

## 5. Spelling

(See also Chapter 7 “Compounding Examples” and Chapter 9 “Abbreviations and Letter Symbols”)

- 5.1. GPO uses Webster’s Third New International Dictionary as its guide for the spelling of words not appearing in the GPO *STYLE MANUAL*. Colloquial and dialect spellings are not used unless required by the subject matter or specially requested. The tendency of some producers of computer-assisted publications to rely on the limited capability of some spell-checking programs adds importance to this list.

### Preferred and difficult spellings

- 5.2. In addition to indicating the preferred forms of words with variant spellings, the list also contains other words frequently misspelled or causing uncertainty.

## Doubled consonants

- 5.14.** A single consonant following a single vowel and ending in a monosyllable or a final accented syllable is doubled before a suffix beginning with a vowel.

## Geographic names

- 5.20.** The spelling of geographic names must conform to the decisions of the U.S. Board on Geographic Names (BGN) (<http://geonames.usgs.gov>). In the absence of such a decision, the U.S. Directory of Post Offices is to be used.
- 5.21.** If the decisions or the rules of the BGN permit the use of either the local official form or the conventional English form, it is the prerogative of the originating office to select the form that is most suitable for the matter in hand; therefore, in marking copy or reading proof, it is required only to verify the spelling of the particular form used. GPO's preference is for the conventional English form. Copy will be followed as to accents, but these should be consistent throughout the entire job.
