ultra* of perfection. It epitomizes all the diseases incidental to the eye in a clear and masterly manner, not only enabling the practitioner readily to diagnose each variety of disease, but affording him the more important assistance of proper treatment. Altogether this is a work which ought certainly to be in the hands of every general practitioner.—*Dublin Med. Press and Circular*, Sept. 12, '66.

We cordially recommend this book to the notice of our readers, as containing an excellent outline of modern ophthalmic surgery.—*British Med. Journal*, October 13, 1866.

Not only, as its modest title suggests, a "Handy-Book" of Ophthalmic Surgery, but an excellent and well-digested *résumé* of all that is of practical value in the specialty.—*New York Medical Journal*, November, 1866.

This object the authors have accomplished in a highly satisfactory manner, and we know no work we can more highly recommend to the "busy practitioner" who wishes to make himself acquainted with the recent improvements in ophthalmic science. Such a work as this was much wanted at this time, and this want Messrs. Laurence and Moon have now well supplied.—*Am. Journal Med. Sciences*, Jan. 1867.

**LAWSON (GEORGE), F. R. C. S., Engl.,***Assistant Surgeon to the Royal London Ophthalmic Hospital, Moorfields, &c.*

**INJURIES OF THE EYE, ORBIT, AND EYELIDS: their Immediate and Remote Effects.** With about one hundred illustrations. In one very handsome octavo volume, extra cloth, \$3 50. (Now Ready.)

This work will be found eminently fitted for the general practitioner. In cases of functional or structural diseases of the eye, the physician who has not made ophthalmic surgery a special study can, in most instances, refer a patient to some competent practitioner. Cases of injury, however, supervene suddenly and usually require prompt assistance, and a work devoted especially to them cannot but prove essentially useful to those who may at any moment be called upon to treat such accidents. The present volume, as the work of a gentleman of large experience, may be considered as eminently worthy of confidence for reference in all such emergencies.

It is an admirable practical book in the highest and best sense of the phrase.—*London Medical Times and Gazette*, May 18, 1867.

WALES (PHILIP S.), M. D., Surgeon U. S. N.

**MECHANICAL THERAPEUTICS: a Practical Treatise on Surgical Apparatus, Appliances, and Elementary Operations: embracing Minor Surgery, Bandaging, Orthopraxy, and the Treatment of Fractures and Dislocations.** With six hundred and forty-two illustrations on wood. In one large and handsome octavo volume of about 700 pages: extra cloth, \$5 75; leather, \$6 75. (*Just Issued.*)

A Naval Medical Board directed to examine and report upon the merits of this volume, officially states that "it should in our opinion become a standard work in the hands of every naval surgeon;" and its adoption for use in both the Army and Navy of the United States is sufficient guarantee of its adaptation to the needs of every-day practice.

The title of this book will give a reasonably good idea of its scope, but its merits can only be appreciated by a careful perusal of its text. No one who undertakes such a task will have any reason to complain that the author has not performed his duty, and has not taken every pains to present every subject in a clear, common-sense, and practical light. It is a unique specimen of literature in its way, in that, treating upon such a variety of subjects, it is as a whole so completely up to the wants of the student and the general practitioner. We have never seen any work of its kind that can compete with it in real utility and extensive adaptability. Dr. Wales perfectly understands what may naturally be required of him in the premises, and in the work before us has bridged over a very wide gap which has always heretofore existed between the first rudiments of surgery and practical surgery proper. He has emphatically given us a comprehensive work for the beginner; and when we say of his labors, that in their particular sphere they leave nothing to be desired, we assert a great deal to recommend the book to the attention of those specially concerned. In conclusion, we would state, at the risk of reiteration, that this is the most comprehensive book on the subject that we have seen; is the best that can be placed in the hands of the stu-

dent in need of a first book on surgery, and the most useful that can be named for such general practitioners who, without any special pretensions to surgery, are occasionally liable to treat surgical cases.—*N. Y. Med. Record*, March 2, 1868.

It is certainly the most complete and thorough work of its kind in the English language. Students and young practitioners of surgery will find it invaluable. It will prove especially useful to inexperienced country practitioners, who are continually required to take charge of surgical cases, under circumstances precluding them from the aid of experienced surgeons.—*Pacific Med. and Surg. Journal*, Feb. 1868.

The title of the above work is sufficiently indicative of its contents. We have not seen for a long time (in the English language) a treatise equal to this in extent, nor one which is better adapted to the wants of the general student and practitioner. It is not to the surgeon alone that this book belongs; the physician has frequent opportunities to fill an emergency by such knowledge as is here given. Every practitioner should make purchase of such a book—it will last him his lifetime.—*St. Louis Med. Reporter*, Feb. 1868.

BIGELOW (HENRY J.), M. D.,  
Professor of Surgery in the Massachusetts Med. College.

**ON THE MECHANISM OF DISLOCATION AND FRACTURE OF THE HIP.** With the Reduction of the Dislocation by the Flexion Method. With numerous original illustrations. In one very handsome octavo volume. Cloth. \$2 50. (*Now Ready.*)

We cannot too highly praise this book as the work of an accomplished and scientific surgeon. We do not hesitate to say that he has done much to clear up the obscurities connected with the mechanism of dislocation of the hip-joint, and he has laid down most valuable practical rules for the easy and most successful management of these injuries. The mono-

graph is largely illustrated with exquisitely executed woodcuts, after photographs, which help to elucidate the admirable subject-matter of the text. We cordially commend the "Hip," by Dr. Bigelow, to the attention of surgeons.—*Dublin Quarterly Journal of Medical Science*, Feb. 1870.

THOMPSON (SIR HENRY),  
Surgeon and Professor of Clinical Surgery to University College Hospital.

**LECTURES ON DISEASES OF THE URINARY ORGANS.** With illustrations on wood. In one neat octavo volume, extra cloth. \$2 25. (*Now Ready.*)

These lectures stand the severe test. They are instructive without being tedious, and simple without being diffuse; and they include many of those practical hints so useful for the student, and even more valuable to the young practitioner.—*Edinburgh Med. Journal*, April, 1869.

Very few words of ours are necessary to recommend these lectures to the profession. There is no subject

on which Sir Henry Thompson speaks with more authority than that in which he has specially gathered his laurels; in addition to this, the conversational style of instruction, which is retained in these printed lectures, gives them an attractiveness which a systematic treatise can never possess.—*London Medical Times and Gazette*, April 24, 1869.

BY THE SAME AUTHOR. (*Nearly Ready.*)

**ON THE PATHOLOGY AND TREATMENT OF STRICTURE OF THE URETHRA AND URINARY FISTULÆ.** With plates and wood-cuts. From the third and revised English edition. In one very handsome octavo volume, extra cloth, \$3 50. (*Now Ready.*)

This classical work has so long been recognized as a standard authority on its perplexing subjects that it should be rendered accessible to the American profession. Having enjoyed the advantage of a revision at the hands of the author within a few months, it will be found to present his latest views and to be on a level with the most recent advances of surgical science.

With a work accepted as the authority upon the subjects of which it treats, an extended notice would be a work of supererogation. The simple announcement of another edition of a work so well and favor-

ably known by the profession as this before us, must create a demand for it from those who would keep themselves well up in this department of surgery.—*St. Louis Med. Archives*, Feb. 1870.

**TAYLOR (ALFRED S.), M. D.,**

*Lecturer on Med. Jurisp. and Chemistry in Guy's Hospital.*

**MEDICAL JURISPRUDENCE.** Sixth American, from the eighth and revised London edition. With Notes and References to American Decisions, by CLYMENT B. PENROSE, of the Philadelphia Bar. In one large octavo volume of 776 pages, extra cloth, \$4 50; leather, \$5 50. (*Just Issued.*)

Considerable additions have been made by the editor to this edition, comprising some important sections from the author's larger work, "The Principles and Practice of Medical Jurisprudence," as well as references to American law and practice. The notes of the former editor, Dr. Harts-horne, have likewise been retained, and the whole is presented as fully worthy to maintain the distinguished position which the work has acquired as a leading text-book and authority on the subject.

A new edition of a work acknowledged as a stand-ard authority everywhere within the range of the English language. Considering the new matter introduced, on trichiniasis and other subjects, and the plates representing the crystals of poisons, etc., it may fairly be regarded as the most compact, compre-hensive, and practical work on medical jurisprudence which has issued from the press, and the one best fitted for students.—*Pacific Med. and Surg. Journal*, Feb. 1867.

The sixth edition of this popular work comes to us in charge of a new editor, Mr. Penrose, of the Phila-delphia bar, who has done much to render it useful, not only to the medical practitioners of this country, but to those of his own profession. Wisely retaining the references of the former American editor, Dr. Harts-horne, he has added many valuable notes of his own. The reputation of Dr. Taylor's work is so well established, that it needs no recommendation. He is now the highest living authority on all matters con-

nected with forensic medicine, and every successive edition of his valuable work gives fresh assurance to his many admirers that he will continue to maintain his well-earned position. No one should, in fact, be without a text-book on the subject, as he does not know but that his next case may create for him an emergency for its use. To those who are not the for-tunate possessors of a reliable, readable, interesting, and thoroughly practical work upon the subject, we would earnestly recommend this, as forming the best ground-work for all their future studies of the more elaborate treatises.—*New York Medical Record*, Feb. 13, 1867.

The present edition of this valuable manual is a great improvement on those which have preceded it. It makes thus by far the best guide-book in this de-partment of medicine for students and the general practitioner in our language.—*Boston Med. and Surg. Journal*, Dec. 27, 1866.

**WINSLOW (FORBES), M. D., D. C. L., &c.**

**ON OBSCURE DISEASES OF THE BRAIN AND DISORDERS OF THE MIND;** their incipient Symptoms, Pathology, Diagnosis, Treatment, and Pro-phylaxis. Second American, from the third and revised English edition. In one handsome octavo volume of nearly 600 pages, extra cloth. \$4 25. (*Just Issued.*)

Of the merits of Dr. Winslow's treatise the profes-sion has sufficiently judged. It has taken its place in the front rank of the works upon the special depart-ment of practical medicine to which it pertains.—*Cincinnati Journal of Medicine*, March, 1866.

It is an interesting volume that will amply repay for a careful perusal by all intelligent readers.—*Chicago Med. Examiner*, Feb. 1866.

A work which, like the present, will largely aid the practitioner in recognizing and arresting the first insidious advances of cerebral and mental disease, is one of immense practical value, and demands earnest attention and diligent study on the part of all who have embraced the medical profession, and have

thereby undertaken responsibilities in which the welfare and happiness of individuals and families are largely involved. We shall therefore close this brief and necessarily very imperfect notice of Dr. Winslow's great and classical work by expressing our conviction that it is long since so important and beautifully written a volume has issued from the British medical press.—*Dublin Medical Press*.

It is the most interesting as well as valuable book that we have seen for a long time. It is truly fasci-nating.—*Am. Jour. Med. Sciences*.

Dr. Winslow's work will undoubtedly occupy an unique position in the medico-psychological litera-ture of this country.—*London Med. Review*.

**LEA (HENRY C.).**

**SUPERSTITION AND FORCE: ESSAYS ON THE WAGER OF LAW, THE WAGER OF BATTLE, THE ORDEAL, AND TORTURE.** Second Edition, Enlarged. In one handsome volume royal 12mo. of nearly 500 pages; extra cloth, \$2 75. (*Just Ready.*)

The copious collection of facts by which Mr. Lea has illustrated his subject shows in the fullest manner the constant conflict and varying success, the advances and defeats, by which the progress of humane legisla-tion has been and is still marked. This work fills up with the fullest exemplification and detail the wise remarks which we have quoted above. As a book of ready reference on the subject it is of the highest value.—*Westminster Review*, Oct. 1867.

When—half in spite of himself, as it appears—he sketches a scene or character in the history of legalized error and cruelty, he betrays so artistic a feeling, and

is shown in weaving in anecdote and picturesque stories, without impairing the flow of the relation or the proper dignity of the composition.—*Hartford Courant*, Jan. 22, 1870.

This is a book of extraordinary research. Mr. Lea has entered into his subject *con amore*; and a more striking record of the cruel superstitions of our un-happy Middle Ages could not possibly have been com-piled. . . . As a work of curious inquiry on certain outlying points of obsolete law, "Superstition and Force" is one of the most remarkable books we have met with.—*London Athenæum*, Nov. 3, 1866.

**BY THE SAME AUTHOR.** (*Just Issued.*)

**STUDIES IN CHURCH HISTORY—THE RISE OF THE TEM-PORAL POWER—BENEFIT OF CLERGY—EXCOMMUNICATION.** In one large royal 12mo. volume of 516 pp. extra cloth. \$2 75.

Altogether, the book is a useful addition to the popu-lar literature of a most important and too little known department of mediæval history.—*London Saturday Review*, Feb. 26, 1870.

They are careful studies by a thorough scholar in the most interesting of all historical fields, made without passion or prejudice, and recorded with hon-esty. The whole volume is of the deepest interest; the style is masculine and animated, and great skill

We recommend the book as a highly instructive discussion of matters which are always of interest to scholars, and which are just now clothed with a spe-cial importance.—*N. Y. Nation*, Feb. 3, 1870.
