HELD IN WASHINGTON, D. C., FERRARY 24, 104C.

The seventh meeting of the Commission of Fine Arts during the fiscal year 1940 was held in its office in the new Interior Department Building on Saturday, February 24, 1940. The following members were present:

> Mr. Clarke, Chairman, Mr. Borie, Mr. Sevage, Mr. Sheplay, Mr. Lamb, Mr. Lamb, Mr. Manshin, also H. P. Caermerer,

Secretary and Administrative Officer.

The meeting was called to order at 9:30 a. m.

1. APPOCVAL OF FINUTES OF PRECEDING HEEMING: The Finutes of the meeting held January 19, 1940, were approved.

2. CERATICS FOR THE MUTICIPAL CERTED: Mr. Mathem 2. Wheth, Municipal Architect, submitted four sets of designs for ceramics on the Municipal Center Building, which is now being erected on the east side of John Marchall Place adjacent to Indiana Avenue. The artists had six works to make their drawings. Mr. Wyeth said that the jury held a meeting yesterley; four members including himself were present: Lee Lawrie, George Harding, Dancar Phillips. Mr. Wreth said: "They were disappointed in general in the submissions. Of course, not knowing much about ceramics, I felt I should listen to their better judgment. They decided that this one for the eastern court, called Health and Telfare. Tas acceptable or could be made acceptable. They felt that this are (should fire engines) was of satisfactory feasuse it is a surface treatment: it is a mural, and not a ceramic. The one showing an arch would not fit the location. The fourth one showing firemen in the center the jury throught interesting but locking at it as a whole it ceered to fall apart. The artist shows a treatment

of cerarics but is faulty in the composition." Mr. Savage said it changed scale as it goes along. Mr. Manship felt the one, showing the firemen, was the best in the lot. He remarked one sees ceramics that are painted and others that are just modeled; there are several ways of making them. Mr. Lamb felt that if the artist did well on the central part of his composition it would seem reasonable to believe that he could bring the rest of it into proper shape. The Chairman called attention to a brief report filed by Mr. Myetn, which was read, as follows:

February 23, 1940.

Report to the Fine Arts Commission

Subject: Ceramic Murals for the Courts of the Administration Building, Municipal Center

The jury for awarding of the competition for the ceramic murals in question wish to express their disappointment at the submission of the four drawings.

It is suggested that the murals for the East Court be avoided to the design submitted by No. 2.

For the West Court it is suggested that two of the remaining contestants (Nos. 1 and 4) be requested to submit a new sketch for the West Court in which the subject in question is the Police Department, Fire Department and Bureau of Vehicles and Trailic, the contestants being allowed three weeks for resubmission.

(Simed) Nathan C. Wyeth

The ceramics will be 72 feet long by 8 feet high, and 10 feet obove the ground. Their location was noted on a blueprint. Mr. Weth said the designs were from Hildreth Meiere, Waylande Bregory, Varnum Poor and Tom Loftin Johnson; that the designs were submitted anonymously and the envelopes have not from opened. He said \$50,000 has been allowed by P. W. A. for these murals and two sculptural reliefs.

. . • *

* 4 ×

.

After discussion of the designs, the Chairman said: ""Te do not wart to act as a jury, but it would seem we have designs here from two artists that are capable of producing good ceramics. The east panel submitted by one artist is satisfactory, and the central part of the west panel submitted by another artist is satisfactory. I contend that the purpose of a competition is to secure a capable artist for the project rather than a design. The submissions indicate that the artists have devoted a great deal of time to the designs, for which they have received no compensation, and it would be unfair to ask three of the artists to submit a new design for the west parel. One of these three artists has demonstrated his ability and has submitted a satisfactor design in part; why not give that artist the award with the understanding th t further study will be given to it and that it will be completed in matters of detail; I suggest therefore that the jury reconsider its report with a view to giving the award to the two artists whose designs have beer favorable considered," The other members concurred in this suggestion of the Chairman. Mr. "Leth said he would bring it to the attention of the other members of the fury and report back to the Commission.

3. SCULPTURE FOR THE MUNICIPAL CENTER: Mr. Wyeth submitted a model received from Mr. John Gregory, for a relief on a check block of the limitical Center Building. The sculpture would be on the east side of John Marshall Place. Mr. Gregory had described his model as follows:

65 West 56 Street.

Description of mythological subjects used in statch of sculpture for East Cheer Block of Nunicipal Center, D. 3.

Aesculapius, son of Apollo, renormed physician.

Mercury, son of Jupiter and Maia, swint as the wind, was the fortherer of commerce by land and sea. (The Fifth Avenue traffic control lights carry a statuette of Mercury)

Vesta, elder sister of Juniter, voddess of the heart , is juddess of

- 3 -

• the burning hearth, Vesta is the divirity of the home, of settled, in opposition to nomadic, habits of life. In her terris at Rome a sacred fire, tended by six virgin priestesses called Vestals, was kept religiously aflame. The safety of the city was held to be connected with its conservation,

The Commission inspected the model and thought it interesting. Mr. Shepler said this sculpture would be appropriate in relation to the Hadfield Courthouse at the head of John Marshall Place. After consideration the Commission approved the model.

The Commission suggested an inscription or a simple sculptural motif at the end of the check block. It was also recommended that the cap shown on the model be left off.

Mr. Wyeth also submitted a model received from Mr. Lee Lawrie for set lytural relief on the west side of John Marshall Place, a companion place to the one submitted by Mr. Gregory. Mr. Lawrie's showed two horses heads, indicating Pegasus or traffic.

The Commission felt that there was too great a contrast between Mr. Gregory's model and Mr. Lawrie's and suggested that Mr. Lawrie redesign his model to conform in motivation as well as in composition to that of Mr. Gregory's. A report was sent to Mr. Wyeth. (Exhibit A)

4. SHIPSTEAD-LUCE ACT SUBMISSIONS:

(a) The Commission considered an application (No. 522) to repaint signs on the Continental Hotel Building at 420 North Capital Street. It was shown that the signs measure 3 by 30 feet, 3 by 25 feet and 3 by 15 feet. The Commission noted that these signs far enceeted the 25 square feet limitation allowed in the Shipstead-Luce Act area and disapproved the repainting of them.

(b) Sign at 131 B streat, S. E. The Commission considered an application (No. ClS) for relocating a sign at 131 B Streat, S. E. The cign measures 45

- 1 -

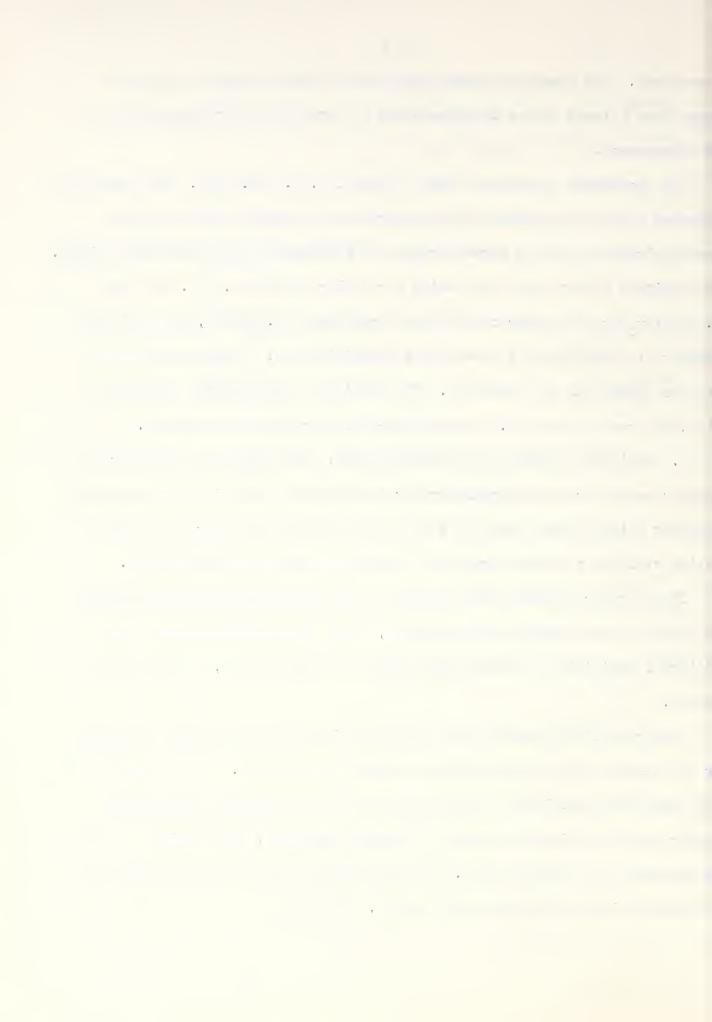

· · · · . 6 6 , _____ - • square feet. The Commission noted that this is much in empess of the 25 square feet allowed in the Shipstead-Luce Act area and the re-erection of it was disapproved.

(c) Apartment Building at 2501 Q Street, N. W. (No. 120). The Confission inspected a set of blueprints for an apartment building at 2501 Q Otreet inrediately west of the Q Street Dridge and adjacent to the Rock Creck To hway. The architect members gave the design particular attention. Mr. Lemb and Mr. showled were in conference with the architect, Mr. Leple , and indicated a number of changes with a few to its simplification. The Comfission felt that the facade was too broken up. The Commission recommended a plain red brick, the run of the kiln. The architect is to resubmit his festion.

5. SHELTER IN IRCUT OF THE UNION STATICN: The Commission considered a design received from the Washington Terminal Company proposing the erection of a shelter fully 60 feet long and some 30 to 40 feet wide in Front of Union Station over the streetcar tracks and ertending almost to the fourtain.

The secretary stated that officials of the Wachington Terminal Company had submitted the design for the shelter, which they wished to not up for additional facilities to accomposate patrons of the station, as also tablene frivers.

The Coursission inspected the Jerlin and decided that it would periodely our the facade of the Union station to allow its erection. It was cointed out that the station was built in 1906 and since for 32 percent and such street shelter had been allowed in front of the main entrance, the Commission of M suc no reason for having it now. The Commission disapproved the lesion and informed the Terminal Company accordingly. (Extinut 1)

C. RESERVATION 10, NATIONAL AUDITORIUN: Under date of February 13th, a letter was received from the Bureau of the Budget, requesting advice of the Commission of Fine Arts with reference to a proposition of the District Commissioners to sell Reservation 10 at Third Street and Constitution Avenue, Y. W., which has been considered for the National Auditorium.

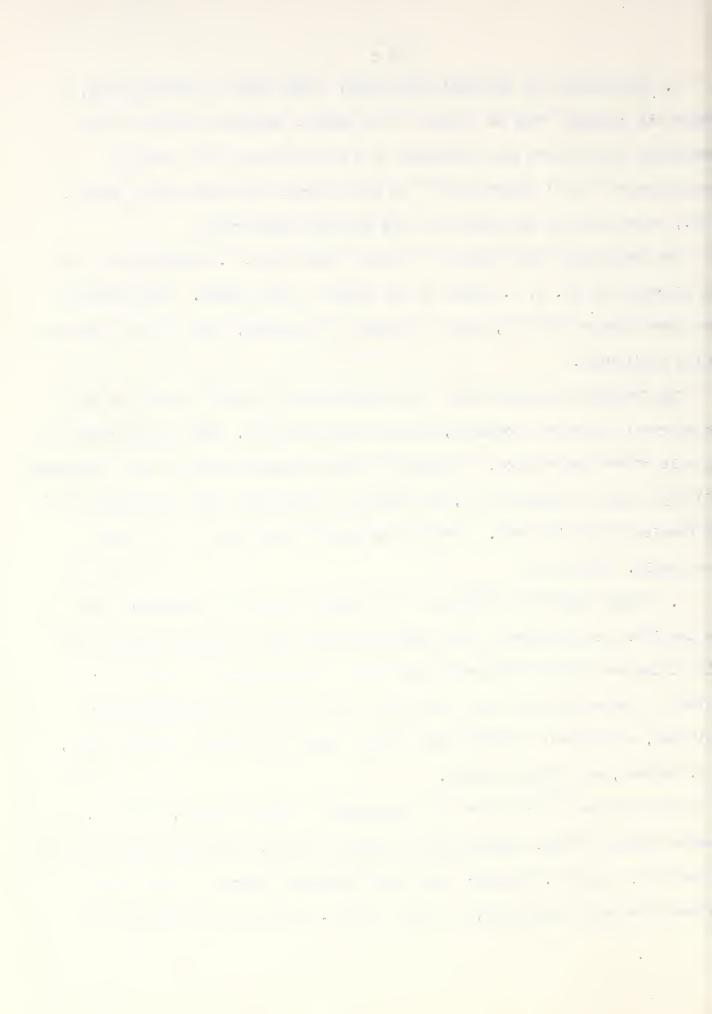

The Commission noted copies of a letter from the D. C. Commissioners and one addressed by Mr. F. A. Delano to the Bureau of the Budget. The Commission also noted Senate Bill 865, which is pending in Congress, provising the erection of the auditorium.

The Commission decided that if the Recervation is sold it should be with the approval of Senator Connally, who sponsored the bill. Also in the event of the sale of the Reservation, it should be with the understanding that a monumental building would be erected on it, the design of which would have the approval of the Commission of Fine Arts. A report was sent to the sureau of the Edget accordingly. (Exhibit C)

7. THOMAS JEFFERSON MILICRIAL: The Commission were in conference with the Committee on Sculpture of the Thomas Jefferson Nemorial Commission in Room 5012 of the new Interior Department Building and considered six models for a statue of Thomas Jefferson that had been received from six nationally known sculptors, as follows: Rudolph Evans, Raoul Jesset, Lee Lawrie, Sidney Wawg', A. A. Weinman, and William Zorcela.

The Contittee on Scilpture was represented on Fishe Wilhell, Cheirman, Senator Thomas of Utah, Representative Lanhas of Texas, Representative Culhin of New York, Joseph F. Tumulty; and Stuart Gibboney, Chairmon of the Thomas Jefferson Memorial Cormission, was also present. Also the jum appointed by

· 6 ·

the Thomas Jefferson Lemorial Commission to advise concerning the models, was present. The jury consisted of Henry Marcean, Professional Advisor and Chairman, James E. Fraser, and Heinz Warneke, sculptors.

There was a general discussion of the models, in which all present participated. A report concerning the models was read by Mr. Marceau. It was decided that the Thomas Jefferson Memorial Commission should submit its recommendations to the Commission of Fine Arts for advice concerning the models.

8. PORTRAIT OF FORMER PRECIDENT HOOVEP: The secretary reported that an estimate for an appropriation of \$2,500 had been submitted to the Eureau of the Budget and is now under consideration by that Bureau and that it is believed the amount will be made available in the next Deficiency Appropriation Bill. The secretary submitted a list of applicants, 21 in number, who wish to be considered for the appointment to raint the portrait. (Erhibit D)

The Commission discussed the subject. Mr. Savage said there are only two on the list that are nationally known portrait painters, namely, John C. Johansen and Mrs. Ellen Emmet Rand. Mr. Savage said he felt that any portrait rainter recommended to paint a portrait for the White House should be one who has received recognition as a portrait painter by his profession and who has been honored by his fellow painters.

The secretary reported that Lawrence Ritchie, who was secretary for former President Hoover, had informed him that Mr. Hoover has not cormitted himself to any one pairter and would gladly welcome the recommendation of the Cormission of Fine Arts in this matter.

The Commission decided that a letter be sent to Senator Barblev, Unahman of the Joint Committee on the Library, and a similar letter to Congressman Keller, stating that the Commission of Fine Arts would be glad to recommend an artist to paint the portrait of former President Ecover at a ch time

- 7 -

p. • A Constant of the second . . as request for such recommendation is received from the Joint Committee on the Library. (Exhibit E)

9. CANTON CHINA FOR THE WHITE HOUSE: The Chairman presented a letter received from Mrs. H. F. McFarland of Dallas, Texas, offering some Canton China for the White House.

After consideration, the secretary was requested to inform Mrs. McFarland that no legislation to provide for the purchase of the china has been enacted and that in the absence thereof the Commission of Fine Arts could not take any action in the matter. (Exhibit F)

10. WAR DEPAPTIENT BUILDING: The secretary reported that a few weeks age he was informed that the lowest bid received by the Federal Works Agency for the erection of the first unit of the War Department Builling was \$4,615,000 for marble and granite and \$4,303,000 for limestone and granite, making a difference of \$312,000. He also remorted that on February 23, 1940, the Federal Works Agency awarded a contract for the first unit of the war Department Building to the lowest bidder, John MoShain, Inc., of Failedelphia, for \$4,328,500 for a granite and limestone building.

The secretary cubmitted a letter from the Director of the declogical Survey on the merits of limestone. (Exhibit 6)

11. OSCAR CIPAUS HINTRIAL: Mr. Atto Eggers submitted a set of Humprinto of a revised design for the Oscar Straus fountain. The design showed that the fountain would be on a level with 14th Street and that no energytion would be required adjacent to the fountain. He sold it is proposed to place the fourtain on a permanent foundation. He sold also that the fountain hed been releasined so as to be in proper relation to the Great Place Flace Flace with an energied out would have a donth of about 3 foot. This is in accordance with an eggreement

- _ -

. . . . • c e t . . reached between Alfred Geiffert, Consulting Landscape Architect, and the supervising Architects Office, and Mr. Louis Simon, Supervising Architect of the Federal Works Agency.

The Chairman inspected the design and on his recommendation the Commission approved it. Steps leading down to the Great Plaza from 14th Street are to be to the north or south of the fountain area.

Mr. Eggers was requested to proceed with the project so that the funds made available by Congress for starting the foundations of the fountain would be obligated by June 30, 1940. (Exhibit 1)

12. DISTRICT GPOCERY COMPANY "APPROUSE, 4"T AND C STREETS, C. ".: Hr. E. Burton Comming, architect, submitted a design for the D. G. C. warehouse to be built at Fourth and C Streets, S. W., adjacent to the railroad tracks in square 493. The architect members inspected the design and considered it to be satisfactory. Mr. Corning said it is proposed to use a gray brick to ratch that of the Social Security and Railroad Retirement Duilding in that locality.

13. PAINTING BY WILLIAM E. NORTON: Under date of Telmsreld, 1940, the following letter was received from Hon. Nent E. Weller, Unimmar of the House Committee on the Library:

Tebrus pr 14, 1940.

Mr. H. P. Caerrerer, Secretary The Fine Arts Commission Jas'ington, D. C.

Ly dear Mr. Caemorer:

H. R. 272C now before this Committee provides for the purchase of two paintings by William E. Norton.

Inasnuch as Mr. Berr, who introduced it has asked for a report, the Committee would connectate your bringing this before the Commission of Fine Arts at its next meeting, and oddising the monthe altebility of such legislation.

> Very trily pours, birred) Test D. Waller, Chairmon

e . . e e , ------ · · · · · * .

The legislation is a follows:

H. R. 2720 In the douse of Representatives January 16, 1930

A E111

To authorize the nurchase of certain pictures by William 2. Norton

De it enacted by the Senate and House of Pepresentatives of the United States of America in Congress assembled, That the Indiffect of the Capitol be, and he is hereby, a thorized to nurchase from Gertrude and Florence Horton two maintings by William E. Forton, "Night Attack of General Armstrong off Pico Azores" and "Hussel Gatherers, Coast of Normandy, France", which are now in the Dational Collection of Fine Arts, Smithsonian Institution, for a price of 1,500, and the sum of 10,500 is hereby a thorized to be a proprieted therefor.

The Commission inspected the two maintin a above mentioned in the National

issen on Saturday afternoon. The matter was referred to Ir. Done e for report.

(Ixlibit I)

The Commission concurred in the report by Mr. Servic and a latter was sent

to Congressman Heller.

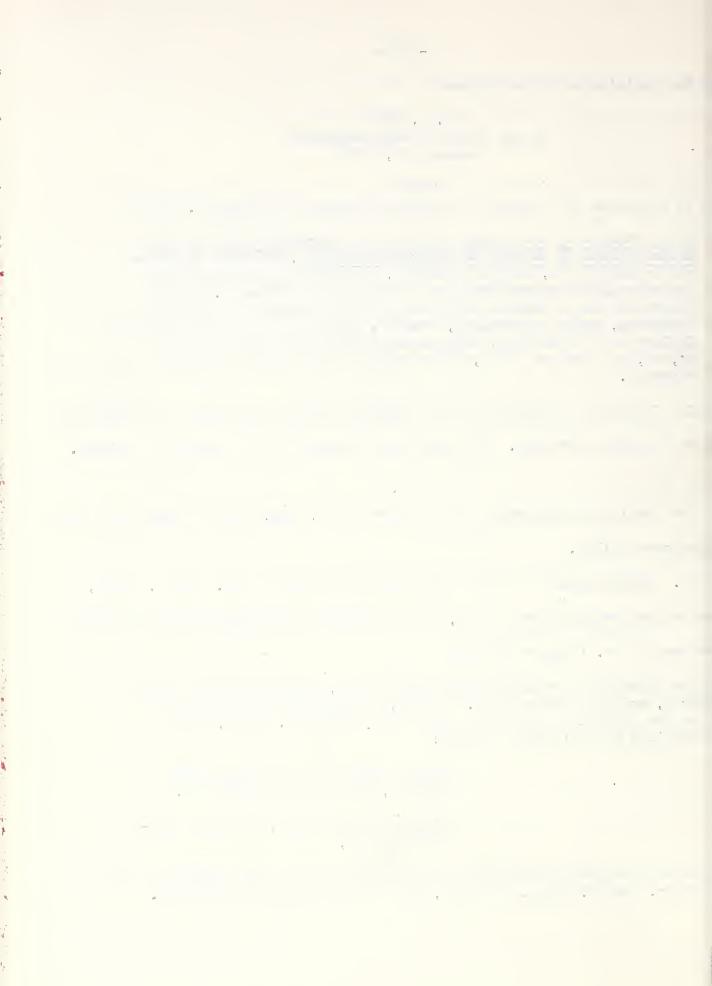

14. FREER GALLERY OF APT: The Commission called of Nr. John G. Lodge, Curator of the Freer Gallery of Art, and inspected and approved objects proposed for purchase by Mr. Lodge as follows:

Le Regents of the Smithsonial Institution, The Courission of Sine Arts, and Mics Mathanine N. Shoades, o provided in Dangrage 4 of the codicil to the Will of the late Cherles J. Prer, hore examined the following objects:

> l promos dass of the time bu, shing dimestry, 19th-19th cent mile. 1.

C Fieces of metal wird, Lergion, lith-17th continue,

Thich have been recommended for numbers for the inport client of int in Ir. John B. Lodge, Director, and here's apprend the mindluse.

For the Regents of the .mithsonian INSTITUTION.

For the Commission of Fire Arts.

Feoruar: 20-h, 1940.

Katharine T. Rhoades.

15. OVERPASE BRIDGE TO THE NEW AIRPORT: The National Park Service submitted a design for a bridge to cross the Mt. Vernon Sighway as an additional approach to the National Airport from U. S. No. 1.

The Chairman brought up the question as to whether or not the National Copital Fack and Planning Commission had approved an exact location of this approach to the airport. Mr. John Nolen, Director of Planning of the National Capital Park and Planning Commission, was present and stated that his Commission had agreed to the location in principle but that the matter had not been finally facided. The proposed bridge is to assure an all-year approach to the Airport. The tridge would be at an elevation of 52.25 feet.

The Commission decided to take no action with reference to the design for the tridge until the question of location for it had been finally decided.

16. PLANTING PLAN FOR TYOMAS CIRCLE: The Notional Park Service submitted a planting plan for Thomas Circle, lesigned to meet changed conditions due to the Massachusette Avenue underpass. Mr. Clarks inspected the feeign and upon his recommendation the Commission approved it. (Echilit J)

17. LANDECAPE PLANE FOR C. AND C. CANAL TURCUGU (FOREPTCAN: The National Park Service submitted landscape plant for treatment of the area adjacent to the Chesapeake and Ohio Canal through Georgetown. The Commission inspected the designs with interest and approved them. (Dublikit N)

p . 9 - · · · · · · · · P () · · · · · . 13. SPANISH-AMERICAN WAR MELORIAL: The National Part Service submitted a landscape plan received from Mr. A. D. Taylor, landscape architect, and plans for the momorial building, designed by Mr. Leo Elliott, architect, for the Opanish-American Memorial at Tampa, Florida.

Mr. Taylor discussed the treatment of the entrance with the Commission where he had indicated a gatehouse. The Commission felt that simply a jateway in the old Spanish mission style should be sufficient. The Commission also felt a pool at the cross axis of the mall was not necessary. In general the Commission considered the landscape plan to be satisficatory and approprie it.

Hr. Elliott submitted drawings for the memorial building, drawn to conform to scheme No. 1, without colonnade, that had been favored by the Commission at the January meeting.

The architect members gave the design particular attention and a number of changes in matters of detail were suggested. These are to be given particular consideration sometime lator. In the meantime the design was given preliminary approval with the understanding that before working drawings are made, the design would be resubmitted to the Commission for recommendations. A report was cent to the National Park Service accordingly. (Exhibit I)

The Commission adjourned at 5:15 p. m.

- 12 -

Y n

February 21, 1940.

Dear Mr. Wyeth:

The Commission of Fine Arts, at their meeting on Tebruary 24, 1940, considered the models you submitted for conjuture on chee' blocks of the Funicipal Center Eucliding.

The Convission approve the nodel by Ir. John Fregury. The Convission suggest leaving off the car at the top of the model. Also, a simple inscription or sculptural motive would see desirable for the end of the check block.

The Commission would like to have Mr. Lawrie rest dy his odel for motivation, as well as for commosition, is as to bring it into harmony with Mr. Bregory's model.

For the Commission of Time offer

Sincerely yours, (Signed) Gilwore R. Clarke, Maimes.,

I'r. Fethan ~. yeth, I'micipal Architect, District Puilding, Vashington, . C.

TTILIT

.

eurlary 27, 1.4.

Tear Sirs:

The Commission of Fine Arts, at their meeting on Telemary 24, 1940, considered the design you submitted for a "Herquise" at the entrance to the Union Station.

The Corrission disapprove the design and also the scheme to place such a structure in front of the Union Station. It is a long and wide of trusive structure that would deface the facale if the station, which is one of the most monumental buildings of its hind in the country. The "shelter" would create a service entrance at the main entrance to the building.

For the Corrission of Time rts:

Yours very truly, (Signed) Gilmons T. Clarke,

Chiman.

February 24, 1:40.

My dear Mr. Bailey:

I have received year letter of February 13, with its enclosure, requesting the advice of the for ission of Fire Arts in the matter of the proposed sale of Reservation 10 at Third Street and Constitution Avenue, N. W.

In repl. I would call attention to femate Bill No. 605, under which it was proposed to build the Pational Auditorium on this reservation. The Commission have officially recommended Reservation 10 for the National Auditorium and would not favor its sale unless an agreement is reached to that officially motion favor its sale unless an agreement Senate Committee on Public fulldings and Grounds, sponsoring the bill. Also in view of the fact that the reservation is so near to the United States Capitol Ruilding, it would be understood that if the reservation should be sold it would be required that a noncentel structure re erected on it and that the design be subject to the agricult of the Commission of The Arts. Any building erenter in the the restriction should be in keeping with the monumental public willings in the vicinity of Reservation 10.

For the Commission of rise Arts:

"ery truly yours, (Signed) Gilmore D. Clurke, Chairman,

Mon. F. J. Bailey, Assistant Director of Coordination, Pureau of the Budget, Weshington, D. C.

UNITED STATES DEPARTMENT OF THE INTERIOR

GEOLOGICAL SURVEY

WASHINGTON

1 EB - 6 1340

1 7 311

Mr. H. P. Caemmerer, Secretary, The Commission of Fine Arts, Interior Department Building, Washington, D. C.

Dear Mr. Caemmerer:

In reply to your letter of January 24:

The durability of limestone, like any other variety of building stone, is dependent upon several factors, and in the case of limestone some of the more important factors are purity, presence of argillaceous beds or partings, degree and character of porosity (and consecuent resistance to frost action), seasoning, et al. Like any other building stone, one variety may be very durable and another variety quite otherwise. It is often stated that water containing carbon dioxide obtained from the atmosphere will rapidly dissolve and weaken limestone. Loughlin (Bulletin 811-C, Indiana colitic limestone, relation of its natural features to its commercial grading, 1930, obtainable from the Superintendent of Documents, this city, for 30 cents) has cited experiments that show "that carbon dioxide gas, even in very humid atmospheres, has no corrosive effect on limestone but that carbon dioxide in water exerts a slow solvent action, and that rain water containing carbon dioxide but no other acid radicle and falling at the rate of 40 inches per year (the rate for the District of Columbia) would require 450 years to corrode the surface of the stone to an average depth of 2/5 of an inch." Of course strong acid funes would rapidly affect limestone, but such conditions are special and local and pertain chiefly to industrial centers. Marble would react similarly to limestone insofar as atmospheric corrosion is concerned, since it is essentially a mure carbonate rock derived by the recrystallization of limestone, but its greater compactness and much lower overage porosity (usually less than 0.5 percent), tend to increase its relative durability in this respect. Granites, for comparison, have about the same porosity and type of crystallinity as marbles, but the minerals composing a good grade granite are much less soluble in ordinary waters of atmospheric origin and hence the rock is more stable in this respect than either marble or limestone. It is probably for this reason, in part, that limestones are compared unfavorably with granites by some people. Nevertheless, the data quoted above show that limestones of good quality are sufficiently stable to meet requirements as thoroughly satisfactory building stone, so far as chemical durability is concerned.

Durability of stone is often judged in part also by its crushing strength. For Indiana colitic limestone Loughlin quotes Bureau

3

.

Mr. H. P. Caemmerer

of Standards tests ranging from 3,700 pounds to 15,700 pounds per square inch, with the most common range from 5,200 to 9,100 (all figures approximate). For purposes of comparison, marbles show a somewhat higher average --- Dale quotes figures on certain Rutland, Vt. and Lee, Mass. marbles that range from 9,100 to 18,047. Statistics on a large number of commercial granites compiled in the Survey office give a range from 13,100 to 39,800. But inasmuch as a stone block at the base of Wasnington Honument, for example, needs to sustain a load of much less than 700 pounds per scuare inch, it is evident that good limestone in buildings would not be subjected to undue strain from load, and will be able to withstand ordinarily imposed stresses with a very large factor of safety. Considering further, that with present day methods of construction, the load is supported largely by a steel frame work, it is seen that crushing strength is less important to consider than formerly, except insofar as this quality may be significant with regard to other qualities of the stone, such as porosity, weak planes of parting, etc.

Other features of limestone might also be discussed similarly, but in summation it seems sufficient to remark that under ordinary conditions of use, at least, the blanket statement that "limestone in public buildings does not last longer than 40 years" is untrue, even without considering the demonstrable fact that limestone buildings constructed very much longer ago than 1900 are still in constant use and satisfactory general condition.

Very truly yours,

wennedula

Director.

V C C Y

Marc. 9, 1:40,

Dear IIr. Simon:

The Commission of Fine Arts, at their meeting on February 24, 1940, a proved the revised architectural scheme, providing pedestels for two sculptural groups not get designed, submitted by Mr. Otto Eggers, representing Eggers a Higgins, Architects for the Oscar Straus Memorial Fountein.

It is understood that the elevation of the centrel turi ranel in the Great Plaza will be approximately three feet below the level of the walk surrounding the lasin of the Memorial Fountein. The Commission recommended to Mr. Eggers that the walks perfering the centrel turi manel be extended straight to 14th Street north and south of the fountain area, thus leaving the Memorial area area of through perfectminent to file.

The Commission have that the work of erecting the fourthan will be under way before the end of this discal year.

Sincerel: yours, (Signod) Gilmore 3. Slame, Chairme..

Ton, Louis A. Simon, Supermising Architect, Leforal Works Agency, Machington, L. C.

THI THE

c 2

Loron 15, 1940.

hy dear Congressmar Keller:

In accordance with your letter of terminry lett, the Cormission of Fine Arts, at their reating on February 24, 1940, considered H. R. 2720 to a charize the nurchuse of certain pictures, "Night Attack of the General Armstrong off Pico Azores" and "Mussel Latherers, Joest of Normandy, Irance" by William E. Norton.

The commission brought the matter to the particular attetion of Mr. Eugere Savage, mainter member of the commission, and inspected these two maintings at the Mational Luserm on february "4th.

Similar requests of late have brought to the attention of the Commission of Fine into many works of art, particularly portraits of the highest artistic and historical importance to the American people and the Commission have not besitated to stress the urgency and importance of governmental ecculsition of such maintings but without success to date.

The Corrission do not feel that the paintings in question by Mr. Norton come within this category and therefore repret that they cannot recommend their nurchase.

for the Com ission of Fine Arts:

Sincerely yours, (Signed) Gilmore D. Clarke, Clairmar.

hon. Zent F. Heller, Chairman, Committee on the Library, House of Representatives, Washington, J. C.

My dear Ir. Commerer:

The Commission of Fine Arts, at their meeting on Tebruary 24, 1940, opproted the landscape glan, supmitted by Mr. A. D. Taylor, Landscape Architect, for the Spacish-American War Discortel.

Also the Condission gave preliminary approval to a design submitted by Mr. Leo Elliott, Architect, of Tompa, Florida, for a Spanis - American Memorial Duilding. This approval was given with the inderstanding that the design would be resubditted to the formission for the consideration of matters in fotail before the working frawings are made.

For the Consission of Time Laws:

Sincerely yours, (Signed) uilcore), Clarke, Chairman,

Ton. 4. E. Gammerer, Director, National Park Service, Interior Depurtment, Washington, D. C.
