

Dear audience.

**It is so great to have you all
here.**

**The '2019 WikidataCon
Award is starting soon.**

WikidataCon Award 2019

WIKIMEDIA
'19 COOLEST
TOOL AWARD

2019: The year of
Wikimedia awards!

WikidataCon Award is inspired by the Coollest Tool Award, that took place for the first time at Wikimania '19. Wikidata is like a galaxy of cool projects, inspiring ideas, growing content and incredible wonderful people. It's time to celebrate this!

Editing

About OpenRefine

[OpenRefine](#) is a tool to clean tabular data and to get datasets into Wikidata or other knowledge bases. Originally developed by Google under the name *Google Refine*, it is now a **community-driven project**.

The Wikidata community focus especially on the [maintenance and development](#) of Wikidata-related features for OpenRefine.

What makes this project so cool

- Reconciliation.
OpenRefine allows you to take a list of free-text and semi-autonomously connect it to WD items.
- Editing.
Export tabular data as WD statements, directly or via Quickstatements.

WikiProject India

2019 WikidataCon Award Winner

In the category

Community building

About WikiProject India

[Wikidata:WikiProject India](https://www.wikidata.org/wiki/WikiProject_India) is the coordination project for, and about, India-related topics and for supporting its community and its languages.

What makes this project so cool

- [skillshare](#).

Both online and offline the group organises a variety of activities from technical workshops, to Wikidata training for beginners, to labelathons, and datathons.

- Communication.

Quarterly [newsletter](#) and [twitter account](#)

- Content.

Massive increase in data. E.g. 50 India specific properties, 13k hospitals, 9k railway stations, 8k 2014 election candidates...

[Data ingestion for West Bengal](#),
late 2018 – early 2019.

Presentation of the 2019 WikidataCon Award

<music>

Ecosystem

And the winner is

A wooden sign is the central focus, mounted on a wooden pallet. The sign is made of horizontal wooden planks and has three lines of text. The background is a garden at dusk, with several raised wooden beds on either side and various plants, including tall stalks and leafy bushes. The sky is a deep, dark blue with some light clouds. The overall lighting is dim, creating a moody atmosphere.

sum of all paintings

2019 WikidataCon Award Winner

In the category
Ecosystem

About sum of all paintings

[Sum of all paintings](#) (SoAP) is the project to create an item for every notable painting; painter; collection.

What makes this project so cool

- Leadership.
Many tools, processes, workflows now used by others.
- Quality.
Consistently high standard items and lists.
- Impact
proof of interoperable GLAM data, at scale.

Ateliers Wikidata à Paris

2019 WikidataCon Award Winner

in the category

Newcomer-friendly

About Ateliers Wikidata à Paris

Ateliers [Wikidata à Paris](#) is a newcomer friendly meetup, held monthly in Paris since 2015.

What makes this project so cool

- Consistency. More than 4 years of regular workshops, steadily building a local community.
- Newcomer-friendly. Providing a welcoming atmosphere to support new editors.

About WD Infobox on Commons

South Pole

Telescope [[Hide](#)]

telescope at the South Pole

The South Pole Telescope in
November 2009

[Wikidata infobox on Commons](#) is a template to quickly and easily create language localised infoboxes on Wikimedia Commons categories.

What makes this project so cool

- Flexibility. Fetches values, and qualifiers from over 300 properties.
- Scale. Now used in 2.5 MILLION Commons categories.
- Proof. Demonstration of the power and value of WD to the rest of the wikiverse.

Wikidata properties

The following Wikidata properties can be displayed:

- category's main topic (P301)
- image (P18) collage image (P2716) image of grave (P1442) photosphere image (P4640) flag image (P41) coat of arms image (P94) logo image (P154) service ribbon image (P2425)
- audio (P51) spoken text audio (P989) pronunciation audio (P443) audio recording of the subject's spoken voice (P990)
- instance of (P31) subclass of (P279) part of (P361) facet of (P1289) main subject (P921) edition or translation of (P629) industry (P452) category combines topics (P971) category contains (P4224)
- taxon name (P225) taxon rank (P105) parent taxon (P171) taxon author citation (P6507) original combination (P1403) taxon author (P405) taxon common name (P1843) parent club (P831)
- call sign (P2317) located in protected area (P3018)
- named after (P138) dedicated to (P825) commemorates (P547) genre (P136) depicts (P180) material used (P186)
- located on terrain feature (P706) located on astronomical location (P376) location (P276) located in the administrative territorial entity (P131), country (P17) located on street (P669) street number (P670) applies to jurisdiction (P1001) located in or next to body of water (P206) located at street address (DEPRECATED) (P969) postal code (P281) country of origin (P495)

Wikidata Lab

2019 WikidataCon Award Winner

In the category
Outreach

About Wikidata Lab

Wikidata Lab is a series of thematic edit-a-thons at the University of São Paulo. Monthly meetings bringing together Wikimedians, researchers, GLAM and students

What makes this project so cool

- Sustainable: 20 labs events since 2017
- Practical: Skill sharing in a Global South community, particularly from other wikimedia projects. Creating resources for use in other communities.
- Integration: Helped the strong uptake of Wikidata within Portuguese projects.

WIKIDATA LAB XIX
DIVERSIDADE DO CONHECIMENTO E DADOS CONFLITANTES

Este treinamento pretende compartilhar recursos e capacidades para a integração de Wikidata com outros projetos Wikimedia em espanhol e Wikipédia.

Nesta sessão, parte do ciclo Wikidata Lab, haverá uma apresentação e uma sessão de atividades práticas sobre conceitos em uso que envolvem dados conflitantes.

O evento é voltado à experiência de comunidade brasileira de editores dos projetos Wikimedia. A coordenação do treinamento será realizada pelo voluntariado Comunidade Wiki em inglês.

Por favor, se tiver interesse em participar do evento, faça um cadastro na página de inscrição. Não há custo de inscrição. Vagas limitadas.

Local: NeuroMat - Av. Prof. Luciano Galvão, 117, CEP - Cidade Universitária, prédio do NeuroMat
Data: 08/03/23 (sexta-feira) das 18:30 às 19:30

Organização: **WMB** NeuroMat

Mix'n'match is a service which allows you to import authority-control datasets and align them to Wikidata items semi-automatically and as a game.

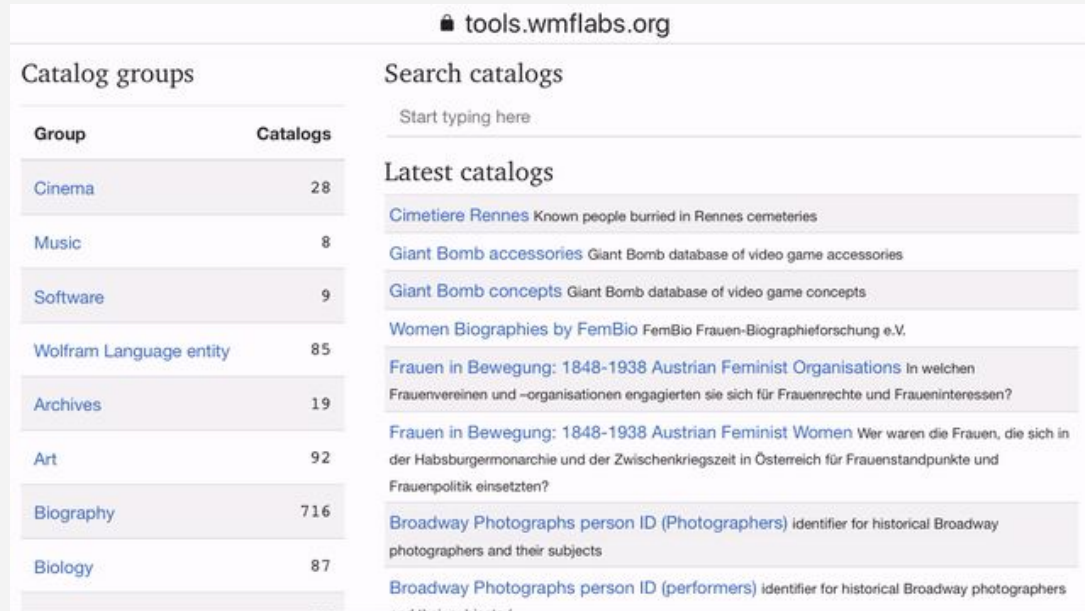

What makes this project so cool

- Fundamental.

Introduced in 2013, M'n'M quickly became core to many peoples' workflows.

- Influential.

Wikidata's wide and deep connections to external IDs – facilitated by M'n'M – makes WD 'the internet's duct tape' also known as the 'Wood wide web'.

The screenshot shows the website tools.wmflabs.org. On the left, there is a table titled 'Catalog groups' with two columns: 'Group' and 'Catalogs'. The table lists various categories and their corresponding number of catalogs. On the right, there is a search bar with the placeholder text 'Start typing here'. Below the search bar, there is a section titled 'Latest catalogs' which lists several catalog entries with their titles and brief descriptions.

About Wikidata Menu Challenge

[Wikidata Menu Challenge](#) were competitions to all translated labels, pronunciations, and images to items relating to food served at events in Stockholm.

What makes this project so cool

- Online/IRL combo. Combines food, editing and fun.
- Multilingual. Highlights WD's multilingualism by using basic knowledge.
- Replicable. Short time frame, approach applicable to other projects.

Menu Challenge

July 16 - August 11, 2019

ISA

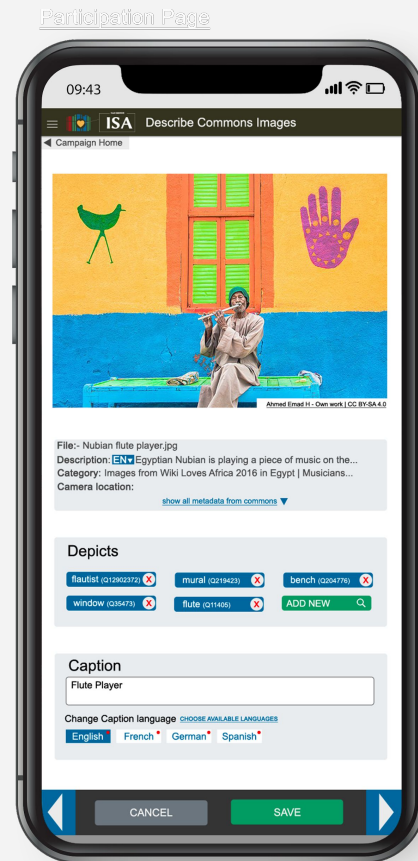

2019 Win *Mid-*ataCon *Awar*d Win

in *Category*
Multi-media

About ISA

ISA is a multilingual tool that makes it easy to add **structured data** to images on **Wikimedia Commons**.

What makes this project so cool

- Collaboration. Wiki In Africa, Histropedia, and Structured Data on Commons project.
- Scalable. Using a ‘campaign’ structure, focusing on mobile, allows many more to join.

ISA

Easily Add Information about Images on Wikimedia Commons

ISA is a multilingual, mobile-first tool, that makes it easy for people to add 'micro-contributions' in the form of [structured data](#) (descriptions, captions, tags, etc.) to images that have been contributed to Wikimedia Commons by Wiki Loves competitions. [Click on Explore Campaigns to begin!](#)

[EXPLORE CAMPAIGNS](#)

About This Tool

In the long run, the intent behind the tool is to increase the use of the knowledge that is reflected by each image hosted on Wikimedia Commons.

Presentation of the 2019 WikidataCon Award

<music>

**honorable
mentions**

DataDrainer is a small and nicely written gadget that **allows you to delete content of an item for cleanup purposes.** **Histropedia** is a web-based timeline application **that uses Wikidata as an information source to create data visualizations.** You can explore history across time, subjects and events. **Mbabel tool** **generates *narrative* Wikipedia stubs based on Wikidata.** It is already used in GLAM wiki and educational projects in Brazil, and under further development. **Petscan** **is the *swiss knife* among Wikimedia's query tools,** with great value also for **Wikidata.** **Pywikibot** is a Python library and collection of scripts that **automate work on MediaWiki sites.** Originally designed for Wikipedia, it is now used on many projects - including Wikidata. **Quickstatements** is a powerful editor. Statements, labels, descriptions and aliases can be added and removed by using simple text commands. **Quickstatements won the 2019' Coolest Tool Award in the category editing.**

<music>

Thank you for all the amazing projects!
