TARGET OBJECTIVES

NAGOYA GROUP

5250 TECH. INTEL. COMP. CO.

S E C R E T

TARGET OBJECTIVE FOLDER

Included herein are specified objectives compiled for use by Technical Intelligence Units of the 5250th Technical Intelligence Composite Company, Sep (Prov).

Objectives are listed generally by priority under the town or cities in which they are to be found. Towns will be arranged alphabetically within this folder, and constitute a definite area centered around the principal city in that locality.

The targets represented herein do not form a complete list, but represent some of the most important ones available. Each target or objective will bear a number which is based on its source. Numbers of targets obtained from research by Headquarters AFMESPAC will be prefixed by the letters "WP", while War Department targets will have no prefix letters.

This folder, complete with blank work sheet forms is intended to be used as a combined check sheet and filing system, providing meanwhile a common system for target designation between field units and higher Headquarters. Information concerning newly discovered targets will be forwarded immediately to higher echelon with a brief description including location, condition and action taken.
